HARRY THAW MUST GO BACK U. S. CABINET IS DECISION OF GOV. FELKER

In Statement He Declares That Any Other Course Would Be Violation of Interstate Laws-Case Now Rests With Federal Court.

[Canadian Press.]

Concord, N. H., Nov. 8 .- Governor Felker today honored the requisition of the State of New York for the extradition of Harry K. Thaw. The case Is now transferred automatically to the federal courts, where a writ of habeas corpus on behalf of Thaw is

The governor based his decision on the indictment returned against Thaw in New York County, and which charged him with conspiracy to escape from the insane asylum at Matteawan, N. Y., to which he was committed following his trial for the killing of Stan ford White. Thaw made his spectacular flight on Aug. 17, and a few days later was arrested near Coaticook

Thaw Not Present.

Thaw's attorneys announced that they would file immediately an amendment to their petition for a writ of habeas corpus, application for which made shortly after Thaw was arrested in this state, following his deportation from Canada. The original petition was based on the allegation that Crown Prosecutor Says That the several weeks ago, for the working Thaw had been indicted for conspiracy by the Dutchess County grand jury, and it was suspended pending the governor's decision on the matter of extradition.

Because the extradition has now been granted on the strength of the New York County indictment it will She Will Not Be Further Probe necessary to amend the petition accordingly.

Thaw was not present when Governor Felker announced his decision to the attorneys representing Thaw and the State of New York at the capitol. He will remain here in the custody of United States Marshal Nuts and Sheriff Drew, pending the federal proceed-

Felker's Statement. In granting the extradition, Gover-

nor Felker said in part:

The sovereign state of New York, by its governor, has demanded of the proper authority of this state the extradition of Harry Thaw. A proper respect for the public interest manifested here in demands that I should state the views which form the basis of my decision.

"By the petition of Governor Glynn and the accompanying papers, it appears that the grand jury inquest of the county of New York has duly returned into open court, an indictment against Mr. Thaw. That is sufficient to warrant the arrest, arraignment and trial of the respondent if he may be found within the state wherein the indictment is pending.

"It is, furthermore, sufficient to establish that Mr. Thaw is-if found in any state or country, while such indictment is pending-a fugitive from administered the strychnine himself.

GETS IN POLICE COURT

Wingham, Nov. 8.—Police Magistrate Morton has a difficult case to decide, and it is all owing to the caprice of Sarah, a prize hen, the prooperty of Mr. Harry Brown, who is the plaintiff in the case. Sarah recently took a notion to spend the nights on the fence of Mrs. R. Hen-derson, rather than in the home coop. In an attempt to put a stop to these ramblings, Mr. Brown tried to get the fowl, but before he could get hold of it, Mrs. Henderson seized the bird for rent of her fence for sleeppurposes. This action caused Brown to put in a charge of theft, with the result that the matter was transferred to the police court. Twenty-one witnesses have been summoned in the case. It was called Friday, but owing to the plaintiff's counsel being out of town, it was postponed until next Tuesday.

MR. THOMAS H. SMALLMAN THE MAYOR NOT TO

'Your Manner Is Sickening," Says Vice-President of Street Railway to Graham — "Putting On Side" Arouses Mr. Smallman — The Sunday Car Ouestion.

Not a single concession will be | gin, then we would have only about half granted by the street railway company for the privilege of operating Sunday cars in London. This flat statement was made by Vice-President T. H. Smallman at the conference of street railway officials and aldermen at the city hall on Friday afternoon. The question of fares and schedules that would be operative if a Sunday service were instituted here is still in abeyance. They are to be presented to the council in the form of a report before Nov. 15, and will form the basis of the only agreement that now seems possible in the Sunday car negotiations.

The statement of Mr. Smallman that no concessions would be granted was an unqualified one. "We will not pay a cent for the privilege of running Sunday cars," he said. "The company is indifferent and we do not care to mix Manager King's Views.

When the Sunday car debate was opened, the company officials were asked to present their views on the question, Manager C. B. King was the first "I thought that I expressed it last

Mr. Smallman: "Sunday ears would be a convenience I know, but their patronage would only be for church-going purposes. There is no place to go outside of church, except to visit relatives and friends in other parts of the city. I don't think that a railway service would have enough traffic to make it pay. . There is no doubt that it is a convenience. You

have the right to order the service." Ald. Spittal: "You would get your power for nothing. It won't make any difference whether you use it six days a week or seven."

Mr. Smallman: "We will be very happy if we get it for six days a week." Must Pay Extra Day.

Manager King: "The power is metered nd we would have to pay for the sevnth day."

Mayor Graham: "Can you give us some asis of your Sunday schedules?" Mr. Smallman: "That would be premature now."

Mayor Graham: "Well, we want to know the conditions. Would you operate the same service and schedule on Sunday as you would on the week day?" Mr. Smallman: "That would be decided by the patronage. You wouldn't suppose that the same service as week days would be demanded, would you? You wouldn't have the cars start at 6 earnings would justify the expense. They a.m. and run until midnight. The Furnishing of the Home

Even with people whose means are limited, the word quality newadays is the first consideration. Nobody wants cheaplooking furniture, for you have to live with it. Your furniture forms a lifelong companionship with you. It is therefore important that it be furniture of a character of the highest standard possible to elevate the standard of the home. Even if you furnish or refurnish one room at a time, let it be good. Cheaply-made furniture is dear at any price, because it has no character or lasting standard value. Our furniture floor is now stocked with standard grades of medium-priced and highclass pieces from reliable Canadian and American factories only. We are also selling agents for the famous "Gurney-Oxford" Ranges and Heaters.

A Stroke of Luck.

We come now to the most crowded and eignificant day in all the erowded life of Rosalie Le Grange. When she told of it afterward to the only person who ever enjoyed her full confidence, she gave but a parrative of fighes and energials. Rosalle Le Grange. When she told of the first context at one enjoyed her full confidence, she gave but a narrative of flashes and snatches—a pertinent fact, out of its context, at one session, a state of emotion at another Rosalle was logical and consecutive only when the long slow road of reason would see Betsy-Barbara fell to work on feeble. So Betsy-Barbara fell to work on the second-hand typewriter; and she had serve her purpose better than the short cut of intuition. But, indeed, there is in this world hardly a mind so logical and consecutive only this world hardly a mind so logical and consecutive only when the long slow road of reason would see Betsy-Barbara fell to work on feeble. So Betsy-Barbara fell to work on the second-hand typewriter; and she had so far progressed that she could write a passably good business letter in four attempts and a morning's work.

it is all Betsy-Barbara. Hers was the choice and placing of the green mission furniture. Hers was the selection of the pictures, their arrangement in relation to the wall spaces. That it might be a a pleasant place for work, she picked out prints of her favorite pictures—the Countess Potolka, the Baby Stuart and the Duchess of Devonshire. To give it a business air, she added a framed photo-graph of the Union Station in St. Louis. Further, Betsy-Barbara found the most spectacular specimens of advertising design executed by Thomas W. North, set them in passe-partouts with her own hands, and hung them just where they would invite the eye and confidence of customers. She remembered also the soul needs of Mr. Thomas N. North himself. In the interstices of the decorations she placed such mottoes as she deemed best for him, as "Do It Now," "Industry is sary than concealment. So she proceed-thappiness," and, most significant of all to one who understood the reason for the "Betsy-Barbara Lane." she said. "I be-"Betsy-Barbara Lane." she said. "I be-Thomas W. Annoying Dandruff

Will Make Canada a Bald-Headed Nation If Not Checked.

M. Pasteur, the great French physiian of Paris, once said: "I believe we shall some day rid the world of all diseases caused by germs."

Dandruff is caused by germs, a fac ccepted by all physicians. Dandruff is the root of all hair evils. If it were not for the little destructive germs working with a persistency worthy of a better cause, there would be no baldness.

Parisian Sage will kill the dandruff terms and remove dandruff in two eeks or money back, It will stop itching scalp, falling hair nd make the hair grow thick and

Science he felt had been derelict to duty and had allowed itself even to become a minister to "the lords of hell." Yet, though like Tennyson in "Locksley Hall Sixty Years After," he showed a disgust at science's failure to move things "for-

ward." he did not quite despair of this world. There is no doubt of Wallace's title to rank in the first flight of Victorian thinkers. If less great than a few others in some of the detail work of science, he had a mind fitted to present the philosophy of the new learning. Like Sir Oliver Lodge and the late Andrew Lang, he was a believer in spiritualism to some extent he was bold enough to denounce vaccination. and perhaps most striking as original thought after his contribution to the law of natural selection, was his argument in "Man's Place in the Universe" (1903, 1904), for old geocentric views. He held that after all the earth is probably the only sphere inhabited by beings of human order and therefore the true moral centre of the universe.

A great Englishman was Wallace, if we may split the difference, as it were, in the case of one of Scottish descent and born in Wales and call him an Englishman. He will live in memory with Darwin, Lister, Spencer, Kelvin and Tennyson, the protagonists in "the wonderful century," as Wallace called it, of science, its philosophy, poetry and morals.

