PARKER MASSON, IS MISSING.

Has Not Been Seen Since Half Past Seven Monday Morning.

RIVER DRAGGED

No Clue to the Little Fellow's Whereabouts.—He is six Years old

Parker, the bright little son of Mr. and Mrs. Frank Mason, aged six years and two months, left his home in usual good health about 7.30 Monday morning. He did not return at noon, and when he did not come home during the afternoon his parents became alarmed. Search was made for him at the gypsy camp and on the steamer lying at Sinclair's wharf, but without success. About 10 p. m. parties began to drag the river off the public wharf and elsewhere, and have continued doing so but up to time of going to press the little fellow has not been found. It is hoped the boy was not drowned. Much sympathy is felt for the family of the absent one.

The Scott Act Was Sustained

Fredricton Upholds Its Thirty-Year Record by Great Majority

FREDERICTON, Thursday.—The Scott Act was sustained here today by a majority of 178. Though it was expected this morning that liquor license would be defeated the majority in favor of the act was larger than anticipated. An exceptionally large vote was polled and resulted as follows:—Court House for Act, 278; against 348; Opera House, for 487; against 237. Majority for act 178.

GOVERNMENT AND OPPOSITION AGREED

Both Will do Utmost to Protect Game and Fish of the Province.

FREDERICTON, Friday.—A Kelly Evans, of Toronto, secretary of the Ontario Fish and Game Protective Association, spoke to a large audience in the Assembly Chamber of the parliament buildings this evening on fish and game protection. Governor Tweedie was chairman, and many members of the legislature including Hazen, LaBilloy and Grimmer were among those present. Evans made capital address of an hour's duration and urged the government to give them every protection. He also urged that steps be taken to prevent depletion of lumber lands. He strongly advocated establishment of trout hatcheries so that streams and lakes of the province can be restored. Mr. Hazen in moving a vote of thanks spoke of the good work the Legislature had already done to protect game and fish and promised greater efforts along that line in future. He moved the vote of thanks. LaBilloy in seconding the motion stated that he had the honor to represent a county as rich in natural resources as any in the province. He promised hearty support of the opposition to any move toward fish, game and forest protection.

IN THE HOUSE OF ASSEMBLY

New Highway Measure and Many Other Important Bills Introduced by Government

McKEOWN'S SPEECH

Former Management of Central Railway Severely Criticized by Hon. Mr. Fleming

After the address in reply to the speech from the throne was moved by Dr. J. P. McLaerney and seconded by F. M. Sprout, Premier Hazen introduced a Highway Bill, some returns were presented, and the House adjourned.

On May 1st, Mr. Robinson spoke on the address, followed by Mr. Hazen.

D. P. MacLachlan presented a petition from the trustees of St. Andrew's Presbyterian church at Chatham, asking for power to sell a certain property.

On the 4th instant, the House met at 3 o'clock. Hon. Mr. Hazen introduced a bill to legalize certain marriages, a bill to amend the probate court act, a bill to amend the succession duties act, and a bill to correct an error in the valuation of county of Sunbury.

Hon. Mr. Fleming presented report of Hotel Dies, Tracadie, and the report of the provincial board of health.

Other reports were from crown lands department and agricultural departments.

Notice of enquiry was given concerning the highways for county of Beauséjour by Mr. LaBilloy, concerning money to the credit of municipality of Gloucester, by Mr. Byrne, and other reports and petitions were presented.

Hon. Mr. McKewen resumed the debate on address and criticized much that had been said in the former debates. He claimed much of present good standing of this province due to Messrs. Blair, Emmerson and Pugsley, whom he said had been unjustly criticized. He proceeded to defend the St. John cold storage plant transaction and claimed the late government had done a worthy act in proposing an increased bond guarantee to the promoters. Referring to the highway act he twitted the present government with putting the control of highways into the department of the Attorney-General and claimed the money voted for road purposes would be severely taxed to pay the salary of the many officials created by the new act. He was very optimistic concerning future of Central Railway and advocated full inquiry into affairs of road. As to school book question he suggested a comparative statement of prices of books in different provinces be prepared by the education department. He hoped the new government would make good their promises.

Hon. Mr. Fleming spoke briefly in reply and intimated the governments first guarantee of \$60,000 to St. John cold storage company should have been ample. He contended the new highway act did not apply to roads in the hands of the people in fact as near to them as possible and explained the government had appointed a man on the highway board in order to complete a competent board and to avoid divided authority of expenditure. He also severely criticized former management of Central Railway; and in regard to the school book question stated that so early in their tenure of office the government had little to give out but was taking up matter and hoped to accomplish results soon.

House resumed at 8 o'clock and adjourned immediately on account of sudden death of Deputy Surveyor General Flewelling.

CIRCUIT COURT IN SESSION

An Unsavory Incest Case Upon The Criminal Docket

ONE CIVIL SUIT

Former Teacher Sues Trustees for Term's Salary, Alleging Breach of Contract

Circuit court opened here to-day Judge Gregory presiding.

Naturalization papers of Jephson Lahay of Chatham were filed.

The Grand Jury found true bill against John Cable of Napan charged by his daughter with incest. T. W. Butler was assigned to defend prisoner.

There was one civil case; Mason R. Benn vs. Douglstown School Trustees Plaintiff charged breach of contract. It appears that Mr. Benn was engaged as teacher in 1894, and when the statute was changed making the school year end in June, there was no change in this contract, which made under old law, said that notice of termination must be given in November. In May 1904 the trustees gave notice of termination of contract. Plaintiff claims they could not legally do so before Nov. 1904. Hence the suit, which is to recover salary for term ending Dec. 31, 1904, including gov't grant—about \$370 in all. H. W. Robertson for plaintiff; Tweedie & Haviland and M. G. Teed for defendant.

The criminal case was postponed until this morning.

The civil suit was settled by the parties out of court.

STRANGE TEST WORKED WELL

Dead Body Said to Have Been Located Through Actions of Loaf of Bread

OTTAWA, Wednesday.—A story from Carleton Place, published here today states that on Friday last the old mystery of locating a body which had been drowned by floating a loaf of bread on the water was strangely exemplified. It appears that an unsuccessful search had been conducted for some time for the body of Lorne Thomas, a young boy who was drowned in the river there on Thursday last. On Friday afternoon a thirteen-year-old girl named Alice Wood, who had lost a sister by drowning a year ago, and had heard of this method of locating a body, brought a loaf of bread to the men who were grappling for the body and told them to cast the bread on the water and follow it until it stopped. This they did. The loaf of bread floated down stream while the girl knelt on the shore and prayed for success. After going 200 yards the loaf circled six times and then sank.

The body was found exactly underneath the spot where the loaf stopped, and was at once brought to the surface. The story apparently is well authenticated, and the mystery is the talk of the town.

QUEBEC ELECTION LIKELY IN JUNE

MONTREAL, Wednesday.—There appears to be little foundation in the story that the Quebec elections are not take place before the autumn.

Hon. Lomer Gouin and a good many of his supporters returned from Quebec yesterday and the general impression still prevails that election day has already been decided upon and that by the tenth of June polling day will be a thing of the past.

The statement to the effect that Hon. Adelard Turgeon will retire immediately from the ministry, is also incorrect, although it is quite probable that Mr. Turgeon will be appointed to the Canadian Senate if he is again returned to power, with his colleagues. It may be accepted as certain that he does not go out just now.

The government, as it is constituted will go to the country but a reconstruction will follow closely after.

PROMINENT MAN COMMITS SUICIDE

Deputy Surveyor-General Flewelling Shoots Himself Through The Head.

FOUND AFTER 3 HOURS

Motive; for Rash Act Unknown Left Letter for Premier Hazen

W. P. Flewelling, deputy-surveyor-general of New Brunswick for the last fourteen years, and for twenty-five years before that an official of the same department, committed suicide by shooting himself, Monday afternoon. His body was found in the basement of the Departmental buildings. A revolver was clasped in his right hand, and he was shot through the heart. No motive is known for his deed.

That afternoon Mr. Flewelling wrote two letters—one to his wife, and one to Premier Hazen—and then shot himself. When his body was found he had been dead three hours.

The letter to Mrs. Flewelling is understood to contain no reference to the reasons for suicide. Mr. Hazen refused to discuss the contents of the one handed him Monday evening. Deceased was a son of late Hon. W. P. Flewelling of Clifton, Kings Co. He was in his 58th year. No children survive.

E. A. McCurdy, delegate from the Newcastle Board of Trade went to Ottawa Monday night to join Mayor Miller and the Chatham delegates who will interview the Government re exhibition grant.

Of the lately organized Newcastle Bible Society the Treasurer elected was Mrs. S. McLeod, not Mrs. H. Leard as reported.

BASE BALL TEAMS. On Monday, the Hobos and Tail Twisters, base ball clubs, who cultivated athletic society last summer through their interesting games were reorganized, and promise to eclipse all records during the coming season. A challenge from the Hobos appears elsewhere in this issue. Each day members of the rival teams may be seen practicing at any time of the day when business is slack, and are seemingly full of enthusiasm. The Hobos (dry goods clerks) have the following members:—John Lingley, 2nd; Ray Morrison, 1st; Eddie Wiseman, pitcher; Clair McCabe, 1st base; Don Creighton, catcher; Jas. McMurray, left field; Jack Morrissey, short stop; Fred Locke, third base; Bert Stewart, centre field.

