

Botany.
GIRDLED TREES.

Of the many scenes of the Western land,
Few seem so strange as the spectral band
Of girdled trees, that gaudy and high
Raise their naked arms to the Summer Sky.
Singly they stand in mournful solitude,
Or in marshalled ranks pressed side by side,
White around each trunk the axe has lashed
The circle of death, and life is sped.

The slun shines warm, the dew's distil,
The showers fall with bounteous will,
The soil beneath is richly stored;
With wealth of nourishment richly stored;
But the dew and the rain are not updrawn,
And the sun is idle from early dawn,
And the fertile wealth, a miser's gold,
Lies all untouched in the hoarding mold.

Around, around, on every side,
With foliage banners green and wide,
The forest stand 'mid mirth and song
And the glancing wings of a flitting throng;
But the girdled trees are calm and mute,
No leaf waves on them from top to root;
Unable to play with the sportive air,
Restless and songless their bows are bare.

The Spring may come with delicate grace,
The Summer's luxury fill the scene,
The Autumn splendour may flush the world,
The Winter's storms be in fury hurled;
But alike thro' Spring, thro' Autumn's glow,
Thro' Summer's Strength, thro' Winter's snow,
The girdled trees, by night, by day,
Shew naked and gaunt and mute and gray.

A winter scene in the summer time;
A sudden death in life's full prime;
A desolate heart where blossoms and dry
Show the blighted forms of memory;
A monument sad o'er a brave race dead
Whose customs and honours are with-
led,
Are the groves of girdled trees that stand
Spectral and bare in the Western Land.

ISTHMIAN CANAL.

The present editor of the Albany Register, during his official residence in Central America and travels in other sections of the continent, made himself well acquainted with the merits of the several projects for securing a connection between the Atlantic and the Pacific. In a long article he has given an account of the various projects for uniting the Atlantic and Pacific Oceans by a ship canal. He says:

The most noticeable achievement was that of a curate of Novitia, a small town in the province of Choco, New Grenada, who caused his parishioners to dig a small canal in a ravine of the Kaspadura, which loaded caucos were carried to the head of the river, the San Juan de Chiriqui, a bold dashing river that empties into the Pacific in about 4 deg. north latitude, to the little river of Quito, which, uniting with the Andagada and Luira, forms the river Atrato, that empties into the Gulf of Darien.

By means of this canal, which was commenced as early as 1788, considerable commerce was carried on between Cartagena on the Caribbean Sea and Peruvian ports on the Pacific. This is the only instance in which water communication has actually been effected. The canal of the obscure curate of Novitia existed and was used for several years, unknown to Europe, but on the breaking out of the war of independence, during which commerce was greatly interrupted, and all internal improvements were utterly neglected, the canal was suffered to fill up, and it is now obliterated. The fact of its former existence, however, is not doubted, but such a result shows the practicability of connecting the two oceans in its route.

The Atrato, above mentioned, is a noble river. It flows between high banks, with a deep and tranquil current, nearly due north of the Gulf of Darien. It is navigable for vessels drawing seven feet of water to Quindio, a distance of more than four hundred miles from its mouth. Its head waters take their rise in the province of Choco, a region there is every reason to believe as rich in mineral wealth as California. Its banks are lined with forests of Cautuche or India-rubber tree, rivaling those of the Amazon, and the forest, and other valuable woods of commerce. The Bay of Candelaria, at its mouth, is well sheltered, has good anchorage, and would hold all the ships of the world. About one hundred miles from its mouth it receives a small river from the west called the Napiipi. Up that stream loaded boats can go within five leagues of the Gulf of Copaca, a good harbor on the Pacific. From that point the sailing distance to San Francisco is not greater than from Panama. It is by the Atrato and the Napiipi, we suppose the canal mentioned is to be constructed.

The route, from all the information we have been able to obtain respecting it, we are strongly inclined to believe, beyond all comparison, is the most feasible of any on the continent for a ship canal. It is just about where a canal should be to accommodate our trade, not only with California, but with South American ports on the Pacific, and with China and the East Indies. It has also this great superiority over all other routes—it is the only one where the mountains separating the waters that flow into the two oceans, sink down into a plain and entirely disappear.

