"But will God in very deed dwell with men on the sarth? behold heaven and the heaven of heavens cannot contain thee, how much less this house which I have

In simple grace and majesty it stands, Another Temple, to His worship raised, Whose presence fills the boundless realms of space, And who, I y all, is " worthy to be praised "

To Him Creation pours her ceaseless song, Her incense, to His throne, ascends each day; he sounding ocean, and the lotty mount, All own his voice, and bow beneath his sway.

Maker Supreme! The universe is thine, Thine all the tribes of air, of earth, and sea; How then shall we, the creatures of a day, Presume to build a Temple worthy thee

But Thou hast promised, where, recorded, stands Thy Name engraven, gracious to draw near; To listen to the sighs of herable hearts, The weak to strengtheupand the mourner cheer.

Then, in thy House-for which we bring, to-day, Our humble offerings with a thankful heart-Thy gracious presence manifested be, And needful strength to worshippers impart.

Hear Thou, from Heaven the humble rongs of praise, Which from within these walls shall soon ascend; And, to the supplications of thy sainis, Oh, gracious Lord, a listening car attend.

Each Sabbath day amid these courts be found, Age with its heavy locks, and smiling youth; pacid matron, and the careworn mar, Listening, with reverence, to the Word of Truth.

Here may the stubborn heart relenting bow, In humble penitence and grateful joy; Here may the broken spirit find a balm, And fler, the troubled, peace without alley.

And through revolving years may happy souls, Casting aside the tenement of clay, Casting aside the tenement of easy.

Soar glad'y, from this Temple built with hands,

And in thy higher Courts their hornage pay.

The Music of a Peaceful Heart.

What is all music, compared with what the child of God knows? He beholds immeasurably more than all the handiworks of the Infinite One-he beholds the peculiar glory of the Great Father, shining with singular grace in the face of Jesus Christ. « He beholds the harmonious union of compassion and holiness. Their separate crowns are cemented by the bleod of the cross into one doubly radiant diadem. A voice from the midst of the throne comes in the gentlest whispers to his soul, bidding him to be of good cheer, because he who was dead, and is alive again, is his friend. When the vernal sun smiles on the snow-clad earth, the floods descend and the winds blow. But at length the silent and gentle influence of the sky prevails. The earth returns the smile to the heavens. She walks around the throne of her God in robes of the loveliest hue bespangled with flowers of every colour .--When the Holy Spirit has opened the heart, and the light of the knowledge of God, in in the face of Jesus Christ, shines into it, the ice melts, the camity dies, and faith, hope and love spring up. There are peace and joy then, joy which corrows render more intense and precious. To an individual who has such views and affections, how can the condition of him who is without God and without hope in the world, be otherwise than pitiable in the extreme? How can we help taking the imperitent by the hand, saying. I am distressed for thee, my brother, my sister. Of the thoughts which fill the soul with glory and blessedness, thou art altogether ignorant. For the purest and most lasting joys thou hast no heart. Would I could help thee. But all I can do is earnestly to commend thee to Him who can give eyes to the blind and cars to the deaf.

The Modest Clerk.

Not long since, there came to our city an unassuming young man, whose delicate health had prevented him from entering the ministry, and made it advisable that he should commence business as a merchant's clerk. Entering an establishment here, he found himself the room-mate of the head clerk, a moralist, and proud of his virtues, and of a second clerk, kind, but gay and thoughtless. And now came the first struggle of duty. Should he retire without reading the Scriptures and prayer? Conscience told him his duty, but his fears answered, "Give me any cross but that."

After two months of disquiet and remorse, days of ceaseless unrest and nights of sleepless trouble, he drew forth his mother's Bible from his trunk, and endeavoured to extract consolation from it; but alas he saw that those who would find rest must take the yoke : and every passage seemed addressed to him, summoning him to take up the cross, however great the sacrifice. He resolved to obey. That night, however, his companions entered the room unusually gay, and amid laughing and trifling, and varied conversation, there seemed no place to introduce devotional exercises. He anxiously awaited the favourable moment, but it came not; and when sleep succeeded silence, he had failed of duty, and was again in distress. The night was spent in penitent confession and secret resolutions for the next evening. These resolutions he resolved nothing should thwart.

