| 180 | 165 | 15 |

## Calcutta Sicca Rupec

Ditto half
Ditto quarter
And its fractions in proportion being 1-12th alloy,
The use of the sicea weight of 179666 grains hitherto employed for the receipt of bullion at the mint, being in fact the weight of the Mourshedabad rupee of the old standard, which was assumed as the sicca enrrency of the Honourable Company's Provinces of Bengal, Behar, and Orissa, shall he discontinucd, and in its place the folluwing unit, to be called the Tola, shall be introduced, which, from its imme. diate connexion with the rujee of the Upper Provinces, and of the Madras and Bombay, will casily and speedily become miversal throughout the Britisti territories.

The Tola or Sicca Weight to be equal to 180 grain: troy, and the other denminations of weight to be derived from this unit, according to the fullowingscale:

8 Ruttecs-1 Musha-15 Troy grams.
I2 Mushas-1 Tola-180 ditto.
80 Tolas (or Sicca Weight) -1 seer-2 $2 \frac{1}{2}$ lbs. ditto.
40 Scers-1 Mun, or Bazar Maund- 100 lbs. Troy,
$\Lambda$ Calcutta the monies of account are as fullows:
4 cowries (Cowrie is a small shell, plentiful on Eastern shores, particularly those of Africa; they are, however, fast disappearing from commercial transactions at the Presidencies, $)=1$ gunda $=16$ anas $=1 \mathrm{~s}$. rupec (20 gundas-1 pum-4 punns-1 ana) 16 S.R.- 1 gold mohur. The usunl accounts are 4 punns or 12 pice $=1$ ana -16 anas $=1$ S.R. $=1$ gold mohur.

At Madras there is a considerable variety of coins in circulation; accounts are kept thus, 80 cash $=1$ fanain; 12 fanams $=1$ rupee, and 42 fanams $=1$ pagoda, star or current jragoda worth $7 s .5 \frac{1}{3} d$. , commonly valued at $8 s$. The gold rupee, new coinage, 11. $9 \mathrm{~s} .2 \frac{1}{2} d$., according to the mint price of gold in England. By the latest accounts from India, it was proposed to establish a new bank at Agra, and saving's hanks were about to he set on foot under the sanction and superintendence of Government.
For a long period the flow of the precious metals was towards India; the current has now, however, changed, and the exportations from India to Euroje of gold and silver has been yearly nugmenting.

The treasure held in the several treasuries of the Company, under the Bengal Presidency, amounts generally to $3,000,000 t$., and under the subordinate Presidencies of Madras and Bombay, the amount tluctuates from $2,000,000 l$. to $3,000,000 l$. sterling. liefore the breaking ont of the Burmese war, from $10,000,000 \mathrm{l}$. to $12,000,000 \mathrm{l}$. stg. was collected by the Marquis of Hastings, in Bengal, for the purpose of paying off the debt. The accumulations of such large balances in the hands of Government has justly been objected to, as causing sudden and excessive fluctuations in the currency of the country. The amount of remittances from India to England is very great; being, first, the sum requisite to pay territorial charges in England, $3,000,000 l$. ; second, a demand for remittance of private savings and family expenses, estimated at $1,500,000 l$. ; and third, a return or the outward trade, $3,000,000 l$. ; total, $7,500,000 l$. The annual drain on India in remittances to England on account of Government, is thought by Mr, Milis, of the Auditor-gencral's department, to average $3,000,000 l$. a year for the last 30 years, which at compound interest for that period at the Indian rate of interest ( 12 per cent.) amount to $723,997,971 l$. sterling. Returns are made through the commerce of India and China, or of loullion from both countries.

List of the several Establishments of the East India
Company in England, and the Salaries and Allowances payable by the Court of Directors in respect thercof, on the lst May, 1837 ( 3 \& 4 William IV., c. 85, s. 116). [Parliamentary Return, House of Commons, 30th June, 1837.]
Secretary's office : consisting of a secretary, deputy secretary, four assistants in the respective branches of minuting and correspondence, accounts, pay, and audit; 37 clerks, 1 clerk in charge of proprietors' room, 1 superintendent of extra clerks, 20 extra clerks, 4 writers, 1 assistant elder, and 10 messengers. In all, 80 ; salaries, \&c. 36,817 l.

Examiner's office: consisting of an examiner of India correspondence, an assistant cxnminer, first assistant, 3 clerks in the correspondence branch, 3 senior elerks, 8 clerks, 1 superindent of extra clerks, 1 registrar of India books and records, 8 extra clerks, 8 writers, and 8 messengers. In all, 43 ; salaries, \&c. 17,109l.

Office of the secretmry in the military department : consisting of a secretary, an assistant, 7 clerks, 7 extra clerks, 2 writers, and 4 messengers. In all, 22 ; salaries, \&e. $8,362 l$.

Of the first or six jer cent. remittable loan, the loans have the interest thereon paid quarterly to all principal, when repaid, was demandable in bills on England at the rate of $2 s .6 d$. the Sicca rupee, the interest being intermediately payable half-yearly, either in cash in India, or, if the proprictors resided in Europe, and demanded it in that form, by bills at the rate of 2\%. 1d. This loan bas been recently paid off. The other loans, both principal and interest, are demandable only ia ladia; but to the holders of the second (five per cent. of 1823 ), an option was given of receiving their interest (which is payable half-yearly) in bills at the rate of $2 s, 1 d$. (subsequently reduced to $l s .11 d$. ), during the pleasure of the home authorities. The third and fourth
holders wheresoever resident, either in cash or in bills, at the rate of $2 s$,, during the pleasure of the home authorities. The tive per cent. loan of 1823 is repayable only by annual instalments of one and a half crore of rupees; the notes first entered in the register having the advantage of being least liable to discharge. The whole debt is now fully recognised by the Legislature, and the remittable loan paper bears a premium in the Indian market of from 30 to 40 per cent., and consists solely of the debt ol 1822 , viz. $7,47,38,700$ rupees.

The following is a detailed comparative satement of the Indian debt in 1809 and in 1827 :-

o meet political was, therefore, a sufficiency to al profits of the erritorial debt of us-

The debts of India in 1833 were as follows. Debts bearing interest: Bengal, about 32,000,000l.; Madras, 3,000,000l.; Bombay, 630,000l. Not bearingr interest: Bengal, $8,000,000 l$.; Madras, $700,000 \mathrm{l}$.; Bombay, 300,000 . The five per cent. loan is the principal debt: it amounts in IBengal to 18,000,000l.; and in Madras to $2,500,0006$; in Bombay, none. The Treasury notes issued by the Bengal Government amount to $700,000 \boldsymbol{l}$.

The home bond debt of the E.I. Company, amounting to $3,400,000 l$, is composed of securities issued by the Company under their common seal, Parliament having authorised their borrowing money to a certain extent, and limiting its subsequent reduction to $3,000,000 l$. The rate of interest paid in 1831 on this debt was two and a half per cent.

An Account of the Public Debts, bearing Interest, outatanding at the several Presidencies In the East Indlies, on the 30th April, 1835; also of the Rates and Annual Amount of Interest payable thercon. (Commoos Parliamentary Paper, 19th December, 1337, No. 51.)

- In tie above statement, from the year 1828, the allowances and assignments payable to Native Princes, and others under treaties, amnunting to upwards of a milion and a half per annum : and the charges of collecting the revenue, Including the cost of the oplum and galt, amounting to upwards of two milions and a lialf more, fave bcen exciuded in order to arrive at the reat produce of the revenuc.
In the tabutar atatement, down to the year 1827, the gross revenues are ghewn 1 and the rate of converting tite indian money into stering is 16 per cent. higher tian the rate at present used.
These aitcrations in the systcm of dirawing up the aecoints of the indian finances, were guggested by Mr. James Cosmo Mivill, the Company's Financial Sceretary, in the late arranyements under the New Cliarter Act, and sanctioned by the Conrt of Directors aud the Commissioners for Indian Affairs.
$\dagger$ Deficit of 852,217l.

As considerable interest is felt in this country for what is called the " Pilgrim Tax" on idolatrous worship in India. The following statement, derived from official sources, is giver in the Gyannaneshum, published at Calcutta.
By Reg. Xll. of 1835, Government bound itself to continue the eatablished donation for the support of the temple of Juggurnauth, and with a view to the exclusion of European interfcrence, and the better mansgement of the internal affairs of the temple, the superintendence of that edifice is, by Reg. IV. of 1809, vested in the Rajah of Khoordah. In 1808. during Lord Minto's administration, this donation was, after a review of the expenses incurred by the preceding Governinent, fixed at about Sa. Ks. 55,000. and as the priests of the temple represented their inability to procure the woollen cloths necessary for the ruihs, Government, in conformity with the practice of the soubadar of Orissa, engaged at the same time to furniah that also, which was accordingly done, up 10 the abolition of the Company's warehouses in 1830, when a sum of about Rs. 1,000, was agreed to be paid in licu. The lands granted by preceding Governments for the support of the temple, yield about $\mathrm{R}_{\mathrm{B}}, 21,000$ per annum; the balance, therefore, of Rs. 36,000 , has to be made good from other sources. For the first two years after our acquisition of the Cuttack district, no tax on pilgrims was levied at Poorec. Since that period, the expenses of the temple have been defrayed by a tax on the pilgrims resorting to that shrine; and as it is a matter of curiosity to compare the sums collected by Government
at three celebrated places where a tax on pilgrims is imposed, we here suhjoin a statement up to 1830, of the gross collections, expenses, and receipts of the tax at Juggurnauth, Gyah, and Allahabad.
Collections from 1810-11 to 1830-31 at Juggur-
nauth 21 years :
Gross collection
Rs. 24,37,570
Annual average . . . . . . $1,16,074$

＊Including Mauritiua．$\dagger$ Of this， $516,077 l$ ．was Mauritius．$\ddagger$ Of this， $527,904 l$ ．was Mauritius； $524,017 l$ ．Mauritius augar， 1833 ；533，890l．ditto，1834．§ East Indies alone．

Notwithstanding the great efforts made，aince 1814，to procure extensive suppliea from the Eastern hemisphere，and although geveral new islands and stations have been made marta of cominerce by British merchanta，we perceive a atationary or declining trade in almost cvery article of Eaatern production；whereas the aupplies from the territoriea of British India alone ought to have shewn an immense increase．Had it not been for the supplies reccived from Sincapore，Ceylon，Java，Australasia，and the whole Pacific and Indian Ocean，a vast decrease would have been seen in this table．

Total Value of the Importa into Great Britain from all Places Eastward of the Cape of Good Hope（except China），according to the Prices at the East India Company＇s Sales in the respective Years．

There were no returns at the India House（for 1836 and 1837）which would enable me to give the quantities of the Bombay Trade，as has been done under the heads of Calcutta and Madras．Neither does this return specify what portion of the above mentioned articles were received hy sea and what portion from the interior ；the piece goods and cotton twist were evidiady trom Engiand，and in these alone is there an increase at the expense of the native manufacturer．

Trade between Intia and the Eastern Islands.- |traffic at present are British and India piece goods, In a work of this nature, it would be impossible to enter more fully than I have already done into the detail of Indian commerce, but before closing so important a section, it will be necessary to shew the large trade carried on between Bengnl, Madras and Bombay, and the Eastern Islands; the articles in

Commerce between Bengal, Madras, and Bombay, and the Eastern Islands.

It is now time to close this array of figures, which, however monotonous, is indispensable to shew the valuable commerce which British India carries on-a trade which, however vast at present, is not a tithe of what it may become by England adopting a just and generous system towards the intelligent and industrious myriads so mysteriously subjected to her sway; so long as the two countries are united their interests are identified, and a partial or temporary benefit snatched at by the one will be certainly succeeded by the punishment, which sooner or later overtakes injustice.
The produce of the United Kingdom is admitted into the ports of India at a very low rate of duty. The following are the rates of duty chargeable on goods the produce or manufacture of the United Kingdom, imported hy sea into Calcutta :-

Rates of Duty on Commerce at Calcutta.

XIII. Bengai-Weights.-5 siccaa-l chittuck$16=1$ secr- $40=1$ maund.
Two maunds in use; the factory maund, 74 lbs .10 oz. 10.666 drs. avoirdupois ; the bazar maund, 82 lbs. 2 oz .2 .133 drs .
Liquid Mensure.- 5 giccas- 1 chittuck, $4=1$ pouah or pice, $4=1$ seer, $40=1$ maund, or 5 secra $=1$ pus. saree or measure, 8 measures $=1$ maund.
Grain Mersure.-4 khaouks=1 raik (or 9 lbs. avoirdupois), $4=1$ paillie, $20=1$ goallie, $16=1$ kahoon ( 1 kahoon $=40$ B. maunds.)
Long Measure. - 3 jows (or barley corns) $=1$ finger, $4=1$ hand, $3=1$ span, $2=1$ cubit, $4=1$ fathom, 1000 $=1$ coss ( 1 coss $=1$ mile, 1 furlong, 3 poles and $3 \frac{1}{2}$ yards).

Square Measure.-5 cubits or hauts $=1$ chittuck ( 45 English square feet), $16=1$ cottah, $20=1$ biggah ( 14,440 sijuare $f$, $3 \frac{1}{2}=1$ English acre.
Gold amd Sily. 4 punkhos=1 dban (a grain), 4 $=1$ rutty, $6 \frac{1}{2}-\quad$ nna, $16=1$ tolah, $=224.588$ grs. troy; or 8 rutues $=1$ massh, $13.29=1$ mohur.
Madras-Commercial.-Candy $=20$ maunds. The candy of Madras 500 lbs . avoirdupois. The maund divided into 8 vis, 320 pollams or 3200 pagodas (the vis being divided into 5 seers), each pagoda weighing 2 oz .3 grs . The Commereial Dietionary, from which this statement is taken, observes: the garce $=20$ barnays or candies-the baruay $=20$ manuls-the maund $=8$ visay or vis, 320 pallams or 3200 varahuns, the varahun weighing 523 English grains; therefore, the vis is 3 lhs .3 oz ; the mannd, 2.4 lbs . $2 \mathrm{oz}$. ; the baruny, 482 lhs ; and the garce, 9645 lbs . avoirdupois, or nearly 4 tons 6 cwt .
Mcasures of Capurity.-The parce corn measure contains -80 parahs $=40$ mareals, - the marcal $=8$ puddies $=64$ ollucks. The marcal $=750$ cubic inches $=27 \mathrm{lbs} .2 \mathrm{oz} .2$ drs. avoir. of fresh spring water ; hence 43 marcals= 15 Winchrster bushels, and the garce nearly $17 \frac{1}{2}$ English quarter. Grain, when sold by weight, $9256 \frac{1}{2}$ lbs. $=1$ garce $=18$ candies $=12$ $4-5$ the maunds.
Вомвач-Commerrial. -1 tank $=2.488$ drs., $72=$ $1 \mathrm{seer},-10=1$ maund $=2 \mathrm{~s} \mathrm{lbs}$. avoirdaposs.
Grain- -2 tipurees $=1 \mathrm{seer}, 4=1$ pailie, $7=1$ parah, $8=1$ candy $=156 \mathrm{lbs} .12 \mathrm{oz} 12 \mathrm{drs}$.

Salt. $-10 \frac{1}{2}$ adowlies $=1$ parah, $100=1$ anna, $16=$ 1 rash $=2,572,176$ cubic inches ( 40 tons; the anna weighs $2 \frac{1}{2}$ tons).
$P^{\prime}$ 'earl Height. - 1 tucka $=0.208 \mathrm{gr}$., $133^{3}=1$ ruttee, $-24=1$ tank $=72$ grains.
Gold and Silver.-1 wall, 4.475 grs., $40=1$ tolah $=179$ grains.

Lang Meisure- 16 tussoos $=1$ hath $=18$ English inches; 24 tussoos $=1$ guz $=27$ English mehes.

Liquor Measure.-The seer weighs 60 Hombay rupees $=1 \mathrm{lb} .8$ oand $8 \frac{1}{2}$ drs., and 50 seers $=1$ maund.
XIV. The products of Hiudostnn are as various ns they are valuable. Mr. Forhes Ruyle, in his interesting and valuable botanical Indian work, justly observes, "In the peninsula of India and in the neighbout:island of Ceylou, we have a climate capable of producing cinnamon, cassia, pepper, and cardanoms. The coffee grown on the Malabar const is of so superior a quality ns to be taken to Arnbia nud re-exported as Bivehn coffee. The Tinnivelly semna brings the highest price in the London market; and there is little doubt that many other valuable products of tropical countries may be acclimated, particularly as several are niready in a fluurishing conclltion in the botanic garden at Calcutta, such as the cocoa and nutmeg, as well as the camphor, pimento, cajcput,
and cashew nut trees. In the Neilgheries a favourite aite might, without doubt, be found for the cinchona (Peruvian bark) as well as for the different kinds of ipecacuanha, and as the potatoe has been introduced into almost every part of India, equal success and considerable benefit would probably result from in. troducing the several kinds of arracarica so much prized for their roots as food by the natives of South America.
"Along the coast of the Bay of Bengal the cocoa and areca nut palms flourish and abound, and the continent every where produces indigo, cotton, to. bacco, sugar, and opium. The firat, harilly of any note as an Indian product 30 years ago, is now im. ported in the largest quantities into England. The cotton is indigenous to India; many provinces seem peculiarly adapted for ita culture, particularly Malwa and those to the north-west. The tobaceo hrought home hy Dr. Wallich from Martaban was pronounced by competent judges to be equal to the best from America: Patna opium is preferred in China, and that of Malwa hids fair to rival Turkey opium in the European market. The sugar cane is cultirated in every part of India, hut very inferior sugar has hitherto been produced; lately, however, a manufactory has been established near Calua (Burdwan), a new mine opened in the Burdwan coal formation, and very superior specimens of sugar sent home. Here the occurrence of sugar at the surface of the soil, and coal ouly a few feet below it, in a country where lahour is so cheap, ought to be attended with decidedly favourable results. If from these we turn our atten. tion to other products, we shall still see that there are great capabilities every where; we should at least expeet them, for though India is generally looked upon as a rice country, wheat is imported into and sold at a profit in England, from the northern pro. vinces; and flour for making starch is now one of the annual exports from Calcutta. Of dyes, medicind drugs, resins, gums, and oils, there are great varietie, and more might he suecessfully introduced.
" Timber of every kind is everywhere abundaat, the coasts producing teak, ehony, and many others ; the interior, saul, sissoo, bamboos, and rattans; whilea great variety of plants yield excellent materials for cordage. The northern and hill provinces grow at one seaaon European grains, and at another those which are peculiar to the tropics, and many perennids of both these climates suceeed equally well in the north provinces. In the hill provinces the foresta are formed of oaks and pines. The hill men make their strongest ropes for crossing rivers with hemp, which every where uhounds, and is of the finest quality: Opinm, rhuharb, and turpentine, form articles of commerce, as well as musk, Thibet wool, and borar, from the other kingdoms of nature. Somewhere in the vnllies nt the fuot of these hills, or at modeate elevations, the more generally useful productions of European countries might he successfully introduced, as the olive and hop; the latter would be particularly beneficial, as a brewery has been established in the hills, where the climate is excellent. Here also there is considerable prospect of success in the cultivation of the tea plant."
"In the cold scasons," Mr. Royle continues, "there are cultivnted (ahout Saharunpore) of graminu, whet, barley, oats, and millet; of the lequmine, peas, bean, vetch, tares, chich, and pigeon-peas; of crucifere, 1 species of sin 7 pis (mustard) and nulied genera ellit. vated for oil acells, and of the umbellifere, the carno, corinnder, cumman, a apecies of ptychotis and juthis

culum pannorium, as well as of other tribes, tobacen, flax, safflower, and auccory. Almost all the esculent vegetables of Europe succeed remarkably well in the cold season in India. In the rainy acason, a totally different set of plants engage the agriculturist's attention, as rice, cotton, indigo, maize ; holcus sorghum, species of panicum, paspalum, and elusina, of lpgu. mine, species of phiseolus and dolichos; many of the rucurbitacere, as well as sesamum and the species of solanum for their esculent fruit." In another place, this scientific botanist obscrves, "As we have seen with perennials of other kinds, 80 is it with those yielding fruit of an edible nature. Many, both of tropical and temperate climes, succeed nenrly equally well in the northern parts of India; 80 that taking Saharunpoor garden (lat. $30^{\circ} \mathrm{N}$., long. 77.32 , elevation above the sea 1,000 feet, and 1,000 iniles N . W. of Calcutta) as an example, we have collected in one place and naturalized in the open air the various fruit trees of very different countries, as of India and China, Cauhul, Europe, and Amcrica. Of those belonging to het countries, we have the plaintain, custard apple, shaddock, orange, lemon, guava, mango, tamarind, and others, which are common to every part of India. Of Chinese fruits, the lechee, loqutut, longaro, wumpee, flat peach and digitated citron, are perfectly naturalized. Of fruit trees from more northern countries, as Caubul and Cashmere, and from the hills of Europe, there are the almond, pench, nectarine, and apricot, plum, jomegranate, grnpevine, apple, pear, quinee, mulberry, fig, and walnut. Of useful trees of cold countrics which thrive in what
is at some seasons so hot a climate, pincs, oak, maple, dor-wood, service tree, holly, juniper, and box. Of American trees, besides those first enumerated, the logwool, mahogany, parkinsonia aculeatu, and acer nerundium, may be instanced as perfectly naturalized. (Sce large edition of the "History of the Colonies" for a minute description of the principal forest trees of India.)

Indiro, from time immemorial, has been cultivated and manufactured in Hindostan, and in 1665 it was one of the exports from India to England. The E. I. Company's servants turned their attention to it ahout 40 ycars ago, and its successful prosecution has been principally owing (after the circumstance of the destruction of St. Domingo, which, previous to its revolution, supplied nearly the whole world) to the small duty levied on its importation into Fingland, the duty nt first being little more than nominal: in $1812,1 \frac{1}{2} l$. per lb. : in 1814, $2 \frac{1}{2} l$. ; and in 1832, $3 l$. per lb. Its importance to India miny be judged of from the fact, that in the l3engal Presidency the cultivation of indigo is carried on from Dacea to Delhi, occupying upwards of $1,000,000$ statute acres, yielding an annual produce worth from $2,000,000$. to $3,000,000$. sterling, whereof one-half, or jerhaps more, is expended in Indin for rent, stock, wages, interest on capital, \&c. There are from 300 to 400 factories in llengal, chiefly in Jessore, Kishnagur, and Tirhoot. The factories are principally held by Earopeans; but many natives bave factories of their own, and in several instances produce indigo equal to any manufactured by Europcans.

Number of Indigo Factories in the several Dlatricts under the Bengat Presidency; aiso, the Number of European Indigo Planters, Proprietora of Estutes, and the Number of European Assistants resident in the several Districts under the Bengal Governmeut,-18:32.

The low price which Indigo now brings in Europe |profitable limits. The cultivation of Indigo in Madras is diminishing the quantity produced, the exportation some years being $9,000,000 \mathrm{lbs}$.; the recent failures in India will tend to bring the trade within more is tritling. There is little or none prepared in the Bombay Preaidency. The Indigo produced annually in the Kast Indica from $|8| \mid$ was:-

The quantity of Indigo imported, in 1834, was 4,155,296 lhs . ; re-exported, $3,928,226 \mathrm{lba} . ;$ home usc, $2,447,827 \mathrm{lbs}$. 1835 , imported, $4,168,395 \mathrm{lhs}$. ; reexported, $4,074,598$ Ibs.; home use, $2,590,606 \mathrm{lbs}$. i $\$ 336$, imported, $7,710,544 \mathrm{lhs}$. ; re- exported, $3,691,951$ lbs. ; home use, $2,840,398$ lbs.
The price of indigo per chest in Iondon was, in 1824, 1116 . ; in 1825, 140l.; and in 1831 but 451 .; the supply now exceeds the demand, at least in England; but the consumption of Bengal indigo is fast augmenting in France, Holland, Germany, \&c.
Silk forma the next moat important staple of India, and in conjunction with the former, its production in our own territories is of easential advantage to silk and tahbinet manufacturers in England. The total quantity of raw ailk imported into England for 1834 was $3,693,512 \mathrm{lhs}$; and the quantity furnished by British India alone to England in the aame year was 1,203,658 lbs.
Three siecies of mulberry trees are cultivated in India, and two species of silk-worm (the country worm, and the annular Italian, or Chinese worm); the latter fects also on the castor oil plant leaf. The silk is produced in cocoons by the ryots or small cultivators, to whom the E.I. Company's agents make advances; and the Company have 11 or 12 filatures or large factories fnr reeling it with machinery on the simple Italian principle. The Gonatea is the best, the Bauleah the worst. The price of silk has risen in India with the wages of labour, and some manufacturers aay the quality has deteriorated; probably quantity has been more attended to than quality. The
silk districts of Bengal are, Radnagore, Hurripaul, Santipore, Cossimhuzar, Bauleah, Comercolly, Sardah, Jungypore, Mauldah, Rungpoor, Sunna.Meekhi, and Gonnatea, all between the parallelo of lat. 229 and $26^{\circ}$, and long. $86^{\circ}$ to $90^{\circ}$.
The superior quality of Italian silk doee not de. monstrate natural inferiority in that of India, in bales of E. I. to which attention has been paid have sold equally well with Italian silk. Efforts are now making in the Bombay Presidency to extend the pro. duction of raw silk, and the commencement promises success ; we may therefore look forward to a period when we shall be totally indepenilent of every other country for the raw staple of this essential and beau. tiful branch of our national manufactures.
Cotton, a staple of Indian Agriculture and of British manufactures, well deserves attention, were it only for the important circumstance that our chief branch of trade is almost totally dependent on a rival, (and with little provocation) perhaps a hostile state. The importation of American cotton into England is nearly $300,000,000 \mathrm{lts}$. yearly, that of India not the onetuentieth part of British consumption. If we can be made independent of France and America for indigo and silk, ao can we become also of cotton, Indis pro. ducing in itself every varicty; the justly celebrated sea island cotton is actually in cultivation in several parts of India, but owing to neglect it degenerates into an annual, whereas in America it is carefully cultivated as a triennial plant. The Dacca muslins, so celebrated all over the globe, (and of which the manufacture is now lost, owing to the inundation of Manchester goods), were made from India cotton, and if the late duty had been kept on American raw cotton, sufficient encouragement would have been given to the Hindoos to attend to ita cultivation, as it is we have not only ruined the Indian manufac. turer, but in return we have offered no encounge. ment to the raw producer. The cotton grower in India ought to be stimulated to greater efforts on examining the consumption of cotton wool in Eng. land:-

As the surest means of inducing a more careful attention to India cotton，both in the cultivation， cleaning and packing，a removal of the entire duty on importation into England would be most effectual， coupled with an absence of all transit dues in the East．

That England has nothing to fear from admitting the cotton manufactures of the Hindous to British markets，at a juster rate of reciprocity than is now practised－that is $30 l$ ．per cent．in England，against the Hindoo，and but $2 \frac{1}{2}$ per cent．in India，against the Englishman is evident，from Mr．Keunedy＇s statement hefore the Parliamentary Committee，viz．that one spinner by machinery，in Britain，will produce yarn at one－fourth the price that it costs for the same quantity of workmanship in lndia，supposing the wages of the former to be 1 s .8 ll ．and of the latter $2 l$ ． per day．

Mr．Kennedy＇s statement was thus corroborated by figures，which shew that，in addition to onerous duties in England on the Hindoo wenver，the Intter was less liable to contend with the former，by reason of the rapid fall of English prices．
Cumparison of the cost of labour in producing yarns in
Brtain and India，for one pound weight，from No． 40 to 250 ，and likewise of the value of the labour and materlal combined．

Sugar may be cultivated and manufactured to an extent in India sufficient to supply the whole world； its production at present is immense，as it forms an ingredient in almost every article of food or drink used by the Hindoos，and where the manufacture is attended to as at Benares，the grain is large and sparkling and pure as the best Mauritius or Demerara sugar．The aoil and climate of Bengal，Madras，and Bombay are peculiarly suited to the production of this essential nourishment to man；every village has its patch of cane，and a rough manufacture named Jaghery is extracted from the Palmyra and cocoa－nut tree．It is in evidence before Parliament，that the sugar cane of Bengal is as good as any of the West Indies，and some of a auperior quality has been produced In the Appendix，page 2 ，will be found the quantities of sugar exported from the E．I．pos－ sessions since 1816 ．

Coffee next deserves consideration as an Indian staple，and which like the last article only requires just treatment in England to become one of the most valuable exports．In Malabar，Coimbatore，\＆c．the cultivation is extensive，and the berry of the finest flavour when attended to in the drying．Upper Ben－ gal and the territories acquired from the Burmese， are peculiarly adapted for the growth of coffee．
The following returns shew the quantity of coffee imported from the East Indies into Great Britain，－ re－exported and retained for home use for 15 years； the return includes Ceylon，avg．2，824，998 lbs．Sin－ gapore，3，611，456 lbs．Mauritius，26，646 lbs．\＆ic． From Bengal，Madras and Bombay alone for 1831， 2，780，668 lbs，

East india Coffee（including Mauritius in 1835 and 1836） Imported into the United Kingdom

## HINDOSTAN.-STAPLE PRODUCTS.

It will be perceived by the foregoing, that of late $\mid$ with 1815 and 1816 , when the importation of coffee years the importation of East India coffee is on the $\quad$ hy the private trade amounted In two years to increase, still there is a great defalcation compared $\mathbf{4 3 , 3 8 1 , 4 7 8} \mathrm{lbs}$.

* The quantity of opium shipped from Calcutta in $1795 \cdot 6$, was 1,070 chests, and in $1829-30,7,473$ chests. The total quantity of opium exported from Calcutta during the former year was 5,183 ehests, and during the latter, 9,678 chests; the grand total exported duriny the whole 35 years was 162,273 chests, which, at the average rate at which it sold, 1,200 dollars a chest, would give a trade in this stinulating drug of nearly two hundred million Spanish dollars I

Malwa opium is considered by the Chinese as having a higher touch, but not so mellow, nor so pleasant in flavour as the Patna opium. The smokeable extract which each quality of opium contains is thus intimated by the Chinese,-(who use opium as we do wine or spirits) I'atna and Benares opium 45 to 50 touch; avg. 48 ; Malwa 70 to 75 ; avg. 72 $\frac{1}{2}$; Turkey 53 to 57 ; avg. touch 55. The cultivation of opium in India, as explained under the chapter in revenue, is a monopoly as regards Patna and Benares in the hands of Government; and a revenue is derived from the Malwa opium by a system of passes on shipment from Bombay.

Pepper is another valuable India staple, but its import from the Liast has considerably lallen off, the
importations of 1815 and 1816 , being $17,863,847 \mathrm{lbs}$, and in 1827 and 1828 , but $14,045,868 \mathrm{lbs}$. being a decrease of uearly $4,000,000 \mathrm{lbs}$. weight

Saltpetre is yielded by the Indian soil in greater abundance than any other country, ita importation into England by the East India Company in 1814, was $146,000 \mathrm{cwt}$., but the continuance of peace has much lessened both the price and consumption; both are now again on the rise, but the price is still solow that the saltpetre collected in the East is now being brought to fertilize the fields of Albion. The import of late years of saltpetre from Bengal has been about 100,000 bags, but the total quantity exported from Calcutta, has averaged 170,000 bags, while in the year 1795, it did not amount to more than 13,000 bags. The total quantity exported from Calcutta during the thirty-five years ending 1829.30, was $2,202,465$ bags, of which the United Kingdom received 1,5 23,655 hags; North America, 278,895 bags; France, 101,237 bags; and China, $1,333,615$ bags.

The Tobacco of Masulipatam, made into snuff, is much prized in England; the quantity of tobacco grown in India is enormous; every class, high and low, use it, and if the duty were reduced in England, the variety of soils in India would afford an infinite variety of that fascinating weed for the British market. Very rich lands produce about 160 lbs . per acre of green leaf; excellent Havannah tobacco is grownin Guzerat, Boglipoor, Bundlecund, \&e., and some if in

The import gal has been about ity exported from ags, while in the more than 13,100 ed from Calcutta ing 1829.30 , was Kingdom receired , 278,895 bags; 1,333,615 bags. hade into snuft, is antity of tobacco ry class, high and duced in England, afford an infinite the British market. 0 lbs. per acre of bacco is grown in c., and some fr m
the Irrawaddy territories has been reported by the brokers in London as equal to the best American The wsit of proper attention in the curing has been a great obstacle to its arriving in a marketable state in England sfter a long East lndian voyage. Tohacco, like hay, must undergo a heating to be fit lor use, and the alightest particle of green vegetable matter left in the tohacco heats on the voyage, destroys the delicate flavour of the leaf, and even rots it. Experiments are now making at Bombny in the curing process. The duty on E. l. tobacco might, withont lunh to the revenue, be reduced from 2 s .9 d . to 2 s . at least
Grain is one of the ataples of Bengal; the total guantity of grain exported from Calcutta to countries beyond the three Presidencies, amounted during the thirty-five years, ending 1829-30, to $12,366,571$ hags ; for the latter years the export has been on the increase, averaging 600,000 bags a year, and of this quantity Mauritius has of late taken nearly one-half, for instance in $18.8-29,332,7.5$ bags. Great Britain has received, during the whole thirty-five years, $1,730,998$ hags ; and the export to France is yearly increasing.

Tea of excellent quality, rated by the London brokers at $1 s .10 d$. per lh ., which is equal to the Chinese Congo, is now heing prepared in Assam, nnd will doubtless ere long be a large and valuable article of export.

Silkworms are found in Bengal, and towards the north of Poonah in the Dekhan (see Dr. Roxburgh's paper on the silkworins of Bengal, in the seventh volume of the Transactions of the Linncan Society ; and Colonel Sykes' account of the Kolisurra silkworms in the Dekhan, Transactions of the Royal Asiatic Society, vol, iii. p. 5.41, \&c.)

Iron, copper, lead, antimony, plumbago, zinc, sulphur, silver and gold, together with inexhaustible supplies of coal, ahound in various parts of the comntry. Boglipoor district is peculiarly rich in iron; and about Pointy and Siccary Gully, very large mines have heen worked in former times: the ore is nodular, and yields from twenty to twenty-five per cent. iron. The Sylhet hills produce in the greatest abundance time granulnr iron ore like sand. At a meeting of the Bengal $A$ siatic Society, 20th February 1833, specimens of copper ore from Nellore, were presented on the part of Mr. Kerr. The mines appear to lie to the northward of the Pennar river, 36 miles N. N. W. of Nellore, and thirty-seven west from the sea, near a village called Ganypenta in Arrowsmith's map. Coal (see Geology) is now raised in Burdwan in considernble quantitics, and it is preferred for the steam vessels at Calcutta, to European or New South Wales coal, in consequence of its not so soon filling the flues, owing to the pureness of the bitumen and the superior quality of the gas.

A coal mine now working at Chirra Poonjee produees a mineral, which does not leave one-fourth as much ashes as the Burdwan coal; the strata are nearly horizontal, requiring no pumps or machinery for drainage; it is delivered at the Sanatarium at 400 lbs . weight for 1 s . The coal now worked is of the alaty kind, specific gravity 1.447 , containing volatile matter, 36 ; carbon, 41 ; and a copious white ash, $23=100$; seams of a superior coal, from two to tour feet thick, have been more recently discovered contiguous to abundance of excellent iron ore. Coal has been recently discovered at Fatephír (Nerbudda) which showed near the surface; water separated on a sand heat, 3.5 ; volatile matter not infiammable, 10.5 ; charcual fixed, 22 ; carthly
residue red, $64=100$. Specific gravity of coal worked at the mines on the Kosya or Cossyah hills, 1.275 ; composition volatile matter or gas, 38.5 ; carbon or coke, 60.7 ; earthy impurities, $0.8=100$ (the ash ia pxceedingly small). The coal found near Hurdwar in the Jimalayn mountains, has a specific gravity of 1.968 , eumposition volatile mntter, 35.4 ; carbon, 50 ; ferruginous ash, $11.6=100$; coal found in Arracan, specific gravity, l.f(1) ; gives out bitumen and gas on Ignition ; composition, volatile matter, much 66.4; carbon, 83 ; 解h, $0.6=100$.

The iron ore found in the south of lndia is excellent, Mr. Heath is now producing excellent Iron near Madras. The Himalaya mitues supply, ehiefly, varieties of red iron ore, affording from thirty to sixty per cent of taetal. Near Kalsi, on the Jumna, there is an extensive bed of specular iron ore; red hematite, associated with micaceous iron ore, occurs in a large bed in gneis nt Dhaniakat. At Rhamghur, on the road trom Bhanouri to Almorah, there are beds of the senly red iron ore, also in gneis; compact red iron ore occurs in clay-slate, containing beds of limestone at Kntsari, on the Rhamganga. In some places a hrown ore of the hyidndit species, containing manganese, and affording a superior steel, is found. Boglipour district is peculiarly rich in iron, and about lointy and Siccary Gully, very large iron minea have been worked in former times; the ore is nodular, and yields from twenty to twenty. five per cent. iron. The Sylhet hills produce in the grentest abundance fine granular iron ore like sand. Copper mines are worked at Dhanpur, Dhobri, Gangoli, Sira, Pokri Khari, and Shor Gurang. The ore found in the Dhaupur mine is gray copper ore, which affords from thirty to fifty per cent. of copper; it is associated with malachite, or green carbonate of copper. The ores are contained in a compact red-coloured dolomite ; hence mining operations can be carried on without the expense of wooden frame-work or masonry, The Pokri mine or mines, are situated in talc alate of a loose texture, and hence the worbing is more difficult. The ores are vitreous and $p$. nition $n=$ both of them rich in copper. The waters nowing from the mine are impregnated with sulphate of copper or blue vitriol. The Sira and Gangoli mines are situated in beds of indurated talc, which are enclosed in dolomite. Sometimes the one, sometimes the other rock, form the walls of the mine. The iron is yellow copper or copper pyrites, mixed with iron pyrites and smaller portions of gray copper ore. The Khnrl and Shor Gurang mines are similarly situated, the ores are gray copper, yellow copper, or copper pyrites, and cartonate of copper. Mines exist to the northward of the Penuar river, thirty-six miles N. N. W. of Nellore, and thirty-seven west from the sea, near a village called Ganypeuta, in Arrowsmith's map. The copper ore prevails over a considerable tract of country ; it consists of malachite, and of black anhydrous oxide of copper, with red and ycllow ochre imberlded in micaceous schist. The ore differs from the English coppers essentially, in being free from iron pyrites and other deteriorating ingredients, as lead, antimony, sulphur, \&c, which make that ore difficult to purify, wherens the Nellore ore hecomes quite pure by simple 8 melting. A specimen of reduced metal sent with the ores to the Asiatic Society is of a very fine colour and highly mulleable. On anaiyzing the ore, it was found to contain carhonic acid, 16-8; black oxide copper, 60-75; red oxide iron, $19-4$; silica and loss, $3-0.5=100$. Four different varicties examined by the secretary, contained from
thirteen to forty-seven per cent. of red oxide of iron and silex. Lead.-The most productive of these mines are situated on the river Tonse, near Deyrah Doon; The ore (a fine granular galena) is found in clay-slate and clay-limestone. It would be tedious to particularize other productions; two have heen recently discovered. $\Lambda$ native sulphate of alumina obtained from the aluminous rocks of Nepal, used by the native doctors to cure green wounds or bruises, yielding, on analysis, sulphate of alumina, 95 ; peroxide of iron, 3 ; silex, 1 ; loss, $1-100$; and a rative sulphate of iron is procured from the hills of Behar, and used by the dyers of Patna, yielding sulphate of iron, 39 ; peroxide of iron, 36 ; magnesia, 23 ; loss, 2-100. These two minerals, the natural productions of Nepal and Behar, may be had in the largest quantities, and would be found extremely useful in the manufacture of Prussian bluc, calico printing and dyeing. Common salt (muriate of soda).-Carbonate of soda and nitrate of potash occur in many districts forming the salt, soda, and nitre soils. A salt lake, twenty miles long by one and a half broad, is situate near Samber at Rajpoot Town, in latitude 26.53, and longitude 74.57. ; it supplies a great portion of the neighbouring country with salt on the drying up of the lake after the rains. In Berar there is a salt lake, called Loonar, lying in a sort of cauldron of rocks; it contains in the 100 parts, muriate of soda 20 ; muriate of lime, 10 ; muriate of magnesia, 6. Natron and soda lakes are said to occur in the Himalaya range. Towards the sources of the Indus salt lakes were observed by Mr. Gerard at 16,000 fect elevation ahove the sea, and there is an extensist: salt mine in the Punjaub.
The valuable diamonds and other precious stones found in Golconda, in Orissa, in Bundlecund, \&c., require no detailed notice. Silver ore, of a rich quality, is ohtained in different places. Gold is found in the beds of most rivers, particularly in Neilgherries; but it exists in abundance in the state of ore in Malabar. This precious metal has been discovered not only in Coimbatore, but throughout that tract of the country lying west and south of the Nielgherry mountains and Koondanad. It is found also in large quantities in various parts of India.
In Bengal land is now worth 67 years' purchase of the revenue. The inerease of wealth throughout Bengal has been most rapid; notwithstanding the disadvantages under which the agriculturista labour, by the English markets being shut against their raw and manufactured produce, and the great number of artizans thrown out of employment by the introduction of piece goods, \&c. from England; land purchased in Calcutta 30 years ago for 15 rupees is now worth and would readily sell for 3 C 0 . Ten years ago a labourer in Calcutta received two rupees per month, now he is not satisficd with less than four or five ruplees per month, and there is ceen a scarcity of workmen; 12 field labourers were formerly to he had for less than one rupee a day, now half that number could not be had at that rate of wages. Mr. Colebrook says, in 1804, in his Husbandry of Bengal, that "a cultivator entertains a labourer for every plough, and pays him wages, on an average, one rupee per mensem, and in some districts not half a rupee per mensem." A cabinet maker was glad to obtain eight rupees a month, for the exercise of his
skill, now lie readily obtains 16 or 20 rupees for the same period. All handicraftsmen or labourers have risen in a like proportion ; and as to the price of food it is sufficient to state one article as a criterionrice, the staff of life in Bengal, was wont to be sold at eight annas (half a rupee) per maund ( 82 lbs .) its price has increased four fold, being now averaged at two rupees per maund. The wages of a Hindoo car. penter at Calcutta may be estimated at $6 d$., of a Chinese at $2 s$ s., and of the lowest European 6s. per day. This increase in the value of property may be mainly ascribed to the fixed settlement of the land revenue -to the security given to all species of industryand thus inducing the surplus wealth derived from commerce to be invested in the soil : hence the rise in wages, and in the value of all commodities.

Comparison of the Wages of Artifieera and othet Public Setvants, under the Pelshwa's and Itritinli Governments in the Dukhein, in 1828 and 1814. [Col. S! kes' Report,]

It would be extremely desirable to ascertain the rates of wages, the prices of provisions, and the rental of land in the various districts of British India, and in particular to compare the present with the past. Wherever political security has been established, pro. perty of all species will rise in value; but where social rights are secured-where the state has no longer the power of taxing at its will and pleassre every species of industry-and particularly that basis on which all social prosperity is based (the land) :there, indeed, with a fertile soil-a genial climate-an industrious and dense population-and great mineral and commercial resources-it would be difficult to fix the limit of social wealth, of political greatnes, and of moral happiness.

CHAPTER II.-CEYLON.

Section 1. Ceylon (Singhala, Lanka, Serendib, or Taprobane), situate between the parallels of 5.56 to 9.50 N . latitude, and from 80. to 82. E. longitude, is one of the most magnificent islands on the face of the globe; the extreme length is about 270 miles from north to south, with an extreme breadth of 145 miles (an merage of 100 ), and a superficial area of about 24,664 square miles.
Favourably situate at the W. entrance of the Bay of Bengal, it is separated on the N. W. from the Coromandel coast, by the Gulf of Manaar, 150 miles distant from Cape Comorin ; on the S. and E. its beautiful shores are laved hy the Indian Ocean. The interior of the island is formed of ranges of high mountains, in general not approaching nearer to the sea than 40 miles, with a belt of rich alluvial earth, nearly aurrounding the island, and well watered by aumerous rivers and streams. A picturesque table land occupies the southern centre, and thence, towards the coast is a continuous range of low hills, and elevated flat land extending nearly to the seashore. 'To the west, the country is flat, and on the northern shore broken into verdant rocky islets, and a peninsula named Jainapatam. The lofty central division of the island varies in elevation above the level of the sea, from 1,000 to 4,000 feet, but the range of table land may be estimated at from 2,000 to 3,000 feet, extending in length 67 miles by 50 miles wide. From this elevated region arise some conical mountains from 2,000 to 3,000 feet higher above the sea. The mountains run in genernl in continuous chains with the nuis lovely vallies the sun ever shone on between them; the hills clothed to the very summits with gigantic forests, from which issue magnificent cascades and foaming cataracts, that form in the vallies placid rivers and babbling brooks fringed with turfy banks, and all the beautiful verdure of the tropics. [Sec "Colonial Library."
11. Of the early colonization of Ceylon, Sclan, $\operatorname{Sin} \alpha-$ ala, Lanka or Taprobane, we know little certain. The original Singhulese, or Ceyloneze, are probably de. cended from a colony of Singhs, or Rajpoots (to shoa, in appearance, even at the present day, they pear a striking resemblance) 500 years B. C. But the Malabars, it is stated, several times succeeded in inading the island 200 years B. C. At an early era the bland seems to have attracted the attention of the vestern world; thus Dionysius, the geographer, menions Taprobane, its ancient and classic name, as mous for its elephants; Ovid speaks of it as a place 0 far distant that it conld be no advantage to have is fame extended thither; Pliny thought it the comencement of another continent, and extolled it for he purity of its gold nud the size of its pearls. In he reign of Claudius, n Ruman, who farmed (says the (ev. Mr. Fellows) the customs in the Red Sca, was riven in hia bark by a gale of wind from the coast of rabia tu'Taprobnne, where he received a most fnvour.

3 n
able reception, and so extolled the glory of the imperial city, that the sovereign of Taprobane sent to Rome an embassy of four persons vid the Red Sea. We have existing evidence that, in remote ages, Ceylon was an extensively peopled and civilized country (it has now only 58 mouths to the square mile). Near Mantotte are the ruins of a very large city, constructed of brick and mortar, and an immense artificial tank or reservoir for water, the basin of which is 16 or 18 miles in extent; an embankment about nine miles from the tank is formed of huge stones, eight feet long, four feet broad, and three feet thick (these are cemented together by lime) ; the length of the dam is 600 feet, the breadth about 60 , and the height from 8 to 12 feet. This gigantic work is said to have been exccuted by the Hindoos, who made Mantotte the capital of a kingdom which they established over the northern parts of the island. Of an antiquity, however, more remote than the foregoing, arc various buildings and wurks towards the interior, constructed of vast stones, elegantly cut and dovetailed-like into each other. No mortar has bcen used in some of the edifices, which still exist (as if in defiance of the ravaging hand of time), with visible inscriptions on them, which no existing human being call understand. Among the works of this remote age is the Lake of Knndely, near Trincomalec, which is 15 miles in circumference, formed by the artificial junction of two hills, which, in one part in particular, exhibits a parapet furmed of huge blocks of stone, 12 to 14 feet long, and broad and thick in proportion. This parapet is at the base 150 feet broad, and at the summit 30 feet. By means of this wonderful structure, the adjoining high lands are connected.

It is also singular that arches are to be found in the parapet, and over them conduits, similar to those used by the Romans in Italy, and termed condottori.

Belonging also to this age is a gigantic pagoda, 40 iniles S . of Batticalua, the base of whose cone is a quarter of a mile in circumference, surrounded by ant chelosure one mile in circumference, consisting of a brond wall of brick nind mortar, with mumerons cells in it, and an entering colonade of stone pillars 10 feet high.

Mr. Brooke, in trncing the course of the Maha Villagunga, in 1825, came on the ruined tracks of several very extensive canals, one of which he estimated to have been from 5 to 15 feet deep, and from 40 to 100 feet wide. The natives told him that this canal was cut hy people whose stature was forty fiet high! The largest recorded bridge was one in the southern part of the island, stnted to be 280 cubits ( 630 feet) long; the next in size wns 193 fect long, across the Kaloo-Ganga, on the road from Aclam's I'eak to Bentotte. The remnins ot a stone bridge exist near the lort of lialawo Oya, the stones of which nre from 8 to 14 feet long, jointed into one another and laid in reguiar lines, the upright pillars being grooved into the rocks helow; this bridge was built

15,000 years ago, and Captain Forbes demonstrates that the Singalese, at that remote period, used the wedge and chisel for splitting and shaping those huge blocks of stone, after the manner which bas only been introduced into Great Britain in the nineteenth century.

It is recorded in ancient mamuscripts, that Anorajhapoorn, the ancient Cingalese cupital, was surrounded by a wall 16 miles square; mud indeed a list of streets of the city is still in existence. To the N . of the ruins of this place are six pagodas of immense magnitude, the form leing half a sphere with a spire built on it; the two largest are each 270 fect high, of solid brick-work, once entirely cowered with chmam (lime polished like marhle) ; the solid contents of one of the largest is abaut 456,071 cubic yards, and with the materials of which it is composed, a wall of brick might be constructed 12 feet high, two foet wide, and 97 miles long ; the roofs are composed of curionsly carved raters of wood, and the expense and habour enmboyed in the whole of the structures bust have been immense.

In the ancient histories of Trincomalede, $\mathfrak{q}$ is stated by Sir Alexauder Johnston, that two kmg af Noldemamdelum, Manumethy Candesoldm, and hii: son Kallocarta Mahurasa, reigued over the grent re part of Ceyon, and over the southern peninsuli of latha, about the $512 t h$ yenr of the Cell Juer, or $1 H 00$ years ago, who constructed the great buiddings and tanks, the remains of which are yet extant.
But we must leave these remote ages, and come to some later period. In the sixth contury Ceylon was the ehief mart for eastern commeres. In the sistecnth year of the reign of Praakrama Bahoo the ist ( A .1 ). 1153), the Siagalese monsreh sent a theet of 500 ships, with an army on board, and provisioncd for 12 months, to avenge the insults offered to the Singalese ambussador and to Singalese merchants by the kitig of Cambodiae and Arramana. This vast tleet was rquippod in six months. In the thirtecoth century it was visited by Marco Polo, who pretty accurately marrated the particulars of the island, which he described as "the finest in the world." The central situation of Ceylon had led to its port being frecfuented by ships from China, India, Arabia, \&e. by which means Galle and Colomion, from their fuvourahle sitmation, became entrepots for the general commerce of the East. When the Portuguese first visited the island, A. J. 1505, they found it had for $n$ long period been declining, owing to intestine wars and invasions from Malatiar and Arnhia. The Cingalese King availed himself of the assistance of the Portuguese Admiral (Almeida) for the expulsion of the invaders, pro. mising in return an anmual tribute in cinnamon. In 151N, the Portuguese, under Nvarenga, began to fortify themselves in Colombo, Galle, \&e., and soon after they ohtaned complete possession of the maritime provinces, and drove the King of Kandy to such extremitios, that he was glad to retain even possession of the interior provinees.

For a century the l'ortuguese held their sway, when in 1603, the tirst Dutch theet arrived at Trineomalee and Batticalon, and ofiered to assist the King of Kandy against the Portuguese. In 1632, a strong Duteh armament, acting in conjunction with the King of Kandy's forces, commenced a series of contests with the Portuguese, and after a long and sanguinary struggle, which lasted until 1656-7, the latter were finally driven from an island, of the sea coast of which they had been masters for mearly 150 years.

The Cingalese, however, soun found that they had
exchanged masters to no advantage ; for, from 160 if to 1796, when the British in their turn cane to the aid of the Kandians, the Dutch were engaged in a series of perpetual hostilities with their mountain neighbours. Nor were we more fortunate than our predecessors; for, in 1798, on the elevation of a new king to the Kandian throne, we became involved in hostilities, which led to our capture of the lisadian enpital in 1803.
We did not, however, long retain the capital, the Kundians attacked us with great violence, complelied our troops to a precipitate retreat, massacrod bin sick soldicrs in the hospitals, and having surrounded the British foree, required them to lay down their urms; the commanding oflicer, Major Davic, unfor. tumately did so, the Malay troops were picked aside, and the whole Laglish furce instantly massacred, es. cept three binropean ofticers retained as prisomers, and one mutilated corperal, who made his escape to Colombo with the melancholy intelligence. Until $1 \times 15$ we retained the maritime provinces, while the king of Kandy kept the interior, hut in that year the monareh being deposed on aceount of his repeated acts of oppression and ernelty (one act was making the wili of his prime minister pound to dealh he own ehidren in a rice mortar), Gencral Browntigy was invited hy the Kandian chicfs to take pussession of the interior, and execpting an expensive und troublesome insurrection, which lasted from 1817 to 1819 , Ceyton has ever since had the British sway established over the whole island.

III. Colombo.-Ceylon mny not inaptiy be termel the Nalta of the Indinu Ocean. Its commercial copital Colombo, is situate on the S.W. eonst, lat. 6.57. N., long. 80.0. E., defended by a strong fort (built on a peninsula projecting linto the ocean) mensuring one mile and a quater in circumference, having seven primeipal Instions of different sizes, connected by intervening curtains, and defended by three hundred pieces of cannon. The fortress is nearly insulated, two-thirls of the works being alinost laved by the acn, and, with the exception of two very narrow and strongly guarded eausewnys, the remuinder protected by a fresh-water lake nad a broud and deep diteh with a tiuc glacis. Four strong bnstions are scawned, and three face the lake, and command the narrow approach from the l'ettah, or mative town outside the walls. The sea itself is ndditional strength for the lortress, for on the extensive southern aide the surf ruus so high on a rocky shore, that any attempt at lauding troops would be attended with certain destruction; and on the west side, where the sen is smoother, the appronch is completely commanded by the batteries; and a projecting roek, on which two compact batteries are placed, entirely protect the rondstead.
Thincomalee.-Trincomalee, the maritime capital of the island (Colombo is the seat of Government), , in a politien point of view, of the most impor. ance, not merely is regards Ceylon, but from being,

Neison justly described it from personal knowledge, "the finest harbour in the world." Trincomalee is on the E. of Ceylon, lat. 8.32 N., long. 81.17 E., 150 miles N.E. from Colombo (to which a fine road has beell opened), 128 miles travelling distance from Kandy, and within two days' sail of Madras. Its physical aspect is that of a narrow neck of land or isthmus, connccting the peninsula on which the fort of Trincomalee is built (which juts out a considerable distance into the sea) to the mann land. Towards the W. this isthmus gradually expands itself into a plain of considerable extent, which is bounded on the S. E. by a ridge of lofty mountains, on the N. W. by low wooled hills, and on the $W$. at the distance of about a mile from the fort, by the inner harbour. As far as the eye can reach from the fort, excepting in the immedinte neighhourhnod of the bazaar, the country is covered with wood.

The scenery of the spot has been compared to Loch Katrine on a gigantic scale (the vast harbour appearing land-locked), the grandeur of which enanot be surpassed. The fortifications sweep along the rocky coast, upwards of a mile in lengtli, encompassing the base of a steep hill on the sides connected with the adjacent lancl. The town and fort are placed at the bottom of a rock, and joined to a marrow neek of land running out towards the sea, and separating the inner barbours from two outside bays, which lie on either shore of a three-sided or corned promontory.
" Duteh" and " Back" buys are eutircly commanded by the artillery on the S . and N . side of the lortified rock, and the month of the harbour is protected by Fort Ostenburg, situate on a mount three iniles W. of Trineomalee. No communication can take place with the promontory (the part that projects into the sen being protected by steep rocky eliffs) except through the well-covered gates of the fortress; and the lust engineers have pronounced their opinion of its impregnability if it be well garrisoned.

Fort Frederick, where the luropean troops (consisting generally of four companies of a liurojean regiment, a company of royal engineers and artillery, and detnehments of the Ceylon rifles) are stationed, is a fortified neek of land projecting into the sca, separuting lack Bay from Dutch Bay. The ground rises gradually from the glacis to the llag-staff, a higight of about 300 feet, and then slopes towards the sin, till abruptly terminated by a perpeudicular clitr, from which a pinmmet may be dropped to the water, $n$ distance of 240 feet. The depth at the base is so great, that a line-of-battle ship may pass close to it. None but military reside within the works. The prospect from the barracks towards the sea is only hounded by the horizon, whilst towards the land, the eye ranges over the splendid scenery of the inner harbour, fort Ostenberg, und a long extent of wooded country.

Fort Ostenberg is nenrly three miles from Fort Frelerick, and is built on the termination of a ridge of hills that partly form the houndary of the limer harbour. The fort commands the entrance, and its base is wnshed by the aca on three sides; it also protects the doek-ynrd, which is immedintely below it. A detnehment of Royal Artillery are quartered there, and $n$ company of Europeans.

The vicinity of Trincomalee is a wild uncultivated country, abounding with game of all kinda, from a snipe to an clephant. Quail, jungle lowl, monsedeer, and monkeys, are found on the Fort Ostenherg ridge. The Mahasilla Gangn, which runs past Kandy, empties itself into the ser not fur from 'Trincomalee.

It has lately been surveyed by Mr. Brooks, the master attendant, who reporta favourably of its capabilities. It is navigable for some distance; and he is of opinion, that with a little expense, it might be made so to within 40 miles of Kandy, and therehy open a water comsau. nication, by which the coffee, timber, and other prou. こe of the interior could be brought to the sea-coast.
The harbour, beantifully diversified with islands covered with a luxuriant vegetation, is spacious enough for holding all the ships in the world, accessible at all seasons; and the depth of water within the bay of Trincomalee is so great, that in many places, not far from the shore, it is unfathomable, and vessels may lie close alongside the rocks in perfect safety.

Point de Galie is another strong fortress and excellent harbour, situate at the very southern extremity of the island, in lat. 6.1 N., long. 80.10 E., distant 78 miles along the sea shore, S.S.E. from Colombo. The fort is a mile and a quarter in circumference, on a low rocky promontory, commanding the narrow and intricate entrance leading to the inner harbour. The extensive and substantial works are, like those of Colombo, surrounded for the greater part by the ocean, and there is every convenience of water, \&c. capable of enabling the fortress to stand an extended siege. The outer and inner harbours are spacious, and the inner secure at all seasons of the year.

But if the sea-coast he well defended, not less so is the interior; every hill is a redoubt, and the passes in the mountains might be defended by a resolute enemy by rolling the stones off the suminits of the heights. Kandy, the capital of the interior ( 85 miles from Colomho) is situate in an amphitheatre commanded by forts on the surrounding hills; the vale has but two accessible entrances well guarded, and the city within four miles is nearly surrounded by a broad and rapid river (the Maha-Villa Gunga) filled with alligators.

The roads in the maritime country are through groves of cocoa-nut trees along the sea const. Carringe roads extend from Colombo as far as Chilaw to the northward, and from Colombo through Galle as far as Matura to the southward. The mnin road from Colombo to Kandy (the Simplon of the East, on which there is now a "mail coach and four !") is a work of stupendous magnitude; hills have been cut away, vallies filled up, and (near Kandy) a tunnel fire hundred feet long' cut through the mountain, while rapid and unfordable torrents and rivers have had elegant iron and wooden bridges thrown across them. A capital road has been opened between Trincomalee and Colombo, and, before a few more years have elapsed, every town in the island will be connected by roads passable at all seasons.

Paradeinia bridge, which has been thrown over the rapid and unfordable river Maha Villa Gungn, consists of a single arch with a span of 205 feet, principally composed of satin wood; its height above the river at low water-mark is 67 leet, and the roadway is 22 leet wide. The arch is composed of four treble ribs transversely, distant from each other five feet from centre to centre; the sum of the depths of these ribs is four feet, which, with two intervals of two feet each, makea the whole depth of the arch eight feet; the arch beams, with the exception of those next the abutments, are 16 to 17 fert long and 12 inches thick, abutting agminst each other with an unbroken section, secured at the joints by the notched picces which support the rond-way, the latter being held in their position by means of cross ties below and ahove the arch, and immediately under the road-way; these cross-ties, with the aid of diagonal braces, which
are also locked into them, serve to give stability and firmness to the whole structure, which has no other material but timber in its construction.
IV. The north division of the island is sandy and calcareous, resting upon madrepore, as it is little elevated above the level of the sea; the surface of the elevated lands of Saffragam and Lower Ouva is much stronger and well adapted for tillage; the granite soil of the interior produces the most tuxuriant crops wherever there are a sufficiency of hands to call forth the gifts of industry. The soil of the southem plains is sandy, resting on a strong red marl termed "Cabook," the base of which is granite, and in the neighbourhood of Colombo, the lands nre low and subject to inundations from the Mutwal river.

The fonndations of the island are evidently calea. reous, yet the greater proportion of its soil is sili. ceous, in many places (as in the cinnamon gardens near Colombo) the surface heing as white as saow, and formed of pure guartz sand. The soils of Ceylon are stated to be in ganeral derived from the decom. position of gneis, granite, or clay, ironstone, the principal ingredient being quartz in the form of sand or gravel, decomposed felspar in the state of clap, combined with different proportions of the ovide of iron, quartz in most instances being the predominat. ing substance, and in many places, forming nine. tenths of the whole, the natural soils seldum contain. ing more than three per cent. vegetable matter. The most productive carths are a brown loam resulting from the decomposition of gneis or granite exceeding in felspar, or a reddish loam originating from the de. composition of clay ironstone : the worst soils are those where quartz predominates, proceeding from the disintegration of quartz rock, or of granite and gneis, containing a very large proportion of quartz. Regular granite is not of very common occurrence; well formed gneis is more abundant, but sienite is not common: pure hornblende, and primitive greenstone, are far from uncommon; and dolomite some. times of a pure snow white, well adapted for the statuary occasionally constitutes low hilis in the inte. rior: limestone is prineipally confined to the northerly province of Jafnapatam, and the island appenes to be sorrounded by an interrupted chain or belt of sand. stone. interspersed with coral.

The coral of the Pamban banks is not the zoophite of the Mediterrancan and the South Scas, but a light, porous, crumbling substance, sometines cut and shaped into bricks by the Dutch, and more frequentry burnt into lime. Of this suecies of lime the late fort of Negapnam was boilt ; and so great is the hardnes which it acquires by long exposture to the weather, that when Major De Haviland, some years ago, requested a specimen of the masonry of the fort to be procured and sent up to him, the iron crows and other instruments used in detaching the blocks were blunted and loent in all directions by the solidity of the cher nam, which is far more adliesive than that obtained from shells. A stone capable of being converted into so valuable a cement, would almost pay the expens of its excavation. The ridge ealled 'Adam's Briden' consists of a mass of loose sand, with no firm fous dation of rock or clay to support it. The sand appers to be thansported in great quantities from noe sidet the other ol the ridge, according to the directionof the monsoon; for, in addition to the action of tw surf, which washes it over to the lee side, where it 3 narrow,-in other parts, where it is broad, strem of lt , in a dry state, are carried across by the wind itself, and deposited there. strait are very shallow, and not more than sufficient for the amall country boats to pass; but it is stated, in the records of the Dutch government at Ceylon, that a Dutch fleet once passed through the channels of Adam's Bridge to avoid a Ianish fleet in chase of them. It has been justly observed, that if such really were the case, the channels must have been in a very different state, as some parts of the 'hridge' are now dry, and a few feet of water is the greatest depth any where on it.

The metallic riches of Ceylon are yet almost unknown. The island is principally eomposed of granite, with veins of quartz, hornblende and dolomite; rock and shell-limestone are found near Kandy and Jatinapatam, iron and plumbago (the latter now forms an article of considerable export) are abundant, and gold (some say also quicksilver) and silver are found in the hill-streams; amethyst, topazes, cats-eyes, garnet, cinnamon stone, sapphires, rock erystals, shorl, zircon, rubies, and dianoonds, \&c. the islaud has long been famed for. The celebrated pearl fishery in the Gulph of Manaar my limits forbid me here dwelling on. Nitre caves are numerous; alum is plentiful, and the coast from Chilaw to Manaar and Jarina on the western side, and from Tangalle through the Mahagampatoo to the eastward, contains the most extensive and valuable salt formations which are to be met with in India. The Leways, or natural deposits, at Hambantotte, yield the largest supply of the finest salt.
The natural history of the pearl oyster is imperfectly known. The banks have been found suddenly to fail when a productive fishery had been anticipated. At certain seasons the young oysters are seen floating in masses, and are carried by the current round the coast; they afterwards set:le and attach themselves by a fibre or beard to the coral roeks, and on sand they adhere together in clusters. When full grown, they are again separated, and become locomotive. The pearls enlarge during six years; and the oyster is supposed to die after seven years; they are fished at a depth of 36 to 40 feet in the calm season. The length of time which the divers remain under water is almost incredible by an European.
V. Ceylon is under the complete influence of the monsoons, the N. F. prevailing from November to February, and the S. W'. from April to September ; the intervening or equinoctial months having variable winds or calms. The eastern side of the island is hot and dry like the Coromandel coast, occasioned by the N. E. monsoon ; the opposite division of the isle is temperate and humid like the southern Malabar shore under the influence of the S . W. monsoon; the climate, however, of the southern const is more congenial to Europeans than perhaps any part of the continent of India. On the whole the N. mind N. E. may be said to be dry, and the S. W. moist. The S. W. wind is more general all over the island, as both at Colombo and Trincomalee it blows for tlve montha in auccession, whereas the N. E. blows at Colombo only in the montles of Decemuer and January, seldom beyond them. Among the mountains of the interior, the winds are moditied by local circumstances, according to their proximity to the E. or W. coast : and the highest and most central land have peculiarities of their own. Thus, at Badulla, in Upper Ouva (where there is an excellent hospital and military station), the wind for three-fourths of the year is from the N. E., ant in June, July and August variable.

Owing to its intertropical position, the quantity of rsin that falls in Ceylon is very great, probahly, about
three times that of England. Being less frequent the showers are much heavier while they last, a fall of two or three inches being not uncommon in 24 hours; the average of the alpine region is ahout 84 inches; on an average however, less rain falls on the east than on the west side of the island; a lofty mountainous ridge often acting as a line of demareation, one side of which is drenched with rain, while the other is broiling under an unclouded sun: Colonel Colebrook in his valuable report on this lovely island, justly remarks, that the climate and seasons of the north and south districts are strikingly contrasted. On one side of the islaud, and even on one side of a mountain, the rain may fall in torrents, while on the other, the earth is parched and the herbage withered; the inhabitants may be securing themselves from inundations, while in another they are carefully husbanding the little water of a former season which may be retained in their wells and tanks. Thus throughout the southern division where the rains are copious (owing, probably, to its exposure to the sonthern occan) canals are not less useful in draining the lowlands, than in the conveyance of produec; and embankments are much required to secure the crops from destruction during the rainy senson; while in the north division of the island, tanks nnd water-courses are in the greatest request, to secure the inhabitants against the frequent droughts to which those districts are liable. At Colombo the annual quantity of rain is about 100 inches, of which, 80 fall in April, May, October and November.

Owing also to its insular position, no elimate is more favoured than Ceylon, its temperature being moderate when eompared with the scorching plains of India. Along the sea-coast the mean annual temperature may be taken at $80^{\circ}$ Fnhrenheit; the extreme range line from $68^{\circ}$ to $90^{\circ}$, and the medium from $75^{\circ}$ to $85^{\prime \prime}$. The climate of the mountains is of course cooler, but its vicissitudes greater. At Kandy, which is 1,467 leet above the sea, the mean anuual temperature is $78^{\prime \prime}$; at the top of Namini Cooli Kiandia, 5,548 feet high, Dr. Dany found the temperature at eight A. M. $57^{\circ}$. At Colombo (the capital) the mean daily variation of the temperature does not exceed $3^{\prime \prime}$, while the annual range of the thermometer is from $76^{\circ}$ to $862_{2}^{\prime \prime}$, Fah. At Galle, the mean daily variation is $4^{0}$, and the annual range $71^{6}$ to $87^{\circ}$. Jaffnapatain, mean daily variation $5^{0}$, annual range $70^{\circ}$ to $90^{\circ}$. Trincomalce, greatest daily variation $17^{\circ}$, annual range $74^{9}$ to $91^{0}$. At Kandy, (the capital of the mountain or table land in the interior) mean daily variation $6^{\prime \prime}$, annual range $66^{\circ}$ to $86^{\circ}$. At Newera Ellia, a military convalescent station, mean daily vnriations as high as $11^{0}$, and annual variation from $3 .^{0}$ to $80^{10}$.

The climate of Ceylon, where the soil is not cleared, is untoubtedly suhject to perricious miasmata, arising from staguant marshes, and dank and noisome jungles, and even when the jungles nee eleared, it regures the sun to act on them lor some time before the unheulthy miasmata are dissijated; at certain seasons, therelore, endemic levers nppear in situations favourable to their propagation, but the whole island is lecoming more unitormly salubrions as it becomes cleared and cultivated. The environs of Trincomalee, which were formerly very unhealthy, have become much less so by elearing the jungles in the environs, and if the salt water lahe ("Suake Is. land,' I think it is ternied) to the northward of Culombo were eleared, the maritime capital of Cey-
lon, though within $8^{0}$ of the equator, would be one $\mid$ facilities of water communication which the Ganges of the healthiest and pleasantest residencea in India.
It is true, that our troops bave suffered much in Ceylon, but it should be recollected, that as compared with the Indian army, their wear and tear of duty is much severer than the latter, and they have not the
and its tributaries afford; the one country is in many parts quite unpeopled, and the other comparatively civilized; add to which, a pernicious aystem prevails in Ceylon, of making the troops commence marches at night.

CEYLON METEOROLOGY.

COLOMBO (SEA SHORE) REGISTER.

* The Raln Gange, shewing a total of 84.3 inches, is for Kandy (is 1819), in the intertor, which shews lie average of he monntain districts : on the sea shore, as at Cohmmo, the avelage anmal lall of rain is from 75 to 80 laches.
+ Badulla is situate on a plain, surronnded by hills from I to 3,000 feet, in a monmainous conmry, in the south extie mity of Ceylom, having the sea at to to 50 miles distant on the cast, south and west sides; the elevaton above the octan levet of $2,1 \mathrm{lin}$ feet.

A delightful station has heen formed at Newera Ellis, S. W. from Kandy, 50 miles, 14 from Fort $M^{\prime}$ Donald, 15 from Maturatte, and 122 from Colombo. The road between Newera Ellia and Kandy leads through a witd and mountainous country, the scenery always pieturesque, sometimes magnificent in the extreme; at one time, a traveller is surrounded by steep and inaceessible mountains, whose sides arc clothed with dense forests; rocks of an enormous size, deep and precipitate ravines, and cataracts rushing with foaming velocity from the heights, diversify the scene. 'The height of Newera Ellia plain (four miles long, and one and a half broad) is 6,000 fcet above the sea, and is surrounded by steep mountains of irregular height (covered with wood to the very summit) one in particular, rising 2,000 feet above the level of the Newera Ellia river, which meanders "hrough lovely banks across the plain. The climate is delicious, never npproaching tropical heat in summer, and yielding ice in winter; the mean temperature by day and night for the entire year $55^{\circ}$. The water is so pure as tu iorm a transparent solution with nitrate of silver; several chalyheate springs have been met with. The daisy, buttercup, violet, ribwort, dandelion, barbery, briar, \&c. flourish indigenously; the rose, pink, mignionette, and carnation, are as fragrant as in England ; delicious strawberries are abundant, and potatoes, carrots, artichokes, peas, beans, salads, cabbages, turnips, parsnips, and in fact, every British culinary vegetable thrive luxuriantly. The soll is of a deep black mould, resting on a stratum of yellow clay and gravel, numerous varieties of beautiful quartz exiat, and the frequenters of the climate within a fow tegrees of the equator, will learn with astonishment, that a fire is alurays cojoyed by might,

## and frequently in the day. Limestone has been

 found.VI. That Ceyion was formerly extensively peopled is evident from the works and structures before alluded to, but it would appear the number of the inhabitants had been declining for the last four or five centuries, and it is doubtful even now (although an increase has commenced in the maritime provinces, which had in 1814,-mouths, 475,883 ; and in $1824,595,105-$ increase in ten years, 119,222 ) whether on an area of 24,000 square miles, there are $1,000,000$ mouths. Colonel Colebrooke states in his report, that the population in 1824 was, in the southern or Cingalese provinces, 399,408 ; in the northern or Malahar districts, 195,697; and in the interior or Kandyan provinces, 256,835 , total, 852,940. The returns from the maritime provinces are doubtless correct, as the village registers of marriages, and birtha, and deaths are kept as punctually there as in England, but having myself traversed the Kandyan provinces more extensively perhaps than any European, I should think the estimate of their population is under rather than over the mark; it is to he feared, however, that the decrensing of the semi-barbarous inhabitants of this splendid region has scarcely reached its acme, perhaps, it may now be considered stationary, as the ".min's of the people are on the increase.

The following in some respects complete view of the population is highly interesting; it shews how thinly the island is peopled, there not being in some districts more than four, five, or six mouths to the square mile! Comparing the births with the dealhs it would appear at least in the maritime proviuces that the population is on the increase.

Census taken in the year 1832 of the Population of Ceylon, p.nd of the Births, Marriages, and Deaths.

Population of Ceylon, $\mathbf{1 , 0 0 9 , 0 0 8}$.

The following table demonstrates that in the Colombo district, at least, population is on the increase ; and it will be observed that the augmentation (except in the fort and pettah) has been steady for the last five years.

Population of the District of Colombo.

The population of the island, although comprising a variety of different nations, may be divided into four distinct classes :-first, the Singalese or Ceylonese (descended, as some say, from the Sings or Kajpoots of Hindoostan, and by others from the Siamese) proper, who occupy Kandy, and the S. and S. W. coasts of the island from 1 lambantotte to Chilaw. Second, the Malabars or Hindoos, who invaded Ceylon from the opposite coast, and are in possession of the north and cast coasts, and of the peninsula of Jaffnapatam. Third, the Moors or descendants of the Araba, or perhaps, from Mahomedans of Upper India, who are dispersed all over the island (as the Moslems are over Hindoostan) and in Pultam district form the
mass of population. Fonrth, Veddas or Beddns, the aborigines of the island, who dwell in the most untutored state (having neither habitations nor clothing) in the great forests which extend from the $\mathbf{S}$. to the E. and N., and also in the most inaccessible parts of the interior, wild fruits and bensts being their sole sustenance, and the branches of large trees their resting placc. There are some Malays, Caffres, and Javanese, a few Chinese, and Parsee traders, and a good many descendants of the Portuguese and Dutch, and even of the English mixed with native blood, scattered over the island. Castr, as respects the Singalese and Malabars, is serupulously preserved, and very widely ramified, almost every occupation having its distinct caste. There are for instance, the gold and silversmith's caste, the fisher's, the barber's, the washermen, the manufactures of jnghery (sugar), the toddy drawer's, the lime-maker's, \&c. \&c. \&c.; but the highest and most esteemed caste, is that of Vellalahs or Goyas, wh nse occupations are purely agricultural, but as land is assigned for the performance of every deseription of service, the practice of agriculture is not confined to this elass, but is exereised by persons of all castes for their subsistence. By the Kandyan laws the intermarriage of the high and low castes is prohibited, and many distinctions recognized and enforced, by which the latter are degraded and reduced to a servile state, now considered hereditary. While the Malabars professing the Hindu faith, maintain the religious, as well as the ciril distinction of caste, the Singalese or Buddhlsts have abolished the former and retained the latter; hence, perhaps, the hostilities which prevailed between both sects, whose sacred dogmas arc both apparently based on the creed and doctrincs of Mend, the great Hindoo lawgiver, an lllustration for which will be found by contemplating
the parallel of the Romanists and Lutherans，the essentials of whose religion stripped of externals are the same．The distinctions of custe in Hindoostan as well as in Siam，Birmah，and Ceylon，had their origin in a superabundant population pressing too closely on the heels of subsistence，and it w＇s perhaps thought that the introduction of a minute division of labour

At present I cannot say that the Singalese are
superior，if indeed equal，to the Hindoos，in the do－ mestic and fine arts；although many branches of manufactures，such as the weaving of cotton and silk， the smelting of and working in gold，silver，iron， copper，\＆c．；the cutting and setting of precious stones， the glazing of pottery，applicntion of lacker，prepara－ tion of gunpowder，casting of cannon，distillation of spirits，\＆c．\＆c．nre carried on，it is by the most simple instruments，and with little aid from mechanics，and less from science．In the fine arts they are searcely on a par with the Hindoos，nnd in their structures of a recent period certainly far behind the latter people， or even less advanced than the Burmese．They how－ ever possess grcat capabilities of instruction，and in the neighbourhood of the principal British stations are beginning to profit by the superior handicraft of the Eurupean artizan．
＂The peasantry of India，as well as Ceylon，gener－ ally possess land，from which they derive part of their subsistence，and the wages of labour in the neighbouring provinces of the Continent are as low as in Ccylon，and in some instances lower；any con－ siderable rise would therefore be checked by the com－ petition of strangers．The wages of eommon labour－ ers vary in different parts of the ishand from $6 d$ ，a day in Colombo to $3 d$ ．and $4 \frac{1}{2} d$ ．a day in the country The government has interfered to fix these rates when requiring labourers；but higher demands are
made to private employers，according to circum－ stances．Those who possess simall portions of laad rnrely derive their support from them exclusivds， but employ theinselves in the fisheries，in trades and manufactures，and in the petty traffic of the country， and from the small amount of their individual gains there is reason tu conclude，that if they could obtain regular employment near their homes，or even at a distance，from 6d，to $1 s$ ．a day would be generally neceptable to them．

The wages of mechanics and nrtizans are proportion． ally higher than those of labourers，but still extreaty moderatc ；and from the frugal habits of the natives， and the resource derived from their lands，a slight angmentation of these wnges would add materially to their comforts．

The minute subdivision of Innds has heen accele rated in the maritime provinces by the Dutch law of inheritance．In fields，gardens，and plantations， which are farmed or held in joint ownership，the interest of an individual proprietor is often limited to such fractional portions as are valued at a few peace． For example，the inheritance of one person will con－ sist，in land，of nine－tenths of a seer ol rice ；in trees， of five－twelfths of a cocoa－nut tree，and two－thirds of a jack trec．

The attachment of the natives to these possessions is evinced by the fact，that they are often the subject of protracted law suits．

## There

b these possessions e often the sabject

There are a few native landholders in the Colombo district who possess about 1,000 acres each ; but under the laws of inheritance these will in time be subdivided. Four thousand and sixty-seven acres of land were granted in $1 \times 36$, in one hundred and eightyeight grants on a pepper corn rent. Seventy-two thousand one hundred and nine neres have been granted by government. It is stated in the Blue Book for 1836, that " by far the largest proportion of the surface of the island is jungle, (mncultivated waste land) at the disposal of the Government." It would be very desirable to cause a survey to be made of the whole island, to ascertain the actual area, the land cultivated and waste, the proportion in the possession of individuals, of temples, \&c., the tpuantity of land rent free, or paying a tax to govermment, aud the state of cultivation and produce. It would then be strongly advisable to grant or sell the waste lands at a moderate sum, and thus give every facility for bringing them under enltivation nud inducing Europeans to in. vest capital in the soil. lit the land-tax were fixed in perpetuity at a moderate corn-rent all over the island, the state would derive a large revenue for the making of roads, the construction of tanks, bridges, \&e. The resources of Ceylon are numerous and valuable, and they require but a slight attention on the part of government to render them available for the public good.
VII. The religion of the Singalese is Buddhism, the early history of which is little known. Many IIindoo writers agree, that $B m i l h$ or Boodh, is supposed to be the ninth avatar of Fishnu (the second person of the llindoo Triad, and God of preservation ;) having appeared for the purpose of reclaiming the Hindoos from many abominations into which they had fallen, and to teach them more benevolent forms of worship, than through the means of human and nnimal sacrifices which they then extensively (nnd with respect to animals now) practised. These doctrines, says Mr. Coleman, heing too simple, and therefore interfering too strongly with the privileges of the Brahminical priests, a religious war ensued between the old and new sects, and the Buddhists were ultimately cxpelled from the peninsula of India. [Here we find a striking analogy to the incarnation of our Saviour.] But the Buldhists, in general, will not tolerate the iden of superior antiquity being vested in the Brahminical faith ; they deny the identity of their deity with the ninth avatar of Vishnu, which they declare was $n$ mere manifestation of his power. They do not acknowledge a creation of the universe, but assert that it has been destroyed many times and by some extraordinary operation as often reproduced. They enumerate twenty-two of these regenerated worlds, each of which was successively governed by Buddhas, and that the present universe has been ruled successively by four, of whom Gautama or Gaudimat (whose doetriues now prevail in Ceylon, Ava, Siam, \&c.) is the fourth; a fifth, Maitree Buddha, is yet to come, previous to which this world will be destroyed.
The commandments of Buddha, were originally Fire (necessary towards salvation) but five others were alded, which were meritorious but not imperative. The first five are-1st. Nol to kill a living crenture of any kind; 2nd. Not to steal ; 3rol. Nut to commit alultery; 4th. Not to spenk an untruth on any occaion; 5th. Not to use intoxicating liguors or drugs. The meritorious commands are-not to eat after milltay; and not to sleep on costly, solt, or elevated peds, (but on clean mats) or indulge sensually. The thers inculcate, generally, virtue and benevolence, and the practice of indivitual abstinence.

The hearens of the Buddhists are 26 , placed one above another; which together with their hells are described by Mr. Colemali; and it will be seen that there is much need of the light of education and Christianity, to remove such ideas from the minds of an otherwise intelligent and fine looking race of human beings.-(See History of the British Colonies.)

Protestant Churehes \&c. of Ceylon in 1836. [B. B.]

* At Cotta Divine Scrvice is held twice on a Sunday in English and onee in Clagalese. At five of the village sehools, neec every Sunday, at three once a fortnight, and at three others ouce a month.
+ Divine Service is held oecasionally on week-tays at some nf the village schools.
$\pm$ This Chureh is not eonseerated.

Scbools, \&c. oí Ccylon-continued.

Phivate Schouls.
Western Province, 521 Private Schoois. Of these, 59 are under the superintendance of the Vivar-General of the Roman Catholie Congregation.
Southern Province, 5 Ditto. Of these, 1 is inder the above superintendance.
Eastern Province. 66 Nitto, Of these, 4 are under the above superintendauce.
Northern L'rovince. 227 difto. Of these, 36 are under the above superlntendance.

Remarks.-(a) The expenses include 100l. rent of premises, for the acndemy and the residence of the bead-master. The acndemy consists of a high school and a low school ; each boy in the high school pays 7l. 4s., and each boy in the low school half that sum. All teachers except the chiel' assistant, nre paid out of the income of the hend master.
(b) The expenses inctude $9 l$. salary of the kepper of the school.
(c) Paid as Portuguese Colonial Chaplain of St. Paul's Church, 108l. ycarly.
(d) Paid ns Malabar Colonial Chaplain of St. Thomas' Church, 108l. yenrly.
(ej The expenses include 4t. 10s. school rent; needlework is also taught.
( $f$ ) No sehool kept, the master enjoys his salury ns clerk of the church at Morottoo.
(g) The trades of tailor und shoemnker are ulso tanght. 'The asylum is under the superintendunce of the King's Visitor.
(gg) This school is muder the superintendance of the clergymnu of the Dutch church.
(h) The expense inclutes 41.10 s school rent.
(i) The expenses include $12 l$. school rent.
(k) Gcography is also caught.
(l) These sehools were established lately, and no returns have been received from them.
(m) The expenses include 12l. school-rent.
( $n$ ) The 64 adults ure non-commissioned offieers and privates, who niso receive instructions in the schoul ut present. They furnish what is required for themselves.
(o) The boys are regularly taken on the strength of the regiment by nuthority from the Deputy AdjutaitGconernl, as ist, 2d, nad 3d class boys; when of age they are tuken as privates for life, without bountr. Besides the class boys (in number 146 ) there are 10 boys and I girl, children of soldiera of the regiment attending the school

12 boys and 5 girls, attend the school of the 90 th regiment.
(q) The Christian Institution at Cotta, is intended to give a superior education to a limited number of youths selected from out-sehools, to prepare them for the office of teachers, catechists and assistant-inissionaries. Supported by the Church Missionary Society in England, and voluntary contributions in Ceylon.
The books supplied by the Clurch Missionary Society are not ineluded in the school expenses, as all those used in the Cingalese districts are printed at the Cotta press, and most of them are sent out from England by the Chureh Missionary Society. The teachers are paid according to the proficiency actually made by the scholars, which is aseertained by monthly examinations, so that their salaries vary from mouth to month. In the girls' sehool looth at Cotta and Badegamma, reading in the native language and needlework are taught, and the girls daily repeat catechisms or lessons from the Holy Scriptures. The mode of instruction in the seminary is not necording to any general system, but such as appears hest to the resident missionary. English reading, writing, grammar, arithmetic and geography are taught, and particular care is taken to make the youths aequainted with the Holy Scriptures, and to impress on their mind Christian principles. The seminarists are hoarded and elothed, and a liberal education given them.
( $r$ ) In the schools in which the English language is taught, the children are also instructed in the rudiments of grammar, arithmetic and geography; and at most of the stations there are a few youths whom the missionaries personally instruct in the higher branches of learning, without any remuneration. The masters are paid by a graduated scale, according to the attendance and improvement of the children. Each school is examined almost daily by a visitor, and the salaries of this class of men, exclusive of what the masters receive, amounted in 1836, to 207l. 4s. The Wesleyan Mission receives no pecuniary assistance from government. Associations have been formed at all the stations, to raise contributions towards defrnyir ${ }_{y}$ the expenses of the school department, but the sum total raised for this purpose in 1836, amounted only to about $80 l$. The defieieney is made up by the Wesleyan Missionary Society in England.
(s) Many of the boys and girls of this school pursue their studies ln Tamul in the morning and afternoon. The intellectual system as pursued in the Highland School of Scotland, has been adopted on this station. The boys are making rapid advancement in various branches of learning. The extension of the system in different parts of Northern India, promises to do much for the advancement of native youth.
( $t$ ) There are 140 students arranged in five cinsses : lst. Class; 20 studenta, Companion to the Bible, history, native astronomy, T'amul poetic, grammar, trigonometry, surveying, European astronomy, Watts' on the Mind. 2d. Class; 29 students; Companion to the Bible, Engllsh grammar, algebra, Negundoo, Tamul poetic, Grammar, Tamul scriptures. 3d Class : 28 students, Bible history, English grammar, abritgment of Tomul granmar, algebra, geography, Negundoo and'English New Testnment. 4th Class: 23 stildents; English New Testament, Child's look on the Soul, abrldgment of Tamul grammar, urithmetic, Negundoo, clements of English grnmmar. 5th. Class : 40 students ; first lessons in arithmetic, Phrase Book, Negundoo, Engiish instructor, abridgment of Tamul
grammar, Picture Defising and Reading Book, and Tamul Scriptures; the expense of food, clothing and instruction is 543l. This does not include the salaries of the principal and professors.
(u) Course of study : Reading, writing, common arithmetic and geography in Tamul, also sacred music and plain sewing; considerable attention is also paid to reading, writing, and speaking the English language. The whole expense for lood, clothing and instruction is about $290 l$.
$(x)$ These are designed not merely to supply youth for the seminary at Batticotta, but to raise the character of the native schools, by introducing more thoroughly the study of common arithmetic, geography, and the grammar of the Tamul language. These youths in time it is hoped, will be qualified for schoolmasters in their several villages
In these the monitorial system is introduced as far as it can be applied, the first object is to teach the children to read and write their own-language, and to become familiar with the printed character. Christian lessons, and portions of the Bible are studied daily $i \times$ all the schools. All the children are required to attend at our churches with their teachers, at least once a week.
(y) The readers in each school are also assembled weekly at the stations to which the school belongs, for the purpose of reading the scripcures and tracts, and reciting catechisms and othel Christian lessons. The mnsters are also formed into Bible classes, and meet as the children do weekly for instruction; they do not receive a stated snlary, but are paid according to the progress of the scholars, which is ascertained by a monthly examination. The total mentioned as the expenses of the schools, includes not only the wage's of the master, but the expenses of the sehool-room, the wages of the superintendants, and the small pre. sents made to the children. The school-rooms are used to a considerable extent as julnces of preaching.
$(\approx)$ This is as near to the annual expensc of the different schools as can be calculated. Teachers are, some of them, paid according to the number of seholars, and the clarges for books and other things vary according to circumstances. The expense of the schools is almost exclusively borne by the Missionary Society in England. Nothing has ever been received from government in aid of the sehools.

The Government schools are in number about one hundred, of which the far greater part are in the Singalese or maritime districts. They were originally established hy the Dutch; and, accorting to Colonel Colebrooke's report, the numbers educated have been ns follows :-Protestants, 83,756; Roman Catholics, 38,155; total, 121,911. Mahomedans, 14,847; Boodhists, 78,602; total, 93,449. The expenditure amounts to about $3,600 l$. per annum ; and it is to be hoped it will be extended to the Malabar and Knndyan diatricts. The schoolmasters receive a small stipend of 6il. 6s. per annum, and they derive further emolument from fees received for registering native marriages.

Abstract of Ceylon Missionary Schools, - Church Mission. - Schouls 56, containing 1,554 boys, 254 girls, and 61 adults ; total, 1,869. Employs 83 native teachers and assistants, and has printing and bookbinding establishments at Cotta and Nellore. The number of boys in the Cotta iustitution is 16 , of whom 11 are Singalese, and 5 Tamulians.
Wesleyan Mission, established in 1814, and occupy ing seven stations, has 65 schools in Singalese, or snuthern, and 21 in Tamul, or northern, districts, thus :-

X. Civil Government of Ceylon.-The legislative administration of the island is confided to the governor, aided by a council composed from among the oldest and most distinguished European civil servants, appointed by the governor or sometimes by the Secretary of State for the Colonies in England; the duty of the council is, however, only to advise and consult with the governor, (who is also commander-in-chief of the forces) when convoked by him. The governor may pass a law without the concurrence of bis council, who, if dissentient, record their opinions. Rcgulations or luws of the government are published in the Official Gazette some time before their enactment, in order to elicit public discussion, and when passed into law take immediate effect in the maritime districta on their publication, and in the Kandyan districts by the governor's proclamation, subject in both to the final approval of the King in council. There is a apecial board for the administration of the affairs of the Kandyen Provinces, whom the governor is in the habit of consulting previous to his extension of an enactment there, which may have been ordained for the lower or maritime provinces. In the maritime provinces the governor is reatricted from authorizing coutingent disbursements exceeding 75l., without the concurrence of the council ; but in the Kandyan provinces he ordcrs expenditure on his own control. In his executive capacity the governor refers, or not to the council, as he wilts, but his proceedings are recorded in the secretary for government's office or in the department charged with the execution of the mcasure. The regulations of the government are puhlished with the translations, in the native languages, (Cingalese and Malabar), anu widely disseminated.
Three clasaes of persons are employed in carrying on the business of government : first, the civil servants, who are sent out as "writers" from England, under the patronage of the Secretary of State for the Colonies; there are 25 principal appointments in the istand to which theae gentlemen are alone cligible. the seniors being exclusively employed aa heads of departments, in the revenue, as government agents, chief secretary, paymaster, or auditor-general, \&c. \&c. ss collectors of districts and provincial judges and
magistrates. The juniors as assistants to the collectors or magistrates, and in the chief secretary's department. On its present footing the effective civil service consists of 38 members : an acquirement of one or both of the native languages is indispensable previous to the holding of a responsible situation. The second class is formed of Europeans (not of the civil service), or their descendants, from among whom are appointed provincial magistrates, (of which rank there are 16,) and clerks in public offices. The third class comprises the natives, who hold the situations of modeliars (or lieuts.) of korles (or districta), interpreters to the courts of justice, and to the collectors' offices or cutcheries. The modeliars are still recognized according to ancient custom as command. ers of the lascorgns or district militia, although at present chiefly employed in the civil administration of the country, and in the execution of public works. There are, of course, gradations of native officers in authority under them; the assistants of all natives are still regulated in a great degree by their caste. Independent of the numerous government ' headmen,' and the titular 'headmen' who receive no emoluments, there are, ir conformity to ancient usage, headmen appointed to each caste or class, aome of whom receive certain perquisites as the head of fishermen do of the fish caught, \&c. Since 1828, no ' headmen' have been appointed who could not read and write the English language; and the headmen form a valuable connecting link in the social fabric, as well as an intelligent and respectable body of individuals, from among whom the government can select officers for the more immediate service of the state. The number of principal headmen in the Cingalese districts anount to 243, in the Malabar to 112, and in the Kandyan to 47 ; these numbers do not include the headmen of villages, who are, of course, very numerous.

The fourth class consists of officers aelected from the regiments serving in Ceylon, for the fulfilment of the post of government ugents or sitting magistrates in the Kandyan Provinces, the duties of which are performed efficiently and creditably upon small aalarics in addition to their military allowances.

Patronage.-All appointments to the higher offices
are provisionally made by the governor, who selects candidates from the civil service according to their seniority, when otlierwise qualified, subject, however, to the confirmation of the Secretary of State in Eng. land.

The magistrates and clerks are also appointed by the government; the modeliars and principal headmen, hold their appointments under His Excellency's warrant, being recommended by the Commissioner of Revenue, the provincial headmen being recommended by the Collectors of Districts. In the Kandyan provinces appointments are similarly made by the Governor, on the recommendation of the Board of Commissioners (to whom the more immediate management of those provinces is committed) including the chicfs or principal headmen of provinces or departments, the chiefs of temples, and the priests in the colleges or wihares. In the Northern or Malabar provinces, the headmen of villages or castes are commonly appointed on the nomination of the inhnititants, a deputation of villagers making a return to the magistrate of the candidate approved of by them.

Judicial.-Justice is administered first by a supreme court, with powers equivalent to the Court of King's Bench, and in equitable jurisdiction to the High Court of Chancery; it is presided over by three judges, appointed from England, aided by a King's Advocate (whose functions are similar to the Lord Advocate of Scotland,) Master in Equity and Registrar, also appointed from home : and thanks to the enlightened patriotism of Sir Alexander Johnson, trial by jury (with reference to Europeans or natives), is established under its supremacy.

The island is divided into the district of Colombo, and three circuits, called the Northern, Southern and Eastern ; the $N$. circuit comprises the district of Jaffina, with the districts parcel of the maritime provinces of the island, which lie to the westward of the Kandynn provinces between the districts of Jaffua and Colonho; the $S$. the district of the Mahagampattoo, and all the districts parcel of the maritime provinces lying to the $W$. and $S$. of the Kandyan provinces, between the districts of the Maghampattoo and Colombo ; the E. all the Kandyan provinces and all the districts parcel of the maritime provinces lying to the eastward of the Kandyan provinces, between the districts of Jaffina and Mahngampattoo. The circuits (exclusive of Colombo) are subdivided into districts.

Within each district, there is one court, called the District Court, holden before one judge and three assessors; the district judge is appointed by the crown and rumovahle at pleasure; the assessors are selected from amongst the inhabitants of the island, whether natives or otherwise, 21 ycars of age, possessing certain qualifications. The right of appoint. ing, in each district court, one person to act as permanent assessor, is reserved to the crown. The officers of the district courts are appointed in like manner as those of the Supreme Court.

The Supreme Court is held at Colombo (except on circuit), and the district courts is at a convenient piace in each district.

Each district court is a court of civil and criminal jurisdiction, and has cognizance of and full power to hear and determine civil suits, in which the defendant is resident, or in which the suhject of action shall have occurred, within the district (where the judge is a party, the court adjoining takea cognizance of the cause) : and to try all offences, short of auch as are
punishable with death, transportation or banishment, imprisonment for more than a year, whipping exceeding 100 lashes, a fine exceeding $10 l$., which shall have been committed within the district.

Each district court has the care and custody of the persons and estates of idiots and lunatics resident within the district, with power to appoint guardians and curators ; and power to appoint administrators of intestates' effects within the district, and to determine the validity of wills and to record and grant probate thereof, and to take securities from executors and administrators, and to require accounts of such persons.

Offences against the revenue laws are cognizable before the district courts (saving the rights of the Vice Admiralty Courts), limited as in respect to criminal prosecutions.

The judgments and interlocutory and other orders of the district courts are pronounced in open court, the judge stating, in the hearing of the assessors, the questions of law and fact, with the grounds and reasons of his opinion; and the assessors declare, in open court, their respective opinions and votes on each and every question of law or fact: in case of a differeace of opinion between the judge and the majority of the assessors, the opinion of the judge prevails and is taken as the sentence of the whole court, a record being made and preserved of the vote of each.

The Supreme Court is a court of sole appellate jurisdiction for the district courts, with ariginal criminal jurisdiction throughout the island: eivil and criminal sessions of the supreme court are held by one of the judges in each circuit, twice in ench year: all the judges are required to be never absent at the same time fiom Colombo, and also to be resident at the same time at Colombo not less than one month, twice in each year.

At every civil sessions of the supreme court, on circuit, three assessors are associnted with the judge; and every crioainnl sessions is held before the judge and a jury of 13 men. In all civil suits, the judge and assessors deliver their opanions and votes as in the district courts; in appeals from the district courts, in criminal prosecutions, the appeal has not the effect of staying the exccution of the sentence, unless the judge of the district court see fit. All questions of fact, upon which issue shall be joined at any criminal sessions of the supreme court, on circuit, are decided by the jary, or major part of them ; questions of law are decided by the judge in open court, with the grounds and reasons thereof.

Where a person is adjudged to die by the supreme court, at a criminal sessions, execution is respited till the case be reported by the presiding judge to the governor.
Judges on circuit holding criminal sessions, are required to direct all fiscals and keepers of prisons within the circuit to certify the persons committed and their offences, who may be required to be brought before the judge.

The judges of the supreme court, on circuit, exa. mine the records of the district courts, and if it shall appear that contradictory or inconsistent decisions have been given by the same or different district courts, the judges report the same to the suprane court at Colombo, who prepare the draft of a declar. tory law upon the subject, and transmit it to the governor, who submits such draft. to the legislative council. The supreme court also make rules and orders for the removal of doubts.

The supreme court, or any judge of the same at sessions or on circuit, may grant or refuse writs of haiueas corpus and injunctions; it may require district courts to transmit to Colombo the records in any caae appealed, and may hear and decide appeals, in a summary way, witnout argument, and may frame and establish rules and orders of the court, not repugnant to the charter, which promote the discovery of truth, economy, and expedition in business, to be drawn up in plain and succinct terms, avoiding unnecessary repetitions and obscurity.
$A_{i}$ peals are allowed to the King in Council, subject to the following rules nnd limitations:- 1 . The appeal must be brought, by way of review, before the judges of the supreme court collectively, holding a general sessions at Colombo, at which all the judges shall be present. 2. The matter in dispute must exceed the value of $500 l$. 3. Leave to appeal must be applied for within 14 days. 4. If the nppellant be the party against whom sentence is given, the sentence shall be carried into execution, if the respondent shall give security for the immeciate performance of any sentence pronounced by the Privy Council ; until which, the sentence appealed from shall he stayed. 5. If the appellant shall show that real justice requires the stay of execution, pending the appeal, the supreme court may stay execution, on security, as before. 6. In all cases, the appellant shall give security to prosecute the appeal and for costs. 7. The court appealed from shall determine the nature of the securities. 8. Where the aubject of litigation is immoveable property, and the judgement appealed from shnll not affect the occupancy, security is not to be required; but if the judgement do affect the occupancy, then the security shall not be of greater amount than to restore the property, and the intermediate profit accruing from the occupancy, pending the appeal. 9. Where the subject of litigation consists of chattels or personal propesty, the security shall, in all cases, be a bond to the amount, or mortgnge. 10. The security for prosecution of appeal and for costs shall in no case exceed 300l. 11. The security must be completed within three months from the date of the petition of leave to apper!. 12. Any person fceling aggrieved by any order respecting security or appeal, may petition the Privy Council.
The same laws are administered in the District Courts as in the Supreme Court, namely, the Dutch (or Romon law with certnin exceptions).
A prisoner can only be tried in the Supreme Court, upon the prosecution of the king's advocnte, he has the right of challenge to the jury before whom he is to be arraigned, he is entitled on his trial to the assistance of an eminent proctor or harrister, paid by the gorernment (an admirable provision) and the witnesses on both sides, in criminal cases before the Supreme Court, are also paid by the government.
Silitary.-The regular armed force maintained in the island consists at presevt of four King's regiments of infantry (the head quarters of which are stationed at Colombo, Kandy and Trincomalee), two companies of the Royal Foot Artillery, a monnted body-guard for the Governor, and the 1st Ceylon regiment, compered principnilly of Malays, nearly 1,500 strong, and one of the finest regiments in His Mojesty's service. I have never seen any native troops on the continent of India to equal the 1st Ceylon light infantry, either in appearance or mancuvring, and their conduct during the Kandian war proved them to be inferior to no light infantry in the world. Their dress is dark green, and their arma a compact rifle, with a shott
strong aword attachable instead of a bayonet. They are native officered, as in the E. I. C.'s sepoy regiments, with European officera to each of the 16 com panies, and their fidelity to their leaders has been evinced in every posaible manner whenever an opportunity presented itself. I have seen many regiments of different nations under alins, but none ever offered to my view such a striking coup d'ail as H. M.'s lst Ceylon rifle regiment.

