FAULTY CONSTRUCTION.

NEW YORK, March 1. - Another building disaster occurred about four c'clock this cut off the maintenance of Government house afternoon, which proved nearly as fatal in after this year. itt results as did the Tenth avenue male house accident. The interior of four tenements in course of construction on Orchard street, near Rivington, fell in without moment's warning, and a number of bricklayers and laborers who were working on it were carried into the cellar with the falling walle. One man, an Italian laborer, is missing, and it is believed is dead in the ruins. Two men are probably fatally injured, and eight others seriously. The wrecked building has been in course of construction for ten weeks, and work had progressed as far as the fifth floor when the crash came. Both of the contractors as well as the owner were present when the accident occurred. They were placed under arrest. The charge against them was criminal negligence. It is expected that the responsibility for the disaster will be placed upon the prisoners. The materials used in the construction of the building it is alleged were faulty.

The President said: "It is not necessary for me to say that I shall release Mr. Bissell with the utmost regret. All his associates in the administration will feel that they have lost a colleague who in all respects was a valuable factor in their executive labors as well as a companion to whom they have become greatly atttached. I have known for some time that this was inevitable, because Mr. Bissell's reasons for his action were of a personal nature and were inexorable. Still, this first break in the cabinet, which has been, in the mide of many perplexing situations, entirely harmonious, causes us all real sorrow. FRIDAY, MARCH 8, 1895. A BAD BEGINNING.

The organ of the Opposition on Thursday promised to be good. It tells its readers that as long as the election lasts it will refrain from evil speaking, lying and slandering, and will be for that time, at any rate, a good little newspaper. It is a pity that it did not begin to carry out its very praiseworthy resolution at once, for the leading article of that issue does not show that it had then experienced a change of heart. The article is misleading, and we cannot help believing that it was intended to be so. In that article the editor holds the Government responsible for the decrease in the imports for the month of January of the present year. Every man who possesses an atom of common sense knows that the duliness of trade is owing not to anything the Government has done or has not done, but to the general depression that prevails in almost every country in the world. It would be quite as and \$1,600,000 a year into the pockets of the reasonable to blame the Government for the electors to condemn it because the mer-chants of Canada did not see their way to overflow of the Fraser River as to ask the import as large a quantity of goods standard brand equal to Canadian granding ed on Thursday were three and thirteen-six last January as they did in January of 1894. A NEW NATION.

The rise of a new nation on the other side of the Pacific Ocean is a matter of considerable interest to the inhabitants of this Pacific province. Hitherto Japan, as a nation, has been regarded with indifference. The attempt to establish constitutional government in a country unacquainted with even its forms was watched with interest by a comparative few, and the wonderful adaptability of the Japanese was witnessed with Blake. Both were harassed out of the leadamazement. But until lately it was not erahip, and virtually or really out of the helieved that the changes that have party. Liliuokalani to Be Imprisoned for Five Years-Deportation of Dangerous Persons.

SAN FRANCISCO, March 2.- The Oceanic mail steamship Australia arrived this morning from Honolulu with advices to the 22nd mlt. :

The week had been quiet in Honolulu. Martial law will probably be discontinued af er the military commission finishes the trial for treason and misprison. The first four days of this week were occupied with the trials of twenty-one natives for treason. All of them were charged with having carried arms with Nowlein and Wilcox. Three pleaded guilty. The majority tried to show they were forcibly detained beyond Diamond Head and compelled to carry arms. On the 22ad twenty-one natives were reeased from prison mainly for lack of evidence against them. One was William Clark Seward, who is conditionally set at large on account of his important services in unearthing arms and bombs at Washington place and aiding in the search for the Ex-Queen's papers as well as for his testimony

The prisoners exhibited much nervousness while their sentences were being read. The sentence of the Waimaulo's captain has not yet been announced, the executive has not yet passed upon the sentence of the ex-Oneen. It is certain that the military commission made it five years and \$5,000 fine. It is understood that the government is de-bating the method and place of imprison-ment. A conclusion will soon be reached. The Honolulu public are satisfied with the sentences as the wisest that could have been imposed under the circumstances.

Willis Creighton, attorney-general under the ex-Queen, said to the United Press representative who boarded the ship, that he had been kept six weeks in jail without being charged with any offence. His request was made through the United States ninister, and the request of his counsel to be informed of the nature of his offence was,

Lady Aberdeen's Tribute to the Qualities of the Late Premier of Canada.

His Life Reviewed and Its Lessons Emphasized-He Died at His Post.

(From the Canadian Gazette.) The Countess of Aberdeen has given expression in the following article to her high appreciation of the qualities of the late Can-him in the Behring Sea arbitration and on and we are glad to have the opportunity of publishing it in its entirety in the Canadian

What manner of man was this whose death has stirred the heart of an empire, whose memory was crowned with laurels by his sovereign's own hand, and whose re mains were borne across the ocean by one of Britain's proudest warships, and followed to the grave by the representatives of army and mavy, church and state, and of every party, class and creed, amidst the mourning

Some will attribute the feeling which has been evoked to the dramatic character of his death-and, truly, all the circumstances surrounding it were such as to leave an indelible impression. Here was a man still in the prime of life who had risen by steady and successive steps to the highest post of honor in his own country, at the head of a powerful party, and enjoying the respect of both friend and foe, called by his Queen to her palace to receive from herself a signal mark of recognition of services which he had rendered to the Empire. And scarcely had he left her presence when the startling news came that a higher summons had ealled him to the presence of the King of Kings, and his sorrowing family and country were left to realize all the greatness of

All that queenly thoughtfulness and womanly sympathy could do to soothe the grief of those who loved him and the country which trusted him was done by Queen Victoria, who in her respect for the religious persuasion of the dead, in her motherly tenderness towards the young daughter left fatherless far from her own home, and in her beautiful act of royal recognition of faithful service in herself laying the visitor's wreath of laurels on the coffin of the departed statesman, showed once more the secret of the power by which she has strengthened her throne and the British onstitution for well nigh sixty years.

Her government and her people caught up the note and honor after honor was showered on the remains of the late Premier, and not only his own country but every British colony throbbed responsively to this demonstration of the oneness of the British Em pire and of the reality of the ties which nite all its component parts.

But when all this is said, and more than ully granted, can it be asserted that it was merely the accident of Sir John Thompson's death at Windsor Castle, and the consequences resulting therefrom, which occasion. ed the deep feeling perceptible amongst the crowds who attended his funeral, and which has left such a keen sense of bereavement from East to West in the wide Dominion even after the first outburst of sorrow has

The increased importation of tes is probably due to an apprehension that the war between China and Japan may cause an advance in the price of that commodity.

