Painful Disease of the Throat

RESTORED TO PERFECT HEALTH.

PICKERING, ONT., *July 18th, 1871.*

To JAMES H. GERRIE,

DRUGGIST, *Whitby, Ont.*

Sir:—I have much pleasure in giving my testimony to the good effects of BRISTOL'S SARSAPARILLA AND PILLS. After suffering for a long time with a painful disease of the throat, and trying many remedies, I was induced to use BRISTOL'S SARSAPARILLA AND PILLS, from which I quickly began to improve, and am now restored to perfect health.

Yours, etc.,

MARY CLEGG.

IT HAS DONE MORE FOR ME
THAN ANY MEDICINE I EVER GOT.

PLYMPTON, ONT., *May 1st, 1871*

Mr. E. W. POUSSETT,

DRUGGIST, *Sarnia, Ont.*

Dear Sir:—Please send me two bottles of BRISTOL'S SARSAPARILLA by train to Forest, as I have just finished taking the fourth bottle, and am very much better than when I began the last one. It has done more for me than any medicine I ever got from any doctor. I have tried many, and have received but little good; but they never forgot to charge me well for skill; but now, thanks to you for advising me to try the BRISTOL'S, the rheumatism has almost left me, and

I AM A DIFFERENT MAN

to-day from what I was three months ago. I feel quite sure it will cure almost any case of rheumatism.

I remain yours very truly,

J. H. B. HOLT.

 *The highly respectable Druggists whose names are attached to above Certificates, can be consulted as to the truthfulness of every statement made.*

CANADIAN ALMANAC

For 1872.

Eclipses. There will be four eclipses this year.

I. A partial eclipse of the Moon, May 22, not visible in Ontario and Quebec. At Frederickton, the Moon's centre rises three minutes before the eclipse ends, and a mere contact with the earth's shadow may be visible there.

II. An annular eclipse of the Sun, June 5, invisible in Ontario and Quebec. Visible in the Arctic regions of the northwest.

III. A partial eclipse of the Moon, November 14, in the evening, or morning of the 15th. Visible. Size, only one thirty-third part of the moon's diameter, or the northern limb. At Quebec, it begins 14 minutes past midnight of the 14th, and ends at 54 minutes past. At Toronto, it begins at 42 minutes past eleven, evening, and ends 22 minutes past midnight, on the morning of the 15th. At Montreal, 23 minutes later. At Frederickton, 50 minutes later.

IV. An annular eclipse of the Sun, November 30, invisible.

MORNING STARS.

VENUS, until July 15th.
 MARS, after May 17th.
 JUPITER, after August 2d.
 SATURN, to April 10th.

The Head, Aries, The Ram.

Arms, Gemini, The Twins.

Heart, Leo, The Lion.

Reins, Libra, The Balance

Thighs, Sagittarius, The Archer.

Legs, Aquarius, Waterman.

Neck, Taurus, The Bull.

Breast, Cancer, The Crab.

Bovels, Virgo, The Virgin.

Secrets, Scorpio, The Scorpion

Knees, Capricornus, The Goat.

The Feet, Pisces, The Fishes.

EVENING STARS.

VENUS, after July 15th.
 MARS, until May 17th.
 JUPITER, until August 2d.
 SATURN, after April 10th.

Planets Brightest.

MERCURY, January 27th, May 25th, and September 18th, rising before the SUN; also April 2d, July 31st, and November 24th, setting soon after the SUN. VENUS and MARS not this year. JUPITER, January 15th. SATURN, July 9th.

Cycles of Time.

Dominical Letters, G. F. Epact, 20. Solar Cycle, 5. Golden Number, 11. Roman Indiction, 15. Jewish Lunar Cycle, 8. Dionysian Period, 201. Julian Period, 6585.

They all gave me up to Die!

The following is a letter received by the celebrated druggists, Messrs. DEVINS & BOLTON, Montreal :

DEAR SIRS:

OCTOBER 3d, 1870.

During a sickness that lasted three years, I was attended by the best doctors in the country; but after a time they all gave me up to die, and as they were not willing to attend me any more, I resorted to the Bristol's Sarsaparilla, 14 bottles of which have perfectly cured me.

PAUL YAILLE, St. Urbain,
District Beauharnois, P. Q.

The only Perfume for the Bath is Murray & Lanman's Florida Water!

How to GET FAT.—It is a striking fact that persons want to weigh more than they do, and measure their health by their weight, as if man were a pig, valuable in proportion to his heaviness. Thin men, the world over, are the men for work, for endurance; they are wiry and hardy; thin people live the longest; the truth is, fat is a disease, and, as proof, fat people are never well a day at a time—are not suited for hard work. For mere looks, a moderate rotundity is most desirable. To acquire in the shortest time enough of flesh to cover all angularities, a man should work but little, sleep a great part of the time, allow nothing to worry him, keep always in a joyous, laughing mood, and live chiefly on albuminates, such as boiled cracked wheat, and rye, and oats, and corn, and barley, with sweet milk, and buttermilk, and meats, taking occasional doses of **Bristol's Sarsaparilla**. Sugar is the best fattener known.

RIDDLE No. 1.—What animal in the morning walks on four feet, at noon on two, and in the evening on three?

BE POLITE.—Politeness is the poetry of conduct, and, like poetry, it has qualities. Let not your politeness be too florid, but of that gentle kind which indicates refined nature.

Why is it that **Bristol's Sarsaparilla** has so entirely superseded all similar preparations in this country—when but a few years have elapsed since it was brought prominently before the people? Because previous to the time when it was brought conspicuously forward the public were not aware of the extraordinary virtues which it possessed; no sooner were these known than all other Sarsaparillas were dropped, and **Bristol's** became, as it now is, the people's medicine.

If in matrimony you are so unfortunate as to be taken in, don't carry it to the absurd and be done for.

Why is a worn out shoe like Ancient Greece? Because it once had a Solon (sole on).

BREAK OF DAY.—"Come, husband," said the wife of a note-shaving Stock Exchange bear, "it is time for us to get up; the day is breaking." "Well, let it break, I don't hold any of its paper."

In order that we may get correct ideas of external things, it is absolutely necessary that the brain, the nerves, and the organs of sense, through which sensations are made upon the mind, should be in a healthy condition. All these depend on the blood for their health and strength, and it is a well-known fact that **Bristol's Sarsaparilla** is the only reliable and safe blood purifier—hence its great value in all nervous diseases.

Although living in a dense city, thousands of our ladies have their lawns.

When a person declares that his "brain is on fire," is it etiquette to blow it out?

A crusty old bachelor says that Adam's wife was called Eve, because, when she appeared, man's day of happiness was drawing to a close.

Bristol's Sarsaparilla is really a most extraordinary medicine; it subdues inflammatory and feverish symptoms, gives tone and strength to the whole nervous system, and speedily induces that calm equanimity of mind, which is the unflinching evidence of health. In all cases of high fever and severe inflammation, a beneficial result will be greatly expedited by using, as directed, **Bristol's Sugar-Coated Pills** at same time with the **Sarsaparilla**.

Depth of Thought.—Down fifty feet in a well, meditating how you can get up again.

Why do many carpenters really believe there is no such thing as stone? Because they never saw it.

"How do you like my strain?" said a poet. "Oh, I'll pardon you this time, but pray don't strain again."

When is iron like a band of robbers? When it is united to steel.

Give Bristol's Sarsaparilla A fair trial!

Bristol's Sugar-Coated Pills do not contain a single atom of anything that is deleterious or dangerous to health; the active principles which make them so powerfully antibilious are no secret, being Podophyllin and Leptandrin. These two vegetable resinoids are known to every person versed in modern pharmacy, and are now admitted to be equal with calomel in antibilious power, without any of its dangerous effects.

PUZZLE No. 2.—A gentleman, writing to another, mis-spelt the name, and received the following: "My name is spelt thus: Divide 150 by nothing—add two-thirds of 10, and so will the name end." How was it done? and what was his name?

WINE BISCUITS.—Take of flour, half a pound; butter, four ounces; sugar, four ounces; two eggs; carbonate of ammonia, one drachm; white wine enough to mix to a proper consistence, and cut out with a glass.

BATTER PUDDING.—Take of flour, four ounces; bicarbonate of soda, two drachms; a little sugar, and one egg; mix with milk to a thin batter, and bake in a well-battered tin, in a brisk oven, half an hour. A few currants may be strewed in the bottom of the tin if preferred.

There is no source so prolific of the ailments and sicknesses that afflict our everyday life as bilious derangements. From this cause spring headaches, dizziness, sickness of the stomach, costiveness, indigestion, heartburn, bad complexion, jaundice, fevers; besides, all the troubles of the liver, such as pain in the left side and up under the shoulder-blade, inflammation, etc., etc. **Bristol's Sugar-Coated Pills** are a sovereign remedy for every form of bilious trouble.

"The iron has entered my soul," as the fellow said who found a nail in the bottom of his boot.

The Spaniards have a saying: "At thirteen, marry your daughter to her superior; at twenty, to her equal; at thirty, to anybody who will have her."

A learned doctor has given his opinion that tight lacing is a public benefit, inasmuch as it kills off all the foolish girls and leaves the wise ones to grow into women.

It is a fact, not easily accounted for, that at parties, after supper, the guests begin to grow thin.

When did Noah go into the wine business?—He made port about one year after the deluge began.

Doctors talk about paying their visits, when at the same time it's their visits that's paying them.

Pork and beans make muscles strong—
Something farmers seek;
It is a dish to make life long
When cooked but once a week.

Why is an Italian exile returning to his native land like a man going to see his son go up an apple-tree? Because he's going to see his own sunny clime.

The stomach, liver, and bowels are liable to many derangements and diseases, acute and chronic inflammation, jaundice, dyspepsia, colic, costiveness, piles, diarrhoea, dysentery, etc., etc., to cure which requires a medicine that will tone and strengthen each part, that will not reduce the strength while it purges and cleanses—in short, that will assist nature instead of paralyzing her operations. In **Bristol's Sugar-Coated Vegetable Pills** every requirement is met.

I hate the man who is always ready to do a good turn for his neighbor, and obstinately refuses to do anything at home; who gives freely of his time and money to outsiders, and neglects to provide for his wife and children.

LEMON PUDDING.—Beat the peel and juice of a lemon in a mortar, with the yolks of four eggs and a quarter of a pound of white sugar; mix all with five ounces of butter, warmed, and lay it in a dish lined with crust; when cold, turn the pudding out and serve.

An Eastern editor accuses another of having stolen his report of a meeting, which was recognized by certain ear marks. The retort courteous is that the first editor "should tie his ears over the top of his head while writing, to keep them out of the ink bottle."

"Why is the earth like a school blackboard?" "Because the children of men multiply upon the face of it."

Sprinkle your Carpets with Murray & Lanman's Florida Water.

"LET US HAVE PEACE."

From hallowed ground,
From martyr's mound,
From widow's breast,
From grief-oppress'd,
From sire-bereft,
In sorrow left,
From every sod
The slain have trod ;
From every flood
Once tinged with blood,
From plenty-bless'd,
From toil-oppress'd,
From hill and dale,
From every vale,
From vine-clad Rhine
To sunny Seine,
The prayers increase—
"Let us have peace."

Why is it that **Bristol's Sarsaparilla** always acts the same, producing the same beneficial effects in every case, while other Sarsaparillas seem sometimes to relieve, sometimes to aggravate, and again to have no effect whatever? Because **Bristol's Sarsaparilla**, unlike any other, is not prepared from the crude roots, etc., but from the active medicinal parts of each root, leaf, etc.,—those medicinal parts having first been extracted separately, and then mixed in proper chemical proportion.

PUZZLE No. 3.—A man had nine apples; he placed them in ten rows, each row containing three apples. How did he do it?

FIG PUDDING.—Three-quarters of a pound of grated bread, half a pound of best figs, six ounces of suet, six ounces of moist sugar, a teacupful of milk, and a little nutmeg. The figs and suet must be chopped very fine. Mix the bread and suet first, then the figs, sugar, and nutmegs, one egg beaten well, and, lastly, the milk. Boil in a mould. To be eaten with sweet sauce.

How can we purify our blood? There is a medicine which combines within itself the very properties required; its potent influence passes from the stomach into the circulation, and is carried to the minutest veins and arteries; it seizes upon every particle of poisonous morbid matter, neutralizes or expels it, instills new health and vigor over the entire body, and leaves the system in a natural condition. This life-saving remedy is **Bristol's Sarsaparilla**, the oldest and the best of all blood purifiers, tested in all countries and climates, and proved to be the only alternative on which the sick can confidently depend.

Murmurs of the Tied—The grumbings of a married couple.

There's one thing which can always be found, and that's a fault.

Backgammon—A lady's waterfall.

Popular diet in Utah—Spare rib.

Pressed for time—Egyptian mummies.

All kinds of eruptions on the skin are speedily and safely cured by the use of **Bristol's Sarsaparilla**. Its effect is so thoroughly to cleanse and purify the blood and humors, that the virus, which supplies life to all eruptions, is neutralized, and the unsightly affliction passes away forever.

A gipsy woman promised to show two young ladies their husbands' faces in a pail of water. They looked, and exclaimed, "Why, we only see our faces!" "Well," said the gipsy, "those faces will be your husbands' when you are married."

TO WHITEN STRAW HATS.—Scrape stick sulphur with a knife, mix the powder to a mush with water, plaster it thickly over the straw, and place it in the hot sun for several hours; brush off when dry.

It is very difficult to keep your own peace of mind, if people thrust pieces of theirs upon you.

**From an old and much-respected resident
of Brantford, Ont.**

BRANTFORD TOWNSHIP, April 5, 1871.

Messrs. TAPSCOTT & CRAIG, Druggists:

Dear Sirs,—I drop you a line in recommendation of Bristol's Pills. I was troubled with nervous headache and a very weak stomach, and I never before experienced such relief as I found from their use. I advise all suffering with headache or stomach trouble, to use them, and feel confident they will find cause, as I do, to speak of them in terms of unqualified praise,

Yours truly,

ANDREW MITCHELL.

Bristol's Sarsaparilla Cures every form of Scrofula.

Bathe the hot and feverish head with **Murray & Lanman's Florida Water**, and it will become cool and easy; lave the temples with it, and the racking, nervous headache will be relieved.

PUZZLE No. 4.—1802500ay. What sentence does this express?

What's the difference between a chilly man and a hot dog? One wears a great coat and the other pants.

If a man gets up when the day breaks, can he be said to have a whole day before him?

The nation which produces most marriages must be fasci-nation.

A friend of ours, with but one suit to his back (which is enough for any reasonable man), became an editor recently, and now he has three suits. Two of them are libel suits.

The newest style for dressing the hair is called "the Cleopatra." The hair is brushed high off the forehead and braided low in the neck, surmounted by a large imitation snake, which is coiled around the head.

Sprinkle **Murray & Lanman's Florida Water** in the sick-room, and it will soothe and relieve the restless invalid.

A LITTLE RAIN.

How monarchs die is easily explained.

For thus upon their tombs it might be chiselled:

As long as Louis Nap. could reign he reigned,

And then he mizzied!

NICE PLUM CAKE.—One pound of flour, quarter of a pound of butter, quarter of a pound of sugar, quarter of a pound of currants, three eggs, half a pint of milk, a small teaspoonful of carbonate of soda. The above is excellent. The cakes are always baked in a common earthen flower-pot saucer, which is a very good plan.

ARROWROOT BLANC MANGE.—A tencupful of arrowroot to a pint of milk; boil the milk with twelve sweet and six bitter almonds, blanched and beaten; sweeten with loaf sugar and strain it; break the arrowroot with a little of the milk as smooth as possible, pour the boiling milk upon it by degrees, stir the whole, put it back into the pan, and boil a few minutes, still stirring; dip the shape in cold water before you put it in, and turn it out when cold.

