ONTARIO EDUCATION DEPARTMENT

The intelligent advocates of the province protest against this frequent experimenting with the course of study. This has been particularly noticeable and objectionable in the departmental regulations for teachers' certificates.

Another principal, writing to The Mail, Oct. 15, 1930, says: "In the last three years we have had three different courses of work laid down, and owing to exemptions and variations the difficulty of interpretation is such that I sympathize with a correspondent who suggested an annotated edition of the regulations."

It is noted that the board has paid to each either \$100, or \$175, for the O'Neil building for the first three years and was also a certificate from a land appraiser in 1928 that the value of the building was \$200,000.

From Dr. Langtry's statement it also appears that for the last three years and upwards since the board has been in office, repairs and other outgoings, in fact, they have found, just as Miss O'Neil has pointed out, that the building has been a financial burden on the city.

Referring to the names of the prominent laymen who have been on the committee, it is noted that they do not themselves responsible for the present situation any more than they were in 1928.

The Liberals of North York will convene today at Owen Sound, to nominate a candidate for the Legislature.

Under the auspices of the Loyal True Blue Association, a successful social and concert was held Thursday night in the Victoria Hall.

TOM SWALLOW FOUND DEAD

Windows and Door Tightly Closed and Gas Turned On in His Room.

The dead body of Thomas Swallow, a well-known commercial traveler, was found yesterday morning in room 66 at the Gladstone House, West Queen-street.

Mr. Swallow registered at the hotel on Wednesday at noon, he being accompanied by his wife, who, however, did not remain with her husband in the room.

Yesterday morning he did not come down to breakfast and the proprietor, Mr. Turnbull Smith, went up to investigate. Looking through the fan-light he saw Mr. Swallow lying motionless on the bed.

Mr. Swallow had been dead for some time, and the body was removed to the late home of deceased at 84 St. Andrew-street.

The coroner's jury on the death of Swallow was composed of Messrs. J. W. H. Stone, J. P., and Messrs. J. W. H. Stone, J. P., and Messrs. J. W. H. Stone, J. P.

It is noted that the board has paid to each either \$100, or \$175, for the O'Neil building for the first three years and was also a certificate from a land appraiser in 1928 that the value of the building was \$200,000.

MASONS FROM ROCHESTER

Frank Lawrence Lodge Pays a Pleasant Fraternal Visit to Zetland Lodge, Toronto.

Thirty-two members of Frank Lawrence Lodge, No. 707, A.F. & A.M., Rochester, came to this city last night, and paid a fraternal visit to Zetland Lodge, No. 226, G.R.C.

The visitors were met on their arrival at the Yonge-street wharf, a little after 8 o'clock, by Messrs. Stannard, Norman, Donald and Jones, and escorted to the Masonic quarters at Temple Building.

The American brethren worked the first degree, as it is done in the State of New York, after which W. A. Sutherland, P.M., of New York, presided.

After the degree was conferred, the tables were laid for refreshment, and the members of the two lodges enjoyed a very pleasant evening.

The officers of Frank L. Lawrence Lodge accompanying Mr. Sutherland, were: Wm. H. Woodworth, treasurer; Fred. H. Graves, secretary; Clifford A. Berry, S.W.; Henry J. Bhat; J.D. A. E. Hickford; S.M.C.; A. J. Johnson; J.L.C. Willis; J. Anderson; organizer; and A. Reynolds; Tyler; Thomas Brooks.

Japanese of High Standing Now in Toronto, Studying Judiciary and Law.

M. Suzuki, president of the Court of Appeal of the island of Formosa, is making a tour of the world, looking into the judicial systems in vogue in the various civilized countries. He is at present in the city, being a guest at the Queen's Hotel.

Mr. Suzuki will make a report of his investigations when he returns, and upon his recommendations will depend the establishment of a more perfect system of law courts than the little island dependency now enjoys.

Accompanying Mr. Suzuki is a Japanese clergyman of sobriety attainments, Rev. F. Name of Tokio, who is making a study of the charitable institutions of Christian countries for the guidance of the Japanese government in establishing such institutions.