The export trade of the half year was as a

whole, fairly satisfactory, its aggregate value having been \$72,599,132 as compared with \$77,604,390 in the like period of 1893 These figures indicate a shrinkage of about five million dollars, but it is important to bee ve that practically the whole of this decline is due to a lessened export of America agricultural products, which were shipped through Canadian ports to the value of \$7.338 681 in 1893, and to the value of only \$1,850,200 last year. This decrease is, course, regrettable since it involves loss of freight to inland and ocean vessels and to the railways, and also loss of profit on the similar reduction in the export value of Canadian products. Of home commodities we shipped to the amount of \$67,447,169 in respect of Canadian products exported the trade has been well maintained. The details

for the two periods follow :-Produce of. Total \$ 67,705,213

THE information of Aaron Lewis charging George Voltz with assault was yester day so amended as to allege aggravated assault, and upon this latter indictment the accused was committed for trial by Magisather and Sergt. Hawton. Voltz did not deny the assault, but pleaded extenuating circumstances. He said that he was out of work and that he was a creditor of the complainant on account of labor performed some time ago. Not only did Lewis refuse payment of the bill but used bad language to-ward him, and finally struck him. The prosecution deny the truth of this statement of the facts, and charge that Voltz was the aggressor throughout. He was last evening taken to the provincial jail there to

THE appeal in Edison v. Edmonds and yesterday, Justices Crease, McCreight and Walkem presiding. The Edison Electric Light Co., sued Mesers H. V. Ed. monds, David Oppenheimer, Isaac Oppenheimer, Alexander Ewen and E. A. Wyld as shareholders of the Westminster and Vancouver Tramway Company, under the railway act which provides that shareholders are liable under an execution on the amount of their unpaid stock. The defence is that the tramway does not come under the provisions of the railway act. This view Mr. Justice Drake upheld at the trial in Vancouver, hence the appeal. SHIPS AND SHIPPING.

The shipping business has, it is thought, reached its lowest stage during the month of February. One important factor, the Northern trade, is, however, already showing marked improvement. This is demonstrated by the large freight going North on the steamship Danube to day. It was originally intended that the Barbara Boscowitz should make the next trip North but the change was made to afford increased accommodation for freight and passengers The latter comprise numerous Chinamen, who are going North in anticipation of work in the canneries. The Alaska business will also be more active from now on than for some time past, and steamboat competition will be strong. Following are the clearances and entries for this port for the past month: ENTRIES.

THE "WILLAPA" HERE SUNDAY.

The new Alaska steamer Willapa, whose appearance in the field of competition has already been productive of a considerable reduction in both passenger and freight rates, will reach the Hudson's Bay Company wharf here at 7 o'clock Sunday evening from the Sound, and will be open to the public for inspection. She will be under the command of Captain George Roberts, and will leave at 10 p.m. the same night for Alaskan points.

Messrs. Davies, Helmoken and Yates were appointed a special committee to consult with the Ladies' Auxiliary, a request having come from the ladies that a committee be appointed to meet them.

Dr. Richardson reported that Dr. Hanington, physician to the Indian department, wished to know if Indians would be admitted to the hospital at \$1 per day. Dr. Richardson stated that rate would be sufficient for ordinary cases, if special arrangements were made, but would not repay the cost of surgical dressings in most cases.

The visiting committee for the month reported everything satisfactory at the hospital. The report stated: "A matter has been called to the attention of your committee which deserves the serious consideration your board, viz, the recent admission of se patients as free patients, whilst perfectly able to pay. The majority of these cases have obtained signatures to their adnission cards on the medical certificate of Dr. Lang. There is at present in the hospital a Chinaman who was a pay patient of Dr. Jones and who agreed to pay him \$25 fee and \$10 a week to the hospital, to have an operation at the hospital. He somehow learned the value of Dr. Lang's certificates and having obtained one is now in the hospial as a free patient to be operated on by Dr. Davie, while Dr. Jones has lost his patient and the hospital has lost possibly \$40 or \$50. Mr. Wilson stated that he had signed the

mr. Wilson stated that he had signed the certificate. Dr. Lang had explained that the Chinaman was his patient, and had to go to the hospital for proper treatment for an operation, but was unable to pay. If Dr. Richardson knew that the man could pay it was his duty to have refused him adnission as a free patient.

Mr. Brown did not for a moment think

Dr. Richardson was to blame for admitting the patient as long as he had a certificate. The matter was referred to the committee of the month wish full power to act. Mr. John Jardine was thanked for offer-

It was decided to order a quantity of fels slippers for use at the hospital, Mr. Braden offering to supply rubber for the soles. The Chairman said he had investigated complaints as to meals supplied the patients, and read the bill of fare, which was certainly varied enough to satisfy any person. The rest of the board agreed in this The pay roll for the month, \$563 25, was rdered to be paid if found correct. The board adjourned shortly after 9

BETTER TIMES.

In his Wall street circular, dated Pebruary 23. Henry Clews says: Wall street if fairly taken by surprise at the stupendou success attending the syndicate's negotia-tion of the new treasury loan. Two weeks ago, all was in the gloom of utter uncer-tainty as to whether the treasury could be kept afloat, or it must sink from lack of rescue. Now, the status of the public credit is elevated before the world by bids for ten times the amount of honde offered and by the fact that the major part of the subscription is made in Europe. This fact is as remarkable for its revelation of the large amount of capital seeking employment as it is for its evidence of the still high standing of our national credit.

WILL SUPPLY SEED.

The Provincial government has had under consideration for some time the matter of supplying the farmers in the flooded districts of the Fraser valley with seed. It has been shown that the conditions existing in the inundated portions are such that advances to the settlers are absolutely necessary in order that a crop may be sown. In the absence of action by the municipalities, the duty of which it more particularly is, the government felt that distress should not be allowed to go unrelieved, and as will be seen by a notice in another column the necessary machinery has been set in opera-

duired to give a promissory note payable on the first day of January 1896, bearing interest at five per cent. per annum. The seed is to be supplied delivered at New Westminster at the lowest market prices for cash, minster at the lowest market prices for cash, as being inclusive of everything requisite to complete the proposed works well known to many as the Granite Creek country, for in '85 and '86 it was a lively favoritism being shown to certain dealers over others, each applicant is permitted to sign his requisition in favor of any dealer with whom he has been in the habit of deal-

The conditions imposed by the government are as follows:

COUGHLAN VS. WILMOT AND CORPORATION F VICTORIA. The question here is, What is the meaning of the contract? The plaintiffs tendered for the work on an estimate of quantities furnished by the defendants' engineer. It is now stated the quantities are largely in excess of the actual material required to be removed. It is stated that they show some 2,600 lineal feet, while the whole work has been completed

while the whole work has been completed for some 1,460 feet.

This error, if it is one, is not that of the plaintiffs. The specifications, clause 10, expressly state that the defendants are not to be in any way responsible for the quantities given or liable for any loss in respect thereof. On the other hand, the defendants cannot complain now that they corrections to

the work.

The plaintiffs, when they made their tender, put in figures in the forms furnished them at how much per foot they would charge for the various material they would remove in vertical depth. Looking at the tender, it is clear the plaintiffs contemplated these figures as having relation to the amount they would be entitled to receive for any extra the market building next Thursday, the election being fixed for the following Monday. FRANCE AND SAN DOMINGO.

LONDON, Feb. 28 .- The Times corresponent in Paris scouts the idea of a conflict between France and the United States over the French attitude to San Domingo. "It owed by ten feet of earth, this result would is true, however," he says, " that certain happen, the contractor would get \$1 50 for the rock and 57 cents for the earth or \$2.07. The result would be, the easier the work the higher the pay, and by working out in some other instances these figures by his mode of calculation the contractor would, with a foot of rock at a depth of twelve feet, get nothing for removing it.

Mr. Mohne was called to support Mr. foot of rock at a depth of twelve feet, get nothing for removing it.

Mr. Mohun was called to support Mr. Wilmot's figures, but he admitted that in such a case as that last mentioned the engineer would make an allowance to the contractor, but how or on what basis he did not explain. I am satisfied the mode of computation is wrong, but I have not been furnished with any criteria as to the correct method and therefore I cannot deal with the question of value of the extra works at present.