As the trio were again brought together into their room for retirement, he saw the time had come. With trepidation and trembling, he said to the eldest clerk, and change its colour-another by a gentle "Henry, we have been room-mates for a long time, and never prayed together. Let us neglect this duty no longer. I have done wrong in delaying as I have." The moralist was struck dumb with amazement. The other clerk was silent also. He opened that dear Bible of his mother, read, kneeled by his chair; and then was verified the promise, "It shall come to pass that before they call, I will answer; and while they are yet speaking, I will hear." Night after night the three clerks bent their knee in prayer. The moralist acknowledged a power that he knew nothing of. Conviction ensued, and he is now rejoicing in the hope which maketh not ashamed, and ascribes his first impressions to that prayer of the trembling junior clerk.

The Chemist's Power over Matter.

Yet from the power over matter, with which existing progress has already invested man, how wondrously interesting are the results and substances which he can produce at will? one of these substances takes fire, and glows brilliantly when simply exposed to the air-another starts into flame when it is toucked with water or with ice -a third shines in the air with a paler and more lambent but almost perpetual lightand the smell of a fourth is too nauseous to be endured. One gas when diffused through the air, in absolutely inappreciable proportion, affects those who inhale it with violent catarrh - another, when inhaled, exhilarates with a happy but fleeting intoxication-a third, if breathed but once, suddenly arrests the current of life. A single drop of one fluid, if swallowed, will produce instant death-of another, will set in motion the whole contents of the alimentary canal,-while the vapour of the third will produce insensibility. One solid substance, if merely touched, will crumble to powder friction will explode with a terrific detonation-while others again change by a single gleam of the brilliant sun, and produce the wonderful pictures of Taibot and Daguerre. Again other substances are enriched with a healing, balsamic, and salutary virtues. assuaging, exhilarating, or strengthening at the experimenter's will-realising, in a somewhat different sense, the aspiration of the latter alchemists after a universal medecine. And then how remarkable are the changes in the sensible properties of an organic compound, and in its relation to animal life, which are produced by a very small alteration in its chemical composition! It is sufficiently striking that the union of combustible hydrogen gas with fire-supporting oxygen, should produce the fire-extinguishing fluid, water, and that salutary common salt should contain, mollified and disguised by its combination with a metal, sixty per cent of suffocating chlorine. But these combinations, water and common salt, consist of equal atoms of each constituent, which may readily be supposed by their union, greatly to modify the proper ties of one another. In organic compounds, however, containing many molecules united Ruth and Amy were sisters. In early together, it is more surprising that the addition of a molecule more should often enlife. Benzule, for example, contains twenone forms the high flavoured and poisonous oil of bitter almonds: or one of oxygen added in its stead forms the well-known so-

In the low-pressure engines, the steam which has driven the piston in one direction is condensed into water, and taken sixty years ago, he was united in matrimony entirely out of the way before the piston to the eminently pious and worthy person, returns. In these engines, if the steam let in gives a pressure of fifteen pounds to the inch within the cylinder, this will just balance the pressure of the atmosphere without, and the engine will move without any pressure on the boiler outward. It is only above this pressure that the strain on the boiler begins. But in the high-pressure engines there is no apparatus for condensing the steam. It is driven out, in the way described, against the atmosphere, and the first fifteen pounds of pressure on the boiler does nothing to move the engine. It is only above this that anything is accomplished.

The engines of our locomotives and our mills, shops and factories generally, are high-pressure. The condensing apparatus adds much to the expense, and requires much space. On all our eastern steamers condensing or low-pressure engines are used.

Perhaps this explanation will suffice. The manner of effecting the condensation of the steam we will not now describe. The reader is satisfied, we trust, in regard to the peculiarity which gives the names high pressure and low pressure. The former are known by their puffing off a portion of steam, at every stroke, into the at-

The doctrines, discipline and usages of the Connexion, Father Lent loved and admired, and invariably felt a growing interest in their establishment and extension. As we were thinking of the name, age, piety, conduct and end of this "old disciple," we were led to improve his funeral occasion by a discourse, founded upon Gen., xxv. ch. and 8 v .-"Then Abraham gave up the ghost, and died in a good old age, an old man and full of years, and was gathered to his people." While we were endeavouring to pourtray the prominent features in the character of these distinguished servants of the Most High, the manner of their death, and their subscruent glorious state, the people were profoundly attentive, and many of them deeple affected. THE EXISTENCE OF THE HUMAN MIND.

