MORE TESTIMONY OF CHINAMEN

IN THE BLACKMAIL CHARGES AGAINST THE POLICE OFFICIALS.

Jail Accounts Also Touched On—Hearsay Evidence Against the Chief of Police—No Startling Developments.

The parties who are making the accusations against the police department have not as yet succeeded in convicting Chief Ingram of any wrongdoing, though there was a good deal of Chinese evidence against Mitchell and some hearsay evidence against the chief.

The crowd, again somewhat disorderly, was toned down by a warning from the mayor that should any disturbance arise in the court room would be cleared and the court held in private.

At the opening of the court City Clerk McQueen produced the jail accounts for April, May and June, and stubs of questions for jail supplies during that period.

The witness room was full of Chinamen. The opening of the court City Clerk McQueen produced the jail accounts for April, May and June, and stubs of questions for jail supplies during that period.

On cross examination "Scotty" admitted that the passbook was correct. He had no authority to look at the jail books. The witness suggested that it was "pure guesswork" that made him examine the books, he asserted.

On cross examination "Scotty" admitted that the passbook was correct. He had no authority to look at the jail books. The witness suggested that it was "pure guesswork" that made him examine the books, he asserted.

THEIR FIRST SHOOT.

Local Riflemen Make Good Scores at the Barney Ranch Range.

There was a good turnout of the Rossland rifle company at the first practice match on the new range Saturday.

Messrs. Harkins and Palmer, of the B. A. C., accompanied the riflemen to Barney's ranch, and acted as markers and scorers.

Only the 200-yard range was available, but for tomorrow's shooting the 400, 500 and 600-yard ranges will be in order.

Following are the scores made by the marksmen for 10 shots at 200 yards:

Total Name and Rank Score. Capt. Forin...234330442-25. Lieut. McEwan...234330443-31.

There are many old rifle shots in the camp and they are entering into the idea of a Rifle Association with enthusiasm.

A disgraceful scene was witnessed at the foot of Spokane street the other evening, which was witnessed by many.

SOPHIE MOUNTAIN ROAD.

Cannot Be Completed This Season—To Be Used as a Sleigh Road.

J. A. Kirk, who is engaged in surveying the line for the wagon road to Sophie mountain, has his report nearly ready for submission to the government.

Of fine weather will enable his staff to complete the survey. It has been decided that the completion of the road before the snow flies is impracticable, and it is unlikely that it will be constructed before next season.

TO IMPROVE THEIR SHOOTING.

Rossland Riflemen Will Shoot Over Their Range Today.

The members of the Rossland Rifle company will commence their rifle shooting at the new range this afternoon.

The range is now in excellent shape. Captain Forin having had a gang of men at work putting it in order. The captain would like as many men as possible to turn out.

NOTICE.

In the County Court of Kootenay holden at Rossland in probate and in the matter of the goods of J. E. Boyden, deceased, intestate.

Take notice that pursuant to an order of His Honor Judge Forin, dated the 26th day of July, A. D., 1899, letters of administration were on the 18th day of August, A. D., 1899, granted unto John Widmer of all and singular the personal estate and effects of J. E. Boyden, deceased, intestate, who died at the town of Trail, in the province of British Columbia, on the 30th day of January, D., 1899, the administrator having been empowered to recover whatever debts belong to the estate of the said deceased and pay the claims of creditors of the said deceased in the province of British Columbia.

And further take notice that any persons indebted to the said estate of J. E. Boyden, deceased, are required to pay the amount of such indebtedness forthwith, and any persons in this province having claims against the said estate are required to forward the same duly verified to the above named John Widmer, administrator, care of Daly & Hamilton, Rossland, B. C.

Dated at the city of Rossland, this 17th day of August, A. D., 1899. DALY & HAMILTON, Solicitors for John Widmer, Administrator. 2 dl-w

TORONTO OFFICE: CENTRAL PRESS AGENCY, L.D., 83 Yonge St.

SPOKANE OFFICE: ALEXANDER & Co. Advertising Agents, Room F First National Bank Building.

EASTERN AGENT: EMANUEL KATZ, 239 Temple Court, New York.

THE SUBSCRIPTION PRICE OF THE WEEKLY ROSSLAND MINER for all points in the United States and Canada is Two Dollars a year or One Dollar and Twenty-five Cents for six months.

WONDERFUL COAL MEASURES. Col. Prior, M. P., has been looking at the Crow's Nest Coal Fields and comes to this conclusion: "To my mind it would be impossible to place too great a value on these coal fields."

