OPINIONS OF THE PRESS.

The wonderful success that has attended the goods manufactured by the world wide known firm, the WELLS & RICHARDSON CO., is another proof of what pluck, energy and never sleeping zeal, (combined with a high sense of honor as to the claims of their customers, the public,) can attain. The Diamond Dyes for instance, have reached a popularity so great, that they have taken the palm over all other dyes in the market, in fact other package dyes are fast disappearing and Diamond Dyes in all cases are taking their place. For brilliancy, strength and purity they are unsurpassable, and family dyeing has become not only an easy but a pleasant task. The demand for Diamond Dyes has become so great that the parent house in Burlington, Vermont, has opened large branch establishments in Canada, England and Australia, and the end is not yet.

Their Improved Butter Color also has achieved great victories, being in all cases awarded the first prize for superior qualities not to be found in any other Butter Color. It is quite a boon to the farmer to have an article that will make his butter look "all the round" as rich and golden-edged as the richest made in June. To attain this perfection of qualities and color has been the patient work of years, neither time nor money being spare and with the results above stated. Their lately introduced Cheese Color, though only a few months in the market, is being fast sold throughout the States and in Canada. But the CROWNING POINT GAINED BY THIS WONDERFUL FIRM is their discovery of a new process by which they can make "SUGAR OF MILK," one of the chief ingredients of mother's milk, at a reasonable cost, and by mixing it with the finest parts of the cereals, wheat, oats and barley have manufactured a food for infants and invalids which is chemically and practically most perfect food in the world.

Cholera Infantum and all other troubles arising from very hot weather, weaning and teething, can be avoided by using this food, for it is in itself a preventive and also a cure for these and similar disorders. WELLS & RICHARDSON Co's "Lactated Food," which is the name it goes by, is bound to be as great a success as any thing they ever handled, and will doubtless prove a boon to thousands of sufferers and a great commercial success to the enterprising discoverers.

It seems almost unnecessary to speak of WELLS & RICHARDSON Co's world famed "Kidney Wort" because its name and value is now known over the habitable globe, but its usefulness has been so great in the cure of Kidney and Liver diseases that to pass over this preparation of theirs would be decidedly unfair. It leaves daily in the States not by dozens but by carloads to every part of the Union, and is looked upon by the general public and by hundreds of physicians as the safest, surest and most reliable medicine in the world for the diseases it professes to cure. The house of WELLS & RICHARDSON Co. is one of too high a standing to foist any useless article on the market for merely the sake of gain, and knowing that, we have no doubt but that it is as good a remedy as they claim it to be.

ASTRONOMICAL CALCULATIONS.

NOTE.—In the computation for this Almanac the Seasons, Eclipses, and Moon's Phases are given in Standard Rail Road Time. But it is impracticable to give the Risings and Settings of the Sun and Moon in that time. By the following rule the standard times may be ascertained. For any place east of one of the Standard Meridians, and within 75° of it, four minutes of time must be subtracted from the almanac dates for every degree of difference of longitude. For a place West of any Standard Meridian, within 75°, add four minutes of time to the almanac date of rising or setting for every degree of difference of longitude. Any good school map will give the longitude near enough for the application of these Rules.

THE FOUR SEASONS.—1886.

ECLIPSES.

In the year 1886 there will be two eclipses, both of the Sun. I. An Annular Eclipse of the Sun on March 5, visible in the United States as a partial eclipse. At San Francisco, Cal., the eclipse begins on March 5, 2^h. 59^m. evening, Pacific Standard Time. Ends on March 5, 4^h. 45^m. evening, Pacific Standard Time. Greatest magnitude a little more than 4 digits. East of the Rocky Mountains the eclipse will be visible a short time before sunset. East of Ohio it will be invisible. II. A Total Eclipse of the Sun on the morning of August 29, 1886, visible as a partial eclipse in some portions of the United States. At Cincinnati, Ohio the eclipse begins on August 29, at 6^h. 50^m. morning, Central Standard Time. Ends on August 29, at 8^h. 47^m. morning, Central Standard Time. At New York City the eclipse begins on August 29, at 6^h. 17^m. morning, Eastern Standard Time. Ends on August 29, at 6^h. 45^m. morning, Eastern Standard Time. At Cambridge, Mass., the eclipse begins on August 29, at 5^h. 17^m. morning, Eastern Standard Time. Ends on August 29, at 6^h. 35^m. morning, Eastern Standard Time.

This Diary Almanac will be found the most useful of any Almanac presented to the public.

FAMILY DYEING.

The great study in the average household at the present time is how to economize! Wages have been cut down or incomes reduced in some manner, and it is a necessity to make the dollars go further if we are to keep up appearances. Fortunately it often happens that by looking around the house any number of things can be found that have been laid aside and cast off, that can be made as good as new by being recolored, or that can at least be made over for younger members of the family. Dresses, Cloaks, Wrappers, Shawls, Hoods, Scarfs, Ribbons, Feathers, etc., can be colored over any color desired, by the use of the popular **DIAMOND DYES**.

How to Buy Dyes.

Fortunately almost every druggist and merchant now keep the **DIAMOND DYES**, and those only. It is necessary, however, to be cautious, for in some old fogy places they still have old-fashioned dyes, both in bulk and in packages, which they try to sell; but do not be induced to take these. Insist upon having the **DIAMOND DYES**, and find some live dealer who keeps them. Then there are some unscrupulous dealers who will try to foist cheap imitations of the **DIAMOND DYES** on their customers,

because they can buy them at low prices, and make more profit on them. Avoid these too. You will regret it if you try to use anything but the **DIAMOND DYES**. These only represent the latest scientific achievements in this field, and these are the only ones so prepared that any one can use them with success.

An iron-clad oath follows the sitting down upon a tack.

It's meet and drink that is depriving many a family of food.

Widows and widowers often mend their conditions by re-pairing.

A lady who had boasted highly at a dinner party of her little darling addressed him thus: "Charlie, my dear, won't you have some beans?" "No," was the ill-mannered reply of the petulant cherub. "No!" exclaimed the astonished mother; "no what?" "No beans."

KIDNEY WORT

THE BEST REMEDY

EVER DISCOVERED FOR

Kidney Diseases,

LIVER COMPLAINTS,

CONSTIPATION, PILES,

RHEUMATISM,

DYSPEPSIA AND DEBILITY,

Because it acts at the same time on

The Kidneys, The Liver,

AND

THE BOWELS,

Stimulating them to healthy, vigorous action. It restores their ability to throw off all impurities; it regulates the flow of bile; it cures the worst cases of Constipation and Piles and all forms of Kidney Complaints, such as difficult and painful urination, weakness and incapacity of holding urine, brick-dust deposit, mucous or milky discharges, Gravel and Diabetes. For Female weaknesses it is the great remedy, and it speedily eliminates all Rheumatic Poisons from the system.

It is put up in *Dry Vegetable Form*, in tin cans, one package of which makes six quarts of medicine.

Also in *Liquid Form*, very concentrated, for the convenience of those who cannot readily prepare it. It acts with equal efficiency in either form.

PRICE.

Kidney-Wort, Dry, in Tin Cans, \$1.00

Kidney-Wort, Liquid, in Bottles, 1.00

The Dry Form is the most economical. The Liquid the most convenient. It is equally efficient either way.

Almanac Patented April 11, 1882. (3) Licensed by G. G. Green, Patentee.

Use these diary pages for memoranda of accounts, payments, engagements, etc.

Preparing the Dyes for Use.

Having procured the color of **DIAMOND DYE** which you wish to use, put the powder in a large bowl, or a bright tin or granite iron dish, moisten it with cold water, and then pour on sufficient boiling water to dissolve it completely. Before using, it is always well to strain through a cloth, that there may be no undissolved particles get into the dye bath to spot the goods. The exceptions to the above rules are the black and some other of the dark colors, for which follow the special directions on the package.

For those Dyes for which vinegar is directed to be used, be sure that it is not forgotten, as it is important in order to enable the Dyes to go on the goods readily and to set the color.

Coloring Yarns, Carpet Rugs, etc.

There are probably more dyes used for these purposes than for any other, and such has been the case always. In many sections of the country every thrifty housewife spins yarn, and makes carpets or rugs. We wish to remind all such that the most disagreeable part of the work has been completely revolutionized by the introduction of the wonderful **DIAMOND DYES**; by their use the coloring can be done in one-fourth the time and at less expense than with the old fashion dye-stuffs, while the colors are more brilliant and durable. If your materials are cotton, remember to get the special cotton colors.

Coloring Cotton.

The Diamond Dyes of most colors work well on Cotton, but for a deep Blue, a good Yellow, Green, Cardinal, or Scarlet, it is necessary to have dyes specially prepared, for these dyes for Silk and Wool do not color Cotton well.

For Brown on Cotton we recommend Refined Gum Catechu, sold in packages with full directions. It makes the best and most durable Brown known on Cotton.

If you wish to know just what colors you can get on Cotton from the Diamond Dyes ask the dealer to show you the Sample Book of Colors on Cotton.

A bad marriage is like an electric machine: It makes you dance, but you can't let go.

A miss was asked by her parents which she would prefer for a present, a pair of roller skates or "The Youth's Companion." "I will take the skates, if you please," she said, "I can get a companion at the rink."

A buxom country girl rode into Carlisle, Pa., the other day, wearing a jaunty-looking hat of strictly domestic manufacture. It was made wholly of oat straw and corn shucks that grew upon her father's farm, and was trimmed with chickens' feathers dyed with Diamond Dyes. She created a sensation.

KIDNEY DISEASES.

