Rome, Friday, July 10.—At 12:15 this morning it was declared that the Pope's condition had not changed since the issue of the bulletin at 5 last evening.

4 a.m.—The injections given first by Dr. Mazzoni and then by Dr. Lippioni have had in part the desired effect, as the Pope has succeeded in getting some sleep, although his slumber was not entirely tranquil. The patient's diet has been somewhat lightened, since the attack of diarrhea yesterday, and is now limited mainly to meat broth and beef tea.

6:30 a.m.—It is reported that when, shortly after sunrise this morning, Dr. Lippioni went to see his holiness, he found him with his hands together in the attitude of prayer. On the doctor inquiring whether he needed anything his holiness replied: "Today finishes a week since I was taken ill. I am thankful God for having given me strength to still give to him."

Rome, July 10.—The Pope rose at 6 o'clock this morning. He said he thought the air was somewhat cooler than what vitiated, and wanted it changed. An attendant, Pio Centra, after having been authorized to do so, opened the windows of the whole apartment, including that of the sick-room. The Pope, having previously been fully covered with extra blankets, after remaining open for a short time, the windows were closed, with the exception of the window of the sick room. Dr. Lippioni having decided that the balmy fresh air could only do the patient good. The opening and shutting of the windows was watched from the piazza by the people who had gathered there to hear the latest news, and some of them interpreted it as meaning that the Pope was dead, which necessitated a prompt official denial.

The Pope prayed for half an hour and then had breakfast, partaking of the usual fare, including a light biscuit. The Pope then attended to his toilet, but he did not shave. He then received his private secretary, Monsignor Angelini, who was again surprised at the Pope's brightness of mind and display of energy.

On leaving the sick room Monsignor Angelini remarked to those who surrounded him and asked him for news, that, if it was not known that the Pope was dangerously ill, from his appearance at that time, no one would say he was not in his normal condition.

The Monsignor added that the Pope referred to several different matters, recalling exactly the most minute details, and remembering facts, figures and dates with marvellous promptness, and all this to the accompaniment of snuff-taking.

The same impressions were formed by Count Camillo Pecci, who visited the Pope after Monsignor Angelini.

The doctors' visit and the operation followed.

DOUBT THROWN ON KISHINEFF YARN

How Editor Krushevan and the Jewish Ruffian Played a Clever Part.

London, July 10.—The Times' Russian correspondents throw doubt on the genuineness of the attack made on Krushevan, the anti-Semitic editor. It was represented that Krushevan narrowly escaped assassination at the hands of the Jews, and suggests that Krushevan, "having got into hot water in consequence of his philanthropic efforts to save Kishineff from the Jews," came to St. Petersburg to restore his prestige. "Here occurred the terrible attempt of the Jews, or was it a counterfeited presentment of the Jews, to assassinate him. Testesky, having been deceived, and the stage ruffian, who, armed with a huge knife, attacked Krushevan in a crowded street, and having scratched him on the neck, allowed himself to be quietly arrested by Krushevan and marched off to the police station without further ado." It must have been the crowning misfortune for Krushevan, says Testesky, that the assassin, striking him on the head, sent him to a few days' imprisonment.

The authorities of the Vatican have made arrangements which show that they expect a quiet day, and the general feeling is that while the case is hopeless, the Pope may live several days or even a week longer.

In the provinces so firmly rooted has become the conviction that the Pope will not recover that the discussion concerning his recovery is now superseding in general interest the details of the Pontiff's illness. Betting goes on with great animation, each cardinal having his fervent admirers. Those most frequently mentioned as likely to be the next occupant of the papal throne are Cardinals Gregorio, Agliardi, Serafino Van Nottelli and Ferrari press them hard in public favor.

A DISPAIRING LOVER

Shoots Himself When Denied Company of Young Lady.

Ottawa, July 10.—Ene Schingh, aged 26, painter, shot himself in the head Wednesday night because he had been forbidden to continue paying attentions to Miss Albertine Flax by her mother. He has been unconscious since the shooting and may not recover.

HEAD BLOWN UP

Fatal Accident to Cecil Ratley of Sparta.

St. Thomas, July 10.—Cecil Ratley, the 14-year-old adopted son of James Dangerfield, of Sparta, met with a horrible death Wednesday evening at 8 o'clock. He went out for the purpose of shooting woodchucks. While climbing over a fence, gun in hand, he accidentally discharged, striking him on the head, and blew the top of his head completely off. His brains were scattered on the ground. The only relative in this country is his brother Harry, who lives in Aylmer.

ENDEAVORERS CONVEYE

Thousands of Them Flocking to
Denver City.

Denver, Col., July 10.—Thousands of Christian Endeavorers from all parts of the United States and Canada, with a few from abroad, arrived here yesterday, and many more are on the way. More than 10,000 persons attended the opening mass meeting of the convention yesterday afternoon. The convention was called to order by Francis E. Clark, father of the Christian Endeavor movement. After devotional exercises led by Rev. Dr. E. B. Tyler, of Denver, a welcoming song was sung by a chorus of 600 voices, conducted by Professor W. T. Whitman. Welcoming addresses followed, Governor Jas. Peabody speaking. At the annual business meeting of the united society yesterday all the old officers were re-elected, as follows: President, Rev. Francis E. Clark, D. D.; treasurer, William A. Hawes, clerk, George B. Graft, auditor, Fred H. Kidder. The retiring trustees also were elected, and presidents were named for the various states, territorial and provincial authorities.