Colonel Prior is eminently right in his deductions as to the value of these coal fields. Already the effect of the use of the coke made from the coal from these fields has been felt in the lowering of the smelter rate.

From the way in which new strikes are being made, here and there in the division, it would seem that it will not be a great while before even the present output will be doubled.

LABOR DAY AND THE RAIN. The first Day of the Labor Day festivities went off very well yesterday when the condition of the weather is considered.

MR. MACPHERSON'S INTERVIEW. It seems that Mr. Robert Macpherson, M. P. for Vancouver, takes exception to the report of the interview with him regarding his attitude towards the Provincial government published in the Victoria Colonist.

YESTERDAY'S ADDRESSES. The addresses delivered yesterday at the Miners' Union Hall by the leaders of the Labor party were characterized by a moderation in dealing with the principles which should underlie all agitation for the improvement of the condition of the toilers which could not fail to commend them to reasonable men.

THE WATERWORKS SYSTEM. There is a feeling prevalent in the city that the municipal council is not displaying judgment in its waterworks policy, and that if it proceeds on the lines apparently mapped out, it will expend the full amount of the money, recently voted for the purpose to put in a thoroughly efficient system for fire as well as domestic purposes, without having greatly improved the system which we now have.

THE RED FOX BONDED. Mr. W. R. Townsend, on behalf of a British syndicate, has bonded for Mr. S. A. Hartman and associates, the Red Fox property, which is near the Mascot.

AN ERRONEOUS REPORT DENIED. Rossland merchants who are handling Lake of the Woods, Keewatin flour, desire The Miner to state that no corner exists upon that commodity.

MR. JAMES BREEN, manager of the Newport smelter, is in the city. His visit is taken to have some connection with the reduction in the smelting rates.

MR. W. F. OLIN, travelling freight and passenger agent of the Maple Leaf route, is at the Windsor.

MR. J. D. SWORD returned yesterday from the Boundary.

MR. JOHN LESLIE OF TORONTO, is registered at the Windsor.

MR. J. D. SWORD returned yesterday from the Boundary.

MR. J. D. SWORD returned yesterday from the Boundary.

present Stoney creek system. According to Mr. Fellows estimate, the pipe and fitting required for the new lines will cost approximately \$30,000, but no estimate of the cost of laying and connecting has as yet been made, some better understanding of the nature of the ground to be worked being necessary before the cost of the entire system can be arrived at even approximately.

JUST WATCH THEM GROW. Again the shipments of ore have made a new record, as the 5,000-ton mark has been passed.

CONSULTING ENGINEER: RONALD HARRIS, C. E. & M. E.

REGISTERED OFFICE: Winnipeg Mine, Wellington Camp, Greenwood P. O., B. C. TREASURY: The proceeds of the sale of the Treasury Shares will be used for the development of the property of the Company and will be sold only from time to time as funds may be required for development purposes. POOLED STOCK: The owners of all stock other than the 300,000 Treasury Stock have pooled their stock for a period of one and one-half years. SHAREHOLDERS PROTECTED: There is no preferred stock in this Company. Purchasers of Treasury Stock enjoy all the rights and privileges of the original stockholders. This Company was formed for the purpose of acquiring, and has acquired 'The Homestake Mineral Claim,' being one of the best known properties in Summit Camp, Yale District, British Columbia. The title to this property is perfect, and

assays of ore: By J. Edwards Leekie, C. V. and M. E., Greenwood, B. C., June 28, 1899. An average sample of ore taken from a small open cut gave: Gold, 75c; Silver, 0.8 ounces; value of silver, 85c per ounce, 5c; Copper, 2.78 per cent; value in copper at 17c, \$0.45. Total, \$10.20. Two general samples of the ore taken from the thirty-foot shaft gave, respectively: Gold, \$1.10; Silver, 1.4 ounces; value 80c; Copper, 3.87 per cent; value, \$13.15. Total, \$14.95. Another sample of the same ore gave: Gold, \$1.10; Silver, 1.6 ounces; value, 97c; Copper, 5.32 per cent; Total, \$30.06.

