Public spinion demends a meeting of the citi-sens forthwith, that that opinion may be brought to bear upon the Corporation of Montreal in an unmistakeable manner. Within the last two nonths we have had as many great confingrations, which houses, to the value of a hundred and fity thousand pounds, at least, have been destroy-ed, to say nothing of furniture, stock in trade, ares during the same period.

There is no question whatever but that the in tane persistence, not only to build houses of wood, but to roof them with shingles, must always expose Montreal to a recurrence of these frightful calamities. Why is it that in the Centre Wards, where no wooden buildings or wooden roofs are permitted, we have none of these large fires, while in the Suburbs, abounding with shingle roofs, they constantly occur t is it not manifest that it is the material employed which assists in ting and spreading the flames. After two ears exposure to sun and air, the shingle is as inflammable as touch-wood; alightly fastened on, and light as a feather, the slightest gust of wind carries the burning flakes to an almost incredible distance; they fall on other shingles just as ine, and thus the fire is borne from one

Every one here knows that satill the injudicious interference of the Corporation the Fire Companies of Montred were a highly officiant body. I had recourse to the best medical treatment, but continued to grow worse to an alarming dagree. Some of my frends spoke despirit gly of my, case, and vised to persuade me from making use of any advartaced remodical, and, I doubt not, but what there are hundreds who are descuded from taking you excellent Medicines, in consequence of the deception and inefficiency of many advartaced remodies put forth by unprincipled men, in finning ad crusements. But, what a pity it is that the deception used by others should be the means of discussing many labring under discuss, from making trial and being cured by your ascellent remodies.