The rich man and Lazarus are both in the world of spirits: the one in heaven; the earthly tabernacle is dissolved, "we have a the pulpit in defence and support of the system other in hell. They both died; and their building of God, an house not made with of sprinkling in lieu of buptism bodies returned to dust, from which they hands, eternal in the heavens." As the Rev. Mr. Martell was to produce a last, he must have a spark? and as he could get it no other way, he very adroitly turns "sparkle" into "sprividle" and wishes his readers to under-

Our author says above, very correctly, that " Nazzch". He next professes to give a quotation from Dr. Robinson, which I do not conceive is to the point, and then asserts "the primary idea" of "Nazzeh" "is that of sparkling."

Now if Parkhurst is any authority in this case, this assertion is obviously a mistake : for he shows the word for "sprinkle," and the word or "sparkle" are different words ; being differently spelt: and having different primary ideas. The word "sprinkle" as said above is "Nazzeh" but the word "sparkle" is "Natztzeh:" the difference is "tz" instead of "z" two very different letters in the Hebrew.

Under "Norseh" Parkhurst gives the following meanings; " to leap, -leap out :- To leap Mr. Entron, -The Christ'an Messenger of or spurt out as blood from a wounded body, the 23rd of April, has just tallen into my hands, Lev. vi 27. "To cause to leap forth-to sprin-

> Our Author will have to tax his ingenuity a good deal, before he can make it appear that two words so very different in their ideal meaning are identical.

> Our learned Critic next refers to two texts of Scripture, but for what purpose it is difficult to He says however, " Nasah" with its sibilent or hissing sound softened, is a kindred word with " Negat" " splendoor" I Chron. xxix. 11. This text reads in English; " Thine O Lord is the greatness, and the power, and the glory, and the victory, and the majesty

Your Readers, Mr. Editor, will perhaps be surprised to learn, that as in the English text they cannot find either sprinkle or sparkle so neither in the Hebrew can be found, either Nazah, Naza, but the word there rendered Glory is Tiphereth, a very different word altogether. The other text is Ezek. i. 7. " And they spark-bed like the colour of burnished brass." There the word used is Notation, from "Natztzeh? which as Mr. Martell says, signifies to sparkle.

We might here ask what has all this to do with the question at issue, and why does our Critic, when he sets outto show that," sprinkle" is not the meaning of the original word in Isaiah Lii. 15, introduce the word "sparkle," about which there is no dispute.

O, but say our author the worls are kindred. Surely the Rev Gentleman may have a person who is kin to him, who is not much like

Mr. Martell next informs his readers that Dr. Robinson and others, pedo-baptists, render the passage -- So shall be cause many nations to rejoice in himself."

I know nothing of Dr. Robinson's translation: but I apprehend, the Rev. Mr. Martell will not contend that in the Hebrew, Chen Yazzeh Goim Raybim: " So shall he sprinkle many nations," the verb "Yazzah," is in the conjugation of Hithpael; or that there is any word which can be correctly rendered " in himself."

The verb is most certainly either in the conjugation of Kal or of Hiphil: if in Kal, then it has the sense of the indicative future in Engsion; if in highld, it means, " so shall be cause many nations to be sprinkled."

In either case it is sprinkle not sparkle. But our author seems determined to blow up the Citadel of Pedo-baptism, and therefore after presuring that the world will receive his dogma that, sparkle, and, sprinkle, are nearly if not quite deatical, he proceeds: I find further that in the Septuagint, or the version of the Seventy, that they translate the Hebrew word, Jazzeh, by the Cree's Thannasontai, the middle voice of the springle, but means to Wonder. Now to render Thaumazo by the English word sprinkte would be preposterous; but this is the word selected by the Seventy to correspond with the Hebrew, Jazzeh, in the teat."