The following local corps have been entertained and paid for by the Island during 1836 :-

| Corps. |  |  |  |  |  |  |  |

* The sergeant and rank and file draw the difference between their reginerital pay, as privates in the Ceylon Rifle regiment, and the regulated pny of the corps.

The pecuniary allowances grunted to the King's troops, consist of island allowances according to the following schedule. Some few officers occupy government quarters, the rent of which is recovered from them monthly, according to the scale subjoined. No other advintages are enjoyed.

Schedule of island allowances drawn by officers doing duty in the islnnd. - Regimental: Colonel, 45l. 9 s . per mensem ; Lieut.-Colonel, 32l. 2s.; Major 23l. 19s.; Captain, 13l. $16 s$. ; Lieutenant, 8l. 5s.; 2nd Licutenant or Ensign, 6l. 6s.; Paymaster, 13l. 168. ; Surgeon, 17l. 10s.; Assistant Surgeon, 12l. 10s.; Adjutant, 10 l .4 s ; Quarter-Master, 10 l .4 s .

Additional allowances to officers in command of corps.-Colonel, $5 \ell .4 s$. per mensem ; Licut.-Colonel, $5 l .4 s$. ; Major, $8 l .3 s$. ; Captain, 10l. 4s.; Lieutenant, 56. 11 s.

Additional allowances to officers in command of garrisons, with the exception of Colombo, Trincomalce, Kandy, and Galle. - Colonel, 29l. 11s. per mensem; Lieut. Colonel, 8l. 18s.; Major, 6l. 14s.; Captnin, $3 l$. 19s. 6d.; Lieutenant, 2l. 14s.; Ensign, 2l. 0s. $6 d$. The allowance for the commandant at Trincomalec is fixed at $30 l$., and that for the commandant of Kandy at $25 l$. per month. The allowance attached to the command of Galle is $10 s$, per day. The fixed allowance of the commandant of Colombo, viz. 29l. 11s., ceased from lst November, 1832, in consequence of the disunion of the oflices of Governor and Commander of the Forces.

Genernl and Medical Staft.-Major-General on the Staff, 275l. 13s. $4 \frac{1}{4} c$. per mensem; Deputy Quarter-Master-Genernl, being Lieut.-Colonel, 16l. 1s.; Deputy Assistant Quarter Master-General, being Captnin, 6l. 18s.; Deputy Adjutant-General, being Lieut.Colonel, 16 l . 1s:; Deputy Assistant Adjutant-General, being Lieutenant, 4l. 2s. 6d.; Assistant Military Sccretary, being Captain, $61.18 s$; Aid de Camp to the (qovernor, $6 l$. 18s.; Aid de Camp to the General Of ficer, 6l. 18s. (whether Captains or Subalterna) ; Brevet Inspector-Generul of Hospitals, 68l. 3s. Gel.; Staft Surgeon, 23l. 19s.; Assistant Stnff Surgcon,

12l. 10s. ; Apothecary to the Forces, 13l. 5s. In addition to regimental allowances being regulated, where the rank of staff officers do not correspond with the table, by making the addition equal to one half of the regimental allowance to officers. To Aid de Camps, if Subalterns, the atafl and island allowance of a Captain are granted.
When officers of the undermentioned ranks, holding ataff appointments, or doing duty in Ceylon, are relieved or supcrseded, and have ceased to perform military duty, they are allowed the following reduced island allowances, from the date of their relief to that of their emharkation : Colonel, $22 l .14 \mathrm{~s} .6 \mathrm{~d}$. per mensem; Lieut.-Colonel, 16l. 1s.; Major, 15l. 19s. 4d.; Surgeon, 13 l . 16 s ; Inspector-General of Hospitals, $22 l .14 s .6 d$.; Deputy lnspector-General of Hospitals, 161. 1s. ; Assistant Deputy Inspector-General of Hospitals, 15l. 19s. $4 d$.; Staff Surgeon, 15l. 19s. $4 d$.
Besides the above allowance, the following are the rates of pay granted to officers on the ataff paid by the colony :-1 Deputy Assistant Adjutant-General, 20s. per day; 1 Dcputy Assistant Quarter-MasterGeneral, 10s. per day ; 4 ataff officers of garrisons, 10s. per day; 1 Aid de Camp to the Governor or Lieut.-Governor, 10 s . per day.
Scale of stoppage made from officers occupying government quarters.-Major-General, Colonel and Inspector. General of Hospitals, 2l. 0s. 6d. per month; Lieut.-Colonel, Major, Deputy Inspector-General of Hospitals, and Assistant Inspector of Hospitals, 1l. 14s. 6d.; Captain, Paymaster, and Surgeon, 1l. 0s. 3d.; Assistant Surgeon, Licutenant, Ensign and Quarter Master, 13s. 6d.

Maritime districts, Land Rerenue:-[Ceylon BB.
for 1836.]-Tax on Paddy. - In the western and southern provinces the tax payable to government varies, being sometimes one-half, sometimes onethird, one-fourth, one-fifth, or one-tenth of the produce. In the northern and eastern provinces, it is invariably fixed at one tenth ; the tax is levied on the authority of immemorial usage, and it ia particularly recognized by a proclamation of the 22 nd of April 1803. The commutation system originally put into practice in the Kandyan districts, has been introduced in all the divisiens of the western, eastern, and norithern provinces, but Manar, and in the Galle divison of the southern province.
Tax on Fine Grain.-This is not levied in the Colombo, Caltura, and Negomho divisions of the western province. It is however recognized by the proclamation of the 22nd of April 1803, which imposes generally a tax of one-tenth on the produce of all ligh lands, which means lands not adapted to the production of Paddy. In those divisions where it is not levied, the exemption is in consequence of special eauses represented to, and sanctioned by government.
Tax on Gardens.-This revenue is derived from two different aources, from gardens belonging to govemment, and the governmeit share of Ratmahare, Nillapalla, Mallapalla, Muttetto, Divile Parveny, and Accommodessan Gardens.
Tithes Redeemed.-A measure adopted in Novem. ber 1813 by Government, under the conviction that proprietors of Paddy lands, would cultivate them moie carefully, and with greater advantage to the public, if suhjected to one tenth only, instead of to the larger rates of tax, mentioned in the first paragraph. The redemption is effected by the owner paying the eatimatid value of the difference of Tax for eight or ten years, at one payment; under instructions from the Secretary of state, preparations are being made for the general redemption of the land tax, upon the same principle.

Duty on Paddy Fields.-An annual duty in money on government lands, cultivated by the inhabitauts of the Batticaloa division of the eastern province, under authority from Government, established when the Dutch first gained possession of that district.

Land Customs.-Taxes levied at ferrics, bridges, canals, and the lock and cart tolls established from time to time, under the authority of Government, according to the ancient Dutch laws. The regulations No. 17. of 1822, and No. 3. of 1831, protect this source of revenue.
Turnpike at Macoon.-Established in 1829, and levied on loaded Passengers at the rates fixed by a minute of Council under date 22nd December 1888, this tax was abolished from Ist January 1837.
Sea customs.-These duties are collected under, and agreeably to the directions, of the Regulation No. 9. of 1825, No. 1. of 1828, and No. 4. of 1830, and an ordinance passed by the Legialative Council No. \%. of 1836. The payment of Fees on Port Clearances and Pilatage under the 59 and 68 clauses of the regulation, No. 9 . of 1825, is regulated from 1st Janurry 1835, by advertisement of the 29th December, 1834.
Cinnamon.-The procceds of cinnamon, the collection of the plantations, retained by Government, sold under the instructions of the Secretary of Sate, and the advertiaement of the 9 th March 1833, issued thereupon. The cinnamon is put up to sale monilly, in lots of five bales of one hundred pounds each bale, at the upset prices of 3 s .6 cl . for the firat, 2 s . for the aecond, and 9 d . for the third sort, per lb.

Under this head are brought to account, rece:pts for assorting and embaling private cinnamon lodged in the Government stores at Colombo and Galle, under the superintendance of the officers of government, at the rate of $2 s$. per bale of one hundred pounds; under the advertisement of the 14th Angust 1833.
Licenses.-Arrack and Toddy.-Tax on the consumption of Arrack and Toddy or the exclusive privilege of retailing Arrack, formed in the several provinces, protected by the ordinance No. 5 . of 1834. Stills.-This tax was first imposed in January 1821, but it was found expedient to lower the established duty, in the proportion of one-third in March 1826, sind again to lower it to 2s, a gallon in May 1832, which is the rate now levied. The ordinance No. 5 . of 1834 , protects this branch of revenue.
Sifting Sand for Pearts.-l'rivilege of sifting sand for pearls, and is rented at Manar after the pearl fishery is over.
Weights and measures.-Annual payments to the Colombo cutcherry for stamping weights, and measures, and hire of dry measures established by govern. ment under the 3rd and 7th regulations of 1816 , and which syatem has by the 19 th regulation of 1822, been extended to liquid, and linear measures and weights.
Aucion Duty.-Government duty of 2 per cent. on moveable property, levied under the ordinance No. 5. of 1836 .
Fish.-Government share of fish caught in the sea, rivers, lakes, \&e. This duty is rented in the several provinces and was established under the Dutch government from an early period. The duty was generally reduced to one-sixth, from lst January 1834, and has been further reduced to one-tenth from 1 st January 1827.
Under instructions from the Secretary of State, an alteration in the mode of collecting this branch of the revenue, is under consideration.
Chank Fishery.-The exclusive privilege of fishing for Chanks, reserved by government from time immemorial, generally rented. The Dutch proclamation of the 28 th May 1665 , protects this branch of revenue eatabliahed in June 1836.
Salt,-Recognized by regulation No. 2. of 181:3, and was formerly conducted on the duthority of custom and orders of the Dutch government. The Ordinance No. 3. of 1836, consolidates and amends the laws for the protection of this branch of revenue.
Stamps.-Amount of stamps sold at the several cutcherries, and by the commissioner of stamps, under the regulations No, 4. of 1827, and No. 2. of 1830, which have been revised by the ordinance No. 6. of 1836.

Judicial Receipts.-Amount of stamps sold in judicial process and paid into the Cutcherries, by the several district judges throughout the island, according to the tables of fees, established by the supreme court, under the charter dated the 18 th February 1833.
Fines and Forfeitures.-Fines levied and sums obtaired for articles, confiscated and sold for the benefit of the Crown, by the supreme court and district judgag.

Posiage.-lsland postage on Letters \&c. regulated by the ordinance, No. 8. of 1836 .

Pearl Fishery.-Can only be considered as a casual and not a permanent revenue. The regulation for the protection of the banks and the Dutel proclamntions of the 28th Mny 1665, and the 15 th November 1745, and the regulation No. 3. of 1811 .

Lands and Houses.-Under this head receipts of the following descriptions are brought to account. The monthly rent of Government houses and lands occupied by individuals; the amount of proceeds of houses, gardens, waste ground and cinnamon plantations, disposed of by government, and the collection made at the several government rest houses in the island, from travellers or passengers occupying the same.

Assessment on houses, \&c.-This tax is levied from occupants of houses at Colombo and Galle, and was first imposed in the year 1820 . This as well as the tax on bullock earts (both of which are brought to account under one head) are protected by the ordi. nance, No. 4 of 1834, as amended by No. 3. of 1835 .

Got'ernment Gazettes, \&c.-Under this head reccipts accruing from the sale of, and from advertisements inserted in the "Government Gazette." Also from the sale of the Ceylon almanac; are brought to accuunt by the government agent for the Western province.
Kandyan Districts.-Land Revenue.-The receipts classed under this head, are derived from the tax of one-fifth, one.tenth, or one fourteenth, on the Paddy (Rice) lands of private proprietors, which is imposed by the 18th, 19 th, and 20th clauses, of the Proclamation of the 21 st November 1818, and from the royal lands still possessed, unalienated by the Crown, by a tax varying from twenty.five to fifty per cent. of the produce, whieh last mentioned lands are annually rented.

In the central province the tax on private property, had till 1826 been exclusively levied by an annual assessment of the crop of each harvest, and had chiefly been collected in kind. Within the last eight years in the districts adjacent to the town of Kandy, this annual assessment has been commuted, with the consent of the proprietors, for the annual payment of a given quantity of grain, without annual assessment till the end of the year 1830 , and that system has been further improved within the last six years, by giving the proprietors the option of paying that commuted fixed assessment, either at a fixed money rate, or in kind. The stimulus given to industry in the aforesaid districts by the completion of the carriage road, between Colombo and Kandy, and other channels of communication have induced and enabled the preprietors to pay that commuted tax since 1831, almost exclusively in money. From the double advantage of an increase in the amount of the tax, and of the saving of the charges of annually assessing, transporting and storing the revenue grain, a nett increase of upwards of one hundred per cent. was derived under this head, in those commuted districts as compared with the revenue, obtained under the former system, and the proprietors have at the same time been protected from many disadvantages and grievances insuperable from the former system of annual assessment. The term of the first settlement having expired with the year 1832, the proprietors had the option of either renewing the settlement on the same conditions, for another term of three years, or of reverting to the former system of annual assessment. The renewal of the commutntion assessment: was accepted throughout the former commuted districts. At the end of 1835 , the renewed commutation also expired, and a notice was issued, that the assessment may either he renewed, for a term of twenty-one years, or that the tax may be redeemed in perpetuity, by paying ten years purchase of the cominuted annual
tax. The permission to redeem has been accepted to some extent, each of the proprietors as were not prepared to redeem, have accepted the commutation assessment for the term of twenty-one years. The commutation system of obtaining for a term of years, a fixed arnual payment in grain or money, without assessment of crops, and of renewing the term as it expires, likewise prevails in the Kandyan portion of the western, southern, eastern, and northern provinces.

Land Customs.-The only reccipts under this head are those derived from the ferry and bridge toll rents, which are levied under the regulation No. 3. of 1831.

Licenses.-Tax on the consumption of arrack, or the exclusive privilege of retailing arrack protected by the ordinance No. 5. of 1834.

Auction Duty.-This head requires no explanation beyond what is given above respecting the maritime districts.

Stamps.-Judicial Reccipt.-Fines and Forfeitures. -Postage.-These heads too require no further explanation.

Expenditure.-From the time of our acquisition of this island, its revenue has been inadcquate to meet the expenditure, whether wiscly or unuccessarily in. curred. Certainly much of the expenditure arose from causes which now cease to operate-namely, internal war with the Kandyans, and, in consequence of hostilities in Europe or British India; even at this moment, a larger military force is kept up in Ceylon than is required for the mere protection of the island, in consequence of its bcing the Malta or Gibraltar of our eastern possessions. The following abstract was laid beforc the finance committce of parliament in 1828.

expected to meet the charges requisite for its maintenance and peace.
Yet the excess of expenditure in the latter years had considerably diminished; but a more agreeable prospect of the finances of the eolony is presented to us in the Ceylon Almanac for 1833, which gives the revenue and expenditure from 1821 to 1831 , thus-

Copper-British copper coin, 1,698l.; Copper coin of Europe coinage, 4,554l.; total, 6,252l.; grand total, 52,4416 . Add twice that amount as prohably in the hands of the public $(104,883 l$. $), 157,324 l$. Probable amount exported and melted, 202,059l. Total, 359,383l.

Statenent shewing every descriptlon of Currency in the Cash Chests of the General Treasury and several Cutcherries of the island, as they stood on 31st December, 1836.

Amount of Paper Currency in circtulation. [B. B. 1836.] 40,715 notes of 11 . cach, 40,7151 .; 18,375 notes of $\because l$. each, $36,750 l$. ; 1,274 notes of $5 l$. each, 6,370l.; 213 notes of $10 l$. cach, 2,130l.; 38 notes of 201. each, $760 l$. ; 27 notes of $25 l$. each, 675l. ; total 87,400 l. The value of the paper currency is the same as that of the precious metals in circulation, the same
beirg always exchanged on demand at the treasury. The guarantec of the Governor for the time being, under the sanction of his Majesty's ministers, is the security on which the paper depends

On the 31 st December, 1836, the amount of paper currency in the several Treasuries of Government was as follows, viz.: Pound notes, as per statement

25,9153. The amount of precious metals in circulation has been estimated at $157,324 l$. The amount of paper currency is $87,400 l$. Probable excess of precious metals beyond paper currency, 69,724l.

Rate of Exchange.-Established by Government order of 7th July, 1825: With England © 1s. $6 u$. per rix dollar ; with Madras @ 1s. 11d. per rupee; with Bombay @ 1s. 11d. per rupee.
Established by Government order of 7th July, 1825, and 4th August, 1836 : With Calcutta (1) 2s. $1 d$. per sieca rupee, and 100 siccas per $106{ }_{3}^{2}$ Company's rupees.

Established by Government order of 7th July, 1825 :
With the Mauritius and Penang @4s.4d. per Spanish dollar.
The rates of exchange with Great Britain and foreign countries have been fixed necording to the relative value of the Ceylon rix dollar to the British and foreign coins. The rate of exchange has been the same from January to December, 1836 , as fixed by the above orders of 7th July, 1825, and 4th August, 1836.
Coins.-Gold coinage : Sovereigns; half ditto.-British silver coinage: Crowns; half ditto; shillings; six-penny pieces ; rix dollars of English coinage, value 1s. 6il.-Foreign silver coinage: Spanish and American dollars, value $4 s .2 d$. ; sicca rupees, value $2 s$.; Company's ditto, value 2s.; Bombay ditto, value 1 s .1 d . ; Madras ditto, value 1s. 10d.; Madras quarter ditto, value $5 \frac{1}{2} d$. - Copper colnage: Penny pieces; half ditto; farthings ; half ditto; two pice pieces of English coinage, value $\frac{3}{4} d$. ; one pice ditto, value $1 \frac{1}{2} d$.; half pice ditto, $\frac{3}{4} d . ;$ Dutch copper challies, taken as prizea in Kandy, value $\frac{1}{2} d$.

The value of the British silver and the rix dollar must have been fixed by assay in England. None of these coins have been cut, pierced, or defaced. Tbe Madras quarter rupees imported expressly for circulation in the island, have received the impression of a crown, but not otherwise altered.

Weights and Mensures. - The Singalese, or dry measure is 4 cut chundroons $=1$ cut measure or seer; 4-5ths=1 coornie; 2 1-12ths=1 mareal; $2=1$ parrah ; $8=1$ ammonam ; 93.8 ths $=1$ last.

The internal measure of a standard parrah is a perfect cube of $1157-100$ th inches; the seer is a perfect. cylinder-depth 4.35 inches, diameter 4.35 inches; the weight of the parrah measure, according to the custom-house account is, for coffee, from 50 to 35 lbs.; pepper, 27 to 30 lbs .; salt 52 to 55 lbs.; paddy (unhusked rice) 30 to 33 lbs ; rice 42 to 46 lhs ; the Candy or Bahar $=500 \mathrm{lbs}$. nvoirdopuis, or 4611 lbs . Dutch troy weight.

Kandyan Measure of Surfuce. - Eight lahas $=1$ coornie ( $1015-16$ ths square perches), $10=1$ peyla (2 square roods, 298 square perches), $4=1$ nmmonam ( 2 acres, 2 square roods, $37 \frac{1}{2}$ square perches). 13ut althongh the average extent of one ammonam is found to be 2 neres, 2 roods, and 2 perches, the measurement of land is not calculated for the speeific area, but from the quantity of seed required to be sown on it, and consequently according to its lertility.

Weights of ozs., Ibs., \&c. are used nlso throughout the island, British standard. The bale of cimamon consists of nearly $92 \frac{1}{2} \mathrm{lhs}$.

Liquid Measure,-Gallons and their multiples and sub-multiples : 150 gnllons $=1$ lenguer or legrger.
Monetary System.-'llic circulation of late is $£$. s. and $d$, as in lingland, and nccounts are becomlug more genernliy kept in the same. The rix dollar is equal to $1 \mathrm{~s} . \mathrm{gd}$. ; it is divided into 12 fanams (a thick
copper coin), and each fanam into 4 plce. There is s government bank at Colombo; hut I can obtain no returns of Its circulation or deposits. Notes are issued by government ; but no annual returns are published of the amount, nor is there any information within the reach of the Colonial Office, in Downing Strect, as to the real state of the paper and metallic circula. tion in the island. It is proposed to estahlish a private bank at Colombo. A savings bank is now in operation.

Measures.-Dry Measure.

The parrah measure is a perfect cube of internal dimensions, a table of which, with its sub-divisions, is herewith inserted :-

Internal dimensions of a Parrah and its sub-dinisions. - Parrah, length, 11 57-100th inches; depth, ditto; breadth, ditto. Half parrah, length, 9 18-100th inches ; depth, ditto ; breadth, ditto. Quarter parrah, length, 7 28-100th inches; depth, ditto; breadth, ditto.
The seer is a perfect cylinder, of the depth and diameter descrihed in the table underneath, in which is nlso stated its sub-divisions :-

Internal dimensions of a Seer and its sub-divisions. -Seer, depth, 4 35-100th inches; diameter, ditto. Half seer, depth, 3 45-100rh incbes; diameter, ditto. Quarter seer, depth, 2 74-100th inches; diameter, ditto.

hess all over the island. Cardamom plants are equally plentiful. The much sought after arecanut is of the finest species, and unsurpassed, nay, even unequalled in any part of the east. The rice of Ceylon has a richness of flavour I have never found in any other country. Teak forests abound and excellent masts and yards of the largest size are everywhere procurable. Calamander, ebony, satin, rose, sappan, iron, jack, \&c., and every species of the most beautiful cabinet making woods, are in rich profusion (ride Ceylon cabinet desks, dressing-cases \&c., so much and so justly admired in England). Enchanting groves of the Palmyra palms surround the villages in the northward of the island, and like the cocoa palms in the south, are of tlie greatest value to the peasantry in seasons of draught.
In 1831 it was calculated that there grew along the coast between Dondra Head and Calpentyn (184 miles) ten millions cocoanut trees. The value of these may be judged by an enumeration of some of the articles prepared from them.

1. Arrack (the spirit under this name, made from the cocoanut blossom, is far superior to the Batavian arrack, made from rice) which is distilled from the sweet juice of the incised Hlower-stock, termed-
2. 'Toddy,' in itself a delicious wholesome beverage, when drank fresli drawn before the morning sun has caused fermentation to commence.
3. Jaghery, a course, strong grained, but peculiar flavoured sugar (well adapted for crystallization, or refining in England), made in abundance from toddy.
4. Vinegar equal to any made from white wine, also prepared from the toddy, and used in making exquisite pickles from the young shoots.
5. Coir, or ropes, strong and elastic, and hnving the peculiar property of being best preserved for use in sea-water (hence their adaption for nooring, and other purposes to which they are now applied in Mauritus harbour and elsewhere, as also ior running rigging in the loslia shipping).
6. Brushes and hrooms, of various descriptions.
7. Matting of excellent quality.
8. Rafters for houses.
9. Oil of much valuc, and now used in England for candles as well ns lamps.
10. Gutters or water-spouts, or conveyances, for whici: the hollow stem or trunk is so well adapted.
11. Thntching for the pcasants' cottnges, the shady broad leaf being almirably suited for the purpose.
12. Alkaline ashes for the burnt lenves, nud used by washermen.
13. The roots are sometimes masticated in place of areca nui.
14. Baskets of the young shoots,
15. Drums of the crust of the trunk.
16. Reticulated cloth cradles or couclies for infants. 17. The terminal buds, used instead of cabbage.
17. Translucent lanterns of the young leaves.
18. Tablets for writing upon with nn iron stylus or pen (after the Roman manuer), from the lenflets.
19. An Eolian harp of the stripes of the lenf.
20. Stufting (coir), in place of hair, for coueh cushions, mattresses, saddles, \&c.
The list has been extended to 99 different nrtieles.
It may also be mentioned that the nutives of the Maldive islands send nn anmal embnssy to Ceylon, the boats conveying whom ure entircly prepared from this tree, the persons composing the embassy, clothed and fed on its products; and the mumerous presents for the Governor of Ceylon are all manufactured from this queen of palms.

The laurus cinnamonum, although cultivated in many tropical places, has its priucipal hnbitation at Ceylon, which is capable of yielding a sufficient supply for every country in Europe; the tree whence the cinnamon bark is derived grows to the height of from 15 to 20 feet, with an irregular and knotty stem, branchy and ligncous roots, fibrous and inodorous wood, external bark, rough, thick, scabrous, and of an ash colour, inner bark reddish, (the young shoots are often delicately speckled with dark green and light orange colours) ; branches umbrageous inclining horizontally and downwards; leaves oblong and in pairs, from six to nime inches in length, and three broad, petiolated, colour dark green; flowers clustered on one peduncle, white, wanting calyx, smell resembling a mixture of rose and lilac ; fruit an oval berry, larger than a black currant, receptacle thick, green and hexangular. The roots have the pungent smell of camphor, and the delicious odour of cinnamon, yielding camphor by distillation, the leaves have the pungent taste of cloves; the berries, by boiling, yield au unctuous substance like wax, emitting an agreeable odour, and formerly used as candles for the exclusive use of the Candian Court. Cattle of every kind eagerly feed on the luxuriant foliage, while pigeons, crows, and other birds, devour the berrics with avidity. To the industry of man belongs the bark, the varicties of which are dependent on the nature of the soil, on the skill in cultivating and peeling, and on the age and healthiness of the plant. About 2,000 acres of land are laid out in regular cinnamon plantations in Ceylon, and about 30,000 persons employed there01. The peeling of the bark begins with May and and ends with October : the peclers (chalias a distinct caste in Ceylon) commence the process by striking a sharp bill-hook into a shoot which seems fit for peeling; if on opening the gash the bark scparates gently, it is fit for decortication; if otherwise, the shoot is unhcalthy, the gash is carefully closed, and the sucker left for liture examination; shonts thus found fit (generally from threc to five feet long, and threequarters of an inch in diameter) are then cut down, conveyed to sheds, and there cleared of leaves and twigs; by means of two longitudinal slits the bark peels off in two semi-circular slips; when a sufficient number are collected, the sections are placed in close contact (as two quill-halves would be laid one within the other) and the whole bundle is firmly pressed and bound up together for 24 hours, until a degree of fermentation is produced, which facilitates the removal of the enticle ; subsequently the interior side of each section of bark is placed upon a convex piece of wood fitted to its size, and the epiderinis, together with the green sueculent matter carefully scraped off (if any of the outer pulpy substnnce be allowed to remain, the cinnamon has an unpleasant bitternesa); a few hours after the removal of the cuticle, the pieces are again placed in each other, and the bark in drying gradu. nlly contracts and rolls itaelf into a quill-like form. During the first dny it ia placed under shelter on open platforms, subacquently it is finnlly dried in the sun, and made up into bundles about 30 pounds weight. A plantation requires seven or eight years' growth before yielding prodnce, the tree is least advantageously propagated by seeds,-linyers and shoots, or transplanted stumps, are the best means of extending the growth.

Quantitics of Cinnamon recently Imported, Exported, and taken out for consumption in England.

The peari banks, according to Dr. Ruschenberger, are formed by coral ridges from six to ten miles off shore: their general depth is from five to seven fathoms, but it is on the banks of Arippo, where the coral rising nearly to the surface of the water forms a shelter against the violence of the monsoons and currents, that the pearl oyster chiefly arrives at perfection. The young oysters, when they first escape from the egg, are scen flunting about the sea in immense clusters; a little increase in size and solidity makes them sink to the bottom where they immediately attach thenselves to the rocks by means of a heard and a glutinous inatter secreted from it. There they remain in security until age hus enfeebled the fibres of their beard, or deprived them of their adhesiveness, and then they drup from their coral supports and lic in heaps on the sandy bank beneath. The pearl-divers say that the oyster is about six years and a half old when it drops from the rock; it is supposed to arrive at perfection in seven years, and to die soon after. During their clinging period they accumulate on the rocks in heaps, sometimes 18 inches or two feet deep. The best pearls are gencrally found in the most fleshy part of the oyster, near the hinge of the shell, but they are not confined to any part of the fish. Instances have occurred of a single oyster contnining above 60 pearls; yet the rarity of these treasures is manifest from the fact that oysters cost less at Arippo during the fishery than at Faversham or Colchester.

During the calms of Novemher the banks are examined by experiencel oflicers, und snmples of the oysters are forwarided to the seat of govermment. If the result of the examination prove favournble, then the fishery is announced by an advertisement, stating when and on what tank it is to take place, how long it is to continue, and how many boats will be allowed to engage in it. These boats are of very rude construction, generally from cigit to fifteen tons burden, and without deeks. They leave the shore at midnight, favoured by the land winds, nud anchor near the government gunrd-vessel and the fishing bnak. A little after dawn in the morning a signal is given for the diving to begin, and a gon is fired at moon, on which it ceases. 'The following description of the mode of procecding was procured ly Dr. Ruschenberger, on the spot.
"The crew of a hont consists of a Tindal or mnster, ten divers, and 13 other men who hamate the bout and attend the divers when fishing. Ench boat bas Hve diving stones (the ten divers relieving each other);
five divers are constantly at work during the hours of fishing. The weight of the diving stone varies from 15 to 2.5 lb ., according to the size of the diver; some stout men find it necessary to have from 4 to 8 lb . of stone in a waist-belt, to enahle them to keep at the bottum of the sea, to fill their net with oysters. The form of a diving stone resembles the cone of a pine; it is suspended by a double cord.
"The net is of coir-rope yarns, 18 inches deep, fastened to a hoop 18 inches wide, fairly slung to a single cord. On preparing to commence fishing, the diver divests himself of all his clothes, except a small piece of cloth; nfter offering up his devotions, he plunges into the sea and swims to his diving stone, which his attendants have slung over the side of the boat; he places his right foot or toes between the double cord on the diving stone-the bight of the cord being passed over a stick projecting from the side of the boat; by grasping all parts of the rope he is enabled to support himself and the stone, nud raise or lower the latter for his own convenience while he remains at the surface ; he then puts lis left loot on the hoop of the net and presses it against the diving stone, retnining the cord in his hand. The attendants take care that the cords are clear for rumning out of the bont.
"The diver being thus prepared, he raises his body as much as he is able; drawing a full breath, be presses his nostrils between his thumb and tinger, slips his hold of the bight of the diving stone, and descends as rapidly as the stone will sink him. On reaching the bottom he abundons the stone, which is lauled up by the attendants ready to take him down again, clings to the ground, and commences filling his net. To accomplish this he will sometimes creep over a space of eight or ten fathoms, and remain under water a minute; when he wishes to ascend he checks the cord of the net, which is instantly felt by the attendants, who cominence polling $u_{p}$, as fast as they are able. The diver remains with the net until it is so far clear of the bottom as to be in no danger of upsetting, nad then begins to haul himself up by the cord hand over hand, which the attendants are likewise pulling. When by these means his body has acpuired an impetus upwards be forsakes the corl, places his hands to his thighs, rapidly ascends to the surface, swims to his diving stonc, and hy the time the contents of his net have been emptied into the boat he is ready to go down ngnin. Oae diver whll take up in a day from 1,000 to 4,000 oysters. They seldom excced a minute under water; the more common time is from 53 to 57 seconds, but when requested to remain as long ns possible, they can prolong tibeir stay to something more than 80 scconds. They are warned to asechd hy a siuging noise in the cars, and finally by a sensation similar to hiccup."

The divers have much faitls in the powers of the shark charmer, and many of them will not descend unless he he present: : he is therefore paid by government. One-fourth of the oysturs taken ap belong to the divers, the remninder are disposed of by publie sale. The annual nett revenue derived from the pearl fishery is estimated at Id, 000 l .; but in 1833, when to less thm 1,250 divers were employed, it monounted to more than 25,0006 .

Manufsetures, Mince, and Fisherles of Ceylon in 1836. [B. B.]

There are no regular manufactorics, mills, \&c., in | the army, and the public offices, containing the official Ceylon, those entercd in this return being, with the records of the island; it forms a strong hold in the exception of the two steam engines (set up, by a mer- island, and is most conveniently situated for trade. cantile house at Colombo) of a very inferior description. There is also no regular yard for ship building in the island, small sloops and schooners are however occasionally built. The description of fish and quantity of each are not stated, mostly all of them bearing mative names.
Miliary Defences of Ceylon in 1836. - The fortress of Colombo, situate on the west siut: of the island, is en irregular octagon, defended by eight bastions; the lines of defence fichante, with three insignificant ravelins. One half of the fortress is surrounded by the sea, the other half or land side, by an extensive inundation, leaving only two narrow canseways of approach. There is a covert way to the land fronts ; the glacis, however, was never filuished. The revetments are of masonry generally composed of cabrook and lime mortnr, and are (with some exceptions) in tolerable repair. The profile, from having a wet ditch in front, is respectable, the ditches are broad, well supplicd with water from the inundation, and when cleaned would be sufficiently deep. There are neither casemnted barracks, nor casemated storehouses within the fortress. The wells afford slightly brackish water, but the water fails on a continunnce of dry weather. There are several powder magazines within the fort, the whole of which are in a scrviccable state. The fortress conmands the harbour, into which none but vessels of small burthen can enter; it cannot be anid to commmad the rondstead, because ves. sels may anchor with safety from one to fitteen miles from the shore; it encloses within its lines of defence the residence of the governor, the head quarters of

Although the trace of the body of the place does not conform to the science of more modern war, being of the days of Louis XIII., and aecording to the system of the Chevalier de Ville; still, if good outworks were added, and casematerl cover for troop's stores constructed in the body of the place, and the ramparts \&c. placed in an efficient state of repair, Colombo, from its situation, and the great difficulty of approaching it by land, ought, under an intelligent aud intrepid governor, to make a protracted defence ; with a naval superiority, the fortress could, under any land attack, receive succour from the sea. Trinconale, the principal British naval depot in the Indian stas :-Fort Frederick, Trincomale, is situated on the east side of the island, and on a peninsula, projecting into the Indian ocean. The works of defence consist of three irregular fronts, with the lines of defence fichante, a cavalier and a citadel, without either casemated barracks, or casemated store-houses ; one front with an unfinished ravelin, occupies the narrow isthmus, the ditches of this front are dry, und have never been tinished; the two other fronts follow the direction of the ground. The cavalier stands on elevated ground, in rear of one of the bastions of the land front, and is connected with the bastion by a curtain. The citadel is in rear of the cavalier, and on still more elevated ground. The profile has 20 feet of escarp, but the revetments are of good masonry. The fort is well supplied with water. There are also several powder magazines within, which are in a serviceable state.

Fort Osnaburg, Trincomale, situated ut the mouth
of the inner harbour, is a small irregular work, and does not sufficiently protect the entrance; its profile is insigniffcant without casemated barracks or store-houses. The fort is aupplied with rain water, collected in a tank, and has two powder magazines within it. The works of defence now in existence at Trincomale, are far from adequate to the secure holding of a port of such great importance.

Galle.-The fortress of Galle situated on the south side of the island, and on a peninsula projecting into the sea, commands the only harbour on that side of the island, into which large ships can enter, but it is commanded by a range of hills about 700 yards distant. The lines of defence on the land side, or across the isthmus consist of one bastion with a cavalier, two hnlf bastions with fausse brays, and two curtains containing each half hastion with the whole bastion, with a half finished ditch in front of the whole, but without casemated barracks or store-houses. The salient angles of the balf bastions are appuyed to the harbour and sea. The construction of this fort does not follow any regular system. The remaining defences consist of substantial lines built on the edge of the outlme of the peninsula, the base of which is constantly washed by a heavy surf. The profile is irregular, in some parts bold, but from the small height of the faussebraye, requires $n$ wet ditch in order to guard against escalade. The revetments are composed of rubble stone and cornl lnid in lime
mortar, and are in tolerable repair. The fort is also tolerehly well supplied with water, and there are four powder magazines within it.

Jaffna.-The fort of Jaffna is situated on the N. W. side of the Island, and on an inlet of the Gulf of Manar. The work is an irregular pentagon, with five bastlons connected by curtains, the lines of defence fichante, and the flanks perpendicular to the curtains it has four land and one sea front. The former have ravelins, a covertway throughout. With the excep. tion of the ravelins, to which there is none, the com. munication passing by gallery under the flanks of the ravelins, also a glacis. The body of the place has a wet ditch, but the ravelins a dry one. The profile has 22 feet of escarp, above the level of the wet ditch the revetments are of masonry, and in a good state of repair. The fort contains 25 wells, two of which give good, and the remainder brackish water This fort alfords security to a small garrison, stationed in $n$ remote part of the island, and surrounded hys dense native population. Independant of the above four principal posts, there are detached ones on the const, generally with small garrisons, nnd a field work for their protection. In the interior of the island, the principal post is Kandy, an open town situated in a valley, with four unfinished redoubts on the surrounding heights. The military works are controuled by the colonial government, and scarcely any explense has been incurred by the colony during the year I 836 .

## CHAPTER III.-PENANG, OR PRINCE OF WALES'S ISLAND.

The possessions now about to he described, though small in comparison with thosn delincated in the preceding pages, are of considerable importance, whether viewed in connection with the Anglo-easterr, empire, or separately as commercial stations or political maritime positions. Being under one government, their history is given in one chapter, but their distinct features, geographically and mercantilely, demand a separate consideration for each : to begin with the seat of government.
Section I. This picturesque island (so well adapted for a commercial entrepot), is situate on the west coast of the Malayan peninsula, in latitude from 6. 15. to 5.29 . N. and longitude 100 . E.; its greatest length is 16 statute miles from N. to S., and its greatest breadth 12 miles at the north, and decreasing to eight miles at the south, thus forming nn irregular four sided shnpe, with a range of lofty hills in the centre, the whole computed to contain 160 square miles. Penang is so called from the Malay term for the Areca or betel nut, which the Malays think the isle bears scme resemblance to in shape.

The valley of Penang, about three miles in breadth, is the level purt of the island on its castern side, extending from the hills to the sea, of a trinngular shape, the ranges of mountalns forming the base, and the apex, called Tanjong, jutting into the hnrbour, and having Georgetown (the capital) and the Fort of Penang huilt on it, on which, for threc miles in cvery direction from the point, private houses extend. Almost the whole of the north of the island is moun. tainous, and through the centre of the island runs in range of hilla, decreasing in height and magnitude as
they reach towards the snuth. On the west and south of the mountains there is a considerable quantity of level ground of good quality for every species of cultivation as is now demonstrated by the general culture thereof. Indeed six-thirls of Penang is of level or gentle inclination. The east, owing to its moistness, is covered with rice fields. The south and west vallies, though partly cultivated for the same purpoae, are chiefly laid out in pepper gardens and spice plantations. Everywhere close to the coast, as in Ceylon, runs an extensive helt of cocoa nut trees and scattered over the island in various groups, appear groves of the graceful arecn palm (or Penang) from which the isle takes its Malay name. The hills and low grounds, where not cultivated, are thickly covered with wood. Vegetation is splenilidly luxuriant and for miles and miles the eye rests on one dense mas of mountain forest. Besides Georgetown (the capital) above alluded to, there is only one Inrge collection of houses entitled Jamestown, situnted on the sea shore, four miles to the sointh of the enpital, amidst a grove of the lovely palm trihe. The hill called the "High. lands of Scotland" is 1,428 feet above the sea (and like the other atations), the situntion nad climate of which are delightful. Numerous smnll villages and Mnlay topes are scattered over the island (especially on the south sidej, nften benutifully and romantically situate on the coast, or amidst spice groves in the vales.

The harhour of George Town, the capital, is capt. clous with good nnchornge and well defended; tit formed hy a strnit ahout two miles wide, that sepurntes Penang from the opposite Quednh coast on the Malayan penitisula. The sea is placid thrumghout

## LAND

On the west and considerable quan． ity for every species ated by the general ds of Penang is of east，owing to its lds．The south and vated for the same pepper gardens suid lose to the coast，a of cocos nut treet， rious groups，appear on（or Penang）from ame．The hills and ，are thickly covered didly luxuriant and $s$ on one dense masis getown（the capital）， e large collection of ted on the sea shore， pital，amidst a grove Il called the＂High． above the sea（suld ration and climate of is small villages and he island（especially Illy and romantically spice groves in the
the capital，is cap． well defended；it is iles wide，thant spas． Quedah casst on the placid throughout
the year，and the periodical effects of the monsoons little felt，the winds partaking more of the character of land and sea breczes．
II．When first known to Europeans the island ap－ perred quite untenanted，covered with foresta and considered as a part of the poasessions of the king of Quedgh on the contiguous coast．In 1785 Capt， Light，the commander of a＇country ship＇in India， having married the King of Quedah＇s daughter，re． ceived a gift of the island as a marriage portion ： Cspt．Light transferred it to the E．I．Company，who having entered into a treaty with His Quedah Majesty （which was to last as long as the sun and moon gave light！）agreed to pay six thousand dollars annually to the King，which in 1800 was caised to ten thou－ sand，in consideration of the Company receiving the Wellesley province on the main land opposite Penang， s territory extending thirty－five milea along the coast， four miles inland from the S．bank of the Qualla Mudd to the N．bank of the Krian river，Lat $5^{0}$ $20^{\prime} \mathrm{N}$ ．
lll．The mountains are entircly composed of fine grey granite，and the smaller hilla are of the same material，excepting some hills near the coast formed of laterite as is also Saddle Island on the $S$ ．W．angle of Penang．A tin mine was worked some years ago in the hills，and doubtless many valuable minerals exist in the mountains，which are probably equal in quality to these of the contiguous Malayan Peninsula．
The soil is generally a light black mould mixed with gravel and clay，and in some parts there is a rich vegetable ground formed by the decayed leaves of the forests with which the island had for ages been co－ veind，the eoast soil is sandy but fertile．
IV．January and February are the dry and het
months，and November and December the rainy ones；but excepting the two former the island is seldom a week withuut refreshing showers．The thermometer on Flag－staff hill（two thousand two hundred and forty－eight feet high）never rises beyond $78^{0} \mathrm{~F}$ ．（seldom to $74^{\circ}$ ）and falls to $66^{\circ}$ ；on the plain it ranges from $76^{\circ}$ to $90^{\circ}$ ．The island is considered remarkably healthy．The climate of the high land of Penang resembles that of Funchal at Madeira，pos－ sessing the advantage of a very limited range of ther－ mometer，the greatest range in the twenty－four hoirs being $11^{\circ}$ ，and generally only three or four．The lightness and purity of the atmosphere clevate the spirits and render the step free and buoyant，while the splendid and varied scenery，the island itself with its hills and dales，the calm ocean around studded with verdant isles，and the opposite coast of Quedah with chains of mountains towering chain over chain， combined with the health inspiring breezes，render a residence among the gardens of Penang of much value to the invalid．

V．When the Company＇s Establishment was formed at Penang in 1786 ，the only inhabitants were a few miscrable fishermen on the sea coast．In consequence of the disturbances in the Malayan principalities，and the encouragement given to settlers by the E．I．Com－ pany，a native population of various descriptions arose．The population of the Settlement according to all the returns before me has been as follows during the years

$$

oricial ycars 1835-36 are thus particularized. Under the Portuguese flag, Sa. Rs. 2,00,133; French, Sa. Rs. 21,062 ; American, Sa. Rs. 3,920 ; Danish, Sa. Rs. 7,658; making a total of Sa. Rs. 2,32,773. The ex. ports during the same period under the Portuguese flag were Sa. Rs. 3,83,991; and under that of the French, Sa. Ks. 6,000; making an aggregate amount of Sa. Rs. 3,89,991. The quantity of specie imported between the lst of May 1835 and the 30th April 1836, is valued at Sa. Rs. 9,6.4,500, and the quantity exported in the same time at Sa. Rs. 8,25,295.
VIII. The hotany of the island is rich and varied : on the mountains grow the poon, bitanger, rangas, red poon, dammerlaut, wood oil tree, the cypress and some superb species of arborescent ferns. The cauntchouc or elastic gum winds round all the trees in a spiral form. All the Malacca fruits, with the exception of the duku, grow in great abundance, the sugar cane and pepper vine are extensively cultivated (the quantity of pepper annually produced averaged lbs. 2,025,000 avoirdupois) cloves and nutmegs thrive well (the former cover the tops of the cleared summits, the latter are found in cvery part of the valley, one plantation alone occupying a space of several square miles) coffec yields ahundantly, extensive fields of pine apples of delicious gout are found at the foot
of the mountains; the tea plant grows wild; ginger, cinnamon, cotton, tobacco, and in fact every intertropical production is capable of being brought to the highest atate of perfection.
Beef, mutton and pork are of excellent flavour, and the bazar furnishes a great variety of fish.

In 1818, the bearing nutmeg trees on the island were estimated to be 6900 . Since that period spices have been more extensively cultivated. There are now upwards of thirty spice plantations at this settlement, including Pruvince Wellesley, and these may be clased as follow :-

Five plantations containing from 4000 up to 20,000 trces.
Eight from 500 up to 10,000 trees.
Seventeen from 50 up to 2000 , containing in the aggregate about 80,000 trees, of which number 45,000 are estimated to be in hearing. When Bencoolen was ceded to the Dutch, the plantations there were estimated to contains 25,000 bearing trees only.

The gross annual produce from the plantations may be roughly estimated at $130,000 \mathrm{lhs}$., but young trees are yearly coming into bearing to swell this quantity; should the cultivation meet with no serious interruption, it may perhaps in time supply the whole of the English market with spices.

## CHAPTER IV.-MALACCA.

Section I.-Near the zonthern extremity of the long Malayan peninsula, which is in length 775 miles, with an average breadth of 125 miles; in latitude two degrees 14 minutes north latitude, 102 degrees 12 minutes east, is situated the British settlement of Malacca, extending about 40 miles along shore by 30 inland, and containing an area of 800 square miles : bounded on the north by Salengore at Cape Rochado, on the south Jehore, at the river Muar, on the east, by the Rumbo country, and on the west, by the straiis of Malacca.
11. The sea coast is rocky and harren, with detached islets of cavernous rocks, which the Chinese used as places of sepulture. The interior is momstainous (being a continuntion of the Alpine chain, which runs from the Brahmaputra river in Assam to the cxtremity of the peninsula) ; with several picturesque vallies, the highest mountain (named by the natives l.ealdang, by the Portuguese Mount Ophir) has an elevation of 4,000 feet above the sea. Colonel Farquhar was nearly six hours ascending to the highest part of Mount Ophir, the table surface on the top of which does not exceed 40 yards square; the whole mountain appears to be a solid block of granite, here and there thinly covered with decayed vegetable soil. Stunted firs are found near the summit, and the vegetation of the mountain was quite different from that met with on the plains and vallies. The principal rivers are the Muar and Lingtuah, and the small streams and rivulets from the monntains are very ummerous. The extreme point of the peninsula is a cluster of small islands; the rondstend is safe, and in the south-west monsoon vessels not drawing more than 16 fect of water are sceure in a harbour under the lee of the fort. Colonel Furguhar (who has made Mnlacen his study) observes that violent tempests never
occur at its excellent anchoring ground, that the Sumatre squalls, which are common to the straits, seldom last above an hour or two, and that for upwards of 25 years while the English had possession of the place no ship had been lost.

Ill. The Malayan peninsula, although the great majority of the inhabitants are Malays (whence it derives its name), is not the original country of that active, restless, courageous, vindictive, and ferocious people.

The present possessors (or Malayan princes and their subjects) emigrated in the 12 th century, from Palembang in Sumatra (the original country of the Malays) nhout A. D. 1252 , and founded the city of Malacca. As they extended their colonization, the aborigines of the country, who are oricntal negroes with woolly hair, jet thlack skin (the Malays are copper coloured), thick lips, and flat nose, like the African, and of diminutive stature, were driven inland to the mountains, where some of their unfortunate posterity still exist.
The Malayan chiefs soon became involved in hostilities with their neighbours, partly, perhnps, because their sultan Mahommed Shah, ndopted the Mahommedan religion from the Arabs, then the great traders in the east. Although the Malncen people were able to resist the nttacks of the Siamese on their chief city, they were compelled to ;ield to the conquering Portuguese, who, in 1511 , compelled Sultan Mohammed Shul, the 12 th of his line, and the 7th of the city of Malacen, to fly, after an obstinate resistance, to the extremity of the peninsula, where he tounded the principality of Jehore, which still exists. The Portugucse held Malacen until 1640, though with great dilliculty, against the repented assaults of the Sultans af Achern, when it was assuiled hy the Inteh, who

## MALACCA．－GEOLOGY，CLIMATE，POPULATION．

captured it after six months＇siege．In 1795 it was seized hy the British，but restored to the Dutch at the peace of Amiens in 1801．On the breaklng out of the European war in 1807，it was again taken by the English，but again restored at the peace of 1815； however，in 1825，it was received by England，together with the Fort of Chinsurah on the river Ilooghly， 20 miles from Calcutta，in exchange for the British settlementa on the island of Sumatra．

IV．The climate is reckoned one of the healthiest in India，the temperature being unlform，the thermo－ meter rauging from 72 to 85 the whole year round． The mornings and evenings are cool and refreshing， and the sultry nights of Hindostan rarely occur． There is no regular monsoon，but the rainiest months are September，October，and November．The fluc－ tuation of the barometer throughout the year is tri－ fling，the range being 30.3 to 29.83 ，giving an annual variation of only one－fifth of an inch．The average of casualties in the garrison for seven years was two in 100，a fact which attests the salubrity of the climate．

V．The population of the settlement of Malacca， was in 1750，1766，1815，and 1817，thus，－

In 1822 the population was 22，000．

- The iohabitants of Malacca, in 1830, came to a unanimous resolntion to liberate every siave in the settlement 31 st December, 1841.
VI. One of the most vuluable British institutions in the east, is the Anglo-Chinese college at Malacca, established in 1818, hy the joint efforts of the late Rev, Drs. Morrison and Milne. The ohject in view is the reciprocal cultivation of Chinese and European literature, and the instruction of native youths in the principles of Christianity. The native Chinese students in the college, generally average from 25 to 30 , all of whom are on the foundation of the college, receiving each a monthly allowance. Several valuahe and interesting translations have been made from Chinese books, and English standard works have been translated into Chinese; a foundry for types has been established, paper manuiactured, and a periodical commenced. The college is indebted for existence to private contribution, and it is to be hoped that so useful an institution will not be allowed to languish for want of support. Attached to the college at Malaces are several schools, the whole of which arc supported by the London Missionary Society; the Chinese schools alone contnin nearly 300 boys, and the Tamul schools are increasing. The female schools at Malacca are doing well, and three schools have been established by the Malays for the instruction of their countrymen in the English language. Schools are also established at Tavoy, Moulmien and Rangoon. At the latter place, the head master is a Chinaman, who has been brought up in the Anglo-Chinese col. lege at Malacca.
VII. When acquired by the British government, the whole revenue of the settlement was but 20,000 dollars; its revenue accounts are now incorporated with those of the other settlement (vide Penang).
VIII. Malacca, heing situate between the two great emporiuuns of trade in the castern archipelago, Penang and Singapore, the one at the north-west, and the other at the south east of the straits, has necessarily a trade limited to its own consumption and produce. Before the establishment of the two latter named settlements, and during the monopolizing sway of the Dutch there, it was a place of considerable traflic.
Tin forms one of the principal items of export, and as the free trade captains may perhaps enter into the trade, it may be well to caution them of the adulterations practised by the Chinese and Malay miners. Lead is the metal usually alloyed with tin, and in order to detect adulterations, buyers may readily ascertain (with sufficient approximation to correctness) the extent of fraud endeavoured to be practised
hy melting a standard muster of pure tin in a large sized bullet mould with a small orifice, and then compare a mould of the tin under examination, with thnt of the pure metal; if the former be heavier, the proportion of adulteration may readily be calculated. Antimony has the effect of kardening the admixture with lead, thereby increasing the difficulty of detection, as regards external appearances.
The total value of imports in 1828-29, was sicca rupees $10,81,782$; of exports, sicca rupees $6,72,211$. The importa of specie amounted to sicca rupecs 4,19,717; and the exports amounted to sicca rupees $2,65,239$. The value of imports from Calcutta, is sicca rupees $1,12,565$; from Madras, $2,43,178$; from England, 1,01,664; and from small native ports, 2,98,591.
The accounts, however, of this government, as stated by Mr. Fullerton, are extremely defective.
IX. Throughout the Straits of Malacca, the common weights are the pecul, catty, and tael. The Malay pecul, three of which make a bahar, is heavier than the common or Chinese pecul, which is $=133 \frac{1}{2}$ lbs. Rice and salt are usually sold by the coyan of forty peculs nearly, and gold dust by the Bunkal = 832 grs. troy. The gantang (hy which grain, fruit and liquids are sold) $=1 \frac{1}{4}$ English gallon, is divided into two bamboos. Twenty gantangs of rice make a bag, and forty bags a coyan. Cloth is measured by the astah or covid of eightcen inches nearly. Land, by the orlong of twenty jumbas $=1 \frac{1}{3}$ acre.

The currency of the straits is Spanish doliars divided into 100 cents. The Dutch rix dollar and guilder (divided into fanams and doits) are also used, chiefly at Malacca. One guilder $=12$ fanams $=120$ doits. The rix dollar is a nominal coin of about 20 farams, 31 or 32 of which make a Spanish dollar. The silver coins comprise dollars of all descriptions, guilders and halfguiders. The copper, the cent, half and quartercent; there are also doits, stivers, and wangs, including a great variety of copper coins, of different countries.
X. Natural Praductions.-The staple of the settlement is tin mines (which are all within a circuit of 25 miles round Malacca), which produce, generally 4,000 peculs (a pecul is 133 pounds avoirdupois) a year. In the vallies vegetation is extremely luxuriant : rice yiclds from 200 to 300 fold; the sugur cane is cqual to any produced in any part of the globe; coffee, cotton, indigo, chocolate, pepper, and spices, have all
been tried, and thrive remarkably well. The spontaneous productions of the soil are very numerous, consisting of an almost endless variety of the richest and most delicious fruits and vegetables. The country is covered with very fine and durable timber for ships and house building; the Murbon tree, which is nearly equal to teak, is extremely abundant. Canes and rattans form a considerable branch of the exports; the forests yield gums, resins, and oils in great plenty; the camphor tree grows near the south-east extremity of the peninsula ; a great varicty of medicinal plants and drugs are common in the woods; the nutineg grows wild. If the gold and tin mines in the vicinity of Malacca were scientitically worked, they would prove of great value; at present, the Malay and Chinese miners seldom dig below six or ten feet, and
as the veins become thin, remove from place to place. The gold from Hoolo Pahang, 100 miles inland from Malacca, is of the purest quality ; and there are some small mines of gold at the foot of Mount Ophir, called Battang Moring, about 36 miles from Malacca.

Bird's nests, wax, cutch, dammeer, fish maws, and sharks' fins (for Chinese soups) rattans, camphor, hetelnuts, gold dust, sago, dragon's blood, ivory, hides, aguilla and sappan woods, \&c., are among the principal productions. Captains of ships will he glad to henr that fruit and vegetables of every variety are abundant and low priced, and that poultry, hogs, buffaloes, and fish are plentiful and cheap. During the progress of the expedition against Java in 1811, 30,000 troops, with their followers were abundantly supplied with fresh provisions of every variety daily.

CHAPTER IV.-SINGAPORE (SINGHAPURA.)
I. This rapidly rising emporium of trade, is situate on the southern extremity of the peninsula of Malacca just described, in latitude 1. 17. 22. north; longitude, 103.51.45. east, (this is the position of the town) ; of an elliptical form, about trom 25 to 27 miles in its greatest length from east to west ; to 15 miles in its greatest breadth from north to south; and containing an estimated area of 270 square miles, with about 50 small desert isles within 10 miles around it, in the adjacent straits, whose area is about 60 miles; the whole settlement embracing a maritime and insular dominion of about 100 miles in circumference.
II. The Malay annals relate that in A. D. l252, Sri Iscandar Shah, the last Malay prince of Singapore, being hard pressed by the king of Majopahit, in Java, returned to the main land, where he founded the city of Malacca. That the Dutch or Portuguese may have settled on the island is probable, from the remains of religious buildings and other structures, which indicate its having been once thickly inhabited. On the design of Sir Stamford Raffles, the settlement of Singapore was first formed in February 1818, and its sovereignty in its present extent was confirmed to Great Britain in 1825, by a convention with the King of Holland and the Malay Princes of Jehore. There is, 1 believe, a pension of 24,000 Spanish dollars a year paid by the East India Company to this Rajah, as an equivalent for the cession.
1II. The island is on the north separated from the main land of the Malayan peninsula, by a very small strait, which in its narrowest part is not more than one quarter of a mile wide. On the front, and distant about nine miles, is an extensive chain of almost desert isles, the channel between which and Singapore, is the grand route of commerce between cast and west Asia. The aspect is low and level, with an extensive chain of saline and fresh water marshes, in several parts covered with lofty timber and luxuriant vegetation : here and there, low rounded sand hills interspersed with spots of level ground, formed ot a ferruginous clay with a sandy substratum.

The town stands on the south coast, on a point of
land near the west end of a bay where there is a salt creek or river navigable for lighters nearly a mile from the sea; on the east side of the town is a deep inlet for the shelter of native boats. The town con. sists generally of stone houses of two story high, but in the suburlis called Campong.glam, Campong. Malacca, and Campong-China, bamboo huts are erected on posts, most of them standing in the stagnant water. On the east side of the harbour enterprising British merchants are erecting substantial and orna. mental houses fronting the sea, presenting a strange contrast to the wretched tenements of the Malays. The ground is generally raised three feet, and the mansions have a superb entrance by an ascent of granite stairs, then an elegant portico supported by magnificent Grecian columns of every order of arehitce. ture: the rooms are lofty, with Venetian windows down to the floor, and furnished in a luxuriant manner; each tenement provided with its baths, billiard tables, \&c., while the grounds are tastily laid out with shrubs of beautiful foliage, the tout ensemble affording a most picturesque prospect from the shipping in the roadstead.
IV. The principal rock is red sandstone, which changes in some parts to a breccia or conglomerate, containing large fragments and crystals of quartz. The whole contiguous group of isles, about 30 in number, as well as Singapore, are apparently of a submarine origin, and their evulsion probably of no very distant date.
V. Notwithstanding its lowness, marshiness, intertropical position and consequent high temperature, with a rapid and constant evaporation by a nearly vertical sun, from a rank and luxuriant vegetation, and a profusion of animal and vegetable matter in every stage of putrefaction, Singapore has hitherto proved exceedingly healthy, owing perhaps to its maritime position. Being so near the cquator, there is of course little variety of seasons, neither summer nor winter: Fahrenheit ranges from 71 to 89 deg.; the periodical rains are brief, indistinctly marked, and extending over about 150 days of the year.

| Total | 746 | 590 | 1336 | Grand Total | 13432 | 1232 | 17664 |

When taken possession of by our establishment in the shopkcepers and most valuable part of the citizens 1820, it had been inhabited for eight years by about one hundred and fifty Malays, half fishermen and half pirates. Within the brief space of time from 1820 to 1832, its population has thus rapidly increased (we have no correct data previous to the end of 1823).

[^13] are Chinese, nearly 5,000 of whom arrive annually from China by the yearly trading junks, about 1,000 of whom remain at Singapore, and the remainder disperse themselves over the neighbouring islands. The Malays are chiefly fishermen, and the natives of the Coromandel coast boat-men.

Socicty is divided as at the l'residencies, into fourois. tinct castes-1st. The civilians of the Company. 2 d . The military. 3d. First class merchants. 4th. Second class merchants, shopkeepers, \&c.; and, as in all small communitics, they are exclusive in their coterics.
VII. There is an American missionary and two Roman Catholic priests in the island, but as yet no house of worship. A Romish chapel is in progress, and near its completion. The humbler classes are uneducated, but honest and faithful to their employers.
VIII. No accounts of the trade of the island were kept prior to 1824 ; since then the value of the imports and exports have been as follows:

| Ycar. | lmports. | Exports. | Both. |
| :---: | :---: | :---: | :---: |
|  | £. | $£$. | $£$. |
| 1824 | 1455509 | 1390268 | 2845777 |
| 1825 | 1323917 | 1228786 | 2552703 |
| 1826 | 1361978 | 1388306 | 2750284 |
| 1827 | 1488599 | 1387201 | 2875800 |
| 1828 | 1961120 | 1804660 | 3765780 |
| 1829 | 2121559 | 1876250 | 3997809 |
| 1830 | 1875350 | 1826634 | 3701984 |
| 1831 | 1780994 | 1565157 | 3346151 |

The account of its trade with different countries will be scen by the following return of the comparative statement of the trade of Singapore (imports and exports) with the different countries in 1830-31 and 1831-32, \&c.

Comparative Statement of the Imports and Exports of

Native Cruft.--Stutement of the momber nad tonmage of native versels, prahas, and junks, which have imported into and expotted from Singapore during the olficial yeur 1s33:t-3.1:-

Imporls.-China, 27 vessela, $4,6,12$ tons; Cochin China and Camboja, 49, 3,010; Siam, 2.1, 3,7!2;

East side of the Peninsula. 72, 1,689; Borneo, 13 , 3,096; Celebes, 55, 1,345; Bally, 63, 1,566; Java, 72, 2,986; Sumatrn, 514, 3,744; Penang, 8, 420; Malacea, 60, 2,608; West side of the Peninsula, 46, 341 ; Rhio, 251, 3,613; Neighbour Islands, 220, 2,075.
Erports.-Chinn, 9 vessels, 1,447 tons; Coehin China and Camboja, 27, 1,966; Sinm, 17, 2,5:37; East side of the Peninsula, 76, 1,565 ; Bornco, 148 , 3,231 ; Celeles, $102,2,041$; Bally, 73, 2,043; Java, 44, 2,120; Sumatra, 397, 3,309; Penang, 5, 447 : Malacen, 68, 3,003; West side of the Peninsula, :3f, 250; Rhio, 264, 3,863; Neighbour Islands, 214 , 2,055.
Gold forms one of the most valuable imports of Singapore. The principal portion is from Pabang on the coast of the peninsula, and it is considered superior to the metal brought from other plaees. The various places whence this important product is shipped from Singapore will be seen by the returns for 1831 :-
From Ports on East const of Peninsula: Pahang, 4,28.; bunkals; Calantan, 300. From Borneo: Lambas, 1,508 ; Pontiana, li33; Soongai Rayoe, 417 Papes, 58; Bintoola, 20 ; Banjar, Rc. 32. Sumatra: Jambic, 10.1 ; Campar, 169. Celebes island, fifio other islands, 31. Totnl, 8,103 bunkals; or 4 . rattios, 3 bunkals ( $n$ cottie' is 1 lb . and $1-3 \mathrm{rd}$ avoirdupois). The greater part of this immense quantity is sent to Calcutta for opium, \&e.

As a commercial mart and key to the navigation of the seas in which it is situate, this settlement is of incalculable importance. We have seen by the foregoing that it has sprung up within the short space of ten or twelve yenrs from a tesert isle to a rieh and flourishing settlement, exporting anoually $3,000,000 \mathrm{~m}$. worth of gools. It has two periodical journals well conducted; its inluabitants are imbued with a manly and independent spirit, and its trade is as yet lut in its infancy.
IX. Notural Iruturtions.-From the forgoing degeription, it will he seen that the island can as yet have few indigenous productions; it is, in fact, a commer. cial emporium, and probably will never be much more. Its chief staple is the agaragar of the Malays (furus succherinus), a plant like tera, which abounds on the coral shoals around singapore, and produces in China from six to eight dollars per pecol, in its dry halky state. By the Chinese it is converted into glue, paint, \&c, Ne. for glazing their cottons, nad sacrifice panct: the finest portion is mude into a rich jolly, whieh makes a delicions swectmeat when preserved in sytup. The hurvest of this sen-weed is from 6,000 to 12,000 peculs mimuilly.
There are about 10 sago manufactorics at Singapos, giving employment to 200 Chinese manafatures: the quantity of pearl sage exported from the island during $1 \times 34$ was-to lingland, pecols 17,030; Calcutta, 1,700; Bombay, 970; Chiua, 300; Cape, 150;
 -total, $2: 3,100$ pecols. 'The sage is wat grown in the ishand, but brought in its rough state from Hormo,㫮

## BOOK V.-POSSESSIONS IN AUSTRAL-ASIA.

CHAPTER I -NEW SOUTH WALES.

Section. I. The vast island of New Holland, which whs discovered in the fifteenth century (see "Colonial Library," vol. 11.), may be said to extend hetween the parallels of 39 . and 10 . S. Intitude, and the ineridians of 112 . and 153. E. longitude, with a wilth from L. to W. of 3,000 miles; a breath from N . to S. of 2,000 miles, a superficial area of more than $3,000,000$ square miles, and a coast line of 8,000 miles, connecting Terra Australis with the navigation of the vast Pacific and Intian Oceans. The proportions assigned by Capt, Du Frecinet to the principai tivisions of the globe are-

French leagues.

II. In shmpe it is nn irregulnr oval, or it may be compared to $n$ horse-shoe; and, so far as we know, appears bounded, for the most part, by a ridge of stcep mountains, of greater or less elevation, which extend around the coast, varying in distance from the shore, sometimes approaching within 30 ailes of the occan, at other times extending back to domble and perhaps treble that distance. The country behind this rauge is, with the exception of the New South Wales territory and a part of the S. E. const, a perfect terra incognita; and, from what has been observed on the S . E. shore, it may be inferred that it is a vast level plain; it is more matural, however, to suppose that the country consists of extensive steppes or terraces as in Sonth Africa. [The topography, so far as it has been ascertained, will be found in my "Colominl Library."]
On the return of Captain Cook from his voyage in the $S$. hemisphere, and discovery of that part of the coast of New Holland named New Sonth Wales, it was resolved to form a penal settlement at Botany Bay, with the following objects:-1st. To rid the muther country of the yenty inereasing number of prisoners, who were necumulating in the gaols. 2nd. To afturd a proper place tor the safe custody and punishment of the criminmes, as well as for their progressive nad ultimate retormation ; and, 3 rel, to form a free colony out of the materinls which the reformed prisoners would supply, in nddition to families of free cmigrants whomipht settic in the comntry from time to time. With these laulable objects in view, II sail of ships, consisting of a frigate (the Sirius), an armed tender, thrce store ships, and six transports, assembled ut Portsmonth, in March, 1787, haviug on buard 565 male, and !!92 timnle conviets, with a guard consisting of $n$ minhor-commandant, three captnins, 12 subaiterns, ef bin-eommiszioned officers, mud 168 privates, all of the Royni Marhes, together with 40 of the marines' wives and thoir chidrens. Captain Artbur Philip, R.N., an expericneed ofticer, was up. pointel Governor of the new colony. The small fleet,
with two years' provisions on hoard, sailed from the Mother-bank, on the 13th of May, 1787; touched for supplics and stock at Teneriffe, Rio de Janeiro, and the Cape of Good Hope; and arrived at their destination (Botany Bay) on the 18th, 19th, and 20th of January, 1788, after a voyage of upwards of cight months, of which four weeks were spent at the Cape. Captain Philip soon found that the descriptions which had been sent home of Botany Bay had been too flattering; in the first place, the bay was open to the full sweep of the E. winds, which rolled a tremendous sca on the beach; and, in the second, the land, though delightful for botonizing, was a series of swamps and sterile sand, without water. Little suspecting that one of the finest harbours in the world was within a few miles' distance to the northward, Captain Philip procecded, with three hoats and some of his officers, to examine what Captain Cook had termed Broken Bay, where the Hnwkesbury disembogues; but while proceeding thither, he resolved to examine an inlet, which, in Cook's chart, was marked as a boat harbour, but appmently so small as not to be worth investignting; Cook had, therefore, passed to the northward, and given the inlet the name of Port $J$ tre\%sem , which was that of the seaman at the masthead, who tirst descried it while on the look out. Cuptain lhilip entered between the lofty headlands to examine this " boat harbour," and his nstonishment may be more easily conceived than described, when he found, not a boat creek, but one of the safest havens in the workl, where the whole of the British navy might sccurely ride at anchor. It is navignble for vessels of nny burthen, 15 miles from its entrance, and indented with numerous coves, slieltered from every wind, and with the finest anchorage. Thither the fleet was immedintely removed; and the 13ritish ensign, on the 2fith Janmary, 1788, was hoisted on the shores of Sydney Cove, then thinly wooded, and abounding in kangaroos, but now the infant capital of nu embryo empire. The silence and solitude of the forest were soon broken in upon by the resounding stroke of the wondman's axe; the ground was clenred, tents pitched, the live stock lauded, stores deposited, nud the little colony established, the number of individuals amounting to 1,030 , which, within half $n$ century, has been nugmented to 100,000 souls. Great difficultics were experienced for severnl yenrs, which nothing but the most extraordinary persevernnce, nided by that inorul mad physicul courage which Britons possess in so eminent a degree, eould have sormoruted. [The history of the settlement will be found in my "Colonial Library."]

The progress of the colony may be thus summarily stnted, in chrmologient order:-1789, one year after the estahlislment of the colony, first harvist reaped (at Paramatta) ; 1790, first settler (a eonivict) took possession of the land allutted hin ; 1791, first briek building thished: 1793, first purchuse of colonial grain (1,200 bushels) by goverument; 1794, first
church built ; 1796, first play performed; 1800, first copper coin circulated; 1803, first newspaper printed; 1804, Fort William built; 1805, first vessel built; 1810, first census, free school, toll-gates, police, naming of the streets, establishment of Sydney market, races and race ball; 1811, first pounds; 1813, first fair ; 1815, first steam-engine; 1817, supreme court established and first bank; 1818, benevolent society formed; 1819, orphan institution founded; 1820, first spirits distilled, and first colonial tobacco sold; 1821, first Wesleyan and Roman Catholic chapels built; 1822, freedom of the press granted, and first agricultural and reading societies formed; 1824, charter of justice granted, legislative council appointed, and first court of quarter sessions held ; 1825, first criminal jury impannelled, first archdeacon ordained, first coroner appointed, and first constitutional county meeting held; 1827, first daily newspaper eatablished; 1829, first circuit court opened ; 1830, first civil jury impannelled, and first college founded; 1831, first colonial steam-boat launched; 1832, first savings' bank instituted; 1833, mechanics' school of arts formed, and a monthly magazine establiahed; 1834 land sold in Sydney at 20,000l. per acre!

List of Gorernors of the Colony of New South Wales siuce its foundation:-Capt. Arthur Philip, R. N., from 26th January, 1788, to 10th December, 1792 ; Capt. Francis Grose (Lieut.-Gov.), 11th December, 1792, to 14th December, 1794; Capt. Paterson, N. S. W. C. (Lieut.-Gov.), 15 th December, 1794, to fith Auguat, 1795 ; Capt. Hunter, R. N., 7th August, 1795 , to 27 th September, 1800 ; Capt. P. G. King, R. N., 28th September, 1800, to 12 th August, 1806 ; Capt. William Bligh, R. N., 18th August, 1806, to his suspension on 26th January, 1808. During Gov. Bligh's suspension the government was succesaively administered by Lieut.-Col. Johnstone, Lieut.-Col. Foveaux, Col. William Patterson, N.S. W. Corps, 26th Janunry, 1808, to 28th December, 1809. MajorGen. Lachlan Macquarie, 1st January, 1810, to 1 st December, 1821 ; Major-Gen. Sir T. Brishane, K.C.B., 1 st December, 1821, to 30th November, 1825 ; Col. Stewart, 3d regt. (Licut.-Gov.), 1st December, 1825, to 18 th December, 1825 ; Licut.-Gen. Ralph Darling, 19th December, 1825, to 21st October, 1831; Col. Lindesay, C. B. (Licut.-Gov.), 22d October, 1831, to 2d Decenber, 1831 ; Major-Gen. Richard Bourke, C. B., 3rd December, 1831 ; Sir G. Gipps, 1837.
11. The general fentures of the New Sonth Wnles territory consists of alternate hills, vallies, mountains, and plains; the sea coast has a range of loity and stecp hills (clevation 3,000 to 4,000 feet) rumning nearly parallel with the const, at $n$ distance of from 40 to 50 miles, and cnlled the Bhue Monntains; the Intervening space being an undulating phin, intersected by several rivers which have their rise in the elevations just mentioned; beyond which, a considerable extent of table land stretches in every direction, gradually sinking townrds the interior.

The territory is divided into 19 counties, nud the geography of each will be found in my Colonial Library.

The l3ritish settlement on the E. shore of Ncw Holland, called New South Wules, has its boundary imperfectly defined: it may he said, however, to extend coastwise between the purallels of 36 mod 28 S . Int., or nhout 500 miles along the sen shore; while the grentest distance yet acttled inland cenn scarcely be sald to extend more than 200 miles. The portion within which land may be selected, was fixed by a

Government order, dated Sydney, October, 1829, and comprised 34,505 square miles, or 22,083,200 acres; the boundaries being, on the east, the sea coast from the mouth of the Murroo River (S. of Bateman's Bay), in 36 degrees to the mouth of the Manning River in 32 degrees; on the the north, the river Manning from the sen coast westward to a range of mountains, including all streams, vallies, and ravines which descend to the rivers Goulbourn and Hunter ; on the west, a line ncarly along the meridian of 148 W . long. ; and, on the south, from Mount Murray, in the latitude of Bateman's Bay, to the Murroo River, in 36 S. latitude.

Sydney, the capital of New South Wales, is situate nearly equidistant from the extreme northern and southern extremities of the county of Cumberland; it is built partly in a narrow ravine or valley, and partly on the side of a gentle slope extending upwarls from the ahores of one of the coves of Port Jackson, and called Sydney Cove on the first founding of the colony. The strcets are long (some one mile), wide, and quite English in their appearance; the houses are generally lofty and well constructed, interspersed with cottages fronted by small neat gardens, which in some quarters of the town are attached to every house.

The houses rise in successive terraces, giving variety to the scenc, and conveying by their neatness and elegance the idea of a prosperous community. The shops are frequently laid out with great taste-they are not, as in America, 'stores' where every article may be bought under the same roof, but cach trade or business has its own distinct warehouse. House rent is high at Sydney, as may be inferred from the fact that buidding land has been recently sold in George Street at 20,000 l. per acre $I$ mind some ground is worth 50l. per foot! Several private establish. ments are of considerable size; auction rooms have been lately huilt by one individual at a cost of 5,000l, and Mr. R. Cooper has expended nearly 20,0006 , on his distillery. The firm of Messrs. Daniel Cooper and Levy have expended even large sums in erecting steam-engines, mills, \&c.; and Mr. Barnet Levy has built an excellent Theatre on speculation. The hotels and inns are numerous nud excellent.

The situation of Sydney adapts it for the capital of a commercial empire. Port Jackson is one of the finest harbours in the world; its entrance is three quarters of a mile wide, it afterwurds expands into a capacious basin, 15 m 'les long, irt some places three wide, and navigable for ships of any burthen at the distance of 15 miles from its entranee-i, e. seven miles above Sydncy, up the Paramatta liver, and which for 12 miles further enn scareely be considered more than an nrin of the sen. Ships come up close to the wharfa and stores at Sydney, and the cargoes are hoisted from a ship's hold into the ware-rooms, The town is about three miles in length, with trothirds of its cireuit environed by the navigable coves of l'ort Jackson.

A the lighthouse was erceted on the loity S. heal of l'ort Jackson, by Gen. Maequaric ; it is in lat. 33.51. 40. S., Long. 151. 16. 50. l., ; the tower is admirably built; the height of the light (a revoling one) trom the liase being 76 feet, nnd above the sa 277 leet,-total 353. The inner's. hend bears from the lighthonse N. by W. ${ }^{3}$ W. distant a mile and a quarter. The outer $N$. hend bears from it $N$, by L two miles. The inner $S$. and outer $N$. heads lie $S$. Norfolk Island, in lat. 29.1. S. long. 168.10. E., contains about 11,000 acres of land, generally a rich hown mould. It is extremely beautiful, atrording a fine tropical seenery and a hill and dale country. In 1791, it was colonized by the Governor of New South Wales, for the purpose of growing supplies for the colony. It is now used as a prison for the most depraved male convicts, who are banished thither from New South Wales to work in chains for life.
IV. The line of coast throughout the territory of Xew South Wales, presents in general an aspeet of bold perpendicular cliffs of sandstone, lying in horizontal strata. The cliffs are occasionally interrupted by sandy heaches, behind which the country is low and flat, the high land retiring to a considerable dis tance.
The strata of sandstone consists of beds lying one upon the other in the most regular manner, so that their original relative situation has evidently never undergone any change. This sandstone is principally siliceous; sometimes indeed it is argillaceous, and in this state it is generally found over coal, in which situation it is soft and very decomposable.
Among the coal measures, are occasionally met with thin beds of what may be called calcareous sandstone. In fact the E. coast of Australia, from Bass's Straits to 19. S. Lat., presents ranges of moun-
tains rising parallel with the coast, and consisting, with few exceptions, of vast conglomerations of sandstone. Mr. Berry asserts, that there is no granite to be round in masses near the coast, for an extent of 1,200 geographical miles. At the 19th parallel, a ehain of lofty granitic or primitive mountains appears, of various elevations, forming the barrier towards the ocean for about 300 geographical miles, or to the prarallel of 14 S . latitude. Here the sandstone again predominates, the land gradually dipping titl it loses itself in the sea to the $N$. when coral reefs extend as far as the eye can reach. An unbroken reef of coral extends 350 miles in length on the E. coast of New Holland; and Captain King found the coral formations to extend through a distance of 700 miles, interrupted by no intervals excceding 30 miles in length. [For further details see Colonial Library, Vol. II.]
V. The sensons of New South Wales are the opposite of those in England-January being the middle of Summer, and July of Winter. The Summer extends from the 1st of November to the 1st of March; the Spring and Autumn are brief, but well dehined: the Winter of a bracing coolness, with occasional frosts at Sydney, and snow in the interior. The Spring months are September, October, and November; the Summer, December, January, and February; Autumn, March, April, and May; Winter, June, July, and August. March, April, and August are generally considered the rainy months. The average temperature of Spring is 65.5., of Summer 72., of Autumn 66., and of Winter 55. The barometrical pressure, is about 29.94319 inches, and the average of the thermometer 64 F .

Meteorological Register for Sydney.

[^14]In Sydney, the thermometer is rarely below 40; in Paramatix, it is frequently down to 27. in winter. Of course, as the land rises above the level of the ocean, a difference of temperature is felt ; the winter at Bathurst, where the lnxury of snow is in its season enjoyed, being much colder than on the aea shore; while the difference of lat. between, for instance, Sydney in 34., and the parallel of Moreton Bay in that of 28., is considerable. In fuct, every varicty of climate may be obtained; that of Sydney may be in some measure judged of by the foregoing meteorological table.
During the summer months, a regular sea breeze aets in daily, and refreshes much the inhabitants along the coast, who besides are not so much exposed to the hot winds as those residing in the interior. These winds have never yet been satisfactorily accounted for. They blow from the N. W. three or four times every aummer, like a strong current of air from a heated furnace, raising the thermometer to 100 F . in the shade, and 125 when exposed to their influence. They seldom last more than a few days, and are cleared off by a thunder storm.

The salubrity of New South Walcs is proverbial ; of a community of 1,200 persons, only five or six have been known to be sick at a time, and at some of the military stations, seven years have elapsed without the loss of a man.

Although New South Wrales is not subject to the periodical showers of the tropies, a large quantity of rain falls throughout the year; hitherto the colony has been visited by a drought ahout every 12 years; the last one continuing from 1826 to $18^{\circ} 29$, during which period, little or no rain fell, in the county of Cumberland in particular. It is, however, more than probable, that as the country becomes cleared and cultivated, such lamentable visitations will be less frequent.

The prevailing directions of the winda at Sydne are thus indicated :-

VI. The British colony, when established at Sydney Cove, on the shores of Port Jackson, 26th January 1788, consisted of only 1,030 individuals, of whom upwards of 700 were convicts. Emigration was for many years studiously discouraged by some of the authorities, notwithstanding which, owing to the number of conviets sent out, and the fineness of the climate, the population rapidly increased. Four censuses have been taken, and the augmentation since 1788, is thus shown:-1788, 1,$030 ; 1810,8,293$; $1821,29,783$; 1828, 36,598; 1833, 71, 070.

These enumerations are considered very inaccurate by those who know the colony well, especially that of 1828, when the settlers were apprehensive of the establishment of a poll tax ; that of 1833 , is thus given for cach county, as also for the principal towns in the colony :-

| 1835 | 231 | 1 | 442 | 97 |
| 1836 | 168 | 4 | - | - |
| 1837 |  |  |  |  |

On the 1st August, 1833, the punishment of death ceased for cattle stcaling, and stealing in a dwellinghouse above 5l., and forgery, by Acts of Parliament 2 \& 3, Gul. IV, caps. 63 and 123. A great portion of such offences thereafter, were tricd by the Courts of Quarter Session. At the close of May sessions, 1836, 155 prisoners remained in gaol for trial.
Return of the number of civil cases fixed in the Supreme Court of New South Wales during 1836. [B. B.] Before Juries; Common, 9, Special, 14. Before two Magistrates assessora; undefended cases, 177, defended cases, 98, total, 298.

Return of the number of prisoners sentenced to transportation from the colony of New South Wales, by the Supreme Court, Courts of Quarter Sessions, and Police Courts.

| 灾 | Supreme Court. | Quarter <br> Sessions. | Police Courts. | Total. |
| :---: | :---: | :---: | :---: | :---: |
| 1831 | 140 | 30 | 245 | 415 |
| 1832 | 157 | 6 | 99 | 262 |
| 1833 | 149 | 38 | - | 187 |
| 1834 | 168 | 146 | - | 314 |
| 1835 | 168 | 266 | - | 434 |
| 1836 | 31 | 61 | - | 92 |
| 1837 |  |  |  |  |

In October 1832, the power to transport was withdrawn from the Magistrates in summary jurisdiction, by the Act of Council, 3 Gul. IV. No. 3.

Many cases are now adjudged by the Petty Sessions, that heretofore were decided by the Superior Courts only.

This return includes prisoners whose gentence of death has been commuted by the Governor and Executive Council, to transportation. On 6th July, 1836, tenders were called for in the Official Gazette, for the conveyance of 120 persons to Norfolk Island.

As the state of crime in our penal settlements is deserving of the most serious attention, I have given every public document under ais section which would convey information on the subject.

grounds of his disapprobation. If a majority of the members dissent from any bill, and enter the grounds oftheirdissent on the minutes of council, the bill cannot become law. Every bill passed by the council must be transmitted within seven days to the supreme court to be enrolled, and aiter 14 days from the date of such enrolment, it comes into operation. If the judges represent that such bill is repugnant to statutes or other public deeds before cited, it is again brought under the consideration of the councl, and if arain passed, procects into operation, until the pleasure of his Majesty be known, to whom are transmitted the opinions of the judges, \&c. The votes and procecelings of the Legislative Council are officially puhbished in the newspapers. The Governor and Council have the power to impose tases for local purposes. By 3rd Gco. IV., c. 96, continned by 9th Geo. IN., c 83, s. 26, the Governor is anthurized to impose, on importation into the colony, duties not exceeding 10s. per galton on British or West India spirits, and $15 s$. on all other spirits : not excceding ts. per Ib. on tobacco, nor 15 s . per cent. upon goods, wares, \&c., not being the growth, produce, or manufacture of the United Kingdom; ant, by 9th Geo. 13., c 83, s. 26, the Governor is also empowered to levy a duty upon colonial spirits, not exceeding that levied on imported spirits.
Lan's and Courts.-The statute laws of England are in force in the colony, aided by Acts of Parliament, and local enactments by the Governor and Legislative Council : and an Insolvent Debtor's Act is in operation, the benetit of which may be obtained by a defendant a second or third time, if he pay 1.5 s. in the pound (any public olficer taking advantage of the provisions of the Insolvent. Act, is, by an order of the Secretary of State dismissed the service). The execution of the laws devolves umon a Supreme Court, presided over by a chief and two puisne judges, whose powers are as extensive as those of the Courts of King's Bench, Common Pleas, and Exchequer, at Westminster. The Supreme Court is a court of oger and terminer and gaol telivery, it is also a court of equity, with all the power, within its jurisdiction, of the Lord High Chancellor of England; and it is a court of admirulty for criminal oflences, within certain limits; it is empowered to grant letters of administration, and it is an insolvent delotor's court. From the Supreme Court an appeal lics in all actions, when the sum or matter at issue exeects the value of 5001 , to the Governor or Acting-Governor, who is directed to hohd a conrt of appeals, from which n final appeal lies to the King in Council. The Supreme Court is provided with an Attorney and Soli-citor-general. There are nine barristers, and 33 solicitors practising in the court. The sheriff xercises by his depoties the duties of his office over the whoke territory, Circuit courts are held in diblerent parts of the colony; they are courts of recort, and stand in the snme relation to the Supreme Court as courts of myer and terminer, and of nssize and misi prius, in E'ogland to to the King's superior courts of recond at Westminster,
Courts of General and Quarter sessions, have the same powers as those of Cughad, mad also may the cognizance, in a summary way, of all crimes not puni hable by death, committed by convicts whose sentences have not expired, or bave not been remitted,

A Vice-Actmirnlty Court, presided over by the Phicf Justice of the Supreme Court, tahes cognimance of civil cases only, ;uch as semmen's wages, \&e.

There is an Archicacon's Court for clerical matters; but this court has no jurisdiction in testamentary affairs, the charter of justice having empowered the Supreme Court to grant letters of administration, and direct the distribution of testator's effects. Courts of Requests have heen established onder autbority 9 Geo. IV.e. $\times 3$, for summarily determining claims not excceding 10t. sterling, except the matter in question relates to the title of any lands, tenements, or hereditaments, or to the taking or demanding of any duty payahic to His Majesty, or to any fec of oflice, annual rents, or other such matter, where rights in future wond be bound, or to a gencral right or duty, and to award costs. The decision of the court is final and summary, as in lingland. One Commissioner, appointed by the Crown, presides in all the Courts of Requests throughout the colony. .luries now sit in civil and criminal cases; until lately, military and naval ollieers formed the eriminal jury; and civil canses were determined by a judge ant two sworn assessors. Law suits ate frefuent in New South Wales, and large fortunes have been made by baristers and solicitors. In the year 1831, the mmber of the mopaid magistracy throughont the territory was 136 .

Potice.-This important branch of civil life is well managed in New South Wales. There are Benches of stipentiary as well as unpaid magistrates in Sydney, and at the primipal towns throughout the colony, airled by head constables, and a civil and military police force at each station.

It should he olserved, that a large part of the military force is required to guard the prisoners ; and troops are seasoned in N. S. Wales for Indian service.

Military I'asts and Horks--There are no military posts in any part of the colony ol New South Wales; and there are only three military works, viz. Fort Macquaric, Dawes' Battery, and Fort Philip. The two former are situated on two points of land in the harbour of Port Jackson, forming the entrance to Sydney Cove, and were erected for the security of the shipping. The Battery and Fort Philip is situatrd on an eminence crowning the isthmus or neck on fond, Which is washed by the waters of Sydney Cove ot the enst, and of Darling harbour on the west side.

Fort Merequarip.-Fort Macpuaric is a spuare, the length of each face being la3 feet. It is bally eonstructed with masonry, on a low site; the hase of the rampart is washed by the sea at high tide. The work is piesed for 11 gans and 4 en barbette; 10 twenty-four-pounters mud 5 six-pounters are mounted. At ench of the angles is a small circular hastion, in which one of the twonty form pomelers i s placed en harhette. There is a tower of two stories in the eentre of the land fince 99 leet in cireumference, with a magazine beneath cmpable of containing 350 barrels. The tower is appropriated as a store and goard room, nod through which the fort is entered by a permanent bridge over a dry ditch. At each extremity of the counterscurp, there is a smaller tower; but, in common with the large one they are not intended for may military ollensive parpose. The platform on the battery is at at elevation of 22 feet ahove the level of the rem.

Dowes' Buttory.-Dawes battery is a curvel theche, the length romal the crest of the parapet benng 120 feet. The ibterior slope is two leet high, and retained by a stone wall. The remander of the parapet is formed of enth. It contains 15 guns, viz. it sixpounders and 12 twolve-pounds. The whole ol them are en bubette. The plation of the batery is at an elevation ol thl lent nbove the kevel ut the sen.

Fort Philip.-This fort is in an unfinished state, although commenced in 1804 by Governor King, the faces of the salient angle only being carried up in cut stone-work to the level of the platform, 11 feet 8 inches in height. It is in the form of a pentagon, the length of the sides heing 100 fect, and appears to have been intended to mount four guns in each face. The thickness of the platform is 18 feet 6 inches, and the parapet (which is not raised) 13 feet 6 inches; in all, 32 feet. The situation commands the whole of the town of Sydney, its cove and Darling harbour; the north face looks into Dawes' battery, at about

400 yards distance ; the cast into Fort Macquarie, at about 800 yards. In its present unfinished state, it is of no use whatever as a military work, and is now only used as a telegraph station. There is a maga, zine, bomb proof, immediately under the wall, capable of containing 200 barrels of gunpowder. The elevation is 241 fect above the level of the sea. These works are under the controul of the Master-general and Board of Ordnance. There has been an ordnance establishment in New South Wales since 31st Jan 1836, the expense of which is defrayed out of the military chest.

Return of Mounted Police on 31.st December, 1836. [B. B.]-Seven officers, 8 sergeants, 16 corporals, 96 tronpers; total, 127.
Expenses of the above Corps in 1836.—Mounted orderlies to the 30 th June, $327 l$. (the mounted orderlies were transferred to mounted police from Ist July 1836) ; mounted police to the 30th June, 13,002i. Total, 13,3296 . Of this sum the prineipal items are -pay of men $1,842 l$., and forage for horses $9,281 \%$.
Xl. Since the colony was established in 178 N , a revenue has been derived from the importation of spirits, tobaceo and manufactures, Re. as also from lienses; as the population and commerce of the settlement increased, so did the revenue. The increase which has taken place in the Custom duties at Sydney is remarkable; they now amount to $100,000 l$.; in 182.2 they did not reach 10,000 ., the principal items being 5,081 gallons of spirits, at $12 s$. $6 d$. per gal. ; 3,854 gallons of ditto, $11 \mathrm{~s} .10 \%$. per ditto ; and 2,438 ditto, at 10 s .
The rate of duties levied is, on spirits distilled from grain the proluce of the colony, $3 s$. per gallon imperial measure (until 183.1 it was 2s. 6.t.), ditto British, West India, or North American, if imported from the United Kingdom, 7s. 91. 6--tenths (formerly 6s. 6id.) ; all other spirits, whether made within the colony or imported, 9s. 2il. 4-tenths (formerly ss. Cid.);
tobaceo, manufactursd, 2s. 6 . . per lb., uninanufactured, 1s. 6d. ditto; British manufactures free; all others goods 5 per cent. ad val. Register fees, if under 40 tons, $2 l$. each register; over 40 tons, $1 s$. per ton. Permits for the removal of spirits, $6 d$. each.

Licenses to distil spirituous liquors, 25l. per ann., to sell ditto, 251 . per annum. Goods sold by auction pas $1 \frac{1}{2}$ per cent. duty, and an auctioneer for his license, $2 l$. per annum. Butchers, earters and carts, boatmen and boats, and porters, are lieensed: dogs are taxed at $1 s$. for one, $5 s$, for two, $15 s$. for three, and $10 s$. for every additional dog. The number of auctioncers in the colony is 18 , of whom 10 are in Sydney.
Each head of cattle in Sydney, Paramatta and Liverpool must be examined by a publie inspector before it be slaughtered, for which a charge of $3 \boldsymbol{l}$. is paid. Quit rents are levied on land, at the following rateif granted prior to 5 th November 1823, $2 s$. per 100 aeres; prior to 18 th May $1825,15 \mathrm{~s}$. per ditto; suh. seguent to 1 sth May 1825,16 s. 8.1 . per 100 acres. lown allotments in Sydney 6 6 . per perch, at seaport towns, $5 d$. ; in towns at the head of navigable waters, td.; and in inland towns, $2 d$. There are also a variety of fees legal, territorial abd elerical.

miscellaneous, 205l.; total, 3,549 l.

The following shews the Land Revenue of New South Wales since the sale of Land commenced.

The progress of New South Wales in revenue is equally remarkable with the advance which the colony has made in other matters; the income derived from land in particular has heen very large. Two years of revenue and experditure are suhjoined, in order that a comparative view may be obtained of the financial situation of the colony.

The Pitt Row Gate, Parramatta, on the western roal to limu Ferry, 1837, Ior 195l.; 1838 for 445\%. ; increase 2;00. Bedlam Ferry, larramatta River, 1837, for 50l.; 18.3 s , for 301 .; tlecrease $20 /$ Ferry over the Nepenn nt Emu l'ains, 1837, 500l. 1838 , for $160 /$; decrease $34 \%$. Wiseman's Ferry over the Hnwkesbury, 1833 , for $95 l$. ; 1838, for $55 l$. ; decrease $40 \%$.

Merkets. - Sydncy Market Place, George-street, rentel for the ensuing year at 5101 ; 1837, at $537 /$. decrease $27 l$. Hay and Corn Markets, Brickfield Hill, 1837, at $127 \%$.; 1838 , at 9.5. Paramatta Market rented for 1837 at $1 \%$. $s$ s., was leased for the ensuing ar at $1-4.10 \mathrm{~s}$; increase 13 l .9 s .
XII. The commerce of New South Wales is become an olject of ereat consideration to the mother country, The maritime trade of the colony is now upwards of two million sterling per annmm; whereas, ten years ago, it amounted to little more than half a million. The largest portion of the trade is carried on with Great Britain; the extent for consecutive years will he seen in the following table. The imports are spirits, wines and beer, len, groceries and tohncco, salt provisions, cottons, linens, silks and woollens; the exports-wonl, timber, Hax, oil of all hinds, maize, hides, and ship stores.

Return of the principal Artictes Imported into New Sonth Wales slince the Year 1828.

Grain imported from 1828 to 1836 . [13. B.]

XIII. Previous to 1817, the circulating medium of the colony consisted principally of the private notes of merchants, traders, shopkeepers and publicans, the amount being sometimes so low as bith. To remedy the evils attendant on such a state of things, the-
Bank of New South Hales was in 1827 incorporated by a chatter under the seal of the colony, with a capital stock of 20,0001 . sterling, raised in shares of luol. each. The amount of slares subscribed was $12,600 l$., and notes were issued by the bank for $\geq s .64 .$, ts., $10 s ., 1 l$., and 51 . In the first year of its incorporation, the bills discounted by the bank amounted to only 12,193l.; in 1818 they rose to $81,672 l$.; in 1819 to 107,2566 ., demonstrating fully the necessity that existed for such an establishment, and the advantages that result from it. Interest was not uncommon at the rate of 10 per cent. per annum. The dividends declared in 1818 were at the rate of 12 per cent. ; for 1819,21 per cent. ; for 1820 and 1821 , 12 per cent.; and for 1822,15 per cent. The charter was granted for seven years, which was of course renewed. Each shmecholder is responsible for the
whole of the proceedings of the bank, thus giviw, greater stability to the institution, and seculing a more careful management of its transactions.
The Bank seldom alvances money upon real securitics of any description, nor does it grant cash credits, or allow any interest upon current acconuts, or permanent lodgments of cash. The tiominal capital of the Bank of New South Wales is ahout $150,00 \mathrm{il}$, civided into one thousand five hundred lool, share., The amount of eapital paid up is about 33,000 .
The aftairs of the institution are managed by a pre. sident and eleven directors, who are elected hy the shareholders from their own number, on account of their influence and respectability. Every 500 . paid up gives a vote.

Almost from its first establishment, it has yielled the shareholders a dividend of from 15 to 20 per cent; a rate of profit which, considering that its transactions are restricted to the discounting of three month,' bills, must be highly satisfactory to its sharehollers; and it is a remarkable faet, that the establishment has never sustaincd any actual losses through the nonpayment of the paper whieh it has discounted. L'p to the year 1824, the bank diseounted at the rate of $x$ per cent., atter which the rate of discount was increased to 10 per cent., at which it has cever since continued. The colonial government pays and receives in specie only; and in consequence of its receipts, from the cistoms, duties, sales, and leasts of laud, and other sourecs of revenue, having comsiderably exceeded the amount of its disbursements, it has from time to time gradually withdrawn from cirenlation nearly all the specie in the colony. In consequence of this and the remittances occasionally made of specie to Canton and other places with which a trade is earried on by the colonists, the hank of New South Wales, though far more than solvent, has more than once been under the necessity of suspending the payment of specic on demand. It is a a act highly creditalle to the bank and to the colonists in general, that owing to the last severe drought during the panic which occurred in 1826, and which continsud for three years with little intermisson, there wefe bills to the amount of $1 \times, 009$. over tae to the bails,
while the 22,0001.; so great, of the oul to pay a cent. Su lonists in ment, thay sioned any the inhab

while the whole capital did not at that time exceed 22,000.; the confidence of the public, however, was ${ }_{\text {so }} 0$ great, that by prudent management, not a sixpence of the over due bills was lost, and the bank continued to pay a dividend all the time of from 15 to 20 per ceat. Such, however, was the confidence of the colooists in the stability and integrity of the establish. meat, that in no case has such an occurrence oceasioaed any run upon the bank; but, on the contrary, the inhabitants, with one accord, poured into its
coffers all the specie they could collect, and by refraining from demanding it as much as possible, soon enabled the bank to resume cash payments, and to carry on its usual transactions.

The notes issued by this establishment amount to about $20,000 l$., dividet into $11 ., 2 l ., 5 l ., 10 l ., 20 l$. and 30l., the greater proportion being 1l. notes. Since the year 1826, when dollars and rupees were current, all the money business of New South Wales has been transacted in sterling, British coin only being used.

Statement of Affairs 30th June, 1836.

Dividend, 30th June 1836, 9 per cent.

The Bank of Austrulia was instituted in 1526 , with a capital of $220,000 l$., divided into several shares, of which $45,000 l$, is paid up. It is managed by a chairmaa, deputy-chairman, and eight directors, with the accessary assistants. Like the bank of New South Wales, it is one of issue and deposit; and its transactions are limited to discounting bills which have not more than three months to run. It aflords no facilities for remittances to Europe or elsewhere, nor does it makc any advances on real securities of any kiad.
The bank of Australia discounts from $10,000 l$. to 12,000l. weekly, at 10 per cent., which is the current rate of interest in New South Wales.

The establishment has been highly prosperous ever since its commencement, and has hitherto paid the shareholders an annual dividend of 12 to 15 per cent. upon the capital paid up. The notes issued by this bank are for $11.2 l .5 l .101 .20 l$. and $50 l$. ; its cireulation being about 25,000 l.

In the year 182f, a gang of thieves, having obtained access to its strong room from a drain which passed beneath it, robbed the bank of nearly $5,000 l$. in cash and notes, but a portion of this was recovered, and the actual loss sustained was not more perhaps than $2,000 l$. One fifth of the nett profits of this bank is reserved for a sinking fund or "rest."