The great cause of the wonderful success of **Murray & Lanman's Florida Water** may be found in the fact that the principal aim in its preparation has always been to give the simple natural perfume of flowers, without any chemical additions whatever, and to avoid, by all means, the great error of making a heavy, sickly, sweet perfume.

PUZZLE No. 5.—A and B set out from the same place, in the same direction; A travels uniformly 18 miles a day, and after 9 days turns and goes as far as B has travelled during those nine days; he then turns again, and pursuing his journey, overtakes B 23½ days after the time they first set out. At what rate did B uniformly travel?

AN EPITAPH.

Here lies a friend—would all might prove as true!

Unselfish, steadfast, gentler ne'er I knew.

Throughout all time this stone shall tell his fame—

He had four legs, and Toby was his name.

A young man charged with being lazy, was asked if he took it from his father. "I think not," was the reply; "father's got all the laziness he ever had."

Paradoxical as it may seem, folks in love grow leaner as they increase in sighs.

A "backward spring" is produced by presenting a red-hot poker to a man's nose.

Violets and water-lilies exhale an exquisite fragrance, agreeable to the most fastidious; but in the **Florida Water of Murray & Lanman** it is not to these two floral beauties alone that we are confined; in it we have the full fragrance of a whole bouquet of blooming tropic flowers.

I hate a woman who, when her husband comes home at night tired, and discouraged perhaps with his day's labor and trials, insists upon dragging him out to party or opera, when the lounge or bed appears the only comfort to the exhausted man; and I hate him if he is simpleton enough to dress and accompany her because she cries.

Josh Billings, in one of his late papers, says: "The sun was agoin to bed, and the hevins far and near were a blushin' at the performance."

Murray & Lanman's Florida Water— The Imperishable Perfume.

Podophyllin and Leptandrin, the active principles of **Bristol's Pills**, are acknowledged by all enlightened physicians to be the surest and safest remedy for every form of hepatic or biliary derangement. No other Pill, of which we have any knowledge, contain these invaluable resinoids. Prepared in our own laboratory, under our personal supervision, they insure the unvarying uniformity of operation for which **Bristol's Pills** have become so justly celebrated.

PASTRY SANDWICHES.—Puff-paste, jam of any kind, the white of an egg, sifted sugar. Roll the paste out thin, put half of it on a baking-sheet or tin, and spread equally over it any preserve that may be preferred. Lay over this preserve another thin paste, press the edges together all round, and mark the paste in lines with a knife on the surface, to show where to cut it when baked. Bake from twenty minutes to half an hour, and a short time before being done take the pastry out of the oven, brush it over with the white of an egg, sift over pounded sugar, and put it back into the oven to color. When cold cut it into strips; pile these on a dish pyramidically, and serve. These strips, cut about two inches long, piled in circular rows, and a plateful of flavored whipped cream, poured in the middle, make a very pretty dish.

RIDDLE No. 6.—Nine less ten, with fifty twice told
Is what many feel when they are growing old.

Pretty Teacher—"Now, Johnny Wells, can you tell me what is meant by a miracle?" Johnny—"Yes, ma'am. Mother says if you don't marry our new parson, that it will be a miracle."

Bristol's Sugar-Coated Pills do not depend upon any mineral or dangerous substance for their action upon the liver. They are purely vegetable, and entail no evil consequences upon the patient; they do not dry up the natural humidity of the bowels, thereby causing a continual necessity for further purgation, and the ultimate weakening of the entire excretory organs.

Eugenie's latest dinner toilette:—A plain tarlatan, white, over a white taffeta; nothing but ruche and flounce for ornament. In her hair a bunch of white lilies of the valley, with a few black and red cherries—a most striking combination for a blonde, and suited to her altered state.

"Really, my dear," said poor Mr. Jones to his better half, "you have sadly disappointed me. I once considered you a jewel of a woman, but you have turned out only a bit of matrimonial paste." "Then, my dear," was the reply, "console yourself with the idea that paste is very adhesive, and will stick to you as long as you live."

"My friend, don't you know that it is very dangerous to take a nap while the cars are in motion?" "Why so?" exclaimed the astonished individual, waking up, "why so?" "Because this train runs over sleepers."

"I think," said a wife, who could not agree with her husband. "I think, Mr. Gibbs, we had better divide the house; you shall live on one side and I on the other." "Very well, my dear," replied he, "you take the outside, and I'll take the inside."

"Husband, I hope you have no objection to my getting weighed?" "Certainly not, my dear; but why do you ask me that question?" "Only to see, my love, if you would allow me to have my way once."

Bristol's Sugar-Coated Pills are a remedy on which the sick and ailing can always depend. Their effect is to tone and strengthen the liver, to stimulate it in its continuous, natural, and healthy action; to prevent torpidity, to keep the bile from coagulating or becoming thick and sticky, which is always the condition in certain stages of liver complaint, being the preliminary to the formation of gall stones, and the most excruciating pain in their passage into the bowels.

Men are frequently like tea—the real strength and goodness is not properly drawn out of them until they have been a short time in hot water.

Irate Hibernian.—"Waiter! Them pitatees isn't riddy!" Waiter.—"Verry sorry, sir. Cook's been a-billin' 'em these two hours." Irate Hibernian.—"Two hours, is it? Faix, it's cold water she's been b'illin' 'em in thim."

It is altogether untrue to say that "man is not perfect." Who is there that has not met with many who were *perfect* strangers, and some who were *perfect* rascals, and not a few who were *perfect* fools?

We knew a girl so industrious that when she has nothing else to do she knits her brow.

Murray & Lanman's Florida Water Relieves all Nervousness.

The Spanish journals state that Queen Isabella, during the thirty-five years of her reign, received \$88,500,000 in gold for her personal expenses.

FASTIDIOUS.—A young lady refused to visit the Springfield Arsenal the other day, because she had heard that some of the muskets were without breeches.

Unhealthy blood supplies unhealthy nourishment to the bones, and, of necessity, must produce unhealthy or diseased bones; and the very first step toward a cure must be taken through the blood and humors. It will be all in vain to blister and bleed and poultice and bathe, if the internal life-fluids are diseased. **Bristol's Sarsaparilla** is the safest, speediest, and surest of all purifiers of the blood and humors.

Good motto for merchants and manufacturers, and tradesmen generally:

“Early to bed—early to rise—
Never get tight—and advertise.”

PUZZLE No. 10.—A fox, 90 rods due south of a greyhound, is pursued by the hound at the rate of 5 rods to 4 of the fox, the fox running a due east course. How far will the hound run to overtake the fox?

“How long do you wear a shirt?” severely asked an inspecting officer of a soldier whose shirt was too dirty for dress-parade. “Twenty-eight inches, sir,” was the respectful reply.

Much suffering is often caused by gravelly formations in the kidneys or ureters, and the treatment should be prompt and effective. Either cover the soles of the feet with mustard-plasters, or immerse the feet and legs up to the knees in hot water, with half a pound of mustard mixed in it; at the same time apply to the small of the back a large mustard poultice, and follow it up with hot fomentations of hops, making a diet drink of strong linseed tea mixed with one-fourth part of **Bristol's Sarsaparilla**, to be used freely.

A CURIOUS HYMN.—Lines taken from a hymn-book which a young lady incautiously left behind her in church:

“I look in vain—he does not come,
Dear, dear, what shall I do?
I cannot listen as I ought
Unless he listens too.

“He might have come as well as not—
What plagues these fellows are!
I'll bet he's fast asleep at home,
Or smoking a cigar.”

A telegram was lately sent from London to Teheran in Persia, 3700 miles, and an answer received in thirty seconds.

It is said that the three highest mountains on the globe are Gaurisankar of the Himalaya range, 29,380 feet; Dapsang, in Western Thibet, 28,730 feet; and Ranchinjing, in Eastern Thibet, 28,600.

A Paris paper describes some of the contents of the Sultan of Turkey's treasury. The emeralds are said to be the largest in the world, and the pearls are unique in size and beauty. One of them—resembling in shape a pear—and white as snow, is three-quarters of an inch in diameter, and a single emerald weighs 125 ounces. Among other treasures in this collection are a brooch, ornamented with 280 large diamonds, a dagger enriched with jewels, and containing an emerald of 300 carats in weight, and several necklaces of rubies and pearls, the latter as large as pigeons' eggs.

The following are some of the diseases which affect the bones, viz., Rickets, Spinal diseases, Tumor of the Bone, Acute and Chronic Inflammation, Softening, Caries or Ulceration, Necrosis or Mortification, Exfoliation, Cancer of the Bone, Hip-joint disease, and White Swellings. The first and second of these diseases are in many cases the result of carelessness and accidents during childhood. But with the remainder, the true cause is generally to be found in a scrofulous condition of the blood and humors. **Bristol's Sarsaparilla and Pills** are the true remedies: they cleanse, purify, and strengthen all the vital fluids on which the bones depend for life.

Some alarmingly stupid fellow wants to know if there was ever such a thing as an eclipse of the honeymoon.

A REALLY GOOD THING!

MONTREAL, July 29th, 1871.

GENTLEMEN :

I tender you my thanks for the great benefit received by me from your Bristol's Sarsaparilla, which has entirely cured me of a bad case of Salt Rheum, that had defied all treatment for years. Having found your Sarsaparilla a really good thing, I cheerfully recommend it to all afflicted as I was.

Respectfully yours,

ALEX. BALLIER.

Murray & Lanman's Florida Water The Great Purifier.

RICE PUDDING WITH FRUIT.—In a pint of new milk put two large spoonfuls of rice well washed, then add two apples pared and quartered, or a few currants or raisins; simmer slowly till the rice is very soft, then add one egg, beaten, to bind it. Serve with cream and sugar.

STRAWBERRY ICE CREAM.—Take one pint of strawberries, one pint of cream, nearly half a pound of powdered white sugar, the juice of a lemon, mash the fruit through a sieve and take out the seeds; mix with the other articles and freeze. A little new milk added makes the whole freeze more quickly.

Why is it that **Bristol's Sarsaparilla** is so much more successful in curing disease than other preparations said to be made from the same root? Simply because it has more medicinal power or strength, and is made of better materials than any other so-called Sarsaparilla.

ON THE CHOICE OF A HUSBAND.

The love of power, old records show,
So deep in female bosom lies,
That Scythian women, long ago,
Put out for this their husbands' eyes.

And now the same desire to rule
Makes many a woman wed a fool,
Who wants, though not in body blind,
The better eyesight of the mind.

A great mistake! by sad experience schooled,
They learn, too late, that fools will not be ruled,
Wise men, who seek and value quiet lives,
Wise men alone are governed by their wives.

Rheumatism, no matter how long it may have existed, or how severe it may be, is to a perfect certainty removed by the use of **Bristol's Sarsaparilla**.

How to LIVE LONG.—Eat and drink and be comfortable. Never go to excess, and always be hopeful. Take occasional doses of **Bristol's Sarsaparilla and Pills**. Let the world wag as it will, be happy. If it goes well, laugh; if it goes ill, never cry, for that makes it no better. Be cheerful, contented, simple in habits, active in pursuits, wish well to man, and have faith in God. Then shall your years stretch out like a summer's day.

How does a statue exposed to the rain become diminished in size? It is a statue *set* (statuette).

Why is the letter "n" of more value than cream to a dairymaid? Because it makes "better" "butter."

All who are exposed to changes of weather, bad water, and decaying vegetable exhalations, will find in **Bristol's Sarsaparilla** a safer, better, and more certain preventive and remedy than any other article ever offered for sale.

PUZZLE No. 19.—A number of pigeons sat upon the branches of a tree, when a hawk passed near and saluted them, saying, "Good morning, you 100 pigeons." But they replied, "We are not a hundred; but we are as many more, and half as many more, and quarter as many more as we are, and you included, would make one hundred." How many pigeons were upon the tree?

Miners, laborers, farmers, and all others exposed to changes of weather, will find a perfect safeguard in an occasional dose of **Bristol's Sarsaparilla**.

Why is a pretty girl like a locomotive engine? Don't give it up—there are plenty of reasons. She sends off the sparks, transports the mails (males), has a train following her, and passes over the plain.

* A water-proof liquid for boots and shoes may be made of the following articles: Linseed oil, one pint; suet, eight ounces; beeswax, six ounces; resin, one ounce. Melt together.

Rheumatism, and all pains in the joints and bones, are quickly and permanently cured by the use of **Bristol's Sarsaparilla**. We have certificates from many persons, of the highest respectability, proving this fact.

A man is a mere telescope in a woman's hands. She draws him out, looks him through, shuts him up, and shelves him.

The man who "came within an ace of it" got euchred.

There is no other Perfume equal to Murray & Lanman's Florida Water.

A matter-of-fact philosopher asserts that "love is to domestic life what butter is to bread—it possesses little nourishment in itself, but gives substantial a grand relish, without which they would be hard to swallow."

After an attack of kidney or bladder disease, the bowels must be kept open by a gentle purge for some months, so as to assist the kidneys in carrying out of the system those morbid matters that would tend to a recurrence of the trouble. For this purpose, **Bristol's Pills** stand unequalled. They do not contain any mineral substance, nor anything that can irritate or inflame the system.

MODERN DEFINITIONS.

Head, *n.* a portion of the human body intended by nature to produce hair and contain brains, but frequently as empty inside as it is bare out.

Health, *n.* one of two elements—the other being wealth—which, when combined, form a pleasant effervescing mixture, called human happiness.

PUZZLE No. 9.—1 y 1 own II. Read this, if you please.

ABOUT So.—"My son," said the elder Spriggles to his junior, thinking to enlighten the boy on the propagation of the hen species—"My son, do you know that chickens come out of eggs?" "Do they?" said Spriggles junior, as he licked his plate, "I thought eggs came out of chickens."

A carpet in which all the colors are light, never has a clean, bright effect, from the want of dark tints to contrast and set off the light ones. For a similar reason, carpets the colors of which are all of what artists call middle tint (neither dark nor light), cannot fail to look dull or dingy, even when quite new. To be really beautiful and in good taste there should be, as in a picture, a judicious disposal of light and shadow, with a gradation of very bright and of very dark tints, some almost white, and others almost or quite black.

Bristol's Sugar-Coated Pills are the most reliable of cathartics, yet their operation, while it is thorough, is also mild and soothing; and to keep the blood up to the standard of health, and to dissolve any gravelly accumulation, **Bristol's Sarsaparilla** should be occasionally used for some months after recovery from kidney or bladder troubles.

Why is the water-wheel a paradox? Because, while it cannot move without a head of the water, it never gets a head of the water, and yet is always moving.

The word flirt is said to be a corruption of *ma fleur* (my little flower), a term applied to their young lady friends by the gallants of Louis XIV.'s court.

Woollen cloth should be washed in very hot suds, and not rinsed. Lukewarm water shrinks them.

Charcoal powder will be found a very good thing to give knives a first-rate polish.

If you have blue eyes, you need not languish; if black eyes, you need not stare; if you have pretty feet, there is no occasion to wear very short petticoats.

A western editor had a remarkable dream. Here it is:

I had a dream the other night,
When everything was still;
I dreamed that each subscriber
Came up and paid his bill.
Each wore a look of honesty,
And smiles were round each eye;
As they handed me the stamps
They yelled, "How's that for high?"

The powerful antibilious properties of **Bristol's Pills** are not their only virtue; they are besides a splendid tonic, a thorough yet safe cathartic; a sure cure for indigestion and dyspepsia, safe for the weakest, yet strong enough for the most robust. In short, they are an unfailing source of good health to those who use them, without any of the griping, sickening, or weakening effects produced by the operation of other Pills.

Does a man consider a woman a poem when she is a-verse to him.

Why cannot a medical man ever be "wide-awake?" Because he's always dosing. Somebody says, "A wife should be like a roasted lamb—tender and nicely dressed." A scamp adds, "and without any sauce."

