

The Beacon

VOL. XXIX

SAINT ANDREWS, NEW BRUNSWICK, SATURDAY, AUGUST 25, 1917

NO. 8

THE CROOKED FOOTPATH

A, here it is! The old road that marks the old remembered spot—
The gap that struck our schoolboy trail—
The crooked path across the lot.
It left the road by school and church.
A pencilled shadow, nothing more,
That parted from the silver birch
And ended at the farmhouse door.
No line or compass traced its plan!
With frequent bends to left or right,
In aimless, wayward curves it ran.
But always kept the door in sight.
The gabled porch, with wooden green,
The broken millstone at the sill,
Though many a foot might stretch
Between.
The truant child could see them still.
No rocks across the pathway lie—
No fallen trunk is over it thrown—
And yet it winds, we know not why,
And turns as if for tree or stone.
Perhaps some lover trod the way
With shaking knees and leaping heart,
And so it opens runs astray
With sinuous sweep or sudden start.
Or one, perchance, with clouded brain
From some unwholly banquet reeled—
And since, our devious steps maintain
His track across the trodden field.
Nay, does not this—no earthborn will
Could ever trace a faultless line—
Our truest steps are human still—
To walk unwavering were divine!
Tranquil from love, we dream of wrath;
Oh, rather, let us trust the more!
Through all the wanderings of the path,
We still can see our Father's door!
OLIVER WHEELER HOLMES
(Born August 29, 1909; died October 7, 1894.)

MONSIEUR JOSEPH

ON the day that I left hospital, with a month's sick leave in hand, I went to dine at my favorite Soho restaurant, the Mazarin, which I always liked because it provided an excellent meal for an extremely modest sum. But this evening my steps turned towards the old place because I wanted a word with Monsieur Joseph, the head-waiter.
I found him the same genial soul as ever, though a shade stouter perhaps and greyer at the temples, and I flatter myself that it was with a smile of genuine pleasure that he led me to my old table in a corner of the room.
When the crowd of diners had thinned he came to me for a chat.
"It is indeed a pleasure to see M'sieur after so long a time," said he, "for, alas, there are so many others of our old clients who will not ever return."
I told him that I was too glad to be sitting in the comparative quiet of the Mazarin, and asked him how he fared.
Joseph smiled. "I've a surprise for M'sieur," he said—"yes a great surprise. There are ten, fifteen years that I work in these places, and in four more weeks I shall retire and I become the proprietor. Oh, it is beautiful," he continued, clasping his hands rapturously, "to think that in so little time I, who came to London a poor waiter, shall be patron of one of its finest restaurants."
I offered him my warmest congratulations. If ever a man deserved success it was he, and it was good to see the look of pleasure on his face as I told him so.
"And now," said I presently, "I also have a surprise for you, Joseph."
He laughed. "Eh bien, M'sieur, it is your turn to take my breath away."
"My last billet in France, before being wounded," I told him "was in a Picardy village called Flichelle."
He raised his hands. "Mon Dieu," he cried, "it is my own village!"
"More than that," I continued, "for nearly six weeks I lodged just behind the church, in a whitewashed cottage with a stock of oranges, pipes and boot-laces for sale in the window."
"It is my mother's shop!" he exclaimed breathlessly.
I nodded my head, and then proceeded to give him the hundred-and-one messages that I had received from the little old lady as soon as she discovered that I knew her son.
"It is so long since I've seen her," said Monsieur Joseph, blowing his nose violently. "So 'ard I work in London these ten, fifteen years that only once have I gone 'ome since my father died."
Then I told him how bent and old his mother was, and how lonesome she had seemed all by herself in the cottage, and as I spoke of the shop which she still kept going in her front-room the tears fairly rained down his face.
"But, M'sieur," said he, "that which you tell me is indeed strange; for those letters which she writes to me week by week are always gay, and it 'as seemed to me that my mother was full content."
Then he struck his fist on the table. "I

SEA-FOR

THE sea-fog glimmers on the empty benches,
Under a lowering sky;
Far from the land I hear a vessel calling—
An eerie mournful cry.
Silent and black the oily sea is heaving
In deep swells to and fro,
With here and there a cruel sharp tang showing
Of the great rocks below.
Like a gray ghost above the steaming waters,
The shrouding veil comes on;
Swiftly it touches shore with clammy fingers—
Village and boats are gone.
The world lies hushed, and the leader silence
That sways the air is deep.
I hear the started music bubbles dripping
Slow tears upon the ground.
O for the rough Northwind, and foam-topped breakers
Racing across the bay,
For sunlight, salt taste on the lips, and open fanning,
Over the Great Highway!
Nearer and nearer still the Siren's warning
Comes wafting through the gloom,
While the sea-fog pours in, and smoothly levels
All in one giant tomb.
ETHEL WOLFE, in New York Times

CHARLOTTE COUNTY EXHIBITION

The Big Fair at St. Stephen opens on September 11th. This exhibition has grown with leaps and bounds, and is now rated among the largest fairs in Maine and New Brunswick.
The attractions this year will outclass any of previous years, and include the famous Flying Howards, who perform a new admixture of aerialism and buffoonery arranged to inspire wonderment and cause unceasing laughter, also a clever comedy trapeze and trampoline act.
The other feature consists of Roman rings and wrestling, which is a beautiful sensational gymnastic offering, and as done by the Howards is a guaranteed act.
The second attraction is performed by Hobson and Nichol, who are better known as the original gloom destroyers on roller skates. Don't fail to see them especially if you have that dull-care mood about you.
The third attraction is the La France Trio, who will give a series of intricate feats of strength, hand to hand balancing, and grotesque tumbling. This is a classy combination of acrobatic and knockabout comedy that will please everybody.
The upper part of the fair grounds this year will be taken up by the returned soldiers, who will dig trenches and give the public an actual idea of how the boys at the front are fighting. There will be two trenches in all, the main trench and the communication trench, besides the dug-outs; it is also expected that there will be machine guns in operation. Any who may visit the fair will have an opportunity to see and go through these trenches just as they are in actual war.
All departments of the exhibition promises to be well filled, and a large attendance is assured, as this is the only large exhibition held in Eastern Canada this year.
The dates are September 11th to 14th.

RECRUITING IN CHARLOTTE COUNTY

We are indebted to Capt. Geo. P. Ryder, Recruiting Officer, St. Stephen, for the following list of men recently enlisted for overseas service—

Name	Residence	Age	Unit
Graham, Fredk. H.	Moore's Mills, N. B.	18	A. S. C.
McLeod, Donald N.	St. Stephen, N. B.	24	R. T. C.

Steeves, George M.	Hillsboro, N. B.	26	62nd Draft
Stewart, Silas G.	St. Stephen, N. B.	18	Forestry
Ward, Albert H.	Vanceboro, Me.	20	8th F. A.

TORPEDOED CREW DEVoured BY SHARKS

Details of the torpedoing of the steamer *Marston* on July 15 provide yet another instance of the barbarity displayed by German submarine commanders. There were two explosions, the second of which blew the whole of the midship cabins into the air, and the vessel sank rapidly. The cook picked up a hatch and jumped overboard. He counted 17 men clinging to the wreckage. The submarine, a large craft painted jet black, came to the surface in the midst of her struggling and drowning victims. Through a trap-door in the conning tower an officer stood, looking through his binoculars at the forms in the water. He silently ignored all appeals for assistance, although the crew could easily have been rescued by the submarine in a few minutes.
One of the drowning men disappeared with a scream, and a moment later another vanished in the same way. Their disappearance was due to the arrival of a school of sharks and one by one all the brave men of the *Marston*—except one—suffered a horrible death in the jaws of these monsters. The scene was too much even for the U-boat commander, for he closed the trap-door of the conning tower and submerged his vessel. Fifteen hours later the sole survivor of the tragedy was rescued by a British merchant vessel.

NORMAL SCHOOL LEAVING EXAMINATIONS

The result of the Normal School Examinations held in June was announced last week. The following from Charlotte County were successful: First class Licenses, Mabel E. Christie, Oak Hill; Second Class Licenses, Madeline M. McCullough, Bonabec; Dora E. Johnson, Bonabec; Clara Wilson, Wood Island; Grand Manan; Vera G. Scullin, Rolling Dam; Marjorie H. Brown, Milltown.

THE RED CROSS SOCIETY

The Red Cross Society has great pleasure in acknowledging the receipt of two very welcome gifts: \$10. worth of finest quality grey wool from Miss Odell, and a handsome cash donation from one who wishes to remain anonymous.
The Society has also received a further contribution of \$5.10 from Miss Fowles, and wishes to express its sincere gratitude for the same.

NO MORE FISH FROM DENMARK

A recent message from the American Minister at Copenhagen, announces the issuance of a decree in regard to the exports of fish from Denmark, says a Commerce Report, issued by the Federal Department of Foreign and Domestic Commerce. The export of all kinds of smoked, dried, or salted fish out of the country is prohibited.
Only such exporting houses as have been designated by the Ministry of Agriculture may export live or cleaned fresh fish and only upon certain conditions to be further prescribed. Exportation of fish may only be made through certain ports. Fish that has been prepared by other method than being salted, dried, or smoked, can only be exported in accordance to agreement and to the regulations existing at the time of exportation.

SCOTIA'S FIRST STEAMER

New Glasgow, Aug. 21.—The steamship *Was Wasp*, built by the Nova Scotia Steel and Coal Company, and the first steel steamer to be built in Nova Scotia, is now plying the high seas, full fledged cargo ship. In all her trials, she measured fully up to requirements and to expectations, and is evidence of the capacity of Nova Scotia mechanics and engineers.
Work on the two sister ships is being vigorously prosecuted by master builder McMullan, at the Scotia shipyard, the only drawback being shortage of labor.

