THE
FACULTY OF MEDICINE
OF THE
University of Bishop's College.

The 30th Annual session of this Faculty will commence on Monday, 1st October, 1900, and will be continued regularly until April, the usual Christmas vacation intervening.

The course leading to the degree of C.M., M.D., extends over four years, and consists of four sessions of six months each, and three Summer Sessions, of three months each, one only of which is compulsory; but the Faculty strongly recommends attendance upon the three summer courses, as fuller opportunities are afforded for practical clinical work. Students who require the Quebec license will be given an extended course in order to comply with the Quebec laws.

The Faculty of Medicine of Bishop's College aims at imparting a thoroughly practical medical education, and its facilities for doing so are in many respects unequalled in Canada. In addition to the regular course of didactic lectures, students have the advantage of extensive and varied hospital privileges.

The Montreal General Hospital, Royal Victoria, Western Hospital, Hotel Dieu Hospital, and Montreal Dispensary afford every opportunity to students of this College to receive clinical instruction in Medicine and Surgery. At the Women's Hospital, special facilities are provided for the practical study of Obstetrics.

The College building contains large lecture rooms, several smaller lecture rooms for Practical Chemistry, Practical Physiology, Histology, Bacteriology, etc., and large, airy, well-lighted dissecting rooms at the top of the building, isolated from the rest of the class-rooms. Under the new Anatomy Act of the Province of Quebec, ample material for dissection is provided at moderate rates.

The Histological, Physiological and Bacteriological Laboratories are supplied with a complete outfit of Microscopes, Microtomes and other modern apparatus. The Pharmacological Laboratory, besides possessing a very complete cabinet of crude drugs and their preparations and alkaloids, has all the necessary appliances and means for the making of B. P. preparations and every facility for teaching practical

dispensing. Recently the Faculty has expended a large sum for apparatus in several departments, to facilitate practical teaching.

The Faculty is recognized by the Royal College of Surgeons, England, and the Royal College of Physicians, London. Class tickets for the various courses are accepted by these Colleges as qualifying candidates for examination. The Royal College of Physicians of Edinburgh, the Royal College of Surgeons of Edinburgh, the Faculty of Physicians and Surgeons of Glasgow, also accept the Diploma of this University, and exempt its holder from being examined on the subjects of the Primary branches and Matriculation. Such candidates are therefore only required to pass in the subjects of the Final Examinations, including Hygiene. The Scottish colleges acting conjointly grant only one examination, and therefore confer a triple qualification. The University of London, Eng., also recognizes the diploma of Bishop's Collège.

The Degree of Medicine and Surgery of this University, being accepted by the licensing bodies of Great Britain, its possessor is entitled to the same exemptions as are allowed to all other holders of recognized colonial degrees. The College of Physicians and Surgeons of Quebec accepts the degree without further examination, provided the holder of such degree has, previous to beginning the study of Medicine, passed the preliminary examination exacted by that Board.

The class tickets for the various courses are accepted as qualifying for the examination of the College of Physicians and Surgeons of Ontario, and the Matriculation examination of this Faculty is recognized by the General Medical Council of Great Britain and Ireland provided that all the subjects are passed at the same time.

The Medical degrees of this University are—Master of Surgery (C.M.) and Doctor in Medicine (M.D.). The degree of Master of Surgery is not conferred upon any person who does not at the same time obtain the degree of Doctor in Medicine.

The Dental College of the Province of Quebec is now affiliated to the University of Bishop's Collège, and the medical lectures of the Dental course are given by Bishop's Medical Faculty. The degree granted is that of Doctor of Dental Surgery (D.D.S.) (for announcement see page 60.)

Convocation for the conferring of Medical and Dental degrees is held in Montreal immediately after the close of the session.

HOSPITAL PRACTICE,

Montreal being the most populous city in the Dominion of Canada, as well as the commercial metropolis, affords in its large and well equipped hospitals, greater opportunities to the medical student for acquiring practical experience with disease both medical and surgical than can be obtained elsewhere in the Dominion. Unfortunately, the larger the city the greater the extremes of wealth and poverty, and Montreal forms no exception to this rule. This condition of things adds to the opportunity of the medical student, for the wards of our numerous hospitals are frequently overcrowded with the sick and suffering, affording examples to the teacher and student of a great variety of diseases. Being a large manufacturing centre, and at the head of navigation, the greatest variety of accidents are daily presented to the student for illustration and instruction, and students are most urgently requested to spend as much time as possible in the hospital wards and in the out-door rooms of the hospitals and dispensaries, to familiarize themselves with the work for which they are preparing. The best students are those who spend as much time as is consistent with proper attention to their other work in reporting and dressing in hospital wards.

The Western Hospital is now a general one, receiving patients of both sexes. It is attended by a staff of fourteen physicians and surgeons, most of whom are members of this Faculty.

In addition to general medical and surgical cases of this hospital in the department for diseases of women, the various gynæcological operations are frequently performed. The large number of abdominal sections which are performed in this institution afford abundant opportunities for witnessing the recent advances in abdominal surgery. Members of the staff are in attendance daily at 12 noon, when clinics are held. These afford special advantages to students for studying in detail the essential clinical elements of the cases in the medical, surgical and gynæcological wards.

In the departments for diseases of the eye, ear, nose and throat, and of the skin, ample opportunities are afforded for pursuing the study of these specialties. The large number of patients enables the physicians in attendance to impart instruction, by selecting cases for demonstration, and presenting points for comparison and contrast. Practice can be obtained in auscultation and other means of Physical Diagnosis.

The positions of resident House Surgeons of the Western Hospital are open to graduates of this College.

The dispensing department is in charge of a licensed pharmacist, and students are permitted to dispense under his supervision. Many useful and practical hints in the compounding of drugs, and a knowledge of their doses are thus acquired.

The Women's Hospital is entirely under the control of Bishop's College, and is directly under the superintendence of the Professor of Obstetrics. It has recently been removed to much larger buildings, completely remodelled, all the latest Sanitary and Obstetrical appliances introduced and the number of beds more than doubled, admitting a much greater number of patients. The operating room is of ample capacity to admit the attendance of final students, who are always called to important operations. To each ordinary case only two students are called, one of whom confines the patient, the other assisting in the work. An additional practical advantage is that each student resides in the hospital for a varying period, that he may the more thoroughly become familiar with the treatment of convalescing patients.

The position of acting Resident Assistant Accoucheur in this Department is open to graduates of Bishop's College, for the period of one year.

The Montreal General Hospital (200 beds) is situated within a few minutes walk of the College, and is visited daily by two physicians and two surgeons, besides two ophthalmic surgeons, two gynæcologists and two laryngologists. It has at great expense been thoroughly renovated and modernized, and its pathological department and clinical laboratory are fully supplied with the most recent equipments for teaching purposes. This is essentially a hospital for acute diseases, as evidenced by the large number of patients treated annually—2,342 Medical and Surgical last year, besides 40,000 consultations in the out-door department. It affords equal advantages to students of all medical colleges for obtaining a practical knowledge in every department of Medicine and Surgery. A ward used as a children's department will also greatly assist students in the study of diseases of children. A special department for the treatment of the diseases of the eye and ear, under the care of the Ophthalmic Surgeons, affords students ample facilities for studying this class of affections. Clinical instruction is given daily, and all operations performed in the presence of the students. Regular Clinical Lectures on Clinical Surgery and Clinical Medicine, open to

students of this University, are delivered during the winter. In addition, clinics are given every Monday and Thursday by Dr. F. W. Campbell, Dean of the Medical Faculty of Bishop's College. Annual fee, \$5.00 ; perpetual, \$15.00.

The Royal Victoria Hospital. This hospital is situated on Pine Avenue, corner of University Street. The erection of this magnificent pile of buildings, in commemoration of the jubilee year of the reign of Her Majesty Queen Victoria, was rendered possible through the great liberality of two of the city's greatest benefactors, Lord Strathcona and Mount Royal and Lord Mount Stephen, each of whom gave half a million dollars and have more recently added an endowment which will afford revenue for the running expenses of the Hospital ; the city contributed a large piece of ground for the use of the hospital. The hospital receives all classes of medical and surgical cases, and has special wards for Gynæcological and Ophthalmic Diseases. It can accommodate about 250 patients, and extends its charity to the afflicted from all parts of the Dominion as freely as to those from the city. There are three main buildings, a central administration block and two large wings, one for surgical, the other for medical cases ; each has three large wards, 126 ft. by 26 ft. 6 in. besides several smaller ones ; medical and surgical theatres capable of seating 250 students. There are laboratories for Clinical and Pathological Chemistry, Pathological and Bacteriological investigations and a mortuary. Students from all colleges are admitted on equal terms.

