They were met at the Canadian end of the tunnel by a delegation of Port Huron citizens, aldermen and city officials, headed by Mayor Stevens. The Cadets were given an enthusiastic reception by the delegation and cordially welcomed into Uncle Sam's domains. After a short stay the visitors proceeded on their trip, leaving here at 8 o'clock over the Chicago and Grand Trunk Railway. The Cadets are uniformed in the regular full dress of British redcoats and carry Martini-Henry rifles. They enter this country with their arms by special permit of the United States Government. On their return trip the Cadets will less through Detroit.

American Warships Take Part in the Engagement.

Insurgents Driven Back-Loss Serious on Both Sides-Dispatches From Admiral Dewey and General Otis-Washington Startled by the News, but Confident That the U.S. Forces Are Masters of the Situation.

Washington, Feb. 6.-Admiral Dewey on Sunday cabled the navy department that hostilities had begun between the American army and naval forces in and about Manila and the Philippine insurgents. The insurgents, he said, had been the aggressors, and had been repulsed. The admiral's message was as

"To the Secretary of the Navy, Washington: Insurgents here inaugurated general engagement Saturday night, which was continued today. The American army and navy is generally successful. Insurgents have been driven back and our lines advanced. No casualties to navy. (Signed)

"DEWEY."

No word had been received from General Otis up to nightfall. It was with great regret that the administra-American people, and relying upon the emy.

least technically. Officials noted one point in Dewey's dispatch, in that he spoke of the American navy as "generally successful," conveying just the least intimation that at some points the results were not as satisfactory as at others. It is inferred here that this might mean the development of weakness at some of the more exposed

points on the American lines. CONFIDENCE IN GEN. OTIS. that Gen. Otis is master of the situa-The forces under his command at the last report were 21.649 troops. Approximately 6,000 men, are on their way to join General Otis in four separate expeditions, though none is expected to reach Manila for six weeks or a month. These troops, with those now in Cuba, represent the cream of the American army, according to Gen. Corbin. It is true that only about 3,000 of Gen. Otis' soldiers are regulars, but his volunteer soldiers have been under thorough discipline and training for months, some as much as eight months, and many participated in the engagements tending the capture of Manila, and are

equally as good as the regulars. INSURGENTS' STRENGTH UN-

BACKED BY DEWEY'S FLEET. Besides his soldiers, Gen. Otis has at his back in Manila Bay, commanding the city, a veritable rock of Gibraltar in Dewey's fleet. With the vessels he has now and about to join him, Dewey will have 21 ships of various types. The fleet cannot operate against troops in the interior, but undoubtedly Dewey will immediately draw tight a cordon of blockading vessels around the Island of Luzon and make a special effort absolutely to cut off the insurgents from the supplies and ammunition which they must have to carry on the war.

"Manila, Feb. 5 .- To the Adjutant-General, 5th February-Insurgents in large force opened attack on our outer lines at 8:40 last night; renewed attack several times during night. At 4 o'clock this morning entire line engaged; all attacks repulsed. At daybreak advanced against insurgents, and have driven them beyond lines they formerly occupied, capturing several villages and their defense works. Insurgent loss in dead and wounded large. Our own casualties thus far estimated at 175. Very few fatal. Troops very enthusiastic and acting fearlessly. Navy did splendid execution on the flanks of the enemy; city held in check, and absolute quiet prevails. Insurgents have secured good many Mauser rifles, a few field pieces and quick-firing guns, with ammunition, during last month.—(Signed) OTIS."

Manila, Feb. 5-6:15 p.m.-The longthe protocol, it will amount to a re- expected rupture between the Americans and Filipinos has come at last. The Californian and Washington regiments made a splendid charge and tain fanatical bravery in onslaught drove the Filipinos from the village of Paco and Santa Messa. The Nebraska regiment also distinguished itself, capturing several prisoners and howitzer, and a very strong position at the reservoir, which is connected with the waterworks. The Kansas and Dakota regiments compelled the enemy's right flank to retire to Caloocan. There was intermittent firing at various points all day long.

GUESSING AT THE LOSS. The losses of the Filipinos cannot be estimated at present, but they are known to be considerable. The American losses are estimated at 20 men killed and 125 wounded. The Ygorates', armed with bows and arrows, made a very determined stand in the face of artillery fire, and left many dead men

on the field. Several attempts were made in this city yesterday evening to assassinate American officers. THE NEWS AT MADRID.

Madrid, Feb. 5.-Intense excitement was caused here this evening by the receipt of the following dispatch from Gen. Rios, the Spanish commander in the Prilippines: "The insurgents have violently attacked and captured almost the whole of the exterior American line. The Americans offered a vigorous defense at the exterior barriers, using their artillery as well as principal points of the eastern trade, the squadron. The warships destroy-

Rios cables that Aguinaldo promises to release the Spanish troops upon the payment of \$500,000 and handing over to him of the cannon, rifles and 5,000,000 cartridges belonging to the Spaniards. The government here replied that it could not accept this transaction, as it would be equivalent to indirect protection to the insurgents, which would be a breach of the Spanish engagement with the United States. Aguinaldo, it appears, still retains the

civil prisoners and the monks. THE LONDON PRESS. London, Feb. 6.-The Daily Chronicle says: "The Filipinos have helped to assure the ratification of the peace

treaty. The Standard says: "The paucity of news and the boldness of the rebels in their attack upon Manila is ominous, and it is not unlikely that the Americans will have a series of toilsome campaigns over the scattered islands."

The Daily News says: "The fact that American blood has been shed will secure, we imagine, the immediate ratification of the peace treaty. The Filipinos have shown their unfitness for self-government at the very outset by a rash and untimely manifestation.

Troy, N. Y., Feb. 6 .- Word was received in this city at 10 o'clock last night that Agoncillo would reach here on his way to Montreal at 11:15 o'clock. The train arrived on time, and with the train was a party of newspaper men. When the cars pullwas given out that Agoncillo was in one of the sleepers, and that he could not be disturbed. He had retired at Poughkeepsie. The train left Troy at 11:30 o'clock for Montreal.

Today's Developments.

DEATHBLOW TO INDEPENDENCE. Manila, Monday, Feb. 6-9 a.m.-The Filipinos have apparently reached the conclusion that the Americans mean business, as there were no further hostilities last night, and not attempt was made to recover the lost ground. It is possible, however, that they are following the tactics they employed against the Spaniards, and will merely lie off a few days to recuperate their forces before returning to the attack. It is impossible to ascertain as yet how

the news has been received at Malolos, the seat of the insurgent government, but the Filipinos in Manila express the opinion that the movement for inde-pendence has received its deathblow, and that annexation will soon be welcomed generally.

GENERAL WADE'S VIEWS. Chicago, Feb. 6.-In referring to the James F. Wade, who is en route to St. Paul, where he goes to take command of the department of Dakota, which position he held previous to going to Cuba, said: "I do not think the United States need anticipate any trouble there. Gomez's last communication to the president, in which he accepted the terms offered by this country, has practically settled that as far as the insurgents are concerned. When shown the dispatches from Manila, giving an account of the attack on the American forces by the insurgents, General Wade said: "Well, that looks like business. Of course, there is nothing left to do but fight, and I don't think there can be any doubt of the result. Of course, it is greatly to be regretted that hostilities have been commenced, but it certainly does not seem to have been the fault of the Americans.'

TO CRUSH AGUINALDO.

New York, Feb. 6.—A dispatch to the Herald from Washington says: Instructions have been sent to Major-General Otis directing him to follow up his victory over the insurgents and to crush the power of Aguinaldo in the Philippines. This was the decision reached at an important cabinet meetreached at an important cabinet meeting held in the White House tonight (Sunday), attended by the president, Secretary Hay, Secretary Alger, Attorney-General Griggs and Adjutant-General Corbin. It was further decided now that Aguinalde has thrown cided, now that Aguinaldo has thrown down the gauntled, that Iloilo shall be taken and the islands of the archipelago occupied as rapidly as possible and to the extent that General Otis' forces will permit.

BRAVERY APPRECIATED.

The victory won at Manila was the cause of the sincere congratulations in the executive mansion, and the president expressed himself as delighted with the heroic performance of our officers and men.

President McKinley greatly depre-cated the action of the insurgents in precipitating a conflict. It has been his hope that when they understood the beneficent purposes of the Washington Government they would willingly consent to the extent of American sovereignty over their homes.

