Good Words for Talmage by the London Standard.

Berlin Excited Over the Reunion Be tween Bismarck and the Emperor.

Talmage Eulogized in London. London, Jan. 24 .- The Standard has a leader concerning Talmage's resignation of his pastorate in Brooklyn. The writer, after speaking highly of Talmage's ability in the pulpit, says: "His usefulness was never impaired by scandal, and it will be very difficult to supply his place."

Mrs. Martin Objected. LONDON, Jan. 24 .- Mrs. John Biddulph Martin, formerly Victoria Woodhull, some time ago took action against the trustees of the British Museum on account of two books reporting the Beecher-Tilton trial, reflecting on her character, and yesterday it was announced in court that the books in question had been withdrawn,

Royalty's Afflictions.

LONDON, Jan. 24.—The Prince of Wales, in declining for the Princess an invitation to visit Belvoir castle, the residence of Duke of Rutland at Grantham, Lincolnshire, stated that the Princess would hereafter take no part in social events. Truth further says that the Prince is suffering from his old complaint and is unable to take much exercise. He will abandon riding.

The Bismarck-Kaiser Reunion. BERLIN, Jan. 24.-It now appears that Col. Count Von Moltke on his recent visit to Friederichsruhe was the bearer of an autograph letter to Prince Bismarck from the Emperor. It is stated to-day that a second autograph letter has been sent to the Prince by the Emperor, inviting the Prince to come to Berlin to take part in the celebrations in honor of the anniversary of his Majesty's birth, which occurs on Saturday next.

The Pamirs Boundary.

London, Jan. 24.-The negotiations of the Foreign Office with Russia as the boundary of the Pamirs have resulted in an arrangement to which the Ameer of Afghanistan has consented. All parties to the arrangement are satisfied. The State of Jakhan, which the dispute concerned, has miners' refusal to accept a reduction. been left to the protection of the Ameer. Russia has now settled with China their dispute as to the boundaries in the same region. It is reported that Lord Rosebery. Secretary of State for Foreign Affairs, has obtained China's sanction to propose to France a convention in which Siam's integrity shall be declared inviolable, and shall be placed under the protection of France, Great Britain and China. This proposal seems to be intended to test the truth of France's declaration that she will not follow an aggressive policy in Asia.

A Fatal Collapse.

BERLIN, Jan. 25 .- The gallery of the Ducal Riding School, of Gotha, collapsed yesterday during the rehearsal for the festival of Jan. 31, when the duke will make his formal entry into the city. Four persons were killed and twelve others so severely injured that they are likely to die. A Peculiar Charge.

RIEL, Jan. 25 .- Herr Stroebel, editor of the Volks-Zeitung, the local Socialistic organ, has been sentenced to imprisonment for one month at hard labor for asserting that the captain of the German ironclad Koenig Wilhelm punished marines by suspending them from the masts, as if crucified. Stroebel based his assertion on what he said was the sworn testimony of the ship's carpenter.

Terrible Railway Accident.

St. Petersburg, Jan. 25 .- A dispatch from Orenburg states that a railroad accident in which fifteen persons lost their lives has occurred at Samarca, in Southeast Russia. A passenger and freight train ran into each other. There were five cars loaded with petroleum in the freight train, and these caught fire, resulting in the burning of the wrecked train. Many of those who lost their lives were burned to death.

A BOGUS NEPHEW.

Uncl John Grohl Was Glad to See Him But it Cost Him \$6,000.

LEDO, Jan. 25 .- John Grohl, a rich ner of East Toledo, has relatives in the est, but has heard little of them for ars. Among them is a nephew about 25 ears old. The other day a nice-looking oung man appeared at Mr. Grohl's east side home and dropped his luggage, saying: "How is my dear old uncle of whom I have heard so much in the far west, but have been unable to see all these years. Let's have a good visit, uncle," he continued. "I was in this part of the country for a tew days and I thought I would break away from business long enough to run over to Toledo and see you."

The young fellow had in reality come from the West, and knew all about the old gentleman's relatives. After rehearsing ramily history and anecdotes, the young man said that although young he had accumulated considerable property in the way of mining stocks and farming lands. He started back at the same rate of speed, was sorry he could not remain in the city long, as his remittance from the West did not arrive and it bothered him.

NOT TO SPITE HIS FACE.

But A. K. Klam Had Part of His Cwn Nose Cut Off.

READING, Pa., Jan. 25 .- A. K. Klam, of Exchange Place, New York, came to Reading five weeks ago and called at Dr. Ege's Surgical Institute. Klam is 28 years old, in good health and was of fine appearance, with the exception of his nose, which Dr. Ege says was so extremely large as to amount to a facial blemish. Klam said he was so greatly annoyed by its abnormal development that he desired an operation performed.

Dr. Ege put the man under the influence of chloroform and cut away a piece of the cartilage near the end of the nose threequarters of an inch long, drew the lower portion and joined it to the upper part of the bridge to the nose, and the two sections were stitched together. The patient remained at Dr. Ege's until to-day. The wound healed nicely, the nose was straight and much smaller. Klam, well pleased, left for home looking like another man.

THE WORLD'S END PREDICTED. An Eminent Austrian Astronomer Causes a Sensation-Critical

Days in 1891. Paris, Jan. 25. - The Paris papers contain accounts of a new and startling prediction made by Prof. Falb, the famous astronomer, of Vienna, whose previous predictions of earthquakes and terrestrial disturbances have almost invariably come true.

Much uneasiness has been caused by the unusually sensational prediction for the year 1894. The professor's prediction indicates certain "critical days," as he calls them-that is to say, days when violent storms and other serious forms of atmospheric or terrestrial disturbances may be

The critical days given by Prof. Falb for 1894 are stated in the order of maximum disturbance as follows: Aug. 30, Sept. 29, Feb. 20, March 21, Aug. 1, April 6, May 5 and Oct. 28. Thus the most serious disturbance may be looked for on Aug. 30, and the slightest on Oct. 28. But the most serious disturbance-or, rather, according to Prof. Falb, "calamity"-will be some six years hence, when the earth will come into collision with a comet, which was first discovered in 1866, and which has been moving about space ever since in an uncertain way. Dr. Falb has calculated that the comet will collide with the earth on or

about Nov. 13, 1899. The professor's theory is that the interior of the earth is a vast ocean of molten fire, which, like the sea, is subject to the influence of the moon, and which rises to dangerous storms on the conjunction of certain planetary influences, causing earthquakes and other forms of terrestrial dis-

THE P. P. A.

What the Convention Is Doing Behind Tiled Doors.

The Officers Elected-No Governme Official Reed apply-Wm. Bell Shut Out.

Wednesday Afternoon's Proceedings. HAMILTON, Ont., Jan. 24.-The P. P. A,

convention continued in secret session this afternoon. For the office of president the names most freely mentioned are: J. H. McConnell, of Windsor, the present president; Rev. J. C. Madill, of Belwood, the present vice-president, and ex-Mayor Fleming, of Windsor.

Mr. McConnell is looked upon as an extremist by a large number of the delegates. and is thought to be too indiscreet for this important office. Rev. J. C. Madill is considered a moderate man and likely to be elected president. A prominent P. P. A. Toronto or Ham-

ilton man will be elected vice-president. Rev. F. R. Ghent will be re-elected chaplain, and Jackson L. Little, of Toronto, and E. J. McRobert, of London, will be re-elected secretary and treasurer respectively.