Annual fee, \$5.00. Perpetual tickets are obtained when the third annual fee is paid. Tickets are given at the hospital.

Hotel Dieu Hospital (250 beds). The oldest and largest hospital in the city, is situated within a short distance of Bishop's College. Attention is directed to the large number of Medical and Surgical cases to be seen in this institution. Besides many cases of acute illness this hospital affords accommodation to such chronic cases as require hospital care. Clinical lectures are regularly delivered. Fees for hospital attendance, \$4.00 yearly. Clinical lectures \$8.00 each Medical and Surgical course.

The Montreal Dispensary, with a staff of six attending physicians and an Oculist, Gynæcologist, Laryngologist and Dermatologist has an average daily attendance of about fifty patients. Being in close proximity to the manufacturing districts of the city, it has a large number of minor accidents brought to it for attention, thus giving an excellent oppor-

tunity for the practice of minor surgery—such as dressing wounds, bandaging, strapping, application of splints, etc. The student will have every advantage afforded him for acquiring practical knowledge in diagnosis and methods of treatment. A very large number of cases of disease of the eye, ear and throat are treated in this institution, and students will be practically taught the use of the ophthalmoscope, laryngoscope, etc.

MATRICULATION.

According to the Medical Act of 1879, in order to register a diploma in Medicine in the Province of Quebec, and to obtain a license, it is necessary that all students must pass a preliminary examination before the examiners appointed by the Board, or produce a certificate of having passed an equivalent preliminary examination before a College or Licensing Board, recognized by the "Provincial Medical Board," elsewhere than in the Province of Quebec.

The Quebec Medical Act of 1896 enacts as follows:—

I. Every medical student must pursue his professional studies during a period of not less than four years, without interruption, from the time of his having passed the preliminary examination. If there has been any interruption, he must make up the lost time.

II. Of the above four years, four six months sessions at least, must be passed in attendance upon lectures at a university, college or incorporated school of Medicine recognized by the Board. A certificate of study from a licensed physician for the period intervening between the courses which the student has attended will also be required. This certificate shall not be called for, if the candidate has followed nine months' courses.

Students who intend practising in other Provinces of the Dominion should pass the Matriculation examination accepted by the several registering boards of these Provinces.

Students intending to practise in Ontario are required by the Medical Council of that Province to pass their preliminary examination before commencing the study of Medicine. Those having the degree of B.A. and Matriculants of any University, and of most of the Medical Colleges and Boards in Her Majesty's Dominions, and not requiring the license of this Province, are exempt from this examination in this University. The B.A. degree is now accepted by the College of Physicians and Surgeons of Quebec. Students who do not desire the license of either Province must pass the Matricu-

lation examination of this University, or present a certificate of an equivalent examination before a body authorized for that purpose, if not otherwise qualified as above indicated.

Attention is particularly directed to the importance of passing the Matriculation examination in the spring, as four full years of professional study are required from the date of Matriculation before a provincial license is granted either in Ontario or Quebec.

PRELIMINARY EXAMINATION OF THIS UNIVERSITY.

Examiners for Canada :

A. N. SHEWAN, M.A. REV. G. AROTT SMITH.
REV. JOHN KER, D.D.

Examiner for West Indies :

W. MORRISON, M.A., Kingston, Jamaica.

Students who do not desire the license of either the Quebec or Ontario College of Physicians and Surgeons, and not otherwise qualified, will be examined by this University on or about 15th October, 1900, and in March, 1901, on the following subjects, after enregistration. Fee for examination, \$5.00. Enregistration, \$8.00.

COMPULSORY SUBJECTS.

(a) English language, including Grammar and Composition.

(b) Latin, including Grammar, Translation from Caesar de Bello Gallico, Books I. and II., or Virgil's *Aeneid* Book I., and translation of easy passages not taken from such authors.

(c) Mathematics comprising (a) Arithmetic ; (b) Algebra, as far as Simple Equations, inclusive ; (c) Geometry, the subject matter of Euclid, Books I., II. and III., with easy deductions.

(d) Botany as in Gray's School and Field Book of Botany.

(e) One of the following Optional Subjects :—(1) Greek, (2) French, (3) German, (4) Italian, (5) any other Modern Language, (6) Logic.

The General Medical Council of Great Britain will only enregister students whose certificates show that all the above subjects, Botany excepted, have been passed at the same time. Matriculants must obtain 50% of total marks for a pass.

COLLEGE OF PHYSICIANS AND SURGEONS
OF THE PROVINCE OF QUEBEC.

PROGRAMME OF PRELIMINARY EXAMINATION FOR 1900.

LATIN.—The Commentaries of Cæsar, first five books. The Æneid of Virgil. bks. I. and II.—The Odes of Horace, bk. I. A sound knowledge of the Grammar will be required.

FRENCH.—Candidates whose mother-tongue is French will be required to have a critical knowledge of Molière's "Bourgeois Gentilhomme," of Fénelon's "Telemachus," and of the first three books of Lafontaine's fables. They will also be required to answer questions of grammar, of etymology and of analysis.

English-speaking candidates must translate into English, passages from "Telemachus" and answer questions of French grammar. Also, they will be required to translate into French short English sentences.

ENGLISH.—Candidates whose mother-tongue is English will be required to have a critical knowledge of one of Shakespeare's plays—including also grammar, etymology and analysis.

French-speaking candidates must translate into French, passages from the first eight books of Washington Irving's "Life of Columbus," and answer questions of English grammar. They will also be required to translate into English short sentences from "Telemachus."

BELLES-LETTRES.—Principles of the subject and of Rhetoric; also History of the Literature of the age of Pericles in Greece, of Augustus in Rome, and of English and French literature of the 17th, 18th and 19th centuries.

HISTORY.—A general knowledge of the History of Greece and of Rome, and a more particular knowledge of British, French and Canadian History.

GEOGRAPHY.—A general knowledge of the subject, and more especially of England, France and North America.

ARITHMETIC.—Must include vulgar and decimal fractions, simple and compound proportion, interest, percentage and square root.

ALGEBRA.—Must include fractions and simultaneous equations of the first degree.

GEOMETRY.—The first three books of Euclid and principal propositions of the Sixth. Also the measurement of the lines, surfaces and volumes of the regular geometrical figures, without proofs.

CHEMISTRY.—Elementary principles as in Remsen's "Elements of Chemistry."

BOTANY.—Elements of the subject as in Gray's "How Plants Grow."

PHYSICS.—Elements, as in Peck's translation of "Ganot's Physics."

PHILOSOPHY.—Logic, as in Jevon's Logic, and Intellectual and Moral Philosophy as in Professor Murray's Handbooks.

N. B.—Candidates must produce certificate of good and moral character.

The examinations will be held in September, 1900, at Quebec, and in July, 1901, at Montreal. Applications to be made to one of the secretaries of the College of Physicians and Surgeons at Montreal or Quebec, either of whom will furnish schedule giving text books, programme of questions and percentage of marks to be obtained, with exact date of examination.

Examination fee, \$20. Should the candidate be unsuccessful, one-half of the fee will be returned.

ENREGISTRATION, ETC.

At the commencement of every session students are required to enroll their names and residences in the register of the Medical Faculty. The Registration Books shall be closed on the first day of December in each year.

An *annus medicus*, or medical session, is constituted by at least two full courses of 120 lectures each, or by one such course, and two courses of 60 lectures each, with previous enregistration.

Students of this University who do not reside in the city, on application to the Registrar, will be furnished with certificates, which, through the kindness of the railway authorities, will entitle them to return tickets to Montreal at greatly reduced rates.

Graduates are requested to kindly notify the Registrar of any change in their address or of any omission or error noticed in the calendar list of names and addresses. The

Faculty would also feel thankful for the receipt of any interesting pathological specimens, and donations of books for the College Library, which will be gratefully acknowledged.

While the Faculty feels bound to keep faith with the students in regard to the rules and regulations now in force, and appearing in this Calendar (which hold good for the current Calendar year), it is understood that students will be governed by such regulations as may be passed from time to time by the Faculty.

COURSES OF MEDICAL STUDIES TO BE TAKEN UP EACH YEAR, AND EXAMINATIONS REQUIRED.

The course of studies and examinations is divided into primary and final branches. The former are taken during the first and second years, and the latter during the third and fourth years. The marks for second course of Pharmacology and Therapeutics being included among the final branches.

The primary subjects are Chemistry, Practical Chemistry, Descriptive and Practical Anatomy, Physiology, Practical Physiology, Histology, Materia Medica and Therapeutics. The subjects included in the final course are:—Practice of Medicine and Neurology, Surgery, Obstetrics, Clinical Obstetrics, Pathology and Bacteriology, Gynæcology, Medical Jurisprudence and Toxicology, Hygiene, Ophthalmology and Otology, Laryngology and Rhinology, Diseases of Children, Psychiatry, Clinical Medicine and Clinical Surgery.

