Q. O. R. ORDERED OUT FOR ACTIVE SERVICE BELGRADE STILL RESISTING FOES BRITISH PUBLIC ASKED FOR AID

England and Our Neighbors

Something further about Britain and the United States in the light of the Great Dislocation now on in Europe: and first, let us point out what we have already hinted at, that the first to lose, and the largest losers in the United States by reason of the war, is and were the American holders of American and Canadian railway and other securities, and all of which were raided by German holders deliberately throwing them on the market during the past two or three months. These German holders or somebody behind them, knew what was coming. It may have been the German banks, acting under instructions from the Kaiser's government, putting such pressure on customers carrying these securities that they closed down and forced a sale. Anyway there was an organized raid on these securities at the expense of the United States and Canada; further aggravated by the fact that American and Canadian investors came into the market and took up the securities that had been thrown out of Germany. But something even worse happened: not only were these securities sacrificed on German markets, but another of the same lot of German investors who had large deposits in New York, cabled over orders to sell these securities short, Canadian Pacific for example; and the American and Canadian buyers, thinking that bargains were to be had, went in and bought further of them. The Germans who had sold to them were not in a position to deliver, but they succeeded in driving the price still lower, and as a result they cleaned up millions at the expense of the innocents on this side of the Atlantic. That is, American investors by the hundreds and thousands have been ruined by the deliberate and hostile acts of German banks and brokers instigated as we believe by the German Government. It was a premeditated plan to wreck the markets of Great Britain, New York, of France, but the people who lost the most were those who dealt in American securities; and these German raiders were enabled to do these things because they found a ready instrument at hand in Wall street and the New York Stock Exchange. For two days last week, this same Wall street, whose brokers had been made booby of by the Germans, were boasting that New York was the money market of the world and could keep open under any stress. Of a sudden they wakened up to find they had been raided and run down by men who had inside information and who had money, and who were only too glad to hit Americans and Canadians a deadly thrust in their pockets.

But if American investors have been injured by the Great Dislocation, the same thing is also true of the trade of America with Europe. The food-stuffs of the United States and Canada go largely to Europe, and these are not in a position to go forward at the present moment. Still more than this: the United States pays to Europe, and principally to England, at least two million dollars a day as interest on securities held across the Atlantic and for advances of various kinds; and the United States is only able to keep herself in good shape and to pay these enormous commitments to Europe by the shipment of her food products, her cotton and other things necessary to Europe. It is the wonderful fertility of the Mississippi valley, which hardly ever fails—and it certainly has been most productive this year—that enables the United States to keep its head above water, and to have millions to spend in travel in Europe, in buying works of art, and also in buying the products of the factories and workshops across the pond. If then, Americans cannot sell their products to Europe they can neither pay their interest, and it is over a billion dollars a year, nor can they travel in Europe, nor can they pay for luxuries, for knick-knacks and many other things that hitherto they have bought from that continent.

The result is that the United States has been hit in its finance, has been hit as to the market for its products and has had its taste and desire to acquire the luxuries of Europe upset in a surprising way. Perhaps it is a good thing that the States is learning how to spend its savings at home, and to encourage travel and other things connected with it in the direction of America rather than in countries where Americans have recently been treated in the most insolent and barbarous fashion.

The Americans have thus been hit in a way that is forcing them to think it all over; will force them to readjust their position and attitude to the conditions of the Great Dislocation. But they can't say that this unfair treatment that has come to them has been in any way contributed to by Great Britain or by France, or by the allies thereof.

The prosperity of the United States is absolutely dependent on, first, of all, marketing her products, and next maintaining freedom of trade and freedom in the exchange of money and credit between America and Europe. When England's trade is jeopardized, as it now is, she is conserving her finance in her own interest and to call in debts due her from all quarters of the globe, but no one can say that any pressure in this direction has at this time been exercised by Great Britain as against the United States. Even with the greatest war of her history on her hands, England is holding up trade and finance for America as the best card.

It is therefore absolutely in the interest of the United States that the British feet should destroy the German fleet in order that one or more squadrons be put in the direct line keeping the channels of trade between the States and Britain absolutely clear and safe. And it is equally in the interest of the United States that the freest exchange of money should be re-established between New York and London. In every respect England is closer to and of more account in the prosperity of the United States than all the rest of Europe combined!

But we do not say because of all this that the Americans should join with the allies in the crusade against Germany and her allies; that would be asking too much; but we can ask for their co-operation in some way, and we should do their utmost to keep the Atlantic Ocean as free as possible for trade of all kinds and to establish once again the freest interchange of money and credits as between the two continents. As a continent we in America stand to lose millions daily as long as the conditions above set out and resultant from this war continue!

As to fighting, we know the Americans could not intervene even if they were disposed, inasmuch as millions of German and Austrian are now citizens of the United States, and they would not like to see their adopted country taking up arms against their motherland.

But there are many other things upon which appeals could be made to the Americans, and which must be running thru their minds at this moment. First and foremost is the crusade—the satanic crusade—that the Kaiser is making with his big and hungry machine, which means the ruthless slaughter of hundreds and thousands, if not millions of mankind—this crusade is against decency, against free government, is against the uplift of humanity generally, and especially is it against womankind and children; and if successful it might be extended against the free institutions of America! We can see no common interest between the democracy of the United States and the "Caesarism" of Germany!

The Kaiser is today and has been for years deliberately plotting against a free press, against free discussion, against any such thing as the influence of public opinion in the government of a state, and even against the influence of world-wide public opinion on world-wide politics! "The public be damned" is his motto!

If the American colonists vindicated their liberties and their rights against the autocratic and unwise government of England of 140 years ago, surely the recollection of those events ought to give the American nation and the American people an inside view of the crusade of Germany against dearer liberties and dearer rights than those for which Americans fought in their Revolutionary War.

We do not propose to say anything further on this question today other than this, that it is incumbent on the government of the United States to clean up its methods of finance and especially those methods of finance that have prevailed in Wall street for many years now, and which have brought such dire results to the American people and to American finance! Wall street today is closed, and it ought to be the duty of the president and congress by the exercise of law, to take complete control of this market, such as the issue of securities in connection with railways and other great industries, and that Wall street, as a money market or place or centre of investment, be placed under the strictest regulation by way of license, and its members, and of all other exchanges, be put under the strictest rule as to what they are allowed to do and as to what they should not do. "High finance" so-called, and the exploitation of the public and especially the savings of the people, as they have been exploited in the past, must cease forever in the United States; and what we say of the United States we say of Canada, which has more or less followed "high finance" and followed Wall street.

But, what our neighbors can do as a nation and as individuals is to establish again the freedom of exchange in matters financial between New York and London and to establish again the freedom of trade channels between the ports of North America and England, and we hope also the ports of the rest of Europe.