European power assumes an imperious attributed towards any American state, especially when, as here, the citizens of the United States have spent money in the country and have capital guaranteed by customs which the foreigners may menace. On the other hand, France, which certainly has a grievance against San Domingo, cannot think of renouncing her claims on the mere refusal to accept them. Mrs. Cram of Boston Will Furnish Apparatus For the Coming Paris Exposition. Many women show an aptitude for business in the more conservative lines of late, but Mrs. D. Henry Cram (Alice E. I have known her permouth, the largest of the kind in the country at that time, was to me an illustration not only of rare sagacity, but

While she was in England several years ago she inspected a considerable portion of the dock system of London, which occupies 2,000 acres.

Though Mrs. Cram is devoted to interests supposed to be attractive only to glove. Striking colors are avoided by a masculine brain, there is nothing the best bred people. Old gloves worn mannish about her. On the contrary, at night after the hands have been care- she is domestic in her tastes, devoted to her friends and sufficiently fond of dress public schools of that city and married when quite young. She has a sunny temperament and a frank and winning personality. Though her offices are very businesslike, her womanly tastes crop out in the flowers on the desk, the pictures on the walls and a pet animal sleeping serenely in a cozy corner. While caring nothing for general society, she is extremely fond of professional people and entertains handsomely those who are congenial.

Mrs. Cram is one of the originators of the Old Glove club, a member of the Boston branch of the Business Woman's league and also of the Professional Woman's league of New York.

A late number of The Woman's Tribune contains a gratifying review of the progress made by women in 1894, parPIAZZA CHAIR IN WINTER.

This will take away the straight, plain look that the cover otherwise would have and make it quite ornamental. Rugs or Carpets? We are constantly being asked, says Decorator and Furnisher, whether it is better to use rugs or a carpet covering every exposed inch of flooring in carpeting a room. On the score of convenience and ease of handling the modern or oriental rug suggests itself, but the deal floor of the average house, in nine cases out of ten, is too rough and open in the joints to make good work "stained and varnished," and even if under favorable conditions you start fair the threshold will become shabby in 12 months with average traffic, in three months with a heavy one. If one goes to the expense of a parquetry floor, where is the modern M. Costillo, Vancouver, semaid that knows how to take care of it? It gets scratched, the grain fills with dirt, and the charm is gone.

It frequently happens that where a dominant tone of color is required in the DR. J. COLLIS BROWNE'S carpet to carry out a certain color scheme the best effect is obtained by covering the room entirely with the carpet, but in most cases an oriental or axminster carpet woven in one piece or a rug made of the narrow widths of carpet sewed together and bordered will prove the most desirable kind of floor covering. The exposed flooring can be treated in many ways. It may be covered with fine, close india matting, too fine for its fibers to be torn up by boots, or the space may be filled in with plain dark linoleum or with plain carpet of a color that will harmonize with the rug.

A new fashion is to make linen covers for the 5 o'clock tea table with a valance. One seen and described by The Housewife has the part that covers the top of the table cut in a square to fit it. The valance, which is about 12 inches to be always tastefully gowned. She ly full and fastened to the center by a small cord or welt covered with white linen. The valance is finished at the lower edge by a hemstitch an inch wide. The square that covers the table top is bordered by conventionalized primroses about the size of a 20 cent silver piece and by many leaves. The colors are opalescent, one flower being worked in softest violet or a pinkish shade, one in pale gold and others in pale old rose and a very soft bluish green. The leaves are all of the green. Both flowers and leaves are worked in long and short stitches. The same flowers that border the center are scattered singly and far apart over the valance.

Lent are rightly proud of the beauty and will take pleasure this evening in pointing out her charms to admiration for those who visit the vessel between 7 and 10 p.m. at the Hudson's Bay wharf. The Willapa has been specially fitted up for the passenger trade. On the upper deck there are fourteen large staterooms, each with two beds, some double, and all furnished in a tasty and convenient manner. The beds are furnished with the finest spring mattresses and the bedding is of the beat. In the corner of each room is a portable washstand with the latest conveniences, and the rooms are fursely and conveniences, and the rooms are fursely and conveniences.

Capt. F. D. Walker Says He Was Not Forced to Leave Honolulu.

He Was Detained But His Passport Was Afterwards Returned to Him.

Capt. F. D. Walker has returned from Honolulu and indignantly denies that he was deported by the Hawaiian government, on the steamer Gaelic. He explains that just prior to the revolution he submitted to the Hawaiian cabinet a scheme for building a cable 1,000 miles long to connect the Hawaiian islands with the proposed Canaadian cable at Fanning island, Capt. Walker to go to London to float bonds for the purpose, also to attract English capital for investment in Hawaii. The cabinet were about to place his scheme before the legislature when is being rapidly productive of good results the revolution broke out. Capt. Walker says that he was on the most friendly terms with the members of the government. On February 2 he was about to sail by the steamer Warrimoo for Victoria to attend to some business in Victoria when, for what reason he has not yet discovered, the marshal refused to contersign the passport, and he was unable to depart. He immediately went to the dook to ask the marshal for an explanation, but the dook gates were closed. Unable to get satisfaction from any of the officials, he complained to Mr. Hawes, the British consulgeneral. At a second interview with Mr. Hawes, that gentleman returned him his passport, saying Mr. Hatch had stated that Captain Walker could go when he liked, all the explanation the government The new Alaskan liner Willapa, which is made neing that the case of Caputal Was under investigation. (From the Mail-Empire.) the bishops in Quebec a letter from Mr. wrong. The leader has had the judgment of the judicial committee before him for weeks. No evidence of pleading has yet of injuring that gentleman in Ontario. What truth there is in the story time will reveal. Meanwhile we must all strive hard to cultivate the belief that Mr. Laurier has no fixed intentions on the question, although we are well aware that, speaking through his lieutenants in Quebec, he is eager for federal interference, whereas, as represented by his Manitoba colleagues, rebellion would

be far better than revision.

Matters on this Manitoba question appear to be taking very much the same shape as that assumed by them during the election of 1891. Mr. Laurier, is will be remembered. was, while that contest was pending, quiescent so far as the school issue was con ed, except to the extent that he declared for justice, toleration, freedom and equality, principles which, let us hope, nobody dis putes. But there was another leader in the campaign who, in that he controlled the lest, was far more is fluential than the leader proper. We shall possibly never know to a dollar how much was stolen from the Quebec treasury in order to further justice, toleration, freedom and equality at that particular time; but we do know what, in every detail, the great public questions were. Increased subsidies, together with more railways and bridges, were important planks, but towering above them all was the declaration of Mr. Mercier that either the western public schools or the

confederation must go.

It happened ut fortunately, that Mr. Mercier's frank declarations reached Manitoba, an accident which is to be attributed to the unfriendly activity of the public press. Great commo ion arose there as a consequence, and Mr. Watson, who was leader of the Manitoba Liberals in the ing in the same way. That it will result, as Commons, as indeed he had been for years, seeing that he was the only Liberal mem from the territory, lying west of Lake Su. men who bled Quebec white those of us who perior, was moved in self defence to take place a fair estimate upon the honor and good sense of the people of Canada will not were 45. It is of interest at this period of the discussion, and in view of the dual position Mr. Laurier, through his followers, is once again assuming upon the question, to exof the dispute so far as it has gone. The first point to bear in mind quiries addressed to the governors of fortywith reference to the subject is that it originated within the Liberal fold. Mr. During that campaign Mr. Joseph Martin took an active part, promising the electors that if they should return the Liberal candidate their schools would certainly be safe.