The symptoms of kidney diseases are many and varied. Some of the following are usually present: Pain in the small of the back, usually of a dull, dragging nature, but sometimes acute and severe; a disordered state of the urine, sometimes pale in color and very copious, at other times high colored and scanty, often with brick-colored sediment or with settling of mucous, offensive and foul smelling; a general feeling of lassitude and weakness, and inability to perform usual amount of work, either mental or physical. These symptoms are often complicated with others, caused by derangement of other organs, which also are really symptoms of disease primarily located in the kidneys. No remedy ever equalled

KIDNEY-WORT

in banishing these symptoms and in curing the disease. Do not delay until it is too late, for if not remedied, it will ere long be too late, but take *Kidney-Wort*, and you will soon again be rejoicing in health and strength. Thousands have been cured, and you may be. Try it faithfully and at once.

ALEXANDER AVERY, Akron, N. Y., says:

"I was obliged to get up from three to five times every night. Ropy urine with a heavy sediment, constant headache with pain in the back and kidneys. Three years ago I took my first package of *Kidney-Wort*, from the first dose my health improved. I took some three packages and have been a well man since."

WM. HOPE, Meadville, Pa., says:

"I had pain in the small of my back. Urine high colored with a dark sediment, my appetite and circulation very poor, the extremities often becoming purple from this cause. This continued for one year. Two boxes of *Kidney-Wort* completely cured me and now at the age of 79 I am proud of my health which I owe to *Kidney-Wort*."

THOMAS GREEN, Mayville, N. Y., says:

"I had to get up many times at night, and my urine was high colored with a brick-dust deposit. One box of your *Kidney-Wort* cured me."

SAMUEL DUPEE, Cherry Creek, N. Y., says:

"For four years I hardly knew what it was to have a good night's rest: the pain in my back and kidneys was so intense. My urine was thick and high colored like brick-dust. After the first dose of *Kidney-Wort* I went to bed and slept all night. I have taken four bottles and consider myself cured."

Telephone is feminine — it talks back.

Sitting down on a hornet's nest is stimulating, but not nourishing.

The man with rheumatism is every inch a king.

A man may be so wrapped up in science that he forgets all things else; but he never fools with electricity and gunpowder more than once.

"What is the safest way to transfer bees?" asks a suburban correspondent. Hire somebody else to do it, and be in the next county when it is done.

Keep a daily record of the weather, and save the almanac for future reference.

Coloring Garments, Dresses, etc.

Since the **DIAMOND DYES** have been offered to the public, dyeing of large garments has become easy and practical in every household. Before that it was only done by the regular dye-houses, and the expense was such, that few made a practice of having it done.

Now at a trifling expense it can be done in any house, and any one can save many dollars every year by the extra wear they can get from garments that have been renewed in this way. Coats, cloaks, and heavy garments can be dyed without ripping. If dresses are to be made over, of course it is best to rip them, but if not, it is only necessary to let out the drapery in order that they can be easily handled in the dye-bath.

Coloring over Other Colors.

In coloring over other colors it is usually desirable, especially if much change is to be made, to discharge as much as possible of the old color. This is best effected by boiling in strong soapsuds and rinsing, and repeating this as long as any color comes out into the water. All colors can be re-dyed or made a darker shade of the same color. In this way the **Diamond Dyes** are very useful for reviving faded or dingy colors.

SCARLET, CARDINAL RED, CRIMSON, MAGENTA.—All kinds of Pink or Red can be made brighter and deeper with these dyes. They will color over Yellow or Orange, making various shades of Scarlet; over Blues, Purples and Violets, making various shades of Purple; over Slates, Drabs, and Browns, making various shades of Crimson, Maroon, or Garnet.

BISMARCK BROWN, SEAL BROWN.—These will color over all colors except Black, making various shades of Brown. Drabs or Slates take the best Brown. Over Green they make a bronze; over Reds a Garnet; over Purple a Maroon, or Dark Wine.

PURPLE, VIOLET.—Will color over Reds and Blues, and all light colors, making various shades of Purple or Violet. Violet colors over Black to Seal Brown.

YELLOW, ORANGE, OLD GOLD.—These will only make good colors on white or very light colored goods. They make all other colors of a yellowish shade.

GARNET, MAROON, PLUM, NAVY BLUE, DARK BLUE, DARK GREEN.—These will color over all light colors, making various shades of the colors named.

Little Jack—"My mamma's new fan is hand-painted." Little Dick—"Pooh! Who cares? Our whole fence is."

"What's the reason you didn't speak to Jones when he passed us just now?" "He insulted me the other day." "What did he say to you?" "He called me an old ass." "Called you an old ass! How ridiculous! Why, you are not old."

(6)

LIVER DISEASES.

The usual symptoms of a disordered liver are, loss of appetite, sometimes nausea and vomiting, a vague and indescribable uneasiness in the epigastric and hypochondriac regions, a tendency to constipation, furred tongue, disordered vision, general disquietude, great and apparently causeless depression of spirits, and a disposition to gloomy views on all subjects. These symptoms, if not speedily grappled with, will result in most serious consequences to the whole system, producing biliousness, jaundice, biliary calculi, or gall stones, fatty liver, waxy liver, nutmeg liver, cepts, hydatids, malignant affections, death.

KIDNEY-WORT

goes to the root of all these evils, and by the mild but certain virtues inherent in it, throws off the morbid poisons that have been the cause of all, infuses new life into every organ, and the result "devoutly hoped for" — health — ensues.

JOHN D. NEVENS, Springfield, Ohio, says: "After spending time and money, and suffering untold agony with a disordered liver and urinary trouble, I was induced to try **Kidney-Wort**. The change is great. I am a living advocate of its virtues."

GEO. W. HUTCHINSON, New Haven, Conn., says: "I have been troubled with torpidity of the liver and deranged stomach, bowels and kidneys. I had read of the value of your **Kidney-Wort**, but thought I would consult my doctor before taking it. To my surprise he told me it **WAS AS GOOD A MEDICINE AS I COULD TAKE**. By its use I was completely restored to health."

E. E. CARNER, Gen'l Agent Mutual Benefit Life Insurance Co., Troy, N. Y., says: "For three or four years I did not know what it was to have a good night's rest, or to enjoy a good meal of victuals. I had terrible headaches and pains in my kidneys, my urine was so thick that it was passed with difficulty, pain in my limbs so that it was torture to stand or walk. I tried several doctors in the city but without benefit. My weight became reduced to one hundred and twenty pounds. I purchased a bottle of **Kidney-Wort** and began taking it. Within one week I was able to eat a good hearty meal without being distressed. I took in all four or five bottles, my weight began to increase and at present I weigh one hundred and fifty pounds. The headache and pain in my back have left me and I am in as good health as any one could wish for, have not paid one dollar for medical services for the past eighteen months."

A girl ran away from home, and the father advertises her as "Laura, aged 18, dressed in a straw hat." What a fix she'll be in if that hat should blow off.

A gossiping woman, intent on slander, went into a neighbor's and exclaimed, as she threw herself into a chair, "One-half the world doesn't know how the other half lives!" "That isn't your fault," quietly responded the neighbor.

The **Diamond Dyes** always do more than they claim to do. You can color over that dress, and it will look like new.

MOON'S PHASES—New Moon, 4th, 0.31 mo.; First Quarter, 11th, 7.44 eve.; Full Moon, 18th, 9.50 mo.; Last Quarter, 26th, 0.15 mo.

Almanac Patented April 11, 1882.

(9)

Licensed by G. G. Green, Patentee.

Keep the dates of putting in your crops, and of doing other important work.

Coloring Everlasting Flowers, Grasses, Mosses, etc.

Dip into a hot-water bath made quite strong with the dye, and dry carefully. Some flowers, etc., are so waxy, they will not take the dye from water. For such dissolve the dye in a weak shellac varnish, and dye in that. Beautiful winter bouquets can be made up from these colored grasses, and home made lovely and attractive during the dreary winter months.

School Teachers, Attention!

Lessons in colors are given in many primary schools, and ought to be given in all. There is no necessity of buying expensive chromo color charts, when a small sum invested in Diamond Dyes and one or two cheap brushes will give ample facilities for producing as many as are required. Children are always interested in articles made in the school-room, and such articles to them have an increased value. No child can get a definite idea of green, violet, or any color from any description you can give him; but produce the color before him and you have taught him a life long lesson that will never need to be repeated. Teachers will readily see the many uses of the dyes in mixture of colors, complementary colors, production of different shades, etc.

They can also be used to great advantage with advanced classes in the study of Arithmetic, Geography, Natural Philosophy. Send stamp for pamphlet entitled "Hints to Teachers" which contains full instructions for use, to Wells, Richardson & Co., Burlington, Vt.

Coloring Baskets, etc.

Coloring fancy baskets can be very easily done with Diamond Dyes. They may either be dipped in the dye bath, or the dye dissolved in alcohol and applied with a brush. For delicate baskets the latter is the best method. Use the dye cautiously for if you get too much it will give a dull bronzy look. Any object of wood or vegetable fibre can be dyed in the same manner. Ivory, bone, fish scales, etc., take the dyes readily from the bath.

"Adieu," she said sweetly, as he kissed her good-night. "He's adieu'd, ain't he?" sung out her little brother, as he vanished upstairs.

A girl who could spell Deuteronomy,
And had studied domestic economy,
Went to skate at the rink,
And as quick as a wink
She sat down to study astronomy.

RHEUMATISM.

This disease, terrible in its ~~course~~ and long enduring in its ~~duration~~, is one of the most ~~common~~ diseases that flesh is heir to. It is a disease that will not bear neglect, for if not treated promptly will remain till death, to pain, harassment, and make life miserable. It is also a constitutional disorder and hereditary. Because of an inactive condition of the kidneys and bowels the blood is not purified, and an acrid poison is formed and deposited in the muscles and joints, and this causes the inflammation and intense suffering. Some of its effects are fatal, especially when it affects the heart, which often causes sudden death. What a blessing that a remedy has been found that counteracts the poison and eliminates it from the system.

KIDNEY-WORT

has been found to do so thoroughly, and no better remedy can be found than it; for it promptly alleviates pain, and banishes the disease from the system.