And from the clear-cut denunciation of the Kaiser in the American papers far and wide—and we have read them carefully—the Americans see things pretty much as we in Canada see them, and they will act accordingly.

NEED N. T. R. SECTION TO MOVE OUR TROOPS

Government Likely to Take Over Line From Levis to Moncton to Avoid Violating Neutrality of the United States—Will Arrange Insurance on Men at Front.

Ottawa, August 7.—The government has under consideration, it is understood, a proposal that it should take over from the contractors the eastern section of the National Transcontinental from Levis to Moncton and equip and operate it. The reason given for this proposal is that the C. P. R. could not handle any troops or war supplies sent down to the maritime provinces since its line runs thru the State of Maine, and the United States as a neutral country could not allow it. This would put the whole traffic on the Intercolonial in addition to its regular business and it is represented that the I. C. R. might not be able to stand the strain. The taking over of the eastern section of the N.T.R., it is urged, would solve the whole difficulty. The contractors of the eastern section, it is said, would be glad to see the suggestion adopted. The financial undertaking of which the G. T. P. would be relieved would of course, be transferred to the shoulders of the government. One of the objects of an all-Canadian road was to meet just such emergencies as the present one, when the means of communication between the maritime provinces and the rest of the Dominion must be entirely thru Canadian territory.

When parliament meets in special session on Aug. 10 one of the questions to be seriously considered will be the provision for the men who go to the front, and who may be incapacitated in any way, as well as for the families of the men who are incapacitated or killed. This is a matter that many men are compelled to take into account when they think of enlisting, and there is every reason to believe that parliament will make full provision so that those who go forth to fight for their country will not need to worry about what will happen to those dependent on them if they do not return.

To begin with, the men in the ranks get a dollar a day on active service. Apart from this, the whole question of payment to men who are wounded, and the matter of pensions and insurance will have to be arranged. This provision will all be made by Canada, although the men go to the front in the ranks get a dollar a day on active service. The government has never insured men in service before, but during the South African war an arrangement was made with some of the insurance companies by which they accepted risks on men's lives.

Re-enlisting is brisk. Recruiting is well all over Canada. In addition to the Canadians who are volunteering, applications have been received from

MAYOR HOCKEN SHOULD ACT

With a knowledge of some of the things that happened in Toronto yesterday we believe it is time to call the attention of his worship the mayor to the position of this city in its relation to the British Empire. The greatest war, perhaps, that Britain will have to record for another century at least is going on. The empire is fully prepared for it. The people of Great Britain and Ireland are meeting the crisis calmly. There is no disturbance of business except what is inevitable under the circumstances. The bank rate was reduced for the second time since the outbreak of hostilities yesterday to five per cent. It has been announced that the government will take over the harvest as it has already taken over the railways. So far from stopping public works, new work is to be commenced and road-building on a large scale is contemplated to provide employment in Toronto to be less calm or cool than the cities and towns nearer the arena of war by 3000 miles? There has already been a spirit of timidity in the city hall, and talk of closing down all work that could be in any way dispensed with. Some firms were struck with panic yesterday and reduced their staff or reduced the wages of those they kept, in some cases by as much as fifty per cent. Where such things occur as the result of mere panic there is something wrong with the intelligence of the city. The banks give assurance that there is no need for alarm. Canada is particularly fortunate in its situation, and stands rather to profit than to lose by actual military operations. There will be no scarcity of supplies here of the necessities of life. We may have to cut out some of the luxuries made in Germany, but Canada is a land flowing with milk and honey in comparison with any other land involved in the fray. There need be no increase of prices here more than in France, where the government has taken steps to see that normal prices are maintained. Our merchants and citizens can do these things of their own accord. We should have public spirit enough and all the confidence King George displays in his navy, and we should avoid panic. It is the Kaiser's men and who need to be in a panic and not King George's at the present time. Perhaps his worship could convey these ideas more pointedly by an official comment. Most of the panic is the result, we believe, of the foolish and unfounded statements made in war "extras" which convey absolutely erroneous impressions of what is going on. The mayor is in a position to elicit the public spirit of all concerned, and to put an end to these panic-stricken declarations of the imagination.

BELGRADE STILL RESISTING FOES BRITISH PUBLIC ASKED FOR AID

Bombardment Has Been Steady for Days—Foreign Legations Hit by Shells.

Canadian Press Despatch.
 BELGRADE, Aug. 5. (Delayed in transmission via London, Aug. 7, 3:40 p.m.)—The bombardment of Belgrade by the Austrians, which began without notice on July 29, has continued almost steadily since. The capital was crowded with women and children when the Austrian artillery opened fire, and there was a rush for the country, but the people were obliged to return because of the concentration of food supplies here.

In the first few days of the fighting the people were terror-stricken, but gradually they became calmer and the merchants opened their shops.

The royal palace, the British and German legations, and most of the larger buildings of the city, have been struck by shells.

The legations and consulates are filled with frightened nationals, who had gathered at the buildings in the hope that the neutral flag would be respected by the Austrians.

FLOWER OF THE GERMAN ARMY WERE MOVED DOWN BY SQUADS

Carnage at Liege Was Appalling Beyond Description and Germans Admit a Loss of 25,000 Men and Ask for 24-Hour Armistice.

MONTREAL, Aug. 7.—Mayor Martin this morning issued a proclamation in which he declares that there is absolutely no reason why retail merchants should be allowed to raise the price of food-stuffs during the war, and advising citizens not to be stampeded into stocking their cellars, thus causing shortage in the various markets.

Special Direct Copyrighted Cable to The Toronto World.
 BRUSSELS, Aug. 7.—According to an official announcement issued by the Belgian war office this evening the Germans admit that they have lost a total of 25,000 men during the three days of desperate and sanguinary fighting in their efforts to reduce the fortifications before the city. It is also stated that the German commander has asked for an armistice of twenty-four hours in which to bury their dead and care for the thousands of wounded.

The ranks of unnumbered dead that strew the open stretches of ground in front of the Belgian forts included in their ranks thousands of the flower of the German army, notably the Uhlans, long the pride of the Kaiser and said to be the finest cavalry in the world. Two and possibly three regiments of this famous unit of German forces were literally annihilated in the face of the withering fire delivered from the machine guns of the Belgians. Two regiments of the tenth army corps were also thereby wiped out of existence by mines.

Mowed Down by Squads.
 All night long the Germans kept up a heavy bombardment of the forts and three times during the night did they hurl their columns against the fortifications only to be met by a fire so deadly that they were literally mowed down by squads leaving the ground in the immediate vicinity of the forts heaped with dead and wounded men.

The ruins were successful beyond the wildest dreams of the Belgians and the Germans, like a pack of hounds released from the leash, pressed forward on the run waiting until the invading force had practically reached the fortifications when the ground beneath their feet which had been mined, was sud-

Italy Now Against Germany

LONDON, August 7.—An early unconfirmed report says that the Italian ambassador has announced that Italy has declared war against Germany.