The Tail Twisters (bank clerks) include Jack McKendry, Garfield Troy, Woodside Duran, James McCabe, Arthur Desbrisay, James Wood, Melvin Allison and Messrs. Barton and Williston.

C. N. R. Comes to Terms With Men

C. P. R. Still Holds Out, and Conciliation Board Will be Applied to.

WINNIPEG, Thursday.—The trouble between the Canadian Northern Railway mechanics and the company has come to a satisfactory conclusion and with that company there will be no further trouble. Each side made concessions which will be made public today. One thing that has been altered is the working time, and men are benefitting by this change.

Mr. A. M. Nanton has been nominated by the Canadian Pacific Railway Company to represent them in the board of conciliation which will deal with the dispute between the company and their men. The workmen nominated Mr. Somerville, of Toronto some days ago as their representative. It now remains for the labor department to appoint the third arbitrator.

CHILD SHOT BY BROTHER.

Gun Left Where Children Could get it and Usual Result Followed.

SACKVILLE, Wednesday. — News has come here of heart sickening tragedy at Upper Rockport this afternoon whereby the three-year-old daughter of Frank Tower had top of head blown off through the discharge of a gun in the hands of her six-year-old brother. Details are lacking but it is understood that in the absence of parents the boy took the gun from its place and in some way discharged it, the charge striking his baby sister. The whole top of the little girl's skull was blown off and death was instantaneous. Coroner J. M. Baird will inquire into the accident.

TO INVESTIGATE RE HODGINS.

OTTAWA, Wednesday. — The special committee appointed to investigate the charges made by Major A. E. Hodgins in reference to the carrying out of its contracts on section F of the National Transcontinental met this morning and elected Mr Victor Geoffrion, M. P. for Vercheres, as chairman. It was decided to meet again on Friday, May 8th and to summon Major Hodgins to appear on that date. The committee will ask for permission to sit while the House is in session.

I. C. R. EMPLOYEES' RELIEF AND INSURANCE SOCIETY
MONCTON, Ap. 29 — Secretary Faver of the I. C. The deaths were Logan Hunter and David McKensie, Truro, and William Pickering, Halifax, \$250 each, and Isaac G. Stevens, St. John, \$500. \$1000 total disability claims were paid to Joseph Gagnon and F. M. L. Tweedie, River du Loup. In addition to the deaths above reported, Robert Lamkie, killed in Derby Junction wreck, was a member of an employe's relief and insurance fund. Fees and levies for the month are, Class A, \$2, Class B, \$1.20, Class C, 80 cents.

PAIN

Pain in the head—pain anywhere, has its cause in congestion, pain is blood pressure—nothing else usually. At least so says Dr. Shoop and he says he has created a little pink tablet. That little pink tablet, Dr. Shoop's Headache Tablets—relieves blood pressure away from pain centers. Its effect is charming, pleasantly delightful, healthy, though mild, it gently equalizes the blood circulation.

If you have a headache, it's blood pressure. It's a painful period with women, same cause. If you are sleepless, restless, nervous, it's blood pressure. That surely is a remedy, for Dr. Shoop's Headache Tablets stop it in 10 minutes, and the tablets simply distribute the congested blood pressure.

Brings your eyes, and doesn't get red, and swell, and pain your? Of course it does, it's congestion, blood pressure. You'll find it where pain centers are, it's a remedy, it's a remedy, it's a remedy. We sell it in 25c and 50c bottles, and cheerfully recommend

SHOT MAN INSTEAD OF HAWK.

Sportsman Seeking Health by Hunting Lost His Own Life by Accident.

CHARLOTTETOWN, Wednesday. — On Monday evening a fatal shooting accident occurred at Alexandra, ten miles from Charlottetown, the victim being John Winslow, aged 18. He and his cousin, Arthur Wood, aged 19, were gunning. The latter saw a hawk and rushed for the gun. On coming out of the building the weapon was accidentally discharged and the load of small shot struck Winslow who was a few yards away, in the abdomen. He died a few hours later. Winslow belonged to Boston and was visiting the island for his health.

SMALL BANK HAS TO SUSPEND.

MONTREAL, Wednesday. — The Bank of St. Johns, Quebec, is going into voluntary liquidation. The paid up capital was \$316,000, and the deposits were \$351,000. Therefore the bank was not in a position to compete successfully with institutions having millions at their disposal. It is stated that the notes of the bank are secured under the banking act. According to the latest official return the bank had a surplus of \$353,000 over its liabilities. It is certain that there will be a balance for the shareholders.

Doukhobors Coming East

Two Doukhobors at Fort William are likely to leave on the continuation of their pilgrimage towards the East in search of the Promised Land any day now. In their house in May street they are getting uneasy and are acting in a manner which leads to the belief that they are preparing travelling outfits. In fact they have told the police that they intend to start East shortly. The Doukhobors last year tramped thousands of miles or more from Yorkton, Saskatchewan, through Winnipeg, and Kenora, and only stopped at Fort William because the winter overtook them there. Fort William was the only stopping place during the cold weather period, and the coming of warm weather has apparently induced them to do as they promised last autumn, that is, to go on to Montreal, when the spring came.

Muskrats Plentiful

KEENE, Ontario.—The catch of muskrats in Keene marshes, and in fact, in all the marshes along the shores of Rice Lake, has been exceptionally large this year and with the prices higher than ever before this should prove a banner year. Two of the Indian families at the Elbow are living in tents, while the third family have ingeniously constructed a paper house, using a wooden framework, covered with building paper, leaving the seams covered with basswood bark. They claim that it is much better than a tent, and just as much waterproof. The house was constructed at a cost, exclusive of labor of half a dollar and the proprietor claims it is just as warm and comfortable as the ordinary summer cottage.

FROZEN UP FOR FIFTY-SEVEN YEARS

Ship That Sailed to Find Sir John Franklin is Rediscovered

WILL BE TAKEN HOME

She is the Rip Van Winkle of the Seas Entirely out of Date.

A story of the greatest interest is told by the London Telegraph concerning the reappearance of the long-lost H. M. S. Investigator. In the autumn of 1851 her Majesty's ship Investigator was frozen in the ice in The Bay of God's Mercy in the far north, while endeavoring to find traces of Sir John Franklin and his courageous companions, says the Telegraph. 'Now all the memories of those anxious, heroic times have been once more revived by the report that whalers have found the abandoned ship, and hope it may be possible to free her from the ice-grip after the lapse of fifty-six years. Our New York correspondent has suggested that the old man-of-war may even be sufficiently sound to be navigated across the Atlantic to her old home country.

'Packed away in the frozen north, she has been practically in a refrigerator, maintaining her youth and the stout heart of her venerable timbers, while in less frigid zones the world has been getting older and older, sails have been replaced by steel; the old salt of Captain Murrat's novels has had to make way for the modern sailor mechanic. In the lore of the sea everything has changed since her Majesty's ship Investigator began her long rest in the ice. If she is really rescued she will be the Rip Van Winkle of the world's fleets. She will need to be refitted of course, at some Canadian or other British port on her way, and then under sail, with the White Ensign and the Union Jack battling with the breeze, she should make her furrow once more across the water to her long lost home.

'Practically all who sailed in her have gone, though Admiral Sir Vesey Hamilton, who was the mate of the companion ship Assistance is still alive to tell the story of the struggle with the elements over fifty years ago. The Investigator was commanded by one of the heroes of Arctic exploration—the late Vice-Admiral Sir Robert John Le Mesurier McClure who was born at Wexford fifteen months after the battle of Trafalgar. 'In 1848 he was offered and accepted an appointment as first lieutenant in Her Majesty's ship Investigator—the Rip Van Winkle of the British fleet. She had been purchased from the merchant service and was about to leave England to make the first of many efforts to pierce the veil which hid from the world's view all traces of Sir John Franklin and his companions England at the moment was in a fever of nervous excitement; all eyes were on the pathetic but courageous figure of Lady Franklin, hoping against hope and prepared to risk her all on the faint chance of rescuing her husband and his daring party from death or at least finding some traces of them. Sir James Clark Ross was the captain of her Majesty's ship Investigator. This officer, his first lieutenant and Admiral Sir Leopold McClintock one of the most daring assistants, have all passed away. The Investigator in company with the Enterprise, went out by way of Lancaster Sound and wintered at Leopold Island near the northeast point of North Devon. The two ships made a fruitless search and in the following year came back.

'By this time the Government and the whole nation were in a condition of reckless determination to solve the mystery; it had to be solved. Plans for a renewed effort were immediately settled. Captain Collinson was given the command with the Enterprise as the senior officer's ship and McClure who had shown himself well fitted for the post by his resourcefulness and energy, was given the command of the companion vessel, the old Investigator. The expedition also included the Assistance, in which Admiral Hamilton served, and the Resolute; but the latter ships had a more or less independent commission, under Captain Austin; they were to search the Barrow Strait. Our concern is with McClure and the Investigator and Enterprise. The vessels sailed from Plymouth on January 26, 1850, and since that eventful day no one in England has cast eyes on the former little man-of-war—she is only of 600 or 600 tons displacement.

Ultimately the Investigator was forced into wharf, proved to be half a century's banishment in an inlet on the northern shore of Banks Land. McClure had been so sufficed about that he accepted his fate with some amount of satisfaction because his might have been worse. In the feeling of relief he named the bay the 'Bay of St. John's Mercy' and there the Investigator has lain absolutely frozen up, undergoing a process of refrigeration for upward of half a century. From September, 1853 until the following summer the frozen up ship was McClure's headquarters. At last the situation began to assume a grave aspect. Food was running short and

CELEBRATED KERRY AGAIN HEARD OF.