The student will attend the course of Medical studies and take the examinations as follows:—

FIRST YEAR.

ANATOMY, PRACTICAL ANATOMY, PHYSIOLOGY, PRACTICAL
PHYSIOLOGY, HISTOLOGY, CHEMISTRY, HOSPITAL
ATTENDANCE.

Sessional examinations are held at end of the term and the pass examination in Histology.

SECOND YEAR.

ANATOMY, PRACTICAL ANATOMY, PHYSIOLOGY, PRACTICAL PHYSIOLOGY, MATERIA MEDICA, AND GENERAL THERAPEUTICS, CHEMISTRY, PRACTICAL CHEMISTRY, HOSPITAL ATTENDANCE.

The sessional examination on Materia Medica and general Therapeutics is taken, and the pass examinations on the remaining primary subjects.

THIRD YEAR.

MEDICINE AND NEUROLOGY, SURGERY, GENERAL PATHOLOGY AND BACTERIOLOGY, OBSTETRICS, CLINICAL OBSTETRICS, GYNÆCOLOGY, CLINICAL GYNÆCOLOGY, PHARMACOLOGY AND GENERAL THERAPEUTICS, MEDICAL JURISPRUDENCE AND TOXICOLOGY, PSYCHIATRY, HYGIENE, AUTOPSIES, CLINICAL MEDICINE AND SURGERY.

The pass examinations in Pharmacology and General Therapeutics, Pathology, and Medical Jurisprudence are held, and the sessional in the remaining branches. Lectures on Hygiene and Psychiatry will be given in the Summer session and examinations held at close of course, for all Students not requiring Quebec Board license, while those who do must pass these subjects before the Assessors at end of final year.

Special attention is directed to practical work of Summer Course.

FOURTH YEAR.

MEDICINE AND NEUROLOGY, SURGERY, AUTOPSIES, OBSTETRICS, CLINICAL OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, OPHTHALMOLOGY AND OTOTOLOGY, LARYNGOLOGY AND RHINOLOGY, CLINICAL MEDICINE AND SURGERY.

The final pass examinations are held. By attending and finishing the courses as above, a definite amount of work is accomplished each year, and an equal division is made between the primary and final branches, and the student is required to work energetically from the beginning of the course.

MEDALS, PRIZES AND SCHOLARSHIPS.

The following medals, prizes and scholarships will be offered for competition during the ensuing Winter session :

The Wood Gold Medal (value \$60), presented annually. This medal is endowed by Dr. Casey A. Wood, of Chicago,

and is given to the student who has attended at least two sessions at Bishop's College, and at the final examination has the highest aggregate number of marks on all the subjects of professional examination in both primary and final branches.

The Robert Nelson Gold Medal (value \$50), presented annually, This medal is endowed by Dr. C. E. Nelson of New York and given for the best special examination in surgery, open to all candidates who have taken honors in the aggregate on the final branches, and who have attended at least two sessions at Bishop's College.

The David Medal.—In 1880 the Faculty founded a Scholarship, which was afterwards named the "David Scholarship," in honor of their late Dean. Owing to changes having occurred in the arrangement of lectures, it has been decided that in future this prize shall consist of a silver medal, to be known as the "David Medal," which will be awarded to the student who obtains the highest number of marks in the primary examinations.

Chancellor's Prize.—A prize in books given annually by R. W. Heneker, Esq., Chancellor of the University, to the student who passes the best final examination. (This prize is not open to the "Wood" Gold Medalist).

The Wood gold medal, the Nelson gold medal, the David silver medal, and the Chancellor's prize are awarded to those who have attended at least two sessions at Bishop's College.

Prizes in books will be given for :—

1. The best examination in Histology.
2. The best dissecting and examination in the Practical Anatomy course in the first year.
3. The best dissecting and examination in the Practical Anatomy course in the second year.

A scholarship, consisting of a reduction of one-half the fees in all theoretical subjects of the Medical course, will be awarded to the applicant showing the highest aggregate of marks taken in the Provincial Matriculation Examinations of each year. Applications for this scholarship will not be received later than the 1st October, following the examinations.

A scholarship, consisting of a reduction of one-half the fees in all theoretical subjects of the Medical course, will be awarded to a graduate in Arts from Lennoxville, who shows the highest aggregate of marks in the Arts course. Application for this scholarship will not be received later than the 1st September following the graduation.

No student can receive a medal or prize who has not taken honors in the examination.

EXAMINATIONS.

Written or oral examinations will be held from time to time by each professor upon the subjects treated of in his preceding lectures, and every such examination shall be counted as a lecture. Each professor shall, at intervals, call a roll of the names of the students attending his class. Evidence of regular attendance will be required before admission to examination.

On all subjects in which attendance on one course of lectures only is required, pass examinations will be held at the end of the course.

On subjects where two courses of lectures are required, a sessional (written only) examination will be held at the end of the first session, and the pass examination on that subject at the end of the second course. The student will not be allowed to go up for his pass examination on any subject until he has passed the sessional.

Students who fail to pass any sessional examination or the primary pass examination, may make application to the Faculty for a supplemental examination, which, if granted, will be given in October of the following session, said applicant in the primary pass examinations to be accompanied by a fee of five dollars for each subject. Sessional supplementary examinations are free of charge. Marks taken at supplementary examinations count for pass only, not for honors. No further supplementary examinations will be given subsequent to October.

Students must have passed all their primary examinations before being permitted to go up for the pass examination in the final subjects.

The total number of marks given for any subject in which two courses are required will be divided as follows: One-quarter for sessionals and three-quarters for pass examinations.

To obtain first-class honors, at least seventy-five per cent. of the marks must be taken; second-class honors, at least sixty-five per cent.; to pass the ordinary examination at least fifty per cent.

Students exempt from the first year of a subject for sufficient reason are allowed only a pass standing (*i.e.*, in sessional marks), but may present themselves at the end of the session for the sessional examination also if they wish to compete for honor standing.

Students rejected in their final year on Medicine, Surgery or Obstetrics must attend another session and pass all the

final subjects again on which they were examined that year, when they take a future examination ; but if they fail on a minor final subject, then a supplementary examination on that subject alone may be allowed at the discretion of the Faculty, and at such time as may be determined upon.

Certified Class Tickets from recognized Medical Schools are accepted where such schools reciprocate with us.

Certificates of pass examinations from recognized Medical Colleges must be submitted to the Faculty for decision as to acceptance.

TABLE OF FEES.

Anatomy, two courses required.....	each	\$12 00
Physiology " "	"	12 00
Chemistry " "	"	12 00

Students who can attend the hospitals and dispensaries also during the summer sessions throughout their course will find it greatly to their advantage to do so, as more extended practical information may thus be obtained.

Dresserships and Clinical clerkships can be obtained at the Montreal General, Royal Victoria, and Western Hospitals by making an early application. Graduates of Bishop's College are eligible for the position of Resident Medical Officers in the Montreal General Hospital ; six are appointed annually on or about the 15th June, and in the Western General Hospital, where two are appointed in April.

QUALIFICATIONS FOR THE DEGREE OF C.M.,
M.D.

Candidates for graduation in Medicine and Surgery must give sufficient evidence by certificates:—

1. Of having matriculated or possessing equivalent qualifications.
2. That they have attended two six months' courses of lectures in each of the following departments in Medical Science:—General or Descriptive Anatomy, Principles and Practice of Medicine and Neurology, Surgery, Obstetrics, Chemistry, Physiology, Pharmacology and Therapeutics.
3. That they have attended one winter and one summer course in General Pathology and Bacteriology; two three months' courses in Gynæcology; one three months' course in Medical Jurisprudence and Toxicology, Diseases of Children, Hygiene, Practical Chemistry, Ophthalmology and Otology, also a course of not less than twenty-five demonstrations in Practical Histology. Practical courses on Pathological Histology. Courses in Psychiatry and Medical History and Ethics.
4. That they have attended two six months' courses of lectures on Clinical Medicine and Clinical Surgery.
5. That they have attended two six months' courses of Practical Anatomy.
6. That they have taken two courses of Clinical Obstetrics of twenty-four lessons each or one of forty-two.
7. That they have attended for at least twenty-four months or four periods of six months each, the Medical and Surgical practice of a hospital in which are contained not less than 100 beds, under the charge of not less than two physicians or surgeons, and that they have been engaged for at least six months in compounding medicines at a hospital dispensary, or with a duly licensed practitioner.
8. That they have attended at least twelve cases of Midwifery, either in a lying-in hospital, or in a private practice, under the supervision of a regular medical practitioner.
9. They shall furnish evidence of having reported at least six medical and six surgical cases.