"What flower of beauty shall I marry?" asked a young spendthrift of his miserly governor; to which the governor replied, with a grim smile: "Mari-gold."

Bristol's Sarsaparilla Was established in 1832.

ANSWERS TO RIDDLES AND PUZZLES IN 1871 ALMANAC:

No. 1.—Time.

No. 2.—It is done thus

15

36

47

98

2

100

No. 3.—The fish that swallowed Jonah.

An Arabian having brought a blush upon a maiden's cheek by the earnestness of his gaze, said to her, "My looks have planted roses in your cheeks; why forbid me to gather them? The law permits him who sows to reap the harvest."

Moss-rose and jessamine, exquisite in their odors, are yet poor by comparison with the clouds of incense that arise from **Murray & Lanman's Florida Water**, so justly styled "The Queen of Floral Perfumes."

PUZZLE No. 8.—Two men have an 8-gallon cask full of wine, which they desire to divide equally between them. How can they effect this division, provided the only measures they have are a 5-gallon cask and a 3-gallon cask?

Does a fish ever sleep? and if not, what was the use of making a bed to the sea?

A cynical pedagogue gives it as his opinion that now-a-days ladies seem to treat their waists as vulgar fractions—to be reduced to the lowest terms.

APPLE CUSTARD.—Take a pint of boiled apples, and mash them as fine as possible. Add the yolks of six and the white of three eggs, well beaten; one teacupful of sweet cream, a little rose-water, some nutmeg, cinnamon, and a small lump of butter. Mix altogether, and sweeten it well. Then make a good crust. Pour in the mixture, and bake in an oven.

Of the various luxuries which go to make up the enjoyments of civilized society, there is probably not one which can claim so great an antiquity, or such exalted authority for its use, as perfume. **Murray & Lanman's Florida Water** is the most delightful and refreshing of all perfumes, ancient or modern.

Retail trade—Putting new skirts on old coats.

A tombstone in Maine, erected to the memory of a wife, bears the inscription:—"Tears cannot restore her, therefore I weep."

The height of politeness is passing round upon the opposite side of a lady, when walking with her, in order not to step on her shadow.

OYSTER PIES.—To 75 oysters take two boiled eggs (the yolks chopped) and some bread crumbs mixed in with them. Add some butter to the oysters, as much pepper as you like, twelve cloves, some mace, and one onion. Fill your pies, put the top crust on, and bake them in the oven half an hour. This recipe is sufficient in quantity for two pies.

What river in Bavaria answers "Who is there?"—Isar (I, sir).

Why is a candle-maker the worst and most hopeless of men? Because all of his works are wicked, and all his wicked works are brought to light.

Murray & Lanman's Florida Water, for use in the bath, has no equal and no substitute—so invigorating! so refreshing! so bracing! But as there are counterfeits, buyers should always ask for **Murray & Lanman's Florida Water**, prepared by LANMAN & KEMP, sole proprietors, New York.

Those who are fond of logical entanglements, and can appreciate their felicitous unravelment, will be pleased at a trait recorded in proof of the acuteness of old Mendelssohn, the philosopher, as the father of the great composer was called. In his presence some young sophist propounded this paradox: "If the saying that there is no rule without an exception be true, how fares it with the truth of that maxim itself?" Mendelssohn's way out of the dilemma was that "in the case in point, the rule was its own exception." It takes some time to see it, when you are not accustomed to dialectics, but the answer is perfect.

Reynolds, the dramatist, observing the thinness of the house at one of his pieces, said: "I suppose it is owing to the war." "No," was the reply, "it is owing to the piece."

They Prefer it to any other Perfume!

STADACONA VILLAGE, Quebec County,
July 2, 1870.

L. N. ALLAIRE, Esq., Quebec City.

* Dear Sir,—I would feel obliged if you would send me, at your earliest convenience, five cases of Murray & Lanman's Florida Water. The last lot I received from you gave full satisfaction, and consumers prefer it to any other perfume.

B. H. CAINE.

For
Call

Bristol's Sugar-Coated Pills Are purely Vegetable.

An exchange says: "Persons who use kerosene lamps will be glad to know that if the wicks are soaked in vinegar twenty-four hours and thoroughly dried before being inserted, all smoke will be avoided, the wicks will last twice as long, and increased brilliancy of light will be obtained."

In all diseases of the bones or muscles **Bristol's Sarsaparilla** is the best of remedies. Its potent power has time and again been fully tested in such cases, and always with the best results. Hundreds of persons are now walking upon healthy, natural limbs, who, but for **Bristol's Sarsaparilla**, would have been maimed by the surgeon's knife. To all who suffer with such diseases, we say, in good faith: Try this great remedy—it is worthy of your confidence, for it has within it more healing virtue than any other remedy we ever knew.

PUZZLE No. 12.—There was a poor blind beggar who had a brother; the brother died, but the man who died had no brother. What relation was the beggar to the man who died?

Say, which enjoys the greater bliss,
John, who Dorinda's picture kisses,
Or Tom, his friend, the favored elf,
Who kisses fair Dorinda's self?

Faith, 'tis not easy to divine,
While both are thus with rapture fainting,
To which the balance should incline,
Since Tom and John both kiss a painting.

HORSE RADISH POWDER.—Take up the roots in November or December, dry them carefully with a gentle heat, and reduce to powder.

Through the human heart all the blood in the body—about 28 pounds—passes once in about one and a half minutes; and when we consider that the heart works in this way through our whole lives, resting not day or night, we cannot wonder that it gets out of order. Fortunately, there is a potent remedy for many forms of heart disease—**Bristol's Sarsaparilla and Pills**, in moderate doses, cannot injure any one, and in a majority of cases will give immediate relief.

OPTICAL DELUSION.—You think the upright line is longer than the horizontal one, don't you? Measure them.

A fashion article in a Wisconsin paper describes the suit of an Indian boy five years old. It consists of a garter tied around the left leg.

What medicine does a man take when he has a cross wife? Elixir.

LEMONADE.—Shave the rind of two lemons very thin, into a jug, remove all the pith, and cut the fruit into thin slices. Add sugar according to taste, and pour over all a quart of boiling water. Drink either hot or cold.

Purify, cleanse, and enrich the blood with **Bristol's Sarsaparilla**. It is the safest and best of all medicines in spring and summer.

Don't go to church with a cough and disturb the rest of the congregation.

The oldest books on record are volumes of water, and they circulate all over the world.

"Uneasy lies the head that wears a crown." A head would be very uncomfortable without one.

Better trust all and be deceived,
And weep that trust, and that deceiving,
Than doubt one heart, that, if believed,
Had blest one's life with true believing.

WHITE CURRANT JELLY.—After the fruit is stripped from the stalks, put it into the pan, and when it boils run it quickly through a sieve, take a pound of sugar to each pint of juice, and let it boil twenty minutes.

For every pleasurable emotion we enjoy we are indebted to our nerves; and as pleasurable sensations improve the health and temper, unpleasant ones do just the opposite—they break down the health. The best of all medicine for the nerves is **Bristol's Sarsaparilla**. It tones and strengthens them more surely than any other nerve.

Bristol's Sarsaparilla prolongs Life!

It has been said that "old dog Tray is ever faithful;" but it is well known that a faithful dog will never be-tray.

A young lady gives her excuse for using a parasol in these words: "I raise my parasol to parry Sol's rays."

Within the past few years it has become the fashion, when entertaining among the refined and cultivated societies of Europe, to sprinkle **Murray & Lanman's Florida Water** on the floors of the drawing-rooms; and so highly is the custom esteemed, that where it is not done, public opinion condemns the omission as a lack of courtesy and attention to the enjoyment of the guests.

PUZZLE No. 14.—Add two strokes to / / / and make nothing;

ABOUT KID GLOVES.

A glove should be large enough, without being too large. If one will only take time to put on a glove, it will fit much better not to use a stretcher, but to make all the expansion by the hand. How many misshapen hands we see in fine kid gloves!—hands whose symmetry is all destroyed—hands so bound up as to be of the same size across the knuckles as at the wrist—hands so stiff, that not only all graceful motion is lost, but it is impossible for them to be closed without splitting the back of the gloves.

Murray & Lanman's Florida Water is a peculiar perfume, quite different from Cologne, suited for the handkerchief, the toilet, and the bath—it stands alone, unequalled and unique.

What is the difference between a chemist and an alchemist? One is an analyzer (Ann Eliza), and the other is a charlatan (Charlotte Ann).

CAPITAL PUNISHMENT.

Old Master Brown brought his ferule down,
His face was angry and red;
"Anthony Blair, go sit you there
Among the girls," he said.

So Anthony Blair, with a mortified air,
And his head hung down on his breast,
Went right away and sat all day
By the girl who loved him best.

Beanties often die old maids. They set such a value upon themselves that they don't find a purchaser before the market is closed.

That **Murray & Lanman's Florida Water** is possessed of sterling excellence is best proved by the wonderful and ever-increasing demand, and by the universal favor which it meets from the refined and educated of all countries and all climates.

Iron rust is removed by salt mixed with lemon juice. Mildew, by dipping in sour buttermilk and laying in the sun. Ink stains may be sometimes taken out by smearing with hot tallow, left on when the stained article goes to the wash. Freezing will take out old fruit stains, and scalding with boiling water will remove those that have never been through the wash.

What kind of springs should be always running, and yet always dry? Watch springs.

At a bachelor's dinner, recently, a crusty old wit gave this toast: "Matrimony—the maiden's prayer and the widow's might!"

A dandy, with a cigar in his mouth, entered a menagerie, when the proprietor requested him to take the cigar from his mouth, lest he should learn the other monkeys bad habits.

What is the difference between an editor and his wife? Why, one sets articles to rights, and the other writes articles to set.

Murray & Lanman's Florida Water has a delightfully fragrant aroma, distinct and different from that of any other fragrant water. Its great peculiarity is its wonderfully refreshing effect. Whether used on the handkerchief, at the toilet, or in the bath, the invigorating influence exercised is marked and unmistakable.

Who brews a quarrel may bruise his head.

Strange that a dull set of people never appreciate the dulcet notes of a melody.

Bristol's Sugar-Coated Pills Tone the Stomach and strengthen the Bowels.

SUCCOTASH.—Take one dozen ears of green corn, cut the grains from the cob, add one quart of Lima beans, and mix with the corn; put it on to boil in three quarts of water, with one pound of pork, cut very small; add black pepper and salt to taste. When the water has boiled away to one-half the original quantity, serve in a tureen as soup.

The special office of the kidneys is to draw or strain off from the body those useless worn-out particles which contain nitrogen, while the liver takes away those carbonaceous matters which have no nitrogen. **Bristol's Sarsaparilla and Pills** are unquestionably the best of remedies for stimulating the kidneys without inflammation, and for invigorating the liver without injurious reaction of any kind.

"I will preach from dat portion of de Scripture dis evening," said a colored domine, "whar de 'Postle Paul p'int's his 'Pistle at de 'Pheesians."

QUESTION No. 15.—What is that which burns to keep a secret?

Lodger—"Somebody called in my absence. Did he leave his name?" Servant—"O yes, sir, he said it was Immaterial."

A publisher has sent us "The Secrets of the Art of Dyeing." If he would send us "The Secret of the Art of Living," it would be more useful just now.

The bones are subject to the same laws that govern the other parts of the body. They are supplied with blood-vessels and nerves, and are liable to become diseased and die. Scrofulous and syphilitic poison in the blood is the great cause, and the surest cure is **Bristol's Sarsaparilla**, the great blood purifier.

CURRENT JELLY.—Take ripe currants, string them, place them in a jar, and immerse the jar in hot water, and let them scald for some time; then squeeze them through a flannel bag; add a pound of sugar to a pint of juice; dissolve the sugar and boil it twenty minutes, skimming it all the time; put it in the glasses while warm. When cold seal it up.

Spring hats should be trimmed with hops.

What part of France attracts the most attention? The Bonapartes.

What State is high in the middle and round at both ends? O-hi-o.

"And you have married a Mr. Penny," said a gentleman to a lady of his acquaintance. "No—Mr. Pence." "Ah, you have done better than I thought."

To have a sound brain you must have healthy blood; for its nourishment the brain requires and receives one-tenth of all the blood in the body, and if this life fluid is not pure and healthy, how is it possible for the great centre of our sensations to act in a natural or healthy manner? **Bristol's Sarsaparilla** is the surest, safest, and best of all blood purifiers.

The Mahometan era began with the day after the flight of Mahomet to Medina; which event occurred in the night of Thursday, July 18 (N.S.), 622 A.D. The year consists of 12 months, embracing 12 lunations, or 354 days. The intercalary, or leap-years, consist of 355 days. In a cycle of 30 years there are 19 common and 11 leap-years. Since the Mahometan year is 11 days less than the tropical year, "it is obvious that in about 33 years the above months will correspond with every season and every part of the Gregorian year." The ninth month is the month of fasting.

Josh Billings says that "The lion and the lamb may possibly sumtime lay down in this world together for a fu minnits. but when the lion kums to git up the lamb will be missing."

TO FRY LIVER.—It should be cut across the grain in slices half an inch thick. Then put into a deep plate, and pour boiling water over it. Let it lie thus for a few minutes, drain it, and season with pepper and salt. Dip each piece in flour, and drop in hot lard. Let it be thoroughly done, but not hard. Make a gravy as for beef, and pour over it.

Have you an old sore that troubles you very much, and which you have been unable heretofore to heal? If so, try **Bristol's Sarsaparilla**, and our word for it, you will soon be healed.

A mechanic his labors will often discard,
If the rate of his pay he dislikes;
But a clock—and its case is uncommonly hard,
Will continue to *work* though it *strikes*.

IT IS AN INFALLIBLE REMEDY!

QUEBEC, June 30th, 1871.

Messrs. POTVIN & LECOMTE:

Gentlemen,—Send me one dozen more of the Bristol's Sarsaparilla; my desire is to keep it constantly in the house, as I believe it to be an infallible remedy, especially for every kind of fever, and debility of the nervous system.

Your obt. servant,

LAWRENCE LAWSON.

May 13th Evening Gate of Grenville Locks in Place May day

The Friend of the Afflicted, Bristol's Sarsaparilla.

Laziness is a good deal like money, the more a man has of it the more he wants.

The latest fashion for gentlemen is for them to wear a scarlet ribbon tied in the button-hole in place of a bunch of flowers.

To sprinkle the carpets with **Murray & Lanman's Florida Water** is now the height of fashion. It certainly adds very much to the enjoyment of your guests.

A YOUNG LADY'S SENTIMENTS.—If it was not good for Adam to live single when there was not a woman on earth, how very criminally guilty are old bachelors, with the world full of pretty girls!

VEGETABLE SOUP.—Take a white onion, a turnip, a pared potato, and a head of celery, or a large teaspoonful of celery seed. Put the vegetables into a quart of water (adding a little salt), and boil it slowly till reduced to a pint. Make a slice of nice toast, lay it on the bottom of a bowl, and strain the soup over it.

[*New York Gazette of Fashion, for January.*]

"We have never known any article of the toilet which has received such universal commendations as **Murray & Lanman's Florida Water**. It is certainly the most fragrant and lasting of perfumes."

The Most Pompous Soldier ever Known—General Importance.

Knowledge and timber shouldn't be much used till they are seasoned.

PUZZLE No. 18.

The father of the Grecian Jove ;
A little boy who's blind ;
The merriest man in all the world ;
The mother of mankind ;
A poet whose love-sonnets are
Still very much admired.
The initial letters will declare
A blessing to the tired.

The French and English perfumes have each a special use—one is for the Handkerchief, another for the Toilet, and a third for something else ; but with **Murray & Lanman's Florida Water** there is no such limit. It is the best of all Perfumes, alike for the handkerchief, the toilet, and the bath.

Volage, who is a single man, is generally considered honest, but says there are times when his fingers have itched to hook a dress.

