

CIRCUS PARADE A FINE ONE; SEEN BY EAGER THROU

Sparks Show Stirs Young and Old—Makes Excellent Impression.

Today was a day of days for juvenile St. John. This morning he awoke all agog for the big things that were due to happen, morning, afternoon and night; it was circus day and the thrill of memories of the past was reawakened—not only for the youth, but for many of the older people, who had not forgotten previous circus days.

Long before the great parade of the Sparks Big Show was due to pass, the route was lined several tiers deep with an expectant throng of people.

Following the standard bearers were groups of well-groomed, finely proportioned young men and women, dressed in colorful costumes.

There is no doubt the horseflesh exhibited by Sparks Circus is a fine collection and the way in which some of the six and eight-horse hitched negotiators of the narrow turnings on the route called for admiration.

This afternoon all roads led to the grounds where the main performance began at 2:30, and the indications were that there will be few in the city who will not see one or other of the two shows scheduled for today.

THE NEVIN'S WILL CASE. Asked this morning what would be the next step in connection with a settlement of the Nevins' will case, D. Mullin, K. C. counsel for members of the Nevins family, said that so long as no further appeal was to be made, the distribution of the estate would be made according to letters to that effect granted by the Probate Court here and which the first appeal was based on.

ST. STEPHEN HERE. The pro. league attraction for Dominion day is a double header on the East End grounds, the morning game at 10:30 o'clock and the afternoon game at 3 o'clock with the War Vets hosts at St. Stephen. Towle, Tippett and Carubers will do mound duty for the locals in these games with "Joe" Dever behind the plate, Johnny Malcolm and McKinnon will work for the Saints.

THE NEW I. S. IMMIGRATION LAW

There seems to be some doubt in the minds of Canadians as to the new regulations governing the passage of people from Canada into the United States, which go into effect tomorrow. At the local office of the U. S. Immigration Department this morning it was said that intended tourists, who planned on spending less than six months in the United States would not be charged the \$8 head tax, nor would they be obliged to pay a \$10 visa fee, provided they were able to satisfy the immigration authorities that they were bona fide tourists and were not moving permanently to the United States.

The same thing applied to representatives of local firms going to the U. S. on buying trips. These regulations, however, applied only to native born Canadians or British citizens domiciled in Canada. Natives of other countries, whether they were now Canadian citizens or not were required to furnish pass-ports and pay the \$10 visa charge.

It was pointed out at the local office that residents of other parts of the province should not come to the U. S. Consul's office here for the purpose of visa, unless St. John was the nearest consulate, as otherwise they might have to be sent back to the proper office. It was also suggested that those who planned making a trip to the United States, either for a visit or to make the arrangements two or three weeks beforehand, so that they would have time to straighten out any difficulties which might arise in connection with the immigration laws.

In cases where sufficient proof is not available as to the bona fides of people claiming to be tourists only, a \$500 bond might be supplied to the authorities here and thus do away with the necessity of obtaining the consular visa. This bond would be cancelled if the tourists returned within six months, but as the cost of such a bond amounted to the same as a consular visa, \$10—this plan would not affect a monetary saving to traveler. In either case a bond would be called upon to deposit the \$8 head tax, which would be returned to him if he came back within the six months.

STRIKERS GO BACK AT \$85 A MONTH PAY. (Special to Times-Star.) Ottawa, June 29.—Surprise was expressed this morning by Hon. James Sturrock with respect to a report of the details of the postal settlement at Toronto, made public from the latter city. Particular surprise is expressed at a statement that the settlement and the original conditions of the men involved, and that to the postal federation would be granted the right to select one or two of the members of the committee in question.

"No such arrangement has been made," declared Mr. Sturrock this morning. "Nor was it ever mentioned at the conference. The real and simple facts of the case are that the men go back to work, not in their previous positions, but at a postal salary, and that they must take their chances of getting back into their previous ratings." The salary at which the men will start is \$85 per month.