Many of the delegates favor a change in the name of the order from the Protestant Protective Association to the Can adian Protective Association.

The oath of the Canadian order is identical with that of the American Protective Association, and its ritual, constitution and general principles are almost unchanged.

One of the statements made by Grand President McConnell in his address was that in the last Provincial election 300,000 votes were polled; that the P. P. A. now controled 17 per cent. of this number, and before the next Provincial election the association expects to control 30 per cent. of the legitimate vote in Ontario.

The delegates are almost a unit in their indorsation of D'Alton McCarthy as their eader in the Dominion House of Commons, but have not fixed the leaders in the Legislature. They look to feach district to nominate a candidate who will uphold the aims of the association, and are prepared to make it very interesting for both political factions.

Hamilton, Jan. 25.-The election for officers for the ensuing year was begun yesterday afternoon, but did not close until night. President McConnell. ex-Mayor Fleming, of Windsor, and Rev. J. C. Madill, of Bellwood, stood for the presidency. The Rev. Mr. Madill was elected by a large majority. Mr. J. Kennersley, Toronto, was the choice for vice-president. Mesers. E. J. McRobert, of London, and Jackson Little, of Toronto, were elected treasurer and secretary, respectively; the Rev. J. Ghent, Walkerville, chaplain; Mr. J. Harper, Hamilton, secretary of state; Mr. R. Noxon, of Brandon, Man., J. Graham, Havelock, and W. Smith, Barrie, were elected to the offices of guards.

(Kingston News.) The only danger is that the baser element in any or all of the national societies may make their existence an excuse for perpetuating on Canada's shores race prejudices which have grown up in the course of centuries in the old country. SIX OF THEM SHOT.

The Terrible Fate of Conspirators in San Domingo.

Laid for the President with Bombs-Buried on the Road.

NEW YORK, Jan. 25 .- The Herald's Port.

Au-Prince correspondent writes that on Dec. 10, 1893, Gen. Campos, Governor of the Azua district, San Domingo, was ambushed and assassinated while riding on the public road. A few days later President Heuraux passed over the same road, but with a strong military escort. The attention. The escort plunged in and captured six men with dynamite bombs, which they had intended throwing at the President. An investigation took place and a conspiracy was revealed. The two brothers, Carlos and Pablo Baez, nephews of ex-President Baez, were implicated and imprisoned. The brothers Baez and the six would-be dynamiters were executed by shooting them on the very spot where bloodstains still showed where Campos lost his life. The rites of the church were refused, and also a request by Gen. Marching, one of the conspirators, to be allowed to write a note of farewell to his wife, with whom he had not been allowed communication for twelve months. They were buried in the roadway, where passing wheels and hoofs will soon obliterate all traces of the graves. To the prayers of the families for the remains to give them decent burial, the reply was made, "Anyone touching these graves will be instantly

On Tuesday afternoon a standing vote of thanks was passed unanimously by a largely-attended meeting of the W. C. T. U. to Dr. Arnott for his able and chivalrous defense of the union, and especially its beloved president, from the cowardly attacks of anonymous letterwriters in the Free Press. The following is Dr. Arnott's letter:

THE WORK OF THE W. C. T. U. To the Editor of the Free Press:

The majority of the letters against the prohibition of the liquor traffic which have appeared in your columns of late have been such as might have been expected from those who feel that their business is in danger. There was one, however, which oversteppeed the bounds of decent argument, sneered at the temperance people and mentioned by name the president of the W. C. T. U. The gist of that letter was to make it appear that this estimable lady and the temperance people generally do nothing but preach and pray, and that when it is necessary to do something which calls for self-denial, or to give of their means for some good object, they are not quite so liberal. As there may be, and doubtless are, many who are honestly ignorant of the noble work which this organization is doing, I shall, with your permission, endeavor to enlighten them. Their charitable work alone would be a sufficient refutation of the sneer that they do nothing but preach and pray. Many hungry stomach they have filled with something more satisfying than talk. Many suit of warm clothing bears evidence that they give something beside their prayers. and many a person might have been turned out on the street if their rent had not been paid by the W. C. T. U. In some instances the food that was meant to feed the children has been sold, and the money spent in drink. However, none know better than they that the best way to assist people is to teach people to help themselves. Accordingly, we find them tramping all over the city collecting neglected boys and girls. They teach the boys the rudiments of education, and instill them with wholesome, moral principles. If any one will visit this band of hope, as it is called, they cannot fail to be struck with the patience, self-denial. labor and even money, that are required to carry on this work. They will also see the immense value that it must be to the city, since it is always cheaper to prevent

poverty and crime than to remedy it. The girls in the "Industrial School" are taught knitting, sewing, neatness, cleanlito make them useful and respectable members of society. One of their latest efforts is a cooking school for poor girls who most useful art. Surely people who are pestered with incompetent servants will heartily approve of this work. And when we consider that through it all there runs the inculcation of high moral and religious sentiment, it is easy to see that the importance of the work cannot be estimated. the W. C. T. U. the Government were induced to pass a law against young chil-

dren smoking. Fathers may smoke themselves, but they know too well the injurious effects to wish their children to do so. Even the dumb brutes have reason to bless them, as through their influence the drinking fountains were established which have proved to be such a boon.

Then they visit the sick, generally with more than words, carrying the gospel of peace to those who cannot or will not come to the churches, distribute wholesome literature, endeavor to suppress vicious literature, and in many other ways prove themselves to be veritable sisters of mercy, actuated by the purest and noblest motives, without hope or desire of reward other than

the pleasure of doing good. Does anyone imagine that all this work is carried on without money? And do the public find them frequently begging? On only one occasion, I believe, did the organization ask a few friends for pecuniary

keepers, we understand, would be pleased to have it prohibited and all treated alike. The W. C. T. They have confined themselves in the most ladylike manner to pleading for the abolition of the traffic and to relieving the distress which it has occasioned. (Toronto Monetary Times.) Few believe that a Province possesses constitutional authority to prohibit the importation of anything which the Federal laws admit. The right of regulating trade and commerce rests with the Dominion, the trade in liquor as well as iron and drygoods. To pass a prohibitory law with a suspending clause would be as far as the Province could go now, with any chance of ness and many other things that may help ultimate success; and it is a question whether it would not be better to await the decision of the Privy Counoil before undertaking to legislate in have not had an opportunity to learn this any form. BEATON VS. CCLCOCK.

Latest Phase of the Now Notorious Libel Suit.

The Defendant Proposes to Prove the Truth of All His Assertions.

HAMILTON, Jan. 24.-Mr. Jos. Deacon, barrister, of Brockville, solicitor for Proprietor Colcock, of the Brockville Times, filed an amended claim in the libel suit of Beaton vs. Colcock, which succinctly says: "No. 5 article complained of is true in substance and in fact.

This is the suit brought by Mrs. Eliza Beaton, of Burlington, against the Brockville Times for \$10,000 damages for republishing an article from the New York World, recording an investigation made by two World reporters, who claimed to have followed and identified the plaintiff as the woman who is suspected of throwing C. Harrison, of Norfolk, Va., off the Old Dominion Line steamer Guyandotte last year. The suit was to have been tried at the winter assizes here, but was postponed till

Defendant in his statement claims that he will be able to prove the truth of everything contained in the alleged libelous

article. It is said the New York World reporters never lost sight of the woman from the time she got on the steamer at Norfolk, Va., until she arrived in Burlington, Ont. They will come here to give evidence; also the officers of the steamer Guyandotte, the people who found Harrison's body on the coast of Virginia and other competent wit-

nesses. A number of newspapers have been sued by Mrs. Beaton, and it is understood they have combined to fight this as a test case, and that the New York World is putting every facility at their disposal to prove the article, The suit, if it comes to trial, promises to create a big sensation.