TO REPAIR BLOOR STREET

Controllers Recommend That the Asphalt Pavement Be Repaired and Not Re-Surfaced.

MUNICIPAL CONVENTION IDEA

Mayor Sends Out Letters Asking Heads of Municipalities to Be Present at It.

At the Board of Control yesterday afternoon, the Reception and Legislation Committee reported that they had received a letter from the Dominion Publishing Company, stating that they wish to see to the events which will take place during the visit of the Duke and Duchess of York. The company desires that their shall be the official program, and that Council sanction it. It would not cost anything, they say.

See Water at the Hall

Ald. Lamb asked that \$100 be reported for the purchase of a water meter, to be placed in the City Hall corridor. The Mayor, however, has a large one in his room, and thought that this would fill the bill. The other controllers agreed.

The recommendation of the City Engineer that the Bell Telephone Company be given permission to erect poles on the south side of Bloor-street was approved by the board, on the understanding that it would be without prejudice to the city's contentions.

The report of a sub-committee, in connection with the grading of Harrison-street between Shaw-street and Ossington-avenue, was referred back for a report from the Assessment Commissioner and City Engineer.

Repairs to Bloor Street

The question as to what is to be done with the East Bloor-street pavement was considered. To re-surface the pavement would cost a large sum, and repairs to it could be done a great deal cheaper, and satisfactory, it was claimed. Ald. Lamb said the street should not be re-surfaced, because the city would then be committed to the practice of paying out permanent payments, after they were paid for. He said this would cost the city about \$100,000 per year, if it were done.

The board finally decided to recommend that the road be repaired. It will cost about \$1500. If it were re-surfaced, the cost would be in the neighborhood of \$12,000.

Ald. Urquhart equated what the Board of Control thought about the instructions they had received last November, to inspect the cedar block pavements on Ossington-avenue, Arthur-street, Usher-street and other thoroughfares.

Wants Opinion of Bar

Yesterday morning the Mayor received a telegram from B. B. Rowlands, which reads as follows: "Mills states Canada settled Privy Council. Could opinion Ontario and other provinces be ascertained Communicate Judge Emerson, Newfoundland delegate, Inns Court Hotel."

His Worship sent the telegram to Mr. Wilson, K.C., Chairman of the Western Bar Association, with a letter asking if the cablegram is evidently intended to be communicated to the bar.

"If anybody," the Mayor adds, "at the conference, from this country, or any other colony, is endeavoring to give the impression that the colonies desire to be relieved from the appellate jurisdiction of the Privy Council, it seems to me that it would be very proper, if not necessary, that your association should record its opinion. If I am not greatly mistaken, it would be strongly in favor of the maintenance of the right of appeal."

A similar letter, which was sent to A. Irving, K.C., of the Ontario bar.

Street Car Fenders. Corporation Counsel Patterson has written Hon. F. R. Latchford, asking if the street car fenders have been approved of by the Provincial Engineer, as the legislation of last session provided for.

Municipal Convention Idea

The following is a copy of the letter the Mayor is sending out to the heads of the various outside municipalities, in connection with the municipal convention idea:

Pursuant to letters from and conferences with several Mayors of other cities, a project is under consideration by the Council of the City of Toronto to arrange a conference of the municipal representatives of the Dominion, with a view to forming a union for common action in defence of municipal rights and the rights of the citizens against the encroachments of great corporations. Other subjects of common interest and advantage from a municipal point of view may come up for discussion and be handled by the proposed union.

It is thought that a suitable and central place for such a meeting would be Toronto, and that a convenient time would be during the period of the annual Industrial Exhibition, about Sept. 1. Half fares are then granted by the railways to visitors to Toronto.

As your Council may soon adjourn for the summer, I would be glad to submit the proposition to them, and, if it meets with their approval, obtain the necessary authority for yourself or other representatives to be present and take part in the conference.

The conclusions arrived at at the conference will be of a preliminary and tentative nature, and will be subject to ratification by the respective Municipal Councils.

Should it not be convenient for your Council to send a representative, perhaps the representative of the city of Toronto, or of some neighboring city or town in your province to act on your behalf, so that the meeting may be as fully representative as possible.

