In the Department's continuing efforts to improve the management of the Export and Investment Promotion Program, I am pleased to see that we are now able, in this Quarterly Trade Tracking Report, to display the progress being made by posts in the execution of the planned activities as outlined in the export and investment promotion plans submitted by each post last fall. This review of progress will improve our ability to keep abreast of developments in your posts in a more disciplined fashion. This report will enable you and your officers to monitor the progress of program implementation in your posts by comparing planned activities in priority sectors with quarterly activity highlights and results. It joins the Quarterly Results and Activity Report which has been, and will continue to be sent to you.

On the whole I am pleased with the quality of the progress reports submitted by the posts. Some missions have taken particular care to set out precise activity statements in their plans which have made their quarterly activity and results summaries in this report very effective program evaluation tools. I would hope that those posts who have not yet indicated a commencement of their planned activities will be more forthcoming in their next report.

Our ability to continue to defend and build upon our current level of trade and investment resources abroad will be increasingly dependent upon the reliability of information your posts provide to identify their activities, workload and results which the tracking system was designed in part to accomplish.

Je suis heureux de constater que, dans le cadre des efforts que le Ministère ne cesse de déployer pour améliorer la gestion du Programme de promotion des exportations et des investissements, nous sommes maintenant en mesure, dans le présent rapport trimestriel sur les activités et les résultats, d'indiquer les progrès accomplis par chacune des missions dans la réalisation des activités prévues dans les plans de promotion des exportations et des investissements qu'elles ont présentés l'automne dernier. En raison de cet examen des progrès, nous serons mieux en mesure de nous tenir au courant, de façon plus disciplinée, des développements qui surviennent dans vos missions. Grâce au rapport, vos agents et vous pourrez comparer les activités prévues dans les secteurs prioritaires aux activités qui se sont déroulées et aux résultats qui ont été obtenus au cours d'un trimestre et, par conséquent, surveiller les progrès réalisés en ce qui concerne la mise en oeuvre du programme dans vos missions. Ce rapport s'ajoute au Rapport trimestriel sur les activités et les résultats qui vous a été envoyé jusqu'ici et qui continuera de vous être transmis.

Dans l'ensemble, je suis satisfait de la qualité des rapports d'étape qu'ont présentés les missions. Certaines missions ont pris bien soin d'établir des énoncés d'activités précis dans leurs plans, ce qui fait des résumés trimestriels sur les activités et les résultats que renferme le rapport susmentionné des outils très efficaces d'évaluation du programme. J'ose espérer que les missions qui n'ont pas encore signalé avoir entrepris les activités qu'elles avaient prévues se montreront plus communicatives dans leur prochain rapport.

Notre aptitude à continuer de maintenir et d'accroître notre niveau actuel de ressources en matière de commerce et d'investissements à l'étranger reposera de plus en plus sur la qualité des renseignements que vos missions nous transmettent pour déterminer les activités, la charge de travail et les résultats pour lequel le système de suivi a, en partie, été mis sur pied.

Le sous-ministre
du Commerce extérieur,

G.E. Shannon

A V I S I M P O R T A N T

Nous avons voulu donner à ce nouveau rapport une présentation qui soit aussi lisible que possible et rectifier quelques irrégularités et problèmes liés à l'entrée des données et aux réponses présentées par les missions, ce qui a retardé la publication de la première édition.

Vous remarquerez que dans les pages suivantes, nombre de sections devant contenir les données des missions ont été laissées en blanc. C'est parce que celles-ci n'ont pas fait rapport de leurs activités trimestrielles dans les secteurs qu'elles ont identifiés dans leur plan comme étant des secteurs prioritaires (voir page 30 du Guide et les instructions sur le formulaire 'Rapport des activités et des résultats', sous la rubrique "Activités de promotion des exportations"). Autrement dit, le système est programmé uniquement pour comparer les activités et les résultats trimestriels avec les activités prioritaires énoncées dans le plan annuel de la mission. Un certain nombre de missions ont présenté des rapports d'activités trimestrielles pour des secteurs autres que ceux qui ont été identifiés dans leur plan annuel, de sorte qu'il devient impossible à leur Direction générale de surveiller les activités prioritaires planifiées pour la période.

Pour ce premier rapport seulement, nous avons présenté, dans la section 2, les activités réelles dont ont fait rapport les missions, contrairement aux instructions, afin d'indiquer qu'elles ont effectivement présenté des rapports d'activités trimestrielles.

La section "Activités spéciales dans le cadre du Programme de promotion des exportations et des investissements", telle que présentée par les missions dans leur Rapport des activités et des résultats, figurera dans les éditions ultérieures. En outre, celles-ci seront publiées dans les 30 jours qui suivent la date limite de présentation des rapports trimestriels par les missions.

I M P O R T A N T N O T I C E

The first edition of this new report has been delayed by efforts to configure the report in as readable a format as possible and to deal with some anomalies and teething problems associated with mission responses and data entry.

Readers will note that many of the sections for post inputs on the following pages are blank. This is a result of missions not providing quarterly activities on the sectors they identified in their plans as being their post priorities (see guide page 30; see Tracking report form instructions under "Export Promotion Activities). Put another way, the system is programmed only to compare quarterly activities and results with priority activities outlined in the post annual Plan. A number of posts provided quarterly activities statements for sectors other than those they identified in their annual plan, thereby making it impossible for their bureaux to monitor their intended priority activities.

For this first report only, the actual activities reported by posts who did not conform to instructions have been included as section 2 as an indication that those posts in fact submitted quarterly activity reports.

Future editions of this report will also include "Special Activities in Export and Investment Promotion Program" as submitted by posts in their quarterly tracking reports. As well future editions will be published within thirty days of the cut off date for the submission of quarterly reports by missions.