THE COTTON COMBINE. (Ottawa Free Press.)

So far as the question of cotton duties is concerned Canada is governed from the palatial residence of Mr. C. D. Owens, of Boston, the head of the cotton combine, The Cornwall Freeholder states that Mr. Owens is the managing director of one of the companies which control the output of Canadian cotton mills, and no doubt it is well informed.

THE three Masonic charitable institutions of England received during the year 1893 £58,922. Their average annual receipts

for the also nine years have been £62,390. A curious question of law has been brought before the Verment courts. The point to be determined is whether one man may be held in damages for injuries inflicted by another man's dog in the owner's house and upon the owner's wife.

A BOLT of lightning near Luling, Texas, Royal and United States Mail Steam- struck the corner of a house, passed through a shelf, hit a snuff bottle and leaped to the floor, where it seemed to exhaust itself on a little 2-year-old child. The child was only slightly stunned, but in a short time its back turned perfectly black.

Some writers think the process of turning white among arctic animals is in some way connected with a decrease of vital energy, and in his notes on recent science in the Nineteenth Century Prince Krapotkin brings forward as an example the alleged permanent white colors of domesticated animals in subarctic regions, such as the Yakutsk horse.

Retained Eis Equine-imity. The man whose livery stable with all its contents had been wrecked by a powder explosion sat among the ruins and looked

ruefully about him. "I seem to have gone out of business," he said, "under somewhat unfavorable 'oss

pieces."

Have You ! hought of It? For four thousand years or more the world groaned, suffered, and fumed about its corns, for there was no positive reliefno certain and painless cure until Dr. Scott Putnam gave to the world his great Corn Extractor. If there is suffering now it is a result of carelessness, for the remedy is at hand. Try Putnam's Corn Extractor. It is sure, painless, and prompt. Beware of substitutes. N. C. Polson & Co., pro-

prietors, Kingston. The national debt of Great Britain at the revolution of 1688 was only £664,000. Since then it has increased to £685,000,000. The great lung healer is found in the excellent medicine sold as Pickle's Anti-Con-

sumptive Syrup. It soothes and diminishes the sensibility of the membrane of the throat and air passages and is a sovereign remedy for all coughs, colds, hoarseness. pain or soreness in the chest, bronchitis, etc. It has cured many when supposed to be far advanced in consumption. In Austria, of 816 convicted murderers in the decade ending 1879, but 23 were put

Sow Ex-Ald. Lewis Found Many Set-

lers in the Canadian Northwest. OTTAWA, Jan. 24.—Ex-Ald. Lewis, who went to the Red Deer district in the Northwest and took up 640 acres a few years ago and returned disgusted with the years ago and returned disgusted with the state of things up there, was asked if things were really so bad as he represented. While insisting that the land is good and the country the very best, and the climate all right, yet he declares that the settlers all over the Territories are in abject powerty owing to the constitute of the co abject poverty, owing to the exactions of the C. P. R., the taking of the toll by the storekeepers the oppression of the tariff and bad immigration policy. He will do his best to keep Ontario farmers from going to the Northwest and losing their savings and having to return to Eastern Canada and start anew, perhaps as farm laborers. The storekeepers, liverymen and old hands in the Territories exact all they can from the settler, who is shamefully bled. The Immigration Department after bringing a settler to the Northwest leave him to the mercy of the first comer, and do not even enable him to find a location. Mr. Lewis referred to the immigrants brought by the department from Chicago, and said some of them were thieving Jews, who stole cattle, went to the towns to peddle, and were generally the worst kind of tramps. The immigrants brought in from the United States went out as fast as they came in. "Are all the settlers as badly off as those

"Yes," replied Mr. Lewis. "I traveled hundreds of miles on a tour, and I say that all the settlers are in a terrible condition. Why, I have seen a strong man sit down and sob in the midst of his grain because he could not sell it. The C. P. R. will carry \$1 worth of grain if you give the company 90 cents of it. Then the Massey-Harris agricultural implements have a monopoly up there, but I bought an American mower and paid more for it, because it was cheaper in the end. If my wife's health had not failed I would have stayed there and fought these evils to the bitter end. I was engaged when I had to come east in forming a farmers' association, and not one bona fide settler refused to join. Many of those who call themselves farmers are mainly storekeepers, and you people down here have got your reports from these men, and station agents, land agents, immigration agents, railway agents and Government agents generally and they have deluded you as to the real state of affairs in that ccuntry." Mr. Lewis is a member of the Ottawa Conservative Association.

A STRANGE EXPERIENCE. Suffered for Two Years With Sick Headache, Dizziness and Dyspepsia-

How Relief was Found, Mrs. S. W. Avery, says the Brantford Expositor, lives on Pleasant Ridge, about four miles out of the city of Brantford. Mr. and Mrs. Avery have always lived in that neighborhood, and he is the owner of two spendid farms. Having heard that Mrs. Avery had been cured of chronic dyspepsia and indigestion, by the use of Dr. Williams' Pink Pills, a reporter asked if she was willing to make Mrs. Avery was perfectly willing to give her experience. "For the past two years," she said, "I had been troubled with a very sick headache, dizziness and a cough which I believe were the symp-toms of dyspepsia and indigestion, and I eould find nothing to relieve me, although I tried several different medicines. I could not even find anything which would relieve my cough, which at times would be very severe. I had read of Dr. Williams' Pink Pills, and was induced to try them. Before I had used two boxes I felt so much better and relieved from my distressing symptoms that I thought it best to continue taking them through the winter, and I used them with the result that I have been totally cured. I have not once since had the severe headaches which formerly made my life miserable and my cough has entirely disappeared. I strongly recommend Pink Pills to anyone who suffers from dizziness, headaches, indigestion, etc., and I believe they will derive great benefit from their use. As a blood builder and researches. blood builder and nerve restorer no other remedy has met with such brilliant success as Dr. Williams' Pink Pills, and in cases like that of Mrs. Avery's they never fail to bring relief and a cure. Forty-Third Annual Meeting of the Congregation.

ment-New Board of Managers.

The 43rd annual meeting of St. Andrew's Presbyterian Church was held last evening. It was largely attended. The reports presented were of a satisfactory nature. Mr. James Mills, chairman of the board of

managers, presided.
Under the able pastorate of Rev. J. A. Murray the congregation has entered upon a career of steady advancement. Each year is but a repetition of its predecessor as far as progress and prosperity is concerned. Not alone is Mr. Murray greatly admired and much appreciated by those over whom he directly presides, but he has also a wide circle of warm and hearty well-wishers among the membership of other Presbyterian churches in the city.

He opened the meeting with prayer. "Now, we are waiting for the gentlemen to say something about this; otherwise we will call on some of the ladies," remarked Mr. Mills, after he had read the first clause of the manager's report, amid the smiles of those present. However, the gentlemen warmed up, and a lengthy discussion ensued. The first clause was amended by inserting the full amount of the expenditure-\$6,240 51. Following this the words "for want of funds" were displaced with "by ordinary revenue," in order to bring out the correct sense. Some objection was raised to foisting the whole onus of increased expenditure on the "Sabbath schools," so the two allusions to these bodies were also stricken out. It was decided that, if the funds permitted, the amount of \$100 would be voted at the end of next year to the augmentation fund.