Regarding for an early expression of your views on what is felt to be a matter of vital interest to all municipalities, and, third, to the community at large.

NEW LADIES' COLLEGE.

Westbourne School for Girls Will Be a New Presbyterian Institution in Toronto.

Toronto is to have another ladies' college. PARIS-BERLIN MOTOR RACE

Seventy-Three of the Competing Cars Reached Aix-la-Chapelle and Started on Second Stage.

LEADING MACHINES COLLIDED

But Were Not Damaged—Fountain, Who Led the First Day, is Still Ahead.

Aix-la-Chapelle, June 28.—Altogether 73 motor cars completed the first stage of the Paris-Berlin race between Paris and here yesterday, and started again at 5 o'clock this morning for Hanover, 276 miles distant. The racers started from here in the same order in which they arrived.

Two Motors Collided. Dusseldorf, Rhineland Prussia, June 28.—Two of the motors competing in the Paris-Berlin race (those of M. P. Fountain and Girard) collided on their arrival at the checking station at Ober-Kassel, and ran into a crowd of spectators. The cars were not damaged, and the drivers were not injured, but the motors were damaged, and proceeded.

Fountain Holds His Lead. Hanover, Prussia, June 28.—Fountain was again first to arrive at the end of the day's stage of the motor race. De-Knytt was second, and Girard was third. Fountain then started to the Grand Duke of Luxembourg's prize, which he won yesterday, and the award of the Grand Duke for the quickest journey from Paris to Hanover.

Outcry About Accidents. Paris, June 28.—The Paris-Berlin race is causing an outcry, and Deputy Chamberlain brought the matter up in the Chamber of Deputies this afternoon. He asked that measures be taken to stop running automobiles at excessive speeds, and to mark, amid loud applause from the Rightists, that it was a stupor to the racing idea to take a race to Berlin, passing thru Hasselt and Sedan.

The President, M. Waldeck-Rousseau, replied that the race would not have been authorized if it had not been started for pleasure or sport, and that it was to be limited to control the speed of automobiles, and henceforth no race would be authorized at a speed exceeding that used in the past, and henceforth no contest would be longer be placed at the disposal of automobile drivers. The statement was greeted with cheers.

WANT 22 CENTS AN HOUR. Rochester Contractors Notify Workmen to Return to Work or Have Agreement Abrogated.

Rochester, N.Y., June 28.—The contractors have issued an ultimatum to the striking street laborers in the following terms: "We hereby notify the striking laborers that they do not return to work on Monday morning next, all propositions or agreements heretofore offered or existing will be abrogated."

Yesterday the contractors rejected the strikers' latest proposition for a settlement of the difficulty by agreeing to shade their demands to \$1.52 per day, an increase of only one-fourth of a cent in an hour from the old schedule, and now the men are notified that if they fail to return to work by Monday morning next all negotiations are off. Sections torn is anticipated, and at strike headquarters it is stated that the strikers' unamiable tones is expressed. The strikers say they will not go back until a schedule of 22 cents per hour has been agreed to.

Refused Wages. Reading, Pa., June 28.—Three hundred of 250 striking Railway Brotherhood hands called at the office today in answer to the public notice that they would be paid. They refused to surrender their books of membership in the company's relief association, and they were refused their wages.

Still a Strike. Dayton, O., June 28.—At a meeting of the Dayton's and Metal Polishers' Unions the joint proposition of the National Cash Register Company to its striking employees was refused. The company at once decided to operate the large concern in all departments affected. The employees in other departments will remain at work.

Russians for Canada. Twelve Thousand Colonists Desire to Leave the Czar—Will Not Do Military Duty.

Ottawa, June 28.—A party of six representative farmers of the Mohawk tribe of South Russia arrived here today, in charge of A. Landy of Hamburg, Germany. The men, who are fine, stalwart-looking agriculturists, are proposing to offer a delegation of the tribe who visited Canada last year. These six will settle, and at the same time look about them for good land. The tribe numbers some 32,000 in all, and are looking for a home where most land can be had and liberty enjoyed. They are a sect by themselves, neither smoking, drinking nor eating pork. They are trialarians, and do not use the cross either as a sign or emblem. They refuse to do military work, but are not Quakers. They are seeking a new home for political reasons, and have plenty of money for the expenses of the tribe to set up on well without requiring any aid.