Mr. Fisher, now a member of the legislaries and a Liberal correspondences this state-Mr. Fisher, now a member of the legislar ture, and a Liberal, corroborates this statement. He attended meetings with Mr. that it is impossible for me to be of any serment. He attended meetings with Mr. Martin, and heard that gentleman declare that it was never the intention of the Lib. erals to interfere with the language of the shools. "He went further," says Mr. Fisher, "and not only said that Liberals Rhode Is and, as the committee reported, had no idea of interfering with these insti-tutions, but he give a positive pledge in the name of the Liberal party that they would

not do so." Mr. Martin's candidate won. . They followed the formation of the local cabinet. Mr. Ewart declares that in this process Mr. Greenway consulted Archbishog Tache, and made voluntary and definite promises to him that the schools would not be affected. Mgr. Tache in a letter confirms the statement made on this point. He says that when Mr. Greenway was ferming his ministry the Premier paid him a visit. and announced that he was anxious to have a French-Canadian colleague, Mr. Prendergast, in the cabinet, and that under his government the schools would be continued. The Archbishop was glad enough to hear this; but His Grace was very much sur-prised later on to find the schools made the subject of attack by Mr. Greenway, and much more so to learn that Mr. Greenway denied that he had given the promise to protect them. Writing to Mr. Greenway, he says: "After violating your promises you now deny ever having made them. After sealing my lipe with the promise of secrecy you have injured the people entrusted to my spiritual care in a matter dearer to me than life itself." Here then is dearer to me than life itself." Here then is the local political history of the case. The Greenway government pledged itself to the public and to Archbishop Tache to continue Greenway government pledged itself to the public and to Archbishop Tache to continue the schools, and then passed the law abolish-

Now immediately that the promise had been broken the Quebec wing of the Liberal party began to call upon the Federal power to undo what the Manitoba wing bad done began to call upon the Federal power to undo what the Manitobs wing had done. No men in the world could have been more anxious for the welfare, material and religious, of the minority in Manitobs than were Messra. Meroler and Tarte. Mr. Mer. der for his part was prepared to destroy confederation, or at least to retallate upon the Protestants, if justice were not promptly rendered to the oppressed. Had he been able to corry into effect his lesser threat-and, happily, the discovery of the thefit rendered this impossible—he would have deprived the Protestants of Quebec of the separate education they enj y. Mr. Tarte was equally b 1 igerent; but his campaign took the form of an assault upon Archbishop Tache. He held that the Archbishop had not been sufficiently active in the matter of pressing for action at Ottawa. Said he:—

"The old Archbishop, sick, tired, harassed," pressing for action at Ottawa. Said he:easily became the victim of the orbinet, in whose name Mr. Chapleau applied to him His excessive confidence has compromised a cause which could then have been safe-

ing them.

The reference to Mr. Chapleau was based upon the assumption, denied by the Archibishop, that there had been a political agreement with that statesman. But while his Grace resented the inputation cast upon his integrity still more forwards all points. integrity, still more fervently did he repudiate the insinuation that sentility had overtaken him. In an ably written letter he complained bitterly of Mr. Tarte's cruel injustice to him, and declared that while age

had certainly crept upon him his efforts were still directed towards the promotion of the welfare of his people. A very unfortu-nate episode was Mr. Tarte's collision with Mgr. Tache. Resulting, of course, from Mr. Greenway's legislation, it was nevertheless the direct outcome of a keen desire

The more recent history of the case is familiar to us all. Two years ago Mr. Laurier promised that if it should be found that the Manitoba law interfered in any Mr. Onimet is reported to have said in ority he would personally plead with his Russell that the Liberals were exhibiting to Western friend for the ratification of the Manitoba government would see to it that Mr. Greenway is altogether Mrs. Calbick, wife of provincial constable the separate schools were re-established. Thus we have the Greenway wing of the party threatening the peace of the Pominion of the views of the Tarte wing should prevail; while the Tarte wing is prepared to destroy the peace of the country if the Greenway wing is not forced to accept what Mr Laurier, who is well able to plead with declines or neglects to ask it to do. Mr. Parte attributes the entire trouble not to Mr. Greenway, who began it, in violation of the pledge, which Mr. Ewart, another L beral, says he gave to Archbishop Tache, but to the Orangemen of Ontario, who have not even votes in Manitoba. In his Montreal speech he declared that the disturbers of e Dominion were these same Orangists. I oppose Sir Mackenzie Bowell because he is an Orangeman. No peace is possible in the country if the rights of all are not equal. Orangemen seek to destroy the peace by attacking Catholicism. They wish Proestantism to rule in the country : it is what we do not wish." L'E ecteur, Mr. Pacaud's paper, seconds Mr. Tarte's assaults upon the Orange order. It has discovered that two hundred thousand armed Orangemen will pounce down upon Quebec, upless in

Should should be shown and proceeded slowly at the mountains this spring. This will obviate any danger of heavy spring floods this engineer began running at the rate of thirty miles an hour. About 28 miles from the capital and midway between Temamatla and Tenago there is a steep down grade. On one side of the track the blasted rock forms high wall, on the other is a steep descent. At a point where the descent reaches down The trains usually round it at half speed, but for a reason not yet ascertained the engineer of the pilgrims' train tried to take without slowing down. Either the rails spread or the ergine jumped the track.
The engine and tender broke loose from the paches and rolled down the embankment. The coaches ran off about fifty yards further on. The rear coaches crashed down against he engine and tender, and the rest went to pieces at the foot of the embankment near

Five coaches were smashed so as to be tle more than piles of splintered boards and beams and twisted iron About twenty passengers were able to extricate themselves without severe injuries. and they began rescuing those who were pinned under the wreck. Four women were found with their arms crushed and immovable under the beams. They lay near the engine, and were screaming for flames. After all efforts to clear them had proved they were torn loose, one of them losing her arm from the shoulder, another her arm from the elbow, and each of the other two having both arms crushed and legs terribly mangled. Three of the four will die. Three children of one family were found dead together under an upeet car truck. Their mother lay near by with her skull crushed and one leg gone. The father escaped with only a broken shoulder, alhough he was on the same seat with the three children who were killed. Fragments of arms and legs were strewn throughout the wreckage and several of the bodies were so mutilated that no attempt to identify them will be made. When the doctors arrived on the wrecking train they found sixty pilgrims now the mercantile and hotel man has more near the wreck and five who had not yet been taken out, because there was no way of out-ting them loose. TORONTO'S FIRE.

Many Business Blocks Burned to the Ground Involving Over a Million Dollars Loss.

TORONTO, March 4 .- Agent Leman, who

is connected with one of the buildings, stated last night that he had no doubt that the big fire of yesterday was caused by incendiarism and expressed the opinion that the agitation against the departmental store was directly connected therewith. His statement is that Farley, the night watchman of Simpson's, came up through the

men over the signatures of Keuter and Dalziel. He gives as an instance a Reuter's
dispatch under date of January 26, which
all the time rehearing the history of the
vious manhole out of the basement to the sidewalk level alongside the main entrance door to Queen street; that looking across the of 1894. Sir William says that the revenue walk level alongside the main entrance door road he saw the Homes' protective man going his rounds making his ring at Sutcliffe's door opposite; that the Homes' man came over to speak to Farley. While the two were chatting they heard a crash of window glass; that their attention was called to this; that they ran and jumped over the Krox church fence, and went in the direction of the noise. Opening into the church-yard were two windows from the packing room in Simpson's basement. Here they saw the fire. They immediately returned and descended the trap hole on Queen street, and attempted to put out the fire by means of a hose there. It is believed that the incendiary went into the churchyard, broke the windows, and threw some combustible or bomb into the straw in the packing room, and in that way caused the conflagratio In other words the building was deliberately fired, and the agitation against the depart-mental stores had something to do with it. The furnace room was a separate vault under the sidewalk, and separated from the main building by a thick wall and heavy door.