The new board of managers is composed of the following gentlemen: Messrs. T. H. Purdom, A. Gillean, James McSween, James Mills, Dr. Macarthur and Dr. Gardiner.

Mr. James Gillean, who has been an usher for the past 44 years, asked leave to resign from the position. Mr. Frank Love objected to an acceptance on the ground that Mr. Gillean had made the same speech annually for the past 30 or 40 years. (Laughter.) It was finally decided that Messrs. Donald McDonald, James Gillean and James Mills should be appointed honorary ushers. They will have a staff under them to do the practical work.

Mr. Charles E. Wheeler, the organist, who has occupied that position admirably for four years, had his salary advanced to

Such a Gigantic Affair: : Such a Magnificent City. Such Beautiful Structures. : Such Grand Exhibits. Such Crowds. : : : Such Wondrous Fetes.

We have a full appreciation of the fact that millions of people who saw the great Columbian Exhibition and millions more who were not so privileged desire mementos of that great event, and the Advertiser has completed arrangements to offer its readers a series of World's Fair reproductions, which absolutely excel anything yet produced in the way of photography. The artist has secured effects of light and shade, and given the views such delicate and perfectly harmonized shading as to make them little less than marvels in mechanical execution and nothing less in beauty. In our collection are photographs of the magnificent buildings, with all the fine ornamentation brought out with distinctness. There are the grand pieces of statuary, which so adorn and beautify the structures. There are also lovely bits of picturesque scenery, which have inspired artists and have delighted the millions of visitors who attended the Fair.

-The Dominion Government has found its system of bonusing immigrants to go to the Northwest a failure, and has withdrawn the offer. The best help that can be given newcomers is to so lower the taxes on the necessaries of life as to make them comfortable in their new homes. Then every one of them will become a better immigrant agent than half a dozen well-paid professional offerers of bonuses. These have long since been distrusted by old world people.

-Many paintings and prints are much injured by the action of dampness and gases and from other causes; but under a new scientific arrangement, arrived at after many ingenious experiments in London, it is believed that they can be preserved for an indefinite length of time. It is simply placing the surface of the picture, be it canvas or paper, in a vacuum, thus protecting it from the usual atmospheric action, which is so deteriorating. In carrying out this plan the picture is inclosed in a metal frame or vase, covering the back and sides, and projecting from the sides like an ordinary frame. In the edges of this case a plate of glass is inserted, just as in an ordinary frame, and heremetically sealed to the metal. The air is then withdrawn from between the surface of the picture and the glass, and thus the picture is in a vacuum. It is asserted that the effect of this plan is to completely protect pictures from dampness, air and gases that operate to destroy paintings exposed or framed in the ordinary way.

-The most keenly contested battle for the position of warden this week took place in the Elgin County Council. Five candidates went before the councilors-D. Ferguson, reeve of South Dorchester; John Richardson, reeve of Malahide: W. M. Ford, reeve of Bayham; W. B. Cole, reeve of Yarmouth, and Frank Bennett, reeve of Southwold-and no fewer than 69 ballots had to be taken before Mr. Ford was elected to the position. The vote on the 69th ballot stood: Ferguson, 11; Richardson, 2; Ford. 14. The successful warden is a native of Bayham, and is 43 years of age. He is a successful farmer, a Liberal and a member of the Patrons of Industry. Some time since he received the nomination of the last-named body as their candidate for the representation of the riding in the Legislature. It is generally conceded that he is a talented, upright, progressive man.

LOWER THE TAXES, AND THE REVENUE WILL COME.

In Manitoba the Patrons of Industry favor lower tariff and a twenty-foot canal from Port Arthur to the sea. They would decrease the receipts and add enormously to the expenditure. Any man who knows how to do that and keep the country solvent has a brilliant future before him.-

Our contemporary, in its progress back to the fold of the high tax party, appears to ignore the avowed intention of the high 'protective" tariff to which not only the Manitoba farmers, but the people of the Northwest generally, as well as a majority in the east, are now known to be opposed. A "protective" tariff is not imposed to produce revenue, but to put as many obstacles as possible in the way of importation. In so far as a tariff is high and restricts trade, to that extent does it prevent imports, and prevent the accumulation of revenue. Everyone conversant with the history of the British free the present cost. The passing of such a tariff would vastly benefit the Canadian people. Manitoban farmers are right when they stand up for a reform which has done so much to keep Great Britain-small country though she is-in the front rank of the nations of the earth.

THE SCRAMBLE FOR TITLES. The Ottawa correspondent of the Toronto News professes to know of Canadians who have applied for knighthood. Does he? He would do a world of good if he volunteered to tell the public all about it. The ation of the actual duty, reduced to an ad legend is that the Queen searches out the valorem basis, to the cost of cloth import- great and noble of the race in the Dominion and resolves to make them "Sirs" as a special mark of her approval. But there have been suspicions that in recent years some men have received titles as solatium for wounded vanity, or in return for a fat subscription to the Conservative election funds. The public would be in a better condition to give intelligent judgment on the subject if it were possessed of the facts alleged to be in possession of the Ottawa correspondent. Out with them! The farce of pretense has been played long enough in connection with the scramble for titles.

A SCOTTISH OBJECT LESSON. Rev. Dr. Cameron Lees, preaching at a Christmas service in St. Giles', Edinburgh, remarked that what a free people would not do at the command of a king they now did cordially of their free will, and in Scotland the day was becoming freely observed, as it was in other countries. It stands to reason that an intelligent people cannot be made to adopt a particular line is a good deal of distress in that city. The of religious observance or conduct by compulsion or persecution. It has been tried been in power, the professional agents of predilections for Presbyterianism, and the predilections of a sect by forcible means. Indeed, one wonders at any professing Christian countenancing the principle of boycotting a man because of his religious down rules of conduct entirely different, He taught, without any qualification, the Fatherhood of God and the Brotherhood of Man. He inculcated without ceasing the Golden Rule. His was and is a religion of love and concord, rather than of hatred. We cannot convert those who differ from us in religion or in politics by harsh treatment. All history teaches us that.

Practical Experience with the Silo-Composite Milk-Testing-A Farmer's Experience-Winter Dairying in Ontario - Advantages of the Babcock Tester-Election of Officers.

(Special to the ADVERTISER.)

Wednesday Morning. INGERSOLL, Jan. 24 .- To-day was cheesemakers' and patrons' day at the greatest dairying convention ever held in Western Ontario. The town hall has been filled to su ocation all day, and at each session the crowd extended from the stage to the hallway. The speakers' platform was invaded. hundreds stood in the aisles and doorways. and thoughout all the discussion the best of order was maintained. Many ladies were present. During the long afternoon session the audience was allowed to stand up for a brief period to rest. Ingersollites cannot do too much to show their appreciation of the fact that the convention is being held in the early home of the industry. The firemen turned out in a blizzard to give an exhibition of their skill, the Ingersoll Athletic Association extended a welcome to their club rooms, and the manager of Grant's slaughter house invited the farmers to witness the slaying of 500 mgs during the day. Mr. Noxen has asked as many as can grand banquet will be given in the hall by cattle, young and old. the citizens. Bailantyne, Stratford; Prof. Robertson, Ottawa; Prof. Fletcher, Ottawa; ex-Ald. Stevely, London; Hon. Senator Reed, Belleville; D. A. Macpherson, Lancaster; F. E. Leonard, London; E. J. Birrell, Little Fails, N. Y .; E. A. Struthers, manager of Dr. Barnardo's farm, Manitoba: John Leitch. Glencoe. PRACTICAL EXPERIENCE WITH THE SILO.