THE IRISH CONVENTION

Dublin, Aug. 22.—An official statement issued last night on the progress of the Irish convention, says: "The fifth meeting entered upon the consideration of certain draft schemes based upon dominion principle of self government and the discussion lasted throughout the day."

RECRUITING IN NEW BRUNSWICK

The official report of the result of recruiting in the Province of New Brunswick, for home and overseas service, for the week ending Aug. 11, is as follows:

METALS EMBARGO

Washington, August 9.—The Department of Commerce served notice on Canada yesterday that the embargo on metals needed for shipbuilding would become effective absolutely on August 15, as announced by the President on August 2, and that special licenses must be obtained for all iron and steel products for other purposes which leave this country after that date.
It was made known in the statement that even steel, iron and steel products for manufacture of ammunition would not be permitted to cross the border except under a license which showed that they were to be devoted to the prosecution of the war.

LOCAL CROP PROSPECTS

The farmers in this district report rather unsatisfactory crop prospects. The hay crop is very heavy one, but owing to the continued rain and severe storms there is still a great deal of it uncut and much has been badly lodged. The quality will not be of the best when it is finally got in. Grain crops have rather a rank growth, and have also been considerably beaten down, while appearances indicate a light and poor yield. Blight has affected the potato crop very extensively, and all root crops are in a pretty woe-y condition as the weather has prevented proper cultivation and favored the rapid growth of weeds. The harvest of tree fruits varies considerably, some of the trees are laden down with fruit, while others have almost no fruit at all. On the whole this season's crops do not promise to be very satisfactory.

NEWS OF THE SEA

St. John's Nfld., Aug. 22.—The relief sailing steamer *Nepawa*, commanded by Capt. Robert Bartlett, bringing some members of the McMillan Arctic exploration party from Greenland, was reported to-night of the coast of Labrador. The *Nepawa* probably will reach here Sunday.
London, Aug. 22.—The number of British merchantmen sunk by submarines or mines in the past week was only slightly larger than the previous week, when a considerable falling off was noted.
According to the official statement fifteen vessels of more than 1,500 tons were sunk, and three vessels of less than 1,600 tons, in addition to two fishing vessels, as compared with fourteen large vessels the previous week, two small vessels and three fishermen.
The admiralty statement issued to-night says:
"Arrivals, 2,859; sailings, 2,764.
"British merchantmen sunk by mines or submarines over 1,600 tons, including one previously, 16; under 1,600 tons, 3.
"British merchantmen unsuccessfully attacked, including two previously, 12.
"British fishermen sunk, 2."
Last week's figures showed the smallest loss in British ships since the summary was first published for the week ending March 4.
Paris, Aug. 23.—In the week ending August 19 five French steamships of 1,600 tons or more were sunk by mines or submarines, according to the weekly official report. Four vessels under 1,600 tons were sunk. No fishing ships were destroyed. Three attacks by submarines failed.

HERRING DROP IN PRICE

Herring suitable for sardines have been coming in more plentifully during the past week than at any other time during the entire season, and as a result the price dropped from \$40 and \$50, last week's standard, to \$20 on Monday and Tuesday, and to-day, according to excellent authority, the price is scheduled to fall to \$10, although as we go to press, no confirmation has been obtained as to sales actually made at this figure.
The August "dark" has delivered the goods once again, and the herring, which were being reported outside in bodies of varying size have struck the shore in quantities large enough to keep every factory in Eastport and Lubec at capacity pack for several days, the largest number coming on Monday when more than a thousand hogheads were taken. The catch dropped off yesterday however, to half of Monday's account, and it is probable that it will continue to diminish throughout the week, as the tides which have been "on" drop off.
As the supply diminishes, it is probable that in spite of the talk of \$10 herring, the price will hang at \$20 or even go beyond that point again inasmuch as the price is determined solely by the supply.
The quality of the herring is good. Most of them are oils, and occasionally a few larger ones mixing in. The supply continues to come mainly from the North Shore, although Deer Island and Campobello weirs have made some good catches. Feed fish are being taken in the Bay.
The price of sardines continues at \$5, with the packers holding their stocks and buyers holding their orders, both factors apparently undecided as to which way the market may go.—*Eastport Sentinel*, Aug. 22.

CHINA'S WAR DECLARATION

Austrian Minister Says It Is Illegal, Lacking Parliament's Approval
Peking, Thursday, August 16.—Austria-Hungary considers that China's declaration of war on the Central Powers, proclaimed August 14, is illegal and unconstitutional. Dr. Arthur von Roethlisberger, the Austro-Hungarian minister at Peking, in a note replying to a notification from the Chinese Foreign Office, announcing the existence of a state of war, says:
"I must consider the declaration unconstitutional and illegal, as, according to so high an authority as former President Li Yuan-hung, the declaration requires the approbation of both houses of Parliament."
At first the call was for men, munitions, and money, says Food Controller Hanna. "Now the cry is for men, munitions and food."

THE ALGONQUIN HOTEL

The following guests registered at the Algonquin Hotel during the week ended August 21:
Montreal: H. W. Beachler, B. J. Lowe, F. H. Chigau, A. K. Doble, A. Haspoun, Jr., E. F. and Mrs. Sine, Brig. Gen. Hugh H. McLean, L. V. De Bury, Ernest Alexander, Kenneth Rea, O. SHIPPED BACK TO CANADA

SOLDIERS' DEPENDENTS

London, July 16.—Under the dingy roof of an immense London railway station the other day was enacted one of the numerous dramas in Canadian life, which beset these troublous times.

Much baggage there was aboard that day. The grown passengers averaged about two trunks each, which included the apparel of the various families, and had they been permitted, doubtless many knick-knacks in the way of old furniture picked up in England, dogs, parrots and the like, would have been included.

Don't imagine that getting aboard a vessel for a voyage across the Atlantic in these times of peril and suspicion is like walking up the gang-plank of the "Chippewa" for a breeze to Niagara.

No ticket and no money. "I have got no ticket," quoth one sad-faced woman in black, with two small children. "I thought it would be all right. I have no money either. My husband was killed in the war and I haven't had any pension for two months."

Others, too, came down, tickleless, baggage gone astray or otherwise distressed. But in every instance their cases received patient attention and they went aboard, leading their tired children, headed for home.

Such is in part the process of getting Canadian soldiers' dependents back to Canada. It is estimated that there are still thousands of them in this country, and at an average of \$35 a month separation allowance, not to mention assigned pay, it is computed roughly that they are spending every thirty days about \$1,250,000 which might be going into Canadian coffers.

Government Emigration office to obtain facilities for their passage. All cabin passengers must have passports and are charged approximately \$30 for their steamer passage. Third class steerside seats, which is really as good as second class on these Government boats, if previously domiciled in Canada, do not require passports.

Government Emigration office to obtain facilities for their passage. All cabin passengers must have passports and are charged approximately \$30 for their steamer passage. Third class steerside seats, which is really as good as second class on these Government boats, if previously domiciled in Canada, do not require passports.

ON WATCH FOR IMPOSTORS. In such cases and where it is due, two months' separation allowance may be deducted by the Government to reimburse itself. Fakirs are carefully watched for, but no bona fide cases are left stranded.

BOCACAB COVE, N. B. Aug. 20. Miss Marjorie Flaherty and Miss Balfour, of Boston, spent several days recently at the home of Mrs. John Flaherty.

Miss Hazel Belyea, who has been the guest of Miss Rachel Holt for the past week, has returned to her home in St. John.

Miss Bernice Mitchell spent the week-end with her grandmother, Mrs. J. E. Holt.

Miss Helen M. Lowery, of Brunswick, Me., is spending the summer with Miss Alice Thomas.

A dance and pie supper will be held at Cedar Street Hall, at Elmville, on Wednesday, Sept. 5. All are welcome.

Mr. Howard Holt spent Sunday with his parents, Mr. and Mrs. David Holt.

THE MEN ARE BUSY MAKING THE REPAIRS on the roads that were so badly needed.

Miss Helen Lowery and Mr. Seymour Holt spent Sunday last with friends in Bocacab.

Mr. Seward Parker took a large crowd to the picnic at St. Andrews today.

A number of people drove to St. George last week to see the 9th Siege Battery marching through.

LETITE, N. B. Aug. 20. Mr. and Mrs. Gallant and little daughter, of St. John, are visiting at the home of Mrs. Randall Matthews.

Mrs. Clayton Holmes and daughter, of Lubec, Me., were guests of Mrs. H. H. MacLean last week.

Mr. and Mrs. Leslie McLaughlin and daughter, Norma, of Malden, Mass., are guests of Mrs. N. N. Seelye.

Miss Clara Dines, who has been employed at Mattapan during the past month, is visiting at her home here.

Mrs. Neil Chubb and daughter, Georgia, are guests of Mrs. George Chubb.

Miss Eola Worthing, of New York, is the guest of Mrs. Sidney Dines.

CUMMINGS' COVE, D. I. Aug. 20. Thos. A. Sullivan, of Worcester, Mass., is a guest of Mr. and Mrs. Moses McDonald.

A Grafton Sauger, of Worcester, Mass., arrived on Saturday to join Mrs. Sauger, who has been here for a few weeks, a guest of Mr. and Mrs. Fremont McNeill.

Mrs. James H. Wilson, of Letite, is spending a few days with her daughter, Mrs. Frank S. Cummings, at the home of the latter's uncle, Mr. Chas. Haskins.

Miss Annie O. Palmer, who has spent several months at Jacksontown, Car. Co., N. B., arrived home by Str. Grand Manan on Thursday last.

Mrs. Gertrude Chaffey is spending a few days in Eastport, Me.

Mr. and Mrs. Gilman Appleby and Mrs. Stanley Appleby, of St. Stephen, have been recent guests of Mr. and Mrs. Albert McNeill.