NOTES ON HOMESTAKE: By J. Edwards Leekie, B. S. and C. and M. E. There is a very well defined vein of chalcopryite with a garnetiferous gangue, on this property. The vein lies in a quartz-porphry and is eight feet in width. The dip is vertical and the strike approximately northeast and southwest. A shaft has been sunk on the vein to a depth of thirty feet and some fine ore lies on the dump. A SAMPLE TAKEN IN THE SHAFT ACROSS FIVE FEET GAVE THE FOLLOWING RESULTS: Gold \$2.10, Silver \$1.30, Copper \$17.40. The shipping facilities are excellent as the spur of the C. P. R. now under construction, runs through the claim. The property is well timbered and there is sufficient water for all steam and domestic purposes. Some of the best copper properties in the district are being opened up in this camp. The Emma, adjoining, has a large body of ore and the Oro Denero, adjoining the Emma, has an excellent showing of chalcopryite.

SUMMIT CAMP: Is now recognized as standing foremost (in the Boundary Creek country) in big copper properties. The 'B. C.' mine only two miles distant was sold recently for \$300,000, while the Oro Denero, having large bodies of copper-gold ore, adjoins the Homestake. The Emma, also the R. Bell, are well known and high grade properties which have showings sufficient to demonstrate their great value. The first block of Treasury Stock (made out in certificates of 1,000 shares each) is now placed upon the market at 10 cents to the public. Those who wish to get in upon the ground floor should place their orders promptly as only a limited number of shares will be sold at 10 cents. Prospects on application. Use Clough's, or Bedford McNeill's code. Telegraphic and Cable Address: 'Plewman,' Rossland.

Orders for Stock Should be Addressed to the Company's Broker

RICHARD PLEWMAN, Rossland, B.C.

WEATHER COULDN'T SPOIL SPORT

Labor Day Celebration Highly Successful Despite Rain and Wind--Events Tuesday.

Everybody in Rossland who was in a position to do so, took two days off for the Labor Day celebration, and the only untoward feeling of the whole affair was that the clerk of the weather also closed his office, leaving no one to regulate the elements, which, being left to themselves, proved rather intractable, and considerably marred the enjoyment of visitors and citizens. Yesterday morning broke with cloudy skies, which soon fulfilled their promise of rain, and when the program was taken up at 10 o'clock, a heavy rain was falling. In spite of this, however, the rock drilling contest, which took place at the corner of First Avenue and Washington Street, was witnessed by one of the largest crowds that ever assembled in Rossland. As usual, the greatest excitement was aroused by the lightning-like work of the contestants, even the continuous rain not serving to dampen the enthusiasm of the crowd. There were two teams in the drilling contest for the championship of British Columbia, which was open to the world, and for which a prize of \$250 was given. Mike Burns, the former champion, was apparently in good form, as was his partner, J. A. Morrison. The other team was Mike McNicholls, who won the last single drilling contest, and William Tallon, who twisted the steel for him on that occasion. All four men are fine specimens of muscular humanity, and the appearance of each team was the signal for a grand outburst of applause from their backers and the spectators in general. Burns and Morrison were first on the rock, and from the time they got the word to start until the timekeeper, Sam Hall, called the end of the 5 minutes, the crowd was in rapt attention, especially during the last five minutes, when cheers and shouts of encouragement were continuous. The work of the two men was very fast, and though they drilled was of the hardest variety, they grunted 34 3/4 inches. The judges, Messrs. Fitzwilliam and McPherson, announced the depth of the hole, there was a round of applause from the Burns and Morrison supporters, which was succeeded by an even greater outburst when McNicholls and Tallon stepped on the platform. The depth of this juncture was at its worst, but it was decided to go on with the contest, and the team got down to work. The changing of the drills and hammers was the prettiest piece of work seen in Rossland for some time, and evoked wild applause, which was intensified when it became evident that the drillers were likely to beat the record of the previous team, and their supporters were ready to wager

presented a fine appearance, the members of the union being all attired alike, in white duck overalls and jumpers, with white caps, their new banner, a beautiful silk affair, hand painted by Paul Beyrgrau, and decked with gold, was in the front rank, and was the pride of the parade. The painters, who were the only one in the procession, was appropriate and catchy, representing, on a handsomely decorated wagon, an immense pot of paint, with boys in brownie costumes in and around it, flourishing paint brushes. The Barbers' union presented a natty appearance, the members being attired alike, with preposterous straw hats and barber pole decorations. The Carpenters and Joiners and the Typographical union also turned out, while a large number of the miners, in informal procession, followed the band.