The morning session opened with a talk on the sile by Mr. John Gould, Ohio, who in 1885 built the first silo west of the Allegheny Mountains. Mr. Gould said that the farmer had arrived at the parting of the ways and should change his methods, He must be in a position after raising a crop on the farm to get all the value out of it. Too much food was fed to unproductive animals and the farmer thus lost his labor and his crop, too. Too much good dairy food was fed to horses and hogs. If the constable had shot one half of the horses in Ohio on the 1st of December the farmers of that State would be better off, because over there they spent \$25 in feeding a horse during the winter, and then had to sell at \$6 a dozen in the spring. (Laughter.) Farmers should stop woodchuck farming, fatting up their cattle in summer and letting them get poor in the winter. The silo afforded a chance to fatten cattle all the year round. In sowing corn for ensilage instead of sowing four bushels to the acre he would put in eight quarts, good Virginia corn, and cultivate not more than one inch deep. The sugar qualities of Virginia corn made it of especial value as ensilage. He warned the farmers not to waste corn fodder after raising it, thinking that the virtue had all gone into the ear. He had met with fair success in sowing millet and clover with his corn. The average silo cost 50 cents a ton for storage capacity. The best silo was built with a kettle-shaped bottom, of sound, but not expensive

It should be 12 or 15 feet square inside, and very deep. It possible it should be made 30 feet deep. The best silo he ever saw was 12 feet square by 45 feet deep. Five square feet should be fed per day to each animal. The silo of the future would be built more largely in the barn. The food would then be all under one cover.

Mr. Gould detailed the best method of gathering the crop and packing and stowing, saying that twenty pails of water was the ideal cover. In conclusion he stated that in Ohio they had fed ensilage for nine years for winter dairying, and they liked it better and better every year. They found out that with ensilage, with oats, and with wheat and with the material they bought, their winter dairying was becoming their most profitable industry.

COMPOSITE MILK-TESTING. After Mr. Gould had answered a number of questions relative to the silo, Prof. Dean read an excellent paper, with chart illustrations, on composite milk-testing in the factory. Composite milk-testing, he said, would not be necessary unless they were paying for milk according to its quality or per cent. of fat, and he wished to show why milk should be paid for according to its quality in cheese making. One principle admitted by some but denied by others was that fat was the most valuable element in milk. The variation of fat in cows was assigned to several causes. One was individuality. It was not possible to increase a three and a half per cent. cow to five per cent. Another cause of variation was in the breed. Then the oftener a cow was milked the richer the milk became. But the speaker would not advocate an hourly milking on that account. It would not pay than twice a day. Then the longer the was the care bestowed on the cow.

Wednesday Afternoon.

A FARMER'S EXPERIENCE. The hall was again crowded in the aftergave his experience and the practical results of farming 120 acres of land, directly for the past four years, and indirectly giving the experience of a lifetime. Mr. Mac-Pherson, in passing, spoke of the difference between experimental and practical education, and of the need of the latter. The farm under discussion was of very light soil, and had been cropped for 50 or 60 years, and was in very poor condition when Mr. MacPherson took charge. The the buildings, making large, spacious stables and silos. The object of the plan was to produce milk, beef and pork. The buildings had a capacity for 140 head of cattle, 900 tons of ensilage, 50 pigs, 1,500 bushels of grain, and room for 25 tons of straw. The crop of the past year was 800 tons of corn, 80 tons of hay, 70 milch cows, 10 dry cattle and 30 pigs. They fed to visit his factory. To-morrow night a this winter 50 milch cows and 90 tattening

> Farmers, he said, should do more brain work and less hand labor. Fertility of land was increased to the greatest extent and in the best manner by buying animal foods. He would not take city manure two miles if he got it for nothing. A great question was the business phase of farming. The farmer generally had sufficient practical knowledge, and many had a scientific knowledge, but he had yet to find the man who could combine the both and figure out the profits. Until the farmers applied more business capitalization to their work they would not receive their just reward. The full value of the work done on the farm could not be realized without a proper medium, and that medium was the stable and the silo. After four years practical experience with the sile Mr. MacPherson said that he could not emphasize too much the importance of having a large silo properly constructed. The silo solved the question to a large ex-

MR. GEARY'S VALEDICTORY. "I have had two years of real pleasure," said Mr. Geary in relinquishing the chair to Mr. Pattullo. "Your board of directors has worked most harmoniously, and I think they have worked in the interests of the dairymen of this country. We started last winter some new work-work which I think is now bearing its fruits. We held local conventions through the country, and the result is shown in he splendid attendance here to-day. I cannot help congratulating you strongly on the way in which you have turned out to attend to the interests of your own association. For I have always held that the Association of Western Ontario is an association of the people. I have been in times past sorry to see the farmers were not consulting the r hope and trust those days are past.'

Referring to his successor, Mr. Pattullo, Mr. Geary said he was a man who had the confidence of every dairyman in the country-a man of energy, a man of ability and a man who had the interests of the dairymen of this country at heart. He had always found him so and he hoped they would find him to be the right man in the right place. (Applause.)

(Applause.) On motion of Messrs. G. W. Scott. Sparta, and J. A. James, Nilestown, a vote of thanks was unanimously tendered to Mr. Geary, who replied briefly and to the

point. WINTER DAIRYING IN ONTARIO. Prof. Robertson was warmly applauded when he rose to speak on the winter dairying movement in Ontario. The dairy business, he said, had actually helped to save the whole country from financial depression, helped people to pay their debts, and gave them comforts and even luxuries, when financial bankruptcy prevailed almost everywhere else. Besides it pro-protected their fields, and the most fertile land in the country was where dairying had been engaged in. Dairying, he argued, should be pushed in the future, mainly in the direction of butter-making, and that in the winter. There came from afar off a warning not to overdo the cheese business. Their competitors in Great Britain, if pressed to the wall, might devise some means of successfully meeting the Canadian cheese competition. They need not push that industry now it had got so much momentum that it would push itself, anyway. They should make themselves safe by having two products instead of only one to depend upon, which would give them a revenue every month of the year. The obunder average conditions to milk oftener | ject of winter dairying was not to displace summer dairying, nor even curtail cow had been milking the richer the milk it. It would give paying employment became. Still another cause of variation on the farm and bring a revenue every month of the year. One hundred and Prof. Dean then proceeded by giving the seventy million dollars was invested in result of a series of experimental tests, and | dairying in Ontario, and the most of it lay with the aid of a chart to show that idle all the winter, with money at 4 per monthly testing saved three-quarters of the cent. Milk and its products were worth labors of weekly testing, three-quarters of more in winter than in summer. Again, a the acid and wear and tear of the machine | cow was all the better for being milked ten and risk in breaking bottles, and so on. It months in the year. Cows, like men, were also saved three-quarters of the work now not benefited by too many holidays. Ontario did not need better cows so much as the cows needed better managers. The cows should be fed on succulent food, have warm, clean, light and well ventilated noon. Mr. D. M. MacPherson, Lancaster, stables, have good water and a liberal supply of salt. In conclusion he advised farmers to grow oil-producing plants such as sunflowers, castor bean, etc., to put faith in the silo, in the separator, to clean their finger-nails when making cheese and ever to remember that perfection in

anything was only gained by looking well after the trifles. In the cross-questioning that followed it was demonstrated that (1) 50 pounds of ensilage and 5 pounds of hay was sufficient first change he made was to reconstruct ration for one cow per day; (2) that any greasy substance or carbolic acid applied would stop the inroads of the horn fly; (3) that the horn fly had left Ohio and was going to leave Canada next summer; (4) that rennet extract, raw eggs or flour and water was good for diarrhea.