U. J. BUXTON, Marion, Ohio, says:

"I was affected with rheumatism and urinary trouble for some time. I made a trial of Kidney-Wort and before one package was taken, I was well."

JOSUAH HUTCHINS, Ripon, Wis., says:

"One year ago I was laid up with rheumatism and kidney troubles in their worst form, so I could not work. Used a number of remedies without relief. I was advised to try Kidney-Wort. I have taken five packages, and can now do a good day's work on the farm."

H. T. MILLS, Independence, Kan., says:

"I was afflicted with inflammatory rheumatism for fifteen years, used many remedies but found no relief until I tried Kidney-Wort, which has entirely relieved me. My wife has also used it with great benefit."

P. S. COLLINS, Ripon, Wis., says:

"Have had rheumatism for two years; received no benefit from doctors or 'batteries.'" Seeing Kidney-Wort advertised I bought a package and at once found relief. I could not get along without it."

M. A. DAY, Vassalboro, Maine, says:

"I was very lame with rheumatism, could hardly walk, my joints swelled badly, I could with difficulty turn in bed. I was induced to try a bottle of your Kidney-Wort and I am now able to attend to my regular duties."

"Oh, I do so dote on the sea," she gurgled. "If you only had a yacht, Augustus dear!" "I have no yacht, Wilhelmina," he sighed, "but I can give you a little snack." And then it sounded as if a cork had flown out of a bottle.

You may talk of the signs of the weather,
Of the coming days you may sing,
But sitting down on a red-hot stove
Is a sign of an early spring.

The most noted dairy authorities recommend Wells, Richardson & Co.'s Improved Butter Color.

MOON'S PHASES—New Moon 3d, 10.43 eve.; First Quarter, 10th, 9.21 eve.; Full Moon, 17th, 8.47 eve.; Last Quarter, 25th, 6.36 eve.

Almanac Patented April 11, 1882. (11) Licensed by G. G. Green, Patente.

Set down how much butter you make weekly, and continue to use the Improved Butter Color.

Coloring Photographs, Engravings, Maps, etc.

The beautiful art of coloring photographs, etc., with Liquid Water Colors, is the latest and most fascinating form of art work, and is the reigning sensation in the large cities.

The very best colors can be made from DIAMOND DYES at one-tenth the expense of those sold under high-sounding names, as "Royal Art," etc. Full directions for making the colors and complete instructions so that any person can do good work

without taking lessons, sent to any address on receipt of a stamp. A finely colored cabinet photograph as sample, sent for ten cents, and uncolored photographs furnished at 75 cents a dozen.

The Diamond Paints.—Gold, Silver, Copper, and Bronze,—can often be used to good advantage in connection with this work.

Engravings or Pictures without glazed surfaces, need no preparation, but caution should be used in applying the colors, to use but little liquid.

Children's Books can be decorated in Kate Greenway style, with beautiful effect.

Maps or Sketches can be drawn in black, and the colors can be put on over the drawing without changing the black. Do not use the colors too strong. School children will be greatly interested in coloring their drawings in this way.

Kalsomining.

Kalsomine can be beautifully tinted with the DIAMOND DYES, and at a trifling expense.

One package tints ten to fifteen pounds, handsome shades for walls. The favorite colors are Yellow, Orange, Cardinal, Slate, Magenta, Crimson, Bismarck, Violet, Green, Blue for Cotton. The best blue shades can be made by mixing the Green and Blue for Cotton.

To make good Kalsomine dissolve one-fourth pound good glue to each ten pounds of Paris White. Mix with sufficient water to give the right consistency. To tint it, dissolve a package of dye in a quart of water, and add as much as is necessary to give the color desired.

For Frescoe Paints, a package of dye should be used with from one to three pounds of Kalsomine.

An ounce of keep-your-mouth-shut is better than a pound of explanation after you have said it.

A young lady told her mamma that all the caries wear white pants, then her little brother added, "and so do their sisters and their cousins and their aunts."

"What is an epistle?" asked a Sunday-school teacher of her class. "The wife of an apostle," replied the young hopeful.

CONSTIPATION.

Constipation is also often attended, even in its occasional attacks, with dulness, depression of spirits, drowsiness, irritability of temper, vertigo, headache, flushing of the face, pains in the loins and limbs, palpitation, breathlessness, furred tongue, gastric derangements, and various disorders in the biliary, urinary and generative organs. When habitual, in addition to above, there is piles, colic, congestion of liver and inflammation, dyspepsia, sick headache, foul breath, apoplexy, epilepsy, paralysis, hysteria, melancholy, and hypochondriasis. All of these have constipation as their source.

KIDNEY-WORT

is a perfect remedy for all forms of constipation. Restoring the natural condition of the secretive glands of the intestine, the proper amount of mucous fluids are mixed with the excretory matter, and thus that dry and hard state which produces such suffering is prevented. Then it causes more vigorous peristaltic action, and so more frequent and natural movements.

J. D. McDOWELL, Salamanca, N. Y. says:

"Have been troubled with kidney difficulty, constipation and piles. Doctors and their medicines did no good. Kidney-Wort made a new man of me."

A. B. TRENNER, Cincinnati, O., says:

"Five years ago I commenced taking Kidney-Wort for constipation, was at the same time suffering with dyspepsia. By its use have been cured of both complaints."

E. E. CARNER, Troy, N. Y., says:

"Constipation troubled me to that extent that it would give me a siege of colic two or three times a month. I took Kidney-Wort and was cured, and can now truthfully say, it is one of the greatest remedies of the age."

Mrs. S. A. COOPER, No. 7 Edinboro St., Boston, Mass., says:

"Have been afflicted with constipation for nearly forty years and some bad forms of urinary trouble. I have employed many physicians with little benefit. Also have used some ten of the most popular Kidney and Liver Remedies without any lasting results. The use of Kidney-Wort has nearly restored a healthy condition of both liver and kidneys and has well nigh cured my dyspepsia, which was driving me into a state of mental despair which my physicians said would end in insanity."

The difference between a woman and an umbrella is, that you can shut up an umbrella.

"How one thing brings up another," said his lady, in pleasing retrospection. "Yes," replied Dibble, "an emetic, for instance." She left the table in a huff.

Answer me this question, darling,

Only this and nothing more:

I beseech you, tell me truly,

When we're married will you snore?

Keep a memoranda of your sales, and the prices and amounts, and so learn to be methodical.

Coloring Feathers, etc.

Feathers readily take the most beautiful colors from **DIAMOND DYES**. Clean the feather by soaking in strong soap-suds fifteen minutes, then draw gently between the thumb and forefinger a number of times, and rinse in warm water; dye up to the shade required, rinse in cold water, and press gently with the hand between two cloths, to remove the water. Now hold before a gentle fire, shaking slightly until nearly dry, then curl by taking three or four sprigs of the feather and drawing briskly between the thumb and the back of scissors, and so on until it is finished. Old feathers can be re-colored and made to look like new. To color feathers a good black is difficult, and we do not recommend inexperienced persons to try it.

Live birds can be colored the most brilliant shades by simply applying a strong solution of the dyes with a brush or sponge. A number of druggists have made a handsome display of colored birds or chickens as an attractive window advertisement, and it never fails to draw a crowd. For this purpose it sometimes works better to dissolve the dyes in alcohol, especially if the feathers seem oily.

Odd Colors.

Many colors are called different names by different persons, and different shades of the same colors are often known by different names. Below is a list of such colors, and directions by which they can be made.

Blue Black.—A Dark Navy Blue.

Bronze.—A combination of Bismarck and Green.

Light Brown.—Bismarck Brown, or a light shade of the Brown.

Buff.—A light shade of Orange.

Canary—Lemon—Straw.—Light shades of Yellow.

Gray.—Can be made from Slate or Drab, or by using a weak Black dye.

Grass Green.—A light shade of Dark Green.

Lavender—Mauve.—Light shades of Violet.

Lilac.—A light shade of Purple.

Olive.—A dark, heavy shade of Old Gold, or a combination of Old Gold and Dark Brown.

Peacock Blue.—Add a little Green dye to the Dark Blue.

Peacock Green.—Add a little Light Blue dye to the Green.

Ponceau.—Crimson.

Red—(Aniline).—A heavy shade of Magenta.

Rose.—Solferino.—Light shades of Magenta.

Ituby.—A light shade of Plum.

Salmon.—A combination of Orange and Cardinal Red.

Steel.—Use a weak Black dye.

A young politician explained the tattered condition of his trousers to his father by stating that he was sitting under an apple tree enjoying himself, when a farmer's dog came along and contested his seat.

PILES.

This is one of the most annoying and most painful of diseases. It is brought on by weakness of the lower part of the bowels, often induced and always aggravated by constipation. It may sometimes be temporarily relieved by external applications, but never cured. It must be treated by a remedy that restores to health the intestinal system, and such a remedy is

KIDNEY-WORT

G. J. VANDERPOOL, Mukwanago, Wis., says:

"I suffered untold misery with kidney difficulty and piles. No medicine gave any permanent relief I was urged to try Kidney-Wort and before the first package was taken I began to feel better; after using three or four packages have recovered. Would recommend it to all who suffer from the piles."

ABRAM MILNE, Madison, Kan., says:

"Have been afflicted with the piles for 20 years. My case was considered hopeless. As a last resort used Kidney-Wort which completely restored me."

ALBERT M. ROBINSON, Francisco, Gibson Co., Ind., says:

"I have had piles for at least thirty years, have used many remedies and was treated by a leading physician of the place, with little or no relief. I was advised to try Kidney-Wort. The first dose stopped the bleeding and relieved me every way. I have now taken nearly two packages and feel that I am completely cured."

WM. M. WILKINSON, Augusta, Ga., says:

"A friend of mine was afflicted for ten years with piles could get no relief from doctors or medicine. He was induced to make a trial of Kidney-Wort and is now cured by its use, I know of another case of cure by the same means."

