The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

MILK COMMISSION

OF

The Montreal Medico-Chirurgical Society.

Montreal, April, 1900.

SIR,

Following a plan which has succeeded admirably in securing a pure milk supply in many American Cities, the Medico-Chirurgical Society of Montreal has established a Milk Commission, affording to those milkmen who are wishful to fulfil the modern requirements of sanitation in connection with their dairies and milk delivery, an opportunity to keep the members of the medical profession and the public generally informed as to the quality of milk supplied and the results obtained by the employment of due care, as laid down by the rules of this Society.

To this end, it has been decided to establish a system of registration, the Society placing upon its register all those milk dealers complying with its regulations, and who are willing to pay their share of the cost of such supervision as the Society may deem necessary. Those upon the register of the Society shall be permitted to freely announce the fact that they are so registered, as long as they continue to conform to the rules and regulations of the Society, of which a general outline is given on the reverse side of this sheet.

The fee for registration will of necessity vary, according to the extent of the business and the extent of supervision found necessary, there being no desire on the part of the Society to make a profit out of the supervision, its object being simply to ensure a thorough supervision and to remunerate the necessary active officials.

The supervision will include chemical and bacteriological examination and veterinary inspection, for which a definite scale of fees will be established. For details, please address, J. ALLAN WILLIAMS, M.D., Secretary to the Commission, 385 St. Antoine Street, City.

I am, Sir,

Yours faithfully,

J. G. ADAMI, M.A., M.D.,

President, Montreal Medico-Chirurgical Society.

SUPERVISION.

The general scope of the supervision will include means necessary to ensure :—

1. The sanitary control of the dairy animals (including veterinary inspection and tuberculin test.)
2. The proper construction of the buildings at the farm and depots for the distribution of milk.
3. That the staff is free from infectious disease.
4. That there is a due supply of the proper apparatus for preserving the milk and cleansing the utensils.
5. That, where this is required by the conditions under which the business is carried on, or by the distance of the farms from Montreal, there be arrangements for Pasteurisation of the milk.
6. That the quality of the milk, both bacteriologically and chemically is maintained at the standard required by the Society, and that chemical preservatives have not been employed.

Information as to the result of analysis will be furnished to registered milkmen concerning their supply, to members of the Society concerning any supply, and thirdly as regards the milk used by them, to individual members of the general public who pay an annual subscription.

If fuller information is desired we will be glad to furnish you with the same, * and with copies of rules and instructions, as also with a copy of the contract provided for by the Society.

* In order that the Commission may afford you an approximate estimate of cost of supervision it will be necessary for us to have from you a statement with regard to the following points :—

- (a) Amount of milk delivered per diem.
- (b) Source or sources from which milk is obtained.
- (c) Methods of delivery, in bulk, bottles, or both.