Now what kind of logic is this? The Rev. Critic sets out with some pomp (I will not say And now comes the blast. I will give it in full, in defence of his position he seizes on the Greek I find the word in the Hebrew rendered sprinkle, word 'Thaumazo,' as though he had made a

it would not help the matter; for much as we admire and value the Septuagint, yet it is only a Redeemer is certainly the primary meaning of 11. "If any man defile the temple of God, him translation, and no one supposes the translators of that version were any more inspired than were stituted as an outward and visible sign of that "Let us therefore fear, lest a promise beour English translators.

It is admitted that the Seventy translate the ed men, whether the word yazzeh was in the when applied, in a secondary sense, to those who diligently lest any man fail of (fall from) the copy from which they made their translation, or whether it was another word.

Parkhurst, under the word nazzeh, says, " After all, may we not reasonably suspect that the Seventy had in their Hebrew copy a different reading? And it seems not improbable that the Hebrew word they intended to translate was, yechezzu, from the root chezzu, which signifies,to see, to behold.

Whether the Seventy bad the word yazzeh, or not in the text from which they made their version, no one will doubt that sprinkle is the proper meaning of that word: and if the word admire were used instead of sprinkle, it would make many texts of the Old Testament speak the most consummate nonsense.

Lev xiv, 7., " And he shall, We-hizzah, sprinkle upon him that is to be cleansed seven times If you read 'admire,' what sense can be made of

Verse 16: " And the Priest shall dip his right finger in the oil that is in his left hand, and shall, 4 We-hizzeh,' sprinke of the oil with his finger seven times before the Lord." Verse 27: " And the Priest shall ' We-hizzeh,' sprinkle with his right finger some of the oil that is in his left hand seven times before the Lord." Numbers viii, 7: " And thus shalt thou do unto them to cleanse them: 'hazzah,' sprinkle water of purifying upon them." Num. xix, 18: "And a clean person shall take hyssop, and dip it in the water, ' Wehizzah,' and sprinkle it upon the tent." Lev. xvi, 14: " And he shall take of the blood of the bullock, and shall sprinkle, We-hizzah, it with his finger upon the mercy-seat eastward. 2nd Kings, ix, 33: "And some of her blood was sprinkled on the wall, and on the horses."

I think, determine its meaning to be "sprinkle," assistance in preaching, and exhortation, and and although the Rev. Mr. Martell may find ano- prayer; and other praying members manifested ther word in another language, to mean something much fervency of spirit in their addresses to the else; yet it is absolutely impossible for him or any one else to translate the Hebrew sentence Chen yazzeh Goim Ravbim, in any other way, or at least in any better and more correct way, than

But the Rev. Gentleman seems determined to " blow up pedo-baptism;" he therefore proceeds, as he thinks, to show the incoherency of the English text. He says, "In the preceding verse the prophet says, 'As many were astonished at amongst us; a greater zeal for God's glory, and friend, is, he had nothing better to give. One closing, however, a deep still more profound in the prophet says, 'As many were astonished at a more fervent desire for the salvation of manthing,' &c, 'Sox or in like manner, he shall sprinking a more fervent desire for the salvation of manthing he has made undeniably manifest—he can the abyss of absurdicy, in which the elaborate kle many nations.'" Here the "comparison don't bear inspection."

Don't it, Kev. Sir? The writer may be "pedantic," "flippant," or "illiterate;" nevertheless, he will venture to show that the comparison is very striking.

But first our critic's paraphrase:

"But if we read thus, As many were astonished at him because of his deep humility and poverty: So, or in like manner, will be cause ed at his humiliation, so many shall admire his exaltation and glory. Hence the prophet proceeds, 'Kings shall shut their mouths at him.' that is, in viewing his glory and honour they shall It is a substantial, excellent building; and I of his late article and make it consistent with be Calvinists." be struck with amazement, and be silent in reference to their own dignity. Thus 'So shall he cause many nations to rejoice in himself,' is both hereafter on this circuit. It stands in a delight- ber our former well-merited castigation for prea scientific, evangelical, and reasonable render-

At the risk of being driven into one corner of the Rev. critic's triangle, I must say that the above rendering appears to me to have little to do with science, it is less "crangelical;" and, least of all has it to do with accuracy.

