instantly killed his wife and Father E. J. Walsh, priest of the Church of the St. Augustine, in their respective homes in South St. Paul. The motive for the crime is unan-

nounced. Before he shot into the hip and head of the priest the fatal wounds which caused his instant death, Gibbon shouted into Walsh's ear words which attendants refuse to reveal and which are believed to fur nish the real clue to the motive. Murderer Surrenders.

The city jail was assailed within half an hour after the husband gave himself up to the suburban police by several hundred men, women and children, foreign laborers in the packing plants, who cried for vengeance to atone the murder of the leader of their parish. After an hour or two, by swearing in many deputies, however, the mob was allayed and departed to their homes.

Gibbon has been a leading stock buyer here for many years and separated from his wife over unknown causes about a year ago. Since that time he has visited the eight children every two weeks and, it is understood TWO MORE LISTERS supported them.

Shoots Priest Twice.

This afternoon he called at his wife's home in a carriage and they went driving, returning at 6 o'clock. Mrs. Gibbon dismounted from the carriage in tears and walked into the house, her husband following. A moment later neighbors heard a shot and ran into the house. They found Mrs. Gibbon dying on the floor.

From his wife's home Gibbon rushed to the house of Father Walsh and dashed through an open window into the room where the priest was sitting. The latter arose and attempted to flee, but Gibbon seized him by the shoulder, placed the revolver to his head, and shouted into his ear. He then shot him twice. The priest dropped dead in a pool of blood.

Gibbon proceeded to the police station and surrendered.

MUSICAL FESTIVAL A SPLENDID SUCCESS

Large Audience Hear Public School Children in the Princess Rink.

A magnificent success was the public school festival given in the Princess Rink on Saturday afternoon. The audience was not so large as the concert deserved, but still a most encouraging one.

The entire programme was given with the exception of one number by Mrs. E. Wyatt, by a chorus from the public schools, under the direction of Mr. E. W. Goethe Quantz, and the pupils of several schools in drills and

The chorus work was excellent. About 350 children took part, and they showed a degree of careful training, and musical perception much above the average. It was very evident that Mr. Quantz and his assistants had bestowed a great deal of time and patience on the youngsters. The voices were all carefully selected and well

The concert is a vivid demonstra ion of what can be done by the public school pupils, and should meet with the encouragement of the public generally,

WESTERN CANADA PROBLEMS. London, May 30 .- At the meeting of the Society for the Propagation of the Gospel, the secretary stated that the preblems of Western Canada seemed be growing vaster.

Rev. Douglas Elison is about to proede to the southern parts of Saskatchewan and Alberta to prepare the advent of the second band of clergy and laymen under the archbishop's fund. The creation of that fund, he said, had virtually destroyed the Wes-Canada fund, which still had claims upon it, especially with regard to some catechists who were sent to Saskatchewan three years ago. He also made appeals for new medical centres.

CIGARMAKERS' STRIKE IS STILL UNSETTLED

Strike Has Now the Sanction of the International Union.

The cigarmakers' strike is still on and Saturday the strikers drew the second installment of strike pay.

There is no change in the situation whatever. The strikers and the manufacturers have held no conference of late, and no effort has been made to settle the difficulty.

Organizer Selzer, of Chicago, who has been sent by the international authorities to take charge of the strike, s still in the city and consults daily with the executive of the union. Some of the manufacturers have nade arrangements to have their cigars made in other cities. One firm n particular has secured part of a ouilding in the east, and is having his

goods made up there. He claims the arrangement is very satisfactory, and he insists that the strike has no influence whatever on his sales or his work.

After Machines. The other manufacturers are watching results. They have seen the cigar-making machines work in Detroit and other cities. Some declare that the machine is giving great satsfaction, but they hesitate to install them, as they prefer hand work. If the men return or make overtures for settlement within a week or two, it s not likely that any of the machines will be installed. Otherwise the manufacturers say they will put the ma-

The old precentor! How well I remember him! I never hear, for example, such tunes as "Jackson," "St. Asaph," "Bangor," "Coleshill," and "French" without seeming to have brought before me the church atmosphere and environment of other days. There were no choirs then, and there were no organs. The precentor was the sole leader of praise. And, as Rev. Mr. Wright, of Ferryhill, noted in his charming speech to the precentors—a speech I have read over again and again-we saw "the old precentor coming in with his gown, sitting down, choosing his tunes, putting out the names of them, turning them this way and that.". And in what a spirit of detachment the precentor carried out his duties taking the pitch with his tuning fork, which he tapped on the desk before him, Sol-Fa-ing up and down, and then raising his voice loudly as a call to the congregation to follow him.—Exchange.