PRINCE GEORGE A PRISONER

LONDON, August 7.—It is reported from Brussels that Prince George of Prussia has been taken a prisoner at Liege by the Belgians.

WAR SUMMARY

Government employment greatly increased to provide work for men laid off by factories.

Greatest anxiety felt for thousands of Britons in Germany.

Response to Lord Kitchener's appeal for men is unparalleled in enthusiasm.

The British tank steamer San Wilfrido, which was destroyed by a mine off Cuxhaven, Germany, and the British steamer Craigforth, was beached near Constantinople after contact with a mine.

Many German merchant vessels were brought into English ports by British cruisers. The Holland-Lloyd steamer Tubantia, with 24,000 tons of goods for America for the Deutsche Bank in London, was also brought in.

British squadrons hem in German warships at Taingtan, which is strongly fortified by German troops.

Official German account of the siege at Liege characterizes the operation as a defeat but as a unique act of heroism in the history of war and praises the heroic gallantry of German troops.

The British legation at Dresden was mobbed.

The crown prince with an army of 800,000 is marching on Belgium.

The German cruisers Goeben and Drotteln, obliged owing to Italian neutrality to leave San Salvador, Sicily, have gone out to meet the British fleet.

Report that German cruisers Goeben and Breslau sunk by British Mediterranean fleet on side of Sicily.

Stores of discountury in Germany to the Dowager Empress of Russia are declared false by the German foreign office.

American ambassador in Berlin cables appeal to British public to send funds for relief of British subjects in Germany.

Kaiser in proclamation avows willingness to fight the world.

GERMANY WILL FIGHT AGAINST THE WORLD SAYS THE KAISER

Proclamation Issued by Emperor Says Germans Are Aware of Their Responsibility and Power and Calls on Them to Fight for Their Very Existence.

Special Direct Copyrighted Cable to The Toronto World.

BERLIN, Aug. 7. (via London)—A proclamation by Emperor William, addressed to the German nation, was made public in The Official Gazette today. The text was as follows:

"Since the foundation of the German Empire it has been for forty-three years the object of the efforts of myself and my ancestors to preserve the peace of the world and to advance by peaceful means our vigorous development.

"Our adversaries, however, are jealous of the success of our work, and there has been latent hostility to the east and to the west and beyond the sea. This has been borne by us in responsibility and our power.

"Now, however, these adversaries wish to humiliate us, asking that we should look on and watch our enemies preparing themselves for the coming attack. They will not suffer that we maintain our resolute fidelity to our ally, who is fighting for her position as a great power and with whose humiliation our power and honor would equally be lost.

"So the sword must decide. In the midst of perfect peace the enemy surprises us. Therefore to arms. Any dallying and temporizing would be to betray our fatherland.

"To be or not to be is the question for the empire which our fathers founded. To be or not to be is the question for German power and German existence.

"We shall resist to the last breath of man and horse, and we shall fight out the struggle even against a world of enemies.

"Never has Germany been subdued when she was united. We will be with us as He with our ancestors."

WILL SWEEP SEAS INSIDE ONE MONTH

Britain to Provide Safe Ocean Pathway From United States Ports.

Special to The Toronto World.

NEW YORK, August 6.—The New York offices of neither the Cunard nor the White Star Lines had more than the routine information regarding the putting into Halifax of the Mauretania and Cedric.

From information given at the Cunard offices, it appears that the reason why the steamships had put in was not fear of capture or of attack so much as the desire of the British admiralty to throw a line of cruisers all the way along the western and eastern lanes from the English Channel to the ports of New York, Philadelphia, Boston and the St. Lawrence.

It was predicted that within a month there would be the freest and safest communication between all American ports and Liverpool by way of Queens-town and Fishguard. Similar protection may be extended as far as Gibraltar. As the harbors of Southampton and Plymouth are both mined, traffic must be with Liverpool.

OPERATIONS OF TROOPS ARE ENTIRELY VEILED

LONDON, August 7.—Movements of the great aggregations of troops which must by this time have gathered at their springing off points on the German frontiers facing both the Russian and the French armies are kept from public knowledge. Military authorities here, however, are confident that preparations must be almost complete for a forward move which will give some indication of the plan of campaign to be followed.

The French army authorities have also raised a heavy screen to hide the developments in their own camp. They have been satisfied with the manner in which the men of the nation responded to the call to arms and they declare every movement to have been carried out according to the plans drafted by the popular commander-in-chief, Gen. Joseph Joffre.

NO FIGHTING, NO MORE LOSSES, DANGER OF MINES TO BE REDUCED

Statement of Winston Churchill in Commons—Indiscriminate Use of Mines About High Seas Menace to Peaceful Neutral Merchant Vessels—Admiralty Makes Arrangements Successfully to Combat This Peril.

Canadian Press Despatch.

LONDON, Aug. 7, 12.30 p.m.—Winston Spencer Churchill, first lord of the British admiralty, announced today in the house of commons that there had been no fighting and no losses of any kind other than had already been officially made public.

The first lord said: "Apart from the loss of the small British cruiser Amphion and the German mine-layer Koenig Luise there has been no other fighting and no other loss so far as we are aware."

"On Wednesday a flotilla of torpedo boat destroyers while patrolling the upper reaches of the channel found the Koenig Luise laying mines. The destroyers pursued and sank her. About 50 men crew, which probably numbered 120 or 130 men, were humanely saved by the crews of the British destroyers.

"The Amphion continued to scout for flotilla, and while on the return journey was blown up by a mine.

"Barbarous Methods. "The indiscriminate use of mines, not only in connection with military harbors or strategic positions, and the indiscriminate scattering of contact mines about the seas, might, of course, destroy not only warships, but peaceful merchant vessels under a neutral flag and possibly carrying supplies to a neutral country.

"This use of mines is new in warfare and deserves the attentive consideration of those who are engaged in war, and of the nations of the civilized world.

"The admiralty is not at all alarmed or disconcerted by this incident."

Mr. Churchill added that arrangements had been made such as would reduce the possibility of accidents caused by mines to a minimum.

Referring to the disconcerting war rumors spread by the newspapers Mr. Churchill said they were probably due to the very strict censorship prevailing, and this caused the papers to fill their columns with reports from irresponsible and nervous people on the coast.

Press Bureau.

Mr. Churchill announced that the British government had decided to establish a press bureau, presided over by Frederick B. Smith, a member of parliament, and from this bureau is to be issued a steady supply of trustworthy information from both the admiralty and war office, without, however, placing in danger the naval and military interests of the country. In this way, he said, the country would be kept properly and truthfully informed of the state of affairs from day to day.

The first lord then paid a tribute to the admiralty and war office during the precautionary period when the government was without any legal means of controlling it. This had enabled the authorities to expediently and discreetly to complete their preparations.