TO REMOVE COFFEE STAINS.—Mix the yolk of an egg with a little milk-warm water, and use it as soap on the stain. For stains which have been on the material some time, add a few drops of spirits of wine to the eggs, and apply it.

ALL KINDS OF RINGS.

There's the anvil's Ring when the strong smith strikes,
There's a Ring in the sweet church bells,
There's the Ring of the miser's cherished gold,
And the Ring that of true love tells.

There's a Ring when Fisk puts his armor on,
A Ring when Morrissey fights,
There's Saturn's bright Ring, and the whisky Ring,
And a Ring of Gladstone's and Bright's.

Many perfumes are injurious to health, but **Murray & Lanman's Florida Water** is quite the contrary ; it revives and invigorates the weary and fatigued, and is really beneficial in every way.

Cheap articles—Good advice and promises.

Generally attended to—Other people's business.

Corry O'Lanus says:—"Homer was an original Greek, you know ; his family name was O'Meagher, but was abbreviated into O'Mer, which some wretched Englishman pronounced ho'Mer, and it has been spelled that way ever since."

RESPECTABLE.—"I think you must allow," said a pompous gentleman, "that my jests are very fair." "Sir, your jests are like yourself," was the quick retort ; "their age renders them respectable."

The Great Blood Purifier, Bristol's Sarsaparilla.

1776 AND 1872.

1776.

Farmer at the plough,
Wife milking cow,
Daughter spinning yarn,
Son threshing in the barn,
All happy to a charm.

1872.

Farmer gone to see the show,
Daughter at the piano,
Madam gaily dressed in satin,
All the boys learning Latin,
With a mortgage on the farm.

By regular use of **Murray & Lanman's Florida Water** at the toilet it tends to prevent and remove wrinkles, the softness of skin produced by its use taking away the natural inclination of the cuticle to form into ridges and furrows. Besides, it is really the most delightful and efficacious of toilet waters, everything entering into its composition being of the finest quality, and so combined to secure their best effects. It never changes nor alters, keeping for any length of time, and in any climate, as delicate and fresh as at the moment of its preparation.

Why is Liverpool like benevolence?—Because it is founded on Mersey (mercy).

PUZZLE No. 26.—Divide this square into five parts, four of which shall be equal, and have two dots in each of the equal parts and eight dots in the fifth part.

Too TRUE!—The man who is awfully *urbane* to his wife before strangers is generally also "*her dane*" behind their backs!

Why is natural politeness like flour? Because it is in bread (inbred).

If a gentleman marries, the lady must be won before they are married—afterward they are both one.

Beautify the complexion by using **Murray & Lanman's Florida Water**. It is the most healthful and safe of all cosmetics, containing no deleterious ingredients, being prepared solely from the rich floral perfumes of nature, unadulterated by any foreign substance whatever. It is suited for use by the blonde and brunette alike, imparting that beautiful, clear softness to the skin so much admired in the fair sex.

WANTED.—A garment to cover the naked eye.
The hammer which broke up the meeting.
The animal that drew the inference.

A good way of cleaning oil-cloth is to sponge it well with skim milk, as it brightens and preserves the color.

Dirty knives should be wiped before cleaning; and the handles should never be put in hot water; it loosens them and causes the ivory to become yellow.

Fish napkins that have been used should be put to soak in water all night and washed out next morning. If allowed to dry with the grease in, they become discolored, and no ordinary bleaching will restore them.

It is now nearly twenty-five years since we first introduced to the notice of the public our celebrated **Murray & Lanman's Florida Water**. The name was then unknown, and the difficulties to be overcome were very great. The markets of the world were filled with the productions of the perfumers of Germany, France, and England, and to the casual observer no opening seemed to exist for a new perfume, yet to-day it is probably sold more extensively than any other article of the kind on the globe. The result of its sterling excellence alone.

CONFIRMED LIVER COMPLAINT

CURED BY

Bristol's Sarsaparilla and Pills!

SAINT ELZEAR, P.Q., April 15th, 1871.

MR. GIROUX:

After three years' suffering with Liver Complaint, which produced a severe pain in the side, destroying my appetite and rendering my respiration very difficult, I find myself to-day perfectly cured in accordance with your statements.

Since the beginning of the complaint, I applied to the best physicians for relief, but without any success, and if to-day I enjoy the good health that I had lost, I must declare that I am indebted for it to your good advice, and specially to the gentlemen who manufacture the Bristol's Sarsaparilla and Pills, of which two bottles of the former and two vials of the latter have been sufficient to cure me radically.

Therefore I advise all those persons who suffer from the same complaint to try Bristol's Sarsaparilla and Pills, and I have no doubt that they will obtain the same benefit that I did.

I remain, dear Sir,

Your very obliged servant,

PIERRE LETOURNEAU,

Farmer.

To A. GIROUX, Esq.,
Druggist, Levis.

INFLAMMATORY RHEUMATISM

OF SEVEN YEARS,

Completely Cured!

SAINT FRANÇOIS, P. Q., May 7th, 1871.

MR. GIROUX,

Druggist, No. 26 Place du Marche, Levis:

I hasten to let you know that I am to-day completely cured of the rheumatism, which during seven years had rendered me unable to attend to my business.

For the health I am enjoying to-day, I confess that I am obliged to you, Mr. Giroux, and to the four bottles and four vials of Bristol's Sarsaparilla and Pills, which you advised me to take, and which I bought in your drug store.

The cure that I have obtained through those remedies compels me to praise them to all those who suffer with inflammatory rheumatism.

I remain, dear Sir,

Your grateful patient,

JOSEPH DUFOUR,

St. François, Comté de Beauce.

I discarded all others, and put my faith in BRISTOL'S SARSAPARILLA!

QUEBEC, July 7th, 1871.

Gents,—If my case is not a miracle, it certainly is very near it. Brought nigh to the grave, after long suffering, by ulcerous scrofula, which seemed to have poisoned my blood from my feet to my head, and having tried and tried one medicine after another in vain, I was, as a last hope, induced to use Bristol's Sarsaparilla; but I had not taken more than two bottles, when I felt that a great change was taking place in my system. I persevered, discarded all others, and put my faith in it, and it has brought me out all right. After using 23 bottles, I find myself sound and healthy in every part.

Yours, M. P. LALLAMAND.

The most exquisite of all Perfumes is Murray & Lanman's Florida Water.

Think'st thou the man whose mansions hold
The worldling's pomp and miser's gold,
Obtains a richer prize
Than he who, in his cot at rest,
Finds heavenly peace a willing guest,
And bears the promise in his breast,
Of treasure in the skies?

In the practice of the family physician there is but one recognized remedy for Liver Complaint, and that is mercury, sometimes given in the form of blue-mass, sometimes simply as hydrargyrum; and again as bi-chlorid or calomel; but, in whatever form, or under whatever name, it is still mercury, which, unfortunately for the patient, while it relieves his bilious difficulty, generally entails upon him other diseases more serious and dangerous in their ultimate effects than the original trouble. **Bristol's Sugar-Coated Pills** will be found fully as efficacious as the calomel, and without any of its dangerous effects.

Why is a large, fresh egg like a virtuous deed? Because it is a good egg sample.

POOR MAN'S HARD SOAP.—Put in an iron kettle 5 lbs. unslacked lime, 5 lbs. soda, 3 gallons soft water, let it soak one night; in the morning pour off the water, then add to the water 3½ lbs. of grease, boil till thick, turn into a pan to cool, when cool, cut in bars.

Tailor's revenge—Giving a customer fits.

What is always invisible, yet never out of sight? The letter s.

What was the earliest tubular bridge? The bridge of the nose.

What was the earliest musical instrument? The nasal organ.

A CEMENT made by dissolving rubber, cut fine, in benzine, may be used to mend rubber boots and shoes. This cement will firmly fasten on a rubber patch.

Hundreds of patients will certify that their health has been restored by the use of **Bristol's Sugar-Coated Vegetable Pills**. Reader, why not yours?

Why is a side-saddle like a four-quart measure? Because it holds a gallon.

POLISH FOR PATENT LEATHER.—Take half pound of molasses or sugar, 1 ounce of gum arabic, and 2 pounds of ivory black; boil them well together, then let the vessel stand until quite cool, and the contents are settled; after which, bottle off. This is an excellent reviver, and may be used as a blacking in the ordinary way, no brushes for polishing being required.

CLEANING ENGRAVINGS.—It very often happens that fine steel engravings get stained with moisture on the wall, or speckled with mildew, and it becomes an important question how to bleach them. One of the best methods is to moisten them carefully and suspend them in a large vessel partially filled with ozone. The ozone bleaches them perfectly, without attacking the fibre of the paper.

Why was Robinson Crusoe's man Friday like a rooster? Because he scratched for himself and crew-so.

A careful looking after the tides by fishermen does not appear to make them more tidy than other people.

The powerful anti-bilious properties of **Bristol's Pills** are not their only virtue; they are besides a splendid tonic, a thorough yet safe cathartic; a sure cure for indigestion and dyspepsia; safe for the weakest, yet strong enough for the most robust. In short, they are an unfailing source of good health to those who use them, without any of the griping, sickening, or weakening effects produced by the operation of other Pills.

"The only liberty-cap," says a clever and witty author, "is the night-cap. In it men visit, one third of their lives, the only land where they are free and equal."

1st Cockney.—"I say, what sort of a 'ouse will do for a Fowl 'Ouse?"

2d Cockney.—"Lor' bless yer, Henny 'Ouse."

Of all milks, that from the sow is pronounced best by Professor Cameron, of Dublin, to be the richest and most nutritious.

20 Hundredweights = 1 Ton.	

This weight is used in almost all commercial transactions, and in the common dealings of life.

POST-OFFICE INFORMATION.

LETTER RATES.—Letters posted in Canada addressed to any place within the Province, pass, if prepaid, for 3 cents per half-ounce; but if posted unpaid, such letters are charged 5 cents per half-ounce.

On Letters to Nova Scotia, New Brunswick, and Prince Edward's Islands, the rate is 3 cents per half-ounce, with optional prepayment.

The rate on Letters to the United Kingdom is, by Canadian Packet,

Not exceeding half-ounce.....12½ cents.

Exceeding half-ounce, and not exceeding one ounce.....25 "

And so on, increasing one rate of postage for each additional half-ounce. And by Cunard Packet 15 cents per half-ounce, etc.

Letters for the United Kingdom must be prepaid, or they will be charged a fine of 6d. sterling on delivery.

Letters for British Colonies and Possessions beyond the Sea, and Foreign Countries, *via* England, must be prepaid.

The rate on Letters for the United States is..... 6 cents per half-ounce.

The rate to Cuba.....10 cents per half-ounce.

There is a further charge on delivery of Letters addressed to British Columbia.

Letters.....10 cents per half-ounce. | Newspapers.....2 cents each.

MAILS FOR CANADA FROM ENGLAND.—Two Ocean Steamers carrying mails for Canada leave Liverpool in each week, *viz.*: a Canadian Packet on every Thursday, *viz* Derry on Friday, sailing to Quebec in summer and Portland in winter, by which the Postage rate is 6d. sterling per half-ounce; and a Cunard Packet every Saturday, *viz* Cork on Sunday, bringing mails for Canada, alternately to Boston and New York, by which the Postage rate to Canada is 8d. sterling per half-ounce.

The British Post-Office forwards letters to Canada by the first Packet sailing after the letter is posted, unless the letter bear a special direction—"By Canadian Packet" or "By British Packet"—and in that case they are kept over for the Packet designated. "By Canadian Mail" is not a distinctive superscription; for any Mail for Canada is a "Canadian Mail," by whatever Packet forwarded.

REGISTRATION OF LETTERS.—Persons posting letters containing value, should be careful to require them to be Registered, and to obtain from the Postmaster a Certificate of receipt for Registration.

The charge for Registration, in addition to the Postage, is as follows, *viz.*:

On Letters to any other place in Canada, or British North America.....	2 cents.
On Letters for the United States.....	5 "
On Letters for the United Kingdom.....	8 "
On Letters for British Colonies or Possessions, sent <i>via</i> England.....	25 "

On Letters for France and other Foreign Countries, *via* France, an amount equal to the postage rate.

Both the postage charge and registration fee must in all cases be prepaid.

Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a Registered Letter can be traced when an Unregistered Letter cannot, and the posting and delivery or non-delivery can be proven. A Registered Letter is thus secured against many of the casualties which, from incorrect address, forgetfulness of the receiver, or other error, may affect an Unregistered Letter.

MISCELLANEOUS CHARGES.—The charge on parcels by the Parcel Post, which is limited to places within the Dominion, is 25 cents per pound (with 3 cents additional if registered).

One cent per ounce, payable in advance by Postage stamp, is the rate on Printed Circulars (Printed Circulars, if sent in envelopes, whether *sealed* or *unsealed*, are liable to letter postage). Prices Current, Hand Bills, and other Printed Matter of a like character, and on Books, bound or unbound, when posted at a Canadian Post Office addressed to any place in Canada, British North America generally, or the United States.

The postage upon Prices Current addressed to the United Kingdom is *two cents each*, which must be prepaid by Postage stamps, or they will be sent to the Dead Letter Office to be returned to the sender.

BOOK POST WITH GREAT BRITAIN.

A Packet weighing not more than 4 ounces.....	7 cents.
Above 4 ounces but not exceeding 8 ounces.....	12½ "
" 8 ounces " " 12 ounces.....	19 "
" 12 ounces " " 1 pound.....	25 "

And so on, adding 7 cents for every additional 4 ounces.

NEWSPAPERS AND PERIODICALS.—Newspapers published in Canada may be sent by Post from the office of publication, addressed to any place in Canada, at the following rates, *if paid quarterly in advance* by either the publisher at the Post-Office where the papers are posted, or by the subscriber at the delivering Post Office:

For a paper published 6 times a week.....	30 cents per quarter.
" " " 3 " ".....	15 " "
" " " 2 " ".....	10 " "
" " " 1 " ".....	5 " "

When the above rates are not paid in advance by either publisher or subscriber, such papers are charged one cent each on delivery.

TRANSIENT NEWSPAPERS.—Transient Newspapers—that is to say, Canadian newspapers posted otherwise than from the office of publication, and American and British papers posted or re-posted in Canada—must be prepaid 2 cents each, by Postage stamp, or they cannot be forwarded, except only *British Newspapers* distributed to regular subscribers by Canadian Booksellers or News Agents, such papers pass free as they would do if received in the Canadian Packet Mails.

NEWSPAPERS BY MAIL FROM ENGLAND OR UNITED STATES.—Newspapers received from England by the Canadian Packet Mails are delivered free.

Newspapers from England by the Cunard Packet Mails are charged 2 cents on delivery. (This is the American transit charge.)

United States Newspapers, brought by mail to Canada, are charged 1 cent on delivery.

MONEY ORDERS ON CANADA.—All the Money Order Offices in Canada, are authorized to draw Money Orders on each other for any sum up to \$100, and for as many orders of \$100 each as the applicant may require, upon the following terms, viz.:

On Orders up to \$10.....	5 cents.
Over \$10 and up to 20.....	10 "
Do. 20 do. 40.....	20 "
Do. 40 do. 60.....	30 "
Do. 60 do. 80.....	40 "
Do. 80 do. 100.....	50 "

Table of Stamp Duties.

On every Promissory Note, Draft, or Bill of Exchange, for \$25 and under, 1 cent; over \$25 to \$50, 2 cents; over \$50 to \$100, 3 cents.

On every Promissory Note, Draft, or Bill of Exchange, executed singly, for the first \$100, 3 cents; for every additional \$100, or fraction of \$100, 3 cents.

On every Draft or Bill of Exchange executed in duplicate, for the first \$100, 2 cents; for every additional \$100, or fraction thereof, 1 cent.

The duty to be paid by stamps affixed at the time of making, upon which the signature of some integral portion of the instrument shall be written. The stamps to be affixed by the maker or drawer of the instrument, or, if drawn out of the Province, by the acceptor or first indorser, in the Province. Penalty for neglect to affix stamps, \$100.