Faunted in Court. A. M. Chisholm, Charged With Forgery in Kingston, Overcome Yesterday.

Kingston, June 28.—A. M. Chisholm, manager of the Helena gold mine, near Kildare, Barré Township, is under arrest here charged with fraudulently obtaining \$153 from Michael Seitz, a partner. At the Police Court he pleaded not guilty. Counsel for the prosecution, contending for a postponement in order to lay two other charges of theft against the prisoner, stating that the prosecution had 150 specific charges against the prisoner, who was overcome by a fainting spell and had to be carried out of court, a physician being summoned to attend him. New York capitalists are prosecuting.

Advertising Ontario. The handbook of Ontario, published by the Crown Lands Department, intended for foreign consumption, it will chiefly be distributed at the Pan-American Exposition, and by the Ontario agent at Liverpool, England. Attractive and creditable in appearance, its article on political institutions will be found to contain some hints for Ross campaign speakers. The pamphlet for which the Ontario agent is acting is not yet out of the hands of the printers, and the colonization work of the season is in the hands of the Ontario agent, who is hampered for lack of up-to-date literature.

NEW PHOENIX IN THE WEST

A Stupendous Series of Changes Has Occurred in the Vicinity of the Young Colossus.

WHAT HAS BEEN DONE IN A DECADE

Interesting Sketch of Mines and Mining Development in British Columbia, by a Knowing One.

Phoenix, B.C., June 24.—Here, in densely wooded mountains, which rear their summits nearly 6000 feet above the sea, nature has distributed her mineral riches—gold, copper, silver—with a lavish hand. It is a region where titanic forces seem to have held sway upturning metaphoric rocks, creating yawning fissures as a vent for subterranean overflows, and in the cooling process depositing or concentrating the precious metals by precipitation or chemical reaction. Broadly speaking, true minerals are not characteristic of the Boundary country, rather are the sulphide ores found in distinct mineral zones. The entire region, "as on a scroll," tells the tale of its aqueous-igneous origin. Even the observer with a dilettante knowledge of geology will readily perceive that a stupendous series of changes have occurred in the vicinity of Phoenix—set the faded Phoenix of antiquity, but Phoenix, the young colossus destined to have a world-wide fame.

Ten years have barely elapsed since Henry White, an adventurous prospector, almost followed a deer trail up the steep ascent from Boundary Creek. On a warm July day in 1891 he came across an immense outcrop of whose character he could not be deceived. Then and there he located the Knob Hill and Old Ironsides. Twenty years earlier Mr. White discovered the now famous Homestake mine of South Dakota, but failed to locate, considering the distance of 250 miles from transportation too great, besides the territory was infested with hostile Indians. Having succeeded one fortune thru a failure to appreciate the rapid development of the west, he was prepared for any future opportunity. Six years elapsed before the exploitation of these properties was seriously begun. The task of interesting capital was undertaken by Mr. Jay P. Graves of Spokane. The success of Mr. Graves has already passed into history. His association with Mr. H. C. Miner of Grubby, Que., a "captain of industry," resulted in opening up a group of mines not surpassed on the continent. Other investors of Montreal, Boston, New York and Philadelphia, with equal funds, contributed to this great enterprise, controlled by what is known in popular parlance as the Miner-Graves Syndicate. The original group has been added to, and now comprises the Fourth of July, Aetna, Phoenix, Victoria, Grey Eagle, Triangle, Banner and Tip Top. All these properties adjoin one another. The Grey Eagle is the southern extension of the Knob Hill. The total area of the group is practically one mile in length, with a width of 3000 feet. The upper town of Phoenix, with its bustling population of 1200, is situated on the Fourth of July and Phoenix claims. The mineral zone traversing the group has been uncovered on the Old Ironsides, Knob Hill and Grey Eagle. Its precise width has not yet been finally determined, but it will approximate 200 to 300 feet. This zone or deposit (for it can scarcely be called a vein) runs south 68 degrees west, the dip of the footwall being 68 degrees east. Mining in Phoenix reveals minerals that have no parallel elsewhere. Iron deposits in Minnesota are mined on