KATE MATLOCK, Odessa, La Fayette Co., Mo., says:

"Have been an invalid for 25 years. In that time have been treated by 13 different doctors. Have had trouble with the kidneys for fifteen years. Have been confined to the bed most of the time for the last two years with pain in the back, scalding and scanty urine, with bloody sediment, constipated bowels and piles. Four doses of Kidney-Wort changed the character of the urine, stopped the bloody sediment; and its continued use established my appetite and cured the back-ache and piles."

MARSH NOE, Chief Fire Department, Davenport, Iowa, says:

"I have been troubled with kidney disease for a great many years and tried many remedies, but found nothing that gave me relief, until I began the use of Kidney-Wort."

What is the difference between a camel and some men we could mention? A camel will work for seven or eight days without drinking, while some men will drink for seven or eight days without working.

MOON'S PHASES—New Moon, 1st, 5.07 eve; First Quarter, 8th, 8.18 mo.; Full Moon, 15th, 10.09 eve.; Last Quarter, 24th, 2.21 mo.; New Moon, 31st, 0.26 mo.

Almanac Patented April 11, 1883 (15) Licensed by G. G. Green, Patentee.

For one dime get a package of Diamond Dyes at the Druggists. They color anything the simplest and most desirable colors.

Coloring Easter Eggs.

Dye, any color wanted, and a tablespoonful of strong vinegar to a pint of boiling water, then put in the eggs and let them remain until of the desired shade. The eggs may be eaten with safety after being colored.

Staining Wood.

Beautiful wood-stains can be made from the DIAMOND DYES, either for any of the bright colors wanted, or by properly combining different colors to imitate any of the costly woods. The following combinations are recommended, but quantities need to be varied somewhat according to the kind of wood the stain is to be used on.

For Cherry Stain, use one package of Terra-Cotta dye in one quart of water.

For Mahogany Stain, use two packages of Orange, two of Cardinal, and one of Blue for Cotton dissolved in two quarts of water.

For Black Walnut Stain, use one package of Cardinal, one of Slate, and one of Blue for Cotton dissolved in three pints of water.

To Ebonyize Wood.—Take one package of Black Dye and dissolve the yellow powder, and the dye separately,—the powder in one pint of hot water and the dye in one quart. The dye should be kept at a boiling heat for half an hour. The wood should be gone over first with the hot solution of the powder; after ten minutes make a second application, then one or two applications of the hot dye. If not sufficiently black repeat the process. For small articles the Diamond Artist's Black is to be preferred.

Mahogany Varnish for Wicker Work, etc.

Wicker chairs in mahogany color are very popular now, and many chairs that have become yellow and dark by age can be made as good as new, and in the best of style.

This Varnish, which by one application will give a handsome effect on any article of wicker or wood work, may be made as follows:—

Dissolve one package each of Magenta and of Cardinal for Cotton Dyes in one pint good Shellac Varnish.

Apply with a soft bristle or camel's hair brush.

A Georgia man has paid for a farm with the melons off it, to say nothing of the struggling young doctors he has firmly established in business.

"You seem to have plenty of business here," said a drummer to Miss Fitz, the dressmaker. "There's a heap more bustle than business," was the lady's reply.

EVERY WOMAN IN THE LAND

owes it to herself and to her family, when she finds her health failing, her system getting disordered, and debility and weakness sapping insidiously her health and strength, to make a trial of this sure and safe remedy. Acting as

KIDNEY-WORT

does on the liver and kidneys at the same time, it enables these important organs to throw off accumulated poisons; it strengthens them for the proper performance of their functions; it moves the bowels freely and cures the habitual costiveness that is such a bane to nearly every American woman.

Mrs. MARY WABER, Kendall, Mich., says: "While suffering from a severe attack of Kidney disease, with aggravated uterine complications, I was induced to try a bottle of your valuable medicine. In less than three hours after taking the first dose I was more comfortable and continued to improve steadily until recovery was complete. A few months later I had a return of my old malady with other complications. Kidney-Wort gave me relief at once."

T. N. KINGOLEY, Gowanda, N. Y., says: "Three years ago my wife was attacked with inflammation of the kidneys. At the same time suffering from troubles peculiar to her sex, Kidney-Wort has restored her to complete health and we believe saved her life."

C. M. SUMMERLIN, M. D., Sun Hill, Ga., says: "For two years my wife has been a sufferer from chronic inflammation of the bladder, together with constipated bowels, and pains in the lumbar regions. She tried prescriptions by myself and other physicians, but they only palliated for a time. She concluded to try Kidney-Wort. She has taken five bottles and now thinks she is well."

REV. SAMUEL PORTER, Crete, Ill. Co., Ill., says: "My wife was for a long time a great sufferer from chronic inflammation of the bladder. By the use of Kidney-Wort she has been entirely relieved."

WM. CORNELL, Waterloo, Iowa, says: "My wife has made use of Kidney-Wort, and it was worth everything to her at the critical period of life."

CATHERINE MILLER, Shelby, Ohio, says: "I have suffered for a long time from habitual constipation, with severe pains in the stomach and rheumatism—besides I was greatly troubled with congestive chills. Some four months ago I commenced the use of Kidney-Wort. I have gained my lost flesh and am cured of the constipation, rheumatism and chills."

May a colored man posting a letter be called a case of black-malling?

A small boy says the leaves of tables are called leaves because you can leave them up or you can leave them down.

Some say that a man who would "beat an egg" would be so cruel as to "whip cream," "thrash wheat," or even "lick a postage stamp."

MOON'S PHASES—First Quarter, 6th, 4.06 eve; Full Moon, 14th, 1.24 eve.; Last Quarter, 22d, 2.42 eve.; New Moon, 29th, 7.54 mo.

Almanac Patented April 11, 1882. Licensed by G. G. Green, Patentee.

When your crops are harvested put down the acreage and the yield. Each year try to excel previous years.

LADIES' SHOE DRESSING.

All liquid dressing for ladies' shoes, superior to any sold in bottles, can be easily and cheaply made as follows: By the aid of heat dissolve one ounce of Borax and two ounces of Gum Shellac in a pint of hot water. Some time is necessary for this. If the gum does not wholly dissolve—strain. While still hot, dissolve two packages of DIAMOND PLATE DYE in the liquid, and add one-half ounce of Glycerine. The vessel used

should be twice the capacity of the quantity made, and care taken to prevent boiling over. Apply to shoes with a swab or cloth.

Making Ink.

Writing Ink, Copying Ink, Ruling Ink, Stamping Ink, Shading Ink, Stencil Ink, Marking Ink, Copy-pad Ink, of any color, and of the best quality, can be made by simply dissolving a package of DIAMOND DYES of the color wanted. They are BETTER than the inks sold in small bottles, and cost less than one-fourth as much.

Slate Dye makes Black Ink.

Eosine Dye makes Scarlet Ink.

Purple Dye makes Purple Ink.

Violet Dye makes Violet Ink.

Light Blue Dye makes Blue Ink.

Green Dye makes Green Ink.

Writing Ink.—Moisten the dye with a little cold water, then add a pint of boiling water; stir until dissolved, and your ink is ready for use. For Violet and Purple, use a quart of water.

Copying Ink.—Use but half the quantity of water, and add two ounces of rock-candy.

Stamping Ink.—(For Rubber Stamps).—Dissolve the powder in four ounces of Glycerine.

Marking Ink.—Dissolve a package in from one-half pint to one quart of water, according to strength needed.

Stencil Ink.—The same as for Marking Ink. To use, put a sponge in a cup and saturate with the ink. Then use with a brush.

Colored Lacquers.

Beautiful colored Lacquers or Varnishes can be made from the Diamond Dyes by simply dissolving a very small amount of the color wanted in White Shellac Varnish. In this way a handsome colored coating, perfectly transparent, can be put on any object wanted, whether of metal, glass, wood or stone.

We recommend for this work the cotton colors without the mordant.

Don't be proud, young man. Adam and Eve were among your ancestors, and they couldn't show a marriage certificate to save their reputation.

Surprise is one of the elements of art. This is why a man always laughs (?) when he sits down on a pin.

Nothing in this world yields larger and quicker returns on the amount invested than poking a wasp with your finger to see if he feels well.

(18)

MALARIA.

One of the most common sources of disease in this country is the state of the system following the inhalation of noxious, deadly malaria. This dreaded, unseen, almost omnipotent and omnipresent poison, the parent of fever and ague, even though it may not always produce that particular disease, always gives to the system a condition of blood highly favorable to the entrance of other diseases.

KIDNEY-WORT

is the most powerful enemy to malaria extant. It strengthens the system, neutralizes the poison, and renders it harmless and inoperative. In malaria districts it amounts almost to a crime to be without it. Remember constant vigilance is the price of safety. Make free use of Kidney-Wort and you need have no fear of ague, chills, slow fevers, and that lassitude and debility which always accompanies attacks of malaria.

HENRY WARD, Late Col. 69 Reg. N. G., S. N. Y., New York City, says:

"I have suffered perhaps as no other man has suffered, from liver disease, brought on by malaria. Last year I went to Europe to try and better it, but came back worse. I came to the conclusion to try Kidney-Wort; and I want to tell all sufferers from liver diseases that the last three weeks I have enjoyed such good health as I have not had in many, many years."

D. L. Cowdrey, Esq., County Clerk of Walworth Co., Elkhorn, Wis., says:

"Over one year ago, my kidneys and liver became affected from close confinement at my desk. This became complicated with dyspepsia. I took Kidney-Wort and from the first began to get better. I soon could take a good meal. The pain in the back and kidneys left me and I am well again. I consider it the best remedy for kidney complaints, constipation, dyspepsia or rheumatism."

EDWARD F. HOBBS, Palmyra, N. Y., says:

"I had typhoid fever which left me quite low and with very weak kidneys. In January of the same year I slipped while cleaning away the snow at my door. Was confined to my bed eighty days, could not get up or turn over without help. My urine was high colored and threw down a brick-dust sediment. Physicians did me no good. A friend gave me some Kidney-Wort and from the first day I could see I improved. It cured me from constipation and got me on my feet."

