B. E. SPOHN, a German physician of much note, having devoted his attention for some years to the cure and removal of the causes of NERVOUS AND SICK HEADACHE, has the satisfaction to make known, that he has a remedy which by removing the causes cures effectually and permanently this distressing complaint. There are many families who have considered Sick Headache a constitutional incurable family complaint. Dr. S. assures them that they are mistaken, and labouring under distress which they might not only alleviate, but actually cradicate by the use of his remedy. THE POET'S BRIDAL SONG.

BY ALLAN CUNNINGHAM. O! my love's like the steadfast run,
Or streams that deepen as they run;
Nor hoary hairs, nor forty years,
Nor moments between sights and tears—
Nor mights of thought, nor day's of pain,
Nor dreams of glory dreamed in vain—
Nor mirths, nor sweetest song which flows
To sober joys and soften woes,
Can make my heart or fancy flee
One more, at, my sweet wife, from thee!

O, when more thought we gave of old
To silver, than some give to gold;
Twas sweet to sit and ponder o'er
What things should deek our hamble bower.
Twas sweet to pull, in hope, with thee
The golden fruit from Fortune's tree;
And sweeter still to choose and twine
A garland from those locks of thine—
A song-wreath which may grace my Jean,
At times there come, as come there ought,
Grave moments of scalater thought—
And hope, that seeks the peasant's hower,

Othen I see, while exacted nigh,
A mother's heart shine in thine eye;

Horrible Case—A Woman rousting her Child.

On the 14th April, between the hours of seven and eight in the vening, the crise of an infant were heard proceeding from a house occupied by a couple of the name of Ward, in Cow-cross Street, Tooley Street, London. A sister of the married parties entered the room, when a scene of indiacibiable herror was presented to her view. The wile was in a kneeling position, with the infant in her hands, forcing it against the bars of the fire-grate, that had a blazing fire in it. The sister instantly ran out of the house into the street, and gave the alarm to the neighbours, who repaired to the apartment. The infant the y found lying in its mother's lap, alive, but burnt completely black; it was taken from her, and conveyed to St. Thomas's Hospital, but it did not survive many min'rts after its admission. The mother, who is about 34 years of age, was not the least oncerned, and when asked how she could have been guilty of such a dreadful deed, laughed at the persons who spoke to her. She was taken into custody, and is carefully watched, to prevent her attempting soli-destruction.

Substitute for the Sux.—The newly invented light of Mr. Gaudin, on which experiments were recently made at Paris, is an improved modification of the well-known invention of Lt. Drumenond, which pour a stream of oxygen gas through spirits of wine, upon unslacked lime, Gaudin makes use of a more otherial kind of oxygen, which he co-ducts through essences of turpentine. The Drummund light is fifteen times stronger than that of burning gas; the Gaudin light is, we are assured by the inventor, as strong as the sun, or thirty thousand times stronger than gas, and of course ten times more than Drummond's. The method by which Mr. Gaudin proposes to turn the new invention to use is singularly striking. He proposes to erect in the island of Pont-Neuf in the middle of the Seine and centre of Paris, a lighthouse five hundred feet high, in which is to be placed a light from a hundred thousand to a million of gass pi strong, the power to be varied as the night are light or dark. Paris will thus enjoy a nort of perpetual day, and as soon as the sun of Heaven is set the sun of the Pont-Neuf will rise.—[Mechanic's Magazine.]

The village of Aberdare was thrown into the greatest alarm on the moraing of Saturday se'unight by an outery of murder, which had been commetted by Mary Lewis on the budy of her own husband. Thomas Lewis was 52 years of age, and had been for a considerable time in an ill state of health, his complaint leing astlima, which compelled him to spend whole nights kneeling by the fire instead of going to bed; and on the above morning, about 6 e'clock, his wife came down statis, and some words ensued between them, when he threatened to strike her with a stool. She instantly seized a hammer, and struck him several timendous blows on his bead, from which he fell and died. It came out on the inquest that a son of the murdered man was awaked from his sleep, and hearing his father struggling, asked his mother what was the matter with his father, when she replied that it was the colic. On being so informed, he composed himself to sleep. He was afterwards awoke by his mother, who said his father was dead, when he came down stairs he asked his mother what was the blood on the floor. She replied "I struck him with a hammer." She expressed no sorrow for what had happened. The jury returned a verdict of "willu murder" against the said Mary Lewis, who has been committed to Cardiff god to take her trial at the next assies. By this sad even eight children, seven of them of very tender years, are left orphans. There is an impression that the woman was insane.—Cambrian.

THE PATRIOTS ON THE FRONTIER.
Detroit is now the abiding place of a brigade of distinguished characters, or, to use a figure better suited to the occasion, it is a regular patriotic menagerie where the curious in such matters, may have an opportunity of seeing some of the queerest animals which have ever attracted attention in this queer world. There at his time, is vezetating the renowned Green's Theller, of which worthy our correspondent writes thus, under the date of the 21st ult:—Dr. Theller has quarrelled with the 'patriots' of this city, because at the late election they refused to nomnate him for Mayor. The war-loving doctor has an uncommon fondness for fingering public money, but our 'free and THE PATRIOTS ON THE FRONTIER.

At the present time people wonder how he mana-ges to support himself and family, for being considered a very paltry person nobody likes to be physiced by him. Mack of the invisible invinci-bles, Col. "In sustaining the great interests of the Country, no object of legislation requires more care and precaution than the due regulation of its system of Banking; and nothing is more its system of Banking; and nothing is more hazardous to those interests than a prolonged issue of inconvertible Bark paper. Impressed with this truth, a consider it would have been better to fix a much earlier day, for the return to a sound system of Banking.

The tide of emigration on a large scale The tide of emigration on a large scale has fairly set in from Great Britain for South Australia. On the 9th April, the bark Ariadne sailed from Greenock with 134 passengers. A great number of emigrants who had embarked on board the vessel were turned on shore by the Government superintendant of emigrants, there being a greater number on board than allowed by the law. The emigrants by this vessel are taking out a vast deal of money, besides goods, plants of useful shrubs, osiers, hawthorn, &c., and one or two wooden houses in frame, ready to be put up immediately on landing.

At Glasgow, three or four vessels are fitting out for the purpose of conveying emigrants to the same destination.

MORISON'S UNIVERSAL MEDICINE

MORISON'S UNIVERSE

NOTICE.

THE Subscribers, general agents for Morison's Pills, have appointed William Whittaket, Sub-Agent for the Upper Town, No. 27, St. John Street.

LEGGE & CO.

LEGGE & CO.

Quebec, October, 1839.

That the public may be able to form some idea of Morison's Pills by their great consumption, the following calculation was made by Mr. Wing, Clerk to the Stamp Office, Someriset House, in a period of six years, part only of the time that Morison's Pills have been before the public,) the number of stamps delivered for that medicine amounted to three million, nine hundred and one thousand.

to three million, nme numero and one sand.

The object in placing the foregoing powerful argument in favour of Mr. Morison's sys.em, and to which the public attention is directed, namely, that it was only by trying an innocuous purgative medicine to such an extend that the truth of the Hygeins system could possibly have been established. It is clear that all the medical men in Eagland, or the world, put together, have not tried asystem of vegetable purgation to the extend and in manner prescribed by the Hygeists. How, therefore, can they (much less individually) know any thing about the extent its properties.