Miss Helen Leeman, who has been visiting Miss Vera Chaffey, has returned to her home at Letite Cove.

Mrs. Frank Fountain is spending a few weeks at Woodland, Me. with Mr. and Mrs. Frankie Fountain.

Quite a number from here enjoyed the excursion trip to St. Stephen on Saturday on the Str. Grand Manan.

Herbert Fountain, of Worcester, Mass., has been enjoying a short vacation with his mother, Mrs. Elmora Fountain.

Mrs. Chester Dixon entertained her cousins, the Misses Clara and Sadie McNeill, and Mrs. Sauger, of Worcester, Mass., and Mrs. Frank S. Cummings and little daughter, Eloise, of Ansonia, Conn., at the tea-hour on Wednesday of last week.

Mrs. Ross Cummings, of Eastport, spent last week with Mr. and Mrs. Edgar Cummings.

Mrs. J. K. Fountain and grand-daughter, Miss Eva Hooper, are guests of Mrs. Chas. Humphrey at Mohannes.

Mrs. Daniel Leitcher and Mrs. Cleveland Barreau left for their homes on Friday last, the former to New Haven, Conn., and the latter to Portland, Me.

Edgar Cummings leaves to-night for Portland, Me., in the interests of the Swift Oil Co.

Miss Lottie Chaffey, of Eastport, is enjoying a visit with her cousin, Miss Muriel Dixon.

Mrs. Fred Richardson called on friends at Cummings Cove en route to and from St. Stephen last week.

Mrs. Chester Dixon and little daughter, Muriel, and Miss Lottie Chaffey, spent last Thursday with Mrs. Richard Dixon at Indian Island.

Mrs. W. Hatheway Fountain spent the week-end with her aunt, Mrs. James Hurley, at Leonardville.

Miss Marion Cummings is enjoying a trip to Portland with her sister, Mrs. Jack Ingalls, and little daughter, Dorothy, who are awaiting the arrival of the Str. C. A. Canfield, of which Mrs. Ingalls' husband is captain.

Miss Alma Chaffey, of Eastport, spent Sunday at her home here.

Mr. and Mrs. Frank Westworth and Mr. H. A. Wentworth visited friends in St. Andrews on Sunday last.

Miss Nina E. Macallum, of Elmville, visited Mrs. W. S. Wentworth recently.

LEONARDVILLE, D. I. Aug. 20. Mrs. Frank Cross, of Yarmouth, Me., is the guest of her brother, Mr. Arthur Barreau.

Miss Lillian Doughty, Eastport, spent Sunday at her home here.

Miss Lettie Doughty spent Sunday at Eastport, being the guest of Mrs. F. S. Varney.

Miss Mabel Shaw, Manchester, N. H., is visiting relatives in Leonardville.

Mr. Percy Matthews, Cambridge, Mass., is spending his vacation with his parents here.

Mr. George Sparks, Stonington, Me., is the guest of Mr. and Mrs. O. B. Poland.

WHITE HEAD, G. M. August 17. As the weather has been very favorable the haymakers have been busy; and a large quantity of dulse has been dried.

Miss Alice Titus and Mr. Owen Small were baptized on Sunday morning, and that evening they were taken into the church by the pastor, Mr. Wilson, assisted by Mr. J. D. Harvey, of Nova Scotia, who was spending the day here, and who was also present at the baptism.

The Institute held a much enjoyed picnic on Thursday, when ice cream, candy, cake and cool drinks were served throughout the day; and a well attended supper was given in the hall in the evening.

CASTALIA, G. M. Aug. 20. Miss Reba Watt, who has been visiting friends at St. Andrews, N. B., returned to her home here on Thursday last.

Mr. Loring Sinclair, assistant at the Gannett Rock Light and fog alarm station, who has been visiting friends and relatives here returned to his duties on Saturday last.

Mr. Judson T. Watt, has purchased a small motor boat.

Mrs. Cornelius Tatton and daughter Ona, spent Saturday in Eastport.

Mr. Frank Sinclair went to St. Stephen per R. S. Grand Manan on Saturday last, returning the same day.

Miss Tillie Dalzell left on Saturday for Lubec, Me., where she will visit friends.

Mr. Wellington Fleet of Princeton, Me., is visiting his mother Mrs. Alice Fleet.

Miss Emma Davis, who has been visiting relatives here returned to her home in Lubec, Me., on Saturday.

We are glad to learn that Little Ruby Crofts, who has been ill, is able to be out again.

CAMPOBELLO Aug. 20. Mr. and Mrs. Thaddeus Calder announce the marriage of their daughter Annie Treacrin to Everett Calder to take place on Thursday, Aug. 22nd.

Mr. and Mrs. W. L. Blair, of Ottawa, and Miss Vessey, of St. Stephen, are spending a few weeks at Beverly Lank's.

Mr. and Mrs. Ernest Enos came from St. John on Monday with the remains of their infant son, Norman W., for interment in the village churchyard. They have the sympathy of many friends in their great trouble.

Rev. F. A. Currie is away enjoying a well-earned vacation.

Mr. and Mrs. Leslie McLaughlin and daughter, Norma, came from Boston in their motor boat. After spending a week with Mr. and Mrs. Luther Brown they went to Letite to visit relatives.

Miss Theda Osbourn and Mrs. Charles Hilyard are on the sick-list.

Makes Cooking a Pleasure

No bending over a hot top to reach the dampers—Kootenay controls are all on the outside—in front. And the oven thermometer shows the temperature without opening the oven door.

THE INFLUENC LINKS ON GAM

THERE is little of peculiarities of prone to have a strong class of game that is inclined to develop. Although naturally follow that from a certain course produce a stamp of certain resemblance to golfers from that part there are similarities in manner in which they individual strokes, and, partially for the play, certain defined way.

As an instance, the draws invariably leave upon the game of the learned the rudiment golfer who has halted is, more or less, a mass approach, and one comparatively indifferent to ball up to the hole to a degree of ease and every way worthy of nents of the game. To shot—which has to do with a slight loft, and career over undulating were no such things as to impede its progress, tremely difficult one to that for some reason a habit of refusing to of the correct and orthodox place of proceeding of smoothness and dispatch catching all the pos which happen to be in

ILL-FORTUNE For their failure of hesitation, blame the lie of the ground and if expert St. Andrews play that the failure was of peculiarities of the gro but simply to the fact not struck in a manner playing of such a stroke ably far to play the st in which so many app be played—that is, by the ball. And it must that the majority of go play the shot in this reason that they kn it is true that a ball p more apt to be influen tices in the ground the without spin.

Some Scotch go that the correct way to shot is with what shot club, which is presu ward journey by the ball. But to the mode this is a peculiarity of striking the ball with curacy, as there is a str raise the head at the ti this action will inevit topped or topped shot hand, however, the fa same effect as if it was correctly; in truth, instructor on the game h advise his pupil to the piece of advice which appear to be on the there is so very little tween the half-topped a topped one.

RUNNING APPR Among the present era, one but seldom on who manipulates this in the same neat, acc in the old school of go This may be due to present-day resilient bing of the shot a con affair. In the days of ball the playing of the was a much more diff affair than it is now thing of a feat to indu ball to run along the great distance, and the any appreciable amount to it would of a surety upon meeting the first To-day there are me played on the running ever were in times of able thing in connexio is that the absolute b find little difficulty in being wrong in his jud

THE QUEENSLANDERS

L EARN brown loaves of the Brisbane beaches,
Little-limbed kings of the Culegas bends,
Princes that ride where the Roper reaches,
Captains that camp where the gray Gulf ends—
Never such goodly men together.
Marched since the kingdoms first made war;
Nothing so proud as the Elm Feather
Waved in an English wind before!
Ardor and faith of those keen brown faces!
Challenge and strength of those big brown hands!
Eyes that have flashed upon wide-rung spaces!
Chins that have conquered in fierce far lands!
Flood could not drench them, drought could not break them;
Deep in their hearts is their sun's own fire;
Blood of their own blood, England, take them!
These are the words of the soul's desire!

WILL H. OGDEN, in *The Spectator*.

THE INFLUENCE OF GOLF LINKS ON CLASS OF GAME

THERE is little doubt but that the peculiarities of particular links are prone to have a strong bearing upon the class of game that its devotees are inclined to develop. Although it may not naturally follow that a player who hails from a certain course will of necessity produce a stamp of game which bears a certain resemblance to that of his fellow golfers from that particular centre, still there are similarities to be found in the manner in which they all play certain individual strokes, and, moreover, in their partiality for the playing of strokes in a certain defined way.

As an instance, the course at St. Andrews invariably leaves a strong imprint upon the game of those who originally learned the rudiments thereon. Every golfer who has hailed from St. Andrews is, more or less, a master of the running approach, and one occasionally finds comparatively indifferent players running the ball up to the hole over hill and dale with a degree of ease and accuracy which is in every way worthy of the leading exponents of the game. To many players this shot—which has to commence its career with a slight loft, and then upon landing, careen over undulating ground as if there were no such things as hills and hollows to impede its progress—appears an extremely difficult one to play, as they find that for some reason or other the ball has a habit of refusing to run up the hills in the correct and orthodox manner, and in place of proceeding on its journey with smoothness and dispatch will persist in catching all the possible obstructions which happen to be in the way.

ILL-FORTUNE IN LIES

For their failure they will, without hesitation, blame the combination of the lie of the ground and ill-fortune. But the expert St. Andrews player will tell them that the failure was due to neither the peculiarities of the ground nor to ill luck, but simply to the fact that the ball was not struck in a manner essential for the playing of such a stroke. For it is invariably fatal to play the shot in the manner in which so many approach shots have to be played—that is, by imparting spin to the ball. And it must be acknowledged that the majority of golfers do attempt to play the shot in this manner, mainly for the reason that they know no other, and it is true that a ball played with spin is more apt to be influenced by the inequalities in the ground than the ball played without spin.

