Miscellaneous.

The Road to Bliss. BY THE REV. FREDERICK SUTHERLAND.

"Come, Paul, go into the pulpit with me and read the Scriptures and pray for me and for your leader, play the organ and all that."

"When I was in San Francisco," continued Mr. Sutherland, "I had between \$1000 and \$2000 in the savings bank. Consolidated Virginia was then selling at 40. A particular friend of mine, knowing that I had money laid by, urged me to buy some Consolidated Virginia stock."

"I was a fearful miser and had ruined and wrecked its legions whose days had been one continuous struggle, and whose nights had been sleepless nights."

"I was a fearful miser and had ruined and wrecked its legions whose days had been one continuous struggle, and whose nights had been sleepless nights."

"I was a fearful miser and had ruined and wrecked its legions whose days had been one continuous struggle, and whose nights had been sleepless nights."

Vegetine.

Mr. Brown, professor of agriculture, at the Guelph Model Farm, Province of Ontario, has been making a variety of experiments, the results of which are summarized as follows in his annual report, and which may prove suggestive to our readers, even if they are not prepared to accept all the points suggested as conclusive.

1. A steady, frosty winter is better than an open one in feeding cattle.

2. A average two or three-year-old steer will eat his own weight of different materials, in two weeks.

3. Two or three-year-old cattle will eat one-third of a pound more prepared hay per day to their weight upon the same material as unprepared hay.

4. It is thirty per cent. more profitable to pre-mature and dispose of fattening cattle at two years old than to keep them up to three years.

5. There is no loss in feeding a cattle beast with a variety of material for the sake of the manure alone.

6. Farm-yard manure from well-fed cattle, three years old, is worth an average of \$3.30 per ton.

7. A three-year-old cattle beast, well fed, will give at least one ton of manure every month of winter.

8. No cattle beast, whatever will pay for the direct increase to its weight from the consumption of any kind or quantity of food.

9. On an average, it costs twelve cents for every additional pound of flesh added to the weight of a two or three-year-old fattening steer.

10. In this country the market value of store cattle can be increased thirty-six per cent. during six months of finishing by good feeding.

11. In order to secure a safe profit, no store cattle beast, well done, can be sold at less than 44 cents per pound (live weight).

12. In the fattening of wethers to finish as shearings, the Cotswold and Oxford Down grades, the Cotswold and the Southdown (grades) 100 pounds each (live weight).

13. Combining wool and flesh value, the Cotswold grades give the highest returns—as much as double that of the Cotswold grade, and thirty-five per cent. over that of the Leicester grade, also slightly in advance of the Oxford Down grade.

14. Fattening cattle on oats will not cost one-sixth less hay than when receiving corn or peas. On peas meal will drink one-third more water than those upon corn or oats. Clover lessens the consumption of roots.

15. Apparently about one-fifth of ground corn passes through the cattle undigested.

16. Peas meal (rough ground) gives twenty-one per cent. greater returns in fattening cattle than either corn or wheat.—American Cultivator.

What an Albany Man Said.

From the Detroit Free Press.

One of the lumber dealers in Michigan has for the past three years been supplying a dealer at Albany. For the first year everything went well, but at length the Albany man began to complain. He found shortages and quality in the lumber, and he demanded discounts thereon, and this spring it was impossible to please him. No matter how carefully lumber and shingles were culled and piled here, it was never to his liking. He would not go up to the standard. Two weeks ago a carload of 'star' shingles was sent him. The 'star' shingles beats anything made in the country, and they know it at Albany as well as in Michigan, but as soon as the car arrived the dealer replied that he really must protest. The shingles were hardly 'clear cuts,' and he could not unload the car until assured of a discount of twenty-five cents per thousand.

The Michigan dealer had suffered long, but he did not give in. He had inspected every bunch of shingles on that car, and he made up his mind to go to Albany and inspect the 'star' shingles. The dealer there had never seen him, and the Wolverine walked into his office as a would-be purchaser of some extra fine shingles.

"I've got exactly what you want," promptly replied the Albanian. "I've got a car load of Michigan 'stars' out here which lay over any shingles you ever saw."

"Every one of them?"

"No cuts in the centre of the bunches?"

"I'll eat every nail you find. I got them from a Michigan man who is as straight as the Ten Commandments, and he has never yet sent me a stick of second-class stuff. Come and see 'em."

The Wolverine quickly pulled out his business card and laid it on the desk. The dealer took it up, read the name, and set down on a stool with a queer feeling in his knees.

There was an awful silence as they stared at each other, and it was a full minute before the victim slowly extended his hand and hoarsely whispered:

"Did you ever see a man make such an infernal ass of himself? Shake!"

Vegetine.