Asked as to the new men who were taken on, he said there are several matters to be considered, such as the fact that in time everything will be straightened out.

CANADA'S BIRTHDAY.

Canada at fifty-seven is among the young countries of the world, and none other has so much cause for congratulation upon its birthday. Upon the young countries the future of the world in a great measure depends, and, taking the long view, as we should in thinking of this great Dominion, its contribution to world progress in coming years is bound to be of the highest importance. Here between the two oceans are vast spaces and mighty resources which a vigorous race is only beginning to people and to develop, yet what they have done is already wonderful and what will be done in the future will be almost beyond the imagination of to-day.

On the country's birthday we think of the Dominion as a whole rather than of these provinces by the sea. Confederation has not yet brought to this part of the Dominion all that was hoped for, but that will be remedied as time goes on, and as for the future of the country we look forward with both confidence and pride.

This is a land of high destiny. Those who are young to-day, and who live on the allotted span, will see wonders. Not only will they see a mighty population and great national wealth, but a Dominion playing an influential part in the affairs of the British Commonwealth and of the world.

It is a matter for congratulation that as population grows those of Canadian birth and those born in Great Britain or elsewhere in the Empire continue to form the vast majority of Canada's inhabitants. That is as it should be, and it will be our duty to see that there is no departure from that safe line of growth.

To-day there are signs that the depression following the war is passing. There is an easier road ahead of us, and we shall not lack material prosperity. But, with the coming of the national birthday, we must remind ourselves that mere material prosperity is not enough. That is desirable, and even essential, but more important still are found patriotism, high ideals of citizenship, and a national determination that this country shall be worthy of greatness in the best sense of the term.

Ours is a noble heritage, and ours a people with manifold opportunities. We should keep our aims high. We should have ever in mind the inspiring traditions of the past. We should build for the future, and, in education, in government, in leadership, in the quality of our citizenship, we should consciously strive to attain a national life such as will bring and justify real happiness and contentment.

There is no better land than ours. There is none before which lie years of fairer promise. Peace is ours, and tranquillity, justice and freedom. Let us be worthy of our heritage and our privileges and hand them on to the better for our keeping, to the generations of the mighty Canada to come.

HERE AT HOME.

"Let us talk about success in our own country, and not about the success which our people sometimes win by going to other lands," says Mr. Russell F. Kelley, the retiring President of the Canadian Good Roads Association, who visited St. John on Saturday. This is no mere generality. Mr. Kelley, who has spoken before many public organizations throughout Canada, very truly says that we do not talk enough, particularly to our young people about the land we live in, its resources and its opportunities, and about the successes won by Canadian leaders in various walks of life. If a Canadian goes away from his own country and makes his mark, we are naturally proud of him, but we fail to remind ourselves that in many instances at least such men might have achieved equal success at home. Of the thousands who have gone and who have failed to find fortune in alien lands, we hear little.

In both the homes and the schools Mr. Kelley suggests that much more attention be given to instructing children in the wonderful and romantic history of Canada, of its real greatness, the richness of its resources, and the inviting nature of its opportunities. He thinks that business organizations and many other bodies should be continually working for Canada along these lines. As an example he speaks of a meeting of the Canadian Club in Hamilton, about to be held, at which each member will have as his guest a young man between eighteen and twenty-five. On this occasion there will be ten speakers and each will talk for six minutes about some one of Canada's most successful men, telling how they started, what handicaps they overcame, and how they reached their commanding positions. This sort of thing, says Mr. Kelley, is much more practical, more productive, more patriotic, than talking about Canada's loss of population through emigration; and education along such lines, if carried on earnestly in every city throughout the country, would certainly do a great deal to keep Canadians at home by proving to the growing generation that

BETWEEN TWO DARKS.

(Toronto Star.)

An airman has voyaged from New York to San Francisco in 21 hours and 45 minutes, flying much of the way through rain, fog and clouds. Because he was following the sun he was able to make the trip betwixt daylight and dark. He was able, in less than a day, to cover the ground which the tide of white population required more than two centuries to cover.