Not a Party Question.

London, July 10.—A correspondent of the Morning Post, who is touring Canada, writes to that newspaper: "After conferring with leading men of both sides of the Canadian House of Commons, I have formed the opinion that the imperial preferential trade scheme will not be a party question in Canada, except in the sense that the two parties will rival each other in showing support."

A SUDDEN DEATH

Thomas C. Douglas, of Galt, Died
From Apoplexy.

Galt, Ont., July 10.—Thomas C. Douglas, one of the best known, most highly respected and progressive farmers of North Dumfries town, died very suddenly at his residence, on Spragues road, Tuesday night. He worked in the field all day, apparently in his usual health, and in the evening, while resting alone on the veranda, he became alarmed at his long absence and arose from bed to investigate, and found him cold in death. Medical men say apoplexy was the cause. He was president of the South Waterloo Farmers' Institute and widely known in Canada and the United States as a successful breeder and exhibitor of thoroughbred Southdown sheep.

An Alliston Shooting.

Alliston, Ont., July 10.—W. S. Wallace, auctioneer of this town, whilst laboring under a fit of despondency, yesterday, shot at his wife and his wife's mother without effect. He then deliberately placed the barrel of the revolver in his mouth and fired twice, inflicting flesh wounds. He will likely recover. He was taken into custody.

CHOLERA MORBUS.

cramps and kindred complaints annually make their appearance at the same time as the hot weather, green fruit, cucumbers, melons, etc., and many persons are debarrred from eating these tempting fruits, but they need not abstain if they have Dr. J. D. Kellogg's Dysentery Cordial, and take a few drops in water. It cures the cramps and cholera in a remarkable manner, and is sure to check every disturbance of the bowels.

MUNICIPALITIES IN CONFERENCE

Transmission of Niagara Electrical Power Discussed—A Resolution Passed.

Berlin, July 9.—Another conference of representatives from the various municipalities in Western Ontario interested in the development of Niagara Falls power was opened at the Y. M. C. A. hall this morning at 11:30. The purpose of the meeting was to decide upon what action should be taken by the municipalities under the act to provide for the construction of municipal works and the transmission, distribution and supply of electrical power and other power and energy, passed at the last session of the Legislature. The morning session was taken up with Chairman E. W. B. Snider's address, explaining the present position of the municipalities as far as Niagara power is concerned, and the discussion of the duties of a committee of five to be appointed by the meeting to obtain further information in order that the municipalities could take definite action.

Those present were Messrs. E. W. B. Snider, St. Jacobs; George Douglas, Stratford; Jos. Mitchell, London; Mayor of St. Thomas; F. W. Butler, H. L. Rice, St. Marys; Col. Carter, Guelph; Robert Scott, Galt; S. J. Cherry, Preston; P. Shirk, of Bridgeport; Mayor D. Bean, of Brantford; J. G. Haight, of Waterloo; Wing, J. Lang, Mayor J. R. Edin, D. B. Detweiler, C. K. Hagedorn, W. H. Breithaupt, M. De Bus, H. G. Lacker, M. P. P., and City Clerk C. E. Edwards, of London.

On motion, Mr. E. W. B. Snider was appointed chairman of the meeting, and Mr. Mitchell, of Waterloo, secretary in the place of Mr. D. B. Detweiler, who stated that he could not be present at the afternoon session.

On taking the chair Mr. Snider gave brief resume of what had been accomplished since the well-known "Berlin Conference." He referred to the meeting held in Toronto with the Government, at which the municipalities were suggested to the Niagara power act, some of which were adopted and some were rejected. He should be taken to put the act into force. It was the purpose of the meeting to decide upon the action to be pursued in order to get the municipalities interested in line, and to get the cheapest power possible.

The conditions under which the new power act could be made use of by municipalities, at which the municipalities were suggested to the Niagara power act, some of which were adopted and some were rejected. He should be taken to put the act into force. It was the purpose of the meeting to decide upon the action to be pursued in order to get the municipalities interested in line, and to get the cheapest power possible.

He said: "I have been ailing for about a year from deranged nerves, and very often weak spells would come over me and be so bad that I sometimes thought I should be unable to survive them. I have been treated by doctors and have taken numerous preparations but none of them helped me in the least. I finally got a box of Milburn's Heart and Nerve Pills. Before taking them I did not feel able to do any work, but now I can work as well as ever, thanks to one box of your pills. They have made a new man of me, and my advice to any person troubled as I was, is to get a box of Milburn's Heart and Nerve Pills."

Price 50 cts. per box, or 3 for \$1.25, all dealers.

The Press Excursion.

London, July 10.—The press excursion to Canada, which will sail on the 16th, will comprise representatives of the London Morning Post, the Daily Express, the Daily Chronicle and Reynolds', the Sheffield Independent, the Birmingham Express, the Bristol Mercury, the Newcastle Chronicle and the Glasgow News, the Aberdeen Free Press and the Belfast Times. The following are going independently: The Birmingham Post, the Manchester Guardian, the Sheffield Telegraph and the Yorkshire Post.

A CURE FOR COSTIVENESS.

Costiveness comes from the refusal of the bowels to perform their duty, and is regularly from contributing causes, usually disordered digestion. Parnelle's Vegetable Pills, prepared on scientific principles, are so compounded that certain action is taken upon the bowels so as to remove the torpor and arouse them to proper action. Many thousands are prepared to bear testimony to their power in this respect.