Candidates for the degree must, on or before the first day of March, deliver to the Registrar of the Medical Faculty a declaration, in their own handwriting, that they have completed twenty-one years of age (or that they will have done so before the day of graduation).

Ita praesens mihi spondenti ; adsit Numeo.

LECTURES.—SESSION 1900-1901

PRINCIPLES AND PRACTICE OF MEDICINE AND NEUROLOGY.

PROFESSOR FRANCIS W. CAMPBELL.

ASSOCIATE PROFESSOR, J. BRADFORD McCONNELL.

It is proposed in these lectures to give a definition and history, with the etiology, symptoms, diagnosis, prognosis, complications, sequelae, pathology, and treatment of the more important constitutional affections, as well as of the diseases which attack the principal organs of the human body. The distribution of the course will have, as far as possible, some reference to the different systems and organs, the diseases of which will be considered in separate groups.

The lectures will be illustrated by plates, diagrams, pathological specimens, microscopical preparations, etc.

A few lectures will be given on Medical History, Ethics and Life Insurance Examinations.

Particular attention will be given to the special Pathology of the different diseases and their therapy.

The course of lectures on Diseases of the Nervous System will include, first, an outline of the various methods and tests employed in the diagnosis of these affections, the use of the ophthalmoscope, electricity, æsthesiometer, etc.; then a general consideration of the chief Diseases of the Brain and Spinal Cord, and of their membranes and nerves.

Some of these lectures will be given at the Western Hospital, where Clinical material will be used for practical demonstration.

PRINCIPLES AND PRACTICE OF SURGERY.

LECTURER, DR. ROLLO CAMPBELL.

INSTRUCTORS, DRs. TATLEY AND GEO. FISK.

This course of lectures will be practical, and will include the principles on which the science of Surgery is formed, and also the chief rules for its practice.

It will be divided into three parts, General, Special and Regional. General surgery will embrace the following subjects : Surgical Bacteriology, the process of repair, the traumatic fevers, Inflammation, Suppuration, Ulceration, Abscess and Fistula, Gangrene, Septicaemia, Pyaemia, Erysipelas, Tetanus, Scurvy, Tuberculosis and Scrofula, Rhachitis, Contusions and Wounds, Syphilis and Tumors.

Special Surgery.—Surgery of the Vascular and Osseous Systems, Fractures, Dislocations, Diseases of Muscles, Tendons, and Bursae, Surgery of the Nerves, Glands, Lymphatics and Joints, Surgical Diseases of the Skin and its appendages.

Orthopaedic Surgery.—Regional Surgery.—Diseases and injuries of the Head, Neck and Spine, Surgery of the Digestive and Respiratory tracts, and, on account of the great progress recently made in Abdominal Surgery, special attention will be given to that region ; Diseases and Surgery of the Genito-Urinary organs, Venereal and Rectal Diseases. When required, charts, specimens, and instruments will be shown, and the uses of the latter fully explained.

OPERATIVE SURGERY.

Operations will be performed on the dead body, the different forms of surgical instruments, apparatus, etc., shown, and their uses explained.

Senior students will have the opportunity of performing operations on the dead subject under the guidance of the Lecturer.

DISEASES OF THE EYE AND EAR.

LECTURER, DR. G. H. MATHEWSON, B.A.

The course will consist :

1. Of systematic lectures, at which the symptoms, diagnosis, and treatment of the more important diseased conditions of the eye and ear and their appendages will be discussed.

The lectures will be illustrated by drawings, diagrams, etc.

2. Of clinical instruction in the eye and ear department of the Montreal Dispensary, Montreal General Hospital and Western General Hospital, where opportunities will be afforded for practising the use of the Ophthalmoscope.

OBSTETRICS AND CLINICAL OBSTETRICS.

PROFESSOR H. L. REDDY.

DR. WM. BURNETT, Demonstrator.

This subject will be considered in the following order :
Pregnancy, including Abortion and Premature Labor.
Natural Labor, Complex Labor, etc.
Obstetrical Operations, the Puerperal State and its management.

The principal Obstetric operations, such as Version, Forceps, Craniotomy, etc., are performed on the Edgar-Parvin Mannikin.

Each student will receive practical instruction at the Women's Hospital and in his final year have entire charge of the cases to which he may be called, and have the opportunity to reside in the hospital from one to two months.

GENERAL PATHOLOGY, PATHOLOGICAL HISTOLOGY AND BACTERIOLOGY.

PROFESSOR ANDREW MACPHAIL.

The instruction in these subjects extends over a period of nine months, namely, one Winter and one Summer Session. The lectures will deal with the principles of General Pathology, and the Pathological Histology of the diseased conditions of the human body. The demonstrations will be upon the material acquired at the autopsies of the week, and the lectures will be illustrated by recent specimens, sections and preparations.

The following practical courses are obligatory upon all students :—

1. The performance of post-mortem examinations. Each student is required to perform or assist in performing six autopsies.

2. Bacteriology. All students are required to be familiar with the common forms of Bacteria, and to make themselves proficient by practice in the isolation, staining and detection of them.

3. A practical course in Pathological Histology in which students will learn the methods of preparing, staining, mounting and examining diseased tissues.

PHYSICAL DIAGNOSIS.

PROF. W. G. STEWART.

In this course the various methods of eliciting the physical signs of disease will be taught ; the use of the stethoscope and other mechanical aids to diagnosis. The topography of the chest and normal physical signs will be demonstrated on the living subject. Disease in selected cases occurring at the Western Hospital, will also be demonstrated from time to time, and the students will be examined in rotation upon the work done.

GYNÆCOLOGY.

PROF. J. PERRIGO.

*This course will embrace the following subjects :

1. Abnormalities.
2. Diseases of the external Genitals, including the injuries of the perineum.
3. Diseases and injuries of the Vagina ; Vesico and Recto Vaginal Fistulæ.
4. Diseases and injuries of the Uterus, including Stenosis, Subinvolution, Metritis, Endometritis and Fibroids ; Deformities, Displacements and Lacerations.
5. Diseases of the Fallopian tubes, including Salpingitis, Hydro and Pyosalpinx and Tubal Gestation.
6. Diseases of the Ovaries, Ovariectomy and other forms of Abdominal Surgery.
7. Pelvic Peritonitis, Pelvic Cellulitis and Pelvic Abscess.
8. Diseases of the Female Bladder and Urethra.

At the out-patient department of the Western Hospital there will also be a course of instruction in practical diagnosis and treatment.

PRACTICAL GYNÆCOLOGY.

PROFESSOR A. LAPHORN SMITH.

At the Montreal Dispensary, every Monday and Thursday, at 3 p.m.

During the summer, students of the third and fourth years will be taught bi-manual examinations and minor gynæcological operations, as well as other methods of treatment ; two students being taken in turn each day. Every Saturday, at 10 a.m., from April to October, major operations will be performed in their presence at the Western Hospital, and clinical lectures given on the cases.

DISEASES OF THE THROAT AND NOSE.

PROFESSOR GEO. T. ROSS.

This course will impart a general knowledge of the diseases commonly met with in these organs. Inflammation, growths and injuries of the Throat, Nose and Naso-Pharynx will be dwelt upon, and their effect on the general system explained. Interesting cases attending the Clinic at the Western General Hospital will be lectured upon. Colored plates, photographs and diagrams will also be used to make the course thoroughly practical.

MEDICAL JURISPRUDENCE.

(Including Toxicology.)

PROFESSOR W. H. DRUMMOND.

The purpose of these lectures is to bring as far as possible, within a reasonable compass, the application of medical knowledge to medico-legal investigation.

DISEASES OF CHILDREN.

PROFESSOR WILLIAM BURNETT.

This course will include a series of lectures on the Diseases of Infancy and Childhood. The dietetic and hygienic management of children will also be considered.

MENTAL DISEASES.

PROFESSOR J. V. ANGLIN.

Insanity in its various forms will be lectured upon in this course, and the subject treated from a Medical as well as a Medico-legal basis, with occasional demonstration of cases at Verdun Hospital for the Insane.

PHARMACOLOGY AND GENERAL THERAPEUTICS.

PROFESSOR ROBERT WILSON.

FRANCIS O. ANDERSON, M.D., Demonstrator of Practical Pharmacy.

JAMES A. GILLESPIE, L. Ph., Demonstrator of Pharmacology.

This course comprises :

- I. The consideration of the source, properties, composition, preparation, physiological actions, toxicology and therapeutic applications of the various substances used in medicine. The

lectures w
tions and

2. The a
of Practic
peutics. T

The lectu
ledge of Hu
will be larg

lectures will be illustrated by colored plates, dried preparations and a complete cabinet of drugs and their preparations.