Statement of affairs, 30th June, 1836.

Dividend, 8 per cent., with $2 \frac{1}{2}$ per cent. from the accumulating fund, making the dividend for the hnlf year $10 \frac{1}{2}$ per cent.
The flourishing state of these two banks may be $\mid$ South Wales bank were recently sold at 95 premium judged of from the fact that, 10 shares of the New ${ }^{\text {and }} 28$ of the bank of Australia at 75 to 80 .

Dividend, $7 \frac{1}{2}$ per cent. for that half year. Interest nt the rate of 4 per eent. per annum allowed on balnnces of current accounts.

A London company, established March, 183-1, has been incorporated liy royal charter, called the Brank of Australasia, with a capital of 200,0001 . for the purpose of establishing banks of issue and deposit in New South Wales, Van Diemen's Land, and other settlements in Austrulasia. One half of the com3 к
pany's capital paid up before the commencement of business, and the entire capital within two years. The stock is divided into 5,000 shares of 40 l . each ( 500 of which were reserved for allotment in the colonies), to be paid up as follows :-10l. per share at the time of sulseriling, $7 l$. at three month from
that date, $6 l$. at six months, $3 l$. at nine months, $4 l$. at twelve months, $5 l$. at fifteen months, and $5 l$. at eighteen months.
The management of the compnny's affairs is vested in the London Board of Directors, appointed by the proprictors, and the banks in the colonies are conducted by loeal directors and other persons duly qualified, appointed by the directors in London.

The proprietors are entitled to vote at the annual meeting, according to the number of shares held by
them respectively, in the following proportions five shares and under 10 , one vote; 10 shares and under 20, two vutes; 20 shares and under 50, three votes; 50 and upwards, four votes, and not more, The following shews the progress and the prosperity of the establishment.
The bank of Australasia commenced husiness in the colony 14th December, 1835. Capital 200,000 1 , paid up. Interest allowed on current accounts at the rate of 4 per cent. per annum.

Realized profits to the 31st December, 1836 , forming the "dividend or dividing fund," $11,72+1$. The profits of the year terminating the 31st liecember 1837, afler deducting the whole of the anmual expenses, both in the colonies and in London, for that year; and also a further sum in part liquidation of the pre. liminary expenses, according to the principle baid down in the previous reports, are 21,9081 .; making $n$ totnl of $36,636 \mathrm{il}$. Out of whieh have been paid to the proprictors-Midsummer dividend for 1837, 8,0001.; Christmas ditto, $8,000 l$.; total $16,000 l$. Leaving the sum of $20,636 \%$. 12s. 10d. as the amount of divisible fund on the 31 st December last. The directors have therefure the satisfaction of announcing their intention of declaring a dividend upon the original shares of 4 per cent. for the first hali year of $183 \beta$, ending the 30th instant ; being after the rate of 8 per cent. per annum.
In addition to the above assets, the average amount of the paid '1p conitals of the corporation in hands of the court of directors in London, for the use of the colonial establishment, was 98,6301 .

Australian Marine Assurance Company, established January, 1831, capital 140000 ., 14,000l. paid up; dividend, 30th July, 1836, $8 \frac{1}{2}$ per cent. for that half year.

Union Assurance Company of Sydncy, established January, 183 f , capital $250,000 l$., in 5,000 shares, capital paid up, 2l. per share- $-12,500 l$. Profits not to be divided for threc years. Capital inereased to 16,659l. 30th June, 18:36.

Coin in circulation. [B. B. 1836.] The whole amount of British coin in the colony is estimated at about 445,0002 ., and of this sum there was, on the 31st December, 1836, in the Coloninl treasury, 218,630l.; in the bank of New South Wales, 73,342l.; in the bank of Mustralia, $41,0.4 \times 1$. ; in the bank of Australasia, $50,005 /$; in the Commercial bank, $39,234 l$; total, 425,259l.
'The amount of coin in the bank of Australasia is taken from the half yearly average of the weekly liabilities and assets of that bank in New Sonth Wales, from 12th April to 10 th Octolser, $1 \times 36$, published in conformity with the ehartur of the bank; the board of dircetors having refiused to supply the locel government with any other information than that which the charter prescribes.

Austrnlia, hank of Australasia, and Commereial bank. The amount of these notes in circulation on 31s? Deeember, $1 \times 36$; was notes of the bank of NewSouth Wales, 25,665\%; bank of Australia, 29,24.\%.; bank of Australasia, $11,8.66 l$. ; Commercial bank, 32,7311.; total, $99,487 \%$. [The information respecting the toter in the bank of Alustralasia has been derived from the same source as that relating to coin, explained in the note under that head.]

The bank of New South Wales, the hank of Australia, and the Commercial bank are Joint Stoch companies, the shares in which are transferahle. The bnnk of Australasia is a chartered bank. The notes are all of sterling denomination, and are convertible into British money on demand.

The great portion of the circulation in this colony is carried on by drafts or checjues on one of the fout banks; the mass of pecuniary transactions centering, in Sydney, and almost every individual of propetly having an account with one or other of the banks, in which for security a large portion of their cash is lodged.

Course of exchange. [B. B. 1836.] Bills on the Lord's Commissioners of His Majesty's treasury are drawn at par, under a notice issued by the Deputy Commissary General, dated 28th February, $1 \times 3$ 3. Bills of private individuals are negotiated at a lis. count varying from $2 \frac{1}{3}$ to 5 per cent. Few if any bills are negotinted on foreign countries, and no rate of exchange on such bills ean therefore be quoted.
Rate of interest. [13. B. 1836.] Eight per cent. per annum is allowed in cases before the courts of law or equity when no rate has previously heen agreed upon, under authority of the act of council, 5 W .1 V, sec. 10. The bank of Now South Wales, bank of Australia, bank of Austrnlasia, Commercial hank, and Savines bank charge discount upon bills at the rate of 10 pat cunt. per annum. The Saving's bank allows, for money deposited therein, interest at the rate of 5 per cent. per annum. The other banks allow 4 per cent. per annum on all cirrent amounts.

Rotes of Insurunce at Sydney, N. S. W., March li, 1838.-Iondon and Liverpool, $2 \frac{1}{2}$ to 3 per cen.; Hobart Town, 1 jer cent.; Launceston, $1 \frac{1}{4}$ percent:; Swan River, 4 per cent.; New Zealand, 1 per cent; South Sen Islands, 2 per cent.

The vnlue of property annoally created in Xem South Wales is estimated at $2,366,66.4 l$.; moveabie, $3,703,000 l$.; immoveable, 19,150,000l.

wool. The introduction of this article into the colony was owing to the late John M'Arther Esq. So long back as 1793, that enterprising gentleman became cunvined that the grasses and climate of New South Wales were adapted to Merino sheep, and about two yeatalter, he obtained a ram and two ewes from Captank Kent, R. N., who had brought them, with some other stock for the supply of the scttlement, from the Cnpe of Good Hope, to which place some of the pure breed hatl heen sent by the louteh Government. Mr. M'Arthur immedintely began to cross his coarse fleeced sheep with the Merino, and in ten yars his flock, which consisted originally of 70 Bengal animals, was incrensed to 1,000 , although the weathers were slaughtered as they hecame tit for lood. In 1803, Mr. M‘Arthur revisited England, exhibited samples of his wool to a committec of manufacturers,
Origin and Progress of the Flocks, and Production of Wool, of New South Wales nad Van Diemen's Land; the Data being collected from the severnl Publications referred to nt the end of the Report.

* About this period an Importation of sheep from Bengal, Sydney, and Norfolk 1sland, formed the basis of the alocks of Van Dieman's Latd. t The value of the wool exported irom sydney for this year, is estimated by General Darling at 24,3061 . (sec his :eport to the Colonial Office, April, 1838, ) and applies to the exports of 1827 . $\pm$ Quarterly Revlew, xii, p.38. Retura of the quautity of Slieep＇s Wool shipped from New South Wales since the Year 1807.

＊The welghts previous to the year 1822 are taken from the Euglish Custon House returna ；iliere belag no record in the colony from 1822 to 1835，they are derived from the booka of the sydney Custom House．
＋Where the weight is greater in precediag than in aubse－ quent years，it does not arise from a cessallon of increase in the weight shorn，but from variation tu the time of shipment．

The following data relative to the progress of the wool trade in Australasia are taken from a report of the committee appointed by the Agricultural Socicty of Western Australia to investigate the subject ：－

All the publications on the Australian colonies， which embrace the topics of agriculture and general statistics，have noticed the ameliorating influence of the climate on the fleeces of the native or imported sheep，independently of the improvement effected by the system of crossing，generally adopted，of late years， by the flock－holders．

It was，in fact，this peculiarity of the climate or pasturage，or probably the influence of both com－ bined，which，as early as the year 1797，attracted the attention of the late Capt．J．M＇Arthur，and induced him to commence a series of experiments for the further refinement of the tlecce，by the introduction of a few Spanish sheep．The rapid improvement which followed in the course of three or four years was no less gratifying than aurprising；and，con－ vinced by thesc successful experiments，he pursued the object until a late period of his life with unceasing perseverance，and with results at once beneficial to himself and to his adopted country．

In the statement presented by Captain M＊Arthur to Lord Hobart in 1803，he adverts in strong terms to this point ：－that his flock，then consisting of 4,000 sheep，was derived from 30 Indian sheep purchased in 1793 from a ship which arrived at Sydney from Calcutta，to which he had added about ten of the Spanish and Irish breeds，and subsequently the flock belonging to another officer，originating from the same number and from the same vessel．
The rapid improvement of the Heece in Australia by the Influence of the climate only，is further con－ firmed by the evidence of several witnesses，wool－ staplers，and others，examined before the＂Select Committee of the House of Lords appointed to take into consideration the state of the British Wool Trade，＂In 1828．Mr．Henry Hughes，an eminent Blackwell Hall factor，gave his evidence in the fol－ lowing terms ：－
＂The quality of the wool was originally very bad， but the climate has a most extraordinary effect on the fleece：＂and again，＂the fleeces of sheep imported into those colonles have improved in a wonderful degree，which ennnot be accounted for by the best judges，except from the climate．＂＂I have from New South Wales some fleeces shorn off German sheep，sfter they had been in the colony about 16 months，and the improvemeut was so extraordinary， that I have had most of the German merchants now in London to see them；and，if 1 may use the phrasc， they were astonished at the great improvement the climate had made in the flece．＂Mr．S．Donaldann
and several other witnesses attest to the same effect． The committee constructed the table（p．435），shew． ing，in separate columns，in every instance where they have been able to collect the required dsta，the date of arrival，the number of sheep imported，their annual accumulation，the quantity of wool exported， \＆c．，commencing from the year 1791，when the foun－ dation of the present flocks in the colony of New South Wales was laid，by the arrival of the Gorgon， in the month of September，from the Cape of Good Hope，having on board 68 sheep．

The previous efforts of the colonists for the purpose of obtaining live stock，and their total failure，may be first briefly stated．

The first expedition landed on the 20th January， 1788，and in the following month a census of the live stock，imported with it，was taken，consisting of four cows，one bull，one stallion，three mares，and one colt，besides some pigs and poultry．Between this date and the month of April it appears thst some sheep had been introduced，it being reinarked by Capt． Watkin Tench，that a great diminution in their num． ber had taken place，by bad pasturage and other causes．In May there were 29 sheep；and in June the misfortune occurred of all the horned cattle，con－ sisting of two bulls and five cows，straying away into the bush ；where they remained，undiscovered，until the year 1795，when they，with their progeny，amount－ ing in all to about 60 head，were found in the neigh． bourhood of the Nepean River．In June，1790， H．M．3．Guardian arrived from the Cape of Good Hope，where had been embarked a quantity of live stock，including sheep，but the whole were destroyed during the voyage ；and the disastrous history of this first stock of sheep and cattle is summed up，in the month of November， 1790, by the author before quoted with the remark，that＂They have not，at this time， either horse，cow，or sheep here．＂

Such are the great improvements in navigation， that the expense of serding the fieece to loondon from Australia，a distance of 15,000 miles，is not more than $3 \frac{3}{d} d$ ．per lb ．including freight，insurance，broker－ age，commission，dock and landing charges，while the expense of transmitting German or Spanish wools to Eugland is from $4 d$ ．to 4 id ．per lb ．

The rate of increase in Western Australia has been nearly 40 per cent．per annum；and the number of sheep in the colony，in 1837，about 12，000，of whom 10,000 were ewes or ewe lambs．
The progress of cultivation and of live stock in New South Wales since its settlement in 1788 ，will be seen by the following statament．

The prices of horses，cattle，and sheep，which a few years since had fallen considerably，are now on the increase；and as provisions are becoming a staple export，we may soon see flour one of the imports from Australia．
After wool，whale oil is the chief staple of the co－ lony；this article of commerce is also of recent cre－ ation，and its progress is thus indicated ：

The black whale is found in abundance along the coast of New South Wrales，but the mariners prefer cruizing off New Zealaud，and among the besutiful islands in the Pacific．
The sperm fishing is the most valuable，and the extent to which it is prosecuted，may be estimated from the number of vessels engaged in it，and which sailed out of the Port of Sydney in 1834：－namely， 40 vessels， 9655 tons， 1179 men．

Return of Fisherfes，carried on in Vessels，belonging to，or sailing from the Colony of New South Wales Ia 1886．［B．B．］

The Phormium Tenar, or New Zealand flax, is dressed flax, are then exported to Sydney, where it is another article of export yearly increasing in amount; it is similar in appearance to the English flax, and is chiefly dreseed by the native women of New Zealand, who scrape off the outer part of the leaf with musele

Timber, particularly cedar plank, has been for some time exported; coals also were proving a valuable staple of the colony.
shells: the inner fibres or filaments, resembling
Table of Distances to and from the acveral l'ost Towns in New South Walcs.*

The figures signify the distance by land, and with the letter $w$, in addition to water carriage, $w$, alone, wholly by water. The distance ls given by the route the mail travels.

* An examination of this table will shew the extent of surface orer which the colonists are spread, and bys reference to the map, a more complete idea may thus be formed of the distance and direction of the differn! settlements or touns from the capital (Sydney). Other post tou'ns have been added since the annexed return uns receired, ouring to the ropill spread of population and industry.
ydney，where it has been for some roving a valuable

There are two treadmills at Carter＇s barracks for the punishment of prisoners．

The whole of the preceding statements demonstrate the rapid progress which New South Wales has made in population，wealth，and civilization．

CHAPTER II．－VAN DIEMEN＇S ISLAND，OR TASMANIA．

Section I．Van Jiemen＇s Island is situate on the S．E．const of New Holland，from which it is sepa－ rated by Bass＇s Straits，between the parallels of 41 ． 20．and 43．40．S．，and the meridians of 144．40．and 148．20．E．It is of an irregular heart－shape ：and its grestest extent from $\mathbf{N}$ ．to $\mathbf{S}$ ．is estimated at ahout 210 miles，and from E．to W． 150 miles（calculating the degrees of longitude in that parallel at the average of shout 50 miles each），nnd covering an extent of surfisce of about 24,000 square miles，or $15,000,000$ of scres ；being nearly the size of Ireland．
II．It was in honour of the Governor－General of the Dutch East Indies，Anthony Van Diemen，that the island received its name；its occasional appellation of Tasmania，is a tribute to its first discoverer，Tasman， who in 1642 first visited the coast，in the course of an eastward voyage from Mauritius；but it was up． wards of 120 years before the knowledge of its exist－ ence was followed hy any event of the slightest im－ portance to its annals．Captain Cook，as well as his companion Captain Furneaux，in the course of their voysge of circumnavigation in 1773，and again in 1777，visited the shores of Van Diemen＇s Land with－ out diacovering its insularity．
In 1803，it was formally taken possession of by the English；a small detachment under the command of Lieutenant Bowen，having arrived from Sydney， with a view of forming a penal settlement for con－ victs transported from that colony．Risdon or Rest－ down，as it ls sometimes called，on the eastern bank of the Derwent，a few miles up the river，was the spot selected for the settlement ；but beyond this， little was effected at that time．

Early in 1804，Licutenant－Governor Collins，who had recently left England with a considerable expedi－
tion，having in view the formation of a settlement at Port Philip，on the south east coast of New Holland， altered his destination after a short experience of the difficulties attending a settlement at that place，and arrived in the river Derwent，when the island was formally taken possession of in the name of His Britannic Majesty ；and after various surveys of the Derwent，the present site of Hobart Town was decl－ ded upon for head－quarters（the name was bestowed in compliment to lord Hobart，at that time secretary of state for the colonies）．Leeutenant－governorCollina had about 400 prisoners under him，with about 50 marines to secure them．
The colony at times suffered great hardships；for the first three years the inhabltants heing wholly dependent apon foreign supplies fur the most com－ mon articles of food，were occasionally reduced to great atraits ； 80 much so，that we hear of eighteen－ pence per pound having been given for kangaroo fiesh，and that aea－weed，or any other vegetable sub－ stance fit for food，was purchased at an equally high rate．
After the island had been settled about three years， sheep and cattle were introduced．Until 1813，the island was a place of transportation from New South Wales，and all communicatlon except with England or New South Wales interdicted．In 1821 emigration commenced，and the progressive civilization of the island will be seen by lts statistics．

III．The general face of the interior is very diver－ sified，but decidedly mountainous，nut however in ranges，but rather in Isolated peaks，varied by lofty table land，and extensive fertile valleya or plains．

Around the coast are numerous baya and harbours， that afford secure anchorage．The entrance from the
ocean to the Derwent, on the banks of which Hobart Town is built, presents two lines of continuous bays or anchorage of unrivalled excellence; the one most commonly used leads through Storm Bay, and the other through D'Entrecasteaux's Channel, which is one string of little bays or anchorages for nearly 40 miles.

Hobart Town, the capital of the island, and the seat of govermment, is an extensive, well laid out, and neatly built town on the River Derwent, about 20 miles from its mouth. The cove or bay, upon the banks of which Hobart Town is built, affords one of the best and most secure anchorages in the world, for any number of vessels, and of ally burthen.

An amphitheatre of gently rising hills, beautifully clothed with trees, and having Mount Wellington ( 4000 feet elevation) as the highest, defends it from the westerly winds, and bounds the horizon on that quarter: while the magnificent estuary of the Derwent, (with its boats and shipping, and picturesque points of land along its winding banks, forming beautiful bays and lakes), skirts it on the F..

The town itself stands upon a gently rising ground, and covers rather more than one square mile. Its streets wide, long and intersecting each other at right angles.

The suburbs of Hobart Town have lately undergone considerable improvement; handsome villas and enclosures occupying ground in every direction, which in some places would have been supposed to bid defiance to the hand of art. A noble wharf has been constructed, 80 as to allow vessels of the largest burthen to lade or unlade close alongside the shore, without the assistance of boats.

Next in rank and commercial importance is Launceston, on the north side of the island, distant, by a good road, 121 miles from Hohart Town. It is the richest land in the island, backed by gently rising hills, at the confiuence of the N. and S. Esk Rivers, which there form the Tamar, flowing about 45 miles, when it disembogues into the ocean at Bass's Straits. The town is thriving greatly, owing to its being the maritime key of a large and fertile country, and affording sufficient water for vessels upwards of 400 tons burthen, to load alongside the wharfs.

1V. The geology of the island is very varied; basalt is supposed to be the principal stratum; limestone is almost the only mineral that has yet been brought into general use; marble of a white mixed grey colour, susceptible of a good polish, has frequently been found, though never yet dug up or applied to use. Around Hobart Town, where, in the progress of improvement, the soil is frequently exposed to the depth of two or three yards, strata of soft clayey marl occur, which has been found very useful as a manure. Much of the common limestone is of a yellowish or reddish colour, no doubt derived from the quantity of oxide of iron with which it is mixed, and which is so generally seattered throughout the island. Iron ore is very frequent, both of a red, brown and black colour. In one or two instances it has been analysed, and found to contain eighty per cent. of the perfect mineral. It also oceurs, though more rarely, and in smaller quantities, under the form of red chalk, with which, mixed with grease, the Aborigines besmear their heads and bodies. Indications of coal have been found across the island.

Excellent sandstone for building, is obtained in almost every part of the island, and most of the houses in Hobart Town nre now bullt with it, instead of badly made bricks, as formerly; it is brought from different parts within half a mile or a mile of the
town. A quarry of that kind has recently been dis. covered at Port Arthur; where the manufacture of filtering. stones, it is probable, will be found a profita. ble employment.

Of the metallic ores, besides iron, which is most abundant, specimens of rell and green copper ore, lead, zinc, manganese, sud, as some say, of silver and goll, have occasionally been met with.

The soil is very varied, in some places a rich black, alluvial mould, in others sandy or argillaceous; its fertility is shewn by the excellent crops produced, the land being cultivated for years without refreshment.
V. Allowing for the higher aouthern latitude, and the coldness and humidity attending on its insularity, the seasons and weather at Van Diemen's Land may be estimated from the data given in the preceding chapter respecting New South Wale's.

September, October, and November are the spring months, when the weather is usually bright and clear, with oceasional rain and high winds. The average of the thermometer for these months is from 50 to 60 degrees.

December, January, and Fehruary, constitute the summer. In general very little rain falls during these three months. The productions of the earth, such as grass, corn, and vegetables, arrive at maturity about one month earlier than the same kinds would in lingland; that is, in December, which answers to the June of the northern hemisphere, products are gathered which, in England, ripen in July.

March, April, and May are the autumn of Van Diemen's Land, and form by far its pleassntest season. The air is then clear and bright-the sky free from clouds and vapours-the medium heat of the day is about 65.-and the nights are cool and refreshing. It may be noticed here, that even in the height of summer, the evenings and nights are generally coul.

June, July, and August are the Winter. In the interior, particularly upon high and exposed situations, frosts are sometimes severc, and at times a good deal of snow falls; but it is seldom that the sun so wholly loses its power as to suffer an appearance of either frost or snow to last throughout the day; and the winter of Van Diemen's Land is rather contemplated by the inhabitants aa a season of moderate and geniul rain, sufficient to replenish the storehouses of the earth against the ensuing spring, and to facilitate the labours of the hushandman, than as the cold and dismnl period of the higher latitudes. The ave. rage range of the thermometer is from 40 . to 48 .; now and then, however, for a day or two, some degrees lower. The longest day in Van Diemen's Land is 15 hours 12 minutes; the shortest, 8 bours 48 minutes.
VI. When first discovered, Van Diemen's Land was densely peopled by a dark race of inhabitants, differing somewhat from the aborigines of the adjacent coast of New Holland in the more negro-like caste of countenance, woolly hair, and darker colour. Shortly after our occupation, contests began between the white and black races, which continued with occu. sional interruptions until about four years since, whea a general levy of the white colonists took place. The blacks were hemmed into one corner of the island, and finally removed, under the protection of government, to Flinder'a Island, in the adjoining straits. Their numbers were, however, very much diminished; smad pox, famine, and the retaliation of the colonists for the murders of their relations and friends, having thinned considerably the aborigines. The following shews the progress of the white population :-

The churches at Campbell Town and Ross, now huilding, will remedy the great Inconvenience at present felt from the want of accommodation.
VIII. An Abstract of the Report of the State of the Government Schools in December, 1835.

1. Back River.-One daily achool, attended by 7 males and 12 females. The number of children admitted from the commencement is 37 . Of the daily scholars, 17 of both sexes also attend on Sundays. Government allows 25l. per annum towards the rent of a school-house. The mistress receives $25 l$. per annum, in addition to which 8 of the scholars pay 1 s . a week each. The children are taught spelling, reading, writing, arithmetic, and English grammar; the girla also learn marking, netting, and plain needlework. System, Dr. Bell's.
2. Bagdad.-One daily school, 7 m . and 15 f. No. of children, 41. Of the daily acholars, 12 of both sexes also attend on Sundays. Gov. allows 25t. per sm . towsrds the rent of a achool-house. Master 50 l ., mistress 251 . per an.; In addition to which 19 of the scholars pay 3 l. 10s. 7d. a week. Rending, grammar, geography, writing, arithmetic, and the Latin rudiments ; the girls likewise, needlework, \&c.
3. Bothuell.-One daily school, 17 m . and 10 f No. of children, 51. Of the daily scholars, 26 of both sexes also attend on Sundays. The school-house belongs to Gov. Master 25l. per an. ; in addition to which 10 of the echolars pay 108 a week. Spelling, reading, writing, and arithmetic.
4. Brighton.-One daily school, 5 m . and 6 f. No.
of children, 17. Gov. allows 20l. per an. towards the rent of a school-house. Master $25 l$. per an. ; in addition to which 7 of the scholars pay 7s. a week. Spelling, reading, writing, and arithmetic.
5. Campbell Town. - One daily school, 5 m . and 13 f . No. of children, 37. Gov. allows 25l. per an. towards the rent of a school-house. Master 25l., miatress $15 l$. per an.; in addition to which 8 of the scholars pay 8s. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.
6. Carlton.-One daily school, 7 m . and 9 f. No. of children, 37. Of the daily scholars, 13 of both sexes also attend on Sundays. Gov. allows $10 l$, per an. towards the rent of a school-house. Master $30 l$. per an. ; in addition to which 9 of the scholars pay 9 s . a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.
7. Clarence Plains.-One daily school, 15 m . and 11 f . No. of children, 99 . The achool-house is Gov. property, but is in want of repair. Master 50l., mistress $25 l$. ; in addition to which 23 of the scholars pay 1t. 9s. 7d. a week. Spelling, reading, writing, history, geography, arithmetic, and the Latin language.
8. Evandale,-One daily school, 9 m . and 4 f . No. of children, 23. Of the daily scholars, 13 attend also on Sundays. Gov. allows 254 . per an. towards the rent of a school-house. Master 50l., mistress $25 l$. per an.;
in adilition to which 21 of the scholars pay 11s. 6d. a week. Spelling, reacling, writing, arithmetic, and English grammar. System, Dr. Bell's.
9. Ceorge Toucn. - One daily school, 10 m . and 8 f. No. of children, 19 . Of the daily scholars, 18 of beth sexes also attend on Sundays. The schoolhouse, which is much out of repair, belongs to Gov. Master 50l., mistress 25t. per an.; in addition to which 13 of the children pay 13s, a week. Spelling, reading, writing, arithmetic, and gcography; the girls likewise learn needlework. System, Dr. Bell's.
10. Glenarchy.-One taily school, 12 m . and 13 f . No. of children, 41. Of the daily scholars, 20 of both sexes also attend on Sundays. Gov, allows 25l. per an. for the rent of a school-house. Master 50l., mistress 25\%. per an.; in addition to which 9 of the children pay 9s. a weck. Spelling, reading, writing, arithmetic, with needlework for the girls.
11. Green Ponds.-One daily school, 12 m . and 8 f . No. of children, 29. Of the daily scholars, 14 also attend on Sundays. Gov. allows 25t. per an. for the rent of a school house. Master 50l., mistress 256 . per an.; in aldition to which 12 of the scholars pay 12s. a week. Spelling, reading, writing, geography, grammar, and arithmetic, with needlework for the girls. System, Dr. Bell's.
12. Hamilton. - One daily school, 8 m . and 7 f . No. of children, 29 . Gov. allows 25t. per an. for the rent of a school-house. Master 25l., mistress 15l. per an. ; in addition to which 10 of the scholars pay 6s. a week. Of the daily scholars, 10 attend on Sundnys. Spelling, reading, writing, geography, and art:hmetic.
13. Hobart and Suburlis. - St. Darid's Parish.Two daily schools, one of which, belonging to the Established Church, is attended by 31 m . and 19 f . No. of children, 1,332 . Of the daily scholars, 24 attend also on Sundays. Gov, rents the school-house at $115 l$. 103 . per an. Master $88 l$., mistress 25l. per an.; in addition to which 26 of the children pay 7s. 9d. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's.

14,-From the other school, which belongs to Roman Catholics, no return has been received; but in December, 1835 , it was attended by 45 m . and 12 f . Master $50 l$. per an. System, Dr. Bell's.
15. Sandy Bay or Queenboro' Parish.-One daily school, 9 m . and 10 f . No. of children, 57. Of the daily scholars, 12 attend also on Sundays. Master 30l., mistress $30 t$. per an.; in addition to which 14 of the children pay 9s. fid. a week. Spelling, reading, writing, and arithmetic. System, Dr. Bell's. It is feared that this school must be given up, as the owner of the school-house requires it for other purposes, and no other suitahle building can be obtained.
16. Trinity Parish.-One daily school, 70 m . and 54 f . No. of children, 260 . Of the daily scholars, 69 of both sexes attend also on Sundays. Gov. rents the school-house at $80 l$. per an., but it is too small for the number of children now attending it. Master 50l., mistress 25l. per an.; in addition to which 124 of the scholars pay 3 l. 12s. a week. Spelling, reading, writing, grammar, geography, and arithmetic. System, Britiah and foreign school.

Housebreaking 3；Murder 3；Stealing in the dwel－ ling 2；total，13．1835，Burglary 5；Cutting and maiming 1；Murder 3 ；Rape on a child 1；Stealing in the dwelling 2 ；total， 12.
X．Van Diemen＇s Land is a Lieutenant Govern－ nuent of New South Waies，but in local mntters since 1825，the Lieutenant Governor with the aid of an Executive and Legislative Council，administers the affairs of the island after the same manner as they are carried on in New South Wales，and independent of that government．
The Executive Council consists of the Lieut．－go－ vernor，Chief Justice，Colonial Secretary，Colonial Treasurer，and the officer in command of the troops． The l．egislative Council consists of not more than 15 inembers，nor less than 10，appointed by the King＇s warrant．Several memhers of the government，such as the Chief Justice，Colonial Secretary，Colonial Chaplain，Attorney General，Treasurer，\＆c．，are ex－ officiu members of this council，on whom devolves the making of laws and the issuing of ordinances for the good government of the colony，suhject to the approval of the King in Council．The Lieut．－Gover－ nor has the initiance in，all laws brought before the council；drafts of such laws to be inserted in one or more of the colonial newspapers eight clear days be－ fore their enactment，thtiess in cases of special emer－ gency．Two－thirds of the council must be present ； if a majority dissent from the Governor，they may minute the grounda of their dissent，and then the law cannot be passed．Laws passing the Legislative Council，must within seven days be enrolled in the supreme court，and 14 days trom such enrolment they come into operation，unless the judges of the supreme court declare them to be repuguant to the laws of England，or the charter or letters patent of the colony．The Lieut．－Governor and Council in such an event，rcconsider the laws and the judge＇s oljections；and if they see fit，may cause the laws to he put in force and transmit to Fingland the whole of the proceedings connected therewith．The laws of England，so far as they can be applied，are recognized in the administration of justice．All laws made in the coleny，and all orders by the Crown in pursuance of the 9 th Geo． 4 ，c． 83 ，to he laid before larliament within six weeks after the commencement of ench session．Criminal offences are tried by seven inval or military officers as a jury，and civil cases by a judge and two assessors，magis＇rates of the colony， appointed by the Lieut．－Governor，open to challenge by the parties，but the challenge to be determined by the judge；if the assessurs do not ngree，the judge has a casting vote．The supreme court may；on the application of either a plaintiff or detendant，summon a jury to try an action．The supreme court may declare insolvencies，and distribute elfects；it pos－ gesses also equitnble and ecclesiastical jurisdiction，as in New South Wales，and in fnet，in all respects the government and courts of Van Diemen＇s lsland are on the same principle as those of the elder colony．
The Governor of New South Wnles is exr－officio general of the district，which includes Van l）ienten＇s Island；the Lieut，－Goveruor of the colony heing only colonel，and in that capacity，commanding the troops stationed in the island．
Return of Troups serving in Van Diemen＇s Land， with the No．of Women natl Chitdren of ench Corps， and Deaths during the year enting 3lst December 1836．－Regts．17th．， 21 st．，50th．，6？＇d．，foot ；Othicers present， 31 ；Non－com．Ollleers and Privates，678； Ditto aick and absent， 41 ；total，750．Women， 156 ；

Children，M．141，F．155．Deaths since last return， 10 men， 6 children．

XI．The revenue is derived from custom duties， excise，fees，sales of land，and quit renta，\＆c．Goods of British manufacture are importable，duty free， forcign ditto，five per cent．ad ralorem．Spirits are charged with a duty of 10 s ．per gallon on brandy， hollauds，or geneva，West Indin rum or Britisb gin 7s．Gil．；tobacco，ls． $6 d$ ．per lh．；a license to distil or sell spirits，costs $25 l$ ．per annum；to bake or sell bread， $5 s$ ；to slaughter cattle or sheep， 5 s. ；to keep a dog on the chnin，5s．；off ditto，10s．；and a bitch ditto， 1l．；to keep a cart for hire， $5 s$ ．；auctioncer＇s license， $3 l .3 s$ ．；marriage license， $4 l .4 s$ ．There are fees on grants of lands，\＆c．equivalent to stamp duties．

The increasing trade of this colony may be judged of by the preceding table; with Great Britain it has increased sevenfold in 12 years, and the whole imports of the settlement have been augmented nearly tenfold. The exports have been augmented from 14,000l. to $420,000 l$. per annum, and the tonnage has been extended in the proportion of 5 to 1 . The value of land and cattle has increased during the same period 400 per cent. The progress of the population and revenue will be seen under their respective heads. The principal exports of the colony are wool, whale and seal oil, whalebone and bark, to England; and provisions and live stock to the neighbouring colonies. The quantity of wool exported in 1827, was 192,075 lbs. in $1835,1,942,800$ lbs., price 1s. $6 d$, to $2 s, 6 d$. per lb.
A Return of the Number and Tonnage of Vessels be. longing to the Ports of Van Diemen's Land from 1824 to 1835 , both inclusive.

## CHAPTER III -WESTERN AUSTRALAA or SWAN RIVER.

Section I. The establishment of this colony originated in a proposition, on the part of Thos. Peel, Esq., Sir Francis Vincent, E. W.Schenley, T. P. Macqueen, Esqre., and other gentlemen, to further the views of Government in founding a settlement, at little or no expense to the mother country, on the western coasts of Australia. These gentlemen offered to provide shipping to carry 10,000 British subjects (within four years), from the United Kingdom to the Swan River to find them in provisions and every other necessary,
and to have three small vessels runuing to and from Sydney as occasion might require. They estimated the cost of conveying these emigranta at $30 l$. per head making a total of $300,000 l$. ; and they required in return that an equivalent should be granted them in land equal to that amount, and at the rate of $1 s$. $6 d$ per acre, making $4,000,000$ acres ; out of which they engaged to provide every mate emigrant with no less than 200 acres of land, free of all rent.

This arrangement was not carricd into effect, and
a project for the formation of the new colony (with. out making it a penal settlement), was issued from the Colonial Office in 1829 .

By this project his Majesty's Government did not intend to lncur any expense in conveying settlers to the New colony on the Swan River; nor supply them with provisions, or other necessaries, after arrival there.

Such persons as were to arrive in the settlement, before the end of the year 1830, were to receive, in the order of their arrival, allotments of land, tree of quit-rent, proportioned to the capital which they were prepared to invest in the improvement of land, and of which eapital they were to produce satisfactory proofs to the Lieutemant Governor, at the rate of 40 acres for every sum of $3 l$. which they were prepared so to invest.

Those who incurred the expense of taking out labouring persons, re to he entitled to an allotment of land, at the rat. 15l., that is, of 200 acres of land, for the passage $r^{-}$. ery such labouring person, over and above any cuter investment of capital. In the class of 'labouring persons' were included women, and children above ten years old. With respect to the children of labouring people under that age, it was proposed to allow 40 acres for every such child, above three years old; 80 acres for every such child, above six years old; and 120 for every such child, above nine, and under ten years old.

The title to the land was not to be granted in fee simple, until the settler had proved, to the satisfaction of the Lieutenant Governor, that the sum required, (viz. 1s. 6il. per acre), had heen actually expended in some investment, or in the cultivation of the land, or in solid improvernents,-such as buildings, roads, or other works of that kind.

Any land, thus allotted, of which a fair proportion, at least one fourth, should not have heen lorought into cultivation, or otherwise improved, to the satisfaction of the local Government, within three years from the date of license of oceupation, was to be liable to one further payment of Gid. per acre for all the lame not so cultivated or improved, into the public chest of the settlement; and, at the expiration of seven years more, so much of the whole grant as should remain in an meneltivated or unimproved state was to revert absolutely to the Crown. And in every grant there was to be contained a condition, that, at any time within ten years from the date thereof, the Government might resume, without compensation, any land not then netually cultivated, or improved, as before-mentioned, which might be required for roads, canals, or quays, or for the site of public buildings. After the year 1830 , land was to be disposed of to those settlers who might resert to the colony on such conditions as his Majesty's Government should determine.

Captain Stirling was appointed Lieutenant-Governor of the intended scttlement, with a grant of 100,000 acres ; and Mr. Peel was to receive 250,000 acres, on condition of taking out 400 emigrants, with liberty to extend the grant to $1,000,000$ aeres, previous to the year 1840, by receiving 40 acres for every child above three years, 80 frr evciy child above six, up to ten years 120, and exceeding that age and upwards 200 ncres for each person conveyed to the colony. The terms requisite to obs. tain 500,000 acres have been complied with. Uns der these circumstances, early in 1829, a number of settlers left England for Swan River, in Western Australia, where they hegan to arrive in August, and to locate themselves along the banks of the Swan and Canning Rivers, so that by the end of that year there were in the new colony resitents 850 ; nor -
residents 440 ; value of property, giving elaims to grants of land, $41,550 l$. ; lands actually allotted, 525,000 acres ; locations actually effected, $39 ; \mathrm{N}_{0}$, of cattle, 204; of horses, 57 ; of sheep, 1,096; of hogs, 106 ; and 25 ships had arrived at the settlement between the months of June and December. Such was the commencement of our new colony on the shores of Western Australia. The settlers met at first, as must le expected in all new conntries, with many difticulties, and great hardships had to be sur. mounted; the land near the coast, as is the cse generally in New Holland, was found poor and sands; but subsequently, on exploring the interior, fine pas. toral and agricultural tracts have been discovered. $\lambda$ portion of the aettlers have heen located at King George's Sound (lat. 35.6.20. S., lon:. 118.1. E.) ntat the S. W. extremity of Australia.

After this introduction to explain the origin of the settlement, which is dated from the Ist June, I829, and which through good report and evil report, has proceeded in the path of energy and industry, we may now examine the geographical feat ures of the country.
II. Western Australia, lying between the paraliels of 31. und 35., S. lat., and including all that part of New Holland situate to the westward of the 1290 uf longitude, is therefore 1,280 miles from N. to S., and 800 miles from E. to W. It comprises a finc extent of territory, of which the distinguishing features are three distinct parallel ranges of primitive mountains, bordering on the sca coast, in a N. and S. direction. The highest and easternmost has its termination near King Grorge's Sound, in 35 S. lat. and 118. E. long.the sccond, denominated the Darting Range, passes behind the Suan River, and neects the sea at Cape Chithem in 34.40. S. lat., and 115.20. E. long.; the thin ridge, which is inferior in altitude and cetent, hns its southern boundary at Cape Lemuin, in 34.20 . S. lat., and 115. E. long.; disappenring at Cape Di. turaliste, in the same meridian in 33.30. S. lat.; and on shewing itself again at Mureshy's Flat-topped Range, about half way hetween Suan Ricer and Shark's Buy, or about 300 miles to the N . of Cape Leurin.

These dividing ranges give off several rixers, which flow E. or W., according to the dip of the land at either side-the principal on the sea shore being the Suran and Canning, in 32 . S. lat.; the Murray, in 32.30. S. lat.; the Collie, the Preston, and a smalle: streain into Port Leschenault, in 33.12. S. lat.; the Blarkuood, to the castward of Cape Leuuin, and disemboguing into Flimelers' B.ty; the Denmark, Kent, Huy, and Steeman, on the S. coast, in 35. lat. and nearly 117. long.; and King's Rirer, falling into King Gporge's Sound, in 35.6.20. S. lat., 118.1. E.long. When the coast is further explored, other rivers will most probably he found.

On each of those rivers, locations have been formed by our hardy settlers; the !town of Freemantle has been founded at the entrance of the Surm Rirer; Perth, about nine miles inland, on its right or north. ren bank; and Guildford, about seven miles further E. at the junction of the streain; a town, called Augusta, was founded at Blackwood's River, nar Cape Leuwin; and King George's Sount, which has been occupied by a detachment of troops and convicts from Sydney in 1826, has been given over by the New South Wales Government, and attsched to the Swan River colony.

The following excerpts from the official report made by the Governar to the Colonial Office, lith Octoher 1837, together with the statistics derined from the Secretary of State, will give a fair view of the colony.

the official report Colonial Office, 15th te statistics derived give a fair viex of

It appears from King's surveya, that the coast of the colony, within the trople, is fronted by indentations, bays, straits, and islands, and abounds in the finest harbours imaginable. The rise and fall of tide in some places amounts to 35 feet, affording opportunities thereby for building docks, or for laying ships on shore, without considerable expense. The existence of an interior sea, or of great rivers, connected with some of the inlets which were not fully explored by King, remains a problem as yet undetermined.

The principnl ports in the south-western parts of the colony are those in Cockburn Sound and in King George's Sound. The first of these is an excellent port, but its entrance is encumbered by roeks, and it is not aecessible with safety to large vessels, while there is not an effective establishment of pilots and beacons. The open anchorage at the mouth of the Swan Kiver is therefore in general use at present. King George's Sound possesses all the qualities which constitute a good harbour; its position being however to the eastward, and to leeward of Cape Leewin, in the vicinity of which strong westerly gales prevail, this circumstance detracts from the value of its other qualifications. Shark's liay abounds in safe anehorages, and affords, as well as Doubtful Island Bay, secure access to the districts in their immediate vicinity. Harbours for boats and small coasting vessels exist near the entrance of Pecl's Inlet, Port Leshenault, Augusta, Nornahp, Torbay, Collingwood lay and Cape Riche.
One of the most remurkable peculiarities on the south-western coast of the settlement, is the frequent occurrence of estuaries or inlets of the sea, having narrow and shnllow entrances. Between King George's Sound and Swan River, there are no less than 10 of these; they nre usually from five to ten miles in length, and from two to three in breadth ; they scrve as the receptacles of the streams in their vicinity, and will afford hercafter water communication to the inhabitants. In the summer scason, the water in them is salt, but becomes fresh after the return of the rains.
In the interior, no lakes of any extent have been as yet diseovered, but salt marshes, and salt pools of small diameter, are not unfrequent.
The absence of considerable mountain ranges forbids the chance of finding any considerable rivers of a perennial character; and it is somewhnt remarkable, that one of the largest rivers known, whose course is not less than 200 miles, disappears entirely as a stream, and ceases to run, long betore the end of the dry season. In the country situated to the south of Swan River, there are, however, streams which continued to run throughout the ycar, as may be Instanced in the cases of the Murray, Harvey, Brunswick, Preston, Capel and Donelly ; and on the south coast, where the country is more hilly, and the rains later, mill-streams exist in great numbers, and, fortunately, those districts contain an inexhaustible supply of the finest timber.
The chance of discovering a river of great magnitude on the north-west const, appears to be strengthened by the non-occurrence of any considerable stream in those other parts which have been as yet explored.
The supply of water for domestic purposes, in all those districts which have been occupied, appears to be sufficient. In the district of York, inconvenience has been found on some farms, from the difficulty of finding water at first, but these inconveniences have
been usually overcome hy the discovery of springs, on further inspection. The country at the distance of 100 miles from the western coast, does not appear to enjoy its share of the rain brought in by the westerly winds, and it ia to be apprchended that a deficiency in the supply of water, during the dry scason, will be found in that quarter when it comes to be settled.
IV. The whole of the oceupied portion of the territory appears to rest upon a granitic hase; rocks of that deccription having been fonnd to exist in every district which has been as yct explored. In the neighbourhood of Doubtful Island bay, the granite assumes the stratified form of goeiss, and as red sandstone is found on the north-west coast, and tertiary formations on the shore of the Australian Bight, it is probable that the general dip of the country is in a direction a little to the north of east. To the south of the 31 st degree of latitule there are no mountain ranges of any great altitude; the highest as yet known being that of Koikycunreuff, near King Gcorge's Sound, which attains to the height of 3,500 feet. On the primitive base of the country, none of the the secondary formations have been found to exist ; basaltic rocks are not however unfrequent in almost every district in the country; and in one position in Geographe Bay, there is a columnar formation resembling in its character that which exists on the north coast of Ireland. The principal range of hills extends in a norther!y dircetion from the south coast, near Cape Chathan, for at least 300 miles. The only varieties of rock which have been found on this granite range, are occasional portious of roofing slate, and of indurated clay; but extending from the western base of these hills towards the sea, upon an average breadth of about 20 miles, there is a low and tolerably level plain of diluvial origin, which bears the marks of having been covered by the sea at some remote period. The portion of this plain nearest to the sea presents limestone hills, which have a slight covering of meagre sandy soil; the remainder varies from sand to clay, with exception of the lands in the immediate vicinity of rivers, which have been affected, and rendered rich, by the overflowing of the streans.

The mineral substances heretofore discovered, are lime, marl, selenite, slate, siliccous and calcareous petrifactions, magnetie iron ore, peacock iron ore, chromate of lead, and chrystals of quartz. The very small portion of the territory which has been inspected being almost entirely of a primitive description, a larger list of minerals could not be expected; but when time shall permit the further examination of the northern districts, of the red sand-stone formation, it is not unlikely that important mineralogical discoverics may be effected. The discovery of copper ore by Captain King in the vicindy of Cainden Bay, corroborates this expectation.

The surface of the country generally is covered with those substances which are technically called earths, in contradistinction to soils. Of the latter, as far at least as relates to those of a vegetable origin, a very small portion exists, and that only on moist grounds. The extreme drought of the climate, and the summer conflagrations, appear to prevent the growth of succulent planta, as well as any great accumulation of soil from decayed vegetation. But although the country is not remarkable for richness of soil, it is favourable in other respects to furming purposes. In its natural state there is scarcely any part which docs not produce some description of plant, and its defects apyear to be of that clas3 which
art, aided by climate, will be enubled hereafter to overcome.
V. The wet season commences with light showers in April, which continue to increaae in number and force throughout May, June, and July, and from that period to decrease, until they cease altogether in the month of November, when the dry weather begins. These two seasons, with an intermediate spring following the conclusion of each, embrace the circle of the year. It is usual to call the wet season the winter, and the dry scason the summer, but neither of them has the character of the corresponding season in Europe. The extreme drought and heat of an Australian summer renders it the least agrecable portion of the year, while the winter, with the exceptlon of intervals of stormy weather, is only suftlciently cold to be pleasant.

The prevailing wind, in the seas adjacent to Cape Leewin, is from the westward throughout the year; on the coasts, however, land and sea breczes take place with great regularity in the summer. In the winter season gales of wind from the north-west and south-west are very trequent, and are usually accompanied by heavy falls of rain. At such periods the atmosphere is charged with moisture to a considerable degree, and the quantity of rain that has been ascertained to fall at King George's Souncl, in the course of the six winter months, equals the quantity experienced in the western counties of England. The atmosphere in the summer season retains so little moisture that none but hardy and fibrous plants can withstand the drought. The air is so clear, and the reflection of solar heat so great, that the thermometer occasionally reaches, in the shade near the ground, $105^{0}$, but the effect at those times upon the European constitution is not injarious; this can only be accounted for, under so great a heat, by the peculiar dryness of the air, and the regular succession of cool nights after the warmest days. The experience of the last eight years has established in the minds of the colonists the full belief, that the climate of the settlement is, in a remarkable degree, conducive to health and to comfort : but it certainly is not equally suitable to the growth of those vegetable products which flourish to great advantage in moister climates. With reference to this point of difference between England and this new colony, it is perhaps fortunate for it that it does not resemble the former country, but may rather be considered in tempernture as a supplement to the southern districts of the United Kingdom, and as affording every range of temperature between the Land's End and the equatorial regions for the production of commodities which cannot be raised in the colder atmosphere of the mother country.

The suhjoined communications on Climate, Meteorology, rain, \&c., have been drawn up by John Harris, Esq., Colonial Surgeon :-

In compliance with your desire, I give you such information as my experience in the colony has enabied me to coilect, on the following subjects :

1st. On the elimate, scrasone, scale of thermometer, quantity of rain, \&c. 2d. Diseases, endemic or imported, influence of the climate on the health of men and animals, and a general state of health of the inhabitants. 3d. Diseases incidental to cattle.

On the climate, I beg to remark, that the concurrunt testimony of every individual who has spent a round of the seasons in this country, has given to it a celebrity, which increases as we become better acquainted with the steady and uniform changes
which those seasons bring. The hottest months are January, February and March ; but, although the thermonneter has stood in the shade at 90, and in one instance, in March of the present year, at 105 , the mornings, evenings and nights are generally cool and pleasant, and the mid-day heats are tempered by a refreshing sea breeze from the south-west, which sets in with conslderable regularity about noon. Through the whole summer, a land breeze from the east prevails in the morning; the sky is beautifully clear, and the air pure. Slight fogs occasionally hang along the course of the river, early in the morning: a refreshing dew fails during the night; but as there are no considerable marshes, the country is free from malaria or noxious vapours. The winter mouths sre June, July and August ; the two latter the most rainy. There are sometimes smart frosts, and now and then a little ice, all traces of which disappear on the rising of the sun. Snow is unknown. Hail. stunes of very large size, occasionally fall. A fire is agreeable during these winter months, mornings and evenings. The rains geldom continue more than three or four days, falling chiefly in heavy showers, with squalls, and sometimes atorms of thunder and lightning, and now and then severe gales from the north-west. The intervals of fine weather are from five to ten days. During the other quarters of the year, nothing can be more delightful than the climate generally, and its invigorating influence on the human constitution, especially of the Europeans, renders it more fit for invalids than any other in the world. During the winter months, the greater part of which are remarkably temperate and fine, the changes of temperature are often sudden; but by ordinary care and avoiding unnecessary exposure, no ill consequences ensue to the invalid. Several persons arrived in the colony, suffering from pulmonary and bronchial affections, asthma, phthisis, hæmoptysis, or spitting of hlood, hopeless of recovery in Europe, are now perfectly recovered, or living in comparative health.

The principal diseases met with in this colons, are rheumatism, dysentery, scurvy, and catarrh, during the winter months; and during the summer, and bespinning of autumn, a kind of subacute purulent ophthalmia, which is endemic, and is the only disease that can strictly he so considered. Hooping cough was imported in 1833, but has disappeared sinee 1834 . Gonorrbœa has been also introduced. Small-poxand measles are unknown. Vaccination has not hitherto succeeded. Cases of fever are seldom met with; and the diseases enumerated as most common, are never of obstinate character, if attended to promptly. Very few cases of ophthalmia have occurred during the past season, owing to the care taken when the trst symptoms appeared. Scurvy has nearly disappeared; indeed, nine cases out of ten, reported of this, and inost of the diseases named, occurred during the early days of the settlement, when the people, especially the labouring classes, were badly sheltered, and bsdly fed, without vegetables, suffering from fatigue, exposure in wet weather, or to a hot sun, alternately, privations of every kind, and consequent despondency. Intemperance was also a primary cause, in a great many cases, especially of dysentery. The bigher classes, being better provided with food and shelter, were generally healthy. Many of the causes no longer operate. Few of the laiouring classes are now with. out comfortable dwellings; food is plentiful, and vegetables of every kind are raised in great abundance, with a fine climate, therefure obnoxious to no parti-

The higher th food and shelter, the causes no longer lasses are now with. d is plentiful, and - in great abundance, noxious to 110 parti-
cular diathesis: the average mean temperature being from 60 to 64, the Inhabitants of Western Australla are as healthy a community as any in the world. My range of practice includes a population of about 1,000 persons, and it may be well to observe, that at this moment I have not a single sick person on my list.
The experience of seven years has brought us to rely on a steady and uniform return of the seasons; the agriculturist ia enabled to carry on his operations in the field, both in seed time and harvest, with less interruption from inconstancy of weather, than in any other part of the world yet known. No excess of rains, or long continued droughts, occur to mar the fair prospects which cheer his labour ; he may safoly calculate on the result. The atock owner sees, in the condition of his sheep, goats, cattle, and horses, in those districts suited for grazing, a reasonable expectation of profitable return. All descriptions of animals and domestic fowls thrive well. Sheep and cattle, however, have been attacked by a disease, the symptoms of which, in both, are very similar ; and although considerahle attention has been given to this disorder, the remote cause has not yet been
clearly ascertained ; no particular diathesis is observable. It has chiefly appeared in flocks recently imported and in feeble condition, and in cattle engaged in long journeys in the bush, where the food is serubby and coarse. Floeks kept on low damp ground near the coast, or in high serubby ground, destitute of healthy grass, or in driving them across the Darling range of hills into the interior, through serubby country, have, too, been principally affected, owing probably to a deficiency of a requisite bitter stimula. tive quality in this kind of food, of difficult digestion in stomachs so peculiarly formed as those of ruminating animals. Horses are fed on the same ground, without the least injury. The disorder seems the most frequent at the commencement of the wet season, the immediate cause heing the condition of the stomachs, overloaded with hard indigestible food, in a state of fermentation, from food eaten after rain, and consepuent pressure on the beart and lungs. The mode of treatment is urgently indicated, namely, bleeding and stimulants, spirits of turpentine, and afterwards a little salt; but, as death ensues a few minutes after the attack, which affects many at the same time, the utmost activity is required.

Meteorological Journal for 1834.

| August . . | 72 | 43 | 30.36 | 29.59 | $\begin{aligned} & \text { E. by N. } \\ & \text { W. by S. } \\ & \text { N. W. } \end{aligned}$ | Cool ; rain and gales five days, lightning and thunder two. |
| September | 78 | 42 | 30.36 | 29.95 | E. S. S. W. | Cool, squally, sultry, gales; very variable; a few ahowers. |
| October. . | 80 | 44 | 30.28 | 29.62 | S. W. | Clear, fine, ahowery ; on the 10 th and 11 th, rain, lightning, and thunder. |
| November | 82 | 46 | 30.31 | 29.85 | S. W. | Variable ; four days' rain ; sultry and oppressive towards the end. |
| December | 95 | 70 | 30.32 | 29.69 | S. W. | Generally cool; three days' rain, one day lightning and thunder. |

Fogs are extremely rare; a haze overhanging the $\mid$ season, and spcedily dispelled by the sun's rays at an lagoons and rivers, not unfrequent in the summer early hour; miaria or noxious exhalations unknuwn.

The land and sea breezes veering round throughout the year with extreme regularity, and the rainy senaon remarkably certain. A slight affection of the eyelids is the only disease peculiar to the clime, generally appearing in the month of March. The cure is slmple and effectual, except with the Ignorant and obstinate.
VI. In this part of New Holland the food of the natives embraces a great variety of articles. In the estuaries and rivers, and on the coast, there is ahundance of fish at certain periods of the year, and kangaroo of various sorts, together with opossums, dalgerts, and other amall animals, are obtained in considerahle numbers; roots and gums of several kinds are also used by them, and hirils' eggs, lizards, frogs, gruhs, and cray-fish from the swamps, are resorted to as varieties, or used in cases of urgent want. They do not appear to be reduced at any time to very great difficulties in procuring suhsistence, but their habits preclude the possibility of keeping any accumulated stock of the wecessary articles, and therefore their time and attention are almost constantly occupled in the pursuit of their daily food. As they have no fixed habitation, and do not practice any art tending to inerease "..e supply which nature has provided, it is probable that their numhers are strictly limited by this circumstance, and that they have been long stationary at their present amount.
The law which thus torbids any further increase, is the cause, moreover, of their dispersion throughout the territory, nud prevents them from entering into any larger confederacies than those which are neecssary for rendering most successful their hunting and fishing occupations. The tribes, as they are called, usnally comer:se shout 120 persons, of all nges and both sexes these are connected for the most part by relationship of hlood, although it is by no means uncommon to procure wives or to adopt strangers from neiglibouring tribes. The only species of control or government under which they live is founded on the influence of the strong over the weak, and the deference which is shown to the aged, and to the pretended powers of the magician or doctor. Certain usages established hy custom are frequently appealed to as rules of conduct. Of these, the principal relate to the right of individuals to certain portions of hunting ground, derived by inheritance from their immediate ancestors; to the practice of boring the cartilage of the nose of the young men on their admission to the rights of manhood; and to retaliation for injuries received, which all are enjoined as well as entitled to seek, whether the offender belong to the same or to a neighbouring community. It has been found very difficult to ascertain the exact locality or tribe to which individuals belong, in consequence of alliances which are very frequent amongst individuals of different tribes; this species of brotherhood by adoption, carries with it the obligation of hecoming parties to each other's quarrels, and although it appears to be followed by the advantsge of mutual protection, as far as such individuals are concerned, it gives rise at the same time to many hostilities. The intercourse between tribea is seldom of a friendly character; but it is remarkable that their contlicts seldom extend to the loss of lives. Almost continually engaged as they are in feuds arising out of the Invasion of each other's territory, or the abduction of each other's women, it might be expected, that when they met to fight, the weaker party would be exterminated, wherens these contests, after a great deal of clamour, and a few unimportant wounds, generaily
end in the murder of a child or of a female, hy mutual consent admitted as an atonement for the offence or ground of quarrel. Independent of theae occasional warlike meetings of trihes, almost every native is under an engagement to avenge at a convenient op. portunity, the death of some departed friend, or an in. sult prevlously offered to himself ; this purpose, whieh he cannot forego without diseredit, gives rise to acts of the greatest treachery, and not unfrequently ends in the surprise and sudden death of some individual belonging to the same tribe with the avenger, or of some of his neighbours. They rarely, therefore, sleen a second night in the same place; the spear seliom quits the hand of the man from boyhood till dcath; and they hecome accustomed to witness, endure, and practise the greatest outrages.
The personal qualities of some memhers of this peeuliar ace are superior to the condition in which they live ; a few of them are remarkable for symmetry of form and countenance, and the natural intelligence of many appears to be in the highest degree scute. The greater part, however, are, from hardship of life, and bodily injuries, disgusting specimens of the human race; and the deformity of old age, whether in the men or women, is usually accompanied by a concentration of all the vicious projensities to which their usages give rise.
In their intercourse with the whites, they accom. molate themselves with astonishing realiness to the language, the hahits, and even the weaknesses of their new friends. They are remarkably cheerful, and make themselves very useful in many enployments; but they are not to be relied upon, for in a great many instances it has been found, that after living for montlis in the house of a settler, they have been all along eniployed by the rest of the tribe as spies, for the purpose of conveying intelligence as to the hest point of attack on life or property. Living in a constant state of warfare, they are bold, crafty, and persevering, and lay their plans with juilgment, equal to the vigour with which they put them into execution. With such qualities as these, they would be too powerful as a nation for the present number of colonista, if it were not for their mistrust of eaeh other. They cannot combine their efforts, nor act on a concerted plan; for if they were to do so, there are many of them who would readily betray the rest, and voluntarily lead the whites to their retreat for the sake of a few pounds of tlour.
It is impossible to give any accurate account of their numbers ; 750 have heen known to visit Petth from the districts surrounding it to the extent of 10 miles each way. The nearest estimate of the populs. tion appesrs to he that which assigns one native to each portion of ground of two square miles.
From the followingreturn, as compared with asimilar document drawn up in 1832, it appears that the popuIntion has increased since the latter period from 1,510 to 2,032 . The increase has been priucipally oving to the excess of births over deaths; the number of persons who have settled in the colony, since that perind, having exceeded only by a few those who have quitted it.
On examining the return, it will he perceived, that the male adult population is limited to 788 , a number by far too few to accomplish, in a short time, the establishment of a new colony; and scareely sufficient, with the aid of the amall military force employed, to protect themselves, and their property, from the depredations of the uatives. It is satisfactory, howere, to observe so large a proportion of females, and of

Return

Nute．－During the two first months of the present year，1836，acveral persons and families have removed from the Towns of Perth and Fremantic to York and the＂Murray＂districts，with agricultural views．

The proportion of the sexes is，adults，male and female， 1 to 0.607 ；Between 14 and 21.1 to 0.820 ； Under 14 years， 4 to 0.902 ；Total， 5 to 3 ，or 1 to 0.605 ．

This list is exclusive of the military stationed in phe ahove districts，consisting of

Offirers and privates，86；Women， 18 ；Children， 29 ；Tulal， 133.
There werf bor：n，during the year 1835，in the nbuve district， $\mathrm{f} / \mathrm{\|}$ A／srriages， 4 ；Burlals， 24 ；Popu． lation of King（ieorge＇s Sound，exclusive of military， Ist Jan．Iniff， 160 ；Ditto of Auguata（no returns） entimated at， 40 ；＇Total， 200.

VII，［13．13．1837．］The fifirochial divisions of the Colony cannot he ascertained．

There are no churches，but divine service in per－ formed every Suiday in the Court House Perth，and will contain abont 200 persons；the geaeral atten－ dance is about 150．The Colsuial Chaplain who preaches here has a salary of fe．50 per annimin and an allownace of $£ 50$ per annum in lieu of a parsonage house；of dissenting places of worship there is one at Perth belonging to the Wesleyan methodists， latcly enlarged and will contain about 100 persons， and one at Guilalford，under the patronage of the Western Australian Missionary Society capable of containing ahout 100 persona．

In the year 1835 an association was formed in loonlon for promoting religion according to the rites of the Church of England，under the designation of the＂Western Australian Missionary Society．＂An Italian gentleman of the name of Giustiniani was ae－ lected as their first minister ；le arrived here in July last year，and has erected a chapel and achoolhouse at Guildforid，and has commenced the formation of a farm on the Swan River，at which it is understood to be the intention of the society to collect natives，with a view to their instruction and future civilization．

VIII．［B．B．1837．］There are two public achools， one at Perth containing 20 male，and 12 female scholars：and one at Freemantle containing 22 male and 11 female scholars．The master of each school is allowed $\mathbf{i} 0 l$ ．per aunum by government．

At＂Albany Plantagenct＂there is also one private school．

There are published in the colony at present，two weekly newspapers，independent of the Government Gazette．The oldest of these has existed under the name of the＂Perth Gazette＂for six or seven years ； the other，under the title of the＂Swan River Guardian，＂commenced its publication in last year， as the friend of the people and the corrector of abuses．

If we return from the colony down to a later period，its progress in population，civilization，\＆c． would be more fully shewn ：the Secretary of State for the Colonies，has expressed hinself perfectly satisfied with the improvement that has of late taken place，and looks forward confidingly to the ultimate flourishing state of the settlement，which has now surmounted its primnry difficulties．

IX．Few subjects deserve more serious considera－ tion，than the moral condition of a population．The following Synopsis of the Stnte of Crime，and Syatem of Criminal Jurisprudence，has been prepared by W． H．Mackic，Esq．，Chairman of the Quarter Session， and may，probably，indicute the state of morals in this community，in a more satisfactory manner than any commentary on the sulject．

Number of persons, charged with crime, convicted, acquittcd, and discharged for want of prosecution, and against whom no bills were found, from the first Quarter Sessions of the Peace, held in the Colony, (July, 1830, inclusive,) to the termination of the January Sessions, 1836, inclusive :-

Punishments.-Transported (to New South Wales and Van Diemen's Land):-for life, 1 ; fourteen years, 4 ; seven years, 22 ; whipped, 13; imprisoned for two
years, 2 ; do. for one year, 6 ; do. for nine months, 1; various periods, from fourteen days to six months 74, including eleven of the thirteen whipped; tried and discharged, 2 ; pardoned by the Governor (convicted of perjury, and sentenced to transportation), 1 .

Drunkenness, and its usual attendants, assaults and affrays, have been the most frequent offences, in which the magistratea have exercised their summary jurisdiction.

Specific Crimes and Misdemeanours, with the Number of Persons charged with each, in the before. mentioned period.

It cannot he denicd that the foregoing exhibita large proportion of crime; and from the quantity of spirits conaumed, sucls a result might necessarily he expected. It is to be hoped that as industry extends, the proportion of criminals to the rest of the population will be considerably diminished.
It is descrving of record in this place, that since the foundation of the settlement in 1829, to the present date, the law has not found occasion to impose seltence of death upon any individual.

X . The local administration is provided for by the Royal Commission, and instructions, and by Act of Parliament, and an Order in Council dated lst November, 1830.
The legislative power conferred on the Governor and the members of the Legislative Council has been hitherto exercised only in the adoption of certain recent Acts of Parliament of a general tendency, and in the passing of a few ordinances connected with matters of local interest.

The state of the law in this colony is therefore as yet in atrict accordance with the letter and spirit of the law of England, as far as it is applicable to the circumstances of this country. In the absence of every institution foreign to the practice of the mother country, as well as the non-existence of foreign customs, language, and blool, in this settlement, it possesses an attraction for free emigrants in a great degree peculiar to itself.
XI. Comparative yearly statement of the revenue of Swan River, [B. B.] Separate tax or duty, reguiar revenue, $1835,3,308 l$., casual revenue, $946 l$., total, $4,254 l$; ; 1836 , regular revenue, $3,062 l$., casual revenue, 799l., total, 3,86il.; 1837, regular revenue $3,313 l$. casual revenue, $1,273 l$., total, $4,586 l$.
Comparative yearly statement of the expenditure of Swan River. Separate head of expenditure, 1835, salaries of public officers, $1,06 \pm l$., contingencies, 3,779l., total, $4, \mathrm{x} 41 \mathrm{l}$.; 1836, s:-ries of public officers, 842l., contingencies, $3,614 l$., total, 4,456l.; 1837, salarics ol public officers, $869 l$., contingencies, $3,043 l$., total, $3,910 l$.

Estimate of the charge of defraying the expenses of the settlement of Western Australia, from the 1st April 1838 to the 3 1st March 1839. Salaries to the governor, 800 l . ; ditto colonial secretary and clerk of the councils, $400 \%$. ; do. first clerk of do. 150l. ; second clerk to do. $75 \%$; do. messengers to councils and secretary, $50 l$. ; do. surveyor. general, 400l. ; do. draftsmen and oftice-keeper, 1501 ; do. clerk to surveyorgeneral, 500 . ; do. colonial chaplain, 250l.; do. colonial surgeon, 2731.; do. commissioner of civil court, and chairman of quarter aessions acting as civil and criminal judge, $300 l$. do. advocate general, $300 l$; do. clerk of the poace and registrar of civil court (in lieu of fees in Crown cases), 100l.; do. sheriff (in lieu of fees in Crown cases), l00l.; (lo. six residents, or resident magistrates, at $100 \%$. each, $600 l$.; allowance to officer commanding the troops, $182 l$.; total salaries, 4,181l.

Contingenciea, \&e, House-rent for colonial chaplain, $50 l$.; atationary for public departments, $150 l$.; maintenance of government vessel, $708 l$.; hire of surveyor-gencral's office, 701.; sum required towards the erection of puhlic olllies, 9891 .; tutal contingencies, $1,967 l$.; total charges, 6,1491 .

Remarks.-In the estimate for the proceeding year the grant towards the erection of public buildings was omitted, it being proposed that such charge should in future be defrayed from the revenues of the colony.

Shortly after the estimate had been submitted to Parliament, a report was received from governor Sir James Stirling, stating that on principles of economy as well as public convenience, he had been induced to contract for the conatruction of buildings for the offices of the colonial secretary, the registrar of deeds, \&c., the collector of revenue, the survey department, the colonial treasurer, and the commissariat. To complete these buildings, the sum of 989 l .15 s .6 d . has been included in the present estimate, under the head of contingencies. An increase of $25 l$. is made in each of the salaries of the first and second clerks in the office of the colonial secretary, it having been found impracticnble to procure or retain the services of competent persons at a lower rate. The sum of 2001 ., which appeared under the same head in the last estimate for arrears of salary to two additional government agents, has been omitted. There is an increase on the last ycar's estimate of 840 l .15 s .6 d. ; but it is less by $1,229 l .14 \mathrm{~s}$. 6d. than the estimate for the year 1836-7.

Commissariat.-Pay of the troops, provisions, \&c. Amount paid fur supplies, 2,761l.; ditto on account of allowances for fuel and light, 131l.; do. for miscellaneous purchases, $8 \%$; do. for land and water transport, $435 l$.; do. for extra staff of commissariat department, 196l.; do. for military allowances, $506 l$; do. for special services, $1,041 l$. ; do. for contingencies, $787 l$. ; do. for military pay, $2,869 l$.; pay of commis. sariat officers, $552 l$.; Greenwich pensions, $92 l$.; consignment of specie and bills, 1,498l. ; special disbursements, $166 i l$. ; total, $11,021 l$.

The funds for the support of the ahove-mentioned services were drawn from the following sources:-

From the cominlssariat chest, $11,021 l$.; do. colonial, 3,912l.; do. parliamentary grant, 6,840l.

The annual cost, up to March 1837, of the civil, judicial, ecclesiastical, and military departments, was in the following proportions:-

Recapitulation of the Eatablishment, Civil Estab lishment, 3,525l.; contingent expenditure, 1,449l.; judicial establishment, $1,005 l$.; contingent expenditure, $441 l$.; ecclesiastical establishment, 250l., colltingent expenditure, $100 l$.; miscellancous expenditure, 3,981 $l$.; penaions, 0 ; grand total, $10,752 l$.

With regard to the public establishments, it is necessary to observe, that the population is scattered over a very wide extent of country. The causes of this dispersion were, in the firat place, the annexation of the settlement at King George's Sound, and, In the second place, the mode in which lands were granted to the colonists. Having the power to select large
grants in distriets suitable to their views, the settlers naturally availed themselves of their freedom of choice; and lands being sulhject to forfeiture if not improved within a certain number of years, they have been impelled by the fear of losing them to locate themselves upon their grounds, however remote their position. This dispersion has been further increased by the nature of the country, in respect of its general inferiority of soil, or the absence of water in certain localities.

As all had equal reason to expect protection, and the assistance of the government, it became necessary to form stations at nany different points, by which the expenditure has been much increased; and establishments, which would have been sufficient for the wants of a much larger population if confined within reasonable limits, have not sufficed for the wants of this eolony, embracing as it does so many separate and distant stations.

In this department, a considerable increase of mili. tary force is requisite for the protection of the colo. nists. Whatever may have been the views of the Government on the earlier formation of this settlement, the settlers consider themselves by its declarations entitled to be protected, and secured in the quict enjoyment of the lands assigned to them, or bought by their outlay. Without this they cannot fulfil the location duties, nor can they make any pro. gress in the extension of the settlement. This protection of the white population is moreaver necessary to the security of the uboriginal race; if not given, a constant state of warfare and violence betwcen the two must follow, and while the former is hindered in his progress towards the establishment of the country, the latter will be rendered vindictive and cruel in proportion to the injury which he receives from, and intlicts upon, the settler.

Statement of the stock and crops at King George's Sound, the Vasse, and Port Augusta, taken December, 1836: Wheat, barley, and oats (acres), 182 ; gardens and potatoe crop, $32 \frac{1}{2}$; sheep (head), 409 ; goats, 55 ; horned cattle, 101 ; horses, 25 ; swine, 55.
The further extension of tillage is impeded by the want of labourers; and the very high wages demanded, compel those who priricipally depend on hired workmen, in rural occupations, to seek the means of employing their capital in pursuits less dependent on the whims and caprices of the labouring class. In consequence of this, the raising of wheat will be confined to those families the members of which are sufficient for the work of the farm on which they live; and the higher class of settlers will endeavour to invest their means in the rearing of live stock. The sdaptation of this country to the purposes of wheat growing may be, however, considered as proved beyond all doubt; but this article cannot be profitably cultivated for exportation until there is a greater command of labour. The culture of the vine, fig, peach, and melon tribe, has been carried thus early to a considerable extent; and if ever it should be desirable for the mother country to possess a winegrowing colony, the soils and seasons of this country afford reasonable ground for anticipating a successful issue to such a speculation. The return of profit on sheep-keeping may be estimated in the gross at 75 per cent. per annum. The rate is undoubtedly higher here, where the price of meat is high, and the value of land low, than it can be in New South Wales and Van Diemen's Land. After deducting the expenses of shepherding, and allowing a reasonable rent for the land on which the flock is maintained, a net profit remains to the owner of about 50 per cent. per annum. Such a profit as this, combined with the means of extending indefinitely the number of sheep farms, must attract to this branch of investment, in the course of a few years, a large amount of capital. At present the absence of funds within the colony applicable to such purposes, and the prejudices which unjustly exist in respect of its capabilities, together with the mishaps attendant on the importation of sheep from other places, impose obstacles on its extension, apart from natural increase.
Horses and cattle may be expected to multiply rapidly from this time forward. In addition to the number of the latter, stated in the preceding return, there are known to exist four or five wild herds in diffcrent parts of the colony, which have maintained themselves without protection against the natives for several years, and are rapidly increasing their number.
Looking to the small number of colonists, and to the few years they have been established in this country, the extent of land in cultivation, and the quantity of useful animals in their possession, are highly aatisfactory. The settlement is now enabled to feel, that in less than cight years from its foundation, it has arrived at the point of producing its own subsistence, and is entirely independent of other places for the support of its inhabitants.
The arts connected with building and agricultural implement making, employ a considerable portion of the workmen of the settlement ; and it is, in consequence, better provided with the products of the first named of those arts, than is usual in countries so recently occupied. Many convenient and substantial houscs have been erected in the towns, and by the
employment thereby given to artificers, a large number have been induced to remain, who would otherwise have quitted the settlement ; carpenters, masons, plasterers, blacksmiths, painters, and other artisans, have hitherto received high wages; but some of them are begimning to turn their thoughts to rural occu. pations, in consequence of an anticipated diminution of employment in their proper pursuits. Being usually superior in education, and in steadiness of conduct, to labourers in general, the class to which they belong is one of the most valuable in colonies, and therefore it is not to be regretted that a very large sum has been invested in buildings, by the outlay of which they have been induced to settle in this country.

Since the carliest discovery of this coast, it has been known to abound in various descriptions of fish. The Malays have carried on, for at least 200 years, an extensive and profitable tripang and tortoiseshell fishery, on the north-west coast. Dampier, Baudin, and King, at different periods, have reported the existence of astonishing numbers of whales in the adjacent seas; and our own experience since the establishment of the colony, and still more recently since whale fishing commenced in its bays, about 12 months ago, confirms the reports of the earlier navigators. This abundance of fish is probably connected with the existence of a bank, which adjoins the shore from the northern to the southern extremity of the colony. On this shoal, which extends for 30 to 40 miles from the land, and which is composed, for the most part, of calcareous or coralline substances, there exist several varieties of edible fish, which admit of being cured for exportation.

The various descriptions of fishery which may be carried on under such circumstances must eventually employ a large amount of capital, and a great number of seamen ; markets for their produce are open in China, as well as in Europe.

At present there are only four whaling establishments or associations ; these are not as yet upon an efficient footing, but their success has been great enough to ensure their future improvement and extension. The catching of fish for the purposes of food gives profitable employment to a fetv boatmen; and the convenience afforded in the estuaries for learning in smooth water the art of managing boats, seems likely to attract to maritime pursuits a large number of young men.

Boat building is carried on with much success by two establishments, and some of the native woods are found to be well suited to those purposes.

The operations of the miller, baker, and brewer, tanner, shoemaker, and clothicr, are in course of im provement and extension; and the community, although limited to a very small number of persons, suffers no serious inconvenience from the absence of any of the arts and trades which administer to the primary wants of man.

The number of persons exclusively engaged in the civil, judicial, clerical and military branches of the public service, amounts to 160 .

In other public offices, independent of the government, such as printers, innkeepers, \&c. there are employed about 34: as this description of persona, however necessary their labours may be to the general welfare, do not contribute directly to the produce of commodities, their number, together with that of their families, must be deducted from the gross popu lation, in comparing the productive classes with the products of labour.

The internal conaumption of commodities having been of late in a great measure limited to the products of the land, and the importation of foreign articles having decreased in proportion, the mercantile part of the community has bad much reason to complain of the want of business in general. The traffic in tea, sugar, spirits, clothing, harness, earthenware, glass, and ammunition, has becn carried on at very high prices, and with great profit. Trnders being a class of persons whose capital is always available for nny speculation which may offer, and colonial farmers being always in need of advances, the mercantile men in this community, possessed of menns, have frequent opportunities of laying them ont to ndvantage, either by monopolizing particular commoditles, or by giving credits at high interest ; they have therefore had their full share of the gencral prosperity, even in the absence of any considerable demand for merchandize. They are at this time looking forward to an increase in the exports of the colony, as the probable cause of an extension of business; in the meantime, money, in proportion to the reasonable demand for it, is abundant. A joint-stock bank has been recently established, and facilitates the transnction of husiness. The principles on which it is founded are such as to render it an institution of a most beneficial character, while the names of the subscribers, ns well as the cautions system of mnnagement adopted, ensure to the pullic the most judicious and equitable employment of its means. Its discount on bills are done at the rate of $12 \downarrow \mathrm{p}$ per cent. per annum, and it allows depositors, under the usual regulations of savings' banks, an interest at the rate of five per cent.
XIII. Amount of coins in circulation, nhout 15,0001 . Amount of paper currency in circulation, about 400,0001 ., consisting of 1 . notes issued by the Commissariat on account of Government, and not yet brought in to be exchanged for British silver money. -[B. B.]
Coins.-British gold and silver, dollars at $4 s .4 d$. each, and rupees at 2s. each - [B. B.]
Exchange.-The bills of the Commissariat upon the treasury have been litherto negotiated at the rate of $1 \frac{1}{2}$ per cent. premium, but the demand for them is gradually decrensing, and will cease entirely when the value of colonial exports is equal to the value of goods inported, unless an increase of population from without extend the demand for imported commodities. Private bills on England are nsually subjected to a discount of five per cent., and this appenrs to be a reasonable charge where there are no considerable remittances to be effected.
The establishment of a bnak had been long an object of desire in the colony. The want of such an institution occasioned the greatest inconveniences on the transfer of property, as well as in the safe custody of balances in hand The funds applicable to such purposes could not, however, be obtnined in the colony until this ycar. On the 1st of June, however, a joint-stock bank commenced business, and is now in effective operation, with the fairest prospect of success. Being supported by 80 individuals of respectability, it" credit is undoubted; nnd as it proposes to limit its discounts to actunl transnctions in the course of businesa, and to issue notes to a very small amount, it will yield a safe and sufficient profit to the proprictors, and promote materially the general interests of the settlement.
Its ostenaible capital is $\mathbf{0}, 000 \mathrm{l}$., but its credit is so good that it has not been found necessary to call for
more than an eighth part of its proposed funds, in consequence of deposits being made by its customers at its commencement, to the extent of $4,000 l$. It is also proposed to render it available ns a bank for savings, and if it succeed in this respect, it will tend much to crente habits of frugality and temperance amongst the labouring people.

Weights and Measures are British imperial.
Mimufuctories, Mines and Fisheries.-Brewery at Perth. Two boat builders; 1 at Perth and 1 at Fre. mantle. Three lime burners; $\boldsymbol{2}^{2}$ at Perth and I at Freemantle. Three brick makers at Perth. Three Flourmills by water; 2 at Perth and 1 at Upper Swan River. Two windmills at Perth; and 4 horse. mills at Perth, used tor various purposes. Two boats employed at seal fishing; 10 ditto recently established for whaling.

There are at present four establishments of tlis description ; the first at Frcemantle, consisting of 30 subscribers, at the rate of $50 l$. each; the second, called the " Perth Fishing Company," is divided into 60 shares at 15l. cach. The fishing ground of these two companies is nenr the entrance of the Swan River. The two other establishments occupy sta. tions in Doubtfill Island Bay, on the south coast; one of these is the property of a gentleman namad Cheyne, the other belongs to a Mr. Sherratt; the latter was established lnst year, and found abundance of employment. It is supposed that the aggregate produce of the fisheries in the present season will amount to $4,200 \mathrm{l}$. in oil, whalchone, and seal skins.

The following statenents will afford information as to the actual population, and to the value of build. ings and improvements effected in the Towns.

Estimated valuation of improvements in Perth:Number of nllotments granted, 422; ditto suburlian ditto, 15 ; ditto milcs of fencing, about 35 , value nhout $5,600 \ell$. ; ditto houses nbout 350 , value about 30,000. ; Vnluc of suburban improvements, about 4,000l.; ditto gardens ditto, 2,000l; mills, 3,0001, ditto public works, $15,000 \mathrm{l}$. Total value, say ahout 50,000l.

In Fremantle :-Number of allotments granted, 430 ; ditto miles of fencing, about 20 , value ahout 3,200l.; ditto houses, alout 300, value about $23,000 l_{;}$ gardens, 5001 .; private works of public utility, $500{ }_{3}$; works undertnken by companies, 800l; public works, 2,3006 . Total valuc, say nbout, 22,0006 .

Perth, 50,000l.; Fremantle, 2x,000l.; Guildford, 5,000l.; Attiany, 5,000t.; Augusta, 2,0001.; Kelmscott, York, Peel Town, 1,7501. ; Busselton, 8001. King's Town, 500l. Total value of improvements in all the towns, say about, 93,050 .
Acricultural Soriely.-This institution had its be. ginning in the first year of the settlement; it eom. prises almost all the owners of land; its members are ndmitted by ballot; the regular meetings take place on a fixed day in each punter of the year, and ans usually well attended. The socicty has promoted good conduct amongst farm servants by giving distinctions and prizes to the best conducted and most efficient labourers, and in other respects it has tended, in 1 very considerable degree, to promote the customary objects of such institutions.
Condition of the Colimists.-In regard to the condition of the colonists, the most inportant consile. ration is the aggregate wealth of the community. The following Table exhibits an accurate statement in column A. of the amount of the several descriptions of property within the colony at the preend time, and in column B, the proportionate or avenge

Wages of common labour by
Ditto artificers
which have been assiduously propagated as to the failure of the attempt at colonization in this quarter. So far is this from the truth, that it may be fairly asked, with reference to the table above, in what other colony are the colonists, on an average, in a more prosperous condition than in this, or in possession of larger means for future welfare?

After these remarks, it is unnecessary to go into any detailed account of the condition of the settlers at large, as to fond, lodging, clothing and general comfort; even those who have the smallest share in the aggregate wealth, or indeed no share at all, may attais to comparative affluence by their own labour, at the present rate of wages, \&e., and it is undoub:edly in the power of the poorest individual, who is free from bodily intirmity, and from vicious propensities, to procure tor himself in this country, by industry, not only the necessaries of life, but future independence of labour.
The annexed interesting information was collected in the colony in 1836, every thing now wears a still brighter aspect.

The following vegetables thrive in this colony most abuudantly; turnips, cabbages, cauliflowers, radishes, lettuce, carrots, onions, potatoes, peas, kidney beans, beet, ©ic. These vegetables are highly productive, ergual in size, and generally superior in flavour, to those grown iu England. Long-pod and Windsor beans, are not productive. The various kinds of put-herbs, such as thyme, parsley, \&e. thrive extremely well. The various kinds of melons, such as the rock, cantelupe, romana, and water, bear fruit abundantly, and are of the finest quality, as to size and tlavour. Cucumbers grow remarkinbly fine and good; and pumpkibs and gourds are of large size, and very productive.

As regards fruit trees, they are not at present very numerous; those that were introdiced at the first of the settlewient, were, for the most part, lost to the colony through want of care, and ignorance of the nature of the country, and want of confidence on the part of individuals possessing them, as to the capa. bilities of the colony for producing the requisites for the support and comfort ot man. These prejudices, experience has happily removed; no one here, now doubts the capabilities of the colony: he is well aware that it can produce whatever is requisite for the welfire of the buman race. The fruits most plentiful, at present, are penches, tigs, and grapes; it is not possible tor any truits to be doing better than these are, as regards their productiveness, quality of fruit, and bealthy growth. The almond, hitherto, has not done well ; the walnut tree thrives well. Within the last year or two, $n$ considerable number of apple, pear, plum, orange, lemun, guavi and other trees, have been introduced; these are in a healthy and thriving state. The bnnana is also introduced, and, where sheltered from boisterous winds, promises to do well, particularly those planted under the protection of Mount Eliza, und the high shelving land of Perth, several of which are now bearing fruit. The hop plant is also doing well in several phaces.
The price of vegetables, at the time of their flrst production, after the settlement of the colony, was very high. The first cabhages were sold at $2 s .6 d$. ench; they are now worth one penny or one penny halfjenny each, of large size, full hearted, and of excellent guality, Putatoes were tirst sold at $1 s .8 d$. per b.; the price is now one permy halfpenny. Peas were sold $2 s$. per quart (unshelled); they were aold, during the present senson, at $1 s$, $6 d$, per peek.

Onions, three years ago, were worth 1s. $6 d$. per Jb. ; they are now, one penny. The first water melons aold as high as 10 s .6 d . each; they may now be purchaaed for $2 d$, or $3 d$, each. Rock melons were $5 s$. each; their present price is 6 d . Cucumbers, that at one time produced $9 d$., are now sold at one penny each. Two years ago, the grapes were aold at ${ }_{2 s}$. $6 d$. each lb.; their present price is $9 d$. Peaches, two yeara ago, (the first offered for sale,) were one shilling each; they are now sold for twopence each. Figs were four for a shilling ; they are now aixpence per dozen.

Perth is now, at all times, abundantly supplied with vegetablea, and it will not be any great length of time, before it is equally well supplied with fruit, as a great number of fruit trees have recently been introduced, and they are so easily propagated by cuttings in the colony. Cuttings, in many instances, bear fruit the second year after planting; and abundantly, the third year of their growth. The large vine, in the government garden, was introduced into the colony, by Mr. Macfaull; it has been planted in its present aituation, about four years. Two years ago, it made shoots, upwards of 30 feet in length, in different directions, $s u$ as to cover an area of more than 60 feet in one year; it has borne as much as 100 weight of grapes in a season ; but not having hitherto been cultivated, with a view of producing truit, but of cuttings for propagation, it has been cut down very cloae every year. Had it have been trained, with a view of producing fruit, it is supposed it would have yielded upwards of three hundred weight yearly. A great variety of grape vines are now introduced into the colony; those introduced by Mr. L. Leake, and planted under Mount Eliza, are of very superior quality, both as regards the size and flavour of the fruit. There can be no doubt, but this will prove a fine country for the growth of the vine, soil and climate being both in its favout. Fruit trces, of most kinds, are of much nore rapid growth in the colony than in England. The peach trees in Government Garden, began to bear fruit when they were little more than two years old, (they were raised from the atone,) and have attained a height of from eight to ten feet ; and other treea grow with equal rapidity.

With reapect to animal food the following information has been collected; in the latter part of the year 1829, 1830, and 1831, a great number of sheep and cattle were imported from Van Diemen's Land. Not less than 3,500 of the former ; but in consequence of the general opinion, then entertained, that there was little land capable of grazing stock, (the land to the eaat of the Darling Range not having then been explored, nearly the whole of them were killed, to supply the ships of war, during those years moored in Cockburn Sound, viz. the Sulphur, Cruiser, and Success, at $9 d$. per lb., the price to private individuals being at the same time one shilling.

At the same time, Mr. Lurd, and Mr. Bryant, imported a number of horned cattle, abcut 60 head, a great part of which strajed away into the Bush, where they still continue, many about the unsettled upper country of the Murray River; the rest were killed for the men of war, at one shilling per lb . The Government, at this time, had a herd of cattle, which they occaaionally killed, and sold at the same price. The quality of the meat was very indifferent, the sheep being nearly all ewes, and in lamb, and in a poor weakly condition, from scab, and effects of the voyage; average weight, about 30 lbs . each. The horned cattle were all poor, having been recently
landed. In the year 1833, a few good wether sheep were landed from the " Dart," from Sydney, and were sold for thirty ahillings each, the meat being aold at one shilling per lb .
At this period, a few settlers were enabled to supply an increase of shecp and goats, for which the butcher would give 1s. $3 d$. per 1 b ., for retailing it againat 1s.6il. The contract for the supply to the troops, was taken at 1s. 4d. The colonial bred stock good. In 1834, a considerable number of horned cattle were imported by Captain Taylor, and sold at $£ 15$. per head. In 1835, the retail price continued to be from 1s. $4 d$. to $1 s .6 d$. per lb., the market being now prin. cipally supplied with colonial atock. The contract price, for the last quarter of this year, for the troops, was 1s. $2 d$. per lb. The colonial bred meat is of excellent quality and flavour. The average weight of lambs, 30 lbs ., and wethers, 45 lbs . each. The supply of mutton, up to the preaent period, has been tolerably abundant ; beef is abundant, but the demand too amall to enable the butcher to kill, with a cer. tainty of sale.

In addition to the above information, it may be observed, that, at several periods, during the first three or four years of the colony, it was almost im. possible to obtain fresh meat at any price. The supply of fish is generally good, as well at Perth as st Fremantle, a shilling or eighteenpence being sufficient for the purchase of a large fish.

The supply of bread, or flour, has been equally precarious and fluctuating, with that of other de scriptions of provisions; at times the market over. atocked with imported flour, selling at twopence; at other times difficult to be bought at one shilling per lb. At one period, a substitute for bread was solld at one shilling per lb ., composed of a small quantity of bad flour, rice, and potatoes. For the last fifteen months, however, the supply has been abundant, and the price steady, generally from three-pence to four. pence per lb.
The following table has been prepared at Swan River
in conformity as stated with the plan laid down in my first colonial work.
A.-Moveable property existing.-Sheep, 5,300, st 50 s each, $13,250 l$; Horses, 170 , at 35l. each, 6,9501 ; Horned cattle, 540, at 12l. each, 6,480l.; Goats, 500, at 30s. cach, 750l.; Swine, 550, at 20s. each, 5501 .; Dogs, 500l.; Crafts, boats, and gear, 3,000l.; Fur. niture in houses, $10,000 l$.; Clothing for 1683 persons, at $5 l$. each, $8,415 l$.; Farming implements, machinery, \&c., 5,000 . ; Merchandize on hand, 15,000l.; Bul. lion, coin, \&c., 5,000l.
B.-Houses, 375 in Perth and Fremantle, 30,0001.; Land cultivated, 1579 acres, at $15 l$. per acre, including farm, 23,685l.; Land granted, and wholly or in part occupied, as sheep or stock runs, 160,000 acres, at 5 s . per acre, $40,000 \mathrm{l}$. ; Land granted, remaining unoccupied, $1,379,616$ acres, at $2 s$. per acre 137,9611 Public buildings, jails, \&c., 13,000l.; Roads, bridges, and wharfs, $2,000 l$.; Grand Total, 321,541l.
[These tables are exclusive of a considerable pro. perty existing at King George's Suund, in four vessels of considerable tonnage, houses, \&c. \&c.]

Estimated value of property created or carsumes, whether of colonial production, or imported duing the year 1835. Animal food for 1,892 persons, at l001hs. per annum each, $189,200 \mathrm{lbs}$., at ls . per lb . $9,460 l$. ; salted meat, imported beef, pork, and tongues, for 1,892 persons, at 150 lbs . per annum each, $283,800 \mathrm{lbs}$., at $5 \mathrm{ld} ., 5,912 l$. ; fish for 1,000 person., 100 lbs . each per annum, $100,000 \mathrm{lbs}$., at $1 \frac{1}{2} d$. pet lon

625l.; in each per for the 3,547l.; st $0 \frac{1}{2} d$. ported fll annum, estimate butter, tea, suga per day swine, 8 or

## CHAPTER IV.-SOUTH AUSTRALIA.

Another portion of the vast island of New Holland has been recently erected into a British colony termed South Australia. The conditions under which it was established, will be best scen by the following abstract of the Act of Parliament framed and passed for the formation of the new settlement.
' The colony to be crected into a province under the name of South Australia, extending from the 132nd to the 141st degree of east longitude, and from the aouth coast, including the adjacent islands, northwards to the tropic of Capricorn.
'The whole of this territory within the above limits to be open to settlement by British subjects.
' Not to be governed by laws applying to other parts of Australia, but by thoae only expressly enacted for this colony.
'The colony in no case to be employed as the place of confinement of transported convicta.
' No waste or public lands to become private property, save by one means only; viz. by purchase at a flxed minimum price, or as much above that price as the competition of public auction may determine.
' Subject to the above restriction, and to the necessity of previous surveys, all persons, whether reaiding in the colony or Great Britain, to be free to acquire property in waste or public lnnd, in fee, and without limit, either as to quantity or situation.
'The whole of the purchase moncy of waste or puhlic land to be employed in conveying labourers, natives of the British isles, to the colony.
'The emigrants conveyed to the colony with the purchase money of waste land, to be of the two sexes in equal numbers; a preference amongst the applicanta for a passage cost-free being given to young married persons not having children; so that for any given outlay of their moncy, the purchasers of land may obtain the greatest amount of labour wherewith to cuitivate the land, and of population to enhance its value.
'Commissloners to be appointed by his Majesty to manage the disposal of public lands, the expenditure of the purchase-money thereof ns an emigration fund, and to diacharge some other duties relative to the colony.
'Until the colony be gettled, and the sales of waste or public Innds aliall have produced a fund adequate to the want of labour in the colony, the commis-
sioners to have authority to raise money on loan, by the issue of bonds or otherwise, bearing colonial interest, for the purpose of conveying selected labourera to the colony: so that the first body of emigrating capitalists going out to buy land, may from the first be supplied with labour. The commissioners being empowered, until such loan or loans be repaid, with intcrest, to apply all the proceeds of the aales of land in repayment of guch loans.
' For defraying (provisionally) the necessary expenses of the commission and of the colonial government, the commissioners to have authority to raise money on loan, by the issue of bonds or otherwise, and provided such expenditure do not exceed 200,000 . in the whole, the amount thereof to be deemed a colonial debt, and secured upon the entire revenue of the colony.
'The authority of the commissioners to continue until the colony having attained a certain population, shall, through the means of a representative assembly, to be called by his Majesty, undertake to discharge the colonial debt, and to defray the cost of future government; when the colony is to receive such a constitution of local government as his Majesty, with the advice of his Privy Council, and with the authority of Parliament, may deem most desirable. The population of the province must amount to at least 50,000 before it be lawful for the Crown to frame a constitution of local government for the colony.'

The province contains an area of nearly 300,000 square milcs, or $192,000,000$ acres. It was taken possession of and an accessary made by Captain Hindinarsh R. N., ns governor, and the following proclamation fixed the site of the capital :--

## Poat Adelatde.

" Proclamation by his Excellency John Hindınarsh, Knight of the Royal Hanoverian Guelphic Order, Captain in the Royal Navy, Governor and Comman-der-in-Chicf of her Majesty's Province of South Atstralia.
"I do herelby direct that the two points at the entrance of the estuary on the castern shore of the Gulf of St. Viucent, in lat. 34 deg .46 min . leading from said gulf shall be called as follows, viz. :-The northern point slaall be calied Point Gray ; the southern point shall be called Point Malcolm; that the
entrance between these points into the port hereafter proclaimed shall be called Light'a Paasage; that the peninsula bounded on the eastern side by the port hereinafter proclaimed, and on the western side by the sea, shall be called Lefeard's Peninsula; that the island forming the north castern boundnry of the port hereinafter proclaimed shall be called Torrens Island; that the inlet forming the southern boundary of Torrens Island, and running to the eastward, ahall be called Angus Inlet; and that the larid lying to the southward of the aaid inlet, and extending from such inlet to the southern extremity of the port hereinafter proelaimed, and inland to a distance of three statute miles, and forming phrt of the eastern and south-eastern boundary of the said port, shall be called Fife Angus.
"That the estuary leading out of Gulf St. Vincent from a right line across the same from Point Grey to Point Malcolm, and from such right line up the said estuary to a right line drawn across the same, at the distance of one statute mile ahove the present landing place in Fife Angus, shall be the port of the town of Adelaide; and I do herchy proclaim the snme within the boundaries hereinbefore described to be a legal port, and direct that from henceforth it shall be called and known by the name of Port Adelaide.
" Given under my hand and the seal of the province, this 25 th day of May, 1837,
" John Hindmarsh."
Distances of several plaees from the settlement.

A full description of the country generally, so far as it is known, will be found in my "Colonial Library." The following topographical account has been furnished by the South Australinn Commissioners :-

The capital of the province of South Australia is situated on the eustern side of Gulf St. Vincent, in latitude 34. 57. south, and longitude 138. 43. east. All the accounts which have been received from the colony concur in extolling the salubrity of the elimate and the fertility of the soil, and go to confirm the opinion expressed by Captain Sturt in the report of his survey of this district of country, that between the eastern coast of Gulf St. Vincent and Lake Alexandrina, from Cape Jervis to the head of the Gulf, there are several millions of acres of highly fertile and beautiful land. The following statement respecting the climate, the soil, and the capabilities of the settlement, is extracted from a letter from Mr. John Morphett, addressed to several gentlemen in this country who had entrusted him with the management of their land in the colony.

Gulf St. Vincent is without island, roek, reef, or sandbank, and navigable by a stranger in the darkest might by means of the lead. I have heard it stnted by competent authorities that gales from the southward and westward do not blow home here; and I
know that some nautical men, besides the Surveyor. general, consider almost any part of it perfectly safe anchorage all the year round; in addition to which there is a safe and commodious harbour, adapted to admit, at all times, ahips of 300 tons burthen, and, Colonel Light atates, capable of being made practicable for vessels of double that tonnage.

The country from Cape Jervis upwards is very picturesque, and generally well timbered, but in the disposition of the trees more like an English park than what we could have imagined to be the character of untrodden wilds ; it is, therefore, well suited for depasturing shcep, and in many places, under present circumstances, quite open enough for the plough.
A range of bills, with valleys opening through to the back, runs down it at an average distance of 10 or 12 miles. Most of these hulls are good soil to the top, and all would furnish excellent teed during the winter. The country between there and the sea is very diversified, in some places undulating, in others level, with plains both open and elegantly wooded. There are many streams runniug into the sea, with very deep channels. These in summer are low, and a few of them Iry; but the entire range of hills in which these have their sources abounds in gullies and ravines, affording the greatest facilities for damming whereby an immense quantity of water inight be retained from the winter rains. This is important, as a system of irrigation might be applied here with great advantage The soil is generally excellent; a fine rich mould, with a substratum of clay.

The site fixed on by the Surveyor-general for the enpital of the colony is in about 34. 57. south. It is situated on gently rising ground on both banks of a pretty stream, commanding a view of an extensive plain, reaching down to the sea, over which the S. W. hreezes blow nine months out of the twelve, with invigorating freshness. As the back is a heau, tifully wooded comery, which extends for nbout six miles to the base of the first range of hitls, which are capped ly a high wooded one, catled, by Sturt, Mount Lofty, 2,400 feet above the level of the sea. To the left the hills gently curve round, and trend dowa to the coast at about nine miles from the town, enclosing a plain country, in some places open, in others wooded, having a few small streams and fresh water lakes. To the right the hills rum in a northerly and easterly dircction, continuing for 30 or 40 miles, where they appear to sink into a plain The country along their hase is well timbered : nearer the coast it is open and level.
At the distance of six miles from the town is the head of a creek, from 300 to 400 yards wide, communicating with the sea, in which vessels not drawing more than 18 feet water may be moored as easily and safely as in the London Docks.
The creek has two mouths or openings to the gulf, the most southerly of which, in latitude 35.47 , communicates with a chanuel formed by the coast, and sand-spits dry (at low water) about three miles long, with three and a balf, four, and five fathoms water, in which vessels may be moored commodiously and securely, having an entrance to the sea more than three fathoms deep, at high-water spring-tides.

The course of the ereek is almost due north and south, running parallel to the coast for the first four miles from the entrance; there is three and three and a half tithoms in the middle, and two fathoms close to the banks; afterwards for a mile it decpens to four and then for a mile and a hnlf it hecomes five fathems deep, and at the point, about seven miles from the
des the Surveyor it perfectly safe addition to which arbour, adapted to :ons burthen, and g made practicable

yor-general for the 4. 57. seuth. It is on both banks of a ew of an extensive a, over which the out of the twelre, the back is a beautends for about six of hills, which are ed, by Sturt, Mount of the sea. To the and trend down to the town, enclosing open, in others ns and fresh water a in a northerly and 30 or 40 miles, ,lain The country nearer the coast it

## om the town is the

 0 yards wide, comvessels not drawing oored as easily andenings to the gulf, itude 35.47 ., comby the coast, and t three miles long, five fathoms water commodiously aud the sea more than pring-tides. ost due north and it for the first four hree and three snd two fathons close it deeperis to four, comes five fathoms en miles from the
mouth, where it would be most convenient to form a communication between it and the capitnl, there is only a distance of one mile from the sea shore.