LO! THE POOR SENATOR. Hon. Senator Reid, of Belleville, was feeling very genial and summer-like despite his wintry locks. He asked to be excused if he felt timorous at meeting such an intelligent-looking audience; he had only been used to speaking against those old fogies, to mention our Kid Gloves, only voung man from Chicago. offered and given \$100 for the first cheese factory started under the joint stock system. He had never expected to see such interest taken in the industry, but it had hardly commenced yet. When the mated at 50 per cent. of the value of the Globe had said about 30 years ago that reciprocity would be repealed he had sent a neighbor and his son to the United States to inspect the cooperative system of cheese factories. When the advance agents came back and reported Mr. Reid offered the \$100 for the first joint stock cheese company.

Evening Session. "THE NEW VS. THE OLD."

The capacity of the hall was again sorely tried at night, and the stage was adorned

with about a score of the fair sex. Dr. S. S. Vanslyke, Geneva, N. Y., spoke on "The New vs. the Old"-the new vs. the old system of paying for milk at cheese factories. The system which had been in common use was to pay so much per each 100 pounds of milk brought to the factory, no matter who by. This system was that 100 pounds of one man's milk would make just the same amount of cheese as any other man's 100 pounds. But mild differed much in cheese-producing value, and therefore the old system was unfair. The question then arose as to whether fat in milk was a fairly accurate guide to the amount of cheese which it would make. It had been claimed that it was not, because richness of fat did not increase with richness of casein. By means of charts showing the relative amounts of fat and casein, it was established that casein, to all practical purposes, did increase correspondingly

with butter fat, and that the fat in milk was an accurate gauge of the amount of cheese that it would produce. It had been asserted that the richer the milk the more fat was lost in process of cheese-making. Mr. Vanslyke undertook to prove that the richer the milk was in fat the less was lost in whey. He held that milk should be bought according to the amount of butter fat contained. The old system was unfair for fraud. The new process would prevent fraud, because a man by skimming or watering would only be cheating himself. Under the new system each man would get just what his milk was worth, and his neighbor would not get an equal price for an inferior article. Some people wanted to get the price of good milk for an inferior quality, and it was these who objected so strenuously to the Babcock tester.

. MR. BALLANTYNE. Hon. Mr. Ballantyne was invited to speak on the subject under discussion, and amidst applause proceeded to advocate the use of the Babcock tester. All intelligent dairy men who were reading agricultural periodicals, he said, would realize how unfair, how unjust, was the present system of pooling receipts. Milk having I per cent. more of butter fat would make 1 per cent. more cheese. It was frankly admitted that cheese-makers were not at present making the Babcock test, but there was no reason own interests by attending these conver- why they should remain in ignorance, as tions, yet to-day the thing is different, and I | there was established at Guelph a short term dairy school, and all that could should take advantage of it to qualify themselves. It had been proved that cows varied in butter fat. What then, it might be asked, was the use of the Babcock tester? It proved that when there was 4 per cent. of

system and impart freshness and beauty. butter fat there was the same amount of Mr. John Gould, Ohio, gave an instrucive talk on the modern life of a dairy cow,

Liberal Tariff Platform.

We, the Liberal party of Canada, in convention assembled declare:

That the customs tariff of the Dominion should be based, not as it now is, upon the protective principle, but upon the require-

ments of the public service.

That the existing tariff, founded upon an unsound principle and used as it has been by the Government as a corrupting agency, wherewith to keep themselves in office, has developed monopolies, trusts and combina-

It has decreased the value of farm and other landed property;
It has oppressed the masses to the en-

richment of the few; It has checked immigration; It has caused great loss of population;

It has impeded commerce; It has discriminated against Great

In these, and in many other ways, it has occasioned great public and private injury, all of which evils must continue to grow in intensity so long as the present tariff system remains in force. That the highest interests of Canada de-

mand a removal of this obstacle to our country's progress, by the adoption of a sound fiscal policy, which, while not doing injustice to any class, will promote doturn of prosperity to our people

That to that end, the tariff should be reduced to the needs of honest, economical

That it should be so adjusted as to make free, or to bear as lightly as possible upon the necessaries of life and should be so arranged as to promote freer trade with the whole world, more particularly Great Britain and the United States

We believe that the results of the protective system have grievously disappointed thousands of persons who honestly supported it, and that the country in the light of experience is now prepared to declare for a sound fiscal policy.

The issue between the two political parties on this great question is now clearly lefined.

The Government themselves admit the failure of their fiscal policy, and now profess their willingness to make some changes, but they say that such changes must be based only on the principle of protection.

We denounce the principle of protection as radically unsound and unjust to the masses of the people, and we declare our conviction that any tariff changes based on that principle must fail to afford any substantial relief from the burdens under which the country labors.

This issue we unhesitatingly accept and upon it we await with the fullest con dence the verdict of the electors of Canada A Sure Cure.

A firm resolution is as good as any of the many remedies for the drink habit.

A Matter of Doubt. He was in a sad plight when they brought him into the house, shaking from an involuntary ice-water bath in the skating

"Johnny!" exclaimed his mother, aghast. Where have you been?"

The boy was silent. "Why don't you answer? "C-cause, mother, I can't exactly say."

"Why not?" "C-cause, I d-dunno whether I've b-been skatin' or s-swimmin'"

Local Market Quotations. Reported by A. M. Hamilton & Son.

LONDON, Thursday, Jan. 25. London, Thursday, Jan. 25.

Receipts of grain to-day were moderately good, and prices ruled about steady. Eggs were quiet; strictly fresh brought 17c to 18c by the basket. Held eggs were hard to sell and ranged from 10c to 15c per dozen. Butter steady; pound rolls at 20c to 23c by the quantity. Meats unchanged, except dressed hogs. They had an exceedingly wide-range, and sold all the way from \$4 50 to \$6 75, according to the size and quality. Hay was steady at \$7 50 to \$8 50, with the bulk of sales at \$8. Live Stock Markets. Live Stock Markets. EAST BUFFALO. N. Y. Jan. 24.—Cattle—
The receipts were fair, but about all consigned through. The market was dull and weaker for all kinds and sales all of 10c to 15c lower than Monday's opening prices. Good fat 850 lb steers sold at \$3 and prime fat cows at \$2.75 to \$3. Good stockers cleaned up late yesterday at \$2.25 to \$2.65, and the outlook is anything but desirable for all grades.

\$3. Good stockers cleaned up late yesterday at \$2.25 to \$2.65, and the outlook is anything but desirable for all grades.