Will Hunt Seals and Whales and Search for Guano in the Far South.

The passion for exploration and adventure is once more demonstrated in the latest undertaking just explained by the publication of the prospectus of the South Atlantic Trading Company, Ltd. which has been formed for gathering guano from Inaccessible Island, Nightingale Island and Gough Island, which are all within hailing distance of the lonely Isle of Tristan de Cunha. In the intervals of guano gathering the company will hunt for seals and whales. The company has been formed to acquire an exclusive license granted by His Majesty King Edward VII. to Thomas Caradoc Kerry, to take over that galleon, commander's yacht the Pandora. Both Mr. Kerry and the trim Pandora are known to fame, for their story has been told in the prose atmosphere of our English courts of law—adding to the gaiety of nations thereby. In 1806 Mr. Kerry was charged at the Old Bailey with the extraordinary crime of stealing bibles, hymn books, etc. from his own yacht the Pandora. Tristan de Cunha is one of the loneliest and most inaccessible of our islands in the South Atlantic and once or twice a year its inhabitants receive a call from a British steamer sometimes a warship, with mails and provisions from faraway civilization. Three years ago Mr. Kerry arranged with the Colonial office to take out in his yacht any parcels that might be sent out to Tristan's lonely natives. This fact was duly advertised. With the result that large boxes and cases of bibles, hymn books, clothes and some delicacies were sent to the Pandora. Upon Mr. Kerry's return to England he was charged with stealing many of these articles, and the allegation against him was that he had some of the cases broken open and fumbled overboard. The case was carried to the Old Bailey, and with Mr. Kerry as the central figure it proved a lively and entertaining trial, in the end of which Mr. Kerry triumphed, and was discharged. Mr. Kerry has had an adventurous career. He has had many a hand to hand encounter with savages, and once took his place in a queue of whites who were waiting to be eaten by cannibals. Kerry, however managed to escape. Hemmed in by war canoes, he and four other explorers ran the gauntlet successfully of a raging tornado of naked savages. Reaching the coast a sailor named Scott went off in search of help. He never returned. Seven years later Mr. Kerry then a member of the Royal Geographical Society's expedition to the same island came upon a skeleton. By the skeleton lay a knife, and on the knife was the name 'T. C. Kerry.' It was Scott's skeleton and the knife was one that Kerry had lent him years before. The Pandora—now sacrificed to the god Guano—has had almost as eventful a history as her owner. She was originally a British gunboat, and as the steamship Newport represented the British government at the opening of the Suez Canal. Then she was engaged in Polar explorations. Later Mr. Coats, of Paisley turned her into a yacht, painted her cream, and sold her to Mr. Kerry for \$20,000.

The crew were suffering from illness. There was no prospect of relief. McClure at length decided that he had no course but to abandon the little vessel to her fate and seek safety for himself and his companions. If such were to be found anywhere in these alien' wilds.

He had come to this determination when Lieutenant Bedford Pim appeared on the scene by chance. He had come across from the Resolute which by this time had got to Melville Sound. McClure found all his doubts come to life once more. His hopes were centred on waiting to save the Investigator, and he thought of getting stores from the Resolute and seeing the incident out to a finish. Before coming to a final decision, he went across the Resolute where he conferred with Captain Kellett. By this time the illness among his men had increased, and he had no alternative but to leave the Investigator to her fate and convey his men across the ice to the Resolute.

Thus it came about that the Investigator was left in the ice pack, while her captain and crew took passage in the Resolute. They were, afterwards transferred to the North Pole and reached England on September 28, 1854, after an absence of four years and eight months. It was an eventful voyage and now the home-coming of the Investigator after half a century will prove an appropriate sequel to the discovery of the North Pole.

"Sunshine" Furnace

Where Shaking is Respectable

A Draft of furnace flame, with no other assistance, is powerful to overcome the dust nuisance in shaking times. Only Sunshine dust rises of itself above the fire. Great bulk descends into ash-pit, and unless legitimate outlet is thereby provided, dust will escape through ash-door slots and into operator's face.

In "Sunshine" Furnace the legitimate dust outlet is provided. It's a great big dust-pipe running straight from ash-pit to dome, thence to chimney. When big pipe damper is opened, all dust in ash-pit ascends to dome, then, when direct drafts are opened, all dust passes up chimney.

Always the clean and quick dust route in "Sunshine" Furnace—old grate, to pan, to dust-pipe, to dome, to chimney, to open air.

POLITICAL NOTES

In 1896 the last year of the Conservative government the total trade of Canada amounted to \$82,154,440.

Over 280,000 acres of land have been sold this spring in Manitoba. Of this 100,000 acres are in the Farming home district and will be settled by immigrants from Illinois, Iowa, and Nebraska.

The increase of trade during the Tory and Liberal reigns is very striking. For the last eleven years of Conservative rule trade increased by \$50,000,000, and during the eleven years of Liberal rule it has increased by \$360,000,000.

In the last eleven years of the Tory regime \$80,000,000 was spent on Capital account, of this amount the Tories had to borrow \$62,000,000 and charge it up to the debt.

CHILDREN KILLED IN MILL WHEEL

HALIFAX, Friday.—The report of a terrible tragedy comes from West La. Have Ferry, by which two little daughters of Henry Renette, aged nine and eleven years, lost their lives while on their way to gather Mayflowers. There is a saw mill in the vicinity and the children were in the habit of taking a short cut under the wheel when the mill was idle to shorten the distance. On this occasion their father warned them not to go in that direction as the mill was to be set going that afternoon. The children did not heed the warning. Seeing the mill was not running, they thought they were safe and when they were half way through, the wheel started and whirled them around, mangling the children dreadfully. The children did not stop the machinery and to their horror found the poor little ones dead, one injured so badly as to be beyond recognition. Much sympathy is felt for the parents as they had but these two children.

Members of a religious sect known as the "Dreamers" have been arrested near Medicine Hat accused of having burned the house of a farmer who refused to be converted. This world is no place for dreamers of such dreams.

Tired nerves, with that "no ambition" feeling that is commonly felt in spring, early summer, can be easily and quickly altered by taking what is known to druggists everywhere as Dr. Shoop's Restorative. One will absolutely note a changed feeling within 48 hours after beginning to take the Restorative. The bowels get sluggish in the winter-time, the circulation slows up, the Kidneys are inactive, and even the Heart in many cases grows decidedly weaker. Dr. Shoop's Restorative is recognized everywhere as a genuine tonic to these vital organs. It builds up and strengthens the worn-out weakened nerves; it sharpens the falling appetite, and universally aids digestion. It always quickly brings renewed strength, life, vigor, and ambition. Try it and be convinced. Sold by All Dealers.

CLOSED FOR THE SUMMER.
On Monday evening 27th instant, the Methodist Men's Union held the closing meeting of a most successful season, and plans were laid for more aggressive work when the Union reopens in October. After an informal discussion of matters pertaining to the Society, President Rice gave a brief resume of the season's work, thanking the members for their cooperation. Addresses were then given by Messrs. B. E. Steeves, Ex-Ald. Clarke, Arthur Petrie, J. H. Ashford and Waldo Crocker. Refreshments were served and meeting adjourned.

There is a Pink Pain Tablet made by Dr. Shoop that will positively stop any pain, anywhere in 20 minutes. Druggists everywhere sell them as Dr. Shoop's Headache Tablets, but they stop other pains as easily as headache. Dr. Shoop's Pink Pain Tablets simply coax a blood pressure away from pain centers—that is all. Pain comes from blood pressure congestion. Stop that pressure with Dr. Shoop's Headache Tablets and pain is instantly gone. 20 Tablets 25c. Sold by All Dealers.

CREDIT SYSTEM ABOLISHED.
Edmonton, Alta., Thursday.—The credit system that has been in vogue in the north country since the trader and trapper invaded the country, has been practically abolished this year and all trading between the Indians and halfbreeds and the white traders is conducted on a spot cash basis. The step was taken as a result of the shortage in the supply of furs this year, which made the trader shut down on the practice of giving traders food and clothing on tick in the fall, and trusting to their bringing in a supply of furs to settle their back debts.
Now that the new aldermen have been sworn in they are fully qualified to listen to the troubles of their constituents.

Hanging Is Not Painless.

Says Professor Spitzka, Who Recommends Electro-cution.

PHILADELPHIA, Friday.—The accepted idea that execution by hanging is a painless operation was disputed by Dr. E. A. Spitzka, the eminent specialist, before the annual meeting of the American Philosophical Society, which began in Independence Hall yesterday. Professor Spitzka said that he had witnessed thirty-one electrocutions at Sing Sing, Auburn, in New York and at Trenton, and five hangings at Moyamensing prison in Philadelphia. Electro-cution was, he said, the most humane method of inflicting the death penalty, because it was the most efficient, the speediest and the least painful, and he advocated its adoption by the commonwealth of Pennsylvania. In every case of hanging, he said, the heart of the victim continued to beat a long time after the fall through the trap, sometimes as long as thirteen minutes, and he believed consciousness continued or partial consciousness at least from one to one and a half minutes. The struggles of the men indicate efforts to find a support for their feet as they swung in the noose. Death in many instances, he was convinced, was actually due to strangulation.

A LONG LIFE.
How to Conserve Energy and Prolong Life.