In the winter the creek receives the waters of the river, but, during the height of the summer, the river loses itself in a marsh before it reaches the creek. Nothing will be easier than to dnm the river above this point, and thus always keep it full ; and, as the country between Adelaide and the hatbour is a dead level, it will not be an expensive work to cut a canal from one to the other.
The climate is deeidedly fine; the licat latterly has been very great, but tempered by a pleasant sea breeze, which blows regularly through the summer, setting in about nine o'clock in the morning, and continuing till sunset.

As a proof of the healthiness of the climate, I may remark that there has heen scarcely a case of illness aince we landed, notwithstanding the privntions and hardships attendant upon the first settlement of a country, and we think nothing of slecping in the open air.

The anticipations we formed in England respecting the fall of rain on this coast, have been, I am bappy to say, realized; whilst at Sylney they have been very nearly without a drop of rain for the last five or six months, we have had an abunclance.

The grass grows at present in tufts, which I believe to be the case in all natural pastures; consequently the country would not now support half the number of sheep that it would be ahle to do a year or two years after the lands have been cropped close, and the roots more spread. It is gratifying to find that the country and climate are ndmirably adapted to sheep breeding, since wool is the staple commodity of Aus. tralia. In Van Diemen's Land, this branch of farming is calculated to yield an average nnnual protit of 80 per cent. But 1 should conceive the returns would he still more satisfactory here, as in the older settlements pasturage is scarce, and most of the sheep-runs are ohliged to be rented at a high rate; whereas in this colony a purchaser of land may obtain a square mile (or 640 acres) of pasturage at $40 s$. per annum.

1 have before alluded to the advantages to be expected from a communication with the Murray, and I now refer to it again as being a point of great importance. There are extensive and rich plains to the westward of the Warrangony Mountains, in which several hundred thousand sheep are depastured. The produce of these flocks is obliged to be carried over these mountains at an immense expense, in order to be shipped at Sydney. The yearly increasing flocks of the settlers of New South Wales will compel fresh explorations to the westward, and the formation of stock settlements still further from the point of embarkation. In addition to which, we may contidently expect the occupancy of that extensive and beantiful tract of country still nearer to us, discovered by Major Mitchell, and called Australia Felix. [South Australian Commissioners Report for 1837. House of Commons, January 26, 1838.]
The annexed report is by Captain Martin, of the John Pirie, in August, 1836.
"I landed in a fine bay round Cape Jarvis, about eight miles up St. Vincent's Gulf, in one of the loveliest spots I ever beheld, with a fine stream of water running through the middle of a level plain, and Colonel Light at once pronounced it to be one of the
best situations possible for a town. This bay is well sheltered from all winds except those from down the gulf and from the W. nud N. W., but it does not appear that the wints blow home, and, from the appearance of the heach and the shore, 1 should say there is never any sea running. The anchorage is good holding ground, nud I should not hesitate to ride all the year round in from ten to three fathoms water. Colonel Light pitched his tents on shore, made a garien, and put in his seeds and plants. He set to work surveying the bay.
"The country all about is delightful and well watered. I proceeded up St. Vincent's Gulf, on the east side, about 75 or 80 miles, till I got into a river sufficient for the John Pirie to enter at high water, and when in there is plenty of water. 1 went about 12 miles up this river, it runs close up to Mount lofty. The banks are low, composed of small islets, with low mangrove trecs growing in the water; but a little wny inland we came to a beautiful open country, fine plains as far as the eye can reach, very morlerately wooded, as are also the hills all fine rich dark brown soil, with a yellow clay of from two to four feet under it, runs of tine water in all directions. All from this part to the Cape is a continuation of fine land, plenty of grass for food for cattle and sheep; fine shady hill, moderately timbered. The princijal wood is the oak and mimosa. There are abundance of kangaroos and emus. There is one large plain of fine land between this river and the Cape, with three rivers running through From this to the lake Alexandrina is alrout 22 miles across the finest country that ever eyes beheld."

All accounts agree in the eligibility of the situation for a colony, and confirm the impression which I entertained when coasting along the southern shore of Australia in 1828.

Although balf the land in the colony should turn out to be waste and irreclaimable, and the remainder not even excced the price which has already been actually realized (from 12s. to 20s. per acre), there will still be $50,000,000 l$, worth of land to provide for the expenses of the government, atid to plant labourers on the soil. An excellent public spirited association bas been formed, termed the " South Australian Company," with a subscribed capital of $300,000 l$., who have already invested about 100,000l. in the purchase of land from the government commissioners, in the conveyance of labourers and stock to the colony, and in the establishment of whale fishing vessels, \&c.

We have no accurate census as yet of the colony it probably numbers upwards of 3,000 European inhalitants, of whem the females are in proportion to the males larger than is usually the case with infant settlements. The commissioners in their last report state that the total of the sums received for the sale of land up to the present time (1)ecember 22,1837 ) has amounted to $43,221 l$. Of this sum, $36,427 l$. were received before the date of the first annual report, and subsequently to that report 3,200 . have been paid for land in this country, and 3,59.4l. have been paid in the colony on account of the 563 town sections sold by auction, after the first 437 town sections had heen approprinted to the original purchasers of land orders in this country. The whole of the sales of tand hitherto effected is stated in the following tabular form :-

Return of the Sales of Lands from the commencement, on the 15 tis July, 1835, to the 7th December, 1837.

| Sales of Lands. | Number of Acres. | Receipts. |
| :---: | :---: | :---: |
| 437 land ordera included in the preliminary aalea, each order being for 135 acres | 5899. | £. ${ }^{\text {c }}$ 35397 |
| One deposit forfeited . . | . . | 20 |
| Land ordera, exclusive of the preliminary sales, each for 80 acres, at 12 s , per acre | 1600 | 960 |
| Ditto, at $20 s$. per acre . . | 3200 | 3200 |
| Investment for the purchase of land in the colony . | - | 50 |
| Amount received by the Commiasioner in the colony for sale of the town sections, not included in the 437 preliminary orders | .. | 3594 |
| Total | 63795 | 43221 |

No expense has been defrayed from the revenues of this country on account of the colony of South Aus. tralia, except the sum of $4,801 l$., paid by the naval departments on account of Her Majesty's ship ' Buffalo,' employed in the formation of the aettlement. Of this, $1,843 l$. has been repaid from the funds chargeable with the cost of conveying emigrants, and the remainder is to be repaid by the commissioners.
A return of all monies received by the sale of Public Lands in Southern Australia, in each year, from the lst of April 1835, to the latest period for which it can be prepared.-From 1 April 1835 to 31 March 1836, both incluaive, $36,377 l$. (including the preliminary aales, amounting to $35,000 l$., required by the Act 4 \& 5 Will. IV., c. 95). 1 April 1836 to 31 March 1837, both inclusive, 4,092l. (including $3,594 l$. 4 s ., received in the colony from the aale of town aections; a return of subsequent sales there has not been received in England). 1 April 1837 to 31 March 1838, both inclusive, 4,820 l. 1 April 1838 to 27 July 1838, both inclusive, 12,640l, Total, $57,929 l$.

A return of the number of Ships, and amount of their Tonnage, which have cleared out for South Australia from any Port of Great Britain and Ircland, in each year respectively, since 5 April 1835.-Year ended 5 April 1836, 3 ships, 535 tons; 1837, 11 ships, 3,139 tons; 1838, 14 ships, 5, 171 tons.
Copy of a letter from Robert Torrens, Esq., to James Stephens, Esq.

South Australian Colonization Office,
Sir,
Adelphi Terrace, 16 June 1838.
The Colonization Commissioners for South Australia, have the honour to acknowledge the reccipt of your letter of the 6th instant, and, in obedience to the directions of Lord Glenelg therein contained, to
encloae a " Return of the annual charge to be pro vided for hy the Local Government of South Austra lia, under the several heads of Interest on Debts con. tracted on the Credit of the Colonial Revenue; of Expenses of the Local Establiahment, and Contingen. cies; and of Expenses of the Eatablishment of the Colonization Commissioners in this Country, and Contingencies."

With respect to the debts contracted on the credit of the colonial securities, the Commissioners heg to remark that the amount has been very considerably enhanced by the necessity imposed upon them, by the provisions of the South Australian Act, of borrow. ing the sum of $20,000 l$. as a aecurity fund, hefore any step could be taken towards the establishment of the colony. Another cause of the large amount of the colonial debt has been the necessity the Commis. sioners were under of borrowing, for the purpose of fitting out a aurveying expedition for the purpose of exploring the almost unknown coasts and harbours of South Australia, and for selecting the site of the first settlement.

Though these incidental and preliminary expenses have avelled the colonial debt to twice the amount to which it might otherwise have risen, yet the pro. gress of the colony is such as to give to the Com. missioners a confident assurance that the resources of the colony will be equal to the discharge of sll it: obligations.
By the 20th section of the South Australian Ac. the public landa, and the monies arising from the sale thereof, are made available for the payment of the principal and interest of the colonial debt; and a: the actual rate at which, even at this early stage of its progress, the public lands of the colony have been selling during the present month, the amount of the land revenue for a aingle year would exceed the whole amount of the colonial debt, including all interest thereon.-I have, \&c. Robert Torrens, Chairman.
A Return of the Annual Charge to be provided for hy the Local Government of South Australia; viz.Interest on debts contracted on ti:a credit of the Co . lonial Revenue, viz. Bonds for secuity fund, 20,0001 , interest, 2,000l.; Other bonds to this date, 35,0001 , interest, 3,540l. Total, 5,540l.-Expenses of the Local Establishment and Contingencica from January to December 1838 ; viz. Salaries, 8,250l.; Contingencies, 1,750l. Total, 10,0001 .-Expenses, of the Estahlishment of the Colonization Commissions in this Country, and Contingencies, from January to Dec. 1838; viz. Salarics, 1,600l.; Contingencies, 1,000l. Total, 2,600l. Grand total, 18,140l.
The wages of labour are from 5s. to fis. per dey, Every account brings more and more valuable intelligence as to the quality of the soil, the extent of nayigable waters, and the salubrity of the climate. ## BOOK VI.-SOUTHERN AFRICA.

## CHAPTER I.-THE CAPE OF GOOD HOPE.

Section I. The Cape of Good Hope, situated at the southern extremity of Africa, is bounded by the vast southern ocean on the $S$., on the $W$. by the Atlantic, on the E. by the Indian ocean, and on the N. Uy the Gariep or Orange River, and by unexplored territories.
It is difficult to state the exact area of South Africa, extending from Cape Point, in $S$. latitude 34.23 to Delngoa Bay, a Portuguese settlement, on the E. coast in lat. 26. In order, however, to explain the nature of the country, it will be necessary to consider the British located territory, which after its conquest from the Dutch was thus defined (by Mr. Barrow, in his valuable view of the Cape, published in 1801) ; length of the colony, from W. to E. Cape Point to Kafferland, 580 miles; from River Koussie to Zuureberg, 520 ; breadth from S . to N . river Koussie to Cape Point, 315 miles; Nieuwveld mountains to Plettenhurg's Bay, 160; mouth of the Tush River to Plettenburg's baaken, 225 miles; which gives a parallelogram, whose mean length is 550 , and mean breadth 233 English miles, comprising an area of 128,150 square miles. The present boundaries may be considered as the Keiskamma River on the E., snd the Gariep or Orange River on the N., estimated at 600 miles from E. to W., and 330 miles from N . to S ., comprising an area of about 200,000 square miles, with a sea coast of upwards of 1,200 miles, from the Gariep on the western or Atlantic shore to the Keiskamma, on the eastern or Indian Ocean coast.
II. The lofty promontory of southern Africa was discovered by Bartholomew Diaz, in 1487, and called by him Cabo dos Tormentos, in consequence of the tempestuous weather experienced. The mutinous state of his crews, and the shattered condition of his ships, prevented Diaz from touching at the Cape; and on his return to Portugal, John II. directed the Promontory to be called Cabo da boa Esperança (Cape of Good Hope), in expectation of future beneficial results. In the confident expectation of discovering the long desired passage to India, another fleet was fitted out by John, and the command given to the celebrated Vasco de Gama, who, after contending with the fury of the elemients, and the despairing, almost mutinous, conduct of his compunions, doobled the Cape of Good Hope (ten years after its discovery), on the 20th November 1497.
The Cape of Good Hope continued thus to be resorted to as a temporary rendezvous by European mariners for more than a century, and dispatches for the Directors of the Dutch and English East India Companies were buried by the commanders of the outward-bound ships, with instructions cut on stone or wood, indlcating where letters and the ship and cargo registers were to be found by the homewardbound vessels. In 1620, two of the English East India Company's commanders (Humphrey Fitzher-

3 P
bert and Andrew Shillinge, their proclamation is dated "Bay of Saldanha, 3d July 1620 ,"), took formal possession of the Cape, in the name of King James, thirty years prior to the establishment of the Dutch colony. No settlement was, however formed; and the English, Portuguese, and Dutch continued indiscriminately to resort thither for shelter and refresh. ment; but in 1650 , the Dutch government, at the suggestion of a surgeon of one of their East India ships (Van Riebeck) who viewed the station as an admirable rendezvous, and also with a desire to form a barrier to their ludian dominions, resolved to colonize the Cape; a determination which was shortly after put in exceution by sending out 100 males, to whom were subsequently added 100 females, from the houses of industry in Amsterdam. From this periorl, for 180 years, the Cape of Good Hope remained in the possession of Holland.

The British government in 1795 took possession of the colony for the Prince of Orange, and it remained in our occupation for seven years, until the peace of Amiens, when, after various improvements, \&c., and contrary to the profound views of that profound statesman the Marquess of Wellesley, then Earl of Mornington, (see his Lordship's Despatches, vol. i., puhlished in 1836) it was most injudiciously restored to the Dutch nominally, but in reality to the French, who made use of the Hollanders as suited their convenience. On the renewal of the war with France, and its dependencies, it was wisely determined by our Government to recapture the Cape of Good Hope: and with this view, a well appointed force of 5,000 men, under Sir David Baird and Sir Home Popham, appeared off the Cape in January 1806. The colony has ever since remained in our possession. [For further details, see Colonial Library, vol. iii.]

The following is a list of the governors of the colony since its establishment in 1652, under the Dutch governmeat-Joan Anthony van Riebeck, 8th April 1652; Zacharias Wagenaar, 9th May 1662; Cornelius van Gualberg, 24tlı October 1666; Jacob Borghorst, 18th June 1668 ; Pieter Hackins, 2d June 1670; Coenraad van Breitenback, lst December 1671; Albert Van Breugel, 23d March 1672; Ysbrand Goske, 2d October 1672 ; Johan Bat (van Herentalsj, 2d January 1676 ; Hencbrik Crudat, 29th June 1678; Simon van der Stell, 14th October 1679; Willem Adriaan van der Stell, 11 th February 1699; Johan Cornelis d'Ableing, 3d June 1707; Louis van Assemburg, 1st February 1708; Maurits Posques de Chavornnes, 28th March 1714; Jan de la Fontaine (Acting) 8th September 1724; Pieter Gisbert Nood, 25th February 1727 ; Jan de la Fontaine (Acting), 24th April 1729; Ditto (Effective), 8th March 1730 ; Adraan Van Rervel, 14th November 1736; Daniel van den Hengel, 20th September 1737; Hendrik Swellengrebel, 14th April 1739; Ryk Tulhegh, 30th March 1751 ; Joachim van Plet-
tronburg, 12th August 1771; Pieter van Reede van Oudtshoorn (died on his passage to the colony, on board the ship 'Aaia'), 23d January 1773; Cornelis Jncob van de Graaff, 14th February 1785; Johsisnea lsnak Rhenius, 29th June 1791; Abr. J. Slaysken (Commissioner), 2d September 1793. Under the Brilish government-J. H. Craig, 1st September 1795; Earl Macnrtney, 23d May 1797; Sir Francis Jundas (Lieutenant-governor) 22d November 1798; Sir George Yonge, 18th December 1798; Sir Francis Jundas (Licutenant-governor), 20th April 1801; Jan. Willem Jaasens (Batavian Governor), 1st March 1803; Sir Javid Bnird, 10th January 1806 ; Hon. 11. G. Grey (Lieutenant-governor), 17th January 1807; Du Pre, Earl of Caledon, 22d May 1807; Hon. H. G. Grey (Lieutenant-governor) 5th July 1811; Sir John Francis Cradock, 6th September 1811; Hon. R. Mcade (Lieutenant-governor), 13th 1)ecember 1813 ; Lord Charles Henry Someract, 6th April 1814; Sir Kufane Shawe Donkin (acting duriug the absence of Lord C. Somerset), 13th January 1820 ; Lord Charles H. Somerset (Returned), 1 st December 1821; Richard Bourke (Lieutenant-governor), 8th February 1828; Sir Galbraith Lowry Cole (Governor), G.C.B., 6th August 182 $\downarrow$; Sir B. 1)'Urban (Governor), 1833; Major-general Najier, 1837.
III. Southern Africa is generally composed of chains of lofty mountains and intervening plains and vallies, extending east and west, excepting one range beginning at Table Bay, opposite to Cape Point, and stretching to the northward along the western coast about 200 miles, which is as far as Olifant's River.

The first great chain running east and west, has, along the southern coast, a beit of undulating land, varying from 10 to 30 miles in width, indented by several bays, and intersected by numerous streamlets; the soil is rich, the hills are well wooded, and the climate equabie and mild, from its proximity to the ocean.

The next great chain is the Zwarte Bergen or Black Mountains; more lofty and mgged than the coast chain, (in some places consisting of double and treble ranges) and divided from it by an interval of from 10 to 20 miles wide, the surface of which is very varied, in some places barren hills predominating, in others naked and arid plains of clay, termed by the colonists the karron, while widely interspersed are patches of well watered, fertile and beautiful grounds.

The third range is the Nicuwveld's Bergen : between these mountains and the second range is the Great Karroo, or Desert, an elevated steppe or terrace, nearly 300 miles in length from E. to W. 80 in breadth, and 1,000 fect above the sea, exhibiting a clayey surface thinly sprinkled over with sand, studded with occasional isolated hills, with here and there a few stunted shrubs which seldom receive a friendly shower.

Along the western coast the country also aacends in successive terraces, the most elevated of which (the Roggeveldt) unites with the last mentioned chain of mountains, (the Nicuwveldt). Indeed the Roggeveldt Bergen range may be said to commence in nearly 30 S . latitude, running nearly south for two and a half degrees, when its course is bent to the E. and subsequently to the N. E. until the range reaches Delagoa Bay, that part of it forming the north boundary of the Great Karroo, being termed Nieuw. velds Bergen.

At the most southern extremity there are several
eminences, the heights and namea of which sreTable Mountain, feet 3,582; Devil's Peak, 3,315; Lion's Head, 2,760; Lion's Rump, 1,143; Muy. zenherg, about 2,000; Elsey Peak, 1,200; Simon's Berg, or signal hill, 2,500; Paulusberg, 1,200; Con. stantia, 3,200; Cape Peak, 1,000; Hanglip Cape, 1,800 fect.
Cape Town, built immediately at the foot of Table Mountain, along the ahores of Table Bay, on a plain which rises wit.. an casy ascent towards the moun. tain, is regularly constructed, with straight and parallel streets intersecting each other at right an. gles, and shaded with clon or oak trees; the houses chiefiy of red brick or stone, of a good size, and generally with a stoup, or terrace, before the door, shaded with trees.
The population of the metropolis of South Africa is at preaent more than 20,000 , of whom nearly 15,000 are white inhabitants - the majority being Dutch, or of Dutch descent. With the exception of Sydney, New South Wales, there is a more English appearance about Cape Town than any colonial station I have visited. The squares are well laid out, the streeta extremely clean, the public edifices numerous anil substantial.
The castle situate on the left of the town (entering frum Table Bay), is a strong fortification command. ing the anchorage, and, if well defended, capable of successful reaistance against any force which may be brought against it. The fortress is pentagonal, with a broad fosse and regular outworks. It contains within its walls most of the public offices, and barracks for 1,000 men. There are other works defending Cape Town. Fort Knokke, on the east, is connected with the castle by a rampart called the sea-lines; and farther east as Craig's tower and battery. On the west side, and surrounding the Lion's Rump, are Rogge, Amsterdam, and Chavonne batteries, all hearing upon the anchorage. The en trance of the bay is commanded by a battery called the Mouillé.
The colonists are indebted to the paternal sway of the Earl of Caledon for the laying down of hydraulic pipes, by means of which a plentiful supply of es. cellent water is furnished to every part of the town, and ships' boats are supplied at the landing place.

The colony is divided into districts; the topography \&c. of each will be found in the 3 rd vol. of my Colo. nial Library.

Port Natal, the locale which the colonists are so desirous that our government should occupy, was purchased in 1689, by order of the Dutch East India Company, for the sum of 20,000 guilders, who directed the Governor of the Cape of Good Hope, M. F. de Cha. vonnes, by letter, dated Amsterdam, 23rd Dec. 1i19, to form an establishment at Port Natal, and to hold it with the purchased territory in its vicinity, as a dependency of this colony. In 1814, the Cape of Good Hope and its dependencies were formally ceded by the Dutch to Great Britain. Since the year 183t, Port Natal has been almost constantly occupicd by British subjects, who resided there with the express permission of the Governor of this colony.

The pastures of the country are of a character highly favourable. It is well wooded with large timber, and watered with upwards of 100 rivers and running streams, some of which are larger than the chief rivers of this colony. The soil is fertile, and has produced three crops of Kaffre and Indian Corn in the year. The rains are periodical, and the climate is cooler than that of the Cape, and highly salubrious. The Bay of evil's Peak, 3,315 ımp, 1,143; Muy. ak, 1,200 ; Simon' aberg, 1,200; Con. 00 ; Hanglip Cape,

re of a character highly with large timber, and 0 rivers and running er than the chicf river ile, and has produced ian Corn in the gear. e climate is cooler than alubrious. The Bay of

Port Natal is an exceedingly fine harbour, but the entrance is narrow, and has a bar of ahifting sand. There are six feet of water on the bar, with a run of six feet, and at spring tides the depth is 14 feet. [From a memorial to the King in Council, praying that Natal may be assigned a small Government establishment.]
IV. Southern Afriea is evidently of diluvian origin ; the formation of the peninsula is sufficiently indicated by the atructure of Table Mountain, which is composed of many strata, piled on each other in large tabular masses lying close together without any intermediate veins of earthy or other extraneous matter. The plain round the mountain is a blue srhistus, running in parallel ridges N. W. and S. Fi.., and interrupted by masses of a hard blue flinty rock.
The schistus reste on a stratum of atrong ironcoloured elay, varying from a pale yellow to a deep red, abounding with brown follated micrt, and interspersed with immense blocks of gronite, some of them crumbling into fragments, and others hollowed out as if by the hand of man, but really from the operation of time.

The experiment of boring in search of coal which took place under the government of Lord Macartney at Wynberg, a tongue of land projecting from the Talle Mountain, gave the following insight into the strata of the country : coal, 2 fect; blue soapy rock, 5 ; rhite seapy rock, 22; srrey smilstone with chey, 21; chocolute-hrown sandstone, 14 ; blueish soupy clay, 31, and strinted sand, red and white, containing chay, 33; total 128 feet.
The stratum of coal found on the banks of a deep rivulet flowing out from the Tigerberg (a hill that terminates the isthmus to the eastward) was horizontal with a suner-stratum of pipe-clay and white sandstone, and a sub-stratum of indurated clay. The coaly seam from ten inches to two feet in thickness, differed in quality at various places-sometimes it was in large ligneous blocks with visible traces of the bark, knots and grain of timber, and in the very middle of these, imbedded pieces of iron pyrites running through them in erooked veins, or lying in irregular lumps. Other parts of the stratum consisted of laminated coal of the nature of turf, burning with a clear fiame, and leaving a light white ash; the more compact and heavy coal gave out a sul. phurous smell, and left a slaty cauk with an ochreous crust. A vein of coal has recently been diacovered near the mouth of the Kroom River, which is accessible to small craft.
The most distinguishing feature of the mountains of Kaffreland, is a superineumbent stratum of sand. stone; huge detached masses are found in many places standing some feet above the surface of the earth. The upper part of a mountain visited by the Rev.S. Kay, presented to the eye immense precipices capped with large rhomboidal tables and projecting angles, forming a kind of cornice to the face. On the sides of the declivities, there was a description of prismatic quartz crystuls in a corroded state, and evidently undergoing the process of decomposition a circumstance which is perceptible in almost all the mountains of South Africa, and presenting a fair prospect of a yearly increasing extent of fertile soil.

Iron stone is everywhere obscrvable in Kaffraria, and likewise considerable quantities of ochre of diffcrent kinds, some specimens in a state of impalpable powder encloced in crustaceous coverings of a reddish colour, of the hardness and consistence of baked enrthenware; sometimes in single nodules of an inch
or two inchea in diameter, but more frequently in elisters of two, three, or four nodulea connected by neeks which are alao hollow; in these atones every shade of colour has been found except the greens, but the most common are those of a pale yellow and chocolate brown.

In the Graaff Reinet diatrict some specimens of tufit and abundance of limestone are found; fossil remains have also been discovered (perfect fosail remains of the Mammoth species have been found a few years alnce in Beaufort); common cornelian, topaz and bloodstone have been met with in the Orange river, and in some of the $\mathbf{N}$. ficld cornetcies, sultpetre. The infinite number of large blocks of isolated stones that are to be found in South Africa, to the very verge of the Caje promontory, are aggregates of quirtz and mira, the first in large irregular masses, and the latter in black lumps, reseinbling shot ; they also contain sometimes cuhic pirecs of felspar, and seem to he bound together by plates of a clayey ironstone; by the action of the air and weather, they tall to pieces in large concentric Inmine, beeome disintegratel, and, finally form n soil, at first barsh and sterile, but meliorated and enriched by time.

The soil throughout the colony is very varied, in some places a naked sand, in others a stiff clay, and in many parts a rich dark vegetable mould; frequently the surface appears a dry sand, but on removing it to the depth of a few inches, a black mould is found beneath; the stiff clayey soil, sometimes red, and sometimes met with of a yellowish colour, is very fertile when irrigated. The east coast border is generally an alluvial loam, as is the case with many vallies, particularly among the ravines and windings of the Fish River.

The surface of the Great Karroo is diversified; in many places it is a stiff brownish coloured clay; in some parts a bed of sandstone, crossed with veins of fat quartz, and a kind of ponderous iron-stone; in others, a heavy sand, with here and there a blackish loam. Near the bed of the Butfalo River, the whole surface of the country is atrewed over with small fragments of a deep purple-coloured slate, crumbling from strata of long parallel ridges, running E. and W.; scattered among these fragments are black tumified stones, having the appearance of volcanic strogs or the scorire of an iron furnace; several conical hills, some truncated near the top, stand detached from each other on the plain; and although at first appearing as if thrown up by volcanic explosion, yet on a nearer view of the alternate strata of earth and sandstone, regularly disposed, exhibiting the effects of water, and not of fire. Some flat sandy marshes of the Karroo are overgrown with rushes, and abound in springs strongly impregnated with salt, and a species of salsolu (salt-wort), grows here in perfection; the surface around its roots being generally covered with a fine white nitrous powder. It is from this plant that the inhabitants make excellent soap, in conjunction with sheep's fat.

From the Little Loorry fonteyn, in the Great Karroo, to De Beer valley, there are nearly 30 miles of a continued bed of solid and arid clay, without a partiele of herbage ; when, suddenly, as by enchantment, the De Beer valley, a plain of several miles in diameter at the base of the Black Mountains, is entered on, elothet with the most luxuriant vegetation; the water, however, of one of the streams which How through it, being as briny as that of the English channel. Beyond this valley the Karroo again expands in all its nakerlness.

Of minerals few have yet been discovered,-indications of coal, as before observed, have been met with at the Kroom Kiver and other places. Near the Bushman's River (Uitenhage district), an extensive vein of alum has been recently discovered, which is particularly beautiful in its structure; the colour is perfectly white, of a silky lustre, consisting of delicate fibres, of six or eight inches in length, which run parallel, sometimes perpendicular, and sometimes in an undulating direction; the vertical course of the filaments being directed by small fragments of greyish limestone, and minute particles of yellow ferruginous earth; these are found near the basis of the tender capillary crystals, which shoot from a thin stratum of concrete alum, the lower surface of which is encrusted with yellow clay and portions of blue limestone. The alum is very pure and valuable as an article of commerce.

At Camtoos Bay ( 20 miles W. of Algoa Bay) a rich lead ore of the species known by the name of galena (load mineralized with sulphur), has been found in the steep sides of a deep glen; the masses seen by Mr. Barrow had no appearance of cubic crystallization, but were granular or amorphous in some species; the surfaces, in others, made up of small facets, called by miners white silver ore; the vein of the ore was tiree inches wide and one thick, increasing in size as it advanced under the stratum of rock with which it was covered. The matrix, is a quartoze sandstone of a yellowish tinge, cellular and fibrous, harsh to the touch and easily broken. This ore, when assayed by Major Van Dheu, an officer in the Dutch service, yielded from 200 lbs . weight, 100 lbs. of pure lead and 8 oz . of silver.
Mineral waters exist in different placea; a few miles from Graff Reinet, there is a spring of cold water, strongly inipregnated with sulphurated hydrogen. About five miles from Cradock, in Somerset, there is a hot mineral spring (thermometer 86 degrees), which issues from the ground close to the bank of the Great Fish River, which is here a small stream about 200 miles from the sea. The taste of the water much resembles that of the Harrowgate or Gilsland spa, and it is resorted to for bathing by invalids labouring under various complaints. The ground in the vicinity is impregnated with saltpetre, and considerable quantities of nitre in a pure state may be collected in the neighbouring mountains. At no great distance from Cradock, near the Bamboo Mountains, are three salt lakes, similar to those in the vicinity of Algoa Bay and other parts of the country, from which the neighbouring colonists sup. ply themselves with sslt. There are two warm springs at the village of Caledon, under the Kleine Swartberg, which contain muriate of sods; their heat is 92 degress. These springs arc used as baths, and the water is also taken internally; they are found beneficial in cases of chronic rhcumatism, diseases of the skin, and scorbutic ulcers. One spring is private property, where there is good accommodation for invalids sud others visiting the baths; the other belongs to Government, and is let on lease,-the tenant being bound to allow the frce and gratuitous use of the bath and buildings to poor indigent persons, of whatever description, producing certilicates of inability to pay. There are two other warm springs in the district; one at Cognan's Kloof, also containing a muriate of sodan the heat of which is 114 degrees; and one at Roodeberg, containing a small quantity of carbonate of lime, the heat of which is 94 degrees.

Several singular salt-pans exist; some of them 200 miles from the sea-coast, and 5,000 to 6,000 feet above the level of the sea, the salt being hard, and from five to six inches in thickness. The largest and finest salt-pan is near Zwartkops River, Algoa Bay. The soil on all sides of the great Zwartkops salt.pan is a deep vegetable earth, in some places red, in others black, resting on a bed of clay, and without a vestige of salt in its composition.

From the Cape of Good Hope along the S. coast to Algoa Bay, a bank, with various soundings, projects to a considerable distance from the land, called the bank of Lagullas. The S. extremity of this bank is nearly on the meridian of Cape Vaches, or in long. 22 E., and ia said to extend to about $37 \frac{1}{2} \mathrm{~S}$. lat. in this part ; but a little to the S . of 36 S . it converges quickly, and becomes of a narrow conical form, with very deep water on its $S$. end. The soundings to the westward of Cape Lagullas (to the southward of 35.15 S.) are generally of mud; to the southward of the Cape, frequently green or other sand; and on the S.E. and eastern parts of the bank to the eastward of Cape Lagullas, mostly coral, or coarse sand, shells, and small stones. This bank is probably the deposit of the strong current which sets to the $S$. and $W$ according to the direction of the bank, and is generally strongest during the winter months, running with the gi satest velocity along the verge of the bank, or a little cutside of soundings. When opposed by adverse galt s , a very high sea is thrown up, which sometimes lessens the strength of the current; the rapidity of the stream is, however, always lers towards the shore, where the sea is smoother. By keeping on the edge of the bank, a ship will be carried 80 miles a day with an adverse wind round the Cape into th: Atlantic; vessels, therefore, trusting to their reckoning should be mindful of this circumstance.

A more minute detail of the geological structure of this portion of the African continent will be found in my " Colonisl Lihrary," vol. iii.
V. The seasons at the Cape of Good Hope are the very opposite of those of England, for example:-

The S. E. and N. W. winds are the most prevalent in this hemisphere; the former in summer and the latter in winter. The violent gales of wind which were formerly so fatal to European vessels appear to have been diminished in their force of late years, and large icebergs are now seen to the north of the Cape. In the Eastern districts the inountain tops are occs. sionally covered with snow, but of course, in such an extent of country, and at different clevations, the heat varies; taking Hottentots Holland in the Cape district as a fair criterion for the elevsted country, the following meteorological register, from the Army Medical. Board Office, indicates the state of the westher throughout the year, Cape Town of course being warmer.

The healthiness of the Cape district is evinced by / commonly blows cold in aummer, at the same time the fact, that in 1830, out of a population of 1,500 , that the sun shines powerfully. It is this circumstance at Hottentots Holland, the total number of deaths which distinguishes a warm from a hot climate.was only five; of which four were coloured persons, one an old Mozambiquer, another an old alave, both of whom died of chronic diseases; the third, a young child, died suddenly; the fourth, a Kaffre girl, was burnt; and the fifth, a European gentleman of 50, principally of a mental affection. The mean temperature of Cape Town (which is heated by its proxinity to Table Mountain) inferred from a meteorological journal kept for several years, is $67 \frac{1}{3}$. The mean temperature of the coldest manth is, perhaps, 57.; hattest, 79.; mean of three recent winters, 58.; of three summer months, 77. ; least heat during aummer, 63. The temperature of the district of Stellenbosch, deduced from the observations of a single twelvemonth, is $66 \frac{1}{2}$.; extremes, 87 . and 50.
In this colony, as in the S. of Europe, and most of the warm elimates of a temperate zone, the wind
(See "Colonial Library.")
VI. South Africa, when first viaited by the Portuguese, Dutch, and English, was, considering the country and birbarous atate of the inhabitants, extensively peopled by a race of Hottentots, who, from being masters of the soil, became in a short time the servants of the Dutch settlers, and, as in the West Indies and North America, sank before the white race; their numbers, though still considerable (upwards of 30,000 ), being very much reduced.

The first authentic account of the state of the colony is furnished by the Oppgaff or tax lists for 1798, when the Cape was in our poasession, and the returns were required to be made for the firat time on oath.

According to the Oppgaff returns, the population from 1797 to 1807 had augmented upwards of 10,000 . Its progress at intervals is thus shewn:-

Population of the Cape of Good Hope exclusive of Military.

VII. Churehes, Livings, \&c. of the Cape if Good Hopa. [B. B. 1836.]

[^19]
(a) The old church having been found insecure, and having in consequence been pulled down, divine service is performed in the Lutheran Church which will contain about 1600 persons. The dissenting places of worship are two belonging to the Independents, and one to the Wesleyans.
(b) Morning and evening service is performed in the English Episcopalian Church (St. George's). The children of the English poor, free blacks, and apprentices are catechized in the government free school in Kerrom Street every Sunday.
(c) The senior minister of the Lutheran Church receives a atipend from the community of $150 l$. per annum, and enjoys other advantages, the second has also an anmual allowance of $100 l$.
(d) The Rev. Mr. Moral who had acted as Catholic priest, during the absence on leave of the Rev. Mr. Fishton (since deceased) has left the colony. The living is therefore vacant. The Roman Catholic Chapel, situated in the Bintenkant, Cape Town, has during the late season been reduced to a heap of ruins, nor is there any immediate prospect of its being rebuilt. The arrival of a bishop and two priests who are shortly expected, will probably mature any plan, that may be in contemplation for the ercetion of a new place of worship.
(e) The dissenting place of worship belongs to the Wesleyans, it is situated near Wynberg and contains 200 persons.
$(f)$ The minister is paid by the community.
(g) The chaplain, has an allowance of $52 l$. per annum from the navy. The service for the Episcopal comnunity at Simon's Town is performed in the Wesleyan Chapel, for which Government pays an annual rent of 500 . It will contain 300 persons. The Episcopal Church, when finished will contain 400 persons.
(h) Three Missionaries officiate alternately.
(i) The dizsenting place of worship is supported by individuals, for the religious instruction of apprentices and persons of colour. It will contain 400, and 150 usually attend, Mr. Luckof of the German Missionary Society gives instruction here.
( $k$ ) One of these dissenting places of worship, is situated at the Paarl, and another in Wagonmaker's valley ; they were erected by private individuals for the instruction of slaves; each will contain 300 peraons. Mr. Elliot of the London Missionary Society, officiates at the Paarl, and Mr. Bisseux of the Mis. sionary Society of Paris, in the other. The third dissenting place of worship is situated at Fiansche Hock, it will contain 100 persons, but there is no missionary
(l) The Wesleyans have a chapel, which will con. tain 130 persons.
(m) A Missionary resides at Worcester and instructs the coloured population.
( $n$ ) Two missionaries reside at Tulbagh and give religious instruction to the heathen.
(o) There are four Missionary Institutions in the district of Clan-William, one at the Cederberque, one in the Kamisberg, one in Minaquoisland, and one at the mouth of the Oliphant River. They are conducted by persons sent out from the different societies in Europe.
( $p$ ) The dissenting place of worship is the chapel at the Caledon Institution, belonging to the London Missionary Society, at which 834 persons reaide.
(q) The diasenting places of worship, are cbapelsat the Moravian Establishments at Guadenthal, where 1,454 persons reside, and at a branch of that Establishment at Elim, to which 310 persons are atiached, and a chapel at the Leper Institution at Hemeleu Aardes, where there are generally from 80 to 100
patients perform

- The
expenses pa
patients, at which a Missionary from Gnadenthal performs Divine Service.
(r) A church is now building and almost completed, which will contain about 1,200 persons. The Dissenting place of worship is at Pacalkdorp, a station of the London Missionary Society. The chapel there will contain 200 persons. The attendants at divine service are Hottentots.
(s) There is a London Missionary Institution at each of the following places, viz. Bethelsdorp, Port Elizabeth, Uitenhage and Hankey. The Moravians have a Missionary atation at Enon. Each of these Missionary Institutions is frequented by Hottentots.
( $t$ ) Previous to the appointment of the present minister, the minister of Graaffe Reinet officiated four times a year to administer the sacrament, when about 1,000 attended.
(u) The dissenting places of worship in this dis-
trict, are : 1 Independent, 1 Baptist, and 2 Wesleyan Chapels at Graisam's Town; 1 Wesleyan at Kat River ; 1 ditto at Salem; 1 ditto at Port Francis; 1 ditto at Wesley Mount; I ditto at Clumber; I ditto at Bathurst; 1 ditto at Manley's Flat ; 1 ditto at Greenfontein, and the London Missionary Society at Theopolis. The Rev, Mr. Heavyside officiates as chaplain at Graham's Town, and receives for that duty a portion of the salary of the minister there.
(1) The minister of Somerset, performs Divine Service for the Dutch community at Albany once a quarter in the English Church at Graham's Town.
(w) Mr. Morgan acts as minister of the Dutch Reformed Community in Albany.
( $x$ ) The Dutch ministers, by occasional viaits to the distant parts of their extensive parishes, remedy in some degree the inconvenience caused by the remoteness of the rcsidences of the people from the church.
VIII. Schools, \&cc., of the Cape of Good Hope. [B. B. 1836.]

*The sums in this column are the salaries paid the masters. $\dagger$ Under this head are included all expenses paid by government. $\ddagger$ The auma here inserted are the contingencies paid by government. \& Vacant.

## § Vacant.

(a) The expenses are defrayed from the funds of the Bible and School Commission, and consist in various petty charges for chalk, brooms, cleaning, \&c.
(b) These masters are engaged in the instruction of free persons of colour, who may be desirous of being baptized, either in the Dutch reformed or Lutheran faith : the schools are open every week day from four to five $\mathbf{p}$. m.
(c) The want of a achoolmaster capable of giving instruction in the English language is much felt. This want might be supplied if funds could be found for the erection of a school-house.
(d) The expenses of these schools are defrayed by the Moravian Mission.
(e) The teacher receives $27 l$. per annum for house rent, which is included in the expenses.
$(f)$ The school mentioned in the last column is a public school (not a free school) for instruction in the Dutch language: 12 scholars attend.
(g) The expenses are for house rent.
( $h$ ) The expenses are for house rent.
(i) The object of the foundation of these schools is to afford religious instruction to children living at a remote distance from any church, and to give elementary instruction in the English and Dutch languages. A few of the inhabitants have private schools.
( $k$ ) The annual expense for house rent has not been incurred. The master is the church clerk, and receives a salary of $30 l$. per annum on condition of keeping a school, which is held in the house occupied by him as church clerk.
( $l$ ) The expenses are for house rent. In addition to the charge for house rent, government furnishes these schools with forms, desks, \&c. Reading and spelling lessous, slates, and other school materials have been supplied hy the School Commission in Cape Town. There are Dutch private schools in the village of Swellendam and Caledon. There are private schools for Hottentots, viz. :-at Gnadenthal, two sunday schools for persons above seven years of age, two

## II Undefined.

daily schools for girls and boys, and an infant school supported by the Moravian Missionaries; at Elim, one daily school and an infant school ; at the Csledon Institution (Zuurbrak), one daily achool for children, and an infant school supported by the London Mis. sionary Society. Many persons engage private schoolmasters at their own houses, and the children of the neighbourhood generally attend there for instruction. The number of these private school-masters in the district is between 30 and 40 , and about 250 children attend them.
( m ) The 22l. 10s. is a charge for house rent. Go. vernment is also at an expense of 3 l. 7s. 6d. per month for the hire of a school room. There is an infant school supported by voluntary contributions. The house and school rooms, being public property, are kept in repair by government. Desks, forms, \&ic, are supplied when required. There is a school at Pacaltadorp, in the district of George; and one at Bethelsdorp, at Hankey, and at Enon, in the district of Uitenhage, for the children of the Hottentots be. longing to those institutions which are supported by the respective missiors. In the town of Uitenhage there is also a achool for free persons of colour, kept in a building belonging to government. The teaher of it is also church clerk, for which he receives 25l. per annum from the church funds.
( $n$ ) The total number of scholars instructed in the private schools is 123 males and 122 females. There are several private schools in the several field cornetcies of this district, but they are not permanent, 4 teacher being occasionally employed for short periods in a family. The appointment of teacher has been vacant since the resignation of the late master in November, 1835.
(o) The expense is for house rent.
( $p$ ) The expense is for house rent.
(q) The expense is for house rent.
(r) The expense is for house rent.

Return of the Gaols and of the Prisoners confined therein throughout the year 1836. [B. B.]

General scale of Prison Rations throughout the except those at the breast, per day, meat $\frac{1}{4} \mathrm{lb}$., bread Colony.- [B.B.] To each female prisoner, per diem, $\frac{1}{2} \mathrm{lb}$.; to each child between 7 and 14 years, ditto, meat $\frac{1}{3} \mathrm{lb} .$, bread 1 lb . ; to each child under 7 years, meat $\frac{1}{2} \mathrm{lb}$., bread 3 lb . ; to ench male convict at hard
labour, or each person detained as a witness, per day, either meat $1 \frac{1}{4} \mathrm{lb}$., bread 1 lb ., or in lieu, meat $1 \frac{1}{2} \mathrm{lb}$., bread $\frac{3}{4} \mathrm{lb}$.; to all other male, criminal or civil prisoners confined for debt, per day, mest l lb., bread 1 lb . All persons admitted for medical aid, or pri. soners under medical treatment, rcceive such rations only as the surgeon mny direct. The daily allowance of rice, vegetables, soup, \&c. in addition to the above mentioned articles, remain as heretofore customary in the aeveral districts, but when the full rations of bread and meat are issued, the allowance of rice does not exceed 2 oz . for each ration.
$\mathbf{X}$. The affairs of the colony are administered by a governor (salary 6,000l. per annum), nominated by the Crown, aided by an Executive Council, composed of the Commander of the Forces, the Chief Justice, the Auditor-general, Treasurer, and Accountantgeneral, the Secretary to the Government. There is a Legislative Council appointed by the government in England, at the recommendation of course of the Colonial Government. The members of this council (of whom five are official) after two years' sitting, hold their seats for life; their debates are carried on with open doors.

At present each district or drostdy, has a Civil Commissioner, who acts also as a resident magistrate, aided by a relative number of unpaid justices of the peace : a district is divided into several smaller divisions, termed Veld Cornetcies, over which an officer with that title presides. The Veld Cornet is in fact a sort of petty magistrate, empowercd to settle trifting disputes within a circuit of 15 or 20 miles, according to the extent of his authority, to punish evil-doers, to call out the burghers (over whom he presides) in the public service, and act as their officer on commandoes, (reprisals on the frontier tribes for incursions into our territory) to supply government with relays of horses or oxen, when wanted, \&c. \&c. ; he receives no aalary (except upon the Kaffre frontier), but is exempt from all direct taxes.

The municipal body at Cape Town consisted of a Burgher Senate, under the form of a President, four members, Secretary, and Town Treasurer: the President remaining in office two years, and receiving 3,500 rix-dollars per annum; he was succeeded by the senior member, and the election of a new member took place by the Board (not by the inhabitants or burghers, paying the taxes), three persons were returned by the majority of votes, and their names sent to the Governor, who selected one out of the three.

This Senate, if properly elected and managed, might have been productive of much good; it had the superintendence of the cleansing and lighting of the public streets, and of preventing encroachmenta on public lands, it regulated their sale, supervised weights and measures, and the reservoirs, waterpipes, and fire-engines; attended to the assize of bread, the slanghtering of healthy cattle by the butchers, levied and received the town taxes, and the commando tax, when that was necessary, and watched over the prices of various articles of prime necessity. Under proper regulation and management auch a body, duly elected, would have been of considerable assistance to a government, by relieving it of all minor details of management, in the concerns of private life; it has recently, however, been dissolved, without any substitute being provided.

When the Cape became a British colony the Dutch criminal and civil laws were in operation; tbese, particularly the latter, have undergone some modification, torture has been abolished; the penalty of
death attaches on conviction to murder, rape, coinin money, and high treason; transportation, for theft to a large amount, or crimes of a serious or violent nature, not liable by the Dutch law to death: for minor crimes, the punishment is banishment to Rob. ben Island (at the entrance of Table Bay), with hard labour; imprisonment in the Tronk (prison), or flog. ging. Criminals are tried by a jury, of whom there must be at least seven members present, and when the nffence is capital a majority must agree in th verdict, if seven only he present; if more than seven jurors attend, and opinions as to guilty or not guilty are equal, the prisioner is acquitted; by the new charter the English system has been brought into operation. A criminal is allowed, on his trial, to em. ploy an advocate to examine and cross examine wit. nesses, and to argue for him on all points of law in his defence.
The civil law is modified by that of the Dutch code,-the ' Statutea of India,' collected by the Dutch towards the end of the seventeenth century and declared to be applicable to the Cape by a Beta. vian proclamation, dated February, 1715,-and by various colonial laws, or where these are found defi. cient by the Corpus 'uris Civilis. The equal division of property on the demise of a parent, added to the absurd custom of measuring distances by a man's walk in an hour, or a horse's canter, render li'igation frequent.

The laws are administered by a Supreme Court presided over by a Chief Justice (salary 2,000l.), 80 d two Puisne Judges (salsry each 1,200l.), who hold four terms in the year-February, Jone, August, and December. Circuit Courts, civil and criminal, are also held after the inglish form (the colonists complain of a great want of uniformity in the law proceedings of the circuit courts ; two of the judges being Eng. lish, act according to that system-whilst the third being Scotch, follows his national customs, hence different procedures prevail, to the no small annoy ance of suitors; it is indeed to be hoped that aome more suitable qualification were requisite for our colonial judges than mere party influence, or aristocratic connexions) ; for the better execution of the law, the office of High Sheriff, with the appointment of Deputy Sherifis for each district, was created in 1828. Small debts under 20l., in the Capedis. trict, or $10 l$. in the country, are recoverable in the Court of the Resident Magistrate, from whose judg. ment there is an appcal ; in Cape Town if the sum in dispute amount to, or exceed 5l., or in the country districts 40 s . Debts exceeding 20l. sterling in the Cape district, and $10 l$. in other parts of the colony, are recoverable only in the Supreme Court, where, however, smaller sums may also be recovered (under the Charter of Justice of 2 William IV., the jurisdic. tion of the Court extends to suins not exceeding in amount 40l.) : claims founded on a note, or bond already due, require no witncsses; book debts, and others, not founded on liquid (note of hand or other acknowledgment) documents, require to be proved by witnesses; and a person, suing in forma pauperis, is allowed an advocate by the Court, to inquire into his case.

A court of Vice-Admiralty sits for the trial of offences committed on the high seas, and for the adjudication of maritime disputes. The coinmissioners appointed by letters patent under the Great Sea, dated 13th March, 1832, are the Governor, or Liell-tenant-Governor, Members of Council, the Chief and Puisne Judges, the Commarder-in-Chief and flys.

sits for the trial of seas，and for the ad． The commissioners inder the Great Sed， he Governor，or liell． Council，the Chief and er－in－Chief and Aas．
fficers of ships of war，and also the captains and commanders of ships of war．Matrimonial courts， for the gettlement of conjugal differences，and the granting of marriage licenses，are held by the Com－ missioners，who are also resident maglstiates，In their respective districts，aided by the local Justicea of the Pence and the Veld Cornet．
The tenures of land are various；the most anclent are those which are called＂lorm farms，＂which were granted to the early settlers，at an annual rent of 24 rix dollars，the lease being perpetual，so long as the rent be paid．Three auch farms are calculated to con－ sain nine square miles，and there are about 2,000 in the colony．Gratuity lands are a customary copybold， and pay about the same rent as＂loan farma．＂They vere grants by favour，and are chiefly situate in the neighbourhood of the Cape district．Freehold estates are grants made to the first settlers，of about 120 acres each，and are also situate chiefly around the frst locatior．made at Table Bay．The greater part of these tenures are held on account of a sum of money being paid down at once，on the primary oc－ upation of the settlers．Quit rents were derived from the use of waste lands lying contiguous to an estate，the occupant of the latter consenting to pay st the rate of $1 s$ an acre，under a lease granted for 15 years．
The last and most usual system in operation is perpetual fuit－rents，the annual payment depending upon the quality and circumstances of the land； these estates vary upwards to 3,000 morgen，or 6,000 English acres．Transfers of land，or mortgages（ex－ cept the bond called Skygene），are legal only when registered in the debt book，at the Colonial Office at

Cape Town，where Commissioners sit to superintend such matters；and no aale or transfer can be made till after a settlement of all bonds，either by the mort－ gager consenting to continue his loan on the securitles of the new purchaser，or by repayment；a fresh transfer is then made，and the purchaser is placed in possession of a complete title，without the possibility of fraud，of claims withheld，or mortgages concealed， at an expense of a couple of shects of paper，and a trifing payment－thus avoiding a ponderous maas of conveyance．

There are 12 barristers（L．L．D＇s），and 17 attorneys in Cape Town，and 5 in the country．Many of the attorneys are notaries，and some of them practlse as barristera．

The Dutch language，formerly used in the courts of law，is now superseded by the English．

The establishment of king＇s troops in South Africa is three regiments of infantry－the head quartera of two being at Cape Town，and of the other at Graham＇s Town．There is a atrong detachment of royal artillery， a party of the royal engineers，and a regiment of mounted riflemen，termed the Cape cavalry，the pri－ vates and non－commisaioned officers of which are principally Hottentots．

The following was the strength of the corpa on 1st January，1837．One major， 3 captains， 4 lieutenants， 3 ensigns；staff－ 1 adjutant， 1 surgeon， 1 quarter master； 25 sergeanta， 12 buglera， 21 corporals， 334 privates， 366 horses．

The military stations along the Kaffre frontier，with the strength of each corps at the respective posts，was in 1831 as follows：－

Cape Town，as head－quarters，gives off detachments，similar to the above，to Simon＇s Town，and some outposts．
Our naval force is under the command of a Rear－｜can only acquire the regard and respect of their fellow Admiral，whose authority extends along the E．and subjects by treating them with propriety，and accord－ W．coasts of Africa，and to Mauritius and St．Helena． The Dutch established a system of subordinate ma． gistrates at the Cape of Good Hope，which we have retained．The following are the instructions under which they act，dated 5th October 1837 ：－
Instructions for the Field．Cornets of the Colony of the Cape of Good Hope．－1．The field－cornets must，each in his respective ward，be considered as subordinate magistrates，and，as such，be respected accurdingly．

2．They must not forget that，as mugistrates，they
ing as they themselves set the example of what they reguire of others．
3．They must endeavour to obtain a perfect know－ ledge not only of the lands within their wards，but of the productions thereuf，and their capability for other produce．

4．They must take particular notice of the conduct and deportment of the inhabitants of their wards，in order to be at all times prepared to report thereon to superior authority，when required．
5. They must endeavour to settle disputes among the inhabitants which might lead to animositics and litigation, and to reconcile the parties.
6. The field-cornets shall never suffer either friendship or enmity, pleasure or displeasure, fear or favour, to infiuence their officinl conduct. They would otherwise render themselves unworthy of their situation; they would themselves become culpable; and in cases where evil consequences did result therefrom, they might be found guilty of having violated their oath.
7. Should they find themselves placed within the fourth, or nearer degree of consanguinity with, or be brother-in-law to a person against whom they are called to act; should they be on terms of close intimacy, or, on the contrary, at enmity with the same, they shall in such cases acquairit the civil commis. sioner of the district there'with, in order that some other person may be appointed to perform the duty required.
8. The field-cornets are obliged particularly to watch for the maintenance of order and tranquillity in their district, and not to suffer it to be disturbed by any one.
9. All laws, proclamations, ordinances, or other instructions, expedited by, or on the part of, the Government, for the use of the country districts, shall be communicated to the respective field-cornets, in order, by each of them in their duty to see that they are punctually obeyed. The field-cornets must endeavour, by example and expostulation, to promote obedience to the same; and they shall, without delay, report any disobedience to the nearest magistrate or clerk of the pcace.
10. In addition to the general laws, proclamations, ordinances, or other instructions from Government, they will receive and obey all orders given or addressed to them by the civil commissioners of the district.
11. Every field-cornct must keep an exact register of all the inhabitants of his district above 16 ycars. This register is, in the first instance, to be formed from personal examination; and after that, every youth on having attained the age of 16 years, sliall be obliged immediately to report himself to the fieldcornet, in order to be entered upon the register.
12. The male population in each district shall be divided into three classes-first, from sixteen to thirty; the second, from thirfy to forty-five; the third, from forty-five to sixty years of age. This classification field-cornets must attend to in calling out the armed burgher forces of their wards, and observe in each class to call for personal service,-first, upon single men, in preference to those who are married, and on those who have no particular vocation or pursuit, in preference to those who have. Those persons who have attained the age of 60 years are exemnt from personal service, except in case of extreme necessity.
13. From these registers they shall form and transmit to the civil commissioner of the district, in the month of October, a list of the young men who have, within the year ending in September, attained the age of 16 , in order that they may be duly enrolled.
14. The field-cornets sliall erase from their registers all such persons who have died-wherefore, all heads of families are obliged to report, or cause to be reportcd, in writing, to the field-cornet of their ward, within forty-eight hours, the death of any individual who shall have died in his family above the age of 16 years, on pain of being fined tuenty-five rix dollars.
15. Should any inhabitant meet with an untimely death, either by his own violence or from accident, the body shali not be buried until the field-cornet of

## have permitted the burial to take place

16. The field-cornets shall send all prisoners under sufficient guard to the field cornet next on the rosd, who is bound to receive them, and in like manner to forward them on, and so on in succession, until they arrive at the place of their destination.
17. And in case that on the road by which the pri soners are to be conducted no other field-comet resides, then shall the field-cornet who has arrested the prisoners, or the one to whom they are delivered over, send the prisoners on to the next inhabitant, although not a field-cornet, who shall, as also the other inhabitant next in succession, be obliged to receive the prisoners and forward them on, until they reach the place of their destination, without any tis. tinction, and whether such inhabitants residing along the road belong to such district and ward, or not, The officers of justice, or such other to whom the prisoners are finally to be delivered over, are to take particular notice that this regulation has bcen strictly obeyed.
18. No field-cornet ahall aummon the inhabitants to meet armed, without special orders from the civil commissioner ; except, however, on information received by him, that the peace of his ward is endangered by gangs of vagabonds within it, or hy hostile assemblages of such persons without. In such cases the field-cornet is enjoined to call out the necessary number of armed men from the ward, to protect the inhabitants and their property from violence and depredation.
19. In such cases the nield-cornet shall immediately report to the civil commissioner of the district, and also acquaint the neighbouring field-cornets with the particulars, who shall be obliged, whenever required, to assist him with armed men of their own wards.
20. The field-cornets shall report all extraordinary occurrences in their wards, not herein mentioned, to the civil commissioner: And whereas every possible occurrence cannot be foreseen, it is recommended to the discretion of every field-cornet, in cases when the delay occasioned by the time required for making the report, and to receive orders, which might be attended with injurious consequences to the public or to individuals, in such cases immediately to check the evil, and, if necessary, to oppose it by force.
21. In case any vessel on the coast should send a hoat on shore, the field-cornet shall make himself acquainted with the following particulars, viz. the names of the vessel and the commander; to what nation belonging; whence, and whither bound; number of the crew and passengers; cargo; how long from the last port; why put in; crew if healthy; and if not, what malady on board; and whatever sdditional information he can obtain.
22. In case the vessel be in want of provisions, the field-cornet shall provide a supply of such as msy be requisite from day to day on payment being made; but he shall allow no communication between the vessel and the ahore, further than is necessary, and prevent desertion of the seamen.
23. He ahall prevent the landing of goods of any description from such vessel ; and should he suspect the existence of any contagiors disease on board, be shall suffer no one to land, but cause the suppliss to be handed into the boat, with the utmost caution.
24. But when any vesscl approaches the shore in such distress, that to await orders from the civil commissioner might endanger the ship or cargo, the cargo may then be landed; but the sanie must then remain
uest thereon, shall place.

coast should send a shall make himself particulars, viz. the ommander ; to what hither bound; num. ; cargo; how long $n$; crew if healthy; d; and whatever adin.
ant of provisions, the ly of such as may be yment being made; ication between the an is necessary, and
ling of goods of any hd should he suspect disease on board, he cause the supplies to e utmost caution. oaclies the shore in from the civil comp or cargo, the cargo ie must then remain
under the joint care of the field-cornet and the owner, super-cargo, or commander, until orders for its disposal be received from conpetent authority.
25. Whenever any vessel is cast on any of the shores of this colony, the person first discovering it shall forthwith acquaint the field-cornet therewith, who shall also immediately report it to the nearest maglstrate.
26. The field-cornet ahall, until some magistrate ahall arrive at the place where the vessel is stranded, endeavour as much as possible to save the persons and property belonging thereto; and for this purpose the field-cornet shall order in time a sufficient number of men, and, if necessary, call in the assistance of the neighbouring field-cornets.
27. They are to take care that all letters or papers addressed to, or transmitted by Government, or other public authorities, which may come into the hands of any of the inhabitants, be forwarded by them with the utmost speed.
28. The field-cornets shall watch attentively, that no roving people keep themselves in their wards with their families and cattle. On discovering such people in their wards, they are immediately to report it to the civil commissioner and the nearest magistrate, and to order them forthwith to depart. The fieldcornets shall in particular not suffer the Uitspan places to remain longer than twenty-four hours at any one time by the snme persons, unless the swelling of a river, or other unforeseen circumstance, should prevent their proceeding.
29. When the state of the country mny render it necessary to establish signal stations for the more rcady assemblage of the means of defence, the fieldcornet, when informed of the firing of an alarm gan, ahall forthwith dispatch a trusty person to the nearest signal post, to watch that the signals be properly repeated.
30. At the same time he is to take care that all such persons belonging to the armed burghers, or any other corps, and who at that period are within his ward, do forthwith rejair to their respective posts; and he shall give the necessary orders for the prescrvation of the peace, and, when required, render such other services as circumstances may demand.
31. The field-cornets, each in their respective wards, shall pay attention to the improvement and repairs of the public roads, and particularly obey, and cause to be obeyed, the orders they may receive respecting them, or which the proclamations and ordinances prescribe to them; and shall use all means in their power to induce the inhabitants to contribute the means of forming and keeping up the same.
32. The field-cornets shall mutually correspond with each other in all matters in which their several wards have a common interest ; and they shall endeavour to assist one another in all things tending to promote the welfare of the colony.
33. Whenever a field-cornet goes beyond the limits of his ward, he must appoint one of the most able inhabitants of his ward to act for him, who shall be obliged to do 80 during his absence; and in all things to conform himself to whatsoever is contained in these regulations, for which he will be held responsible.
34. A field-cornet intending to remove to another ward, shall be obliged to acquaint the civil commissinner to whose district he belongs therewith, in order that another person may be appointed to succeed him. And the retiring field-cornet, in such or any other case, shall give up to his successor all books and
papers belonging to his situation, including these present instructions.
35. The field-cornets shall not, cither themselves, or their wives, chlldren, or inınates in their lamilies, receive any presents or gifts from any one who, on account of the field-cornet's situation, has any thing to hope or fear of him.

All field-cornets holding office for 15 years in one district receive the advantages usually accorded to field-cornets after 25 years service. No field-cornet is obliged to serve more than five years, unless with his own concurrence, and with the approval of the civil commissioner of the district.
XI. It is difficult to convey a clear idea of the mode of managing the finances of the colony, owing partly to the variety of items, which enter into the TreasurerGeneral's budget at the Cape. The best mode of explaining the receipts and disburgements will be to give the following statement of the gross revenue of the colony of the Cape of Good Hope, from lst January to Slst December, 1832 :-

Gross Revenue. - Port dues, 1,269l.; stamp dues, $16,837 l$. ; Lombard Bank, interest, \&c. 15,633l.; Discount Bank, discounts, 4,616k. Customs: Duties, 3 per cent. on English and 10 on foreign, 13,385l. ; store rent, 357l.; wharfage, $1,482 l$.;-total, $15,225 l$. Postage, 3,877l.; land rent, 7,310l.; fines, 954l.; advances recovered, $426 l$. ; surcharges recovered, $100 l$. Assessed taxes: Capitation tax, 4,912l.; tax on servants, $177 l$.; tax on horses, $1,362 l$; tax on carriages, $2,801 l$.; tax on stock and produce, $3,162 l$.; tax on income, 2 per cent. 2,564l.; water tax, 1,107l.; huuse tax, 920l.; tax for keeping in repair the Cradock-hill road, $122 l$.; arrear taxes, due prior to the 31 st March 1829, 413l.;-total, 17,544l. Market duties, 3,727!.; auction duties, $12,508 \ell$.; rent of butchers' shambles, 840l.; rent of quarries, 26 l . Tithes: On wine and brandy, 2,754l.; on grain, 1,619l.; - total, 4,374l. Transfer dues, 7,2276 .; tolls and ferries, 3,1316 .; fees of office, $6,345 l$.; pound fees, $182 l$.; Somerset Hospital, 535l.; miscellaneous, $8,113 l$. Total revenue, $130,80 \mathrm{sl}$ l.
The port dues are derived from a tax of $4 \frac{1}{2} d$. per ton levied on all vessels entering Trible or Simon's Bay (Algoa Bay is exempted), for the purposes of trade, and if for refreshments, or any purposes other than trade, $2 \frac{1}{4} d$. per ton. This is independent of wharfage dues or permits, which are, however, light.

Stamp dues, with the exception of the assessed taxes, form the largest item in the hudget; they are extremely numerous, but appear to be well graduated, and if not pressing on the lower classes of the community, they furm an unexceptionable item of revenue. At the Cape, stamps are requisite on all transfers of property, on bills, on promissory notes, on bonds passed before notaries, on wills or codicils, on various law papers, and all deeds of contract, \&c., on powers of attorney, civil or legal appointments or promotions, on licenses for the sale of wines, spirits or beer, for keeping an inn or eating-house, and for excrcising the following trades-auctioneers, bakers, retail shopkeepers, pedlars and hawkers, game-killers, fire-wood carriers, brewers or distillers, for waggons and boats, clubs and societies, public billiard tables, marriage licenses, letters of hurghership, adoptions, leave to go to the hot baths, and permission to quit the colony. The foregoing is a formidable list, and some petty items might well be excluded.

The Lombard and Discount Banks, which are government establishments (see Monetary System), yield a considerahle item of the revenue, $n$ the
shape of interest on loans made, profits on banking, \&c.

The customs are derived from a duty of 3 per cent. levied on all British and British colonial goods, and of 10 per cent. on all fureign goods imported either in British bottoms or in vessels of certain nations in amity with Great Britain; 10 per cent. is also levled on all goods lmported into the Cape from the East Indies. It has been proposed to incrense the import duties, and thus augment the revenue, so as to admit the abolition of some of the vexatious items of taxntion.
Postage is not very heavy, considering the slowness of communication throughout the colony. From Cape Town to Simon's Town, a distance of 25 miles, it is 3d. for a single letter; and from Cape Town to Granff Reinet, 500 miles distant, it is 18 . ; ship letters brought into the colony, single, $4 l$. ; double, $8 . l$. ; one ounce, 1s. Newspapers sent inland, or from the colony, ld. each. The mails are conveyed throughout the colony by post-riders on horseback ; the riders are generally Hottentots, or slaves, in the service of the postholders, who are boors, residing near the high roads. The post-holders receive an allowance, regulated by the number of hours' journey which they engage to carry the mails. The improvement of the roads in the colony, under the able superintendence of Major Mitchel, has tended much to facilitate the transfer of the maila ; and, with increased knowledge and intercourse, the post-office ought to be a source of revenue, which it can scarcely be considered at present.
The assessed taxes are payable under the provisions of ordinance, No. 57, passed March 5, 1829. The capitation tax is levied on every free male above 16, and on every free female, widow or unmarried, at the rate of $6 s$. yearly.
Exceptions.-Free male servants taxed as servanta at 10s. yearly; officers in the King's service on full pay, or employed as military men in the colony, and their families; field commandants, field cornets, and provisional ditto; all pensioners not receiving more than 1s. a day, and having no other means of livelibood ; all persons of the border tribes, for two years after their first entering the colony; and all apprentices under ordinances 49 and 50 .
On every free male servant, or slave above 16, em. ployed as coachman or driver of carriage, taxed at 4l. 10 s. , or $2 l$.; and every groom or stable servant, porter, tootman, house-servant, or cook, 10 s.
Exception.-Military otticers' servanta.
Horses.-On each riding or draught horse used for pleasure carriages, $10 s$. ; on each saddle horse used in trade or agricuiture, 1 s.
Exception.-Military men, according to the number allowed to their rank.
Carriages. - On all sorts of vehicles with four wheels, used or hired out for pleasure, 4l.; on all ditto, with two wheels, $2 l$.; on all four-wheeled vehicles used in trade or agriculture, 5s.; on all twowheeled ditto, 2s. 6 d . Coachmakers, agents, \&c. not liable for carriages not used or lent out.

Income Tax.-Two pounds per cent. on all whose incomes exceed 30l., excepting from farming stock chargeable with Oppgaaf.

Exceptions.-Military officers, half-pay ditto, and their wives and children receiving colonial half-pay, for the amount of such half-pay only.
N. B. These taxes were imposed in lieu of former ones, known as the Kaffre Commando, taxes on cattle and grain, levied by the late Burgher Senate, and the extraordinary assessment on ordinary oppgaaf, autho-
rised by proclamation of 1 st April, 1814, sec. 14. All these were of course abolished.

Direct Tares, Ordinance 57.-Capitation, servants, sec. Do. 78. Housea and stores, and water rate.

On Produce and Stock.-Fach head of black cattle,视.; each breeding horse, $3 \mathbf{d .}$; 25 sheep or goat, $2 \nmid d$; ; each muid of wheat, barley, rye, and oats, , $_{\text {d }}$; each leaguer of wine, Gil.; ditto, brandy, 1s. $1 \frac{d}{d}$.
The other items explain themselves by their names -the auction duties are large - must sales taking place in that manner. The tithes on wine, and brandy, and grain are derived from duties levied on these articles as they enter Cape Town, which it is now proposed to abolish.
Revenue of the Cape of Good Hope since the con. quest by the English. [Foond among Lord Wellcs. ley's papers] :-

From 1st October, 1795, to 30th September, 1796, R. Ds. $111,264 . \quad 22,2521$.

From 1 st October, 1796, to 30th Scptember, 1797, R. Ds. 201,893. 40,378l.

The sum sdvanced to the ordnance department, 13,7621 .; being the amount of the ordnance store keeper's drafts upon the military chest, ss also the sum of $13,542 l$.; sdvanced to naval and other departments; und further the sum of 24,055 l.; paid under the hesd of special services are not included in this statement ; total commissariat expenditure, $150,7.42!$.

Ordnance Deprrtment. Pay allowances of the Roysl Artillery and Royal Engineers, 3,731L.; disbursements in the pay of barrack officers, artificers, and labourers, and purchase of atores under the head of services: oromance, $2,306 l .$, barrsck, $4,633 l$., total, $10,670 l$. ; add commissariat expenditure, 150,742l.; total military expenditure by Great Britain, $161,412 l$.
XII. There sre no early accounts obtainsble of the commerce of the Cape. I begin with showing the quantity of shipping engaged In the trade of the colony.
The following is independent of numerous vessels of divers nations, touching at Table and Simon's Bays for refreshments. The colonists have, as yet, very little shipping of their own, and it is employed prin-
clpally in the coasting trade. List and tonnage of colonial and coasting vesssin in 1834: Mary, brig, 116 ; Conch, brigontine, 100 ; Mary, schooner, 72 ; Kate, ditto, 83 ; Ligonier, cutter, 55 ; Knysma, brig, 142 ; St. Helena, schooner, 175 ; Leda, bark, 188; Urania, brig, 132; Jane and Henry, brigantine, 146; -total number, 10 , tons, 1209.

No steam vessel has yet been introduced into the colony, though the adsptation of such, for keeping up the intercourse between Cape Town and Algoa Bay, is indisputsble; a diligent search should be made for good coals, for if these were discovered, a steam intercourse with India and Austrslasia, via the Cape of of Good Hope, would apeedily follow. The annual commerce of the colony may be estiniated at ncarly a million sterling in imports and exports.

A summary view of the Trade and Navigation of the Colony of the Cape of Good Hope in the year ending 5th January, 1836.-[B. B.]

* Exclusive of the value of these articles, ahipped as stores to merchant vessels, or supplied to H. M. Nsvy, the former averaging in Cape Town, this year about 70,000l., and the latter 3,000l.

In 1827, Algoa Bay was made a port of entry, and its trade thus rose : 1828, imports, $55,201 l$., exporta, $11,290 l$. ; 1829, imports, $63,491 \mathrm{l}$., exports, $59,300 \mathrm{l}$.; 1830, imports, 99,742l., exports, 60,828l.; 1831, imports, 65,518l., exports, 65,351l.; 1832, imports, 3 R
$112,845 l$, exports, $86,931 l$.; 1833, imports, $213,309 l$. 1834, imports, $236,563 l$.

This comparatively large extent of commerce has arisen from the industry of the British settlers, and the intercourse which they have opened with the

Kaffres，and other native tribes ：the Kaffre trade in the first 18 months after its opening，poured native produce into Graham＇s Town，（chictly ivory），to the amount of 32,000 ．

An account of the weight of Cape hides imported into the United Kingdom in each of the sevels years， ending with 1832 ； $1826,7,520 \mathrm{cwt}$ ； $1827,12,207$ cwt．；1828，12，963 cwt．；1829，15，844 cwt．；1830， 19,957 cwt．；1831， $16,900 \mathrm{cwt} . ; 1832,13,193$ evt．
The imports at the Cape consist of every varicty of articles of British manufacture，and the extent to which our trade can be carried，it is difficult to state， for an outlet has now been opened for calicoes，ker： seys，ironmongery，gunpowder，\＆c．，in exchange for ivory，hides，gums，horns，\＆c．
XIII．The Monetary System at the Cape has been very imperfect，and its fluctuatious have caused great distress to private individuals，and much ruin to mer－ chants and others，whose active pursuits require a frequent conversion of capital；a brief account of the past，will he，therefore，requisite，in order to form a correct idea of the present state of currency and banking transactions in the colony．

Holland，up to the period of 1780 ，had forwardel every sort of supply，with exact punctuality，to the Cape，but the war between England and Amerin， and the part taken by the Dutch，left the colonists of the latter power in extreme distress．To proride for the exigencies of the occasion，Governor lin Plattenberg was compelled to create a paper cur． rency，and from 1782 to 1784 （when he resigned the Cape government） 925,219 paper rix－dolars were thrown into circulation，on no other security than the good faith of the Dutch government，and a solemn promise of redemption whell peace would permit the accustomed supplies to be sent from Holland．This atipulation was fulfilled by the anui－ hilation between 1787 and 1789 of rix－dollars 895,904 ， by paying that amount in specic and bills on Hol－ land，leaving ouly 99,326 rix－dollars afioat and in circulation．

A procedent was thus set for the creation of papt rix－dollars on any emergency．In 1793 the colon？ laboured under a very pressing inconvenieucy fron want of a sufficient circulating nucdium，the amonat not then excceding 200，000 rix－dollars；with a view， therefore，to public relief，and for the purpose d checking those usurious transactions which natunily accompany a contracted currency，the Dutch Cas． missaries－General（Nederberg and Trikennices）formal firms al holders lombar our cap holders cuation， improve addition neral Cr cure bill nonoural whose cu tavian $G$ rece：＂ed but vithe dollars．

## or the creation of paper

 y. In 1793 the cotong sing inconveniency from ig modium, the amont ix-dollars; with a viex; and for the purposed sactions which naturulp rency, the Dutch Com. and Trikennices) fomdCAPE OF GOOD HOPE.-MONETARY SYSTEM.
the institution of a Lombard or loan bank; $1,000,000$ rix-dollars were declared to be an adequate circulation for the colony, and 680,000 rix-dollars were advanced by various instalments to form the capital of the loan bank, under the direction of a president, two commissioners, a cashier, and book-keeper, all appointed by governmen'. The commissioners were authorised to lend money at 5 per cent. on mortgage of houses and lands, go!d, silver, jewels, and merchandises, or other articles that could " lie still" for 18 months, but not longer; and on goods of a more nerishable nature for a period not exceeding nine months.
In 1795, the circulation of Cape rix do's. - (er.clusive of the capital of the Lombard bank; hed $1 \cdots:$ to 611,276, without resting on a shadow of real property, or cven on a Government engagement, the rix dollar being merely a counter, passing current in all the various purchases and sales within the colony. On the British conquest of the Cape, in 1795, Governor Sleuskens obtained from the humanity of Genersl Craig a stipulation, that the Government farms and public buildings should be a security to the holders of 611,276 rix dollars, leaving the loan of the lombard bank protected by its own mortgages. Thus our capture of the colony gave the paper moneyholders the first security they had; and on our evacuation, in 1803, this security was given over in an improved state to the Dutch Government. Even the additional sum of 300,000 rix dollars, crented by General Craig, in consequence of his inability to procure bills on England at par, was accounted for and honourably discharged by the British government, whose conduct formed a striking contrast to the Batavian Government, which, in breach of its faith, rece:-ed bills and specie for the 330,000 rix dollars, but without cancelling paper to a like amount of rix dollars.
On our cvacuation of the colony, in 1803, the whole amount of paper in circulation was about 2,000,000 rix dollars, nearly half of it bottomed on a nominal sccurity, for the Government lands and public buildings were by no means worth the sum they were pledged for. This sccurity was, however, in a great measure, swept away by the Dutch Government, in a proclamation of 1804 , calling in the whole of the old paper money, and issuing a new set of paper dollars, without any reference to priority, thus setting the question of a preference of security at rest, and gaining 32,000 rix dollars by the non -appearance of old paper on the re-issue.
From this period to 1806, there was an additional coinge of 300,000 rix dollars. The Batavian Government, under French auspicea, seems not to have been at all scrupulous as to the means by which money was to be acquired. A part of the Government larms, which were pledged as a security for the paper rix dollars, were sold for 80,000 rix dollars, without the amihitation of the currency, for whose faith it whs supposed to be a sccurity ; in fact, not a paper dollar was recalled or repaid by the Batavian Government alter 1789. In this sad state, as regards the credit of Government, we again became masters of the Cnje, when every mercantile transnction was lifeless, and the currency was withheld by the timorous in the apprehension of loss, and by the usurious in the hope and in the exaction of high interest. In order to relieve the public wants (says the civil serrant, who wrote auch an admirable account of the Cape, in 1823, nud to whom I am indehted for many valuable suggestions and much information), " Lord

Caledon, in that unceasing endeavour to benefit the colony which marked his Lordship's conduct throughout his administration, establislied a bank of discount in 1808, and advanced as a capital, without interest, the sum of 100,000 rix dollars from the treasury. Six per cent. was the legal rate of interest at that time ; but the bank was allowed to receive deposits, and to pay an interest of five per cent. on all sums left there for a year, or more, and the public offices were instructed to carry their daily receipts to the bank, thus making a considerable addition to ita floating balances." In June, 1810, Lord Caleclon authorised the creation of $1,000,000$ rix dollars, half of which were to be appropriated to the use of the loan bank, and the remaining 500,000 for the purchase and repair of public buildings. This latter sum was not issued until 1814 by Lord Howden, and wholly expended hefore the close of his government.

Lord Charles Somerset, on his arrival in 1814, changed the wise aystem of deposits sanctioned by Lord Caledon. Notice was given that no more would he reccived, and that those in hand would be discharged at the end of the year. Tlse withdrawal of the interest on dcposits inflicted a severe blow on the progressive prosperity of the culony. The measure was adopted on the plea that, on any scrious alarm, the whole amount of deposits (about $1,000,000$ rix dollars) might be withdrawn, with no other penalty than a forfciture of the interest, and the capital of the bank being only 100,000 rix-dollars, its ruin would be certain. This was, however, a very problematical event ; and to avoid a distant, remote, nay almost impossible contingency, a certain and immediate cvil, fraught with distress to the whole colony, was madly incurred; hank discounts were now procurable with great difficulty-mercantile speculation (the life and soul of a commercial yeople, like the English and Dutch) abated-a preminm was held out to the renewal of usury, and an encouragement to hourding, two of the most serious disadvantages that can take place among a small community. After enduring all the misfortunes which auch an unstates-man-like step may be supposed to have created for seven or eight ycars, the Cape Government, desirous of remedying the distress which it had caused, notified in 1822 the issuing of 200,000 rix dollars in Government debentures, bearing four per cent. interest. Those who have the slightest knowledge of the bearing of financial measures on a mercantile community, will admit that so partina a measure could not reatore frecdom of discount and a rapid interchange of the representative of property, whether it be in paper or metallic money.

The progress of the paper circulating medium on these transactions was, from 1802 to 1822 , as follows. In 1802, R. Ds. 1,200,000; in 1806, R. Ds. 2,083,000; in 1811, R. 1)s. 2,580,000; in 1814, R.Ds. $3,100,000$; in 1822, R. Ds. $3,005,276$. The paper rix clollars thus created were issued at the rate of $4 s$. sterling, and for a long period maintained this value, being nearly on a par with the Spanish dollar; but, from various causes, a great depreciation took place in the value assigned to the rix dollar. Some ascribed this result to an over-issue beyond the wants of the colony ; others to the circumstance of $50: 1,000$ being too suddenly thrown into circulation hy Lord Howden, in addition to the 500,000 lent to the bank by Lord Caledon; aeveral thought it was because paper money had no real value, not being hyputhecated on land or a portion of the revenue. Perhaps each and all of theae causes contributed to lessen the value of the 4 s .
rix dollar; but to these must also lie added the return to casi) payments in England in 1819, which of course uffected the rates of exchange thetween the Cape and Great Britain. The deprecintion was rajid, and its effect on the colony may be seen from the fact, that $3,000,000$ rix dollars at 4 s., yielding a nominal sterling of 600,0001 ., was reduced in a few ycars to $3,000,000$ rix dollars at $1 s .6 d$. (the rate now fixed by Government), yielding but a nominal sterling of $225,000 l$. The result of such a change to a small community may be imagined; many were ruinedthe quiet transactions of commerce paralysed, and the colony has never since recovered from the shock.
There is no private bank in the colony, but a lombart (or loan) and discount bank before reterred to, inder the control of Government, who detive profit from the discount of bills.
The capital of the Lombard was in 1830-In the Long Loan Fund, 80,952l.; Short ditto, 1,315l.; Agricultural ditto, $11,643 l$. ; total, $93,910 l$.
The funds of the Discount Bank, consisting of deposits belonging to Government, and to those individuals who have opened accounts with the Bank umount to $125,000 l$; ; its capital being about $30,000 l$., and its average anmual discounts 410,000 l.

Amount of l'aper Currency in Circulation.- [B. B. 1836.] The amount of red stamped rix dollar notes, created and issued in lien of old cartoon notes, up to May 1832, as before reported, was-
R. Ds.
f.
$2,667,960$ or 200,097
of which were destroyed to the end of 1834 (and replaced by sterling notes sent from Eugland)
$760,000=57,000$
$1,907,960=143,097$
and during 1835 (and replaced as above)
$1,566,000=117,450$
$341,960=25,647$
In 1836, notes of the same description (also replaced by sterling notes) have been destroyed to the annount of
$356,200=26,715$
Shewing an excess on Red stamped notes of
To which is added Cartoon notes destroyed in 1835, and replaced by sterling notes

Total excess
The notes which have formed this have undergone the strictest scrutiny of the parties whose signatures they bore, and ns there could be no doubt of their being genuine, they could not be rejected by the trensurer. Reports have at different times been made to H. M. governinent as to the causes of the excess in the colonial paper currency, and it may therefore be unnecessary to detail them here. As all rix dollar notes, however, of whatever description, have now been called in, to be replaced by sterlling notes, which do nnt atford the same facilities for forgery as the former paper, and as the present mode of cancellation will totally preclude their fraudulent reissue under any circumstances, it may be expected that this speces of currency will, before long be placed on a permanent footing, ins well in regaril to the exact amount in circulation, as to aecurity ngainst future excess. During 1835, a sum of R. I)s. 18,042
or $1,156 l$., consisting of the last instalments of the Stellenboach Fire Loan, and the balance of the Short Loan Fund of the Lombard Bank, in old Cartoon notes, also in excess, was destroyed, but as it was not replaced by other currency, it has been omitted in the foregoing return.

In licu of the rix dollar notes destroyed to the end of 1836 (with the exception of those alluded to in the preceding paragraph) Government promissory notes (sent from England) have been issued as under: To the end of 1834, $57,0001$. ; in 1835, 117,9331. in $1836,26,715$; total, 201,648 . Of which have been withdrawn from circulation in 1836, and can. celled, $5,185 l$.; balanee, $196,463 l$. ; and replaced by new to the same value, $5,185 l$.; making the official amount of paper currency in circulation, as far as can be ascertained, $201,6+86$.
'There are, however, without doubt, unohjectiunable notes of each deseription of the former currency still outstanding; but as before stated, the amount must now be inconsiderable, althougli no estinate can be formed thereof with any prosprect of aceuracy.
The Government promissory notes in circulation oll 31st Jecember 1836, consisted in 93 notes of 100l. each, $9,300 \mathrm{l}$.; 620 ditto of $50 \mathrm{l}, 31,0001$. 3,027 ditto of 20l., 60,540l.; 4,414 ditto of 102 . $44,140 l$. ; 3,393 of $5 l ., 41,9651$. ; 14,703 of 11 . 14,703l.; total, 201,648 $i$

Amount of Coin in circulation.-[B. B. 1836.] The British currency introduced into the colony from the ycar 1825 (when it became a legal tender) to 1829 inclusive, by the Commissariat, to meet the expenditure of the military establishment, amnounted at the end of the latter mentioned year to $169,800 \mathrm{l}$. in silver ; 2,200l. in copper, and 80,000l. in specic, have bees imported by the Commissariat, during the year ending 31st March 1836. A considerable diminution has, however, undoubtedly taken place in the amount, nearly $40,000 l$. having been shippled to Ceylon and Van Diemen's Land by the Commissariat ; and it is known that remittances have at different periods, been made by merchants and others to England and elsewhere, in specie. About $16,000 l$. in gold has been imported into the colony by private individuals during 18:36 The present circulating medium in metal, may therefore be computel at nearly 150,000 , exclusive of such sums of gold coin as nre also oces. sionally introduced by passengers of vessels and othen, but which cannot be at all estimated, the whole being naturally liable to much tluctuation from a variety of causes, which must also prevent any exact or approximate calculation of the amount.

The coins in circulation are exclusively British, consisting in gold of sovereigns nnd half-sovereigns; in silver of a few crowns and half-crowns, shiflings and sixpences; and in copper of pennies, halfpennies and farthings ; there is no colonial coin, Her Majesty's government hnving established the British coin as the circulating medium of this colony, and having directed that British silver money should be a legal tender ill discharge of all dehts, due to individuals and the public, at the rate of 1 s. Gid. aterling, for each preper rix dollar, and so in proportion for any greater or less sum; the value of the rix dollar, formerly the only currency in the colony, was accordingly fixed at that rate by ordinance of the Governor in Council, No. 2, bearing date the 5th day of June 1825. The coins in circulation have not been cut, pierced or otherwise tefaced or nlteral; neither have their respective values been diminished or augmented.
toreign Coins-me in very smull quantities, and are
t instalments of the balance of the Short lank, in old Csition yed, but as it was not s been omitted in the
destroyed to the end $f$ those alluded to in verument promissory been issued as under: ; in 1835. 117,9331, 48. Of which have ion in 1836 , and can;33.; and replaced by l. ; making the official reulation, as far as can
doubt, unohjectionaof the former currency re stated, the amount although no estimate y prospect of securacy. y notes in circulation isisted in 93 notes of itto of $50 / 2,31,0001$;
4,414 ditto of $10 t$., ,9665.; 14,703 of 11 .
on.-[13. 13. 1836.] The ito the colony from the a legal tender) to 1829 It, to meet the expendi. iment, amounted at the year to $169,800 \mathrm{l}$. in sil. $80,000 l$. in specie, have ssariat, during the year considerable diminution ken place in the smount, shipped to Ceylon and Commissariat ; and it is e at different periods, others to England and $16,000 \%$, in gold has y by private individuals circulating medium ia ited at nearly 150,000 , d coin as are also octa. ers of vessels and others, imated, the whole being ration from a variety of at any exact or approxi-
are exclusively British,
s and half-sovercigns; (1 half-crowns, shillings of pennies, halfpenaies lonial coin, Her Majes. blished the British coin this colony, and having oney should be a legal bts, due to individuals s. Gil. sterling, for fach portion for any greater rix dollar, formerly the as accordingly fixed at Governor in Connel, $y$ of June 1825. The heen cut, piersed or neither have their r 1 or augmentel. ninll ijunntities, and ane
not used as a circulating medium. They are principally Spanish dollars and a iew rupees. Their value depends almost entirely upon the occasional demand for them. The usual exchangeable value of the Spanish dollar is from 3 s .9 d . to 3 s .10 d ., or at most to 3 s . 1 ld ., and that of the sicea rupee from 1 s .6 dd . to 18. $\mathrm{H} \frac{1}{2}$ d. Other rupees when in demand, are lisposed of at about $1 s .6 d$. each, but the general price does not excred 1 .s. $1 \frac{1}{2} l$. or six skillings.
All public accounts have since lst January 1826, bren rendered in British currency; although amongst private persons, the old mote of reckoning in rix dollars, skillings and stivers is in many instances still in use. The proportions are as follow:-

> 1 stiver is
> 6 stivers $=1$ skilling $=0 \mathrm{~s} .0 \mathrm{os} l$.
> 8 skillings $=1$ rix dollar $=1 s, 6$.

Course of Exrhange.-[13. 13. 1836.] Prior to the fith June 1825, the exchange between this colony and Great Britain, was chiefly rezulated by the average rate at which the Commissariat Department disposed of its bills on the Lords' Commissioners of His Majesty's Treasury. But as on the above-mentioned date, the value of the dollar was fixed by law at 1s. fid, sterting, by order of the Governor-in-Council, No. 2; the exchange has also in a manner become settled at that rate, with slight variations, depending upon demand. By the instructions to the Commissariat, bills negotiated on the British Treasury, were jssued nt a payment of 101 l . 10 s . for every bill of 1001., being at a premium of one and a-half per ceut. against the colony or remitter; which in some measure regulated the premium on private bills; althongh the latter were olten sold at par, and sometimes even at a discount, nccording to the credit uttached to the parties, whuse bills or eudorsements were in the market. But the great want of funds in the military chest, consequent upon the great increase of expenditure, caused by the late Kaffre war, has for some time past necessitated the sale of liils on the British treasury at par; and even at this rate, few applica. tions have been made for their purchase. Private bills therefore are at a higher rate of diseount than formerly.

The standsrd measures of this colony are similar to those of Ainsterdam.

Liquid Steusure.一A legger $=152$ old gallons, or about $1267-11$ ths imperial; a half do. $=76$ do., or about $63 \quad 7-22$ do. ; a pipe $=110$ do. or about 91 7.11ths do. ; a half do. $=\mathbf{5} 5$ do. or about $459-11$ ths do.; sul anm $=38$ do. or about $312-3$ rds do.; $n$ half ilo. $=19$ do. or about 155.6 ths do. ; an anker $=9 \frac{1}{2}$ do. or about 7 11-12ths do.; a half do. $=43$ do. or abnut 323.24 ths do.; a tlask $=19.32$ do. or about $.49-46$ do.

There can be no fixed proportion hetween gallons and the hottles in use here, as the latter nre of various sizes and descriptions, but generally a gullon is reckoned equal to $4 t$ bottles.

Corn Measure.-A schepel $=82-107$ old Winches. ter bushel, or $7+3.1000$ imperial; a muid is 4 schepols $=328.107$ do. or 2972.1000 do.; a load is 10 nuids $=3280 \cdot 107$ do. or $2972-100 \mathrm{do}$.
Thus 107 Dutch schepels are equal to 82 Winches. ter bushels, or four seliepel are about three imperial bushels, and 11 schepels are about one quarter.

Cloth Measure.-One ell $=27$ Rhyuland inches; nue yard $=3417-20$ ths do.
The propurtion between Wutch ells and English yards is generally taken nt three yards to four ells, but the real one is 100 yarils $=1291-9 \mathrm{th}$ ells.

Land Measure.-1 144 square inches $=1$ square foot Rhynland; 144 do. feet $=1$ do. rood do.; 600 do. roods $=1$ do. morgen do.

A morgen is generally taken to be equal to two English statute acrea; but the true proportion is considered at 49 71-100 morgen to 100 acres.

The weights generally in use in this colony, are of the standard of Amsterdam, and were introduced by the Dutch Goverrment. They consist of pounds subdivided into 16 ounces or 32 loots each. The proportion generally made use of here in comparing Dutch with English weight, is 92 lhs . Dutch to 100 llss . English : the true proportion, however, is considered to be 914 -silss. Diteh to looths. English or avoirdupois.

The pieces of weight admitted to assize, are from 50lbs. down to one loot, or the 32 nd part of a pound, which is regarded as equivalent to $\frac{1}{2}$ an ounce, though slightly exceeding that proportion. [B. 13. 1836.]
XIV. Corn, wine, wool, provisions, oil, alves, and fruits are the staples of this fine colony, but many other articles are either produced in the country, or obtained from the neighbouring nations. There is an annual exportation of corn, and it brings, as fluur, a higher price at the Mauritius, and other inarkets, than the best American.
The corn of the new settlers in Albany sutfered much at first from the 'rust,' but it has now almost disappeared, and the introduction from Bengal of a hard flinty grain, termed 'Patna wheat,' bas been productive of goorl. Barley, oats, and Indian corn thrive well; the latter is admirably adapted for fattening swine, the export of which, in the shape of hams, bacon, and salt pork, is yearly increasing. Two crops of potatoes are raised in the year, of a succulent and yet mealy quality ; and the nutritive property of every article of provisions is abundantly exemplitied in the fat and healthy appearance of the people. Agricultore is as yet quite in its infancy at the Cupe: the Duteh boors are so heedless of manure that they allow it to necumulate until it reaches a mountainous height, when they set fire to the mass ns a means of getting rid of it; some of these masses (which would be so valuable in England) have been known to continue burning for seven years.

Hine has long been a staple export of the Cape, The eulture of the vine was introduced at first into the colony hy the refugee l'rotestants, after the revocation of the edict of Nantes, but it received a considerable stimulus, when the dominion or intuence of Napoleon extended over the greater part of the wine countries of Europe; the British Government wisely considered it desirable to eneourage the growth ot the vine in our own colonies, beyond the power of foreign nations, and hy a goverument proclamation of the 19 th of December, 1811, the merchants and cultivators of the colony of the Cape of Good Hope, had their attention directed to the wine trade as " a consideration above all others of the highest importance to its opulence and character ;" this proclamation, after athoritatively demanding from the settlement a scrious and lively attention to their interests, promised "the most conslant support and putronage on the part of governmest, and that no means of assistance should be left unnttempted to improve the cultivation, and every encouragement given to honest industry and ndventure to establish the sucesss of the Cape commeree In this her great and native superiarity." This proclanation was followed by another offering meminms to those who planted most largely, and
those who produced the best wines, by the promise that the old channels of this trade should be reopened and new ones formed, and by a variety of regulations, all strongly evincing the lively interest which government felt In promoting the trade, and which was fully ratified and confirmed by the Act of July, 1813, admitting Cape wines to the British market at one-third of the duty then payable on Spanish and Portugal wines. The consequence was a rapid and constant increase from the above period of the quantity of wine produced, so that in the space of eleven years, the annual produce (as appears from official returns) rose in the wine districts from 7,335 leaguers ( 117 gallons imperial) to 19,230 leaguers.

In this state the trade continued till 1825, when the duties on all wines underwent an alteration, and notwithstanding the urgent remonstrances of the merchants, and others interested in the trade of the colony, supported by the consistent patronage of Earl Bathurst, who was still the Colonial Secretary, the protection was suddenly reduced from 28l. to $11 l$. per pipe, with a further prospective reduction of about $2 l$. $15 s$. per pipe at the end of eight years. The effect of this reduced protection was the immediate ruin of some of those largely engaged in the trade, and the general depreciation, to a great extent, of the property of those who were embarked in it, and from which it was impossible for them to withdraw their capital.

The property embarked in England, and in the colony, in the trade in Cape wine, was recently estimated as follows :-vineyard lands and growing vines, $1,200,000 l$.; buildings, stores, vats, \&c. in the country, 60,000l.; buildirigs, vats, \&c. in Cape Town, 300,000l.; brandy, casks, \&c. 100,000l.; wine in Cape Town, 125,000l.; stock in bond, in England, about 10,000 pipes, at 12l. each, 120,0001 .:-total, $1,905,000$ l. A very small portion of the immense capital thus employed can be withdrawn under any circumstances, even by its present possessors. In the gradual decay, and ultimate ruin of the trade, it will perish and be utterly lost to the country.-Even the soil in which the vines are planted, is in general unfit for any other species of profitable culture. Wheat cannot be raised upon it, and what is now an extensive vineyard would be altogether contemptible as a grazing farm. The fustage, buildings, \&c., might at once be committed to the flames. Cape wines have formerly had in general a peculiar raciness which much injured their sale in European markets; this was most probably owing to the avidity of the wine farmers, who attended more to quantity than quality; whenever the latter has been attended to, the wine produced at the Cape has been equal to that prepared in any part of the world.

The produce of wine and brandy in 1821, and subsequent years, is thus given in a manuscript prepared at the Colonial Office, and not before printed. The quantity in leaguers (a lenguer heing 152 gallons) 1821, 16,254 of wine; 1,205 of brandy ; 1824, w. 16,183, b. 1,326 ; 1828 , w. 20,405 , b. 1,413 ; 1831 , w. 18,467, b. 1,382 ; 1832 , w. 16,973 , b. $1,394 \frac{1}{2}$.

Wool will, in time, be one of the greatest nnd most profitable staples of the Cape; by an unaccountable want of foresight it has long been neglected; but stimulated by the example of New South Wales, the colonists are now actively engaged in endeavouring to replace the coarse woolled, or rather hairy sheep (of which they possess $3,000,000$ ) for the tine and pure blood breed of that animal, whose numbers at the Caje now amount to urnvarts of 50,000 -the
wool from which has brought 2 s .6 d . per lb , in the Lnndon market. The British settlers in Albany have taken the lead, and are at present importing Saxon and Merino rams from England and New South Wales, the former bringing $15 l$. per head, and the latter 30l. per head. Algoa Bay or Port Elizabeth, as it is now called, has thus increased its exportation of fine wool; 1830, 4,500 lis., value $222 l$; 183], 10,600 lhs., value $551 l$.; $1832,10,700 \mathrm{lbs}$., value 935l.; 1833, 44,896 lbs., value 2,649l.; 1834, 59,266 lbs., value 3,279t. It is a singular circumstance that some of the original Merino stock of New South Wales were rejected at the Cape, and theri carried on to Sydney, where they were purchased by Mr. M'Ar. thur: had the Africans received the proffered boon, they would probably now be exporting a quanlity greater than that of their brother colonists (sce New South Wales.)

The fineness of the climate, requiring no winter provender, and the great extent of upland soil and park-like downs, with the numerous saisola and saline plants, so admirably adapted to prevent the Huke or rot, shew the adaptation of the colony for a vast sheep fold, capable of supplying an almost indefinite quantity of the finest wool; and, together with New South Wales and Van Diemen's Land, rendering England not only totally independent of supplies from Germany and Spain, but really furnishing a much finer and more durable and elastic wool, which will enable us to maintain our superiority in woollens against foreign competition : this is a view of the subject which it behoves a statesman to attend to

Provisions, particularly salt beef, ought to be a larger staple than it is, but I trust it will augment in quantity as it certainly has improved in quality. I can hear testimony to the excellence of the Cape salt provisions : among other instances I may mention one, namely, that when in H. M. S. Leren, in 1823, I, as caterer of our mess, laid in six month's salt provisions at Algoa Bay, the price paid for the beef being, as well as I remember, $1 \frac{1}{2} d$. perlb.; we were cruising for the next six months in the tropics, but the last cask of beef was as fresh and as juicy as the first, while the contrast between the Cape and our ration provision from Cork was very great, the advantage being decidedly in favour of the former. At present, cured meat is pretty largely exported to the Mauritius, and other places, hut it should he used for victualling our navy at the Cape, India, and West Africa stations, the contractors being placed under the same supervision as at home, every cask being examined and branded belore shipment, and a heavy penalty attending any default. Its importation should he permitted into England at a gradually decreasing rate of duty, until it was perfectly free.

