22. Some people said that Canadian business cannot compete with Mexican business in a free trade agreement because wages, environmental and safety standards are much lower in Mexico. Others have said that Canadian businesses can compete with Mexican businesses because Canadian workers are better trained and Canada has better facilities like roads, airports and communications. Which viewpoint would be closer to your own?

24. Some people say that by signing the NAFTA, Canada will tie itself too closely to the U.S. and Mexico and will cut itself off from countries outside North America. Other people say that Canada should sign the NAFTA because Canada needs freer trade with the U.S. and Mexico now in order to increase its exports while it continues to work toward freer trade with other countries. Which of these two viewpoints is closer to your own?

22. Some people said that Canadian business cannot compete with Mexican business in a free trade agreement because wages, environmental and safety standards are much lower in Mexico. Others have said that Canadian businesses can compete with Mexican businesses because Canadian workers are better trained and Canada has better facilities like roads, airports and communications. Which viewpoint would be closer to your own?

24. Some people say that by signing the NAFTA, Canada will tie itself too closely to the U.S. and Mexico and will cut itself off from countries outside North America. Other people say that Canada should sign the NAFTA because Canada needs freer trade with the U.S. and Mexico now in order to increase its exports while it continues to work toward freer trade with other countries. Which of these two viewpoints is closer to your own?

	Overall management of the Economy				Support of FTA				Support of NAFTA