It is to-day intact and not even scorched. The loss by the disaster is fully as great as either of the two previous visital The fire originated in the heart of the buel ness section of the city, starting at 12:40 yesterday morning in Robert Simpson's building on the southwest corner of Yonge and Queen streets, an immense seven-story structure, completed only six months ago at a cost of \$150,000. A general alarm was given, and the whole brigade was on the scene before I o'clock. The only steam fire engine in the city was brought into action. and although the water pressure was fairly good the firemen were unable to throw a stream to the upper stories. The front wall stream to the upper stories. The front wall fell at 1 o'clock and 20 minutes later the whole building collapsed, sending the fire, sparks and oinders flying in all directions. In the meantime the fire had c ossed Queen street and the clothing store of Philip Jamie- the commercial treaties. But why then, street and the clocking store of Philip Jamieson, on Yonge street, was quickly destroyed with its immense stock. The adjoining dry goods house of Joseph Sutcliffe & Sons, with an annex running through to Queen street, was completely gutted and the stock a total loss. George Me-Pherson's boot and shoe store was badly gutted. South of Simpson's the large jewelry store of John Wanless was damaged considerably. The fire next attacked the Henderson block on the corner of Queen street, occupied by James Bonner, furalshing, and Henderson block on the corner of Queen street, occupied by James Bonner, furalshing, and Henderson block on the corner of Queen street, occupied by James Bonner, furalshing, and Henderson block on the corner of Queen street, occupied by James Bonner, furalshing, and Henderson block on the corner of Queen street, occupied by James Bonner, furalshing, and Henderson block on the corner of Queen street, occupied by James Bonner, furalshing and Henderson block on the corner of Queen street, occupied by James Bonner, furalshing and Henderson block on the corner of Queen street, henderson block on the corner of Queen street,

street, occupied by James Bonner, furnishings, and Mischell Bahar allikers belt stocks being completely rained. The root of C. F. Anams & Co.'s store, home furnishings, was burned through and the stock of furniture, carpets, etc., was much damaged by water. The fiames leaped across Queen street and the Imperial bank building was soon ablaze. The lower flat, occupied by the Imperial bank as a branch, was flooded. The remainder of the building, occupied by Brown & Co. as a furniture and carpet warehouse, is a total loss. The two stores to the south, and occupied by James Mine & Co., hardware, and C. M. Henderson, auctioneer, lost everything. South of these were Dunfield & Co., general furnishings, and the Tremont hotel, both of which were badly gutted. The fire found its way to the Knights of Pythias hall on Victoria street, where its progress was finally arrested. The Knights lost most of their furnishings and regalia.

A golden opportunity for trade development presents itself for the consideration of the Canadian people. Shortly before Sir John Thompson's death he and Hon. Cecil Rhodes, premier of Cape Colony, had a conference in London, at which the question of closer trade relations was discussed. Some time before then an offer had been made to the Cape government by Canada for the esnt of direct steamship service between the Dominion and Cape Colony. In talking over the matter with Sir John Thompson, Mr. Rhodes took the ground that there would be no need for subsidizing a steamship line. He proposed that Canada and the Cape should each remove and the Cape should each remove tariff barriers to the products of each other; in other words, that there should be free trade between the two colonies. With the establishment of a policy of this kind and the tremendous increase in trade that must follow, a direct line of shear a would be the result without sither

CAPITAL NOTES.

Case Resumed by Dalton McCarthy.

Pedigree Stock-Undermanning of Shins.

From Our Own Correspondents OTTAWA, March 5 .- For four hours today Dalton McCarthy endeavored to show that government ought not to take steps towards redressing the grievances of the Roman Catholic minority of Manitoba. Mr. McCarthy admitted that they had grievances but that it would be bad policy for the ministry to do anything in the direction of establishing special schools in Manitoba. largely attended by the general public, much interest centering in the proceedings. At the outset, Mr. McCarthy said, while

here as the representative of the Manitoba government, he did not wish it to be anderstood that that government recognized by his presence the jurisdiction of the privy council and the judicial powers that they might exercise. Mr. Ewart had the right to appear here, but it must be remem-bered he did not represent the Catholics in general. He only represented a portion of the Catholic minority. No poll had been taken to ascertain the wishes of the Catho lics as a whole. A portion of the history which Mr. Ewart had given had no bearing on the case. The Manitoba act must be interpreted by itself independently of what had happened between the settlers and William MacDougall and others. Neverthe bill of rights submitted by the Manitoba settlers to the government envoys does not contain any reference whatever to separate schools. There was, however, a cally to Mr. John O'Donohue's statements reference to education. Again, in the list In giving them to the council Mr. O'Dono of rights submitted to Sir Donald Smith by hue had forgotten to produce his credentials the Council of Forty," and sent to Ob. Mr. Ewart would supply the omission and

cial committee, in reply to a question of Hon. Mr. Curran, Mr. McCarthy admitted that the Catholic minority had a grievance. Whether the governmen interfered or de-clined to interfere the result would be to displease one set of persons in the country or the other. Thus it was purely a political question. Regarding the statement that the pledge of separate schools was renewed to the French Capholios of Manitoba at the abolition of the provincial senate, Mr. Mo-Carthy argued that there had been no in the then Manitoba government to bind subsequent legislatures in that respect. Further, he was instructed by Attorney General Sifton that the alleged bargain between Mr. Greenway and the late Archiblahop had been repeatedly denied. He was also authorized to say that Joseph Martin had no authority to make the promises he was declared to have made at St. Francois Xavier in 1888 in the name of the of 1890, which on July 30, 1892, was de-Liberal party of which he was a member.

Coming to the question of the petition of the minority, he would remind the Council the minority, he would remind the Council that while the legislature of Manitobamight refuse this session to pass remedial legislation, next session it might change its mind. Meantime the authority to pass remedial remedial legislation is now being argued legislation would also be best within the legislation is now being argued before the Privy Council and the act of 1800 which the attaches of 18

Premier Bowell asked whether applying that argument to Ontario Mr. McCarthy would undertake to say that anyone by re-fusing to sanction or sign a petition for the abolition of separate schools would thereby be declaring in favor of the separate scho

Later on Mr. Ives remarked that he thought the question was this: The Catholics of Manitoba claim the rights to separate schools, which rights had been taken away, made famous during the troublous times immediately following the assassination of

system. Disallowance would be less humilitating than what was proposed. In this case the council was asked to take the first step to secure the passage by the federal parliament of a purely local law, as absolute and irrevocable as both the legislature and parliament itself.

Sir Mackenzie Bowell—That is, this parisment cannot repeal or amend its own acts.
Mr. McCarthy—No, not acts passed under this section (subsection 3 sec 22, Mani-toba act.) Could anything be imagined more tobe act.) Could anything be imagined more calculated to create disturbance than the passage of a law here at Otawa to interfere with education in Manitoba? Let this council not forget that Manitoba was driven once to the verge of rebellion by the disallowance of her railway policy, which Sir John Macdonald subsequently had to abandon. To accede to the request of the applicants would be to take the first step in plicants would be to take the first step in oresting a difficulty and danger that not the youngest member of the council would probably live to see extinguished. Why was it sought to be raised? Because about 10,000 establishing special schools in Manitoba.