Hogs—The receipts were 35 cars. The market ruled dull and slow, with prices about steady for good medium and mixed lots, and fully 15c to 20c lower for high grades. Good to choice Yorkers sold at \$5.65 to \$5.75, mostly \$5.70; good to choice mediums and heavy. \$5.60 to \$5.70, mostly \$5.65; pigs. \$5.65 to \$5.80; roughs. \$4.50 to \$5.5 a few good smooth lots at more.

Sheep and Lambs—The market is simply in a paralyzed condition, with 10 cars of held over stock and the fresh arrivals, 65 cars, we had about 15.000 lambs and sheep in the pens for sale this morning, and outside of a load or two of sheep taken by the butcher trade of Philadelphia and a few decks of lambs bought by the New York butcher buyers and the city slaughterers, there was practically nothing doing. The butchers bought up a load or two oi cull stuff sorted out of the load and took them at their own prices. The New York markets are demoralized. "Lambs can't be sold at all," one dispatch read. Another read "Market bad, weather bad; don't buy anything." A sample sale to-day was two decks of good 80 lb lambs at \$4.10; common and cull lambs at \$2.50 to \$3. The best lots of Canadas went at \$4.75 to \$4.85, but even for these choice stock there was hardly any demand.

Mrs. Casy argued the point. "She en-loyed the fresh air," she said, "when she went to fetch work;" but Casy was firm. He declared the only condition on which he would let her go would be that she wore his poots, and as this would necessitate his staying at home she yielded at last with a bad

Casy was in some things as yielding as a child, in others unreasonably obstinate. When he got the idea that to wear her boots vas bad for Mrs. Casy's corn, no argument on her part availed. He believed it was nerely her unselfishness which made her go or the work herself, and that therefore he and a right not to let her follow her own desires. Henceforth Mrs. Casy only enjoyed such fresh air as was admitted by her little window. However, as she did not spend time going to and from the warehouse, she got through more work, and was able to pare a halfpenny a week for Bessie as wages for looking after Thomas.

Still, in spite of the precautions, Mrs. Casy's corn did not seem to improve; that is b say, Casy's quick ear would sometimes eatch a half-stifled groan. He had never known his wife to suffer before, and his eympathy might possibly have seemed disproportionate to the cause were it not that love justifies such exaggeration, and even makes it beautiful. With few interests, and all those centered in one being, and debarred as he was even from the distraction of labor—for in doing everything for him perhaps his wife had encouraged his help-lessness—it was not unnatural that he should brood on this subject. At any rate, he did apparently wonder what could be done, for one evening he said sullenly-

"Heneritta, I've made up my mind to give up my pipe for a spell." 'Whatever should you do that for?" inquired Mrs. Casy with surprise, for he had never made any secret of the enjoyment he got out of his small weekly allowance of

"I've been a-thinkin'," said he meditat-ively, as it 'ld teach me self denial a bit. I don't think as we'd oughter be bound to our "There ain't no call," said she decidedly.

"It ain't as if you was selfish, or bound up in them things." "That's so," replied Casy, "but still it-it 1d interest me to see the money accoomolate

bit. If you 'ld give me the pennies I ly and inwardly, to cure the sore but all could drop 'em into a box and watch 'em to no purpose. I had often thought of try-"It seems to me, Thomas," Mrs. Casy remarked with undue severity (for she scented

a motive in this fad of her husband's), "that u are deloodin' yourself. It ain't selfdenial to shove a pleasure on one side and put another in its place. If you 'ld enjoy saving them pennies you might just as well enjoy smokin' the 'baccy."

This wisdom appeared unanswerable, and
Mrs. Casy thought she had gained the day.
But she was mistaken. When she gave

Casy his pipe in the evening and he began to smoke it she was not without a thrill of triumph that her common sense had conquered, but the triumph was short-lived. Casy took a few puffs, then he made a grimace and laid down the pipe.
"Henerietta," he said, "I'm off 'baccy for

"Ain't it good?"

"Oh, I don't find no fault with it, but I'm off it. I don't seem to relish it. I expec' it don't agree with me over well, and nature's a protestin'. She have that way of doing'it I've heard. She turns you agin what you'ld oughter rejec'. Maybe when my stomick's ready for it, I shall fancy it agin." So he got his way, and the pennies ac-

cumulated, though not very fast. When throat and ungs, coughs, colds, bronchitis' there were nine of them he took them out lesc. of the box and slipped them into his pocket, Mrs. Casy being too used to seeing him play with them to notice what he did,

That day he took back some shoes, and pbtained materials for fresh work. He had bidden Bess look out for the chemist's shop where he had once made inquiries, and he brought back something with him which evidently filled him with great delight. Directly he got in he slipped it into his

wife's hand. It was a bottle of corn-killer! "There's directions," he said, "one the bottle, so the man explained, but I made him go over 'em again. You applies the mixture at nights with the little brush, and after a bit you soaks your foot in hot water and it'll come off sure enough. This ain't no quack stuff off of a truck, but real genuine. It come out of a chemist's shop with regila-tion colored glasses, so Bess said, and a man to serve you that might have been a gent for the manner of him."

Mrs. Casy pulled the paper off the bottle with a hand that trembled slightly, and there was a queer, half-amused, half-pathetic look in her eyes and she thanked him, scolding him a little as one might scold a child that has bought a present for oneself with the penny given it for sweetmeats. "There ain't much, I should say, from the

size of it," said Casy: "but when that's gone we can manage another."

"Oh no, no," she answered quickly; "this'll be quite enough—more than enough,
Thomas. Do't never get another bottle." That evening, before going to bed, she pulled out the cork and prepared to use the mixture. But her method of procedure was strangely like that of the old woman who had a cough and being bidden to put a blister on her chest promptly applied it to her box and left it there all night. Mrs.

smeared a little on a piece of rag. It gave forth a peculiar pungent, unpleasant smell, which the old man sniffed as if it had been the odor of flowers. 'You're applyin' the mixtur', Henerietta?" "Oh yes," the old woman answered, hold-ing her nose, "I'm applyin' of it, Thomas."

Casy dipped the brush in the mixture and

'Do it sting?" "Not particular." "Ah, I expec' it'll do that later on. I but it ain't altogether disagracable either, considerin'. Do you—do you chink it'il go off soon, Henerietta?"

"I should hope so, Thomas," Mrs. Casy replied, an she softly dropped the rag into

This operation was repeated nightly, and greatly to Casy's satisfaction, at the end of the week Mrs. Casy pronounced the corn much dimished in size. It must have been entirely a case of faith-healing if so, for not one vestige of the corn-killer had touched Mrs. Casy's foot.

But if the corn vere smaller it had apparently not ceased to pain her. As time went on the look of suffering seemed to have imprinted itself on her face, and often she would lay down her work and wring her hands together in silence. The luxury of groaning was denied her. She still let her husband go with the little girl to fetch the work, and manifested no desire to accompany him. When he was away she would attend to her small household matters, and then it would appear she indulged herself, for she would often cry bitterly and aloud while she went about her duties. Her eyes grew still more sunken, her face had even less fullness than before, and her skin be- 864.

came, if possible, tougher and more leathery. The blind man, meanwhile, was spared the pang of seeing the change in her, and was as peaceful, as happy, and as contented as

But one day, having been out in the rain, he caught a cold which settled on his chest, and though she wanted some more work she would not let him go for it, but put on her shawl and took the old umbrella, which they fondly imagined was a protection from the rain, and went forth herself, taking the little shoes under her arm. And the old man sat at home by the fireside and awaited

her return. All the morning he waited, but she did not come; the fire went out, and the room grew chilly, and hunger beset him. And for the first time she was not there to min-

ister to his wants. And the afternoon passed away and the dusk came, and though day and night were the same to him yet he knew that it grew late. And still she did not come.