LEGE STILL DEFIES INVADERS GERMANS ASK FOR ARMISTICE

Belgians, So Far as Known, Have Not Acceded to Request—Germany Declares Reverse Will Not Have Effect on Plan of Operations.

Canadian Press Despatch.

LONDON, Aug. 7.—The siege of Liege is the outstanding feature of the European war. The latest advice, received by way of London in the form of official despatches, may that Liege still holds out against the attacks of the German army of the Meuse.

The Germans have asked for a twenty-four hours armistice to bury their own dead and the governor of Liege, Lieut.-General Leman, has not acceded to this request, so far as is known.

On the authority of the Belgian war minister, the German cables in the battle around Liege number 30,000, according to their own admission. An official statement issued from Berlin declared the attack on the Liege fortress was unsuccessful, and the assault of the Germans on the citadel of Namur, which they had taken, was not the result of the greatest influence on the larger operations of the German army.

Italy is Firm.

German diplomats have been using their utmost efforts to win Italy to the German side by negotiations and direct appeal to King Victor Emmanuel, but without success. The Italian ambassador in London, in addressing a great assembly, including several peers and members of parliament, which gathered at the embassy, said that Italy had declared her neutrality, and would adhere to it.

BRITONS OPEN PURSE STRINGS DRIVING GERMAN TRADE OFF SEA

More Than Million Dollars Subscribed in Day for Relief of Poor.

Canadian Press Despatch.

LONDON, August 7, 11.31 p.m.—Altho it was only opened today \$1,125,000 had already been subscribed tonight to the Prince of Wales' Fund for the relief of the poor during the war. The provincial cities are still to be heard from.

One of the first subscriptions was \$90,000 from the Prince's First Life Guards. Among those who contributed to the fund were: George Costen, £75,000; the Rothschilds, \$60,000; King George, Sir Ernest Cassel and Sir William Hartley, each \$25,000 and dozens of other persons \$5,000, including Alfred Gwynne Vanderbilt.

The Queen Mother Alexandra has also appealed for the Red Cross Society, and Ladies Page, Lowther and Churchill and Mrs. Harcourt, American women who married Englishmen, have formed a committee and will arrange a plan whereby Americans can "manifest in some way their sympathy with England and their aid to alleviate the sufferings of her sailors and soldiers."

BRITISH GOVERNMENT GIVES EMPLOYMENT TO WORKLESS

Measures Taken to Care for Men Laid Off by Industries—Price of Bread in London Not Advanced—Rush to Purchase Provisions.

Canadian Press Despatch.

LONDON, August 7.—Plans to prevent unemployment thru the war and for the systematic relief of the distressed are being arranged on a large scale, instead of economizing on public works in the interest of military expenditures, the British Government has adopted the policy of greatly increasing government employment for the purpose of providing for those who will lose the work thru the shutting down of factories. Road building will be one of the principal occupations, and the board for the development of roads has a fund of several million pounds which it will spend.

The Prince of Wales issued an appeal last night for a national relief fund, of which he will be chairman. The Queen has added an appeal to the women of the country to contribute.

The building trades strike, which has kept 80,000 men out of work, has been settled, and a truce has been declared in the marine engineers' strike, which began in June.

Bread Price Steady.

The London Master Bakers have agreed that there will be no immediate increase in the price of bread. The millers have agreed to carry out all contracts for grain, which were made before the war, at the original price. The wheat crop, which has been partly harvested, is larger than usual. The potato crop is also large, and there will be no need of importations. The prices of frozen and chilled beef have been raised about four cents a pound. This is a two months' supply in the country.

The big department stores were crowded today by women, many of whom came to purchase provisions, but the drygoods, furniture and other departments were deserted. A similar condition prevailed in the small shops. Bread, cheese, bacon, eggs, sugar and rice have gone up fast.

Labor Papers Demand.

The labor papers are already demanding that the government prepare measures to take charge of the food supplies in case of need and in the interests of the poor. They argue that it is not more difficult than commanding motors and horses, which have been taken for the army.

The wholesale price of petrol has not been increased, but the rush of automobile owners to lay in a store has induced the retailers to charge as much as they can get. The government has placed an embargo on the sale of finest grades of petrol, which are being retained for the aeroplane service.

The British Government has instructed its diplomatic representatives in the European capitals to request the governments to which they are accredited for moderate loans from the state banks to send home stranded British subjects.

Thousands Missing.

There are still thousands of travelers not accounted for. The position of the greatest anxiety there are fewer in Austria and the Austrians are less bitter towards the English than are the Germans.

While some of those who have returned from Germany tell stories of ill-treatment, others write to the papers saying that they received great courtesy in all places.

A group of Liberal members of the house of commons who had been opposed to the foreign office policy in the old policy of isolation, have formed a committee to relieve distress and in the purchase of provisions, but the drygoods, furniture and other departments were deserted. A similar condition prevailed in the small shops.

BOTTLING UP FLEET COST OF NEUTRALITY

Head of German Embassy in U.S. Explains Attitude to Britain.

Canadian Press Despatch.

NEW YORK, Aug. 7.—Prior to Germany's attack upon Liege Sir Edward Grey tried to impose upon Germany conditions which Great Britain could have obtained only after a successful war, according to a statement issued here tonight by Haniel von Haimhausen, head of the German embassy in Washington, in the absence in Europe of the German fleet. The statement here tonight by Haniel von Haimhausen, head of the German embassy in Washington, in the absence in Europe of the German fleet. The statement here tonight by Haniel von Haimhausen, head of the German embassy in Washington, in the absence in Europe of the German fleet.

These conditions, said Mr. Haimhausen, would, if accepted by Germany, have led to absolute inactivity on the part of the German fleet. The statement of the German charge d'affaires was prompted, he said by the nearly complete absence of news from official sources in the past few days in account of the present European conditions, including cable censorship.

"It is erroneous to assume," said Mr. Haimhausen, "that the English declaration of war was actually caused by Germany's invading Belgium. Negotiations in London preceded the attack on Liege. During these negotiations it was promised that England would remain neutral under the following conditions:

"First, Germany is not allowed to commit any act of hostility against the French coast in the North Sea.

"Second, German troops are not allowed to pass thru Belgian territory.

"Third, the German navy is not allowed to attack Russia from the Baltic Sea.

"To the question put by the German government whether Great Britain would undertake to respect Belgian neutrality during the whole war, no answer was given.

"Could Not Accept.

"Sir Edward tried to impose conditions which would have secured to Great Britain without incurring any risks all the benefits which it could have obtained only by a successful neutrality during the whole war. The conditions would have led to the bottling up of the whole German fleet, forcing it to absolute inactivity.

"Thinking on this subject that a great number of French officers had crossed the Belgian frontier in Liege, which was a flagrant violation of Belgian neutrality, knowing further that Antwerp was ready to open its most important harbor to the British fleet and landing corps, the whole war was reluctantly compelled to refuse compliance with the British conditions."