Stamps in all cases to be defaced at the time of affixing the same, by writing or stamping the date thereon, and such stamp shall be held *prima facie* to have been affixed at the date stamped or written thereon, and if no date be stamped, or written thereon, such adhesive stamp shall be of no avail.

IT IS A GENERAL FAVORITE!
 Whiffle tree & Cross bar of B.B. 257
 PRESCOTT, Ont., June, 1871.

Gents,—I have much pleasure in stating that your Murray & Lanman's Florida Water is a general favorite in this section with all lovers of fine perfumes. As a toilet preparation, it is almost indispensable; and in cases of tan, sunburn, roughness of the skin, etc., etc., it is very useful.

Yours, etc.,

T. R. MELVILLE.

The best Blood Purifier is Bristol's Sarsaparilla.

A coquette is one who first steals your heart by her address, and then steals her heart to your address.

A home without children is like a lantern and no candle; a garden and no flowers; a vine and no grapes; a brook and no water gurgling through its channels.

Like all truly excellent preparations, a host of worthless imitations have followed in the train of our **Murray & Lanman's Florida Water**. From Hamburg, in Germany, and from Paris, in France, unprincipled and dishonest men have issued fraudulent imitations of our great perfume; but being without any of the virtues of the genuine, they have no sale, the buyer quickly discovering the cheat, and refusing to purchase from the same dealers again. In this way some perfumers have destroyed their business, by gaining the reputation of dealers in counterfeit goods.

PUZZLE NO. 28.—There is a hole in the barn floor just two feet in width and twelve in length, how can it be entirely covered with a board three feet wide and eight feet long, cutting the board only once?

It is now asserted by the London *Spectator* that Xantippe was a model of docile amiability, who bore with angelic meekness Socrates' abominable goings on with that brazen baggage, Aspasia; and that it was Myrto, the philosopher's first wife, who, having married him for money, naturally flung her aristocratic connections—she was descended from Aristides—in his teeth, and made a terrible time over his having a night-key.

The diocese of Sahara has been created. Some ecclesiastic will now receive his desert.

To the invalid there is nothing more agreeable or refreshing than the Citrine odors of purely floral fragrance, avoiding always the heavy, sweet perfumes of France and England, which are so apt to cloy and satiate the sense of smell, rather injuring than refreshing those persons of delicate nervous organizations. In **Murray & Lanman's Florida Water** we have an elegant and delightful preparation exactly suited to the requirements of the invalid and the delicate.

"My dear," said the sentimental Mrs. Waddles, "home, you know, is always the dearest spot on earth." "Well, yes," said the practical Mr. Waddles, "it does cost me about twice as much as any other spot."

About the following there can be no mistake:

"Under this stone lie two babies dear,
One is buried in Connaught, and the other here."

The monument—is it needful to say?—is in Ireland, in Athlone churchyard.

CLEANING MARBLE.—Marble may be cleaned by mixing a quantity of the strongest soap-lye with quicklime, to the consistency of milk, and laying it on the marble for twenty-four hours. Clean it afterward with soap and water. Or else use the following: Take two parts of common soda, a part of pumice-stone, and one part of powdered chalk; sift through a very fine sieve, and mix with water. Then rub it well all over the marble, and the stains will be removed. Then wash with soap and water as before, and it will be as clean as it was at first.

Sole agents—Boot and shoe dealers.

How to fire and fall back—Get a gun that kicks.

A safety match—Ten thousand a year on both sides.

A half or whole bottle of **Murray & Lanman's Florida Water** mixed with the water of the bath enables the most weary and fatigued to emerge feeling fresh and buoyant. The forehead and temples bathed with it removes headache and faintness. Used on the handkerchief it is the richest yet most delicate and lasting of all perfumes: nothing short of washing removes it. Weeks after being sprinkled with it, the handkerchief exhales its exquisite floral breath. As a tooth-wash, a few drops in a glass of water is most excellent. In short, it is the cheapest and best of all perfumes.

What is the difference between the first month of marriage and the rest of it? During the first month it is all "joy," and after that it is all "jaw."

Almost any young lady has public spirit enough to be willing to have her father's house as a court-house.

Murray & Lanman's Florida Water The only healthful Perfume.

TO MAKE A CANDLE BURN SLOWLY.—When, as in case of sickness, a dull light is wished, or when matches are mislaid, put finely-powdered salt on the candle till it reaches the black part of the wick. * In this way a mild and steady light may be kept through the night by a small piece of candle.

Bristol's Sarsaparilla is powerful enough to cleanse the most impure of blood and humors ; it is safe enough to administer without fear to the weakest child or most delicate woman. It has been tested in every form of disease with the greatest success ; again and again have the most complicated nervous disorders been cured by it. Do not hesitate, suffering invalid, give it a trial ; restored health and strength will be your reward ; but do not delay, time is precious. It may soon be too late.

WANTED—A horse to travel around the course of love ; a spark from the blazing eyes of a tigress ; a grindstone to sharpen the point of an argument ; a few seeds from the apple of an eye ; a head to fit a wreath of smiles ; a wag from the tail of a comet ; a leg from a duck of a bonnet ; a pupil from the eye of a needle.

QUESTION No. 16.—Why is a tallow-chandler one of the most sinful and unfortunate of men ?

The worst tax—At-tacks on one's purse.

The man in debt for his shoes cannot say that he has a soul (sole) of his own.

There is no question or doubt about **Bristol's Sarsaparilla** cleansing and purifying the blood and humors : the fact has been proved beyond all cavil by forty years' continual success. To all those who can feel kernels or lumps under the lower jaw, or in the neck or chest, we say do not delay, use **Bristol's Sarsaparilla** freely. These kernels are simply the beginning of scrofulous sores.

A RECIPE FOR DESTROYING HOUSE FLIES.—Take a spoonful of black' pepper in powder, one teaspoonful of cream, mix them well together and place them in a room where the flies are troublesome, and they will soon disappear.

The entire alphabet is found in these four lines. Some of the children may like to learn them :

God gives the grazing ox his meat,
He quickly hears the sheep's low cry ;
But man, who tastes his finest wheat,
Should joy to lift his praises high.

Adelina Patti's collection of jewelry is greater than that of the Empress Eugenie.

A western undertaker, having apartments to let, pasted his bills upon the coffins in the windows, announcing " Lodging for single gentlemen."

The fountain from which scrofula in all its phases is fed is impure blood ! Cleanse and make healthy that vital fluid and every vestige of scrofula will leave the system ; while on the other hand you may continue for years and years constantly taking medicine, which, if it have not the power of altering and cleansing the blood, will do you no good whatever. Use freely **Bristol's Sarsaparilla**.

TO PRESERVE STRAWBERRIES —To two pounds of fine large strawberries add two pounds of powdered sugar, and put them in a preserving kettle, over a slow fire, till the sugar is melted ; then boil them precisely twenty minutes, as fast as possible ; have ready a number of *small* jars, and put the fruit in boiling hot. Cork and seal the jars immediately, and keep them through the summer in a cold dry cellar. The jars must be heated before the hot fruit is poured in, otherwise they will break.

Why is the letter " e " a gloomy and discontented vowel ? Because, though never out of health and pocket, it never appears in spirits.

It is necessary the sick should always remember that in all diseases having their origin in the blood, **Bristol's Sarsaparilla**, that best of blood purifiers, should be used with **Bristol's Pills**, the two medicines being prepared expressly to act in harmony together. When this is done faithfully, we have no hesitation in saying that great relief, and, in most cases, a cure, can be guaranteed, when the patient is not already beyond human help.

THE SEAT OF WAR.—A correspondent asks if the seat of war is cushioned ? If it is not it ought to be, for it is not a very soft seat at any time.

The most delicate of all Perfumes is Murray & Lanman's Florida Water.

A shrewd old gentleman once said to his daughter, "Be sure, my dear, you never marry a *poor* man; but remember that the poorest man in the world is one that has money and nothing else."

PURIFY THE BLOOD.—If the blood is impure, or the humors vitiated or depraved, which can be known by the myriad indications by which nature tells us of the condition of our bodies; there is but one safe and sure method of cure; it is to purify the blood. Without this all else is useless. The great thing, then, is to get the medicine that will do this most speedily, thoroughly, and safely. The evidence of respectable people in all classes of society proves that the best of blood purifiers is **Bristol's Sarsaparilla**. For forty years it has stood unrivalled; and it is to-day prescribed and recommended by the most learned physicians in all parts of the world as the safest and best blood purifier known.

THE REAL PHANTOM SAIL—A mock auction.

A WAY WITH MELANCHOLY—Suicide.

QUESTION No. 17.—How is it that a man with long legs cannot travel faster than one with short legs?

An aching void—The socket from which a tooth has just been drawn.

WAY OF THE WORLD.

Determined beforehand, we gravely pretend
To ask the opinion and thoughts of a friend;
Should his differ from ours on any pretense,
We pity his want of both judgment and sense;
But if he falls into and flatters our plan,
Why, really, we think him a sensible man.

All who are exposed to changes of weather, bad water, and decaying vegetable exhalations, will find in **Bristol's Sarsaparilla** a safer, better, and more certain preventive and remedy than any other article ever offered for sale.

BUCKWHEAT CAKES.—Take two quarts of water, blood warm, half a pint of brewer's yeast, make a thin batter, let them rise as far as they will come, then add three-fourths of a teaspoonful of carbonate of soda, dissolved in a little water, then fry them as quick as you like.

Smiles are the most beautiful ornaments that you can wear,—brighter and cheaper and better than costliest gold and diamonds.

WRITING INKS.—Purple: add a little muriate of tin and gum arabic to a strong decoction of logwood. Yellow: gamboge triturated with water, adding a little alum and gum. Blue: sulphate of indigo (diluted with water to shade desired), add gum. Gold and Silver Inks: take fine bronze powder, or gold or silver leaf ground with a little sulphate of potash and washed from the salt; mix with water, adding sufficient gum.

In every form of heart disease severe exercise, mental excitement, and stimulating drinks should be avoided; live quietly and regularly, take three or four of **Bristol's Sugar-Coated Pills** once or twice a week, and use the great purifier and restorer, **Bristol's Sarsaparilla**, in doses of one or two table-spoonfuls, two or three times a day.

FOR CLEANING SILVER.—Boil together wood ashes and water sufficient to cover the ware, putting in promiscuously forks, spoons, castor, etc. Let it boil for one hour, and your silver will have a new look. The lye cleans the accumulated dirt from the crevices. Wipe off with a soft cloth.

An editor, referring to patent metallic air-tight coffins, says: "No person, having once tried one of these coffins, will ever use any other."

Mrs. Partington expresses her apprehension that the people of the gold regions will bleed to death, as the papers are constantly announcing the opening of a new vein.

Why is it that **Bristol's Sarsaparilla** cures all scrofulous diseases, while other Sarsaparillas, at the most, seem only to relieve for a little while? Because it possesses the power of completely purifying, cleansing, and neutralizing the poison on which disease feeds—while other Sarsaparillas only partially, if at all, possess this property.

Why should physicians have a greater horror of the sea than anybody else? Because they are more liable to see sickness.

THEY HAVE MADE A PERFECT CURE!

QUEEN STREET, ST. MARYS, Ont., June 26, 1871.

To CUTHBERT McCALLUM, Esq., Druggist:

My dear Sir,—I have used the Bristol's Sarsaparilla and Pills you sold me, and can say with much pleasure, that I deem them one of the GREATEST DISCOVERIES OF THE AGE, for the cure of sore eyes, and diseases arising from impure blood. They have operated on me with perfect success, and have made a perfect cure.

I am, Sir, yours very truly,

S. R. SMITH.

Bristol's Sarsaparilla Clears the Complexion.

PASTORAL.—A parson was twitted with taking too long a time over his white tie while dressing. "It is my duty," he answered, "to attend most carefully to my fold."

Ocean lumber—The seaboard.

A cobbler has a sole purpose in life.

"If you marry that poor girl, you'll find matrimony up-hill work!" "Good," said the lover; "I'd rather go up hill, than down hill, by a great sight."

Murray & Lanman's Florida Water is to the invalid the source of health and strength; to the robust it is a never-failing fountain of pleasure. In the gay assemblages of fashion and of wealth it is the recognized and necessary perfume.

What costume ought to remind a lady of her washerwoman? Why, her lawn dress, to be sure.

Why is a hen at roost like a sportsman's gun? Because it's a fowl in peace (fowl-ing-piece).

Did the man who "scaled the mountain's dizzy height" find his *weigh* or lose his *balance*?

PUZZLE No. 7.—A $\frac{TgEooNdT}{ion}$, $\frac{5a50ne500}{but}$ & $\frac{Stoo500}{1000is}$. How does this read?

THE FINDING OF MOSES.—IRISH VERSION.

On Egypt's banks, contiguous to the Nile,
King Pharaoh's daughter went to bathe in style;
And as she trod the strand, sipping her gin,
She stumbled on the cot the babe was in.
Then she exclaimed, in accents strange and wild,
"Och! murther, girls, which of yees owns the child!"

In London and Paris, during the prevalence of the cholera, it was particularly noticed that the employes in the perfume manufactories were not attacked by the disease; their occupations made them proof against the evils of that death-dealing malady. And so it is in the sick-rooms; the free use of **Murray & Lanman's Florida Water** is a good preventive against infections of every kind.

ROLLED JELLY CAKE.—Five eggs, two cups sugar, two cups flour, two teaspoonfuls baking powder, sifted with the flour, two teaspoonfuls water. Bake in four jelly pans. Have ready for each a cloth a little larger than the cake, thickly sprinkled with powdered sugar, on which turn the cake while hot. Spread with jelly, and, beginning at one end, roll up, pushing it with the cloth, which may be wrapped around the roll to preserve the moisture of the cake.

BLARNET.

If love is an innocent thing, my dear,
My heart, then, is innocent too,
For sure it contains not a single thing
But love for an angel—that's you,
An' all of the day
It's the whole of my lay,
This love I am bearing for you.

Murray & Lanman's Florida Water, for use on the handkerchief, is unequalled—so delicate! so refreshing! so agreeable!

Why is a passenger by the 12.50 train very likely to be too late? Because it will be 10 to 1 if he catches it.

DRIED PEACH PIES.—First well wash two quarts of pared peaches, cover them with water and a large teacupful of cider, and half an orange peel; let them stew gently three hours, then add one pound of brown sugar, a gill of rose-water, and, if you can spare it, a pint of syrup left from preserves.

Punch says that a silk dress should never be sat in.

"Hear me gnaw, ma," as the operatic mouse said to his mother.

Murray & Lanman's Florida Water is the most delightful and healthful of perfumes. For the refined, and those of delicate, nervous sensibilities; for the sick-room, and for the general purposes of the toilet, the bath, and the handkerchief, it is without a rival. But be sure to ask for the genuine, prepared only by **Lanman & Kemp**, New York.

Invigorate the Liver with Bristol's Sugar-Coated Pills.

As Dr. Dwight once passed through a region of very poor land, he said to a farmer: "Sir, I see your land here is not very productive." "No, sir," said the honest farmer, "our land is just like self-righteousness." "How is that?" "Why, the more a man has of it the poorer he is."

Old sores, bad legs, etc., are difficult to heal, because they generally arise from a scrofulous tendency in the blood. **Bristol's Sarsaparilla**, the great purifier of the blood and humors, is a speedy remedy for all such troubles. It positively will effect a cure in ten out of every twelve cases.

PUZZLE No. 20.—Here are five complete squares—take off three sides of a square and leave three complete squares only.

TUNEFUL LYRE—The music-teacher who broke his engagement.

A wag pronounces morphine "the greatest of modern composers."

The Perfection of Politeness—Offering a standing joke a seat.