ANGLO-AMERICAN UNDERSTANDING

Lord Beresford Says Arrangement Could Command the Peace of the World.

London, July 10.—At the Pilgrims' Club luncheon to the visiting American officers at the Carlton Club yesterday afternoon, Vice-Admiral Lord Charles Beresford read a message of regret from the Prince of Wales. At the center table Lord Beresford presided. On his right was seated Rear-Admiral Cotton, and on his left Capt. Lambton, naval aide-de-camp to King Edward. Ambassador Choate, Senator Dewey, General Lord Grenfell, the Archbishop of London, Dr. Sinclair and Admiral Sir John Ainslie Hay sat at the same table.

In proposing the toast of "The King," Lord Beresford said: "I believe the day was coming when King Edward would be known as 'Edward the Peace-maker.'"

Lord Beresford then toasted "President Roosevelt," and asked why the President was liked in England. He added: "We like the man. We like the strong, generous man, what I may call the real human man. The President will do his level best to bring the two English-speaking nations together in one harmonious whole, which is the same idea King Edward had on the occasion of his visit to the President of France. If President Roosevelt were to come here I believe the enthusiasm would be far greater than in the case of any reception ever accorded to any visitor from any country."

In proposing "The American Navy," Lord Beresford said that whenever there was anything disagreeable about Great Britain and America generally drifted together. If these two nations got together to maintain their common interests and commerce it would make for the peace of the world. Neither Great Britain nor America want an alliance, "but," the speaker added, "we want an understanding. Both Great Britain and America are increasing their navies, and that is no more a threat to other nations than increasing the police force of their cities in order to maintain order."

Admiral Cotton, in replying, testified to the warm feeling existing between the two nations and their navies, and recalled instances where British and Americans had served side by side in the same cause, and the people of Great Britain for the welcome given to the Americans, and proposed the health of Lord Beresford amidst great enthusiasm.

Uncle Sam in Canada.

An English tourist, sojourning at a small town in the Western States, remarked that he did not see how the town could support two newspapers. "It takes two newspapers to support this town," was the reply. In the west the disposition of every new community to boom itself lustily so as to add to its numbers naturally finds expression in a newspaper. There are more newspapers in the Canadian Northwest in proportion to the population than in Ontario. Victor Ross, who has been writing some capital letters for the Toronto Globe, from the Territories, remarks that a blacksmith shop and an implement agency are the first indications of a town there, and the next proof is a hotel and a newspaper. He notes, as a somewhat extraordinary circumstance, that a great many of these papers are established by Americans. Of the eight published along the 200 miles of railway between Calgary and Edmonton, only three are edited by Canadians, the rest of the remaining five being presided over by men who formerly edited papers in the United States. Mr. Ross adds that "in spite of the fact that this immense press in these young communities has been allowed to drift into the hands of those who have been educated to opinions and views not popular in this country, one must scan these papers very closely to find anything unorthodox, and beyond a stray comparison of local life with similar conditions in the great republic, sometimes favorable and sometimes not, they are edited from a point of view entirely Canadian, and are aggressively patriotic to their several constituencies."

"One of the American settlers on the train gave me in a sentence the attitude of the people from the United States who are filling up this spare and tall, and with the pointed chin-whisker, which the local residents call the 'Uncle Sam' look. When I asked him how he viewed life under another flag, he swept his whiskers aside, expectorated with amazing swiftness through the window, and replied: 'It's a matter of business with me; when a man's doing well and happy he's liable to like the country he's in, ain't he?' The sole fault which this spry old gentleman and his friends had to find in Canada was in its being a 'little slow,' a condition which they were willing to associate with the 'slowness' of remedying. The tendency to settle districts in a body has taken away from the American party sense that he is in a strange country, and the colonies proceed to form school districts and begin to improve of road improvements and other public work with as little loss of time as does the eastern Canadian."

This describes the situation in a nutshell. The American farmer crosses the line to take up land, grow crops, breed cattle and make money. As the elderly gentleman with the chin-whisker put it, "It's a matter of business," and the average American is "business" clear through. No doubt he will bring with him a love of country, but he will find hardly anything in Canada, excepting the British flag, to remind him of a change. The language, the schools, the social customs, the courts, the municipal institutions and the principles of government are all foreign to him. His political habits and training will make him desirous of taking part in public affairs. This is the surest guarantee of good citizenship, and the speediest method of assimilation. Canadians need have no disposition over the American invasion. The immigrants from Central Europe will need more of their concern.

No Comparison.

According to The Advertiser the Canadian cotton manufacturers are very bad citizens when they begin to send raw material to the United States, there to give employment and wages to Americans, and profit to American mills. And yet the Advertiser itself is guilty of precisely similar operations in the matter of pulp wood, pulp, nickel ore and matte, pine logs and some other things. The Government which the Advertiser supports persistently refuses to put a stop to the export of these raw materials, which are being sent to the United States, there to build up gigantic industries, to enrich the American nation and give to employment and wages to Americans, which ought to be given to Canadians. Indeed, the policy of the Canadian Government is infinitely worse than the action of the Canadian cotton men which The Advertiser so roundly denounces, for the latter is the result of a temporary shortage in cotton, while the former goes on year after year, the volume of export and consequent loss to Canada rapidly increasing from year to year.—Hamilton Spectator.