Old-time Scotch golfers will tell you that the correct way to play this running shot is with what they term the "manner of the ball," which, in its presumed, means its upward journey by the time it meets the ball. But to the modern way of thinking this is a peculiarly difficult method of striking the ball with any degree of accuracy, as there is a strong inclination to raise the head at the time of striking, and this action will inevitably result in a half-topped or topped shot. On the other hand, however, the fact of half-topping the ball will, no doubt, have much the same effect as if it was struck absolutely correctly; in truth, more than one instructor on the game has been known to advise his pupil to half-top the shot—a piece of advice which would certainly appear to err on the dangerous side, as there is so very little margin for error between the half-topped shot and the badly topped one.

RUNNING APPROACH SHOTS

Among the present generation of golfers, one but seldom comes across a player who manipulates this running approach in the same neat, accurate manner that the old school of golfer was wont to. This may be due to the fact that the present-day resilient ball makes the playing of the shot a comparatively simple affair. In the days of the hard resisting ball the playing of the running approach was a much more difficult and complex affair than it is nowadays, as it was something of a feat to induce the gutta-percha ball to run along the ground for any great distance, and the shot played with any appreciable amount of spin imparted to it would of a surety give up the ghost upon meeting the first obstacle in its path. To-day there are more approach shots played on the running method than there ever were in times of old. One remarkable thing in connexion with this stroke is that the absolute beginner appears to find little difficulty in playing it. He may be wrong in his judgment of distance

and inaccurate in his sense of direction, but the problem of making the ball run truly over small obstructions presents no terrors to him. It is only when he has once learned to impart under-spin to a ball that he realizes the difficulty of playing a shot which is better when brought off without it.

Not long since a player was observed turning in the head of his club deliberately, with the avowed intention of correcting a tendency to sky his drives, and the only consequence of his novel remedy was that he now skied his drives off the top edge of the face instead of off the centre, with even worse consequences than before. Luckily it is not generally a matter of any difficulty for a player to tell when the clubhead is not meeting the ball properly. The very feel of the stroke ought to warn him, and a little more carefulness in grip and swing should put the matter right.

On the other hand, it may be due to mere twisting of the clubhead, but to some error in the swing itself. If the lower edge of the club plays whack on the ground behind the ball, the most likely explanation is that the player is standing too close up to his ball. Curiously enough, this error is often found to be accompanied by a tendency toward pulling; but a little consideration makes this scarcely so hard to understand. The clubhead cannot continue along its original line, because the player is standing so close to the ball that the clubhead to do so would require to pass into the ground. Since it cannot do this, it is forced to pass outward a little, and it is this stroke which is the occasion of the pulled ball.

If the player endeavors to correct this by drawing himself up, or by drawing his hands in toward his body just before the club reaches the ball, he will assuredly find himself slicing as well. In fact, the minor errors which are wont to accompany the great error of taking ground are endless in their variety. Andrew Kirkaldy is reported to have expressed his contempt for what he calls "polka" golfers—the kind that play first off the heel, and then off the toe. There are quite a few players in this class, who sin simply through carelessness; and then they wonder why only a few of their drives travel any distance.

LORD'S COVE, N. B.

Aug. 22.
The Misses Sadie and Jessie Gardner, of Red Beach, Me., are visiting Mrs. James A. Stuart.
Miss Hazel Lambert entertained a number of her friends on Monday evening.
Mr. George E. Richardson has lately purchased a new automobile.
Mr. and Mrs. Frank Greenlaw were visitors to Lubec on Wednesday.
A number of our people visited St. Andrews on Field day.
Mr. B. G. Morang is at present doing mason work at Letite.
The people in Lords Cove were shocked and saddened to hear of the death of Mr. John F. Conley, of Leonardville, on Tuesday.

GRAND HARBOR, G. M.

Aug. 21.
Mr. and Mrs. F. F. Hogan, who have been the guests of Mr. and Mrs. A. M. Dakin, returned to their home in Boston last week.
Mrs. B. H. Cronk, Mrs. Edward Sawyer and daughter, Mrs. Grace Titus, and Mrs. Wm. Cronk returned by Steer *Grand Manan*, on Saturday from Lubec, where they had been visiting relatives.
Miss Iva Dakin spent a few days last week with friends in St. Stephen.
Miss Kathleen Wooster, who has been spending the holidays with her parents, Mr. and Mrs. Howard Wooster, left last Monday to resume her school in Winnipeg.
Miss Estella Ramsdell, of Eastport, was the guest of Mrs. L. E. Foster for a few days last week.
The U. Baptist Sunday School held their annual picnic last Tuesday on the "ten acre." A large crowd was present, and not only the children and young people, but the older ones, joined in the sports. At six o'clock the tables were spread, and all sat down to satisfy the inner man. This was pronounced by all to be one of the best picnics of the season.
The Misses Beatrice and Shirley Ingalls, of Lubec, are the guests this week of Mr. and Mrs. Frank Lakeman.
The Misses Fleda Ingersoll and Gwendolyn Zwicker have returned home after a very pleasant visit with friends in Lubec and Eastport.

MOST PICTURESQUE GOLF COURSE IN THE WORLD

What is said to be the most picturesque golf course in the world is St. Andrews by the Sea, New Brunswick, Canada. Three distinct views of the ocean are to be had from different parts of the course. It is flanked by mountain peaks and is the Mecca of many golfers in Eastern Canada. Nearby the country is wild and is fine hunting ground for moose. A number of improvements have been made in the course preparatory to some events which are to be held during the season, proceedings of which will be devoted to war relief uses. This course, as well as the other courses in Canada, is being more and more used. At the beginning of the war and for some little time there was not so much golf played. The Canadians are finding out as others have that golf tends to keep one fit and consequently the Canadian courses are again showing normal attendance.—*Golfers' Magazine*, Chicago.

ST. ANDREWS, N. B., CANADA. Saturday, 25th August 1917

PROGRESS OF THE WAR

[August 16 to August 22]

The week under review was marked by the extreme violence of the hostilities on the Western front and in the Austro-Italian campaign.

In the Western campaign activity prevailed pretty well over the whole front from the sea coast of Belgium to the border of Switzerland, but the fiercest fighting was in the sectors centering on Ypres and Lens, and in the sectors north of Verdun.

The week's news of the Eastern campaign was meagre, but indicated that the Russian retirement was about arrested at all points, and at some points, especially at the southern extremity of the battle front, they and the Rumanians were more than holding their own.

In the Caucasus region the Russians were reported to have resumed the offensive, and with success.

The week furnished no news of the operations in the Mesopotamian, Egyptian, and East African campaigns; and very little progress was reported in the Balkan campaign, the outstanding feature of which was the air-raiding of Monastir by the Bulgars and their Teuton fellow outlaws.

Perhaps the outstanding feature of the week was the success of the Italians in their fierce drive on the Austrians on the front from Tolmino to the Adriatic.

The reports of the fighting are at variance, but the Austrian claims are clearly exaggerated, and the advantage rested altogether with the Italians, who took more than 20,000 prisoners, a number of guns, and great quantities of military supplies.

On the night of August 21 an unknown number of German airplanes approached the Yorkshire coast of England, but were driven off by anti-aircraft guns.

The Censor was busy all week keeping back details of the week's losses in shipping caused by the continued rather less German submarine campaign; consequently we are unable to print in this issue the usual details of the disasters under the heading of "News of the Sea."

POLITICAL UNREST

CANADA, following the example of most other parts of the world, is now in a state of political unrest, if one can judge from the utterances of the party press.

CHANCE MADE IN RUSSIAN COMMAND

Petrograd, Aug. 22.—General Letchitzky has been appointed commander of the northern front, succeeding General Klembovsky.

General Letchitzky was the right-hand man of General Brusiloff in the successful drive of the early summer of last year, and secured a considerable number of troops and occupied all of Bukovina.

THE WEEK'S ANNIVERSARIES

August 25.—Thomas Chatterton, the English "boy poet," died, 1770; David Hume, Scottish philosopher and philosopher, died, 1776; James Watt, Scottish engineer, improver of the steam engine, died, 1819; Bret Harte, American novelist and poet, born, 1839; Bill Nye, American humorist, born, 1880; Victoria Bridge, Montreal, opened by Prince of Wales, 1869; Michael Faraday, English chemist, electrician, and natural philosopher, died, 1867.

August 26.—Crey, 1346. Lope de Vega, Spanish dramatist, died, 1635; Sir Robert Walpole, English statesman, born, 1676; Prince Albert, consort of Queen Victoria, born, 1819; Treaty of Peace between Great Britain and China, 1842; Prof. Robert H. Richards, American metallurgist, born, 1844; Haiti proclaimed an Empire, 1849; First petroleum well opened at Titusville, Pa., 1858; First Treaty between Great Britain and Japan, 1858.

August 27.—James Thomson, Scottish poet, died, 1748; Fort Frontenac, Canada, surrendered to the British under Gen. Bradstreet, 1758; First hydrogen balloon ascent, 1783; Judge Thomas C. Haliburton, Nova Scotian, author of "Sam Slick," died, 1865; Sir Rowland Hill, advocate of penny post, died, 1879.

August 28.—St. Augustin, Kasassin, 1882; Heiligoland Bight, 1914. Count Tolstoy, Russian novelist, born, 1828; Leigh Hunt, English essayist, died, 1889; William Lyon Mackenzie, leader in Canadian rebellion of 1837, died, 1877; Montenegro became a Kingdom, 1910.