AGUINALDO HAS GONE TOO FAR. It was pointed out tonight that Aguinaldo and his followers have placed themselves within that provision of the president's proclamation declaring it being the purpose of the United States Government to hold to strict accountability those responsible for the dis-turbance of the peace and order of turbance of the peace and order of his farms. It is added that two regithe island, or who fail to recognize the ments which were sent to the scene of supremacy of the United States. MESSAGE FROM DEWEY. Washington, D. C., Feb. 6.-Admiral department today: "Manila, Feb. 6.— Secretary Navy, Washington,—Insurgents have attacked Manila. The Boston leaves today for Iloilo to relieve the Baltimore, which will return to Manila. Two men wounded yesterday on board Monadnock, one seriously. "(Signed) DEWEY."

"(Signed) BEFORE THE BATTLE. Hong Kong, Feb. 6.-The following

dispatch was received here from Manila before the outbreak there occurred: Rear Admiral Dewey, in an interview, said the Monadnock is guarding one end of the city, the Monterey the other, and the army protects the rear. He added that he had sent word to Aguinaldo, that if, accidentally, the insurgents entered Manila, he would reduce it to mortar and stone. The insurgents are an armed mob, the dispatch adds, incapable of government, and are angry with Admiral Dewey for seizing vessels flying Filipino flags. The admiral, the correspondent says, is not favorable to annexation, but believes in the gradual withdrawal of the United States troops. He also says the United States is morally bound to establish a stable government in the Philippines.

"ONLY A SKIRMISH."

Hong Kong, Feb. 6.-The Filipino junta here has issued a statement setting forth that the fighting at Manila was only an outpost skirmish, designed to influence the vote in the United States Senate today on the peace treaty.

CARNEGIE AGAINST EXPANSION. "Americanism vs. Imperialism" is the title of an important article from the pen of Andrew Carnegie in the January number of the North American Review. Mr. Carnegie is a determined foe to territorial aggrandizement, regarding possessions in the far east the republic. He would leave the declares, that the inevitable result would be a government better suited to the people than any that our soldiers and their officers could ever give.

## occossosso DEATH OF A PIONEER.

Mr. Charles Connors. One of London Township's Oldest Residents, Is Dead-Had Reached the Advanced Age of 87 Years,

Mr. Charles Connors, one of the oldest pioneers of Middlesex, passed away at his late residence, con. 7, lot 20, London township, yesterday, from an internal trouble. Deceased was 87 years of age, and was hale and hearty until a short time ago. He was born in Ireland and came to Canada when a boy with his parents, who settled in Howard township, in 1821. The country was then a wilderness, and Mr. Connors endured many hardships in the early days, which gave him a very rugged constitution. He was well-known throughout Middlesex, and universally respected for his warmth of personality and kindness of heart. He was a life-long member of the Methodist Church.

Four daughters and one son, Thomas W., survive to mourn the loss of a kind and indulgent father. The interment will take place tomorrow to the Thamesford Cemetery.

Mr. Robert McCurdy, a well-known citizen, died yesterday at his residence, corner Bathrust and Adelaide streets, aged 67. Mr. McCurdy had had a busy in Hamilton, Scotland, and came to Canada when very young. He learnt the carpentering trade, but when still in early manhood went to New Zealand and Australia, accompanied by his brother, Mr. Thomas McCurdy, and engaged chiefly in mining. Mr. Thomas McCurdy remained six years, but Robert did not return for 15 or 16 years. He took up his residence again in London, and had lived here ever since, a useful and honored citizen. He worked at Wortman & Ward's establishment until a year or two ago, when illness compelled him to give up active exertion. Of late he had suffered a great deal. Mr. McCurdy leaves a widow, but no children. His brothers are: Thomas, of this city; Hugh, of Corunna, Mich., the celebrated Knights Templar. In religion deceased was a Presbyterian. The funeral will take place, tomorrow, at 2:30.

OSTRICH HUNTING IN NUBIA. Ostrich hunting involves good riding, and is animated sport. Having ascertained where a nest is to be found.three or four mounted men go out on the plain together, and one of them rides in the direction of the nest.

Instantly the bird sees him it starts off at a tremendous pace, the hunter following in hot pursuit, until, after running perhaps a couple of miles, the ostrich begins to circle, its object being to get back to its nest, from which it fondly hopes it has diverted its pur-

suer. The other hunters, who are scattered over the plain, take up the running by turns, succeeding each other as each horse becomes spent; they are thus able to press the bird to its utmost kissing the Bible in one of the court rooms where he was sitting, has reground, with outstretched wings, gasping for breath.

The nearest hunter then gallops up and severs its head with a blow from his sword. Hastily dismounting, he at once seizes the bleeding stump and thrusts it into the sand to prevent the feathers from being soiled by the blood, which is spurting in all directions from the convulsive movements of the neck, even after death.

The feathers of a full-grown bird fetch from \$50 to \$75 at Kassala, where they are bought by Arab traders from Cairo, but they ultimately realize treble that value in the European mar-kets.—From "A Glimpse of Nubia," by Capt. T. C. S. Speedy, in Harper's Magazine for January.

# CANADA A FREE COUNTRY

So Says a Doukhobor-He Likes Canada for That Reason.

That the Doukhobors will get on well in their new home there is little doubt. The movement to transplant them from the Russian steppes to our Northwest prairies was not entered upon without long and careful considerattion of the difficulties to be encountered and the prospects of success. Many asylums were offered them in the various parts of the world, but the Dominion was selected as the country where there was the best chance for successful settlement. Some notion of the mental attitude of the Doukhobors may be gained from the report of an interview which a Montreal Witness reporter had with John Ivan, the advance agent of the colony. He is described as being as wholesome and robust a specimen of an agriculturist as one could desire to see He is stout of build, ruddy of face, and with a pleasant expression and manner. John is reported to have said, with the

aid of an interpretor: "I regret that I do not know the English language, but I am not too old to learn. All that I have seen in this country I like. I went to the parliament at Winnepeg, I went to the parliament at Ottawa, and I found that this was a free country. You can criticise; you can put the government out if you want to. This is something I never dreamt of in Russia. If you dare to say of such and such a local council which ruled the district, that you did not like it, that would settle you. You would be arrested and probably exiled. I find people in this country shake hands with me and speak kindly to me. This is a new and grateful experience. The first century run by a woman in 1899 was made on Sunday by Mrs. Irene Brush, a comely young cyclist, of Brooklyn. Mrs. Brush was accompanied by her brother-in-law, Charles Brush, a hardy road rider. The pair left the house at 8:30 a.m., reached Babylon, the turning point of the ride, and completed the last mile at 7:30 p.m., making the century in exactly 11 hours. In order to prevent any question as to the authenticity of her ride, Mrs. Brush received signatures of innkeepers, along the route, who verified her claim.

### FORSOOK BILLIARDS FOR HORSES.

Frank C. Ives, the billiard champion, who has decided to campaign a stable of trotters and pacers next season, has sold a half-interest in the horses he recently purchased-the bay stallion Planet, 2:04%, by Bonnie McGregor; the gray gelding Success, 2:12%, by Sherman; and the bay gelding Canton, 2:19%, by Alcyonium, dam Lady Roxy. Senator Reynolds, of Brooklyn, is the gentleman who will be in partnership with Mr. Ives. They expect to buy two or three more good ones, and will have a stable that ought to haul down some of the purses. Mart. Demarest will have charge as trainer and driver.

Parmer, secretary of the northern racing circuit, has issued the stake programme for the spring and summer running meetings, and the dates are: Montreal, June 8 to 24; Fort Erie, June 28 to July 21; Windsor, July 22 to Aug. 12; Highland Park, Detroit, Aug. 12 to 26. Five stakes valued at

meeting. The association plans to make the Fort Erie meeting the biggest feature, and offers six stakes, valued at \$7,500, the most prominent being the renewal of the Canadian Derby, \$2,500.

At the Windsor and Detroit meetings three stakes worth \$1,000 each are are three three cincennation.

FISTIC. TWENTY ROUNDS.

Joe Bernstein, of New York, got the decision over "Young" Pluto, of South Africa, Friday night at the Greenwood Athletic Club in Brooklyn after a hard fight of 20 rounds.