The analogy is very far-fetched. The Ontario Government already prohibits the export of pulpwood out on crown lands, and the Quebec Government imposes a tax which is equivalent to an export duty. Why the Maritime Provinces do not adopt the same policy, we do not know, but presumably they want the revenue. At any rate, the pulp areas of the country are under provincial jurisdiction, and the Dominion Government has let each provincial government choose its own course. We know that a law prohibiting the export of pulpwood out on private property

would be a hard blow at many settlers in the newer parts of the country, and they are as much entitled to consideration as any other class.

As for pulp, an embargo on the export would be ruinous to the great pulp industries which are springing up in Ontario and Quebec, and which find their markets in Great Britain and the United States. Pulp is not a raw material in the first stage; it represents the expenditure of capital and the employment of skilled labor. It is a pure assumption to say that the prohibition of the export of pulp would at once create a great paper industry in Canada. The world is not dependent on Canada for pulp or pulpwood. Paper industries are coming to this country, because of the natural advantages of water power and a plentiful supply of raw material, and they will continue to come regardless of tariff legislation.

The Spectator is alone in advocating an embargo on nickel ore and matte. When the Ontario Government proposed to take power to do this the whole male population of Sudbury protested. The leader of the Opposition attacked the Government for "holding a club" over the head of the mining industry. It is doubtful if a corporal's guard in either the Ontario Legislature or the House of Commons would stand up for an embargo on nickel ore and matte. The Spectator must know that nickel ore is carried to a very advanced stage of refining in Canada. The finishing process which is carried on in New Jersey, represents comparatively little outlay.

Pine logs, cut on crown lands, are not allowed to be exported from Ontario. If the other provinces do not place an embargo on logs it must be because, as in the case of pulpwood, they need them. What the "other things" are, which should be kept in the country, it is not easy to guess.

The cattle guard question has been settled at last by placing on railroad companies the onus of proving negligence on the part of farmers whose cattle have been killed on the track. Perhaps the railroad companies will now devise a good cattle guard.

King Edward has finished embracing President Loubet, and now toasts President Roosevelt. The King of Italy and the King of Portugal had their innings a few weeks ago. The glad hand is more potent for peace than the mailed fist.

The correspondent of the London Morning Post says that after interviewing men of both parties in Canada, he is confident that they will rival each other in supporting Chamberlain's scheme. The Post man is not very astute. If Chamberlain's scheme involves the reduction of the Canadian tariff on British goods it will be fought tooth and claw by at least one party in this country. The high protectionists will take all they can get from Great Britain, but they will be chary about returning the favors.

The municipal convention, which met at Berlin yesterday to discuss the Niagara power problem, appointed a committee to gather information and take steps toward forming a union of municipalities. It will be some time yet before the Niagara power companies will be ready for longer distance transmission, and the municipalities must wait for the result. They will be in a better position to demand reasonable terms from the power companies by reason of the legislation empowering municipalities, separately or in association, to develop and transmit Niagara power. In the meantime the cities and towns of Western Ontario will do well to get together and be prepared to act unitely.

The Chicago Tribune publishes the record of the Fourth of July accidents in 200 cities, ranging alphabetically all the way from Allegan, Mich., to Zanawille, Ohio. The summary shows that 52 persons were killed and 3,665 injured in the celebrations. The loss of property by fire amounted to \$400,625. Toy pistols injured 559 persons, and gunpowder used in homemade bombs and fireworks 768 victims. Firearms, carelessly handled, injured 562 persons, probably as many as are hurt in hunting accidents during an entire year. Skyrockets caused 206 injuries, cannon 219, the American invasion. The immigrants from Central Europe will need more of their concern.

The New York Sun points out that the increase in Canada's population through immigration during the past twelve months has been 2.3 per cent, while the corresponding increase in the United States has been less than 1 per cent. "In point of the quality of the immigration," says the Sun, "Canada distinctly holds the lead. About 70 per cent of her new arrivals are in every way homogeneous. They are of the stock that has made the Canada of today, and will at once fit into their new social environment. Of the remaining 30 per cent, a large percentage comes from the north of Europe, German, Scandinavians and Finns, who come out to join those of their own kind who have been coming in increasing numbers for the past five years. With rare exceptions, this class has been eminently successful. They are industrious by habit, inured by previous experience to the hardships which must inevitably attend pioneer settlement, and the climatic conditions of the new land are not greatly unlike those of the land of their birth. It is wholly safe to predict an increasing influx of these people during the coming years."

An Editor's First Baby.
 [Aylmer (Ont.) Express.]
 "He grows more like his dad every day."
 At the time of writing he is just 1 week, 1 day, 7 hours, 23 minutes, and 58 seconds old.
 After this week we shall cease sending daily cable message of the baby's condition to King Edward.

We will now have a good excuse to go to every circus that comes around for the next fifteen years or more. It is a great pleasure and consolation to know that we have a voter to take our place when we have gone to a better world than this.

A son and heir, but just what there is in the heir part of the business for the kid is a mystery, outside of a big unpaid subscription list. We are disgusted with all our lady acquaintances. They come in, kiss the mother and the baby, and then turn and give us a look of mingled pity and defiance. We have done our best to encourage them to continue the first part of the programme, but up to date it has been a blank failure.

The question of settling on a name for the young man gives promise of causing a split in the family circle. There are as many different ideas as there are members of the family, and they range all the way from common Jack and Bill up to the aristocratic and time-honored name of David Aaron.