SOON TO ABOLISH THE CATTLE EMBARGO

High Prices of Meat in Old Land Said to Have Compelled the Action.

Ottawa, May 30 .- According to a report received by the Department of Trade and Commerce from Canadian Trade Commissioner F. A. C. Bickerdike, of Belfast, there is a probability of an early removal of the British embargo against Canadian cattle. Mr. Bickerdike reports that there is a growing feeling in Ireland that the embargo cannot be much longer maintained, and that cattle dealers in Belfast and Dublin are already considering the question of neeting the consequent increas∈d competition from Canada by going into the dead meat trade.

St. Thomas, May 30.—In the absence of conclusive evidence that a crime was committed. It is not likely that any action will be taken over the death of Richard Rock until the attorney-general's department is placed in full possession of the facts. The coroner's jury investigating the finding of Rock's body beneath the Wabash railway bridge a week ago, found that Rock had been struck on the head with some instrument by St. Thomas, May 30.-In the absence of were with Rock on Thursday night. They admitted that a row occurred a quarter of a mile from the bridge at 1 o'clock in the morning after a carousal and that Kilburn, one o fthe men, struck Rock with his open fist, the er's cap being lost in the scuffle. Rock went back for his hat, and the rest of the party came up town to a restaurant. The waiter in the restaurant said that Mrs. Grantham the restaurant said that Mrs. Grantham, one of the women in the party, was crying. When the first well was sunk at the foot of Horton street, no one thought of the Parke flats as being necessary to the project. Because of the flow of water from the first well, The Advertiser took the responsibility, on the very eve of the municipal election, of water commissioners' plan in order that the experiment of the wells should the leading businessmen of the city formed themselves into a committee for the same purpose. This theory is also destructive of the conception of duty for duty's sake. Mark Twain admits this:

"The impulse that moves a person to do a thing is the impulse to content his own spirit. It is called altruism when the action benefits someone else also. Even deeds of selfsacrifice, the giving of a man's life for his friend, or even for a stranger, simply prove that there are things a man prizes more than his own life. If he had not sacrificed his own life would have been miserable to the end of his days." This is not original; it is the utili-

GOOD BEGINNING.

[Winnipeg Free Press.] In the short time since its establishment the Commission of Conservation has made an excellent beginning of its work. It is the first time that a comprehensive attempt has been made to do important public service of this character on purely non-partisan lines, men of both political parties joining together to work in the interests of the country's welfare. That the commission can exert a powerful influence in the right direction, and that ready been made manifest.

When she asked where Lady Hilbury was, and if she were alone, the footman merely announced the fact that a gentleman had called and would make one of the luncheon party. Rosamund entered the boudoir with an air of charming impulsiveness practiced so sedulously that it had long ceased to be artificial. For once in her life it abandoned her. Warden's friendly greeting was such a bolt from the blue that she faltered, paled and blushed alternately, and actually stammered a few broken words with the shy diffi-

She Was Going Into Consumption. Gained Ten Pounds in Two Weeks by the Use of Burdock Blood Bitters. Mrs. Fred. Biggs, Kingston, Ont.,

writes:-"I was completely run down, my blood was out of order, and I used to get so weak I would be compelled to stay in bed for weeks at a time. I could not eat, was pale and thin; every one thought I was going into consumption.
I tried everything and different doctors until a friend advised me to use Burdock Blood Bitters. I did not have one bottle used when my appetite began to improve. I used six bottles. I gained ten pounds in two weeks. When I began to take it I only weighed ninety-three pounds. It just seemed to pull me from the grave as I never expected to be strong again. I will tell every sufferer of your wonderful medicine.'