August 29.—Behanding of John the Baptist. John Locke, English philosopher, born, 1632; Edmund Hoyle, author of a book on Games, died, 1769; Loss of the Royal American scientist and author, born, 1809; Maurice Maeterlinck, Belgian poet and dramatist, born, 1862.

August 30.—Plevna, 1877. Cleopatra, Queen of Egypt, committed suicide, 30 B. C.; William Paley, English theologian, born, 1743; Sir John Ross, Arctic explorer, died, 1856; Volcanic eruption of Mount Pelée, Martinique, 1902.

August 31.—Kandahar, 1880. King Henry IV of England died, 1422; Fredericton, N. B., Cathedral consecrated, 1855; Antonio Salandra, Premier of Italy, born, 1853; Yoshitomo, Emperor of Japan, born, 1879; Queen Wilhelmina of The Netherlands born, 1880.

Up-River Doings

Miss McGuigan, of St. John, is visiting Miss Byrne at her home on King Street. Mr. Byrne, of the Buckminster Hotel in Boston, is enjoying a holiday in town and is staying with his sister. The Misses Winnifred and Helen Everett, of Fredericton are the guests of Mrs. C. S. Everett. Mrs. Joyce, of Toronto, is making a short visit in town, the guest of Mrs. Richard Keay. The Misses Ella and Hope Sharp returned on Saturday last from an extended visit in Gagetown. Mrs. E. Atherton Smith entertained at the tea hour on Sunday for several out-of-town ladies. Miss Amelia Kennedy gave a delightful children's party at the Red Rocks on Tuesday evening for little Miss Kathleen Howard. Mr. Hedley Wren, of Boston, has joined his family here. Mrs. E. Atherton Smith and Mrs. George Babbitt gave a children's party at the Black House on Friday for Helen O'Leary and John McInnes. Mrs. Hazen Burton has returned from a visit to Elmville. Miss Kate Hudson, of Fredericton, and Miss Helen Hudson, of New York, are at Miss Cathcart's. Mrs. G. S. Grimmer has returned from a visit to St. Stephen. Mrs. Hamilton Gault, who has been staying at the Algonquin, has returned to Montreal. Miss Margaret Keay has been on a trip to Grand Manan. Miss Fannie Black, who was injured in a recent automobile accident, has recovered sufficiently to be moved to Mrs. Wm. Holt's at Bocabec. Mr. Wyndham Beaucer, of Montreal, is with his family at the Algonquin. Lord Shaughnessy has returned from Montreal. Mr. and Mrs. E. F. Size, of Montreal, are at the Algonquin. Sir Mortimer Davis, of Montreal, is visiting Baron and Lady Shaughnessy at Fort Tipperary. Mr. and Mrs. B. R. Ruggles, of New York, are at the Algonquin. Mr. and Mrs. J. J. Robson, who have been spending a few weeks at the Algonquin, have returned to Montreal. Mr. and Mrs. Charles J. Rhoads, of Philadelphia, are at the Algonquin. Mr. A. T. Sweeney, of St. Louis, has joined Mrs. Stickey at the Algonquin. Judge Wells entertained at dinner last week. The Ladies Maud and Blanche Cavendish, who have been visiting Baron and Lady Shaughnessy, have gone to Wood's Hole, Mass., to visit Sir Cecil and Lady Spring Rice. Mrs. Holiday, of St. Louis, is at Kennedy's Hotel. Mr. C. J. Vickers, of Toronto, is spending a few days at the Algonquin. Mr. and Mrs. Craig Heberton, who have spent the summer at the Algonquin, have returned to their home in Philadelphia. Mr. C. R. Hosmer, of Montreal, has joined his family at their summer home here. Brigadier General H. H. Maclean, of St. John, is at the Algonquin. Mr. Ernest Alexander, of Montreal, is a guest at the Algonquin. Mrs. Judson Bemis, of St. Louis, entertained at a dinner party on Saturday. Dr. J. H. Bryan and family have arrived from Washington, D. C., and are at the Algonquin. Col. and Mrs. J. B. Maclean, of Toronto are in town, guests at the Algonquin. Mrs. F. F. Dalley and Mrs. O. L. Hillman, of Hamilton, are spending a few weeks here. Miss Drayton has arrived from Ottawa to spend the rest of the summer at the Algonquin with her parents, Sir Henry and Lady Drayton. Miss Hazel Bruce, who has been visiting her sister, Mrs. Warren Stinson, returned to Boston on Monday. Miss Gertrude Sharpe, who has been the guest of the Misses O'Neill, has returned to her home in Boston. Prof. Charles T. Copeland, of Harvard, is at Kennedy's Hotel. Miss Lois Grimmer, of St. Stephen, was in town on Sunday. Mrs. Linus Crawford and children were in St. Andrews on Tuesday on their way to their home in Sussex. Dr. Edward Elliott, of Boston, is visiting his aunt, Mrs. Edwin Odell. Capt. H. S. Everett, of the 236th Battalion, is on furlough in town. Mr. and Mrs. Harry Burton arrived on Chipman on Saturday. Mr. Burton returned to Chipman on Monday, but Mrs. Burton is remaining in town, the guest of her parents, Mr. and Mrs. Geo. F. Hibbard. Mrs. Earl Brown and little son, Frederic, have returned to their home in Stanley, York Co. Mrs. B. Dick and Miss L. G. Dick, who have been visiting friends in St. John, returned home on Monday.

Local and General

CONFIRMATION SERVICE AT ALL SAINTS' CHURCH On Sunday, the 19th, His Lordship Bishop Richardson of Fredericton conducted both of the services held in All Saints' Church. At the morning service he administered the rite of Confirmation, and the following eleven candidates were presented by the rector, Rev. George H. Elliott: Robert Edwin Cockburn, Edward Delavan Lorimer, Mary Phyllis Johnson, Florence Winnifred McGurdy, Hazel Fern McDowell, Alice Helena Wilson, Sarah Emily Stinson, Marjory Melville Babbitt, Hazel May McCurdy, Gladys Elizabeth Horsnell. The bishop's address to the candidates was very forceful and instructive. Rev. C. M. Sills, D. D., of Geneva, N. Y., assisted in the Communion service following the Confirmation. The attendance at the evening service was unusually large, and the Bishop's sermon on the character of Moses was attentively followed. CAPT. PERCY C. SHERREN, M. C., of the Royal Flying Corps, is visiting St. Andrews. Capt. Sherren has seen much active service at the front, having enlisted with "The Fighting 26th" during the early months of the war. After he had recovered from wounds received while with that famous battalion, he joined the Royal Flying Corps in England, and for nine months was actively engaged with the enemy in this most important branch of the fighting service. He became known as one of the most expert and daring airmen in the Canadian Section of the front, and personally and single-handed brought down six German Taubes. He subsequently bombed and blew up a munition train. For these feats he was awarded the Military Cross, and a bar to it which indicates that he has twice won this coveted honor. He was invested with these decorations by the King at Buckingham Palace a few months ago. Capt. Sherren, who was accountant at the Bank of Nova Scotia in St. Andrews four years ago, is receiving a warm welcome from his many friends here, who are very proud of the great distinction he has won. He is at present instructor at the Military Aviation Depot in Toronto. Prof. Mavor, of Toronto, who is a guest at "Covenhoven", has received word that his younger son, Major Wilfrid Mavor, M. C., has been wounded for the fourth time. Major Mavor is of the 15th Battalion, (Toronto Highlanders), and was one of the first Canadian contingents to go overseas. Mrs. Henry McQuoid, who has been visiting friends in St. Stephen, returned home by automobile on Wednesday last. Mrs. James Stoop and Miss Eva Stoop have been visiting up-river friends. Miss Emma Odell has been visiting relatives in St. Stephen. Miss Norine Cunningham, of Medford, Mass., is visiting her aunt and uncle, Mr. and Mrs. Frank Kennedy, at "The Cottage". Mr. L. B. Knight, Miss Jarjory Knight, Mr. and Mrs. Crawford, and Roy Daley, were in town to attend the funeral of Mrs. MacLeod. Mr. Hazen T. McQuoid, C. P. R. Agent at Boston, and Mrs. McQuoid, who have been visiting Mr. and Mrs. Hugh McQuoid, returned to their home on Friday. Mrs. Frank Dutton and infant son have been guests of Mrs. Thos Odell. Lieut. Col. Ballantyne, who has been at the Algonquin for some time, has returned to Montreal. Premier and Mrs. Foster, of St. John entertained at dinner on Saturday. Sir Thomas and Lady Tait entertained at dinner Saturday evening. Mr. and Mrs. A. A. Laffin and Mrs. Wm. Burton, of St. Stephen, were in town on Sunday. Mr. Arthur W. Mason and little son, Morris, who have been spending a couple of months in the Laurentians with Mrs. Mason's family, returned home on Saturday. Prof. Kenneth Sills, of Bowdoin College, is visiting his parents, Dr. and Mrs. C. M. Sills, at Infield Cottage. Mr. Thomas Britt, of Boston, is spending his vacation with his sisters, the Misses Annie and Stella Britt. During his stay in town, His Lordship Bishop Richardson was the guest of Mr. and Mrs. Henry Joseph. Miss Edna Giberson, Principal of the Prince Arthur School, has returned from her home in Bath. Rev. Mr. Marshall, rector of Gagetown, who is on a cycling tour through this part of the Province, spent Friday on Minister's Island, the guest of Mr. and Mrs. T. E. Sharp. Prof. James Mavor, of Toronto University, and Mrs. Mavor, arrived on Saturday last on a visit to Lady and Miss Van Horne at Covenhoven. Prof. and Mrs. Mavor spent the earlier part of the vacation at a summer resort in Massachusetts. Mrs. D. R. Bedell and Miss Josephine Bedell, of Andover; Mrs. Howard Shaw, of Toronto, and Mr. LeBaron Bull and son, of Fredericton, were guests on Sunday of Mr. and Mrs. Rankine, Chamcook.