The jealousy of Harry Pollock, Frank Caven, Ernie Kilmer, Dr. Smith, and other poor fellows who have nothing but ordinary girls is very pathetic, but it is nothing compared to the awful and indescribable feelings of Huh Adams, Newt Newell, George Harp, Jack Low, A. J. Anderson, and the other old good-for-nothing scrubs who have made a total failure.

The Summer Man.
 [Harper's Weekly.]
 In summer, at the mountain blue, Where the sun is so bright and free, He is a man of the sun and sea, And he is a man of the sun and sea. Until the season fades away.

He dresses in the height of style, There's fascination in his smile, He is a man of the sun and sea, And he is a man of the sun and sea. He is a man of the sun and sea, And he is a man of the sun and sea.

At archery, in tennis court, He rivals all the gay sport, But plays so fast the fairest wins, That though he is the best of men, The vanquished bells still take his part. And leave him with unpunished sins.

But summer joys, alas! are brief, He's out of the sun and sea, And when the sun is gone, he is a man of the sun and sea, And he is a man of the sun and sea.

Curing the Blues.

[Minneapolis Journal.]

A well-known doctor of Minneapolis, who has made a specialty of nervous diseases, has found a new remedy for "the blues."

As no drugs are administered, he has felt safe in experimenting with at least a half hundred melancholy patients and now declares himself thoroughly satisfied with the good results of his treatment. His prescription reads something like this: "If you keep the corners of your mouth turned up you can't feel blue."

The directions for taking are "Smile, keep on smiling, don't stop smiling. It sounds ridiculous, doesn't it? Well, just try turning up the corners of your mouth, regardless of your mood, and see how it makes you feel; then draw the corners of your mouth down and note the effect, and you will be willing to declare 'there's something in it.'"

Have You?

[New York Herald.]

I have a little hatchet. With an edge that's keen and true, To use upon the bore who asks "Is it not curious to you?"

Why Is It?

[Boston Herald.]

No one has ever explained why at this season of the year, a girl whose skin would be hopelessly ruined were she to roll up her sleeves and put her hands into a dishpan half-full of water for a few minutes, can play golf or tennis, bare-armed, all day long, or go into the water bathing morning, noon and night, and be proud of the color she acquires in so doing. Why is it, girls, that you don't know the answer at once.

How Does He Know?

[Hamilton Times.]

Is not the neat waist girl really as cool as she looks?—Ottawa Citizen.

Screw up your courage, a bit and find out. There's a way of doing it.

Curing the Blues.

[Minneapolis Journal.]

A well-known doctor of Minneapolis, who has made a specialty of nervous diseases, has found a new remedy for "the blues."

As no drugs are administered, he has felt safe in experimenting with at least a half hundred melancholy patients and now declares himself thoroughly satisfied with the good results of his treatment. His prescription reads something like this: "If you keep the corners of your mouth turned up you can't feel blue."

The directions for taking are "Smile, keep on smiling, don't stop smiling. It sounds ridiculous, doesn't it? Well, just try turning up the corners of your mouth, regardless of your mood, and see how it makes you feel; then draw the corners of your mouth down and note the effect, and you will be willing to declare 'there's something in it.'"

Have You?

Why Is It?

[Boston Herald.]

No one has ever explained why at this season of the year, a girl whose skin would be hopelessly ruined were she to roll up her sleeves and put her hands into a dishpan half-full of water for a few minutes, can play golf or tennis, bare-armed, all day long, or go into the water bathing morning, noon and night, and be proud of the color she acquires in so doing. Why is it, girls, that you don't know the answer at once.

How Does He Know?

A black and white illustration of a man in a top hat and suit, sitting on a ledge and leaning on a cane. The man is wearing a dark top hat, a dark suit jacket, a light-colored shirt, and a dark tie. He is sitting on a ledge, with his legs crossed at the ankles. He is leaning on a cane with his right hand. The illustration is in a classic, somewhat stylized manner, with a focus on the man's attire and posture.

had bad dosition, one of its favorite "tricks" being to bite everyone who might come within reach of him. Slightly annoyed, the man was disconcerted by Star Pointer, one of the fastest, if not the fastest horse of the day, but he has some very bad traits. He is very nervous, and sometimes gets uncontrollable, being liable to balk or stand perfectly still in the middle of a race. He is very kind and he works wonderfully well. When on his good behavior he has speed that is nothing short of wonderful. He was one of the heats he forgot himself so far as to go an eighth of a mile at a time, and he continued it, would have made a record, but for the event. He is not an old horse by any means yet, and the story goes that he was given to the man who sold him, gave such promise that he was sold for many thousands of dollars. Now, however, some horse admirers would not let him home if he was given to them.

happened in the second heat of the race and trot, and that the drivers of the sulky horses were hurt by the accident. How Spinx Bix was a mile and a half away from the track when he turned a somersault, escaped through a crowd of spectators, and was a mystery. Spinx Bix was showing a mystic speed as he came into the stretch for the third time, and he was a mile and a half away from the track. A month or more later Texas Kooker pulled up beside him, he (Spinx Bix) got a trifle unsteady, the driver, George Powell, attempted to save him by giving the lines a quick pull, drawing the horse's head back, and the animal fell. The driver threw the animal full on his knees and went over in a complete somersault. The sulky was thrown into the air and was thrown many feet in the air. A number of track hands were soon on the scene, and the driver, George Powell, was thrown from the sulky. The sulky was damaged slightly, while the horse was killed. The driver, George Powell, got up and walked to the stable as if nothing unusual had happened. He was a good driver, and he was a good horseman. It was a puzzle to those who witnessed the accident. Whether the driver was drunk or not, again this season remains to be seen.