The blood reaches every portion of the body to distribute nutriment and remove effete matter and waste products. Clearly then, any influence, good or bad, affecting the blood, must necessarily affect the entire system for good or evil as the case may be.

Get pure blood and keep it pure by removing every trace of impure morbid matter from the system by using Burdock Blood Bitters. It exerts a curative influence unapproached by any other

Hardships in African Wilds. London, May 29.-News is published in London of the death of Joseph Creswick, the prisoner who escaped in Rhodesia and tramped through Africa or months before he reached civilization. On returning to England he was recognized and sent back to his Rhoesian prison, where he died from the

rison to another, and jumped out of the train one night when it was travelling slowly between Buluwayo and Salisbury. He did not know the country, but made a bee-line away from the railway. He was handicapped by his irons, but after some days he managed to file these through with bits of rock. For several weeks he lived chiefly on wild fruit, and then he stumbled on a hut in which he found an old gun and some ammunition. He game for several marches, until the gun got out of order. Once he met some natives, but luckily they were friendly, and gave him directions to a long water, which he thought might be the Congo. So it proved, and just eight months after his escape lying in a weak and feverish condition about 200 miles from Leopoldville. They nursed him back to health. At Bomba, arrayed in a pair of cricket trousers and a football jersey, the fugitive found a ship on which he work-

BUNCHED HITS WIN GAME

Chicago Takes Saturday's and Sunday's Contests and Makes It Ten in a Row.

Chicago, May 29.-Bunched hits and sacrifice gave Chicago two runs and today's game, 2 to 1, with Pittsburg. The visitors' lone score was the result of Byrne's double to left, a sacrifice and a sacrifice fly, which Hofman speared with one hand. The pirates came close to tieing the score in the last inning, when Miller opened with a double to right and Miller opened with a double to right and attempted to score from second on Flynn's sacrifice hit down the first base line. A quick double play with Archer, Chance and Cole participating, the latter covering home plate, caught Miller sliding home. All the visitors hits were ter covering home plate, caught Miller sliding home. All the visitors' hits were scattered. Ground rules were necessary. The score:

BIG AUTO RACE

Chicago Racer in Marmon Car Captures 200-Mile Event at Speedway.

A RECORD ESTABLISHED

Made by Chevrolet at Atlanta.

Indianapolis, May 28.—In desperate struggles for supremacy among drivers of the most powerful American cars, records went down for all distances between 5 and 200 miles at the Indianapolis speed-way today, and in the merciless grind only two men were injured. Herbert Lytle, the driver and his me-chanician, William Clifton, were hurled ored champion. Delaney refused to commit himself to any arrangement with Johnson until he had arranged for the employment of his protege as sparring partner for the negro.

Herbert Lytle, the griver and his mechanician, William Clifton, were hurled from their car, an American, when a front tire burst as they were turning into the home stetch in the last lap of the ten-mile free-for-all handicap. The car plunged into the sand at the inner edge of the track and was smashed. Lytle's left leg was broken and Clifton was badly

Harroun driving a Marmon achieved the most sensational long-distance tri-umph in the history of automobile track racing in this country, when he won the 200-mile race in 2:46:31, breaking the 600 record which had been held by Chevro-450 let, who went the distance in 2:46:48 at 439 Atlanta.

Oldfield Breaks Record. The five-mile record for cars of 451 to 600 cubic inches piston displacement, was broken by Barney Oldfield and his Knox. Oldfield's time was 4:03. The old record was 4:43.

Aitken (National) took the honor of breaking the record for ten miles for cars of 301 to 450 inches displacement. His time was 8:08, against the former E. record of 8:17, and Harroun (Marmon) 0 and Merz (National) who were second 7 and third, shared in the victory, for the three were bunched almost to the finish, when Aitken cut ahead and was first over the wire of the electric timing machine. Buick Led at Start.

Burman (Buick) led off the 200-mile race with a leap, Harroun (Marmon) pressing almost against his rear wheels. Burman had engine trouble before the 20th Burman had engine trouble before the 20th mile, and dropped back in Harroun's favor. From then on to the finish Harroun unswervingly whirled the bowl of the speedway ahead of his competitors.