transfers it to the ore bins, sampler, and finally to the furnace. The economy effected in avoiding re-handling by manual labor is obvious. There would seem to be no limit to the daily output in view of the exceptional facilities afforded for mining simultaneously at half a dozen places on these properties. According to its dip the mineral zone extends thru and beyond the northern portion of the group on which the city of Phoenix is built. This portion of the ground has hitherto been neglected, but can be reached owing to the trend of the hill, from the lower workings of the Old Ironsides. It would not be unreasonable to predict that if circumstances warranted the undertaking, a maximum output of 10,000 tons a day could be reached, a limit far exceeding the capacity of any group of smelters in any one district. As the Old Ironsides is situated further down the hill, its development was accomplished by means of shafts. The original shaft, sunk at the centre of the claim, has attained a depth of 200 feet. It is situated on the side line between the Old Ironsides and the Victoria food 200 feet east of No. 1 shaft. No cross-cutting has yet been done below the 200-foot level. The shaft of the hill, where ore is known to exist, reaches the 200-foot level. Drills have disclosed the same ore body at an additional depth of 602 feet, giving a proven depth of 802 feet vertically. The ore body was first encountered 90 feet east of No. 1 shaft on the 200-foot level, and there ran north and south along the foot-wall 600 and 800 feet. At a point 70 feet east of No. 2 shaft, drifts were run parallel to these foot-wall shafts, and the ore was discovered. On these drifts cross-cuts were made connecting the blocks, and the ore was discovered. There are two of these blocks on the south and one on the north. The blocks have been driven far enough in both directions to make another block of each, but cross-cuts have not been made to make the connections. The length of the main cross-cut on the 200-foot level is 200 feet, and the distance from No. 1 shaft. On this level there are four stopes on Old Ironsides ground, and seven stopes, giving a distance of 720 feet between the north end of the north stope and the south end of the south stope. The distance between the east end of the east stope and the west end of the west stope is 370 feet. On this level a drift was run 1000 feet from No. 2 shaft to a point where an upraise to the surface is now in progress. This upraise will be converted into a central five-compartment shaft, and is fully described elsewhere. At the 200-foot or intermediate level of the Old Ironsides, on the north side of No. 2 shaft is one stope 180 feet long, and so far, at its widest part, it measures 85 feet across, with ore on all sides. This ore is precipitated in the 200-foot level, and is raised by a shaft from No. 2 shaft, a distance of 620 feet. The first stope was commenced 200 feet east of No. 2 shaft, and the writing of the slope is 170 feet long, with an average width of 80 feet, with four sets of timbering and averaging 25 feet in height. From the south end of this stope a drift is being run 200 feet west, and the same drift will also be connected south to meet the new working shaft, No. 2 shaft. Thus far it has attained a length of 130 feet, and width of 25 feet. All this "prospecting" work on the entire group was accomplished with a plant of 20 air drills. An air drill compressor with an additional capacity of 40 drills will be installed during the fall season. W. A. Markin.

Assessment System.