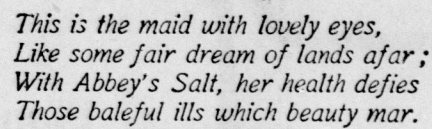

When the accident happened, J. B. F. Fick, of Port Dover, was following a few lengths to the rear of Spinx B. F. and took a quick look over his shoulder in a glance. He had very little time to react, but he succeeded in turning his horse's head in time to see the rear wheel of his own rig, however, struck a horse in the middle of the back. The horse, and Schooley, the driver, were tossed about fifteen feet, while his own rig turned onto one side. An effort was made to stop the rig, but it came past the stands, but this was unnecessary, as the horse was not hurt. The driver, Charles Kennedy, of Toronto, who drove some of the horses of the track, was not hurt, but he was riding the sulky, which had ridden by this time, and he drove J. B. F. to the finish line, but he was not able to keep the horse's distance. The action of Kennedy was appreciated, not only by the spectators, but also by the judges, and Schooley was equally as fortunate as the driver, and was not hurt. The accident resulted in Spinx B. F. being declared the association runner, and the driver, Charles Kennedy, was a horse in such a case, even though the failure to finish was due to an accident.

Before the run was called a heavy track in places, and before it ceased the track in places was heavy. The last heat of the trot and pace was called after the rain, and the heavy track was the cause of the slow time made. In the running event the glorious uncertainties of the day were the cause of the race as clearly as they were on the preceding days of the meeting. Innomintum, the favorite, had a hot trot, but was distanced in the run on Wednesday, while Rathlin had to run the third heat of the race. The pace was a good one. Gleszeg did not get in the money at all. The time was vastly different yesterday, and the race was a very different one. In the initial heat and won handsily, and in the second he appeared to be a very good horse. In the third at the back turn he closed up a great part of the gap, and came under the tail of the leader, Rathlin, who was in the previous heat could not do better than fifth. The deciding heat was not caused so much by disappointment as by the spectators. The race seemed to be about even for the two horses, and as Innomintum was the favorite, he was expected to win. He was on a heavy track he should win. It did not change their opinion, even though the heat was a very different one, for coming into the stretch it looked as if the rider of Innomintum had a pair of pants on his back, and was satisfied himself with staying there, without even making an attempt to get to the front. This ended the meeting.

Even during the warmest weather Angier's Petroleum Emulsion is pleasant to take, and agreeable to the stomach. For this reason it is the 'dead-end' remedy for consumption. Made of odorless and tasteless petroleum, glycerine and hypophosphites, it is better in every way than emulsions made of fish oils or other fats.

UNNECESSARY TO SUFFER FROM ASTHMA.—This distressing complaint can be perfectly cured by inhaling Catarrhoxone, a vegetable antiseptic that destroys the germs which cause the distressing cough, and which are driven out from a convenient pocket inhaler and after permeating the minutest air cells is exhaled slowly through the nose. It stops the cough, makes breathing regular, and eradicates the cause, so that it never returns. Don't suffer from asthma, use Catarrhoxone—it will speedily cure you. "And when the first heart-throb of dismay, as she saw the sea of faces turned toward her, she passed to the side and saw the many eyes bent on her, she knew her mother to do the honors of the occasion.

"And at the opposite side of the room, beholding her, felt his heart bound within him with mingled exultation and pain—exultation over her surpassing beauty, and pain, lest something would cause him to fall to win her.

"*"She is like a stately calla in her beauty,"* he said, his spirit, so sweet and pure, *"is like the white lily,"* and then, *"truly,"* he breathed, while an almost unconquerable desire possessed him to turn to her, *"she is like the sun,"* as he saw from the sight and sound of everyone, and poor forth the burning love that was in his heart.

"Who is that beautiful girl?" everybody asked; and they were greatly surprised on being told that she was Sir Mordaunt's daughter, the daughter of the Duke of Mordaunt, and eagerly pressed forward for introductions.

"Jerri-ol!" ejaculated a young sprig of nobility, who had been introduced on occasion with his presence, "won't she make a sensation when she comes out next year?"

"She will," said another, "ah, won't there be a fluttering among the young of prey when that bit of news becomes known?" and he immediately began to flutter his fan, and to turn his head toward the object of his admiration, to be presented.

Abe Johnson's Ability as a Driver Plainly Shown.

and Also That of the Track-Running Event Disappointing.

Queen's Park yesterday afternoon got full value for their money. Those who were there to witness the sport of the

card, but yesterday the association served up something of an even better brand, and in return got by far the best crowd of the week. Possibly the only dissatisfied ones were those who happened to back Iniminitum, the best chestnut gelding, to win the final heat of the consolation run, and Sidney Pointer, who was looked upon by some as a sure winner of the free-for-all. Sidney Pointer was brought all the way from Rochester, N. Y., where he went a mile in 2:10, to compete here, but the best he could do, or would do, was to come in at the tall end of the race, and then balk and break so badly in the next heat that he was outside of the flag when the winner crossed under the wire.