Dawson had a miraculous escape from death in the 70th mile. On the back stretch a tire burst and his car plunged to the inner sand cushion turned completely over, landed on its wheels and crashed through a fence. Dawson did crashed through a fence. Dawson did not lose his seat, and when the car stopped against a heavy post he found himself unhurt. The car, however, was wreck.

Harroun Increases Speed. Harroun drew ten miles ahead of all the closest rivals after the 100 miles had been covered, and barring accident was certain to win, and the great crowd, fas-cinated, followed his unerring flight around the high banked turns. The track was now an oil-soaked path The track was now an oil-soaked path on which the tires slipped dangerously. The drivers strained to hold to the course and their mechanicians added their grip on the steering wheels. Harroun had no mechanician with him, but he bent unflinchingly over the hood of his car and increased his speed in the last 50 miles.

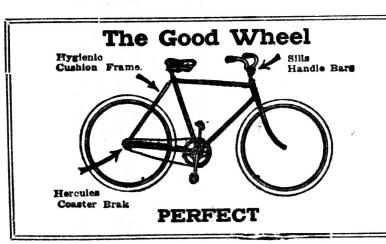

The Paying Bicycle

The Bicycle that "doesn't eat its head off" in repair bills is the one for you.

"The return of the blcycle to favor is a healthy sign. Its early popularity was largely a fash-ion or a fad, but today it is used because it combines invigorating exercise, outdoor pleasure, and practical utility." HARRISON GREY FISKE, editor "The New York Dra-matic Mirror," New York City.

You can buy a Bicycle at almost any price you care to pay, but what's the use? Half the time a cheap wheel is in the repair shop, and when you come to figure it out it's a pretty expensive investment after all. Nor have you enjoyed the comfort of wheeling as it is possible to do today with a good wheel.

PERFECT BICYCLE

The PERFECT sells at a price that covers the making of a thoroughly honest wheel. It is fully guaranteed. The PERFECT is equipped with the very latest of the new inventions that have done so much to make wheeling comfortably pleasant. The PER-FECT is greater today than it was years ago, and then it was considered the best.

THE HYCSENIC CUSHION FRAME—If there is one invention more than another in the bicycle line that has helped to popularize wheeling, it's the Hygienic Cushion Frame. "Makes all roads smooth," is the slogan that carried it to popularity, and it has lived up to the advance notice. The Cushion Frame gives "Pullman Comfort" to bicycling.

COURT LIFE TO BE LESS GIDDY

English Society Likely to Take On a New Tone.

NEW QUEEN VERY PROPER

Both Mary and George Opposed to the So-Called Bohemian Atmosphere.

London, May 30.-Many people in England, particularly the Nonconformists and people in the provinces, never really approved of the gayeties of the late King Edward's court and of the so-called bohemian atmosphere that characterized it, particularly in the last five years of Edward's reign. The new King, it is known, has no toleration for bohemianism in the highest of society, and Queen Mary shares his dislike of it. The court of King George and Queen Mary therefore will be extremely decorous and conventional.

Queen Mary has a will of her own, as nobody who has seen her face, with for a moment doubt. She will not, the Queen-Mother, Alexandra, play a passive part in matters that concern her household. She will be Queen in fact as well as in name.

Her new Mistress of the Robes, the young Duchess of Devonshire-her intimate friend-is as straightlaced and conventional as the Queen, and those ladies who have had large influence in Edward's court are already rapidly disappearing. There will be no "cosmopolitanism," no "bohemianism" in the court of King George V. and his

King George will look for advice and friendships more among the old families of undoubted British origin than did King Edward. The latter's circle of intimate friends contained a number of men and women of distictly un-English origin and names. George V. it is prophesied, will look for some of his intimates and advisers to the strong men of the British dominions beyond the seas rather than to the courts and bourses of the Continent of Europe, mro,mmsb,'d mfwyp shrdl cmfwypwf

He had intimate friendsthe Marquis de Soveral, Mr. and Mrs. face, ordered him never to enter her Albert Sassoon, Sir Edgar Cassel, Sir John Fisher, Mrs. Hartmann and ing around after her daughter, and that he had ever advised the King, nor was there a suspicion that he was under any influence save the official influence oft he advisers of the crown. An idea is prevalent that King missed the case. George intends to refer many points

privately to Lord Kitchener. There is much discussion as to the degree of the new King's firmness of character. In the London clubs all Former Resident of This City Expired sorts of stories on that point are heard. the new Queen's character there is no dispute.