The first permanent English settlement in the new world was established at Jamestown, Va., in 1619, after earlier attempts at the same point dating from 1607. Thereafter it took 156 years for the English speech to cover the Atlantic plain, cross the Allegheny mountains and set up free government within the Mississippi basin. In 1773 the first incipient settlements appeared in what is now the State of Kentucky. In 1821 Missouri was admitted to the union; in 1850, California. But the actual frontier of advancing population took much longer to occupy the intervening territory than these figures would indicate. As late as 1790 not more than five per cent. of the 4,000,000 people of the United States lived west of the Allegheny mountains. The frontier of 1800—less than a century ago—extended in a great convex westerly curve from Detroit, Michigan, to New Orleans. In 1832 Chicago was the "far west." In 1890 the frontier lay almost due north and south just west of Iowa and Missouri, ready for the final dash across the great plains. In 1899 the completion of a continuous railway from the Missouri to the Pacific coast linked up the east with the west and ushered in a new era of westward expansion.

AGREEING TO DISAGREE.

The honorary degree of Doctor of Laws has just been conferred upon Ambassador Hamura of Japan by Brown University, Providence, and while he was receiving it the American Secretary of State was making public the American reply to Japan's protest against exclusion, saying that the position taken by the United States was final. The Japanese Ambassador did his best to make a hopeful speech in receiving his degree at Providence, but it was hard work. It was he who is charged with having provoked, or at least precipitated, the action of Congress by telling the United States Government that "grave consequences" would follow the Exclusion Act. In thanking Brown University the Ambassador recalled the long friendship that had existed between his own country and the United States. He accepted the compliment bestowed upon him as an assurance of good will and friendship and he said: "And I may express the hope that the friendship between us will remain true to our worthy tradition of the past, which is an embodiment of that great spirit of mutual toleration and esteem."

The position of the Ambassador in the circumstances was somewhat awkward. He said nothing, of course, to indicate that his nation could regard the exclusion legislation as in any sense satisfactory. Yet the reply of Secretary of State Hughes to the Japanese protest says, however courteously and politely, that the action of Congress must stand, that the gentlemen's agreement comes to an end on July 1, and that the United States never did and never will relinquish its sovereign right to say who shall and who shall not become residents of its country. Mr. Hughes, while employing the language of diplomacy, says, in effect and very positively, that the door is shut and will remain shut.

In Europe, recent cablegrams show there is considerable feeling against the American position, and a feeling that, while the Americans must be conceded the right to control immigration, they might have done so without affronting Japan. There is talk that the Japanese may bring their case before the League of Nations, but it does not appear that any such course would help the cause of world peace. The more important members of the League would not think of saying that the United States must open to Japan the door which it has closed in the matter of immigration, and since there is no likelihood that the League will take that sort of action, Japan will scarcely present its case in that quarter.

The bars are up and, in spite of mutual diplomatic assurances of respect, it is universally recognized that friendship between the two nations has been gravely impaired. The United States has made a powerful enemy. Worse yet, this misunderstanding will be an obstacle to further disarmament after a European settlement paves the way for another arms conference.

MADE SUB-DEACONS.

William Crowley, son of John Crowley, and William Osborne, son of Mrs. Margaret Osborne, both sons of the parish of St. John the Baptist, were raised to the sub-deaconate during the service in Holy Heart Seminary, Halifax, yesterday. Rev. J. J. McDermott, pastor of St. John the Baptist, during his sermon yesterday referred to the honor which had come to the parish in having two of its sons elevated to the stepping stone to the priesthood. He asked the prayers of the congregation for the young men. Arthur Kinsella, son of Mr. and Mrs. Augustine Kinsella, Paradise row, was also made a sub-deacon in Halifax yesterday.

AUTOMOBILES COLLIDE.