WASTED WEALTH. Not many years ago John W. Gates was a noted figure in the financial world-a Wall Street stock broker. Apparently reckless, in reality shrewd and cunning, he was a successful gambler, and accumulated great wealth. But the rich man dies, as rich and poor alike must die, and he left a fortune to his son Charles. The younger Gates was a gambler like his father, and added to his millions. But he was more than a gambler, or less His gambling was only an incident; his occupation was to spend. He was going to take life merrily, and his only idea of merriment was to rush into everything that promised amusement, and to scatter his money with naval policy, with one qualification, a lavish hand. Not a dissipated man, namely, that the Canadian Governin the sense of besotted drunkenness; but a dissipated man in that he wasted energy and talent and wealth in the pursuit of pleasure. A Ridiculous Story. that has developed is that one from Brantford, which states that the Canadian League will put-teams in Buffalo, Rochester, Baltimore and a couple more American cities in order to fight the Federal League. This is the very

worst kind of rot. The idea of Canadian League franchises being placed in these cities, where already International and Federal League franchises are, is so ridiculous that it is hardly worth mentioning. Supposing they were, how could London, Hamilton and Ottawa hope to compete with teams such cities would demand? To say that the Canadian League intended securing franchises in New York, Chicago and San Francisco would be just as reasonable

ful quantity with a losing team, and the chances are that should the club here be a second-division one or anything less than a pennant-winning one, the owners would do nothing more than break even.

A Pity to Change Name. With the entrance of Niagara Falls and Erie, it is likely the name of the league will have to be changed. It will not be a purely Canadian League then. Changing the name is rather an permitted three outside men, or playimmaterial thing, but it is nevertheless egrettable. The name "Canadian" advertises Canada. The title "Canadian these outside men can be played at League" has stood for Canadian baseball despite the fact that it was

something less meaning and less at-tractive, seems to be a pity. It is to be hoped that an effort will be made to retain this name.

Leave Brantford Where It Is. Another amusing article that has appeared in reference to the situation was that published in a local daily. I'wo tables were arranged showing class B league and class D league. In the class B league the cities of Peterboro and St. Thomas were placed, while Brantford, a city of greater population, was placed in the class D or-ganization. Brantford is a better payadmirably located for the Canadian League, and the wisest move, if the franchise is sold, would be to leave the Telephone City franchise just where it is. Any other move would be nothing but a "bonehead' play.

Tire Taxes

Which We Pay for You in No-Rim-Cut Tires No Other Maker Does It

The cost of tire upkeep lies mainly in these three shortcomings:

Rim-Cutting—Blow-Outs—Loose Treads. We spend fortunes each year-spent by no other maker—to minimize these costs.

We save tire users in these ways many thousands of dollars. And Goodyear tires, on this account, outsell any other.

Note now how we do it.

The Rim-Cut Tax Our No-Rim-Cut tire ends rim-cutting com-

pletely, and we control the way. The method we use - the only feasible

method—is protected by secrecy. The rim-cutting tax is enormous.

Careful statistics, made by public accountants, prove that rim-cutting ruins almost one clincher tire in three.

We wipe out all that tax.

The Blow-Out Tax

Most blow-outs are caused by wrinkled fabric, shirking its part of the strain.

The wrinkles are caused by curing, under fierce compression, on an iron core. All tires save Goodyears are cured on iron cores alone.

No-Rim-Cut tires are final-cured on air bags, shaped like inner tubes. They are vulcanized on elastic air, as you use

Thus the fabric adapts itself to actual road constretched out. Every inch of every layer does its share of duty. We add to our tire cost \$300 daily to thus save blow-outs for you.

Loose Tread Tax

Tread separation usually occurs close to the breaker strip-an essential fabric used at the base of the tread in all standard tires.

We use a patented fabric, woven with hundreds of quarter-inch holes. The tread rubber, in its plastic state, is forced down through these holes. Then the tire is vulcanized en

Thus hundreds of large rubber rivets are formed to prevent tread separation.

\$50,000 was paid for rights to this method, and no other maker employs it.

We Pay It All.

All this extra expense is to save you expense-save you many times what it costs us. At one time-on this account-No-Rim-Cut

tires cost one-fifth more than others.

But multiplied output has cut cost of production until it balanced this extra cost.

Now no standard tire of any type costs less than No-Rim-Cut tires.

So you get these savings, without a penny of tax, by simply insisting on Goodyear No-Rim-Cut tires.

Read the facts again and judge if you want them. If so, bear in mind that no other tire gives them. Our dealers are everywhere.

"THE POWER OF PUBLICITY HAR-NESSED FOR USE IN THE HOME."

HAT is a clever writer's definition of Classified, or Want Ad., advertising.

Pretty good definition, I'm thinking.

That's the idea-"for use in the home." This newspaper goes into the homes of thousands of people each day. People read its Classified columns. They know the news value, to say nothing of the business possibilities, of Want Ad. adver-

There isn't a thing under Old Sol that can't be advantageously and profitably advertised in the Classified columns.

Turn to those columns. Suppose you do it right now. Whether you want a Position, want Help, want to buy, swap or sell-you'll find a message from somebody, somewhere in those columns, that will be vitally interesting to you.

If you've a Want, and if you would advertise that Want, in a sure, quick, inexpensive way, try a little ad. in the Classified columns.

Take my word for it-you'll not regret the

CANADA'S BEST YEAR

Are Bright for 1915.

London, Nov. 8. - Colonel Davidson, land commissioner for the Canadian Northern Railway, after surveying the position here, says 1915 will be Western Canada's best emigration year. A very large number of farm laborers will be able to get well-paid work, owing to the excellent crop, maintained by the company, the largely-increased acreage and area of schedule that should be maintained fall-plowed land. The country northwest of Battleford and between Sask- engineer, and the amended schedule atoon and Calgary is proving especially attractive. The company intend to put more new townsites on the mar ket next spring.

CUT OFF EAR.

Montreal, Nov. 8.-When Joseph Romaine was taken to the Western Hospital in the ambulance yesterday he carried with him his right ear, wrapped in a handkerchief. After his admission to the institution when the doctors found that the loss of an ear was the only injury sustained in his fall from a scaffold, they sewed the member to its accustomed place at the side of Romaine's head, and they anticipate that the ear will be as good as ever. The ear was cut cleanly from the head when Romaine in his fall struck a guy wire.

committee on Friday afternoon. The findings of the engineer as to speed Dundas street, etc. and service have been recommended have been sent on likewise for the in-T. H. Smallman, Director Spencer Manager C. B. King, and Superintendent H. Humeston, having been present at the conference. The company will report on the feasibility of the plans of the engineer at another conference

on Friday afternoon next. There was little discussion on the changed routes and schedules. When the question was brought forward, Manager C. B. King asked the reason of the engineer's changes from the present system. He was informed by the aldermen that the complaints of the citizens and a comprehensive report on the entire street railway question had been the reasons.

To File Objections. Instead of discussing the routes at length, as was at first intended, with the street railway officials, the rerailway to file its objections or ac-

ceptance within a week. Vice-President Smallman admitted that there had been many complaints of the South London service in particular, but asserted that the desire of the company was to suit the convenience of the greatest number of its patrons-the public.

In referring to the South London service, Ald. William Spittal asserted that traffic had been forced onto the Ridout line, that formerly had been handled by the old belt line. The "foreing" was denied by Mr. Smallman. Ald, J. H. Saunders raised the ques-

tion of the Central avenue service, claiming that in place of the old 7minute service there a variable one of from 15 to 45 minutes was now the On the assurance of Mr. Smallman that the question would be immedi-

ately taken up by the street railway and a report presented to the committee next Friday, the question was dropped for the time. Ten More Cars. The feature of the new service rules

the extensions are made next summer, to which London, through annexation, is now entitled, if the service is to come up to the standard set by Engineer Ashplant.

The institution of practically the old belt line service, the reversal of the Ridout street line, and the change of the Oxford line back to its former route, are the outstanding features of the route report.

The Proposed Schedule. The time difference on the different routes, showing the present schedule under the existing order of the city recommended now, is shown below.

The acid will be neutralized and the fermentation stopped almost instantly, and your stomach will at once proceed to digest the food in a healthy, normal manner. NEW YORK, Nov. 8.—The stock list yielded in an orderly manner T hebuying was principally in the nature of short covering, and while speculative sellers were active, still much liquidation was in evidence. There was not much news relative to the status of affairs in Mexico, but it is nevertheless realized that conditions in that quarter are critical. World-wide lack of confidence and unsatisfactory investiment conditions, and slackening trade tendencies, we believe, will exert a promounced influence on stock

will exert a pronounced influence on stock

'SLOWEST IN 19 YEARS'

This Is Township Officer's Characterization of This Year's Council.

J. H. Hodgins, reeve of London Township, is in the city today in regard to the agrement made between the city and the county shortly after to reimburse the taxpayers of the county for the loss of the Ealing school, which was taken into the city.

May Go to Board. Mr. Hodgins states that after repeated requests he is unable to collect the money, and threatens to take the matter before the Ontario Railway and Municipal Board, to compel the city to turn the money over to the township. "I have had dealings with the city for nineteen years," said Mr. ously, in the collapse of a scaffold on Hodgins, "but I never saw a bunch of aldermen as slow as these are."

The Chairman's View. Ald. Percy Moore, chairman of the inance committee, explained the cause of the delay as being due to the fact severely hurt. All are being cared for here. The bridge is under constructhat there were a number of other adjustments of a somewhat similar nature to be made, and that the city did not want to make the payments piece-

There was money coming to the county in respect of statute labor done on the roads, local improvement depentures, etc., and as soon as the city auditors had computed the Inspection tests of milk by Sanitary amount due the money would be Inspector James Lutman, of the board handed over in a lump sum.

# DEATHS AND FUNERALS

Funeral of John McGinnis. The funeral of John McGinnis, formerly of William street north, and whose body was found beside the Grand Trunk tracks between Dorchester and Ingersoll, was held at 10:30 this morning from Logan's undertaking rooms to St. James' Presbyterian Cemetery. Rev. J. E. Hawkins conducted the services.