EVENTS AT CINCINNATI. Cincinnati, Ohio, Feb. 6.—The largest crowd since John L. Sullivan and Dominick McCafferty fought here in 1885, witnessed the boxing contests at the Stag Athletic Club on Saturday night. The main attraction was a 15-round go between Australian Jimmy Ryan and Joe Walcott, at catch weights, for a purse of \$1,500. Walcott was the aggressor during the entire contest, Ryan continually clinching. In the 14th round landed hard body blows with the right. In the break-away Walcott landed a hard left swing on Ryan's chin, flooring him. Ryan took nine seconds of the count, and on rising rushed to a clinch. Walcott pushed him away, and swinging a hard left and right landed on the jaw, and again sent Ryan to the floor. The latter got to a sitting position, but the referee, seeing he was helpless, stopped the contest and awarded the decision to Walcott.

ELEVEN ROUNDS. New York, Feb. 6.-At the Pelican

Athletic Club, in South Brooklyn, on Saturday night, Tom Broderick, of Yonkers, defeated Paddy Fenton, of Boston, in 11 rounds. The men met for 15 rounds at 118 pounds.

WALCOTT KNOCKED OUT RYAN. Cincinnati, Ohio, Feb. 6.-Walcott knocked out Australian Jimmy Ryan in the fourteenth round.

### BASEBALL.

SOUTHPAWS NOT STAYERS. The first left-handed pitcher known to the ranks of professional ball was Lee Richmond. He was with the Worcesters in 1881-82, and was looked upon as a freak. Left-handed batters thought they could not hit him, and when he pitched against the old Detroits, Hanlon used to beg of Bancroft to leave him off the card, and send a catcher to center field. Richmond could strike Hanlon out four times out of five. The second port-side pitcher was Morris, of the Pittsburgs. He was first a catcher, but one day discovered that he could pitch. He was considered one of the most effective of pitchers in 1884, but he had a red-headed temper, got into trouble with Manager Horace Phillips, was laid off, and dropped out of sight. Kilroy and Ramser were the next pair, and were good ones, but soon dropped out of sight. There have been many since then, but none of them last long. Old Jimmy Galvin used to say that they could not stand the strain "because their pitching arm was on the same side with their ticker," meaning the heart.

It is Byrne who is now blocking the Baltimore-Brooklyn deal, and his terms have been agreed to, but Abell is not prepared to pay \$10,000 in cash, as Byrne demands, and there the deal hangs.

According to an eastern exchange, First Baseman Slater is down with typhoid fever, and Stallings may be obliged to get Kelly, the big fellow from Ottawa, who is on the claim list. Hanlon is said to have received \$10,000 for his services as manager of the

Orioles last season. This figure seems rather high for these days of economy, and probably is far above the true mark.

Manager Dooley, of the Montreal team, has given it out that he intends to release many of the last season's players, and will sign a new team, but Frank Sheibeck, who played shortstop for the Eastern League champions, does not anticipate any sweeping changes in the team.

Herman Doescher, the old umpire, claims he has received offers from both the Western and Eastern Leagues for the coming season, but has decided to give up the business. His son is a college pitcher, and it was reported that he had signed with Buffalo, but Doescher says he will not allow the boy to pitch professional ball for the measly salary that has been offered.

George M. Beckett, captain of the Stanford University paseball team, died at Palo Alto, Cal., from the effects of an operation for appendicitis on last Friday, President Golt, of Indianapolis club,

says that unless the old grounds can be secured for another season the present owners would not maintain a ball club in that city next season. This step has been decided on. As soon as the board of public works takes final action on the opening of a street through the park, the Indianapolis players and franchise will be for sale.

A fan who has held a stop watch on the games for several years past says average time from the crack of the the bat to the moment when the ball reaches the hands of the first baseman, when fielded by a third baseman or shortstop is 4½ seconds, the range being from 3 to 5 seconds. Ned Hanlon, manager of the Baltimore club, says that the deal in which the cream of the Baltimore baseball talent was to be transferred to Brooklyn was to be represented by as strong an aggregation of ball tossers as ever pursued the championship emblem.

Geo. N. Kuntz, secretary of the Syracuse baseball club, gives out the news that the deal whereby Rochester was to become a member of the Eastern League has fallen through.

John H. Callahan said that he had been in telephonic communication with President P. T. Powers, of the Eastern League, after the receipt of the Associated Press dispatch from Syracuse, and that Powers had notified him manent cure. that the Utica deal was off, and that Rochester's application for membership both men rushed at each other and in the Eastern League still holds good. Within twenty days the St. Louis franchise and players will be sold to satisfy the creditors, and as Von der Ahe has appealed, but failed to deposit an indemnifying bond, it will be closed out over his head.

An occasional game of baseball is played in Cuba, and it is said that the natives are more insane over the sport than Americans are. If they act as foolish as a Western League crowd does during an interesting game, Cuba is certainly entitled to be called part of the United States.

lected the \$400 bet. At the sportsman's show, which opens March 2 at the Madison Square Garden, those who are interested in the life of the hunter will find plenty to see. A large part of the garden will be given over to an Indian village and a big game park, 90 by 40 feet, which will be something new to New Yorkers.

An energetic critic writes in an Australian exchange deprecating the idea of what he calls Sloan's "monkey-ona-stick" method can possibly be the main cause of the jockey's success. This he attributes largely to Sloan's ability to pick his mounts, which, he says, was also the foundation of Archer's fame. He winds up with, "Put me on the Grafter and Ted Sloan on a 'bus horse, and he'll do badly every time, even though he sat between his horse's ears and had an electric battery switched on to his tail also."

# London Adbertiser. [ESTABLISHED BY JOHN CAMERON IN 1863.]

Managing Director John Cameron and Editor,

London, Monday, F.b. 6, 1899.

Startling News From Manila. There is startling news from Manila. It was not altogether unexpected, but still it comes as a shock. The tension between the natives and the Americans has been severe ever since the conclusion of peace negotiations between Spain and the United States. Aguinaldo seems to be regarded as a George Washington by the Filipinos, and has evidently been carried away by the ambition to exercise his authority and power.

It will be interesting to watch the effect at Washington of this sensational and accordingly he continued to sleep, devélopment. It will doubtless cause bitter recriminations in Congress. Those who have favored the immediate ratification of the peace treaty will endeavor to place some of the responsibility for the outbreak at Manila upon those who resist American sovereignty. The opponents of the treaty will retort that the eruption is the natural fruit of the Administration's mistaken policy in overriding the legitimate aspirations of the natives.

The vote upon the peace treaty is fixed for this afternoon, and it is certain that the news from Manila will insure its adoption. The minority of the Senate will hardly dare to burk it, in the face of the national sentiment aroused by the attack upon American arms. The prestige of the republic is at stake in the eyes of the world.

It is gratifying to note that the American troops behaved with gallantry, and decisively repulsed the native rabble. It may have the effect of bringing the latter to their senses without further bloodshed and violence. Now that they have felt the superiority of American military power, they may be inclined to listen to American diplomacy.

### The Open-Air Cure for Consumption.

A writer in the January number of the Nineteenth Century gives a most interesting account of how he was cured of what was alleged to be a very bad attack of consumption by the open-air system. The cure is so simple that one have been subjected to the same treat-

The patient referred to was seized with what his medical advisers all the symptoms and suffering that usually come from consumption, and the young man was told that he had not long to live. He was gradually wasting away, when he was advised to try the treatment given in the Black Forest, Germany. This he did, remaining away from Great Britain three and a half months. During that time he gained three stone in weight, and quite recovered his health, his chest measurement having increased six inches. Since that time, now three years, he has uniformly enjoyed good health, and is as strong as any of his neighbors.