2. The attendance during the Summer Session of a course of Practical Pharmacy and Dispensing and special Therapeutics. This includes (a) The actual making of many of the more important preparations of the Pharmacopœia, together with the dispensing of prescriptions, under the direction of a graduate in Pharmacy ; (b) The delivery of a short course of lectures on special Therapeutic measures, such as Electrotherapy, Sero-therapy, Dietetics, Massage, Hypnotism, etc.

PRACTICAL HISTOLOGY.

PROF. ARTHMAN BRUERE.

The course will consist of fifty meetings for practical work in the laboratory of the College. Students will be instructed in the methods of preparing the tissues and organs of the body for examination with the microscope. Special attention will be paid to comparative histology.

CHEMISTRY AND CHEMICAL PHYSICS.

PROFESSOR J. T. DONALD.

T. LINSEY CROSSLEY, Demonstrator.

The object of this course is, in brief, to teach the general truths of Chemistry, in order that the student may be prepared to pursue in an intelligent manner the intimately related professional courses, *e.g.*, Physiology, Materia Medica, Hygiene, etc. At the same time the more important elements and compounds are discussed, special attention being paid to those of hygienic and dietetic interest and of importance in medicine, pharmacy and dentistry.

Diagrams, charts, specimens and experiments are freely used with a view to making the course as practical as possible.

PHYSIOLOGY.

PROFESSOR ARTHMAN BRUERE.

The lecturer's aim will be to impart a good general knowledge of Human and Comparative Physiology. The lectures will be largely illustrated, and numerous experiments will be

performed before the class. Electro-physiology, the physiology of the sense organs and of the central nervous system will be especially dwelt upon. Practical instruction in the use of Physiological instruments and in Physiological Chemistry will be given to senior students.

DESCRIPTIVE AND SURGICAL ANATOMY.

PROF. F. J. HACKETT. LECTURER, CHAS. A. HEBBERT.

Five lectures weekly, are given on this subject.

The course will be illustrated by diagrams, models, plates, moist and dry preparations, blackboard drawings, and special recent dissections, etc.

Written examinations are held upon each of the completed sections of the course. Comparative Anatomy, Anomalies and Malformations will be fully discussed in their relation to the subject.

Embryological points of interest will be dwelt upon when necessary.

The College is in possession of a large collection of moist and dry preparations, viz., dissections of the central Nervous System, various regions of the body and of cross sections of the entire cadaver.

These specimens are open for study by the class.

SURGICAL APPLIED ANATOMY.

The lectures and demonstrations on this important subject will be given during the summer session.

This course will be illustrated by plates, moist and dry preparations, and special dissecting operations upon the cadaver.

The anatomy of the various ligations, amputations, excisions, etc., will be systematically discussed.

Special attention will be directed to Abdominal and Pelvic Anatomy.

HYGIENE OR STATE MEDICINE.

LECTURER, A. J. RICHER.

The lectures on this subject, the importance and value of which are now universally admitted, are intended:—

To teach the application of Sanitary Science to questions concerning Public Health.

To aff
in Sanita
etc.

To afford rules for the conduct of the Medical Practitioner in Sanitary Inquiries, Municipal Sanitation, School Hygiene, etc.

To inculcate the use of suitable Hygienic Measures in the prevention and arrest of Contagious Diseases.

To confer such knowledge of the principles of State Medicine as it is desirable that every medical man should possess.

PRACTICAL CHEMISTRY.

PROFESSOR JOSEPH BEMROSE.

Work in the Laboratory for Practical Chemistry is continued throughout the Winter months, and is intended to afford to the student a knowledge, by personal experiment, of the more important elements and compounds used in medical practice, special attention being paid during the first half of the session to the reactions of those of a poisonous nature, both inorganic and organic. Afterwards the preparation of the volumetric solutions of the British pharmacopoeia and quantitative estimations of the fixed and volatile Alkalies, Oxalic, Arsenious and Hydrocyanic Acids, Iodine, Bromine, and their compounds; also the separation and recognition of the alkaloids in the tinctures and extracts of Nux Vomica, Cinchona, Opium, etc.

To each student is allotted a working space furnished with a full set of reagents; also the necessary apparatus, for which a deposit of \$5 will be required, to be returned at the end of the session, less an amount sufficient to cover breakages.

Special students who desire the course of Chemistry only will be admitted to the Lectures and Laboratory on enregistration, and payment of fees.

PRACTICAL ANATOMY.

PROF. F. J. HACKETT.

Lecturers, DRs. C. A. HEBBERT, D. MCNAMARA.

Demonstrators, DRs. GEO. FISK, FRANK DUCKETT.

Assistant Demonstrators, W. H. SMYTH, M.D., T. D. MCGREGOR, D.D.S.

The dissecting room is open daily from 8 a.m. to 10 p.m., except on Saturday, when it is closed at 5 p.m.

Ample opportunities are afforded for dissecting fresh subjects. Demonstrators will be in attendance daily to direct and assist students in their dissections, and examine their work.

The dissecting rooms are supplied with every requisite for the comfort and convenience of students, due regard being observed for sanitary measures. Every possible facility will be afforded students in this most important department.

Students during dissection of each extremity are examined on the muscles, arteries, nerves, etc., of the extremity as they are exposed. Certificates are granted as soon as the student shows by examination a thorough knowledge of the anatomy of the part and its practical bearing in relation to Medicine and Surgery. The course in Practical Anatomy is under the care of the Professor of Anatomy.

CLINICAL MEDICINE.

PROFESSOR, J. BRADFORD McCONNELL.

CLINICAL SURGERY.

Daily clinics will be given in the above subjects, and one or more lectures weekly at the Western Hospital. Opportunities will be afforded here for the reporting of cases, surgical dressing and practice in Clinical Chemistry and Microscopy; but owing to lack of the required number of beds at present in the Western Hospital, in addition to what can be attended of the above, students of this University are required to attend the Clinical Courses, Autopsies and other work at the Montreal General, Royal Victoria, or Hotel Dieu Hospitals, where our students receive the same attention, and are accorded the same privileges as those from other teaching bodies; but the pass examinations will be conducted at the Western Hospital.

CLINICAL CHEMISTRY AND MICROSCOPY.

PROF. BRUERE.

RESULTS OF EXAMINATIONS.

SESSION 1899 AND 1900.

PRIMARY SUBJECTS.

ORDER OF MERIT.

Anatomy.—First year.—1st class honors—Georgiana McBain. 2nd class honors—James McGregor, B. W. Brock, W. H. Brown, C. M. Cass. Passed—E. A. Vallée, T. P. Donnelly, A. E. Wilson, P. H. Adams, L. H. Bennett, D. W. Morison.

Second year.—1st class honors.—E. H. Brown, Florence L. A. Evans, H. L. Troutbeck, W. H. Still, Chas. Depencier, L. R. Morrin, Wm. D. Smith. 2nd class honors—B. A. Planche, J. R. Brown, J. E. Dohan, O. J. Tansey, J. R. Fournier. Passed—L. Tremblay, R. H. Somers, D. K. H. Cowley, W. C. Bazin, E. J. T. Stuart, Nap. Desjardins, A. C. De L. Harwood, T. W. O'Connell.

Physiology.—First year.—1st class honors—Georgiana McBain. 2nd class honors—L. H. Bennett, W. H. Brown, M. Fortier. Passed—H. R. Mathews, S. Mauffette, B. W. Brock, W. F. Roach, J. P. H. Massicotte, W. W. Kelly, P. H. Adams, D. A. Morison, Ernest Vallée, L. N. Trudeau.

Second year.—1st class honors—Miss Florence L. A. Evans, Chas. Depencier, J. R. Brown, W. D. Smith, E. H. Brown, J. N. Fournier, C. M. Cass, J. E. Dohan, W. C. Bazin. 2nd class honors—L. R. Morrin, W. H. Still, B. A. Planche, H. L. Troutbeck, E. J. T. Stuart, Nap. Desjardins, L. Tremblay. Passed—R. H. Somers, W. K. H. Cowley, A. Beauchamp, C. C. Warren, Louis Trudeau, L. L. Benny, A. C. De L. Harwood, O. J. Tansey.

Chemistry.—First year.—1st class honors—Miss Georgiana McBain, W. H. Brown, T. F. Donnelly, P. H. Adams, B. W. Brock, L. H. Bennett, 2nd class honors—E. A. Vallée, S. S. Sperber. Passed—H. R. Matthews, W. W. Kelly, D. W. Morison, L. N. Trudeau, M. Fortier.