Alexander Farquhar, a former well-known and highly respected resident of Lobo in the 90's, died in Arden, Wash, who inaugurated a milk boycott here when the dealers boosted the price to nine cents a quart today sent a circular letter to all city clergymen asking them to join in the fight. He asked that they take the matter up with their cengregations, and try and get them to join in to Arden, where he has since resided. While in that city he acted in the capacity of postmaster. He was born in Wick, Scotland, July 5, 1855. Three sons. tions, and try and get them to join in an absolute boycott, which he is satisfied would make the dealers back down with-William, Harry and Robert, survive. Interment was made Tuesday, Oct. 28. His His worship says that he wife predeceased him in 1906.

> Seven-Year-Old Boy Dies. Ralph Ernest McLaren, the 7-year-old son of Mr. and Mrs. Hugh McLaren, died on Friday at the family residence, 737 King street. The funeral will be held at 2 o'clock Sunday afternoon to Mount FOR KILLING TWO Pleasant Cemetery.

ssays is invaluable as a not too comorehensive history of social evolution. In readable and remarkably entertaining style the author makes very likely guesses at the origin of social and moral codes. He is evidently a very liberal evolutionist, and the early chapters of his book will be delightfully instructive classes of readers. He takes a fairly moderate and unbiased view of Socialism and there is much in his argument that economic fact is vastly mightier than ethical sentiment. There is something of a Nietzschean brilliance, piercing vision and intuitive grasping of basic facts and principles about "A Rifleman," but not everyone will admit that increasing industrial efficiency will ultimately terminate in international strife as he attempts to show, in a unique argument for the increased arming of the English nation His points are well-taken, but hardly proved.

He believes that the English and other Caucasian peoples as races will not reach their maturity for at least a century yet In the meantime, the increasing efficiency, industrial and otherwise, of these races will intensify their rivalry in ev ture, as well as in economic matters, that ultimate resort to arms will be un avoidable. He says:

The development of German, Russian and American culture-levels, not to speak of a possible analogous development of China under European and American inuences, must inevitably cut into the conomic resources of the dominant ulture-level. England, with the result that we must either fight to defend our markets or permit the decline of our comnerce without an effort for its defence And, again, the economic and racial antagonism between France and Germany Austria and Russia, and the various other states, must inevital y with the sharpen ng of trade rivalry, due to the increased mentum of industrial efficiency, result

There is a great demand for it for wigs, toupes, and transformations for old men and women, who like to have a more luxuriant crop of silver hair than nature has allowed them. All the fine hair is European. That from China is coarse. "The perfection with which wigs now made accounts for the tremendous increase in the use of false hair, that false hair is not obvious, the prejudice against it is dying . There are also

HERE NOVEMBER 14

The floor at the rear of the hall suddenly sank about six inches with a noise which could be heard all over the hall. There was confusion at once, and someone yelled "Fire," whereupon a rush was made for the door; but Alf. King and R. S. Cull had presence of mind enough to block the way, and called out for everyone to stop, which they did. The people were then allowed to file out, one by one, and not a single person was injured. Whitby, Ont., Nov. 7. — For five hours this afternoon those interested in the case of Stead M. Gamble, of Toronto, financial secretary of the Structural Ironworkers' Union, waited impatiently while the jury wrangled and argued in an attempt to reach an agreement. At 12:40 Mr. Justice Britton concluded his charge, and without waiting for dinner the jury filed into the jury room. As the afternoon wore on hope of a unanimous verdict being reached was abandoned. At 5:40 the jury again appeared. "What is your verdict?" asked the court.

"We have not been able to agree, your lordship," replied the foreman. "Is there no hope of an agreement?" the judge asked "None whatever."

Judge Britton thereupon dismissed the jury. It is understood that two jurors held out for conviction and ten

ARTS WON RUGBY GAME

Annual Field Day Sports of the West ern University Proved a Big Success.

One of the most successful field ays ever held by the Western Uniersity was staged yesterday afteroon in Tecumseh Park. To the stirring strains of popular college airs by the Seventh Regiment Band, the students marched in column to the park at 2:15 o'clock for their annual day of ubilation. Yells and hoots, at times frowning the music of the band, which vas heroically doing its best, enlivened he proceedings considerably.

Interest in sports was keen, and the entry lists in all events were well Competition was of the keenest, and many hard-fought contests were pulled off before the cheering 'fans' in the grandstand.

# FOREIGNER STABBED

Man Who Attempted To Play Peacemaker Seriously Wounded.

[Special to The Advertiser.] St. Marys, Nov. 8 .- A serious fight took place late Thursday night in the vicinity of the C. P. R. Hotel on Jones street between several foreigners, Austrians and Bulgarians, and some telephone wiring men. One of the telephone men received a knife thrust close to the shoulder, which pentrated the clothing and grazed the flesh. In the midst of the affray, while other missiles were flying, Mike Jakik, who runs a boarding-house for the foreign element who are working at the cement plant, went amongst the combatants as a peacemaker. He received a severe stab in the arm, which cut an artery, and the blood flowed profusely. He was immediately taken to Dr. Brown's surgery and had the wound dressed. Dr. Brown stated that the knife wound bled so profusely that in another ten minutes Jakik would have expired from loss of blood. The police have the case in hand, and Chief Young states that the trial will come off before Magistrate Lawrie the first of next week. For some time past the citizens have been congratulating themselves in securing so peaceable a foreign element in the various quarries and cement works in town, but Thursday night's calamity will change this opinion. The telephone wire men were not foreigners.

A session of the water, light and the end of the second quarter the game ended 2 to 0, with the Arts on the cheerful end. The game was weird in detailed report with man plan of spots. The above illustration, taken from Westminster Bridge, shows the magnificent and unique site, the option for which Lord Grey has secured for the Dominions Overseas, should the idea appeal to them to erect thereon a great Imperial building, and which will be as visible, suggestive, and inspiring as St. Paul's. As will be seen in the illustration, the site is in the very centre of the Metropolis—halfway between St. Paul's Cathedral and Trafalgar Square, flanked by the Courts of Justice. Somerset House, and the other great institutions of the city With the exception perhaps of the Mansion House, probably more people pass this point during the day than any other in London, while north of this great island site is a splendid new street. Kingaway, which in ten or twenty years time (a very short span in the life of a nation) will be ope of the finest streets in Great Britain. The amount to be paid for this site is, according to a leading Montreal paper. "a surprisingly low one, a price at which land could not be got on St. James' or St. Catherine's Streets."

London is not only the centre of the Empire, but is becoming more and more the magnet of the world. Tens of thousands, not of needy aliens, but the leading citizens of both hemispheres visit the city every year, and pass this spot in the heart of her bus est thoroughfare.

As does a business house, so must a nation advertise her wares, and no one can accuse Canada of not having set the pace. Here we have an opportunity of taking a leading part, in not temporary exposition, but in a great monument in stone, which will secure a permanent exhibition of her vast resources and which would focus Imperial trade in a manner otherwise unobtainable. To quote the Australian World, "Such a colossal building as the one contemplated, with its commercial administrations, aims and possibilities, would come to be regarded as the embodiment of the Empire in such a way that even the most unimaginative, unthinking and unreflecting person would be forced to realise what the British Empire is, and what it means."

It rests with the people of Canada to say "Yes," or "No."

# LIFE'S STRUGGLE

Mrs. Stewart Tells How She Suffered from 16 to 45 years old—How Finally Cured.

Euphemia, Ohio.-"Because of total ignorance of how to care for myself when verging into womanhood, and from taking cold when going to school, I suffered from a displacement, and each month I had severe pains and nausea which always meant a lay-off from work for two to four days from the time I was 16 years old.

"I went to Kansas to live with my sister and while there a doctor told me of the Pinkham remedies but I did not use them then as my faith in patent medicines was limited. After my sister died I came home to Ohio to live and that has been my home for the last 18 years.

"The Change of Life came when I was 47 years old and about this time I saw my physical condition plainly described in one of your advertisements. Then I began using Lydia E. Pinkham's Vegetable Compound and I cannot tell you or any one the relief it gave me in the first three months. It put me right where I need not lay off every month and during the last 18 years I have not paid out two dollars to a doctor, and have been blest with excellent health for a wowoman of my age and I can thank Lydia

E. Pinkham's Vegetable Compound for it. "Since the Change of Life is over I have been a maternity nurse and being wholly self-supporting I cannot over estimate the value of good health. I have now earned a comfortable little home just by sewing and nursing since I was 52 years old. I have recommended the Compound to many with good results, as it is excellent to take before and after childbirth."—Miss EVELYN ADELIA STEWART, Euphemia, Ohio.

# Twelve Years Horrible Torture

Ontario Lady Suffered Tortures for 12 Years With Burning Eczema. "Fruit-a-tives" and "Sootha-Salva" Completely Cured Her.

MISS LAURA E. MATTICE.

NEWINGTON, ONT., Jan 21st, 1913 I was a dreadful sufferer from that awful complaint Eczema, or Salt Rheum, and this trouble bothered me for about 12 years. My hands and arms were chiefly attacked, and the pain and irritation were terrible. I consulted several doctors and tried every remedy I heard of, but nothing did me any good. Last June, when in Ottawa, a friend asked me to try "Sootha Salva" Ointment and to take "Fruit-a-tives" at the same time. I had little hopes that this would be any better than the other remedies, but after I had taken two boxes of "Fruit-a-tives" and used one box of "Sootha-Salva," I was entirely cured and all the irritation and annoyance left me. My hands have been, ever since, perfectly free from the Salt Rheum, and I have had no return of the disease. I look upon the cure as wonderful, inasmuch as no physician was able to cure me, and I had tried every remedy that I had been told about, yet without the slightest benefit, until I used "Sootha-Salva" Ointment and took "Fruit-a-tives." "Fruit-a-tives" cooled the blood, and practically relieved the disease and the Ointment completed the cure.