ARMY OF 800,000 GERMANS MARCHING ON BELGIUM

CROWN PRINCE HAS AN ARMY OF EIGHT HUNDRED THOUSAND

Invading Force is at Verviers, Having Crossed the Meuse South of Vise on Newly-Built Bridges, Undeterred by the Fire From the Belgian Guns.

Special Direct Copyrighted Cable to The Toronto World.
LONDON, Aug. 7.—Hugh Martin, The Daily News correspondent, wired from Rotterdam Thursday night: "Speaking to Dutch across the frontier at Vise this afternoon, Germans declared that the crown prince with 800,000 men is at Verviers. Six pontoon bridges were thrown across the Meuse south of Vise yesterday, and by 6 o'clock this morning a large German force had crossed to the left bank undeterred by the fire of the Belgian guns. The army then began to move south on both sides of the river, blowing up a number of steam tramway bridges on the Tongeren-Bilzen line. An eye-witness described to me as a mighty spectacle the orderly advance of the German army, which rolled slowly down the slope towards the river, bringing a host of machine guns and motor wagons, cavalry riding thru growing corn. On the Lancour bridge appeared the date 1871. Troops are in gray-green uniforms, magnificently equipped. But a pitiful spectacle was provided by fifteen prisoners, apparently farmers, marching with bowed heads and hands bound behind their backs.

"Suddenly an aeroplane swooped from the clouds, flying low, and sped away in the direction of Liege. For three hours troops passed west and south as far as the eye could see. They conversed laughingly with Dutchmen on the other side of the frontier, and asked for newspapers which were given them, but the moment a Dutchman stepped over the frontier a gun was pointed at him and he sprang back to safety.

"During Meuse fighting one German regiment fired on the rear of another, killing 13 and wounding 26."

POLICE TAKE OVER WIRELESS OUTFITS

Three Temporarily Confiscated in the Seventh Ward.

Following the command from Ottawa and police headquarters that all private and public wireless stations be temporarily confiscated or taken in charge by the department of militia, the Ward Seven police yesterday confiscated three complete wireless outfits in West Toronto and these are being carefully guarded until the war is over at the Seale Street Station. The outfits were all erected by amateurs, and private individuals, and the not of an improved type, might intercept en route important dispatches and information valuable to the enemy might thus leak out. In each case the owner willingly handed over his instruments without protest.

NEWS OF SPECIAL INTEREST TO WOMEN

PLENTY OF SUGAR IN THIS COUNTRY

Refiners Will Not Allow Heartless Speculators to Boost Prices.

Huntley Drummonds, president of the Redpath Sugar Refinery, Limited, said: "There is no necessity whatever for alarm as to the sugar supply here, and anyone who orders a barrel of sugar for 'storage purposes' besides having his work for his pains, merely bids up the price on himself and others. There are sufficient stocks in Canada to supply all the legitimate needs of the country, and the refiners do not propose to allow speculators to unduly enhance the price. It is the duty of every good citizen to keep his head at present, as any other course invites unnecessary suffering and cost. Let me repeat, there is sugar enough for everyone, and no need whatever at present to pay increased prices whatever the future may hold in store for us."

London's Beauty Writers

Weekly Selections from Noted Beauty Experts Writing for the English Press. Simple and Effective Methods.

By Olga Amstedt, Special Correspondent, London, Eng. Each week in this department I will endeavor, by careful clipping from the London papers, to keep my Canadian readers informed on the latest and best advice of the London beauty experts. Owing to the persistent demand most London newspapers and periodicals are now devoting much space to the serious consideration of beauty culture. Many of them now employ high started experts to advise and instruct in methods most efficient for the beautification of face and figure. I send herewith a few clippings from leading English publications. Any of the ingredients mentioned could be obtained from Canadian chemists or druggists, so I am told. Look out for more hints next week. I shall endeavor to keep right up to date.

A Strange Shampoo. A young woman envied for her beautiful glossy hair declared she never washes it with soap or artificial shampoo powder. Instead she makes her own shampoo by dissolving a teaspoonful of sturges granules in a cup of hot water. "I make my chemist get the sturges for me," said she. "It comes only in sealed packages, enough to make up twenty or thirty individual shampoos, and it smells so good could almost eat it." Certainly this little lady's hair did look wonderful even if she has strange ideas of a shampoo. Wonderful Growth of Hair. Long ago I made a resolution to try and concoct a real hair grower. My own formula, now perfected after tedious experimenting, has had the effect of giving me a wealth of hair that is surprising. Obtain from your druggist an original package of boronum, and mix with this a pint of bay rum. Rub this into the scalp night and morning with the finger tips. It sets the hair-roots tingling with new life. Secret of Beauty Doctors. It now transpires that the mysterious white paste used so successfully by many beauty specialists for riding the skin of objectionable hairy growths is nothing more than powdered phenol, which can be found in any drug store. With phenol and water make enough paste to cover hairy surface; apply, and in two or three minutes rub off, wash the skin, and it will be free from hair or blemish. To Lengthen Eyelashes. Eyelashes will be greatly beautified if merrilline be applied at lash-roots with

MRS. EATON LOSES YACHT WHEN BOAT HOUSE BURNS

Gasoline Launch and Rowing Boats Destroyed—Rain Prevented Its Spread. WINDERMERE, Ont., Aug. 7.—In a disastrous fire at "Ravenscrag," the summer home of Mrs. T. Eaton of Toronto, here, early this morning, the boathouse along with the fine steam yacht Wanda II, and the gasoline launch Rosemary, also rowboats and canoes, were a total loss. The fire had made considerable headway before seen by anyone, making it impossible to save anything except the small gasoline launch Wapenao, which is also badly scorched. The fire might have been much worse had it not been for the shower of rain which fell just before, preventing the spreading of the fire to any other buildings. Cause and amount of insurance unknown.

Where lace edging is applied it should be put on by hand, whipping it on to a folded edge that is hemmed; or in some cases the edge is rolled (an inch or two at a time) and the lace then whipped on. When the lace is to be slightly gathered the thread which is to be found at the top of the lace may be used as a gathering string and pulled up as desired. The lace is held to the right side of the material, and the edge of this seam whipped together with fine thread and stitches. Feather-stitch banding will be found particularly useful in children's clothes, as it can be bought in various grades and may be used on gingham or hosiery alike; it is especially nice where embroidered founcing is attached to a plain section, as the raw edges can be brought to the right side and their joining concealed by the banding. In conclusion let me say that nice finishing in all respects will greatly add to the wear of children's clothes, as they must stand frequent laundering and much wear and tear.