Humboldt, whose keen observation allowed nothing of importance in science or physical geography to escape his attention, was the first to announce this remarkable fact. His statements are confirmed by gentlemen of the highest respectability and intelligence, who have gone over the ground. Gen. Lopez, the enlightened President of New Grenada, says the route suited to him entirely well. Col. Joaquin Acosta, the former Minister from New Grenada to the United States, a gentleman eminent for his high literary and scientific attainments, and who has paid great attention to the topography of his country, told us that there was a very slight swell of ground between the Atrato and the Pacific, but not enough to be formidable, nothing in comparison with many difficulties which had been overcome in the construction of the Erie Canal. The length of the canal would be about fifty miles, with nothing to indicate heavy rock excavation. From these data readers can estimate the probable cost of the work. A canal large enough to admit the passage of the largest class of steamers or East India men, could probably be constructed for less than ten millions of dollars.

The valley of the Atrato, in his opinion, is the only practicable route for a ship canal, while the isthmuses of Yelantepeque, Panama and Nicaragua may all be made available for a railroad transit. These facts show the vast importance of the Isthmus of Darien, and must command for it a large share of public attention.

Great Temple of the Sun in Old Peru.

The interior of the temple was most worthy of admiration. It was literally a mine of gold. On the western wall was emblazoned a representation of the Deity, consisting of a human countenance looking forth amidst innumerable rays of light, which emanated from it in every direction, in the same manner as the sun is sometimes personified with us. The figure was engraved on a massive plate of gold, of enormous dimensions, thickly powdered with emeralds and precious stones. It was so situated in front of the great eastern portal, that the rays of the morning sun fell directly upon it at its rising, lighting up the whole apartment with an effulgence that seemed more than natural, and which was reflected back from the golden ornaments with which the walls and ceiling were everywhere encrusted. Gold, in the figurative language of the people, was "the tears wept by the sun"; and every part of the interior of the temple glowed with burnished plates and studs of the precious metal. The cornices which surrounded the walls of the sanctuary were of the same costly material; and a broad belt or frieze of gold, set into the stone work, encompassed the whole exterior of the edifice.

THE SHEPHERD'S DOG.

Without the shepherd's dog, the whole of the mountainous land in Scotland would not be worth sipping. It would require more hands to manage a stock of sheep, gather them from the hills, force them into houses and folds, and drive them to markets, than the profits of the whole stock would be capable of maintaining. Well may the shepherd, then, feel an interest in his dog. It is indeed, he that earns the family's bread, of which he is content himself with the smallest morsel. Neither hunger nor fatigue will drive him from his master's side; he will follow him through fire and water. Another thing very remarkable is, the understanding these creatures have of the necessity of being particularly tender over lame or sickly sheep. They will drive these a great deal more gently than others, and sometimes a single one is committed to their care to take home. On these occasions they perform their duty like the most tender nurses. Can it be wondered at, then, that the colley should be much prized by the shepherd; that his death should be regarded as a great calamity to a family, of which he forms, to all intents and purposes, an integral part; or that his exploits of sagacity should be handed down from generation to generation, and form no small part of the converse by the cozy ingle, on the long winter nights!

GOOSE TROOP.—Many a dyspeptic has arisen from his "dry toast" with a feeling as if he had eaten a pound of lead, and half in despair at the diminished power of his digestive organs, yet never for a moment suspecting that the trouble was more in the toast than in the stomach. Bad toast is about as bad to digest as any thing else. The following directions for making good toast, we clip from a news paper, and give it for the benefit of all whom it may concern.

"If you would have a slice so toasted as to be pleasant to the palate, and wholesome and easily digested, never let one particle of the surface be charred. Chestnut brown is even far to prefer for a good toast; and the color of a fox is rather too deep. The pearrer it can be kept to a straw color, the more delicious to the taste, and the more wholesome it will be. This is done by keeping the bread a proper distance from the fire, and exposing it to a proper heat."