I cannot sufficiently thank the proprietors of these medicines for my relief and I make this statement with the hope that some sufferers from Chronic Eczema or Sait Rheum, will read my testimony and try this wonderful ointment and "Fruit-a-tives" and get well. No one can estimate the torture of this terrible disease who has not suffered from it, and I want the good news, that a remedy has been found, to be known everywhere. (MISS) LAURA E. MATTICE.

"Fruit-a-tives" and "Sootha-Salva" will cure any case of Eczema, no matter how severe or how long you have suffered. Eczema is caused by impure blood; chronic indigestion, constipation and nervousness, but there is usually a tiny parasite or germ which attacks the skin and causes the burning and itching. "Fruit-a-tives" removes all impurities from the blood, tones up the stomach, improves digestion, and regulates the bowels. "Sootha-Ealva" kilis the germs of Eczema, allays the burning and inflammation, and stops the intense itching. If you are suffering with Eczema, no matter what you have tried for it, take the advice of Miss Mattice and use the wonderful combination of "Fruit-a-tives" and "Sootha-Salva."

"Fruit-a-tives" is sold by all dealers at 50c a box, 6 for \$2.50, trial size, 50c box. Sent on receipt of price by Fruit-a-tives "Sootha-Salva" is Limited, Ottawa.

"A woman may be old at 18 and young at 80," says Mrs. Margaret Holmes Bates, prominent Chicago clubwoman, "Years don't matter. Didn't Ninon de L'Enclos have a proposal at 90?"

The youth of our women is more lasting than it was a generation ago, because we are becoming acquainted with simple physiological laws. When the first aging marks appear—wrinkles, baggy cheeks, neck and chin—we realize that the cause is a loosening of the skin and softening of the tissue underneath. We know the cause must be removed. ### GASOLINE IN STOVE CAUSES BAD FIRE

[Special to The Advertiser.] Lucknow, Nov. 7. - Fire demolished the home of Thomas Agnew this morning about 6 o'clock. Mr. Agnew got up at his usual hour and, filling the stove with light wood, poured coaloil on it. He then stepped outside the door to watch the early train pull in. When he turned back to the house great was his surprise to see flames pouring from the roof. He aroused the rest of the inmates and they were soon out of the burning building. The flames spread rapidly and soon it was seen that nothing could be done to save the building. Most of the furniture, bedding, etc., was de-stroyed. There was \$400 insurance on the building.

Billy the Kid" Caused Revolver Smoke To Float About Grand in Clouds.

Thrills without number were furnished the fair-sized audience which witnessed the production of the great western melodrama, "Billy, The Kid," at the Grand Friday night. The plot was most intense and gripping, beginning with two murders and a hold-up in the first act, and ending with the dramatic shooting of the villain and a number of his confreres.

Forced into outlawry by the murder of his father and nother in the first act, he became a most precocious youngster. The murder was rendered necessary by the fact that both the slain actors were needed in another capacity in the next act, but failing to realize this, the bold ad kid started out to avenge their deaths. Much revolver shooting re-

sulted, bad men in abundance coming on the scene. Attempts on the life of The Kid were frequent, but he cleverly defeated all his enemies, although on one occasion he had to shoot up a saloon to do it. When the curtain went down on this act the audience was choking, partly from emotion, but mostly from revolver smoke. A Mexican greaser, who constantly exploded 'sacre," was a feature of the play. # Lloyd George Defines His Program To Strangle the Land Monopoly

Says the Cabinet Is Absolutely Unanimous --- How the Farmer and Laborer Are Both Protected ---A New Ministry of Lands--- State Will Control Rents.

Mr. Lloyd George, speaking for an "absolutely unanimous' cabinet, followed up his outline of land policy at Bedford by a momentous declaration at Swindon, where he detailed the Government proposals for dealing with the whole problem of the land.

Based on the great principle of resumption by the state of the control of land monopoly, these are the outstanding features of a great scheme:

A ministry of lands is to be set up which will have the control and supervision of all questions dealing with the user of land in town and country alike.

This ministry will take over all the functions of the present board of agriculture with widely extended powers.

Acting through judicial commissioners, the ministry will have authority to deal with small holdings disputes between landlords and tenants, simplified system of land transfer, reclamation, afforestation, and uncultivated land.

Afforestation schemes for waste land will be carried out on driving the laborer into the town to the systematic lines adopted on the continent.

The land ministry will have full powers to acquire uncultivated land at a reasonable price, and to take all steps necessary for their cultivation up to the limit of their possibility.

The commissioners will have power to fix the price of land required for public purposes.

FOR THE FARMER (TENANT).

Security of tenure will be established for the farmer through the powers given to the commissioners over ejection from

If a notice to quit cannot be defended, the commissioners will treat the eviction as capricious, in which case the tenant would go in times of unemployment—"no be entitled to compensation and damages.

Further, if the notice is deemed to be purely wanton, the

commissioners will have power to declare it null and void. Sale of an estate will not be regarded as justifying a notice to quit, and if such notice is served the seller must not alone compensate the tenant for his improvements, but also for turning

to the commissioners against the existing rent, or against an increase in rent. The appeal of the large farmer will be against increase of existing rent.

If agricultural wages are raised through state action, the farmer can appeal to the commissioners for a reduction of rent. An amendment of the game laws will provide protection for the agriculturists.

The cumulative effect of the provisions for farmers is that under the new powers it will not be easy to turn a farmer off the land so long as he does not farm badly.

FOR THE LABORER. A living wage, decent houses, reasonable hours, and a pros-

pect of a bit of land are to be secured by state action.

The state will establish a minimum wage, suitable to conditions, and if the farmer thinks he cannot afford to pay it, the commission, on his appeal, will have power to abate his rent to enable him to do so.

The commissioners will also have power to regulate the hours of agricultural labor so as to render them reasonable. As to houses, of which it is estimated 120,000 are wanted in

rural parts, the state itself will build them. Money for the housing scheme is to be found in the reserve

fund under the national insurance act, which is to be adequately safeguarded.

An economic rent will be charged for the houses provided, so that nothing will fall on the taxpayers. This will be a moderate rent, for the money will be obtained cheaply, while the land will

be secured at a fair price to be fixed by the commissioners. Every house must have a garden sufficient to enable the occupier to supply himself with vegetables all the year round.

Housing provision will not be confined to agricultural laborers | of 86, was the eldest of a family of six. In 1845, at the age of 17, he startalone. "Do not run away with the idea that the rural program has nothing to do with towns. It is a fact that you have low wages in the country, and it is a fact that you have got land out of cultivation in the country and where formerly hundreds of people seek employment. # Bottling of Radium Rays Is Great Discovery in Medical Science

Sir Frederick Treves' Announcement -- Expense Is No Longer Prohibitive--- Emanations Are as Useful as Radium Itself---London Institute's Triumph.

A discovery of far-reaching impor- | would represent £17,200 worth tance to medical science was announced at the Radium Institute, London, One

by Sir Frederick Treves.

Briefly, the experts working at the institute have succeeded in "bottling" radium emanations in such a way that way, with the same results, as the of their precious substance exclusively radium itself.

Further, a way has been found of and remarkable cures have been effected by its means.

In order that the work of the Institute may be extended, Lord Iveagh and Sir Ernest Cassel, through whose generosity it was built and equipped, have purchased the whole of one side

of the street in which it stands.

"A complete revolution in the future of radium." In these words Sir matism, and gout. Frederick Treves, the distinguished surgeon, announced the momentous discovery to a small party of journalists at the Radium Institute in Riding-

"There comes of the radium a gas called the emanation, which has ex- got marked benefit. actly the properties of pure radium, I-venture to claim for the scientific members of this institute the credit of having demonstrated that. We have proved now-the discovery was made some months ago, but nothing was said about it-that for curative purposes the emanation of radium is as

efficient as the radium itself. "Radium gives off these emanations constantly. The amount of emanation depends on the amount of radium that is used. The emanation never weakens the radio-activity of the piece radium from which it exudes. It is like the burning bush of Moses-inex-

Mr. A. E. Hayward Pinch, the medical superintendent of the institute here volunteered the information that, according to most reliable authorities, an atom of radium would only shed one-half of its radio-activity in something between 2,000 and 2.500 years so that it would be a good many generations ahead before there need he any worry about the degeneracy of the radium actually possessed by

Captured and Stored. But more marvellous than the discovery that radium emits gases of ficiency are the remarkable inventions made by the institute staff to capture and confine the emanations in tubes

plates, and bottles. Sir Frederick Treves showed the company some flat plates, about as large as two postage stamps, in which 50 or 80 milligrammes has been sealed. These can be sent out to country doc-

tors who want to treat patients.

The emanation loses its radio-activity very rapidly, declining to onehalf of its original strength in three and a half days, Still, the doctor in Edinburgh who wants to apply the equivalent of 50 milligrammes of radium to a patient can have a tube sent to him overnight which will represent that strength on arrival to him the

Six Guineas for 24 Hours. Fifty milligrammes of pure radium would cost £1,000; 50 milligrammes of radium emanation, of equal curative powers to radium itself, would cost him six guineas for 24 hours' use. This is bringing radium treatment, where there is no radium, within the reach of the most modest purse. "During the last ten days," remarked Sir Frederick Treves, "the institute has sent out thirteen pieces of appara-

to this work. Sir Frederick Treves frankly said he charging water with the emanations, could not go beyond the expression "apparent cure" which he had applied last year to the results of radium treatment on cancer, tumours, etc. though the observationns of the past year were "very hopeful."