Oil.-The fisheries of the Cape have not yet been sufficiently attended to: during the calving season, whales come into every hay on the const, to bring forth their young, and thus, in some seasons, a grod number of these immense creatures are taken; hut there have been no vessels fitted out for whaling alnug the coast, or among the islands to the nurthward of Madagascar, where the sperm whale abounds, and where, under a genial clime, and an atmosphere never troubled with tempests, the American whalers fill up in a few weeks. liven in Delagon Bay, almost a part of the colony, I have seen 20 whale ships, Einglish and American, but not one from the contiguous settlers at the Cape. A good banking sygtem would afford a stimulus to such protitable underalings, and the Africanders in this instance, ss weiia
s. $6 d$. per llb. in the tlera in Albany have nt importing Saxon d and New Soulh . per head, and the or Port Elizabeth, as ied its exportation of value $222 t$; 1831 , 19,700 lbs., value ,6491.; 1834, 59,266 ar circumstance that tock of New South , and then carried on chased by Mr. M'Ard the proffered boon, xporting a quantity er colonists (sce Nelv
requiring no winter $t$ of upland soil and icrous salsola and sa. d to provent the tluke the colony for a vast ; an almost indefinite d, together with New en's Land, rendering ependent of supplies t really furnishing a ad elastic wool, which superiority in woollens :his is a view of the sman to attend to. beef, ought to be a trust it will augment improved in quality. xcellence of the Cape instances I may menin H. M. S. Leren, in , laid in six monlh's the price paid for the er, $1 \frac{1}{2} d$. perlb.; we were ths in the tropics, but sh and as juicy as the en the Cape and our as very great, the ad. ur of the former. At argely exported to the ut it should he used Cape, India, and West s being placed under me, every cask being hipment, and a heav its importation should a gradually decreasing tly free.
ape have not yet been ; the calving season, n the coast, to lring some sensons, a grod Ctures are taken; but ted out for whaling islands to the nurth. sperm whale abounds, , nud an ntmosphere the American whalers Delagoa Bay, alinost scen 20 whale ships, one lrom the contigood bunking system profitable undertak. instance, ns weilia
in that of wool, would do well to profit by the
example set them by their more enterprising neighbours at New South Wales. Oil from vegetables might also be extensively collected; the olive thrives luxuriantly where planted, and a rich and peculiar nil, collected by expression, from the sesamum plant, miay be obtained in large quantities from the native triles to the eastward and northward.
The Aloe plant grows indigenously in most parts
of the colony, and a considerable quantity of the inspissated juice has been exported for some years, a large portion bcing probably used as a aubatitute for taxed hops in England.

Fruits of a dried nature, including apples, apricots, peachcs, pears, \&c., have been long in great demand. Hidea, horns, ivory, gums, are also valuable branches of produce.

Return of the Produce, Stoek, \&e., of the Cape of Good Hope. [B. B. 1836.]

*The quantity in tie vicinity of the town is very inconsiterable. t A smali quantity of these articles are cultivated in the District, for which no duty is paid. The quantity raised by the farmers is not stated. $\ddagger$ No accurate aceonnts have been reeeived of either stock or produce for the last two years. \& Undefined. \#The produce raised in the Caje Town District is principaliy used by the grower. The prices annexed are the average of saies at the public market.

Manufactures, Mines, and Fisheries. [B. B. 1836.]Cape Town.-There are seven water mills, one stcam Hour mill, two tanneries, one hat manufactory, four breweries, three candle manufactories, five smuft manufactories; one soap manufactory; one spirit distillery, two whale fisheries, four brick fields (two brick fields, ovens at the military lines), one steam aawing mill, one iron foundry. There are no minea, but eight quarrics of coarse building stone at the foot of the Lion's Rump. There are seven boats employed in the whale fishery, \&e.; four whales were taken in

Table Bay last year, yielding about 10,000 gallons of oil, valued at $1,200 t$. Small fish of various descriptions are also caught in large quantities, but their value is unknown. Very few whales entered Tahle Bay during this year. A manufacture of hats of a superior quality has bcen recently established in Cape Town; those previously manufactured were of a coarse quality, intended chiefly for the use of the country pcople. Many articles of Colonial growth or produce are annually exported.

Cape District.-There are two breweries near New.
lands, five tanneries, three whale fisheries, seven water mills and 40 wind and horge mills for grinding. No mines, but quarries of coarse building stone and lime stone. There are 17 boats employed in the whale fishery, \&c. Seven black whales were taken at Kalk Bay last season, when 10 boats were employed, value of fish, 350l. Small fish of every kind are taken along the const for home consumption.

Stellenbosch.-There are two water mills and one horse mill in the village, two tanneries in the village, three tanneries at the Paarl, three tanneries at Hottentots Holland, one water mill at the Paarl, two water mills at Hottentots Holland, one water mill at Maddergat, and various water mills and tanneries throughout the district; one tile kiln near Stellenbosch. This is the principal wine district of the colony ; grain and all sorts of fruit are also produced here in abundance. The supply of oranges is very considerable, and the finest chestnut trees are found here. The average quantity of wine is estimated at about 10,000 leaguers, and of brandy about 700 leaguers, per annum. There are no mines in this district, but stone for building purposes is found in different parts: there are no quarries. Limestone is found near the sea coast at Hottentots Holland, and is burnt by some inhabitants of that place and of Maddergat. The value is $1 s .6 d$. per half aum. There are several boats, employed at Hottentots Holland, in taking small fish, which are either consumed there or sold to persons present on the spot. Seven honts are employed in whale fishing, \&c.; 11 whales caught this year, valued at $1,5 \% 01$,

Worcester.-One water-nill in the village, and three hat manufactories. Two hat manufactories at Clan William. No mines of any description, and one quarry of coarse building stone in the neighbourhood of Worcester. Lime is also found in very great quantities along the Oliphant's river, but is not used. With the exception of the hatteries on a susall scale, where coarse hats are made for the use of the farmers, there are no manufactories in this district. Each person is provided with either a water, horse, or hand mill, to grind their corn for family consumption. Two tanneries on a small scale are also met with in this district, one at Worcester and one at Tulbagh. On most of the farms the people tan skins for their own use. A quarry of coarse slate, used for building, has been opened near the town, and is there worked by the builder. No mines of any mineral substance have as yet been found in this district; and if mines were discovercd, which, from the nature of the country and external appearance of the mountains, is not improbable, the want of labourers, fuel, and a connient sea-port, would render the working of them unprofitable to the undertaker. This being an inland district, having no communication with the sea coast, and no navigable rivers, no ships or boats are built or employed by the inhabitants; neither are any of them engaged in fisheries. In the division of Clan William, there are also a couple of hatteries of the snme description, and for the same purposes as at Worcester, besides a few mills for grinding corn for home consumption, and tanneries for the preparation of skins for domestic use. There are no manufactories, mills, or works of any description in this division; neither have any mines or mineral substance been found in it. This division borders on the west, from the Groenwally to the Kousie River on the Atlantic Ocean. The mouths of several periodical and a few constant rivers, of which latter the Oliphant's River is the principal, are met in the tract of this coast ; but
are all barred, either by reefs of rocks or by bars of sand, which unfavourable circumstance preventa any commercial enterprize on this coast.

Swellendam.-Three water mills at the village; two horse ditto at ditto; three tanneries at ditto; two water mills near ditto ; two tanneries in the village of Caledon; one water mill in Caledon ; two ditto near ditto; one ditto at Gnadenthal ; one ditto at Elim; one tobacco manufactory at Gnadenthal; one tan. nery at ditto ; one tannery at Elim; one cutlery manufactory at Gnadenthal. There are no mines but quarries of stone for building along the coast, particularly in the eastern part of the district. Lime. stone is also found along the coast. The quantity of lime burnt is very tritting, and only for private use or sale in the village. There are between 40 and 50 water and horse mills, and as many tanncries, in various parts of this district. Fishing boats are also kept by every farmer residing near the sea coast for fishing for private consumption. Seals are caught on Dyer's Island, near Cape L'Agulhas. The island belongs to Government, and is let for three years at 151 1 . 10s. per annum. There are four warm springs in the district. Fish of every description are caught in this district, but for private consumption only.

George.- Three hat manufactories; one saddle manufactory ; three tanneries; one water mill; one horse mill; all in the village of George. No mines; but quarries along the coast, one of coarse building and mill stones, but the latter are seldom used, on account of their softness. There are six boats employed in the whale fishery, \&c. Only two whales were taken this year, valued at $300 l$., which is ascribed by the proprietors of the fisheries, with great reason, to the number of American vessels constantly fishing on our coasts. There is a seal island in Mossel Bay, which has been let for a term of seven years at 13l. 7s. 6il. per annum. Much corn is annually es. ported from Mossel Bay.

Uitenhage. - Two hat manufactories; two tanneries ; also several saw, wind, and water mills. There is a lead mine, situate about 12 miles from Port Elizabeth, but it is not worked. Six boats employed in the fisheries. Quantity caught this year, five whales, value $660 l$., and 681 seals, value $444 l$. The annual value of other fish caught averages $45 l$. The St. Croix Islands have been let for the terin of seven years for 187 l . 10 s., and the Bird and Chuam Islands at an anisual rent of 20 l . 1 s .

Beaufort. - One hat manufactory in the village; one ditto in Nieuwveld.

Graaff Reinet. - Five hat manufactorics in the town, and several mills and hatteries in various parts of the district.

Colesberg.- One hat manufactory ; one ditto at Camdebo.

Alhany. - Two water mills near Graham's Town; one ditto on the Koonap ; two ditto at Bathurst ; one wind-mill at Graham's Town; two ditto near Bathurst; one ditto near Knfir Drift; one ditto at Trappes Valley ; six tanneries in various parts of the district ; one hat manufactory at Graham's Town; two breweries at ditto; one tilc-kiln near ditto; two candle manufactories at ditto. No mines of any description are worked in this district. Several quarries of good limestone are found between Bathurst and the Fish. Abundance of stone for building purposes is found in every part of the district, and numerous quarries have been opened, the most remarknhle of which is situated near Bathurst. The matenal here found at a few feet below the surince is a stratum
rocks or by bars of istance prevents any ast.
Is at the village; two neries at ditto; two eries in the village of don ; two ditto near one ditto at Elim; jadenthal ; one tanElim ; one cutlery ere are no mines hut long the coast, partithe district. Lime. ast. The quantity of nly for private use or between 40 and 50 many tanneries, in ishing boats are also near the sea coast for Seals are caught on thas. The island beet for three years at re four warm springs lescription are caught :onsumption only. actories; one saddle one water mill; one George. No mines; of coarse building and Idom used, on account ix boats employed in vo whales were taken ch is ascribed by the h great reason, to the constantly fishing on sland in Mossel Bay, m of seven years at corn is annually es.
ufactories; two tan. nd water mills. There miles from Port Eli. ix boats employed in this year, five whales, ue 444l. The annual erages $45 l$. The St . $r$ the term of seven d and Chuam Islands
ctory in the village;
hanufactories in the erics in various parts
ctory ; one ditto at
ear Graham's Town; tto at Bathurst ; one two ditto near BaDrift ; one ditto at various parts of the at Graham's Town; kiln near ditto; two
No mines of any trict. Several quar$d$ between Bathurst ne for building purthe district, and nud, the most remark. hurst. The material surfince is a stratum
of indurated limestone ; it is easily worked when first quarried, but hardens on exposure to the atmosphere. Many indications of iron ore are met with ; but it hns not yet been ascertained whether the ore is sufficiently rich and abundant to hold out the hope of a profitable return for the investment of capital in the establishment of founderies or iron-works. Small fish are caught here in abundance at the Kourie River.
Somerset. - Two water-mills in the village; two ditto near ditto; two ditto in the Tarka division; two tannerics; one hat manufactory; one brewery. Several parts of the district of Somerset abound with limestone, and quarries have been opened near Rodeva and at Cradock, both on the banks of the Fish Rlver Saltpetre is sometimes met with in the fissures of the roeks at the northern end of the district ; but it has ever been follnd in sufficient quantities to attract attention to the collection of it. The quantity of lime produced annually may be estimated at 16,000 bushels; the value to the burner is $\mathbf{l 0 0 l}$. Many parts of the Fish River which runs through this district abounds with mullet and eel ; but they are merely taken by the inhabitants for private consumption. Somerset is a pastoral district, and trade is only engaged in by a small proportion of the inhabitants. The northern and eastern parts of the district contain some of the finest pasturage of the colony. From these quarters the Cape Town market is annually supplied with cattle and sheep for slaughter. A few farmers have turned their attention to the production of fine wool.
Quantity of fish caught in 1836 throughout the colony-18 whales, 681 seals and small fish; in value 3,3491 . Total number of boats employed, 47.
The value of property has thus been estimated :Property annually created, and consumed or converted into Moveable or Immoveable Property.-Animal food for 150,000 mouths, at 200 lbs . each per annum, $30,000,000 \mathrm{lbs}$, at $1 \frac{1}{\frac{1}{2} l}$. per lb. $187,500 \mathrm{l}$.; fish for 150,000 mouths, at 25 lbs . per annum, $3,750,000 \mathrm{lbs}$.
at $1 \frac{1}{2}$ cl. per Ib. 7,800l.; vegetables and fruit for 150,000 mouths at $1 d$. per day, for 365 daya, $228,125 l$. ; butter, eggs, milk and cheese for 150,000 mouths, at $1 \frac{1}{2} d$. per day for 365 days, $114,062 l$.; grain raised of all sorts, 600,000 bushels, at $33.6 i l$. per bushel, $105,000 l$.; wine, 1,700 leaguers, at 60 s. per leaguer, 51,0001 ; brandy, 1,285 leaguers, at 180s. per leaguer, $11,565 l$.; luxuries, such as ten, sugar, coffee, \&c. for 150,000 mouths, at $1 \frac{1}{2} l$ l. per day for 365 days, $114,062 l$. ; wearing appnrel, $5 l$. each, $750,000 l$.; houschold furniture, at 101 . per house, 100,000l.; increase of agricultural stock, viz. horses, sheep, \&c., 600,000l.; net income from commerce, trades, and professions, $550,000 l$. ; value of exports not included in the foregoing, $100,000 l$.; total annually created, $2,929,114 l$.

Moveable Property: horses, 100,000, at $10 l$. each, $1,000,000 l$.; horned cattle, 500,000 , nt $2 l$. each, $1,000,000 \mathrm{l}$. ; sheep, $3,000,000$, at 3 s . each, $450,000 \mathrm{l}$.; goats, 600,000 , at $2 s$. each, $60,000 l$. : swine, 160,000 , at $1 l$. each, $160,000 l_{\text {. ; p poultry, value } 100,000 l \text {. ; fur- }}$ niture for 10,000 houses (I estimate a house for each 15 mouths), at $50 l$. each, $500,000 l$. ; clothing for 150,000 persons, at $10 l$. each, $1,500,000 l$. ; machinery, farming implements, \&cc., 800,0001 . ; bullion, including coin, $150,000 l$.; ships, boats, \&c., $150,000 l$.; merchandize of all kinds, 500,000 .; total moveable property, 6,910,000l.

Imimoveable Property: houses, 10,000 , at $100 l$. each, $1,000,000$. ; land cultivated, 300,000 acres, nt 25l. fer acre, $7,500,000 l$. ; land uncultivated, but valuable, $10,000,000$ acres, at $5 \%$. per acre, $2,500,000 l$.; private stores, buildings, \&c., $300,000 l$. roads, bridges, and wharfs, $500,000 l$.; forts, gaols, hospitals, and other public buildings, $1,000,000 l . ;$ vines, plantations, \&c., 800,000l.; total immoveable property, $13,600,000 l$. ; property anuually created, $2,929,114 l$.; ditto moveable in the colony, $6,910,000 l$. ; ditto immoveable in ditto, $13,600,000 l$.; total, $23,439,114 l$.

CHAPTER II.-MAURITIUS, OR ISLE OF FRANCE.

Section I. Mauritius, or Isle of France, is situate In the Indian Occan, 40 leagues to the N. E. of the Isle of Bourbon, and 160 from the grent island of Madagascar, between the parallels of 19.58 and 20.32 S. Lat. and the meridians of 57.17 and 57.46 E . Iong, It is ncarly elliptical in form, mensuring in length, about forty miles from N. to S., and 32 from E. to W., and comprises an area of 432,680 superficial English acres, or 676 square miles.

The greatest diameter of the oval is 63,780 yards, and its breadth 44,248 yards. Some estimate the length at 35 and the breadth at 20 miles.
11. The island was discovered it the year 1507, hy Don Pedro Mascarenhas, a navigator of the Portuguese Government in India, under the orders of Governor Almeida. Mascarenhas named the island Cerné. The Portuguese do not seem to have made any settlements there during the period they were
masters of it, which comprehended almost the whole of the sixteenth century; they appear nerely to have placed some hogs, goats, and monkies on Cerné and Bourbon, in the event of any of their vessels being thereon wrecked.

In 1580, Philip II. of Spain having become possessed of the Government of Portugal, acquired the nominal sovereignty of Cerné, but totally disregarded it during the period of his sway, viz, for eighteen years. The Spaniards were unable to maintain the possessions in South America, and the West Indies, originally belonging to Portugal : while the successful Belgic or rather Duteh insurgents of the Castilian Monarchy appeared in India, to dispute with the successors of Vasco De Gama the sovereignty and commerce of the rich territories of the oriental world, and in 1598, the Dutch Admiral, Vnn Nerk, at the head of a large squatron, landed on the unin-
habited Isle of Cerné, took possession of it and named the place Mauritius, in honour of the Prince of Ornuge.
The Dutch do not appear to have, nt this time, settled permanently on Mauritius; they, however, oceasionally touched at the island to water. In I613, an Englishman, Captain Castleton, commanding an English ship, visited Mauritius, and found it still uninhabited; in which state it continued until some pirates in the Indian seas settled on its shores; but at what precise period it is impossible to say. The Dutch had, undoubtedly, regular governors appointed to the island, who resided at Grand Port, from 1644 to 1712 , when Mauritius was finally abandoned by the Hollanders, and subsequently colonized by the French, with a few settlers from the contiguous island of Bourbon; its formal occupation not taking place until 1721, when the name was changed from Mauritius to Isle of l'rance, and the territory given by the King to the French Enst India Company, under whose sway it remained from 1722 to 1767 . The inhabitants, however, for a long time were chictly composed of adventurers, refugees, or pirates, from all nations, and it was not until 1730, that the Home Government and the French East India Company began to pay attention to the island, by sending engincers and other persons to form a regular establishment; the real founder of the colony, however, was M. de In Bourdonnais, who was sent out as GovernorGeneral of the Isle of France, Bourbon, \&c. in 1734.

Up to the arrivnl of M. de la Bourdonnais at Mauritius in 1735, the French Enst India Company had been at considerable expense in maintaining the island, which was considered to be solely fit for $n$ refreshing station for their ships, while l3ourbon was made a grent colfee plantation. Bourdonnais, in order to snve the Company's finances, introduced the culture of the sugnr cane into Manritius, established manufactures of cotton and indjgo, attended to agriculture and commeree, destroyed the Maroon negroes, foumbed a Court of Justice, made roads, fortified the const, formed aqueduets, arsenals, batteries, fortifications, barracks, wharfs, \&e. and in th? cleven yenrs, during which his government lasted, changed the whole face of the country, laying the foundations of prosperity which subsequent disasters however almonst entirely destroyed. [The History of the Colony during the French Revolution will be found in my Colonial Library, vol. jii.]

The Marquess Wellesley, when Governnl-General of India in 1800, projected and fitted out an expedition destined for the conguest of Mauritius and Bourbon-the commmud of which was given to his brother Arthur then Licut. Colonel Wellesiey, who was to have assumed the governorship on their conquest. [Sce Despntches of the Marquess Wellesley; vol. i. to v.] The subsequent expedition of the Indian nrmy to Egypt frustrated that against the Mauritios, but it was urgently pressed on the home government by the noble Marquess that no time should be lost in destroying the nest of French pirates which these islands harboured. In all their enterprizes against British commerce the French were materially assisted by a set of desperate Amerienn speculators who infested the whole of our possessions in the east ; they brought fust-sailing ships to the Mauritius, fitted them out, met them at fixed stations, gave intelligence of the sailing of all our trade; bought not only the cargoes of the prizes for the American markets, but the hulls of the ships to carry bnek to our own settlements; and there are strong reasons to believe collu-
sive bargains were entered into in anticipation of the enptures made in consecpuence of such intelligence; in short this island was made a rendezvons for all the frechooters of every nation to fit out privateers and commit lepredations on English property.
To put a stop to these proceedings, a strong arma. ment of $, 12,000$ troops, with 20 ships of war, was therefore despatched from India, and from the Cape of Good Hope, for the conquest of Mauritius in 1810 :-a landing was effected some distanec from Port Louis, and after the French troops and national guard had suffered several repulses a capitulation was entired into, and the Manritians became subject to the crown of Great Britain. At the peace of $1 \mathrm{~s} / 4$, the acquisition wns ratified, and the island has ever since remained a colony of the empire.

The following is a list of the governors of the island, French and English, since its colonization: -For the French East India Company-M. de Myon, 1722 ; M. Dumas, 1726 ; M. de Maupin, 1728; M. Mahé de la Bourdonnais, 1735 ; M. David, 1746; M. de Lozier Bouvêt, 1750; M. Magon, 1755; M. Boucher Desforges, 1759. For the King-M, Dumas, 1767 ; M. de Steinafter, 1768 ; M. le Chevatier Desroches, 1769 ; M. le Chevalier te Jernay, 1772 ; M. le Chevalier Gutirand te la Brillanne, 17ifi; M. le Viconte de Souillac, 1779 ; M. Ie Chevalier Brunni d'Entrecasteaux, 1787; M. le Comte de Conway, 1789 ; M. Charpentier de Cossigny, 1790; M. le Comte de Malartic, 1792; M. de Magallon de la Morlière, 1800 ; M. Decaen, Captain-General, 1803. For his Britannic Majesty-M. R. J. Far. quhar, 1810 ; Mnjor-General H. Warde, 1 N11; M. R. J. Farquhar, 1811 ; Major-General G. J. Hall, 1817; Colonel J. Dalrymple, 1818 ; Major-General R. Darling, 1819 and 1823 ; Sir R. J. Fnrguhar, Burt. 18.00 ; Lieut.-Gen. the Hon. Sir Galbraith Lowry Cole, 1823 ; Major-Gen. Colville, 1827; Ma. jor-Gen. Nicolay, $1 \times 33$.
III. The Mauritius is one of the most pieturesque and romantic looking islands in the eastern bemisphere; the land rises from the coast to the middle of the island, and chnins of mountains intersect it in various rudii, from the centre to the shore; there are however, three principnl ranges, in height from 1,800 to 2,800 feet above the sea, mostly coverd with timber, nud few presenting, except at their very summits, hare rock.

Extent of the Islind of Mutritias and the Height of its Mountains.-This island otlers in its outline, so many bays, arms of the sea, and points or promortories, that it is difficult to determine exactly its superficies. The following distances may be considered ns nearly exact:-From the signal post of the Butte aux Sables to thint of the ?ort La Fayete, 9,399 fathoms 7 ft ; from the l'ort La Fayette to the signal of the Puits des Hollondais, 5,399 lathoms $\boldsymbol{i l}$. from the Well of the Hollondais to the rock of the Pointe du I)iable, 7,914 fathoms; from the Pointe du Diable to the Mont Chnour, 10,863 fathoms; from Mont Chaour to the signal of the Savane, 7, , al fathoms; from the signal of the Savane to the S. II: point of the island, 11,286 fathoms 2 ft ; from the S. W. point to the Piton of the Little Black River, 6,271 fathoms 4 ft .; from the Piton of the Little Black River to the Coral Point, 4,639 fathoms 2 fti from the Coral Point to the Point of the river Bed. isle, 5,619 fithoms 2 ft ; from the river Bellisle to the Saud l'lain, 4,677 fathoms 3 ft .; from the Land Point to the middle of the Grent River, 2,5$] 8$ fations, from the Grand River to the Cannonicr's Point,
in anticipation of the : of such intelligence; i rendezvous tor all the fit out privatcers and sh property. edings, a strong arma. 20 ships of war, was dia, and from the Cape juest of Mauritius ia d some distance from ch troops and national ulses a capitulation was ians became subject to At the peace of $18 / 4$, nd the island has ever e empire.
the governors of the since its colonization: حompan!t-M. de Myoa, de Maupin, 1728; M. 735 ; M. David, 1746 ; 0 ; M. Magon, 1755 ; 9. For the King-M. ater, 1768 ; M. le Che. le Chevalier de Jernay, ad de la Brillanne, $177_{6} 6$ 1779 ; M. le Chevaliet 787 ; M. le Comte de tier de Cossigny, 1790 ; 792 ; M. de Magallon de ecaen, Captain-General, Majesty-M. R. J. Farral H. Warde, 1s11; Iajor-General G. J. Hall, e, 1818 ; Major-General ; Sir R. J. Farpuhar, the Hon. Sir Galbraith en. Colville, 1827; Ma.
of the most picturesque its in the castern hemis. be coast to the middle of hoontains intersect it in to the shore; there are ranges, in height from the sea, mostly covered ing, except at their very
uritius and the Height of ollers in its outline, 50 and points or promon. determine exactly its listances may be consiI the signal post of the f the ?ort la Fnyette, e P'ort La Fayette to the dais, 5,399 fathoms itit; ndais to the rock of the ons ; from the Poiate di 10,863 fathoms; from 1 of the Savane, $7, \times 59$ the Savane to the S . II: athoms 2 ft .; from the the Little Black River, the Piton of the Little $\mathrm{nt}_{1} 4,639$ fathoms 2 ft ; Point of the river Bell. $m$ the river Bellisle to s 3 ft .; from the Lanl at River, 2,518 fathoms, the Cannoniers's Puint,
$10,06.4$ fathons 5 ft ; from the Cannonier's Point to the Saak mark, 4,214 fathoms 7 ft . Circumference of the ishond, $90,6,61$ fathoms 2 ft . This circumference is equal to 45 Paris leagrues, or $35 \frac{1}{2}$ marine leagues.
In supposing that the arms of the sea are nearly compensated by the tongues of the land, we must reckon on the superficies of the island being 480 millions 744,002 (toises carres) or 432,680 roods of 100 perches, a perch eonsists of 20 feet.
Height of the Mountains.-Signal Mountains of Port louis to the foot of Mat de lavillon, 996 feet; long Mountain, at the foot of the Mat, 53.4 ; Piton, at the fout of the Mat, 801 ; Summit of the Ponee, 2,481; Summit of the Peterbot, 2,520 ; 1iton of the Little Black lliver, 2,564; Piton of the Cunot, 1,6.4; The Corps de Garde, 2,214; Rempart, 2,376; From the highest summit to the Trois Minnelles, 2,052; Morne de la Riviere Noire, 1,698; Morne Brabant, 1,698; Montagne de la Savant, 2,130; Montagne de Creoles, 1,128; Morne du Grand lort, 2,094 ; Pointe du Diable, 318 ; Piton du Bambon, 1,932; l'iton du Milien, 1,812; Piton de layence, 1,338 ; Coin de Mire, 486 ; Ile Longue, 32.4; He Blanche, 162 ; lle Ronde, 990 ; larasol, 498.

In the centre of the island there are plains of table land several lengues in eireumference, and of different clevations, forming the several parts of the distriets of Moka and Pleins Willsems. From among the ranges of mountains several streams take their souree, running generally through deep ravines, pervious however to the breeze and sun's rays.
The two principal ports are that of lort Louis, to the N. W. or lecward, and the capital of the island, and the other that of Mahehourg or Grand l'ort on the S. E. or windward shore.

Port Louis (the seat of Government), with a popillation of 26,000 , of whom 16,000 are apprentices (crst slaves) and 3,000 whites, is a very neat town, well laid out, and now that stone are being suistituted for wooden buildings, presents a handsome appearance. The shops are numerous and well laid out; the markets admirably supplied, and the water is of crystalline purity.
IV. The appearance of the island and the nature of its material would indicate it to be of volcaric origin. The rocks are disposed in strata, which rising from the sea shore form in the centre of the island an elevated plain upon whose declivity are several rocky mountains. These may be regarded as the remains of an immense voleano which having exhausted itself fell in, either by the effect of a violent cruption or by an earthquake, leaving its firmly supported sides standing. These mountains are composed of iron
stone, and a species of lava of a grey colour, the soil produced from the decomposition thereof forming an carthy substance consisting chiefly of argyl and an oxyde of iron.

The tops of the mountains are in general indented with points like the comb of a coek; the lew which have that summits present the appcarance of a pavement, no signs of a funnel being scen in any part.
$\Lambda$ bank of coral surrounds the island lor the distance of a gharter of a league from the shore, and the several inlets that appear on the coast have all a coral furmation at the hase.

The soil of Mauritius is in many parts exceedingly rich; in some places it is a black vegetable mould, in others a bed of solid clay or quaking earth, into which a stake of 10 feet in length may be thrust without meeting any resistance.

The surface of the plain at Port Lousis, is of coralline or calcareous rock, with a slight covering of vegetable soil ; at St . Denis the soil is reddish and lightly spread over a stratum of stome; at the Fiedd of Mars it is a bed of rich clay mixed with llints; but most generally the earth is of a reddish colour mixed with ferraginous matter, which often appears on the surfine in small orbicular masses; in the dry seasons it becomes extremely solid, and resembies potters' carth from its hardness ; after rain it becomes viscid and tenacious, yet it requires no great labour in coltivation. Many of the plains and vallies are strewed with buge blocks of stone, but there is no real sand in the island.
V. The climate is on the whole very salubrious; there are four scasons at Mauritins; the Ist begins in May, accompanied by S. E.. winds, when squalls and rains occur; the $9 d$, with Sept. or October, when the S. E. ehanges to the N. W.; the sun now approaches the zenith, warms the atmosphere, causing the rains and winds, which begin in December, when the 30 season commences; this is terminated in March, when the th or dry season begins, lasting only about eight weeks. These are the scasons as regards the cultivator, but they may be generally divided into two, when the winds blow from the S. E. to S., and from the N. E. to N., forming a kind of monsoon. The S. E. winds, although they never exceed a certain degree of force, are always more or less strong and violent; and though they give a eertain treshness to the air, yet, while they blow, every thing ecases to vegetate. The winds from the S. prevail in winter, and are cold; E. winds are unfrequent, and generally accompanied by nbundant ruin. The N. W. and W. winds are hot, often wenk, interrupted by calms, violent storms, and great rains.

Many of the East India Company＇s civil and mili． tary officers seek and find health at Mauritius；and I have mysclf invariably found the air，especially al Moka，exceedingly elastic，and giving a pleasing fow of spirits to the mind．
The hurricane months are January，February and March，but these tempesta do not occur every year， their return is uncertain．［Full information on the Physical Aspect，Geology，Climate，Animal and Vege． table Kingdom，\＆c．will be found in my Colonid Library，vol．iii．］

pedle in different Places 0 Mauritius.

known under the name ritius, containing their xtent, their population,
situated in 19.40 .40 s citude from Greenuich lauritius. With an es-
tent of 18 miles in length and three or four in breadth, it contaius but about 9,000 acres of arable land; the western coast does not furnish drinkable water. It offers two places for anchorage; the one at the N. is safe and commodious, the other in the $S$. lias but a very narrow entrance. It contains 123 inhabitants. There is a good fishery.
2. St. Brandon. - Near tise bank of St. Brandon, which is 27 miles long, 12 broad, and 72 in circum. ference, are seen 12 small islands, forming five groupls, one or two leagues apart from each other. This bank, in latitude 16.26, and longitude 59.35, is 246 miles from Port Louis. These islands are used only as a place of security for fishing implements belonging to five persons, who thus gain a livelihood. There ls no purmanent settlement herc. In a great hurricane, these islands are totally submerged.
3. Diego Gurcia.-Situated in latitude 7.15, and 72.32 E. longitude, and 1,176 miles from the Mauritius. This island, in the form of a horse-shoe, comprises 12 miles from N. to $S$., and six miles in breadth, forming a bay capable of holding a large number of vessels. The water is saltish, and is found in wells dug in the sand. Its possession has been conceded to three inhabitants of the Mauritius. It produces an abundance of cocoa-nut trees, and wood for burning. The population consists of 275 individunls.
4. Six Islands.-Thus named from their number; they are situated in latitude 6.35, and longitude 71.23 , 72 miles from Diego, and 1,188 miles from the Mauritius. These islands, arranged in the form of a horseshoe, present an anchorage of eight or nine miles round, and two fathoms and a half deep. A late inbabitant of the Mauritius is settled there.
5. Three Brothers. - Between the Six Islands and the Three Brothers, a distance of 18 miles, are two small nameless islands. The most southerly is very dangerous, on account of the sand banks with which it is surrounded. Those of the N. are accessible at the N. W. The Three Brothers derive their name from their number; they are aituated in 6.10 latitude, and 71.28 longitude, about 1,209 miles from the Mauritius. Cocoa-nut trees, fish, and tortoises are found here; watcr is procured, similar to that at Diego. These islands have been given into the possession of a planter of the Mauritius, who employs 43 people on them.
6. Islunds of Solomon-are 11 in number; they have been named the Eleven Islands by the French, and are in lat. 5.23 , long. 72.35 , about 1,275 miles from the Mauritius. The soil is in general superior to the other islands of this Archipelago; it produces an abundance of the cocoa-nut tree, and a species of tree affording very good wood, with an elevation of 40 feet. The largest of these islands is seven miles and a half in circumference; the next, four miles; two smaller, three milcs each; the other six, two miles; and the last, one mile and a balf. They are arranged circularly, and form a hasin, with safe anchorage for vessels of small draught of water.
7. Peros Bunhos.-A collection of small islands, 22 in number, in 5.23 .30 S . latitude, and 72.3 E . longitude, about 1,260 miles N.E. of Port Louis. These islands, the largest of which is scarcely two miles long, present nn extent of 18 miles in length and 12 in brealth, having two passages to the N . ; one narrow, the other dangerous, and a third tolerably good at the S .
8. Legour Island.-This island, discovered in 1820 by the proprictor M. Legour, of Port Louis, from whom it derived its name by the order of his lixcellency Governor Farquiar, is situated in 5.59 S . latitude,
and 72.37 E. longitude, about 1,250 miles N. E. $\frac{1}{2}$ E. of the Mauritius. Its length is about two miles, and between two and three in wialth; it is diflleult of access, without anchorage, and devoid of resources.
9. The Islands of George and Roquepiz.-These islands are said to extend through 6.20 to 7.15 S . latitude, and 60.4 to 63.8 E . longitude; but they are of very doubtful existence. Some have supposed that they form a pirt of the bank of saya de Mnlha, the position of which is uncertain.
10. Agalega. -This island, in 10.29 .50 S . latitude, and 56.55 E . longitude, about 561 miles in the $\mathrm{N} . \frac{1}{1}$ N. W. from Mauritius, is divided in two by a canal, about 500 fathoms in width, fordable at low water. It is about 11 miles from $N$. to $S$., and one mile and $n$ half from E. to W.; it is covered with cocoa-nut trees in the centre. I'here is but little vegetahle soil; and water, which is saltish, is obtnined by digging wells in the sand. It is situated low, and is without anchorage. A merchant of the Mauritius, who is in possession, has established two manufactories of oil, which employ 199 individuals.
11. Coetivi, in 7.15 S. latitude, and 56.23 E . Iongitude, is about 768 miles N. of the Mauritius. This island, about nine miles in circumference, possesses at the N. E. an anchorage for amall boats from 25 to 30 tons, but not a sufficient one for large vessels. Its sand and coral soil is interspersed with 500 or 600 acres of cultivated land, where maize thrives tolerably well. The water, which is procured by the same means as in the other islands, is saltish. A resident of the Mauritius, who is in possession of it, employs 100 persons, who cultivate maize, and supuly him with cocoa nut oil and tortoises.
12. Seychelles Islands.-These islands, 30 in number, of which many are very small, form an arclipelago, which is the most considerable of the dependencies of the Mauritius. They lie hetween 3.38 and 5 45. S. latitude, and between 55.15 and 56.10 E. longitude, about 915 miles in the N. $\ddagger$ N.W. of Port Louis. The islands are:-1. L'Ile Mahé; 2. St. Anne; 3. Aux Cerfs; 4. Anonyme; 5. Du Sud Est; 6. Longe; 7. Ronde; 8. Moyenne; 9. Therese; 10. De La Conception; 11. Aux Vaches Marines; 12. Aux Fregates; 13. La Digne; 14. Praslin; 15. Les Cousin et Cousine; 16, 17, 18. Les Trois Scurs; 19. L'Ile Ronde ; 20. L'lle Aride; 21. L'lle Felicité ; 22. L'lle Marianne; 23. Aux Recits; 24, 25. Les Dense lles du Nord; 26. L'lle Denis, the most northerly; 27. L'Ile Curieuse; 28. Les Mamelles; 29. L'lle Silhouette, the most westerly ; 30. L'lle Plate, the most southerly of the group.

The circumference of Mahe is $\mathbf{7 5}$ or $\mathbf{7 6}$ miles. It contains 72,768 roods of land; the country is mountainous, intersected with ravines, and interspersed with rocks. The soil, which varies considerably, is generally noist. On the E. coast (nenr the town of Mahé) there is a bay large enough to contnin 30 vessels of considerable size. Mahé contains 5,834 innibitants.

St. Anne is about a league from Mahe. The soil is tolerably good, and contains about 1,200 roods of cultivated land. The population is in number $2!5$.

The Aux Cerfs is close to the $S$. end of the above, much smaller, and contains 33 inhabitants.
The Anonyme lslands, from the S.E. a very small group of islands near the preceding ones, are not inhabited.

Long Islund. This islet and the following, Round Island and Moyenne, between the St. Ame and Cerfs lslands, nlune pussess some little vulue, and are cultivated hy 22 individuals.
lles Therese, de Ia Conception, des Vuches Marines are islets situated to the west, and very near Mahé. They are uninhabited.

The Frigate lsland, towards the E. Is not inhabited.

La lignc. This small island, three miles long and half a mile in width, has not more than 2,000 roods cultivated, of which 1,454 are granted, and inhabited by 344 individuals.

Praslin is the most important of the cluster after Mahe, and has hardly the third of its soil cultivated. Its census gives 2,5I4 roods granted; it has a good anchorage towards the N., near Carion's Island. The population amounts to 108 .

The Cousin Islands are two islands inhabited.
The Sisters are three islands of simall extent, inhabited hy 15 pe ple.

The Round Island and Barren Island, two islands inhabited, adjoining Praslin.

Island of relicity, a small island, having only 34 aeres cultivated, and a population of 52 individuals.

Marian Island, Aux Recifs, Du Nord, Denis, Curicuse, and Manicie, nre all small. The two islands Denis and Curieuse are the most important. The first was granted to Captain Jesage for his use, and the second to an inhabitant of Mauritius. These are about three miles long and one mile and a half wide, and 500 acres uncultivated; the other is only two miles long and one wide, and has not more than 150 acres of good ground.

Ile Silhouette, very little elevated, about nine miles in circumference; 1,515 acres are divided between six proprictors. The population amounts to 136 .
lle Plate; inhabited. This island, of small extent, has till lately been destined for the quarantine of ships, when infectious diseases have raged on board.
13. Les Amiruntes.-This cluster is a collection of seven small islands, joined together by a sand and coral bank. Those islands which have banks of coral mixed with sand, and very slightly raised above the level of the sea, are-The African Island, L'lle Remire, L'lle d'Arros, L'lle St. Joseph, L'lle Poivre, L'lle des Roches, L'lle Lamperiaire, L'lle de la Boudeuse, L'lle Marie Louise, L'lle des Neuf, L'lle de l'Etoile.

The African Island, the most northerly, is situated in 4.59 S . latitude, and 53.32 E . longitude. L'lle des Neuf, the nearest to the $S$., is situated in 6.12 S . la titude. LIlle Lamperiaire is situated more to the E., in 5.45 S . latitude, and 53.46 E . longitude. L'lle de la Boudeuse, more to the W., is situated in 6.12 latitude, and in 53.4 E. longitude; the mean latitude of this cluster is in 5.35 .30 S . latitude, and longitude 53.25. These islands, without water, and valuable only for their fishery and turtle, are inhabited and frequented in the fishing season by some of the inhabitants from the Seychellss, to whom the following islands have been granted ior their use and enjoyment, viz. - L'lle d'Arros, L'lle St. Joscph, L'lle Poivre, L'lle des Roches, L'Ile des Neuf, \&c.
14. L'Ile Alphonse.-This island 36 miles to the south of the Amirantes is situated in 7.0 S . latitude, and 53.0 east longitude about 804 miles in the N. $\frac{1}{4}$ N.W. from the Mauritius, a little larger than the other Amirantes Islands, and affording an abundance of fish ; it has been granted for the use of an inhabitant of Mauritius, but it is not yet inhabited.
15. Providence Island-Situated in 9.12 S . latitude, and 52.17 E. longitude, about 726 miles N.N.E. $\frac{1}{2} \mathrm{~W}$. of Mauritius. This island 8 miles long, and one wide, has no anchorage. It has not any water, and has been granted to an inhabitant of Mauritius, under
condition of receiving persons afflicted with leprosy; it has 35 inhabitants.
16. Jean de Nove Islands.-These islets 5 in num. ber, situated in 10.12 S . latitude, and 15.56 W . longitude, about 675 miles N. N. E. $\frac{1}{2}$ E. of Port Louis are of small extent, and surrounded by a recf in the northern part, where there is a tolerable good an. chorage. Their soil is similar to that of Providence, some cocoa trees scattered here and there, indicate that with some care this valuable tree would succecd there. These islets have been granted to an inhabitant of Mauritius, who died without making any settlement there; they were then given for the use of the proprietor of Providence Island. The establishment formed by the proprietor employs 7 people.
17. Ile St. Pierre, is situnted in 9.15 S . latitude, and 50.55 E. longitude, about 750 miles N.E. 1 W. of Mauritius. It is six miles long, and one mile and a half wide. It is inhabited, and almost inaccessible excepting one place in the N.E. where there is? little flat sandy shore, all the coast consists of rochs of coral, upon which the sea breaks with much violcuce.
18. St. Laurent Istand.-Situated on Lislet Geoffrey's Map in 9.44 S . Intitude, and $51.2 \times \mathrm{E}$. longitude is between Providence, Jean de Nove, and St. Pierre Islands. Its existence is not certain, several eaptnims mention its bearing, without having any knowledge of it.
19. Astove Island.-Sitnated N.N.E. of Madagascar, in 10.10 S . latitudc, and 47.50 l . longitude, has only a few resources for fishing. It has been granted for the use of two planters of Mauritius, who have not the proprietorship of them.
29. Cosmoled 1sland-situated in 9.45 S . latitude, and 4740 E . longitude, has been granted for the use of an inhabitant of Mauritius who has made no settle. ment there. It is of little importance, and surrounded by reefs.
21. Assomption Istand-situated in 9.44 S . latitule, and 45.40 E . longitude. It is inhabited, and like the other surrounded by reefs, except in the N.E. where it is accessible.
22. Aldabra Island.-This islet of little worth, is situated in 8.27 S . latitude, and 34.32 E . longitude.
23. Sand Ishand.-A very small islet situated in 15.53 S. latitude, and 54.43 E . longitude, about 306 miles N. E. $\frac{1}{4}$ of Port Lonis.
24. St. Puul and Amsterdam Island.-The first is situated in 27.45 S . latitude, the other in 38.15 S . latitude, mean longitude 78.0, mean distance from the Mauritius Island 1,446 miles in the south-east, a few degrees south. These islands are of very diticult access; they offer very little means of sustaining life, and exposed to cold and wind, are only frequented by vessels which go in search of sea cows which are found there in abundance. [A minute detail of these islands has been given, because they lie so dircetly ia the track of East India ships. The facts arc obtained from the Mauritius Almanack for 1838.]

Administration of the Seychelles Islands.-Agent of the government, Geo. Harrison, 8881 .; under-ageat and special judge, Mr. Wilson, $628 \ell$.; judge of the peace, G. A. A. Fressanges, $276 i$.; police officer filling the office of king's solicitor, A. Savy, 1441 .

Vl. The first settlers on the Mauritius were pirstes, and in 1657 their strength was considerable. Aftet its colonization by the French, a great number of adventurers flocked to the island from Europe, and other places, and slaves were introduced from Madarascar and Mozanbigue, but at what precise period we have no record. It would seem that the island was mere

uritius were pirates, considerable. After great number of adm Europe, and other d from Malagascar ccise period we have the island was note
populous during the period prior to the French revolution, than subsequent to that event, as it is on recoril that. in 1792, 20,000 persons perished of smallpox in the Manritins. In 1799 the population was stated, hy Baron Grant, at-slaves, 55,000 , whites rud mulattocs, 10,000; total 65,000; and the armed force, national guard, blacks and mulattocs, 2,000, blacks and mulattoes, to serve as chasseurs, and the artillery, 3,000; total 5,000 .
The statistics which I have derived from the Colonial Office, and from the Mauritius Almanack for 1838 , relative to the progressive increase of the population for more than 50 years, are very complete. It will be seen by the census of 1827 , that in the whites and slaves, the malea preponderated over the females; but in the free coloured there was a larger proportion of females, which, however, may be owing to women slaves being cmancipated in greater number than men.

The comparative increase of the three classes of inhabitants from 1767 to 1832, is thus ahewn :-

| Years. | Whites, | Coloured. |  | Total. |
| :---: | :---: | :---: | :---: | :---: |

Table of the Births and Deaths at Mauritius，from the 1st January 1825 to 31st of December 1835.

It will be perceived that the female births have latterly begun to preponderate．The greatest number of deaths are those under five years of age，and of these the males exceed the femules．After w．yenrs of age， women have the greatest lohgevity．

* Service once a month in a temporary chapel for the troops, by the chaplain to the forees.

IRmman Catholic Churehes at the Marritius in 1836. [13, 13.]

Black River, the Savame, and Plalues Wilhems, containing a population of 21,900 souls, hare no chapel, or church, or any place set apart for religinus worshlp. [B. B. Colunial Ottice.]

X . The affairs of the island are managed by a Go. vernor, as in the Cape of Good Hope, aided by an Executive and n Legislative Council. The Executive Council consists of four members (the Governor), the officer sceond in command of the troops, the Coloninl Secretary, the Procureur and Alvocate genernl. The Legisintive consists of $15 \mathrm{members}, 7$ of whom hold no official station. When the island was in the possession of the French, a Colonial Council wns created by a decree of the 29 th September, 1810 . The decree recited, that the colony was bound to contribute its assistance to the expense of providing for its own sufety; and, in order to raise the revenue necessary for this purpose, a Council was createl, consisting of 11 persons, to be chosen from among the principal inhabitants and traders of the different parts of the
island; three from the Port Napoleon, and one from each of the other districts. The memhers of the Council were to be nnmed by the Captain-general, on the presentation of the Colonial Prefect and the Commissary of Justice, from a list of candidates clected for the district of Port Napoleon, and three for each of the other districts. Any veaney in the Council was to be filled up by the tirst of the candidates whose nmmes remained upon the list of election. Flectoral chambers were to be formed for the election of these candidntes for the Council, and menibers of these clambers were to be named by the Captain. general, upon the presentation of the Colauial Prifect and the Commissary of Justice. This Council hins not heen convened since the British occupation of the island.

apoleon，and one from The members of the be Captnin－gencral，on oninl Prefect and the a list of candidates t Nupoleon，nud three Any vacancy in the the tirst of the candi－ bon the list of elcction． formed for the election uncil，nond menhers of nmed by the Captain． of the Colonial Pre． fustice．This Council the British occupation

A Council of the Commune was established by Go－ vernor Farquhar in 1817，composed of 15 notable inhabitants of Port Louis，and three proprictary in－ habitants from each quarter of the island．The qua－ lifications were－ 30 years of age，unless born in the colony（if so，over 27 ）；to have resided 10 years in the colony ；an nanual income of 3,000 piastres in Port Louis，or 5,000 in the country；to be nominated by the Governor from lists containing three times the number of persons so to be nominated，and to con－ tinue in office five years．The Council to elect a president，vice and secretary；to discuss，with the aid of six other members，questions of commerce， roads，educntion，and internul nffairs，as transminted by the Governor．This Council was suppressed by order of Lord Bathurst，in January， 1821 ；and there is not now nny municipa！body to regulate the affairs of the active and wealthy inhabitants of Port Louis．
Before it was occupied by Great Britain，Mauritius was governed by foir out of the five codes of law which had been promulgnted by Napoleon；these were administered by courts established in the island before the time of the French Republic．The forma－ tion of the several courts and their powers have been modified from time to time by the authority of the Governor，and finally settled by the Mauritins Charter of Justice，dated St．James＇s，13th April，1831，which establishes a Supreme Court of Civil and Criminal Justice，presided over by three judges．There is niso a petty court for the ndjudication of civil causes of small nmount，and for the trial of petty offences ： from this court there is no appeal．The Governor has authority to establish minor courts in any of the dependencies of Mauritius，and to extend or limit their powers．
The French law of divorce has been adopted in Mauritius．Mortgnges are required to be registered every ten years by article $215 \%$ of the code of Napo－ leon．The authority to bury a corpse must be given by the Civil Commissnry，upon a declaration of the death made by two witnesses，the nearest relatives or neighbours of the deceased．
Port Louis is well defended on the sea side by the batteries on Tonneliers island nnd on Fort Blane，but it is accessible on the land side，and was found to be indefensible when our troops approached it in 1810. There are several strong posts throughont the island， garrisoned by detnchments from two regimerits of infantry；and a strong section of artillery and engi－ neers．
There is no militia at the Mauritius，nor any law for regulating one if embodied．Power is，however， vested in the Governor by commission，under the great seal，to rnise troops in enses of emergency．
There is a local corps of military labourers，embo－ died partly by voluntary enlistment of government slaves，emancipated in 1833 ；and partly from Africans captured under the acts for the abolition of the slave trade，and enlisted by the collector of enstoms，by virtue of the powers in him vested by His Majesty＇s order in council in that respect made and provided． The authorities fon the formation and payment of this corps are conveyed in the Sceretary of States＇ Desputches，No．44，oi ！st July，1832，and No．6，of 30th Decemher， 1834 The expense of this corps is defrayel by Grent Britain．

XI．The revenue in the gross receipts averages 132，000l．per annum：n large sum is raised from custom duties at Port Louis．
The limportation taxes are－6 per cent．on the esti－ mated value of the goods in English ships；on foreiga
vessels， 15 to 30 per cent．； 40 per cent，on tobacco， and $2 s$ ．per gallon on spirits．Wheat，rice，cattle and bullion are free on English ships．The exportation taxes are on English ships－sugar，1s． $2 \frac{1}{2} l$ ．per 100 lbs．；on a foreign ditto， 2 s .2 d ．per ditto；cotton， 7 s ． on former， 7 s ． 10 d ．on latter，per ditto；coffee， 4 s ． and 6s． 54 ．ditto ditto；other articles ir proportion， Entrepót taxes 1 per cent．English， $1 \frac{1}{2}$ per cent．on foreign．

Direct Taxes are 6s．upon each slave above seven ycars of age，and under 60，in Port Louis，and $2 s .6 d$ ， in the country：this is independent of vaccine，mar－ ronnge，corvée，and other slave taxes．Upon all goods （les immeubles）in Port Louis there is an annual tax of $1 s .3 d$ ．per cent．on the estimated value．Fvery thing sold in the baznar，whether it be fish，flesh， fowl，veyetables，or hucksteries，is taxed；as are also the shop－keepers who sell them，according to the stall．

Indirect－Two per cent．registering acts of sales； one ditto for transeribing ditto ；and proportional taxes on every business act．Stamped paper from 3d． to $2 s .8 \mathrm{l}$ ．and upwards．Licenses，for instance，on an inn and coffee house in Port Louis， $10 l$ ．per month， nnd in the country， $7 l$ ．ditto．On a pedlar， $1 l$ ．per ditto．On carriages，gigs nnd carts，from $1 l .12 s$ ，to $2 l$ ．per aunum．Boats，canteens，distilleries，printing offices，are farmed out by auction．On grants of Innd， $1 l$ ．to $6 l$ ．in proportion．The right to fish in the sen with a scine is 11 ．a year，and with a line $12 s$ ．； nay even according to the size of the seine the tax is raised．

The Police taxes are numerons and heavy，for in－ stance a certificate of life costs 4 s ．and of enregistre－ ment， 12 s ；and for every bundred words of the certificate above the first，1s．7d．A visit on board an English ship，7s．；a foreign，12s．；and so on．Local tax for the poor in 1836，2，395l．

Expenditure incurred by Great Britain for the military protection, and in aid of the
Civil Establishment during the year 1836. [B. B.]

Xll. The commerce of the Mauritius is considerahle, nnd widcly extended. It would have been desirable to give an extended tabular view of the trade for a consecutive series of years; but, unfortunately, the return of the imports and exports in the Blue lhooks not being given in the sume form for two years in succession, it is impossible to form a correct table from that source of information. From documents obligingly furnished me by Mr. Ebsworth, of the firm of Reid, Irving, and Co., I am enabled to supply a complete view of the trade of the island for four years, and which will serve at a future period for comparison.

The duty paid on the export of sugar from Mauri- | The average priees of the sugar exported during the tius heing levied aceording to weight and not to value last four years have however been deduced from the (no declaration of actual cost being required), nud nett French weight and total cost on hoard of shipthe import of specie into, and its expoit from the ments constituting nearly two thirds of the quantity island, having since $1 \times 3.4$ been permitted without any manually exported, to the orginal invoices of which entry at the Custom House, neither the real value of reference has been allowed by the prinejpal mercanthe sugar nor the exact amount of the specie can be there ascertained.
the last three yeara has been obtained from the official returns made to government at the close of each auccessive ycar.

The average cost on board, of the sugar shipped from Mauritins was, in $1833,18 s .9 \mathrm{~d}$. per 100 lbs. nett Fr. wt.; in $1834,20 \mathrm{~s}, 10 \mathrm{l}$. ; in $1835,223.3 \frac{1}{2} l$. ; in 1836, 29s. 11 1 . The amount of specie imported into the island was, in $1833,117,732 l$.; in 1834 , $85,692 l$; in 1835, 54,230l.; in 1836, 279,124l. Whereof was re-exported, in 1833, 8,7571.; in 1834, $38,708 \ell$; in $1835,14,1301$; in 1836, 97,4181 . Leaving for circulation, in 1833, 108,975. .; in 1834, $46,984 \ell$. ; in $18.35,40,10 \mathrm{~N}$. ; in $1836,181,711 \%$.

In 1833, the total nett French weight of sugar exported was $67,483,572$ lhs., making, ut $18 s .9 d$. per $100 \mathrm{lhs} ., 632,658 l$. ; the enstom house value of other produce exported was $10,713 l$.; the amount of treasury bills issued by the comonissnriat in exchange for British money or in payment for supplies, $81,760 l$; the amount of bottomry bonds and bills drawn for ships' repairs and expenses, may be estimated at $58,000 l$. ; total means of remittanee, $7 \times 3,131 l$. The total amount of imports, including specie, was 577.429l. ; whereof the re.exports amounted to $62,79 \mathrm{fl}$; leaving lor consumption, $514,633 l$. Surplus $268,49 \times 1$.

In 1834, the total nett weight of sugar exported was $71,143,898 \mathrm{lhs}$., making at 20 s . 10 l , per 100 llns ., $741,08: l$.; the custom house value of other produce, was $11,750 l$. ; the treasury bills issued by the commissariat amounted to $47,7+21$; the hottomry bonds and bills for ships' repairs and expenses may be taken at $75,000 l$.; total means of remittance, 875,5741 . The amount of imports, exclusive of specie, was $679,396 \%$; and of specie, 85, $69 \% 1$; total imports, $765,0 \times 8 l$. ; deduct specie re-exported, 38.7081. ; deduct other imports re-exported, $9 f, 203 l .=134,911 \%$; leaving for consumption, 630.177l. Surplus, 245,397l.

In 1835 , the total nett weight of sugar exported was $64,8.54,515 \mathrm{lbs}$., making, at $22 s .3 \frac{1}{2} /$. per 100 lbs , $732.8 .57 l$.; the custom house value of other produce, was $8,763 \mathrm{l}$.; the trensury bills issued by the Commissariat amounted to 53,2661 . ; the bottomry honds and hills for ships' repairs and expenses may he taken at $60,000 l$. ; total means of remittance, $844,8 \times 61$. The amount of imports, exclusive of specie, was $642.091 l$; and of specie, $5-1,230 l$.; total imports, $696,321 l$.; deduct specie re-exported, $141,13 \mathrm{ml}$.; deduct other imports re-exported, $57,867 l .=71,997 l$; leaving for consumption, $624,321 /$. Surplus, $220,5622 l$.

In 1836, the total nett weight of sugar exported was $63,357,317 \mathrm{lbs}$, making, at 29 s . 11 d . per 100 Jlos , 947,719l.; the custom house value of other produce, was $11,889 l$.; the treasury bills issued by the Commissnriat amounted to $36,090 l$. ; the bottomry bonds and bills for ships' repairs and expenses may be tnken at $90,000 l$.; total means of renittance, $1085,698 l$. The amount of imports, exclusive of specie, was 916,520l.; and of specic, 279,1296.; total imports, 1,195,649l.; deduct specie re-exported, 97,418l. ; deduct other imports re exported, $93,010=190,428$; leaving for consumption, $1,105,221 l$. Surplus, $80,477 l$. Total surplus means of remittance during the four years, exclusive of bills drawn by virtue of letters of credit and drafts of occasional residents, $814,934 l$. Average annual surplus, 203,733l.

Number of vessels arrived at Port Louis, in 1833, 448 ; in 1834, 482; in 1835, 451; in 1836, 533. Vessels belonging to the Colony, 92 ; tons, 7,879 .

5，000l．；total，40，000l．stg．，being equal to 200,000 dollars．The treasury notes thiss issued are of the following tenor：－－＂The government of Mauritius and Dependencies promises to pay the bearer，on demand， the sum of pounds sterling in specie，at the rate established by law．＂
The paper currency in circulation during the year 1836 was at par with specie，for which it was ex－ changed on demand．Of the amount prepared as ahove stated，6，365l．was in the treasury，and the remaining $33,635 l$ ．in the hands of the public，on 31 st December， 1836.
In the month of January，1832，there was estals－ lished a banking company，by charter，comprising 1,000 shares of $100 l$ ．each；their issues amounted on 31 st December， 1836 ，to 129,0771 ．Their trans－ actions ware generally in discounting merchant＇s bills at 7 per cent．
Cottrse of Exchange．［B．B．1836．］－During the year 1835 paper and specie were at par，but British money bore a premium of 2 to $2 \frac{1}{4}$ per cent．from January to September inclusive，above the other coins， in consequence of the demand for bills on England； but for the months of October，November，and De－ cemher，British coins were at par．No bills drawn on England，during the year $1 \$ 36$ ，by the civil govern－ ment．The Commissariat draw bills for British ster－ ling money，at the rate of 101 l ． 10 s ．for every 100 l ． bill．The government accounts，since January，1826， are kept in sterling money．Merchants and shop－ keepers keep their accounts in dollars and centiemes． 2 sous $=1$ centieme．
20 sous $=10$ centiemes， 1 livre，or franc Colonial． 200 sous $=100$ centiemes， 10 livres，or 1 dollar．
The sou，centieme，livre or franc，are monies of accounts．

Weights．－In the transactions with the Military Commissariat department，imperial weights are used． With this exception，the weights in use in this island are the same as they were in France before the revo－ lution，viz．：－ 100 lhs．French，poids de mare，equal to 108 lbs．English；and the si．ne proportions in the subdivisions，which are the ounce，gros，and grains． 16 ounces make 1 pound， 8 gros make 1 ounce， 72 grains make 1 gros．The quintal is 100 lbs ．French． The ton is 20 quintals．Sugar is reckoned per pound or per quintal；coffce，per bag of 100 lbs ．（net French）；cotton，yer bale of 250 lbs ．Rice is sold per bag of 150 lbs ．

Measures．－In the transactions with the Military Commissariat department imperial mcasures are used， but the measures in general use are French，viz．：－ The French foot is to the English in the proportion of 100 to 92,89 ，or in common practice of 16 to 15 ． 12 lines make 1 inch， 12 inches 1 foot， 6 fect 1 toise， 5 leet 1 fathom．The aune is 4 inches，and it is to the English yard as 9 to 7．Every kind of cloth is measured and sold in this island by the aunc or ell． The velt is equal to 1 gallon 7 pints 4 －5̈ths English， but it is always taken as 2 gnllons in commeicial transactions；it is by the velt that every liquid is measured here． 3 gills make 1 pint， 2 pints 1 quart， 4 quarts 1 gallon， 2 gnllons 1 velt．Nine English quart bottles are generally considered equal to a velt， and 40 drams to 1 gallon．A cask measures 30 veits． The ton of sugar is $2,000 \mathrm{lbs}$ ．French ；Ebony wood， $2,000 \mathrm{lbs}$ ；coffee， $1,400 \mathrm{lbs}$ ；cotton， 750 lbs ； cloves， $1,000 \mathrm{lbs}$ ；grain， $1,400 \mathrm{llss}$ ；liquids， 120 velts ；square cut timher， 32 cubic feet ；bonrds， 386 fect；shingles， 3,300 ．The arpent，or acre，is 100 square perches，the perch is 20 feet French．The tonnage of cases， 42 cubic feet mensurement．

XIV．The progressive increase of Cultivation and Stock in the Colony，is thus shewn ：－

## MAURITIUS.-STAPLE PRODUCTS.

mills worked by animals, 1 stone quarry, 16 guildeveries, 4 wheat mills, 16 fisheries.
Ririere du Rempart- 34 steam-mills, 5 water-mills, I mil? worked by animals, 2 windmills, 11 guildeveries, 6 fisheries. Flucq.- 13 water-mills, 20 steammills; 7 fisheries, 13 alembics. Grand Port.-9 steammills, 5 water-mills, 2 distilleries, 17 alembics, 2 limehilns, 1 tan-house, 2 fisheries. Saranne.-2 steammills, 15 water-mills, 11 guildeveries, 1 fishery. Blark River. $\rightarrow$ water-mills, 3 steam-mills, 2 salt pits, 7 disheries. Plaines If ithems. 7 steam-mills, 3 water mills, and 2 mills worked by animals, 10 guildeveries, ; lime-kilns. Moka.-2 water-mills, 1 mill worked by animals. There are no mines in this island.
The fishery is carried on for the supply of Port Louis market on the coasts of this island; it is also
carried on to some extent at several of the dependent lslands, where the fish are cured, and heing brought to market here, form a great resource for the subsistence of the poorer classes of the population and of the apprentices.

Although no vessels are einployed in whale fishing in the vicinity of the island, it was carried on to some extent at the dependencies, particularly at Seychelles, chietly by vessels belonging to the United States. Three vessels belonging to this part have been employed during the year 1836 , in whale fishing at Seychelles. According to a douhtful return in the 13. B. Colonial Office, 316,684 acres of land have been granted in the colony, and 116,005 acres remain to be granted.

Property annully crcated, $2,066,476 \mathrm{fl}$; moveable and immoveable, 7,311,000l.

# dependencies of mauritius.-RODiague, SEyChelles, \&c. 

## [The position, latitude and longitude, \&e., of the Dependencies, is given at p. 500.]

The island of Rolrigue, the Seychelles Islumds, Diego Garcia, \&c, belong to Mauritius, and an agent from the colony is placed on the vast and important island of Madagasear. Rodrigne is situate ahout 300 miles to the eastward of Mauritius, in 19.13. S. lat., about 26 miles long by 12 broad. I passed close to it in !823, but did not land on account of the heavy suri which breaks along the shore. It is mountainous, or more properly speaking a succession of hills, elothed with verdure, the vallies are full of rocks and stones, which eover the surface to a great extent, leaving, however, a large portion of fertile soil, which is cul tivated by a few French colonists from Mauritias, with which a constant intercourse is kept up in transporting turtle from the former to the latter There is abundance of tish around Rodrigue, but it is singular that those canght outside the reefs in deep water are poisonous, and several sailors have died from eating of them. One sort canght near the island resembles a whiting, and from its destructive qualities is named by the French, mort we chien. The existence of poisonous fish has never been properiy accounted for ; we know ol no birls or animuls that are poisonous, even the most venomous snake, when decapitated, is good eating. Some think that the fact is owing to eopper bants, on which the tish feed; but it is remarkable that those cnuglit on the same bank are at one time poisonous and at another edible. Some sorts are, however, poisonous at all times, and $I$ have seen a dog die in a few minutes after eating one. Mariners ought to reject fish without seales; unless they know them to be good, and a silver spoun if boikd with the fish will turn black should it be noxions. The early i'rench settlers narrate that they found ecls of an exquisite thavour on the islend, so large that one of them was a load for two mon to carry. On the N . side of the
island there is a bay affording excellent anchorage, a secure shelter for ships of all dimensions, (the squa dron which was collected from India and the Cape, for the conquest of Mauritius, in 1810, rendezvoused here;) and abundance of wood and water. The air is delightiul, the water clear, the vegetation luxuriant. In time of peace it is useful as a havea for shipwrecked mariners, and in a period of war as a croiung station (a vessel from Bombay, the 'Ellon, laden with eotton, took tire at sea in October [x34, and the erew, after being many days in an open boat, reached Rodrigue when almost perishing, and from thence the Mauritius.)
The Seychelies of Mape Islanios, situate to the northward of Madagasear, between the parallds of 4. and 5. S. lat., were partially explored by M. lazarus Picault, in 1743 , by order of Mahe dela Beaurdonnais, the Governor of the Isle of France; but in all probability they were previously known to the Portugucse, as were the Amirantes, a low and comparatively insignilicant groupl, 80 miles distant; if, however, the Portuguese saw them, it seens strange that they were not explored, as we should then thase had an enrlier account of the cocode mer peculiar to those islands.

The Seychelles eapitulated to the Eughish in 1794, after which their Hag was consitlered neutral ly the Eaglish and French, when belligerents: on the cap. ture of Mauritius the islands were taken possession of as a dependeney of that colony, and lave since continued under the superintendence of an agent deputed from Mauritins, who is aided by 25 sodiders from one of the regimerts in garrison at the latter place,

The following are the names of the principal islands, with the nuinher $n$ ? acres contained in each :-- (The total acres are, , $1,1!0$. )

There are upwards of 15 other ishands of a smaller size, all resting on an extensive bank of sand and coral, which also surrounds them to a creat extent.
Mahe, the seat of government at the Sachelles, and princepal island in the group, is 16 miles long, and froan three to five broad, with a very stcep and rugged granite mountain running through the ceatre. The town of Mahe is situate on the morth side, in a small glen, irregularly built, and containing some good houses; the principal persons heing, however, in the environs. It is of course more densely peopled than the others; the total popula. tion, when I visited the gronj in 18.2 .5 , was, whites, $\therefore$ : ; free coloured, 323 ; and slaves, $6,05 x$; total. $6,9 \%$. There is, however, a seattered population on many of the that islands spread about those tranquil seas; sometimes on approaching one of these low serdant isles, the recont creation of the coral insect, we have heen surprised hy a boat pushing of from the shore, and a dark-coloured Frenchman, or Portuguese, coming on board the frigate and presenting as with egos, milk, and fowls, at the same time informing us that the island we saw was his, and that his family would receive us hospitahly if we would land. On several of the Seychelles and Amirante group we found no human inhabitants, bat abundance of hogs and goats, as also papaws, cocoa nuts, and other cdible fruit; indeed cruising about this beantiful archipelago is more like romance than reality; while the Italian beauty of the skies, the serenity of the atmosphere, and the purity of the breeze add a peculiar charm to the soft scenery around. The oldest resident at the Seychelles never witnessed there a gale of wind; but the sea breeze is constant, and tempers the heat so as to divest a nearly vertical sun of the ill effects of its fervid rays. I have spent whole days wandering from island to island among the Seychelles group, and revelling in their romantic scenery, with no otlier protection from a tropical sun than a broad-brimmed straw hat, yet without feeling the slightest had effect, and with bint little fatigue. The thermometer varies from 84 . to 64. , its menn buing 70 . to $72 . ;$ the healthiness of the station is indiented by the great age and large families of the inhahitants; indeed it is no uncommon sight to see four generations sitting down at the same table, and forming a numerons party.
Althongh the bank on which this archipelago is situate is of coral formation, yet all the Seychelles Islands, except two, are of granite, huge hlocks of which, generally piled up as it were in a confused mass, form their peaks, which are covered with verdure. Lieutenant (now Captain) R, Owen, R. N , and myself, with a party of seamen, nscended North or Fearn Island, aiter two bours and a half dillicult climbing. Towards the summit, for many feet, there was nothing but huge blocks of granite, piled on each other as a number of paving stones would be on an Irish cerrn; several of these rocks were of the magnitude of a small sized house, und so nicely poised that one might be moved with the little finger.

The Seychelles possess many excellent harbours, and being never visited by tornadoes, the neighbourhood is frequented by whalers who fill up their vessels rapidly with sperm oil. The inhabitants cultivate cotton of a superior quality, spices, coffee, tobacco, rice, maize, cocoa nuts, \&c., and carry on a lucrative trade in the numerous small vessels which they possess, in articles suited to the Indian, Mauri. tilus, and Bourbon markets. (Some ships are afraid to fish on this bank, the whale being so violent when wounded.)

The vegetation arouml is extremely luxuriant the most remarkable specimen is the coco de mer, so called because the nuts were found on the shores of Malabar, and on the coasts of the Maldive lslands, many years hefore the place of their growth was ascertained, when each hut sold for 3001 . or $400 l$. from its supposed medicinal quality. The nut is confined in its growth to the seychelles, and even there to two islands-l'raslin and curipuse. It springs from a species of palm, 60 to 80 feet high, with full leaves; at their junction hangs the nut, one foot long, eight inches thick, with a lirht coloured tasteless jelly in each of the compartments; the seed vessel is about two fect long and three inches dianeter, studded with small yellow flowers issuing from a regular projection, which resemble those of the pine apple. The smell arising from the tluwer is by most Europeans considered intolerable, its oflensiveness increasing the longer the flower is kept.

Various spices grow on Mahe, \&c. such as the cimnamon plant, cloves, nutmeg and pepper, which were introduced by orders of MI. De l'fiere, the intelligent governor of Mauritius, with a view to rival the Dutch in the Moluceas : the cultivation, if persevered in, would probably have rendered the Seychelles, at the present day, as valuable as the far-famed spice islands, but the plantation was burnt on the approach of $n$ ship of war (French), which was supposed to be an Eaglish frigate.

Mabe has a British resident from the Mauritius, with some subordinate officers, and there is a petty civil and criminal court, held for the trial of causes and otlences. The inhabitants are extremely hospitable; and I would strongly recommend our whalers visiting the Seychelles, instead of leaving the fishing to the Americans and French. The central position of the Seychelles for trade with the Eastern Hemisphere, is thus shewn ;-Methé to Madagascar, 576 miles; Comoros, 828 ; Mauritius, 928; Mombas, 930 ; Jelagoa Bay, 1800; Bombay, 1,680; Arabia, 1,230; Cape of Good Hope, 2, (jilo. Had the settlement which Crytain W. F. W. Owen so wisely formed at Mombas, on the E. coast of Africa, uct lave been given up (ihe Americans are now establishing themsedees on this coast), we shonld have had a porfect cluain of posts, if I may so term it, for the extension and protection of our commerce.
Diego Garcia is situate firther E . about $4^{\prime \prime}$. from the Equator, and is one of those numerous coral islands with wheh these sens abound. (The Coco islands in lat. 12.06. S., long. 27.04. E., are n circular chain of islands and keys lined by coral reet, with a sounding trom 12 to 20 fathoms, where a ship may nnchor; there is an extensive harhour on the N. extremity with but one entrance, three miles wide: straggling rocks and a reef project one mile nod a half from W. side of entrance. The islinds are now settled on hy Capt. Ross an American.) It contains plenty of turtle, and has in few residento, from the Mnuritius.

## CHAPTER III.-ST. HELENA.

Section I.-St. Helena (celebrated as the prison nod grave of Napoleon Buonaparte), is situate in the Southern Atlantic in 15.15. S. lat., and 5.49.45. W, long., 1,200 miles from the coast of Africa, 2,000 do. from that of America, and 600 from the island of Ascension. Its extreme length is $10 \frac{1}{2}$ miles, hreadth, $6 \frac{3}{4}$, circumference, 28 miles, and area 30,300 acres.
II. The island was discovered by Juan De Nova Castella, a Portuguese navigator, on 21st May, 1502, and named by him in honour of the day of its discovery, Saint Helena.

When first visited, the island was uninhahited, covered by one entire forest and its shores abounding with turtles, seals, sea-lions, and various sorts of wild fowl ; its settlement, and early improvement in 1543 , are attributed to the debarkation of a l'ortuguese nohleman, who had been mutilated by Albuguerque for erime committed in India, and sent home in disgrace. This gentleman, Fernandez Lopez by name, prevailed on the captain to set him on shore, in preference to the life of ignominy he was destined to lead in D'ortugal, and his wishes being complied with, and abundant supplies forwarded to him by his commiserating friends, he quickly brought some spots under cultivation, and imported hogs, goats, domestic poultry, partridges, and wild towl, besides various sorts of iruits and vegetables, all of which increased and throve exceedingly, such as figs, oranges, lemons, peach trecs, \&ic. Fernandez was removed from his voluntary exile by orders of the Portuguese government in about four years, and the next inhabitants appear to have been four slaves of different sexes, who escaped from a ship, and multiplied to the number of 20 ; these people subsisted on the live stock and fruits which had increased prodigionsly ; but the Portuguese being jealous of their consuming what was required for the refreshinent of the ships, which touched here on their passage from India, finally succeeded in hunting them out, and destroying them. Tavernier informs us that a l'ranciscan triar had also taken up his abode on the istand and led an anstere life for 14 years, when he died; though other accounts say, he was removed in consequence of the great destruction he committed among the goats, for the sake of trafticking in their skins.

The portuguese mariners preserved the secret of the existence of St. Helena from other nations until 158 s , when it was discovered by Capt. Cavendish, on his return from a circumnavigating voyage. He gives the state of the island very circumstantially, from which it appears, that the Portuguese had built a town and a chureh: he tound abmadance of gonts, pigs, and poultry, with game, wild fowl, and varons kinds of fruits and vegetables. The settlement was atterwards trequently visited hy English, Duteh, Spanish, and Portuguese ships: the salubrity of air, and the abundance of fresh provisions invigorating their exhausted crews.

It sometimes happened that ships of nations at
war with each other visited St. Helena at the same time-accordingly we have accounts of various sea fights between the Dutch and Spaniards at the an chorage, who are, moreover, accused of wantonly destroying the plantations, lest succeeding visitors should profit by the supplies which had proved so bencficial to theni. From all these causes the island was destroyed by the Portugnese, when they acquined possession of settlements on the eastern shores of Africa, and for some time continued desolate, owing to the wanton excesses which had been committed: however, about the year 1643 , two Portuguese res. sels being wrecked, their crews got safe to land, and once more stocked the island with cattle, goats, hings, poultry, \&c. In 1645 the Dutch took fermal posses. sion of St. Helena, and established a colony; but they also abandoned it, whon settling at the Cape of Good Hope in 1651.

The homeward bound English East India fleet calling at the island at this period, took possession of St. Helena, and the East India Company obtained a charter for its possession from Charles II. ten years after. Under the supcrintendence in 1658 of Capt. Dutton, the first English Governor, a fort was erected and called Fort James, in compliment to the Duke of York, the king's brother. Settlers were encouraged to emigrate thither, and slaves were imported from Madagascar to work in the plantations. It is teported to have heen captured by the Dutch in 166 , but of this event the accounts are vague and doubt. ful, and the writer of Rennelort's voyage, who sisited the island in 1666 , makes no mention of such occurrence, but eulogizes Governor Stringer, and his fanily for the attentions he received, and describes the settlement as thriving, being then composed of about 50 Englishmen, 20 women, and some negroes. Its popu. lation was shortly after increased by many, who had been rechuced by the great fire of London, secking relief in the island.

In the latter part of 1672 , the Dutch, through the treachery of a planter, succeded in landing in the night 500 men from an expedition which had been repulsed the same day; the lort being thus attacked in the rear, the Governor thought prudent to ahaudon it, and retired, with his garrison and principal effects, on board some shi, in the ronds, taking, however, the precaution of placing a sloop 'o cruise to wind ward of St. Helena to warn British vessels ot its cap. ture, and a squadron arriving soon after (in Mar, 1673), under Captnin Munden, he sucereded into. capturing the island, and, by keeping the Dutch lag Hying atter he got possession of the furts, decoyed in Datch least Indiamen, as well as a ship from liurope, having al (iovernor and remtorcements for the gatisoll on hard, into the roads where they were car. turd. Having formed a British garison hy detacio ments lium the shijs, C'sptann Munden saikd for Englund with his prizes, and was hnighted.

St. Helena remaned in the possession of the E. .

Helena at the same counts of various sca Spaniards at the anaccused of wantonly est succeeding visitor; which had proved so hese causes the island se, when they acquired the eastern shores of tinued desolate, owing hat been committed: , two Portuguese ves. s got safe to land, and with cattle, goats, hogs, ch took fermal possesblished a colony; but settling at the Cape of
glish East India fleet riod, took jossession of dia Company obtained m Charles II. ten years ence in 1658 of Capt. ernor, a fort was erceted pliment to the Duke of ettlers were encouraged es were imported from plantations. It is re. by the Dutch in 16 佔, 5 are vague and doubtrt's voyage, who risited mention of such oceurStringer, and his family and describes the seta composed of about in me negroes. Its popu. ased by many, who had of London, seeking re-
the Dutch, through the ved in landing in the edition which had been ont being thus attacked ght prutent to abandon on and principal eftices, onds, taking, howeser, loop to cruise to wiad ritish vessels of its cap. ig soon after (in Mat 1, he sucereded in it. kepping the Duteh the of the forts, deeoged si as a ship trom liarge, wements for the garn where they were aro tish gerrisem by letadin ain Munden sailed fon was hnighted.
possession of the E. .

Company until the last renewal of their charter in 1833, when the island was given up to the Crown, it having leen retained by the E. I. Company solely as a maritime station for refitting their ships \&c., and which they no longer required, on the abolition of their commerci.al privileges. (See Colonial Lilurary for further particulars).

Chronological account of Governors of St. Helena : -Sir Richard Munden and Capt. R. Kegwin, 1673; Capt. G. Ficll, 1674 ; Major J. Blackmore. 167N; Capt. J. Johnson, 1690 ; Capt. R. Keelinge, 1693 ; Capt. S. Poirier, 1697 ; Capt. T. Goodwin, 1707 ; Capt. J. Roherts, $170 \times$; Capt. J. Boucher, 1711; Capt. M. Buzett, (actg.) Capt. J. l’yke, 171t, E. Johnson, Esq., 1719; E. Byfield, (actg.); Capt. I. Snith, 1723 ; Capt. J. Pyke, 1731 ; J. Goodwin, Esu. 17i, \% D. Crisp, 1739) ; R. Jenkins, Esq., 17-10; Maj. T', Lambert, 17 11 ; G. G. Powel, Es $\}., 1742$; Col. D). Lane, 1807 ; Major Genl. A. Beatson, 180s; Col. M. Wilks, 1813; l.ent. Genl. Sir Hudson lowe, 1slf; T. H. Brooke, Esq., (actg.) ; 1821; Brigadier Genl. A. Walker, 18.33 ; ' I '. II. Brooke, bxit, (2nd actg.) 18.28; Brigadier Genl. C. Dallas, 1N2x; Major Cenl. Mitdleton.
III. When first seen at sea, St. Helena presents the appearance of a small barren rock, nearly perpentienlar on its uorthern side, but gradually shelving to the south. On approaching, its eminences appear more broken, and the central ones covered with verdure; on a near approach this view is again shut out by the rugged and barren appearance of the sbore, whieh is nearly perpendicular, forming a girdle of inaceessible precipices of hasaltic rocks, some of them rent to the bases, exhibiting extensive chasms, and of all the most fantastic shapes that can be imagined. On rounding Munden's Point to the only anchorage that exists, James' Velley Bay, on the north-west or lee. ward side of the island, the eve is suddenly relieved by a view of the town and fortifications. James' Town is situated in a narrow valley between two lonty mountains, and presents a pleasant and reireshing appearance, from the trees being generally in full leaf -a species of the banian of India, called in Bengal the peepul tree.

There is good anchorage in from cight to twentyfive lathoms; the tide rising to the height of five feet at times; the surl upon the shore is generally strong, but about Christmas tremendous. The principal inlets by whieh the island can be approached are Lemon Valley, James' Town, and Rujert's Bay on the northwest side, and Sandy lay on the south-east; all these, however, are strongly fortified. Fiven the small ravines, where it might be possible to ellect a landing, ate also fortified.

Throughout the whole length of the island there: are only two plains, the largest that of longwoon, comprising 1,500 neres of fertile land, sloping to the south-west. The island is divided by a ridge of hills, roming nearly east and west, but bending in a curvel direction to the south, at each extremity, und from this chain immmerable valleys and ridges branch off', generally at right angles. The highest point ol land in the island is Diann's l'eak, which rises 2, 200 feet above the level of the sea, and is situated towards the castern extremity. From the summit of this prak the whole island lies under the view, no proint intercepting the horizon: on the same ridge are C'uckuld's I'oint, 2, 172 inet, mind Halley's Momme,

2,467 feet, which, from their extreme altitude, are often enveloped in clouds. The other remarkable eminences, the altitude of which have been ascertained by diajor Rennell, are lag Statl, 2,272, and Barnselitf, 2,215 , nearer the coast and overhanging the sea; Alarm House, 1,260, in the centre of the island; High Knoll, 1,903, to the southward of Ladder Jlill, and the othicial comintry residence of the Governor; Longwood llouse, 1,762; most of the central eminences are covered with timber and shrubs, consisting of the cablage tree, redwood, stringwood, dogwood, \&e., and formerly the greenwood was to be found in great abundance, hont, at present, few of these trees are to be seen, except about 1,500 acres of an irregular forest nt Longwood, preserved by orter of the East India Company.

St. Helena is plentifully watered by clear and wholesome springs, abondant in every direction : those issuing from the sitles of the hills frequently form pieturesque cascades. Ruads have been formed in a zig-zag direction, with ineredihe labour, whel now give easy access to the interior of the island. [Sce "Colonial Library."]
IV. St. Helena is probably of volcanie origin, perhaps like the Mauritins, the result of a submarine convulsion; or it is the lofty peak of some vast range of mountains, whose hase is bencath the ocean. Limestone is plentiful in some situations, as well as iron ore, but the scarcity of fuel prevents the latter being made available. There have been appearances of gold and copper, but not to the extent to encourage $n$ - ining. There is a substance callod terra puzzolama, foumd in considerable yuantities, which, in eomjunction with lime, makes an excellent cement, and is therefore used in tirming aqueluets, ns it sets hard, and is retentive of water, thongh subject to become speedily foul by vegetable substances adhering to its surface.
V. The climate of tinis island is not ill adajted to the liurepean constitution; indeed it has been found congenial to the crews of vessels that have been kept for a long space of time on salt provisions, and without veretables. The thermometer seldom rises above 80. in James Town, and the heat is only excessive when it is relleeted from the sides of the valley in calm weather; in the interior of the islant the temperature is more even, never so cold as in England, and scarecly so hot. The average tempernture thronghout the whole year has been found to be at Longwood from Sif. to 68., at James Town from 66. to 7 F ., and at Plantation llouse from 61. to 73. Fahrenheit.

The healthy condition of the inhabitants was visible to me in their cherful manners, nad active rumb industry, the cultivation of the soil heing their prineipal osenpation.
it will be seen by the table in the next page, that in $1 \times 33$, out of a population of 5,000 or 6,000 inha. bitants, there were but 80 (lathe, and of these nine were above 70 years of age. The proportion ot baptisms to burials (sce next prage) is also very remarkable ; in some years the proportion of the former is to the latter as 3 to 1 . For the whole period it is more than 2 to 1 -thus demonstrating that a high degree of temperature merely is not milavourable to human life.

State of the Thermometer (Fahrenheit) at Dcadwood, St. Helena, taken by Dr. Short, physician to the forces, from 1st September, 1820, to 31st August, 1822.

Thunder and lightning are rare, and the rains, which fall most abundantly in February, are for the other months more regular than in other tropical situations. The higher peaks and their vicinity from their approximation to the clouds, are generally visited with a shower daily, und cloudy days are more frequent than scorching sunny ones. The atmosphere is, however, generally so clear that a vessel may be deseried at a distance of sixty miles.
VI. The population is estimated at $5,000\left(4,9 \mathrm{Th}^{\circ}\right.$ in B. B. for 1836 ), of whom about 2,200 are whites, and the remainder either people of colour, Chinese, or Africans, whom the East India Company's government have for severnl years liberally and generously aided to purchase their freedom. The total number of paupers in the island is 28 , principally old and hlind people. Those who are born in the island evince considerable quickness and talent. The hap. tisms and burials it St. Helem, from the 30th Sep. tember, 1820, to the 30th September, 1833, were as follows :-

|  | Bps. | Brs. |  | Bps. | Brs. |  | Bps. | Brs. |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1821 | $1+0$ | 90 | 1827 | 180 | 99 | 1832 | 229 | 89 |
| 1822 | 113 | 70 | 1828 | 159 | 96 | 1833 | 201 | 70 |

The head and lower schools are consolidated under |regiment of European troops, and a strong artillerf, the superintendance of the head master. The sums under the head of voluntary contributions are defrayed by the St. Helena lenevolent Society, the funds of which are raised by voluntary subscriptions.
VIII. During the East India Company's sway, the ehief authority was vested in a governor, nided by a council, composed of the principal and senior civic servants. It is now governed as a crown colony.

The military has hitherto been composed of one in the service of the East India Company. The head quarters of the 2nd battalion 60th rifles, form the new garrison, with a detachment of the Royal Ar tillery. The island is so well fortified that properly defended it may be considered impregnable. It has forty-three stations, protceted by mounted ordnance.

The guns mounted and ready for action are,-brass mortars, howitzers, and guns, 9 three-tenths inch mortar, 1 ; 3 inch howitzers, 2 ; $5 \frac{1}{3}$ ditto ditto,purchase$1,554 l . ;$2,2871;4,682l.;

IX. Hitherto the charge for St. Helena has been large, unless it be considered in the important view of an invaluable naval station. The revenue derived from a few licenses and fines is small, but increasing in amount. The following is a statement of the Revenue and Charges of St. Helena :-

| Years. | CHARGES. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Estimate of the sum that will he required in the year ending 31st March 1839, to defray the charge of the civil establishment at St. Helena, and of pensions and allowances to the civil and military officers and
soldiers of the East India Company's late establish ments in that island.
Salaries of Civil Establishment.-Governor 2,000l.; culonial secretary, 700 l . ; chief and treasury clerk, 400 l .; assistant clerk, 200l.; surveyor of rents and lands, 300 l .; office-keeper, secretary's office, $50 l$.; auditor of accounts, $365 l$. ; harbour master, $200 l$. collector of customs, 400 . ; clerk and warehousekceper, $100 \ell$. ; searcher, $120 l_{\text {. ; }}$ chief justice, $700 \ell$. queen's advocate, $200 l$. ; clerk of the peace, $200 l$. provost marshal, 100l.; gaoler, 35l. ; judge of summary court, 200l.; police magistrate, town, 100l.; ditto, country, $100 l$. ; reporter of slave emancipation, $50 l$. ; civil chaplain, $500 l$.; total $7,020 l$.

Miscellaneous and Incidental.--Governor for messenger and repairs of residences, 227l.; harbour master and customs departments, for ooats and boats' crews, $400 l$. judicial department, for constables and incidents, $400 l$.; ecclesiastical department, $75 l$.; schools, $600 l$.; incidental expenses of civil offices, 700l. repairs of public buildings and property, 500l.; rerepairs of roads, $300 \%$; hospitals and medical depart. ment, $450 l$. ; total, $3,552 l$. ; pay of the staff and other expenses for training the militia, 300 b .

Retired allowances to Officers of Enst India Company's late establishments.-Civil 6,376l.; inilitary, $7,027 l$. ; total, 13,403l. ; less, deductions from pensious of officers re-employed on the present establishment of the island, 945 l .; total, $12,458 \mathrm{l}$.; Non-commissioncd Officers and soldiers, 1,555l.; total, $14,013 l$.; total estimated expenditure, $24,885 l . ;$ deduct estimated amount of local revenue collections, 8,885l.; leaving, $16,000 l$.
X. Imports of the island of St. Helena, [B. B. 1836.] There is no export return. From Great Britain, 350 ships, 137,400 tons, value $12,470 l$. From United States, 121 ships, 36,531 tons, value 2,783l. From foreign states, 172 ships, 81,654 tons, value $5,804 t$. From elsewhere, 3 ships, 499 tons, $19,295 l$. Total, 6.46 ships, $256,08+$ tons, value $40,35 \div l$., men, 16,410 .

Number of vessels that received supplies at the island in 1833: British, 156 ships, 58 barques, 79 lrigs, and 7 schooners, total 300, tonnage, 131,974 , guns 1,666 , men 14,459 ; American vessels 93 , tonnage 26,275, guns 158, men 1801; French 51, tonwage 17,478 , guns 139 , men 1,191 ; Dutch 23 , tonnage 9,995, gulus 142, men 589; Portuguese 3, tornage 883 , guns 14 , men 71 ; Swedish 2, tomnage 60 s , guns 10 , men 40 ; German 2, tonnage 541 , guns 8 , men 31 ; Janish 1 , tomage 145 , men 14 . Total, vessels 475 , tonnage 187,899 , guns 2,134 , men 15,196 ; and 162 vessels sighted the island. Of British vessels touching at St. Helena 7 were lrom Algon Bay, 9 Batavia, 42 Bombay, 69 Calcutta, 30 Cape of Uood Hope, 7 Ceylon, 23 China, 5 London, 17 Madras, 9 Manilla, 51 Mauritius, : New Sonth Wales, 1 Rio Janciro, 14 Singapore, 2 Van Diemen's Land, and 12 from whaling voyages; of the above 100 vessels, 189 were bound to London, and 51 t.o Liverpool, the remainder to different ports in the United Kingdom. lî we value the property vested and embarked in 131,07.4 tons of British shipping at 301 . per ton, we st, all have nearly four millions annually ( $3,959,230 l$.) lidebted for its better security to our possession of st. Helena.

Vessels calling at St. Helena during 1837, 685, nggregating $2(69,591$ tons, from Calcutta 13.1, Bombay 19, Mudras 21, Ceylon 25, China 65, Manilla 23 , Singapore 15, Java 110, Sumatra 12, Mauritius 53 , Bourbon 36, Cape of Good Hope 27, Whaters 89 , loondon 7, the remainder trom New South Wules,

Sian, \&c. 19. The value of the oil in the whale ships nearly $1,000,000 l$. sterling.
Most kinds of tropical or European fruits ripen, more particularly in the sheltered valleys. Vines, oranges, citrons, lemons, figs, pomegranates, mulberrics, tamarinds, mangoes, cocoa-nuts, sugar canc, pine arples, \&c. thrive well : apples have succeeded tolerably, but the climate is not congenial to cherries, currants, or gooselerries. The common blackherry increased to such an extent after its introduction in 1780, as to cause an order for its extirpation. Three successive crops of potatoes are often produced in the year, and garden vegetables, such as calbhages, beans, peas, \&c. are raised on every farm in great abundance. As the principal object of the settlement is to provide fresh meat and vegetables for the refreshment of the homeward bound ships, the cultivation of corn and pulse has not been encouraged, neither is the climate congenial to their production on account of dronglits. The provisions exported and brought to marhet in James 'Town, and solely grown on the island during the five years ending in 1833, were-
Potatoes, bags, exported 7,650 , consumed 1,960; cablages, e.. 7,470, c. 16,2.50; vegetables, lmanches, er. 33,800, c. 42,030 ; pumpkins, ex. 3,800, e. 570; lay, ewts. ex. $3 \times 0$, c. 2,880 ; fowls, $2 x .27,700, c$. $20,2.40$; ducks, px. 4,100, c. 4,000; bullocks, ex. 260, c. 5m0; calves, $P x .30$, c. 460 ; shecp, ex. 220 , c. 1,230 ; piss, e.x. 870, c. 390 ; the total value of the exports of the above was $20,400 \%$. of the consumption, 2-4,:000l.

Cattle produced from English stock are not numerous, owing to the grent demand of passing ships; poultry is plentiful and well tasted; and in some parts of the island rablits alound. The stock in the
island consists of horses 300 , horned cattle 1,500, sheep and goats 3,000 .
Fish are numerous, and more than seventy dificrent kinds have been caught on the coast. Amongst the most prized are the coal fish, which is very delicate but searce : those commonly taken are jacks, congers, soldiers, mackarel, albicore, bulls' eyes, stc.
The number of fish caught near the island duriag the five ycars ending in 1833 were as follow:mackarel, 115,300 ; bulls' eyes, 2,500 ; jacks, 35,900 congers, $2.1,000$; old wives, 72,000 ; soldiers, $x, 400$; sandspeer, 6,000 ; cavalliers, 6,000 ; deep-water bulls' eyes, 3,520 ; yellow-tail, 350 ; coal fish, 30 ; cod-fish 40; silver fish, 7,050 ; stumps, 4,600 ; long-leg, 35 ; bear fish, 35 ; turtle, 40 ; five fingers, 490 sword fish, 80 (weighing 10 to 80 lhs. eacli); barracootta, 50 ; albicore, 8,300 ( 10 to 80 llss .).
l'rices of stock and provisions at st. Helema, in 183.4:-horned cattle, from Fingland, 15l. to $2 m$. from the Cape of Gool Hope, 7l. 10s. to 101 ; sheep Cape, 1l.; goats, ditto 10s.; pigs, weighing 1001 bs 11. 10s. ; turkeys 10s.; geese, $7 s$. ; fowls, 2s.; horses 201 ; ; Hour per Ib. $2 \frac{1}{2} d$. ; biscuts, $112 l$ hs. Il. English 16s. Cape; oats, per muid, Cape, 12s. Gut.; barles, ditto, 11s. Git.; hol|s, poeket, 30.s. ; malt, per hoses. head, 14.10 s . ; rice, lag of 1651 ls . 12 s .; Finglish salt, per IL . Id. ; salt fish, per cwt. IL . ; fresh bect, mutton, de. Gid. to Hd . per ll . ; ditto, salt ditto, 3id. to $4 d$,
 3l. to 2s. fid. per 11.; wine, Cape, 1s. Gid. to 2s. per galton; foreign wine, 12 w . to 1 t . per dozen; brandy and gin, 1l. per gallon; English beer, !s. per d̈za; Island ditto, 2ls. per gallon; scrvants' wages, 103 to 15s. per month with board, or 1 s . ful. per day without board; women, 10s, to 20s. per month, with foud.

## ASCENSION

Ascension is contignous to St. Helena, in lat. 7.57. S., long. 14.28. W. It is a small islata of volcanic production, the surface consisting of barren rocks relieved, however, in some pilaces by the verdure on the declivity of the Green Mountain. The island has been of late years well fortified at every accessible part (the sea breaks on the island with tremendous violence) and garrisoned by a detachment of marines and marine artillery, who, aided by artificers, have erectel a neat estallishment for their location. A shaft has been sunk in one of the mountains, abundance of excellent water conveyed to the aachorage by iron pipes mul hoses, and good soil was found two feet under the lava on which an abmudance of esculent vegetables may be reared. The beach, at first thought to be composed of sand, was found to consist of very small fragments of shells; in some places firmly compacted together. These slahs were formed of several layers, of which the size of the fragment diflers in eath layer; they nre used for tombstones, steps of doors, and are broken and burned for lime; red voleanic ashes prevail, several hills entirely exhiliting that apjearance. Of the vegetnble kingdom, the euphor-
hia only is found growing in small tults, distributed not very abumantly about the rugged lava, - heautiful objict among such barren scenes. Sca fowlare very numerons, and there are three speeies of butterflies on the island, of handsome colours.

Ponds are kept stockel with turtle, weighing frem 200 to $\times 00$ lbs each, which may be brught for 50 . Abendance of fish and marine lirds are oltainable. di a place called 'The lair,' the birds maned seaswallows, as well as numerous other aequatic lirds, congregate; the eggs of the sea-swallows, which are of a dirty white with dark red spots, and alout the size of a crow's crg, are collected at certain sensons of the year in thousands, and considered delicate and excellent eating.
Moorings are laid down in the roads, and vesels in want of water and vegetables can be supplied a moderate price.
luring war, these islands in the possession of an enemy, would, as outlying picquets, be a means of serions injury to our commerce; during pence they are tefreshiby stations, embling our seamen to bate at all times atriendly heven under their lie.

CHAPTERIV.

WESTERN AFRICA.-SIERRA LEONE.

Section I.-None of the colonies of England have been misrepresented more than thase situate on the western coast of Africa; few surpass them in moral, commercial, and political interest. They are an important and essential link in the maritime empire of Britain.
The trade between Western Areica nnd Europe conmenced about the middle of the difteenth century, for we learn that in 1455 , Priuce 1 fenry of Portugal built a fort on the island of Arguin. At the beginning of the sixteenth century, the English, Spaniards, French, Danes, and Dutch had begun to send private ships to trade on this coast; but during the middle of this century the cominerce of each nation was organized under the management of chartered companies, who formed establishments on different parts of the coast, built forts at the mouths of several rivers, and prosecuted an active trade, the greater part of which was for slaves. The Euglish settled chietly at Cape Coast Castle; the lirench at the mouth of the Senegal and at Goree Island; the Dutch on the Gambia : the Portuguese at St. George del Mina; the Danes at Cliristianborg, \&e. Each of these strong fortresses, mounting from 50 to 60 pieces of cannon, had subordinate posts and stations, several of which continue to this day. At the present moment our settlements are situate at Bathurst, on the Gambia, at Sierra Leone, Cape Coast Castle, and Aecra, and a briet description of the sea coast, followed by a succinct account of each settlement, will be therefore nees s sary.
II. In general the enast of Western Airica, extending for 4,006 miles along the Atlantic, with an avernge breadth of 300 miles, is along the ocean boundary a Hat country, backed by ranges of lofty mountains, which in some places approach the sea, nod as at Cape Verd projeet in bold headlands. The great coast chaid runs parallel to the coast from west to east, where, athording a passnge for the disemboguing waters of the Nun, one of the months of the Niger, tends towaris the north-enst to join or form the Gebel el Kumri, or Mountains of the Moon; some of the peaks of this range (those of Camernnea, near Benin) are said to be 13,100 feet in elevation. It is only, however, about the estumies of the great rivers and along their banks that the country can be said to be that, in other places it consists of genitie undulations and rising eminences, giving considerable beauty to the landseape, the most conspicnous feature of which are the mumerous rivers that disembogue into the ocean, most of them arising in the chain of mountains above deseribed, und running a tortuous course to the coast.

Among the principal rivers are the Senegnl, Gamhal, Rio Grande, Rio Nunez, K゙okelle, Cmmeranca, Mesurado, Nun or Niger, Cengo and Coanzo. Be-
ginning with the most northerly, the Senegal nppears to rise in the Kong range of mountains (heights of Foota Jalloo), in nealy $10^{0}$ north latitude, and $10^{\circ}$ west longitude, where the Niger was thought to rise; the Senegal, about $15^{\circ}$ north latitude, is joined by several tributary streams, viz. the Woolery, Faleme, Neriko, \&c., and after passing Galam and the falls of Feln, makes a circuitons bend to the north-west along the borders of the desert, and falls into the Atlantic at Fort loois, its course being 950 miles.

The Gambia has its source in the same mountain range as the Senegal, near the Faleme, one of the tributaries of the latter named river, and rolls a powerful and rapid stream, at first to the north-west and then westerly, falling into the Atlantic, after a course of 700 miles, about 13.13 . N. Lat. The country between the rivers Senegal and Gambia, is ealled by the French the Sene Gamhia. The Rio Grande is, as far as we know, a large stream, nor is any river equal to the Gambia met with until we arrive at the Bight or Gulf of Benin, where, for the space of above 200 miles, there is a succession of large estuaries, now ascertained (through the persevering enterprize of the Landers) to be the mouths of the long-sought Niger, whose origin we are still ignorant of, and whose course and cmbouchures are still to a great extent unexplored; the delta of this mighty stream stretching into the interior of Western Africa for more than 170 miles, oceupies, it is supposed, a space of more than 300 miles along the coast, thus forming a surface of more than 25,000 square miles, being a considerably larger area than is embraced in all Lreland. Captain Beleher, who surveyed the const line here in 1830-32, in the btmand Raven, says that he thinks the whole of the space between the Nuncz and Rio Grande is one great archipelago, and navigable, at high water, for vessels of four or five fiet draught, and it is generally believed that eanoes can navigate from Isles de l.as to the Gambia, within the islands of this (supposed) huge arehipelago. It is probable that a large river will yet be tound here. The Compone, as far as explored, is a very extensive stream. Further S . the Congo or Zaire pours its ample volume of waters into the broad Atlantic, 400 miles having been navigated during Captain 'Tuckey's unfortunate expedition, leaving its further course and source still involved in mystery. Of the Comzo, though a large fiver, we are not yet in possession of sullicient information to speak positively. With a knowledge of the foregoing leading physical teatures, we proced to examine the const more in detnil as regards its social as well as geographical divisions, beginning on the north with the river senegal, where the French establishad themselves upwards of a century since.