The time comes to every one when the life forces begin to fall it is a little harder to climb a hill or walk up stairs. Exercise is taken less vigorously or abandoned, and we feel that the end of active service is drawing near.

It is more than probable that we have been over-driving the machine of the body which will give out like any machine if over taxed, and we should immediately take steps to change the gear, build up the strength and restore the life forces. To this end nothing equals our delicious cod liver and iron preparation, Vinol, which is far superior to all other tonics and cod liver preparations, because it is made by a scientific, extractive, concentrating process from fresh cods' livers, combining with peptonate-of-iron all the medicinal, healing body-building elements of cod liver oil, but no oil.

As a body builder and strength creator for old people, delicate children, weak, run-down persons, after sickness, and for chronic coughs, colds, bronchitis and all throat and lung troubles, Vinol is unexcelled.

PORTSMOUTH, Sunday.—The American line steamer St. Paul and the British cruiser Gladiator were in collision this afternoon off the Isle of Wight. A heavy snowstorm was raging at the time. The Gladiator was badly damaged and has been beached. Her crew took to the boats, and during this operation some twenty men are reported to have lost their lives. The passengers and crew of the St. Paul are all safe.

The St. Paul sustained a demaged bow and is now standing by the disabled cruiser.

CITY OF MEXICO, Saturday.—Twenty-eight persons were killed and seriously injured at Gargantua Siding, west of Matratra on the main line of the Mexican Railway in a collision between a freight and a second section of a special excursion train carrying pilgrims from the shrine of Guadalupe. The pilgrims left Mexico City in the morning.

The House in Early Spring.
This is the month of winds, so as early as possible it is well to see that there are no loose bricks in the chimneys, or shingles on the roof which can be readily dislodged. Have the chimneys pointed up, the roofs looked over, ice bridges broken in the gutters, and all detached things made secure. Look to the windows, also have the putty renewed around the panes of glass and the catches for the shutters repaired if necessary.

If additions or alterations are to be made to the house this spring this is the time to get the plans out, so that work may begin as soon as the frost erable increase in the number of cattle owned in these five provinces as well as a large advance in the acreage of all field crops. These figures, which may be taken as reliable, indicate, in some degree, the development that has been taking place. Expansion, growth in agricultural matters leads invariably to expansion in many other ways, to an increasing in the prosperity of the people, just as a failure in agriculture leads to unfavorable conditions in all branches of the people's activity. It is not necessary, of course, or one to face figures such as the foregoing to realize that there is progress in the Maritime Provinces. While of late years hundreds of the young people have left for the Canadian North West—and their departure has been felt—the drain has not been too great for the provinces which have continued to hold surely, though slowly. Here in New Brunswick progress is being made in a number of directions and the outlook for a continuing.

Picnic weather is liable to arrive almost any day.

POLITICAL NOTES

In 1898 the last year of the Conservative government the total trade of Canada amounted to \$92,154,446. After twelve years of Liberal rule the total amounts to \$638,300,291.

Over 280,000 acres of land have been sold this spring in Manitoba. Of this 100,000 acres are in the Farming home district and will be settled by immigrants from Illinois, Iowa, and Nebraska. I vouch for the future of the Northwest which means improved trade in the eastern provinces.

The increase of trade during the Tory and Liberal reigns is very striking. For the last eleven years of Conservative rule trade increased by \$50,000,000, and during the eleven years of Liberal rule it has increased by \$350,000,000. It has increased seven times more under the Liberal government than what it did under Conservative auspices. The figures are striking and should lead the electors to think whenever they may be called on to exercise the franchise.

In the last eleven years of the Tory regime \$80,000,000 was spent on Capital account, of this amount the Tories had to borrow \$60,000,000 and charge it up to the debt. In eleven years of Liberal rule \$157,000,000 have been expended on Capital account, only \$5,000,000 of which was borrowed for the building of the National Transcontinental Railway which will be a revenue producer.

Interesting Report Coming

SYDNEY, Friday.—W. F. Jenkinson, C. E., engaged by the government to prepare for publication mineralogical and industrial information and statistics of Nova Scotia and New Brunswick arrived home a few days ago from his tour of the latter province, after practically completing his work there.

Mr. Jenkinson said that while the mineral indications in New Brunswick are similar to those in Nova Scotia his tour of the former province involved much more work, on account of the difficulty of obtaining the necessary information. The tendency of the New Brunswick mind is in the direction of the lumbering industry, but in Nova Scotia there are few men who have not some knowledge of the mineral conditions of their own district. Numerous enquiries have already been received regarding the forthcoming report not only from the United States but from European countries, the capitalists of which have of late years shown an increasing interest in the industrial progress of the Dominion.

NATCHEZ, Miss., Friday.—Sixty known dead, all colored except two and as many more injured, is the casual they report received here up to tonight as the tornado which swept through a portion of Concordia parish La. and crossing the Mississippi river continued through the counties of Adams, Jefferson and Claiborne, Mississippi, a distance of 50 miles. Hundreds of plantation cabins were destroyed.

Colonel Lamb of the Salvation Army has been telling London audiences that there is work in Canada for everyone who wants it.

WAFERS IN MOUTHS

ERE THEY KNEW IT.
LONDON, Friday.—A Rome despatch to the Telegraph says that Prof. Feilbogen and his family, who yesterday, in the Sistine Chapel, after the Sacrament had been administered to them, spat the sacred wafers on the floor, have left Rome to escape punishment for sacrilege.

Prof. Feilbogen is a man of high character, and he could not have committed the sacrilege voluntarily. Indeed, he is deeply grieved at the occurrence. He was urged by his wife, who was eager to get a closer view of the Pope, to make his way nearer to the altar, which he did, when they found themselves among the communicants. The wafers were placed in their mouths before they realized what was being done, and they were so taken by surprise that they had no time to reflect upon their action and immediately spat them out.

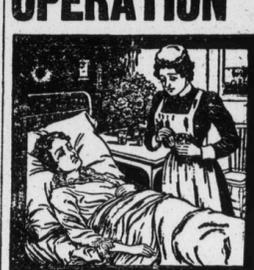

If You are Moving.
We have been commended repeatedly by furniture movers for leaving our breakables all in sight, or where that was impossible, plainly labelled. We have some precious glass jars which we use for household supplies and were in doubt how to pack them. They travelled safely set in an open box with only a layer or two of newspapers to keep them apart. The mover says: "There, those are all right, but the most of folks hides 'em to keep 'em safe, and then we break them."

Didn't Agree with Me

Mr. Arthur Tomlinson, 88 London Street, Toronto, writes enthusiastically of the merits of Trichina for all stomach troubles.

"I have had indigestion and flatulency. I tried cod liver oil, but it did not help. I had bought a bottle of Trichina, which I had bought. Eventually I used Trichina, and every day brought permanent relief. All these things are so common, but quickly and effectively. It is the prescription of great authority. All druggists sell it. Price 25c. Dr. A. Elcock, Limited, Toronto."

A SURGICAL OPERATION

If there is any one thing that a woman dreads more than another it is a surgical operation.

We can state without fear of a contradiction that there are hundreds, yes, thousands, of operations performed upon women in our hospitals which are entirely unnecessary and many have been avoided by **LYDIA E. PINKHAM'S VEGETABLE COMPOUND**

For proof of this statement read the following letter.

Mrs. Letitia Blair, Cannifton, Ont., writes to Mrs. Pinkham:

"I was sick for five years. One doctor told me it was ulceration, and another told me it was a fibroid tumor, and advised an operation. No one knows what I suffered, and the bearing down pains were terrible. I wrote to my sister about it, and she advised me to take Lydia E. Pinkham's Vegetable Compound."

"It has cured me of all my troubles, and I did not have to have the operation after all. The Compound also helped me to pass safely through Change of Life."

NEWCASTLE, MAY 6th, 1908

NEWCASTLE CAN

HANDLE THE ORE

We trust that the public-spirited citizens of Newcastle will be able to show the companies that have pre-empted iron mining claims on the Nipisiguit and North West Miramichi that Newcastle is the most accessible and desirable point for smelting and shipping the ore that will be produced from the said mines.

THE MIRAMICHI'S TURN.

We hope that the Chatham and Newcastle delegation now at Ottawa will be able to persuade the government to send the exhibition grant next year to the Miramichi. It would only be fair to this section of the province for St. John, Moncton and Fredericton to forego their claims this time, and allow the Miramichi to take the position to which her population and industry entitles her.

THE TOWN COUNCIL

The Newcastle Town Council show a disposition to devote considerable time and thought to civic affairs, so long as they continue to do so they should have the hearty support and co-operation of all good citizens.

The Alderman's lot is not an easy one by any means. He gets no remuneration for his services, other than the gratitude of the citizens, which in many cases is grudgingly given, or entirely withheld, or foolishly misplaced. He must devote to public affairs much of the time and energy needed, in these days of fierce and reckless competition, in his private business. All criticism of the Council or of individual aldermen should be based on facts and not on inference or hearsay, and should be open and aboveboard.

THE SPEECH FROM THE THRONE

The speech from the throne, read by the Lieutenant-Governor at the opening of the House of Assembly on the 30th ultimo, promises lots of legislation for the present session.

A measure will be introduced for the purpose of securing a more thorough audit of the public accounts than has hitherto existed, and of vesting the Auditor-General with greater power than he has hitherto enjoyed. Another will deal with the question of Highways, with the idea of placing large control over the roads in the hands of the Municipal Councils.