GENTLEMEN'S SADDLE RACE. It Was Won in Three Straight Heats by Coulthard's Major. What was one of the most interesting events of the day was the gentlemen's saddle race. The distance was a quarter of a mile, best three in five, for a purse of \$50. This race was to be run fully on its merits, as the most intense rivalry existed among the participants. The entries were Dr. Coulthard's Major, Lorne Becher's Victor, H. F. Mytton's Baronet, C. A. Wilson and W. Best. The first heat was a lively one. Major who is a splendid gray, took the lead and was well handled by Dr. Coulthard, and followed by Belle, Tom third and followed by Belle, Tom third and followed by Belle, Tom third. The first heat was a lively one. Major who is a splendid gray, took the lead and was well handled by Dr. Coulthard, and followed by Belle, Tom third and followed by Belle, Tom third. The first heat was a lively one. Major who is a splendid gray, took the lead and was well handled by Dr. Coulthard, and followed by Belle, Tom third and followed by Belle, Tom third.

Quarter of a Mile Race. For the quarter of a mile foot race there were three entries. Thomas Morris, C. A. Wilson and W. Best. The runners spread out, Morris taking the south side of the street, Belle the north side and Wilson the middle. The finish between Best and Morris was close, but the former crossed the line first and was declared the winner. The 220-yard Race. The entries for the 220-yard race were W. Smith, C. McBride, Thomas Morris, C. A. Wilson, S. Frew and Mr. Best. There was a good start, but Smith, McBride and Morris soon shot to the front and raced along for a time side by side. The race was a long, and heavy one through the mud of the street and required not only speed but also endurance. Smith is a stalwart athlete and has the speed and bottom necessary in such a race, and he finally forged to the front and was the winner by several feet with McBride second and Morris third. Smith was given \$25, the first money, and McBride second money, \$10. Frew did not finish and Wilson was tripped by a dog which ran out at the corner of Lincoln Street and Columbia Avenue.

The Firemen's Race. The 100-yard firemen's race was prettily contested. The entries were F. R. Wilson, William Boyd and F. E. French. Wilson came in first, Boyd second and French third. The Boy Drillers. After the championship rock drilling contest the boys' match was decided, and a large part of the crowd waited to see the youngsters on the rock. The first prize of \$25 was won by Furlong and Stephens, who drilled 11 3/4 inches in eight minutes. The second team, which carried off the \$15 prize, was Martin and Smith. Fortescue and Reagh, the other entries, were younger than the prize winners, but made a good showing, drilling 10 1/2 inches.

THE REFERENDUM Free Gold Mining and Milling Co., Ltd.

Capital Stock \$500,000, in 2,000,000 Shares of 25c Each Treasury 800,000 Shares

W. M. CUNLIFFE, Of Rossland Engineering Works, Rossland, B. C. President. E. N. OUMETTE, Late President Washington National Bank, Tacoma, Wash., Rossland, B.C. Secretary-Treasurer. R. M. KINNEAR, President Crescent Dry Goods Co., Rossland, B. C. Vice-President. A. ZETLER, Mine Operator, Rossland, B. C. N. DUFFNER, Mine Operator, Rossland, B. C. The second issue of 100,000 shares in the Referendum Free Gold Mining & Milling Company, Limited, Non-Personal Liability, is now offered for subscription at 10 cents per share, payable in five monthly instalments of 2 cents per share. By provision of the Act under which the Company incorporated these shares are sold free from liability or further assessment. This Company was incorporated on July 3rd, 1899, to take over and operate the 'Referendum,' 'Katie,' and 'Golden Cross' mineral claims, situated on Forty-Nine Creek, about eight miles from Nelson, B. C., and in the well-known free gold belt in which are the Athabasca and Poorman mines, which have yielded excellent profits to their owners. Previous to the acquisition of these claims by the Company two shafts had been sunk thirty-five feet on a lead of quartz on the 'Referendum' and numerous cuttings made, which proved the continuity of the ore body for 1,000 feet. Assays of ore from these workings were as follows: \$30, \$37, \$246, \$390, \$412, with the average value as estimated by Dr. P. Langhammer, M. E., of \$42, and width of 20 inches. Since June 5th nine men have been continuously working on the property. The 'Referendum' shaft has been continued to seventy-five feet, the ore continuing the same in width and character. A shaft of thirty feet has been sunk on a lead of quartz six feet in width discovered on the 'Katie' claim just before the Company took charge. This ledge maintains its width with depth and in places free gold was found in the ore. The Company has purchased a five-stamp mill boiler and engine, with cyanide and chlorination plant. This plant is to be on the ground within thirty days and in operation within ninety days. The development of the property has reached the stage that mine and mill can be worked throughout the winter. The plan of operation includes the addition of five more stamps in the spring and running a tunnel to the boundary of the 'Referendum' claim, which is expected to cross-cut five more leads which show on the surface. All that was outlined in our circular of May 15th has been carried out, and, with the work done since, the condition of the Company has been much improved. Within ninety days the Company will be in a self-sustaining position with its own treatment plant in operation. The first issue of treasury stock has all been subscribed, and the second issue of the same amount is now made at the advanced price of 10 cents--warranted by the result of the work done and the acquisition of the plant. Applications for stock and remittance for first payment of 2 cents per share may be made through any chartered bank or direct to the undersigned. E. N. OUMETTE & CO., Brokers for the Company, Rossland, B. C.