How this marvelous result was brought about is stated with frankness. In the first place, the medical expert in well. There can be no improvement, he ity of the Anglican orders, declares that are willing to admit in devoting his holds, without weight-getting. The patients "are stuffed to their utmost capacity." The food is of ordinary character, but consists of plenty of milk-fats of all kinds, meats, potatoes, vegetables, butter, bread, cheese, fruits, sweets, etc. This overfeeding causes no ill effects. As the weight increases the patient recovers his normal strength, the cough leaves him, his lungs begin to heal, and he gets the rest which is necessary to complete cure. The meals are at long intervals, and there are no snacks between times. The outdoor and indoor exercise is regulated by those in charge, and while one set of patients may be allowed to climb the hills, another is compelled to stay in bed, and avoid even the exertion of reading a novel. Ten hours' sleep at regular intervals is insisted on. It is to bed at 9 and up at 7 always. The medical expert holds that even if one is not sleeping he is being helped, because he is resting. Then pure air, both inside and outside, is absolutely essential to an early cure. The casement windows of the sanitaria are kept open night and day, winter and summer. Thus the patient lives practically an outdoor life. Because of this equality of temperature, there is no danger of chills, summer or winter. The result of the treatment is so beneficial and enjoyable that when the patient returns to Great Britain he cannot feel comfortable in a room with closed windows. How would he live in some of our Canadian houses, with their double windows and perpetually boiled

It may be thought that there is some special merit in the surroundings, and that these effect the cure. Nothing of the kind. lation for the extension and modification of the London government, for the creation of an Irish agricultural department, for the promotion of secondary and technical education, for enabling workmen to purchase their dwellings, for the suppression of usury, and for the prevention of food adulteration. All these, however, are likely to be overshadowed by the new and stead of being reserved for the night most serious situation which has de-veloped so startlingly during the past few days. England is food by the few days. England is faced by the man entertained his Liberal colleagues shocking prospect of a bitter religious is astonished at the results alleged to struggle. No such religious demonstration was ever seen in this country as Tuesday's gathering at Albert Hall, where 10,000 cheered wildly for Harcourt and Kensit, and savagely hissed the Archbishops of Canterbury and York. As an example of how far this religious quarrel transcends ordinary political differ-ences, the ritualists have announced intention to vote against any member of parliament, Liberal or Conservative, who has shown sympathy with the attempt to enforce the principles of the reformation upon the Church of England. No fewer than 57 parliamentary seats are thus threat-

Lord Halifax, leader of the ritualists, who recently failed in the attempt to induce the pope to recognize the validthere are a thousand clergymen who leisure for months to the discussion of daily more ritualistic clergymen frank- ing him as a disturber of religious ly defy the bishops. All this evokes opposition to Balfour's Irish proposal.

Rev. Hugh Price Hughes, leader of the result of Balfour's scheme will be bigotry and intolerance.

Col. Sanderson, an Ulster member, describes the proposal as "an incredible piece of fabulous insanity," which, if persevered with, will not only wreck the government, but break up the Un-Arnold Forster, another Ulster mem ber, declares that the proposal must

be fought tooth and nail.

VETOED BALFOUR'S PLAN. The result is what might be expected, for I learn that the cabinet has vetoed Balfour's plan. Thus his attempt to allay religious passion has caused it to burst into flames with results that nobody can foresee. His position in the government might be compromised. He has now seriously declared that it is a matter of indifference whether he remains in public life. As he feels deeply upon the matter, and has no longer a ghost of a chance of carrying his scheme, his personal future is very uncertain. Meanwhile two classes rejoice greatly at this almost ferocious intermingling these two distinct problems-first, the Roman Catholics, who see the Anglican Church rent in twain, and, second, the Nonconformists, who hope that disestablishment may result.

LIBERALS IN GOOD HEALTH. The eve of the opening of parliament finds the Liberals in better heart than for a long time. Many Liberal members have now returned to London, and the exchanges of views have been numerous and encouraging. Sir Henry Campbell-Bannerman, the new leader, entertained the Liberal officials at dinner Friday night, and they all came away cheered by his own confidence, and in high spirits. As a leading Lib-eral official said: "Campbell-Bannerman is taking up his task as if he were 33 instead of 63, and roundly declares that he means to make everybody on not in Canada, where opportunities are ly been during the past fortnight an collapsed over the great part of its general prosperity in business and ernment is understood to be favoring

London, Feb. 6. - The Queen's attempt by Sir Vernon Harcourt's folspeech will probably announce legis- lowers to secure support for a resolution requesting him to reconsider his resignation, but this has failed. THE QUEEN'S SPEECH.

The Osborne council for the approval of the Queen's speech is held five days before the meeting of parliament, a longer interval than usually occurs, and the contents of that speech were made known to the front opposition benches four nights in advance, in-Friday night, and the political situation was discussed in detail, as it would have been if he had been the titular leader and his colleagues had been dining with him on the eve of parliament. Lord Kimberley will entertain a small group of Liberal peers tonight, the usual ministerial banquets will come on with a large and brilliant reception at Devonshire House. Henry Campbell-Bannerman will serve the purpose of leading the Liberals in the Commons during the transition period, but the real question of party leadership will remain unsettled, with the claims of Lord Rosebery and Sir William Harcourt as closely balanced Sir William's letter in the as ever. Times on the church crises has a fairly jubliant ring, and every paragraph indicates that he is conscious of his advantages of position, and has no idea of effacing himself from politics. Indeed he cannot do this, since he has become the real leader of what is known as the Protestant party of the of England, and will have a powerful following on both sides of the house whenever the real burning question in English politics comes up, and LORD HALIFAX, LEADER OF THE all keen observers agree that it cannot be kept down. SIR WILLIAM'S CLEVERNESS.

Sir William Vernon Harcourt has been much cleverer than his opponents will never abandon ritualism, and that religious politics. They began by mockpeace, and an imitat on of the bad manners of the sensational Kensit, but they no longer laugh at him. The great Protestant meeting in Albert Hall has the Methodists, denounces the Irish convinced them that the disestablish-Catholics as "the spoiled darlings of ment movement has received a tremenparty politicians," and declares that dous impulse, that religious questions are bound to come up in parliament, to stereotype and deepen sectarianism, and that Sir William will be the real leader of Protestant England in the debates which may upset the Unionist Government, well entrenched as it now is in the strongholds of political power. If any one has labored under the delusion that Sir William Harcourt has retired from public life, his remarkable letter will open his eyes. It is in Sir William's most effect debating and knock-down style; Mr. Balfour is mercilessly chaffed; Canon Gore is terribly punished for denying that the English Church Union had anything to do with the Hollborn Town Hall protest, and declaring that 2,000 clergymen would rebel against Episcopal authority. The Bishop of Lincoln is flayed for attending services conspicuous for illegal practices, and the bishops as a body are arraigned for deliberately shielding law breakers inside the church and preventing by their veto the prosecution of

notorious offenders.

DIRECT CHALLENGE. This vigorous and outspoken letter is a direct challenge for the bishops and government to take up a question which they are unprepared to settle. By his cleverness in raising the religious question and heading the movement against the bishops, the ex-chancellor has enormously increased his political influence. Lord Rosebery cannot lead the Liberals back to power with im-perialistic policies which do not differ from those with which the Unionists are identified. Sir William Harcourt has the Non-Conformists solidly with him, and he represents a large body of churchmen of both parties, who insist that obedience to the law is the price that must be paid for the Established Church, and that if this primary obligation be repudiated, disestablishment

must come. IN THE CONGO COUNTRY. Private advices from the Congo confirm the gloomy reports that found their way into print, and even more.

ther of the winter, and still there was | vast territories, and the remaining railway. Scores of stations were abandoned, and the natives destroyed the remainder. Antwerp commercial houses will lose millions, and trade will be paralyzed for years. All this fearful trouble is confirmed by traders and missionaries on the spot, and is placed to the discredit of Belgian officers, civil and military, whose one thought has been to make a personal profit by exploiting the wretched natives, regardless of what followed. The gravest feature of the situation is the loss of white prestige throughout Central Africa, French, German, and English people will inevitably suf-fer. Cecil Rhodes visited Leopold the other day, and it is not impossible that we soon may hear that the maker of all the British African Empire has arranged to take the Congo off the hands of the Belgian monarch. Advices have been received from the Congo it may be predicted, will be the losers. A GREAT-GREAT-GRANDMOTHER. The likelihood of her Majesty becoming a great-great-grandmother is causing no little sensation. She has already 32 great-grandchildren, but if goes well she will in May put another record to her wonderful career, when the confinement of Princess Heinrich Reuss is expected.

TYPEWRITTEN NEWSPAPERS. A typeless newspaper has just been produced at Brussels. The compositors of the Petit Bleu had struck. The news accompanying 16 pages of illustrations was set on a typewriter. Then the single typewritten sheets and the pictures were pasted on sheets of cardboard larger than the size of the newspaper. Then the whole was reduced by photography to the actual size. A print was made from the negative on a sensitized sheet of zinc, and the re-sult was a complete solid form ready for the press.