No one came near him. For little Bess. Thomas, for his who would have done so, did not know that national union. Mrs. Casy had not come back, and Bess. though she was only eight years old, had to "mother" three young brothers, and did not "mother" three young brothers, and did not sor, has done away with its choir and aphave much spare time. She was washing pointed a paid quartet. A number of memshirts that afternoon, and singing a music-hall song that she had heard in the streets, and the melody of which seemed to her entrancingly lovely.

A Wonderful Cure.—Mr. David Smith, Coe Hill, Ont., writes: "For the benefit of others I wish to say a few words about Northrop & Lyman's Vege-TABLE DISCOVERY. About a year ago I took a very severe cough, had a virulent sore on my lips, was bad with dyspepsia, constipation and general debility. I tried almost every conceivable remedy, outwarding Northrop & Lyman's VEGETABLE DIScovery, so I got a bottle and when I had used about one half the sore showed evident signs of healing. By the time that bottle was done it had about disappeared and my general health was improving fast. I was always of a very bilicus habit and had used quinine and lemon juice with very little affect. But since using three bottles of the VEGETABLE DISCOVERY the

biliousness is entirely gone and my general health is excellent. I am 60 years old. Parties using it should continue it for some time after they think they are cured. It is by far the best health restorer I know." 3 A New York court has decided that street car passengers can be compelled to

The Canadian "Great Heart."

Just now, when large-hearted women, irrespective of creed or country, are taking such an important part in the work of moral and social reform, the autobiography of Mrs. L. C. Youmans-"the Canadian Great Heart"—will be read with more than ordinary interest. "Campaign Echoes," as repairer, 308 Dundas street. ywt the book is called, was written at the request of the Provincial W. C. T. U. It is nicely printed and well bound, and Mr. Irvine, of Central avenue, is pushing its sale in this city. Coal Oil.

A correspondent in Paris Station takes exception to the statement made by Mr. Isaac Waterman at Ottawa that coal oil was supplied to the retailer at 61 cents per imperial gallon. He says that the lowest quotation in car lots in London is 91 and 10 cents, and that it cost him 12 cents delivered at his store. He retails it at 15 cents, by no means an unreasonable profit, considering necessary losses by leakage and other causes. Coal oil, like other highly protected articles, seems to have a margin of profit so large that prices can be varied up and down to suit localities or to furnish

protection arguments. Young Liberals' Concert. The Young Liberal Club rooms were crowded to their utmost capacity last night with a merry throng. All came to enjoy a concert, and they were more than pleased at the amusement of various kinds supplied. The president, Mr. Burke, was in the chair and conducted the proceedings in his usual happy style. The programme was varied, and consisted of songs by Messrs, Simon, A. Furness, F. Saunders, J. Kern and T. Ranahan, recitation by W. McLeod, and a number of quartets and choruses. Mr. E. Burness presided at the piano to the satisfaction of all.

Small Fires. covered in a box car on the C. P. R., just east of the freight sheds. The car was loaded with potatoes, a box stove being placed in one end. The heat from the stove doubtless caused the blaze, which was extinguished before the brigade arrived. The damage was light.

The firemen had just returned from the previous run, and had everything cleaned, when they were again called out. At 10:10 P. C. Woolway noticed a light in Joseph Rankin's cigar store, Richmond street, near King. The door was broken open and the fire discovered behind a tobacco cutter near the wall. The brigade turned out, but a stream of water was unnecessary. The damage was about \$15. Tiffin-Ellis.

daughters, Miss Ethel, youngest daughter of Mr. H. F. Ellis, to Mr. S. G. Tiffin, of Buffalo, was a magnet sufficient to draw to Trinity Church, St. Thomas, yesterday afternoon many interested spectators in addition to the invited guests from Windsor. London, Montreal, Hamilton, Stratford, Ingersoll, Toronto and Chicago. The ceremony was performed by Rev. Canon Hill, the bride being given away by her father. The wedding march was beautifully rendered as the bridal party entered the edifice, the fair bride leaning on her father's arm, and being

escorted by her maids, Misses Edith and Kate Ellis, Miss Robinson, of Strafford, cousin of the groom, and Miss Ida Ellis, niece of the bride. The groom was supported by Mr. Champ, of Chicago, and the ushers were Messrs. Walker (Ingersoll), Crotty (Taronto). Crotty (Toronto), A. St. George Ellis (Windsor), and Fred Tiffin (Stratford). The bride and her attendants were most charmingly attired in white. The groom is the son of Assistant Superintendent Tiffin, of the G. T. R., London, and is himself engaged in the railway business in Buffalo, where the bridal couple will take up their residence on their return from their wedding trip. I. O. O. F.

Mr. Joseph Oliver, grand master of the Independent Order of Oddfellows, accompanied by Grand Secretary J. B. King, instituted Star Lodge, No. 304, at Crampton on Tuesday evening, 23rd inst. The lodge starts out with the brightest prospects. The staff of Hope Lodge, No. 69, Harrietsville, assisted the grand master, and conducted the work in a highly satisfactory manner. Besides the members of Hope Lodge, there were present visitors from Dorchester, Thamesford and other neighboring lodges. There were five charter members and seventeen initiated, all of whom received the three degrees. Sixteen applications for membership were received, many of these will be initiated at the meeting of the lodge next Tuesday evening, thus making the membership at starting 38, an excellent start. After the installation of officers, refreshments were served in the lodge room, and a most enjoyable hour was spent in speech and song, the grand master concluding his work with an excellent address of good sound wholesome advice. The brothers of Star Lodge are young, active, zealous members, and will, no doubt, make a creditable record.

Rev. J. H. Robinson, In the Christian Guardian of this week is the following, which will be interesting to all citizens of London who in former years were acquainted with that sturdy, honest and able man, the Rev. J. H. Robin-

"This venerable minister, long and affectionately known by those who formerly belonged to the New Connexion section of the great Methodist Church of Canada, and who for many years filled the offices of general superintendent and connexional editor, and was widely known throughout what was formerly called Canada West as a preacher of uncommon elequence and power, has been superannuated for years. Many of his old friends since his retirement have anxiously inquired of his where-

"He resides with his son-in-law, Prof. Saunders, at Ottawa. He lately reached his 86 year, and since a severe illness two years ago he has been very feeble in health. He is not able to stand alone, and for the last six years has not been able to read, being blind from cataract on both his eyes. His mind is remarkably vigorous, and by hearing friends read to him he keeps himself informed on current events of the day. His heart is not withered with age, but young and fresh as ever. He is deeply interested in the great movements of the age, but, like the prophet of old, he "prefers Jerusalem above his chief joy."

Is almost uniform in the direction of their extending over several years. Frequently the disease is epidemic, becoming definite almost every year in this country. It first made definite inroads in this country three years ago, and this year it seems to have returned in a more virulent form, producing effects far-reaching and uniformly demoralizing to the system, and it becomes absolutely necessary that the system should be kept in a state of perfect health in order to withstand and combat this terrible disease. WILLIAMS' Royal Crown Remedy taken regularly four times a day, with one or two of the Royal day, with one or two of the Royal Crown Pills three times a week, seems to build up the system and combat the disease better, and with less expense to