This meeting of the Privy Council was again in Manitoba which 100,000 intelligent. people sought to abolish to day. Mr. McCarthy concluded with a reference to personal matters. He accused Mr. Ewart of unmanliness when in the course of his various addresses he spoke of "McCar thy and his Protestant Protective Association." Now, he never had had anything to do with the Protestant Protective Association. He belonged to the Orange order, of which he believed the Premier was still a distinguished Orangeman.

Sir Mackenzie Bowell—I hope so, and if you belonged to it you would better appreciate its principles and have a more liberal conception of its objects and teachings. Mr. Ewart, in reply, first dealt with the personal matter introduced by Mr. McCar-

thy. He accepted his learned friend's disclaimer of any connection with the Protestant Protective Association. He had not intended to imply that he was connected tawa, no reference appeared as to separate schools.

Dealing with the judgment of the judi-Ottawa. Dealing with Mr. McCarthy's appeal to the council not to exercise the power o remedy. Mr. Ewart said such a plea was in contravention of the elementary prin-diples of law. For twenty, five years Mr McCarthy, M.P., had been practising before the courts in which the maxim was that there was no grievance without a remedy. He quoted a speech of Mr. McCarthy in the Commons in March, 1889, in which he con-tended strongly for federal interference

with the Jesuit estates act passed by Quebec Mr. Ewart will finish to morrow. At to day's meeting of the cabinet, held in the council chamber after the public pro-ceedings in the railway committee room had was the last day upon which the measure could have been disallowed. Experiences of the Father of the Armenians and Other Refugees.

LONDON, March 5 .- A correspondent sent to Armenia by the Associated Press with instructions to thoroughly investigate the stories told of the Turkish atrocities in that country, under date of Tiflis, Russia, January 25, forwards the following interview with the father of all the Armenians, Mgr. Khirmiram. Mgr. Khirmiran's home is at Etzchmiadzin, in the Ararat region of Russia, within a short distance of the Turkish frontier. In an outer room of the house the correspondent met a monk in a black habit, and at the further end of the room men were in attendance. Mgr. Khirmiran talked fluently and elequently of the wronge

PARIS, March 5.—Paul de Roulde has written a circular letter to his friends in the witness of all kinds of Turkish oppression. In fact, about fifty years of my life have been passed in connection with the perse-cutions in Armenia. Twenty or thirty years ago the Armenians were still very low and narrow, and did not understand cause of all the calamities which befell them. They thought their troubles were sent by heaven as a punishment of their sins. Such is always the belief of the people deprived of education and the printing press. But later, when they began to think and to understand the wicked acts of their oppressors, there came a change and they saw clearly the real cause of their troubles.

46 Among the horrible cruelties perpetrated on the Armenians during the massacre I will relate the following fact, proving the ferocity of the Turkish troops and their commander Zeki Pasha: the Armenians had surrendered, 150 of them including priests, were thrown into a large ditch alive, despite the fact that they were not wounded. Earth was then heaped on them and some soldiers were sent to watch them until they had perished. After this the massacre continued. Many people old and young, were killed, and many women and young girls were sent by the soldiers to Moosh. The bodies of the Armenians who were killed in large numbers together were buried in common graves, but the bodies of those who were killed in isolated places were left unburied. The Armenians who were not killed fled. Most of them came to Russia. Some of them are now in Tiflis. Some came to Etzohmiadin and related to me the sufferings that they had endured. Many Armenians are confined in prisons for 'political matters.' The exact number of the than 2,000. Forty or fifty clergymen are among the number, priests, bishops and archimadrates. They are imprisoned for so-called 'political offences.'

The maximum number to one of these 'hearths' is eighty ber to one of these 'hearths' is eighty persons. Taking twenty as a modest average, the number of inhabitants in the district amounted to more than 70,000 souls. From the information brought to me, I believe that the Kurdish and Turkish troops have burned or destroyed a number of cities or villages, and I estimate that the number of men, women and children killed in the Sassoun district amounts to 11,000"

The correspondent also interviewed says

The correspondent also interviewed several Armenian refugees at Tiflis. The storsettlement in connection with the marriage of my sister to the Count de Castellane is false. Not only has there been no marairge settlement, but such a thing was never discussed or even mentioned by any member of either of the families. His main topic was the Victoria, Saanich and New Westminster railway scheme, of which he was a years ago an ardent promoter announced this as the firs plank in the platform upon which he saked to be elected, and dwelt upon the advantage to Victoria which would result from the proposed rail and ferry communi-

cation with the mainland being established He thought this deserved more attention than the British Pacific scheme. Mr. Alex. Wilson was called up when Hon. Mr. de Cosmos had concluded, and he warmly eulogised that hon, gentleman for his efforts on behalf of the city of Victoria. He reminded the meeting specially of Mr. de Cosmos' visit to England as a delegate in connection with the practical refusal of the Liberal government of the Dominion to carry out the terms of the treaty under which British Columbia entered the confederation. He thought it would be well if those who have represented the city

during the past eight years (great applause) would tell what they have done. He complained that the opposition of the C.P.N. Co. and the C.P.R. had killed the Victoria, Saanich & New Westminster scheme. Mr. Wm. Evans here came forward with a question to Hon. Mr. de Cosmos, whom he asked, "Are you in favor of the British Pacific, or are you not?"

Hon. Mr. de Cosmos answered that he certainly hoped the British Pacific would be successful, but he pointed out the great advantage that would be derived from his own scheme, which would bring Westminster within two hours and a half of the post

Mr. Evans (retiring)-And that's your latform! (Great laughter.) Mr. John Grant was next called for, and the people refused to be satisfied until amidst a tumult of applause he started for the platform. He said he had not come up to make a speech, but he simply wanted to know whether or not Hon. Mr. de Cosmos was for or against the present Dominion

Hon. Amor de Cosmos said his answer to that question would be, that every good citizen supports the Dominion government. (Great applause.) He certainly was not a supporter of the "Liberal" or "Grit" ALD. HALL in seconding this said he did officiated at the service, which was full so from what he had seen himself of Bell's conduct.

David Murray and John Fibbs were reported by the Old Men's Home caretaker to have absented themselves without leave. They left on Saturday and had not returned by Sunday night.

The appeal case of Lashbrook & Kingsley v. Sexsmith & Carscallen came before the men before the second men decided to inform the government.

had not the assistance of any other members from British Columbia, and it is not sur-prising that two members out of a house of 215 failed to accomplish what they desired with the present or with any other government. (Hear, hear.) The majority of the members of that committee declared the scheme not to be of sufficient importance to receive the support asked for, because they said that Victoria already has rapid direct communication with the main and, and they could not be got to see that the saving of an hour or an hour and a half would be a matter of such importance as it

Though the scheme so consistently advocated by Hon. Mr. de Cosmos is a good one, the British Pacific proposition new comprising such general extention. P. R. One of the speakers to-night—he thought it was Mr. Marchant, a very fluent gentlemen, who always has lots to saylaughter), had repeated the assertion often heard that the present government is under the control of the C. P. R. He wished to declare, however, that the C. P. R. is not the master of the Dominion government (hear, hear), and that there never has been a cabinet more thoroughly independent of that corporation than is the present one. In support of the statement

he instanced the circumstances connected with the application made last session for assistance to the British Columbia Southern railway, intended to run through the Crow's Nest pass and to bring coal and coke into the mining regions of Kootenay, at such the price of rates that there would be \$6 or \$7 a ton \$15 at present. The C.P.R. opposed the schem as strongly as they could, using every effort to show that the road could not possibly be built because of the expense involved belittling the value of the coal. The fight was carried before the cabinet, and the late Sir John Thompson sent for him (Mr. Prior) and asked what offer the B. C. Southern party had made to the C.P.R. as to the terms upon which both could use the pass. When he stated the terms Sir John Tho son replied with emphasis that if the C.P.R. or would not come to an agreement within three months they might go to the mischief.