Brantford driver, was possibly, the feature of the afternoon from the standpoint of the horseman. Johnson, who was a member of the association, he landed first money each time. He was up behind Maggie Usher in the free-for-all, and John Nolan in the second race. When the first race named race was concerned, it was considered before the start that the greatest danger to Maggie Usher's success was the Texas Rooker. Johnson, while in the trot and pace there did appear to be much chance for John Nolan, for in the first three heats he had won, and in the second he finished first. It was in the succeeding heats that Johnson displayed in no uncertain manner his ability as a driver. With rooker himself in

of the purse. He made lots of noise in doing it, too. Whether it is a habit of his, or whether he thought it necessary in the case of Nolan, he did not allow 100 yards of the track to be covered without shouting, and, as if fully realizing the meaning of it all, the horse sped on, rapidly and steadily never once showing any sign of

never finished any two heats in the same order, Master Roy, I. T. Washburn and Irene McGregor each having a second, third and fourth place to their credit. This made it necessary to divide the second, third and fourth moneys between the horses—something that does not occur every day on a race track.

Sidney Pointer, who could not—would not—settle down to work in the free-for-all, was a conundrum to the majority of the spectators, and particularly to the horsemen. He made his bow to the crowd with a large ring in his nose, to which was attached a rope, one end of which was in the hands of the driver. This was required to control the animal, for it had

WILL CANCEL CONTRACT

Contractors of Screened Gravel
Did Not Deliver Goods.

Objections to Building Out Over the Street—A Case in Point.

It will be remembered that some time ago the board of works made a contract with Alexander & Boss to supply screened gravel, in South London, chiefly, and that that firm had been unable to furnish it. At last night's meeting of the board a letter was read from the city solicitor advising the cancellation of the contract, and this will be recommended to the city council. The chief matter under discussion arose over the action of some residents of the city in building their houses or verandas out over the public highway. The city engineer explained that he had consulted the solicitor and had found that the board of works had the power to instruct the city engineer to order the removal of the structures. He said that the city engineer was against a new veranda which had been put up by a person on the corner of Waterloo and Dundas streets. In this case he had warned the builder, but the erection had gone on. He thought some action should be taken to stop the practice of building over the public street, and the idea was agreed with by the board, except that it was decided to lay the matter over for one meeting. It was feared that complications might arise by the ordering of the structure down without further consideration.

The Warren Paving Company wrote stating that before they had their plant to Chatham they would like to construct the bituminous macadam pavement on Clarence street, which was delayed some time ago owing to the request of some of the residents, who stated that a petition would be circulated against it. Nothing more was heard of the matter, and the board last night decided to give any of the ratepayers until the next meeting to state what kind of pavement they wish and if no request is made the bituminous macadam pavement will go ahead.

Clarence street will for a time be the new stand of the draymen while the York street road is being constructed. A representative appeared, and stated that the draymen would willingly move away until the road was made, but after that they requested the board's granting of a favorable stand, the present site being the most convenient for draymen and public alike. The board assured them that a good stand would be given the men.

Lovett street, which was torn up by the circus, will be graded and gravelled. It was decided not to entertain the claim of Mr. Robert Hueston for damage to a cab which ran into a pile of lumber in front of A. B. Greer's house. The Queen's avenue sewer came up again for discussion, a request that it be gone on with between Adelaide and Elizabeth streets, being referred back to the council.

It was decided to ask the council to pass a resolution favoring the establishment of a good roads department at Ottawa.

He and Mrs. Warren also intend to visit friends in Ingersoll and Glencoe.

PLEASING PRESENTATION.
At the garden party on St. George's rectory grounds Wednesday evening Mrs. A. T. Platt, who is shortly leaving for Toronto, was presented some valuable articles of silverware as a token of esteem from her many friends in St. George's Church. Mrs. Platt will be greatly missed in church circles.

WHERE IS WILLIAM?
Hamilton Herald says: Some of the friends of William Munro, the Highland piper, who came here some months ago, are alarmed about his disappearance. He took part in the Caledonian games at London, Ont., Dominion Day. He left again on Friday, and has not been heard from since. There was no reason why Munro should leave the city, and it is feared something has happened to him.

Canadian permanent force at Wolseley Barracks, Drill Sergeant Alex. Bethune, purchased his discharge yesterday and left for his home at Seaforth. Drill Sergeant Bethune had served for a number of years as a member of the force, and his decision to leave, his connection with the company is regretted by his comrades, among whom he was popular. He saw service with one of the South African contingents, and was looked upon as one of the most efficient instructors in the permanent force.

IS NOW A RAILROAD MAN.
Lance-Corporal James Strong, of No. 1 Company, R. C. R., has purchased his discharge from the permanent force and entered the service of one of the railways. Lance-Corporal Strong has been a member of the regiment for the greater part of the time since it was established in this city, and was one of the men selected for service in the Yukon. He was in South Africa with the contingent of mounted men, and on returning rejoined the company here. For some time he has been in charge of the military police at the barracks.

LISTEN!
On Tuesday and Wednesday of this week an advertisement appeared in the London Advertiser in a large space with the word "Listen" in the center. A number of readers were so eager to find out the reason that questions were asked as to its meaning. An advertisement of Oak Hall, Thursday's issue explained the purpose of this announcement. Today's paper contains another advertisement of Oak Hall, and the prices quoted are very attractive. It is the half yearly sale of this clothing establishment, and the bargains offered are sure to appeal to all.

DRIVERS' PAY INCREASED.
When increases in salary are given unsolicited the recipients are generally deeply grateful to their employers. The drivers of the Dominion Express Company are in a happy mood just now. Word has been received by Mr. H. P. Sharpe, the local manager, that a new scale of wages for drivers in London was to go into effect from July 1. The increase is entirely satisfactory, and the drivers are much pleased at receiving recognition in this way. The Dominion Express Company believe in showing their interest in the welfare of their employees in this way, when it is deserved. The men are also given complete uniforms whenever desired. The London office is evidently increasing the volume of its business.

