WEDNESDAY, MAY 7th, 1890.

Nomination Day.

Today week has been appointed as the day to nominate "good men and true" to represent the interest of the people of this county and province in the General Assembly.

We have said that Wednesday next will be Nomination Day, and it is probable that many hundreds of the electors will be present to hear the speeches of candidates after the ceremonies of nomination are over.

Every industry, of whatever kind, introduced into the country must, necessarily, add to its prosperity by affording employment to its people, and adding increased demands for a home market, which is always preferable to a foreign one.

It is with pleasure, therefore, that we announce the inauguration of any new industry in our midst. In a former issue we made reference to the reported arrival in Wilmot of the machinery necessary to bottling the waters of the Spa Springs in that township.

The inch. From the room above, where the ginger syrup is manufactured, a rubber tube descends to the room below to the bottling apparatus. This latter apparatus is to be made for us to fully describe. Three people are required to do the work, one bottles and corks as fast as two can cap and wire them.

Mr. Joseph Sexton, one of the leading business men of Halifax, died in that city last week, much to the regret of his many friends throughout the city and province. For some time past Mr. Sexton had been in ill-health. About six weeks ago he was obliged to take his bed, and continued to grow worse. The deceased came to Halifax about 40 years ago from Moncton, with his brother, Robert B. Sexton. Both engaged in business soon after, their establishment being near the foot of Sackville street. They were subsequently appointed agents for the Innan line of steamers. They purchased the wharf at present occupied by Messrs. Pickford & Black, and did a large business at that time. They built the premises at present occupied by the People's bank, but sold it soon after to his brother, Robert B. Sexton, who did business in the building, formerly the saloon's home. The firm dissolved partnership, B. B. going into business for himself and Joseph associating himself with Arthur Mitchell in the wholesale grocery and commission business.

Correspondence.

We do not hold ourselves responsible for the opinions of our correspondents.

Mr. Errol.—As the columns of your valued newspaper are as a rule generously open to anything affecting the public we, I would call the attention of our strict commissioner for the central part of the town, to the condition of Queen Street, where it joins Granville Street. It will be remembered that last fall when the old Quick stand was being repaired, a lot of clay was thrown to the surface and allowed to remain in a rough state, and a large quantity of gravel was placed there, also with a view, it would appear, of elevating the sidewalk to bring it well up to the platform built to accommodate the new store. The result is that all through a long and tedious season of ice and snow the public has had to climb this mound at a risk to life and limb. Whether it is due to the street or to the platform, which is private property, to get around the turn, and then to get to the street again to avoid the numerous teams anchored in the quadrangle which the public has had the use of ever since the last buildings were erected here, some sixty years ago. Again, this sidewalk and corner has been built and left altogether too sloping, the angle being about 45 degrees, who the public has been badly imposed upon in this matter, and although long suffering, will insist upon having this encumbrance removed and made right. We are, &c.

RETRIEVED.—The New York Steamship Company, equipped with three new 1,800 ton steamships, of high speed and with every modern improvement intend to work the coast of Maine and maritime provinces passenger and freight traffic, with quick transportation and cheap rates. These steamers will be first class high speed ocean going ships, superior to anything ever seen on the east coast. Trips will be made twice a week from New York calling at Cottage City, Rockland and Eastport, and terminating on one trip at Annapolis and one at St. John, N. B.

Leaving Annapolis, on the arrival of the express train, passengers by this line will reach Boston via Rockland, the next day at noon, or Montreal at evening by taking rail at Rockland, giving only eight to ten hours; or connecting at Rockland with the palace steamers of the Bangor and Boston line, which reach Boston the same evening by water, as will all Boston freight. The New York Steamship Company's line will open to western Nova Scotia the New York market by quick regular transportation, rates of freight as low or lower than any paid to Boston, for farm products—potatoes, hay, straw, horse, beef, mutton, hamp, apples, wool goods, etc.—and as Ontario flour as well as western corn and meal, pork, etc.

Guylford, May 4.—The following accident happened here Tuesday. A farmer named James Cook, who has been in most of the winter, from the effects of the severe attack of grippe, lately became delirious and in the night, on Tuesday morning he left his house, intending to visit the barn, but not returning. The steamer are expected to start early in May.—M. Chronicle.

Murderer Palmer Hanged.—CONCORD, N. H., May 1.—Soon after 5 o'clock this morning Sheriff Coffey and his assistants began the execution of the scaffold in the prison corridor upon which James Palmer will today expiate his crime for the murder of Henry J. Whitehouse in Portsmouth, May 27, 1888. The prison officers remained with Palmer all night. At a late hour he retired and slept some time. Before retiring he looked at an illustrated paper and a prayer book and spent some moments in prayer. He awoke at midnight and partook of a luncheon. At 12 o'clock he was taken to the gallows. The execution was witnessed by a large number of persons. The gallows was erected on a high and airy spot. The execution was witnessed by a large number of persons. Book Notes.—The May Wide Awake opens with a frontispiece that all American young people will hail with pleasure, for it is a portrait of the author of "The Hair of Reddy" and "The Daisy Chain," Miss Charlotte M. Yonge; further on, "The Baby's Story" by Louise Stockton, which is a unique little history by Mrs. Bernard Whitman. "A Long Horror" is a powerful true story of a young French countess and his wife, who were killed in the "Cow-Bells of Grand Pre" by Grace Dean, and "The Monitor of the Sea" by "The Cow-Bells of Grand Pre" by Grace Dean, and "The Monitor of the Sea" by "The Cow-Bells of Grand Pre" by Grace Dean.

Special Fisheries Agent T. Aubrey Byrne testified before a Congressional Committee at Boston Friday as follows:—

Allen fishermen from Canada are now pouring into Gloucester at the rate of 75 to 100 per day. From 65 to 75 per cent of the fishermen who are manning American fishing vessels are aliens, and they work for less wages than citizens of the United States. Their relatives in the Province are engaged in fishing. The latter sell their fish in American fishing vessels, and these fish are brought to our ports and entered without paying duty as American fish. Thus American citizens are crowded out of the fishing business, and fish caught by aliens are entered without paying duty.

GRAND GUYS FOR RUSSIAN PORTS.—The largest guys yet manufactured at Krupp's works at Essen, which is intended for the naval fortifications at Cronstadt, is made of the finest quality of cast steel and weighs 270,000 pounds (about 135 tons), the caliber is 16 1/2 inches, and the barrel 44 feet long. It will have been ready for shipment in about a month. The greatest diameter is 64 feet, and the range about twelve miles. It will fire two shots per minute, each estimated to cost \$300. At the trial the projectile, 4 feet long and weighing 3,000 pounds, was propelled by a charge of 700 pounds of powder and penetrated 19 inches of armor, going 1,342 yards beyond the target.

It is easy to find out from any one who has used it, the virtues of Hagar's Yellow Oil for painful and inflammatory troubles, rheumatism, neuralgia, lumbago, frost bites, burns, bruises, sprains, contracted cords, stiff joints, aches, pains and soreness of any kind. It has no equal.