Then he launched out on another new departure. The emanations that the institute had succeeded in capuring to send out into the country had been found to assimilate water, and the institute was now able to supply a radium emanation water that was being used experimentally, with promising results, in cases of neurasthenia, rheumatic gout, rheu-

Made up to the strength of one millimetre of emanation per litre, this water was from 4,000 to 5,000 times as strong as the water of the bestknown artificial spa, and out of every hundred cases tried, forty per cent.

Mr. Pinch related two or three instances in which patients suffering from "affections of the joints" derived benefit.

As good a proof as any of Admiral Dewey's heroic qualities is the stern resistance he has shown to the wheedlings and bludgeonings of editors and publishers in the years since he demolished the Spanish fleet in Manila Bay. mellow in his memory to its proper hue in a life full of incidents as vivid. Admiral Dewey comes of Purltan stock. He is from a Huguenot family named Douai, who sheltered or some largest federal ships. Her crew of 35 generations in Kent under the name of Duee, and became Deweys when religious persecution drove them abroad they must be, and the Hartford was once more to New England, Those who like to see the man in the boy will be satisfied to know that young Dewey gloated over the life of Hannibal, was good at watersports and mathematics, and knocked out a brother midshipman who insulted him soon after he entered the navy. This he did in 1854, when Britain and France were the rival world powers; when a united Germany and a united Italy were still dreams; when steam frigates were still an innovation scoffed at by the American veterans of 1812, and Japan was just being opened to western civilization. .. As a midshipman he went on a cruise to the Mediterranean in 1858, and there met the officers of European navies. He found that even then the older British officers thought wooden frigates and ships of the line were not to be improved But he learned something on that trip. He found that in the habit of chewing tobacco the officers of his service were unenviably alone. He be came convinced that it was a "filthy vulgar habit, in which no officer or gentleman would indulge," and, arthough it required "a good deal of

fortitude," he gave it up.

The stir in his life began with the

The way to New Orleans was dark, after the boom across the river had been cut by a small vessel with amazing bravery under two hours of murderous shell-fire. It was such a fight as will never be repeated, except perhaps on a film. Down the confined course of the estuary floated the confederate fire-

ships. The blaze they made gave light for the confederate forts and fleet to shell Farragut's squadron. Farragut's vessels, gaining inch by inch in the melee, poured out broadside broadside; his mortar-boats blazed away so busily that they sometimes had nine shells in the air at once: and all the while the confederate ram. # Some Good Stories By Lady Southwark

[Christopher Graham in London Daily News.]

"Social and Political Reminiscences." By Lady Southwark. Williams & Norgate. 12s 6d net.

One of Lady Southwark's test stories is that of a practical joke played upon Lord Southwark by that singular genius, the late Sir Edward Law. Lord Southwark had been seeing Lord Halsbury off from Homburg, and discovered, when the train was gone, that all his luggage had been left behind on the platform. He promptly had it forwarded, and telephoned through to Frankfort to Sir Francis Oppenheimer, the British consul-general, asking him to do his best for it and to let Lord Halsbury know. A day or two afterwards he met Sir Edward with a letter, in his hand, and was terrified to be told that it was from Lord Halsbury, who said he had seen his luggage most carefully labelled for London, but that some fool had "upset all his arrangements by having it forwarded on to him, and it is now following him all over Switzerland." The unhappy Lord Southwark spent the afternoon cycling wildly between Homburg and Frankfort, only to find at the end of all that Lord Halsbury was exceedingly grateful, and that Sir Edward, who had seen out of the tail of his Irish eye what was going on at the station, had concocted the whole

When the gentlemen joined us in the drawing-room later, Mr. Bright walked straight across to where I was sitting, and, making me a profound bow, held out his hand, saying, "I was very rude to you in the drawing-room. The navy question is a case in point. ston Churchill, as the head of the admiralty, has expressed diametrically opposite opinions as to the manner in which Canada should solve its own problems of naval defence. Why has he poxed the compass?

Within three years the London Times, the London Morning Post, and other heartlest terms of (1) The Laurier naval act, which established the nucleus of a Canadian navy, owned and controlled by Canada; (2) The Borden navy bill, providing for a direct cash contribution to the admiralty and no Canadian navy; (3) The action of New Zealand in abandoning direct contribution and adopting the principle of a local fleet unit. Only a short time ago the 'missing link' brought to light at Pilt Down, Sussex, by Charles Dawson, shows the female skull of a sort of human ape, with a receding chin, heavy simian teeth and very large and flat cranium. No doubt, in evolving from the simian stages, these massive and protruding jaws and strong teeth of the gorilla have degenerated to those of mankind. But there is no cause for regret

Degeneration Marks Progress. "The lesson to be drawn is that

some form of degeneration is the necessary accompaniment of progress. This evolution is accompanied by effects on the individual human organism which are often far from But still, if a person has a normally developed nervous system there is little doubt that the pleasures of life outweight its sorrows. I do not believe it is so much fear of death as a desire to live for the pleasure of living that keeps so many of us from self-destruction. And this applies to all classes-even Schopenhauer says that happy faces are more often seen among the poor than the rich. The life of a dyspeptic and bloated bondholder compares very unfavorably with the lively jollity of a factory girl Thus, it is seen that happiness depends more upon a favorable nervous structure than upon outward environment and a large hanking balance.

'Now comes the great question. If this favorable nervous structure cannot be induced by taking thought, is it at the present time able to support a large proportion of happiness, or has it undergone regeneration in a respect so vital to the well-being of human As we cannot know at this day the working of brains other than ou own, this question cannot be fully answered. But as one of the chief essentials of scientific discovery is to interrogate Nature in the right way, we can form an indirect answer. Anyone who imagines that these are known facts which indicate a diminished capacity of the nervous system to sustain happiness founds his judgment upon a pessimistic diathesis of

which he is a victim.

Nordau Condemned Wholesale. "It is now some time since Dr. Max Nordau created in America furore by his book 'Degeneration.' Nordan con demned wholesale and in a totally unwarrantable manner. He saw signs of degeneration in Wagner, Nietzsche, Zola, Ibsen, Tolstoi—in fact, in the greatest brains of the century — and said that such men 'were unfit to exist as members of a civilized com-

"When a writer collects a group of dissimilar persons under the general appellation of degenerates he is not far from meriting the stigma himself. So it is with Nordau. He takes a totally unfortified and distorted view of his age. 'We stand now in the midst of a severe mental epidemic; a sort of black death of degeneration and hysteria.' He goes on to say, too, that every man is now called on to do five to twenty-five times the work demanded of him half a century ago. This is, of course, mere hyperbole in these days of eight hours and antisweating legislation, and when machines bring a thousand-fold greater return; thus relieving humanity of

Nordau, in fact, intended his work to expand the theories of Lombroso. who alleged that crime is chiefly due to the existence of a certain type of degenerates who are criminal. there are not sufficient facts known that will allow any immediate connection between a degenerate struc-ture and criminality. Indeed, all that can be said is that society does not absorb any abnormal person with same facility as a person of usual de-The Medical View of the Case.

"Now let us take a medical view of the case-an optimistic view. The disharmonies of life result in irritation. The existence of ungratified desire is one of these hisharmonies; disease, old age and death are others.

Metchnikoff in his Essays on the Philosophy of Optimism" treats at great length on the phagocytic theory. These phagocytes, he contends, abound in the fluids of the body, where they devour noxious bacteria and cause immunity from disease. Now Metchnikoff believes that these beneficien microbes in old age become destructive and attack the tissues of the body itself, and so by nefarious treason detroy the organism which they have, up to then, defended. As a case in point he refers to the whitening of the hair. Color of normal hair, as every-one knows, is due to quantities of pigment. With old age and the outbreak of the phagocytic rebellion, cer-tain hair cells become suddenly active and develop into phagocytes, which swallow this color matter and go off

to other parts of the body. "The hair, having the pigment removed, is left colorless. In the same way the nerves, the kidneys, the liver and the arteries are attacked by the phagocyte. To destroy them would be dangerous, for the body would have no defence against disease and it would The solution lies in n succumb. the injection of sera, which would strengthen the tissues and renoer them immune to phagocytic action. In the supposition that sleep and fatigue are engendered by multiplication toxic substances in the organism has been argued that an anti-toxin be injected to alloy these symptoms. In the same way Metchnikoff suggests appiness - insarity, cancer and or ain number of useases, such as ppendicitis, neurasthenia, etc., which, is stated, are increasing.

Many Diseases Wiped Out, "It appears characteristic of the ommon mind that attempts are usully made to prove the increase of certain diseases, and to infer national degeneracy therefrom. But it apears to be forgotten that other diseases are being wiped out, and no theory of human improvement appears founded on that fact. Changed conditions cause a readjustment of the ground for argument unless it can be shown that disease as a whole is more prevalent and more virulent than in times past. And this at present juires to be demonstrated. Such terrible afflictions as leprosy and typhus civilized countries—and tuberculosis is rapidly diminishing. Competition in malignant microbes is diminishing. struggle for their exas the istence is rendered easier - those formerly held in check are now able tion of the heart, the liver, etc., could

o flourish unexpectedly. "So, with the destruction of infectious diseases, every one, of necessity will die of insanity or cancer. If the recent announcements in the papers prove true, the latter can be treated as bacteriological disease.