Fort st. Louis, the capital, is situated on an island in the river, a mere saulbank, without any water

SIERRA LEONE.-GEOGRAPHY.
which can be drank without being filtered, and dependent entirely for provisions on the southern coast, which, however, yields them in abundance. St. Louis never became a large settlement; Golberry, in 1786, reckons not ahove 60 Europeans settled there for the purposes of trade. The military and civil servants of government amounted to 600, the natives to 2,400 . The French lost St. Louis during the revolutionary war, but we restored it to them on the friendly peace which succeeded in 1814, under a treaty that Portendick was always to be open to us for the trade in gum ; but which treaty the French violated. The disastrous fate, however, of the expedition sent out in the Medusa frigate has been unfavourahle to any attempt to restore and extend the prosperity of the colony. It is said, however, to have experienced an increase within the last few years, and to contain now about 600 inhabitants. The original hopes of its greatness were founded on the supposed identity of the Senegal with the Niger, and on the prospect of a communication by it with the inmost regions of Africa. All the efforts founded upon this erroneous theory proved of course abortive, and the commercial advantages of the colony (the procuring of slaves not included) have been confined to the gum trade and the gold trade of Bamhouk.

The kingdom of Bambouk, situate near the head of the river, and so enclosed between its main stream and the great branches of the Kokora and the Faleme, as to form almost a complete island, is the next object of commercial importance to the French on the Senegal. It is almost entirely o country of mountains, whence flow numerous streams, almost all of which roll over golden sands; but the main depositarics, where the metal is traced as it were to its suurce, are two mountains, Natakon and Semayla. The former composes almost an entire mass of gold, united with earth, iron, or emery. The first four fect of depth consists of fat earth, from which the grains of gold are extracted hy agitation with water in a calabash; afterwards the precious metal begins to appear in small grains or spangles, and at 20 fect in small lumps of from two to ten grains. The pieces become always larger as the work descends; but as the natives have no means of propping up the sides, they often fall in and bury the workmen. Semayla, a mountain 200 feet high, presents a diflerent structure. The gold is here embedded in hard sandstone, which nust be reduced to powder before the extrication can be effected. l'art of it also is found in red marble, a substance which to the natives is perfectly unmanageable. Bambouk is said to have been early conjucred by a Mahometan force, and afterwards by the Portuguese. Both have been driven out, and the French never made any serious attempt to establish themselves in it.

The point at which the French attempted to carry on the commerce of the Upper Senegal is at Fort St. Joscph, in the kingdom of Galam or Kajaaga. A voyage thither was reckoned to produce cent. per cent.; but the unhealthiness of the climate, the difficulties of the navigation, and the constant hazard of being plundered by a suceession of barbarous chiefs, who occupy the bauks, rendered it a very precarious speculation. At present the fort is abandoned nond in ruins; but the Scrawoolies, who inhabit this fine country, are among the most industrious of the $A$ frican tribes, and have engrossed the trade of Bambouk, Manding, and most of the upper countries on the Senegal and Niger.

In descending the Sencgal, there are several popu-
lous and powerful states, among which is that of Foota Torra, extending considerably both to the south and north of the river, but of which the interior has not been explored by Europeans. The king is a zealous Mahometan, and, under pretext of making converts, has endeavoured to subduc the almost pagan Damel or Burh of the Jalofs. The latter, however, hy the strength of his country and a prudent system of warfare, has been able to baffic his attempt. On the middle Senegal, the most important personage is the Siratic, who holds his court at Ghiorel, considerably to the north of the river. Nearer the sea is the kingdom of Hoval, governed by a petty prince called the Grcat Brak, which, in the language of the country, signified king of kings. [I give these and several other details on the authority of Murray's Encylopar. dia of Geography, who, however, does not state his authority ; it appears to be derived from Golberry. My object is to stimulate to further investigation.]

The const between the Gambia and Senegal is chietly occupied by the kingdom of Kayor. It is stated, by Golberry, to extend 750 miles in length. aud to contan 180,000 inhabitants, who are Jalofs, At the little island of Gorec, on this coast, the French have established the capital of all their African settlements. lts advantages consist solely in its almost inaccessible situation on a rock, three sides of which are perpendicular, and the fourth very steep. The rock is fortified, hut not, it is said, in the most skil. ful manner. The town contains 7,000 inhahitants, and presents a very bustling scene, heing the entrepot of all the trade with the opposite coast, and also a place of refreshment for French ships on their way to India. It lies on the southern side of the peninsula, which terminates in Cape Verde, the most westerly point of the African continent. Though the soil be sandy, it brars a number of those immense trees called Baohab, which give to the cape that verdant aspect whence it derives its name. On the northern side, two hills, 600 tect high, mark this striking geographical position, and serve as a guide to mariners.

The Gambia is almost entirely an English river, the attempts to form settlements upon it having, for nearly two centuries, been confined to our own na. tion. Our settlements on the Gambia will be found subsequently detailed.

The Gambia is bordered on its nort'! bank by several tlourishing little kingdoms. That imnnediately on the sea is Barra, said to contain 200,000 inhabitants. The capital is Barra Inding; but the chief place of trade is Jillifrey. In the kingdom of Barra there are seven principal towns, with a tamily cutatled to the crown in each, who succeed to the cap or throme alternately. Boor Salum is a still more extensive kingdom, situated on a small river that falls intu the Gambia, and containing, it is said, 300,000 inhahitants. Above it occur successively the two smaller kingdoms of Yani and Wooli. The territory of all these states is flat and fertile, abounding in rice, grain, and other provisions. The inhahitants are chiefly of the Mandingo race, and carry on a considerable trade into the interior. At Barraconda, about 400 miles up the river, are falls, or rather rapids, above which sandbanks and flats soon render the navigation ditlicult.

To the south of the Gambia nothing of great im. portance occurs, till we come to the ailuvial estuaris of the Rio Grande, a river supposed, as its name imports, to be of some magnitude ; but Captain Owen found it a mere inlet, receiving some inconsiderble streams. At its mouth oceur a number of ishands
ong which is that of rably both to the south which the interior has eans. The king is a er pretext of making bdue the almost pagan
The latter, however, , and a prudent system jaffle his attempt. On important personage is rt at Ghiorel, consider.

The territory of all le, abounding in rice, The inhabitants are nd carry on a considerAt Barracouda, about falls, or rather rapids, flats soon render the
nothing of great im. to the ailuvial estratims supposed, as its nane ude; but Captain Oren ang some inconsideratle $r$ a numher of islands
which, with a group opposite to them in the open sea, form what is called the Archipelago of the Bissagus. The inliabitants of the same name, called nalso Bijugas, are a tall, robust, warlike people, who have driven out the peacenble race of the Biafuras, the ariginal tenants, and have compelled them to confine themstives to the contiment and the bnoks of the Rio Grande. Bissno, the largest of these islands, is inhabited by the lapels, also warlike and enterprising. In 1792, an association was formed in England, with a view to planting a settlement in the island of Bulai t; but, though no opposition was made in the first instance, the difficulty of establishing a new colony under circumstances so unfavourable, and espeeially nmidst the hostility of these rude neighbours, chliged us to desist. The Portuguese have latety made a settlement upon this island, despite the remonstrances of Colonel Findlay, the late governor of the Gambia.
Along the heads of the Rio Grande lies the important kinglom of Foota Jallo, said to extend ahout 350 miles in length, and 200 in breadth. It appears to be the most improved of all the states in this pa-t of Africa. The inhabitnnts are Foulahs, and of the Mahometan faith, hut not bigots, nud their marahouts are held in high reputation for learning. They manufacture cloths of consideruble fineness ; they work in fron dug from extensive mines in the comntry, also in silver, wood, and leather, and they conduct large caravans into the interior, as far even as 'Timbuctoo and Cassina. Here, where they are the ruling people, they by no means display that pacific character which distinguishes the tribes on the Gambia ant Senegal. They can bring into the field 16,000 men. Timbo, or Tcembo, the capital, is said to contain 7,000 souls, and Lnby 5,000 .
To the south of Foota Jallo is Soolimana, also warlike and considerable. It borders on the Niger in the highest part of its course, though the sources of that river are plneed in the hostile territory of the Kissi. The king is at present Malometan, but the bulk of the nation pagnn. They are a gay, thoughtless, stirring race. On the eastern side of the Niger is the country of Sangara, still more extensive nnd more warlike; the people of which would, it is supposed, have by this time conquered Foota Jallo, had they been united among themselves. At present, Whenever the Soolimas are inclined to go to war, they can easily command 10,000 auxiliaries from beyond the Niger.
In returning to the coast, we pass through the Koorango country, inhahited by the Mandingoes, who, as usual, are gay, thoughtless, hospitable, and enterprising. Farther down are the Timmances, a more depraved race, who were the chief agents in the slave trade. They are described as treacherous and avaricious. Captain Laing met a woman who accused her two children of witcheraft, and on that ground offered to sell them to him at a low price, Their agriculture is peculiarly rude, and the cloths of their manufacture very coarse. They abuse the English as having deprived them of almost their only source of wealth, which consisted in the sale of slaves. This people are oppressed by a singular association called Purrah, who, united by a bond and always supporting each other, have become almost masters of the country, and often exercise their power in a very tyrannical manner.

The country of the 'limmanees borders on that part of the coast where Britain, with the most philanthropic views, has founded the colony of Sierra

Leone. Its principal seat at Freetown is on the south side of the bny, which receives the river formerly called by the same name, hut now more usually the Rokelle, and which rises in the Soolimana country ; it will be foumd subseruently described.

The space from Sierra Leone to the commencement of the grain coast of Guinea, an extent of ahout 200 miles, is chictly marked by the entrance into the sea of the considerable rivers of Sherbro and Mesurado. The former is navigable twenty leagues up, and has a tolernbly large island at its mouth. On the banks is found a species of pearl oyster. The Mesurndo is a still inger strenm, and very rapid. According to the natives, it requires three months' navigation to reach its source, which would appenr to be in the mountains of Kong, not very far from that of the Niger. The banks nere described as finely wooded, fertile, and, in many places, very well cultivnted. The stntes here are entirely negro in religion and manners, none of the Mahometnn institutions having penctrated so far. Travellers enumerate the kingdons of Bulm, Quojn, Monon nud Folgn, which they sometimes even dignify with the title of empires. The sovereigns are; in general, absolute, and their obsequies are celebrated with human sacrifices, though not to the same frightful extent as in some of the countries to the west.

The Americans, in 1820, formed a settlement on this coast, which was called Liberia; while its capital, on an island at the mouth of the Mesirnado, was named Monrovia. The object was to obtain an asylum for litherated negroes, who, notwithstanding their emancipation, are, by the projudices of the Americans, regarded as beings of an inferior order. In spite of disastrous everits, which obstructed its progress, it had attained in 1830, a population of 1500 . The population of Monrovia amounted to about 700, the rest were distributed in eight different stations along 150 miles of coast from Cape Mount to Tradetown. The territory is healthy and fertile; the colony was well conducted, and opened a friendly intercourse with the natives, from which happy effects were contidently anticipated, but we have no recent accounts to determine how far it bas succeeded.

From the Mesurado to Cape Palmas extends what is commonly called the Grain or Malaghetta Coast of Guinea. The two rivers of Sesters and Sangwin, near the centre of the coast, are rather considerable, and their banks are said to he fertile and populous. A settlement, called St. Gcorge's, has recently been made at this river by Captain Spence. The state of socicty scems to be ncarly the same as in the countries last described; the sovereigns absolute, human sacrifices prevalent to a certain extent, and also selfimmolation.

Great sway is in the hands of a peculiar priesthood, called the belli. The youthful candidate, for a place in this body, must qualify himself by a long initiation, during which he is withdrawn from all his friends, and lodged in the depth of a sacred forest, where, it is said, he is kept in r. state of entire nudity. Amongst the tests of his proficiency is the performance of songs and dances, of a very extravagant nnd often indecent nature; but peculiar knowledge is also supposed to be communicated on various high points; and those who have gone through the course with success, and are called the " marked of the belli," look inpon all the rest of the community as quolga, or idiots. They not only administer all the concerns of religion, but conduct the judicial proceedings ; most of which are made dependent on

## SIERRA LEONE.-GEOGRAPHY.

some form of ordeal. Although the l'ortuguese have lost all their settlements in this part of Airica, considerable numbers of their posterity reside there, mixed with the natives, by whom they are treated with some degree of respeet.

Beyond Cape lalmas, tending to the north-east, and reaching as far as Cape Apollonia, is called the Ivory Coast. The name is evtlently derived from the quantities of that valuable produet, obtained from the numerous elephants on the sea shore, and in the interior. The teeth nre of good guality, and uncommonly large, weighing sometmes not less than 200 lbs . Towards the cast, at $A s$ sinoe and $A$ pollonin, a considerable quantity of gold is bought down from the countries behind the Gold Const. There is nlso a good deal of ivory at the ports of Cape Lahoo, and Great and Little Bassam. There are no European settlements upon the coast, exeyp an linglish fort at Apollonia, which perhaps twiongs rather to the Goht Coast. Navigation along this, as well as the Grain Const, requires much caution, as the shore is that and destitute of any conspicuons hand marks, while a heavy surf, borne in from the whole breadth of the Atlantic, breaks continually against it. Early unvigators describe the natives as the most violent and intractable race on the whole Airican eonst. The teeth filed to a point, the nails long, while their harsh and gutteral language, atmost resembling the cry of witd beasts, inspired disgust ; they have been necused of camihalism ; and their suspicion of Europeans is usually said to be so great, that nothing can induce them to go on board a vessel. Captain Adams, however, the most recent visitor, gives a much more favourable aecount: he even says, that almost all the business istrausacted on buard Liuropeanships, though, when he did go ou shore, be was hospitably reccived.

From Apollonia to the Rio Volta extends what is ealled the Gold Coast of Aritica. It was long the most irequented by European traders, particularly English and Duteh, both for that highly prized eommodity which its name indicates, and for slabs, while so nefarious a commerce was promitted. The coast presents the appearance of an immensely thick forest, only detached spots of which are cleared and cultivated. The soil near the sea, being light and sandy, is scarcely fit for any important tropical product, except cotton ; but six or seven miles inland it improves greatly, and might be made to produce sugar, and others of the richest West India products, if the profits of industry were secured to the inha. bitants. Maize is the grain principally cultivated. The gold, which forms the staple commodity, is chicfly brought down from mountainous tistricts far in the interior. The natives understand the process of smelting the golden ore, but the pure metal is found in such large quantitics close to the surface as to require the exereise of little ingenaity. In many places, however, even upon the coast, a small quantity may be extracted from the earth by mere agitation with water in a calabash. Little or no ivory is exported. The ruling people on the coast are the Fantees, a clever, stirring, turbulent race. They exert more ingennity in the construction of their dwellings, and canoes, than the nations to the west. The form of government is republican, and each village has a large public hall rooled, but open at the sites, where an assembly is hetd, and public aftairs are debated. The pyinius, or elders, possess considerable authority, and the administration of justice is chislly in their hands.

The capital of the liritish settlaments is at Cope

Coast Castle, subsequently deseribed. To the went of Cape Coast, we have Dix Cove and Succontce, in the Ahanta country, $n$ very fertile tract, and to which purer gold is brought than to any other part of the coast. The inloabitants are also peaceabie and tractable, and the chances of improvement, as $M_{r}$. Meredith conceives, are on the whole favourable. The British station at Anamaboe was formerly the grent mart of the slave trade. The fort is compact and regular ; and in $1 \times 07$ it withstood, with a gal. rison of twelve men, the attack of 15,000 Ashanters. Winnebah, in the Aguona conntry, though in an agrecable situation, has been abandomed; hut Fort James, at Acera, would, in peaceable times, nifurd errat convenience for trade, as no other place on the coast has such extensive intercourse with the interius. Cape Coast Castle and Acera are now the only places where any garrison is maintained.

The capital of the Duteh settlements, in this part of Airica, is lil Mina, or the Castle: first fommed by the lortuguese, and taken from them in 1633 . It is about nine miles west of Cape Coast Castle, in an open country, close to a large dirty town of 11,000 inhabitants. The fort is well built, on a high situr. tion, and vessels of 100 tons can come close to the walls; but its strength has been doubted. Thes Duteh maintain here a garrison of 100 men , and kerp their establishment, on the whole, upon a more reputable seale than the British. Their torts along the coast are numerous, but none now are garrisong except limina and Axim. The lauses have $n$ re spectable fort near Acern, ealled Christianberg Castle, and atso one at Ningo, near the eastern extremity of the coast.

The country behind the Gold Const, when firt known to Europeans, was divided amone a number of considerable kingtoms, Dinkira, Akim, Warsaw, and Aquamboe; but all these have now smok beneath the overwhelming sway of the Ashantees. This warlike power has also reduced the interior countries of Gaman, lnta, Dagwumba, and others, of which some are more extensive and populous than itsdi. Ashantee Proper, is estimated to contain 14,0001 spuare miles, and about a million of people; but this last number would be more than quadrupled, it we were io include nll its subjects and vassals. The character of the Ashantees is detailed under the head of Population.

On the eastern side of the Rio Volta commences what leuropeans have called the Slave Coast, because slaves were there procured of the must docile nud tractable character. It consisted originally of the two kingeloms of Whydah and Ardrah, forming the most populous and the best cultivated part of the Atrican coast. The vast and impenctrable forests which eover so much of the continent had here been cut town, leaving only what was reguisite for ornament and convenience. The whole country is sil to have been like a garden, covered with fruits and grain of every description. Amid this abundanc, the Whydahs, having become luxurious and cheninate, were unable to make head against the wathle power of Dahomey, in the interior, which inradd and conquered them at the last century. The fint ravages were dreadfin, and rendered their country almost a desert, nor has its peaceful sulbrission ever allowed it to regain its former prosperity.

Dahomey, which is thus predominarit both ovit the coast and over the interior, to a depth of about 200 miles, is goverued upon the same system as Ashantere, and with all its delomities, which it ca-
scribed. To the west ove and Succonlce, in fertile trnct, and to han to may other part are also peaceable and - improvement, as Mr. the whole favourable. aboe was formorly the

The blondy cus1 ins take place on a still greater scale; and the bodies of the victims, instead of being interred, are hy- - upon the walls and allowed to putrely. Ifuman shalls make the favourite ormanent of the palaces and temples, ald the king is said to have his sleeping apartment paved with them. His wives are kept up to an equal number with those of the king of Ashantee. All the female sex are considered as at the king's disposal, and ant annual assemblage takes phace, when, having made a large selection for him. self, he distributes the reluse among his grandees, who are bound to receive them with the humblest gratitule: in short, this ferocious race allow themselves to be domineered over in a manner of which there is no example among the most timid and polishel nations. The greatest lords in approaching the king throw themselves tlat on the gromme, laying their heads in the dust; and the belief is instilled into them, that their life belongs entisely to their sovereign, and that they ought never to hesitate a noment to saerifice it in his service. The king of Daliomey has been lately worsted in his wars with Eyeo, by whom he is now held in a species of vassalare. His country consists of an extensive and fertile plain, rising from the sea by a gradual ascent. The soil is a reddish clay mixed with sand, and noWhere contains a stone of the size of a walnut. Tituagh capable of every species of tropical culture, little is actually produced from it that is fitted for a forcign market; so that since the abolition of the slave trade, small advantage nas acerued from continuing the intercourse with it, and the English tort at Whydah has been abandoned.
Whodah, now commonly called Griwhee, may he considered the port of Dahomey, from which a route of about 100 miles reaches through lavies and Toro to . Womey, the eapital. Griwhee is situated in a fertile country, still highly cultivated, and is plentifully supplied with all the necessaries and conveniences of Arriean life. Captain Adams, whose estimates on this point are unusually low, represents it as containing abont 7,000 inhabitants. The despotic and capricious manne, however, in which foreign residents are treated by the tyrant of Dahomey, has gradually induced the different European powers to withdraw their factories. Ardral is still larger and more flourishing, containing, necording to the same authority, 10,000 inhabitants. It is situated about 25 miles inland, on a long and beautiful lake or lagoon, running parallel to the sea, with which it bceomes connected at its castern extremity by the river of Lagos. The Ardranese are industrious in the manufacture of entton, interwoven with silk: they make also soap, baskets, and carthenware, and are skillul in working iron. Their marhet is the best regulated of any on the coast, and exhibits the manulactures of India and Europe, tobaceo from Brazil, cloth from Eyeo and Houssa, and every other article that is here in demand. Thongh so close to Dahomey, the people appear to cajoy a republican form of government. A considerable number of Mahometan residents have made their way hither, and have introduced the management of horses, nad the use of milk, to both of which the negroes in general are strangers. Badagry, though it has suffered by recent contests with Lagos, appears by Lander's report to be still a large and populous place, situated in a fine plain, and divided into four districts, each governed by a chief, who assumes the title of king. lagos is built upon a small island, or rather the bauk at the point where the chnumel com-
municates with the sea on one side, and on the other with the Cradoo Lake, a parallel piece of water. The town is scaredy a loot above the lake, abal is over-run by water-rats from it. It has 5,000 inhahitants, with a good deal of stir and trade. Its petty despot assumes all the airs of the greatest African monarels, never allowing his courtiers to approach him unless crawling on the ground. Some barbarous customs prevail, such as impuling alive a young female, to propitiate the getdess who presides over rain, and hanging the heads of malefactors to some large trees at the end of the town. The enrreney bere convists of eowries, which are imported in large fuantities, and transmitted into Houssa and other interior countries, where they form the universal circulating medium.

At the termination of the Cradoo Lake commences a large tract of coast, of a peeuliar character, which, from the principal state, receives the name of Benin. It extends upwards of 200 miles, and presents a succession of hroad estuaries, now discovered to be all brunches of the Niger, of which this country forms the delta. They communicate with each other by creeks, and, frequently overflowing their banks, render the shore for 20 or 30 miles inland, a vast allovial wooded morass. The natives, having thus very extended water communications, are the most active traders anywhere in Africa; but, except slaves, the commolities in which they teal are entirely changed. Guld has disappeared; ivory is again found in considerable plenty; but palm oil is the great staple of the castern districts. A grcat quantity of salt is made at the mouths of the rivers, both for consumption at home and in the interior.

The first leading feature is the river Formosa, two miles wide at its mouth; on a creek tributary to it lies the capital of Benin. This city appeared to Captain Adams the largest he had seen on the coast of Africa; be, therefore, probably under-rates its population at 15,000 ; being irregularly built, and consisting of detached houses, it occuprics an immense space of cround. The surrounding territory is well cultivated, though not so thoroughly eleared of wood as that round Ardrah and Whyddh. The king is not only absolute; but "deliche," or a god, in the eyes of his subjects; and all ollences against him are punished in the most cruel and summary manner, not only as treason, but impiety. Gatto, about 50 miles below, is the port of Benin ; accessible to vessels of 60 tons. The trade on this river has reatly declined.

Warre, or Owarri, is anotler state and city, situated on another creck, communicating with the $b$ rmosa, on its opposite sale. It consists of a somewhat elevatel and heautiful island, appearing as if dropped from the clonds amilst the vast woods and swamps by which it is surrounded. Here, too, the king is absolute, and carries polygamy to a very great extent. A recent traveller, happening to get a peep into the seraglio, saw about 50 queens, busied in various employments, from the toilette to the washing-tub. New Town, on the Formosa, is the port of Warre.

After doubling Cape l'ormosa, and passing several estuaries, we come to that of the brass River, called by the Portuguese, the River of Nun. Though not the largest estury of the Niger, yet, being most drectly in the line of the main stream, and that by which Lander entered the Atlantic, it at present enjoys the reputation of being the prineipal channel. It is divided into two branches; but the navigation is greatly impeded, and the trade linited, by a dangerous bar at its mouth. Brass Town is built not on either branch, but on one of the numerous creeks

connected with hoth, and in a country overgrown with impenetrable thickets of mangrove. It is a poor place, divided hy a lagnon into two parts, each of which contains ahout 1,000 inhabitants. Bonny River forms the next importsnt estnary, having on its opposite sides the towns of Bonny and New Calahar. Being only a few miles $u p$, they are in the midst of the mornsses which overspread all this country. The people support themselves by the manufacture of salt, and they trade in slaves, and pnim oil. Bonny, in particular, is become the great mart for these last commodities, and is supposed to export anumally about 24,000 slaves 1 The dealers go in large canoes two or three days's sail to Ele, the great interior market. The king is absolute, and more harbarous than the rest of his brethren on this coast. He boasts of having twice deatroyed New Calabar, and ornaments his fetiche house with the skulls of enemies taken in hattle.

To the eastward of Bonny is the estmary of Old Calabar River, the broadest of all, and navigable for large vessels 60 miles up to Ephraim Town, governed by a chief, who assumes the title of duke. It appears to contain about 6,000 inhsbitants, carrying on a considerable trade; and the duke has a large house filled with European manufactures and ornaments of every kind, received by him in presents. This river is followed by that of Rio del Rey, and then by the Rio Cameronns. The country yields a good deal of ivory and palm nil. The continuity of that vast wooded flat, which has extended alnng the coast for more than 200 miles, is now hroken by some very lofty mountains, the principal of which is suppoaed to reach the height of 13,000 feet.

Several islands lie in the Bight of Biafra. Fernaudo Po, in 3.28. N. Lat., and 8.40. 15. F. Long., is a fine large island, lately occupied only by a lawless race, composed of slaves, or malefactors, escajed from the neighhouring coast. The British Government, formed, In 1827, a settlement at this lsland, the mountainous and picturesque aspect of which afforded hopes of a healthy station; the settlement is, $I$ believe, ahaudoned by government, but I think premnturely, for as the island became cleared, its insulubrity would have diminished; and it would be an extremely valuable colony to Great Britain, from its vicinity to the mouths of the Niger. Prince's Island, aituate also in the Bight of Benin, $9 \%$ miles long by 6 broad, is high (the loftiest peak, 4,000 feet), and wooded. St. Thomas is large and fertile; towards its south extremity it presente a mass of steep elevations, with abrupt craggy faces, and two or three pinnacles, resembling gigantic nine-pins; one half the island is mountainous. The pretty little lsle of Annahonn is inhablted by a simple native race, to the number of 3,000; it is near 3,000 feet high, but its length does not exceed four, nor its breadth two miles ; its heights are rounded like those of Fernando Po, rather than peaked and pointed Jike Prince's Island. These islands run in a chain to the south west from the Rio Cala. bar; and the last three are in nominal subjection to the Crown of Portugal.

The next division of Western Africa consists of Congo and Loango, the coast of which is generally named Angola. The principal feature is the Zaire, or Congo, powerfil and rapid river, which rushes by a single channeJ into the Atlantic. Its course was traced upwards by Captain Tuckey, in his unfortunate expedition, about 400 miles, yet nothing was ascertuined as to its origin and early course; though the hypothesis of its forming the termination of the

Niger is now completely refuted. The population aloug the river is said to he small; the largest villages, Cooloo, Emhomma, and Inga, containing only from 300 to fo inhabitants. The interior capital of Congowar, however, mentioned as the residence of the Blindy North Conge, to whom all the chicfs pay: species of vassalace, is prohably what the Portuguese called St. Salvador ; and where, according to Mr. Bowdich, they still maintnin a mission; but no recent details bave been olitained respecting it. There is regular distinetion of ranks, the Chenoo, or chief, hereditary in the female line; the Mafoots, or collectors of the revenue; the Foomoos, or cultivators; nnd the domestic slaves, which latter are not numerous.

The slave trade, for which alone this part of Africa is now frequented, is chiefly carried on at Maiemha and Cabenda, on the north side of the river. Malemba has been culled the Montpelier of Africa. It stands on a hill about 100 feet high, commanding a beautiful prospect ot the windings of the Loango Louisa, through an extensive plain. Its dry and elevated situation preserves it from those deadly influences which operate so fatally on the health of mariners, Caberulu, near the mouth of the river of that name, also a heautiful city, is aituated at the foot of s conical wooded mountain, and has been ealled the l'aradise of the Coast. It is a great mart for slaves, who are brought from the opposite territory of Sogno.

The counrry to the south of Congo is called ben. guela, and its commeree is still almost entirely in the hands of the Portuguese. They frequent the bay and river of Ambriz, in which there is a tolerable roadstead ; but their great settlement is at St. Paul de Loanda, a large town in an elevated situation. It is snid to export annuaily 18,000 or 20,000 slares, chictly to Brazil. (It ia a disgrace to Englanil to permit the continuance of this infamous trafic.) $S$. Felipe de Benguela, in a marshy and unhealthy site, is now considerably declined; and its population does not exceed 3,000 , mostly free negroes and slaves. There is also a smaller port, called Novo Redondo. The Portuguese claim a certain jurisutiction over the nutive states for several hundred miles in the interior, obtaining presents and purchasing slaves. Further inland is the country of Jaga Cassanga. The Japas are celehrated by the writers of travels, two centuries ago, as a formidable devastating tribe, adulicted to the most ferocious habits; and no change is since assertd to have taken place in their character. Behind them, and in about the centre of the continent, the nation of the Molouas, ure represented as more numerous, more intelligent, and possessing a higher degree of industry and civilization than any other in Africs, under this latitude. Of the remainder of the cosst, towards our own territories, in Southern Africa, little is known.

Portugal at first claimed the whole of the coast just described, but was driven from it by the Duteh, who took El Mina in 1643 ; the latter were in turn com. pelled to retreat by the English, in 1661, who tool Cape Coast Castle, and having formed an Afrian Company, commenced the establishinent of forts for the protection of tranc.

The settlements at present belonging to England In Western Airica are at Sierra Leone, the river Gimbla, Cape Coast Castle, Accra, and Annamabae.

Sierra Ieone, - The first settlers here were the Portuguese ; ahortly afterwards, the English established themselves upon Bance laland, in the middk of the river. At the suggestion of Dr, Smeathmane.

nt belonging to England rra Leone, the river Gam. $a$, and Annamabae. t settlers here were the vards, the Einglish estaance lsiand, in the middle stion of Dr. Smeathmane
the negroes discharged from the army and navy after the American war, to the amount of about 400, with 60 whites, were conveyed to Sierra Leone, furnished with all things necessary to establish a colony, in the year 1787 ; and a piece of ground 20 miles square having been purchased from one of the native chiefs, town, called Freetown, was founded. A dreadiul mortality shortly afterwards reduced the colonista to one-half, and a native chief, taking advantage of their werkness, plundered the settlement in 1789, and drove the colonists to seek for shelter in Bance lsland. In 1791 and the following year, the African Association having become incorporated and obtained a charter, conveyed thither a number of settlers, smong whom were the Maroon negroess, who had been sent from Jamaica to Nova Scotia. Freetuwn was plundered by the French in 1794, and su great was the disaster, and so destitute the condition of the setters, that the company entered into ari arrange. taent with the government to place the colony under their jurisdiction.
A charter was granted in 1802 to the Sierra Leone Company; it was subsequently revised and (with some alterations) confirmed, first, in 1808, when the settlement was transterred to the Crowin, and, finally, in t821, when the forts and possebsiona of the late African Company on the Guld Coast were annexed to Sierra Leone.
The boundaries of the settlement are difficult to define; in 1787 a tract of the peninsula of Sierra leone was ceded to England by the native chiefs, extending 15 miles from north to south by four trom east to west :-the western boundary subsequently advanced to the sea as far as the point of land called False Cape. In the charters granted to the Sierra Leone Company in 1800, 1809, and 1821, the colony is described as the peninsula of Sierra Leone, bounded on the north by the river of that name; on the south by the Camaranca River; on the east hy the River Bunce; and on the west by the sen. The peninaula, as at present known, is bounded on the north by the Sierra Leone river ; on the south and west by the sea at Calmont Creek, and on the cast by a line up the Calmont to the Watslod Creek, and down this last to the Bunce (which is in fact part of the Sierra Leone River) constituting a tract 18 miles from north to south, and 12 from east to west. By a convention in 1819 hetween Sir C. M•Carthy and a Timmanee Chief, named Ka Konka, possessing country on the boundary of the peninsula, that chief ceded to Great Britain the talimited sovereignty of the lands, known by the name of Ma lorts, and Roe Boness, situate on the banks of the Bunce River. In 1824, Ba Mauro, king of the Nort's Balloms, ceded to Great Britain the islands of Bance, Tasso, Tombo, and all the other tilands on the north side of Sierra Leone, between Zogrine Point, and Ka Keeper Creck : as well as the north banks of the river tor one mile inland from the river Corray Bay on the west, to the Ka Keeper Creek on the east; with a right and title to tive navigation of the River Sierra Leone, \&cc. On the north the boundaries touch the River Memgo or Little learciss, in 8.50 . north; on the south as far as the line which separates the King of Sherboro's territory from that of the Gullinos, in lat. $70^{\circ}$ north einbracing the estuary of the Sherboro and its tributaries; on the west the Atlantic, as far north as Sierra Leone River; and on the east an imaginary line, imperfectly defined.

Our possessions at Sierra lieone (so called from the district having been the favourite resort of lions)
extend over a mountainous tract of country, formed by two rivers, which nearly intersect it. The general appearance of this Sicrra preaents an outline of an irregular congeries of conical mountains, with vallies and prairics in their interstices; the mountains are covered to their summits with lofty forests, giving to the distant scenery a beautiful, rich, and romantic upearance; the territory on the nurth side of the river is however low and flat. Many atreams of water descend from the hills, and are concentrated in a large basin, called the Bay of Franca, which is considered the best watering place along the whole line of coast.

The river called Sierra Leone is more properly speaking an estuary, about 20 miles in length, and varying in breadth from 10 at its entrance, between Leopard's Island and Cape Sierra Leone, to about lour miles at the island of Tombo, where it terminates; it has several anms, which extend themselves in difforent directions; the Rokell River is, however, the only one which offers the udvantage of water commonitation from any considerable distance into the interior; its source being stated to be within 30 niles of Fallaba, and 200 from Sierta Leone; falls or rapids intercept its course at Rocon, 50 or 60 miles trom Freetuwn. The Kates River, 25 miles frum Frectown, ia navigable for boats upwards of 70 miles.

Freetown, the capital, is built upon the south side of the Sierra Leone River, and at the north extremity of the peninsula. It is five miles from Cape Sierra Leone, which is considered to mark on the suuth as Leupard Island, seven miles distant, does on the north the entrance of the river, to which the access is easy and sate. Immediately in frout of the town, the river furms a bay, where there is good and commodious anchorage tor vessels oll all classes, and timber shipa of 400 or 500 tons burden go with facility nearly 20 miles higher up the stream for the purpose of taking in their cargoes.
The settlement has the advantage of a modern plan for its formation; it occupies a large space of ground, extending in a very gentle ascent from the banks of the river, and is about three quarters of a mile long, with apacious streets, intersecting each other at right angles. Most of the huuses were at first built of mud or wood, not however without taste, but many of the natives are now constructing storehouses.

The town is open to the river on the north, but on the south-east and west completely hemined in by a aemicircular range of mountains, from 12 to 1,500 feet high, and wooded to the summit. The distance between the town and the base of these muuntains varies from three quarters to a mile and a hali; the interveniug space broken by numerous undulations, the outline exhibiting the appearance of a syivan theatre, replete with highly picturesque scenery. With the excepition of the cultivated spots, the hiils are thickly clothed to their summit with wood, and ascend almost in regular gradation tuwards Leicester Mountain, above which the sugar-louf is seen to rise at aone distance in the rear. The amphitheatre includes, from east to west, a space, the semi-diameter of which is searly a miie, embracing the town, the Tower Hill, and a small portion of land, called 'King 'Tom'a Point.' The 'lower Hill ia nearly in the centre of this amphitheatre, and Frectown stretches from the water-side towards its base; ahout half way up its aides are situate the fort, the barracks, hospital, and a Marteilo tower, the whole when viewed from tise sea forming a striking c'oul' d'ail,

Mr. Rankin says, the shore is broken into a scries of little bays, with moderate hills gently rising above, and waving with palm-trees; in front is the wide Sierra Leone, glittering in constant sunshine, and bordered by the low woods of the Bullom shore. The inland country, to the west, is intersected by the waters of the Port Logo, Rokel, and Bunce rivers, varied with many a green island, and bearing many a little canoe, formed of the trunk of a tree, and paddled by aturdy savages. The aspect of the country immediately behind Freetown is bold and imposing; it is a anccession of evergreen mountains snaring one above another.

No site for a town more lovely could have been selected, had charms to the eyc been the sole guide; it is not possible that gloomy forebodings should thrust themselves forward when a stranger arrives, and for the first time looks upon the glawing bosom of the estuary, scarcely rippled by the light airs and gentle tides of these latitudes; the quiet Bullom shore, green to the water's edge; the hold sweep of that amphitheatre of undulating mountains which appear to he embracing the capital for its protection, gaping with enormous ravines and dark valleys, and clothed with never.fading forests. The town itself is picturesque. It rises from the water's edge, and gradually creeps up the sides of the surrounding hills, with its white dwellings and prolific gardens; whilst in the distance, emerging from high woods, appear the country mansions of white gentlemen, with -patches of ground devoted to the produce of coffee and fruita. The style in which the houses are generally built throws an oriental character over the view; they are as often of wood as of stone, and are washed white or yellow; pinzzas, with pillars at due intervals, support the verandahs, and secure a shady walk in the open air even during mid-day; the verandahs exhibit rows of jalousies, a kind of venctian blind painted green ; and the roofs, principally formed of layers of thin dry wood, called shingles, project to a great distance, with white caves. The greater number of dwellings stand in a court-yard or in a garden ; causing the extent of space covered by buildings to be much greater than in a European town of equal population, and giving it, from the foliage of luxuriant trees, a healthy and fresh appearance. It is flanked on either side by a brook of clear water, which never fails in the most intense weather of the dry season. The channel of these streamis may be easily traced by the abundant vegetation. The prolific bounty of nature, which makes the spot so heautifnl and ao exciting, and almost invests the busy strects with the charms of the country, is, however, one of the causes of that evil name which pestilence has fixed upon Sierra Leone. The public ways are no sooner watered by the first showers of the wet season, than they appear to be converted into fields; the most frequented thuroughfares become nearly impassahle from the dense berbage that riacs beneath the fect, particularly the indigo, which is constantly cut down to allow the common movements of the inabitants.

Of the amazing circuit occupied by the buildinga of the capital, a very limited portion is inhabited by Europeans,-that which immediately borders the sea. They are not arranged together, but often at long intervals; the interversing apace being filled with clusters of the lowest huts or sheds of the loweat blacks. No taste, however, has developed itscif so strongiy as that which urges the suvage to toil, in order to be enabled to build a house like that of the white man; and, where ample remuneration for
labour is joined to a frugality approaching abstemi ousness, the taste is often gratified.
The number of white reaidents throughout the peninsula of Sierra Leone bears no proportion to that of the blacks. It fluctuates but little: the majority being stated officers or clerks in the different colonial departments. In 1833, 84 only, including the ladies of such as had married white women, were to be reckoned in the entire colony. Of these 73 dwelt in Frcetown, with, however, between ten and eleven thousand blacks, out of the thirty thousand under British authority in the settlement.
The free blacks, who, at the close of the American war, were transferred by the British Goverument to Nova Scotia, and thence to Sierra Leone, occupy, on the western side of the capital, the quarter called Scttler-town. Next to this, on the east, is Foulah. town, the abode of the Mohammedan triles, the Foulaha and Mandingos. Then we have Maroontown, Zalotf-town, and Soldier-town; besides the cluster of wicker huts called Kroo-town ; and on the heights above all the rest, the village of the Congoese or Congo-town. But the miscellaneous collections of slaves of all tribes, imported here in the captured slavers, defy a minute claasification. Some 20 or 30 languages are in use among the inhabitants of Free town, where a zcalous and intelligent inguirer wnuld never want a favourahle opportunity of acquiring fresh information respecting the geography and ciri. lization of the intcrior of Africa.
Thrcughout the peninsula several villages have been formed at the following periods: in 1809, leicester; 1812, Regent; 1816, Gloucester; 1817, Kis. sey and Leopold; 1818, Charlotte, Wilberforce, and Bothwell; 1819, Kent, York, Wellington, Watefloo. These villages are gencrally situate in different parts of the mountain, but all connected by good roals with each other, and with Freetown, the capital.
The Bannana Islands, two in number, south-west of Freetown, may be termed one island, six miles in length and one in breadth, and were celled to the crown in 1819 by the family of the Caulkers, who receive for them an annual payment.
The Isle de Los, in north latitude 9. 16., west lon. gitude 16., five in number, are situate alout 60 miles to the northward of Sierre Leone, and five or sir miles from the coast, and were ceded to Great Britin by the chicf, Dalla Mahomeda, to whom an annual payment is made for them. Factory Island, the sccond in extent, is four and a baif long, by half a mile broad; they are however very valuable for the trade which is from them carried on with the nives of the adjacent continent, consisting in the exchange of British goods for hides, ivory, gold dust, 8 c There is also a considerable commerce in rice on thil part of this coast, some of which is exported hy the traders at Sierra Leone to the West lndies, but the quality is much injured by the imperfect process in use amongat the natives for cieaning it. British fac. tories have recently been established in several of the rivers between the Gambia and Sierra Leane, particularly at the Rio Punez, Scarces, \&c.

Observations on the Public Wurks at Sierra Lemen [B.B. 1836.] Old and New Market.-The old makte being aituated in the centre of Water-street, cuusd considerable inconvenience to the public, from it obatructing a large portion of the thoroughiare, add the unavoidable accumulation of filth rendered it lys a nuisance to the immediate neighbourhood; a mor convenient site has in consequuence been purchasd (in 1835) near the water side, ujon which it in in.

As the sandy seasiliceous, mixed wit matter, where no g vene; it is in the va is met with, formed the surrounding hi
torreuts of rain) and
tended to erect the necessary stalls, \&c., the expense of which, including the inclosing with stone walla and iron railing in front, is eatimated at 400l. The large brick one-storied building, under which a part of the present markets are kept, it is proposed should be converted into a court hall and commercial and other public rooms, and the lower or basement story, into stalls for hawkers, which will yield a considerable revenue to the funds of the colony.
Congo Bridge and Rocd.-This undertaking was commenced in December, 1836, and is an improvement highly desirable, as affording an easy communication with the western districts, which is one of the most populous of the colony, and from whence the largest supplies are daily brought to the markets of Free Town
Street Drains.-This necessary work is still in progress, and will, when completed, effectually carry off the waters which fall at the back of the town, during the rainy season, and would, if left, stagnate to the great injury of the health of the inhabitants.
Freetorn Guol.-Several necessary repairs and im. provements to the premises have been exccuted during the year, viz.: a new and more commodious kitchen has been erected at the lower part of the yard, the old and decayed one being contiguous to the side wall of the yard, afforded great facility to the prisoners in escaping over the roof. A separate airing yard for females has been divided off, with stone walls and iron railings for the admission of air. The expeases of which amount to 73l. 7s. 11tl.
III. On the head of Geology, of course, nothing more than isolated facts can yet be expected. The soil in the vicinity of Sierra Leone, consists chiefly of a slight stratum of brown gravel on a semivitrified rock of the same colour, containing a large portion of the oxide of iron. This is what is called the brown iron atone; the red iron stone is also found in extensive stratn, but the broun appears to be the more prevailing one. Both these varieties of hematites are cellular throughout their entire substance, strongly indicating volcanic origin; they are intersected with yellow streaks, and kidney-shaped segments. Magnetic iron ore is found in the mountains in small detached masses. Some oi the mountains are chiefly composed of granite, large blocks of which are frequently seen studding the surface of the plains. No limestone has hitherto been discovered in the colony, but fortunately there is a large abundance of fossil shells. Gold is abundant as will be subsequently shewn by the quantitics exported to England during the last three years.
There is very little difference in the soil of the coast from Cape Palmas to the River Volta; within five or six miles of the ahore it is of a siliceous nature; the clumps of hills which are to be met with in every direction are composed principally of gneis and granite : mica slate is found to enter into the composition of ${ }^{80 m e}$ at no great distance from Cape Coast Castle. These rocks, from containing large proportions of felspar and mica, are rapidly passing into decomposition, more especially such as are exposed to the inHluence of air and water; the result of the decomposition ia the formation of a clayey or an argillaceous soii.
As the sandy sea-coast is receded from, the soil is siliceous, mixed with decayed vegetable or animal matter, where no granite or micaceous rocks intervene; it is in the valieys where tie rich alluvial soil is met with, formed of the disintegrated materials of the surrounding hills (washed down ly the heavy torrents of rain) and deposited along with the vege
table decomposition, giving richness to the clayey mould. It is in such valleys, from ten to twelve miles inland, that the natives delight to make extensive plantations.
IV. According to the distance north or south of the equator, and to the elevation of the country, the temperature and seasons of course vary; on the north of the Equinoctial line Muy, June, July, August, September, and Octoher, may be considered the wet winter months; and the remainder of the year the dry or summer months; harmattans and tornadocs are peculiar to the latter, and fogs to the former. The rains commence with the end of May or beginof June, and terminate in August. October, November, and December are cold, with occasional fogs. The winds alung the Gold Coast may be divided into the land and sea breczes, the former from the north-north-west generally, and the latter from the southwest, west-south-west generally; during the rains the land breezes are irregular. The land breeze generally continues from 9 A.m. to 7 p.m.

The range of the thermometer is not great ; during 1819 it did not rise higher than $95^{\circ}$-the minimum being $76^{0}$, making a range of only $9^{0}$. In 1820 maximum $84^{\circ}$, minimun $74^{0}$, range $10^{0}$. In 1821 maximum $86^{\circ}$, minimum $66^{\circ}$, range $20^{\circ}$. In 1822 maximum $89^{\prime \prime}$, minimum $74^{0}$, range $15^{\circ}$-and so on ever since, with this exception, that there is a visible change in the duration of the respective seasons; thus, as Dr. Tedlie in his valuable Report to the Army Medical Board observes, solar heat alone is not a cause of disease.

The range of the thermometer at Sierra Leone is very slight, and the average heat throughout the year is eighty-two. The rains continue for six months, and the torrents which pour down from the mountains deluge the plains bencath. The mountains in the vicinity of Freetown are now, however, generally cleared and cultivated, and the scttlement is as healthy for European residents as any other tropical climate.

Indeed of late years the salubrity of different parts of Africa has materially increased : and many Europeans residing on the shores of Western Africa enjoy better health than they have experienced in England.
All tropical countries with an exuherant vegetation, necessarily yield a large portion of deleterious iniasma from decomposing natter: but the formation of drains, the clearing of jungle, and the cultivation of the soil, invariably produce a healthy place of reaidence. If Africa were fully peopled, cleared, and tilled, it would be one of the finest countries in the world in point of beautiful scenery, abuidant produce, and inexhaustible resources. Soidiers and sailors are imperfect criterions of the healthincss of any station, but as there are no other returns available, their statistics have been given in this chapter, as well as elsewhere.

It were very desirable that accurate returns were transmitted from all our coionics, of the deaths of Europeans, specifying whether male or female, the age, number of years residence in the colony, and cecupation. A valuable series of vital statistics would thus be obtained.

In the Annual Medical Report from the West African stations for 1832, transmitted to the Army Medical department, 1 tind these remarks :
' Sierru leone.-This station has continued during this year as during the two preceding years, to maintain its character for salubrity, the total number of casualties in the sick returns is eight; the strength being 446, and the total number of sick treated 230 , of which last uumber (as in the preceding year) more than one-fifth were cascs of sexual discase.'

Not only are felrile and other climatorial diseasea less prevalent than formerly, hut their type is of far greater milduess, and during the ycars 1831-32, and 1833, when most parts of the globe were sutfering from cholcra and other pestilential diseases, the British settlements in West Africa were in the enjoyment of pertect health.
The Deputy Inspector of Hospitals at West Africa, states in his official report, in reference to the causes of disease in Europeans - " Breakiast is taken at rising-at eleven A.m. they sit down to ' relish,' consisting of soups, ments, and the highest seasoned dishea; wine is drank as at dinner, and afterwards sangaree, or brandy and water, which too frequently they continue aipping and drinking till late in the afternoon, aometimes to the dinner hour " ( 6 P.M ) "In all the countries," says Dr. Nicoll, " which I have visited, I never aaw so much eating and drinking."
The wet season, as in some parts of India, is usually ushered in hy tremendous tornadoes, or violent gusts of wind, which come from the eastward, attended by thunder, lightning, and in general, heavy raina. The violence of the wind seldom continuea longer than half an hour; but the scene during the time it continues may be considered as one of the most awfully sublime in nature. Its approach ia foretold by certain appearances, which enable people
to be on their guard. A dark cloud, not larger tha ' n man's hand,' is indiatinctly observed on the verge of the eastern horizun. Faint tlashes of lightning attended sometimes by vcry distant thunder, are then seen to vilbate in quick successlon. The clouds in that quarter become gradually more dense and black; they also increase in bulk, and appear ss if heaped on each other. The thunder, which at first was scarcely noticed, or heard only at long intervals, draws nearer by degrees, and becomes more frequent and tremendous. The blackness of the clouds incresse until a great part of the heavens secul wrapped in the darkness of midnight : and it is rendered still more awful, by being contraated with a gleam of light which generally appears in the western horizon. Immediately before the attack of the tormado, there is either a light breeze, scarely perceptible, from the westward, or, as is inore common, the air is perfectly calm and unusually still. Men and animals fy for shelter ; and, while ' expectation stands in horror,' the thandering storm in an instant burats from the clouds. It is impossible for language to conver a just iden of the uproar of the elements which then takes place.

The temperature of the air ia greatly affected by a tornado (it becomes cool and clear); and it is not unusual for the thermometer to sutfier a depression of eight or ten degrees within two or three minutes after the storm has come on. After a tornado, the bolly feela invigorated and more active, and the mind recovers much of that elasticity which long continued heat tenda to impair.

The harmattan, or north-east wind, generally blors once or twice in January and Fehruary ; it is of cx. treme siccidity, and is near the great desert of Sshan in particular, accompanied by a deuse haze, occasioned by a vast quantity of impalpable powder flosting in the gusty atmosphere.

－The calculations for this year are founded on the returns for three－quarters of a year，the return for the fourth quarter not having yet been received．
$\dagger$ The returns for this period do not show the number of white troops as distinguished from Black，but the number of white troops is known to have been very smail．

V．Of the numbers，characters，and almost of the names of the people of Weatern Africa（estimated at 26 to the aquare mille， $1,200,000$ square miles，thus giving $31,000,000$ mouths）we know very little．

Three great negro races Inhabit the country：
lat．The Foulahs，from Fooladoo on the Upper Senegal，or of the same race with the Fellatahs，in Central Africa，have now spread all over the banks of that river，besidea the great kingdom of Foota Jalloo to the S．，and many districts on the banks of the Gambia．

They have not the extreme negro characteriatics； neither the deep jet hue，the flat nose nor the thick lips，on the contrary，their features are high，with an olive tint，and an agreeable expression．They have embraced the Mahometan faith，but without that bigotry which almost universally accompanies it． Their inanners are peculiarly courteous and gentle： they practise the most liberal hospitality，and relieve the wants not only of their own aged and infirm，but even of those belonging to other tribes．Their ein．

## SIERRA LEONE.-POPULATION.

ployments are pastoral, and thelr habits, in some degree, nomadic. Ocenpying countrles where there is no fixed property in land; they drive their flocks, according to the season, to the tops of the mountains, or the banks of the rivers. At niglat they collect thelr herds within the circle of the tents, and light large fires to deter the approach of wild beasts. Such is their good conduct and Industry, that it is considered Infamous to injure them, and a blessing is said to rest on any territory that contains one of their villages. Their internal government is republican, under chlefs of their own; and this form they insist upon retaining, even when they settle under a aovereign of another tribe.
2d. The Mandingoes are a race more numerous, and more decidedly negro, both in form and disposition. Though capable of great occasional exertion, they have by no means the steady industry of the Foulahs. Their employments are chiefly a slight agriculture, fishing with nets and baskets, and, above all, traffic, in which their enterprise exceeds that of the other negro races. They conduct large kafilas to a considerable distance in the interior, and their language is well understood in all the commercial distriets. They are checrful, inquisitive, credulous, and so gay, that they will dance for 24 hours, without intermission, to the sound of the drum or balafon. polygamy is practised to a great extent.
The Mandingoes have some tastes more refined than are usual among Africans, particularly in poetry, the extemporary composition, and recitation of which forms one of their favourite amusements. The original country of these people is the elevated territory of Manding; but they are now widely diffused over all this region, and particularly along the banks of the Gambia.
The third great race are the Jalofs, who oecupy ncarly the whole of the inland territory which intervenes between Gambia and Senegal, and the extent of which is estimated, by Golberry, at 4,800 leagues. A number of them are subject to a powerful inland prince, called Burb-y-Jalof, who boasts of himself as anciently the sole ruler in this part of Africa. The Jalofs, though of a deep black complexion, and with the decided negro features, are considered a bandsome race. They boast of their antiquity, and in many respects excel their neighbours. Their language is softer and more agreeable; they manufacture finer cotton eloths, and give them a superior dye (Mr. Forster presented me with some specimens of the cotton cloths manufactured by the natives of Western Africa; these clothe have a softness, weight and texture, which our manufacturers at Manchester cannot equal ; the patterns before me are novel and tasteful, proving that the African is not the degraded being he has been so unjustly represented) ; in horsemanship they are fearless and expert, and as hunters they rival the Moors. They possess not, however, the invention of writing, and reckon by fives instead of by tens.
The Feloops are a wild and rude race, inhabiting the shores to the $S$. of the Gambia; their traffic with us is carried on through the Mandingo merchants, and we consequently know little of them.

The Timmanees border on our colony of Sierra Leone.

The Ashanteps, amounting, it is thought, to $1,000,000$ people, with $3,000,000$ of dependants, belonging to other nations, inhabit Ashantee Proper, a region behind the Gold Coast, comprising about 14,000 square miles. They are a very superior class of natives to
those on the coast,-manufacture excellent cotton, smelt metals, and build large houses. The country is governed by a king, alded by four chiefs as enuneillors. Notwithstanding that the manners of the Ashantees are more polished and dignified than their neighbours, annual hecatombs of unfortunate slaves and captives are offered to propitiate the manes of their ancestors: and on the death of any member of the roysl family, thousands of human beinga are slain as attendants for the next world.

The Dithomians (who have conquered the fearfol and effeminate Wydahs) predominate along what is termed the Slave Coast, and In the interior to the depth of about 200 miles; their rule is equal in bar. barity to that of the Ashantees. The Fantecs manufacture cottons interwoven with silk, earthenware, iron, soap, \&c. ; and enjoy a republican form of go. vernment. Other tribes and nations exist, of whom we do not know even the names.

It is difficult to obtain corrected statements of the population of our settlements on this coast. The most thiekly inhabited, by British suhjeets, is Sierra Leone; the census of whieh, at two intervals, was as follows :-

In 1833-males, 16785 ; females, 12979 ; total, 29764.
Abstract of returns, shewing the number of slapes captured, emancipated, and registered in the Mixed Commission Courts at Sierra Leone, sinee their estab. lishment, to the 6th day of Fcbruary, 1826.

Captured in 1819, 96; 1820, 455; 1821, 1,399 ; 1822, 2,753; 1823, 670 ; 1824, 1,331; 1825, 1,753. To Feb. 6, 1826, 1,045; total, 9,502.

Died before Adjudication, 1,462 ; emancipated, bu: died before their deseriptions could be taken to be registered, 38; delivered over to the Colonial Govemment, not emancipated or registered, 626 ; emancipated, but not registered, 254 ; emancipated and registered, 7,122 ; total, $9,502$.

At Sierra Leone, the total number of slaves emancipated between June 1819, and January 1833, was 27,697.

Many of the coloniats possess wealth-some of the liberated slaves being now worth upwards of 1,000 . sterling.

＊School children．
Out of a total population of 37,463 in the colony，there are but 105 white colonists．The proportion of females to males is，in the whites，scarcely more than one－fourth．In the coloured inhabitanta，the sexes are nearly balanced．The number of mouths to the square mile is，in some districts，large（comparatively speaking）； but in the whole colony the average is but 96 to the square mile．The proportion of deaths to births is considerable ；and，but for the fact of many of the captured slaves dying soon after their liberation from the ill－treatment they experienced while in the hands of the slave－dealers，the table would indicate a rapidly increasing population．

V1. The following table shews the large extent of rellglous instruction provided for the liberated slaves, and judging by the column which indicates the number of the congregations usually attending the respective, places of worship, at least an external observance of the form of religion is preserved. The table of crime at page 540, does not prove a large amount of crime; and it is but fair to conelude, that the Christian efforts of the missionaries are attended with beneficial results.

Churches and Livings of Sierra Leone. [B. B. 1836.]

* The 18 Dissenting Chapels at Freetown have congregations amounting altogether to 3,850 , and are supported by voluntary contributions.
† The Gibraltar Hamlet Chapel, auperintended by the Rev. T. Raban of the C. Mcthodist Society.
$\ddagger$ The whole of the Clergymen, as well as the day assiatants, receive their salarica from the Church Missionary Society, without any other emolument.

5 The ministers of these Chapels ure partly paid from funde raised in the colony from the members, and partly by the Society in England. They are aided by native teachers who are paid in the like manner.

II These Dissenting Chapels are supported by voluntary contributiona, and Church service is performed in them all.

This table shews a slight increase of revenue, which has still further augmented since the last official returns were marle. The following table of the expenditure clearly points out how much of the colonial expenditure is defrayed by the colony, and how much by the imperial government. It could not be expected that the culony was to support the liberated slaves landed on its shores.

Comparative Yearly Statement of the Expenditure of Sierra Leone.-[B. B. I836.]

* It is difficult to state the trade accurately, because the denomination of the Exports varies to different countries.- $t$. stands for tons, $c$. for cashs.

The principal exports from Sierra Leone in 1834, were in quantity and value thus:-arrowroot 45,344 lbs., value $756 l$.; dye and hard woods 827 tons, value $10,040 l$.; ginger $11,900 \mathrm{lbs}$. value $205 l$.; gum copal packages 197, value 673l.; hides, no. 15,879, value 1,158l.; ivory, 740 pieces, value $970 l$.; OiI, palm, 92,087 gallons, value $4,665 \mathrm{l}$.; pepper, $35,420 \mathrm{lbs}$., value, $512 l$.; rice, $1,776,960$ lbs., value $7,590 l$.; tobacco, $9,000 \mathrm{lbs}$., value $110 l$.; wax, bees', $6,833 \mathrm{lbs}$., value 276l.; timber, 13,227 loads, value 33,0681 .; boards and planks, 25,210 feet, value 1611 .; shingles, no. 100,000 , value $500 l$.; bullion, gold, $214 \frac{1}{2} \mathrm{oz}$., value, $764 l$.; the total value of the exports were $65,558 l$. of which the amount to Great Britain was 51,231l.
I cannot better illustrate the mere commercial inportance of the British settlements in West Africa than by placing before the reader the following luminous and truly patriotic statement, drawn up by M. Forster, Esq., (of the mercantile firm of Forster and Smith, New City Chambers) in a letter addressed to the Secretary of State for the Colonies. The officers of the Colonial Office are qualified to judge whether the assertions herein made are in the slightest degree exaggerated. The letter is dated the 9th January, 1832.
"Attempts have been frequently made to depreciate the commercial importance of our settlements on the west coast of Africa, compared with the cost of maintaining them : and conceiving that parlinment and the public are not tully aware of the nature and extent of the trade dependent on these settlemeuts, I have taken the liberty of drawing upi a statement shewing the benefit arising from them to the revenue and national industry of this country, which I have the honour herewith to annex for your Lordship's inspection.
" The annual direct and indirect advantages to the natinnal industry from the trade, I estimate as per statement No. 1, at 463,234l. 19s., and the annual benefit to the revenue as per statement No. 2, at $207,873 l$. 13s. exclusive of ship-building materials and labour, as also of some other minor aources of national bencfit not enumerated. The total gain to
the industry and revenue of the mother country ean. not be less than $600,000 l$. jer annum.
" Within the last 20 years the increase in the trade in palm oil, timber, and bees' wax, has been very great. Attempts are making in Gambin and clsewhere on the coast to introduce the cultivation of some articles of produce new to the trade of Africa; but these endeavours require time, on account of the unenlightened state of the natives, the very recent abolition of the slave trade, and its partial continuance by other nations. In several cases, however, the natives have proved themselves capable of entertaining new ideas of trade and cultivation more readily than might have been expected. The trade in teak timber for ship-building was unknown in Africa 20 ycars ago; the annual importation of that article from Sierra Leone at present is from 15,000 to $\because 0,000$ tons of British shipping annually.
" Fifteen years ago, it was not known that mahogany grew in the Gambia; since that period several thousands lond of mahogany have been imported into England from our settlement on that river; and although the natives would not at first cut and prepare it for shipping, they are now willing to supply any quantity of it which this market may require. The low price of Honduras mahogany, however, renders it imposaible to afford any encouragenent to their industry in this article at present; but these instances afford pleasing and conclusive procfs that the natives will turn their attention to trade whenever the opportunity is afforded them.
" The annual cost of our settlements on the Western coast of Africa, as respects the protection of our commerce, exclusive of those expenses incidental to the suppression of the slave trade, which ought not to be charged to the account of those possessions, is hetter known to his Majesty's Government than to me; but I may venture to assume that it bears but a trifiing, indeed insignificant, proportion to the advantages derived from the trade: and those settlements are to lie considered not with reference to their present value alons, but to their future importance as ontlets to British manufactures, when time shali have removed some of those difficulties which at present annum. e increase in the trade $s^{\prime}$ wax, has been very in Gambia and elseuce the cultivation of to the trade of Africa; ime, on account of the atives, the very recent 1 its partial continuance cases, however, the nacapable of entertaining ation more readily than he trade in teak timber wn in Africa 20 years of that article from 15,000 to 20,000 tons
not known that maho. nce that periud several ave been imported into on that river; and t at first cut and pre. now willing to supply market may repuire. thogairy, however, renAny encouragenent to at present ; but these conclusive procis that tion to trade whenever m.
ements on the Westem the protection of our expeuses incidental to ade, which ought not f those possessions, is s Guvernment than to une that it bears buta oportion to the advan. and those settlements reference to their prefuture iuportance as , when time shali have ties which at present
ohstruct the trade. The policy of most foreign governments is directed against our commerce, the acknowledged source of our national power. The territorial extent of the British ialands is too limited ever to have raised this empire to its present proud pre-eminence in the scale of nations, without the aid of msnufactures and foreign trade; consequently I humbly aubmit, that every foreign settlement which gives facility to the aale of British gooda, is to be estimated not only with reference to the direct amount of revenue received on the produce imported from it, but atill more by the employment it affords to our manufacturers, artizana, and shipping. Without a large manufacturing population, the revenue necessary to pay the intereat of the national debt and the annual cost of the civil and military establishments of the country cannot be raiaed; hence the vast importance of our foreign possessions, which a too limited view of our colonial policy leads some persons to undervalue.
" Striking out of the puhlic estimates every charge belonging to the account of the slave trade, I do not think the annual cost of maintaining our aettlements on the western coast of Africa exceeds from 25,000 to $30,000 l$. per annum, probably not so much, while the national gain is considerably ahove half a million per annum. It is a common error to regard those settlements in the light of colonies having a taxable population, from which they may be expected to raise a revenue sufficient to maintain themselves; but the fact is, that nothing can yet be raiaed from the natives for their support, while the protection they afford is indispensable to the protection of our trade; a trade even now important, and which time may render of incalculable value, when the effect of the slave trade shall have ceased to exercise its baneful influence over the native population.
" Neither is it reasonable or politic to require individuals trading on the coast to contribute towards their maintenance beyond the duties they at present pay to the colonial funds on the goods they import from England, and the personal services they are called upon to render as militiamen in defence of the forta. I humbly subinit, that British subjects are as much entitled to protection in carrying on a trade, by which the national industry is benefited, in Africa as at home. In applying their industry, and risking their capital and health in a trade giving employment and profit to their countrymen at home, and by which the national revenue gains ao largely, they may surely not only claim the protection but the gratitude of their country. Besides which, you cannot inveat individuala with a property in public works necessary for the defence of our trading companies in Africa. Individuals change, but the advantage is national and permanent, and so should he the protection.
" By upholding these forts on a footing to command the respect of the nutives, our Governors in charge of them may render the most important services in carrying into effect the convention recently concluded with France, for the auppression of the trade in slaves, the due execution of which treaty cannot fail to produce effects as favourable to the trade and civilization of Africa, as to the cause of humanity, now hourly violated by the continuance of the traffie. France, America, Holland, and Denmark, have each their settlements on the coast, which they evince the utmost anxiety to retain and encourage. Our aettlements on the Gold Coast cost lately only 4,0001 ., and are now reduced, I understand, to 3,500l. per annum; and this is the sole
expense of protecting a valuable trade. The Dutch settlement of Elmina, which is only seven miles from our settlement at Cape Coast Castle, costs the Dutch an equal sum to ours, while Hclland has not one-twentieth part of the trade on the Gold Coast that we have.
" It ahould be borne in mind that every article imported from Africa is in exchange for goods, and that consequently it is one of the very few legitimate trades remaining to this country. The article of palm oil, which has increased so much of late years, can be obtained only in Africa, and is already extensively used as a substitute for Russian tallow in the manufacture of soap, \&c. [There are 20,000 atcam engines in the United Kingdom, and each engine requires two casks of tallow per annum. Tl.is immense consumption of tallow renders the trade in palm oil of great consequence to this country, as a substitute for tallow in the manufacture of soap.R. M. M.]
"The recent additional duties imposed on British goods imported into the Russian market, may suggest to us the policy of cherishing a trade which consumes the products of our national industry without limitation or restraint by hostile tariffa.
" The abolition of the slave trade took effect on the 1st of March, 1808. Twenty-three years is too ahort a period to effect a change in the character and pursuits of a people corrupted by three centuries of war and cruelty consequent on that traffic, and whose kings and chicfa have been taught by the sordid slave dealers of enlightened Europe to despise and neglect the pursuits of legitimate commerce, in favour of a trade in the persons of their people. Let, however, those chiefs be convinced by experience that they will gain more by the iabour of their people at home, than by the sale of their persons for exportation, and you lay at once the focindation of a new system under which war and treachery shall give place to the regenerating influence of peaceful industry. Europe owes to Africa a heavy debt for the crimes that have been committed under the alave trade. England has heen the firat to offer payment of her portion of that debt, and she will not only have the high consolations of humanity for her reward, but probably, at no very distant period, the advantages of a trade with Africa, of which it is difficult at present to foresee the extent."

No. I.
Annual value of Exports from London, Liverpool, and Bristol, to the West Coast of Africa, between the Gambia and Angola, calculated from the amount of Shipments by the several Merchants trading to the Coast from those places.
A few introductory remarks may be necessary to render these tables more clearly understood by those who have not been accustomed to estimate the importance of our foreign and colonial trade on the principles on which they are drawn up. Perhaps I cannot more clearly iliustrate those principles than by the following examples:-Let us suppose two cargoes of British manufactured goods to be sent to Canada, one consisting of cotton fabrics, and the other of hardware articles. In the case of the former we may assume that the average cost of the cotton wool of which the goods are made is ahout 25 per cent. of the export value, the remaining 75 per cent. having been added to the vajue of the raw material by the application of British capital and labour, and is therefore so much value gained to the national weaith and industry. In the case of the hardware
cargo，the iron of which the artictes are made being a native production，we may assume that the total value is an actual creation of national capital and labour．Many persons limit their notions of the importance of our colonial and foreign trade to the profits of the exporter who ships the goods abroad， whereas that is a point scarcely worth considering compared with the advantage to the national indus－ try in manufacturing them．Hence the importance of keeping open every possible outlet for the con－ sumption of our manufactures，without which our capital and artizans must lie idle，the revenue fall off， and the wealth and power of the nation rapidly decay． In addition to this it may be stated，that as every thing which the capitalist and labourer who produce these goods consume，is taxed either directly or indi－ rectly（which tax is included in the cost of produc－ tion），you virtually obtain the help of the foreign consumer to pay your taxes，or in other words，you make foreigners contribute towards the national revenue．

London and Bristol Exports．—Amount of colonial goods， $58,000 \mathrm{l}$ ．；ditto forelgn ditto， $52,000 \mathrm{l}$ ．；ditto British manufactures， $213,000 l$ ．Total， $323,000 l$ ．

The principal articles in these exports are Man－ chester cotton，and India piece goods．The freight， insurance，\＆cc．particularly of the teak timber，hides， palm oil，and those articles collected in the floating trade，compose a large portion of the gross import value of the returns．

Liverpool Exports．－Colonial goods，13，000t．； British ditto，102，500l．；foreign ditto， 5,500 ．＇Total， 121，000l．
The exports from Liverpool are chiefly for the palm oil trade，and the cargoes are differently as－ sorted from those shipped from Bristol and London． The freight，insurance， 8 cc ．of the shipping employed in the trade，constitute a large portion of the returns compared with the value of the exports．

Estimate of National Profit thereon．－On colonial goods amounting to 71,0001 ．the value of Britiab labour in transit and other charges（including pro－ fits）may be estimated at 30 per cent．thereon（on some articles，on rum for instance，these charges are nearer 70 than 30 per cent．and the average amount cannot be less than my estimate）， 21,3001 ．；foreign ditto，57，500l．；ditto，17，3806．；British ditto， 315,5001 ．，the value of the raw material on an ave－ rage being 25 per cent．，leaves 75 per cent．for labour and manufacturer＇s profit，236，625l．The shipping employed in long voyages in the palm oil and float－ ing trade is ahout 16,083 tons，which，at the low estimate of $9 \ell$ ．per ton for sailing charges per annum，
amounts to 114,7471 ．The shipping employed in short voyages（of six months）in the teak timber and other trades，about 17,000 tons，at $4 l$ ． 10 s ．per ton， 76，500l．Deduct for raw material of stores，\＆e． 15 per cent．33，187\％．1s．Total annual gain to the national industry，exclusive of ship－building， 463，234l． 198.

N．B．Of this sum of 463,2341 ．19s．one－third may be eatimated as paid to the revenue in the consump． tion of exciseable and taxed coinmodities，consumed by the labourers and artizans to which the trade gives employment，amounting to the sum of 154,411 ． 13s．carried to Statement No． 2.

## No．II．

This table does not include gold duat. In fact, it fashioned system of adventure was resumed hy many is very difficult to give correct tables, or returns of the trade of the western coast of Africa. A considerable portion of the trade is conducted on the ancient system of " adventures" afloat, or, what is called, the "floating trade." A ship is fitted out, and cominitted, with her cargo, to the direction of the captain, who acts as supercargo, and who trades along the coast, backwards and forwards, till he has disposed of his cargo, in barter with the natives, when he returns home. On the abolition of the slave trade this oldof the captains who had been engaged in that traffic (in which some of them had made considerable sums of money!, and who, finding their former occupation gone, turned their attention in this way to the lawful pursuits of trade. It is a system of traffic, however, attended with great risk, and wholly dependent for success on the honesty, aobriety, and good conduct of the captain, and one which the increasing security, afforded by our settlements on shore has already greatly limited, and will ultimately supersede.
XII. Amount of Coin in circulation.-The amount of coin in circulation may be eatimated at 25,000 l.

About the close of the year 1835, the officer in charge of the commissariat department at Sierra Leone, received from the trcasury, a remittance in dollars to the extent of $14,000 \mathrm{l}$., the whole of which, with the exception of from eight to ten thousand dollars, was cut into quarters to prevent its exportation. [The consequence of this system has been the depreciation of this currency by "clipping," and by cutting doliars into five pieces in place of four 1 a a a, ecies of fraud so easy that it ought to have been foreseen. By the last accounts, the circulation of this "cut money" at Sierra Leone was completely at a stand, in consequence of the commissary by whom it was originally issued refuaing to take it, and the greatest confusion and Inconvenience is the result. Unjess government take upon itself the loss, which it ought to do as the cause of the mischise, it must fall. where it can be very ill borne, on the poor jnhabitants. This ought to be a lesson to government not to attempt to maintain treasury bills, at a prominm, by artificial means. It is absurd to think of preventing the exportation of doliars by cutting them, whiie the merchant finds it his interest to ship dol. lars in place of remitting bilis, owing to the extravsgant premium diemanded on the latter, which on reasonabie terms must aiways have a preference owing to the comparative faciity of transmisaion. The moment the commis. sary observes that doliars are preferred to his hills he may be sure the premium demanded on the latter ia ton high, and it sinould be reduced aecordingly until it becomes the interest of the merchant to prefer bilis to doliars. This is the legitimate method to keep doljars in a colony, and not the expedient of cutting them in picces, which opens a door to fralld of which the innocent native is the victim. So obvious and casy is the fraud, and so tempting the proft, that the native blacksmitis, the armourers on hoard the hips of war, and the Americans (neverbackward in turning a dollar, particularly at a profit of 25 per cent.), have all been busy at the task of cutting dollars and five frank pieces into five quarters! The result of this experiment ought to be a lesson to government not to attempt any thing of the kind again and in this instance justice demands that, as the author of the mischief, it shouid receive the depreciated coin at par.]
There was alao during the past year 2,000l. in British silver in the military chest, which at one time ceased to be issued, with a view to induce persons to tender Spanish money for bills on the treasury; and within the laat few years there was also remitted to the commissarint for circulation $800 l$. in copper coin.

Towards the latter end of the year 1836, a very considerable decrease was observable in the circulating medium, which is partly attributable to the following causes.

1st. Persons returning to Great Britain, taking home with them British silver.

2nd. Strangers (Americans and other transient people) taking away round dollars in return for part of their sales, considering it much more advantagcous, than giving the high premium demanded on treasury bills.
3rd. Ships of war, who on leaving this are supplied with round dollars from the military chest, to defray incidental expenses, and for the purpose of purchaaing refrcshments for their crews down the leeward coast.

4th. Nntives from the interior, taking the silver coin back with them to be made into ornnments.

5 th. To the reduction for a time in the value of the doubloon, from 69s. $4 d$. to $66 s$ s. as the former value could alwaya be got for it at any part of the coast, by which the amount of this apecies of coin, became considerably diminished.

For some time past the circulation has become more extended in consequence of the great increase in the shipping, which arrived for cargoes of timber, whose disburaements are all defrayed, by the merchants to whom they are consigned, and who are repaid by Billa drawn on the owners at par.

For bills drawn on the treasury at thirty days aight
the rate of exchange during the year was as follows : Spaniah Moncy, - Forty nlne pence per dollar, or 6t per cent. premium.

British Money,-One and a half per cent. premium fixed by the Lords Commissioners of His Majesty's Treasury.
Bills drawn on the owners of Merchant vessels, to defray the disbursements of their ships in the Colony arc usually paid at par.

No rate of exchange with foreign countrics.
XIII. Gum Senegal, is the produce of some scat tered oases, or verdant spota, that occur in the vast desert of sand to the north of the Sencgal. The species of acacia from which it exudes has every appearance of a stunted and deaert trec : its aspect is crooked and rough, its branches are thorny, its leaves of a dry or dirty green. The mere blowing of the harmattan causes the bark to crack in numberless places, and the gum to flow in large transparest drops, which remain attached to the surface. The harvest of the gum is in December, when the Moorish trihes, of whom the Trazars are the most powerful, break up from their usual camps, their kings and princes at their head, and proceed in a confused and tumultuous crowd to the forests, of which each claims one or more. After six weeks spent in collecting the gum, they put it in large leathern sacks, with which they load their camels, and proceed in the same tumultuous array to the spot fixed on for the gum market, between Fort Louis and Podor. This plain, which is one of the most desolate spots in nature, is suddenly covered with an innumerable multitude of people enveloped in clouds of dust. The kings apprear mounted on beautiful horses, their wives seated in baskets on the backs of camels, the crowd on foot; the air resounds with the cries of men, women, children and animals. A cannon is fired as the signal for commencing the trade. A dreadful acene of wrangling and higgling immediately ensuea. The French accuse the Africans of most dishonest arts in order to en. hance the value of their commodity. They themselves, it appenrs, are not far behind, since they have not scrupled to adopt the policy of insensibly aug. menting the size of the cantar by which the gum is measured, a change which escapes the notice of their rude antagonists. The French take off annually ahout 1200 tons of gum, which aells in Europeat from 70l. to 901 . per ton. The returns are taken almost exclusively in East India cotton cloths dyed blue, which are called pieces of Guinca, and for which it has been in vain attempted to aubstitute the manufacture of Europe.

From the River Senegal, in about $16^{0}$ north latitude, to the Congo, which is in upwards of $6^{0}$ south latitude, there is a remarkable uniformity of vegetation, not only as to principal orders and genera, but even to a considerable extent, in the species in which it consists. Many of the trees, the palms, and several other remarknble plants, which characterises the landscape, as Adansonia, Bombax pentandrum, Elais guineensis, Raphia vinifera, and Pandanus Candelabrum, appear to be very general along the whole extent of coaat. Sterculia acuminata, the seed of which is the Cola, mentioned in the earliest account of Congo, exists, and ia equally valued in Guinea and Siern Leone, and, what is remarkable, it bears the same name throughout the weat coast. The ordeal tree, called by Professor Smith Cassa, and by Captain Tuckey, erroneously, Acassia; if not absolutely the aame plant as the red water tree at Sierra Leone and the Gold Coast, belonga at least to the same genus. A species of the cream fruit, remarkable in affording
year was as follows : pence per dollar, or salf per cent. premium ners of His Majesty's
f Merchant vessels, to ir ships in the Colony
eign countrics.
roduce of some scat. lhat occur in the vast of the Sencgal. The $t$ exudes has every ap. esert tree : its aspect is s are thorny, its leaves mere blowing of the , crack in numberless arge transpnrent drops, : surface. about $16^{0}$ north latiin upwards of $6^{0}$ south uniformity of vegeta. orders and genera, hut in the species in which , the pnims, and scereal characterises the landpentandrum, Elais guiPandanus Candelalirum, hg the whole extent of he sced of which is the est account of Congo, In Guinea and Siern ble, it bears the same oast. The ordeal tre, yassa, and by Captain ; if not absolutely the ce at Sierra Leone and ast to the same genus. remarkable in affording
a wholesome and pleasant saccharine fluid, used by the natives of Sierra Leone to quench their thirst, though belonging to that generally deletcrious family the Apocyuer, is also inct with. The Sarcocephalus Afzelius which is probably what he has noticed under the name of the country-fig of Sierra Lcone, is found on the banks of the Congo. Anona senegalensis, whose fruit, though smaller than that of the cultivated sjucies, is snid to have a flavour superior to them all, and appears to be a general plant along the whole extent of const : and Chrysobulanus Icaco, or a nearly allied specics, is equally common from Senegal to Congo.
The trunk of the Dracana Draco cleaves open in many parts, and distils, at the time of the summer solstice, a fluid, which condenses into red tears, soft at first, afterwards hard and friable : this is the true dragon's blood of the shops, and must not be confounded, though dry, friable, blood-red, and inflammable, with other resinous suhstances, known under the same name, and derived, the one from a species of Calamus (Rotang), and the other from a Ptervcarpus. To the dragon's blood are attributed astringent, desiccatory, and incrassating virtues. It is administered internally for dysentery, hæmorrhage, violent bowel complaints, and inward ulcers; and externally, to dry up running sores, to heal wounds, and to strengthrin the gums. The painters make use of it, in the rel varnish with which they colour the Chinese boxes and chests. Mr. Sewel informs me that the castor nut grows abundantly in the neighbourhood of Cape Coast Castle, and also on most parts of the Western Coast.
The esculent plants of the Congo, cultivated, as well as indigenous, are very similar throughont the west coast. On the benks of rivers the principal articles of vegetable fond are the Indian corn, or Maize (Zea Mays) Cassava, both sweet and bitter (Jatropha Manilot), two kinds of pulse extensively cultivated; the Cytisus Cajan and a Phaseolus (?), with ground nuts (Arachis hypogaa). The most valuable fruits are plautains (Musa supientum,) the papaw (Carica Papay:), pumpkins (Cucurbitu Pepo), limes and oranges, pine apples, the common tamarind, and safu, a fruit the size of a small plum. One of the most important plants, not only of the Congo, but of the whole extent of coast, is Elais guincensis, or the oil palm, which also affords the best palm wine. The palm tree is truly called the 'native's friend ;' it supplies wine, oil, fishing-lines, hats, baskets, palm nuts, cabbage, tinder, \&c. \&c. The wine is obtained by driving a hard peg or a gimlet into the cabbage-like head of the palm, when a stream of sweet liquor flows into a calabash suspended beneath, and by the time it is filled (six to eight hours) fermentation has reduced the whole into a milky tinted pleasant beverage; the natives, sometimes, allow it to have a harsh and bitter flavour; the process and liquor is, in fact, somewhat similar to that obtained from the cocoa nut blossom, and termed toddy. Wine is likewise obtained from two other palms. Among the other alimentary plants, of less importance, or imperfectly known, are the shrubby holcus, the common yam, and another dioscorea, found wild only, and very inferlor to the yam, requiring it is said, four days boiling to free it from its pernicious qualities. Two kinds of augar cancs, capsicums, and tobncco are generally cultivated, according to the herharium of Captain Tuckey, A second kind of ground nut, opera (Glycine subterranea 9 ), which is extensively grown at Madagascar,
also appears. A species of ximeria (X. americana ?) is likewise found, the fruit yellow, the size of a plum, and acid, but not unpleasant, in the higher parts of the Congo, where it is generally planted. An antidesma, perhaps like that mentioned by Afzelius, as having a fruit of the same size and taste as a currant, is met with.

The edible fruits of Sierra Leone are numerous and luscious. The pench of the negroes (Sarcocephalus esculentus) is a large, fleshy, and solid fruit, hard and eatable throughout, and full of small sceds, not much unlike a strawberry in flavour and consistence. The tree grows plentifully throughout the colony of Sierra Leone, 10 to 15 feet high; leaves large and elliptical, flowers pink, produced in glohular heads, and seated on a receptacle, which afterwards becomes the fruit. The Anona sencgagalensis, or African custard apple, fruit not much larger than a pigcon's egg, and with the same or a auperior tiavour to the rest of the species. The monkey-bread (Adansonia digitata) is much used by the negroes; its fruit, which is of considerable size, and of an oblong shape, is full of seeds, and tastes like ginger-bread, with a pleasant acid flavour. The locust tree of Sierra Leone (Inka biglobosa) is a beautiful tree when in blossom, covered with compact biglobular heads of fine vermillioncoloured flowers, which are succeeded by compact bunches of pods, containing a yellow farinaceous substance, of which the natives are very fond. It is mentioned by Park as affording an agreeable and nutritive food. The country cherry is rare, growing on the mountains, and bearing a small oval reddish fruit, somewhat like a plum in flavour, and produced in clusters on the topmost branches. Anisophyllea laurina, the monkey apple, is a fruit of the size of a pigeon's egg, red on one side and yellow on the other, with a flavour hetween the nectarine and plum. Country grapea are the produce of Vitis casia, they are black, austere, and acid; chiefly eaten by the negroes. Country currants resemble elder-berries, and are found plentifully on the mountains. The shrub (Fiscus Brassii) which bears the large fig, grows about the colony; fruit pleasant; as is also a smaller fig, that bears abundantly, and is the size of a hazel nut. Wild guavas (Psidium pyriferrm) are natives of the country: Mr. Don saw and tasted the fruit, but could not exactly identify the plant with the West Indian guava. The hog plum is the fruit of Spondinus Myrobahanus; it is well tasted, and sharper than the plum of our gardens, but the stone forms half the bulk of the fruit. The grey plum tree ( Pa rinarinm excelsum) is more valnable for its compact and durable wood than for the fruit, which, though large and abundant, is dry and farinaceous, with a very large stone; an allied species ( $P$. macrophyllum) is called by the colonists, ginger-bread-plum. Of four other fruits, called plums, the small pigeon plum (Chrysobulanus ellipticus), the yellow pigeon plum (C. luteus), the black plum (Vitex umbrosa), and the sugar plum; it mny be said that the first threc, though good, are inferior to the latter, which is sold in large quantities in Sierra Leone, and is one of the very best fruits in the colony. The tree is very handsome, 60 feet high, and bears many fruits of the size of a hullace; at 10 feet from the ground the stem throws out roots like a mangrove or pandanus, but its botanical affinities are not known. From the fruit of the swect pishamin (Carpodinus dulcis) a quantity of sweet milky juice exudes, the pulp is also pleasant and swect. The sour pishamin (C. acidus), though sharp, acid, and rather bitter, is much relished
by the natives. The Mammee apple (Mammea africana) is a lofty tree, with useful wood, and a very large fruit. The butter and tallow tree (Pentadesma butyracea) abounds in a yellow greasy juice, to whicb it owes its name, and which is given out plentifully when the fruit is cut ; this is mixcd by the natives with their food, on account of its turpentine flavour, which renders it disagreeable to the European settlers. Two kinds of star apple (Chrysophyllum macrophyllum and C. obvatum) are very inferior to the West Indian atar apple (C. Cainito). Tonsella pyriformis bears a rich and sweet fruit, like a bergamot pear. There is a tree, called pomegranate, said to be excellent : but having no affinity to punica. The seeds of Sterculia acuminata are called cola by the negroes, who hold them In great esteem, at poasessing the same virtues as Peruvian bark. They are like horsechestnuts, and produced in pods, which grow two to five together. A somewhat aimilar seed, named tola, is used in the same way. Velvet tamarinds, the fruit of Codarium acutifolium are produced in beautifully black velvety pods, and possess an agreeably acid taste, while brown tamarinds differ little, except in the colour and larger size of the pods.
Pinc apples both grow wild and are cultivated by natives : they abound in the woods so as to obatruct the passage through them in every direction, shooting most vigorously, and yielding fruit abundantly. Two kinds only, the black and white, are grown at Sierra Leone: though no ${ }^{+}$so large as those cultivated in England, the flavour is superior. The wild varieties are innumerable; and a very pleasant kind of wine is made in the colony from the juice.

Besides the fruits already mentioned as found wild near Sierra Lenne, the following are cultivated : plantains (Musa sapientum), bananas (M. paradisiaca); the cocoa nuts are still rare, and papaws (Carica papaya) are only seen near the settlers' houses. Oranges are abundant, and have now grown wild; lemons are rare, but limes plentiful. Cashew nuts have been cultivated in large quantities of late: rose apples (Eugenia Jaimbos), and tamarinds from the West Indies, love apples (Solanum Lycopersicon); melons, water melons, cucumbers, gourds, \&c., of many kinds and qualities; among the melons some which having the smell of musk, are called musk melons. Two sorts of capsicum are grown.
The Baobab, or Monkey Bread, above mentioned (Adansonia digitata), may be deemed one of the most valuable productions of Western Africa. It is likewise aaid to be found in Egypt and Abyssinia, and is cultivated in many of the warmer parts of the world. It is the largest known tree; its trunk being sometimes no leas than 30 feet in diameter. At one year old, its diameter is one inch, and its height five inches: at 30 years old, when the diameter has attained to two feet, the height is but 22 fect ; and so on, till at 1,000 years old, the Baohah is 14 feet broad, and 58 feet high; and at 5,000 years, the growth laterally has so outst.: ., wed its perpendicular progress, that the trunk will be 30 feet in diameter, and only 73 feet in height. The rects are of a most extraordinary length; in a tree with a stem 77 feet round, the main branch, or tap root, measures 110 feet in length. The foliage is not so abundant as to conceal the vast proportion of the trunk; but it often happens that the profusion of leaves and of dropping boughs almost hide the stem, and the whole forms an hemispherical mass of verdure, 140 to 150 feet in diameter, and 60 to 70 feet high. The wood is pale coloured, light, and aoft, so that in Abyssinla, the
wild bees perforate it, and lodge their honey in the bollow, which honey is considered the best in the country. The negroes on the western coast apply these trunks to a singular purpose. The tree is liable to be attacked by a fungus, which, vegetating in the woody part, without changing the colour or appear. ance, destroys life, and renders the part so attacked as soft as the pith of trees in general. Such trunks are then hollowed into chambers, and within them are suspended the dead bodies of those to whom are refused the honour of burial. There they become mummies, perfectly dry and well preserved, without further preparation or enbbalming, and are known by the name of Guiriots. The Baobab, like all plants of the same order (Malvacea), is emollient and mucilaginous. The pulverised leaves constitute $\quad \mathrm{h} / \mathrm{a}$, a favourite article with the natives, which they mix with their daily food to diminish excessive perspiration, and which is even used by Europeans in fevers, diarrhoeas, \&c. The fruit is perhaps the most useful part of this tree; its pulp is acid and agreeable, and the juice expressed from it, mixed with sugar, eonstitute a drink that is deemed a specific in putrid snd pestilential fever. Owing to these circumstances, the fruit forma an article of commerce. Bowdich men. tions that it possesses such an agreeable flavour, and is so abundant, that it constitutes a principle article of food with the natives, who season many of their dishes with it, especially their corn gruel. The Mandingoes convey it to the eastern and southern districts of Africa, and through the medium of the Arabs, it reaches Morocco, and even Egypt.
If the fruit be injured, it is burned, the ashes being mixed with rancid palm oil, and serving for soap. The flowers are large, white, and bandsome, and on their first expansion, bear some resemblance, in their snowy petals and violet mass of stamens, to the white poppy (Papaver somniferum). Both the flowers snd fruit are pendant. The Baobab tree loses its leares before the periodical rains come on.
The Arachis hypogæa deserves notice on account of the aingular economy of its fruits. It belongs to the very few plants which mature their seeds under ground; the flower stalk, after the blossom has withered, bending downwards, and burying the germen in the soil, where it soon increases in bulk, and per. fectly ripens. The fruit is a pod, containing one or two seeds, the aize of small nuts, with a flavour of almonds; the natives of aeveral countries eat them cither boiled or fried, and make very pleasant confections of them, the taste resembling chocolate. A valuable oil is also extracted from the seeds of the Arachis, alike useful in food and for aupplying lamps, as it never turns rancid. Many attempts have been made to naturalize this plant in Europe; but the climate is too cold for it every where north of the southern coast of France.

The native names of the different species of timber exported from the River Sierra Leone for shipbuilding and carpenter's work are - 1. Co-Tartosar or African oak; 2. Tolongah, or brimstone; 3. Bumia, rather scarce ; 4. Cooper; 5. Kon; 6. Conta; 7. Roth ; 8. Wossomah; 9. Jumo ; 10. Backam; 11. Topercanico; 12. Mooll, the tree produces vegetable butter; 13. Sop; 14. Kelill; 15. Cong; 16. African almond; 17. Bombay; 18. Dye-wood; 19. Pissaman; 20 Pissaman, (no marine animal of any kind attacks it) : 21. Black oak; 22. Wismore; 23. African cedar ; 24 White wismore; 25. Cronko; 26. Shiu-shinginara; 27. Blue wismore; 28. Arwocra; 29. African mammee apple; 30. Catepy ; 31. Lowland box-wood 32. Singa-singa marah; 33. African pine; 34 Highland box-wood; 35. Singuoora; 36. Cabooco; 37. Brimstone; 38. Bessey; 39. African mulberry ; 40. Mangrove. The grain of several of these woods is very rich, and the furniture made therefrom not only durable, but extremely beautiful. In Mr. Forsster's elegant mansion at Hampstead, there are several articles of furniture made from African mahogany, which would vie with the wood of any country in the world : and for ship-building the African teak is now generally and deservedly esteemed. (For the animal kingdom, \&c., see my "Colonial Library.")
The rivers and coasts abound with many sorts of fish, beautiful in their colours, or nutritious for food.
The larva or caterpillars, of all the bcetles that feed upon decayed wood, are rich and delicate eating, ${ }^{30}$ that every forest affords the traveller plenty of nourishment did he know where to search for it. The children in Africa, at the proper season, are busily eniployed in digging out of the ground the females of
a particular sort of cricket, which are then full of eggs, and so enclosed in a bag as to resemble part of the roe of a large flsh: these, when roasted, are deemed very delicate.

Manufactures, Mines, and Fisheries in 1836. [B. B.] -There are no manufactures or mines in this colony. There are many different sorts of fish, viz.-turtle, barracouta, snapper, ten-flsh, grouper, mullet, mackarel, ten-pounder, bonetta, crocus, shy-nose, solea, skait, white bait, ecls, cavalla, flounder and green jar; all averaging in value $\frac{1}{2} d$. per lb ., or $6 d$. per bundle. Also oysters (opened), $6 d$. per pint; cray-fish, 18. each ; cockles, $6 d$. per pint ; crabs, $2 d$. each; shrimps, 6d. per pint; perrywinkles, 6d. per pint; muscles, 6d. per pint.

There are about 20 boats and 40 canoes employed in fishing.

* Cannot be ascertained.

The exact number of acres of land under cultivation in this colony cannot be ascertained; nor can a correct account of the produce gathered and saved during the year be given. The articles, however, usually raised in the colony are-rice, coffee, yams, cotton, arrow root, pepper, cassada, Indian corn, cnstor oil plant, sugar cane, maize, ginger, ground nuts, and other vegetables and fruits indigenous to a
tropical climate．The natives also extract from the palm tree＂palm wine，＂and manufacture from the same tree palm oll，which forms an article of export to England and elsewhere．

Average Prices of Produce and Merchandize．－ ［B．B．1836．］－Horses，15l．each；horned cattle， 2l．10s．；sheep，8s．8d．；goats，Gs．6d．；swine，6s．； milk，ld．per gill；fresh butter，none；：salt ditto， 28 ．per lb．；cheese，1s． $6 d$ ．per lb．；wheaten bread， $2 s$. per lb ．；beef， $5 d$ ．per lh. ；mutton， 9 d ．per lb. ； pork， 9 d ．per lb ．；rice， 3 s ． 10 d ．per bushel；coffee， ls． $6 d$ ．per lb．；tea，8s． $8 d$ ．per lb．；sugar， 1 s ．per lb ； salt，2s．per bushel ；wine，11．16s．per dozen ；brandy， 10s．per gali．；beer，13s．per dozen；tobacco， 13. per lb．

The labourers employed in loading timber vessels， receive on an average， 20 s．per month．
Mr．Mathew Forster，of New City Chambers， Bishopsgate－street，a British merchant，to whom the colonies in general，and Africa in particular，are under deep obligations，thus writes to me，on applying to him for information on the staples of Africa．
－It may add some interest to your chapter on our African settlements if you notice the probable disco－ veries that may yet be made in the products of that quarter of the world，which till very lately，was sel－ dom visited for any more legitimate article of pro－ duce than human flesh．The teak timber for the
purpose of ship－buiiding，and mahogany are disco． veries within the last twenty years．The first impor． tation of palm oil is within the recoliection of per－ sons now＇alive，and when the siave trade was abolished in 1808，the quantity imported annually did not exceed one or two hundred tons．The snnual importatlons now exceed twelve thousand tons！

I have lately been attempting to ohtain oth oils from the coast，and it was only yesterday I re． ceived from the hands of the oil presser the result of my most recent experiment on the ground nut， which I am happy to say is encouraging．I send you a sample of the oil extracted from them．They sre from the Gambia．［It is a pure golden coloured oil， with a pleasant flavour，free from the frecpuent ran－ cidity of olive oil．］ 1 lately received from Cape Coast a quantity of the palm nut from which the palm oil is previously obtained，for the purpose of examining the kernels to see whether they would not yield an oil worth extracting；I send you a sample of the nuts，and one of the candles made from the styrine obtained from them，but I do not think they have had fair play in the management．
＇If 1 am blessed with health and life for a few years longer，I do not despair of increasing the num． ber and value of our African imports．It is the surest method of improving Africa and benefiting the mother country，and it becomes a British merchant to carry his views sometimes beyond the boundary of sordid gain．＇［1 trust these sentiments may be widely diffused among our colonial merchnnts．］

CHAPTER V．－GAMBIA，CAPE COAST CASTLE，ACCRA，\＆c．

1．St．Mary＇s Island（our principal settiement on the Gambia）lies close to the continent on the south side，running nearly east and west about fifteen miles，but of very inconsiderable breadth，and com－ manding the entrance to the river Gambia．The island is an uninterrupted flat，somewhat elevated， and covered with a thick brush of underwood，deno－ ting the fertility of the soil．（Cattle can cross over at low water to Cape St．Mary＇s．）

Bathurst Town is built on the east side of the island，on a point which admits of a strong battery， being surrounded on nearly three aides by the tole－ rably deep and rapid river．The strata is a gravelly soil，consisting of the brown oxyd of iron strewn over a stratum of roek of the same composition；the other parts of the isiand consist principally，of a rich，dark， loamy mould．
The river from which the settlement derives its name，empties itself into the ocean by a mouth about nine miles wide between Cape St．Mary on the south and the Bird＇s island on the north．It was formerly supposed to be a branch of the Niger，but this notion was refuted by Mr．Park．Its sourees have never been explored by European travellers，but it has been ascertained to take its rise amongst the lofty range of mountains which form the eastern front of Foota falls．It communicates with the Senegal River by the Neriko，and is called by the natives River Ba Deema in the upper country．Vessels of 300 tons
navigate it for sixty leagues，and amaller vessels as far as Barraconda， 250 leagues from the entrance； here the obstructions commence which render fur－ ther navigation impossible．From December to June，which is the dry season，the flow of the tide is felt，but in the rainy season，from June to Septem－ ber，the stream sets down so strong，that vessels can－ not stem the current by ordinary means；though no doubt advantage might be tnken of navigating by steam throughout the year．
Colonel Findlay，the late intelligent and humane Governor of the Gambia，has justly observed to me that it is greatly to be lamented the British govern－ ment have nut yet aurveyed the various large rivers and creeks which empty themselves into the Gambia； if this were accomplished，there can be no doubt but an extensive inland navigation would follow，which would increase the trade，by affording a more ready and friendly intercourse with the natives．
There are two channels into the Gambia，the northernmost of which has six or seven fathoms water，is six miles wide，and lies between the Birfl＇s Island and the Banguion bank；the smaller，on the other side of the bank and under Cape St．Mary，has about nine feet water．The river is at all times muddy，and is infested with crocodiles，and also inha－ bited by the hippopotamus．It abounds with fish of various kinds．
The popuiation of this settlement 1 can only
mahogany are disco． eara．The first impor－ e recollection of per－ the slave trade was ity Imported annually red tons．The annual e thousand tons！ oting to ohtain other only yesterday 1 re． 1 presser the result of on the ground nut， ouraging．I send you from them．They are re golden coloured oil， om the freipuent ran． eived from Cape Coast om which the palm oil purpose of examining hey would not yield an you a sample of the made from the styrine ，not think they have th and life for a few of increasing the num． a imports．It is the rica and hencfiting the is a British merchant to yond the boundary of c sentiments may be mial merchnnts．］

V．The administration at the Gambia is under a Civil Lieutenant－Governor，but no council has yet been established to assist him；and the want of one has been repeatedly complained of by the settlers．

Return of Militia．－［B．B．1836．］Bathurst， 1 lieut．colonel； 2 majors； 6 captains； 4 first－lieute． nants ； 4 second－lieutennnts．Staff， 1 adjutant； 1 quarter－master； 1 pay－master； 1 surgeon．Strength， 6 colour－serjeants； 12 scrjeants； 18 corporals； 12 drummers；and 252 privates．
Fort Bullen， 1 captain； 1 lieutenant； 2 colour． serjeants； 4 serjeants； 6 corporals； 4 drummers； and 84 privates．
Macauley＇s Island， 3 captains； 5 licutensants； 1 surgeon； 4 colour－scrjeanta； 8 serjeants； 12 corpo－ rals； 8 drummers ； 168 privates．

There are several establishments on the Gambia belonging to Great Britain，as well as Bathurst． Macarthy＇s Island is up the river，more than 300 miles．Fort James is situated on an island about thirty miles up the river；it is only 200 yards long and 50 broad，and was，formerly，strongly fortified， but the French，on capturing it in 1668 ，destroyed the works which have never been entirely restored． Opposite Fort James on the north bank is Jillifree， in a healthy situation，and surrounded by a fertile district．On the south hank are Vintain，Tancrowal， and Jouka Konda，the first two，the sccond twelve leagues from Fort James，and the last，considerably up the river．About a leaguc above Fort Jamea on the south side，the River Bittan flows into the Gam－ bia，and this is at all times navigable for large boats
to the village of that name, inhabited by African Portuguese. The sovereignty of a tract of country (one mile inland from the beach between Burragadoo Creek and Junkarda Creck) was ceded to the King of Great Britain by treaty with the King and Chiefs of Barra, signed at Jillifree, 15 th June 1826, a smali spot of 400 yards by 300 yards called Albredar, near James's Island, excepted. This tract is extremely valuable from its position on the left bank of the river Gambia, opposite St. James' and St. Mary's isiands, giving us a control of the navigation of the stream from its entrance to James' Island.
The French have a factory called Albredar, about three miles below Jillifree, which they retain posses. sion of, in defiance of the treaty of 1783 (confirmed by the treaty of Paris), and despite the repeated remonstrances of the English Governınent. The following is the article of the treaty in question :" Art. X. The most Christian King, on his part, guarantees to the King of Great Britain the posses. sions of Fort James and of the River Gambia." When Senegaland Gorec fell intoour hands by conquest, during the last war, in 1809, the commerce of the Gambia was carried on by the English traders exclusively from Goree. On the restoration of those places to the French hy the treaty of Paris, exclusive possession of the Gambia was reassured to us on the aame footing as by the treaty of 1783 , and our settlement at Cape St. Mary's was immediately formed for the protection of its trade. Shortly afterwards the French, for the purpose of securing a footing in the river, dispatched an agent from Goree to establish a trading post, or compteir, as they call it, at Albredar, under pretence of their having formerly had a comptoir at that place. Unfortunately this was not resisted at the time by the English commandant, Col. Grant, for want of sufficient information on the nature of the treaties; and every attempt made since to dislodge them by fair means, has failed of success. It is but justice to our government to add, that the most persevering remonstrances have been addressed in vain to the French government on this subject.
Akin to this conduct on the part of the French is their behaviour in respect to our right by treaty to carry on the gum trade with the Moors at Portindic. That right is solemnly guaranteed to us by the treaty of 1783 (since confirmed by the treaty of Paris), in the following words of Art. XI. "As to the gum trade, the English ahall have the right of carrying it on from the mouth of the river St. John, to the Bay and Fort of Pontindic inclusively: provided that they shall not form any permanent settlement of whatsoever nature in the said river St. John, upon the eoast or in the Bay of Portindic."
Nothing can be more clear and definite than this article of the treaty, which has bcen faithfully adbered to on our part; no permanent (nor even temporary) establishment having been formed by the English within the prescribed limits. But what has been the conduct of the French? luring the guin trade of 1834, under pretence of a war with the Trazar trihe of Moors, from whom we obtain our supply of gum at Portindic, they sent from Senegal a naval force, and seized our vessels trading there; which, however, on the remonstrance of Licutenantgovernor Rendall, they subsequeistly gave up, and it was supposed that the outrage would not be repeated. In this, however, the English traders have found themselves mistaken: the desire of the French at Senegal to monopolize the gum trade ia not to be restrained by the faith of treaties.