THE NEW HOUSEKEEPING

By Mrs. Christine Frederick. New and Efficient Devices. Glass Sugar Bins for the Kitchen. KEEPING sugar in bags has always been a messy and unpleasant arrangement, as the sugar moistens with exposure to the air and is apt to burst from the bag. A glass container, which can fit on any wall, is now offered separate from the regular kitchen cabinets and would be desirable for any housewife who wishes to keep her sugar in a more efficient manner. The jars come in solid glass, fitted with nickel clamp, and hold from five to ten pounds. They can be easily attached by a bracket to any wall, either over the kitchen table or other convenient place, and as they have an air tight screw cap the sugar keeps in the very best condition. Olive-Stoner for the Kitchen. A small but helpful little tool is being imported from Germany in the shape of a small olive-stoner. It is well known how inconvenient it is to pit olives by hand when they are needed for salads and other dressings. This little device, which looks like a miniature punch, is so arranged that the olive is placed under the pitter, which quickly and easily removes the entire stone without waste. Price fifty cents.

Advertisement for The Garden Nursery. Includes image of a child and text: "The Garden NURSERY CONDUCTED BY R. R. TODD. The Philosophy of Blue Flowers. Botanists will tell us that those plants which have reached the stage of plant life where they are capable of producing blue blossoms, have reached the highest known stage of plant development. Thus it is that blue blossoms are capable of being so much more soothing to the mind, than blossoms of any other hue. This is no doubt, an entirely new viewpoint from which most flower lovers will need to study blue blossoms. Blossoms of true blue do not as a rule fade, stand they ever so long in an undying sun. The darkest, warmest rose of red will fade, be it ever so little, the deepest shade of rich rose will fade to a sickly white under the ardent rays of a loving sun. Yellow blossoms fade, and even the first orange blossom will of necessity yield up a degree of its fire, before it yields its life. Lavender, pale blue or purple-tinted blossoms never fail to show traces of the sun's rays. But recall the "True Blues." A "True Blue" never fades. Thus the name. To be named a "True Blue" means a compliment of the highest and most enduring kind. To be called a Bluestocking is rather fearsome, but, think what it means. While to have the "Bluest blood of the blue" in your veins, pre-supposes a development, physically and morally and mentally, from the most exclusive and most enduring stock that obtains. With plants so it is as with humans. Thus the blue larkspur could command no other synonym than that of "Heaven's gift." The blue violet, "From Heaven's heights down-dropped," is truly a child of the sky. And the Spidersweb, which an immortal poet wrote, "To know thee, is to know Heaven's gift," has reached the highest pinnacle among the ranks of the "True Blues." And this is the reason that so many lovers of blossoms blue, turn to those plants that send out deep blue flowers. To these, they turn their minds when seeking relief from daily cares. Not only the mind is rested and relieved, but also the eye. Inevitably, the contemplation of blue blossoms turns the mind to a brighter outlook. Just try the experiment. No matter how blue you may be, what blue blossoms will cure you. How do you know? Therefore plant "True Blues" in a goodly number, in your most beloved spots of the garden. Try it, and see.

SHELLFISH OLDEST CREATURE ON EARTH

Represent Greater Division of Animal Kingdom—Divided in Three Classes. Everyone is familiar with clams and snails, and many are acquainted with the pearly or chambered nautilus. These shellfish, says the Geographical Survey, represent the three main classes of the mollusca, one of the great divisions of the animal kingdom, which has existed since the earliest recognized advent of life upon the globe, many millions of years before man first inhabited it. The cephalopoda, the class which includes the chambered nautilus, are the most highly organized of all the mollusca. They breathe by gills and are exclusively marine. The cephalopoda have comparatively few representatives living today, and in the past they were very abundant, and species having been found. One of the subdivisions of the cephalopoda, the ammonoids, are now extinct, but of this particular group no less than five thousand species have been described from their fossil remains. During past geological time these interesting invertebrates were very abundant and may have been the masters of the sea for a long period. To the scientist these fossil cephalopoda are of especial value as markers of geological time. They were so highly developed as to be very sensitive to changes in the sea, and hence were constantly changing during the different geological epochs. An interesting feature of the ammonoids is the complete record of the race which is preserved in the shell. Each individual lives in a shell which it manufactures by its own secretions, and when it outgrows the portion in which it resides it simply moves forward and builds a shelly partition behind itself. Hence the shell becomes chambered, and the earlier portions, inclosed within the latter, therefore constitute a record of the development of the individual. By a careful study of this and other groups it has been found that animals in their development go thru the various stages representative of their remote ancestors. In the more highly developed animals, with which we are familiar, such as the cat, this series of changes recapitulating ancestral conditions takes place in miniature in the embryo, and after birth the animal has only to increase in size. In the ammonoids, however, this series of changes is recorded in the shell of the animal.

Advertisement for The Royal Visit. Includes text: "The Royal Visit. During the recent visit of the King and Queen of Denmark to the Court of St. James, the outstanding feature was the Royal Banquet at Buckingham Palace, and at this most interesting function the two features that impressed the visitors and those privileged to be present were the wonderful gold plate comprising not only the domestic service of Buckingham Palace, but also the magnificent and historic plate of Windsor Castle. Next to this was the magnificent lace worn by persons of high rank, and it is interesting to note that in point of value the Gold Service sank into insignificance. It is common to say "Worth its weight in gold," but let us not forget that Queen Mary is possessed of lace that is worth forty-seven times its weight in solid gold service, and to note that at the time of Queen Elizabeth this priceless lace was sold for but a few shillings a yard. During recent years the manufacture of lace has taken a new lease of life and foremost among the British Lace makers are those of Buckinghamshire, which for seven centuries has been noted for this product. Opportunity to secure the genuine Buckingham hand-made lace is afforded by the Buckingham Cottage Workers Association and any lady interested may obtain an interesting history of the Buckingham Lace together with descriptions and prices of the articles made by these fortunate workers, by applying to Mrs. Eunice Armstrong, Olney, Bucks, England."

Don't Do the Mean Things; "Old Chap, It Isn't Done"

By Winifred Black

Copyright, 1914, by Newspaper Feature Service, Inc.

ALREADY I know was a good deal discouraged—not long ago. The woman he loved, the woman he trusted, the woman he had given his heart to for a keepsake—turned out to be worthless.

She left the man I know, and left his children and hers—and made his name a by-word and a mockery in the light places of the light world.

And money things went wrong, and the man's business failed, and his health departed, and his heart broke, and he wanted to give it all up and go away somewhere very quietly—and die.

But a friend talked with him, and the friend was an Englishman—a man of kind heart and a good brain and stanch character—but he was not much of a talker.

He loved his friend and believed in him and he did not want to see him throw his life away because a light woman had been light.

He crossed the continent to come and be with his friend in his hour of need, and when he got there all he could say was: "You mustn't give up like this, old chap—you mustn't, really. It isn't—It isn't done, don't you know, old top—it isn't done."