Saturday night about 10 o'clock automobiles operated by C. E. Morrison, 10 Peter street, and R. Thorne, 136 Broad street, were in collision in Sydney street. Fortunately the cars were not going fast when they hit. While the automobiles were not seriously damaged the occupants received a shock.

SUNSHINE IN ENGLAND

(Alice Duer Miller in Harper's Magazine.)
When the sun shines on England, it shines
For long-hung leaden skies, and rain and dim
Moist fogs that paint the verdure on her stones.
And fill her gentle rivers to the brim.
When the sun shines on England, shafts of light
Fall on far towers and hills and dark old trees,
And hedge-bound meadows of a green as bright
As bright as is the blue of tropic seas.
When the sun shines it is as if the face
Of some proud man relaxed its haughty stare,
And smiled upon us with a sudden grace,
Flattering because its coming is so rare.

What Is the Cost of Winter Comfort?

WHAT winter comfort costs you depends on your heating system. It is not the price of the furnace, but the efficiency and life of the furnace.

A furnace costing \$150 and heating your home properly with 7 tons of coal each winter for 15 years is far cheaper than a furnace costing \$100 and using 8½ tons of coal every year for ten years.

Clare Bros. build low-cost heating systems—no matter what price you pay—furnaces which save fuel and which last for years—furnaces which cut your annual heating bill. It doesn't matter what price Clare Bros. furnace you buy—they all have these Clare characteristics. There are Clare furnaces for large and small investments—piped and pipe-

less. But all are heating Clare Bros. value. See the Clare Bros. dealer. Let him advise you, as he is so well able to do, on your heating system.

Heating Plans FREE

Clare Bros. free plan service is available to all. It costs nothing. It means that without obligation you can have our heating engineers plan a heating system for your home. Just take a rough plan of the house to the Clare Bros. dealer, or mail it to us. The heating plan will be sent you.

Further Reduction In The Price of Gas

To Our Gas and Electric Patrons:—

We are very pleased to announce that our Directors have decided to grant another reduction in the price of Gas, both for domestic and commercial purposes, effective from July 1st, 1924.

This reduction will be 15 cents per thousand cubic feet, making a total reduction, since the beginning of 1924, of 40 cents per thousand cubic feet to our customers who, we are sure, will realize that we are making genuine efforts to bring the price of gas down to a point where it can be more generally used for cooking and water heating; and this is proven by the fact that during the past 60 days, nearly 100 gas ranges and, approximately, the same number of water heaters have been installed on our lines.

The reduction will apply only to customers who are using our combined electric and gas services exclusively, on the same premises.

In explanation, we may say that it is a much more economical operation to have a customer using both of these services, as the expense of meter reading, billing, office work, and collecting, etc., is much less, as we can handle the DUAL SERVICE as reasonably as if we were only supplying one commodity, and we are, therefore, passing along to the customers who are supporting both departments, the saving that we are able to effect through the joint operation of the two departments.

This is a common practice in other cities, where a public utility corporation is supplying DUAL SERVICE, and follows out our principle that one department assists another to the benefit of the customers patronizing both utilities.

COURT SAYS WIFE MUST BE OBEDIENT

Alabama Court of Appeals Decides Case in Favor of Husband.

Montgomery, Ala., June 30.—The age-old marriage vow containing the word "obey" was given an interpretation with "fresh" by the Alabama court of appeals when it upheld, in effect, the right of a husband to object to his wife's employment of adventitious aids, or her supposedly natural beauty.

It is the imperative duty of a man's wife to obey, the court held. The wife in question had curled her hair against the expressed wish of her husband. In rendering the opinion, the court also decided it not only was the right but the duty of the husband, in absence of proof of bad character, to fix the domicile of his children, irrespective of the mother's wishes. The ruling was made in reversing a lower court which had issued a writ of habeas corpus to Mrs. Macon Sparkman to recover custody of her daughter.

MAZOLA For Salads
Mazola makes the most delicious Mayonnaise or French Dressing—many people even prefer it to the best olive oil. And for frying and shortening it is better and more economical than all other fats.