It's easy for a defeated candidate who was promised the support of his friends to believe King David was right when he said 'All men are liars.'

Brilliant Opening of Legislature

Donald Morrison Unanimously Elected Speaker of New House.

FREDERICTON, Thursday. — The opening of the first session of the fifth legislature of New Brunswick which took place this afternoon was without doubt one of the most brilliant ceremonial of the kind which has taken place for many years past.

The first business was the election of a speaker and the Premier in a few well chosen words moved that Mr. Donald Morrison, of Northumberland, do take the chair as Speaker.

GROW FAST.

40 Years She Will Have 55,000,000 Souls, Says Monetary Times

Prophecy that, in forty years more population of Canada will be fifty-five million souls, was recently made by the Monetary Times. The result arrived at by reckoning a 15 per cent natural increase and immigration. Regarding immigration, a basis for calculation is supplied by the official figures. In 1873 the year's arrivals numbered only 27,773. In 1881 the total had increased to 47,991, and in 1897 to 82,165. A period of world-wide depression, lasting almost a decade, followed, but the turning point was reached in 1907, the arrivals reached the relatively enormous total of 900,000. In the same period of the immigration to the entire American continent had reached 1,000,000, a million and a half, most of which has been absorbed by the United States. In Canada every indication now goes to show that as the west develops, the Dominion's reasonable share of this volume of humanity must correspondingly increase. The experience of the Western States in the early stages of their development, so far as the influx of population is concerned, is aptly repeated in our case unless we ourselves proceed by our own act. If development proceeds as it should do, the time of immigration, it is claimed by our contemporaries, will grow at a justifying the expectation in a year of a million souls a year. Computations on this basis tend to show that the estimate of a population of fifty-five million souls in the Dominion forty years hence is likely to be rather under than over these figures. Whether the realization of these anticipations would be for the greatest advantage of Canada, or not, depends very much on the use that is made of the human material brought into our land. Our advantages may be turned to good account in opening up unutilized fields of employment for men and money; or they may be squandered, and legitimate development hindered for years, bringing the country eventually perhaps to the verge of ruin. National prosperity is to be had only by careful administration of our national assets; by wise legislation with and to our forests, our vast coal fields and oil fields; by judicious liberal outlays on all national works and undertakings truly intended to promote the welfare of the country and the strictest economy in everything else; by putting down graft and corruption, trusts and combines, by ending of the exploitations by aliens of Canada's most valuable resources for their own profit, thus building up our railways and steamship lines and mines, employing their labor and filling the pockets of their capitalists with untold money; by the careful administration of our national assets generally in our government, and the ordinary honesty on the part of those who are entrusted with the federal power.

C. R. FINANCES IN GOOD SHAPE

Mr. R. Timm general traffic manager of the Intercolonial Railway said in an interview that the government had no such untoward experience as the C. P. R. and the G. T. R. in diminishing earnings from passengers and freight. The business all over the Dominion had kept up in a satisfactory manner during the season and so far as he could dip into the future he believed the year would be good throughout the rest of the month. In Nova Scotia and New Brunswick the traffic had kept up remarkably well in no way had the effects of the recent emergency that had affected the provinces been felt by the Intercolonial. There had been stagnation in the winter but it had been reflected in the R. R. traffic receipts, says Timm, but nothing of the kind apparent.

HERBERT, Thursday. — Ralph Le-employé by the Rhodes, Currier, of Amherst while climbing cars in the Amherst yard this morning, fell to the ground and was covered by a passing train. Both were cut off. Le- was about 15 o'clock when he was struck. He was 45 years of age and was unmarried.

Were Buried

BRIDGEHAM, Thursday. — The bodies of the victims of the explosion at Notre-Dame, Quebec, were buried in the cemetery of St. Joseph's. The bodies of many will never be recovered. It is believed that another body, that of Auguste Larivière was discovered by a fisherman on the banks of the St. Lawrence. Only half of the bodies had been recovered.

NEWCASTLE FORMS BRANCH

Of Fish, Forest And Game Protective Association of New Brunswick

22 MEMBERS

Rousing Speeches By Messrs. D. W. Clinch And A. Kelly Evans.

Over seventy men assembled in the Town Hall Thursday night to hear Messrs. D. W. Clinch of St. John, secretary of the New Brunswick Fish, Forest and Game Protective Association, and A. Kelly Evans of Toronto, father and founder of the Ontario Protective Association, speak on the value of our woodland domain. C. E. Fish presided and made a short but interesting address.

MR. CLINCH

Mr. Clinch advocated the formation of an association here. In his youth there was good fishing most anywhere. Now there is no good trout fishing except in private lands within 15 miles of St. John. Up here many trout streams are closed that should be open to the public. And hatcheries should be provided. There is no place in America so suitable for non-resident sportsmen as New Brunswick. In time good moose shooting can be offered here to sportsmen at a fixed rate. Our people do not yet realize the value of our hunting privileges. In St. John the association had interested the best business men, who were giving much time to its assistance. All money spent in this way will soon come back to the province. Millions of dollars will flow this way when the game lands are properly administered and advertised. The association believes that game and fishing should be open to all on equal terms, and that the small lumber operator should have a chance to become a millionaire.

Mr. Evans

Mr. Evans, who is a candidate for provincial parliament in South Toronto, and founded the Ontario Association in 1905, was the next speaker. The Ontario Association had now 37 branches, and some 4500 members. Many business men had joined. The objects of the Association are threefold. It is a strong educational factor; it is democratic in organization and patriotic in purpose.

The forests everywhere in America have been wasted and now we find ourselves in possession of depleted resources. Our asset of game is a great attraction to tourists. In Maine in 1887, the fish and game were nearly exhausted, not by outsiders, but by the settlers themselves. The government appointed a commission to investigate and it reported fishing valueless and game departed. Good game laws were passed and wardens appointed. First five or six wardens were murdered. This caused revulsion of public opinion, and after a few years the fishing and game became plentiful and tourists came. Money flowed in, part of which went to establish hatcheries. In 1887 there were only four lakes or ponds with land locked salmon in Maine. Now there are over one thousand, and eight hatcheries in operation. 1893 the Maine government discovered that 132,885 non-residents came into that state to hunt and fish. Each person could spend at least \$100—a total of over \$13,000,000 a year income.

Fine Moose Country.

New Brunswick's opportunities were as good as those of Maine. N. B. was the finest territory in America for moose. Commissioner Carleton of Maine estimated each wild moose as worth \$500 to the state. These were three thousand killed in N. B. last year. To attract tourists we must accommodate them. With the exception of Hotel Miramichi and few others, our hotels were inadequate.

In Germany—a very thickly settled country—\$5,000,000 worth of venison was produced in 1905, and \$750,000 of small game. With 80,000,000 Americans, rapidly increasing, at our doors, our moose would soon be our most valuable asset.

The provincial government should seek from the Dominion the control of tidal waters, put nets away and stock them with salmon. They should not be leased, but held open under certain conditions, say \$25 for license to fish with rods. He hoped that as leases became due they would be cancelled. In Quebec all available fishing territories are leased at ridiculous low figures. From about 2500 members of clubs the revenue is about \$25,000. But in Ontario where there is a \$2.00 angling licence for trout there was \$12,000 collected last year and each of those 6000 sportmen spent about \$100 each in Ontario—total \$600,000. New Brunswick could make money in the same way, and from moose receipts and fishing licenses a first class system, of oversight could be paid for and hatcheries maintained.

In Forestry, Germany has done wonders. In 1890 Prussia's 5,000,000 acres of forests yielded net profits of 44 cents per acre. In 1906 the net revenue was \$2.46 per acre from 7,000,000 acres. The actual cut per acre had trebled. Morally it is better for the young

HE WAS LOST IN LONDON.

Rich Old Man Went to Big Hospital And Was Lost For Six Weeks

LONDON, Thursday.—Owen Evans, a recluse of the ripe age of 83, left his single lodgings in Essex road at about 10 o'clock one morning six weeks ago, carrying a small black bag under his arm. He did not return.

As he possessed a fortune of \$200,000, and perhaps for other reasons, his relatives were greatly disturbed by his disappearance and a hue and cry was raised in the press. All the resources of the police and the private investigators were used to trace him, but he seemed to have vanished completely.

His picture appeared in the newspapers, close enquiries were made at hospitals, railway stations, morgues, and every nook and cranny of the metropolis. Finally the case was added to the long list of London's unsolved mysteries.

Saturday Evan's landlady received a note from the old man asking her if she wouldn't come round and see him in one of the wards of St. Bartholomew's Hospital, where he had been lying for six weeks recovering from an operation. He had gone straight from his lodgings to the great hospital in central London, where he had been admitted for an operation. The enquiries of the police had been directed only to the list of accident and emergency cases, and the old man had been as safely hidden in a great public institution as though his body had lain in the bottom of the Atlantic. And now the public is marvelling once more on how easy it is to be lost in London.

Denies the Charge

OTTAWA, Thursday. — Referring today to a suit which has been entered for his disqualification for alleged breach of the Independence of Parliament Act, Mr. J. J. Hughes, M. P., informed your correspondent that he had been served with a writ on the occasion of his recent visit to Prince Edward Island, and that through his solicitors he had applied for particulars and was fully prepared to resist the suit. This action he thought had been taken more for purposes of annoying him than with any serious thought of obtaining the disqualification asked for. 'You may say,' said Mr. Hughes, 'that there is absolutely nothing to the charge that has been lodged against me, and that I am still attending to my parliamentary duties and have instructed my solicitors to fight the matter.'