Second year.—1st class honors—Miss Florence L. A. Evans, Chas. Depencier, C. M. Cass, W. C. Bazin, E. H. Brown, J. R. Brown, R. H. D. Benn, W. H. Still, L. Tremblay, J. N. Fournier. 2nd class honors—B. A. Planche, R. H. Somers, L. R. Morrin, J. E. Dohan, W. F. Roach, H. L. Troutbeck, J. P. H. Massicotte, C. C. Warren. Passed—E. J. T. Stuart, W. D. Smith, O. J. Tansey, Geo. Briggs, A. C. De L. Harwood, E. Lemieux, N. Desjardins, Louis Trudeau, S. Mauffette, T. W. O'Connell.

Practical Chemistry.—D. K. H. Cowley, J. McGregor, J. P. H. Massicotte, W. C. Bazin, W. H. Still, C. M. Cass, Miss F. Evans, J. F. Donnelly.

Histology.—1st class honors—W. H. Still. 2nd class honors—W. C. Bazin. Passed—Miss F. L. A. Evans, C. M. Cass.

Materia Medica.—Second year—1st class honors—Miss Florence L. A. Evans. 2nd class honors—C. M. Cass. Passed—W. C. Bazin, W. H. Still, D. K. H. Cowley.

Third year.—2nd class honors—E. A. Tomkins, F. W. Mann, W. F. Roach, Passed—H. B. Henriques, James McGregor, G. H. Tutill, M. L. Benoit.

FINAL SUBJECTS.

Medical Jurisprudence.—1st class honors—G. H. Tutill, J. A. Gillespie. 2nd class honors—H. B. Henriques, D. L. Murray. Passed—James McGregor, E. A. Tomkins.

Pathology.—1st class honors—J. A. Gillespie, Arnold T. Clarke, E. A. Tomkins, 2nd class honors—G. H. Tutill. Passed—F. W. Mann, H. B. Henriques, D. L. Murray, J. A. Hamilton, C. W. Smith.

Gynæcology.—Third year.—1st class honors—E. A. Tomkins, J. A. Gillespie, G. H. Tutill. Passed—H. B. Henriques, C. W. Smith.

Fourth year.—1st class honors—F. W. Mann, A. C. Lopez, Miss Runnells. 2nd class honors—F. O. Anderson. Passed—A. Macdonald, J. A. Hamilton, Miss Currie, C. H. Christie, J. W. Davis.

Surgery.—Third year.—1st class honors—J. A. Gillespie, 2nd class honors—H. B. Henriques, E. A. Tomkins. Passed—G. H. Tutill, D. L. Murray.

Practice.—Third year.—1st class honors—Jas. A. Gillespie, 2nd class honors—E. A. Tomkins. Passed—G. H. Tutill, H. B. Henriques, D. L. Murray.

Obstetrics.—Third year.—1st class honors—J. A. Gillespie, E. A. Tomkins, 2nd class honors—H. B. Henriques, Arnold T. Clarke, D. L. Murray, G. H. Tutill.

PRIZE WINNERS.

Histology Prize—W. H. Still.

1st year Practical Anatomy Prize—James McGregor.

2nd year Practical Anatomy Prize—E. H. Brown.

David Silver Medal—Miss Florence L. A. Evans.

Chancellor's Prize—A. C. Lopez.

Wood Gold Medal—F. O. Anderson.

CONVOCATION.

The Convocation for conferring degrees in Medicine and Dentistry was held in Synod Hall, Montreal, on Tuesday, 11th April, when the degree of C.M., M.D., was conferred on each of the above graduates. Dr. Sutherland gave the valedictory address for the graduating class, and Prof. R. Wilson on behalf of the Faculty of Medicine. At the same time the degree of D.D.S. was conferred on the following graduates of the Dental College, viz.:—F. G. Henry, Montreal; J. A. Butler, Montreal; W. G. McCabe, Montreal; F. L. Wilkinson, Montreal; J. K. Cleary, Montreal. Dr. Henry gave the Dental graduates' valedictory, and Prof. Kerr replied on behalf of the Dental Faculty.

EXAMINATION QUESTIONS.

CHEMISTRY.—SESSIONAL AND FINAL.

1. Explain clearly what you understand by Specific Gravity. How would you determine the Specific Gravity of a liquid by means of the Specific Gravity bottle?
2. Define the terms Electrolysis and Electrolyte. What is behavior of the metal when a metallic salt is submitted to Electrolysis?
3. How would you determine the relative hardness of two samples of water? On what grounds do we usually object to the presence of any notable amount of chlorides in potable waters? What elements are of special interest in mineral waters?
4. What do you understand by Allotropy? Compare Allotropic modifications of any element. What explanation of Allotropy is offered?
5. Explain the manufacture of Calcium Carbide and the reaction by which Acetylene is obtained from the Carbide. Describe the gas.

6. Write briefly on the preparation and properties of any Salt of Magnesium and also any Salt of Mercury used in medicine.

Explain Homologous Series. Write formulas for the first three Alcohols of the Methane series. Write structural formula for ordinary alcohol and give reasons for such formula.

8. Lactose : Occurrence, preparation, properties, uses and advantages over cane sugar or grape sugar in these uses.

ANATOMY.—FIRST YEAR.—SESSIONAL EXAMINATION.

I. Describe the Scapula. Write a short note on its ossification. Distinguish between an Epiphysis and an Apophysis.

II. Give the attachments of the following muscles :—

Adductor-brevis ; Rectus-femoris ; Gluteus-maximus ; Peroneus-longus ; Extensor-brevis-digitorum, and mention their nerve supply,

III. Describe the origin, course, relations, and distribution of the posterior-interosseus nerve. What are its connections with other nerves ?

IV. Describe the Internal-mammary artery and its anastomoses.

V. How is the deep Palmer arch formed, and what are its branch and anastomoses ?

III. What do you understand by the terms ; Enarthrosis, Arthrodia, Ginglymus, Sutura-limbosa ? Give instances of each.

ANATOMY.—SECOND YEAR.—FINAL EXAMINATION.

I. What are the attachments, nerve and arterial supply of the Quadratus-lumborum muscle ? Give its connection with the Lumbar fascia and its processes, also its relations to other structures.

II. Give a dissection to expose the lingual artery in the neck. Trace its branches and name their anastomoses.

III. Carefully describe the course, relations, and distribution of the Ulnar nerve in the hand.

IV. What do you understand by the Pelvic Fascia ? Describe its processes and arrangement. How does it form the sheath of the Prostate ?

V. Give the attachments of the following muscles :—
Scalenus-anticus, Rectus-capitis-posticus-major, Pectoralis-minor, Rectus-abdominis, Pectineus, Semi-membranosis, Adductor-hallucis, and mention their nerve supply.

VI. Give a short account of the Ventricular system of the brain. How is the third ventricle connected with the other ventricles ? Describe the the third ventricle.

AN

ANATOMY.—FIRST YEAR.—DISSECTOR'S PRIZE.

1. What bones form the middle meatus of the nose? Describe its boundaries and the communications with other cavities.
2. Describe the synovial membranes of the wrist joint and of the tendons which pass over it.
3. Give coverings of femoral hernia and its relations to surrounding parts.

SECOND YEAR.—DISSECTOR'S PRIZE.

1. Give a dissection to expose the occipital artery in the sub-occipital triangle. Trace its course and distribution. Carefully explain the anastomoses of its branches and their importance.
2. Describe the vascular supply of the lower end of the rectum and its connection with the portal and systemic circulations; also a few notes on the distribution of lymphatic vessels, and the glands into which they pass.
3. Trace from their origin in the cortex of the brain the fibres forming the motor portion of the musculo-spiral nerve.

PHYSIOLOGY.

SESSIONAL.

1. Name the proteids of blood serum. How can they be separated? State by what tests they may be distinguished.
2. Describe, as accurately as possible, the movements by which the thorax is enlarged in the act of inspiration.
3. Give a brief account of the events which occur in the heart during its systole and diastole.
4. Describe the structure of the buccal mucous membrane.

PASS EXAMINATION.

1. State the sources of carbon dioxide in the body. What circumstances mainly influence the amount of carbon dioxide excreted?
2. Describe the structure of the mucous membrane of the pyloric end of the stomach.
What are the principal tests for free hydrochloric acid in the contents of the stomach?
3. Give a detailed account of the development and structure of Nasmyth's membrane.
4. Describe the organ of Corti. Explain how sound waves, coming from without, are conducted to the labyrinth.
5. Give a short account of the absorption of fats from the small intestine.

PHARMACOLOGY AND THERAPEUTICS.

SESSIONAL.

1. Give the common name of *Digitalis Purpurea*; where is it found? What part of the plant is used? Give the preparations of the E.P., with strengths and doses. What is it used for?

2. What is Mercury, and where is it found? Mention two preparations of the B.P. where the metal itself is used. What is the difference in dose and physiological action between the Bi-chloride and the Sub-chloride, giving their common names. What are the two chief therapeutic applications of Mercury salts?