On its science I shall say nothing, and its inaceuracy I have already shown; but a word on its want of an evangelical character.

In the above paraphrase there does not appear to be any reference to the atonement. "How are many nations to rejoice in himself," or be made happy? Not solely by his humility and pocerty Has his sprinkling blood nothing to do with it And why was his human nature thus exalted? The answer is given in the 12th verse of the 53rd chapter: "Therefore will I divide him a portion with the great, and he shall divide the spoil with the strong; because he poured out his soul unto death, and he was numbered with the transgressors, and he bare the sin of many, and made in-

tercession for the transgressors. Your readers need not be told that the blood of Christ is called the "blood of sprinkling; and this being borne in mind the evangelical sense and accuracy of the passage throughout will be apparent. "As many were astonished at his humiliation and death,"-So shall he sprinkle

MR. EDITOR,-In my last communication I remarked, that we were holding a series of Meetings for the Revival of Religion at Lower Horton, and that from the first we had encouraging tokens of success; and that we were hoping that the Lord would abundantly pour out his Spirit on this part of his heritage, and render our services a great blessing to many precious souls.-I can now say, that his Spirit has been poured out, the members of the Church here have been greatly quickened and blest in their christian course, backsliders recovered to the favour of God, a number of persons seriously impressed with the importance of experimental religion, and twenty-four souls have professed converting grace. Our services were continued four weeks, part of the time twice a day, and then in the evenings. We forgive the sneer, as we do not profess to be so profound as to be obscure, nor so elaborate as to evolve a tissue of mere absurdity and inconsistency. We leave such prefundity and elaborateness to one who can see in faudism a system accordant with the "findings of true philosophy"

To us it has occasioned no surprise, that the Witness, in his protound and elaborate researches, has discovered " one very significant feature in the articles of the Westeyan," which he says, "he cannot allow to pass, unnoticed," and that is, "the entire absence of any proof from the Bible in support of his peculiar views." The significancy of that feature is easily accounted for--the Editor of the Weslegan did not intend, in the articles in question, to cite such proof. Proofs from the Bible will be given in due time, -in greater abundance, perhaps, than our friend will like to see, and so conclusive, we believe, that he will find it impossible to dispese of them, if viewed in the "light of revelation" and determined in accordance with the "conclusive findings of true philosophy."

Our neighbour appears to be in great distress, because, as he affirms, we did not bring forward a " single quotation from any theological controversialist," but only "brought forward merely incidental allusions, in a letter, it may be, to some of the tenets held by John Wesley!" "His profound discovery is worthy of a note of admiration! We admire his penetration-his candour-his controversial fairness! Nova Scotla Bible Society.

The Anniversary Meeting of the Nova Scotia Auxiliary Bible Society was held on Monday evening last at the Temperance Hall. The Chair was taken by his Honor -the Administrator of the Government, at seven o'clock; and the business was concluded about ten.

The audience was large and respectable, and the interest manifested indicative of increasing regard for the cause of the Bible. In both these respects this meeting was somewhat in advance of those of former years; and but for the hurry of business at this season, it is probable that the Hall would

The proceedings were commenced with singing and prayer :-- three verses of an appropriate hymn were given out by the Rev. Dr. Twining, and sung by the audience generally; and a very spiritual and impressive prayer was offered up by the Rev. Mr. Maturin. These devotional exercises were conducted, and united in by those present, in a manner well becoming the objects of the meeting, and the solemnity and importance of the occasion.