SCOTT ACT IS VICTORIOUS.

Jail Sentence for First Offence Sustained by Supreme Court

Mr. W. B. Chandler, City Solicitor, was advised at noon by telegraph from Fredericton that judgment in the Moncton Scott Act cases, argued at the present term of the Supreme Court of New Brunswick, was delivered this morning. The convictions in all the cases argued, some fourteen in number, excepting in one of the Richard Herbert cases, are confirmed by the Supreme Court. The principal point argued was that the evidence of the witnesses in the cases was not read over to them by the magistrate. The effect of this decision is that all the sentences by the magistrate of one month imprisonment stand good. In about half of the fourteen cases there were such imprisonment sentences.—Transcript, 30th.

men to spend their vacation in the woods than at fashionable summer resorts.

Mayor Miller

Mayor Miller was the next speaker. He hoped that the right to fish would be thrown open to the public. He did not believe in the late government's policy of closing streams—the province had lost revenue.

An Association Formed.

On motion of John Robinson, Jr., and Mayor Miller it was decided to organize a branch of the N. B. Association; and twenty-two gentlemen became members.

The following officers were elected: President, Robert H. Armstrong; 1st vice-president, W. A. Park; 2nd vice-president, John Robinson, Jr.; secretary-treasurer, Allan J. Ferguson; executive, S. W. Miller, J. D. Creaghan, E. A. McCurdy, C. J. Morriarty, C. E. Fish, J. W. Stevenson, John Clark, and S. A. Russell.

W. A. Park and S. W. Miller moved that the name of the branch be 'Newcastle.' E. A. McCurdy and John Robinson, Jr. moved in amendment that the name be 'Miramichi.' The vote stood 10 to 10, and the president decided the name should be 'Miramichi.'

President Armstrong spoke in favor of opening streams to the public. The eighteen members of the Miramichi Fishing Club pay but \$400 license. The vote in the sale club had sold for \$1200.

Adjourned sine die, after a vote of thanks to Messrs. Clinch and Evans.

CAN CHANGE METALS TO GOLD

Says Rudolph W. Hunter of Chicago, an Inventor of Standing

CHICAGO, Friday. — The Record-Herald to-day says: Eighteen months hence, Rudolph W. Hunter says he will be manufacturing twenty-four carat gold at the rate of \$100,000,000 annually. Transmutation of silver and the baser metals into gold is his secret and he declares he can produce the finer metal in quality to defy the government experts as to its origin, and in quantity to keep Philadelphia mint busy the year round.

'We are now at the point of putting into commercial execution the result of years of toil,' said Mr. Hunter, last night. 'The last demonstration prove my invention is scientifically and commercially correct and the completion of the plant which is to begin at once will mark the beginning of a new epoch in the commercial history of the world.'

Mr. Hunter is an inventor and engineer of standing in the scientific world.

TWO BANDITS RIFLE TRAIN.

It is Supposed That They Got a Very Respectable Booty

COLUMBUS, Ohio, Friday. — The St. Louis express on the Pennsylvania Railway which was held up last night 10 minutes west of Pittsburg, arrived here 40 minutes late. The crew confirmed the story of the hold-up by two men and say that the bandits escaped with four sealed bags containing mail. The crew state that a number of express packages and a quantity of gold bullion were taken. The Adams Express people here refuse to make any statement. Noah H. Roshen, of Columbus, the Express messenger says that the two men entered his car east of Walkers Mill, and covered him with ropes they brought with them and rifled the car. As the train approached Walkers Mill they pulled the signal cord and stopped the train. They escaped when the train was slowing up. Conductor Lafferty was attracted to the express car by the signal and found Roshen helpless. It was learned that three bags were rifled by the men who entered the car. What they obtained is only a matter of conjecture even to the officials of the Express Company at this time. It is believed that the booty is of great value. Roshen on arrival here at the end of his run was taken in hand by the local manager of the Adams Express Company and is being questioned.

No Peace Yet In Coal Vs. Steel

MONTREAL, Friday. — Mr. James Ross, president of the Dominion Coal Company said this morning that the negotiations for a settlement of the difficulties between the Coal and Steel Companies had so far been unsuccessful. Mr. Wm. McKenzie in conjunction with other mutual friends had made a suggestion to the effect that the Coal Company should name a price equivalent to 20 cents a ton over the cost of production, that the Coal Company should give the Steel Company the best coal they produce, and that the new price should be made applicable from the commencement of the dispute—the Coal Company to return all money over and above the new price received by it under the temporary contract, which had given the Steel Company the free choice of all the Companies' coal at the minimum pocket rate. The Coal Company was willing to consider this proposition favorably but the Steel Company has so far refused to consider it. 'The Coal Company,' said Mr. Ross, 'have no fears of the result should the case go to the Privy Council but at the same time are willing in the interests of peace to come to a settlement along these lines.'

It was stated here by a gentleman pretty close to the conservative leader at Ottawa that Mr. Borden will certainly contact his old county of Halifax at the coming federal election, and that furthermore the leader with his running mate will be elected.

W. S. CHURCHILL TRIES AGAIN

Will Run in Dundee, Against Conservative and Labor Candidates

DUNDEE, Friday. — Winston Spencer Churchill, president of the Board of Trade, whose recent failure to be returned to parliament from the Northwest division of Manchester, has forced him to seek a safe seat has arrived here to contest the vacancy caused by the elevation to the peerage of Edmund Robertson. Churchill had a well organized opposition to fight but it will require an enormous turnover of votes to defeat him. The unionist candidate, Sir Geo. Baxter, has a powerful local influence and the labor candidate, C. H. Stuart, while a novelty in this country, is a strong Mr. Scrymgeour, of the United Irish League is urging the Irish voters to give their complete support to Mr. Churchill, on the ground that Premier Asquith has adopted Mr. Churchill's pledges at Manchester regarding Home Rule for Ireland as representing the policy of the government.

His disappearance is attended by no loss at the bank.

To Deal With Men Singly. MONTREAL, Wednesday. — Another blow at organized labor has been struck here by the determination of the contractors of this city to pay bricklayers what they are individually worth instead of a flat rate. The business agent of the union, Joseph Bernier, expects that the men will be locked out as they will not accept the terms offered by the contractors which it is claimed, would mean the end of the union.

To Iron Muslin Curtains Easily. Tack some old cotton cloth on to small board, saturate with kerosene and rub the iron well over it, then on a clean cloth before using. There will be no more trouble about sticking or rubbing up, and they can be done in half the time.

Washing Fluid. Two and one-half ounces ammonia, 1-4 ounce salt of tartar, 1 can post-shave, 6 quarts of hot water. Put in tight jug or bottles. Use 1 cup to a boiler of clothes and 1-2 bar of soap shaved very fine.

To Remove Scorch from Clothes. A useful suggestion to the laundress is as follows: When ironing, if you should scorch your garments, at once put a wet cloth over the place and hold a hot iron over the cloth, continuing wetting the cloth until the scorch has disappeared. Do not spread the cloth out, but bunch it up. This is much easier and quicker than the old way of hanging the garment in the sun.

Light Cake With Nut Frosting. One and a half cup of sugar, 1-2 cup of butter, creamed together, then add 1 cup milk, 2 eggs, (beat the whites and yolks separately), 2 teaspoonfuls cream tartar, 2 teaspoonfuls cream sugar, 3 cups flour. Put cream tartar and sugar in the flour.

Poach Cream. Pour into a saucepan 1 pint canned peaches, 1-2 cup sugar and a little water, cook for 10 minutes, and strain through a sieve. Into a cup of mixed peaches add 2 tablespoons of hot water into which has been dissolved 1-4 box granulated gelatine. When cold stir in 1 cup of cream which has been whipped, pour in to a mould. Serve with delicate cakes.

Why is an automobile like a woman? Ask the comedian boarder as he peeped a hard-boiled egg. The cynical bachelor was thoughtful. Because it is so expensive. Good, but no, the right answer. Ah, now I have it. Because it has wheels. Uncomplimentary, but not correct. Because it is always running people down. Unkind, but far away. Well, I give it up. Why is an automobile like a woman? Because it needs every attention and after you give it every attention, it is liable to blow up without a minute's notice.

DISCOVERY OF A TREASURE ISLAND. Believed that a Chest of Money Was Once Buried by Pirates at Plum Island.

The Newburyport (Mass.) News says that while Albert Leet, a member of the life saving crew connected with the Knobs life saving station at the lower end of Plum Island was patrolling the beach one day several months ago he saw a shining object lying on the sand partly concealed. He picked it up and to his astonishment found that it was a piece of silver money about the size of a modern half dollar bearing the date 1749. Mr. Leet put the money in his pocket deciding to keep it for a pocket piece little realizing the significance of his find and it was not until several days afterwards when he found several pieces that he was brought to realize that his find is part of a buried treasure that somewhere must be concealed beneath the grains of sand that form the popular summer resort of the island.

The money that has been found to date is dated 1721, 1749 and 1783, and are Spanish and English coins. One piece is dated 1783 and was produced in the reign of Charles III. Another dated 1721 was manufactured in the reign of Phillip. The coins are of a queer design and the milling is extremely odd.

Mr. Leet has marked the locality in which this money was found and he alone knows the section. It is evident that at one time there was a growth of woods on the spot as in the place where the money was found is a strata of black and this, it is believed, is that was left of a mammoth tree.