Following domestic incompatibility as a result of his wife's curled hair, it was said, Mrs. Sparkman left her husband, taking the child. Later Sparkman recovered the daughter and placed her in his mother's home. Mr. Sparkman filed petition for a writ of habeas corpus and the lower court ordered Sparkman to produce the child. This order met reversal in the appellate tribunal.

SENATOR CURTIS SMILES

Topeka, Kas.—On the back of an unassailed pony, galloping across the moonlit plains of an Indian reservation into the world of white men, rode the little grandson of Old Chief White Plume.

That was 50 years ago. Today the keen-eyed youth who forsook the sleepy shadows of an Indian camp for the white lights of civilization is high in command of the U. S. ship of state.

WHEAT SHOWS A SLIGHT DECLINE

Winnipeg Market Off Saturday—Stocks Advance in New York

Winnipeg, June 30.—Continued profit taking by "longs" and lower Liverpool cables caused further recessions in the price of wheat Saturday, and at the low point, July declined one cent, October 1 1/2 cents and December 1 1/2 cents. However, on the scale down the market received support and export houses were shortening the offerings with the result that values improved fractionally above Friday's close, but again, the fish show net losses of 3/4 cent for July, 1/2 cent for October, and 1/2 cent for December. Woolworth advanced a point to a new 124 1/2 top at 112, and Kroger Department Stores moved up 1/4. International Telephone and Mack Truck also gained a point each. Cable transfers. Montreal, June 30.—Cable transfers, 4 1/2. Montreal Market. Montreal, June 29.—Trading was dull and prices easier at the opening of the Montreal stock exchange this morning. Letters To The Editor

THE OLD BURYING GROUND. To the Editor of the Times-Star. Sir—I should think the suggestion of the Mayor to make a memorial park of the Old Burying Ground would not be kindly received by a majority of descendants of the Loyalists. It is a great pity it had not been properly fenced and taken care of, and opened to the public, say once a week. King and Queen Squares are recreation grounds reserved by the city for the enjoyment of citizens.

Morning Stock Letter

New York, June 30.—The market this week will continue to reflect easy money rates, the better feeling in business and the improving possibilities of a conservative on the Democratic ticket. No indications of any reactions except the fact that the market has had a good advance and there are profits that may be taken at any time. The market acts well, however, and may reach considerably higher prices. We believe that

Imports Flies To Kill Beetles

Seattle, June 30.—Some time ago Japanese beetles found their way to New Jersey in a shipment of flies. These beetles spread until they have become a menace to vast truck gardens in New Jersey. A special variety of Japanese fly, several billion of them, is being imported to exterminate the beetles, for which they have shown a ferocious and effective appetite in the old country.

Admiral of Special Squadron Speaks on Naval Protection of Trade Routes.

Vancouver, B. C., June 30.—Naval protection of trade routes is as vital to the Dominions as to Great Britain and the prosperity of every part of the Empire depends on keeping sea communication open which can be done only by an adequate supply of capital ships, according to a written reply by Vice-Admiral Sir Frederic Field, commander of the special service squadron, made to questions propounded by the Vancouver Sun. The general cost of Britain's naval ships is a billion and a half pounds, Sir Frederic says. "A Dominion can contribute to the following ways: (1) Provision and maintenance of local defence forces; maintenance of sea-going vessels left by imperial government; (2) Provision of a sea-going squadron to take over the protection of its own trade routes."

"TACK" DALTON TO PITCH FOR SAINTS AGAINST PORTLANDS IN OLYMPIC GAME

"Beef" Malcolm Will Try for Shot Put Record at Sat. Night's Game.