SCHOOL BOARD MEETING

At a meeting of the Board of School Trustees held on Thursday evening it was decided to extend the summer vacation to Monday, September 10. Owing to the large number of school children employed on the golf links and at the Algonquin Hotel it was unlikely that a full attendance of scholars could be had if the schools opened on August 27. The parents of the children employed at the Hotel and on the links did not wish to forgo or to shorten the opportunity their children have of earning money in the summer; and the Hotel management would be seriously inconvenienced if deprived of the services of a number of their employees. The Manager of the Algonquin, Mr. Allerton, has agreed to make good to the teachers the amount of the Government allowance they would lose by the vacation being prolonged two weeks. The Secretary was ordered to purchase 50 tons of anthracite coal for the schools from the Quoddy Coal Co., at \$13.50 per ton delivered at the school building. There was no other tender for coal.

IMPROVEMENTS AT "COVENHOVEN"

Under the direction of Mr. Angus Rigby extensive improvements are being made on the Van Horne estate on Minister's Island. A gasoline store-house is being built on the beach below the look-out tower at the end of the island. The coachman's house is being altered and enlarged, and a new dining-room is being built in it. The stables are undergoing thorough repairs, and a new workshop for mechanics working on the estate is in course of erection. This season the tennis court has been entirely re-made, and an English expert was employed, who has achieved excellent results.

Rev. J. A. Morrison, D. D., Ph. D., of St. John, will conduct the services in Greenock Presbyterian Church, to-morrow, Sunday, Aug. 26.

MARRIED

FIANDER-MURPHY The marriage of Randall R. Flander, of Bocabec, and Gladys L. Murphy, of Eastport, was solemnized in St. Andrews on Tuesday afternoon 21st inst., by Rev. William Amos, of the Baptist Church.

OBITUARY

MRS. J. M. MACLEOD The death took place on August 22, at the residence of Mrs. T. B. Knight, New River Beach, of Mrs. Elizabeth Taylor MacLeod, relict of the late Rev. J. M. MacLeod, formerly Presbyterian minister at Charlottetown, P. E. I., and afterwards at Vancouver, B. C. The deceased was a daughter of the late James Haddock, of St. Andrews, and leaves a brother, James Haddock, of Ashcroft, B. C.; and a sister, Mrs. L. B. Knight, of New River, Charlotte County, N. B. The remains were brought to St. Andrews on Thursday, and the funeral service was conducted that afternoon in All Saints Church, Rev. Geo. H. Elliott, rector, officiating. Interment was in the Rural Cemetery, the pall-bearers being Mr. E. S. Pollard, Capt. Geo. Lowrey, Mr. C. H. Lamb, and Mr. Edwin Odell.

MRS. ANDREW DEWOLFE St. Stephen, N. B., Aug. 22.—After a brief illness of a few hours, Mrs. Carrie Boardman DeWolfe, the beloved wife of Mr. Andrew DeWolfe passed away last Wednesday evening. She was a lady of most lovely traits of character, and had many friends to whom her sudden death brought much grief and sorrow. The funeral service was held from her home on Union Street and was conducted by Rev. Dr. Goucher, of the Baptist Church, of which the deceased was a valued member. The interment was in the Rural Cemetery. Much sympathy is extended to Mr. DeWolfe in his sorrow and bereavement. Mrs. DeWolfe was the daughter of the late Mr. and Mrs. William Boardman, of Calais.

LIEUT. CHARLES F. CLARKE, U. S. N. R. Lieut. Charles F. Clarke, U. S. N. R., veteran captain of Calais, Me., who entered the Naval Service in April and had been stationed at Commonwealth Pier, died this morning in the Naval Hospital, Chelsea, of neuritis. Lieut. Clarke had been troubled with a cold for several weeks, and collapsed last Sunday. In the merchant service he was Capt. Clarke, well known to navigators all along the coast. It is said that he was to have been sent overseas as second officer on one of the German liners taken over by the United States Government. For a number of years Lieut. Clarke was in command of coal carriers. Three years ago he was master of the North Star, plying between New York and Portland, Me. More recently he had been master of a ship running between Boston and Norfolk, during the Spanish-American War he was in the transport service between Key West, Fla., and Havana.—Boston Post, Aug. 17. Lieut. Clarke is survived by a wife and a daughter, of Calais, Me. Capt. William Clarke, Harbor Master of St. Andrews, is a brother of the deceased.

THE NATION CELEBRATES ITS FIFTIETH BIRTHDAY

FRIENDS PAY TRIBUTE TO OLD WEEKLY JOURNAL

Address Made by Chinese Ambassador, John Bassett Moore, and Speakers From Other Countries

Eighty friends and contributors of the Nation celebrated its semi-centennial anniversary at a dinner at the Biltmore Hotel last night.

Mr. Fuller, in his opening remarks, said he had received many letters of congratulation from well-wishers and contributors who could not be present in person.

DEATH OF OLDEST OFFICER OF THE NAVY

REAR-ADMIRAL STEPHEN BLECKER

REAR-ADMIRAL Stephen Blecker, a retired officer of the navy, died at his home in Newport, R.I., on July 28, in the ninety-first year of his age.

Mr. Blecker, who was born in 1826, was a member of the United States Navy for more than thirty years, and in addition, he served in the Mexican war.

On April 1, 1848, he was ordered to the Naval Academy for examination for promotion to passed midshipman.

He was then ordered to the Naval Academy at Newport, R.I., on July 16, 1862, he was commissioned as lieutenant commander.

He was then ordered to the Naval Academy at Newport, R.I., on July 16, 1862, he was commissioned as lieutenant commander.

WOODLOTS AND THEIR VALUE

BY PROPER UTILIZATION A PERMANENT FUEL SUPPLY IS ASSURED

WOODLOTS on the farms can be made an important factor in the relief of the threatened fuel shortage.

Farmers and the residents of smaller towns and villages situated within hauling distance of woodlots, should, as a measure of practical patriotism, use wood in preference to coal.

Few farmers realize the value of the crop which can be obtained from their woodlots. It even a small proportion of the attention given to other crops were devoted to the protection and improvement of the "bush" a good financial return could be secured.

Aside from its value in affording protection against wind and storms, its importance in the conservation of soil moisture and its aesthetic value, the woodlot has a considerable value for the crops which can be harvested from it every year at a minimum expense. It should have a place on every farm.

Live stock should be excluded, as they destroy the natural reproduction, injure the larger trees and pack the soil so that the growth of the trees is retarded.

Defective and diseased trees should be removed first; then those of poor form, such as very crooked or very branched ones which interfere with the growth of better formed neighbours.

The trees of the less valuable species such as dogwood, ironwood and hornbeam should then be removed. Every effort should be made to secure natural reproduction but, if that is impossible, planting will be found profitable.

The tendency has been to encourage the growing of soft-woods suitable for lumber, such as pine, spruce and cedar, but the function of a farmer's woodlot is better fulfilled by producing hardwoods for fuel.

The fuel value of one cord of several of the common kinds of wood is equal to the following quantities of anthracite coal:

Hickory and hard maple 1,900 to 2,000 lbs. of coal; white oak, 1,540 to 1,715 lbs. of coal; red oak, black oak and beech, 1,300 to 1,450 lbs. of coal; poplar, chestnut and elm, 940 to 1,050 lbs. of coal; pine, 800 to 925 lbs. of coal.

Therefore, hardwood is worth to the owner of the woodlot, from \$6.00 to \$9.00 per cord, as compared with coal at \$10 per ton, plus the cost of hauling it out to his farm.

If a yield is to be sustained permanently, it should not exceed the annual growth which, in unmanaged woodlots, probably does not exceed 7 cords per acre. This production can be considerably increased by careful management.

A woodlot may be considered as similar to a savings bank account from which the annual interest, represented by the growth, may be taken out or allowed to accumulate. In the case of the woodlot, however, the withdrawals can be so made as greatly to benefit the condition of the stand and improve its productivity.

The Dominion Forestry Branch and the various provincial forestry organizations have done much to encourage farm forestry by supplying advice and assistance. The Dominion Government distributes annually between 3,000,000 and 3,750,000 seedlings and cuttings among the farmers of the prairie provinces. In Ontario, the Forestry Branch of the Department of Lands, Forests and Mines also supplies seedlings for planting in private woodlots.—R.D.C., in Conservation for July.

For more information on the possibilities of farm forestry, apply to the nearest Forestry Branch office.

LIVED IN CAVERN IN FORT HOWE

FOUND IN GROTTA IN THE NORTH END

Found in a grotto in the North End on Saturday afternoon, where he had been living for several weeks on scraps of food picked up on the dumps, a veritable cave man was taken into custody by Detective Briggs and Officer Donahue and lodged at the central lockup on a charge of vagrancy.

Amodus Hendrickson, Norwegian, 47 years, is the name given on the police register. The police officers have a fuller description. After skirting the country side in the rear of Fort Howe on Saturday afternoon in search of a man who had been reported living in that locality and had caused uneasiness to people by his strange actions, they came to a cavern with a stone arched roof.

In the cavern was a stony shelf, and back of this burned a small fire. A few loaves of milk bread, picked up on the dump, an old pot and a can of grease used for frying were lying about. Two bags picked from the dump and laid on the shelf of rock, used as a bed, were the only other articles in the place.

The strange inhabitant told the police he had no money, but made out to live by what he was able to collect in the way of food from his daily examination of the dump nearby.—St. John Globe.

SHEEP BREEDING IN NEW BRUNSWICK

New Brunswick farmers are beginning to appreciate the possibilities existing in this Province for sheep breeding. Four years of inquiries are being received at the Live Stock Branch of the Department of Agriculture for information on this subject.