The most valuable part of our trafic is carried on high up the river, above Macarthy's Island, where no protection hy government has yet been provided for the trade. This, by means of block houses, might he afforded at a small expense, which the value of the trade would amply repay. The immense extent of the River Gambia, and the thickly papulated and fertile country through which it has its course, will render it, ultimately, the most valuable of our posses. sions in that quarter of the world.

The Exports for 1834 I do not find at the Custom House.

The trade returns of Cape Coast Castle are less perfect; I am enabled, however, through the kindness of Mr. Nicholls, to shew the Exports from Cape Coast Castle, between the 18t of August, 1829, and 30th of June, 1834.

1st August, 1829, to 30th May, 1830, Palm Oil, Ivory, \&c. ( 11,958 oz. Gold included) value $£ 79,718$. 1st June 1830 to 31st December 1830 1st January, 1831, to 30th September, 183 1st October, 1831, to 31st December, 1831 1st January, 1832, to 30th June, 1832 Ist July, 1832, to 31st December, 1832 1st January, 1833, to 31st December, 1833 Ist January, 1834, to 30th June, 1834
ditto $\quad 5,510$ ditto $\quad 36,377$. ditto $\quad 10,888$ ditto 78,818 . ditto 1,255 ditto 11,464. ditto $\quad 12,580$ ditto 87,654 . ditto 12,117 ditto 93,450 . ditto 21,474 ditto $140,3+4$. ditto 15,351 ditto $106,156$.
$91,134 \mathrm{oz}$. of gold. 'Jotal $\mathbf{L} 633,9 \times 1$.

Exports from the River Gambia, in 1825, 1830, and in 1833.

## * Large quantities ahipped and not invoiced. <br> $\dagger$ The Bordeaux is 60 gallons.

$\ddagger$ The logs average 50 feet.

The trade of Western Africa is of considerable importance to this country, and yearly increasing.
VIII. The following shews the prices of different articles in the markets at the Gambia, 1833 :-Yellow bees' wax, 130l. per ton; African teak, 3l. 10s. per load ; camwooll, $12 l$. per ton; ivory, $3 s .6 d$. per Ib . Mahogany of various kinds at $4 l$. currency, or $3 l .9 s .4 d$. sterling (exchange dollar at $4 s .4 d$.) Ebony of very good quality grows abundantly in Salum River, and partially in Gambia. Dittach, a very hard and durable wood, stands well under water, and is used in the construction of vessels, wharfs, \&.c. Toulacouna, or bitter oil, 3s. Gd. (currency) per gallon. Cotton, nominal or barter price, in the rough, $2 d$. per lb . Indigo, in the rough cake, ws. Ed . each. Hemp, made into ropes or corls, and sold at nbout fid. each. Potash, about $5 d$. per 1b. Honcy, retailed in Mandingo country at $2 s .6 d$. per gallon. Butter, same price as honey. (N.B. The natives preserve the butter by a process of melting, and retail it in the liquid state at $2 s .6 d$. per gallon). Cola nut, 3s. $9 d$. per 100. Cardamums, sold in barter annong the natives, at about 10 s. the lb ., and brought from a distance in the interior by the gold merchants. Goat, ealf, mod butlocks' $\varepsilon$ kins, dressed by the nntives, hut usually made into articles of use. (The natives dress these skins well by means of potash and hnnna seeds). Cayenne pepper of all kinds, in plenty. Beef, good, at $3 d$. (sterling) per ll . Fowls, 1 to $1 \frac{1}{2}$ dollar per dozen. Mutton, generally private property, seldom in market. Goats, 1 dollar to id (with one or more kids).

Wines, claret, 5 dollars the case. Tea, 2 dollars the lb, Dried oysters (good). Eggs, 14 to 16 for quarter dollar.

In the settlement of Bathurst, St. Mary's, Gambia, there are about 20 wax manufactorics. Country eloths, \&c., are manufactured in town, the number of looms nveraging from 50 to 60 . About 12 goldsmiths have considerable employment in manufneturing rings, and trinkets of various kinds. Bricks are also manufactured by liberated Africans.

There are no boats employed in the fisheries, but a number of cnnoes. The different surts of tish are as follow:-Mullet, value 1d. each; Soles, 2I. each; Baracuta, Is. 1 d . each ; Boneta, Id. eneh ; Turbot, 2s. each ; Turtle, 10s. each; Snappers, 1 हैl. each; Skates, $5 d$. each ; Rny, $2 \frac{1}{2} d$. each ; Captnin Fish, 1s. Id.each; Cat Fish, $1 d$. each; Craw lish, Gd. each; Grouper, 1s. 1d. each; Prawns, 2d. per dozelt; Mangrove and Rock Oysters, 7 7 d $d$. per bushel ; Museles and Cockles, $7 \frac{1}{2} d$. per bushel ; besides a variety ol other fish known only by country names. There are also $3!$ vessels belonging to the port engaged in trade, and upwards of 200 boats and canoes.

Mac Carthy's Island.-Country cloths are manufactured by small hand looms. There are vaious kinds of fish caught, but the names are unknowa.

Return of the Protuce, \&r. of Gambia, in 1835, [B. B.] Bathurst, Isle of St. Mary, Ganbin: Indian corn, 100 acres; millet, three kinds, $5: 0$ ncres; rice, three kinds, 250 acres; ground nuts, 100 aces; beans, 50 acres. Alter the crop is cut, the whole of the island is muler pasture. Nearly all cultivaled

walls
sca "
during the rainy season. Number of acres of uncul. tivated land not ascertained. Number of stockborses, 76 ; horned cattle, 210 ; sheep, 330 ; goats, 560. Quantity of produce-Indian corn, not ascertained; millet, three kinds, about 10,000 bushels; rice, three kinds, about 4,000 bushels; ground nuts, about 2,400 bushels. Price of produce-Indian corn, 3 s. 6d. per bushel ; millet, 3s. ; rice, 5s. ; ground nuts, about $2 s .6 \mathrm{~d}$. ; beans, about 10 s .
Mac Carthy's Island.-Number of stock--horses, 17; horned cattle, 350; shecp, 78; goats, 294. Quantity of produce-Indian corn, about 50 bushels; aillet, three kinds, about 36,000 bushels; rice, three kinds, about 6,500 bushels ; ground nuts, about 2,300 bushels. Price of produce-Indian corn, price varies; millet, from $17 s, 4 \mathrm{~d}$. to $1 l .1 s .8 d$. per bordeaux of
cight bushels; rice, from 40 to 48 dollars per ton; ground nuts, about $2 s .6 d$. per bushel.
Prices of Produce in 1836. [B. B.] Horses, 181. each; horned cattle, $2 l .10 s$. ; sheep, 14. ; goats, 7s. $6 d_{\text {. }}$; swine, 1 ll . 10 s . ; milk, 6 d . per quart ; butter, 8alt, 1s. 8 d . per lb.; butter fresh, none; cheese, $1 s .3 d$. per 1 b. ; wheaten bread, $5 d$. ; heef, $3 \frac{1}{2} d$. ; mutton, $6 d$. ; pork, $5 d$. ; rice, $15 s$. per cwt. ; coffee, 1 s . 1 d . per lb.; tea, 8s. 8d.; sugar, $1 s$. ; salt, 1s. 3d. per bushel; wine, $1 l .10 s$. per dozen ; brandy, $8 s .8 d$. per gallon ; bcer, $15 s$. per dozen ; tobacco, 1 s . per II.
Labour.-Domestic, 11. 14s. 8il. per month; precdial, $6 d$. per day ; trades, $3 d$. per day.

The coin in circulation is about 20,000 l. There is no paper money. Dollar $=4 s .4 d$.

## CAPE COAST CASTLE, ACCRA, \& c.

The British forts and stations on the Gold Coast are at Dix Cove, Secundee, Comenda, Cape Coast Castle, Annanaboo, Tantum, Winnebah, and Accra; of these only a few here require notice.
Dix Cove, is a few miles to leeward of Cape Three Points, affording only shelter to boats of fifteen or twenty tons barthen, but yielding much gold of a fine quality.

Cape Coast Castle (long the seat of the British government on the Gold Coast, and residence of the chicf governor during the sovereignty of the late African Company), stands upon a rock of gneis and mica slate, about twenty feet above the level of the sea, in latitude $5^{0} 6^{\prime}$ north, longitude $1^{0} 10^{\prime}$ west.

It may he considered the centre capital between Sierra Leone and the Bights of Benin and Biafra; as alsc the great emporium of trade for the introduction of British manufactures, and the obtaining gold dust, palm oil, and ivory.

The castle is an irregular figure of four sides, with four bastions at each angle; the whole mounting ahout eighty pieces of cannon. Two-thirds of the walls of the fortress are washed hy the very heavy sta which invariably runs along this line of coast, and it is well protected on the land side.

Within the castle is an extensive line of spacions buildings, three storics high, running north and south, dividing the fort into nearly two equal parts, and containing the government-house, \&c.; a nearly similar atructure runs east, forming a triangular space of considerable extent.
The Cape, on which the castle stands, is nu angular promontory, bounded by the sea on the south and east sides. lt was originally settled by the Portuguese, but the Dutch dispossessed them in a few years, and took great pains to atrengthen the fortifications. Admiral Holmes captured it, and demolished the citadel in 1661 , since which time it has remained in the possession of Great Britain, having been confirmed by the treaty of Breda. When the Dutch Admiral De Rnyter destroyed all the English factories along the coast in 1665 , this place withstood his utmost endeavours, although he attacked it with thirteen men of war. The Company, who obtained a charter in 1672 , subsequently added greatly to its atrength by bullding sone bastions, though the fort ia considered to be too near the town, and commanded by some of the houses.
Cape Coast Castle was originally surrounded with woorl, hut a large tract of country has beell now cleared and rendered fit for cultivation.

The native towns on the sea cuast are generally built close to the walls of the liuropean forts; the houses are principally constructed of mud, and covered with Guinca grass, and so crowded together as to render it almost impossible to pass through the spaces allotted for streets; ventilation is of course quite out of the question, and as the inhabitants are filthy beyond description, their villages are productive of much disease, not only to themselves, but to those Europeans who happen to reside near them.
To this description, Cape Coast Town is, however, an exception; streets are non formed, immense masses of filth have been removed, the surrounding hills have been cleared of their luxuriant foliage, roalls have been cut, and the tout ensemble presents prospects of gratifying improvement.

About tive miles north-west from Cape Coast Castle is a small river, running in a southerly direction, and emptying itself into the sea within two miles of Elmina, forming the boundary between the Dutch and British possessions. The number of liuropean stations on the Gold Coast was at one time considernble. l'rom Appolonia to Accra, a distance of 64 leagues, there were, in 1808, of Dutch forts, 13, of Danish 4, and of British 10; names, Appolonia, Dix Cove, Succondoc and Coinmenda, to westward of Cape Coast Castle, and Annainaboe, Tantum Querry, Winnebah, Accra, Prampram and Whydah, to leeward of Cape Coast Castle.

At a distance of about two miles to leeward (eastward) a chain of hills, forming an irregular amphitheatre 160 lect above the level of the sea, commences and runs in a semicircular direction approaching the castle at some places within a quarter of a mile, and terminating on the shore about a mile to windward. There are no mountains within several miles of Cape Const Castle, the highest land not being more than 200 teet ahove the sea; nor are there any plains of great extent ; clumps of hills, with their corresponding valleys, ure however every where to be seen covered with a most luxuriant foliage throughout the year.
Annamubor, ten miles to eastward of Cape Coast Castle, is a good fortification, of a quadrangular form, built on the extreme margin of the shore, the sea washing the foot of the southern boundary wall, and the town of Annamaboe taking the form of a crescent, embraces it. Tantum and Wimebah require no separate notice.
Accra lies in $5^{8} 33^{\prime}$ north latitude, and $0^{0} 5$ west lougitude; there are three settlements there, English,

Dutch, and Danish. The view from seaward is picturesque, the houses white and regularly built, and in their rear a large plain, studded with 'bush,' or groves of various foliage. As the voyager advances towards the River Succomo the prospect widens-and is finally bounded by high lands, whose slopea yield excellent sheep pasturage. The country around is in general a fine, open and level land, with a sandy, red, and black soil or rich mould.

Accra carries on a considerable trade with the Ashantees, who bring ivory, gold dust, horses, \&c. to exchange for romals, ailks, tobacco, and rum, creating a considerable extent of business, for the Ashantees are a shrewd and intelligent people, well acquainted with the advantages of social intercourse, and greatly superior to the Fantees, and other water-side people. Indeed, it is a remarkable fact, that the people nearest the shore on the whole line of coast, are more treacherous, cowardly, and unprincipled, than those of the interior; a atriking proof how little the natives have hitherto benefitted by the ir intercourse with the civilized nations of Europe while slavery existed. But the natives, near the British forts, are now receiving daily advantage and imj rovement from the residence and example of Europea is who are no longer, as formerly, engaged in the slave trade. Mr. President Maclean, the present excellent governor of Cene Coast Castle, has exirted himself with the most praiseworthy zeal and ability to wean the natives from many of their bar jarous customs (that of humali sacrifices, on the dea' $h$ of their kings and chicts in particular, which were formerly sometimes performed within sight of the castle walls), in which he has been eminently successfol, and for which he merits the thanks of every friend of humanity.

Mr. Sewell, who resided eighteen years at Cape Coast Castle, and who is now in London, says that he considers the ratives on the Gold Coast more remarkable for their humanity than for their ferocity. It is true that under the influence of religious fanaticism they perpetrate (although now but seldom) human sacrifices; but during the eighteen yenrs he resided on the coasi he scarely ever heard of a murder, or any other act of personal violence amongst the natives, and certainly lewer than amongst an equal given number of the inhabitants of any nation in Europe.

James Fort, Accra, belongs to the English ;-not quite a cannon shot to leeward lies the dismantled Dutch fortification of Crevecceur ; and about two and a half miles distant fron James Fort is situated Christianborg Castle, built on a promontory, and the chief settlement in Western Africa belonging to the Danes.

Cape Coast Castle was replaced under the management of the merchants in 1828. The forts are governed by a President and Council, according to certain rules and regulations agreed upon with govermment. The business in London is mannged by a committce of three merchants, appointed by government, and accountable to the Secretary of State for the due appliention of the funds, allowed tor the maintenance and defence ol the settlements, which is 3,500l. per annum. With this 8 mall sum 80 men are clothed, armed and maintained for the defence of the castle; the forts kept in repair ; the President's sulary, and all other expenses provided for.

The establishment for the support and maintennace of Cape Coast castle and Accra is-
Cape Coast Castle.-President of the council, treasurer, warelouse-hecper, and commander of the troop;s, per anmum, 400l.; secretary, accountant,
assistant warehouse-keeper and register, 200l.; ca; tain of the guard, adjutant, chief engineer and sur veyor, 200l.; surgeon, and superintendant of schuols, 200l.; 8chools, 100l.; 80 men , at 12l. per man 960l.; clothing; for ditto, at $2 l$. 108 , per man, 2001 , labourers, male and female, 400l.; extraordinaries including ammunition, presents, forts' repnirs, stationery, medicines, canoc hire, funerals, non-commis. sioned officers, messengers, \&e. $740 l$.

Accra.- Officer in charge of fort, per annum, 1000 . 12 men, at $12 l$. per man, $144 l$.; clothing, at $2 l$. $10 s$; per man, 30l.; labourers, 50l.; extraordinaries, in cluding ammunition, presents, forts' repairs, \&c. 1766.

Hume Estobitishment.-Secretary, and office rent 100l.; stationary, postages, \&c. . Total, 4,0001
The preceding charges are now reduced to 3,5001 . and yet with this trithing amount the forts are kept in a better state than when ten times that sum was laid out on them by the colonial authorities.
The main advantages arising from these forts is the power which they enable us to exercise for the suppression of the slave trade, and the security which they afford to our commerce, which increnses in propertion to the total auppression of the traffic in human beings. Mr. James Swanzy, an officer in the service of the late African Company of Merchants, stated in his evidence before a Committee of the House of Commons, on the 16 th June, 1816, that when he served on the coast, from the year 1789 to 1799 , the proportion of the slave trade, to the other trade of the coast, was at that period nine-tentlus of the whole trade.

In the same Committee, Mr. Swanzy (who had resided 10 years on the Gold Coast) was asked the following question :-of what nature is the accom modation which the Forts afford to trade? "Very great ; they open the communication with the interior; they are the depôts for goods; they protect the British subjects residing near them; by these incans the trade is collected, day by day, and a collection of three months is shipped in 24 hours, without which no ship could profitably trade to the Gold Coast, as she would otherwise be obliged to stay three montlis ut each point to collect the same quantity of goods. I would wish to add also, that these forts give an exclusive trade to a considerable extent to the British subject." Mr. Swanzy was asked whether the legitimnte trade of the Gold Coast had increased, or diminished, since the abolition of the slave trade (then only eight years ago) ; to which he answers, "I should think the Guld Coast produces 100,000 ounces of gold per annum: lloring the slave trade not more was collected than was sufficient for the currency of the country, and I think it may still be increased; it requires only exer. tion to increase it."

The late African Committee, in a letter to the Lords of the Treasury, correctly remark that, "Settle. ments on the coast of Africa are valuable on two grounds, as conferring an exclusive right of trade upon the power possessing them ; and second, as the only medium through which it can be safely and advantageously carried on." It is a lamentnble but certain tact, that Africa has hitherto bcen sacrificed to our West India colonies; her commerce bins beea confined to a trade which seemed to preclude all ndvantement in civilization; her cultivaturs have been sold to labour on lands not their own, while all endeavours to promote cultivation, and improvement in agriculture, have been discouraged by the government of this country, lest her products should interfere with those of our more finvoured colonies.
d register, 200l. ; cap) hief engineer and surserintendant of schools, ien, at $12 l$. per man, ll. 10s. per man, 200l;; 400l. ; extraordinarics, its, forts' repairs, sta. funerals, non-commis. . 7401.
fort, per annum, $100 \%$. $l$.; clothing, at $2 l$. 10 s . l.; extraordinaries, in. forts' repairs, \&c. 1761. etary, and office rent, c.

Total, 4,000l. now reduced to 3,5001 , int the forts are kipt in imes that sum was laid uthorities.
g from these forts is the to exercise for the sup. and the security which which increnses in pron of the traffic in human an officer in the service of Merchants, stated in nittec of the House of se, 1816, that when be year 1789 to 1799 , the 2 , to the other trade of nine-tenths of the whule
r. Swanzy (who had re1 Coast) was asked the at nature is the accom. afford to tracle? " Very ication with the interior; ; they protect the British fy these incansthe trade is ollection of three months put which no ship could d Coast, as she would firee months ut cach ntity of goods. I would forts give an exclusive to the British subject." her the legitimate trade sed, or diminished, since le (then only cight ycars I should think the Gold cs of gold picr annum: tore was collected than cy of the country, and 1 ; it repuires only exer-
tee, in a letter to the ly remark that, "Settle. a are valuable on two xelusive right of trade en ; and second, as the $t$ enn be safely and adis a Inmentable but ecrerto bien ancrificed to er commerce has been cemed to preclude all her cultivators have bot their own, white all tion, and improvement burnged by the goverilbrolucts should intervoured colonies.

## BOOK VII.-POSSESSIONS IN EUROI'E.

## CHAPTER I.-GIBRALTAR.

Section. 1. Gibraltnr promontory or peninsuln, three miles long, and seven in circumference, situate in 36.9 of north latitude, and 5.21 of east longitude, and forming the southern part of the eontinent of Europe, and the key to the Mediterrancan, is not the least remarkable possession of the British crown. II. The earliest accounts of this siagular rock are involved in fable, or clothed in the elegnnt fiction of mythology. The Greeks gave, it is thought, the term Catipe, Ka $\pi \pi \boldsymbol{\prime}$ ( Urnn) to the mountain by reason of its advancing into the sea from the main-land, like a hucket, and Calpe together with the neighbouring Mons Abyla, on the opposite or African coast, received the appellation of " Pillars of Hercules:" that demi-god of the heathens having been supposed to have cither crected pillars somewhere in the neighbourhood of the Strnits, or probably it was put forth that Calpe and Ahyln owed their creation to the vast strength of the Hereulean giant.

Whether the Phœnician navigators, Carthaginian merchants, or Roman conquerors ever settled on the "Rock," does not appear, and it is probable that the natural strength of the position was first noticed in the beginning of the eighth century, when the Saracens or Moors invaded and made themselves masters of Spain. The particulars of this extraordinary invasion would he out of place in a work of this nature, suffice it to say, that Tarif Ebn Zarca, a general under the Moorish sovereign or Caliph Alwalid Ebn Abdahmalic, landed A.D. 712 , with an army of 12,000 men, for the conquest of Spain, and gave orders for the erection of a strong castle on the face of the mountain, for the purpose of keeping up his communication with Africa-the remains of which at present exist, though its completion hore the date a.d. 725. From this period Mons Calpe took the nnme of Gibel Turif (hence Gibraltar), or mountain of Tarif, in compliment to the victorious Saracen general.
During the Moorish oceupation of the Spaniah territory, Gibraltar increased in importance, though its strength could not have been very great, as it was captured from the Moors with a small detachment of troops by Ferdinand, King of Cnstile, in the beginning of the fourteenth century ; the fortress remained in the possession of the Spaniards until a.m. 1333, whon Abomelique, son to the Emperor of Fez , who had been despatched to the nssistance of the Moorish king of Grenada, laid siege to Gibraltar, which after live months' attack surrendered to the Africans.
Alonzn XI., an ambitious and warlike prince, then on the throne of Castile, attempted the recapture of this important station five days after its re-occupation loy the Moors; hut Mahomet King of Grenada, joining Abomelique's forecs, so hemmed in the beaiegers as to compel them to raise the siege. In the beginning of 1349, Alonzo again attempted the conquest of Gibraltar, but his army was furced to retire on the death of the Castilian monarch, 24th March, 1350.

Until 1410 a.n. the descendants of Abomelique continued in quiet possession of Gibraltar, when Jusaf, the third King of Grenadn, availing himself of intes. tine feuds in the garrisnn, took possession thereof; but the Grenatian Aleaide was driven out by a revolt of the people in the ensuing year, and the Emperor of Morocco solicited by the inhabitnnts to take the fortress under his protection, accordingly he sent his brother Sayd to their relief, with 1,000 horse and 2,000 foot; the King of Grenada resolving, however, to repossess himself of Gibraltar, appeared before it in 1411, with a large fleet and ariny, and the Moroceo troops, after suffering great hardship were obliged to submit to the superior strength of their enemy.
In 1435, Henry de Guzinan, Count de Niebla, lost his life in an attack upon Gibraltar. The son of this unfortunate nobleman (John De Guzman, Duke de Medina Sidonia) was however, more suceessful in 1462 , having aided in the final capture of Gibraltar from the Moors, who had retained possession of the fortress for 748 years. Henry iV. of Castile and Leon was so rejoiced at the conquest, that he added Gibraltar to his royal titles, (Gibraltar had heretofore heen the chief city in the kingdom of Abomelique) and gave it for arms Gules, $n$ cnstle with a key pendant to the gate, or, (alluding to its being the key to the Mediterranean) which arms have been continued down to the present day.

In 1502 , during the reign of Ferdinand and Isabella, Gibrnltar was annexed to the Crown of Spain iustend of being under the control of the Duke De Medina Sidonia, but its strength could not have heen very great in 1540 , as we find Piali Hamet, one of larbarossa's captains, surprised and pillaged Gibraltar. During the reign however, of Chnrles $V$, the fortifications of the town were modernized, and from additions made by Daniel Speckel, the Emperor's engincer, it was thought to be impregunble.

While under the Government of Spain, Gibraltar was a place upon which divers kings of $S$ pain had bestowed specinl privileges on account of its present. ing the first point of attnek from the Moors of Barhary. Among other privileges by Ferdinand IV. and Alonzo XI., it was declared to be a place of refuge for all malefnetors, being a snfeguard and protection granted them not only while there, but a residence of a year conferred the snme privilege elsewhere. This protection, however did not extend to treason, to taking a man's wife from him, or to breaking a treaty made by the King; nor did the protection extend to those committing the above mentioned crimes within the territory.

Little further is known of Gibraltar until the year 1704, when Sir George Rooke, who had been sent into the Meliterranenn with a large Ileet to assist Charles Archiluke of Austria in recovering the crown of Spinin, finding nothing of importnnce to be clone, called a council of war on the 17th July, 1704, near

Tetuan, where, after several schemes were proposed (such as a second attack on Cadiz) and rejected, it was resolved to attempt the conquest of Gibraltar. On the 21st July, the flect arrived in the bay; 1,800 English and Dutch were landed on the isthmus under the command of the Prince of Hesse D'Armstadt; the governor was summoned to surrender, and on his refusal, a cannonade was opened on the town by the ships, under the orders of Admirals Byng and Vanderdussen. In five or six hours the enemy were driven from their guns, especially from the New Molchead, which the admiral wishing to possess himself of, ordered Captain Whitaker, with the armed boats, ashore; Captains Hicks and Jumper, however, first pushed ashore in their pinnaces, upon which the Spaniards blew up the fortifications, killing two lieutenants and forty men, and wounding sixty. Notwithstanding this slaughter, the British kept possession of their ground, and being now joined by Captain Whitaker, advanced and took possession of a small bastion, halt way between the mole and the town. The Governor being again summoned, thought it prudent to capitulate, for although the works were strong, mounting 100 pieces of cannon, well appointed with ammunition and stores, yet the garrison consisted of but 150 men , exclusive of the inhabitants; hostages were thercfore exchanged, and on the 24th July, 1704, the Prince of Hesse took possession of the gates of Gibraltar, after a loss on the side of the British,一killed, two lieutenants, one
 captain, seven lieutenants, one boatswain, and 207 sailors.

Gibraltar has ever since continued in the hands of the English ; not, however, without frequent attempts of their enemies to wrest it from them. For the sieges, \&c. see [Colonial Library, vol. vii.].

Until our occupation of Gibraltar, the following were the principal rulers:-1309-10, Ferdinand IV., King of Castile, took Gibraltar from the Moors, arid lived here a short time. The plate not of much importance before this time; 1331, Don Vasco Perez de Meyra was Governor; 1333, Abomelic, son of the Emperor of Fez, took Gibraltar, and added it to his royal titles; 1349-50, Albuhacen, son of Albuhacen (of Fez) was in possession of Gibraltar; 1427, Gibraltar was under the usurper and tyrant Muhomet, called the little; 1462, Don Juan de Guzman, first Duke of the House of Medina Sidonia, took Gibraltar from the Moors, and Henry IV. of Castile took the title of King of Gibraltar, us Ahomelic liad done before in 1333 ; 1462, Pedro de Porras was made Gnvernor by Henry, alterwards Don Bertrand del Cueva. The duke of Medina recovered it, and it was atded to his titles; 1502, Gibraltar was united to the crown of Ferdinand and Isaliela, nud hail Spanish governors till 1704; 1704, Marquis de Salinas, the Spanish governor.

Since the British conquest, the following is the succession of governors, commandants, \&c. of the fortress of Gibraltar, from 1704 to the year 1835 :Prince of Hesse, 1704 ; Major-gen. Ramns, Gov., 1705 ; Col Elliott, 1706; Gen. Stanwix, 1711; Colonel Congreve, 1713; Col. Cotton 1716 ; Major Battereau, 1718: Major Hetherington, 1719; Col. Kane, 1720 ; Lord Portmore, 1721 ; Colonel Hargrave, Commanding, 1722; General Clayton, 1728, General Sabine, Governor, 1730; Gen. Columbine, 1739; General Clayton, Governor, General Hargrave, Commanding, 1739 ; General Bland, 1748 ; Lord George Beanclere, 1751; Colonel Herbert, 1752; General

Braddock, 1754 ; General Fowkes, Governor, 1754 Lord Tyrawley, 1756 ; Earl of Panmure, Command, 1757 : Lord Home, Governor, 1758 ; Colonel Tovey, 1761 ; General Parslow, 1761 ; General Cornwallis, 1762; General Irwine, 1766; General Cornwallis, 1767; General Boyd, Lieut.-gov. 1769; General Cornwallis, 1769 ; General Elliott, Governor, 1777 Gencral O'Hara, Commanding, 1787; Sir Robert Boyd, Governor, 1791 ; General Rainsford, Com manding, 1794; General O'Hara, Goverıor, 1795 General Barnett, Commanding, 1802 ; Duke of lient, Governor, 1802; Sir T. Trigge, Lieut..gov. 1803 Gen. Fox, Lieut.-gov. 1805; General Drummond, Command. 1806; Sir Hew Dalrymple, Command 1806; General Drummond, Command. 1838 ; Sir J. Cradock, Command. 1809 ; General Camphell, I.ieut. gov. 1810; General Smith, Command. 1814; Gen. Sir G. Don, Lieut..gov. 1814; Earl of Chatham, Governor, 1820 ; Gen. Sir G. Don, Lieut.-gov, 182:; Lieut.-gen. Sir W. Houston, Lieut.-gov. 1831 ; Ma-jor-gen, Sir Alexander Woodford, Lieut."gov. I835.
III. Gibraltar mountain or promontory (forming witls that of Ceuta upon the opposite coast of Bar. bary, the narrow channel which connects the Atlantic Ocean with the Mediterrancan) is of an oblong form, in a direction from north to south two miles and three quarters, a brealth no where exceeding three-quarters of a mile, and with a circumference of about seven miles. The grentest length of the peninsula, from Forbes's harrier to the flag-staff of Europa, is 4,700 vards; the breadth, from the New Mole to the sea, at the hack of the Rock, 1,600 ynrds; from Europa Point, in the south of Gibraltar to Cabrita Point, on the Spanish side, (which two points form the mouth of the bay) 10,945 yards. The arca of Gibraltar and the adjacent neutral is thus s!ated:Neutral ground (including gardens, meatow and arable ground), 106 acres; North Glacis, three and a half acres; Convent grounds, two and a quarter; South Glacis, seven; Alamida and grounds to south barracks, thirty-thrce and threc-quarters; back of south barracks to upper houndary of Commissioners' garden, eight; gardens hehind the naval ufficer's quarters, as high as cultivation extends, twelve and three-quarters; north ditch, about one-quarter south ditto, one-quarter; farms up the hill, ten; Government grounds below Europa flats, three and a quarter; parterres and gardens attached to houses within the town of Gibraltar, 10: total, 197 acres, The summit is a sharp, craggy ridge, running from north to south, the greatest elevation heing to the southward, where sugar Loaf Point rises to 1,439 feet above the sca level; Rock Mortar, the highest point to the northward, is 1,350 feet, and Signal House, the central point between the two, has an elevation of 1,276 fect.

The promontory is unequally divided by the ahove mentioned ridge, the side next to the Mediterranean being narrower and much steeper thmin that next the bay, on which stanuls the town and fortifications. The west side of the mountain is a series of rugged slopes, interspersed with abrupt precipices; the east mostly consists of a range of precipices, but a bank of sand, rising from the Mediterrancan in a rapid acelivity, covers one-third of its perpendicular height; the southern extremity of the promontory falls in a rapid slope from the Sugar Loaf summit into a rocky flat called Windmill llill, forming half ant oval, and bounded by a range of precipices, at the southern base of which a second rocky flat takes place similar in form and extent to Windmill Hill, and alsa like

wkes，Governor，1754； f Panmure，Command． ，1758；Colonel Tovey， 1 ；General Cornwallis， ；General Cornwallis， t．－gov．1769；General lliott，Governor， 1777 ； ag，1787；Sir Rohert neral Rainsford，Com． Hara，Governor，1795；万， 1802 ；Duke of Kent， gge，Lieut．－gov． 1803 ；General Drummond， Dalrymple，Commani Zommand．1838；sir J． eneral Campbell，Lieut． Command． 1814 ；Gen． ：14；Earl of Chatham， ，Don，Lieut．－gov，182：； Lieut．－gov． 1831 ；Ma－ ord，Lieut．－gov．183．j． r promontory（forming opposite coast of Bar． ieh connects the Atlan． anean）is of an ohlong rth to south two miles th no where exceeding with a circumference of itest length of the penin－ the tlag－staff of Europa， from the N（w Mole to Rock，1，600 yards ；from of Gibraltar to Cabrita （which two points form 945 yards．The area of neutral is thus stated：－ ；gardens，meadow and North Glncis，three and ads，two and a quarter； da and grounds to south hrec－quarters；back of ndary of Commissioners＇ bind the naval ufficer＇s tion extends，twelve and ch，about one－quarter； farms up the hill，ten； Europa flats，three and a lens attached to houses r， 10 ：total， 197 acres． ggy ridge，running from elevation heing to the af loint rises to $1,+39$ ock Mortar，the highest 1,350 feet，and Signal etween the two，has an
lly divided by the above It to the Mediterranean ecper than that next the own and fortifications． $n$ is a series of rugged upt precipices；the east precipices，but a bank of ranean in a rapid aceli－ －perpendicular height； e promontory falls in a paf summit into a rocky ming halif an oval，and －ipices，at the southern flat takes place sinilar ，nill Hill，and also like
it surrounded by a precipice，the extreme sonthern ternination of which is washed by the sea and called Europa Point．The northern point of Gibral－ tar is connected with the main land and is perfectly perpendicular，except towards the north－west， where what are called the Lires intervene，and a narrow passage of flat ground that leads to the low， flat，sandy isthmus，or neutral ground，the greatest height of which above the level of the sea，does not exceed ten feet；its breadth near Gibraltar， 950 yards；about midway to the garrison， 1,200 yards； and near the Spanish Lines，（which are 1，650 yards from the outworks of Gibraltar） 1,750 yards．The shape of this isthmus，which has Gibraltar Bay on the west and the Mediterranean Sca on the east，is irregular，the sand extending considerably beyond the Spanish Lines，both on the Mediterranean and Bay sides，so that its circumference may be estimated at eight to ten miles．
Gibraltar Bay，situate on the west side of the mountain，is ncarly eight miles and a half long，and in breadth וupwards of five；the circumference being between 30 to 40 miles．［ $A$ minute deseription of the fortress and adjacent coast，in Colonial Library， vol．vii．］

In 1783，the total number of guns serviceable in the garrison，consisted of 663 pieces of artillery，as follows：－

Comnom．－Thirty－two pounders，77；24 and＂26 ditto， 149 ； 18 ditto， 113 ； 12 ditto， $74 ; 9$ ditto， 16 ； 6 ditto， 31 ； 4 and 3 ditto， 61 ．Total， 521.
Morturs．－Thirteen inch，29； 10 ditto， 3 ； 8 ditto， 13； 5 and 4 ditto，65．Total， 110.
Honitzers．－Ten inch， $19 ; 8$ ditto， 9 ； $5 \frac{1}{2}$ ditto， 4. Total，32．Grend totnl， 663.

There are now more than 1,000 guns mounted．
The strects of Gibraltar，which were formerly in a most deplorable state，are now well paved，lighted， and cleansed，and extensive improvements are daily going on．Many of the narrow streets have heen widened，several alleys entirely removed，and free ventilation promoted by all possible means．

IV．Gibraltar（aecording to Major Imrie and Dr． Hennen）is composed clicfly of a rock of grey，dense primary marble，the beds or strata of which are of various thickness，from 20 to upwards of 40 fcet， dipping from east to west at an angle of ncarly 35 degrces．［Sce vol vii．Colonial Library．］
V ．The Andalusian atmosphere has long been celebrated for its salubrity，and with some excep－ tions，of late years the climate of Gibraltar is deci－ dedly healthy，except for hard drinkers and phleg． matic constitutions．＇lhe temperature is decidedly warm，the hottest months being June，July，August， and September；and the coldest Dccember，January， and Febutury．Snow rarely falls，and ice is seen no thicker than a dollar；and the mercury ranges from $83^{0}$ in July，to $50^{0}$ in January：but the winds and the rain affect more aeutely the animal frame than the solal hent．From 1816 to 1827，the greatest height of the barometer was $30^{\circ} 90-100$－the lowest $28^{0} 62-100$ ．Hail oceasionally falls with much vio－ lenee，and is generully nccompanied by a thunder． storm，not unfrequently preceded by brilliant light－ ning，corruscations and falling atars，and other meteo－ ric phenomena are observable．In 1753，a fire－hall shot over the rock with prodigious swiftness，in a dircetion from W．to $E$ ．，and after the space of a minute and a－half，exploded with a very loud report． In a period of ten years，from 1816 to 1825 ，the num． ber of rainy days in each month was－January，91；

4 c

February， 71 ；March， 62 ；April， 101 ；May， 61 ； June， 18 ；July， 4 ；August， 9 ；Septwaber， 29 ；Oc－ tober， 57 ；November， 95 ；December， 88 ．Total， 686.

But although the greatest number of rainy days is shewn to have been in April，the quantity of rain falling is greatest in January．The beaviest rains are accompanied with south－east winds，those from the south of east being raw，black，and bleak，and termed a＂genuine Levanter，＂dislodging numerous masses of rock，which roll down the hill with prodigious violence．

Winds are divided into east and west；the dura－ tion of each may be scen by the following meteorolo－ gical records from the books of the principal medical officer＇s office：－

Winils from 1810 to 1815.
In 1810，wind E． 164 days；W． 194 daya；Var． 7 days．

The casterly winds are most prevalent in July， August，and September，and wasterly in December， January，and May．It is probable，from the observa－ tions of Ayala，Mr．Carter，and others，that the easterly winds prevailed formerly more extensively than at pre－ sent，and that Gibraltar，like other places，has ex－ perienced a great change of climate；how far the latter and the rains affect the health of the troops in this in－ portant garrison，is a point of the utmost importance．

Memoranda relative to mortality from yellow fever at Gibraltnr in five years in which it has appeared， since 1804 irclusive．

1804．－Military（including officers），869；civilians， 4，864．Total，5，733．

consists of males，7，419； 08．Of whom 10,122 ant s，and 4,886 resident aliens． mong the poorer classes 1 ： ng the aliena：the bowe have a filthy appearance： omposed of flimsy blanket．
ing，with a hood and sleeves for wet weather；loose cotton drawers，open at the knees，the legs bare，the feet in clumsy slippers，and skull－cap of greasy wol－ len；this garh is frequently worn night and day until it drops to pieces．Provisions，such as beef，mutton， lamb，\＆c ，procured from Spain or Barbary，are good， but rather high priced；fiah is plentiful，but the chief dish of the lower orders is called gespacho，and is composed of water，vinegar，oil，capsicums，garlic， and salt，into which bread is broken ：all the family sit round the bowl，each peraon helping himself with a wooden spoon．The usual beverage is Spanish wine， from Malaga and Catalonia．
VII．Churches，Livings，\＆sc．，of Gibraltar in 1836. ［B．B．］Gibraltar－1，414 Protestant population； value of living，300l．per annum and $100 l$ ．allowed for house rent ；church situate on the Line Wall；will contain $1,0.48$ persons；number of persons generally attending，frum 900 to 1,000 at 11 o＇clock and less than half that number at six o＇clock；chapel situate at the convent，and will contain about 300 ．The chapel is at present closed．Dissenting places of Worship－one Wesleyan Mcthodist chapel，and four Jewish synagogucs．

One Roman Catholic Church，called St．Mary the Crowned，at Gibraltar；Catholic population by the late censua，11，900；value of living，100l．per annum from goverıment and $200 l$ ．from funds of the church arising from fces on baptisms，\＆c．；the church is situated in the main street of Gibraltar，and，when completely full，will contain 2,500 persons；number
of peraons generally attending，about 10,000 ．There is no chapel properly so called．For the accominuda． tion of the troops and inhabitants of the South Dis－ trict，a room is rented in which divine service is performed．This room will with difficulty contain ahout 70．As will be seen from the foregoing return， the church is quite inadequate to contain the whole congregation at one time．Service is therefore per－ formed acveral times in the course of the day，by which means the inconvenience is in a great measure though not wholly got over．

A spacious Protestant church has been erected within the last few years，and a Proteatant chapel，in the building called the Convent，the residence of the Governor or Lieutenant Governor ；also a Roman Catholic Church within the walls of the town，and a small Roman Catholic Chapel in the district called ＂The South；＂the clergymen being generally Genoese． There are four Jewish synagogues．

VIII．Of public schools there is one small garrison school，and also regimental achools in each of the corps atationed in the fortress；the numbers attend． ing being 176 males，and 138 females；total， 314. A school for children of different persuasions；the number in 1835 being about 1,200 ．

The public library at Gibraltar is one of the finest in Europe；the patriotic Colonel Drinkwater may be considered its founder，in 1793．The medical library， as also that founded by the merchants，are of more recent origin．

Schools，\＆c．of Gibraltar in 1836．［B．B．］

| 苞 | Public or Frce School，and where situated． | Salary of Schoolinaster or Schoolmistress． | No．of Scholars． |  |  | Mode of Instruction． | How aupported， and Amount of Contribution． |  |

＊The house is granted by Government for the purposes of the school．There are also cight private schools in Gibraltar．$\quad+$ This school was inatituted on the Ist January，1836，with a view to combine with religious inatruction and general education a diffusion of the knowledge of the English language among a very large claas of the population heretofore unacquainted with it．For this purpose，it was necessary to provide masters from England，which，with the expense necessarily attendant on the formation of a new establish－ ment，occasioned an outlay greatly exceeding the sum mentioned in the foregoing return．These expenses， as well as the current onea of the school．were defrayed by an extraordinary voluntary collection．
$\ddagger$ The scveral regimental schools provided for according to his Majesty＇s regulations，are under the inspec－ tion of the chaplain of the forces．

IN. Numher of Prisoners in the Gaols of Gibraltar throughout the Year since 1828. [13, B.]

X. The chief administration lies in the Governor, who is of course the commander-in-chiof of the troops: and the settlement is treated as a garrison town. The laws of F'gland are genernlly npplied at Gibraltar, and the Charter of Justice of 1830 provides that the courts shall administer the law ns nearly as may be necording to the practice of Wistminster linll.
Matitury Estabhishment of Giburaltar.-Major-genern, aide-de-camp, colonel of engineers, nssistant milithry secretary, town major, town adjutant, garrison quarter-haster, garrison chaphain, provost marshan; 1 company of sappers and miners, 5 companies of royal artillery; 5 regiments of the line at present, but subject to variation. Ni,r is the regular peace estal)lishment at the present strength of regiments.
The following table shows the military strength of the garrison for cighteen years.
Return of the Numbers nuid Distribution of the Effective Force, (thiecrs, Non-commissiomed ollicers, and Rank and Fild of the llritiol Army at fibratiar, In each jear slues 1sis, Including Artillery and Engincers.

* Exclusire of two regiments detached to Lishoo, and includiag one fron Malta.
XI. The Revemue of Gibraltar is raised by means of the following tates:

Hhorfage Toll-On all wines and spirits, stroms waters or cordials, landed or introwlued mto the garrison, per butt, Is. If. : one maiety of which to le remitial as trawhek on re-exportation. On all to. haceo lnoded or introduced into the garisun, Hd, per ewt. or per hogshead, 4s. th.; one moiety of which to be remitted as draniback on re-exportation. In case of dispute as to weight, to be weighed at the expense of the merehant.

Dutirs on Hïuss.-On all wines consumat in ta. verns, wine honses, cnntecns or oh her pullic honses, per gallon, did.; ganging do. do. 04.4.; total per gal. ton, 41d.

Spirits, Strong Hiaters amid Cordials, intemdet for comsumption in the Garrison.-Fior every gallon of such spirits, stromg waters or cordinls, of any streneth not execoling the strength of proot is Sykes's str. drometer, and so in propmortion bir nuy grater stecaphth than the strength of proof, and for any greater or less quantity than a gullon, $2 \mathrm{~s}, 2 d$; ; gauging fee per callou, 012d.; totul per gallon, 2s. 22d. A proportion of six gallons of spirits to cheh pipe of wine is allowed free of duty for the purpuse of infusion, under the superintendenee of an oflicer belonging to the reverue department.
Storurere on Iİines and Spirits.-On every botasso or large butt, 5 rs. or 1s. 10d.; on every pipe, 4 s.
 consk, I r. or 4td., to. Is gallon harrel, 10 dts. or 23d.; do. Dmuijohn, 10 gts. or 23.d.; do. hampur containing sit bottes, 2 is. or sidt, ; do, casceng. taining 12 do. 8 yts. or $2 t i d$; do. do. 22 do. 2 ms . or $\mathrm{a}_{3} 3$.

Auction Fers.-On all goods sold by nuction, allow. ing $\frac{1}{1}$ per cent. to the auctioner, $2 \frac{1}{2}$ per cent.

Hidishme fres.-On nll spices per cowt. Aldi; oil nud other fine merchnndize ler dio $22_{2} d_{1}$; coarse goods per ewt. 1d.; grain, and neticles of mensurement per tancga, $0 \frac{1}{2}$ d.

Duties amd Pers, on Licemses and other Police Naten. -Ries on Daruments relating to Crown property asi issued from the Crom Lamd Office.-Original grant $\alpha$ ground under seal on paper, fil. 18s. Nel.; transferce partition or contirmation of ditto, 33.95 s . W. ; ap proval of a deed of mortgage, 31.93 . 4d.; new lexk, 61. 18s. 8 $l$.

naries, 37,294l.; commissariat pay, 1,5681. ; advances 69401 .; consignments of specie, 20,8411 .; hospital supplies, $465 l$. ; total, $114,864 l$.
XII. The trade of Gibraltar has been of the utmost value to England during her wars, and it is still of considerable importance. Shortly after its capture in 1704, the settlement was wisely made a free port by Queen Anne, and it soon became a most valuable entrepot for the distribution of British manufactures to the Barbary states, and to the different countries bordering on the Mediterranean. Progressively increasing, Gibraltar became at length the centre of commerce, which, considering the number of inhabitants, was perhaps without its equal in the world. An idea of the extent to which it was carried may be judged from the fact, that in one year the value of British manufactured goods imported into Gibraltar direct from England, and exclusive of colonial produce, was nearly $3,000,000 \mathrm{l}$. sterling I And during the last war, it is important to add, that Gihraltar was the moat abundant and never-failing source for the supply of the British army with cash. Various circumatances have occurred to diminish the trade of Gibraltar; among the most prominent are the creation of a free port at Cadiz, the establishment of manufactories in the eastern parts of Spain, and the varioua royal orders of the Spanish Government, which place Gibraltar almost in a state of commercial non-intercourse with Spain, under the plea of preventing smuggling into the provinces adjacent to the fortress. Gibraltar affords indeed a good illustration of the value of our transmarine possessiona; for at first sight " the Rock" might be considered a useless appanage of the British Crown. It has no soil on which the enterprising emigrant may settle and by prosperity consume double or treble his heretofore supply of English manufactures (such as our N. American and Australasian colonies) ; and it possesses no tropical products (such as the E. and W. Indies), but by its commanding position it gives security to the whole of our trade with the Mediterranean and adjacent coasts of Spain and Africa equal to what twenty ships of war could afford; and it is the entrepot of a trade in itaclf valued at more than a million sterling
a-year, and employing annually ncarly half a million tons of shipping inwards and outwards. In 1830, the value of produce of the United Kingdom Imported was 988,2346 ., and of Colonial produce 129,3814 . total, $1,117,6141$.

The fo"?nwing table will convey some idea of the trade of the purt as a depot for the sale of British manulactures:

The Spanish quintal of $100 \mathrm{lb} .=101 \frac{3}{4} \mathrm{lbs}$. English.
XIV. Gibraltar is not the harren rock that has heen supposed ; Colonel James mentions the names of 310 different trees and plants growing on the promontory. Several kinds of fruits are cultivated, and the vine and fig flourish in exuberance; after rains vegetation is richly luxuriant. The olive, almond, orange, lemon, and indeed every tree planted in a proper spot, thrive on Gibraltar ; in the naval garden in the south are some noble date trees; the prickly pear runs wild, the aloe abounds, and the palmetto was formerly plentiful. Geraniums of almost every species grow in the utmost profusion, and a great varicty of wild and uncultivated plants and herbs are found in every part of the mountain. Among the natice fruits brought to market are seven or eight kinds of grapes, figs, oranges, lemons, ponsegranates, almonds, apples, peaches, plums, apricots, (vulgo "Kill Johns") cherries, strawierries, \&c., and potatoes, cabbages, onions, cucumbera, artichokes, tomatas, peas, kidney beans, apinage, lettuces, radishes, \&c. \&c., are produced in abundance. During the latter part of the last siege, the quantity of vegetables grown was sufficient for the supply of the garrison, and the quantity of garden ground is now augmented. Different kinds of fishes are hrought to market, in former times the bay was so celebrated for its fishing of tunny and salmonettas that coins were struck in which these fish are represented. [See Colonial Library for a specific description of all the fish usually taken.]

Munufactures, \&.c. [BB. 1836 .-The garrison is indebted to Messrs. Duguid and Co., for the erection of a steam mill, for grinding wheat, sufficient "or the consumption of the troops and inhabitants.
'The engine is of 14 horse power, on $t$ satest and most approved principles, it is calculated $n$ work 6 pair of stones of $\mathbf{4}$ fect diameter, and can $w_{\text {L }}$ h ease deliver ground, clcaned and dressed from 35 to 40 quarters of wheat in 24 hours; more might be produced in cases of emergency, but the quantity mentioned exceeds what the persons concerned in the mill expect to sell for the supply of the place, to which their attention is almost entirely confined.

The soft wheat hitherto ground by the mill, has been the produce of the Baltic ports, Weismar and Danzig, and this class is preferred by the military and British inhabitants. The hard wheat, ground, has been the produce of Tagauroe, Volo, Sicily and Morocco, and this class is much preferred by the Italians, Spaniards, Hebrews, and most of the foreign inhabitaints. The labour and consequent expense is considerably more in grinding the hard wheat than the soft. The prices at which the mill flour has been sold, since the commencement of the establishment have varied from 5 to $6 \frac{1}{2}$ dol. per barrel of 196 lbs. net weight, wholesale and retail ; the mill not selling a smaller quantity than 14 lbs . United States fiour could not now be imported of a quality equal to that made at the mill to sell under $10 \frac{1}{2}$ dol. to 12 per barrel, the last year however has been one of great scarcity in that country, but I may say for many years past, flour could not be imported to sell under $7 \frac{1}{2}$ to 8 dol. in Gibraltar. The quality of the mill flour depends of course upon the quality of the wheat, as it is now perfectly demonstrated, that the machinery works admirably, and experience is daily benefitting this quite original undertaking in Gibraltar, from the cleaning and separating the grain to the final dressing of the flour ; the pastry cooks and hakers, consider, and pronounce its quality to be quite unexceptionable, and as the supply is constant of fresh ground, and at unexampled moderate prices, the proprictors fiatter themselves, the enterprize will prove a great public benefit, without their being individual sufferers. It is not undeserving of remark that the benefit is fully verified to the garrison by the ample supply of bran, for the cattle, which formerly was entirely imported from S pain, and is now as part of the produce of the mill, ahundant, at less than half its former price.

Market Pricen of Provisions in January 1835, in Gibraltar, Malta and Corfu.

## CHAPTER II.-MALTA AND GOZO.

1. Malta, and its adjacent island of Gozo, are situate hetween Sicily and the African coast, in the mouth of the great bay formed by Cape Bon and Cape Razat, in the parallel of (i. e. Valetta, the capital) 35.54. north, and the meridian of 14.34 . const, the most southerly island in Europe.
2. This island was known eighteen hundred years ago under the name of Melite or Melita, Iliny and Strabo both mentioning it under this denomination, and there is no doubt that Melita, and not an islet on the Illyrian shore of the Adriatic, was the site of St. Paul's shipwreck. It appears to have been at one period a Carthaginian colony, when this singular people held such powerful sway in the Mediterrancan; but whether it was the island mentioned under the appellation of Hyperia (by Homer in the Odyssey) and Ogygia, is doubtful.
The Phocnicians landed, it is said, on Malta about 1519 yeara before Christ, and the navigation of the Mediterranean belonging at this period to that commercial people, they formed a colony there which soon rose in trade and wealth. Whether Malta was inhabited previous to the landing of the Plonicians is doubtful; according to the fabulous history, it was originally tenanted by the Phaacians (qu. Phonicians), a race of ginnts. After being in possession of the island for upwards of seven centuries, the Greeks, 736 years II . c. drove out the Ploenicians settled on the island, and called it Melitas.

Both the Phonicians and the Greeks, while in the possession of Malta, erected extensive buildings, and struck different coins, the relics of some of which are still extant.

About 528 years B. c. the Carthnginians disputed the dominion of Malta or Melita with the Greeks, and it was for some time divided between these two powerful nations; the latter were, however, finally compelled to abandon the island to the Carthaginians, under whose swny it grew into such magnitude and wealth as to excite the cupidity and enterprize of the Romans in the first Punic war, where it was plundered by Attilius Regulus, and seized upon by Cornclius. The Romans, however, were soon expelled from the island, and only recovered it after the naval victory gained by C. Lutatius Catulus, 242 years B. c., when a peace was granted to the Carthaginians on the hard condition of their giving up to the Romans all the islands in their possession between $A$ frica and Italy. The Romans were justly proud of their acquusition of Melita; they took every preeaution to gain
the attachment of the resident Greek and mixed population, permitted them the continuntion of their ancient customs, and made it a municipium, allowing the inhabitants to be governed by their own laws, under a pro-prator dependent on the pratorship of Sicily.

The commerce and manufactures of the island were sedulously encouraged; the cotton and linen cloths of Melita were so famed tor their fineness nud the skill with which they were prepared, as to be regarded at Rome as an article of luxury. Great attention was paid to improving and beautifying the settlement, and the inerchunts and the sailors were then wont to repair to the temples to offer incense to the protecting gods of the island and its trade. On the division of the Romnn empire, the island of Malta fell to Constantme, but the fends of religious dissensions occupying all parties, the Romans in their colonies, as well as at home, felt the desolating inroads of barbarism. The Vandals scized upon Sicily in 454 A. D., and next took possession of Malta, whence they were driven ten years after by the Goths. Uuder the Goths and Vandals the commerce of Malta perisbed; it was, however, partially revived under the reign of Justininn, who sent Belisarius to wrest Africa from the Vandals. Belisarius Innded in Malta a. n. 553, and reunited it to the remnant of the cmpure, but not being allowed the immunities previously granted by its former masters, the island never entirely recovered its ancient splendour.

Malta became now a prey to teuds and disscasions, and for three centuries from the reign of Justaian we are ignorant of the events which mark its hi tory. About the year 870 A . w. the inhbbitants calld in the Arahs, but they were driven out the same year by the bravery of the Grecks, who from thence remained indisturbed masters for 3.4 years; but the Arahs again descenited in great force, exterminated the Grecks, sold their wives and children for slaves, and established a government, dependent upon the Emir of Sicily. The name of Nelitas was then by the Arnlos corrupted into that of Malta. 'To supply the deficiency of tnxes which the Arabs would not leyy on the Maltese, the former fitted out piratical cruisers, fortified the city of Notabile, built a fortress on the site of the present castle of St. Angelo, and enriched Malta with the plunder aequired on the sea. The Arabs, in their turn, were also drisen out of Malta by the Normans, A. d. 1090, under Conat Roger, who established the popular council, which
fd. per lb. ; rice, 17s, 4l. - per cwt. ; tea, 2s.781. per cwt. ; salt, 4id. per 4d. per pipe; Madeira, y, 34l. 13s. 4d. per pipe; pe ; brandy, 17l. fis. 8 d . - per hghd.; tobacco,

ent Greck and mixad pro he continuation of their t a menieipium, allowing rucd by their own laws, ent on the pratorship of
factures of the island were cotton and linen cloths of ieir fineness nud the skili red, as to be regarded at ury. Great attention was ifying the settlement, and irs were then wont to reincense to the protecting rade. On the division of and of Malta fell to Conreligious dissensions occuans in their colonies, as solating inroads of batbaupon Sicily in 454 A. D., Malta, whence they were the Goths. Under the merce of Malta perished; revived under the reign llisarius to wrest Africa fus landed in Malta A. n . remnant of the empire, e immunities previously ers, the island never chplendour.
to leuds and dissensions, $n$ the reign of Justuman s which mark its hi tory. the inhubitants called in riven out the same year ks , who from thence re. s for 34 years; but the great force, exterminated and children for slaves, int, dependent upon the f Melitas was then by the Malta. To supply the ac Arabs would not lery fitted out piratical crus. ahile, built a fortress on cof St. Angelo, and ender acquired on the sea. were also driven out of D. 1090, under Count popular council, which
was composel of clergy, nohles, and people freely elected. The island was afterwards given up to the Germans, on account of the marriage between Constance, heiress of Sicily, and Henry VI., son of the Emperor Frederick Barbarnssa. Malta was erected into a county and marquisate, but its trade was now totally ruined and for a considerable period it remained solely a fortified garrison.
Malta remained for 72 years subject to the emperors of Germany ; and Charles of Anjou, brother of Louis IX., King of France, on becoming King of Sicily, made himself master of the island. On the change of sovercigns in Sicily, after the well known affair of the scillian vespers, Malta continued faith. fil to the French, hut was soon conquered by the King of Arragon, who, as well as (his successors in the supremacy in 1414) the Kings of Castile, ceded it in title of fief to some favourite of the monarch or servsnt of the crown.
The Maltese at this time behcld themselves twice mortgaged for sums lent to their princes; they, therefore, always jealous of their liherty, made a nohle effort to retrieve themselves from this thruldom, by twice paying 30,000 fioring of gold (a large sum in those days), for which the island was pawned. King Alphonzo, therefore, A. n. 1428, declared and promised that in future Malta and Gozo should never be separated from the kingdom of Sicily. Alphonzo permitted, also, the inhabitants, in case of a breach of promise, to oppose him by force, without such conduct being deemed rebcllious.

Charles V., with a view towards commanding the Mediterranean, and to secure the coast of Sicily, became master of Malta; and aware of its great advantages, and that he might be saved the expense of its garrison, while at the same time he might prevent his European enemies from making a descent on the possession, located the order of St. John of Jerusalem at Malta, who being driven from their principal place of residence, Rhodes, were glad to accept the aid of a powerful prince, who in 1530 A. D., granted Malta, Gozo and the city of Tripoli, in perpetual sovereignty to the knights.
For a history of the Knights of St. John and of Malta, during their occupation of the jsland from 1530 to 1798, when it was forcibly occupied by the French under Napoleon, see my " History of the Colonies" and "Colonial Library." It will suffice to mention here, that the Maltese rose en masse on the 2d Sept. 1798, against the French troops (6,000 men) then in Valetta. A small detachment of British troops aided the Maltese blockade of the garrison in the beginning of 1800, and on the 4th September 1800, the French capitulated to the combined Maltese and British troops.

Malta has ever since formed a portion of the Brjtish empire. Mr. Cameron was first appointed Civil Commissioner, and was succeeded by Sir Alexander Ball, who died in 1809; General Sir Hildebrand Oakes, was Chief until 1813, when Sir Thomas Maitland arrived; Sir Thomas died in 1824, and was succecded by the Marquess of Hastings, his lordship died in 1826 ; and was succceded by General Sir Frederick Ponsonby, who died in 1836; the present Governor is Major-General Bouverie.
III. The island was formerly placed by all geographers in Africa, but was declared to be in Europe, as regards the service of our soldiery, by a British Act of Parlinment. It is the most southerly island in Europe, the parallel (Valetta Observatory) being in $35^{\circ} .53^{\prime}$. north, and the meridian $14^{0} 30^{\prime} 35^{\prime \prime}$ east of

4 p

Greenwich. The ahape is an irregular oval, which has been compared by some to a fish-its southern aspect resembling the back, the bay of Marsa Sirocco the mouth, the various indentations on the north aspect the ventral fins, and the deep indentation of the bay of Melleha, with a corresponding indentation at the back of the island, the tail; the island, in fact, stretches east and west, and is much indented with bays and inlets of the sca on the side which corres. ponds with the coast of Sicily, whlle that which looks towards the African coast is nearly a continual curve.

The extreme length of the island is stated by Dr. Hennen at 18 to 20 miles, and its greatest breadth from north to south 10 to 12 miles, and circumference 60 to 70 ; but a chart of the islands under the British crown, furnished me from the Colonial Office, makes the extreme length sixteen and three-quarter miles, extreme breadth nine, with an area of 95 square miles (another estimate will he found under the head of agriculture). The official document makes Gozo (the island adjacent to Malta, and under the same government) nine and three quarter miles extreme length, five and one-third breadth, with an area of 27 square miles. The following, according to Captain Smyth, are the bearings and distances between several points on the south coast of Sicily and Malta: from Cape Passaro to Valetta, south 33.41. West, 56 miles; Alicata to ditto, 21.55. east, $75 \frac{1}{2}$ miles: Terra Nova to ditto, 10.40 ., 70 miles; Girgents to ditto, $\mathbf{3 0 . 0 3}$., 90 miles; Sciacca to ditto, 35.51., 118 miles; Cape Granitola to ditto, 42.32., miles; Maretimo to ditto, 42.45., 173 miles. Malta is distant from Capic Passaro, the nearest point of Sicily, north, 56 miles, and Cape Bon, the nearest point of the African continent, is almost 200 miles distant in a south-west direction. It is bounded on the east by the island of Caidia, on the west by the islets of Pantelleria, Linosa, and Lampedusa, on the north by Sicily, and on the south by Tripoli. The sea dividing Malta from Sicily is only 80 fathoms deep in the middle or deepest part, very shallow in other places, and the bottom sandy: it is called the Canal of Malta, and is generally rough, with strong currents setting through it on the north-west side towards the east-south-east, and on the east-southeast side towards the east. Gozo lsle, originally known under the name of "Gaulos" by the Greeks, "Gaulum," by the Romans, and by corruption in the Arabic language " Gaudese," which in process of time was Italianized into Gozo (pronounced Godso), is situate on the westward of Malta, distant from thence in its nearest point about three miles, though some parts of the strait is five miles broad. In the channel lies the small islet of Comino, formerly called " Hephostia," of an oblong shape, and about five miles in circumference, with a still smaller islet or rock called Cominetto, off its north-west extremity. Malta, comparatively speaking, is low, the highest land being estimated at no more than 1,200 fect above the level of the sea, and cannot be discerned until the mariner approaches within 20 to 30 miles of the shore. The hill and dale surface is beautifully diversified, and the natural industry of the Maltese has converted an apparently barren rock into a very picturespue country. As a general feature, it may be observed, that the island is furrowed with vallies running from south-west to north cast, parallel to each other, and becoming longer and deeper as they extend from the eastern and western extremity. One, termed Melleha, nearly divides Malta into two parts; the most fertile, however, is the vale, which forms at its lowest extremity the Port of Valetta.

A small range of hills and craggy rocks, called the Ben Jemma Hills, bearing a north-west direction from Valetta, stretch across the entire hreadth of the island, and from these different spurs branch off, giving variety to the landscape. The southern shore consists of high or shelving rocks, without creeks or ports, or where a landing could be effected. To the east there is the port of Marsa (Marsa, in Arabic, signifies port or harhour) Scala, and towards the sonth-west that of Marsa Sirocco, capable of containing a great number of vessels. Ont the west there are two bays, called $\Lambda$ ntifaga and Magiarro.
The port of St. Paul is on the coast opposite Siclly, and ia so called from a tradition that the vessel in whlch St. Paul was sent prisoner to Rome was driven in thither by a storm. St. George's Port, towards the north, is not far distant from that of St. Paul ; St. Julian's Bay is on the same shore. [For the topography of the island, and a description of its forts, \&c., see "Colonial Librar!, Vol. VII.]

Gozo (or Gaudisch, as the natives call it), as before observed, is separated from Malta by an arm of the aea, four to five miles wide; with an average length of eight miles, six broad, and $20 \ln$ circumference; although fertlle and thickly inhabited, it contains no town, the inhabitants being scattered in six villages, protected by a strong fort, Rabato, in the centre of the island. The surface of the island it very agreeeably diversified with hill and dale, som : of the more elevated parts in the north-west heing nearly 2,000 feet above the sca. A chain of these elevations encircle the island, embracing a heautiful series of fertile vallies, separated by gently rising grounds; the summits of some of the mountains are flattened, and form truly table lands; others are rounded or mammillary ; and there are four or five remarkably detached hills, perfectly conical in shape, and presenting the appearance of old volcanic productions. The interior of the island and its shores abound in caves and rocks, being of the same calcareous nature as those of Malta, but the country ia much more rural and agreeable.

Fort Chambray, commenced in 1749 , contains the princlpal accommodation for troops; it lies on the south-east side of the island, and is built upon an elevated promontory, forming one side of a little bay in which the Malta hoats anchor; the shore all round is very bold especially to the south, where it rises into rugged and inaccessible cliffs, with huge masses of rock broken off from them and projecting into the sea; the road gradually winds from the sea to the fort (which is 500 fect above the slone) after a circuit of about 700 yards; the area on which this tortification is built being about 2,500 feet in circmonfence. The barracks accommodate 250 men , are admirably arranged, and there is a sinall but excellent hospital attached.

The oblong islet of Comino, two miles in length, lying between the larger islands, has a few inhabitants, employed in cultivating about 30 acres of land, and lo preserving the numerous rablits.

Besides Cominotto, which lies off the north-west end of Comino, there are four or five other islets, or rnther racks, helonging to Malta and Gozo. On the sonth const of Malta is Filfosa, or Filifi, which contains, it is said, an ancient parish church; nearer the shore, and inore to the eastward, is a rock called the Pietra Nera; and at the morth-west end of the Island, towards Gozo, is another rock, called the Scoglio Marfo. At the north end of St. Paul's Bny is the island of Salmonetta, but the best bnown of these
appendagea is the fungus rock of Gozo, or "Hayirn tal general," celebrated for its production of Corallina Officinulis (Linneus), or fungus melitensis, at one time estcemed as a sovercign pranacea for all diseases.
IV. Malta is composed of limestone of different species and of moequal density, though generally speaking remarkably soft, and crumbling down even under the action of the weather with great facility Calcareous freestone is more or less abmutant, lim: stone generally lying on the freestonc, and the latter incumbent ona hed of marl.

The hard stone used in architecture is a species of coarse marble of crystalline structure, of specific gra. vity 2.5,-not absorbent of moisture, and not liable to decompose or disintegrate on exposure to the atmo. suihere. It consists alinost entively of carboante of lime. It is well adapted to all works requiring strength, and particularly well fitted for pavements and floors. It is found in many parts of the island, generally near the surface. (See "Colonial Librury.")
V. The climate of Malta is decidedly warm, indeed, almost tropical. The maxinutem temperature for the year may be taken at 90 . Fahrenheit, the minimum at 46., and the mean at 63. The barometer may of similarly quoted at 38. 8., 30. 2., and 30.5. The hydrometer 87., 30., and $58 \frac{1}{2}$. The heat of the summer is doubtless increased by radiation of the solar mars from the rocks surrounding Valetta; but in the country around, and in Gozo in particular, the atmos. phere is from 2 , to 4 . cooler.

The most prevalent winds are the south east (the Sirocco) and the north-west; the former character ized by its humidity, acrompanied hy an exhausting degree of temperature, producing a damp and suftocating smell to the sick; these Siroccos are most prevalent in August, September, and October. The north-east wind (" gregule") is lorief and violent in its duration, frequently occasioning serious misctief in the harbour during the winter months.

Occasionally sudden and partial gusts of intensely heated air are felt in Malta, which are blown from the coast of Africa. Fortunately they seldom exceel half a minute in duration, for if longer continued, life would be extinguished, owing to the severity of the heat, which is remarkable for blowing in tracts, af. fecting the inhabitants of one honse and not their neighbours. It is probably a portion of the "Samiel" or "Simoom" of Alrica. When dry wind blows over the island, especially in s.mmmer, volumes of im. palpable dust fioat about, which is precipitated in the shape of a shower of mud, on the recurrence of a damp wind, or when the fogs and dews are peculiarly long.

No regular sea and land breezes are felt in Malto, by which the heat would be moderated; and it is a remarkable fact that Captain Smyth found the temperature of the sea, round the adjacent shores of Sicily, at a depth of 10 to 20 fathoms, 73 . to 76 . Fahrenheit, which was 10 or 12 degrees warmer than the water outside of the Straits of Gibraltar. Snow only appears at Malta as a luxury imported irom Ditua, but in the winter months there are frequent hail showers. Rain falls with tropical violence in December, January, and part of Fehruary, About March the sky gets settled; an occasional showet may fall in April and May, but during June, July, and August not a cloud is to be seern. Scptember and October are cooled with showers, the air is placid and invigorating, and termed "St. Martin's," or the "little summer."

Return of Deaths* \&., Continued.

* The greater number of deaths were in January, Felaruary, March, and Angust, and the principal fatal diseases, Diarrhoea, Marasinus, and other diseases arising from dehility.
Mortality of infants received into the Foondling Hospital at Maltn from 1833 to 1836 :- Whtered in 1833, 163; Died, 135; Survived, 28. 183.4, E. 125; D. 112; S. 13. 1835, E. 149; D. 99; S. 50. 1836, E. 160; D. 132 ; S. 28. Total E. 597 ; D. 478 ; S. 119.

The endemic diseases are few ; small pox has been unknown for some ycars; vnricella and scarlatina, occasionally appear, and measles are not unusinn. The most important endemic is the plague, which was first noticed in the Maltese amnals in 1549, A. D. ; in 1593 it again appeared:-in 1623, 40 persons died of it, and in 1663 it reappeared, when only 20 persons fell victims to it: but its advent in 1675 was dreadful, for 11,300 persons died of this terrible malady. For 130 years Malta was free from plague, when it broke out with fearful violence in 1813; for, from its commeneement in April, 1813, to its termination in September the same year, 4,486 deaths took place in the island, of which 1,223 occurred in Vnletta, the mortality being about 80 in the 100 attacked: the monthly progreas is shewn by the deaths from April to Novemler, viz.: April, three cases; May, 110; June, 800 ; July, 1,595 ; August, 1,042; September, 674; Oetoler, 211 ; November, 53 ; maximum of the thermometer during those months was, $71^{0} 82^{\circ} 84^{\circ}$ $88^{0} 86^{9} 88^{6} 83^{3} 72^{0} \mathrm{~F}$. strong winds blew during part of the period, particularly in July. How the plague
originated was never clearly ascertained: it was gencrally attributed to three vessels which arrived in Malta, 29 th March, 1813, from Alexandria, where the plague was then raging; some of the crews of these vessels died on the passage, from pestilential diseases.

It is a remarkable fnct, that some of the populous villages or casals in Malta totally escaped the disorder, and eases are ou record where a woman held her dying husbnud in her arms, or the husband nursed hisdying wife and children with perfect impunity; nay, even children sucked their tying mothers, and lay infolled in their arms without contracting the diselse.
VI. When, or by whom Malta was first peopled is unhoown; according to fubular tratition, the island was primarily tenanted by a race of giants. When in possession of the Plhowicians and Carthaginians it was probably thickly inhahited, owing to the extensive commeree carried on; but the earliest data I can obtain are those given by Boisgelin, who says, that ia 1559, after the raising of the famous siege of Malta by the Trurks, the ialand contained ouly 10,000 inhabitants : in 1632, without reekoning the knights, \&C. of
the Order, and ceclesinstics and officers of the Holy Brotherhood, the number of inhabitants amounted to $51,7: 50 \mathrm{men}$, women, and ehildren.
According to the records the population of the two islandis of Malta and Gozo was in 1590, months, 23, 56.1: $1617,13,798 ; 1670,60,6100 ; 1780,160,000$. In 1735 there were computed to be in Malta and Go\%o, untive Catholie inhabitants, 121,507 ; the re gutar militia, 16,0000 (effictive men). The loss during the siege of the Freneh, in Valetta, from 179世 to 1800, amo inted to 20,000 , including women and children: independent of the troops Buonaparte forcibly took with him to Egypt.
The next document I can find gives the population of Malta and Go\%o, as extracted from li'Almenacco whlle Isole di Maltue Goze for the year 1807 :-
Cutholic Nutires of Maltt. - The Capital Notabile (Citta Vecchia, or Melina), and its suburbs, 3,731; Valcta, and its suburb Floriana (city) 24,546 ; Cospicua (city), 9,224 ; Vittoriosa (city), 3,300; Senglea ícity), 4,152; Birchircarn (1st casal, or Burgh), 3,410; Nnxaro (2nd do.) 3,020; Curmi (3re do.) 3,186; Zurrico (4th do.) 3,01ti; Zeitun, (5th do.) 4,021; Gudia (fith do.) 890; Siggeri (7th do.) 2,715; Zebug (8th do.) 4,026; Attard (9th do.) 731 ; Musta, (10th do.) 3,003; Micabiba (1th do.) 903: Crendi (12th do.) 9:4; Hasciack (13th do. 1,003; Zallbar (14th d.) 2,542; Dingli ( 15 th do.) 180; Tarxien 1 (ith do.) 910 ; Gargur (17th do.) 949 ; Safi (18th do.) 178; Chercop 19th do.) 300; Luca (20th do.) 836; Balzan (21st do.) 444 ; Lia (2end do.) 88.2 ; total in Matta, 80,225
From the registers of the parochial priests :-
Cutholic Natives of Gozo. - Castello e Rabato 5,100; Caccia (casal) 1,469; Garba (ditto) 1,459; Nudur (ditto) 1,400 ; Zendia (ditto) 1,364; Saimat (ditto) 869; Zcbur (ditto) 768; total in Gozo, 12,829.
From the registers of the parochial priests :
In Malta, 80.225 ; in Gozo, 12,829; total native Catholics, $93,0-1$. Other inhabitants and domestlcated strangers, estimated, $2 \pm, 100$; absent, estimated by register, 7,650. Grand total, 122,804 .
The number of foreigners residing in Malta during the six or seven years preceding the plague of 1813, was estimated at from 30,000 to 40,000 . Many houses were fitted uplike ships, with tiers of berths, and several large vessels were converted into tloating hotels.
In 1894, the population of Malta alone was estimated by the deputy inspector of police as follows :-
Populution of Maltr, March, 1824. - La Valettn and Moriana, $95,5+6$; the three cities on the other side of the harbour, 18,649 ; Notahile and Dingli, 5,166; Zebug, 4,776:Siggieni, 3,373; Crendi, 1,052; Micabiba, 814 ; Zurrico, 3,618; Safi, 227 ; Chircon, $315 ;$ Ascisch, $1,13_{1}$; Gudia, 1,040; Zeitun, 5,440 ; Zahhar, 3,537; 'Tarxien, 1,011 ; Luen, 1,268; Curm, 4,130; Birchircara, 5,253.; Bnlzan, 633; Lia, 1,039 ; Attarl, 907 ; Musta, 3,369 ; Nusciaro, 2,965; Gargur, 1,139 ; total, 96,404 .
The estimate of the population of Valetta, Ploriana, and the three eities on the other side of the harhour, is only to the end of the year 1823. The villages are to the month of March, 1824.
The following return of Malta alone, from 1824 to 1828, has been furnished me hy Sir Frederick Ponsonby, together with the census of 1834 :-

Return of the Population of Malta, during the following years.

During this period of five years, there died each year of apoplexy, about 120 ; of dropsy, 200 ; of matasmus, 200 ; of dentition, 550 ; of dysentery, 130 : of diarrhuea, 280 ; of miscarriage, 120 ; still born, 30 ; of debility (infants who died soon after birth), 150; of phthisis pulmonalis, 100 ; of nervous and bilious fevers, 170 . During this period, of those who died, no one had reached the age of 100 ; the oldest did not exceed 98 years; of this age about four or five in each year; about 30 individuals tied annually of 90 and upwards.

The population of Valetta and Floriana, up to the 31 st December, 1826 , was . . . 26,100
$\left.\begin{array}{llll}\text { Ditto } & \text { ditto } & \text { at Vittoriosa } & 4,482 \\ \text { Ditto } & \text { ditto } & \text { at Senglea } & 5,250 \\ \text { Ditto } & \text { ditto } & \text { at Cospicua } & 9,974\end{array}\right\}$

19,706

Total 45,80t
It is difficult to form any estimate of the number of Maltese who are residing in the Turkish dominions, or in other countries hordering the Mediterrancan. For the last five years ati account has been kept of the departures and arrivals, by which it appears that about 10,000 have departed in each of those years, and ahout 9,000 have returned.

The returns to the Colonial Office give the following as the number of inhabitants in both Malta and G(va):-

Population of Malta and Gozo.

| Years. | White rand Free Coloured l'eople. |  | Births. | Marriages. | Deaths. |

It is asserted that the natives of Malta are long lived; but it is to be regretted that we have not in the list of deaths the ages of the deceased. Abela states instances of persons living to $80,90,100,105$, 107, and 110 years. He notices one man, a native of Zabbar, who lived to near 120 years of age, and preserved his strength, his teeth, and in part the colour of his hair; and another, a resident in the civil hospital at Citta Vecchia, completed 120 years, retaining his memory and judgment. It is asserted by the same authority, that some of the ancient inhabitants lived to 130 years of age, owing to the purity of the air, and their temperate mode of living.
The annexed shews the population of Malta and Gozo in 1834 classified:-

* Exelusive of the Malta Fencible Reglment, the men of which are returned with the native popuiation.

Dr. Hennen constructed the following comparative Table of births and deaths among the inhabitants of Malta, from the year 1819 to the year 1823 inclusive.

| Years. | Mortality. |  | 烒 | 号 |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |
| 1819 | 2029 | 367 | 2396 | 3687 | 1291 |
| 1820 | 2297 | 366 | 2693 | 3761 | 1098 |
| 1821 | 1912 | 354 | 2266 | 3468 | 1202 |
| 1822 | 2310 | 356 | 2666 | 3219 | 553 |
| 1823 | 2566 | 363 | 2929 | 3388 | 459 |
| Total | 11114 | 1806 | 12920 | 17523 | 4603 |

It would appear from the foregoing, that the population was then slowly increasing, the births preponderating over the deaths. The annexed table I was favoured with by Sir F. Ponsonby. His excellency did not inform me whether it included Gozo or other. wise. It will be seen that it differs from the preceding table; in some years the excess of births is very slight.

Population of Malta, and Births, Marriages, Deaths, \&c. in 1836. [B. B.]

[^22]The Maltese are generally of middle stature, with robust frames, and small hands and feet; the hair black, and sometimes inclined to frizzle; lips frequently thick, and skin awarthy among the common people where exposed to the atmosphere; the eye dark and bright, and among the higher classes of remales, remarkable for that fulness and languishing beauty which constitutes the great charm of oriental women. In some of the villages, auch as the Casal of Zurrico, there are a remarkable number of blueeyed persons to be met with. In general there is throughout the villages a good deal of the Spanish character displayed, but in the cities, and among the higher orders, a sort of French $\varepsilon \cdot d$ Greek character is combined. The men are industrious, active, frugal ; attached to their country, passive, but yet nowise deficient in courage, as they have often shewn, and they are considered the best seamen in the Mediterranean. Those in easy circumatances dress like other Europeans, but the lower orders are clothed in a lonse cotton shirt, over which is a wide vest, or jacket, with silver, sometimes golden buttons, a long twisted scarf, wound several times round the body, with very often a sheathed knife placed therein; loose trowsers, leaving the legs bare from nearly the knees downwards, and very peculiar shoes called korch, which is a leathern sole, fastened with strings, or thongs, to the foot and leg, nearly like the old Roman sandal. The head in winter is covered with a woollen cap of different colours, having a hood attached, and falling down on the back ; in aummer, large straw hats are worn. The women are attached to their primitive dress, consisting of a short cotton shift, a petticoat (generally of a blue colour), an upper robe opening at the side, and a corsct with sleeves. The hair, covered with pomatum and powder, is arranged in a high cone in front of the head, and the face is concealed by a large black silken veil called faldetta, which the wearer adroitly shifts when exposing her features to a side or full view. Many ladies of the upper class have recently adopted the English costume, except during the time of performing their religious duties, when they appear at church in their ancient costume.
The Maltese marry early; instances are not rare where girls have been mothers at thirteen years of age; they suffer little in childbirth; twins are a common occurrence, but in instance of tripleta have ever been lieard of in the island; and when we spenk of such occurrences as not unfrequent in Eugland, they shake their heads in emphatic silence. Deformity is exceedingly rare, and monstrosity still more so; in early infuncy the children are swathed romad from the shoulders to the tocs, including the arms, which are laid close along the sides, so as to present a striking resemblance to an Egyptian mummy. Notwithstanding this apparently unnatural restraint, the use of the limbs is early acquired; a crippled or an impotent child is a rare sight; and the nctivity of the Maltese, especially as swimmers and divers, is very great. In the female hospital there are two preparations of monstrous twins ; one pair joincd by the backs, and the other by the bellies.
The upper class speak Italian; the language of the coimmon people is a patois compounded of Arabic, German, Italian, and other languages. The Arabic,
however, so far predominates, that the peasants of Malta and Barbary can without much difficulty understand each other. Captain Vella contends that the Maltese language, as it is generally spoken by the mass of the people, is still the original Punic, which has passed unaltered through the changea and revolutions of 80 many nations, which have successively occupied and oppressed the island of Malta. Some slight differences may be perceived, chiefly in the pronunciation, in various parts of the island, but without disparagement to the language itself, whose substance is in every place the same. There is no national alphabet, but according to the fancy of the writer those of other tongues are adopted. English is becoming generally underatood throughout the island.

The Lord's Praycr in the Maltese language (according to Anderson), "Missierna li inti fis meuiet jitkaddes ismech, tigi saltnatech icun li trit int chif fis sema hegda flart. Hhobsna ta culium atina illum u Ahhfrilna dnubictna chif ahhna nahhfru lil min hhata ghalina u laddahhana fittigrif ta tentazzioni isda ehhlisna middeni. Amen."
VII. A scrupulous attention to the rites of their church is characteristic of the Maltese, whose established faith is that of Rome. The landed property belonging to the church is considerable; and there are about 1,000 secular and regular clergy in the two islands. By the calendar of 1742 , it appears that there weic then 2,000 priests and ecclesiastics in Malta and Gozo, exclusive of the members of the order.
Previous to the year 1827, many of the churches enjojed the privilege of sanctuary, and ecclesiastics were not under the jurisdiction of the civil tribunals: but a law was passed in that yeur aholishing those privileges, and the bishup's court has now jurisdiction only in spiritual matters.
There is a Protestant clergyman, and the service is performed in a chapel in the governor's palace; it is not, however, large enough to contain half the Protestants who reside at Valetta, and it is a well founded subject of complaint that a church bas not been built. A military chaplain performs service for the garrison, in a building not very suitable for the purpose; indeed the want of any suitable Protestant church must appear very striking to those who visit the island, when it is recollected that it has been a British possession 35 ycars. The church service is now performed in Valetta in one of the lower oftices of the palace, formerly either the kitchen or wine cellar of the grand master; and the accommodation on the other side of the water, in the Borgu, is worse, consisting only of what was a sort of storehouse of small dimensions.

The following tnble shews the great attention paid by Roman Catholic communities to the religious in structions of the people. Every parish has its chapel, its cure and its festivals. The value of the livings it will be observed is very small, but voluntary offerings, $\&$ c. doubtless compensate for the deficiency in the fixed stipends of the priesthood (sec remarks 1. 580.) There is a Romnn ('atholic bishop) at Maita and a very large estnblishument of ecclesiastical functionaries. The parishes are pretty equally divided. Some of the churches were extremely rich in gold, silver and paintings, until the French got possession of Valetta.

Remarks.-The military have a Chaplain of Brigade, who performs divine service for the troops. The Governor's chapel is not large enough for the accommodation of the Protestant civil inhabitants, of which, however, it is calculated 250 attend the Dissenting places of worship.
Besides the several livings, the fixed annual value of which is stated in the returns, the Catholic clergy enjoy other emoluments, called "Tithes Primitive," and paruchial dues; the maximum, however, of receipts of each, every thing included, is $50 l$., and the minimum, 20l. per annum.

The curate of the four cities receives about 661. a year, liable to certain expenses.
The great church of St. John, at Valetta, is a Conventual Catbedral, with the Cathedral of St. Paul, at Notabile, to which canonries are attached, as is the case in respect to the collegiate churches.

There are no fixed rectors, but the Cure is exercised by removable vicar-curates, who receive each about 58l. a year, which is bonified to the religious establishment of which the curates may happen to be a member.
Independent of the parochial churches and chapels, there are the churches in which great part of the population attends on holidays in particular, belonging to, and supported by, the following religious establishments: the Dominicans; Minori Osservanti; Minori Conventuali; The Augustins; The Carmelites; The Nunneries of Saint Ursula and Presentazione in Valetta; the Capuchins at Floriana; The Barefooted Carmelites or Theresians, and Nunnery of St. Margerita at Cospicua ; The Dominicans; The Minori Conventuali; The Carmelites; The Augustins and Nunnery of St. Benedetto, at Notabile; The Dominicans and Nunnery of St. Scolustrea and Vittoriosa, and The Capuchins.
The Augustin's Minori Conventuali, and The Capuchins at Gozo.
VIII. Education is well attended to in Malta. There is a college in Valctta, instituted by the grand master, Pinto, in 1771 ; it is held in the convent of the suppressed Jesuits, and has lately undergone complete
reform. Degrees in divinity, law, and physic are conferred under certuin regulations; and there is a preparatory school attached to it, in which sll boys are reccived upon payment of a tritle. The support of the college devolves upon government, as on the expulsion of the Jesuits from Malta, their property, which now amounts to about 700. a year, was allotted for the support of the university, and of a church which now costs the government 1761. per annum, the remainder being devoted to the university, in which there are 490 scholars; those in higher schools (unless apecially exempted by the council) pay 4s. 2ll. each month, from which is defrayed the salary of the secretary ( $1.1 .15 s .4 d$. per month), and certain penslons to superannuated professors. To this fund the students in medicine, surgery, and anatomy, do not contribute, but pay 4s. 2 d . each month to their respective professors.

There are two normal schools, at which more than 1,000 boys and girls are educated free of any expense. These schools, together with a small one at $\mathrm{G}_{\mathrm{ozo}}$, are supported chiefly by government,-private subscrip. tions are however received. There was for a considerable time much jealousy on the part of the Ca . tholic clergy on the subject of education, ss it was feared that it might be made use of as the means of conversion. This feeling has subsided; and in one of the normal schools lately established, a canon of the church is the principal director.

The children are taught reading, writing, arithmetic, und the rudiments of Italian grammar, and in some instances, English and Latin ; the females are taught needle-work, spinning, and weaving.

Of private schools there are 82 in Malta : viz. 24 in Valetta and Floriana; 25 in Vittorioso. Sanglea, and Cospicua; and the remainder in the difiterent casals, or villages. In Gozo there are six private aeminaries; and a public free school in Rabato, with 35 scholars.

* The university was instituted hy the grand master, Pinto, in 1771 , under atatutes, which have been modified from time to time. A new arrangement of the university and lyceum was carried into effect from lst January, 1834, having beell submitted to and approved of by His Majeaty's principal Secretary of State for the affairs of the Colony.
+ On the expulsion of the Jesuits from Malta, their property, which now amounts to 700l. a year, was allotted by the grand master for the support of the university and the keeping up of the church. The government aupports the university, having appropriated to itself the whole of the said property.
$\ddagger$ These schools were established 18 years ago, during which period there have been admitted 2,304 males and 1,651 females. The children generally are taught reading, writing, and arithmetic, the English and Italian languages. The females are taught all sorts of needle-work.
$\$$ This school was cstablished 1st July, 1834.
II In the seminary, the pupila are divided into two classes-the first, called Almuri, pay $5 l$. per annum ; and the second, called Convittori, pay 12l. 10s. per nnnum. They, as well as the professors, \&c., live in and are fed by the Establishment. The seminary, independent of the contributions of the pupils, has an annual revenue derived from landed property of about $310 l$.

IThe children are taught rending and writing and the rudiments of the Italian grammar
** These schools were first opened in January, 1820, sinec which period there have been admitted 730 males and 527 females. Reading, writing, and nrithmetic taught the children. The females are also taught needle-work, spinning, and weaving. There are also 26 private schools in Valetta; 2 in Floriana; 17 in the Three Cities, Vittoriosa, Senglea, and Cospicua; 1 in Notabile, and the rest in the different casals or villages.
$\dagger$ Intended for 50 boya, belonging to Rubato and the different casals or villages, in proportion to the population of each; of this number 35 are educated gratis, and 15 on payment of a small gratuity to the master. Reading, writing, arithmetic and the rudiments of the English, Italian, and Latin languages are taught. There arc also six private schools in this island.

Libraries．－In the year 1761，the Baile De Tencen founded the public library at Malta，which was in－ creased by many gifts from distinguished private in－ dividuals，princes and kings．The King of France contributed a select set of books to it；and it was privileged to receive copies of all works published at the royal press at Paris．The library formed at the general hospital was transferred to it，and a regula－ tion was established，by which the books of all the deccased knights became its property；it also had an annuity of 300 crowns left in perpetuity to it，and derived some additional income by the sale of dupli－ cates，insomuch that in 1798 the number of books， if we are to credit Boisgelin，amounted to upwards of 60,000 ．This library was，since the capture of the island from the French，removed to a large building adjoining the palace，formerly called the Conserva－ toria．It is a very respectable foundation，and con－ tains a number of excellent and some very valuable works．This library is open to the public at certain hours of the day，but no books are lent out．

The garrison have a subscription library，both for reference and lending out；it was formed in 1806.

The books are distributed under the five following heails，and the number of volumes as they stood in the library catalogue and supjlement to February， 18．24，is thus ：－

Divinity，Ethics，Arts and Sciences ．．． 426 History，Biography，Voyages，Travels，Mili－ tary lublications．．
Polite Literature，Poctry and Dramatic ．． Works
－ 64
Novels and Romances ．．．．．． 3.5
Periodicals，Miscellaneous，\＆．c．．．．． 273
There are also books on medicine，surgery，and the accessory scicuces．

In the general hospital there is also a good lilirary founded by the medical officers of the garrison．
The university of Malta grants degrees in medicine and chirurgery；and the Maltese physicimus nat sur－ geons are now principally educated in the island， many of them being possessed of considerable profes． sional talents，to dispense which they are required to produce certificates to the government．

vernor and a council of must hold office within officer in command for Iministration of the gom ; the bishop; and the The three unofficial lected by the goveroor; led proprictors and mernative (Maltese) born
subjects; and the third from among the principal merchants of the islanl, being a British born aubject, and who shall have actually resided in the island for a perion of not less than two years.

The supreme court consists of a chief justice or president, nud four members; and there are minor courts, viz. that of special commission, an inferior or magistrates' court ; a court of piratical offences; a commercial cuurt, \&c.
The past state of Malta has almost amnihilated any thing like a code or lex scripta. A commission has beell appointed by the Crown to examine into the state of the law in Malta, and to prepare a criminal, civil, and commercial code.
The law, as it is now administered in Malta, is expensive and tedious. A modified system of trial by jury has been introduced for certain criminal enses. The juiges, who were formerly paid by fees, are now independent with fixed salaries, and not removeable by any authority except by an order of the king in conncil. The language of the courts of law is Italian.
In the eriminal court it does not appenr that there is much business of a very scrious nature. The common offence is stenling and pilfering; but there is a remarkable absence of all crimea of a very aggravated nature.
The island is protected by a naval squadron, Malta heing the head quarters of our Mediterranean flect ; and by a garrison of British troops, and a regiment of Maltese fencibles, consisting of 25 officers, 41 noncommissioned do., and 468 rank and file, which the Maltese themselves pay for.

Numbers and distribution of the Effective Force, Officers, Non-commissloned Otticers, Hank and Flle, of the Britlsth Army, Artiliery and Engineers, Including the Maltese Feaclbles, in each year since 1815.

The Coloninl Government has only heen at the expense of some tritling repairs to some of the towers on the coast used for colonial purposes.

Estallishment, Pay and Allowances of the Royal Malta Fencible Regiment. [B. B.]-One colonel (including six warrant men), $1 l .5 s$. $6 d$. per day; 1 major, $10 \mathrm{~s} .3 \frac{1}{2} \mathrm{~d} . ; 6$ captains, at 7 s . cach per day, $2 l .2 s ; 6$ lieutemants, at $5 s .13 l$. per day, $1 t .10$ s. $10 \frac{1}{2} l$; ; 6 ensigns, at $4 s .1 \frac{3}{4} l$. per dny, $1 l .4 s .10 \frac{1}{2} d . ; 1$ paymaster, $7 s . ; 1$ surgeon, $7 s$.; 1 adjutant, $6 s . ; 1$ as-sistant-surgeon, $4 s .3 \frac{1}{2} i l$.; 1 quarter-master, $4 s .3 \frac{1}{2} l_{\text {. }}$; 1 sergeant-mnjor, $2 s .3 \neq d$; 1 quarter-master sergeant, $2 s$.; 6 colour sergeants, at $1 s .5 \frac{1}{4} d$. ench, $8 s .7 \frac{1}{2} l^{\prime}$; 22 sergeants, including 4 staff sergeants, paymasters, clerk, dium-major, armourer, and schoolmaster, at 1s. $3 \frac{1}{2}$ d. each, $1 / .8 s .5 \mathrm{c} . ; 24$ corporals, at 1 s . each, 1l. 4 s .; 11 drummers, at $10 \frac{1}{4} \mathrm{~d}$. each, $9 \mathrm{~s} .43 \mathrm{~d} . ; \mathrm{Ht}$ privates, at $8 \frac{1}{2} l$. each, $15 l .14 s .6 \mathrm{c}$. Total per day, 27t. $11 s, 4 d$. - Allowance to colonels in lien of ots. reckoning for clothing, 11. per day; ditto to officers commending the regiment, $3 s$.; ditto to fidd olicers and captains, instead of contingent allowanee, 201. ; ditto for regimental stationery and postage, 201.; ditto for paymaster's ditto, 201. ; ditto for regimental school ditto, $10 t$. Bounty money for seven years: for recruits, $2 l$. cach ; re-enlisted, $1 l$. each.

Pensions at Malta in 1836. [13.13.]-l'ensions comnected with the Orter of St. John of Jcrusalem, 2,130l. The existing knights of Malta receive of this sum $1363 \%$, and 25 persons connected with the Order of St. John, 765 l ., granted doring and subsequent to the siege of Volettr. Grnnted on reduction of offices, $1,844 l$.; on superannuation and retirement, $3,95 i l$; for military services, $1,432 l$; total, $9,361 l$.

X11. The trade of Malta in former times, nud even during the continental war, was very great; but the plague and the opening of foreign ports tended much to its dimitution. It was impossible to deprive Bro celona, Marseilles, Genoa, Leghorn, Missima, Aneona, Trieste, Smyrna, Alexandria, and other places, of some share of a trade which local or other advantages would alwnys command; but neither a temporary pestilentinl disease, nor a general peace, which ought to facilitate commerce, could deprive Malta of the adian. tnges which it naturally possesses for trade under the protection of the British tlag.

List of vessels of nll Nations which have entered the Ports of Malta during the year 1834: Quarnntinc hnrbour, above 30 tons, English 249, Forcign 287; under 30 tons, English 16; tonnage 86,012. Great harbour, above 30 tons, English 186, Foreign 457; under 30 tons, English 377, Foreign 247; tonnage, 76,089 ; total number of vessels, 1,819 .

Return of the number of vessels, \&c. belonging to Malta nad Gozo, in January, 1835: number of vessels belonging to Malta, 250 tons and upwards, 15 ; 100 to 250 tons, 67 ; 20 to 100 tons, $25 ; 20$ tons and under, 40 ; total number of vessels, 147 ; total num ber of tons, 16,868 ; of which were built in Malta, 250 tons and upwarils, $9 ; 100$ to 250 tons, $42 ; 20$ to 100 tons, $17 ; 20$ tons and under, 40 ; total number of vessels, 108 ; totnl number of tons, 10,434 ; crews of the above, 1,522 ; number of hoats of all descriptions, belonging to Malta, 906 ; number of boats, belonging to Gozo, 97 ; total, 1003 : number of men employed, 2,817.
The value of the cottons manufactured in Malta is upwards of 118,000 . Black silk stuff is also made. Ship building is on the increase, the Maltese being good carpenters: the timber employed is chicfly from the Adriatic. About $50,000,000$ of segars are annually made, and find a market in every port of the Mediterranean. Stone for paving and building, is quarried and exported in considerable quantities to Constantinople, the Black Sea, Egypit, \&c. There are manufactorics on a small scale of soap, leather, macenroni, iron hedsteads, \&c. The Maltese jewellers are remarkable for the elegnnce of their gold fillagreework, neck chnins, \&c. Salt is prepared in large quantitics by exposing sca-water in the cavities of the rocks to solar evaporation. As ship builders, the Maltese are highly prized. Large quantities of sofas,
chairs, Sc. are annually exported to the lonian Isles, Greece, and other places.
XIII. Coins.-[B.B.1836.]Gold: none in circulation, Silver: British crown, half-crown, shilling and sixpenny pieces, Spanish pillared dollar, dollar of the South American States, Sicilian dollar and half-crown pieces, Maltese dollar, half-dollar, two scudi one scudo, six, fuur, two, and one tari pieces. Copper : British penny, halfjemy, farthing and grain picces, the latter of the value of one-third of a farthing.