"I doubt if insanity is also not in the same category. It is said cancer is increasing. The answer to this is passed the prime of life; then, too, those most liable have some well-defined organic weakness. Now, in the improved hygienic condition of humanity, the proportion of the aged is greatly increasing, and, as to organic weakness-there are people that would be apt to be carried off by other discases in times past whose maladies malignant microbes. Strassburger es- are now held in check by modern sciimates that 150,000,000 of these are

Dr. Hunter states 'many an imbecile owes his existence to the act that his parents failed to die of tuberculesis.' Also the standard of sanity is now far higher than it was ized t the over-ripe age of 185; Draakenformerly-many persons now considered to be imbeciles would then have Westminster Abbey on the strength een regarded as sane, if erratic.
"There is certainly no reason what-

It is, of course, on account of this class that the vastlyincreasing interest in eugenics is being taken. Measures are necessary to prevent the propagation of these unfortunates, many of whom in the old days would have died from neglect.

Is Neurasthenia Increasing? "Then we have a wide range minor disorders, known as 'nerves, relative proportions of various dis-eases to each other—but there is no tiveness, etc. It is not easy to find out tiveness, etc. It is not easy to find out whether these cases are increasing or not. It must be remembered that throughout the Middle Ages 'demoniacal' possession was everywhere comtnon-all kinds of psychonervous epidemics, such as tarantism, flaggellafever have all but disappeared from tion, dancing mania, St. Vitus' dance, etc., were in evidence. Possibly, however, more nervous weakness is now brought on by suggestion than formerly, which is due to the slow development of a sixth sense.

"Finally, I wish to pening words of this article: Eyes e going.' Sir J. Tweed, president of the Royal College of Surgeons, and the Ophthalmological Society, states, 'I do not see that there is any evidence, so far as the eyesight of the population is concerned, of any physical deterioration of the people.' There is no doubt that the teeth of the people have become worse of late years-the cause is undoubtedly due to the increased use of soft and 'patented' foods and more sugar than formerly. Metchnikoff expresses the opinion that a proper system of hygiene of the mouth will do much toward removing a condition of things which, however, is not an indication of legeneracy.

# The Death of Arthur Chamberlain, Brother of "Joe"

Vigorous Personality and Great Figure in Birmingham's Life-Fought His Brother's Tariff Policy-Became More Radical as His Brother Became More Conservative-His Battle Against the Liquor Trade.

The death occurred on Oct. 21 of of practical licensing reform, which Mr. Arthur Chamberlain, youngest was used with telling effect in dealing brother of Mr. Joseph Chamberlain. Mr. Chamberlain had been ill for some years, and latterly his condition had become so serious as to forbid his further participation in those active pursuits which he had formerly followed with such zest. A few years ago he acquired a residence in Devonshire, and thither he retired to pass the short remainder of his days. The two brothers were much alike

personal appearance, but Mr. Arthur hamberlain had a fresh and wonderfully clear complexion, and it was a little affectation of his (at least until later years) to wear a necktie of a peculiar shade of dull pink. His aloofness and cold austerity were declared in the hard, dry tones with which he would hector a meeting either of magistrates or of shareholders. He always spoke his mind, whether what he had to say was palatable or not. And that characteristic he carried n-to his relations with "Joe." They were closely attached, and Mr. Arthur ment. Chamberlain had a profound regard for his elder brother, but he did not hesitate to fight him tooth and nail as the author of what he described as the "raging and tearing propaganda" of Tariff "Reform." They were nextdoor neighbors in the Birmingham suburb of Moseley, and a wicket gate in the garden fence enabled them to visit each other unceremoniously. Once Mr. Arthur Chamberlain gave to a re-

He pursued his policy so resolutely and with so much success that "the trade" became seriously alarmed. It became much more than a local question. The shock of the controversy could be felt at Westminster, and it was regarded as so ominous as to call for intervention in the interests of Mr. Balfour's Govern-

The inner history of the plot by which Mr. Arthur Chamberlain was superseded in the chairmanship the Birmingham Licensing Bench has never been made public. It is not such an episode as anyone would be proud to recall. It was, however, a significant indication of the ascendancy the brewing industry in the politics of the time. Greatest, Most Glittering, Galaxy of STAR SHORT STORIES Ever Offered the Reading Public To Be the New Feature of the Saturday Advertiser!

# JUST READ OVER THIS LIST OF TOP-NOTCHERS

The writers represented in this list are not only "popular" writers -writers who are capable of producing fiction vital and stimulating enough to rank them as "best sellers" — but they are classic writers, many of them. They have produced, and are producing, the backbone of current American and English fiction.

Many of them are already your friends through some great books from their pens, and you will be anxious to meet them all again.

There is STEWART EDWARD WHITE, who wrote that famous story, "The Blazed Trail," which led the way for all the flood of "outdoor" books we have been inundated with the past decade.

And EDITH WHARTON'S "House of Mirth"-surely you remember the biting, stinging satire on the "joys" of New York society, as well as her latest contribution to literature, "The Custom of the Country."

Have you read "The Awakening of Helena Ritchie," or did you see the great emotional actress, Margaret Anglin, play in it? Then you know the brilliance that flows from the pen of MARGARET DELAND.

Everyone knows REX BEACH, author of "The Spoilers," just as everyone knows JACK LONDON, who wrote "The Call of the Wild."

"The Trail of the Lonesome Pine" has made its author, JOHN FOX, JUN., so well-known that even song writers have built ballads about his pretty story, and GEORGE BERNARD SHAW gets so much newspaper comment that he has become an institution!

MYRA KELLY has made thousands upon thousands of friends by her stories of the little children of New York's East Side; we have a star story by her.

SIR GILBERT PARKER conquered us all with "The Right of Way," that terrible, thrilling life of "Charlie Steele"; as for W. B. MAXWELL, England is "raving" now over his study of a man en-

titled "In Cotton Wool." The really penetrating literary critics of what Herbert Quick terms "the greater Englishry" have hailed "Predestined," a book written by STEPHEN FRENCH WHITMAN, as one of the really superlative literary performances of ten years; we have a story by him that will show you why!

Then there is a gleaming, glittering tale by MARY ROBERTS RINEHART, the woman who cheered up the whole world with her "Seven Days"-you'll like "The Dancer at the Tabarin," which we will soon present.

"Simple Septimus" made every schoolgirl a friend of quaint, quizzical WILLIAM J. LOCKE and ALFRED HENRY LEWIS is simply one of the whole great American family!

"Pigs Is Pigs" is all one has to say, concerning ELLIS PARKER BUTLER-then everybody laughs,

CONAN DOYLE is the same as saying "Sherlock Holmes," his great sleuth character, and JUS-TUS MILES FORMAN, who cut "Tommy Cartaret" out of the perfect crystal of his imagination, tells some mystery stories of the Orient fully as amazing!

As for GOUVERNEUR MORRIS and ROBERT W. CHAMBERS well, our readers tasted the festal fare they provide for romancehungry minds; we need not stop to comment on them!

And there are others—all equally great and interesting, and who will contribute wonderfully to the enjoyment of your WINTER SATURDAY NIGHTS!

"Tonight," said Odeskalki, sulkily,
there is to be a large dinner for men given by a young man who is going to be married. There will be a real lake in the middle of the table, with banks of ferns and red roses, and live ducks ewimming in it. It is impossible to say when the affair will break up, for there when the altair will break up, for there will be a great deal of hard drinking—and not ordinary white wine like this, I can tell you Those young fellows will not have anything but the best imported champagne, costing you, perhaps, six dollars the bottle. The third glass Openta drank at his own instigation.

A few minutes later Openta droppe an armful of plates, and the other waiters cursed him.

Champagne had made its appearance with the oysters. Signs of drunkenness were now beginning to be evident unong the diners. The waiters were receiving onsiderable presents of money, and ecret directions to keep particular glasses filled.

Men left their places, and carried their chairs to more alluring neighborhoods Little groups surrounded the humorists, and roared with laughter whenever they spoke. The remarkable Body-building Power of Bovril. The large diagram represents the flosh and muscle-building power possessed by the amount of Bevril sented by the small bottle.

In a series of remarkable experiments upon human subjects conducted under the direct control of one of the foremost physiologists of the day and reported to the British Medical Association,

the body-building power of BOVRIL was proved to be from 10 to 20 times the amount taken.

In each case the addition of Bovril to the regular diet showed a definite increase in bodily weight -out of all proportion to the Bovril taken.

This remarkable increase was due firstly to the nourishing value of Bovril itself, and secondly to the fact that Bovril possesses the peculiar power of enabling the system to extract from other foods nourishment which would otherwise

With superhuman energy, after the loss of nearly half a million men in Russia, Napoleon had stamped almost another half million out of the soil of France. His general plan was to hold the long line of the Elbe from Hamburg down to "Saxon Switzerland" south of Dresden, and strike at the enemy in detail as their columns appeared. But he was unfortunate in his marshals. He lost his favorite, Duroc, after the indecisive action at Bautzen in the spring. Davoust was left far away in Hamburg. While Napoleon held his own with all his old genius at Dresden, Vandamme sufferd serious defeat at Kulm, Ney at Dennewitz, Oudinot at Gross Beeren and Macdonald on the Katzbach. Hearing that Blucher had crossed the Elbe south of Wittenberg and was swinging round upon Leipzig with Bernadotte from the north-west, Napoleon left St. Cyr at Dresden, and removed to Lelpig, where he had Marmont and Murat with him. There he drew up all the force left him-about 180,000-mainly n convex lines two or three miles south-east of the city, and awaited he approach of the Russians, Prussians, and Austrians under the nominal command of the Austrian Schwarzenberg.