"Will somebody please tell what is the nitrate of soda?" Usually about 75 per cent in excess of the day rate. All depends on the druggist you patronize.

"Will you admit you are licked?" yelled the upper man in a street fight. "No, str," replied the under one, "I ain't licked, but—I'm satisfied."

"I had no time to stuff the chicken," apologized a landlady. "Never mind, madam, its tough enough as it is," replied the boarder.

MOON'S PHASES—First Quarter, 5th, 2.56 mo.; Full Moon, 13th, 5.50 mo.; Last Quarter, 21st, 8.53 mo.; New Moon, 27th, 4.19 eve.
Almanac Patented April 11, 1882. (19) Licensed by G. O. Green, Patentee.

Ladies can keep their accounts very easily in these diary pages, and will find it an excellent thing to do.

Coloring Ribbons, Neckties, etc.

These articles can be very readily and very easily colored to any desired shade. If soiled, they should be cleansed carefully, then dyed as per directions. When nearly dry, press carefully between two cloths. A very good way for ribbons is to wind them tightly around a bottle filled with hot water and let stand until dry.

Coloring Draperies, Covers, etc.

Articles of this kind can be colored without difficulty, and we have seen many things that have become badly demoralized by age and exposure to the light, made to look as good as new by the use of **DIAMOND DYES**.

Coloring Hair.

Articles made of real hair fade badly after a few seasons' use. It is of great value to ladies to know that these can be made to exactly match any darker shade, by carefully treating them with **DIAMOND BLACK DYE**.

Switches, or any article made of hair, should be washed with soap and water, to remove grease, then be dipped in a weak dye, hot, made with the **Black Dye**. It takes but a moment to make hair two or three shades darker. When dyed, wash in weak soap-suds, rinse, dry by a gentle heat, and dress with a little oil. The **Brown Dye** is not suitable for hair. White hair of any kind can be colored any of the bright or dark colors.

Colored Crayons.

Colored crayons for school use can easily be made from the cheap white crayons. Use the *soft-finish* crayon. Place as many as are needed in the cup and pour on dye to cover them. Let it stand about ten minutes. Then pour off the dye to be kept for further use. Place the wet crayons where they will be kept warm about twelve hours. Any number of colors may be made in the same way.

Art-Work on Plush.

Fancy cushions, tidies, mats, etc., can be made of white plush, and they can be beautifully tinted and decorated by applying, carefully, solutions of **Diamond Dyes**. Dark shades and bas-relief effects are made by application of a red-hot wire which scorches the delicate plush and gives very novel results.

"Silence is golden," says the proverb. It sometimes may be guilt.

A woman may be as true as steel, but then you know some steel is too highly tempered.

There is 'but little bad luck in the world, but there is a heap of bad management.

WHAT IS SAID OF

KIDNEY-WORT,

By an Old and Respected Physician,

A "REGULAR" OF THE OLD SCHOOL.

MONKTON, VT., June 1st, 1882,

Gentlemen:

I have always been opposed to the use of patent medicines, as I am of the opinion that more harm than good is done by their indiscriminate use. Knowing of some remarkable cures performed by **Kidney-Wort**, I feel it but just that the public should know of them. I was induced to use it in my practice, by positive evidence of its virtues, and have done so to a considerable extent for the past two years.

One of the first cures was that of Mrs. A., who had suffered for years from an obstinate kidney trouble, complicated with constipation and uterine difficulty. There was an inflammatory condition of the organs, which caused much pain and often severe suffering.

I had prescribed previously all the remedies usually employed in such cases, but without benefit. I procured **Kidney-Wort** for her and directed it to be prepared and taken according to directions; it relieved the pain and suffering almost immediately and gave a favorable turn to all the symptoms.

Her recovery progressed rapidly and in a comparatively short time I was able to pronounce her cured. She has ever since been much stronger and healthier than for years before. I could detail a score or more of other cases in which I have used it with the same marked results, if I had time and space.

In the various kidney troubles it has been a very efficient remedy, far more decided in its effect than **Buchu**, **Uva Ursi**, **Spirits Nitre**, and the other agents usually employed.

Its diuretic properties show themselves in two to four hours, while as a laxative and cathartic it produces the happiest results, relieving the bowels speedily and without disagreeable effects. Its action is prompt and the effect lasting. Being curative and tonic, it restores a condition of health and regular action which other cathartics usually fail to do.

This spring I found that through a close attention to my professional duties I had become worn and was in need of a diuretic and cathartic myself. I at once took a few doses of **Kidney-Wort** and found it to operate equally well in my case.

Very sincerely yours,

PHILIP C. BALLOU, M. D.

"Johnnie," said his sister, "you must not commence a quarrel; let the other boy begin."

"Well," exclaimed the little hero, "but if I wait for the other boy to begin, I'm afraid there won't be any fight."

(20)

Hoods, Scarfs, Ribbons and any fancy articles can be made any color wanted with the **Diamond Dyes**. All the popular colors.

MOON'S PHASES—First Quarter, 4th, 5.33 eve.; Full Moon, 12th, 10.24 eve.; Last Quarter, 20th, 9.41 mo.; New Moon, 27th, 2.15 mo.

Almanac Patented April 11, 1882. (21) Licensed by O. G. Green, Patentee.

A short daily diary is a very interesting thing in after years, and can easily be kept in this almanac.

Diamond Paints for Art Work.

THE DIAMOND PAINTS for all decorative or fancy work are unsurpassed. They are sold at ten cents a package, and are equal in quantity and quality to the fifty cent packages of other makers. They can be used for gilding, silvering, bronzing or ebonizing, frames, brackets, wooden articles of all kinds, statuettes, metallic ornaments, emblems, paper mottoes, letters, etc.

There is scarcely a household ornament that is not greatly improved by a little tasteful gilding, and many fashionable decorations are more than doubled in value by it.

There is no kind of ornamental work more fascinating to ladies than this, and none more easily executed.

Lustral Painting.

The cheapest and best paints to use in this art, now so popular, are the Diamond Paints—Gold, Silver, Copper, and Bronze. These colors are the ones mostly used, but if others are required they can be got at any art store.

Bronzing Chandeliers, Lamps, Ebonizing Furniture, etc.

In nearly every house there are gas fixtures or lamps that have become decidedly the worse for wear. These can literally be made as good as new by a careful application of the DIAMOND BRONZE or GOLD PAINT. No one who cares for appearances will fail to make use of them, for their application is simple and easy, and the expense inconsiderable.

For ebonizing furniture or any wooden or metallic article, no other preparation equals the Diamond Artist's Black. One trial will convince any one of its great usefulness.

Repairing Wall Paper.

Nothing is more distressing to the eyes of a tidy housekeeper than to see places where the wall paper has accidentally been knocked off, and the white wall beneath shows so plainly. A ten-cent paper of Diamond Gold Paint will cover hundreds of such spots, and put off for a long time the necessity of putting on new paper. It is very easily and quickly done, and the eye can seldom detect the place.

The dreary, weary croaker,
Will have to die some day;
Perhaps he'll go to heaven
And walk the golden way;
He'll view the shining pavements
With gloomy eyes askant,
And shake his head and mutter;
"They're so extravagant."

RHEUMATISM AND URINARY TROUBLE CURED BY KIDNEY-WORT.

MARION, OHIO, May 21, 1884.

WELLS & RICHARDSON Co.,

Gentlemen: I can say that I believe your Kidney-Wort to be a valuable remedy, and I wish you to know what it has done for me. I was afflicted with rheumatism and urinary trouble for some time. The rheumatism settled in my back and hip and gave me great pain. My kidneys were disordered and gave me much trouble. I finally made a trial of Kidney-Wort, and by the time I had taken one package I was well. It gave me good appetite and strengthened me right up. I think it is wonderful that so severe a case as mine should yield so completely in so short a time. I shall take pleasure in recommending Kidney-Wort to my friends.

Yours truly,

W. J. BUXTON.

KIDNEY DISEASE WITH TERRIBLE SUFFERING CURED.

BENTON HARBOR, MICH., May 25, 1884.

WELLS & RICHARDSON Co.,

Gentlemen: I wish to let you know what benefit I have received from the use of your remedy, Kidney-Wort. For six years I had such a terrible headache that I could not lay on my back at night on account of the pain in my back and kidneys. I employed a number of doctors, but received no benefit from them whatever. One would say it was my spine, and another my kidneys. I was in so much pain that I was obliged to give up my work, and so weak and dizzy that I could do nothing. In the *Tribune and Farmer* I read your advertisement about Kidney-Wort, and I went at once and bought a bottle. After taking it I felt very much better, and the second bottle almost completely cured me. I think it a good medicine for the kidneys and for the whole system. I have recommended it to my friends, and it has done much good. There are a great many people around here troubled with their kidneys, and the doctors cannot do them any good. If they would take Kidney-Wort I am sure they would be cured.

Very truly yours,

FREDERICK HENZLER.

THOMAS GREEN, Mayville, N. Y., says:—"I may have had to get up many times at night, and my urine was high colored with a brick-dust deposit. One box of your Kidney-Wort cured me."

JOHN M. AMEST, J. F., Nutt, Lewis Co., Tenn., says:—"For ten years have been afflicted with pain in the back, the result of diseased kidneys. Tried several remedies from which I received very little benefit. I at last gave Kidney-Wort a trial and have received more benefit from its use than all others."

"What's eggs this morning?" "Eggs, of course," says the dealer. "Well," says the customer, "I'm glad of it, for the last I bought of you were chickens."

"Here, you young rascal, give an account of yourself. Where have you been?" "After the girls, father." "Did you ever know me to do so when I was a boy?" "No, sir; but mother did."

DIAMOND DYES.