The sands of Plum Island will probably receive a great digging this summer by cottagers who hope to find the treasure. Mr. Leet, however, has the exact location marked and it is probable that if any more money is found, he will be the one to get it.

ZAM-BUK SAVED THIS MAN'S FINGER!

Mr. William C. Edwards, Peter Street, Toronto (late steward Elks' Club), sustained a severe cut on the middle finger of the left hand. Blood poisoning ensued and the finger caused him excruciating agony. He says: "My hand was so swollen and painful that I had to carry it in a sling for some months. I was under the care of a well-known doctor in Toronto for several weeks. The wound got no better, and one day he said my finger would have to be taken off. The pain from the wound was terrible and was extending right up the arm. I consulted another medical man and was treated by him for some weeks longer. He then suggested that the finger be opened and the bone scraped. At this stage a friend advised me to try some Zam-Buk which I did. I bathed the wound and applied Zam-Buk as directed. Next morning the wound began to bleed. It was a healthy sign so I continued with the treatment, and in a week time I was able to discard the bandage. A little more perseverance and Zam-Buk cured the wound completely."

President Hawke of Board of Trade Presided, and Meeting Enthusiastic.

MONCTON, Thursday.—Last evening there was a small gathering of the W. C. T. U. hall to listen to Mr. Kelly Evans of Toronto on the Forest, Fish and Game question. Shortly after eight o'clock Mr. John T. Hawke, president of the Board of Trade called the meeting to order and announced its object to take means to continue the preservation and protection of the Forest, Fish and Game of New Brunswick. He referred to his visit to Germany and through the beach forests of that country which he found threaded with suitable carriage roads and no undergrowth. In referring to the game of N. S. he had seen in England a moose which could not be compared with the moose in this country. In fact he would not be recognized by the guides of this country. While examining the exhibits at the Sportsman's show in New York he noticed two moose and a deer advertised as 'American moose and deer,' meaning the United States game, but on examination he found they had all been caught in Northern New Brunswick. The chairman then introduced Mr. Clinch, of St. John, the secretary of the N. B. Forest, Fish and Game Association, who gave an account of their organization in St. John, the object of the society and some of the work in detail. Mr. Kelly Evans was then introduced and for one hour dealt with the question in a pleasing, interesting and instructive manner. He first gave a history of organization in Maine, where it was twenty years ago and what it is today. How that hunting the game had not depleted it, because it was so successfully protected. He also showed how magnificently Maine had profited from a financial standpoint. He then gave the history of their organization in Ontario and what they had accomplished. He referred to the moose as the king of the forest and continually increasing in volume. The late Government had done much to protect the game and he hoped the new Government would continue the good work. The worst enemies of the game were the sportsmen. It was difficult to get the people aroused. In speaking of the fishing of the province he advocated fish hatcheries and the introducing of salmon and trout wherever a suitable place could be found, and he emphasized the good advice, "Do not lease your fishing grounds." He said Quebec had its fishing ground leased but Ontario did not lease any. They charged in Ontario only two dollars for fishing rod and had made more money than Quebec with her immense fishing grounds which are leased. The forests he said should be carefully guarded and in a short time New Brunswick would have as well preserved and as regularly increased as those so ably described by the chairman and seen in Germany. He gave some valuable information from statistics gathered from European countries and hoped New Brunswick would follow on the same line. He closed on the grand pervasion on the moral and religious aspect and influence of the question. He contrasted the environments of the student leaving college who goes to a seaside resort wastes his money and ruins his health, with those of the student who is attracted to the woods made attractive by the persistent efforts of the people, and who when there feels the sublime influence of his supreme Maker, who has made these forests and everything in nature for his amusement and use. Durifig his remarks he congratulated St. John Association on the efficient services rendered by Mr. Clinch. Hon. Mr. Robinson being introduced, made a good speech, complimenting Messrs. Kelly

ROBIN HOOD

In Argentine Prison Writes a Book and Awaits Pardon

THRILLING STORY

Popular in Spain and Argentina Because of his Generosity to the Poor.

MADRID, Monday.—It is currently reported that simultaneously with the appearance of the book which he is now writing in prison on Banditism in Spain, Vivillo, the greatest bandit of them all, will get a free pardon. Such an act on the government's part would be widely popular, for the name of Vivillo to Spain is what that of Robin Hood was to old England.

Vivillo is supposed to be one of those noble outlaws who rob the rich only, and shower benefits on the poor. It was something very similar to regret that characterized reports of his arrest last December. This took place in the Argentine Republic after he had been sought in vain by the police for many years. Picturesque outlaws has always existed more or less in Andalusia. And of all the outlaws in Southern Spain none was more picturesque than he.

The real name of Vivillo is Joaquin Camargo. He was born near Seville 56 years ago. Although he was the offspring of respectable parents, he began his adventurous career of crime while still a youth, and soon made a name for himself. One of his most famous exploits had as its scene a much-travelled road near Setenil, where five years ago he held up 25 merchants, one after another, as they returned from a fair. The whole 25 were later discovered bound and gagged, lying side by side. Vivillo's day's work had netted him 50,000 pesetas. Although he performed some of his most daring feats single-handed, he was captain of a famous band. Members of the organization spread his name and fame afar, performing good deed and bad, for which he got the credit. Personally, he was polite, sober, economical, and extremely fond of his own family. He had a wife, three charming daughters, and two boys. They never took part in his misdeeds, although it is admitted that he kept them freely supplied with money.

Two years ago Vivillo, having made a fortune, sought to change his profession. Many witnesses were present on the fact that he set himself up as a hotelkeeper. It was intimated that he had merely changed his methods of separating travellers from their superfluous cash. He also owned several farms, whither he repaired in times of leisure, devoting himself to the education of his children. He then lived under an assumed name, and his neighbors never suspected who he was. Vivillo had disappeared.

In the meantime the band, which he had once controlled and with which he still maintained relations, carried on business much in the old way. But Vivillo's successor to the captaincy was shot one day and several of his henchmen wounded and arrested. The Spanish gendarmes secured a confession from one of the wounded men, and thus learned of the whereabouts of the bandit, who had escaped them for so long. Vivillo, quietly sleeping in his farmhouse one night, was awakened by a tap on his window. A friend had come to warn him. He got away just in time, for only a few minutes after his hasty flight the place was surrounded by a troop of mounted rural guards. He managed to leave the country and sail for Buenos Ayres.

The Spanish police did not despair, however; they knew Vivillo's virtues as well as his vices. Every member of his family was shadowed. One by one they were left over until he fell in the week.

ENGLISH TO HAVE NEW SEAT.

MONTREAL, Wednesday.—Premier Gouin has just announced that the government has decided to give the English speaking electors another seat in Montreal. For this purpose the seats in Island will be redistributed. Gouin says that the only object is to render justice to the English element in the metropolis and give them their legitimate representation.

CARLETON (QUEBEC)

Reverend Brother Henri of the Order of the Holy Cross of Jesus, of Rimouski was the guest of our esteemed Reverend Father Belanger on Sunday and has given us a conference on Sunday and on the religious vocation which was well listened to and appreciated by a large number of citizens.

Mr. Willie McIntyre of St. John who had been spending a couple weeks hunting in Carleton and New Richmond, has returned home on Friday reporting having good luck.

Chas. R. Scoles, Esq., manager of the A. & L. S. Ry., registered at the Landry's Hotel on Friday evening.

Messrs. J. L. Mercier, representing McCall, Shehyn firm Quebec, and J. W. Martin, representing Gauvreau & Beaudry firm, Quebec, passed through here on Monday.

Mr. Jos. St. Onge who had been in Campbell hospital for over a month receiving medical treatment, returned last week nicely improved.

Mr. and Mrs. Gustave Guite left here on Tuesday, en route to Waterville, Maine, where they will reside in future.

Miss Maggie Mousse who had been the guest of Mrs. A. Bernier these past few days has gone to St. John to join her brother.

Mr. E. Rodier passed here on Tuesday with a large number of illustrated post cards from the Romeo Roussif firm, Montreal.

Mr. Jos. P. LeBlanc has returned from St. Alphonse de Caplan where he had been spending a month at his son's local school. After leaving school he assisted his parents by earning money as a female coster, and with his long hair, female features and dress, was a familiar figure. No one, least of all himself, suspected his real sex. The discovery that he was no, a girl came about in an extraordinary manner. Whilst working as a flower girl in Chingford he got to know a laboring man. Early in March they were pushing a bassinet together along the main street of Chingford when a police constable named Illman, who knew the man, stopped both and began to make enquiries concerning the bassinet. There were pieces of lead in the man's hand, and as a result both were taken to the Chingford police station. The officers at Chingford police station were told that the girl was a flower girl for years.

The police had not the slightest suspicion. They had no cause for it. Accordingly he was entered in the charge book in his real name of Beatrice Alger, and after the Essex quarter sessions at Chelmsford. That led to the discovery of the sex of the girl-man. The prison doctors had found it out. They found that whilst for some years after birth Alger might well be considered to be a girl, there were now certain reasons why he should be considered a man. Under these circumstances all his long hair was cut off before the quarter sessions opened this week, and before he was placed in the dock he was dressed in full masculine garb. The plain but extraordinary facts he had accepted and always regarded himself as a girl and acted as such were now made clear. Details of the case were laid before the justices together with the pronounced physical change that was always likely, and had in this case taken place, and the extraordinary man-woman was liberated at the rising of the court on the offer of a female by marriage to take him under control and obtain for him a suitable situation away from possible evil influences.