A very interesting Report was then read the conflicts between truth and error-will-claim by the Secretary, S. L. Shannon, Esquire, in which was detailed the progress of the Selections will be made at greater length from great work of the Parent Society, and of the operations of the Auxiliary, and its Branches and Associations, during the past year. These details were alike grateful and encouraging to every lover of the Divine Word, The Report of the Halifax Ladies' Association, not less cheering in its character, was

Several Resolutions were proposed, and subjects with which it teems. This department carried unanimously ;—the last-expressing cordial thanks to His Honor, the Chairman-by acclamation; the audience rising "Arminians believe that mankind are not of natural history, incidents of travel, descripe simultaneously. These Resolutions were moved as follows :- The first, by the Rev. Dr. Twining -seconded by Charles Robson, Esquire ;-the second, by the Rev. Mr. Adam-seconded by the Rev. Mr. Dunn ;the third, by the Rev. Mr. Uniacke-seconded by the Travelling Agent, Mr. Isnae Smith ; -- the fourth, by the Rev. Mr. Martin-seconded by J. W. Nutting, Esquire; and the last, by the Rev. P. G. McGregor seconded by Peter Lynch, Esquire.

The speeches, though none of them very lengthy, were appropriate and good; and the interest of the meeting was such, as the friends of the Society were glad to witness, and was well sustained to the last. UNITED STATES.

A SINGULAR SUIT .- The Lowell, (Mass.), Vox Populi states that Catherine Cassidy has brought a suit against the Suffolk Manufacturing Company, for refusing to give her a "line," or recommendation, in consequence of which refusal she was unable to obtain employment in other corporations. A portion of the evidence was heard, when the Judge, on account of the new and important law question raised, took the case from the jury, in order that the whole court might determine the rules of law applicable to it.

FATAL EXPERIMENT .- A physician in Prague has just died a real " martyr of science," he had been in the habit of taking strong doses of poison, after swallowing an antidote, in order to note the effects. On the 23rd ult., he took so large a quantity of morphine that all the efforts of some medical friends present at the exhibition could not save him.

AUSTRIAN CHARGE .- We learn from the National Intelligencer that Mr. Hulsemann, the Austrian Charge d' Affaires, left Washington yesterday on his return to Vienna. It is understood that previously to his departure he addressed an Official Note to the Secretary of State, and communicated copies of it to the members of the Diplomatic Corps; but of the purport of this note we are uninformed .- Baltimore Patriot, 8th.

STORM IN THE WEST .- PITTSBURG, May 4 .-The Western papers received here to day contain accounts of a dreadful storm which occurred on Friday night last, and which caused great destruction of property. Among other disasters, the town of Leavenworth, Indiana, was nearly destroyed. About forty houses, some of them substantial brick buildings, with thirteen inch walls, were demolished by the violence of the wind. A number of persons were badly injured, and two or three were killed. At various other places the storm was severely felt, and many houses, fences and valuable orchards were destroyed.

.ARRESTED FOR MURDER. - The Norfolk-Beacon. says that Noah Chappell, of Princess Anne, has been arrested in that city, charged with the murder of his own son. It is alleged that he knocked him on the head with a hominy pestle about three weeks since, and made his escape.

FALSE PRETENCES .- Messrs. Phillips & Taylor, wholesale dry goods merchants in Cincinnati, have been arrested on a requisition from the Governor of Pennsylvania, charged with obtaining \$12,000 worth of goods by talse pretences, of sundry houses in Philadelphia.

ANOTHER FILIBUSTERING EXPEDITION. - The Washington correspondent of the New York Courier says rumours are circulating in that city and in circles that ought to be well informed, of an organization for a third expedition against the Island of Cuba. Several of the so-called officers of the first attempt have been lounging about the metropolis during the winter.

FIRE AND LOSS OF LIME. - A fire occurred at New Orleans on the 22nd ult., which consumed three or four frame houses. A man named Seigle, with his wife and two children, perished in the flames. It is conjectured that Seigle, while intoxicated late at night, set fire to the house, in order to revenge himtelf against his step-children, with whom he had a law suit about the property, but being too drunk to make his escape, or alarm his family, fell a prey to the flames. Beside his charred remains was found \$695 in cold.

JUDSON'S CHEMICAL EXTRACT OF

CHERRY AND LUNGWORT. FOR THE CURE OF

Coughs, Colds, Hoarsness, Spitting of Blood, Night Sweats, Asthma, Liver Complaints, and CONSUMPTION.