UNEQUALLED FOR COLORING

Dresses, Cloaks, Coats, Wrappers and all Garments; Shawls, Hoods, Scarfs, Yarn, Stockings, Carpet Rags, Ribbons, Feathers, Everlasting Flowers, Mosses, Grasses, Basket Work, Wood, Bone, Ivory, Easter Eggs, Sheep-Skin Mats, Hair, Leather, etc., etc.

ONLY 10 CENTS

For sufficient Dye to color from one to four pounds of goods, according to color and shade wanted.

Remember these are the only pure, harmless, unadulterated Dyes on the market. Always ask for, and insist on having, DIAMOND DYES.

LIST OF COLORS:

Yellow,	Violet,
Scarlet,	Brown,
Crimson,	Dark Brown,
Magenta,	Navy Blue,
Cardinal Red,	Dark Blue,
Dark Green,	Light Blue,
Dark Wine,	Terra Cotta,
Plum,	Slate,
Black,	Purple,
Eosine (Pink),	Garnet,
Bismarck,	Olive Green,
Old Gold,	Drab,
Orange,	Green,
Maroon,	Scarlet, for Cotton,
Seal Brown,	Blue, for Cotton,
Cardinal, for Cotton,	Yellow, for Cotton,
	Green, for Cotton.

—SOLD BY—

ALL DRUGGISTS and MERCHANTS from Halifax to San Francisco; from Winnipeg to New Orleans; in England, Scotland, Ireland, Australia, and South America.

DIAMOND PAINTS.

GOLD PAINT, SILVER PAINT, COPPER PAINT, BRONZE PAINT, ARTIST'S BLACK.

For Gilding, Silvering, or Bronzing, Fancy Baskets, Frames, Emblems, Mottoes, Furniture, Household Ornaments, Statuettes, etc., etc.; Repairing Gold Frames and all other Gilded Work, etc.

DIRECTIONS FOR USING

THE + DIAMOND + PAINTS.

Prepare the liquid for mixing the Bronze Paint by adding half an ounce of Varnish to an ounce of Spirits of Turpentine. Keep in a well-corked vial.

Put a small quantity of the metallic powder into a saucer or other shallow dish; add as much of the liquid as will render it rather less fluid than common paint, give a slight stirring with the brush, and it will be fit for use. If a large quantity is mixed at once, the metallic particles will subside; to avoid this it must be mixed in small quantities, say about a drachm of each, and a slight motion given to the paint each time a fresh supply is taken with the brush. Never mix more than is required for the work in hand.

Apply the paint with a camel-hair brush.

Many of the ladies' papers in the last year have contained articles in praise of the Diamond Paints for a great variety of uses in household ornamentation. They are so cheap and so easily applied that it is a pleasure to use them.

Fancy Baskets can be painted with any shade desired, or with a combination.

Old Wicker Chairs can be stained with mahogany color made from Diamond Dyes, and if some parts of them are gilded with Diamond Paints it will make them very handsome.

Grasses, Grains, Insects, Butterflies, etc., can be gilt with the Paints, and when nicely mounted are exceedingly rich and handsome.

Furniture, Frames, Ornaments, and all objects wherever a little tasteful gilding will improve the appearance, Diamond Paints are very useful. A writer in *The Christian Union* gives a very interesting account of her success in using these paints for such purposes.

Many other uses will occur to the ingenious mind, and for every appropriate use the Diamond Paints will be found to give perfect satisfaction.

PRICE, 10 CENTS.

FOR SALE BY ALL DRUGGISTS.

(24)

Make your old things look like new by using the Diamond Dyes, and you will be happy. Any of the fashionable colors for 10 cents.

HONEST JOHN'S DISCOVERY.

John Gilpin was a citizen
Of honor and renown,
A hardy, honest workingman,
In a Canadian town.

Week in, week out, John worked as hard
As any man could do,
But, somehow, both ends wouldn't meet,
Which put him in a stew.

His wife would ask a bonnet nice,
His youngsters cry for shoes,
It fairly broke John's honest heart
To think he must refuse.

He had a bonny dainty lass,
Who had no lack of beaux,
But would not see her "company"
For want of decent clothes.

John turned it over in his mind
From sunset till sunrise,
When all at once a light broke in—
He thought of Diamond Dyes.

"Dear wife," he cried, "no longer fret,
Our troubles are all o'er,
And you can dress in gay attire
As you ne'er dressed before.

"Your ribbons, feathers, dresses, all
Will make as good as new,
For 'Diamond Dyes' will make them look
Lustrous with brilliant hue.

"And everything a woman wears,
You'll see with glad surprise
Tho' shabby, faded, dingy, worn,
Grow fresh with 'Diamond Dyes.'"

And soon a mighty change was made,
A happy man was he,
For gaily out to church or fair
His wife tripped merrily.

His bonnie lassie also made
Quick capture of her beaux,
And dozens came with heart and hand
Most humbly to "propose."

"God save the Queen, God save us all!"
John cried—"and praises rise
To him that first invented those
Bright brilliant 'Diamond Dyes.'"

(26)

Don't wear dingy or faded things when the ten-cent Diamond Dyes will make them good as new. They are perfect.

WELLS, RICHARDSON & CO.'S
LACTATED FOOD,

FOR INFANTS AND INVALIDS.

SUGAR OF MILK

[Lactose.]

(Saccharum Lactic)

is the basis of this Valuable Food.

Medical authorities agree as to the importance of this article as an addition to the diet of infants deprived of mother's milk, and for all invalids with enfeebled digestion. It has especial value in irritation of the stomach and bowels as it overcomes inflammatory disposition, and relieves and corrects constipation. It is the most important constituent of mother's milk, and the curds formed by the fluids of the stomach with it in Lactated Food are the same in character as those formed with mother's milk. It yields the necessary nutriment for the support of the respiratory organs, and in this way also is a very important addition.

Lactated Food surpasses all others in the following qualities:

Ease of digestion and perfect-assimilation of each constituent.

Great nutritive value.

Close resemblance, in composition and effect, to mother's milk.

Corrective influence in all cases of irritability of the stomach and bowels.

Entire absence of cane sugar.

Character of the coagulum formed with the fluids of the stomach—light and friable—unlike the hard coagulum formed by cow's milk.

The remarkable results thus far obtained from Lactated Food should induce every physician to prescribe it.

It is certainly a very important addition to the resources of the profession, both for hand-fed infants and in cases of enfeebled digestion in adults, whether chronic or the effect of acute disease.

GREAT SUCCESS

HAS followed the use of this Food in a wide variety of cases. It has proved to far surpass all other artificial foods, both in cases of infants deprived of their natural nutriment, and in a large number of cases of enfeebled digestion in adults—whether chronic or caused by acute disease. The reason of this superiority can be easily understood. The composition of Lactated Food is such that it yields a large amount of the most easily assimilated nutrients, and at the same time assists the feeble stomach in the digestive process.

The three cereals of highest type, wheat, barley, and oats are used, and from each is obtained the constituent of special value—from the wheat is taken gluten, the best of all musculo-ferming foods, and one that nourishes the tissues of the brain and nervous system. From oats is obtained that principle which, while giving strength and vigor to all parts, is especially a fat-producing food. From barley we get the very important digestive agent, diastase, which is produced in the grain by the process of malting. This, while of itself an important food, is especially useful in being able to partially digest the other elements of the food, so that the most delicate stomachs can appropriate and assimilate them.

Lastly, and of most importance, is the sugar of milk, which is the basis of Lactated Food. It is this which brings this food so closely to resemble mother's milk in composition and effect, increasing its nutritive value, giving aid to the respiratory organs, and allaying all tendency to irritation in the stomach or bowels.

For further particulars address

WELLS, RICHARDSON & CO.,

BURLINGTON, VT., U. S. A.

MONTREAL, P. Q.

LONDON, ENG.

(27)

Diamond Dyes will color anything any color, and never fail. Their use is the easiest and best way to economize. 10 cents a package.

A SCIENTIFIC FOOD

For Infants and Invalids.

Wells, Richardson & Co.'s LACTATED FOOD.

FREE FROM STARCH.

Lactated Food when cooked is entirely free from starch, as proved by the iodine test. Young infants cannot digest starch.

HIGHEST VALUE IN NUTRIENTS.

Lactated Food possesses the highest percentage of any artificial food on the true nutritive principles of wheat, barley, and oats, the three perfect cereals.

IDENTICAL IN EFFECT TO MOTHER'S MILK.

Sugar of Milk being the basis of Lactated Food, the effect of the food in young infants is identical with mother's milk. It can be used in alternate feedings with mother's milk, when the latter is deficient, without the slightest disturbance.

EASILY ASSIMILATED.

By reason of the process of manufacture, and the constituents of its composition, Lactated Food when prepared has already gone through the first processes of digestion, and is ready for direct assimilation. For this reason it is never rejected by the most delicate stomach of infant or invalid.

Eminent Physicians, from Maine to California, who have given it a trial, endorse Lactated Food as superior to all other artificial foods. It is especially recommended as

- A perfect food for infants,
- A corrective in irritation of stomach or bowels,
- An article of diet when solid food cannot be used,
- A preventive of sick headache,
- A great aid in treating dyspepsia in any form,
- Of great value in convalescence after acute disease.

Three Sizes, 25 cts., 50 cts., \$1.00.

SOLD BY DRUGGISTS.

Proprietors,

BURLINGTON, VT.

INFANT'S FOOD.

The most commonly used substitute for mother's milk, is cow's milk, but in the vast majority of cases it is an unwelcome substitute, being hard for the infant to digest, and so giving insufficient nourishment. If we look at the causes of this we find that the solids and casein in cow's milk are largely in excess of these constituents in human milk, but that the sugar is in the largest proportion in the woman's milk. But the mere difference in the proportion of its constituents is not the chief obstacle. A more important difference is the denseness of the curd of cow's milk. Dilution with water does not affect this property. Under the action of the gastric juice, the particles of casein will run together into a solid, compact lump. This is shown by the masses of hard curd, which a child fed exclusively upon cow's milk often passes from the bowels. Human milk forms a light, loose flocculent curd, which is readily disintegrated and digested in the stomach.