THE "NO POPERY" CRY. London, Feb. 6.-British politics, on the eve of the reassembling of parliament, show that the old warcry of "no popery" so long silent, has suddenly usurped first place. It is overriding party programmes and forcing leaders who prefer to divorce the church from parliamentary strife to declare themselves. The movement was started last summer by a then unknown bookseller named John Kensit, whom Englishmen rated as Americans did Coxey. gathered momentum through the low churchist's agitation until it now dominates public attention. The newspapers are swamped with communications, mass meetings are being organized everywhere, and the voters are insisting that their representatives announce their views.

BALFOUR HOWLED DOWN. How fiercely the people were wrought Balfour (the government leader in the House of Commons and first lord of the treasury, perhaps the most popular publicist), addressed his constituents at Manchester on Monday last, endeavoring to ignore ritualism and re-thrash stock themes of politics. He was fairly howled down. His auditors would not be silenced, when, in his grave, diplomatic manner, he attempted to slide around the subject by remarking that no violations of church law had come to his attention. The audience insisted that he should declare himself and the meeting broke up in a manner very like a state of anarchy.

WILL SAY WHAT HE THINKS. On Wednesday an influential delegation called on Mr. Balfour and arraigned him for advocating the establishment of a Roman Catholic university in Ireland. He replied that the scheme did not represent the party, but only

personal views, and said: "It is a matter of indifference to me whether I remain in public life. It is not a matter of indifference if I am prevented from expressing, even against my own interests, the views I prices. conscientiously hold."

The mass meeting of Wednesday. which was not representative save in the numbers attending, hooted the names of Lord Salisbury, the Archbishop of Canterbury and the Bishop of London, and demanded that ritualistic clergymen be driven from the church.

M. P.'S BLACKLISTED. A curiously leading part in the agitation is borne by the Nonconformists, and it is also noted that party lines do not hold, though the majority of the anti-ritualists are Liberals. The high church Conservatives have issued a blacklist of 60 parliamentarians, appealing to the voters to oppose them if they support anti-ritualistic legislation.

The bishops' bill, recently framed at Lambeth Palace (for over 600 years the London residence of the Archbishops of Canterbury), and the Irish university proposal, furnish the bones of concer tion. The latter had the misfortune be brought forward when the religious strife was most heated, and is likely to

have a hard road to travel. BRITAIN'S BUSINESS BOOM. Great Britain's business boom keeps pace with that of the United States. Not in ten years has there been such

boom, which maintains its strength unexpectedly, gold shares are higher than at the height of the boom of 1895. This feeling of confidence may be expected to continue if the parliamentarians refrain from attempting to goard Lord Salisbury to belligerent action as during the last session of parliament, and provoke counter-threats from other powers. Most of the stock values have attained a higher level than in years, and an unusually large proportion are buying for investments instead of speculation. A WARNING.

"Both the English and American firms have all the orders they can fill now. not enough business for both, the English manufacturers, not the Americans, The papers are daily reiterating their warnings of the past two months, that speedy fall.

PROMOTIVE OF FRIENDSHIP. The recent speech of Gen. Stewart L. Woodford, former United States minister to Spain, before the Army and Navy Club, at New York city, has been applauded by all Englishmen and has provoked divers comments. The moral friendly understanding between the two young potentate, and expresses himself most of them draw is that it helps the countries.

The Globe says: "Our moral support of the United States has been of incalculable value to them, by their own admission. In return we requide something more than Admiral Dewey's platonic approval of the civilizing mission of England." The paper then proceeds to demand more assistance in China than heretofore, and that British commerce should "not be excluded from territories whose acquisition has been facilitated by England's action, by THE KAISER INSULTED BY A MOB.

The shipyards on the Thames, Tyne and Clyde are building more ships for duty. He lately invited the officers of his regiment to dinner, prescribing black evening dress. This reached the ears of the emperor, who reprimanded the colonel and forbade its repetition. There were 48 trials for lese majeste in January, and sentences totaling seventeen years in prison inflicted. Socialistic paper calculates that 2,600 years of imprisonment have been pronounced in German courts for lese majeste during the last ten years.

GAMBLING MUCH IN VOGUE. With reference to the gambling debate in the reichstag a story is told showing the emperor's intense hatred of gambling. When he was crown prince and in command of the Garde du Corps he strictly prohibited it, and old Emperor William asked him to withdraw his orders. But the grandson replied: "As long as you intrust me with the command of the regiment I up was hardly realized until Mr. A. J. will not do so. I would rather ask you to relieve me of my post." The debates showed that in spite of the emperor's efforts, gambling is still much in vogue among the officers of the German army. CUBA A DANGEROUS RIVAL TO GERMANY.

The debates in the Prussian Diet this week were of especial interest, as they brought out the full extent of agrarian demands, and showed that the Prussian cabinet is unanimous on the agrarian question. The agrarian party in the diet is very much stronger than in the reichstag, and the speeches showed that even the National Liberals support the agrarians on many questions. Herr Wallbrecht (National Liberal) assured the government that there was a deep feeling of dissatisfaction caused by the agricultural depression in Western Prussia, as well as in the east, and that the sugar crisis had severely hurt the Rhine provinces. He also expressed the belief that Cuba, under the Americans, will quickly become a dangerous competitor with the German sugar industry, and recommended the Germans to form a sugar trust and raise home THE BALLOT IN GERMANY AT-

TACKED.

There was an interesting debate in the reichstag on the bill introduced by Herr Rickert (the Freisinnige leaderfor the protection of the secreey of the ballot. The two Conservative factions for the first time openly avowed their desire to abolish the secrecy of the ballot, and Emperor William's friend, Baron von Stumm, plainly declared that sooner or later secrecy must be abolished, at which the whole right loudly applauded. The bill, however, was adopted by a large majority, composed

of the center and the whole of the left. The agrarian leaders, Mendelsteinfels and Von Wagenheim, were more violent, calling on the government to abolish the commercial treaties and exclude American, Russian and Austrian agricultural products.

ANOTHER CABLE. The establishment of a company to

lay a direct cable between Germany and the United States now seems definitely assured. The capital, 20,000,000 marks, has been furnished by a number of banks and private capitalists, including the Duke of Ratibor. The German Gov-

stocks. Apart from the South African this and other cable enterprises, and the reichstag will be asked to make various appropriations and give preemption privileges.

RUSSIA FRIENDLY TO THE UNIT-ED STATES.

Ethan Allan Hitchcock, the retiring American ambassador to Russia, recently appointed United States secretary of the interior, carries home the strongest pro-Russian sympathies. He denounces emphatically the stories current since the Hispano-American war that Russia was a member of a coalition of continental powers which would have intervened in the dispute had England not refused to join them. Mp. Hitchcock says there never was a particle of truth in these stories, but, on the contrary, Russia has always been most friendly toward the United States and had manifested that friendship during the past year in many ways, of which Mr. Hitchcock's position forbade

him to speak. The Russian Government is so constituted that it cannot do much talking in such cases as the present, but can only wait for time to afford opportunities of proving the truth. When these oportunities arrive, Russia's friendship for the United States will be demon-

M. ROCHEFORT PELTED WITH

STONES.

The departure of M. Henri Rochefort, the editor of the Intransigeant, the Radical organ, from Marseilles for Algeria, was the occasion of a remarkable demonstration. The Rue de la Cannebiere was black with people, and guarded by a large force of police. When M. Rochefort's carriage appearand invectives, while the air was filled with flowers, stones and oranges hurled indiscriminately at the carriage. Fighting ensued, and many persons were injured, including two town councilors.

When M. Rochefort boarded the steamer which was to take him across the Mediterranean, the mob redoubled its uproar, and many persons jumped into boats and surrounded the vessel. M. Regis, the former mayor of Algiers, who was suspended on account of his bitter anti-Semite utterances, was also a passenger on the steamer. He anathematized the people, and jeeringly invited them to come to Algiers, where, he said, he would be in a position to give them a warm reception. A number of arrests were made.