Study Each Expression and Guess the Girl Behind It

By HELEN STARR

THE word expression has travelled from the Latin through the French and into our own language.

It has changed in meaning from the "pressing out of a piece of sculpture" to the formation of thoughts into words, and feelings into facial pictures.

Our faces are masses of interwoven muscular fibre overlaid with a soft and delicate membrane—the skin.

The muscles are controlled by nerves which are under the rule of the thoughts in the mind, and the face mirrors those thoughts.

ment is called the playmate, and it probably receives more orders from the nerve wires of the brain than any other muscle in the face.

The pictures of the three lovely girls shown above are interesting studies in expression.

mt timid, but their half-veiled gaze is honest.

The face of Kate Merlyn, another member of the "Passing Show" company, divulges the mischief of a sunny mind.

The condition of the bodily health has much to do with the expression of the face.

How Backbones Are Mended to Straighten Hunchbacks

By Dr. LEONARD KEENE HIRSHBERG

A. B. M. A., M. D. (Johns Hopkins)

HUNCHBACK—or humpback, as it is more frequently called—occurs chiefly in childhood, but now and then adults are affected with it.

But, like all deformities, hunchback is fast disappearing. For Dr. Russell A. Hibbs of New York has recently discovered a method of operating upon the sick bones concerned in this trouble.

This disease is merely the result of tuberculosis of the spine, and in medieval Europe it was a very common thing.

But doctors of today realize that tuberculosis has healed a few cases of tuberculosis of the spine, in so doing she has deformed the children during the process of repair.

Some time ago a number of physicians adopted the plan of fixing the child firmly in a bed for from six to twelve months, or perhaps longer.

The revolutionary plan of surgical interference was first successfully performed last year. It was an operation for stiffening the knee joint by wedging the kneecap into the diseased bones.

So the New York surgeon came to the conclusion that if the laminae and spines of the vertebrae can be peeled from their crusty covering of periosteum

and the same spines and laminae be transposed in the intervening spaces, the healing might take place quickly, forming fine, new, healthy bone, and the fibrous stretch of bone is produced between the knee, above it and below it.

Are All GIRLS Such ARTFUL DECEIVERS?

By ANNIE LAURIE

Dear Annie Laurie: Your advice to girls is interesting and undoubtedly good, but you impress the girl invariably that the young man of today is an artful deceiver.

I am a young man brought up in the old country, and considered handsome, with fair hair and blue eyes.

I don't think that the girls are all angels—by any means. I have seen decent men fairly battered into a compromising love affair by girls who pretended to be decent.

GYGLI BOOTED AWAY GAME TO BEAVERS

Nip and Tuck Battle Went to Locals on Manager's Error—Sullivan Fields Well.

A well-timed boot in the fifth inning paved the way for the Beavers to even up the series with Erie yesterday. Manager Gygli of the Yankees failed to pick up Isaac's grounder and he reached first. The team then stole second, and scored on Snell's single. This was the turning point in the battle. Kiley held them scoreless the rest of the journey.

WAR EDITION--SUNDAY

The Sunday World will feature the subject uppermost in the minds of Canadians. Many phases of armed conflict vitally interesting but not touched by the daily papers, will be treated in illustrated articles. Several exclusive photos will appear.

The Wake of the News

The Illustrated Section will contain intimate and unusual photographs, including some of Sir Robert and Lady Borden in Muskoka before the war crisis called the premier to his desk. Other pictures are some uncommonly good ones of the "Beach," of the Green Bush meet, of lively contests at the Butchers' Picnic, and well-chosen views of other events of local interest. A charming portrait of Mrs. W. H. Price, wife of the member for Parkdale, will attract the eyes of all Toronto people.

For the Active Women

The section devoted to women contains several snappy pages devoted to the various activities of women, in the home, the office, the club, and bristling with ideas for the kitchen, and the latest suggestions in fashions. Every page is planned to hold the attention of the active women. The greatest serial ever written, Joseph Louis Vance's "The Trey o Hearts," appears in the Women's Magazine.

Double-Size Comic Section

And if you want diversion from the serious nature of the news, turn to The Sunday World's Comic Section. Its eight pages contain the comics of the best men in America. Buster Brown; a page by Rudolph Dirks, originator of the Katzenjammer Kids; That Son-in-Law of Pa's (a page feature); Dimples, The Newlyweds and Their Da-Da Baby, Cinderella Peggy, and what is developing into the richest comic ever published, Polly and Her Pals—all these are parts of The Sunday World's double-size humor section.

The Sunday World is the largest paper in Canada. Its circulation, far above other week-end, five-cent papers, proves it. Necessarily the edition is limited. Order your copy early.

Last week The Sunday World gave to Toronto, to almost 95,000 of its subscribers, the first news that Germany would wage war on other countries.

WORLD LATEST WAR NEWS

Indicates how unsettled the money and stock markets of the world have become, and proves our contention that the only absolutely safe investment is in

Land

Furthermore, as the only nation in the world which will benefit by the war is the United States, and as the most rapidly growing city in the eastern States is

Buffalo

it follows that BUFFALO INDUSTRIAL ANNE' lots, at prices from \$4.00 per foot up, are a safe investment, and offer possibilities of immense future profits.

WHY NOT SALT AWAY

A little of that money, where neither Wars nor rumors of Wars can harm it, and where it will in all likelihood make you a profit of at least

100%

As you probably know, Torontonians have invested over \$5,000,000 in BUFFALO property within the past two years. Why not make a little investment yourself for your own sake, and the sake of the family?

Send us today your Name and Address for full particulars.

FINANCIAL STATUS OF BRITAIN GOOD

Lloyd George Gives Reassuring Statement—To Cut Discount Rate.

Canadian Press Dispatch. LONDON, Aug. 7.—Before the adjournment of the house of commons this evening David Lloyd George, the chancellor of the exchequer, announced that reports received from points throughout the country showed that with the opening of the banks the financial position was perfectly satisfactory. The Bank of England, he said, had received on foreign accounts £5,600,000 (\$28,000,000) in gold, that there was no sign of gold being hoarded, and that trade was regaining its normal condition. The Bank of England, Lloyd George continued, felt that it could reduce its rate of discount to 5 per cent. on Saturday. Some banks had received more money than they had paid out. At a meeting of the silver brokers here today it was said that the government had taken over all the available silver supplies for current purposes.

NO SHIPPING SPACE NO CHEESE SALES

Cornwall Board Asks Government Guarantee for Ocean Transportation.

Special to The Toronto World. CORNWALL, Aug. 7.—On the Cornwall cheese board today 1756 colored cheese was offered for sale. None of it was disposed of, however, owing to the fact that the buyers were instructed not to make purchases. Edrupen war conditions and the inability of the wholesalers to ship to the old country were responsible for the quietness in the market. The board passed a resolution asking the Dominion department of agriculture to protect the Montreal produce merchants' association in a manner similar to that afforded the grain shippers by guaranteeing from loss or recompense in case of their seizure while crossing the ocean. Last year at this date 1966 colored cheese sold at 12 7/8 cents.