The great object to be attained is the production of a food which shall contain nutritive properties sufficient to develop the child's bone, muscle, and fat, and which shall be digestible from the time of birth until the milk set of teeth are completed.

The most important advance in the search for a food of this character was made when the successful manufacture of *sugar of milk* was established by the American Milk-Sugar Company, under the direction of Prof. Sabin.

Taking their pure product as a basis, it has been found possible to combine in our LACTATED FOOD the soluble, digestible elements of the three staple grains, wheat, barley, and oats, with all the *saline elements* of the milk, so as to form an artificial food that will meet every requirement.

LACTATED FOOD has all these properties to the highest extent. It has, moreover, the very valuable quality of correcting irritability of the stomach and bowels, and overcoming constipation. It far surpasses all other foods in these important points. No mother should fail to use it if unable to give her infant its natural food.

(28)

Dresses, cloaks, coats, stockings and all garments can be colored successfully with the Diamond Dyes. Fashionable colors. Only 10 cents.

**WE CLAIM FOR
WELLS, RICHARDSON & CO.'S
Improved Butter Color**

Every Point Wanted in a Butter Color, viz.:

FIRST.—The butter never turns to a reddish tinge, but keeps the bright golden color.

SECOND.—It is as harmless as the natural color of butter. The material from which it is made is vegetable, and as wholesome as wheat.

THIRD.—Perfect freedom from any taste or smell that can be imparted to the butter.

FOURTH.—Perfect keeping qualities. It does not become rancid, stale or sour, or spoil in any way.

FIFTH.—It will not color the butter-milk. The color is all absorbed by the butter globules, and its weight added to that of the butter.

SIXTH.—It is the strongest color made and put up in the largest package, and therefore the cheapest to use.

***WE NEVER YET HAVE SEEN A BOTTLE THAT SHOWED ANY SIGN OF RANCIDITY, AND HAVE NEVER KNOWN ANY BUTTER INJURED BY ITS USE.**

Of no other Butter Color known can this Boast be truthfully made.

We ask every dairyman to make the trial for himself, and we know he cannot fail to see the superiority of our Color.

BEWARE of all imitations, and of all other oil colors, for every other one is liable to become rancid and spoil the butter into which it is put. Ask for **WELLS, RICHARDSON & CO.'S IMPROVED COLOR**, and take no other. If you cannot get it, write to us to know where and how to get it, without extra expense.

PRICE LIST.

Sample Bottles, 1½ ozs. to color	175 lbs.,	\$0.15
Small Size, 4 "	" 500 "	0.25
Medium Size, 10 "	" 1250 "	0.50
Large Size, 24 "	" 2800 "	1.00

For Sale by Druggists and Merchants generally.

If they do not have it, ask them to order it from their Wholesale Druggists or Grocers.

To Color Milk for Cheeses, etc., use our old Perfected Butter Color, the Best Color made for that purpose.

WELLS, RICHARDSON & CO.,

BRANCH HOUSES:

64 McGill Street, Montreal, Canada.

1 and 2 Australian Ave., London, Eng.

Sydney, New South Wales, Aus.

TEST YOUR BUTTER COLOR!

Use the Best. Avoid the dangerous.

**WELLS, RICHARDSON & CO.'S
IMPROVED BUTTER COLOR**

Is the only one known that never becomes rancid.

***In order to see yourself the danger of using other colors, test any one of them by the side of ours, as follows:—**

Take the corks out of the bottles, and set them by the stove, where they will have a heat of about 100 degrees, for a few days; or expose them in the same way—corks out—to a summer heat in the sun, and in a very few days all colors except ours will have become rancid,—shown by a strong, disagreeable odor like old tallow, lard, or oil; but our color will retain its sweetness, and its clean, pure smell. This test shows the liability of all these other colors to become rancid, and therefore the danger of using them. Any color that has turned rancid is dangerous to use, for it puts the germs of decay into the butter, that will very soon act on the whole quantity, and spoil it all. Don't run the risk of having your butter turn frowy, and so spoil your reputation as a good butter maker.

CONDENSED CONFIRMATION

Of the claims we make above can be found in the following extracts from testimonials that we have received.

WHITMAN CLARK, ex-President Earlvile Agricultural Society, Earlvile N. Y., writes:—"I have been a constant user of W. R. & Co.'s Butter Color, and have always considered it the best of any on the market."

J. A. SMITH, Jericho Centre, Vt., writes:—"Your Improved Butter Color is the best I have ever seen. It is not liable to injure the keeping qualities of butter, and gives the brightest and most even color."

H. M. GINSON, Butter Buyer, Brandon, Vt., writes:—"I have used the Improved Butter Color for more than two years, and have also used other kinds, but I have no hesitation in saying that yours takes the lead in every quality that aids in making nice butter."

A. J. MARSH, Brookfield, N. Y., writes:—"We have used your Butter Color for the past two years, and consider it a superior article."

J. C. KENYON, Coventry, N. Y., writes:—"Your Butter Color is the best by far of any I have ever used, and I have tried many kinds. On a careful test, the result has been that I have received three cents per pound for butter containing it above that of any other that I have used."

W. R. MACOMBER, Jericho Centre, Vt., writes:—"In forty years experience as a butter maker, I have used a variety of articles for giving butter the proper golden hue, but I have never found anything which equals in every requisite Wells, Richardson & Co.'s Improved Butter Color. It is the strongest; it never colors the buttermilk; and never gives a reddish shade, but always the true June color."

(20)

Faded articles of all kinds restored to their original beauty by Diamond Dyes. Perfect and simple. Price 10 cents.

WHAT IS SUGAR OF MILK ?

Sugar of Milk is the substance which gives the sweetish taste to milk. It is found in varying proportions in the milk of all mammals, but most largely in woman's milk. It is left in the whey remaining after the manufacture of cheese, and it is from this source that it has always been made. Until recently it has been principally made in Switzerland, but thanks to Prof. Sabin its successful manufacture is now established by the American Milk Sugar Co., whose headquarters are at Burlington, Vt., and whose supplies are drawn from the choicest dairying sections of that State. It will undoubtedly add not a little to the importance of the dairying industry of that region, especially when its importance as an addition to the food of infants and invalids is understood.

By its incorporation in Lactated Food, its use, which on account of its high price has been confined to the wealthy, is now available to all classes, and it will prove an important aid in the treatment of infants deprived of their natural nutriment.

What Physicians say of Lactated Food :

EDWARD S. PECK, M. D., 51 West 50th St., N. Y., Surgeon in the St. Elizabeth's and Charity Hospitals, New York City, etc.:—"I am glad to give an unqualified commendation to Lactated Food. I have given it a careful trial with several infants with most satisfactory results. It was especially pleased with the good effects on the character of the excretions and the correction of constipation. I shall be glad to recommend it in all instances where artificial feeding is necessary, believing that it meets all the hygienic needs of the system."

HENRY T. BOYLE, M. D., 410 West 40th St., New York:—"I have used Lactated Food in the case of a child three months old, who had been fed on other food, which had produced convulsions and other symptoms of indigestion. Since using the Lactated Food all abnormal symptoms have ceased, and the child is now doing well."

J. D. MCGILL, M. D., Jersey City, N. J.:—"I have had occasion to use Lactated Food in my own family, and the result has been very gratifying. If it continues to act as well as it has hitherto, I shall prescribe it to the exclusion of all other foods. In the case of my own child, it has become indispensable."

G. H. SIMMONS, M. D., Lincoln, Neb.:—"I have been using Lactated Food for some time, and have found no case as yet where it did not agree with the little patients, and twice I feel that I have gained the blessing of parents in having saved their little ones with Lactated Food. Once in a case of cholera infantum, and once in a case where no artificial food could be found to agree."

F. F. PAINE, M. D., Comanche, Texas:—"Lactated Food proves to be the most satisfactory of any food I have been able to procure for invalids, either infant or adult. I have used it in a case of typhoid fever in an adult, and I am now using it in the case of an infant unable to digest the mother's milk. I assure you I esteem it very highly."

A FOOD FOR INVALIDS.

One of the chief considerations in the selection of a food for invalids is the fitness in quality and composition, for the purpose intended. An invalid, who has been reduced by the struggle with disease, is not in condition to assimilate ordinary food, the stomach being so weakened that its effort to digest such food is often attended with serious results. An invalid's food should be capable of digestion and assimilation without taxing the strength of the stomach, thus giving it time to recuperate by nature's grand restorer—rest. Judged by these standards Lactated Food takes precedence of all others. In dyspepsia or convalescence from acute disease, the greatest obstacle to rapid recovery is the difficulty of procuring proper food; that is, food that can be easily assimilated and will invigorate the system, instead of bringing on the long train of symptoms so well known as signs of indigestion. The Lactated Food has been tested in such cases by physicians in all parts of the country, and the unanimous report is "superior to anything I have ever used."

As an article of diet for scrofulous and consumptive patients and in those cases where formerly cod liver oil was prescribed, it possesses undoubted advantages.

It has been used very successfully in the vomiting of pregnancy and in the dyspepsia of old people.

It is also of great value in cases of ulceration or inflammation of the stomach or intestines, both on account of the tendency to subdue inflammation and because of the character of the excretions.

In sick headache it is a most admirable diet, the stomach quickly regaining its normal condition. If taken regularly once a day by those liable to attacks of sick or bilious headache, it will act as an efficient preventive, and this most distressing malady will be a thing of the past.

It is in a form, when properly prepared, for direct assimilation, is very nourishing, and is tolerated by the weakest stomach.

Glit-edged Butter all the year round is the result of using Wells, Richardson & Co.'s Improved Butter Color.

"Now that you use Wells, Richardson & Co.'s Butter Color, I can pay you the highest price."

ONE THOUSAND MILLION POUNDS

BUTTER!