DO NOT NEGLECT 1T. CONSUMPTION Oen and has been cured in thousands of cases by

JUDSON'S CHEMICAL EXTRACT OF CHERRY AND LUNGWORT.

cad no remedy has ever before been discovered that wi certainly CURE CONSUMPTION.

The most strongly merked and developed cases of Pulmonary Consumption, where the longs have become dis-eased and dicerated, and the case so utierly hopeless, as to have been pronounced by Physicians and friends, to be past all possibility of recovery, have been cured by this wonderfor remedy, and are now as well and hearty as over. It is a compound of medications which are peculiarly adapted to and essentially necessary for the cure of COUGHS AND CONSUMPTION.

Its operation is mild, yet efficiency; it loosens the phlegm which creates so much difficulty, relieves the cough, and assists nature to expel from the system all cough, and assists rather to expel from the system all diseased matter by expectoration, producing a delightful change in the breathing and chest, and this, after the prescriptions of the very best method men and the investions of stud and sorrowing friends and Nurses, have fulled to give the smallest relief to the Consumptive sufferer.

THOUSANDS OF CONSUMPTIVE persons have been deceived repeatedly in buying medi-dines which were said to be infallible cures, but which have only proved poliistives, but this medicine is not only a palliative but a cure for ulcerated lungs. It contains no descertous drugs, and one trial will prove its aston-ishing efficies better than any assertions or certificates in oring consumption and all diseases of the Lunes, such as Spitting of blocd, coughs, pain in the side, night sweats

at 1000 certificates of almost miraculous cures, performed by this medicine, from some of the first Doctors, Clergymen, and Merchants, have been sent us for this me, dicine, but the publication of them books too much like

EAST INDIA HAIR DYE.

Colours the Hair, and not the Skin. Colours the Hair, and not the Skin.

This dye may be appled to the bair over night, turning the lightest RED or GREY HAIR to a dark brown, and by repeating a second night, to a bright jet black. Any person may, therefore, without the least possible trouble, keep his hair any dark slude or perfect black; with a positive assurance that the dye, it applied to the skin. nill not colour it. By an occasional application, a person turning grey will never be known to have a grey hair. Directions complete with the article. There is no colouring in this statement, we one can easily test.

These lacts are warranted by the gentleman who manufactures it, who is the celebrated Chemist, Dr. COM-STOCK, author of Comstock's Chemistry. Philosophy, and other works, and School Books, well known and widely celebrated by the public.

DEAFNESS.

Use Br. LARZETTE'S ACOUSTIC OIL, for the cure of Dealness. Also, all those disagreeable noises, like the buzzing of insects, falling of water, whizzing of steam which are symptoms of approaching dealness. Many persons who have been deaf for ten, fifteen, or twenty years, and were subject to use ear trumpets, have after using one or two lastites, thrown aside these trumpets, being, made perfectly well. It has cured cases of ten, fifteen, and even thirty years standing of deafness.

FOR MALE AND FEMALE.

DR. LARZETTE'S JUNO CORDIAL, or Procreative Effect, prescribed as an effectual vestorative in cases of Debility, Impotency, or Barrenness, and all irregularities of nature. It is all that it professes to be, viz: Nature's Great Restorative, and remedy for those in the married Bate without off-spring. It is a certain cure for Seminal emissions, General Debility, Gleet, Weakness of the Gental Organs, Nervous Affections, Leucorthees or Whites. As an invigorating medicine it is unequalled. Also, a certain remedy for Inciplent Consumption, Indigestion, loss of Muscular Energy, Physical Lassitude, Female Weakness, Debilicy, &c. It is warranted to please the user in any of the above complaints, and is of priceless value to those without offspring.

It is now used in the principal hospitals, and in the private practice in our country by an immense number of individuals and is utilities, first and most certainly for the cure of the PILES, and also extensively and effectually as, to baffic credulity unless where its effects are witnessed. Externally in the following complaints:

For Drepsy—Treating extraordinary absorption at once. Smellings—Reducing them in a few hours.

Resumatism—Acute or Chronic, giving immediate case. Sore Threat—By Cancers, Ulcers, or Colds.

Croup and Whooping Conve—Externally and over the