3. Mention and describe briefly any three purgatives. What are the functions of a purgative? Write two prescriptions for purgatives for a baby 6 months' old.

4. Outline briefly your treatment for a case of advancing tuberculosis of the lungs.

5. Mention some drugs which render the urine alkaline after absorption, and write two prescriptions containing them.

6. Name the drugs included under the name "Nitrites," with their doses. What is the characteristic physiological action, and in what class of cases are they used?

FINAL.

1. Write fully on Purgatives, their classification, physiological action, indications, and contra-indications.

2. Give a brief account of the use of the internal secretions of the glands of animals in medicine. Discuss the Pharmacology and Therapeutics of the Thyroid gland, writing prescriptions.

3. Write at length on the physiological action of opium. Give the more commonly used preparations, with their strengths and doses (a) for an adult, (b) for a child of 3 years.

4. Mention the source, part employed, most used preparations, dose and chief physiological action of the following drugs:—Atropia Belladonna, Chloral Hydrate, Cocain, Quinine, Mercury, Bismuth, Salicylic Acid, with a prescription for each, stating what it is for.

5. Write on the pharmacology of Iron, giving five preparations, with their strength and adult doses.

6. Give a brief synopsis of the treatment by Massage, with a summary of its effects on the entire system. Specify the cases where it is beneficial.

GYNÆCOLOGY.

SESSIONAL.

1. How do you treat amenorrhoea in delicate girls ?
2. What are the different varieties of vaginitis, and give the treatment of the simple form ?
3. Give, in detail, Emmet's operation on the cervix.
4. Given an abdominal operation, what are the symptoms which would make you suspect hemorrhage or obstruction of the bowels ?

FINAL.

1. Give the history of abdominal section for the removal of Fibroid tumours of the uterus, and what is the method chiefly followed at the present time ?
2. In operating for Fibroid tumors of the uterus, what are the advantages and disadvantages of curetting, removal of tubes and ovaries, myomectomy, removal of uterus, leaving cervix ?
3. Describe, in detail, the vaginal route in operating for malignant disease of the uterus.
4. What do you understand by sub-involution of the uterus, and what may be the result ?

OBSTETRICS.

SESSIONAL.

1. Mention the signs of pregnancy.
2. Give the rule for the prediction of date of labour.
3. How is the nutrition and respiration of the embryo maintained in Utero ?
4. Give the face presentations.?
5. How would you resuscitate a new born baby failing to breathe ?
6. What anæsthetic would you use in midwifery ? How would you administer it ?

FINAL.

1. Mention an absolute test for proving pregnancy before the third month.
2. Give a short resume of sepsis as found in obstetrical practice ? Cause, degrees, symptoms, treatment.
3. Mention the varieties of extra uterine foetation. Which is most common ? Give treatment ?

4. How would you manage a mento-posterior face presentation?
5. Describe the most modern Cæsarian section.
6. How would you treat the Mammæ so as to stop the secretion of milk and prevent abscess?

PATHOLOGY.

1. Describe the minute appearance of : (a) Rachitic bone. (b) Granulation tissue. (c) Early miliary tubercle. (d) Alveolus in lobar pneumonia. (e) Sclerosis of brain.
2. Describe in detail "a neuron of the upper motor segment."
3. Illustrate collateral circulation following structural change in the various organs.
4. Contrast the history and appearance of carcinoma and sarcoma.
5. Explain the connection between hypertrophy of the heart and chronic interstitial nephritis.
6. Write a short note on : Sequestrum. Callus. Gangrene. Chemiotaxis. Toxin. Immunity. Jaundice. Suppuration. Restoration of blood vessels.

DISEASES OF THROAT AND NOSE.

1. Differentiate between Simple Chronic Rhinitis and Hypertrophic Rhinitis, and give treatment of the former.
2. Give chief symptoms of Atrophic Rhinitis and treatment.
3. What is the usual situation of Nasal Polyps. Give symptoms and treatment.
4. Give general rules governing Antitoxine injections in Diphtheria.
5. Give brief outline of symptoms of : (a) Scarlatinal sore throat. (b) Chronic rheumatic sore throat. (c) Sore throat of measles. (d) Syphilis of pharynx, and treatment of each.

OPHTHALMOLOGY AND OTOLOGY.

1. Give symptoms, course and treatment of Ophthalmia neonatorum. State how this disease may be prevented.
2. What are the chief dangers to be feared in Ulcer of the Cornea? Give treatment of Simple Corneal Ulcer.
3. What are the commonest causes of Iritis? Give main symptoms of Iritis.
4. What are the chief symptoms of Acute Glaucoma? Give treatment of Acute Glaucoma.
5. Give the etiology, course and treatment of Acute Suppurative Otitis Media.
6. Give the important points in the diagnosis of Mastoiditis.

SURGERY.

SESSIONAL.

1. What is an ulcer? How are ulcers classified? Give in detail treatment for the callous form of ulcer.
2. Describe in detail cutaneous erysipelas, and state the possible complications that may ensue.
3. Mention the varieties of fracture of the patella, and give different methods of treatment.
4. Compare and differentiate the symptoms of anal fissure and internal capillary hemorrhoids. Give appropriate treatment for anal fissure.

FINAL.

1. What are the causes of Stricture of the Rectum? Give the symptoms of this malady, and describe in detail the treatment.
2. Differentiate between traumatic fever, sapræmia, septic infection and pyæmia.
3. Discuss the indications for operation in inguinal hernia. What two methods of operation are most used in inguinal hernia, and where do they differ? What suture material is best?
4. Describe in detail the operation for ligation of the lingual artery in the submaxillary triangle.
5. Differentiate the character of the pain in the following affections: (a) Cancer of the stomach. (b) Abscess of the liver. (c) Biliary calculus. (d) Nephralgia. (e) Appendicitis. (f) Strangulated hernia.
6. Give the diagnostic points of difference between the soft chancre and the primary syphilitic sore, and mention the manifestations of the secondary stage. Write a prescription suitable to the treatment of a patient in this stage.

PRACTICE OF MEDICINE.

SESSIONAL.

1. *Trichina spiralis*. How do they enter the human body? Describe their movements when they get there and the symptoms they produce.
2. Define the following terms: (a) Nosology. (b) Etiology. (c) Diagnosis. (d) Prognosis. (e) Idiosyncrasy. (f) Pathognomonic. (g) *Vis Medicatrix Naturæ*. (h) Pathology.

3. What terms are used to express the following conditions: (a) An inflammatory disease. (b) Transudation of fluid on a mucous surface, (c) Hæmorrhage from a mucus surface, (d) Pain without inflammation. (e) Certain morbid conditions of the urine.

4. What is a lesion?

5. Influenza. Give the general symptoms, ætiology, and course, its chief clinical types and the treatment.

6. Give the symptoms and physical signs of aneurysm of the transverse portion of the arch of the aorta.

FINAL.

1. Cancer of stomach. Form generally met with, symptoms, treatment, especially to retard its progress.

2. Epilepsy. Forms met with. Mention some of the theories as to its cause. Give treatment, making special mention of some of the most recent remedies.

3. Hæmoptysis and Hæmatemesis. Symptoms, treatment Diagnosis between them.

4. Describe a case of Capillary Bronchitis, giving symptoms and a general outline of treatment in an aged person.

5. What are the chief primary and secondary lesions occurring in Typhoid Fever? What symptoms may be present in the urinary system. Describe Ehrlich's diazo-reaction and the specific reaction which occurs in the serum diagnosis of this affection.

6. What are the symptoms of a paroxysm of Angina Pectoris? Distinguish between the latter and Pseudo Angina.

REFERENCE AND TEXT BOOKS RECOMMENDED.

SURGERY.

Text Books.—Bryant, Walsham, Treeves, Martin, Moulin, American Text Book of Surgery, Warren's Surgical Pathology, Wharton's Minor Surgery, Wharton and Curtis, Erichsen.

Books of Reference.—Gant, Agnew, Gross, Hamilton on Fractures, Berkley Hill, Keyes, Allingham, Gerster's Surgery, Senn's Principles of Surgery, Dennis' System of Surgery, Roswell Park's System of Surgery.

OPERATIVE SURGERY.

Text Books.—Kocher, Jacobson, Treeves.

Books of Reference.—Holmes' System, Gant, Gross, Agnew.

MEDICINE AND NEUROLOGY.

Books Recommended.—Osler, Strumpell, Flint, Anders, Wood & Fitz; for reference, the American System of Medicine: Hirt's Diseases of the Nervous System, Gowers, Gray, Dercum, Mills, Tyson, Hughes, Ewald.

EYE AND EAR.

Text Books.—Swanzy's "Diseases of the Eye," Jackson "Disease of the Eye," DeSchweintz "Disease of the Eye," Dench "Disease of the Ear."

OBSTETRICS.