That certainly did not look as if the cabinet were at all dependent upon the C.P.R., especially when they knew that an election was coming on. (Hear, hear.) In conclusion he wished to say that should he be the choice of the Liberal-Conservative convention it would afford him much pleasure to

to calls, and stated that when the campaign starts in earnest he will take an early opportunity to lay before the public his views on the Liberal platform. As all no doubt knew, he had been chosen by the opposition—he would not say the Liberal—convention and he hoped to be elected as an opposition candidate. He had great an opposition candidate. AN INNOCENT ABROAD.

(From the News-Advertiser.)

Ornamented with a lithographed present-ment of his own features, Mr. Hewitt Bostock, of Victoria, has issued an address to the electors of Yale-Cariboo announcing that he has "decided to come forward as a candidate at the forthcoming elections in opposition to the present government."
He then proceeds to state his views on current political topics, and here he gives us a genuine surprise. Nearly every item in the programme which he sets out as, in his pinion, the best calculated to advance the interests of the country, is what the present government at Ottawa has for years been insisting on against the opposition of Mr. Lau-rier and Sir Richard Cartwright. On points where Mr. Bostock differs from the Conservative policy it is quite certain the majority of the electors of the Yale Cariboe district will also differ from him. Before referring to a few of the items in his programme we feel it incumbent upon us to protest against the unkind treatment to which Mr. Bostock has been subjected by the Liberal party in Victoria. "I was hungry for parliamentary honors and ye took me in," Mr. Bostock may truly declare and in a sense that will reflect little credit on his Grit foster parents in the Capital. While they rejected his wooing there, they desired to utilise his ambition and resources in the forlorn hope of securing a seat for a Liberal in the Interior constituency. We suppose Mr. Bastock, as a new man in country, must not complain at compelled to obey the behasts

the Liberal club in Victoria.

Instead of that they have left poor young Mr. Bostock to his own resources, and truly he has fallen ameng the Philistines. In nearly every paragraph in his address he manages to make a proposition which runs counter to the expressed policy of the Liberal leaders. Possibly Mr. Laurier may be able to smooth matters over by making Mr. Bostock's platform all contingent on "M." But if Sir Richard Cartwright should get hold of it, we don't know what will happen! But if Sir Richard Carowright happen! held of it, we don't know what will happen! Mr. Bostock actually suggests that "the country should be opened up" by "increased facilities for communication and transportation." Here our interesting and well meaning young friend has got slightly mixed up between the respective functions of the Dominion and Provincial governments. But his motives are benevolent and we trust that Senator Molnnes will not write him an angry letter on this little unintentional slip. the had figured out that with wood not started unanimously and the gathering important which he apparently mistored to the work at each outburst of the best flaished residences in Victoria.

MATE RENNIE, of the steamer Maude, who suddenly disappeared on Saturday morning, is positively known to have gone from here to Port Townsend. His reasons for doing so are not yet explained, but are surmised by those who know him. Rennie, it seems, broke a blood vessel in his head while on the coast a few months ago and was for a time out of his mind. He soon recovered, but is said to have complained a few days previous to Saturday of his head

SANITARY OFFICER CONLIN. with Aldermen Macmillan, Bragg, Partridge and Hall, City Clerk Dowler and several others, paid City Clerk Dowler and several others, paid a visit to the Darcey island lazarette yesterday, taking with them the quarterly supplies for the lepers there. They found the isolated colony in a fairly satisfactory condition, although some of the unfortunate coloniats were fast encoumbing to their terrible malady. One poor fellow informed the visitors that he did not expect to be living on the occasion of the next visit of the city officials. He is known as the "New York" Chinaman, and though once the biggest and burliest of the colonists is now probably the feeblest. Notwithstanding their affliction, the Chinamen are contented and have been prosperous so far as making good use of their property is concerned. Those who went out to the island yesterday enjoyed a delightful trip. The tug left the city about 10 a.m. and returned at four in the afternoon.

The attractive programme presented at the Victoria theatre last night at the concert on behalf of No. 2 company, Boys' Brigade was enjoyed by a large audience. The various numbers were well selected and had variety enough to suit everybody. The ladies' string orchestra, composed of Miss Bryton, the Misses Sehl, Misses Spring, Miss Styles and Miss Marboaf, opened the programme so pleasantly that an encore was all inslated upon. Mr and Mrs. Rowlands, always favorites, were heartily received.

THE MACDONALD CLUB,

The Younger Conservatives Organized Under the Name of the Grand Old Chieftain.

Hon. Dr. Montague to Be Invited to Deliver an Address Under Their Auspices.

The Macdonald Club of Victoria, "with the object of promoting the policy of Canadian Development with British connection

advocated by Sir John A. Macdonald," was well established by the younger Liberal-Conservatives last evening, at an enthusiastic meeting held in the Adelphi hall. The meeting hav-

ing been called to order, Mr. J. D. Taylor, on motion of Mr. D. R. Ker, took the shair, and briefly stated the views of the promoters of the club as to the purposes which it might well serve. He invited addresses from some of the prominent Liberal-Conservatives present by invitation, before the meeting should proceed to the particular

business of the evening.

Lieut. Col. Prior, M.P., was the first to be called upon by the meeting, and in response he delivered a highly interesting address, congratulatory of the young men for the interest they showed in the political affairs of their country in proposing to form an association of this kind; and pointing out the desirability of having frequent discussions of political questions so that all may vote intelligently according to conviction. He thought no better name could be found for the association than that pro-

Mr. H. Dallas Helmoken, M.P.P., followed, speaking to the young men as our themselves, and showing the advantage of organizing for work in the political on the football lowed, speaking to the young men as one of arena, where as on the football field a variety of talent is called for, and each man should find and occupy the place for which he is best adapted. He also considered that it came very gracefully from Victoria to thus ate to the memory of Sir John Macdonald

and also fittingly responded. He considered that the ready response to the call for signa-tures to the roll of the proposed young men's Liberal-Conservative associatio was a most gratifying indication of the solid strength of Conservatism, which he had not the least doubt would again carry the day.

Mr. Henry Lawson being then heartly
called for addressed a few words of advice to

taking.
Mr. H. E. A. Robertson moved and Mr. H. D. Helmoken, M. P. P., seconded the resolution formally establishing the club, and after that part of the constitution respecting the officers had been agreed upon, the following were unanimously elected: President, Mr. W. H. Ellis; vice-presidents, Messrs. A. E. MoPhillips, Herbert Cuthbert and Charles E. Jones; treasurer, Mr. S. D. Schultz; secretaries, J. D. Taylor and Ernest Brammer. A Negro's Victim. JACKSONVILLE, March 5.- Near Hawhorne yesterday evening Annie Jenkins, a sixteen year old white girl was assaulted by a negro and then roasted. The girl was returning home from a neighbor's and was walking on the railroad track. She discovered some ties on fire and attempted to extinguish them. While thus engaged a negro seized her and dragged her into the bushes. Afterward the brute held the girl over the burning ties until her clothing was in a blaze. He threw her into a maddy place near the track and escaped. The un-

Mere than one fortnight and not more than entity closed in April.

The city council have decided to appeal to the Supreme Court of Canada from the verdict of the Divisional court quashing the by law passed authorizing the city to estab-lish an electric light plant.