T. M. REED,
Apothecary and Druggist,
Corner of North Wharf and Dock Street.

RESPECTFULLY announces to his friends and the public generally, that he has opened, where he intends carrying on the APOTHECARY and DRUGGIST Business, and solicits a share of public patronage.

By recent arrivals from England and the United States he has received a large and well-selected stock of

DRUGS, CHEMICALS, PERFUMERY, CARBONIC ACID, and ESSENTIAL OILS, BRUSHES, DYE-STUFFS, &c. &c.

Pure Soda WATER, with choice SYRUPS, constantly on hand.

LONDON HOUSE,
Market Square.

THE STOCK of this Establishment having during the past season, been greatly reduced to make room for extensive shipments, will now present the advantages of an almost entirely

New Assortment, carefully selected on the best terms in the principal Markets of Great Britain and the United States.

NOW OPENING—received per Steamers "Enterprise" and "Admiral," and Ships "Speed" and "Gloucester."

115 Packages of British and American GOODS, consisting, in part of

LADIES' VISITING and MANTLES, in various qualities and fashionable styles; Long and Square SHAWLS, in newest styles; DRESS GOODS, in all the leading materials, particularly the Stock of French and Scotch

In De Lains and Printed Muslins; which will be found worthy of special attention, comprising an extensive variety of new and beautiful Patterns and Colorings;

A Large Quantity of 8, 4, and 54 PRINTS, good quality, very low.

Plain and Fancy Gingham, Furnitures, and Fancy Regattas; Linens, Lawns, Hollands, Osnaburghs, Canvas, Ducks, Grey and White COTTONS, COTTON WARPS,

Black and Colored Oleums, Cobwebs, Copes and Paramatts, Duckings, Satinets, Drills, Flannels.

MOREENS, CARPETINGS; a general Assortment of Haberdashery, Trimmings, and Small Wares.

The above Stock will be announced on the arrivals of the "Lisbon" and "Frisco," from London, and "Tianjin" from Liverpool.—all now daily expected. T. W. DANIEL.

WORTH KNOWING,
To those whose Wardrobe wants replenishing.

No. 1, South Wharf.
W. TISDALE & SON

Have received ex "Gloucester" and "Dane" from the Clyde, "Speed," "John S. DeWolf," "Clung," and "Tianjin," from Liverpool, and "Lisbon" from London:

300 Cases "Thames" Screw AUGERS, 300 Long and Short Screws, 450 Pots, 200 Bakepans and Covers, 410 square Covers, 100 Griddles, 100 Frying Pans, and 60 Spiders, 5 bundles Long Handle Frying Pans, 2000 Cast Boxes,

7 Sheets LEAD, 1 Ton Lead PIPE, all sizes, 2 Tons SHOT, and 8 Ingots Block TIN, 5 Bales "Griffin" SCYTHES and Sickles, 3 Cases "Hole & Co's" 5, 6, 8, and 7, Mill SAWS,

1 Do. ditto, Pin, Hand, Tenon, Buck and other SAWS, 1 Top Iron Wire, assorted, No. 4 to 21, 1 Do. Spring Wire, assorted, also Copper and Brass WIRE,

1 Do. Sintered LEAD, 18 Bundles Blister Steel, 10 do German do, 2 Cases Axe Steel, Octagon and Round Cast STEELS, 1 Case "Pickers" Mill and other FILES, 10 Blacksmith's ANVILS, 1 Case Hammers and SLEDGES, 1 Basket Smith's Vices, 7 Bundles BELLOWS, 1 Case Round Point SHOVELS, 22 Doz. SHOVELS and SPADES, 2 Cases Barn Door HINGES, 2 Cases Clout, Pump, Scupper and Boat Nails, 1 Do. Black Makers' RIVETS,

1 Do. SAD IRONS; 2 Cases Black Boilers, 1 Case Iron Wrenches; 1 Do. Chain Trowels, 3 Cases Tea Kettles, Preserving KETTLES and Saucepans, 2 Cases Butt and other HINGES, 1 Ton Sparrow-bills, 1 Case Guns and Pistols, 2 Bales Wire Seives and RIDDLES, 1 Case London GLUE, 1 Case BORAX, 6 Cases Raw and Boiled OIL, "Brandenburg" WHITE LEAD, 1000 lbs. E. and F. and Fowling GUN POWDER.