Very many of these men contemplate making a start this fall and a number of them in starting are laying their foundation with pure bred stock. This is as it should be. Start small but start right. Some may not be able to buy anything but a pure bred ram and a few ewes, but this means that the ram must be a good one or else the lambs will suffer. A sturdy, blocky active masculine ram means a good bunch of heavy lambs next spring.

To those men who are engaging in this business for the first time, as well as those who are about to go into the business on a larger scale we wish to state that the Department of Agriculture is at your service. We will be pleased to aid you in any way possible. The beginner should start in a small way unless he has had previous experience. Sheep seldom do well on low wet land. Unless you have a dry upland pasture you will have trouble sooner or later. Select the same breed of stock that your neighbour has. Do not select a new breed because you will have to be continually importing rams, but if you have the same breed as your neighbour you can "swap" rams. This is the cheaper way. Our local supply of pure bred rams and ewes is being rapidly exhausted. If you have not already purchased you had better look up your order soon. Deal with reliable people and whenever possible make a personal selection. Book your orders early. Address all Livestock communications to Thomas Hetherington, Department of Agriculture, Fredericton, N. B.

"Food Controllers in the States and Canada were appointed in order that the men at the front might be fed," says Hon. W. J. Hanna, Canadian Food Controller. "In order that those behind at home should not go hungry; in order that Great Britain and her Allies should not have to retreat from the enemy for want of food."

LESS TEAKWOOD EXPORTED

Carl C. Hansen, American vice-consul at Bangkok, Siam, reports to the Department of Commerce that the customs returns for the four months from January 1, to April 30, 1917, show a total export of teakwood to foreign countries of 14,701 tons, as compared with 17,415 tons for the corresponding months of 1916. Of the exports for the 1917 period, 1,105 tons were destined for Europe, including Port Said (for orders); 9,478 tons for India and Colombo; 3,209 tons for Hongkong, China, and Japan, and 989 tons for other countries, including 120 tons for United States.

During 1916 the number of teak logs that passed the duty station at Paknappo was 91,055, while the average yearly number passing this station is estimated at 100,000. The teak-floating season usually begins with July and ends with December, and most of the logs destined for Bangkok arrive during that period.

A good deal of time might be saved on Monday morning if thirty citizens would drink their whiskey as intellectually as they pick their way through the labyrinth of argument as to the why and wherefore of their arrest. The Ontario Temperance Act is proving a mixed blessing. It has shown a man that it is easier to redeem

WOODLOTS AND THEIR VALUE

BY PROPER UTILIZATION A PERMANENT FUEL SUPPLY IS ASSURED

WOODLOTS on the farms can be made an important factor in the relief of the threatened fuel shortage.

Farmers and the residents of smaller towns and villages situated within hauling distance of woodlots, should, as a measure of practical patriotism, use wood in preference to coal.

Few farmers realize the value of the crop which can be obtained from their woodlots. It even a small proportion of the attention given to other crops were devoted to the protection and improvement of the "bush" a good financial return could be secured.

Aside from its value in affording protection against wind and storms, its importance in the conservation of soil moisture and its aesthetic value, the woodlot has a considerable value for the crops which can be harvested from it every year at a minimum expense. It should have a place on every farm.

Live stock should be excluded, as they destroy the natural reproduction, injure the larger trees and pack the soil so that the growth of the trees is retarded.

Defective and diseased trees should be removed first; then those of poor form, such as very crooked or very branched ones which interfere with the growth of better formed neighbours.

The trees of the less valuable species such as dogwood, ironwood and hornbeam should then be removed. Every effort should be made to secure natural reproduction but, if that is impossible, planting will be found profitable.

The tendency has been to encourage the growing of soft-woods suitable for lumber, such as pine, spruce and cedar, but the function of a farmer's woodlot is better fulfilled by producing hardwoods for fuel.

The fuel value of one cord of several of the common kinds of wood is equal to the following quantities of anthracite coal:

Hickory and hard maple 1,900 to 2,000 lbs. of coal; white oak, 1,540 to 1,715 lbs. of coal; red oak, black oak and beech, 1,300 to 1,450 lbs. of coal; poplar, chestnut and elm, 940 to 1,050 lbs. of coal; pine, 800 to 925 lbs. of coal.

Therefore, hardwood is worth to the owner of the woodlot, from \$6.00 to \$9.00 per cord, as compared with coal at \$10 per ton, plus the cost of hauling it out to his farm.

If a yield is to be sustained permanently, it should not exceed the annual growth which, in unmanaged woodlots, probably does not exceed 7 cords per acre. This production can be considerably increased by careful management.

A woodlot may be considered as similar to a savings bank account from which the annual interest, represented by the growth, may be taken out or allowed to accumulate. In the case of the woodlot, however, the withdrawals can be so made as greatly to benefit the condition of the stand and improve its productivity.

The Dominion Forestry Branch and the various provincial forestry organizations have done much to encourage farm forestry by supplying advice and assistance. The Dominion Government distributes annually between 3,000,000 and 3,750,000 seedlings and cuttings among the farmers of the prairie provinces. In Ontario, the Forestry Branch of the Department of Lands, Forests and Mines also supplies seedlings for planting in private woodlots.—R.D.C., in Conservation for July.

For more information on the possibilities of farm forestry, apply to the nearest Forestry Branch office.

PRESERVING VEGETABLES

BY SALTING, PICKLING AND FERMENTING

In a recent issue, the *Youth's Companion* published an article under the above heading which gave in a clear and practical manner some very useful directions for preserving vegetables without using either fuel or glass jars. As both fuel and glass jars are difficult to obtain and very high priced when obtainable, a method of keeping vegetables for winter use which does not require either of them is very desirable, and below we print some extracts from the *Youth's Companion* article which is rather too long to print in full in the space available.

The following equipment is necessary: for packing the vegetables use a clean wooden keg or tub, a stone crock or jar, or wide-mouthed bottles or glass jars not suitable for canning. New kegs are best, but old ones if thoroughly cleaned will do very well. A five-gallon crock is the most convenient size. Too large a crock will be apt to cause waste, because when once the vegetables have been opened up it will take longer to pack up the whole amount, and some of the vegetables at the bottom may spoil.

Use fine salt, the common kind that can be bought in bulk for two cents a pound. Have round covers of board a little smaller in diameter than the necks of the crocks, so that they will slip in and out easily and will allow for several thicknesses of cheese-cloth between the cover and the side of the crock. Some clean bricks or stones are needed for weights to put on the covers to keep the preserved food under the surface of the brine, and ordinary kitchen scales and a quart measure complete the list of necessary equipment.

The vegetables to be preserved must be young, tender and sound. Some vegetables, like greens and beets, should be packed whole, but others, like string beans and cabbage, should be cut up. All of them should be washed to remove surface dirt, and root vegetables should be thoroughly scrubbed.

To preserve by salting, weigh the vegetables and take one quart of their weight of salt. Pack a layer of vegetables about one inch deep at the bottom of the receptacle and sprinkle it heavily with salt. Continue to pack layers of the vegetables sprinkled with salt until the vessel is nearly full. The weighed quantity of salt should be evenly distributed throughout the whole quantity of vegetable. Pack the material close, and cover it with several thicknesses of clean cheese-cloth. Over that place a board cover, and on top of that put a heavy stone or brick. Set the keg or crock in a cool place. In about twenty-four hours the salt and the pressure should have extracted the juices of the vegetables and formed a brine that will cover them. If enough brine has not formed at the end of that time, make a strong brine by dissolving one pound of salt in two quarts of water, and pour just enough of it into the vessel to cover the round board on the top of the vegetables. The surface of the brine is now treated to prevent moulding or loss of water by evaporation. Set the keg where it is to remain, otherwise the layer of wax or other sealing material will be broken when the container is moved. If ordinary paraffin is used as a sealer, heat it until it begins to smoke and then pour it carefully on the brine until it forms a layer a quarter of an inch thick. Suet or mutton tallow can be used in place of paraffin, or a layer of cottonseed or other wholesome oil can be poured over the surface of the brine. Yet another method of sealing the crock is to replace the board cover, bore a small hole in it, pour in brine until there is no air space left and then plug the hole tightly. Corn on the cob can be salted by packing into a small jar and covering it with brine (one pound of salt to two quarts of water), and then treating it as above described.

When vegetables that have been preserved by salting are to be used, drain off the brine and soak them for several hours in clean cold water. Cook the vegetables as usual, but change the water once. In preserving in vinegar, vegetables are first soaked for two or three days in a strong brine (one pound of salt to two quarts of water), and then packed in jars or bottles with strong vinegar. The jars should be filled with vinegar so that there is no air space, and should be tightly sealed. By adding spices, or spices and sugar, to the vinegar, a great variety of products can be obtained. Cucumbers, tomatoes, onions, peaches, pears, apples, plums, and currants can all be pickled with vinegar, sugar and spices. Watermelon rind and ripe cucumbers treated in this way make a very palatable sweet pickle.

For the fermentation method: cabbage, string beans, and beet and turnip tops, are best fermented by the dry salt method. Prepare as for salting. Weigh vegetables, and then take three pounds of salt for every one hundred pounds of vegetables, three per cent. of salt by weight. Spread a one-inch layer of vegetables on the bottom of the crock, sprinkle with salt, and continue until the container is nearly full. Cover with several thicknesses of cheese-cloth tucked down at the sides; place the board and stone on top, and set the crock in a warm room. If after twenty-four

hours the material is not covered with brine, make a solution of three-quarters of a cupful of salt in a gallon of water, and pour enough of it into the container to cover the board. As the fermentation goes on, bubbles will rise and will continue to form until fermentation ceases. Shake the keg slightly, and if no bubbles rise the container should be moved to a cool place and the surface of the liquid covered with paraffin or other sealing material. Should the surface begin to mould, the upper layers of the vegetables can be scraped off, a fresh cloth added, and a new layer of paraffin poured over the top.