The Music Was Good. During the celebration there was plenty of music to make the waits seem shorter, and the bands deserve the greatest commendation. The City Council Band, under the leadership of Mr. Falding, is developing into a high-class organization, many of the selections played during the two days being rendered in concert style, while the versatility of the program was remarkable. The Rossland Independent Band, which also contributed in no small way to the enjoyment of the sport is an organization that deserves well of the citizens. A varied selection of popular airs was given by this band, which succeeded in winning the applause of the crowds. Captain John McCafferty, mining operator, leaves today for the Similkameen country, whither he goes to look after his mining interests.

THE COPPER CENTRE

Importance of Butte to the World as An Industrial Centre.

PARTICULARS OF ITS GROWTH

Its Story Embraced in a Space of Less Than a Quarter of a Century—Some of the Striking Incidents Which Occurred in the Early Days.

Butte, Mont., Aug. 28.—Butte has become the metropolis of Montana and a city of supreme importance, Johannesburg is the only other city on the globe of equal interest to the commercial and financial worlds.

Butte has enriched the nation, too, with boards of gold and silver dug out of its hills, but it is vast copper deposits that give it its unique position.

The story of its origin, its rise, its growth and its national, but of world-wide interest, and the men who aided, guided or directed that development and shaped the destinies of Butte are not only of local but of international importance.

And this story is embraced in a space of less than a quarter of a century. The site of the present city 25 years ago was a lazar of wooden shacks and cabins, where perhaps about one thousand frontier folks had congregated.

Many of them have gone elsewhere. Charley Larabee took five million dollars which he made out of the Boston & Montana company mines to the shores of Puget Sound and there he engaged in the rebuilding of Fairhaven, one of the future cities of the Pacific slope.

Mr. James Wilks, as organizer of the Western Federation of Miners, emphasized the mayor's welcome, and especially referred to the presence of the two members of the legislature, Messrs. Smith and Deane, who had voted and worked for the eight-hour law.

Mr. F. J. Deane, M. P., P. P., from Kamloops, disclaimed any title to the honor of being an orator, but proved by his address quite the contrary.

Mr. Ralph Smith, the next speaker, dealt with the objections that the public have to the principles of trades unions. He stated that what was considered wrong in principle by the public (outside miners) was considered right when done by capitalists.

THE CELEBRATION OF LABOR DAY

The Rain Interfered With Some of the Features, But Still an Enjoyable Time was Had—Interesting Speeches by Messrs. Smith, Sovereign, Deane, Wilks and Goodeve—A Summary of the Day's Sport.

Labor day was damp and showery in the forenoon, but in the afternoon the sun came out occasionally and the rain ceased and made the last half of the day more pleasant than the first half.

The general eight-hour day has been brought about very much by union action. He gave examples of certain countries and states having adopted the principles of a shorter working day. This was one of the great objects ahead to bring about a generally shorter day, and he confessed that a very large amount of agitation and education were necessary for many years to come before this could be accomplished.

The sports commenced with the hub and hub race. The participants were the Nelson and Rossland teams. The distance was 200 yards and the first prize was \$150 and the second prize \$75.

The next event was the foot race for union men. The entries were G. Wilson, Gus Raabe and A. D. Frew. The start was an even one and Wilson and Raabe were off like a shot shortly after William Harp, the starter, fired the pistol.

There were two entries for the open bicycle race. Bert McIntyre and T. H. Cassidy. The distance was a quarter of a mile and the first prize was \$20 and the second \$10.