Casks containing LOCKS in every variety, Planes, BRUSHES, Fire Irons, Spoons, Scissors, Lathes, Ropes, Pine Irons, and a very excellent assortment of BRASS GOODS, &c. &c. together with the Stock on hand, and a further supply shortly expected in the ships "Janet," "Pomona," "Kingston," and "John Woodall," are offered at prices as well made as worthy the attention of purchasers. May 13th, 1851.

Astonishing Efficacy
HOLLOWAY'S PILLS
AND OINTMENT.

EXTRAORDINARY CURES BY Holloway's Ointment.

CURE of a NEURALGIC AFFECTION OF THE FACE, by the use of Holloway's Ointment. Copy of a Letter from Mr. Joseph Gildon, Jan. 6, 1851, to Professor Holloway.

Sir,—I have the gratification to announce to you a most wonderful cure wrought upon myself, by the use of your Ointment and Pills. I had a severe attack of Neuralgia in my right eye, which extended along my neck, and was attended with swelling and inflammation to an alarming degree, inasmuch that I was unable to move without the aid of crutches. I consulted a very eminent Physician, besides other Medical men, but to no purpose. At last I tried your Ointment and Pills, when, strange to say, in less than two weeks the swelling and inflammation subsided to such a degree that I was enabled to pursue my daily avocation, to the utter surprise and amazement of those who were acquainted with my case, seeing that I was cured so quickly. I and my family are well known here, as my father holds his farm under the Rev. J. Spence, Rector of our Parish.

JOSEPH GILDON. Amputation of Two Legs Prevented. Extract of a Letter dated Roscommon, February 20th, 1847, from the highly respectable Professor of the Roscommon Journal.

To Professor Holloway. Sir—Mr. Ryan, the well known proprietor of the Hotel next door to me, had two very Bad Legs one with eight ulcers on it, the other with three. They were in such a fearful state that the effluvia from them was very great. Some time since he made a journey to Dublin for the purpose of consulting one of the most eminent professional men in the Kingdom, and he returned home with the choice of two alternatives—to have both Legs amputated, or die!—On his way home he met a gentleman in the Coach who recommended the use of Holloway's Pills and Ointment, which he had recourse to, and was perfectly cured by their means.

(Signed) CHARLES TULLY, Editor and Proprietor of the Roscommon Journal. Bad Disposition, with extreme Weakness and Debility—an extraordinary Cure. Mr. T. GARDNER, of No. 9, Brown street, Grosvenor square, had been in a very bad state of health for a long time, suffering from a distended Stomach, very impaired digestion, with constant pains in his Chest, was extremely nervous, and so generally debilitated as to be scarcely able to walk the hundred yards; during the long period of his declining he had the advice of four of the most eminent Physicians besides five Surgeons of that city, who recommended the use of various courses to Holloway's Pills, which he declares effected a perfect cure in a very short time, and that he is now as strong and vigorous as ever he was in his life. This being so extraordinary a case, may lead many persons almost to doubt this statement, it may therefore be necessary to say that Mr. Gardner is a broker, and well known.

Cure of a Desperate Scabetic Eruption of long standing. Extract of a Letter dated Haleshampton the 10th of February, 1847, addressed by Mr. Simpson, Stationer.

To Professor Holloway. Sir,—Having been wonderfully restored from a state of great suffering, illness and debility, by the use of your Pills and Ointment, I think it right for the sake of others to make you case known to you. For, and other years I was afflicted with a violent Scabetic Eruption, which completely covered my chest, and other parts of my body, causing such violent pain, that I can in truth say, that for months I was not able to get sleep for more than a very short time together. I applied here to all the principal Medical men, as also to those in Birmingham, without getting the least relief; at last I was recommended by Mr. Thomas Simpson, Stationer, Market-place, to try your Pills and Ointment, which I did, and I am happy to say, that I may consider myself as thoroughly cured, I can now sleep all the night through, and the pain in my back and limbs have entirely left me.