# Does It Pay to Treat Your Employees Well? Does It? Just Ask Cadbury Bros., of England!

Head of Great British Candy Concern Tells of the Results at Bournville of Acting Toward His Workers as Though They Were His Own Children-An Industrial Experiment That Has Yielded Profits on Generosity.

## BY KENNETH WILCOX PAYNE.

Cadbury Bros., Limited, the great English manufacturers of cocoa and candy: Serve hot cocoa and biscuits to girls who come to work before

Serve cold drinks free in departments which are over-heated Pay carfare for those employees who live far from the works! Give free dental and medical advice to all workers!

Furnish swimming pools and compel younger employees to take physical training!

Conduct an educational department and compel all employees under 18 to attend the classes.

Maintain an eight-hour day! And pay better wages than the unions demand!

Cadbury Brothers have developed such an industrial conscience that it has taken Edward Cadbury, one of the proprietors, nearly 300 pages to describe its workings, in a book which he has just published on "Experiments in Industrial Organization.'

Everyone who is acquainted with the Bournville works-the home of the Cadbury concern near Birmingham, England-knows full well that the mainspring of their policy has been a sense of SOCIAL DUTY!" writes Professor W. J. Ashley, of the University of Birmingham.

And Author Cadbury points out: The efficiency of the firm and its employees does not end with the firm itself; it has a wider CIVIC value, in so far as the firm is a unit of the industrial organization of the nation, and the employee plays his part as an

intelligent and capable citizen!" Which is as much as to say that Cadbury Brothers consider an employee to be a MAN, first of all-not merely a unit of industrial energy, to be harnessed, worn out and scrapped as cheaply and quickly

A thorough physical examination and certain educational tests are given to each applicant for employment. All those who are taken on under 18 years must agree to complete a four years' educational course! And the training is not only in subjects that will make the learner a more efficient earner of profits for Cadbury Brothers, but it is also in English history and literature,

arithmetic, French, geography and kindred subjects! Cooking, needlework and the care of children are some of the courses prescribed for the girls. The classes are held at the firm's expense and often during working hours. The firm is in the position of actually PAYING its employees to learn things that will help THEM and SOCIETY directly, and the firm only indirectly, IF AT ALL!

Two physicians and four trained nurses are constantly on duty at the works. Every ailment among the workpeople, however slight or serious, is given immediate attention, FREE OF CHARGE, and the necessary medicines are sold at cost. When a doctor reports an employee's condition requires ! special delicacies are prepared for him in the kitchen of the works!

From this same kitchen more than 3,500 meals are served every day to the employees AT COST! "For," writes Cadbury, " a matter of vital importance to the health and refinement of the workers is the provision of nourishinig and comfortable meals."

Here are directors who show an interest in the REFINEMENT of their employees! The idea is unique, and in carrying it out they have converted what might have been merely an ugly factory into the semblance of a delight ful club. There are libraries, recreation clubs, twenty-four acres of athletic grounds, where tennis, hockey, football and cricket are played. There is a girls' convalescent home in the country, a system of sick aid, and a successfu insurance fund. Three acres of the company's land are divided into small allotments and let out for vegetable gardens at the rate of 12 cents a year per

80 square yards. Then there are vacations-otherwise the employees would not be .ble to keep up their high efficiency. So each worker is given between fifteen and twenty days' vacation a year on part pay. And cheap excursions are especially arranged, so that these vacations may be spent in the country.

All this because Cadbury Brothers feel a MORAL OBLIGATION to their employees. And yet they insist that the economic results ALONE have justifled the trouble and great expense, as the growth of the firm shows. In 1880

they had 303 employees. Today they have over 6,000! "An indication of the high efficiency resulting from our methods," writes Cadbury. "is the fact that the firm is competing with increasing success in foreign and colonial markets, although foreign competitors pay lower wages -the wages of the women workers being in some cases not more than half

those paid at Bournville." In other words, this great new experiment, in the relations boss and the worker, has been a success. IT HAS PAID!

Charles Tellier again disappeared into oblivion and want. Despite his Legion of Honor decoration the inventor still needed food. The Government heard of it again, and it was decided to give him a great banquet. The banquet was given on Feb. 15 last. It was very brilliant and its menu was made of rare and delicate dishes with a dessert of eloquent speeches praising Tellier and his invention. Then the Government believed it had done all that anyone could do for Tellier, for he who was hungry had eaten.

The Old Plan and the New. According to the old system, a tramp who had been trudging the highways during the day could apply in the evening for admission to the casual ward of the nearest workhouse. Here he would be provided with a meal and a bed. The next morning, instead of being set free to continue his journey at once, he would be set to work at some manual task-usually breaking stone or picking oakum. He would other parts of the continent. We are spend all day at that work, with even free from one special phase of necessary meals provided meanwhile, vagrancy which causes no little and on the following morning he would trouble in America. The English be discharged after breakfast. But, as soon as the workhouse gates closed on him, he would be left to his own resources as regards getting something to eat before the supper that in the evening. If, therefore, he happened to meet a charitably-disposed and the same regulations and restric person he could appeal for help on

with to satisfy his hunger during the In a large number of counties the adoption of a new plan called "the way ticket system" has deprived the habitual tramp of this excuse for beg-ging. When he leaves the workhouse he is given a ticket which entitles him to half a pound of bread and an ounce and a half of cheese at some appointed store on his route. A further reform differentiates between the two types of wayfarers. If an applicant for shelter in the casual ward convinces the master of the workhouse that he is not a mere tramp but an honest seeker after work, he is allowed to leave on the morning after admission without putting in a day at stone-breaking. As proof of his good faith he may show a testimonial from some responsible employer given not more than a month previously, or a Every mother should be able to re-, haps, he can give satisfactory evi-

In any case, once he has satisfied the workhouse master that he is really after a job, he is excused the usual day's delay in the workhouse, and can start again after his night's rest with a "way ticket" providing for his meal. This ticket has spaces in the man's arrival and departure and where his next hatting-place will be. It becomes accordingly an equivalent to a through pass, guaranteeing food

and shelter at state expense.

Not Welcome to the Vagabond. This scheme, though a boon to the honest worker, is anything but welcome to the vagabond. He is beginning to ask himself whether, after all, the life of the road is really worth living. For the poor-law authorities have taken the public into their confidence in the matter. Throughout Surrey, for instance, there can now be seen on every official noticeboard a placard entitled "Caution to Beggars and an Appeal to the Public." The text of it announces that the Surrey vagrancy committee has adopted the way and food ticket system, so that "no wayfarer need now want for food during his day's journey." further requests all persons not only to discourage begging by declining to give food or money to beggars. but also to report all cases of begging to the nearest police station. In addition to posting up these placards, the Surrey authorities have printed no less than 100,000 handbills for distribution. Everybody within the county now knows that, if he gives a meal to a beggar, he is really feeding him twice. inasmuch as he had already provided for his needs through the "rates," or

ocal taxes. To make matters worse, from the tramp's point of view, several boards of guardians in Surrey are now making t a rule to discharge no casuals on a Sunday morning. If that would normally be the time for their release, they are detained in the ward a day longer. As Sunday usually gives beggars their richest harvest, this rule has provoked many and vehement maledictions.

The "way ticket" system, when once started, has spread rapidly by its own impulse. One of the first counties, for instance, to adopt the plan was Sussex. Within a few months a large reduction was reported in the number of persons passing through the casual wards of that county. This meant an nflux of the most undesirable class of vagrants into the neighboring counties, which were compelled to adopt the same system in self-defence. So the tramp's map of England is gradually being covered with black splotches, until presently he is likely to be confronted with the alternative of emigration or work.

While this reform has been in process in the country, London has been trying an interesting experiment of its The first step was to standardize the casual wards of the metropolis. Until recently they were under the control of separate local authorities, with the result of wide differences in administration. In some of them the tramp had a much easier time than in others, and a knowledge of these local peculiarities naturally affected his choice of a resting-place. lince April of last year all the casual wards of London have been under the newed laughter, and a voice:

To many thousands of people the mere mention of "Piles' suggests Dr. Chase's Ointment.