The coupling contest proved quite interesting. The contestants had to run 50 feet unscupled a horse and attach a nozzle. The first prize was \$15 and the second \$10. There were three teams: D. McDonald and T. Raymer, F. Wilson and J. Martin, and C. Collins and E. Boyd.

The Trades and Labor Council tendered a banquet to Messrs. Sovereign, Smith and Deane at Miners' Union hall in the evening, and the event was the occasion for the gathering of nearly 150 members of the various unions of the camp.

The rain of yesterday morning prevented the display of decorations that was expected, and the committee have decided to withdraw the prizes offered for the best decorated buildings.

ways opposing forces. Labor was always peaceable when not oppressed. He was not acquainted much with the conditions in British Columbia, but he was in the United States, and there every factory was organized into a trust from the toothpick shop to the Bunker Hill mine.

The 220-yard race. A. D. Frew, Thomas Morris, W. W. Smith and C. M. McBride were the four starters in the union men's race. The distance was 220 yards and the first prize was \$20 and the second \$10.

There was the most intense interest manifested in the horse races and each heat was cheered from start to finish. The free for all was particularly interesting. It was over a distance of three-eighths of a mile. The first money was \$200 and the second \$75.

THE SPORTS OF THE DAY. The Rossland Team Won the Hub and Hub Race. The sports commenced with the hub and hub race. The participants were the Nelson and Rossland teams.

The rain of yesterday morning prevented the display of decorations that was expected, and the committee have decided to withdraw the prizes offered for the best decorated buildings.

There were two entries for the open bicycle race. Bert McIntyre and T. H. Cassidy. The distance was a quarter of a mile and the first prize was \$20 and the second \$10.

The coupling contest proved quite interesting. The contestants had to run 50 feet unscupled a horse and attach a nozzle. The first prize was \$15 and the second \$10.

The Trades and Labor Council tendered a banquet to Messrs. Sovereign, Smith and Deane at Miners' Union hall in the evening, and the event was the occasion for the gathering of nearly 150 members of the various unions of the camp.

cellar to garret to fill the ambulance chests and it is said that for a year after the expedition marched through the valley not a turkey, goose or chicken could be seen. Warren's troopers had forcibly taken possession of everything living and dead that was edible or drinkable.

But the boys of the Butte battalion had a glorious time. Every evening beside their camp fires they enjoyed a barbecue and toasted, in cups of Girard's "best," the major and his incomparable chief of staff.

John Noyes was there, captain of another company, and James A. Talbot, captain of another company, and William McDermott another lieutenant to Captain Talbot.

Chief Joseph actually came 10 days later. But before the rear guard could reach the pass an order was received from Governor Potts for the battalion to return to Butte and disband.

It is 23 years ago that that order was issued, but from the rage and indignation which, in him at least, it gave rise to, had the order never been issued, Warren would have gone to the deathless fame which General John Gibbons achieved when two weeks later he encountered and annihilated Chief Joseph and his warriors at the Seminary battle of the Big Hole.

Those frontier folks who formed the pioneers of Butte were men of fine character and purpose, as those of advancing civilization who are precursors of the modern world. They were men who braved the dangers and privations of the wilderness and transformed it. There was no cant or humbug among such folks and even the parasites that chanced among them had outwardly to play the man.

Some are chasing fortune anew amid the icy terrors of the Klondike, but others are still here—merchant princes, bankers or mining nabobs—who love to sit under cosy winter firesides and tell of the golden days of their youth.

I am not sure that Senator Clark ranks among the very few wealthy men on earth, for besides his enormous wealth in Butte he owns the United Verde of Arizona, apparently the most fabulously rich mine the world has ever known.

Mr. F. J. Deane, M. P., P. P., from Kamloops, disclaimed any title to the honor of being an orator, but proved by his address quite the contrary.

Mr. Ralph Smith, the next speaker, dealt with the objections that the public have to the principles of trades unions. He stated that what was considered wrong in principle by the public (outside miners) was considered right when done by capitalists.

THE MINING REVIEW

An Important Find Has Been Made in the Mascot.

THE ORE IS OF A HIGH GRADE

It Carries Considerable Silver and Large Values in Gold—All Previous Records in the Way of Ore Shipments Have Been Broken—The 100,000 Ton Mark Passed.

The most important happening of the week among the mines of the camp is the finding of a rich ore shoot in the Mascot.

One of the most gratifying features of the week, from a mining standpoint, has been the increase in the ore production, which has not only turned the 100,000-ton mark for 1899, but has also broken the record for weekly shipments.