For fermenting cucumbers, green tomatoes, beets, corn, and green peas, make a brine of three-quarters of a cupful of salt to a gallon of water, and add one cupful of vinegar. When thoroughly dissolved pour over the vegetables in the container and proceed as for the dry salting fermentation.

To use successfully these methods of preserving, it is necessary to follow the directions and to observe a few simple precautions. Metal containers must never be used; tubs of yellow pine are likely to impart an undesirable flavor. All utensils should be scrupulously clean. The proportions of salt and vegetables should be weighed carefully and only pure water used for making the brine. It is especially necessary to prevent the surface of the brine from moulding, and when containers are set aside to ferment they should be watched carefully and any scum of mould that forms on the liquid should be scraped off from day to day. The fermented or salted foods should be stored in a clean, cool place where they will be protected from rats and mice.

ONTARIO'S FISH-DINNERS OF LONG AGO

A fish diet was not entirely unknown to the inland communities of Ontario thirty years ago. The red herring, ayre for that fish, the red herring:—

"Every place was a temple, and all seasons summer."

Ontario feasted on the game fish of "cricks" and rivers, and larger waters, the salmon and whitefish of the great lakes. The areas of consumption for these fish were local rather than provincial. The red herring was popular as a restorative for the jaded appetite of the roysterer who had imbibed deeply and was trying to sober up. The boxes of red herring were always open. The whole anatomy of a salted codfish was hoisted in front of the general store shortly after sunrise and taken in after sundown. The place that the salted codfish occupied in the busy marts of Ontario commerce was thus celebrated by Canada's greatest poet, Mr. R. K. Kernighan, "The Khan," of Rockton, Ont.—

Homeseek to-night, my heart is sick, As in the days of yore I walk again the village street, I see the village store, The same old-timer cod-fish still dangles at the door.

The red herring was a relish for breakfast or tea. The salted codfish and the Labrador herring in barrels were welcomed on the tables of people wearied with their winter diet of pork, fresh and salted. A meal of Labrador herring and potatoes or salted codfish was a banquet that parched the throat of the banqueter with a thirst such as never blistered the throat of a wanderer on the desert of Sahara.—*Toronto Telegram.*

FOOD THRIFT IN RHYME

The National Food Commission of the United States, like Silas Wegg, has "dropped into poetry," to express its sense of the need for the preservation of food, and its effort has produced the following:

From our constant daily reading we can see the things we're needing is the stuff for fully feeding folks at home and folks afar. For the daily papers tell us facts and figures that compel us to be wide-awake and jealous of the waste we should debar. Bread and butter, beans and berries, kraut and cabbage, cheese and cherries, and the eggs of Tom and Jerry should be saved throughout the land, so that ours, the fruitful nation, may prevent the quick starvation of the balance of creation in the troublous times at hand. Though it seems inconsequential each small slice of bread's essential to keep famine pestilential from ourselves and our allies; waste of food is unpropitious, unpatriotic, pernicious, and has consequence as vicious as a swarm of German spies. All our logic and our reason prove us nothing short of treason if we let the growing season find us idly looking on, not considering nor caring for the famine which is staring in our faces, nor preparing for the days when summer's gone.—Let us then do what we ought to by devoting all our thought to saving foodstuffs as we're taught by the manuals complete which the National Commission has prepared in large edition for improving the condition of our stock of things to eat. This is something worth your trying, for by canning and by drying all the things that you've been buying you'll not merely feed yourselves, but you'll find, from the beginning, that you've helped our troops in winning by the drying and the tinning which have stocked your pantry shelves.

THE FISH SUPPLY

TO THE EDITOR OF THE EVENING POST: Sir: There was a dinner at Coney Island yesterday to celebrate the 324th anniversary of the birth of Isaac Walton. The event was under the auspices of the United Anglers' League of this city, an organization composed of anglers who fish as a sport and who are pledged to secure legislation, national and State, for the protection, conservation, and propagation of food and game fish.

The dinner was attended by over 300 hook and line fishermen, and among those who spoke of the great necessity for the enactment of conservation laws to prevent the extermination of edible fish were Dr. W. T. Hornaday, director of the New York Zoological Park; Dr. Robert T. Morris, writer on fishing; Dr. John Treadwell Nichols, curator of the American Museum of Natural History; Charles Bradford, editor of *The American Angler*; and State Senator C. F. Murphy, of Brooklyn.

Mayor Mitchell wrote his regrets at not being able to attend the dinner. The Mayor's letter was received with great enthusiasm, especially that part of it which read:—

"As I understand it the United Anglers' League is an organization which seeks to obtain and enforce laws for the propagation and protection of food fish, and has already secured legislation in the interest of fishing and fishermen. It seems to me that the League, through its organization and members, could at the present time render a great service in assisting other organizations and committees in preventing waste of food fish, and also in helping to secure laws that will permit our citizens to purchase fish at a price that is not prohibitive."

Mayor Mitchell is right. Unless something is done in the immediate future to propagate and conserve our food fish, especially such salt-water fish as cod, sea bass, flounders, porgees, and black fish, these species of fish will be exterminated. There is urgent need of cod-fish hatcheries along the Long Island coast. We hear a great deal about the cultivation of land, but very little about the cultivation of our waters. Edible fish are getting scarcer every year. The Mayor's suggestion should be heeded.

J. W. M.
New York, August 10.
—*The New York Evening Post.*

CANADIAN PULP MANUFACTURED IN 1916

The Forestry Branch of the Department of the Interior, Ottawa, has just issued the annual bulletin on the manufacture of pulpwood. The total value of the pulpwood made into pulp in Canada and exported for manufacture elsewhere in 1916 was nearly \$20,000,000, which represents an increase of over 28 per cent as compared with 1915. The proportion of pulpwood manufactured into pulp in Canada compared with that exported in that state is steadily increasing. These and other particulars of this important industry are set out in the bulletin which may be had free by any citizen interested by addressing the Director of Forestry, Ottawa, and asking for the Pulpwood Bulletin for 1916.

THE EVAPORATED APPLE INDUSTRY

With the apple picking season close at hand and the large quantities of apples grown in Canada a more timely bulletin than one on the Evaporated Apple Industry, written by Mr. C. S. McGillivray, Chief Travelling Inspector of Fruit and Vegetable Canners, and issued by the Department of Agriculture, Ottawa, could hardly be devised. It speaks of the old time methods when apples were cut into sections and hung up to dry, and then, with many illustrations and drawings, describes in full the progress that has been made in the process, the wholesomeness and nutritive value of the evaporated apple, the implements that can be used, and the structures that are advisable for manufacturing on a scale of different dimensions. The bulletin remarks that the industry is only in its infancy in Canada, but is of great value and importance and open to extensive development. It gives the results of many experiments and, in short, in plain and explicit language, explains very fully the operations that are necessary to bring the evaporated apple up to the highest standard of commercial excellence and nutritive value. The bulletin can be had free by addressing the Publications Branch, Department of Agriculture, Ottawa.

"The primary duty of a Food Controller in Canada and the United States," said Hon. W. J. Hanna in a recent interview "is to see that the men at the front do not suffer from want of food, and that our Mother Country and our European Allies should not suffer from want of food."

"Have you power to check prices?" Hon. W. J. Hanna was asked.

"Certainly."

"Are you going to exercise it?"

"In the cases where we have the necessary data we will not hesitate to check prices," declared Mr. Hanna.

FOOD REGULATIONS

AT THE GOVERNMENT HOUSE AT OTTAWA

Thursday, the 9th day of August, 1917.

PRESENT: HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL is pleased on the recommendation of the Right Honourable the Prime Minister, to approve the following Regulations, which have been made by the Food Controller under the powers conferred upon him by the Order in Council of the 10th June, 1917, and the same are hereby approved accordingly:

REGULATIONS APPLICABLE TO PUBLIC EATING PLACES.

1. For the purposes of these regulations,

(a) the expression "public eating place" includes any hotel, restaurant, cafeteria, club or other place where meals to the number of twenty-five or more per diem are sold and served to persons other than members of the family or household of the proprietor;

(b) the expression "bacon" shall include cured (either pickled or smoked) sides, backs, hams, and any portion of what is termed in the trade "Whitshire sides";

(c) at every public eating place, beef shall not be served at more than one meal on any day, and on Tuesdays and Fridays none shall be served;

(d) Bacon shall not be served at more than one meal on any day, and on Tuesdays and Fridays none shall be served;

(e) at every meal at which white bread is served there shall also be served some substitute or substitutes, such as corn bread, oat cakes, potatoes, etc.;

(f) There shall be prominently displayed a printed notice to the effect that all persons in ordering their food ought to consider the needs of Great Britain and her allies and their armies for wheat, beef and bacon, and that the Food Controller requires the public to do everything in their power to make these commodities available for export by eating as little as possible of them, and by making use of substitutes and avoiding waste.—*Canada Gazette, Extra, Aug. 13.*

"It is in the homes of the Province of Ontario that the great battles, we are to face will have to be fought and won," declares Sir William Hearst, Premier of Ontario, referring to the Food Controller's Food Conservation campaign. Premier Hearst's words apply to all Canada.

"We look to the resources of Canada, and to the indomitable energy of Canadians for an answer that will slay Germany's threat of starvation," says Baron Rhonda, Food Controller of Great Britain, in a message to Hon. W. J. Hanna, Food Controller of Canada.

"It is in the homes of the Province of Ontario that the great battles, we are to face will have to be fought and won," declares Sir William Hearst, Premier of Ontario, referring to the Food Controller's Food Conservation campaign. Premier Hearst's words apply to all Canada.