For what reason does a duck go under the water? For divers reasons. For what reason does he come out? For sun-dry reasons.

Bristol's Sugar-coated Pills are prepared expressly to act in harmony with the **Sarsaparilla**, and their use at the same time will greatly hasten a cure.

A CEMENT, made by dissolving rubber cut fine in benzine, may be used to mend rubber boots and shoes. This cement will firmly fasten on the rubber patch.

Mrs. Partridge, hearing of a pedestrian's "great feat," wondered if they troubled him in walking.

An illiterate correspondent, who is given to sporting, wants to know when the "Anglo-Saxon race," so much talked about, is to come off.

When a girl out West is kissed she looks surprised, and says, "How coul' you?" To which the swain replies, "It will give me pleasure to show you," and proceeds to give a duplicate.

A man may properly be said to have been drinking like a fish when he finds that he has taken enough to make his head swim.—*Punch*.

A correspondent wishes to know what kind of broom the young lady in the novel used when she swept back the ringlets from her classic brow.

Of all the popular medicines of the day, **Bristol's Sarsaparilla and Pills** alone have sustained their high reputation; there is no deception in them; what it is claimed they will do, they have always done to the letter.

A KNOWING COUPLE.

The ensuing verses are taken from a recent poem published in London, entitled "Mrs. Jermyngham's Journal:"

"Our hearts are drawn a little near,
Our words come forth a little free,
I feel for him a shade less fear,
And he a shade less wrath for me.

"He knows I'm wishing for the light,
He knows I know he knows I'm true,
He knows his hand can guide me right,
I know he knows I know it, too."

An editor declined to take pudding at dinner "owing to a crowd of other matter." Perhaps he had eaten *pi*!

Purify, cleanse, and enrich the blood with **Bristol's Sarsaparilla**. It is the safest and the best of all medicines in spring and summer.

It is stated that a portion of a raw onion, eaten just before retiring to rest, will insure refreshing sleep to persons suffering with lungs overburdened with oppressive and irritating matter.

A sailor, passing through a graveyard, saw on one of the tombstones, "I still live." This was too much for Jack, who, shifting his quid, ejaculated:

"Well, I've heard say there are cases in which a man may lie; but if I was dead I'd own it."

Good Health is better than Riches.

The following is the alphabet of the Morse telegraph, being the one in general use. It throws open the whole secret of being a telegraph operator: A. — B. . . .

C. . . . D. — . . . E. . F. — . . . G. — . . . H. . . . I. . . . J. — . . . K. — . . . L. — . . .
M. — . . . N. — . . . O. . . . P. . . . Q. . . . R. . . . S. . . . T. — U. . . . V. . . .
W. — . . . X. — . . . Y. . . . Z. . . .

Every ignorant pretender would have us believe that he has made most wonderful discoveries in medical science, which, according to his advertisement, must inevitably overthrow and upset the existing order of medical practice. But a year or two passes away, and when we look again for this shining light, behold he is nowhere to be found! His preparation has been tested by actual trial, found wanting, and thrown aside forever. **Bristol's Sarsaparilla** has been in use for more than forty years, and is more esteemed to-day than ever before. It never disappoints the sick and suffering. Try it, and be convinced.

PUZZLE No. 21.—A man has a water-tank with four faucets in it; faucet No. 1, when opened full, will let all the water out in one hour; No. 2 will let it all out in two hours; No. 3 in three hours; and No. 4 in four hours. Suppose all four faucets are opened full at the same time, how long would it take to let all the water out?

WHEN TO CHANGE THE WATER IN WHICH LEECHES ARE KEPT.—Once a month in winter and once a week in summer is sufficiently often, unless the water becomes discolored or bloody, when it should be changed every day. Either clean pond water, or clean rain water, should be employed.

The instructions for the use of our well-known medicines are the result of long experience, and may be depended upon in all climates and under all changes of seasons or weather. Under no circumstances do our **Bristol's Sarsaparilla and Sugar-Coated Pills** require any addition to them to increase their medicinal virtue.

GINGERBREAD SNAPS.—One pound of flour, half a pound of treacle, half a pound of sugar, quarter pound of butter, half an ounce of best prepared ginger, sixteen drops of essence of lemon, half a teaspoonful saleratus dissolved in a tablespoonful of hot water.

"What brought you to prison, my colored friend?"—"Two constibles, sah."—"Yes, but I mean had intemperance anything to do with it?"—"Yes, sah, they bofe of 'em drunk."

A smart young lady, in reply to an inquiry why she did not get married, said it was because she was unable to support a husband.

There is often but slight separation between a woman's love and her hate. Her keen teeth are very near to her sweet lips.

A hungry friend said at Brummel's table, after the bean had fallen in fortune, that nothing was better than cold beef. "I beg your pardon," returned Brummel, "cold beef is better than nothing."

"Have you ever broken a horse?" inquired a horse jockey. "No, not exactly; but I have broken three or four wagons," replied Simon.

A lady advertises herself in an Iowa paper as an "attorney-at-law." Why not say a barmaid? It is a more euphonious term, and one in familiar use.

A close game—Courtship.

A draw game—A lottery.

A match game—Matrimony.

The roots, leaves, flowers, and balsamic gums used in the compounding of **Bristol's Sarsaparilla** having been forwarded to New York, are there retested in our own laboratory, and all rejected that do not come up to the highest standard. None but the best chemists and pharmacutists are employed in extracting the medicinal properties or powers from the different roots, etc.—which, being done separately, are then combined under our own personal supervision.

TO ILLUMINATE A DARK PLACE.—By the use of a mirror to throw a reflection of the sun's rays down a deep, dark well, the bottom is clearly seen, and a bucket or other object may be hooked up. The same means may be employed to light up a dark garret, cellar, or closet. If there are objects preventing success with one glass, take two glasses, one to receive the direct rays of the sun, and the other the reflected rays from the mirror.

Aunt—"You'll grow up ugly if you make faces." Little Girl (reflectively)—"Did you make such faces when you was a girl, aunty?"

Terrible suffering cured by Bristol's Sarsaparilla and Pills!

TORONTO, Ont., June 9th, 1871.

Dear Sir,—Having been a sufferer with Malignant Scrofula for over seven years, my body during that time being one mass of sores, for which I could get no relief (the skill of two of our best doctors having been exerted for me in vain), I became disheartened, and gave up all medical help. At this stage I was induced to try Bristol's Sarsaparilla and Pills, which at first seemed to have but little effect; but when using the fifth bottle of Sarsaparilla, the evidence of cure became marked. I persevered till I had used 37 bottles in all, and eight little phials of Pills, when I found myself a well man. Seven months have elapsed since I stopped using the medicine, and I have continued in excellent health, without a single sore on my body.

Very truly, your obt. servant,

JOHN P. BROWN.

The best Handkerchief Perfume is Murray & Lanman's Florida Water.

Joseph Esterlin, Kingston, Jamaica, says: "Permit me to do justice to the wonderful curative power concentrated in your **Bristol's Sarsaparilla**. For seven years I have been a martyr to erysipelas; have had the aid of several medical men, who after failing to relieve me, advised amputation of the limb, but instead of doing so I tried **Bristol's Sarsaparilla and Pills**, and they have cured me."

PUZZLE No. 25.—A gentleman given to enigmas stepped into a restaurant the other day and asked what he could have for dinner. "Anything you please to order, sir." "Very well," was the reply; "then give me, 1st, woman's crowning ornament, roasted; 2d, the most active member in Congress, boiled; 3d, what England never can be, for dessert; 4th, mock misery, for my beverage." "All right, sir;" and the guest's order was shortly after filled. What did he have for dinner?

For what purpose was Eve made? For Adam's express company.

Every ingredient in **Bristol's Sarsaparilla** is beneficial to health. For every form of miasmatic disease it is a safe and reliable remedy, being a perfect antidote to malaria, a corrector of impurities, a cure for exhaustion, a preventive of debility, and a healthful stomachic. It is purely vegetable and entirely healthful, and no harm can ever result from its free use.

Great interest is felt in the approaching trial of Distance vs. View, which arose out of the fact that "distance lent enchantment to the view," and the view refused to return it.

SAUCE AND FAMILY PUDDING.—One cupful of brown sugar, with a tablespoonful of wine or spirits, boiled like a syrup, with half a cupful of butter added, and the white of an egg beaten stiff, and stirred in after the sauce cools. It is very nice and simple.

DELICATE TEA CAKE.—The whites of three eggs beaten to a froth, one cupful of pulverized white sugar, half a cupful of sweet milk, one teaspoonful of cream of tartar, half a teaspoonful of soda, two cupfuls and a half of flour, a teaspoonful of almonds, half a cup of melted butter.

An exasperated dealer in skates got off the following, after Tom Moore's "Dear Gazelle:"

"I never wrote up skates to sell,
Trusting to fickle Nature's law,
And advertised and puffed 'em well,
Confound it! but 'twas sure to thaw."

Thomas J. Edwards writes from Stockton: "I really believe **Bristol's Sarsaparilla** has been the means of saving my life."

CLEAR, VERY CLEAR.—Gertrude: "Your inquiry stumps me. The more I think about it the more I can't tell. As near as I can recollect now, I think I don't know. Much might be said both ways; neither may be right. Upon the whole, I think that I would or wouldn't, just as I think best otherwise."

"But, father, you know love makes time fly," said an enthusiastic daughter, who was arguing in favor of a longer bridal tour than usual. "Yes, my dear, I know it does at first, but you'll find in the end that time will make love fly."

RAISED CAKE WITHOUT EGGS.—Eggs are scarce and expensive, and we invent receipts which require few or none. Stir together a coffee-cupful of light sugar, and half a cupful of butter; add a pint of warm water, half a cupful of yeast, and flour enough to make it as thick as ordinary fruit cake. Rise over night. When very light add a little mace, cinnamon, allspice, and nutmeg, and a cupful of chopped raisins. Put in the pan, let rise until light; then bake.

R. T. Coleman, of Idaho City, writes: "I had suffered much from dizziness or vertigo; three bottles of the **Sarsaparilla** and two of **Pills** entirely cured me."

A representative of the rural districts dropped into one of our city restaurants, not long since, and ordered what he had heard the man opposite call for. "Apple dumpling—both." Having managed to make away with the sauce, he was asked by the waiter if he would have some more dumpling? "No, sir, thankee," was the reply; "but I will thank you for a little more of that 'ere 'intment."

"Remember who you are talking to, sir," said an indignant parent to a fractious boy; "I'm your father, sir!" "Well, who's to blame for that!" said young impertinent; "'taint me."

Bristol's Sarsaparilla is the best of all Purifiers of the Blood!

"Why do you look so glum and cross, William, whenever I ask you to go out with me to any party or theatre?" inquired Isabella. "My love," said William, "there would be no merit in going were I not making an awful sacrifice of my own feelings. Permit me the pleasure of showing that I go only to please you, dearest."

Murray & Lanman's Florida Water is adapted equally for the handkerchief, the toilet, and the bath. For the first-mentioned nothing can be more exquisitely delicate, yet full-bodied: weeks after sprinkling, the handkerchief is found to exhale a perfect wealth of delicious aroma. For the toilet it is quite unequalled, a few spoonfuls mixed with the water in the basin tending greatly to soften and beautify the skin: and we believe it to be the only perfume suitable for use in the bath, where its wonderful refreshing and invigorating properties give it peculiar value.

PUZZLE No. 27.—A farmer planted eleven trees in twelve rows, with three trees in each row. How were they planted?

CUSTARD OF COCOANUT.—To half a pound of grated cocoanut take half a pint of sweet milk, half a teacupful of sugar; beat three eggs and stir in the milk, sugar, and cocoanut; put it over the fire and stir all the time until thick, then serve in custard cups.

CREAM PIE.—Three eggs, one cup of flour, one cup of sugar, one teaspoonful of soda; bake, and when cold split and put in the cream. Cream for inside: half a pint of milk, small cup of sugar, quarter cup of flour, one egg; beat all well together and boil; add flavoring to suit taste.

The following conundrum is above the average: Why was Eve the first ritualist convert? Because she began by being Evangelical, and ended by taking to vestments.

In **Murray & Lanman's Florida Water** we have the pure and natural fragrance of flowers in bloom, unaltered and unimpaired by the addition of any foreign substances, and entirely free from the heavy sweetness so disagreeable to many. It is, we believe, the only perfume possessing, in a marked degree, the power of refreshing and invigorating both the body and the mind.

[From the Tombstone of an Epicure.]

At length, my friends, the feast of life is o'er,
I've ate sufficient, I can drink no more:
My night is come, I've spent a jovial day;
'Tis time to part; but oh! what is to pay?

VARIETIES.—Two eggs beaten light, teaspoonful of salt, the eggs thickened with flour to roll as thin as a wafer; cut in strips one inch wide and four inches long, wind it round your finger, and fry it as you do doughnuts.

DUTCH CHEESE.—Heat thickened milk till the whey becomes separated and clear. Put into a bag and drain. Then mash, and add salt to suit the taste. A little cream should be added to form it into balls. Let the balls be the size of a common apple. Set it away till fit for use—the older, the stronger.

A YOUNG gentleman asked a favor of his sweetheart, and she replied, "I will grant it on condition that you give me what you have not, what you never can have, and yet what you can give me." What was it she asked for? Answer—A husband.

About thirty years have passed since the introduction of **Murray & Lanman's Florida Water**, and every year has seen it steadily increasing in popular favor, until to-day it is to be found on the dressing-table of polite and refined society in every section of the world. It is the only perfume possessing the power of refreshing the body and the mind!

Freddy is a little one of seven years' growth, the son of a minister, who, with his wife, has just arrived at a new field of labor. Hearing his mother say to his father that she had been deceived by his saying the parsonage was a three-story building, when in fact it was only two, he said:—"Ma," "Well, Freddy?" "Pa is right." "How is that, Freddy?" "The kitchen is one." "Yes." "This floor is two, and the story that pa told is three."

BOILED BROWN BREAD.—Three small pints of oatmeal, three small pints of bran flour, one pint of molasses, and a teaspoonful of salt, one teaspoonful of saleratus, one quart of milk; pour into a three-quart bucket with a tight fitting lid, which has been well greased, and set it into a pot of boiling water, and boil four hours.

Bristol's Sarsaparilla Cures the worst cases of Scrofula.

A lady said to her sister, "I wonder, my dear, you have never made a match; I think you want the brimstone." To which she replied, "No, not the brimstone—only the spark."

FOR SORE TEATS IN COWS.—Wash twice a day with suds from Castile soap, and then anoint with glycerine.

One spoonful of **Bristol's Sarsaparilla** contains as much pure extract of the root, and more medicinal virtue, than two spoonfuls of any other Sarsaparilla. It therefore becomes self-evident that those who purchase one bottle of Bristol's receive as much for their money as if they had bought four bottles of other so-called Sarsaparillas in the small size.

"Did you know I was there?" said the bellows to the fire. "O, yes, I always contrive to get wind of you," was the reply.

RIDDLE No. 24.—I am the centre of gravity, hold a capital situation in Vienna, and, as I am foremost in every victory, am allowed by all to be invaluable. Always out of tune, yet not lacking in voice, invisible, though clearly seen in the midst of a river. I have three associates in vice, and could name three who are in love with me; still it is in vain you seek me, for I have long been in heaven, and even now lie embalmed in the grave.

Daniel W. Chapman writes from Folsom: "I am satisfied that **Bristol's Sarsaparilla and Pills** are the best medicines of their kind in the market. I had tried many others without relief, my trouble being general bad health, with great debility. These remedies have entirely restored my health and strength."

ON A BALD HEAD.

My hair and I are quits d'ye see—
I first cut it, it now cuts me.

What is the military definition of a kiss?—Report at headquarters.

Why is figure 9 like a peacock? Because it's nothing without its tail.

Joe hates a hypocrite, which plainly shows
Self-love is not a fault of Joe's.