Decorations. Yesterday morning prevent decorations that was expected. The prizes offered for the buildings. The fire boys display of evergreen and of the hall, and had been withdrawn, would have been of the money. They were decorated with colored lights and fire apparatus. The fire apparatus was tastefully decorated with flags and lights.

Decorations. Yesterday morning prevent decorations that was expected. The prizes offered for the buildings. The fire boys display of evergreen and of the hall, and had been withdrawn, would have been of the money. They were decorated with colored lights and fire apparatus. The fire apparatus was tastefully decorated with flags and lights.

Table with 3 columns: Week, Tons, Year, Tons. Rows include Le Roi, Iron Mask, Evening Star, Deer Park, Centre Star, and Columbia-Kootenay.

Mascot. In the Mascot there has been made an important find. A vein of ore, which is about six feet in width, has been located, which carries two feet of clear ore and the rest of mixed ore.

White Bear. The vertical shaft is now down a distance of 325 feet, and the management reports that the indications good. The formation is favorable, and more ore is being met with in the bottom of the shaft.

Mountain Trail. Seventy-five men are employed on the Mountain Trail property and the concentrator. The work of deepening the two double compartment shafts continues. In a short time a drift will be run along the vein for the purpose of exploring it and connecting the two shafts.

Le Roi. The Le Roi kept up its good reputation as a shipper last week, sending 2,362 1/2 tons to the smelter. The work continues with vigor in all parts of the mine. The company is advertising for tenders for a 60-drum compressor, which would indicate that it is intended to greatly increase the output from the mine.

that were trying, is most gratifying. It is very evident that the prediction made by Mr. Williams a week since, that the Mascot would soon join the list of shippers, will in a short time be verified.

Virginia. Two shifts are at work in the shaft on the new ore body which has been located 200 feet south of the main shaft. The new shaft has been timbered up, and very satisfactory progress is being made, the ore still staying with the shaft.

Sunset No. 2. Crosscuts to the north and south are being continued on the 100-foot level in the new shaft, which has been sunk at the intersection of veins No. 2 and 3. On the ledge recently discovered on the Gold Hunter, one of the group, a tunnel was run in on the foot wall a distance of 17 feet, a crosscut being run a distance of 17 feet across the ledge at that point.

Gertrude. Mindful of the many recent instances where good ore has been found on the surface of veins, after useless sinking on other portions of the leads, the management of the Gertrude is keeping a small force of men at work stripping the surface of the ledge. At the same time development in the underground workings of the property is being pushed forward.

Centre Star. No ore was shipped from the mine during the week, and the changes that are being made in the power plant. The two boiler is now on the ground, and within a very short time the surface equipment of the property will be in condition for development and production, and the Centre Star returns will again help to swell the record of ore shipments.

White Bear. The vertical shaft is now down a distance of 325 feet, and the management reports that the indications good. The formation is favorable, and more ore is being met with in the bottom of the shaft.

Mountain Trail. Seventy-five men are employed on the Mountain Trail property and the concentrator. The work of deepening the two double compartment shafts continues. In a short time a drift will be run along the vein for the purpose of exploring it and connecting the two shafts.

Le Roi. The Le Roi kept up its good reputation as a shipper last week, sending 2,362 1/2 tons to the smelter. The work continues with vigor in all parts of the mine. The company is advertising for tenders for a 60-drum compressor, which would indicate that it is intended to greatly increase the output from the mine.

Heather Bell. A force of eight men is at work, under the superintendence of S. Forth. A crosscut is being run from the tunnel, at a point near the foot of the shaft, on the 40-foot level, and it is expected that the ledge will be reached in the course of a week or two. Progress at the rate of over a foot a day is being made.

SET THE COLUMBIA HOTEL AFIRE

Serious Charges Against Men in Grand Forks--Arrest of two of the Accused and Several Other Persons Under Police Surveillance--Rumors Regarding the Ex-Mayor.

Grand Forks, Sept. 4.—[Special.]—When the handsome Columbia hotel in the town of that name, was burned down last July there were rumors to the effect that incendiaries were the cause, and some Columbians went so far as to say that Grand Forks people were at the bottom of it. This was regarded by the general public as mere spiteful gossip, the outcome of the rivalry between the two towns, and but little attention was paid to such reports.