Emperor William had a young French 'cellist, Paul Barzellaire, play at the court ball on Wednesday, and presented him with a diamond breastpin, re-

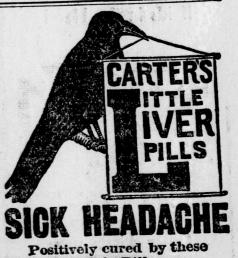

presenting the imperial monogram. The correspondent of the Associated Press hears on reliable authority that the German military authorities have ordered the introduction in the army of a new model repeating rifle, which the government works are already manu-

facturing. A typical duet, "John Bull and Brother Jonathan," a skit on land-grabbing, is having great vogue in the Paris music halls. In the dialogue, John Bull takes an atlas, tears out the map of each country, crumples it up, and puts it in his pocket, saying each time, "That's mine." When all the maps are gone, John Bull hands Brother Jonathan the covers, with the remark, "That's yours."

Curious corrections sometimes appear in the newspapers and a gem was printed in the Times last week. In a recent report in that newspaper, a lady was referred to as a widow. A correction which appeared the following day stated: "We regret that Mrs. Holliday was incorrectly described as a widow." Whether the regret was shared by Mr. Holliday, or his wife is hardly to be supposed.

# DEEP SEA READING

Temperature Taken 4,762 Fathoms Below the Surface.

The news has been brought from Austra!ia, that the British man-of-war Penguin has just returned to Sydney, N. S. W., after taking soundings between the Island of Longn and Auckland, New Zealand. The officers found that Falcon Island, which suddenly came up out of the ocean in 1885, is gradually receding. When relocated by the Penguin's officers, they discovered that the island is now three fathoms

The officers of the Penguin also succeeded in taking the temperature of before. Hitherto when the thermometer got down a great distance it was invariably broken. On this occasion the thermometer was sent down 4,762 fathoms, where the temperature was found to be 35.5°, while on the surface the temperature was 82°. This, the officers of the Penguin assert, is the deepest ocean reading ever taken.

And Then Takes His Own Life-An Old Lady's Terrible Fate.

St. Thomas, Feb. 6.—Mr. John W. Carr, of Union, who was injured in the woods a few days ago by a log rolling on his arm, by which there was a compound fracture, died Friday night. The deceased had resided with his grandfather, Mr. John Carr, for a number of years on the farm southwest of Union. He was a very fine young man, and a consistent member of the Methodist Church, Union, being superintendent of the Braynes Sunday school, Southwold.

TRAGEDY IN OHIO. Lima, O., Feb. 6.-Frank Blair shot and instantly killed Edward Brovard and Mary Anderson at Westminster, seven miles east of here, on Saturday, and immediately afterward committed suicide. Brovard and Miss Anderson were standing in a doorway talking, when Blair slipped up behind them and began shooting. Brovard was killed by the first shot. Miss Anderson was shot twice, the second ball penetrating her body. Blair sat down and reloaded his pistol, and then fired a shot through his head, dying instantly. Jealousy was the cause, Blair and Miss Anderson having been engaged previous to Brovard's appearance on the scene. OLD LADY BURNED AND FROZEN.

Mendon, Mich., Feb. 6.-Mrs. Mary A. Crabb, who had been living alone for the past fifteen years, was found dead registering 32 below zero at Valentine, 22 below at Beaver City and 10 below at North Platt. MOUNTAINS OF ICE.

St. Johns, Nfld., Feb. 6.-The British steamer Ulunda (Captain Fleming) from Halifax, by way of St. Johns, for Liverpool, has arrived here a floating mountain of ice. She reports that for the past few days the thermometer has registered 20° below zero, and that it has been almost impossible to work the ship's deck machinery and steering gear. The steamer Bruce has arrived at Placentia in a similar condition. On her voyage from Sydney she passed through fifty miles of ice. The steamer Gaspesia (Capt. McKinnon), of the new Canadian Line, from Paspebiac for Liverpool, will have great difficulty of forcing her way out of the Gulf of St. Lawrence owing to the ice floes.

Charlottetown, P. E. I., Feb. 6.-The mail steamer Stanley is caught in the ice off White Sands, near Murray Harbor, P. E. I. The passengers got ashore over the ice and drove to Charlottetown.

# **RESULTS OF THE SNOW EMBARGO**

Closed Down.

Denver, Feb. 6.-The weather continues very cold, the minimum temperature being 15 degrees below zero. The Denver and Rio Grande and Colorado Midland Railways have redoubled their efforts to open their lines west of Leadville. Reports received from all sections of the west indicate but small losses of stock in Colorado, Utah and New Mexico, but in Northern Wyoming and Montana, where the most cattle are on the open prairie, it is feared that the losses will be heavy, unless a change comes almost immediately.

Between Dickey and Leadville are 25 snow-slides, each 25 to 200 feet in length and eight to ten feet deep, and at the present rate of progress Kokomo will not be reached until morrow. At Wheeler a train loaded with mercandise and two locomotives, stalled since last Thursday, was discovered on a siding, with the train crew still its occupants. Slides before and behind had penned it in. The train

had been snow-bound for ten days. Division Superintendent Seeninger. of the South Park branen of the Colorado and Southern, said:

"We have had 71 consecutive days of snow and storm between Como and Leadville. In all that time there has not been a single day free from snowstorm and high winds. The old settlers state emphatically that this winter has been the most severe in 25 years. The snow is light and granular, and drifts easily. There has been no suffering from lack of provisions or fuel, unless it be at Kokomo. We have the road open between Denver and within 25 miles of Leadville."

Sawmills and mines some distance from towns have been closed down and the operatives have gone to the towns to secure food and warmth. The only mines open are those close to towns. For six days all communica-

tion on the high line has been stopped. Of the three snow-pound theatrical companies, "Gay Coney Island" suc-ceeded in reaching Grand Junction and went to Salt Lake, via the Rio Grande Western; West's Minstress and "Shot No. 2" are still at Glenwood Springs, missing dates but enjoying every comfort at the hotels. The Colorado Midland and Denver Railways are taking the best possible care of their snowbound passengers. There is little danger of more snow-slides, a crust

having formed Butte, Montana, Feb. 6 .- Saturday octhe ocean at a greater depth than ever curred the break in the extremely cold weather which has prevailed throughout Montana for more than a week. The thermometer went up to 18 below zero. Friday night it registered 35 below in the city and 48 in South Butte. Great loss on the cattle ranges is feared.

Lincoln, Neb., Feb. 6.-Friday night was the coldest for eight years in central and western Nebraska, the mercury on Saturday noon by, one of her neighbors, C. E. Klose. Mr. Klose, not seeing anyone stirring about the house for several days, entered, and found the old lady behind the stove dead. CATARRH OF STOMACH.

A Pleasant, Simple, but Safe and Effec tual Cure for It.

Catarrh of the stomach has long been considered the next thing to incurable. The usual symptoms are a bloating sensation after eatfull or ing, a formation of gases, causing pressure on the heart and lungs and difficult breathing, headaches, fickle appetite, nervousness and a general

played-out, languid feeling. There is often a foul taste in the mouth, coated tongue, and if the interior of the stomach could be seen it would show a slimy, inflamed con-

dition. The cure of this common and obstinate trouble is found in a treatment which causes the food to be readily, thoroughly digested before it has time to ferment and irritate the delicate mucous surfaces of the stomach. To secure a prompt and healthy digestion is the one necessary thing to do, and when normal digestion is secured the catarrhal condition will have disap-

According to Dr. Harlanson the safeest and best treatment is to use after each meal a tablet, composed of Diatase, Aseptic Pepsin. a little Nux, Golden Seal and fruit acids. These tablets can now be found at all drug stores under the name of Stuart's Dyspepsia Tablets, and not being a patent medi-cine, can be used with perfect safety assurance that healthy appetite and thorough digestion will follow their regular use after meals.

Mr. N. J. Booher, of 2,710 Dearborn street, Chicago, Ill., writes: "Catarrh is a local condition, resulting from a neglected cold in the nead, wnereby the lining membrane of the nose becomes inflamed, and the poisonous discharge therefrom passing backward into the throat reaches the stomach, thus producing catarrh of the stomach. Medical authorities prescribed for me for three years for catarrh of stomach without cure, but today I am the happiest of men after using one box of Stuart's Dyspepsia Tablets. English Judge Rebuked.

THE EARL'S SUCCESSOR.