WHEAT REBOUNDED AFTER EARLY DROP

Rumor of North Sea Battle Main Factor in Chicago Pit.

CHICAGO, August 7.—After a serious decline, wheat today rebounded 3-4c, owing mainly to baseless rumors of an overwhelming British victory in the North Sea.

Prices were easy at 1-4 to 1-4c above last night. The other leading staples, too, all showed net gains—corn 1-3 to 1-3c, oats 1-1 to 1-4c and provisions 1-2 to 5c.

Much lower quotations from Liverpool were a decidedly unsettling effect early on the price of wheat. The trade changed front rapidly, however, when the fact was realized that the English market would be bearishly affected by an improved outlook for a resumption of shipments from America.

Winnipeg advices received careful scrutiny as prices there are the highest of the Atlantic, with all markets from Winnipeg said the British Government was preparing to move 1,000,000 bushels, more to follow as quickly as possible.

The United States Government crop report turned out a very active business. Winter wheat flour is 50c per barrel higher, but even at this advance buyers found it impossible to fill their wants.

According to predictions regarding the total yield expected, an increase in winter wheat of setting the losses in spring. Corn ruled strong and new crop futures reached the highest prices of the year.

Belief that the government estimates would prove correct, and the market had closed, it being shown that the probable shortage due to drought and heat was far greater than generally supposed.

Oats advanced sharply. Oats advanced independently of the grain market, as the English Government would be likely to require oats freely from this country and that the Canadian supply was insufficient.

Provisions continued to climb. Exceptional advances were reported at Liverpool and domestic receipts of hogs were greatly improved.

Speculative transactions in pork and lard and ribs were at times impossible the market being entirely bare of offerings.

WINNIPEG GRAIN MARKET

WINNIPEG, Aug. 7.—Wheat prices were again soaring after a weak opening. American houses were selling heavy buyers, and at noon prices were on the rise.

2-4 for October, 2-4 for December and 3-4 for May, all higher than at noon. Oats also made a sharp advance.

October being sold at 1-2 higher; Flax opened unchanged and at mid-day stood at 3-4 to 3-8 higher.

The cash demand for all grades of wheat was good, and cash offers were selling at 3-12c higher than yesterday's close.

The buyers were principally locally housed with eastern connections. The British government bought all the cash offers available.

The weather while greatly improved as regards temperature, keeps dry only two points in the whole map recording moisture, these being Calgary and Edmonton, and it was light.

HARVEST OF BRITAIN MAY BE TAKEN OVER

Canadian Press Despatch. LONDON, Aug. 7.—Chancellor of the Exchequer Lloyd George informed the house of commons that the government was considering the question of taking over the entire harvest throughout the British Isles.

The Chancellor declared that the banking business was normal everywhere and that the people were paying in money quite freely.

The German banks in London have been obliged to close until the British Government grants their applications for licenses.

THIS MAN SUFFERED FOR A YEAR WITH RHEUMATISM. My Electric Belt Cured Him.

Read what Mr. Robert Baker, Tamworth, Ont., says: "I am thankful to tell you that I am well again after over a year's suffering from Rheumatism. I have spent hundreds of dollars after over a year's treatment in medicine, tried some of the best doctors in New York State and Canada, and went to the Hot Springs, but none did me any good.

I seemed to be getting worse all the time. I got discouraged and thought there was no help for me. I was so bad that I could not walk around the house, but thanks to your Belt, it cured me and it helped right from the very start. I can work hard now and do not mind it.

This is the way they all feel after having used my Belt for a short time. You can feel the same way, if you will but try it. Such a recommendation is made by every one who has used it. It not only cures Rheumatism, but also Stomach, Liver, Bowel, Kidney, Bladder and Nervous troubles. Its glowing energy fills your system as you. It is a binder, an invigorator. Its glowing energy fills your system as you. It is a binder, an invigorator.

RUSSIAN REFUGEES BRUTALLY TREATED

Vivid Picture of Conditions on German Island in the Baltic.

HERDED LIKE CATTLE

Women and Children Subjected to Gross Indignities by Authorities.

Canadian Press Despatch. LONDON, Aug. 7.—The Berlin correspondent of The Daily Telegraph, who has reached Stockholm, sends the following despatch:

"The scene witnessed at Sessmith, a famous watering place on the east coast of the German island of Rugen, in the Baltic Sea, baffled all description. Some 5000 Russian refugees turned out on the quay, were left to struggle for access to a steamer which was reached by only a single gangway.

The vessel was obliged to sail, leaving 5000 of them in despair, believing that the last chance to return to their country had gone.

"One family had a letter of credit for 20,000 roubles (\$10,000), but were on the verge of starvation. Some of the refugees were half mad with hunger, thirst and lack of sleep.

"Harrowing Tales. The correspondent says that harrowing stories have been told by refugees who are arriving at Stockholm by the thousands. Many of them were moved about by the train for four or five days, without any idea as to what was being done for them.

Foreigners taking the cure at Wiesbaden and Kissingen were glad to crowd the fourth class cars in their desire to get away. "They were like people in crates," the correspondent adds, "without food for or drink, and almost without air for fifteen hours at a time.

During the nights when they were not in the train they were turned into cow sheds at slaughter houses. Everywhere they were subjected to a continuous fire of insults from the troops, especially the officers. Women of delicate breeding were openly threatened with violence, and all before the declaration of war.

Outrageous Treatment. "Among the victims was Mr. Kasso, former Russian minister of education. Twice he was placed under arrest, in spite of the knowledge of his identity, and packed into a fourth-class carriage. Councilor of State Schreiber and his wife were assaulted by officers, to whom they ventured to complain. Wives were separated from husbands and parents from their children. No consideration was shown either for age, sex or infirmity. Many persons in the ignorance of the whereabouts of those dearest to them.

The Standard's Berlin correspondent said that all persons of name and abroad who previously had been rejected by the army as unfit for service, have now been summoned to the colors.

FATAL ACCIDENT AT CONSTRUCTION CAMP

Peter McIntyre Fell From Donkey Engine and Was Run Over.

Special to The Toronto World. WOODSTOCK, August 7.—At the C.P.R. construction camp just west of this city shortly before 7 o'clock this morning Peter McIntyre, an employee of the contractors in charge of the Dundas street subway construction, fell under the wheels of a donkey engine and was almost instantly killed.

He was riding on the rear of the engine when it suddenly lurched forward from the drawhead on which he was sitting and fell to the roadway. The engine and several dump cars passed over his body. He was a resident of Priceville, and has been employed by the contractors now engaged on the subway for many years. His mother and a sister reside in Galt. An inquest will be held.