The matter was brought to a focus by the arrest of Charles Mullen and Robert Cameron on a charge of arson, and the preliminary hearing given the two men, which opened on Saturday, promises to throw light upon one of the most outrageous deeds in the history of the Kootenays.

The evidence taken yesterday seems to establish beyond a doubt that the hotel was burnt by a man or men acting under orders from some one in this town. Who the originators of the plot were has not yet appeared in evidence, but the names of several well-known citizens are being bandied about in that connection.

Bunker Hill.—Actual mining has not yet been resumed on this group, the force of 17 men employed by the company being engaged in completing the wagon road to the claims. This is now within two miles of the workings, and it is expected, will be in readiness when the mill machinery is received.

Lily May.—No new developments are reported from the mine. The work of stowing out ore for shipment continues, and a good sized dump has already been prepared for the smelter. The manager is not able to fix the date of the first shipment.

Royal George.—Sinking on the ledge is still in progress and results continue favorable. Only a small force of men is working, but the owners have in view a plan for developing the property on a large scale.

Columbia-Kootenay.—Work continues to be energetically pushed in all portions of the mine and the showing is of a very encouraging character. The mine is looking exceedingly well.

Coxey.—The No. 2 tunnel is being continued to cross the ledge, and good progress is reported. In the meantime surface work on the ledge is being continued.

leaving it to burn down into the alcohol. After his refusal, he says, Cameron undertook the job. John Watson, bartender in the Yale hotel here, gave testimony to the effect that Royce warned him that the Columbia hotel would be burned. On the morning after the fire, Watson said, Cameron was broke, and begged a drink. In the afternoon Cameron again came into the hotel, in company with Mullen and ex-Mayor John A. Manly, and ordered drinks for the three, paying for them with a bill from a roll which contained about \$250.

It also appeared that the fuse and alcohol used in starting the fire were left in the office of the Yale hotel until the night of the fire. On application of the counsel for the prisoners, the hearing was adjourned until Friday, when it is said further evidence of a most sensational character will be adduced.

Interest in the matter has been intensified by the issuance of an order by the authorities that Mr. Manly was not to leave town, and by his disappearance on Saturday. While the investigation was in progress the ex-Mayor took a horse and rode across the line, forstalling the officers who had him under surveillance. His friends, while admitting his departure at this juncture has a most suspicious look, say that he had important business to attend to, and fearing that he would be taken in charge bail would not be granted, he left town for a few days in order that his business should not be interfered with. They assert, however, that he will return in the course of a few days, and has nothing to fear from a full investigation of the charge against him, which is one of conspiracy. One or two others of some prominence in the town are under surveillance.

Developments in the case are being followed with the most intense interest. The Roseland Miner is requested to publish the following: All men who are nervous and debilitated, or who are suffering from any of the various troubles resulting from over work, excess or youthful errors, are aware that most medical firms advise using to cure those conditions cannot be relied upon. Mr. Graham, a resident of London, Ont., living at 437 1-2 Richmond street, was for a long time a sufferer from the above troubles, and after trying in vain many advertised remedies, electric belts, etc., became almost entirely discouraged and helpless. Finally he consulted in an old druggist, who directed him to an eminent and reliable physician, through whose skillful treatment a speedy and perfect cure was obtained.

Knowing to his own sorrow that so many poor sufferers are being imposed upon by unscrupulous quacks, Mr. Graham considers it his duty to give his fellow-men the benefit of his experience, and assist them to a cure, by informing anyone who will write to him in strict confidence where to be cured. No attention can be given to those writing out of mere curiosity, but anyone who really needs a cure is advised to address Mr. Graham as above.

Green Mountain.—The work of deepening the shaft continues. There is a showing of ore in the bottom of the shaft, but there were no developments of importance last week.

New St. Elmo.—Work on the shaft and drift continues. The management has everything ready for the installation of the compressor plant as soon as it come to hand.

No. 1.—Drifts are being made from the 400-foot level, and development work is being pushed on the 200 and 300-foot levels.

KICKED HIS PHYSICIAN. "Never Leave His Bed Alive," Said the Doctor—South American Rheumatic Cure Does the Miracle. Mr. Granville Haight, of Sparta, Ont., says his father, who is a very old man, was very low from a severe attack of rheumatism. His physician assured the family he would never leave his bed alive. A friend took a bottle of South American Rheumatic Cure to him. A few days later upon receiving a visit from the doctor, he ran across the room, and playfully administered a hearty kick. He is now up and as well as ever. Sold by Goodbye Bros.