London, Feb. 6.-Evidence revealed since the earl's death has been overwhelmingly in favor of the organgrinder succeeding to the Poulett title. The father's repeated assertion that he had separated from his wife immediately after the first son's birth proves to be false. The official records show that a son, Frederick Poulett, was born in 1852, and lived some hours, and that a son, Charles Poulett, was born in 1854, and lived three years. It is true that a mother can register any name as the father, but unless Poulett himself was that father it is certain that he would have divorced his wife. All this strengthens the presumption that he was the father of the organ-grinder, despite his own amazing statement that the mother was notoriously intimate with a Dublin gentleman when he

CLAIMANT'S PAST LIFE.

Many stories are being told about the claimant's past life. Hawkes, with whom he used to live 23 years ago, says that, although desperately poor, the claimant and his wife were visited by the Dowager Duchess of Cleveland and other aristocrats. The duchess took the eldest boy away to educate, and then assisted Hinton financially.

Suddenly he made a plunge, taking a large residence in Kensington Palace Gardens, and lived for some time in great style, raising money by postobit notes. He kept a private secretary, a number of servants, and obtained credit to the extent of scores of

thousands of pounds. Then came the crash. He was prosecuted for obtaining goods under false pretenses, and sentenced to a year's imprisonment at hard labor. Meanwhile all his former friends and the crowd of parasites that hung around

him had disappeared.

ENGLISH JUDGE REBUKED. London, Feb. 6.-Judge Ridley, trying a case from the north of England the other day, before sentencing the man, had read a list of prevous convictions. He was astonished to find that he had sentenced the same man last year for five years. He said it must be a mistake that the ex-convict was at large so soon. The prisoner answered:

"I was released by your brother. Twas a werry improper sentence. Judge Ridley is a brother of the home secretary. The latter had cancelled the judge's sentence.

FIVE SHOT.

Marseilles, Feb. 6.-A reunion here on Sunday of the League of Patriots, which was organized recently to oppose a revision of the Dreyfus case, was the occasion of great disturbances. A mob led by a number of anarchists attacked members of the league, and five of the latter were shot and seriously wounded. A number of others were most unmercifully mauled by the mob. Several arrests were made.

FRAU WAGNER VERY ILL. Berlin, Feb. 6.-Cosima Wagner, the widow of Richard Wagner, the dramatic composer, is dangerously ill of pneumonia at Vienna.

Cosima Wagner is the daughter of Liszt, the pianist and composer, and was formerly the wife of Herr von Bulow. She married Wagner in 1870. His first wife died in 1866.

CANADA'S GOLD OUTPUT. Washington, Feb. 6.-According to

Consul Brush, at Clifton, Canada, the output of gold from the Klondike and British Columbia has raised Canada to the fifth place in the list of goldproducing countries. While the United States shows an increased output for 1898, it is still second to the Transvaal. > Prospector Frozen to Death on Pike's Peak-Texas Wears a Mantle of Ice.

Colorado Springs, Col., Feb. 6 .- Jas. N. Holmes, a prospector, has been found frozen to death on Pike's Peak. He got caught in the blizzard Friday night, and a searching party has just

found his body. Portland, Ore., Feb. 6.—The cold weather of the past few days over the entire Pacific Northwest still continues. Reports from Eastern Oregon and Eastern Washington show that the thermometer ranged from ten to twenty degrees below zero. West of the Cascade Mountains the thermome-

ter was ten above zero. Austin, Texas, Feb. 6.—Central and Western Texas is today being visited by the coldest weather of the season. The blizzard is a wet norther, with the temperature so low that the rain freezes as it falls, covering everything with ice. Reports from the west are to the effect that big herds of cattle on the ranges have all scattered to get in among the foothills for protection, and it is feared that many of the herds will turn up with heavy losses

# POISONED AT A TAFFY PULL

Whole Company at Merrickville Taken Sick and One Never Recovered.

Brockville, Feb. 6.-A former resident of Brockville, named James Drughen, and lately of Smith's Falls, attended a taffy pull recently at Merrickville, which proved fatal. The whole company was taken sick afterwards, and all recovered except Drughen, who became gradually worse until last night, when he died. It is surmised that the taffy was made in a metal dish, which poisoned it.

BALANCE WHEEL BURST.

Brockville, Feb. 6.-Robert Stewart, a young farmer of Elizabethtown, had marvelous escape from death on Friday. With eight others he was working at a wood-sawing machine on the farm of S. Lorimer, when the balance wheel, weighing 150 pounds, suddenly burst, flying in all directions. Stewart was the only one to be injured. The wheel smashed in splinters a box over the driving wheel, a piece of which struck Stewart on the forehead, crushing it and lacerating the flesh. Two pieces of broken bone, which could not be reset, were extracted. A piece of the wheel came in contact with Stewart's thigh, entering it about seven inches in a stanting direction. He is in a very precarious

# JURY COULDN'T AGREE

In Mrs. McKenna's Claim for Damages Against the Street Railway Company.

Judge Wm. Elliott presided at the jury sittings of the first division court this morning and heared three cases in which the street railway company was concerned.

Mrs. David McKenna, of Central avenue, vs. the London Street Railway Company, was an action to recover \$60 for injuries alleged to have been received through the negligence of the company's employes in May last, at the corner of Dundas and Adelaide streets. The case was tried in the the form Living Edward the tracks and t county court before Judge Edward the tracks and equipment, including the Elliott and a jury, and the latter re- horses then used on the road, was \$1,turned a verdict for the plaintiff for the full amount and costs. Mr. I. F. The judge granted a new trial, cost to abide the action, which was heard this morning. The jury failed to agree on a verdict. This gives Mrs. McKenna an opportunity to

again bring the case into court.

J. H. Ginge, of the Canadian Packing Company, brought an action to recover \$78, the unearned portion of \$150 paid for three passes to run for the The passes were purchased in June last in the form of tickets, bearing certain conditions, one of which that the company would not be held liable for any injury sustained by users of the tickets. On the first of the year it was necessary to renew the tickets to run until June next, and when a renewal was asked for a demand was made for tickets other than those bearing the clause disclaiming liability for indemnity. Mr. Carr refused, and hence the suit.

"That has been the position of the reports of the Filipinos here from the beginning. From the aspect of our relations to the Filipinos there should not have been a moment's hesitation about the ratification of the treaty, and the events of yesterday prove it. By our protocol with Spain, our freedom of action was restrained in every way as to territory and military operations. We should be released from that restraint at the earliest possible moment. It is very unfortunate that the opponents of the treaty could not see this until its demonstration by an actual attack upon the United States forces."

In a dispatch to the Times, Senator Spooner is quoted as having expressed the belief that the situation at Manila would convince the senate of the necessity of prompt action. Senator Platt (Connecticut) concurred in this view.

How It Is Done by the Toronto Street Railway Company.

The Diluted Stock Made to Pay Dividends-Over-Capitalization.

[Toronto Weekly Sun.] The Toronto Railway Company was incorporated by the Ontario Legislature in 1892. Its capital stock is \$6,000,000, and it has issued and sold bonds, or in other words mortgaged its road and equipment for \$2,999,953 33. The stock of the company is quoted at about 109. The total amount of stock and bonds is \$8,999,953 33, and the road is required to produce enough in passenger fares to pay interest and dividends upon this

large amount of money, and to provide

a fund for the payment of the bonds as they mature. 453,788. This sum is set forth in the agreement entered into with the city and embodied in the Ontario statutes. Shortly after the road became the property of the company it was converted, as required by the agreement with the city, from a horse to an electric railway. A large part of the cost of converting the road was borne by the city. If we knew the cost of this conversion to the company, we should know exactly what the complete cost of the road was. The figures showing this cost are in possession of the company. The secretary of the company has been requested to furnish them, but he has declined to do so, and the only course open is to make an estimate of the cost. A liberal estimate places the cost to the company of converting the road from a horse to an electric system at \$1,500,000. This would make the cost of the road to the company \$2,953,788, made up as follows: Amount paid to the city

tric system ...... 1,500,000

If we deduct this sum from \$8,999,-953 33, the amount of stock and bonds issued by the company, we find there remains \$6,046,165 33. This sum never went into the road, but the people are charged fares sufficient to pay interest and dividends upon it. They are also refused reasonable accommodation on the ground that the company, having to pay such a large sum in interest and dividends, cannot afford to furnish it. If the road had been capitalized at what it cost, the company could have reduced fares by nearly third, and had enough left to pay perating and other legitimate expenses and a nandsome dividend on its capital.

Will Be Twenty-Two Knotters - Mr. Dobell's Important Speech.