She has had a very difficult part to play and her policy of severe selfthe background. Whenever the Queen was away, however, it was noticeable how much King Edward had his daughter-in-law with him. Now she will be the supreme moral influence in England, and there is no doubt her efforts will be actively exercised in order to enforce on society a far higher standard of morality. Correct and Proper.

"The court will be very correct and very proper. Queen Mary shares all the views of the Duchess of Portland, and the stiffness around her will not be brightened by much humor." Thus has the new regime been forecast by one who is much in the society of the

younger sovereigns. Unlike her mother the late Duchess orders and pays promptly. She seems to have very little vanity. Her marriage has been happy, her children decline to make any comment, but it far from a reality of Queen Consort, President has a more intelligent grasp and the influence that she undoubtedly of the situation than to misunderstand

The provincial newspapers however have no fear of the court and its social influence and you look to it now and then for plain in a friendly spirit. speaking about royalty. The frankest expression about the late CAUGHT IN BELT King Edward's court and the effect of its behemian atmosphere on all classes of English society was published by a Liverpool newspaper the Post, which

No one need ignore that the long widowhood of Queen Victoria had incidental social effects which the late reign was not long enough, even if it had been wholly adapted, to erase.

The lavish uprising of wealth, power and plutocratic manners, customs, ways of life and pleasures have produced features of modern society which a perfectly decorous and frankly serious royal example and leadership may do much to improve, to refine and to purify. We have conveyed our meaning if we have led our readers to share our feeling that the habits and example of King George and Queen Mary, with the associations of their domestic past and its sure and happy continuance, may be of good augury for the social tone of the new reign. And that would mean better tone and more truly religious life in

GOVERNMENT EXPERTS AT RONDEAU PARK

Minister Cochrane Says Only Bad Timber to Be Weeded Out.

Chatham, May 30.-Hon. Frank Cochrane, provincial minister lands, forests and mines, was in the city on Saturday en route to Government Park, Rondeau, on a trip of inspection. He was accompanied by Hon. Dr. Reaume, minister of public works, Mr. Aubrey White and Prof. Zavitz, both of the forestry department.

In an interview, Hon. Mr. Cochrane stated that the Government had no intention of slashing or destroying the park. Only such trees will be renoved as is absolutely necessary for the preservation of the forest. "When the Government first consid-

ered the matter of improving the Mi-o-na. park," said Mr. Cochrane, "experts were sent to mark certain trees for removal. It is my opinion that all such trees marked should be taken out. However there was some local criticism on this, and there appeared to be a popular sentiment that the number of trees marked for removal should be reduced. Some interested parties somehow got the idea that the park was to be injured. For this reason, on my return from visiting the park some time ago, I had a clause inserted in the contract reserving the right for the department to mark the trees. No trees would be removed that were not marked by a remains at the palace where the heal- Government official, who would super-

To Dredge Thames.

The Thames is at last to be dredged. In a few days dredges will be at the mouth of the river to begin operations. It has not been given out whether it is the intention of the department to dredge only the mouth of the river, or whether the channel will be cleaned out as far up as Chatham.

A. B. McCoig, M.P., has received a telegram from the deputy minister of public works Ottawa, that the dredges will arrive in a few days. Mr. McCoig has been urging the department to have the work begun at once, before other centracts are started.

London, May 30.—Theatrical managers experienced no small difficulty in reopening their theatres after King George sent a request to do so. They had decided to close for ten days, and so the actors and house staffs promptly scattered themselves all over England for a holiday. It was a difficult task to locate them and get them back to town again. In some cases it took four or five days to do it.

Kyrle Bellew has arrived in London and is stopping to take breath before he goes any farther on his trip around the world. In fact, he may abandon it altogether, as what he wants is rest, although he doesn't look it, and there is not much rest to be had in globe circling.