Text Books.—Playfair, 7th Amer, 8th Eng. Davis.

Operative Obstetrics.—Grandin and Jarman.

Books of Reference.—Am. Text Book of Obstetrics, the Practice of Obstetrics by American Authors, Jewitt, Hirst, Winckel.

PATHOLOGY.

Text Books.—Text book of Pathology, by Alfred Stengel, (W. B. Saunders). Pathology and Morbid Anatomy, by J. H. Green, (Lea Brothers & Co). Bacteriology in Medicine and Surgery, by William Hallock Park, (Lea Brothers & Co). Pathological Technique, by Mallory and Wright (W. B. Saunders).

PHYSIOLOGY.

Text Books.—Foster's Physiology, Manual of Physiology by Professor Stewart.

PHYSICAL DIAGNOSIS.

Text Books.—Loomis, Brown, Fenwick.

Books of Reference.—Vierordt, Da Costa, Musser, Hare.

ANATOMY.

Text Books.—Gray, Morris, McAllister.

For Reference.—Quain's (last edition), Holden's Osteology.

PRACTICAL ANATOMY.

Books Recommended for use in the Dissecting Room—Heath's Manual of Dissection, Cunningham's Practical Anatomy, Ellis' Demonstrations of Anatomy, Holden's Dissector. (Am. Ed.)

FRENCH DEPARTMENT, (DENTAL)

Text Books.—Beauvis & Bouchard.

For Reference.—Tesub, Poirier.

For Dissection.—Cunningham.

MENTAL DISEASES.

Clouston "on Mental Diseases."

CHEMISTRY.

Text Books.—Balfour Stewart's "Lesson in Elementary Physics," Ganot's Physics, Attfield's Chemistry, Remsen's Introduction to the Study of Chemistry, Bartley's Medical Chemistry, Witthaus Medical Students' Manual of Chemistry, Remsen's Organic Chemistry, Wurtz elements of Modern Chemistry.

PRACTICAL CHEMISTRY.

Text Books.—Muter, Attfield.

HISTOLOGY.

Text Books.—American Text Book; Stirling's Histology, Schafer's Elements, Stohr. Piersol's Normal Histology.

PHARMACOLOGY AND THERAPEUTICS.

Text Books.—Cushny's Pharmacology and Therapeutics, Squire's Companion to the British Pharmacopœia, Lectures on the Action of Medicines, Lauder Brunton.

Reference Works.—Hare's System of Practical Therapeutics, Lectures on Pharmacology, by C. Binz, Translated by A. C. and P. A. Latham.

GYNÆCOLOGY.

Text Books.—Thomas & Mundé, Garrigues. American Text Book.

Books of Reference.—Keating, and Pozzi. H. Kelly.

DISEASES OF CHILDREN.

Text Books.—Diseases of Infancy and Childhood, Holt, Lewis Smith. American Text Book. Therapeutics of Infancy, by Jacobi. Rotch, Keating.

MEDICAL JURISPRUDENCE.

Text Books.—Guy's Forensic Medicine; Taylor's Medical Jurisprudence; Blandford on Insanity; Allan McLane Hamilton's Legal Medicine. Herald.

THROAT AND NOSE.

Books Recommended.—Burnett; Bishop, Lennox Browne, Williams, Coakley, Kyle.

HYGIENE.

Books Recommended.—Traité d'Hygiène, par M. Levy; Wilson's Handbook of Hygiene; Practical Hygiene, by Parkes; Rohe's Text Book. Précis d'Hygiène, Paul Langlois, Abbott, Hygiene of Transmissible Diseases.

SURGICAL APPLIED ANATOMY.

Text Books.—Shields, Treves, McLellan's Regional Anatomy.

CLINICAL MEDICINE AND SURGERY.

Books Recommended.—Musser's Medical Diagnosis, Vierordt's Medical Diagnosis, R. Von Jaksch, Purdy's Practical Urinalysis and Urinary Diagnosis. Hare's Practical Diagnosis. Simon's Clinical Diagnosis.

Heath's Guide to Surgical Diagnosis, and the text books recommended in the Course on Surgery. Tyson's Practical Examination of Urine. Black.

MISCELLANEOUS.

Pratice of Massage, Eccles; Medical Climatology, Solly; Lippincott's Medical Dictionary, Foster's Encyclopedic Medical Dictionary, Cabot's Clinical Examination of the Blood. Anæsthetics, Turnbull. Gould's Medical Dictionary; Practical Dietetics by Thompson; Food in Health and Disease, Yeo. Venereal Disease—Taylor, Hayden, White & Martin. Skin Diseases—Hyde, Jackson. Shoemaker—Duhring Cutaneous Medicine.

STUDENTS WHO HAVE OBTAINED HONORS IN MEDICINE IN THIS UNIVERSITY.

- ABBOTT, MISS MAUDE.**
 1892 Practical Anatomy, Senior Prize.
 1894 Chancellor's Prize.
- ADDISON, E. J.**
 1896 Chancellor's Prize.
- ANDERSON, F. O.**
 1898 David Medal and Histology Prize.
 1900 "Wood" Gold Medal.
- ARMSTRONG, C. H. B.**
 1892 Practical Anatomy, Junior Prize.
 1893 Senior Dissector.
 1894 Nelson Gold Medal.
- BALL, C. DEXTER.**
 1880 Botany Prize.
 Practical Anatomy, Junior Prize.
 1884 Final Examination, 1st Class Honors.
- BENNY, J. J.**
 1895 David Silver Medal.
- BERTRAND, F. E.**
 1887 Botany Prize.
 1888 David Scholarship.

SUMMER SESSION—Continued.

LECTURES ON CLINICAL CHEMISTRY AND MICROSCOPY.

A clinical laboratory course of lectures will be given by Dr. Bruere, during the Summer Session, in connection with the study of hospital cases.

The following is an outline of the course:

BLOOD.—Technique of obtaining blood specimens; normal constituents of blood; blood formation in bone marrow; corpuscle counting and haemoglobin estimation; technique of fixing and staining specimens; study of blood-serum diagnosis; leucocytosis; medico-legal value of blood stains; blood in malaria &c.

SPUTUM.—Collection and examination of specimens of sputum in asthma, tuberculosis, gangrene and hemorrhage from the lungs, pneumonia, &c.; examination for diphtheria and other bacilli.

GASTRIC CONTENTS.—Administration of test meals; method of obtaining and examining gastric contents; lavage; chemical analysis of vomitus.

FAECES.—Method of obtaining and examining; intestinal parasites and their ova; bacteriological examination in disease.

URINE.—Examination for tubercle bacilli, gonococci, smegma bacilli, &c.; urinary deposits; seminal fluid in its medico-legal aspect; chemical analysis.

EXUDATIONS AND TRANSUDATIONS.—Ascitic and pleuritic effusions; cystic contents; vaginal discharges, &c.

Each student will be furnished with typical specimens for future reference and comparison.

The course shall consist of thirty meetings for practical work, in the laboratory of the college, and shall be free to all medical students of the third and fourth year.

OPTIONAL COURSE.

Practical Toxicology, at 7-30 p.m., on Monday, Tuesday, Thursday and Friday, in the College Building, by Prof. BRUERE.

NOTE.—The Summer Session continues throughout April, May and June, and is compulsory to all students after third year.

For further information as to fees, etc., apply to the Registrar.

Dental College of the Province of Quebec

IN AFFILIATION WITH THE

UNIVERSITY OF BISHOP'S COLLEGE.

The course of instruction in this College is in accordance with the requirements of the National Association of Dental Faculties of the United States and extends four years.

MATRICULATION.

All candidates for admission, except those who hold a degree in Medicine or Arts from a recognized British or Canadian University, must pass the matriculation examination of the Dental Association of the Province of Quebec, before they can register as students of this College.

INDENTURES.

Those students who intend to practice in the Province of Quebec must sign indentures before a Notary Public with a Licentiate of Dental Surgery in active practice in the Province, at the beginning of the College course; the Dental Act requiring four (4) full years as an indentured student after the matriculation has been passed.

COURSE OF INSTRUCTION.

Anatomy, Physiology, Chemistry, Histology and Embryology are taken in the Medical Department of Bishop's University, the remainder of the course is given in the Dental College building corner St Catherine and St Lawrence Sts.

First year—Anatomy, Physiology, Chemistry, Histology and Embryology.

Second year—Anatomy, Physiology, Chemistry, Operative and Mechanical Dentistry, Dental Technique, Dental Pathology and Therapeutics, Surgical Pathology, Dental Surgery and Anaesthetics, Orthodontia, Dental Materia Medica.

Third and fourth years—Operative and Mechanical Dentistry, Crown and Bridge work, Practical work in Infirmary, etc., all work being done at Dental College.