Bristol's Sarsaparilla and Pills, tested in all climates, and under all conditions found reliable and good. Every article in them is to a certainty beneficial to health. They contain no minerals, no drastic, dangerous drugs, nor anything that can injure the most delicate child.

On the tombstone of a person named Kildare:

Who killed Kildare? who dared Kildare to kill?
Death killed Kildare—who DARE KILL whom he will.

THE PRIDE OF IGNORANCE.

The truest characters of ignorance
Are vanity and pride and arrogance;
As blind men often bear their noses higher
Than those that have their eyes and sight entire.

"My experience is certainly very favorable to **Bristol's Sarsaparilla and Pills**. They have cured an old sore on my right leg, which had defied all other treatment. JOHN SANDERSON, *Hobart Town, Tasmania.*"

When lovers quarrel, do they return the kisses?

Young folks grow most when in love—it increases their sighs wonderfully.

What is the difference between a justice of the peace and a piece of justice?

How to make a fire hot—keep it coaled.

Waves that are harmless—the waves of ladies' handkerchiefs.

A HOME-THRUST.

Sir, I admit your general rule,
That every poet is a fool;
But you yourself will serve to show it,
That every fool is not a poet.

An incorrigible wag, who lent a minister a horse which ran away and threw his clerical rider, thought he should have some credit for his aid in "spreading" the Gospel.

Important Testimony from T. R. Melville, Esq.,

The celebrated Druggist of Prescott, Ont.

Gentlemen,—The sale of your Bristol's Sarsaparilla and Pills is steadily increasing. I do a very large trade in them, and all my customers who have used them speak in the highest terms of praise of the very satisfactory results obtained by the use of a few bottles. In many instances the Sarsaparilla and Pills have COMPLETELY CURED bad cases of Scrofula and skin diseases of many years' standing.

T. R. MELVILLE.

Murray & Lanman's Florida Water— A purely floral fragrance.

FASHION ITEM.—Black velvet nearly an inch broad is worn as a necklace with low-throated dresses, fastened with a rosette, brooch, or suspending a locket, charm, etc., tied at the back or one side. Bracelets are much worn. Wide-brimmed hats are gaining in favor.

A young and sprightly widow once appeared at a masquerade at Bath, England, with a paper pinned to her bosom, bearing the following lines.

"To be let on lease for the term of my life,
I, Silvia J—, in the shape of a wife;
I am young, though not handsome, good natured, though thin.
For further particulars inquire within."

The nervous system is the most interesting and important part of the living body. All the vital operations by which we are nourished and sustained, all moral and intellectual manifestations, take place through the agency of this part of the human organization, which is more highly endowed with vitality than any other part.

Bristol's Sarsaparilla purifies the blood, which is the source of nourishment to the nerves, and tones the whole nervous system.

PUZZLE No. 13.—A man had nine pigs, and put them in four pens, with an odd number of pigs in each pen. How did he divide them?

The draughtsman's Paradise—Pencilvania.

You can't marry a miss if you marry a widow.

The man who broke his fast broke loose at the same time.

* When are a young lady's ear-rings like people in debt?—When they are in her ears (arrear).

We learn that a distinguished professor has come to the conclusion that the cause of the potato rot is the *rotatory* motion of the earth.

A time-serving people—Watchmakers.

The back-door belle—A pretty kitchen-maid.

Guppy says that although figures don't lie, he was horribly deceived in his wife's figure.

With pure blood we can bid defiance to every nervous trouble: the ill feelings, the uneasiness, the restlessness, the headaches, the asthma, the neuralgia, and the general misery entailed by all nervous diseases, will lose their power when the current of life is clean, pure, and healthy; but where is the potent medicine to be found that will or can so cleanse and purify the blood? We answer, without hesitation, without fear of contradiction, and with a full knowledge of that whereof we speak, that in **Bristol's Sarsaparilla** every requirement is met.

FANS.—Fans are becoming an indispensable article of dress. They are chosen not for their lightness and convenience in making a draft, but merely as ornaments. They must match the dress and be elaborately mounted. For full dress they are of carved pearl, covered with point lace, and cost from \$30 to \$100. In demitilette tortoiseshell fans are used, and cost about \$25. Fans are a heavy item now-a-days.

PRINTERS' WIVES—May they always have plenty of SMALL CAPS for the heads of their *little original articles!*

The kidneys lie one on each side of the lower part of the backbone. They are from four to five inches long, and two and a half inches broad. They are in shape like the kidney-bean, and weigh about half a pound each. **Bristol's Sugar-Coated Pills** and **Bristol's Sarsaparilla** have proved themselves to be excellent remedies for kidney disease; in moderate doses they speedily give relief.

WANTS

Music of the spheres, with original score.

The cap of a climax.

The musket and powder-horn of a shooting star.

The march of mind, arranged for a full orchestra, with trumpet obligato by Fame.

Some bristles from the last brush with the enemy.

Some sands from Time's hour-glass.

The iron from the plane of the elliptic.

Some tenpenny nails made from fragments of the Iron Duke

Bristol's Sarsaparilla is a sure cure for all Eruptions.

The surpassing aromatic excellence of **Murray & Lanman's Florida Water** has caused its qualities as a cosmetic to be partially overlooked. It is not only the most refreshing and delightful of perfumes, but, as a superficial application for the removal of blemishes on the skin, it is unsurpassed. In all cases of annoying eruptions, freckles, tan, and sunburn, caused by exposure to the sun or air, this soothing, softening toilet-water will be found exceedingly useful, imparting to the complexion clearness and softness, and entirely removing that sallow, greasy appearance of the skin, so disagreeable to refined and elegant taste.

ENIGMA No. 29.—Five hundred begins it, five hundred ends it,

Five in the middle is seen ;

The first of all letters, the first of all figures,

Take up their stations between,

My whole was a king of very great fame ;

Would you know who ? you here have his name.

CORN BREAD.—One quart of buttermilk, three eggs, one tablespoonful of sugar, one teaspoonful of soda, meal enough to make a thin batter.

BREAD PUDDING.—Three eggs, three pints of sweet milk, one tablespoonful of sugar ; cover over the top with buttered bread, about one inch square ; season to suit taste.

Murray & Lanman's Florida Water is very extensively used as a dentifrice, on account of the exquisite fragrance which it leaves in the mouth. The proportions should be about a teaspoonful to a glass of pure water. It neutralizes the minute particles of food lodging in the mouth, and which are the prolific cause of decayed teeth, bad breath, and unhealthy, white-looking gums. Moreover, by the use of **Murray & Lanman's Florida Water** the breath is made sweet and pleasant and the teeth white without any danger of injuring the enamel, a difficulty existing with nearly all the mouth lotions and powders for the teeth.

What flowers are always under a persons nose ? Tulips (two lips).

Why is a drummer the greatest person of the times ? Because time beats all men and a drummer beats time.

Why are most of the heroes and heroines in novels like the letter O ? They are always in love.

DRESSING FOR LETTUCE SALAD.—Yolk of one hard boiled egg, one teaspoonful of mustard, one teaspoonful of olive oil. Rub into paste ; add vinegar to suit the taste. Cut up the lettuce, and pour over the dressing.

Punch's "He smole a ghastly smile," and "many a wink he wunk," have been imitated by a minstrel wit, who said, "He sneezed a snooze, and said I snoze it."

BARLEY SOUP.—Take two pounds of shin of beef, quarter pound of pearl barley, two onions sliced, two carrots chopped, salt and pepper to taste ; place in a gallon pot, fill up with cold water, boil very gently for five hours. Celery tops improve its flavor.

CORNED BEEF.—The *Scientific American* informs the ladies that if they would have corned beef juicy after it is cold, and not as dry as a chip, they should put it into boiling water when they put it on to cook, and they should not take it out of the pot, when done, until it is cold.

As a general thing, ladies who make any pretensions to refinement desire to have soft white hands. We believe that there is no other thing will tend more to produce this effect than the constant use of **Murray & Lanman's Florida Water** mixed with the water in the basin. It removes redness and roughness. The ladies of Cuba and South America were the first to discover the extraordinary virtues of this floral water as a cosmetic, and after twenty-five years of every-day use, they have decided that it is the only fragrant distillation combining all the requisites for a safe and reliable beautifier of the skin, as well as an exquisitely delicate perfume.

In a pool across a road, in the county of Tipperary, Ireland, is stuck up a pole, having affixed to it a board with this inscription : "Take notice, that when the water is over this board the road is impassible."

Lime will do well on retentive sour soils, but not on sandy land, and is more effective on the sea-coast, on account of the salt, than in the interior.

Bristol's Sugar-Coated Pills Are a sure cure for Biliousness.

The invariable success of **Bristol's Sarsaparilla** is not the result of any hidden or wonderful discovery in its component parts, but the legitimate result of the great care and expense used by the proprietors in its preparation. We have our own intelligent and trustworthy agents in the different sections of the world where the drugs are produced which enter into its composition, and in this way have the choice or selection of the best qualities of every article.

PAVEMENT FOR STABLES.—Three bushels of sifted coal-ashes mixed with two of gas lime and made into stiff mortar with gas tar, spread on a level bed of small stones, well rammed down—produce the best pavements for a stable.

RIDDLE No. 23.—What word of six letters contains six words besides itself, without transposing a letter?

A celebrated wit was asked why he did not marry a young lady to whom he was much attached. "I know no reason," replied he, "except the great regard we have for each other."

Courtship is the engagement or siege, proposal is the assault, and matrimony is the victory.

An Irish attorney says: "No printer should publish a death unless apprized of the fact by the party deceased."

Why should men avoid all women of the name of Ellen? Because the man that marries Ellen rings his own (k)nell.

We stood beneath the chandelier—ah me, her tender eyes! "Good night," I whispered, bending near—ah me, her low replies! The gaslight flickered overhead—ah me, her tempting pout! "Pray turn it down," she archly said; ah me, I turned it out! There's Providence in many slips—ah me, her cheek was fair! Oft love is born of wedded lips—ah me, 'twas then and there. We stood within the lighted hall—ah me, her chiding eyes! I stooped to whisper "Pardon all;" ah me, her mute replies!

There are constantly appearing new remedies for the cure of disease,—so many, in fact, as to confuse and embarrass the invalid in making a choice. But if those in quest of a cure will at once resort to **Bristol's Sarsaparilla and Pills**, they will not be disappointed—the speedy restoration of their health and strength will be the sure reward.

A WORD TO FARMERS.—The first thing for a farmer to find out is what crops grow best on his soil. Then let him not be discouraged by low prices for a year or two. If he has a grass farm let him make butter right along, even if some weeks it does not bring him but eighteen cents. So with potatoes, or hogs, or cheese. Farmers differ more in skill as marketers, than industry as producers.

Tied to time—Watchmakers' apprentices.

An instrument of tyranny—A file of soldiers.

Men of means are often the meanest of men.

What is joy?—A sunbeam between two clouds.

A light figure—A woman with a taper waist.

Laziness travels so slow that poverty soon overtakes her.

Does a hen lay her eggs because she is impatient of the yolk?

The following is one of the best specimens of the Pentalgogue:

S A T O R
A R E P O
T E N E T
O P E R A
R O T A S

A tailor who, while skating, fell through the ice, declared that he would never again leave his hot goose for a cold duck.

The great care exercised in the preparation of **Bristol's Sarsaparilla** insures a medicine of the most uniform and reliable medicinal properties, which never disappoints the patient nor the physician who prescribes it, and which, as a rule, will cure all diseases having their origin in bad blood and depraved humors.

PLANT TREES.—The *Country Gentleman* tells of a man who planted ten acres in forest when he was married; when his oldest girl was married he cut off \$1600 worth of timber to buy her a fitting out; this he did also for his other children, and they have a good forest left.

Disease of the Blood cured in five weeks!

Mr. O. E. BRUNET, Druggist, Quebec :

Dear Sir,—For over three years I suffered from an intolerable itching, caused by a diseased state of the blood, and after trying almost everything without benefit, I was induced to use three bottles of Bristol's Sarsaparilla, which I am glad to say quite cured me in five weeks.

JAMES McKEONE,

Metcalf St., St. Sauveur.

To insure a healthy liver use Bristol's Pills.

What is the difference between a watchmaker and a jailor? The one sells watches, and the other watches cells.

Why is your nose in the middle of your face? Because it's the scenter.

Bristol's Sugar-Coated Pills are now so well known and so universally used, that it is scarcely necessary to say anything concerning them. We therefore only remark that the same active medicinal principles, viz., Podophyllin and Leptandrin are still used in their preparation. It being to these two invaluable vegetable resinoids that the wonderful cures of liver and bilious diseases, effected by our Pills, are to be ascribed, and we beg the sick to remember that no other Pills contain Podophyllin or Leptandrin!

FRIED DUMPLINGS.—Take four ounces of grated bread, eight ounces of currants, eight ounces of suet, two tablespoonfuls of sifted sugar, a tablespoonful of allspice, and half a cupful of grated lemon peel; beat four eggs and add a half pint of milk; divide the mixture into ten dumplings, and fry them in butter to a light brown color, and then serve them with wine sauce.

RIDDLE No. 30.—What is that which lives in the winter, dies in the summer, and grows with its root upward?

Cooks will find that by soaking salt pork, salt beef, or sliced bacon, a few hours in milk (instead of water), rinsing it off with cold water and wiping it with a dry cloth before cooking, the flavor will be much improved.

When the doctor orders a dose of bark, has the patient a right to growl?

It is highly important that the wonderful curative powers of **Bristol's Sugar-Coated Pills** in Liver Complaint, should be made known to the public. They are in this disease, as nearly as can be said of any medical preparation, a perfect specific!

"Is that marble?" said a gentleman, pointing to a bust of Kentucky's great statesman, recently, in a New York store. "No, sir; that is Clay," replied the dealer.

SUNDAY SCHOOL DIALOGUE.—Teacher: "Why was Joseph put into the pit?" Pupil (who sometimes goes to the theatre): "Because there was no room in the dress circle."

BEEF A-LA-MODE.—Take eight or ten pounds of round, cut several deep gashes in the flesh, and fill them with fat, salt pork. Then put into a crockery stew-pan half a calf's-foot, a handful of parsley, a bay-leaf, a little garlic, a sprig of thyme, two onions with a few cloves stuck in them, half a carrot, half a pound of fat pork cut into little square pieces, and cover with a gallon or more of good cider vinegar. Place the beef upon this mixture, set over a slow fire or in a moderate oven, and simmer gently five hours. If one cannot obtain all these ingredients a pint of canned tomatoes, two or three onions, with a little pepper, a few cloves, and a little vinegar, gives the meat a very agreeable flavor. When the beef is taken out, let it be put in a pan and pressed into an even mass so it can be cut in handsome slices. The liquor should be strained, the fat removed, and the residue thickened with a little flour.

Joint education—Gymnastics.

Country seat—A milking stool.

Bristol's Sugar-Coated Pills do not depend upon any mineral or dangerous substance for their action upon the liver. They are purely vegetable, and entail no evil consequences upon the patient; they do not dry up the natural humidity of the bowels, thereby causing a continual necessity for further purgation, and the ultimate weakening of the entire excretory organs.

MODERN DEFINITIONS.

HEART, n. a physical necessity in a man's system as created by Nature, but frequently considered a superfluity in the system pursued by himself.

HEIRESS, n. an agreeable kind of young lady, considerably instituted by Nature for the benefit of gentlemen endowed with liberal tastes, but possessing only restricted means of gratifying them.

HERALDRY, n. a so-called art; the only art about it, however, being the art displayed by its professors in gaining money by the preservation of a large colored picture-book.

Paper napkins for table use have been introduced into the restaurants of Germany. Three of them cost less than a cent, and they are made of all sizes. And then you are sure of getting clean ones!

Bristol's Sugar-Coated Pills Are the safest purge you can take.