WRITS AGAINST L. E. AND D. R. R.
Mr. C. St. Clair Letch, solicitor, of Dartmouth, has issued two writs against the L. E. and D. R. R. on behalf of Dr. Ling, administrator of Thomas Luton, deceased, and Rebecca McNeil, administratrix of John McNeil, deceased, respectively. The damages are unstated. These actions arise out of the accident on the L. E. and D. R. R. at West Lorne in April last, whereby John McNeil and Thomas Luton were instantaneously killed in a collision between a local and gravel train. The indictment on the writs charges negligence of the company, its officers and servants. The coroner's jury has given the company to blame in failing to provide proper signals and rules regulating trains, while the Government commissioners recently decided that the gravel train crew were at fault. The actions will be tried at the fall assizes at St. Thomas.

STABBED WITH JACKKNIFE

Webb Was Weary of Life and Tried to Cut Loose.

Was Found on Mount Brydges Farm—Came From Pennsylvania.

"Tired of life" was Albert Marshall Webb's reason for attempting to take his own life yesterday afternoon. Webb, who lies at Victoria Hospital in this city with good chances of recovery. He was brought in from Mount Brydges last night by County Constables Fisher and McIntyre, having been found there on the farm of Mr. Dugald McBain in what was considered a dying state. He was a man of about 35 years of age, and had been stabbed himself three times with a jackknife. The blade, which was two and a half inches in length, had been thrust into his side in two places and into his stomach. This happened about 5 o'clock in the afternoon, and shortly after he was found by Mr. McBain and Dr. Woods, of Mount Brydges, was called in. He did what he could there for the man and advised his being taken to the city hospital.

The man had only worked for Mr. McBain one day, having come from the other end of the county as a stranger in the district. It was decided to send for County Constable Fisher, Constables Fisher and Constable McIntyre, of Komoka, who have been rounding up tramps since the Whalen case. The man brought Webb to the city last night.

The would-be suicide stated that he was tired of life, and that he wanted to die. He was 47 years of age, was a painter by trade, and came from Pennsylvania. He is widowed, and has one son living in the United States. He had on him when found a ticket from Harrisburg to London, dated July 6.

At the hospital this morning it was stated that he would probably recover and was doing very well.

HOTTEST DAY OF SEASON

Thermometer Registered 89.5 Degrees on Thursday.

Did Not Drop Below 70 Degrees During the Night.

The thermometer at the local observatory yesterday registered 89.5 degrees, the highest point reached this season.

While this is not unusual by any means for London during July and August, the heat was very oppressive, for it followed a spell of very pleasant summer weather, with cool evenings.

A comfortable place was what every Londoner sought, especially last night. Springfield was the resort for thousands, for if there is a spot in the city where it is possible to keep cool, it is at the river park. Cars left there every few minutes, and they were continually crowded.

The mark of 89.5 was reached on the thermometer shortly after noon, and it was only at a very late hour that it was more retired. The absence of any breeze, together with the temperature at 70 degrees or better, made the average home almost suffocating.

At 8 o'clock this morning the thermometer registered 77 degrees. Owing to the heat yesterday afternoon, work was suspended for a time at the rolling mill.

OLD LADY HAS NO HOME

Magistrate Sends Her to City Relief Inspector.

Homeless and aged, poor old Mrs. Randall was taken to the police station and had to answer to a charge of vagrancy. In spite of the fact that she was not in a position to maintain herself she did not seem as unhappy as one would have expected. Nor did she complain of the hard work; she said she did not have any money, and she turned out of a home where she had been living. The magistrate asked her why she had not gone to the Aged People's Home, and kindly talked to her, inducing her to consent to go there if she could. She promised to do so.

When she came to leave the station she had a big shawl around her and a little money on her head. Short and stout and yet over the age of 70, she did look a creature for compassion as she walked out with a bundle of clothes under each arm, probably all that she owned. But she went away. Someone jokingly advised her that the best thing to do was to get married, but she laughed and said that she had had a husband for 45 years and that had been enough.

She was directed to the relief inspector's office. To all appearances Mrs. Randall has been a most respectable woman, and it seems a matter of regret that she should have been deserted in her old age by her children.

The other cases before Magistrate Love were intoxicates. One was a first offender and was discharged; another was an old offender and was fined \$5 or 20 days. The third and last one was the worst, as he had gone to a respectable house in the city and had used insulting language to some young ladies. He was fined \$10 or 21 days.

INVESTIGATING HER DEATH

Mrs. Storie Had Hemorrhage of the Brain and Died.

Post-Mortem Examination—Coroner Ferguson's Warning.

The inquiry into the death of Mrs. Nellie Storie began last night at the undertaker's rooms of J. Ferguson & Sons. The jury viewed the remains and heard the evidence of the doctors, who made the post-mortem examination, as well as their report. The inquest is then adjourned until next Thursday night.

Coroner Ferguson impeded the following jury: Messrs. Fred Heighway, Fred Conn, William Leishbrook, Richard H. Cullis, Thomas J. McCormick, Thos. Egerton, Samuel Yelland, Wm. Rowe, Robert Whitton, Wm. Pugsley, George Pelton, John C. Halliday, and Samuel Turner, foreman.