Quebec, Feb. 6.-Hon. R. R. Dobell, on the eve of his departure for Europe, made a most important speech on Saturday night to the electors of Quebec West. As M. A. Hearn, Q.C., remarked after the speech in proposing a vote of thanks: "Mr. Dobell is the first representative of the constituency for a quarter of a century past who has had the courage to come before his electors and explain his parliamentary conduct," and there was much enthusiasm in consequence. The minister defended himself from the attack made upon him in connection with the failure of Petersen, Tate & Co., to carry out their contract. He justified his own action and that of the government in declining to suffer any deviation from the terms of the contract. The good faith of the tenderers was shown in the deposit they made with the government, which was to be forfeited in case of failure. Mr. Petersen was not a wealthy man, and had asked to have the forfeit returned to him. This, Mr. Dobell thought, would be a bad precedent, but he had urged the government to keep half the amount and return the balance to Mr. Petersen. He was now starting on his fourth trip to Europe in connection with the scheme, and if he could obtain from reliable parties as good an offer as that of Petersen's for 10,000-tor boats, running 22 knots or better, he would certainly recommend its acceptance. He insisted that greater safety was required in passenger boats, as shown by the Bourgogne disaster, and said that builders now realized that vessels could be made practically unsinkable. That was what he wanted in the new Canadian Line, and he believed that in the near future it would be deemed criminal to send to sea such boats as now carried passengers. Dobell dwelt upon the vast advantages that would flow to Canada from the deepening of the canals to fourteen feet. Large steam barges would now be able to bring down to Montreal and Quebec such cargoes of grain that it

would cost for transportation ship's side but 4 cents per shel. against 8 cents for carriage to American Atlantic ports. Thus the patriotic canal policy of the Laurier Administration, compared with the dilatory action of their predecessors, would result in saving to farmers 4 cents per bushel upon their grain, besides keeping the shipping trade of western grain for the St. Lawrence, instead of allowing it to as hitherto, through the United

Routed in a Fierce Encounter With Japanese Troops.

Marines at First Defeated, But the Imperial Troops Were Finally Successful.

Tokio, Feb. 6.-Alarming news comes from Tainau, Formosa, which has for some time been the headquarters of the Third Brigade of the Imperial Japanese army, in its long-drawn-out contest with the fierce Formosan bandits, or raiders. The latest advices do not tell of Japanese victories except after several defeats, and it is likely that were the rebels able to give their side of the story the victory might even go to them. The fighting has been carried on in Southern Formosa, and several towns fell into the hands of the raiders. Cho Shu, a country town, about ten miles from Feng Shan, was captured, from a correspondent signed "British- and the Japanese officials killed and er," in settlement of "an affair of honor the Bemmush, or government headquarters, sacked. > The Japanese navy comes in for a Cho Shu. When news reached the coast that the town was in the hands of the rebels, no troops were to be had. The captain of the Katshuragi Kan was appealed to, and landed a force of 50 marines and sailors. A forced march into the interior followed. It was the first fighting that the navy men had done since the Chinese war, and, although worn out by their long march, they are said to have rushed into the fight with remarkable bravery. It was against a very superior force that the marines went.

# REBELS ROUTED.

The raiders were securely entrenched in houses and behind fences, while the troops were exposed to their fire. They finally dislodged the rebels. Retreating into the country, the rebels gathered many reinforcements, including a party of Chinese under the lead of the notorious Lin Sho Myo, who had just arrived from Canton. The combintakes place in the intestines. This ex- ed force marched back against the marines. The latter met them with a bayonet charge, which was not success ful. A number of marines were killed, but all who were wounded were carried to the rear before the retreat was This fact also explains why Dr. ried to the rear before the retreat was Chase's Kidney-Liver Pills have been allowed. Reinforcements were expected from Feng Shan, but failed to arrive; consequently the marines retreated to the Ung Kow. The cruiser sailed shortly after.

A large force of the Third Brigade was dispatched from Feng Shan, and, after a hard march, reached Cho Shu. A two hours' fight ensued, in which many of the bandits were killed and several of the Japanese. The regular soldiers won out by superior arms and aim. They captured 80 prisoners before the bandits reached the foothills. A Japanese sergeant, accompanied by a guard of four soldiers, was led into a bandit ambush by a native guide, and the entire party shot to pieces. They had important messages, which they were taking from the coast to a detachment in the interior. The bandits were carefully hidden along the sides of a ravine, and fired into the party when it was about half-way through.

FRAME TONIGHT.

W. F. Frame and his company of singers and dancers will be the attraction at the Grand tonight and to-morrow night. The Toronto World

"More than 3,000 people attended

Massey Hall last night to hear the concert given under the auspices of the Caledonian Society. The programme was furnished by the Frame Scottish Concert Company, just arrived from the land o' cakes. The personnel of the company is: Miss Florence Hayward, soprano; Miss Anette H. Gray, contralto; Mr. Walter Haigh, violinist; Mr. Walter Gray, tenor; Mr. John G Mackenzie, dancer Mather, piper; Mr. James Booth, pianist and conductor, and last and greatest W. F. Frame, character sketch artist and humorous vocalist. programme was essentially Scotch, and, as the Scotch element in the audience was largely predominant, it goes with-out saying that the affair was enthusiastic from the start. The programme comprised twenty numbers, and, with encores, was very lengthy. The concert may be termed a highclass variety entertainment, in which all the artists were good, some excellent. Frame is, indeed, a host in himself, and created roars of laughter. Mackenzie dances capitally. Mather is

ISHAM'S OCTOROONS. On next Friday and Saturday evenings and Saturday matinee, will be the sixth annual review of John W. Isham's Octoroons in an entirely new style of entertainment, consisting of a new and original musical farce entitled "A Tenderloin Coon," which excels any of the performances given by this celebrated company heretofore. The attraction is sure of a season's success. Many well-known and capable performers have been enrolled under the new title, and unite forces in producing an entertainment which claims individual attention throughout. The farce is presented with the finest scenery and most gorgeous costumes that could be devised. The singing and dancing ensemble is all that could be desired, and the comedy is well taken

"YANKEE DOODLE DANDY." "Yankee Doodle Dandy," the latest and merriest of the New York Casino's successes will be seen with the entire original production at the Grand Thursday. The cast is unusually large, for there are 53 characters introduced, besides a grand chorus, ballets and auxiliaries. Suffice it to say that the judgment of the management in the selection of talent equal to the occasion has been happily shown, and that the gay (rather than grave) responsibility reposed in the members of the organization has in no instance been misplaced. The esprit de corps manifested throughout the performance has, from the opening night, been an important factor in the phenomenal triumph attained. he company in-cludes: Walter Jones, Louis Wesley,

CYCLING COSTUMES IN ENGLAND. Fair cyclists are in a great state of mind over the action of the landlady of the Surrey Hotel, who has come out as a strong opponent of the rational cycling costume. Lady Harberton, who is one of those who believes comfort necessary while cycling, alighted at this hotel, when, to her surprise, she was refused admission because her costume did not appeal to the fine sense of propriety of the landlady. Whether the lady was attired in knickerbockers with skirts, or in knickers without skirts is not stated, but the Cycling a good piper, and the balance of the Touring Club has taken the matter up and the landlady will have to explain her reasons for refusing food and drink

## through fear of Mrs. Grundy. The Rossin House, Toronto.

To globe-trotters, the name "The Rossin," the finest hotel in Ontario, has long stood a synonym of cosiness, home-like comfort and up-to-date luxury, attributes which are much advertised, and in reality possessed little, by other pretentious houses. While being the most centrally located of the Toronto hotels, it is happily remote from all the noise, smoke and dust of the railways, yet only two blocks from the Union Station, up York street, at its intersection with King street, Toronto's historic and most fashionable promenade

In capacity "The Rossin" can comfortably accommodate 400 guests, 50 of its rooms having bathrooms attached. As a protection against fire it is built with brick partitions throughout. There are five stairways from the upper to the first floor, and, nightly, watchmen patrol the corridors, insuring the per-fect safety of guests. An additional feature of the house is the absence of winding passages-all the hallways being attractively wide and lofty. In every respect the architect, with an eye to safety, health and comfort, wrought on a generous scale. In fine, the house is like its management, like its cuisine, like its patronage, the best

and most modern in the city. This hotel home, it will be known with no surprise, has numbered among its guests at various times, members o the royal family, of the nobility and