Lieut. Col. Peters is on record as saying

that the men of the B.C.B.G.A., as a co pany, did extremely well under inspection; the officers and men doing much better than last year. The company drilled for the first time in the open on Saturday; the ground was uneven and they were seriously handicapped. Lieut.-Col. Peters said that the officers for the new company had all een recommended, and with two companies at their full strength the inspection next autumn would be a capital one. Representative Liberals held a meeting in the Y.M C.A. rooms last night. Ralph Smith stated that he has been out in the field and had come to the conclusion that it would be best for the success of the cause for him to withdraw. So far as he could see the Wellington and Union miners would work against him as a Nanaimo miner. The farmers of the district, too, felt that they should have had mere to say in the matter.

Again, it was doubtful if sufficient funds could be raised to meet the needs of a candidate without personal funds. Taking all these facts into consideration, he had, after mature deliberation, decided to withdraw.

MADRID, March 4 .- In the Chamber of Deputies to-day Senor Osma questioned the ministry with regard to Americans arrested in Cuba. He then read a recent interview in Paris with Charles Cespedes. The Foreign Minister re-plied that he was officially informed that three Americans had been arrested in Havana and that the government supported the Governor-General of Cuba in upholding the protocol of 1887 between Spain and the United States, and in no wise would protect Americans conspiring against the Spanish executive in Cuba, where foreigners were subject to the law equally with Spaniards, the only difference being that for violations of the law the former must be tried in ordinary courts i stead of by courtmartial.

FINANCIAL AFFAIRS.

(From the Montreal Gazette.) The bank statement for January betokens

dull trade. There are many changes in the counts since the December return was of course, always a quiet one, perhaps more than any other in the year, and no undue significance should, for this reason, be given to the declining circulation and reduced volume of discounts, which, by the way, in-dicate that if trade is dull its foundations are stable. The note circulation declined by no less than \$3,458,300, or from \$32,375,600 \$28,917,300, and is now at the lowest oint touched in recent years; but it is wel to remember that in January of 1894 the cir ulation fell off \$3 847 560, that in January

significant fact, however, is that the volume and value of the every day business of the country can at present be carried on with four million dollars less currency than was required for the purpose two years ago, a reduction of 12 per cent., part of which is accounted for by the fall in prices, and part by a dimished trade movement. The bank circulation at January 31 for the last six years has been :

1890 ...\$30 879,960 1893 \$32,831,750 1891 31,662 100 1894 30,571,875 1892 32,705,409 1895 28,917,270 tion of \$1,210,000, due probably to the payment of indebtedness maturing. Dominion government deposits declined \$513,000, and those of provincial governments were increased \$1,332,000 by the payment of the federal half-yearly subsidies to the provinces. The foreign balances were drawn upon to the extent of about a million dollars, the amount due to sgents in Great Britain and the United States increasing \$83,000, and the amount due from these agents de-creasing \$996,000, and some of this decrease has, doubtless, been caused by the importation of gold, the amount of specie held by the banks being greater by \$448,000 than at the close of the year. The Duncan, March 4.—George Wake, now holding of Dominion notes is also larger by sheep ranching near this station, bids fair \$370,000. There was a reduction of \$1 678, less by \$2,081,000. On the other hand, loans on railway securities were enlarged \$175,000, and call loans \$295,000. The contraction of current or mercantile loans, while indicative of quiet trade, is also expressive of the ability of traders to keep their liabilities within the range of their business. Overdue debts were reduced \$18,000.

Comparing the condition of the bank accounts at the end of January in this and last year, a notable feature is the great increase in public deposits, which rose \$11,752,000 during that period, whereas in the preceding year they remained stationary.

752,000 during that period, whereas in the preceding year they remained stationary. The net foreign balances due the banks are also higher by \$7,000,000 on the twelve months, and the amount of specie and legal tenders held is greater by \$2,726 000 Mercantile loans have decreased by \$4,300,000, as compared with a decline of \$1,650,000 in the note circulation; but loans on railway securities have been enlarged \$1,800,000, and call loans \$4,000,000, these being apparently the chief vent offering for the surplus funds of the banks seeking employment.

Capes are quite as popular as coats, and the most elegant ones are made of velvet, trimmed beautifully with jet and fur and lined with handsome brocade, and are either very short or quite long. High medici collars are seen on coats and capes alike. The latest cloth jackets for winter wear have either shoulder capes or revers of fur, and Persian lamb, sable, mink and chinchilla are the kinds

most commonly used. The three-quarter length is an ideal made up, and all point to a slow movement in commercial circles, with a great accumulation of funds in the banks. plane the blocks to fit the slope of the trunk. They should be so placed as to rest against the wooden cleats across the top. As the table must always be lifted from the trunk whenever one wishes to use it, such clothing as will not be ire quently needed should be kept there. If the trunk is required for constant use, the table is out of the question, but a pretty chintz cover may be made for it and slipped over the trunk, according to a plan illustrated and described for The Household: Measure the top, cut the material to correspond and border it with a box plaited ruffle about three inches wide. Under this gather a deep flounce reaching to the floor and completely hiding the trunk. Sew strong tapes to the top of this flounce, underneath at the four corners, and insert small screw eyes in the trunk to tie them to. In this way the lid may be raised without removing the cover. The screw eyes will not mar the trunk and can be easily removed when packed for traveling.

To Boil or Not to Boil.

Boiling is a branch of culinary art that is understood by comparatively few cooks, although it is generally supposed to be the most simple form of cookery known. It is a fact in kitchens where the cook understands her business actual boiling as applied to meats very rarely occurs, excepting for a few minutes at a time, and then at the beginning of cooking. When these few minutes are over, the aim of the experienced cook is to keep meats that are to be boiled from boiling and to let them simmer until done, for as surely as the meat boils it will be spoiled. The New York Tribune says that the following is

Fresh meats, fresh poultry, fresh fish, Having the advantage of an elastic currency in Canada, the system which automatically adapts itself to the needs of trade, long, loose cloak is among the things.

Hor evening wear, or as a carriage trade, much boiling water as will cover them. Boil quickly three or four minutes in the case of meat, one minute in the case of fish. Then draw the kettle back, add all alike, should be plunged into as a little cold water to reduce the heat. and keep it covered, and let the contents simmer only until done. The quick boiling "sets" the surface of the meat. which keeps in the flavor and goodness, while the inner portion is gently cooked until done. This is all the "boiling" needed. When really boiled, fresh meatis tough and flavorless, so that to "boil" meat successfully it should not be boiled at all. That fresh meat should invariably be put into boiling water and salt meat into cold is another rule worth remembering. Salt should always be added to the water for fresh meats.

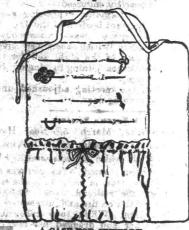

Cologne Made at Home.

Cologne is quite expensive when purchased outright. A better article may be made at home than that which is bought at the drug store, and with little trouble and expense. Here is a recipe for making it from Good Housekeeping: Thoroughly dissolve a fluid dram each of the oils of bergamot, orange and rosemary, with half a dram of neroli, 4 drops of the essence of lemon and a pint of rectified spirits. If this is subsequently distilled, it makes a perfect cologne, having been tightly stopped and kept two or three months.

Another cologne, to use as toilet water, is less expensive than the foregoing: Oil of bergamot, lavender and lemon, each 1 dram; oil of rose and jasmine, each 10 drops; essence of ambergris, 10 drops; spirits of wine, 1 pint. Mix and keep well corked.