North Mill, Wharf
March 4th, 1851.

Mess Beef & Pork

40 BARRELS Mess BEEF in Bond for Ship Stores; 50 barrels heavy Mess PORK, an extra article.
July 8. **GEORGE THOMAS.**

The Great Cough Remedy.
BLISS'S COMPOUND
COD LIVER OIL CANDY,
(The Original and Only Genuine.)

Prepared only by B. K. BLISS, (Sole Proprietor), Drug and Apothecary, Springfield, Mass.
A New and Efficient Remedy for Consumption, Coughs, Cold in the Head, Hoarseness, Bronchitis, Asthma, Tracheitis, and all the Disorders of the Lungs, and Bronchial Affections. This wonderful curative power of Cod Liver Oil, in all cases of COUGHS, COLDS, and CONSUMPTION, have been clearly demonstrated by the experience of the most distinguished physicians of Europe and America, during the last two or three years. It has been used in all parts of the country with great success, by the advice of our most eminent physicians. Dr. Williams, an eminent English Physician, writes, "I have used it two and a half years, and have preserved notes of 23 cases of consumption, where the Cod Liver Oil was used, and that, in 20 of these, the use of the Oil was followed by marked and unequalled improvement, ranging in degree from the mitigation of the symptoms up to a complete restoration to general health. Some of these cases were persons in an advanced stage of this dire disease, and the cure was almost miraculous."

Be assured the introduction of Cod Liver Oil into general use is a great desideratum in our country, and in all the same medicinal value, but free from its disagreeable taste, and which has rendered it a "washed book" to thousands of persons who are suffering and who were afflicted with the cough and lungs. After a series of experiments, the proprietor has succeeded in combining the pure Oil with sugar, cream, and other ingredients, in the form of the most agreeable and palatable Candy, possessing and preserving all the medicinal properties of the pure Oil, without its nauseous and repulsive taste, presenting it in a form which is as palatable as the most delicate invalid without its usual course. So pleasant is the taste, that it may be administered to an infant without difficulty.

It is in Packages, 1s. 3d. each, sold by S. L. TILLEY, King street, St. John Dec. 31.

TO OWNERS OF DEALERS IN HORSES.

FOUNDER OINTMENT, For the cure of Founder, Split Hoof, Hoof-bound Horses, and contracted and feverish Feet, wounds, bruises in the Flesh, Galled Backs, Cracked Heels, Strangles, Cuts, Kicks, &c. on horses.

RING-BONE CURE, For the cure of Ring-Bone, Blood-Spavin, Bone-Spavin, Windgalls and Splints—a certain remedy. This Ring-Bone Cure and the Founder Ointment are prepared from the recipe of a very celebrated English Farrier, and will cure in ninety nine cases out of one hundred any of the above complaints. They have been used by Farmers, Liveries, Stage Proprietors, and others, with the most marked and decided success.

DR. LAZZETTI'S JUNO CARDIAC, Or Procreative Elixir, prescribed as an efficient restorative in cases of Debility, Impotency, and all irregularities of nature. It is all that it professes to be: viz. Nature's Great Restorative, and remedy for those in the married state without interrupting. It is a certain cure for Seminal Emissions, General Debility, Gleet, Weakness of the Genital Organs, Nervous Affections, &c. &c. As a vigorous and restorative medicine it is unequalled. Also a certain remedy for Incipient Consumption, Indigestion, loss of Muscular Energy, Physical Lassitude, Female Weakness, Debility, &c. &c. It is warranted to please the user in any of the above complaints, and is of priceless value to those without offspring.

Sold by J. G. SHARP, Market Square; and FELLERS & CO., King Street, St. John; J. Cox, Carlisle; and Morton & Co., Halifax, N. Cos.