Montreal wholesale trade has been moderately active this week, especially in cereals which are always called for at this season with the first burst of summer heat. In some departments, however, there are signs of trade settling down into midsummer dullness. The condition of the growing crops in the West and the excellent prospects for the make of cheese and butter the present season and activity in other directions all tend to create a buoyant feeling regarding the outlook for fall business. There is a firm feeling in cotton staple goods in sympathy with the advances on the other side of the line. The demand for money is quite active and rates are steady. At Quebec trade conditions show little change over that of the preceding week. No increased activity is noticed in shoe industry, indications for fall business are good, and travelers from various parts of the province continue to send in fair orders. In shipping circles business is still active, but one thing is noticeable—the small shipment of timber, which, at this season, is usually large. The cause is attributed to the scarcity of deals. Remittances from the country are fairly good. There has been improvement in the wholesale trade at Toronto the past week. The hot weather has created a better movement in many seasonable lines. The call from the country for sorting parcels was active all the week, indicating a better inquiry at retail centers, and the aggregate sales were considerably larger than last week. The fine condition of the crops throughout the country is having a good effect on trade, and retailers are inclined to purchase liberally for the fall. Staple goods are firmer in some lines. Cotton goods are steadier as a result of the advances in the United States market. Country remittances have been fair for this season. There is a good demand for money and rates are steady. Business at Hamilton has been a little more active this week, especially in goods suitable for the hot weather and for all sorts of cutting lines. Travelers' orders have been quite large, both for current sales and for the fall trade. The outlook, as generally reported by the wholesale firms, is very encouraging. Values of staple goods continue steady and that is another factor in encouraging purchases by retailers. Trade at the Coast has been moderately active. Some large orders for the Northern mining supply trade have been filled lately, and some round lots of salmon have been cleaned up, both of which have helped to increase the money circulation. Retailers are complaining about dull times, but jobbers report a fair trade going in orders for the mining centres to the north. Should trouble between the fishermen's union and the salmon canners be averted, retail trade should greatly benefit therefrom as soon as the fishing season gets into full swing. The outlook for business is fairly good. Trade at Winnipeg has been greatly stimulated by the splendid prospects for the wheat crop. The rains have interfered somewhat with retail trade in the

LANGUID AND DEPRESSED BY WEARY SUMMER WEATHER.

In these hot summer months, when weary muscles and shattered nerves make you feel so tired, depressed and worn out that you can hardly put one foot before the other, Dr. Chase's Nerve Food will lift you from that horrid overpowering weakness and ever present languor worse than pain. It makes you feel well because it creates the new, vigorous tissue that quickens you into enjoyable life.

Summer Sufferings The Broken Health of Busy Men.

It requires an enormous amount of vitality to withstand the weakening and trying effects of the withering summer weather, to overcome the languid, worn-out feelings and to fight off the fevers and dreadful fatal diseases which are especially prevalent in the summer time and ever ready to attack those in a low state of health. There is nothing so trying on the system as the hot summer weather, and none who suffer more from the heat than the woman with the cares of a family on her hands, requiring work in the hot kitchen and over the stove. Many a worn-out, despondent woman who could scarcely drag herself about the kitchen has been restored to health and strength by the use of Dr. Chase's Nerve Food (pills), the great blood builder and nerve restorative. Mrs. M. A. McCrea, Tory Hill, Ont., writes: "My system was all run down when I began to use Dr. Chase's Nerve Food. I was weak and very nervous and felt so tired and worn out that I could scarcely drag myself about the house. It seemed impossible for me to get rest or sleep at night, and I felt that I was gradually growing weaker and more nervous and irritable. Since beginning the use of Dr. Chase's Nerve Food I feel altogether different. It has gradually strengthened my nerves and built up my system wonderfully. I sleep well now, and am being thoroughly restored to health and strength. I believe it is the best medicine to be had for the nerves." Mrs. S. Dempsey, Albany, Ont., writes: "My little granddaughter, nine years old, was pale and weak, she had no appetite and seemed to be gradually growing weaker. Dr. Chase's Nerve Food proved invaluable in her case, restoring health and color and making her strong and well."

Dr. W. A. Chase's Nerve Food—As a summer medicine to revitalize the brain, the spinal cord, the nerves, and through them the entire human body, Dr. Chase's Nerve Food is unrivalled and unapproached. It increases the number of red corpuscles in the blood, creates new nerve force and entirely overcomes the wretched, languid and worn out feelings of summer. Disease can find no foothold when the blood is kept pure and rich and the nerves strong by using this great restorative. Dr. Chase's Nerve Food, 50 cents a box, 5 boxes for \$2.50, at all dealers or by mail postpaid, on receipt of price, from Edmanson, Bates & Co., Toronto. For chafing, heat rash and itching skin, Dr. Chase's Ointment affords wonderfully prompt relief and cure.