What kind of a showing can "Tack" Dalton make against the heavy-hitting Portlands in their Olympic feud game on the South End diamond tomorrow afternoon, commencing at 3 o'clock? The St. John Baptist outfit are solidly behind their rising young star and believe young "Tack" will surprise the fans when he faces the three leading hitters in the City League, "Charlie" Gorman, Manager Snodgrass and Corriegan. This trio is hitting a .400 and better clip and have been largely responsible for the Portlands' big lead in provincial honours. If Dalton and his teammates can down this gang, it will be a distinct feather in their caps and a record-breaking crowd is expected to be on hand when the umpires get the teams into action.

Games Tonight

Provided the weather is fair, the Royals will meet the Machine Gunners in the South End League this evening. The Royals' proposed trip to Middlebrook has been cancelled indefinitely. A win for the Royals would be a bad blow for the Gunners.

Writing Ads Like This

We all have our troubles in falling short of perfection. We have made our proposition mean the very best when you get next to it—but advertising it is another story. Out of two main strong appeals, if we put our price first into the ad, some men take it for ours for cheap ready-made. If we put first the facts of quality tailoring, others dodge it as too expensive. However, enough men read the ads. as they are, to enable us to keep on tailoring the best cloths under the price of ready-mades.

O'BRIEN IS TAKEN BACK TO BORDER
 The premises of the St. John Mercantile Company, 81 and 82 South Market wharf, were entered by an unknown person or persons some time Saturday. The break was discovered by Mr. and Mrs. Morton Watt, 35 Carmarthen street, who were strolling along the wharf between 6 and 6.30 o'clock Saturday evening. A large window was broken in the premises and a five pound bag of granulated sugar was found on a molasses hoghead a few feet away from the broken window, while one pound was found on the wharf. While Mr. and Mrs. Watt first noticed the break in the window there was no sugar on the wharf. Evidently the thief was in the warehouse at the time and while Mr. Watt was notifying William McCavour, manager of the firm, he made his escape. The police were notified and Policeman McInnis and Detectives Biddiscombe and Kilpatrick visited the scene. It is suspected, from a trail of sugar found leading from the premises entered to the steps at the end of the wharf that the thief used a boat.

SUGAR IS TAKEN FROM WAREHOUSE
 On order of Magistrate Henderson, Daniel O'Brien, arrested here on Friday morning by Detective Biddiscombe, was taken back to St. Stephen late Saturday afternoon by E. C. Hill, chief of police who wanted O'Brien. Chief of Police Hopkins, of the Newcastle force, was here looking for O'Brien. He said that he was given to understand that the chief of police of St. Stephen was to hand the man over to him, but Magistrate Henderson delivered O'Brien to the St. Stephen chief and said he could do nothing else unless instructed by the Attorney-General. Made for Men
 Who seek these results from Shaving Cream
 By V. K. CASSADY, Chief Chemist

Some years ago we set out to create the ideal Shaving Cream. We were qualified, as you know. This laboratory is 60 years old. It has created, for every purpose, some of the greatest soaps. One of them has become the leading toilet soap of the world.

First we asked 1,000 average men to tell us what they most desired.
 Then step by step—by making and testing 130 separate formulas—we met those desires to the utmost.
 The result is a new attainment, better in at least 5 ways than any shaving cream you know.
 Men have welcomed it as they never have welcomed anything else in this line. Millions of delighted men have changed from old-type shaving creams.
 So will you when you know.

The results men wanted
 Abundant lather. Palmolive Shaving Cream multiplies itself in 10 to 250 times.
 Quick action. It softens the beard in one minute.
 Lasting lather. It maintains its creamy fullness for ten minutes on the face.
 A clean shave. The extra strong bubbles hold the hairs erect for cutting, so they don't lie down.
 No irritation. The palm and olive oil content leaves the face in fine condition.
 Let this test prove that we have secured these wanted effects—as no one else has done. Do this in fairness to yourself and us. Clip coupon now.
 To add the final touch to shaving luxury, we have created Palmolive After Shaving Talc—especially for men. Doesn't show. Leaves the skin smooth and fresh, and gives that well-groomed look.
 There are new delights here for every man who shaves. Please let us prove them to you.