Dairy statistics show that even more than this enormous quantity of butter is made in the United States every year. In a very large portion of this enormous quantity of butter the use of WELLS, RICHARDSON & Co.'s IMPROVED BUTTER COLOR will make a difference of five cents per pound in the selling value. This means millions of dollars to the farmers of this country. The immense sales of this unequalled preparation in all the best dairy sections of the country, from Maine to California, shows plainly that the enterprising farmers of the land appreciate the facts. From every part of the country its praises come, and its use is now well nigh universal. Of the scores of imitations that have sprung up in the last few years nearly all have died an early and natural death, for even low prices could not induce dairymen to use them in competition with WELLS, RICHARDSON & Co.'s IMPROVED COLOR. Every year adds fresh proof of the truth of our claim.

TESTED SIDE BY SIDE with other colors, IT ALWAYS PROVES ITS SUPERIORITY. If you wish to use the best, do not fail to give it a trial.

EMPHATIC ENDORSEMENTS

come from prominent dealers in all parts of the country. Dairymen should pay heed to what these men say.

J. DICKERMAN, Grocer, New Milford, Pa., writes:—"We are selling lots of your Butter Color, and it gives the best of satisfaction."

DRAKE & BROWN, Merchants, Albion, Maine, writes:—"We sell quite a large amount of your Butter Color, and it gives perfect satisfaction in every case."

RINDOUT & HUTCHINSON, Druggists, Hutchinson, Minn., writes:—"Your Butter Color surpasses all others."

**VICTORY after VICTORY
AT THE FAIRS**

FOR

**WELLS, RICHARDSON & CO.'S
IMPROVED
Butter Color.**

It is a noticeable fact that, at the Agricultural Fairs, the Improved Butter Color, made by Wells, Richardson & Co., of Burlington, Vt., has taken first premium wherever exhibited, triumphing over all competitors.

The verdict pronounced by the Country Fairs is of the utmost importance, and carries great weight, from the fact that the judges are practical men, farmers and dairymen, who know just what is needed, and know at once whether the promised results are obtained. The most rigid and thorough tests were made and the triumphs of this Color over all others are most marked, because it is based upon real merit, unprejudiced by any favoritism or other influence.

This Color is used from ocean to ocean, and is the *only safe* oil color to use. Thousands of testimonials received by the proprietors speak of its superiority, and sound its praises in the strongest terms.

RELIABLE REPORTS

of the superior results obtained by its use, continue to come to hand by almost every mail.

Y. G. SHARMAN, Freethorpe, England, writes:—"Your Improved Butter Color is the best for butter I have ever had. Please send another package."

HICKINS & PVESTICH, Shrewsbury, England, write:—"A customer of ours, a dairyman of large experience, says that your Butter Color is the best of any that he has ever tried."

J. ANDREWS, Chemist, Cummock, Scotland, writes:—"Several of my customers have offered me their voluntary testimony to the superiority of your improved Butter Color over all others that they have tried."

HENRY MOORE, Whitehaven, England, writes:—"I got a number of farmers up at my own dairy to try your Improved Butter Color, and they pronounce it the best they have ever had."

W. F. CLARKE, Lumont, Passage West, Ireland, writes:—"I have used some of your Butter Color and find it the very best I have ever seen; it does not taste, or smell, or even discolor the buttermilk. I have strongly recommended it to some of my friends."

E. F. HAYEN, Sangerfield, N. Y., writes:—"I tried your Improved Butter Color, and find it the best we have ever used. We have used several different kinds, but none of them are equal to yours."

Send for directions for coloring photographs, engravings, etc., with Diamond Art Colors.

"I'm glad you have come, for it is no use to churn without Wells, Richardson & Co.'s Butter Color."

TIMELY TESTIMONY

TO THE TRUTH ABOUT

Wells, Richardson & Co.'s

IMPROVED BUTTER COLOR

In the following extracts from recent letters:

OLIVER GABRIEL, Merchant, Avon, Conn., writes:—"The manager of our creamery pronounces your Butter Color as the best."

J. G. LOVE, M. D., Druggist, Hanover, Ill., writes:—"I keep no other Butter Color, as my customers want no other. It is perfect."

G. A. LINDON, Merchant, Forest Junction, Wis., writes:—"I am selling your Butter Color; couldn't sell any other color in this town."

B. C. LANE, Merchant, Boylston Centre, Mass., writes:—"I sell your Butter Color, and all say that it is the best in the market."

C. W. WISE, Merchant, Palmer, Ind., writes:—"I am selling your Butter Color. It is the best I have ever sold or used. It goes further and gives a better color than any I ever saw."

Mrs. E. V. GROOM, Merchant, Schipville, N. Y., writes:—"We have sold your Butter Color since you introduced it through here several years ago, and our customers want no other."

ASHENFELTER & SHULER, Druggists, Pottstown, Pa., write:—"Your Butter Color sells well with us; in fact, it is the only kind we sell and recommend."

W. R. WESTGATE, Druggist, Crete, Ill., writes:—"Your Butter Color is the standard in this section."

ROBERT B. HOOKER & SON, Druggists, Elizabeth, N. J., write:—"We have been selling your Butter Color for some time, and have always heard of its giving satisfaction."

J. C. DENSTEN, Druggist, Bridgeport, N. J., writes:—"Those who use your Butter Color will have no other. They say it not only colors better than other brands, but they claim for it an additional and much desired flavor and taste."

D. W. HERROX, Druggist, Princeville, Ill., writes:—"Your Butter Color sells well, and is the only one sold here."

The Trade Mark on every package of

WELLS, RICHARDSON & CO.'S

IMPROVED BUTTER COLOR

Is the above cut of the Dandelion blossom. The label is printed in three colors, Red, Yellow and Black, and is protected by U. S. Trade Mark Patent. Any infringements or counterfeits will be prosecuted to the full extent of the law.

GET THE GENUINE!

We have been informed that in some localities dealers will at times try to substitute other kinds of Butter Color when Wells, Richardson & Co.'s is called for, because inferior kinds are offered them at such low prices that they can make more money by selling them. Do not be deceived—insist upon having Wells, Richardson & Co.'s. Dealers make a good profit in selling that and should be content. They cannot find a better color and they wrong their customers by trying to substitute something else which is liable to injure or spoil their butter. Call for Wells, Richardson & Co.'s and take no other.

CAUSES OF BITTER CREAM.

First.—Ragweed in the pasture. This is a frequent cause when cows are fed in stubble or mowing lands.

Second.—Mildew, but especially the red spotted mildew, which forms upon the cream in damp cellars.

Third.—Keeping the milk too long without skimming, also by keeping the cream too long without churning. Thirty-six hours is long enough for either, which makes the cream three days old when it is churned.

Fourth.—Imperfect cleaning of the milk pails or the churn, and leaving curd in the seams or corners.

Fifth.—The farrow condition of the cow, or her advanced state of pregnancy, will cause this trouble.

Sometimes the addition of as much powdered saltpetre as will lie upon a silver three-cent piece, or about five grains to a six-quart pan of milk, will prevent the bitterness, and to give the cow a dose of two drams a day for a week will have the same effect.

DANIEL HALE, East Corinth, Vt., writes:—"No sensible person will make butter in the winter without using your Improved Butter Color. It is just right and needs no one's recommendation after being tried."

Successful dairymen use Wells, Richardson & Co.'s Improved Butter Color.

THE FOLLOWING LETTERS ARE SPECIMENS OF OTHERS THAT
WE ARE CONSTANTLY RECEIVING.

MONTREAL, 12th July, 1885.

This is to certify that I have tried all other cures for Liver complaint and do not find that they will compare with WELLS & RICHARDSON'S "Kidney Wort." I have used the latter with great benefit.

NEIL WARNER,
Professor of Elocution, &c.

MONTREAL, 11th May, 1885.

MESSRS. WELLS & RICHARDSON CO.,
64 McGill St., Montreal, P.Q.

GENTLEMEN,

For more than a year my health was completely broken up by Kidney disease. I was troubled with severe pains in my back and Kidneys. I used a box of Kidney Wort and I was well. I can recommend it to any one with the same disease.

Yours respectfully,
G. LABELLE,
Of H. M. Customs.

273 King Street East,
TORONTO, 20th May, 1885.

MESSRS. WELLS & RICHARDSON CO.,
64 McGill St., Montreal, P.Q.

DEAR SIRS,

By your book that I received I see an account of Artists Black and Gold Paint. These I have not been able to procure in Toronto. Please send me one package of each.

Your Diamond Dyes are first class and with a plentiful use of them, we can make dyeing easy, not what it used to be. The Bronze dye I procured. Could you give me the name of a chemist to whom you send a variety of your dyes and oblige.

Yours truly,
FIRSTBROOK BROTHERS.

MONTREAL, 24th April, 1885.

THE WELLS & RICHARDSON CO.,
Montreal, P. Q.

GENTLEMEN,

During the past four or five months I have been very ill and under medical treatment suffering from Kidney and Liver complaints but instead of getting better I found myself gradually growing worse, in fact I began to despair of ever getting well again when a friend advised me to try "Kidney Wort."

I have much pleasure in informing you that after using it for a few days I found myself gaining renewed strength, and now after having used five bottles I feel so much improved in my health that I am able to attend my business as usual, and am in strong hopes by still using it further that I will become entirely well. I can with confidence recommend it to any who may be troubled with the same complaints.

I am, &c.
R. SKINNER,

Agent for J. W. Tester & Co.

COWANSVILLE, P.Q., 10th July, 1885.

MESSRS. WELLS & RICHARDSON CO.,
64 McGill St., Montreal, P. Q.

DEAR SIRS,

I received your Butter Color left with your agent E. E. Lawrence and am very much pleased with it. I think it is the most perfect color yet introduced. It cannot be recommended too highly. To first-class butter makers there is no other color to equal your "Improved Butter Color."

Yours respectfully,
CYRUS CLEAVELAND.