FRIED OYSTERS (Delmonico's style).—When the oysters are taken from the can, wrap them in a dry cloth until the surface moisture of the oysters is absorbed; then take them from the cloth, put them in the white of an egg (slightly beaten), from that into pulverized cracker; lastly, for frying, heat together as hot as possible, and not scorch, equal parts of butter and lard, and fry them rapidly.

The rank odors which are sold in small bottles, at high prices, for use on the handkerchief, are almost without exception chemical preparations made from substances the very opposite of agreeable or pleasant, even to think of. **Murray & Lanman's Florida Water** is the pure and simple fragrance of natural flowers.

PUZZLE No. 11.—Express with five letters a sentence containing four words and twelve letters.

A Manchester girl wants to know if the woman's rights movement includes the right to do the courting. If it does, she is in for it, as the men in her vicinity are very bashful. There is something practical in that.

What is worse than raining cats and dogs? Hailing omnibusses.

Game is very plenty on the Pacific road—that is, euchre and seven-up.

"Can you return my love, my dear Julia?" "Certainly, sir; I do not want it, I am sure."

Murray & Lanman's Florida Water is the great perfume for the toilet table—its use is universal and indispensable, removing roughness, sunburn, tan, and blotches.

TAPIOCA PUDDING.—Soak a teacupful of tapioca in three and a half cups of boiling water, and two spoonfuls of white sugar. Keep it in a warm place for three hours. Fill a two-quart pudding-dish three-fourths full of rich, ripe, tart apples, peeled and quartered. Pour the tapioca over the apples and add half a teacupful of cold milk to brown the tapioca. Bake one hour.

SAGO PUDDING.—Pick over and wash a teacupful of sago; pour on nearly a quart of boiling water; add half a teacupful of sugar, and a little milk, if preferred, to brown. When cold, pour it over the apples (same as for tapioca) or mix the two together in a pudding-dish and bake an hour. Cover the dish the last half hour.

Speaking of the bill for civil marriages, a lady writes to *Punch* in behalf of civility after marriage.

It is a well-known fact that perfumes have long been successfully used as remedial agents in a large class of nervous diseases; and their power to prevent or cure other affections of a more serious nature is beyond all doubt. **Murray & Lanman's Florida Water** has been a source of health and pleasure to thousands; as a nerve invigorant it is unequalled.

CRACKER PIE.—Two crackers, broken fine, one cupful of sugar, one cupful of boiling water, one teaspoonful of tartaric acid, two crusts.

LEMON PIE.—One lemon, chopped, one cupful of sugar, one and a half crackers made fine, three tablespoonfuls of hot water, two crusts.

Mythological Festivity.—Hercules going to dine with his club.

An actor ought to be a happy man; his work is all play.

A modern surgical operation—To take the cheek out of a young man.

Why are pimples on a drunkard's face like the cuts in a witty London newspaper? They are illustrations of *Punch*.

From long experience we think it is quite evident that the use of perfume is beneficial to health. It is, however, of the greatest importance that the perfumes used be made from proper materials. **Murray & Lanman's Florida Water** is the simple fragrance of flowers, agreeable and healthful in every case.

"What," asked Margarita of Cecilia, "what, dearest, do you think is really the food of Cupid?" And Cecilia answered, "Arrow-root."

William Rowe was arrested in a western town the other day for beating his wife with a hoe—as if a man hadn't a right to hoe his own Rowe.

Murray & Lanman's Florida Water, The most refreshing of all Perfumes.

MULCHING.—Mulching is placing mulch or moist litter of various kinds upon the surface of the soil over the roots of trees, shrubs, and herbaceous plants, and is very beneficial. Its uses are the retention of moisture, the prevention of injury by frost, and the promotion of an equal temperature. Strawberries thinly mulched, the crown being uncovered, are rendered more productive and continue longer in beauty, especially in hot, dry climates. Newly-planted fruit trees are often greatly benefited by mulching.

Certainly it is one of the most convincing evidences of the sterling excellence of **Bristol's Sarsaparilla** that it has successfully stood the test of public trial since it was first offered for sale in the year 1832, and from that time to this its career has been an uninterrupted and continuous success. In every country where it has been introduced the result has been the same.

RIDDLE No. 22.

Four people sat down in one evening to play ;
They played all that eve and parted next day.
Could you think, when you're told, as thus they all sat,
No other played with them, nor was there one bet ;
Yet, when they rose up, each gained a guinea,
Though none of them lost the amount of a penny ?

Old Grumpy says, a woman's grief is very short. If she loses her husband she pines only for a second.

A poetical American barber, who deals in spirits as well as lather, attracts no slight custom to his shop by the following line fixed over his door :

"Rove not from pole to pole, but here turn in,
Where naught exceeds the shaving but the gin."

Wife—(anxiously)—"What did that young lady observe that passed us just now?"
Husband—(with a smile of calm delight)—"Why, my love, she observed rather a good-looking man walking with quite an elderly female—that's all. Ahém."

Oh ! what's the use of fretting
At imaginary things,
Despair not at mere trifles,
See what the morrow brings.
Look boldly up—push forward,
'Tis the only way to do,
But never trouble trouble,
'Till trouble troubles you.

Bristol's Sarsaparilla is prepared expressly to cure the diseases most prevalent in this climate. It is put up in large bottles, each containing as much as two or three of the bottles of other so-called Sarsaparillas, and we guarantee that Bristol's is nearly twice as strong.

COCOANUT CAKES.—Grate the cocoanut, add the white of two eggs, and the juice of one lemon, with sugar to taste ; beat up the mixture, drop it on wafer-paper, and bake it in a quick oven. They should be small rough cakes, the points just browned.

POTTED BEEF.—Take four pounds of beef well salted, season with pepper, lump of butter and allspice, a little clove and nutmeg ; put it in a jar and press as closely as possible.

Love, it is said, is as necessary to a woman's heart as is a fashionable bonnet to her head. Indeed, we think, rather more so ; for nothing less than a large measure of love will content her ; whereas the recent fashion shows she can be satisfied with a very little bonnet.

Bristol's Sarsaparilla and Pills have been tested for over forty years, and always with success. We therefore urge the sick and ailing not to trifle with their health by wasting valuable time in trying new remedies, but resort at once to those old standard preparations.

A writer, in speaking of bonnets, says the coal-scuttle was in vogue when blushing was known ; but both are now obsolete.

METHOD OF BLEACHING YELLOW IVORY.—A small piece of burned lime is slaked in water, so as to form a thin milk, which is heated in a pot ; the ivory is left in this pot until it is perfectly white, when it is taken out of it, dried, and polished.

RECIPROACITY.—A bachelor editor, who had a pretty sister, recently wrote to another bachelor equally fortunate, "Please exchange."

A MONTREAL LADY'S OPINION

OF

MURRAY & LANMAN'S FLORIDA WATER.

"Having had imposed upon me here a worthless article for your Murray & Lanman's Florida Water, I will thank you to send me a case direct. Amount inclosed. I have used it for some years, and consider it not only the most delightful of perfumes, but also the most healthful."

Imperishable Fragrance! Murray & Lanman's Florida Water.

Extract from a conjugal dialogue: Husband—"If I were to lose you I would never be such a fool as to marry again." Wife—"If I were to lose you, I would marry again directly." Husband—"My death would be regretted by at least one person." Wife—"By whom?" Husband—"My successor."

In all Scrofulous and Syphilitic diseases the cure can be effected only by some powerful, deterring alterative, that, entering into the circulation from the stomach, will send its cleansing and purifying power through the minutest veins and arteries, where, seizing upon the poisonous morbid matter, it will neutralize its baneful nature, and will send the blood back to the heart laden with health and strength. Just such a remedy is **Bristol's Sarsaparilla**.

Josh Billings defines a "thurrer bred bizness man" as "wum that knows enuff about steelin' so 't there kant eny body steel from him, and enuff about law so that he kin do his steelin' legally."

A little boy, some time ago, while coming down stairs, was cautioned by his mother not to lose his balance. His question, which followed, was a puzzler: "Mother, if I should lose my balance, where would it go?"

A Yankee captain once sang out in a squall to a raw hand on board his craft, "Let go that jib, there! Darn your skin, let go that jib!"—"I ain't touching it," squealed out the simple down-Easter.

GRAHAM BREAD.—Take 1 quart of sour or butter-milk; 1 teaspoonful of soda; 1 tablespoonful of sugar, and stir in Graham flour to make a batter as thick as pound cake. A little salt should be added; stir well and bake in small tins or a loaf, as best suits the convenience. It should be baked in a quick oven; if in a loaf, forty minutes, but great care should be taken not to scorch or burn, as this kind of bread burns sooner than the bread made of bolted flour.

In the acute forms of brain-disease, immediate recourse must be had to the best medical help. But in those slower chronic troubles which so plentifully affect the nervous centre, there is no remedy so safe and yet so effective as **Bristol's Sarsaparilla**. Its well-known and long-tried efficacy in purging out from the blood and humors every particle of poisonous, morbid matter, is sufficient guarantee of its value in the diseases affecting the brain.

The perpetrator of the following, we are happy to say, is deceased. He was bled to death with hair-pins, and afterward drowned in catnip tea:—When are babies not babies? When they are robbin' red breasts.

At no moment of difficulty does a husband, knowing his utter helplessness, draw so closely to his wife's side for comfort and assistance as when he wants a button sewed on his shirt collar!

TO CLEANSE BLANKETS.—Put two large tablespoonfuls of borax and a pint bowl of soft soap into a tub, to a pair of blankets, and let them remain over night. Next day rub them out, and rinse them thoroughly in two waters, and hang them up to dry. Do not wring them.

Says an exchange:—"It is common to speak of those whom a flirt has jilted as her victims. This is a grave error. Her real victim is the man whom she accepts." This reminds me of a happy simile: "A coquette is a rose from which every lover plucks a leaf; the thorn remains for her future husband."

Diseases of the bones are unlike those of the flesh in this, that they are more difficult to control, and more tedious of cure. In nearly all such diseases, local applications are of comparatively little use. The treatment must be constitutional. The blood, from which the bones, as well as all the other parts of the body are made, must be purified. **Bristol's Sarsaparilla** is without question the best and only sure purifier of the blood and humors.

I have seen a farmer build a house so large that the sheriff turned him out of doors.

I have seen a young man sell a good farm, turn merchant, and die in an insane asylum.

I have seen a farmer travel about so much that there was nothing at home worth looking after.

Refreshing Fragrance! Murray & Lanman's Florida Water.

On a child being told that he must be *broken* of a bad habit, he naively replied: "Papa, hadn't I better be *mended*?"
How can you mathematically describe the cordage of a vessel which has run ashore and broken up? By a rectangle.

Bristol's Sarsaparilla possesses fine diuretic properties which make it exceedingly valuable in cases of kidney disease. Where these organs are affected with chronic trouble, a drink made with one-third Sarsaparilla to two-thirds water, and used freely, will give the best results.

BLEEDING FROM THE NOSE.—Put a piece of paper in your mouth, chew it rapidly, and it will stop your nose bleeding.

Some ingenious hiped has a machine to make a man rise early in the morning. A young Benedict says a six months' old baby can beat it all hollow.

FRESH PEARS—Newly-married couples.

COATS to make a spread—Petticoats.

WANTED—A bucket of water from "All's well."

MUTTON PIE.—Cut steaks from a loin or neck of mutton that has hung; beat them, and remove some of the fat. Season with salt, pepper, and onion; put a little water at the bottom of the dish, and a little paste at the edge; then cover with a moderately thick paste. Season, and cover it over, pinching the edge. When they come out, pour into each a spoonful of gravy made of a bit of mutton.

"Did I not tell you," said the father of a little girl, "not to pick flowers in the conservatory without leave?" "Yes, papa; but all these had leaves."

All kinds of eruptions on the body are the result, more or less, of an impure state of the blood and humors; and as **Bristol's Sarsaparilla and Pills** are the best of all purifiers, they can be depended upon to remove every vestige of eruption, and leave the skin smooth, soft, and healthy.

Time goes on quickly enough without the application of "the spur of the moment" to hasten the pace!

Watchmakers haven't any right to complain about slow-paying patrons, as there is a good deal of "tick" in their own business.

FASHION ITEMS.

The season thus far has developed no particular change in suits or dresses.

Black lace is worn at the throat and wrists instead of white, and especially with black dresses. When dresses are cut low, black dotted net forms a sort of chemise. It may be relieved with a narrow ribbon or velvet looped in.

Hair is promising greater simplicity. Misses and young ladies wear their hair in two long braids down the back, to quite an extent. Each end is finished with a bow of ribbon.

When was Ruth very rude to Boaz? When she pulled his ears and trod on his corn.

"No, dear," said a mendacious husband to his wife, "you never catch any lies coming out of my mouth." "You may well say that," replied the wife, "they fly out so fast that nobody can catch 'em."

As a spring and summer medicine there is no other thing can compare with **Bristol's Sarsaparilla and Pills**; they speedily remove from the system the thick and unhealthy humors that have accumulated during the winter months, and thus prevent the attacks of fever, jaundice, and biliousness that are so apt to occur in spring and summer if the system be not cleansed.

AN EXCELLENT RICE PUDDING.—Add two quarts of milk, one cup each of rice and sugar, a teaspoonful of salt. Wash the rice and add it to the milk cold, and bake. The secret of having it nice consists in its being taken out of the oven before the milk is all dried away. It should be creamy in consistency, and when cool it is better than a pudding made with eggs, as there is no watery whey. Essence of lemon or raisins is an improvement.

WANTED TO KNOW.—Is a woollen mill a fight between two rams? Is bunting the proper material for street flagging? Was the "tile" that was loose, manufactured by the celebrated insane hatter? Is a "reel" of cotton a fashionable dance? How many dances are there in a ball of twine? How many tons register is the bark of a dog? Are ships' doctors medicinal salts?

THE TESTIMONY OF THE Most Respectable Canadian Druggists

From letters received in July, 1871.

READ! READ!!

From W. E. BRUNET, Esq., Quebec.

"Bristol's Sarsaparilla and Pills have a great circulation here; they give satisfaction."

From J. B. MEACHAM, Esq., Dundas.

"I sell a great deal of your Sarsaparilla, and it gives universal satisfaction."

From ROBERT WIGHTMAN, Esq., Owen Sound.

"I perceive a large increase in the sales of Bristol's Sarsaparilla and Pills here."

From EDMUND GREGORY, Esq., Lindsay.

"The Sarsaparilla always sold well here; but is now going better than ever."

From T. R. MELVILLE, Esq., Prescott.

"The Sarsaparilla continues to have an extensive sale here. I have sold during the past six months more than I ever did in a year before."

From J. C. BRIGHT, Esq., M.D., Chatham.

"Your medicines, Bristol's Sarsaparilla and Pills, sell remarkably well here, and give good satisfaction."

From Messrs. HACKING BROS., Listowel.

"We sell a large quantity of your Sarsaparilla and Pills, and sales are increasing."

From Messrs. TAPSCOTT & CRAIG, Brantford.

"We have good accounts, almost daily, about your Sarsaparilla and Pills. They are obtaining with us a rapidly increasing sale, and we could, if desired, get hundreds of testimonials from the most reliable people."

From Dr. O. RAYMOND, Esq., Montreal.

"I have sold more of Bristol's Pills, the last year, than of all the others together."

From ARCHIBALD STODDART, Esq., St. Mary's.

Your Bristol's Sarsaparilla gives general satisfaction, and is doing a great deal of good in all parts of the country. I recommend it with confidence to all who suffer with diseases of the blood or humors."

From Messrs. A. HAMILTON & CO., Hamilton.

Your medicines, Bristol's Sarsaparilla and Pills, keep up their reputation, and are in good demand."

Had we the space, page after page of such flattering extracts could be given, but we feel that it is not necessary. The people of this country now had many years' trial and experience of our great remedies, and are so familiar with their sterling excellence to require indorsements of any