Hawke, president of the Board of Trade called the meeting to order and announced its object to take means to continue the preservation and protection of the Forest, Fish and Game of New Brunswick. He referred to his visit to Germany and through the beach forests of that country which he found threaded with suitable carriage roads and no undergrowth. In referring to the game of N. S. he had seen in England a moose which could not be compared with the moose in this country. In fact he would not be recognized by the guides of this country. While examining the exhibits at the Sportsman's show in New York he noticed two moose and a deer advertised as 'American moose and deer,' meaning the United States game, but on examination he found they had all been caught in Northern New Brunswick. The chairman then introduced Mr. Clinch, of St. John, the secretary of the N. B. Forest, Fish and Game Association, who gave an account of their organization in St. John, the object of the society and some of the work in detail. Mr. Kelly Evans was then introduced and for one hour dealt with the question in a pleasing, interesting and instructive manner. He first gave a history of organization in Maine, where it was twenty years ago and what it is today. How that hunting the game had not depleted it, because it was so successfully protected. He also showed how magnificently Maine had profited from a financial standpoint. He then gave the history of their organization in Ontario and what they had accomplished. He referred to the moose as the king of the forest and continually increasing in volume. The late Government had done much to protect the game and he hoped the new Government would continue the good work. The worst enemies of the game were the sportsmen. It was difficult to get the people aroused. In speaking of the fishing of the province he advocated fish hatcheries and the introducing of salmon and trout wherever a suitable place could be found, and he emphasized the good advice, "Do not lease your fishing grounds." He said Quebec had its fishing ground leased but Ontario did not lease any. They charged in Ontario only two dollars for fishing rod and had made more money than Quebec with her immense fishing grounds which are leased. The forests he said should be carefully guarded and in a short time New Brunswick would have as well preserved and as regularly increased as those so ably described by the chairman and seen in Germany. He gave some valuable information from statistics gathered from European countries and hoped New Brunswick would follow on the same line. He closed on the grand pervasion on the moral and religious aspect and influence of the question. He contrasted the environments of the student leaving college who goes to a seaside resort wastes his money and ruins his health, with those of the student who is attracted to the woods made attractive by the persistent efforts of the people, and who when there feels the sublime influence of his supreme Maker, who has made these forests and everything in nature for his amusement and use. Durifig his remarks he congratulated St. John Association on the efficient services rendered by Mr. Clinch. Hon. Mr. Robinson being introduced, made a good speech, complimenting Messrs. Kelly

ZAM-BUK SAVED THIS MAN'S FINGER!

Mr. William C. Edwards, Peter Street, Toronto (late steward Elks' Club), sustained a severe cut on the middle finger of the left hand. Blood poisoning ensued and the finger caused him excruciating agony. He says: "My hand was so swollen and painful that I had to carry it in a sling for some months. I was under the care of a well-known doctor in Toronto for several weeks. The wound got no better, and one day he said my finger would have to be taken off. The pain from the wound was terrible and was extending right up the arm. I consulted another medical man and was treated by him for some weeks longer. He then suggested that the finger be opened and the bone scraped. At this stage a friend advised me to try some Zam-Buk which I did. I bathed the wound and applied Zam-Buk as directed. Next morning the wound began to bleed. It was a healthy sign so I continued with the treatment, and in a week time I was able to discard the bandage. A little more perseverance and Zam-Buk cured the wound completely."

ROBIN HOOD

In Argentine Prison Writes a Book and Awaits Pardon

THRILLING STORY

Popular in Spain and Argentina Because of his Generosity to the Poor.

MADRID, Monday.—It is currently reported that simultaneously with the appearance of the book which he is now writing in prison on Banditism in Spain, Vivillo, the greatest bandit of them all, will get a free pardon. Such an act on the government's part would be widely popular, for the name of Vivillo to Spain is what that of Robin Hood was to old England.

Vivillo is supposed to be one of those noble outlaws who rob the rich only, and shower benefits on the poor. It was something very similar to regret that characterized reports of his arrest last December. This took place in the Argentine Republic after he had been sought in vain by the police for many years. Picturesque outlaws has always existed more or less in Andalusia. And of all the outlaws in Southern Spain none was more picturesque than he.

The real name of Vivillo is Joaquin Camargo. He was born near Seville 56 years ago. Although he was the offspring of respectable parents, he began his adventurous career of crime while still a youth, and soon made a name for himself. One of his most famous exploits had as its scene a much-travelled road near Setenil, where five years ago he held up 25 merchants, one after another, as they returned from a fair. The whole 25 were later discovered bound and gagged, lying side by side. Vivillo's day's work had netted him 50,000 pesetas. Although he performed some of his most daring feats single-handed, he was captain of a famous band. Members of the organization spread his name and fame afar, performing good deed and bad, for which he got the credit. Personally, he was polite, sober, economical, and extremely fond of his own family. He had a wife, three charming daughters, and two boys. They never took part in his misdeeds, although it is admitted that he kept them freely supplied with money.

Two years ago Vivillo, having made a fortune, sought to change his profession. Many witnesses were present on the fact that he set himself up as a hotelkeeper. It was intimated that he had merely changed his methods of separating travellers from their superfluous cash. He also owned several farms, whither he repaired in times of leisure, devoting himself to the education of his children. He then lived under an assumed name, and his neighbors never suspected who he was. Vivillo had disappeared.

In the meantime the band, which he had once controlled and with which he still maintained relations, carried on business much in the old way. But Vivillo's successor to the captaincy was shot one day and several of his henchmen wounded and arrested. The Spanish gendarmes secured a confession from one of the wounded men, and thus learned of the whereabouts of the bandit, who had escaped them for so long. Vivillo, quietly sleeping in his farmhouse one night, was awakened by a tap on his window. A friend had come to warn him. He got away just in time, for only a few minutes after his hasty flight the place was surrounded by a troop of mounted rural guards. He managed to leave the country and sail for Buenos Ayres.

The Spanish police did not despair, however; they knew Vivillo's virtues as well as his vices. Every member of his family was shadowed. One by one they were left over until he fell in the week.

CARLETON (QUEBEC)

Reverend Brother Henri of the Order of the Holy Cross of Jesus, of Rimouski was the guest of our esteemed Reverend Father Belanger on Sunday and has given us a conference on Sunday and on the religious vocation which was well listened to and appreciated by a large number of citizens.

Mr. Willie McIntyre of St. John who had been spending a couple weeks hunting in Carleton and New Richmond, has returned home on Friday reporting having good luck.

Chas. R. Scoles, Esq., manager of the A. & L. S. Ry., registered at the Landry's Hotel on Friday evening.

Messrs. J. L. Mercier, representing McCall, Shehyn firm Quebec, and J. W. Martin, representing Gauvreau & Beaudry firm, Quebec, passed through here on Monday.

Mr. Jos. St. Onge who had been in Campbell hospital for over a month receiving medical treatment, returned last week nicely improved.

Mr. and Mrs. Gustave Guite left here on Tuesday, en route to Waterville, Maine, where they will reside in future.

Miss Maggie Mousse who had been the guest of Mrs. A. Bernier these past few days has gone to St. John to join her brother.

Mr. E. Rodier passed here on Tuesday with a large number of illustrated post cards from the Romeo Roussif firm, Montreal.

Mr. Jos. P. LeBlanc has returned from St. Alphonse de Caplan where he had been spending a month at his son's local school. After leaving school he assisted his parents by earning money as a female coster, and with his long hair, female features and dress, was a familiar figure. No one, least of all himself, suspected his real sex. The discovery that he was no, a girl came about in an extraordinary manner. Whilst working as a flower girl in Chingford he got to know a laboring man. Early in March they were pushing a bassinet together along the main street of Chingford when a police constable named Illman, who knew the man, stopped both and began to make enquiries concerning the bassinet. There were pieces of lead in the man's hand, and as a result both were taken to the Chingford police station. The officers at Chingford police station were told that the girl was a flower girl for years.

The police had not the slightest suspicion. They had no cause for it. Accordingly he was entered in the charge book in his real name of Beatrice Alger, and after the Essex quarter sessions at Chelmsford. That led to the discovery of the sex of the girl-man. The prison doctors had found it out. They found that whilst for some years after birth Alger might well be considered to be a girl, there were now certain reasons why he should be considered a man. Under these circumstances all his long hair was cut off before the quarter sessions opened this week, and before he was placed in the dock he was dressed in full masculine garb. The plain but extraordinary facts he had accepted and always regarded himself as a girl and acted as such were now made clear. Details of the case were laid before the justices together with the pronounced physical change that was always likely, and had in this case taken place, and the extraordinary man-woman was liberated at the rising of the court on the offer of a female by marriage to take him under control and obtain for him a suitable situation away from possible evil influences.

Sleeping Draughts and Soothing Mixtures.

A wise mother will never give her little one a sleeping draught, soothing mixture or opiate of any kind except upon the advice of a competent doctor, who has seen the child. All these things are deadly poison. When you give your baby or young child Baby's Own Tablets you have the guarantee of a government analyst that this medicine does not contain one particle of opiate or narcotic, and therefore cannot possibly do harm—but always do good. Mrs. Geo. M. Kempf, Carleton Place, Ont., says:—"I have given Baby's Own Tablets to my baby since he was two weeks old. He was a very small thin baby, but thanks to the Tablets he is now a big, fat, healthy boy." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Dr. Williams, Ont.