Mr. Charles Beauvais, a respected citizen of St. John's, Que., writes: - "For 14 years I have suffered from chronic piles or hemorrhoids, and considered my case very serious. I was treated by a well-known physician, who could not help me, and my doctor decided on an operation as the only means of relief. However, I resolved to try Dr. Chase's Ointment first. The first box brought me great relief, and by the time I had used three boxes I was completely cured. This office is in telephonic communication, not only with the casual wards, but with a number of voluntary relieving agencies. When a homeless person presents a police voucher, the officer in charge decides for which agency the applicant would be most suitable, and arranges accordingly for his food and lodging for the night. A register is kept, and on the following day each case is carefully investigated, and an effort is made to find work for those who are not hopelessly unemployable. If a man refuses to take a voucher offered him by a policeman or to enter the casual ward or institution selected for him, he is dealt with under the vagrancy act, and soon finds himself in prison. Hitherto, the police have always been slow to take proceedings under this act, in view of the absence in many cases of any suitable accommodation for those whom they might find sleeping out. The vagrant could often plead that he had applied at the nearest casual ward, and it was

tation. A hopeful feature of these and other recent changes is the deliberate attempt now being made by public authorities to discriminate between the different types of homeless poor. The chief defects of poor-law administration in the past have been, on the one hand, too little consideration for the unfortunate but deserving, and, on the other hand, too little severity toward habitual and deliberate vagabonds. The tendency of recent legislation, as shown in the insurance act, the estabishment of labor exchanges, etc., has een to help those who are willing to help themselves. -H. W. H.

them the rougher habits of the time. brain, and his health to spending his money. And he had so much money And now, perhaps, I have given some reason why, as a whole, the political career of Labby was not as successful as it ought to have been. When he was refused office by Mr. Gladstone in 1892, it was not merely because the Queen had raised objections. The sovereign in this constitutional country passes beyond his privileges when he tries to put a bar on the selection of his colleagues by a prime minister; and if Mr. Gladstone had really been anxious to have Mr. Labouchere as a colleague, and still more, if Labby had had behind him strong, popular and party support, Labby would have been a cabinet minister. He had certainly deserved the place. One of the curious things about this man who made it almost a fetish to dawdle through life, with the fumes of an ever eternal cigarette, as it were, symbolizing his attitude, was that on occasion no man could put himself to so much fatigue and to so much trouble for his convictions. If you were to take seriously what he says in his letters about his attitude to Ireland, you might imagine that he had no real feelings about the subject except that it was a bore and a lever for the success of his own particular plan for rearranging parties in England. But here again it was all a pose: as a matter of fact, he did care a good deal about Ireland; and certainly no man gave to her more devoted service. I remember still the astonishment with which I watched him as, during a phase of the struggle. he flitted about from one end of the country to the other. There was no small village with an audience of few scores of people on the other. And unlike most men, he was not in the

He laughed at the meal, and enjoyed it, and went to his meeting quite happy. And yet there were few men who were so constantly fussing about the body. He was very stout when first I met him, and as he was rather a short man the stoutness was both apparent and inconvenient. He set himself to work to reduce his flesh, and he would tell you by the hour what things to eat and what to avoid; and he certainly justified his regime by becoming comparatively thin, and remaining so during all the later years of his life. This was the period when the doctors began to tell the world that the thyroid gland, extracted from the sheep, accomplished, amid other marvels, the reduction of flesh; and Labby at once began to take thyroid glands in large quanti- tended.

There was positively nothing English about him except his speech; and even that was French rather than English in its spirit. He fought valiently and persistently for his colleague, Mr. Bradlaugh, but even then people did not take him seriously. I remember the universal titter that went round the House when he said, in portentously solemn tones-and for the moment believe he was quite serious—"This is the law"; it almost reminded one of the devil when he went into the Franciscan's pulpit and tried his hand at a sermon. As Voltaire, who was the author of the immortal story, said, acked unction." Labby always lacked

Another reason of his comparative failure is brought out in that really thrilling chapter which contains correspondence with Mr. Labby's Chamberlain at the time when the first home rule bill was trembling in the balance. Labby, it would be seen there, as in several pages of his life, always concentrated his attention on the personal side of every controversy and on the personal and perhaps the selfish side of every man. He had a perfect passion for intrigue; and he had what was much more dangerous, a perfect faith in intrigue. he had a very firm grasp of principles he could not get away from the personal side of everything. He had an almost childlike faith in the omnipotence of wire-pulling. And thus it was that this brilliant and clear mind often saw questions through a fog.

If you wanted proof of that, you find it in his constant references to Gladstone. To him Gladstone was simply dexterous and rather crooked old gentleman, whose policy was the outcome of his ambition and his hatreds. Gladstone was human, like everybody else, but this is a grotesque misunder standing of his character.

Was there a soft spot in this hard nature? Yes, plenty of them. I have always thought that such hardness as there was in Labby-and there was a good deal-was as much the growth of his environment as of his natural predisposition. The rock was opened owards the middle part of his life by the birth of his daughter, Dora. From that time forward there was a subtle change in the man, though no one would have been more shocked than he to discover that it had been revealed. This should evidence itself not only in the wider and more attractive field of choral concert work, but also in the anthems and solos that we prepare for our Sunday services. I fear some are tempted to stray from "the straight and narrow path," forgetting that certain selections are utterly unfit in our church services. We should remember, always, that our efforts on the Sabbath are part of a diet of worship, and must be in keeping with the services of the day if the work of the choir and organist is to be helpful to those who come to worship God in a reverent manner. I have purposely omitted dwelling on

the subject of the proper rendition of the Psalms and hymns, and the help or hindrance that the choir and organist can be to this part of the musical worship that should largely beng to the congregation. Excellent hints and suggestions have

perhaps in a faultless manner, all the details of expression carefully carried out, but whose singing of the hymns would not create the impression that they had any heart or sympathy in the matter. We should devote at least a few minutes at our regular rehearsal to this, which, if carried out regularly, I am sure, will make our usefulness

felt in a larger manner on the whole From certain quarters we hear a cry of distress, and note with concern the statement that our congregations do not sing as they should. Personally I have no great cause to complain about the congregational singing in the church with which I have the honor to be associated. I am glad to say the majority of our people sing heartily. However, I feel that we cannot afford to allow the sentiment of a few to predominate or to spread; those who would willingly allow the choir to do the work that rightfully belongs to them. The following article, appearing in a recent number of one of our musical journals by Mr. J. Cuthbert Hadden, will bear quoting:

"The reason for the decay of congregational singing is twofold. It lies, first, in the fact that a large number of the hymn tunes in our church collections are beyond the congregational capacity; and, second, in the fact that many people have conceived the idea that it is quite rude to join heartily in the praise. You will see this i you go into a so-called 'fashionable' church, where practically nobody sings. If a man in the pew starts a lusty bass voice or a piping tenor, people around will stare at him as if they had discovered a missing link. To make the organist and the choir responsible. for all this is sheer nonsense. No doubt there are a few organists who prefer the choir to do all the singing. but I believe the rank and file are willing and even anxious to encourage and bring out the congregational

Before leaving this subject, I must strongly protest against the habit of the organist, who, for some unaccountable reason, persists in illuminating his organ accompaniment to the hymns with all sorts of "musical fireworks." Why this is done-unless to "show off" -is still a mystery to me, for if this sort of thing attracts the attention of the audience, it certainly detracts from the dignity of the hymn and the spirit of worship that should prevail. As to Organ Selections.

what about our own organ selections? Have we, with our many church and concert duties, found time to add some new pieces worthy to be included in our repertoire? Or are we still playing nothing but the same old friends that have done such good service in years past? Or perhaps sitting at the console and "filling in" with an aimless wandering over the manuals, waiting Micawherlike, for something to turn up, with the idea that we are improvising?

Are we still fortifying ourselves by old preludes and fugues of Bach, "the musician's daily bread," as one has said, and not the works of this not only a duty, but a great privilege mighty one only, but also the comnewer schools? What would we think of the man of the med ical or any other profession who does not try to keep in touch with the views of the great men or women of their calling? We cannot afford to fossilize. We owe this knowledge to ourselves: we owe it to our pupils. The same thing applies to our theoretical subjects, counterpoint, harmony, musical form, etc. We may not fathom the depths of the ultra-modern theorist, or appreciate the intricate melodies and discordant (?) harmonies of some of these disciples of the New. It is at least interesting to know their views and to learn what they have to give us, and should any of it seem strange to us we must not forget what history tells us-of the better things that were said, of the ridicule that was heaped upon certain musicians who dared to say and do things in a different manner from those of their times, and who can say that those who did not live to see the full fruit of their labors, have not added to our store and to the inspiration of those that will

Many are the beauties of the old masters, whose music will live while other things perish, but can anyone say what new emotions will touch the soul, what new chords will vibrate and charm the ear, what new form or figure incite the musician or poet of the future to breathe into his music all that his own soul would feel and say Let us revere and love the composi tions of the past, which time has proven good and wholesome. That was a very modest cable the other day, which, under a London date line, told of an interview between a man named McBride and another man named Grey.

One of these men is Sir Richard Mc-Bride, premier of British Columbia, and the other is Sir Edward Grey, British secretary of state for foreign affairs. And their interview is news. None of the papers carried the real news. The

real news of the interview is this: All the English-speaking nations of the world are to act as one against the demands of the Japanese and Chinese for the privilege of freely mingling with the

white races! This is real news. It means that the Greater Englishry of the world is a unit

on what Collier's Weekly calls "the world's most menacing problem," and what J. MacMillan Brown, of New Zealand, refers to as "the ultimate crisis of human history." This problem and this crisis is the meeting of Asiatic and European around the shores of the Pacific basin.

How did the papers miss the news? They missed it because they did not cast up the account of the things implied in the interview between Sir Richard McBride of British Columbia, and Sir Edward Grey, of Downing street. Here is what the cable brought "LONDON.-Sir Richard McBride, premier of British Columbia, has im-

ocsed on Sir Edward Grey, British secretary of state for foreign affairs, the task of reconciling Great Britain's pro-Japanese proclivities with British Columbia's determination to enforce its decision to exclude Asiatics from its territory. ## WOMEN CURED AT HOME

Women's disorders always yiels from the very beginning of the treatment to the mild, but effec-tive, action of Orange Lily. Within two or three days after commencing two or three days after commencing its use the improvement becomes noticeable, and this improvement continues until the patient is completely cured. Orange Lily is an applied or local treatment, and acts directly on the womanly organs, removing the conjection, toning and

diseased parts. In order to convince all suffering women of the value of this semedy, I will send a 35-cent box, enough for ten days' treatment, absolutely FREM a each lady sending me her address.