The Spanish dollar was declared a legal tender at the rate of four shillings and fourpence sterling, by proclamation of the 11th October, 1825 ; issued in consequence of an order of the King in council hearing date the 23 rd of March 1825. The dollar of Mexico, Peru, Bolivia, Chili, and Rio Plata, was made current at the rate of four shillings and four pence sterling, by proclamation of the 27th May, 1834, issued in consequence of instructions to that effect contained in a despatch from his Majesty's principal Secretary of State, dated 5 th April, 1834. The Sicilian dollar which formerly passed current at the same rate ns the Maita dollar, namely at two scudi and a half of Malta, continnes to pass, since the introduction of the British silver money into these possessiona, at a proportioned sterling rate. The scudo being equivalent to one shilling and eight pence sterling. The Sicilian dollar consequently passes for $4 s .2 d$. 12th of a penny; the Sicilian half dollar, $2_{s}$. 1 d.; the Malta dollnr, 4s. 2d.; half dollar, 2s. 1d.; two scudi piece, 3s. Id.; one scudo, 1 s .8 d. ; six tari piece, 10 d. ; four do., $6 \frac{1}{k} l$. ; two do., $3 \frac{1}{l} d$. ; one do., $1 \frac{1}{8} l l$.

The introduction of British money into these posseasions has not hitherto produced, among the commercial body or inhahitants generally any alteration of keeping their accounts, and of making sales, con-
tracts, Re, which are continued as formerly in Maltese curreney, mamely, scudi, tnri, and gralus; 20 grails are equal to 1 inri, is tari to I scudi, equal to l.s. Sil. sterling, The government depmrtments (siace the 25th theomher, isen) kerp thedr newounts mall comduct their coshi transuctions in sterling, in the same manner as in longlinid.

Course of exchunge:-[13, 13. 18:3ki.] The Committere of Merchints dechare $n$ rnte of exchange with lingfand twice $n$ week fommed on the netual temenctions during tho intervening dass. 'The commissnry in pursunace of his instrictions from the larels Commissioners of his Mngesty's Trensury, gemuts hills on their Lordships, $n^{\prime}$ the rate of low. in exchange for every 1011. Its. tmered to him in Ihitish silver money, mid nolvertise a for suphlies in other than British specie, when he has ocension an to do. Thenverage rate of the commercial exchange diring the last year has freen ind lid looth pence per dollar of exchamge of 4s. $2 d$.

The following we the aremge rates of exchange with the principal perts of the Meditermamen; umon Sicily, 10s. the sterling per cumer of do dollar ; Naples, 3s. fod. st. per ducat of 1001 grains ; lecghom, 4s. 2d. st. per gold dollar: Genewa, Nd. st, per lirn
 1d. st. per florin; Marseilles, ! Ihd. st. per frmes.

Amomet of ' 'oin in cirrulalion.- [13.13. 1s:li.] Silver and eopper, miny be estimeted at about $150,0161 \%$. sterling. Amount of paper enrrency in circulation; the only paper enrency in cireulation consists of the notes of two separate banks, (ostablished en comme dite) not nombuting to $20,0 \mathrm{mb}$. sterling: they ne not received by the govermment departments, mat are issued more for the convenione of the commercial holy, than with a view of proftr. Thesse hanks nere consideral very solid, nud are comblneted in an sufe and regular wamer.

The Monte di lictid of Minita wns csanbibished in the yenr 159\%, nad like all institutions of the sort, in other parte of limope, purticulaty nt Rome, with the ohject of nflording peenniary relief to the distressed nt rensomable literest, therely preventing them from having recourse to nsurious contracts. Any sum of money, however small, is ndenned to the nppliemits on the socurity of property given in pason, such ns goid, silver, nid other precious articies, or waring apparel, whether worn or new. 'The period of the lonn is for 3 years on pawns of the tirst description, mud never more than two on those of the latter, renewable nt the oytion of the parties, who nre nloon at liberty to redecm their pnons, at nny time within the period, on payment of interest in proportion. The rate of interest now charged is $\mathbf{i}$ per cent per nannm. The uncinimed pawns at the expirntion of the period, are sold by publie anction and the residue of the proceeds, nfter cieducting the snme due to the institution, is pmyable to the person producing the respertive ticket. Of the necommodition thas nfforided by the "Monte" not unfrequently persons in better circumstances, have availed themselves fornny momentaryexigency, and in this why eomsidernble sums have heon advaneed. Till the year 1787, the operatione of this institution were comilucted by menna of money borrowed at a moderate rate of interest, nul by funds nequired by donntions, \&c. But the grand mnater Rohan authorized the consolidation of the funds of the Monte di Pinta with those of the Monte de Redenzione, nuother institution equally nationnl, foundel in the yenr 1607, by private donntions and bequestr, for the philnuthropic object, of reacuing from slavery, ally of the matives who might fall into the hames of

Mahombmednns, not linving meana of ransom. As this lisetitution had inrger fumes (mostly in Innded property) thmi it. actually required to mect all demands, the net of consolidation proved of the greatest advans. thap to the " Monte di lietn." Thus united the two institutions, with the new title of "Mente di pleta " Redenzions," conducted their separnte daties, under the superint endmuce of a Honril consisting of a president nuld cight commalsionuers, till the expulsion of the order of St. John from Malfn, whieh happened in
 the Island was then occupled, atripped the "Monte." of every neticle, whether in money or pawis, mad the lows sustnined by the inatitution on that unfortumate necasion momonted menrly to $35,00 \mathrm{~m}$. sterling indul. lig the slane of the proprictors of pawns, in as much as the mivance they received on that security, never excereled one-half or two-thirds of the value of the artieles pmoned. It is noedless to state that not a shilling ol this smm, was repmid by the French gowernment, nfter the restorationothwirlegitimate momsechs.

When the British forces took possession of ha Vallette, in Neptember, isin), it was one of the first cmose of the hend of the govermment to see this nsedtal instifition ressime its operntions. Accordingly a new bonal was clected, and nlout 4,1000 . manemed to them (without interest) from the heal trensury. A lome was oprened to which individunls did not hasitate to contribute, when they were nssured that the institution comsidered itself hound to pay the old lonn, though forming purt of the momout carricil neny by the Froneh: nad that in the menn time interest womble be pmist on it. 'The Monte, possassing lander property to n much grenter momont, rould never refuse such nut net of justice. Ilnjpily the cessntion of slavery, having bint nn end to the old charge for ransoms, cmabled the institution to devote its revemes to the payment of interest on the old honn, to the erstinetion of part of the enpitni, to the improwement of its property, and for the last 13 yeurs to nssign a sulsidy of swin. per abinim fo the llonse of Imlinstry.

In In3ki, 16,9 I3/. Was recoived on pmwns, and 1'i,310/. lent on do.; 26.4 . was restored surphes on the sale of pawns.

There is mother "Monte di bietin" nt Gozo, pstablished by tho late Sir Alexnader Ball, atoont ail years ngo; lint its operntions noe extromely limited, in as murh ins it possesses no funds of its own worth mentioning, nud has no other enpital nt its disposal but 1,2010 dollars, horrowed from the Monte di licta e Redenziond of Maltn, at the interest of 3 pas cent. per nuthin.

Return of the Produce, Stock, \&cc., of Malta, in 1836 (continued).

N.B. The native crop is estimated, upon the average, at $\mathbf{3 0 , 0 0 0}$ salms.
The average prices of wheat sold to the public in Malta, during the undermentioned periods, lins been :

Cumin sceds and anniseeds are successfully cultivated, and exported in considernble quantity to the surrounding cou"trics in the Mediterranean, as welt as to England and America; and the cumin seeds of Malta are as good as any, if not the best, in the world. The squills grown and dried in Malta are found to produce the hest oxamel attainable from that bulb; and the quantity of orauges hitherto furnished by Malta to the tables of the luxurious in France and England, might be grently increased. Indeed, the oranges of Mnlta are confessedly the finest of the Mediterraneau, and its melons are supcrior to the best of the southern countries of Europe. There is a variety of other delicate fruits. Vegetation of aromatic plants and herbs of cvery sort, aided by rich pastures refreshed by the regular falling of nocturnal dewa, enable the natives to rear considerable herds of cattle and flocks of sheep and goats, whose flesh, s"omntized by excellent food, possesses an exquisite llavour. Poultry is plentiful and excelfent. Quails, and a great diversity of other wild fowl, never fail to come in vast flights at the time of their annual migrations.
Much attention is bestowed on the manngement of bees : a grent many hives are kept in several parts of the island, from which they yearly procure a large stock of delicieusly-flavoured honey. Great pains are also bestowed on the breeds of asses and mules, and the qualities of these useful nuimala have been highly improved by the iuhnbitants. The asses, especially, are well known for their unparalleled strength and beauty, and always sell at a high price.
The ammexed return of the number of cattle, \&c. in the islands of Malta and Gozo, 1st January, 1835, has been furnished me by Sir Frederick Ponsonhy.

| In MnIta | $\ldots$ | 4437 | 8501 | 3213 | 3845 |

Return of the number of carts and calcehes in Malta and Gozo, which pay licenses, Ist January, 1835.

| Malta. | Gozo. | Totals, |
| :--- | :---: | :---: |
| Carts . . . . 1137 | 25 | 1162 |
| Caleches $\ldots .264$ | 14 | 278 |
|  |  | $\underline{14.10}$ |

Cnrts employed solely on the farms are exempted from license. The number may be estimated, in the two islands, nt about 800. The license on carts was taken off on the lst April, 1835.

All the domesticated ansimals thrive in Malta. The Maltese dog, formerly so much celebrnted, is now, 1 believe, extinct. The gonts, are of a very fine breed, but the horned cattle are small, and principaliy imported from Sicily, Barbary, and the adjacent consts. Suakes are to be found, but they are not poisonous. Birds of various kinds migrate to the island at different periods, and the hawks of Malta were formerly much celebrated; the bees were ntso renowned, and indeed continue to yield such excellent aromatic honey, that it is conjectured the island was thence cnlled "Melita" by the Greeks.

Fish of various kinds are plentiful. The dory, rockcod, nnd a species of whiting, populnrly called the " lupo," are excellent. The cray-fish also, found on the rocks in the island of Gozo, are enormous in size, and of very fine flavour. One of the most remarkahle fiah is the "pholis dactylus," which abounds in the harbour, forming for itself a complete "insbitat" in the soft rock, which is perforated as regularly oy these creatures as if the perforation had been effected with an augur, while they approach each other so closely and so regularly, that several portions of the rock appear like the wood-work of a cartridge box.

The price of the best land is from 500 to 600 scudi the tumolo ( $50 l$. sterling). Land of moderate quality sells from 200 to 400 scudi, and the lowest from 200 to 100 scudi, and even less ( $16 l .13 s .4 d$. to $33 l .6 s, 8 d$, The best land rents for about 15 scudi ( 11.5 s .) ; the second quality for about 10 scindi, and the interior from 5 to 2 scudi ( $8 s .4 l$. to $3 s .4 l l$.)

A man farming ten salms is obliged to maintain constantly two labourers, who generally receive from 100 to 120 scudi a-year ( 81.68 .81 . to $10 l$.) each, and the furmer generally feeds them in whole or in part. His other labourers he pays as he wants thein, by the day. The price of labour was in 1816 as high as seven and cight, and even ten tari ( $11 \frac{1}{2} d ., 1$. $1 \frac{1}{2} l$, and $1 s .4 \frac{1}{2} d$. ) per diem, in the summer time. In 1820 it was rednced to six and five tari ( $10 i$, and 8dd.) At present the price is about four tari ( $6 \mathrm{j} \mathrm{g}_{\mathrm{l}}$ ) per diem, and for this the labourers are obliged to furnish their own tools. Sometimes they are paid in money, at others in meschiato (that is n mixture of whent and barley). When they nre paid necording to the latter mode, they receive two tumoli each a week; and this is the method which is generally preferred both by the labourers and the farmers.

A entalogue of plants which grow in Malta and Gozo, and of the fish found on its const, with various other particulars, will be found in vol. v. of my "History of the British Colonies."

Section I. The septinsular union of the Ionian isles are situate in the lonian Sea, between the parallels of 36.0 and 40.0 south, and the meridian of 20.0 nad 23.0 east of Greenwich, extending from the A1baaian Coast to the southern extremity of the Morean peninsula.
II. The early history of these islands, ealled by the Greeks Frank isles (\$payאor $\eta \pi \sigma$ ) is so intertwined with the mythology of the Greeks and Romans, that it is difficult for sober truth to find a starting point. The islands would appear to have been early colonized, remained for many years as separate states, were partly in the possession of Corinth, next in alliance with the Greeks, then with Pyrrhus, King of Epirus, during his invasions of Italy ; subsequently Rome gave law to all the little Grecian republies ; and on the fall of the Eastern Empire, the Venetian republic afforded protection to, and claimed the sovereignty of the islands.
In 1737-38, the Turks, who had commenced their efforts for the expulsion of the Venetians from the Morea and other provinces in European Turkey, besieged Corfu, which, notwithstanding repeated assanlts, remained the chief of the Ionian Isles under the republic of Venice, the fall of which, beneath the aggrandizing conquests of the Gallic republic, immediately affected the islands, which the French took possession of, but evacuated them on the breaking out of the war in 1798-99, when they were taken under the joint protection of Russia and Turkey; the former becoming, however, the sole protector.
A constitution was organized at St. Petersburgh, and afterwards promulgated in due form nt Corfu, but which the septinsulars were far from being satisfied with; and hy a seeret agreement between Alexander and Napoleon, who had then his eyes on Turkey, the islands passed under the dominion of the latter. During the continental war, England took possession of several of the islands, and at the peace of 1815 , the septinsular union was placed under the protection of Great Britain, with whom they have sinee remained. For ample details of the lonian Isles, see [History of the British Colonies vol. v., and Colonial Library vol. vii.]
III. The seat of Government of the septinsular union is situate at Corfu, in the parallel of 39.30 north la. titude, and the meridian of 19.50 east longitude, is situate a little to the eastward of the mouth of the Adriatic; the eapital being distant from Otranto about 30 leagues, and 200 from Venice. It stretches from north to south in the form of a semicirele. On the north and west it is bounded by the Mediterranean, and on the north and east by the channel which separates it from Albanla, or the ancient Epirus. This channel, which runs nearly south-east and north-west, is about twenty-one Geographical miles in length; at its narrowest or northerly entrance, at Cape Karagol, it is not two miles across: at the southerly, between Cape Bianco and Gomenizza, it is about seven miles brood; and at its wldest part, in the neighhourhood of the town of Corfu, it does not much excced ten miles in breadth. The depth of the water in the deepest parts, varies from 40 to 50 fathoms.

The length of the island of Corfu, is atout thirtyfive geographical miles ; its breadth, at the zoith-eastern extremity, about twelve : from whence .t gradually lessens until it terminates in its most southerly point or Cape Bianco.
IV. The mountains of Corfu are composed chiefly of a compact limestone, destitute of any organic remains, but with oecasional strata of flint, precisely similar to the Albanian mountains. In some places carbonate of lime alternates with strata of vegetable earth; and it is often met with, tinged with the oxide of iron, and presenting on its surface, when fractured, heautiful arborescences. Fibrous, crystallized, and granular gyjsum ahounds principally, disseminated in argillaceous deposits : brecein in immense masses, either purely calcareous or with a mixture of silex, is to be met in various parts of the island ; in some spots carbonate of lime is mixed with nodules of sulphur, or with coarse jasper: and Dr. Benza, in one spot, found the rare mineral, dolomite. There is a quarry of white marble inder the western penk of St. Salvador, of a very fine grain, ar.i well adapted to statuary ; and variegated marivie is found in small masses widely scattered. The substance known on the Continent as alabaster of Corfu, is a fine gypsum. The lesser hills consist mostly of an argillaceous soil, mixed with lime: the substratum to nll the low and cultivated lands in the island is principally a stiff tenacious elay, very retentive of moisture, and extremely productive.
The island is not apparently of voleanic production, but would appear to have been separated from the main land by some violent convulsion of nature. Earthquakes, however, are not uneommon at Corfu, and are suppesed to originate in the island itsclf, and not to be shocks in relation to other earthquakes; they generally run from north-west to south-east, and are slight; but in 1745, one shock was so severe as to destroy the palace, bishop's house, and many other buildings. In May, 1819, a severe shoek in the interior of the island stopped a copious spring, The great earthquake which not long since damaged Sunta Maura and Zante, was not felt at Corfu.
V. The climate of Corfu is nearly tropical, and the animal sensations are influeneed more by the winds than by the alternations of the mereury, in the thermometer. On un average of four years, the thermometer ranged from 44.0 to 91.0 ; the general annual average of rainy days for the four years being 96 矛. It appears that there is not a month in the year in which rain does not fall for a greater or less number of days, but November and December, February and March, are the most rainy.

Snow very seldom falls in the island, and when it does it soon melts. Sometimes the summit of St, Salvator is covered in patches, which continues for ten or twelve days. On the Alhanian mountains the snow begins to fall, generally sjeaking, ahout the end of November, and continues till May.

Fevers, especially of the remittent and intermittent types, are of frequent oceurrence, and form nearly twn-fifths of the total adinissions into the hospitals.

The total of all diseases admittel into the hospitals during seven years ending in 1821，was， 15,191 ，ainong which were ：－common fevers， 3,299 ；typhus， 2 ；re－ mittants，1，400；quotidians，342；tertians，285； quartans，17；unclassed intermittants， 376 ；total， 5,721 ．The mortality by fevers of all descriptions was 170，or ahout 1 in 332 ．thirds．
Dysentery is the next most important disease treated in the military hospitals of Corfu．

Diarrhea is also of frequent occurrence；there were treated 605 cases，of which only two died，or 1 in 3022 ．

Phthisis and pulmonic inflammations，as they oc－ curred at Malta，Gibraltar，and Minorca，bear a pro－ portion of 1 to $2 \frac{1}{2}$ of all the other serious complaints． The other diseases do not require notice；the plague has several times appeared，and of twenty－eight cases treated in 1816，only three recovered．

The following return shewing the comparative health of the tronps serving in the Ionian islands and other places，was furnished by J．W．Hay，Esyl．，（then under secretary of state for the colonies）to the Com－ mittee of the H．C．，on Military Establishments，9th July，1834．It does not，however，afford a fair test of comparative healthiness of station，as it is well known a regiment may be very healthy in one year and not in another：residents afford a fairer test of climate than troops，continually shifting，and ad－ dicted to intemperance．

Cephalonia，althnigh second in rank to Corfu，is the largest of the isiands composing the septinsular union．It is situate in the parallel of 38.27 ．north lat．，and the meridian of 20.32 ．east of Greenwich， having Santa Maura about six miles to the north－ ward，Zante eight miles to the southward，and the west coast of the Morea 24 miles distant．The area is 348 square miles，the extreme length 32 ，extreme breadth 18，and the circumference following the coast 150 miles．

Cephalonia is extremely rugged and mountainous． The general direction of the mountains is from south to north．At the southern extremity of the range，or opposite the coast of Zante，is the lighest mountain in the lonian islands，the mountain Enos of anti－ quity，the modern Black Mountain，or Montagna Negra， 3,625 feet above the level of the sea．

The harbour of Cephalonia runs inland for eight miles，rather difficult of ingress and egress，owing to its serpentine form，but offering a spacious and con－ venient shipping port．The entrance to the haven is extremely picturesque：on cither side groves and plantations，relieved in the back－ground by majestic mountains，meet the eye in varied succession．To the left，on the western side of the harbour，three miles from its entrance，stands the town of Lixuri （olim Palis）．In front of this town the harbour opens into a branch running to the south－east for three miles；and on the peninsula formed by this branch，
and close to the sea，is Argostoli，the capital of the island．

Zante，Zacynthos，or Zacynthus，supposed to be so called from its being the burial－place of one of the Boootian followers of Hercules，（Pliny states it was formerly called Hyria，）is situated in the parallel of 37．47．north，and the meridian of 20.54 ．east of Green． wich，ten miles distant from Cephalonia，and lying opposite the Gulf of Lepanto or Patras，towards the west angle of the Peloponnesian province of Elis，the nearest point of which，Cape Klarenzá，is distant about 15 miles．
The area is 156 square miles ；in its grentest length， which lies north－west and south－cast，it measurea 24 miles；in breadth 12：and its circumference，the same which was estimated by Strabo，viz． 70 miles．
From its exquisite heauty，this island is by com． mon consent called＂Zante，il fiore di Levante．＂In shape it is trapezoidacal，or rather irregularly oval， indented with a deep bay at its south－east extremity． The aspect is decidedly mountainous，and oceupying three－filths of the island，the elevation varying from 500 to 1,300 feet above the sea．
The city of Zante is very imposing in its external appearance，viewed from the sea．It is an open un－ walled town，and stretches along a gently curved bay for about a mile and three quarters．At about half a mile from the northern extremity is the point of Crio Nero，jutting into the sea，from whence the town and shipping are supplied with water．

In breadth the town nowhere exceeds 300 yard， except where the houses stretch up the hill，upon which the castle is erected．In 1819，the city con－ taihed 3,730 private houses， 65 churches，five private chapels，two convents of monks，and two of nuns， and 27 public edifices of various descriptions，includ． ing two Jewish synagognes．

The soil is of three different kinds：－a strong clay in the plain，calcarcous on the rising ground，and sandy near the shore．

Zante possesses petroleum and tar－springs，zome－ what similar to those which 1 bave describcd under Trinidad．
As the substance termed asphalle is coming into use，it may be stated here that according to a recent traveller，the valley containing the bitumen at Zante is the segment of a circle，surrounded on three sides by abrupt and rugged ridges of hills；and on the fourth，by rocks rasing above the water，as if the sea had，at some period，burst in and destroyed the conti－ nuity．In the marsh within the circle are several wells or pits ；one examined was about nine feet in diameter，and surrounded by a dwarf wall．The water was two feet below the edge，and one foot deep；the surface covered with a scum，which reflects various iridescent colours，the blue and green are very vivid． A dark，black substance continually forcing its way from the bottom，and boiling up in large globules， which，as they ascended，enlarged，till near the sur－ face，and then burst，liberating a quantity of gas， which the peasantry say is highly inflammable．Some． times the globules are transparent，and assume a sin． gular brilliancy，rising to the top and bursting，while a coating of dark hituminous matter in which they were invested is thrown off．This dark sulbstance is the petroleum，or rock－pitch，which，being specifallifs heavier than the water，remains below，covering the sides and part of the bottom．The brilliant globulea disengagel from it are pure maphtha，or rock－oil， which forms a light olcaginous stratum above，relect－ ing various beautiful colours．The intervening water is sweet and fit for use，but strongly inpreguated
toli, the capital of the hus, supposed to be so al-place of one of the , (Pliny states it was nated in the parallel of of 20.54 . enst of Green. Cephalonia, and lying or Patras, towards the an province of Elis, the e Klarenza, is distant

with a taste like tar-water, and it is prescribed in various dispeptic complaints. The pitch is collected with large spoons into $n$ pit adjoining the well, and thence thrown into barrels. The best time for gnthering it is summer, when it is exuded in the greatest quantitics; and they annually fill nbout 100 barrels, which is used for smearing the bottoms of ships and similar purposes.
There are many instances of longevity among the Zantiotes, and severnl inhahitnnts are known to be above 90 years of age, in the full jossession of all their facultics.
Zante abounds in aromatic herls, the odour of which is experienced some distance at sea; and the delicious thavour of the Zantiote honey is doubtless owing to the fragrance of the herbnge. Currants, oil, wine, and flax are the principal vegetable products

Sunta Maura Islanel (olim Neritos, then Jcucadia, from Xevoe, white, owing to its white rocks) formed by the artificial construction of a channel dividing it from the mainland of Acarnania, with Cephalonia 10 miles to the southward, nnd Corfu 35 to the northwest, is situate in 38.40 north lat., and 20.46 cast of Greenwich, having all area of 180 s guare miles; in axtreme length 23 , in extreme brendth 10 , and about f0 miles in circumference.
Santa Maura is a mass of mountains, of which St. Flias, the highest, rises to an elevation of 3,000 feet above the level of the sea. The ligure of the island is somewhat triangular ; the north-west coast, which forms the base line, runs straight nad perpendicular, raising the land to a considerable height above the level of the sea; from this the surface inclines irregularly towards the enstern const, giving the whole neariy an eastern nspect. A part, however, considerable in population and productiveness, although of small extent, owing to its narrowness, enjoys a fine western aspect.
Amaxichi, the chief town, about a mile in circumference, is situate on a very beautiful plain two miles long, one hroad, and thickly covered with olives, nud contains upwards of 6,000 inhabitants, the remainiog being seattered among 32 villages, some of them situate on the very tops of the mountains.
Ithact (called Thiaki by the natives, Val de Compare by the Venetians), in lat. 38.25. north, long. 20.40. east, is bounded on the south and east by Cephalonia, from which it is distant about eight. miles; on the east and north-cast by the channel of Zante, and $n$ group of small islands, the ancient Echinades; on the north by n part of Santa Maura; and on the northwest, west and south-west by the channel which runs between Santa Maura and Cephalonia. It is distant from the main land of Acarnania about 15 miles at the nearest point, and somewhat more than 30 miles distant, in $n$ south-east direction, lies the opening of the gulph of Lepanto. The shape is irregular, the extreme leugth from north to south being 18 miles, extreme breadth, five, but in some places not more than one mile and $a$ hulf; its circumference about 30 , nud its area 44 square miles.

The appearance of Ithnca is unprepossessing, the whole island being a mass of mountains running in nu irregular ridge cast and west ; or it may be considered a single mountain divided into rugged and mis-shapen rocks.

Vathi is little more than a single street, upwards of n mile long, containing from 3 to 4,000 inhnbitants; the houses built of stone, aud the town remarknble for its elcanliness and health.

Paxo, another of the Ionian islands, in lat. 39.12. south, long. 20.12. east, with an area of 27 square miles, and 12 in circumference, is of an oval shape, and composed of a single mountain, which probably at one period, formed part of Corfu, from the southernmost point of which it is only geven miles distant. Port Gai affords good anchorage for a few vessels; but there is an inner harbour formed hy an island almost in contact with the other, having a circular battery commanding the town, which is scatterel in an irregular manner on the beach.
Cerigo is the most southern island of the Septinsular Union, situate in lat. 36 6. worth, long. 22.50. east, at the entrance of the Archipelago: to the north of Cance, and sonth of the Morea; five miles distant south from Servi, and 14 east-south-enst of Cape Malio. The area is 116 square miles, the extreme length 20, the extreme breadth 12 , and the circumference about 50. The island was anciently known (according to Pliny) by the name of Porphyris, from its possessing abundance of that beautiful marble. l'tolemy attributes the name of Cythera to Cytherus the son of Phcenix, who established himself in the islant. According to some, Cerigo was first peopled by the Lacedomonians, who in the eighth year of the l'eloponnesian war were expelled by the Athenians under the command of Nicias. At a subsequent period it passed under the dominion of the Spartan republic, and served as a retreat to Cleomenes, who on the apprcach of Antigonos, king of Macedon, took refuge in the island. Dtolemy, king of Eggypt, was afterwards lord of Cerigo; the Romans next came in posscssion, then the Venctians, and it followal the tate of the other islands of the Union. The relics extant denote the former greatness of the place; " Prelo Castro" ruin, to the northward of the harbour, stands on the ancient town of Menclaus, whose faithless wife Helen caused the siege of Troy, and whose bath is still shewn. Six miles from the harbour of St. Nicholns, on the east, was situate the former city of Cythera; and a little further to the south are situate some ruins, supposed to be'ong to a temple dedicated to Venus Cytherea.

The island is oval-shaped: at the north is Cape Sparti, having a chapel on its extremity : to the south is Cape Kapello, close to which is situate the harbour, and immedintely above the chief town called Kapsali, and containing about 5,000 inhabitants, whose tenements offer a marked contrast to the other islanders', being mostly of wood, and ill constructed.
VI. We have no carly censuses; according to the Colonial Office Returns, the following shews the-

Population of the Ionian Islands since 1824.

＊Included in the total number of population．

It will be seen from the foregoing，that the present population of Corfu is upwards of 65,000 ，from which it would appear that the number of inhabitants within the present century is on the inerense，as shewn by the following census，taken in November 1802：－

## Within the Toun．

Men，Women and Children ol the Greek persuasion， 4，700；do．do．Latill，1，600；do．do．Jewish，1，229； total within the town， 7,529 ；in the suburbs of St． Rocco， 508 ；do．Manduchio，do．do． 1,829 ；do．Po－ tamo，do．dJ．2，192；do．Castrades，2，160；total in the town and suburbs，14，218：population in the 24 midland villages， 7,706 ；do． 44 northern，do．do． 12，660；do． 34 southern，do．do．5，169；do．Island of Fano and Merlice，do．do． 773 ；total population， 44，926．
The classification of the inhabitants in the town was as follows，according to the same census：－

A curious table of the Roman Catholic inhabitants of the city of Corfu，for 51 years，viz．from 1770 to 1820，inclusive，was prepared by Dr．Benza，and the following is an abstract of $n$ voluminous series of reports ：－Years， 51 ；Born－males，3，071；females， 2，750；total，5，821．Dead－males，5，109；females， 3,217 ；total，8，326．Died more than 90 years old－ males， 35 ；females，36．Died more than 100 years old－males， 5 ；females， 3 ．Born twine and nore， 44. Marriages， $\mathbf{2 , 2 3 5}$ ．So that the marriages were to chil－
dren born nearly as 1 to $2 \frac{1}{2}$ ，and twins stand to ma riages as 1 to 50 ，and to births as 1 to 132 ．

The deaths in this table bear no proportion to the murringes and births．They exceed the latter by 2，505．

The lonians partake in some general features of the Greek physical configuration．The upper and front parts of the skull are well developed；the fea－ tures are，in genernl，pleasing，nid wear an air of in－ telligence．The complexion，in henlthy persons，in． clines townrds olive；and in some of the females， who are not exposed to the sun，it is clear and white． The complexion of the peasantry is，of course，much atfected by the sun．Those who reside in the Lef－ chimo district in particular，and in the neighbour－ hood of marshes，in general have a siekly leucophleg． matic cast．The eyes are almost universnlly brilliant and full，in both sexes，and generally dark－coloured； the teeth good；the hair generally brown or black， and bushy in the men；the beard copious；the figure of the middle standard－sometimes beyond it，－nnl，it not indicative of strength，promising ac－ tivity．The constitution sanguineo－choleric；the gestures vivacious；the gait erect and elastic，and the enuncintion voluble and emphatic．（Sce Colonial Library，vol．vii．）

The females，are，in general，well formed，many of them handsome，but they soon fall into years．

VII．The Greek Church is the predominant faith ef the ishonders，the followers of the latin or Ramish faith locing few，probably not exceeding 3,000 ；of Jews there are about 5,000 in the island，all of whom are cordially linted by the Corfiots．The Romish Church was introduced into the island by the Vene－ tians，and at first was only a bishoprick，but Pope Gregory，in 1600 ，elevated the see to an archbishop． rick；the chief being generally a noble Venetian， chosen by the Senate，whose nomination was at－ tended to by the Pope．The cathedral has a chapter composed of six canons，who elect a grand ticar．The clergy of the Latin Chureh were heretofore paid by government stipends，but excepting life interests， this system has been now discontinued．

The Greek Church has for its head a protopapa （archpriest），elected by ballot in an assembly of the clergy and nobles，and confirmed by the patriarchat Constantinople．［For a description of the ritas

Ecceslastical Return of the Number of Churehes and Chapels in the United States of the Ionian Islauds, on the 31 st beecmber 1836.

- Total expense of Latio Church, 1,010l. 15s. 2dd.

In the Istand of Corfu there is a dissenting preacher, of the ladependent denomination.
VIII. At Corfu there is a public university, also an ecclesiastical seminary for the education of young men intended for the priesthood of the Greek Chureh; and in each of the islands of the state is a school entitled "secondary," maintained at the public expense, in which secondary schools the scholars are instructed in the Greck and Latin classics, in the modern Greek, English, and Italian languages, in arithmetic, and the clementary mathemntics.

In the chief town of cach island is a central school, likewise at the government expense, on the mutual instruction plan, for teaching reading, writing, and arithmetic; and in these schools the village schoolmasters are trained in the method of mutunl instruction. Besides these schools entirely at the public expense, there are in each island district schools on the same plan as the central, and where similar instruction is given; one half of the salarica of teachers being paid by Government, and every other expense defrayed out of the subscriptions from the parents of the children.
The district and village schools are under the immediate superintendence of the head master of the central school in each island, and there is an inspectorgeneral of all these schools.

Schools, \&c. of the lonlan Islands. [B. B. 1830.]

The whele of the establishment for education is under the general direction of the commission for public instruction, revised and improved by Lord Nugent. The number of public schools in the islands, in 1834, was 32, and of private 206 ; the expenditure of Government $6,171 l$. The male scholars in public schools, 1789; of femules, 117. Ditto in private schools, males, 4,583; females, 826 . Total in all, 7,315. For details see Hist. of the Colonies, vol. v.
Libruries.-A collection of books, originally founded at Messina, in 1810, by British officers, and transferred to Corfu by them, has, since that period, gradually increased into a very respectable library of several thousand volumes, containing many valuable and well-selected books, to which a very rendy aceess is at all times allorded. All military and naval officers, officers of the civil departments, British residents, and respectable inhabitants, may become inembers at a moderate entrance, and a small annual or monthly subscription.

Besides this library, the medical officers of the garrison have a collection of English periodical publications and standard works.

A small library was founded by the Canon Carale, from voluntary subscriptions among the nobility, \&ce. The books were lodged in the Franciscan Convent of St. Giustina: to this the Ionian Academy added theirs; but on the arrival of the French, the most valuable of the books were abstracted by them. Some few remain at the convent.
A Bible Society was instituted in the aummer of 1819, for the purpose of distributing the translations of the Scriptures into the Greek language, without note or comment, and there can be no doubt that much good will be derived from it by the islanders, for whose benefit it is intended.

The goals scem to be well managed; wherever the localities will admit, the debtors are separated from the felons; the cost for each prisoner is ahout ide. per diem; the average of hard labour is nine hours per dienn, regolated according to the season. In CephaIonia those who work at the hand corn mills receive half of their earnings, the gnoler one quarter, and the remainder is paid into the police chest. The prisoners are supplied with coarse clothing.
X. The civil govermment is now composed of a legislative asscmbly; of a senate; nud of a judicial nuthority. The Lacuislatire Assembly consists of forty members, ineluding the president: of the forty, deven are inturgal members, and twenty-nine elected from the various islands in the following proportion: Corfu, seven; Cephalonia, seven; Zante, seven; Sunta Maura, tour; lthaca, one; Cerigo, one; laso, one. Fach of the three last in the rotation in which they stand (exclusive of that island whose regent hecomes an integral member of the legislative assembly) elects a second. The members mre elected (on a double list formed by a majority of the votes of the primary council) ont of the body of the syndita of each island. [Chap. iii. Art. 8. Constitutional Charter, Appendix.]

The elections, and all civil appointments, are valid for five years: and the session of the parliament of the states is held every two years.

The votes are vird voce, and the sittings open; ten members, and the president, or vice president, eonstitute a legal meeting; and conferences with the semate, \&e. are managed by the eleven integral members of the assembly, who form, with their president, the primary council. These eleven integral members in the case of parliament dying a matural death (that is, having run its full course of five years), consist of the president and five members of the old senate; the four regents of the great island during the late parliament; mill of one of the regents of the smaller islands; but in case of a dissolution, instead of the regents, the lord high commissioner nanes five members of the late legislative assembly.

The Semate, which forms the excentive power, is composed ot six, viz. five, and a president, entitled " His Hiohness;" while the senators are styled the "Most Illustrious" (Prestantissima); the senators are cleeted out of the body of the legislative assembly in the following propurtion, viz. Corfo, one; Cephalonia, one; Zante, one; Santa Maura, one; Ithaca, Cerigo and laxo, one. The power of placing a member of the assembly in nomination for a senator
rests with the president, on an application being made to him in writing, signed by four members of that body and himself, demnoding such nomination; and the president shall phace in momimation any pro son when eight members make a demand; the cle tion take's place three days at furthest after the meet ing of the assemilly, and is decided by the majority of votes, the president ensting in case of an equality The sanction of the lord high commissioner is neces. sary to the validity of the election. The vacaacies thus caused by the election of five members of the assembly to the sematorshij) are filled up by the trans. missiom of double lists of mames from the prianry council to the syndita of each island. The senate remain in ollice tive years; his highness, the president, half that period, eligible however to be re-appointed by the lord high commissioner. The senato names its own ministerial otlicers, with several exeeptions, nud it las the power of nominating to all situations under the general government; the regent to the different local govermments; the judges in all the islands; and generally to all situations, excepl merely municipal ones, with certain renovations. During the recess of parliament the scmate has the power of making regulations which have pro tempure the force of laws; it has the power of originating laws, as well as disallowing any passed by the legislative ussembly.

The lord high commissioner is appointed by the colonial olfice, and is generally a military otiour; Ilis lixcellency appoints in each island a resident, or representative, of the lord high commissioner, who is a tield utlicer of the regiments on duty in the islands. The regent, advocate, fiscal, secretary, and archivist of each island, are appointed by the senate, subject to the approhation of the lord high commissionce. The municipal administration of each island consists of tive members, independent of the president (who is the regent), appointed by the syudita of each island ; out of the body of the said syndita, from " lists" of names sent in to the regent by the syndita from these " lists ; " and from these ten, five ane selected by the Regent to form the municipal body. (See Ch. iv. Art. 9, Constitutional Chater.)

The qualitications of the syndita, or " noble detors," I have not been able to ascertain with any aco coracy; I understand that some votes are herediart, but that pursuing any trade or business is a disqualification.
'To form a legal meeting one half of the syndita of each island must be present. For the other details of

IONIAN ISIANDIS.-GOVERNMENT AND MLITTARY
this unique form of government, I refer to the Charter. for the respective powers of the assembly and se. natc, [See Constitutional Charter in the Appendix.]
The judicial authority in rach island consists of three tribunals.-a civil, a criminal, and a commer. cial: and there is a court of appeal in ench island: the juages being appointed by the semente, subject to the approval of the lord high commissioner. Intependent of these conrts, there are in each island trihumals for the trial of minor criminal offences, and for the adjuilication of small civil suits; these are presided over by justices of the prace for the island, appointed by the regent of the same.
At the seat of government there is, in addition to the forgoing courts, a superior or high court of apwal denominated " the Supreme Comeil of Jnstice," and consisting of four ordinary members (judges) two linglish and two Greek, and two extraordinary members, viz. the lord high commissioner, and his highess the president of the senate. lior the power of the courts, see the Constitntional Charter. Trial by jury does not exist; nor are there any assessors to nid the judges. No crimes hut those of murater and high treason are pumishable with deuth,-which intliction is now rarely suffered.
The laws were partly Venctinn, partly Greek;-n eode has now been digested for the islands, and is much needed, particularly as regards the law of entail now abolished, and that singular enactment by which a purchaser was compelled to restore a property to a selter several years after the bargain, for the same price at which it was vended, if the vender teuder the original sum ; a measure that of course struck a hlow at all improvement.

Militury Establishment. - Article 1. The military defence of the United States of the Ionian Islands being placed in the hands of the protecting sovereign, the sole regular military establishment shall consist of the forees of His Majesty.
Article 2. Independent of the regular troops of His Msjesty the protecting sovereign, there shall be estahlished in each island a corps of militia.

Article 3. The orgamization of the militia of the United States of the lonian Islands shall be left to the Commander-in-chief of the forces of the protecting sovereign within the same, subject to the apprubation of the Senate, and of his lixeelleney the Lord High Commissioner of the protecting sovereign.
Article 4. The general charge of preserving the tranquillity of the country being immediately and directly connected with the military establishment, the high police of the United States of the Ionian Islands shall be placed under the direct management of his Excellency the Lord High Commissioner of the protecting suvereign and His Majesty's Commander-inchiet.
Article 5. No officer call be appointed to any corps of the militia of the lonian lslands who is not a na-tive-born subject of the same.
Article 6. Ilis Majesty the protecting sovereign shall appoint inspectors and sub-inspectors of the militia of the Ionian Islands, who shall be either British or Ionian oflicers.
Article 7. The corps of the militia of each island shall be placed under the control of the inspectors or sub-inspectors of the militia appointed by His Majesty the protecting sovereign.
Article 8. The regular forces of His Majesty the protecting sovereign shall, in all instanees of civil suit, be amenable to the laws of the land within the United States of the Ionian Islands.

Article 9. The regular forces of the protecting sovereign in these states shall, in respect to criminal jurisdiction, be alone subject to the martial law of His Majesty.

Article 10. The militin within these states is of course subject to the laws of the land; but when it shall have been duly organized and called out, it shall be amenable to the martial law of the protecting power, and linhle by it alone, to be tried for criminal offenees.

Article 11. The regular estnblished number of His Majesty's troops for the garrison of these islands shall loc considered as consisting of $3,000 \mathrm{men}$; but it shall be competent to inerease or diminish that number, as II. M.'s Commander-in-chief may deem fitting.

Article 12. All expenses of quartering the regular forces of His Majesty the protecting sovereign, and, generally speaking, all military expenses of nuy kint to be incurred h; thesestates, (as far as relates to the 3,000 men above named), shall be paid out of the general treasury of the same.

Articless and 6 teturem Great Britain and Russia Soc., respecting the Iomian Islonts, signed at P'aris 5th Noremher 1818:-
In order to ensure without restriction to the inhabitants of the United states of the lonian Islands the advantages resulting from the high protection under which these states are placed, as well at for the exercise of the rights inherent in the said protection, His Britannic Majesty shall have the right to oceupy the fortresses and places of those states, and to maintain garrisons in the same. The military force of the said United States shall also be under the orders of the Commander-in-chief of the troojl of His Britannic Majesty.

His Britanuic Majesty consents, that a partieular Convention with the Government of the said United States shall regulate, according to the revenues of these states, every thing which may relate to the maintenance of the fortress already existing, as well as to the subsistence and payment of the British garrisons, and to the number of men of which they shall be composed in time of peace. The same Convention shall likewise fix the relations which are to exist between the said armed foree and the Ionian Government.

The military force of the British army in the islands is ahout $3,300 \mathrm{men}$.

There are six barracks for the garrison at Corfu, viz, one in the citadel, one at Fort Raymond, one at Fort Neuf, and another for a small detachment at Vido Island. The bairnck in the citadel is a very good stone building of four stories, including the lasement story, situated at the foot of the rock on which the citadel is built, and open to the north.

XIII．Amount of Coin in Circulation．－－［P．B．1836．］in grains troy， $416 \frac{1}{2}$ ；alloy per cent． 9 ；rate esta－ －The only coinage in the States is a small currency to blished per tariff， $4 s .4 d$ ．Mexican，Bolivian，Pcru－ the amount of $11,000 l$ ．sterling ；viz．－Silver quarter－ shillings，1，000l．；copper quarter－pence，6，000l．； copper one－tenth pence， $4,000 \mathrm{l}$ ．
The general circulating medium is in dollars，Spa－ nish，South American and Austrian，in which de－ scription of coins mostly，the States receive lor sta－ ple produce，exported to the amount of about $275,000 l$ ．sterling annually，exclusive of returns from a considerable capital employed by ship－owners in the Levant trade；remittances received for the suh． sistence of the truops，\＆c．，and in Spanish dollars pay lor the article bread corn alone，imported into the States from the 13lack Sea and in Italy，to the amount of about $170,000 l$ ．st．per annum．The quan－ tity of bread corn grown in the islnnds being equal to one－fourth only of the eonsumption．
Since June 1825，British silver to the amount of 95，000l．sterling，has been received from England and thrown into circulation；but judging for the neces－ sity of pulblic duties and rents，and recent state of balances in the respective treasuries，the total amount of British silver now remaining in the Stntes，does not exceed 20,000 ．sterling；and there has been withdrawn from circulation of this description of money 75，000l，sterling for remittances to Malta，\＆e． by regiments returning to England，for payment of artieles imported by British trading vessels，and ocen－ sionally for payments of produce of the Morea．
Coins．－［B．B．1836．］－Gold，Spanish doubloons， aubdivision of coins in circulation，$\frac{1}{2}, \frac{1}{4}, \frac{1}{n} ;$ Gross weight in grains troy， 4162 ；rate established per tariff，3l．63．British currency，alloy per cent． $6 \mathbf{2}-3 \mathrm{ds}$ ． Spanish pillared dollars，$\frac{1}{2}, \frac{1}{4}, \frac{1}{2}, 1-16$ th ；Gross weiglit
vialı，Chilian，and Rio de la Plata dollars，rate es－ tablished per tariff，4s．4d．Inıuerial Austrian dol－ Inrs，subdivision of coins in circulation，$\frac{1}{2}$ ；rate esta－ blished per tariff，4s．2ti．Venetian，St．Mark dollars， subdivision of coins in circulation，$\frac{1}{2}, \frac{1}{4}, \frac{1}{8}$ ；gross weight ill grains troy，432；nlloy per cent．164；rate established per tariff， $4 s .2 d$ ．Ionlan currency，pieces of（rate estnblished per tariff）， $3 d$ ．Copper Ionian currency，pieces of（rate established per tariff）， 1－10th．There was 10 paper money in 1836.

The following rates of exchange may be quoted as ncarly stationary for some months past nt Corfu ：－ London， 51 1－4th per dolinr，at $4 s .4 d$ ．；Trieste， 2 1－8th florins，4s．4d．；Venice，6 1 －6th lire of Aus－ tria， $4 s .4 l$. ；Ancona， 1 scudo，4s．4d．；Naples， 128 grains， $4 s$ ． $4 l$ ．Government bills if pald for in lritish currener，int the rate of $100 l$ ．for 101l．10s．currency， when segociated for dullarsnt（ dollar．

## Weights as established by Act of Parliament，dated

 24th May 1828．－［B．B．1836．］The British imje－ rial troy pound of 5,760 grnins，to be the only stand－ ard of weight； 24 of such grains to be a＂calco ；＂ 20 ＂Caldic，＂nn ounce ；and 12 ounces a＂Lil＇ura sottile，＂or pound light weight for precious nictals nnd drugs；and 7，000 of such grains a＂Libbra Grossa＂or＂Pound great weight，＂equal to the Eng－ lish pound avoirdupois，with the parts and multiple of 16 drams an ounce， 16 oun－es a pound，nnd 100 lbs ． a Talnnto．Measures，as establishel by Act of Parliament，dated 24th May，1828．－The british imperial standard yard to be the only standard measure of extension；one－
third of the said yard, a foot; one-twelfth of the said foot, an inch; five and a half such yarils, a caroaco; 220 such yards, a stadio; and $1,7 \mathrm{fi0}$ such yards, a mile.

The British inpucrial gallon to be the only standard measure of capreity ; the Chilo measure for grain to contain 8 of such gallons, or 64 dicotoli; and the lonian barrel to contain 16 gallons, or $12 \gamma$ dicotoli.

In the islands of Corfn and Zante，soap to the value of about $12,000 l$ ．sterling is made and exported annually；also considerable quantities of common carthenware．The other manufactures of the states are silk shawls，conrse linens，coarse woollen blankets， and goat－hair carpets nud sacking．
Agriculture is yet extremely rude，and the instru－ ments of tillage us primitive probably as in the time of Ulysse．．The olive is the principal product．
The vine is generally planted in the plains und val－ lies，and com on the declivities of the hills．The ex－ port duties are on oil and currants is per cent．al
vul．；and $1 \frac{1}{2}$ per cent．acl val．for repair of roads，\＆cc． on wine， 6 do．；on soap， 8 do．；all other articles are free．
［There is a Regent at cach ishand with 300 to $400 l$ ． per an，each，and styled＂Most Excellent；＂and 4 or 6 municipnl magistrates with salaries of abont 100 ． per an．cach．The president is styled＂His Highness，＂ and has a salary of $1500 l$ ．and a house：there are 5 semators styled＂Most Excellent，＂with 765l．per an． each：the Legislative Assembly of 37 members have each 108i．per an．，und the l＇resident of the Assembly 6001．per an．］

## CHAPTER IV．－HELIGOLAND．

Section 1．－The island of Heligolnad，in the North Sen，is situated in 54．11．N．latitude and 7．51．E． longitude of Greenwich，nad is from 24 to 26 English miles distant Irom the mouths of the Elbe，the Eyder， the Weser and the Jahde．It is of considernble im－ portance to vessels bound to these rivers，not only because its church and lighthouse are an udminable beacon，but also because ships may here be supplied with experienced and licensed pllots．
1I．In August 1714，the island was conquered from the Duke of Sleswick by the crown of Denmark， whiell retained possesslon of it tlll the 5th September， 1807，when it was occupied by the Engliah，and in 1814 was formally ceded to Great Brituin，under whose government it still continues．

III．The island，which is in the form of an acute angled triangle，is now only about one English mile in length from N．to S．，oue－third in breadth from E．，to W．，and two miles and onc－third in circumfe－ rence．It is certuin that it was anciently of much greater extent，but there are no authentic records to determine how far it may have stretched into the sen and nipmoached the continent．

The island consists of the upper part，called the Oherinnd，and the lower，or Unterland，which lies in a south－easterly direction．The height of the Ober－ land，int its most elevnted point on the western side． is $\mathbf{3 0 0}$ leet above the level of the sea，the eastem side being lower．The island is visible at a distance of 16 and 20 miles；its lirst appearance is very striking， 411
and it increases in ithe est on a nearer approach. [For Geology, \&c., see "Colonial Library," Vol. V.]
IV. The climate is mild, and resembles that of the midland counties of England, the heat and cold being tempered by the sea breezes; the air is pure and very salubrious, whence Heligoland has been much frequented by visitors from all parts of Germany, Prussia, Poland and Russia, since the ercction of the baths in 1826 ; they are considered by physicians as the most efficacious in the North sea.
V. The number of inhabitants is 2,200; namely, 1,000 males, 1,200 females. In 1836 -births, 52 ; marriages, 23 ; and deaths, 32 . The population, which is increasing, is considerable for so small a spot, especially as many families have emigrated within the last 20 years from the want of employment at home. They are chiefly engaged in the fishery or navigation, and many also are brought up ns pilots. There is a brewery and a distillery, and the number of mechanics and shopkeepers is commensurate to the wants of this small colony. The number of houses is 470. The Heligolanders are of Frisian origin, and speak a dialect of that language, but at church and in the school the High German alone is used. They are a tall and strong people, with handsome features and florid complexions; their habits are very simple, and their inactivity and fearfulness on shore as remarkable as their industry and daring courage at sca.
VI. There is one church, St. Nicholas, built in 1685, situated in the Upper Town, capable of containing from 700 to 800 jersons; about 250 gencrally attend. The clergyman receives $74 l$. per annom, and has likewise a house found him, together with two pieces of ground, one 48 fathoms long and 27 broal, and the other 140 fathoms long and 13 feet broad. There is no chapel.

The junior clergyman instructs the upper class in the scho : ; the other two classes being taught by two schoolmasters. The total number of chitdren in the schools is about 350 .
VII. There is one school, which is public, sitoated in the Upper Town, and contains 158 male and 162 female children. It is conducted by three masters; the head master receiving 74l. per annum; the second master, $30 l$. per annum; and the third master, $20 l$. per annum. The school is supported by voluntary contributions, and a fixed sum of $5 s .4 d$. per annum for each child, which meets the expenses.
VIII. There is a building used as a prison, situated near the top of the steps in the Upper Town, which contains four cells, hut there have been 10 prisoners of any description this year. [13. B. 1836.]

1X. By virtue of the capitulation concluded with Admiral Russel, in 1807, the inhabitants were permitted to retain their ancient constitutions and the Danish laws, an agreement which has been strictly adhered to. The affairs of the island are administered by a governor (at present Colonel Sir llenry King, Knight of the Goelphic Order), and under him is a court composed of six municipal councillors, who are chosen from among the inhabitants. The finances and police are superintended by 16 elders, and 8 ad. juncts, who with the municipal councillors constitute the government.
X. The local revenues of this island, taking one yenr with another, are about $160 l$. per annum. The
amount so raised is principally by granting licenses $t_{0}$ ahopkeepers, pilots, and other persons following any trade or businesa to enable them to carry on their respective occupations; rating each person in proportion to the extent of his business.

The expenditure of the island is about 1601 . per annum. Its disbursements are principally for the payment of the interest of the island debt, for the erection and repairs of bulwarks, and for keeping in repair other buildings the property of the island.
Estimate of the sum which will be required to defray the expense of the Civil Establishment of Heligoland, for the period from the ist day of April, 1838, to the 31st day of March, 1839:-
Lieut.-Governor, 500l.; Clerk to Lieut.-Governor, 136l.; two Clergymen, at 50l., 1006.; Town Clerk, 60l.; Signal Man, 60l.; Buoy Keeper, 33l.; Mail Carrier, 69l.; Keeper of Blockhouse, 3l.; total, 9631. This estimate is for the same amount as that for the preceding year.
XI. There are eight or nine vessels of 50 or 60 tons each, which perform voyages to England, France, Norway, and the Baltic Sea; and about 60 open fishing boats of three or four tons, and small boats for the lobster fishing.
XII. Prices of produce in 1836 ; Beef, $3 l$. per lb.; mutton, $3 d$. per lb. ; Potatocs, 1s. per bushel; coffee, from $6 d$. to $1 s$. per lb .; tea, from $1 s$. to $5 s$. per lb .; lump sugar, from $5 d$. to $8 d$. per lb. ; moist sugar, from $3 d$. to $4 d$. per lb. ; coals, $1 s$. Gid. per boshel.

There are no manufactories, mills or works, \&e. of any kind. There has been one ship built in the colony of 50 tons burthen. There are about 60 boats employed fishing for haddocks and lobsters; betwcen 70,000 and 80,000 of the former and about 27,000 of the latter are caught annually, the whole of which are sent to Hamburgh and Bremen, with the exception of 7000 or 8000 lobsters annually seut to Eng. land; value of haddocks, $3,333 l$.; value of lobsters, 675l. ; total, 4,008l. There are no hoises end only 6 horned cattle, 150 sheep, and 4 goats in the island.

Juring the system of the continental exclusion from 1807 to 1814 , the possession of Heligoland was of the utmost importance to the English Government, as it enabled them to watch all the motions of the enemy in the countries lying on the coast ; and gave them the command of the mouths of the rivers which permitted them to protect the commerce of British subjects with the neighbouring states, while the island at the same time served as a depot for their goods, which were offered for sale, or sent to dillerent parts of the Continent. At present Heligoland is of great service to navigation from its conspicuous lighthouse, from the able pilots who may always be obtained there, and from the anchorage it allords to shipping. This anchornge inight be converted into an excellent harbour, which would aflord shelter to merchantmen and the government steam-hoats which touch at this island durmg the winter season to deliver the mails, which at the breaking up of the ice, are always for warcled by vessels of small draught.
[A tract ol about 5000 sq (unre miles on the Narth coast of the island of Bornco, the island of Fernando Po, Aden in the Red Sea, and Socotra islaud oll' Cape Gardatlui, have not been included in the Work.]

From this it appears that among every 1, , 00 white troops there have been 1,903 admissions into hospital

If reference be made to the proportion of admissions among troops in the United Kingdom, it will be found that there every man is under treatment about untry every 13 months ; consequently the cases of sichiless or admissions into hospital among white troops in this command are about twiee as numerous as when servii - in their native country. There is, howeer this marked distinction, that they are of so severe? eharacter, that 1 in 24 proves fatal, wherens in thi country only 1 death occurs out of every fit case treated.

The rations of the troops in the windward nad be ward command daring the period embraced in this report have consisted weckly of 7 lbs . of bread, 2 lbs of fresh meat, 2 lbs. of salt beef, 27 ounces of salt pork, 9 ounees of sugar, 10 ounces of rice, 5 ountes of cocoa, and $2 \frac{1}{2}$ pints of pens, for which the soldier pays 5 m . Prior to 1830 he was allowed a gill of rum, for which he was charged l ll. In most of the corps the soldier has but two meals; breakfast, eonsisting, of a pint of cocoa and his ration hread, and dinare, consisting either of the fresh meat made into broth, with vegetables, or the salt meat boiled into somp, with the peas, and eaten with yams or potatoes. In some instances there is also a supper meal, hut this is not common in the command.

It may be necessary to remark, that the deaths stated in the preceding table are only those which have occurred under medical treatment, or atter being admitted into the hospital, leaving still to be accountod for a considerable proportion who die suddenly, or from accincutal causes. The only means we have of aseertaining the number of these is by a comparison of the denths in the preceding table with those reported anmally to the War Ollice by the sumeral officers in this command, and which includts the deaths from all causes.

This omission, added to the ratio of deaths in the preceding table, increases it to $81 \frac{1}{2}$ per thousand, to which must be added invalids whu died at sea, or on their passage hameward; these have averaged about 14 ammally, or $3 \frac{1}{2}$ per thousand, thus making the mortality from all causes 85 per thousand of the mean strength.

This would be a fair estimate of the ratio of mortality anong this class of troops during the last 20 years, provided the streugth in the medieal returns had been accuratriy stated. But as this has, in most instances, been taken at the highest rate to which it attained in the course of the year, and not on the mean of each month, as it ourht to have been, we find, by a comparison with the War Olliee returns, that the strength has in this way been rated, by the medical authorities, about a tenth part hiogher than it ought to have been; consequently the above ratio of mortality must have increused in a corresponding
proportion, which will make it $93 \frac{1}{2}$ per thousand of the strength, or, in other words, about an eleventh of the force have died anmually.

From this statement, however, no definite idea can be conveyed of the insalubrity of the climate, till we compare it with the mortality which mas taken place among the same elass of troops in the United Kingdom. This has amounted, during a long series of years, to about 15 per thousand ammually; but, during the last seven years, it has, owiug to the prevalence of inIluenza and cholern, been about 2 jee thouswnd higher. Thus the mortality among troops in the winduad and leeward command has been six times as highas in the United Kingdom, though the exteat of sich. ness, as shown by the number of almissions into hospital, has only been twiee as grent. Frea this rate of mortality, high as it appears, is considerably las than during the previous 1.1 years, from 1803 to 1 slin when it was as follows:

* This abstaact is denived from a valuable mport by ('mpt. R. M. Tultoch, Joth regt., and Dr. Marsthail made to Government in $18^{\circ} \%^{\circ}$.

| $\left.\begin{array}{c} \text { Ratio of Deaths } \\ \text { per 1000 of } \\ \text { strength } . \end{array}\right\}$ | 117 | 2.49 | 277 | 114 | 128 | 146 | 99 | 168 | 146 | 99 | 73 | 74 | 96 | 157 | $\cdots$ | 138 |

Thus, during this period, 138 per thousand of the white troops in this command died annually, which is alout one half more than on the average of the last 20 years; so that latal as the climate still is to Europran tronps, it appears of late years to liave materially improved, particularly in Marbadocs, 'Trinidad, and Antigna. In this estimate we have carefully excluded the strength and deaths of the troops serving in the sittlements of Surinam, Martinique, Guadaloupe, St. Fastatia, St. Martin's, Santa Cruz, and St. Thomas, which were given uploy the British in 1814 and 1815, as a greate: mortality oceurred in these settlements, than in the others which now constitute the Windward and Leewnrd Command.
The extent of sickness and mortality during the last 20 years being determined, the next question is, by what disenses was it produced? With regard to those leaths unt included in the medical returns, we cum suphly no specific details.

The proportion eorporally punished in the Windward and lecward Command lins amominted, on the average of the last 20 years, to 50 per 1,000 annually. This is six times as high as in this kingdom; but the latter ratio has licen taken on the average of the last seven years, during which corporal punishment has
been very much restricted; while the former extends over 20 years, during the first part of which it was very common. The following table will show that it has gradually decreased in that command, till the ratio is now as low as in this kinglom:

|  | \|1817 | 1818 | 1819 | 1820 | 1821 | 1822 | 182:3 | 1821 | 1825 | 12826 | $1 \times 27$ | 182\% | 1829 | 18.30 | $18: 11$ | 18:12 | 18:33 |  | 1335 | 18.36 | Tot | Avg |

Blark Tronps and Piencers.-In this portion of our investigation we labour under the ditliculty of possessing no information regarding the mortulity to which this class of men are subject in their native country, which is the only correct standard wherely we can estimate with any degree of accuracy the inllaence of other climates on their constitutions. So lar as statistical inguiries have extended, however, there is no comntry, either temperate or tropical, in which the mortality among the indigemons civil inhabitants between the ages of 20 and 40 seems materially to exceed 15 per 1,1000 anr wally; and probably there is no country where tre,ns composed of the indigenous inhmbitants are subject to n higher rate. As in instance we may mention, that among the Malta Fencibles, comused of the natives of that island, the average mortality does not exeeed 9 per 1,000 amually; and among the Cape Corps, coinposed of the aloriginal inhblitants of Southern Africa,
it dnes not exceed 11 per 1,000 : while among the Madras mative troops it does not exceed 13, wor among those of Bengal is it more than 11 per 1,000 anmally.

Now, were the climate of the West Indies as congenial to the health of the negro troops as that of their native country, it may be inferred that the mortality would not exceed that of the Indian ariny, which is composed of men about the same age, emphoyed in the same description of military duty, and also in a tropical climate. In so far, then, as it exceeds that raie, it may fairly be attributed to the insalubrious inlluence of that climate on their constitutions.

It is by no menns extraordinary that African troops should suffer ns well as the whites from the elimate of the West Indies, secing that they are for the inost part natives of the interior of Africa, of which the climate is probably very ditterent: and it is well
known that, though the indigenous races of tropical as well as temperate climates are peculiarly fitted by nature for inhabiting and pcopling the respective portions of the globe wherein they or their forefathers were born, the effects of a transition to any other is in general productive of a great increase in the scale of mortality.

This fact is well illustrated by the following table of the admissions into hospital and deaths among this class of troops, serving in the West lndies during the last 20 years :-

Admissions into Hospital and the Deaths among the Black Troops and lioncers in the Windward und Leeward Command.

|  |  | 号 |  | Ratio per 1000 of Mean Strength. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Admitted | Dicd. |
| 1817 | 4287 | 39.7 | 197 | 923 | 46 |
| 1818 | $33 \times 9$ | 2903 | 126 | 857 | 37 |
| 1819 | 3351 | 2967 | 212 | 886 | 63 |
| 1820 | 28.58 | 2191 | 109 | 767 | 38 |
| 1821 | 2685 | 2139 | 107 | 797 | 40 |
| 1822 | 2533 | 2220 | 108 | 877 | 43 |
| 1823 | 2359 | 2325 | 88 | 98.5 | 37 |
| 18.4 | 2195 | 1883 | 6.4 | 858 | 29 |
| 1825 | 1678 | 1515 | 59 | 903 | 35 |
| 1826 | 1523 | 1444 | 65 | 948 | 43 |
| 1827 | 1543 | 1294 | 40 | 838 | 26 |
| 1828 | 1510 | 969 | 54 | 642 | 36 |
| 1829 | 1581 | 1171 | 73 | 7.40 | 46 |
| 1830 | 1520 | 1039 | 60 | 68. | 40 |
| 1831 | 14.57 | 995 | 53 | 683 | 36 |
| 1832 | 1379 | 1129 | 50 | 806 | 36 |
| 1833 | 1347 | 270 | 50 | 720 | 37 |
| 1834 | 1310 | 872 | 43 | 666 | 33 |
| 18.35 | 1241 | 825 | 46 | 665 | 37 |
| 1836 | 1188 | 756 | 41 | 635 | 35 |
| Total . | $4093+$ | 335:57 | 1645 | -• | -• |
| Average | $\underline{204}$ | 1678 | 82 | 820 | 40 |

Thus, on the average of the last 20 years, 820 have been admitted into hospital, and 40 have died, out of every thousand annually; so that the rate of mortality is at least thrice as high among this description of
troops as in the native army of the Fast Indies, Small-pox and eruptive fevers are the diseases most generally fatal.

It nav not, perhaps, be premature here to mention, that the same liabilities to a high rate of mortality seems to alfect negro troops in almost every quarter of the globe where they bave been employed. In the Mauritius, they die at nearly the same rate as in the West Indies; in Ceylon, where a considerable number was employed in the Colonial Corps of that island, the mortality was so high that they nearly hecanie extinct in the course of a few years, notwithstanding every care on the part of the military authorities to keep up their numbers; in Gibraltar, where the th West India Regiment was stationed for two or three years, 62 per 1,000 of the strength died annuall; ; and even at Sierra Lcone, on the sea-coast of their own continest, the mortality has averaged not less than 28 per 1,000 annually, being about double the ordinary ratio among other troops serving in their native country. This demonstrates beyond a donkt that the constitution of the negro can be but little fitted to adapt itself to foreign elimates, when even the transition from the interior to the sca.coast of Western Africa has been attended with such prejudicial effects.

The returns of the mortality among the negro slave population throughout the West Indies, sufficiently illustrate the unfavourable character of this chmate to the constitution of the negro, the proportion de. ceasing there, exclusive of Jamaica, heing 1 in 33 of the population annually; whereas in most other countrics, ol which we possess accurate statistical details, the mortality among the indigenous inhabitants is only from 1 in $4 ;$ to 1 in 50 annually; and this extra mortality among the negro population falls almost entirely upon the adults, ntgro children being in general remarkably exempt from discase. High as this ratio is among the slave population, however, we shall afterwards show it to be considerably less than among the troops, not in one, but in every colong throughout the command; a sufficient proof that alt the care and attention which can be bestowed on that race of men is quite unavailing to counteract the pernicious influence of a climate unsuited to their constitution.

Here, however, as with white troops, it is pleasing to observe that there has been a considerable diminution in the mortality during the period included in this report compared with the 14 previous years, when the strength and deaths were as follow:-

Strength
Deaths
Ratio of Deaths
$\left.\begin{array}{l}\text { per } 1,000 \text { of } \\ \text { Strength }\end{array}\right\}$

Thus the mortality among this class of troops on derable extent in Martinique, Guadaloupe, and the the average of these years was 64 per 1,000 annually, being one-half higher than during the last 20 years, so that to whatever cause it may be attributable, the mortality of the white and black troops within that period has diminished in the same ratio. The latte: as well as the former were employed to a very consiother settlements before referred to, and the strugth and deaths there have consequently been excluded in this estimate.
We shall now exhibit in the following table, the effect of the elimate of Jamaica on the health of the white troops stationed there during the list 20 years,
my of the Fast Indies, ers are the discases most
emature here to mention, a high rate of mortality s in almost every puarter a been employed. Ia the the same rate as in the ere a considerable number ial Corps of that island, that they nearly became ew ycars, notwithstanding he military authorities to Gibraltar, where the $t$ h stationed tor two or three strength died anmually; on the sca-coast of their ity has averaged not less , being about double the troops serving in their instrates beyond a dotbo a negro can be but little reign climates, whea even terior to the sca-coast of ttended with such preju-
lity among the negro slave West Indies, sufficiently character of this climate aegro, the proportion do. Jamaica, being i in 33 ut whereas in most other sess accurate statistical de. the indigenous inhabitatsts in 50 annually; and this e negro population falls Iults, negro children being apt from discase. High as e population, however, we be considerably less than one, but in cuery colony a sufficient prool that all h ean be bestowed on that vailing to counteract the climate unsuited to their

White troops, it is pleasing cen a considerable dimnu. ng the period iacluded in h the 14 previous years, his were as lollow:-

$\begin{array}{llllll}35 & 57 & 84 & \ldots & \text { fit }\end{array}$
gue, Guadaloupe, and the ferred to, and the strugth equently been exeluded ia
a the following table, the aica on the health of th e during the last 20 ycars,

Adinissions into Hospital, and Deaths among the white troops in Jamaica.

Fromi this table it appears that the proportion of ndmissions into hospital in the course of the year is rather less than in the windward and leeward command, heing 1812 per thousand oi the strength annually; that is, every soldier has an attack of some discase or other, twice in the course of thirtcen months.
Though the extent of sickness is less than in the windward and teeward command, the mortality is much greater. 'The preceding table shows it to be 121 per thousand of the strength annually, but this includes only those who died in regimental and detachment hospitals.

Black troops and Pioneers-it is to be regretted that the materials for estimating the inHuence of the elimate of this island on the constitation of black tronps are by no means so ample as ii: the windward and leeward command. We have already stated that in Jamaica they consist entirely of military labourers, with the exception of a small detachment of one of ${ }^{t}$ tire West India regiments. These labourers being less under medical superintendence than regular corps, it is only when their disease begins to assume a scrious, or perhaps fatal aspect, that they come into hospi'al ; at least we are led to suppose so from the extremely low ratio of admissions, as compared with the deaths in the following table :

Admissions into Hospital, and deaths among the Black troops serving in Jamaica.

Thus it appears that the mortality among this elass of troops in Jamaica is but 30 per thousand of the strength annually; so that the climate must be much morc favourable to their health than that of the windward and leeward command, where the mortality among the negro troops was asecrtained to have been 40 per thousand on the average of the same series of years.

The superior salubrity of this elimate for the negro race is corroborated by the mortality of the slave population being only 25 per 1,000 of all ages, white throughout the windward nud leeward command it is 31 per 1,000 of all ages. Thus, both in regard to black troops and the slave population, the mortality is about one-third less in Jamajea.

By an estimate which has been made of the mortality among this class ol troops, from 1803 to 1817 , it appears during that period to have averaged 49 per thousand amoually; but as the garrison at Honduras was then generally included in the returns of Jamaica, this afforls no accurate standard of comparison with the mortality in the above table, which refers to Jamaica alone.
lrom the high ratio which the Ieatlis, in almost every instance, bear to the atmissions, there ean be little doubt that all the slight cases of sickness have been onitted; we therelore decline drawing any conclusions as to the relative prevalence of cach class of diseases.

The following table will serve to illustrate the variable character of the climate, and the relative influence of mortality in each year, at the prineipal stations throughout the island of Jamaica.

Compnrutive view of the rntio of Mortnlity among the troops in each yenr nt these subordinate stations．

| $1 \times 23$ | 55.12 | 206 | 37 |
| 1824 | $6 \times 14$ | 213 | 31 |
| Total | 51290 | 1140 | 22 |

As, in this table, no distinction is made between those sent bome on accuunt of advanced age, or disabilities contracted in the climate, and those who merely required change of air for the recovery of their health, and were afterwards sent back to their corps, it is impossible to draw from it any accurate conclusions.
Since $1 \times 25$, however, the Returns of invalits from these two Commands have been kept separate, and n distinction has been made between those who were sent home and ultimately discharged, and those who recovered and rejoined their corps; by which menns we are enabled to supply the following details on that subject.

Tahle showing the Ratio Discharged annually, as Unfit for Active Scrvice, of White Troops in the Windward and Leeward Command.

| Total | 55530 | 1221 | 115 | 1336 | 24 |

The following Table shows that out of every thousand white troops there are 87 constantly ineffective from sickness in the Windward and leeward Command, and 63 in Jamaien, though the latter is by far the most unheulthy. This peculiarity arises from four-tifths of the mortality in Jamaica being caused by fevers which rapidly terminate either in death or recovery, and only one-fifth from lingering diseases, such as those of the lungs and of the bowels; whereas in the Windward and Leeward Conmmand, scarcely half of the deaths are caused by fever, and almost all
the others are by diseases which detain the patient long in hospital.

| Ratio per mean st | $\left.\begin{array}{l} 1000 \text { of } \\ \text { rength } \end{array}\right\}$ | 8.5 | $42^{\prime}$ | . | 637 | 83.4 |

The deaths in the Windward and Leeward Com. mand are exclusive ol about 30 which took phace among ollicers and clerks belonging to the Commis. sariat and Ordnance Staff, and have been kept dis.
tinct from those of the reginental grades wherever it was practicable to do so. They are also exclusive of 10, which occurred from accident, suicide, and other canses, not comected with climate.

Thus it appears that in the Windward and Leeward command, the average number ofolliecrs annually
under treatment has amounted to 8.45 per thousand, and the teaths to 42 per thousand of the strenth; while in Jannica the former has anoun' ad to $6.33^{\circ}$ ner thousand, and the latter to 834 per thousand of the strength.

Abstract, showing the Ratio of Mortality among the Negro Slave Population in each of the West India Colonies during the undermentioned periods.

George Roharts, Patrick Maxwell Stewart, and Alexander Stewart, the first 13 other directors of the said corporation, In adid. tion to the saill Chairman and deputy-chairman; and that the said Samuel Gurney, Charles Marryat, and Thomas Moody, shall be the first anditors of the sald corporation; and that the said chairman, deputy-chairman, and 13 other directors and aulitors shall continne in their respective offices until the half yearly general meeting to be holiten in the month of January 1838, and afterwnrils until others shall he duly elected in their steadin manner hereafter in that hehalf provided, unless they or any of them shail sooncr die, resign, or become disqualifed as herein mentioned; and that if before the snid half-yearly general meeting to be hatden in the said month of January 1838, there shall happen to be any vacancy or vacancies in the office of directors or andltors then the court of directors shail from time to time fill up such vacancy or vacancies so as to continne the number of directors at 15, and the number of anditore at three: And we do further order and ordain, that no proprictor shalt be eligihle or ofualified to act as a director or auditor of the said corporstion, unless he shall at the time of his clection be the holder of at least $. \pm 2,000$. of the capitsi stock of the said corporation; and if any director or auditor shall nt any time after bis election cease to be the holder of at least $\mathbf{x} 2,000$. stock, such person shall thereupon lmmediately cease to be a director or auditor, as the case may be: And we do further order and ordain, that the remmneration to be recelved by the chairman, deputy-chairman, directors, and auditors for the time being for their services, shall be fixed by the proprietors assembled at the general meeting to be held in the month of July ;837, or at some anbsequent half-yearly general mecting, and that any half-yearly general meeting shall from time to time tave power to vary the same; and further, that with the exception of the directors and auditors hereinbefnre named, and of any directors or anditors to be appointed by the court of directors previously to the half-yearly general meeting to be hodien in the month of January 1838, as hereinbefore is provided, alt directors and anditors shall he elected at a general meeting; and further, that at each of the half-yearly general meetiogs to be holden in the month of Jnnuary, in the years 1838 and 1839 respectively, five of the directors and one of the auditors, to be respectively nominated and selected for that purpose by the court of tirectors, or (in defaut of the making such nomination and selection) hy the majority of the qualified mprictors present at such half-yenriy general meetings respectively, and not dectining to vote, shall goout of office, and five directors and one auditor shall be elected or re-elected; provided nevertheless, that in case the five directors, or any of them, or the auditor, nominated and selected to go out of office at the meeting to be holden in the month of Jannary 18:8, shall be re-elected at that meeting, sneh directors or auditor so re-elected as aforesald shall not, on shall any director or anditor lected in the place of any of such last-mentioned directors or auditors, upon any occasional vacancy as hereinafter meniomed, be nominated or selected to go out of office at the half-yearly general neeting to be lolden in the month of January 3839 ; and furthe:, that at the half-yearly general meeting to le holiden in the month of January 18:80, the remaining five fifrectors, and the renaining auditor hercinbefore appointed, or the directors or nuditor (if any) elected in the place of them, ar any of them, on any occasional vacancies as hereinafter mentioned, shall go out of office, mut five directors or one anditor shall he elected or re-eleeted; mill further, that at the half-yearly general meeting to be holden in the month of January 1843, and at every haif-yearly general meeting to be holden in the month of January in overy subsequent year, the five directors and one of the aluditors who, for the time being, shail have heen the longest in office (reckenirg from the time of the last election of each directur or auditor) shall go out of office by rotation, and five tlirectors and one auditor shall be clected or re-elected; and further, that any director or auditor for the time being going out of office shall, if in other respects duly quallied, be consitered immediately, or at any time afterwarid, re-eligible to supply the plnce vacant by the going ont of office of himself or of any other director or autitor; and further, that upon any vacancy in the office of dircetor or auditor ater the half-ycarly general meeting to be holden in the month of January 1838, from any cause whatsoever (except that of going out hy selection or rotation, as aforesalid), the same shall be filled up elther at the first half-yearly general mecting which ahall be held after such vacancy shall have occurred, or at a special general meeting to he called and holden for that purpose, or for that and other purpobes; and further, that any person who ahall, in consequence of an accidental or occa. lonal vacancy, be appointed a director or auditor, shall be a substitute only for the person whose uiace he may supply, and dall be considered to have been clected at the same time, and ahall continue in office only for the aame period as the person whose place he may supply would have continued if he had not varated his oftice before the time at which he muat necessarily have gone out of office by rotation, or by such selection by the court of directors as aforeaaid; and that at every general annal meeting the directors and auditors going out of office on that day ahall, for ail the purposes of such meeting, be considered as continuing in such their respective offices until such meeting shall break up or adjourn; and further, that no person ahall, after the half-yearly general meeting to be holden in the month of January 1838, be capable of being elected a director or auditor of the sald corporation, unlesa the name of such person shall have been included in the list which the court of directors are required to cause to be posted up as hereinafter mentioned; and that not more than one candifiate shail be proposed by any one proprietor : And we do further declare and ordain, that upon any vacancy which, after the general annual meeting to be holifen in the month of January 1838, shall happen in the office of director or auditor, from any cause whatsoever (except that of going out by selection or rotation as aforesaid), the court of diructors shall, at least 30 days before the meeting at which such vacancy is to be flled up, give notice of the vacancy, by advertising the same in some daily morning newspaper, printed and circulated in London ; and shall atate in such advertiaement, that every proprietor intending to become a candidate, or to propoae some other proprietor as a candidate for the vacant office of director or nuditor (as the case may be), must, within 10 days from the time when such advertisement shall be inserted, signify, hy some writing under his or her hand, to be left within the same 10 days at the office of the said corporation in London or Middeaex, either his nwn intention to become a candidate, or the name and place of nhode of the candidate intenied to be proposed by him or her; and that thereupon the court of directors shall, at least i4 days before the day on which the election of such director or auditor (as the case may be) is to take place, canae the name of every canditate for the nfice of director or anditor, (and in every case where any auch candidate shall be proposed by any other proprictor, compled with the name of the candidate proposed by him or her), to be fairly written out or printed in one list, which sliall be josted up in some conspicuous part of the office of the said corporstion in London or Miditiesex, and be there kept posted up until the time of the election: And we do further will and oriain, that the chairman and deputy-chairman of the corporation respectively, shall from time to time be elected from amongst themselves, by the court of Directors for the time being, and for such period as to them shall seem meet : And we do further will and nriain, that any moniber of the said court of direc tors, or any anditor, may at any time vacate his office, by sending his resignation in writing to the office of the sald corporation; and in case any member of the salit court, or any anditor, shall, during the continuance of his respective office, by transfer, forfelture, bankruptey, or otherwiae, reduce the amount of stock held by him in the said company below t 2,000 , or otherwiae shall become disqualified to be a member of the sadd cont, or shall be removed by any genera mecting as afuresaid, then, and in every such case, the office of such member of the said court, or of such auditor (ns the case may be) bhall instantiy become vacant: Anil we do further will and uriain, that the court of directors of the anid cor porstion shall meet one day in every month at the least, and at auch otier times as they shall think fit and proper; and any one of the said directors may at any time call a meeting of the said court, hy notice in writing sent tu the residence counting-louke, or office of every member of the naid court, but no business shall be transacted at any meeting of the said court, unless five members shall be present, and that all queations at any court shall be decided by the votes of the majurity in number of members present; and that at every court the chairman, or in his alisence the deputy-chnirnnno of the corporation, ahall be chairman of such comrt, ant in the alowence of both thoso officers some other member of the anid court shall he chosen chairman of auch court, by the members present; and in case of an equal division of votes, such chairman of the court for the tinse being shall have the casting vote, besides his owil vote; mad that the proceenings of every court shall be entered in a book, to be kept for that pirpose, and be signed hy the member th the chair; and further, that the said court of directors shail have fuli power to direct, mamage, superintend, regulate, and control all the affair and concerns of the said corporation, and to appoint all the rgents, officers, nad servants thereof, as well in the United Kingdom of Grent lritain and Ireland as abrond, and to fix their respective salaries or wagen; and from time to time to remove or ilischnrge any much apents, officers or servante, and to appoint others in their stend; anil to make snels rules nicra, andi bye-laws for the pood government of the sadd corporation, nud of their said agents, officers, and servants, and generally for the superintendence and manapement of the sald corjoration, and from time to time to alter nad repent the said rmes, order, and reguintions, or any of them, in such manner as the sald court siail from time to time think expedient or proper; provided always, that all aneh rules, orders, abd bye-faws as shall from time to thme be in force shinil be fairly保 Mldillesex, and open to the inspection of the sadd directors and other joroprietors at all season'ble times: And we tio further
ordain and deciare, that in all cases where the provisions and regulations contained in these presents shall not be appllcabie to the local situation or cireumstances of such subscribers or proprietors, or other holders of any share or shares in the capital of the said corporation, as are or shall be resident in or at any of the several islands and colonies herelnbefore mentioned, or elsewhere than in the United Kingdom of Great Britain and Ireland, it shall and may be lawful for the court of directors, from time to time, when and as often as occasion shall requalre, or they shall think fit, to make all such rules or bye-laws, regulations, and provisions relative to any such aubscribers, proprictors, or holders as last aforesaid, and with regard to their respective shares sad interests in the capital of the corporation, as the circumstances of the case or cases for the time being to be provided for shall, in the judgment and at the sole discretion of the court of directors, appear to demand or require; and from time to time to alter, vary, and repeal all or any of anch rules, bye-laws, regulations, and provisions, and to make others in their stead: And we further will and ordain, that the court of directors shail appolnt the place and hour of holding every half-yearly general meeting, and shall cause at least 21 days' notice of every half ycarly general meeting, and It days' notice of every adjourned general meeting which sball adjourn for a longer time than two days, to be given by advertisements in manner aforesaid; and further, that (aubject at all times to the rules, orders and directions of the general mectings of the said corporation) the said court of directors shall have full power to order and dispose of the custody of their common seal, and the use and application thereof, and exeeute all the powers hereh given to the said corporation; And we do further will and ordain, that the said court of directors shall have power, from time to time, to call for the amonnt subscribed by the several subscribers and propriators for the time being, which amount shall be paid by the said subscribers and proprietors at such times and places, and in such sum or sums, as shall be ap pointed by the said court, so that no such call shall exceed the sum of $\mathscr{C} 20$. for every $\mathcal{E} 100$. subscribed; and $14 d s j s$ notice, at leant, shall be given of every such call as aforesaid, by advertisements in two or more of the daily moraing newspapers printed and circulated In London: And we do further will and ordain, that the respective bodies and persons whoshall be proprietor or proprietors of any stock in the said corporation shall pay the sum or sums by them respectively subscribed, or such parts and proportiong thereof as shall from time to time be called for by the court of directors of the said corporation, by virtue of and agreeably to the powers and directions of this charter at such times and places, and in such manncr, as shall be directed by the said court, ; and in case any body or bodies, person or persons, being 6 subscriber or subscribers, or proprietor or proprictors, of any share or slares of the capital atock of the said corporation shall neglect or refuse to pay his, her, or their rateable or proportionable part of the money called for as aforesaid, at shail neglect or refuse to pay his, ther, or their rateabie or proportionable part of the money called for as aforesaid, at
the time and place appointed by such court, or within 30 days next ensuing, he, she, or they so neglecting or refusing the time and place appointed by such court, or within 30 days next ensuing, he, she, or they so neglecting or refusing
shall forfeit and pay the sum of five pounds for every $\mathcal{E} 1000$. he, she, or they shall have subacribed or held, or be shall forfeit and pay the sum of five pounds for every $\boldsymbol{\mathcal { E }} 1000$. he, she, or they shall have subacribed or held, or be
entitied to, in the capital of the said eorporation, and in case such person or persons shall continue to neglect or refuse entitied to, in the capital of the said corporation, and in case such person or persons shall continue to neglect or refuse
to pay his, her, or their ratcable call or calls as aforesaid, for the space of two calendar months next after the time so appointed for payment thereof, then and in every such case it shall be lawful for the said court of directors (whether they shall or shall not previonsly have sued for the same as hereiuafter mentioned, if they shall think proper), to declare that the respective shares of the capitai stock of the said corporation heid by the body or bodies, person or persins so refusing or neglecting, shall be forfeited, and thereupon the eaid share or shares, and all the profits and benefits thereof, shall be forfeited to and become vested in the said corporation : And we do further will and ordain, that when any share of the said capital stock shall by virtne of this charter have become forfeited to or vested in the said corporation as aforesaid then and in evcry such case it shall be lawful for the said corporation, or the conrt of directors for the time being, and they are hereby authorized and empowered, at any time thereafter to sell or cause to be sold by public auction or private contract and by writing under the comnon seal of the said corporation to assign and transfer such share unto any person willing to become the purchaser thereof, his or her executors, administrators, or assigns, and such assignment and transfer shall be good, valld, and effectual against the owner of every such share, and all perwons claiming under him, her, or then ; provided always, that in case the money produced by the sale of any such share shall be more than sufincient to pay any such arrears, as aforesaid, and legal interest thereon, together with the penaities incurred by nonpayment and the expenses attending the sale thereof, then and in such case it shall be lawful for the court of directors for the time being, if they shall think fit so to do, but not otherwise, to pay the surplus arising from such sale to the person or persons to whom such share shall have belonged : provided also, that the said corporation shall not by virtue of this charter at any time or times sell or transfer, or direct to be sold or transferred, nny more of the stock of such defaulter or defaulters than shall be sufficient, as near as may be, at the time of such saic, to pay the arrears due from snch defaulter or defaulters, for or on account of such call or calle, and the interest, penalties, and expenses attending the same; and from and after the payment of every call or calls to be made by virtue of this chartcr, and the intercst, penaities, and expenses as aforesaid, any stock vested in the said calls to be made by virtue of this charter, and the intercst, penaities, and expenses as aforesaid, any stock vested in the said corporation as aforesaid which shal remain in their hands unsold, shail revert to and again become the property of the person or persons, body or bodies politic or corporate, to whom such stock shal have before beionged, in such nsnner as if or construed to compel the said corporation to sell any fractional part of $\mathcal{E} 100$. of the said atock: Provided aiways, and we do further will and ordain, that in casc any person or persons, body polltic or corporate, who shall bave subscribed for or be entiticd to any share or shares in the capltal of the said corporstion, shall neglect or refuse to pay his, her, or thelr rateabl or proportionable part of any sum of money to be called for at the time and jiace and in the manner to be directed for that purpose by the said court of directors as aforesaid, the said corporation are hereby empowered to sue for and recover the same in any of our courts of law or equity whatsoever: And we do further will and ordain, that if any deceased subscriber or suhscribers, proprictor or proprietors, shall not have left assets sufficlent, or in case the executor or executors, sumi nistrator or administrators, trustee or trustees, committee or committees, guardian or guardians, shall refuse or neglect to answer such call for the sjace of three calendar months next after notice thercof, by advertisement as aforesaid, shall have been given of such call, the said corporation shall be, and they are herchy authorized and required to admit any other person or persons to be a proprictor or proprictors of the stock of such deceased proprietor or proprietors, on condifion that he, she, or they so admitted do and shall, on or before such admission, pay to the exccutor or executors, administrator or administrators of such deceased proprictor or proprietors, or to the trustee or trustees, committee or committces, guardia or guardians of the infant or infants, or other person or persons who may be entitied to his, ber, or their effects, the full sum or sums of money which shall have been paid by such proprietor or proprietors, in his, her, or their lifetime, by virtue of any call or calls or otherwise, upon such stock, or such other sum or sums of moncy as the same can be sold for; and in case no person or persons shall be found who is or are willing to be admitted upon such condition as aforesaid then and tn every such case such share or shares ahall be forfeited to and become vested in the said corporation; And we do further, for us, our heirs, and successors, grant unto the said Colonial Bank and their suecessors, and we do will and direct and appoint, that it shall and may he lawful for the aaid corporation, for the period of 20 years, commeacing from the Ist day of May 1836, to carry on the business of bankers, by dealing in bullion, money, and bills of exchange, and jending money on commercial paper and Government securities, and in such other lawful ways and means as are usually practised among bankers; hut it shali not be lawful for the said corporation to lend or advance money on the security of lands, houses, or tenements, or upon ships; nor to deal in goods, wares, or merchandize of any nature or kind whatsoever: And we do further will and ordain, that it shall and may be lawfil to and for the said corporation, during the same period, to establish one or more principai hank or bajiks in the islands of Jamajea and Barbadoes, and in such other isjands or places in the West Indies and British Guiana, as by them sloall be considercd experient, with such branches or agencies as from time to time may be found convenient; and at and from such principal bank or banks, branchee, and ayencies, or any of them, to make, issue, and circulate notes, payabie in dollars to bearer on demand, or otherwise, provided that no such note shall be isaued for less than the sum of five doliars; and provided that all such notes be made payable in dollars of acknow. ledged weight and fincness to bearer, on demand, as weli at such principal bank or banks, and every of them (if more than one of such principal banks shall be established), as at the branch or skency from which the sama shali have iscued; and provided also, that the said corporation shall not discount any bilis of exchange, promissory notes, or other ncgotitble paper, on which the name of any director or officer of the said corporation sliall appear as drawer, acceptor, or indurser to an amount cxceeding one-third of the whole amount of the sum for the time being under discount by the said coryoration And we do further oriain and deciarc, that it shall be lawfui for the sadd corporation, notwithatanding the Statutes of Mori main, or any other statutes or laws, or anytiling herein contained to the contrary thereof, to purchase, take, hoid, and enjoy, to them and their successors, as well in the United Kingions of Grcat Iritain and Ireland as in any of the said island

## A.-Bank of Britibh Guiana.

Ordinance by His Exceflency Major-Generat Sir Jamed Carmichael Smyth, C. B. \& ${ }^{\text {orc. Governor of Britiah Guiana, ge. }}$ sc. fe.-by and with the advice and consent of the Honourable Court of Polfey of the eald Coiony.

To all to whom these Presents do, may, or ahall come, Greeting ! be it known :
Whansas the several persons hereinafter named, presented to His Exceliency the Lieutenant-Governor and the Honorable the Court of Policy, their humbie petition setting forth that a numerous and respectable portion of this community having taken into consideration the great advantage likely to result to the colony at large, from the establishment of a local bank in British Gulana, had subscribed the deed of settiement of articles of co-partnership, and a meeting of the subscrihers held on the sth October of the present year (1836), had elected the said petitioners directors for the Government of the Company, and for the purpose of petitioning for the enactment of an Act of Incorporstion founded on the sald deed of settlcment; and praying that an ordinance may be cnacted, sanctioning the establishment of the British Guiana Bank, and conferring on the aame the rights and privieges nccessary to carry into effect the provisions in the sald deed of settlement: And wherea the establishment of such a body corporate, has been represented by the said petitioners as likely to be highly advantageous to the commnnity nt large :-

1. Be it therefore enacted, by His Exceliency the Lientenant-Governor, by and with the advice and consent of the Court of Policy of British Gulana. That John Croal, John Groscort Reed, Charles Benjamin, Wullam Johnston, Alexander Glen, John Lane, Ellis John Troughton, Jun., Abraham Garnett, and James Archibald Holmes, Esquires, or such of them as shall become subscribers of not less than fourteen thousand gullders each, towards the capital, or joint stock, hereinater mentioned, in the manner herelnafter provided, together with anch and so many other persons, bodies politic or corporate, as shall become subscribers of or towards the capital, or joint stock, hereinafter mentioned, in manner hereinafter provided; and such other persons bodies politic, or corporate, as shall from time to time in the manner hereafter provided, become proprietors of any part of snch capital, or joint stock, (not being a fractional part of seven hundred gullders of such stock, shall be one body politic and corporate, in deed and in name, hy the name of "The British Gulana Bank," and by that name shall and may sue and be sucd, implead and be impleaded in all courts, whether of Jaw or Equity, and shall have perpetual succession with a common seal which may be by them changed or varied at their pleasure: and service of procesp upon the chairman, or any of the directors of the said bank, shall be deemed and adjudged to be good and sufficient scrice.
2. And be it further enacted by the anthority aforesaid, that the sald corporation shall be estabished for the purpose of carrying on the business of a banker in British Guiana, subject nevertheless, to auch restrictions and provisions as are hereinafter contalned.
3. And be it further enacted as aforesaid, that the capistal, or joint stock of this corporation, shall consist in the first instance of the sum of four million two hundred thousand gulders, to be subscribed in six thousand shares of seven bundred gulliters each; and that so soon as the said sum of fonr millions two hundred thonsand guilders shall have been paid up, and not before, the said capital or joint stock, shall or may be increased and raised to the sum of seven million guilders, by adding to the original sum the furtier sum of two miliion eight hundred thousand guiliters, to be subscribed in four thousand shares of seven hundred guiliers each, provided such increase be deemed aulvisable by the corporstion, and be sanctioned by the votes of two-thirds at least of the proprietors of the original capital, or joint stock, present efther in person or by proxy, at a general meeting convencd expressly for the purpose of deliberating on such increase. The votes on thls question either in person or by proxy, to be given as in all other cases in the manner hereinafter provided.
4. And be it further enacted as aforesaid, that books shall be opened for taking subscriptions to the said capital or joint stock, and that of the sald original capital or joint stnck of four million two hnudred thonsand guilders, the aum of two mllion eight hundred thousand guliders shall be apportioned to subscribers resident in British Gulana; and the sum of fourteen hunired thonsand cuilders to persons connected with the said colony, or with the said corporstion, as agents, fourteen hunired thonsand guilders to persons connectel with the said coiony, or with the sad corporstion, as agened with the colony or with the said corporation as agents, resilient elsewhere, within four months from this date, the remaining sharem of the original capital shall be apportioned and distributed as may hereafter be agreed on at a general meeting of the shareholdern. And shoulit it be decided to increase the capital or Jolnt stock of this corporation as herein-before mentloned, the new shares shall be apportioned and distributed as may be deeided upon in like manner: Provided, however, that no individual or company, or body corporste, shall hold at any time more than two hundred shares of the capital or joint stocl of the sald corporation.
s. And be it further enseted, that the modes and times in and at which the several instalments upon the shares shill $x$ paid, and the uature and form of the notices to be given requiring payment thereof; and also the form of receipts for par. ments, and the nature and form of notices for meetings shall be regulated and determined by the tircetors appointed, of w be appointed as hereinafter mentioned.
5. And be it further enacted, that it shall not be lawful for the said corporation to commence or earry on the sid business of banking under and by virtue of these presents, until the sum of two million one hundred thousand guilders sall have been subscribed for, and four hundred and twenty thousaud guilders actually paid up. 6. And being, shall 1 Corporation, the number all necessary assistante to mient thereof, Corporation, apparent pro after be agre
7. And be it further enacted as aforesaid, that all and every person and persons, bodies politic or corporate, by and from whom any eubscription ahall be made and accepted, and any payment on account thereof made pursuant to the provisions herein contained for that purpose, for, or towards raising the said capltal aum of four million two hundred thousand guilders; or, should the sald capital or joint stock be increased as before mentioned, then for, or towarda raising the said capital sum of seven millions of guilders, no such oubscription being for less than seven hundred gullders, shalt have and be cntitled to a share of and in the sald capital or joint stock of the said corporation, in proportion to the monies which he, she or they shall have so subscribed towards making up the same, and shall hsve and be eutitled to a proportionable share of the profita and advantages attending the capital stock of the said corporstion, and shall be admitted to be a proprietor or proprietors of and in the same.
8. And be it further enacted as aforesaid, that the srid corporation shall cause the names and designations of the several persons who shall subscribe for, or become entitled to any share of the capital stock of the sald corporation, with the amount of such bhare to be fairly and distinctly entered in a hook, kept by their clerk or secretary; and that the severa persons, bodies politic or corporate, who shall subscribe for, or have, or hold any share or shares of the sald capltal atock shall, and they are hereby required to pay the sum or sums of moncy by them respectively subscribed, at such times and places, to such persons, and in such manner as siatll be ordered and directed by any court of directors for the time being of sald corporation, pursuant to the provisions herein contained.
9. And be it further enacted, that when two or more persona are jointly entitled to any share or shares of the capital stock of the said corporation, the party whose name stands first in the book of the said corporstion shall be considered to be the proprietor of the whole of such share or shares, for all the purposes of the corporation-save only as regards his eligibility to fill the office of director
10. And be it further enacted as aforesaid, that it shall be lawful for the several proprietors of the capital or joint otock of the said corporation, to 3 clp and transfer any shares of the said capital stock, of which they shall respectively be possessed or any part thereof, not belng less than seven hundred guilicrs of such stock-and being either the sum of seven hundred guilders, or some multiple of seven hundred gullders of such stock; provided such transfer be in the form hereafter to be gettled by the Directors, and be signed by the party transferring, and accepted by the transferee, and registered in the Books of this Company; for which registration a fee to be fixed by the Directors, not exceeding, however, Three Guilders on each Share, shall be paid for the benefit of the Corporation : and that such transfcr, when duly executed, shall convey the whole estste and interest in the stock therein mentioned of the person or persons transferring the same, to the person or persons so taking or accepting the same, which person or persons shall thereby forthwith become, in all respects, Proprietors of the said Corporation in respect of such Stock, in the place of such persons so transferring the same; and an extract from the Register or Book of the aald Corporation, slgued by a Dircctor and the Manager of the Bank for the time being ohall be sufficient evidence of transfer, and be received as such: Provided always, and be it hereby further enacted, that no Share of the said Capital Stock shall be transferred until Two Hundred and Eighty Gullders at least shall have been paid thereon; and that no transfer of any Share or Shares ahall be permitted after a call for money is made by the Directora uoder this Act, until the money called for is pald thereon ; and lastly, that if the party transferring be indelited to the Corporstion, the Directors may refuse to register the transfer, untll their debt be pald:
11. And be it further enacted as aforesaid, the General Meetings of the Proprietors of the sald Corporation shall from time to time be assembled in Georgetown, and shall be there held in January and July of each year, at such time and place as the Directors may appoint ; provided that advertisements thereof be inserted in the Colony newspapers Twenty one days at least previous to such Meeting; but should the Proprietors not asscmble at these times, the Charter of the Company shall not thereby be affected; and it shall be lawful for the Meetings to be held at other times to be appointed by the Directors, in lieu of those here fixed : provided that due notice as above be first given of such Meeting.
12. And be it further enacted as aforesald, that at any time it shall be lawful for the Court of Directors to call Special General Mectings, to be held in Georgetown, giving notice thereof at least Fourteen Days previousiy in the public papers.
i3. And be it further enacted, as aforesaid, that it shall be lawful at any time for any Thirty Proprictora, holding, in the aggregate, Three Hundred Shares, or upwards, by writing under their hands left at the Bank, to regulre the Directors for the time being to call a Special General Mecting of the Proprietors, provided their requisition expresses the object or objects for which the Special General Meeting is required to be called; and in case the Directors shall refuse or neglect to comply with such requisition for Seven Days after the aame shall have been left as aforesaid, that then a Special General Meeting msy be called by such Proprietors on giving Fourteen Days' notice thereof in any one or more of the newspapers; and every such advertisement shall express the day and hour, and place in Georgetown for holding the same, as also the dellivery of the requisition at the Bank, and the refusal of the Directors to call such special meeting; and ahall contain the names aud realdence of the Proprictors signing the aald requisition, and may also, if such Proprietors shall dcem it expedient, express the object of such meeting ; and all acts of the Proprietors at such special general meeting shall be as valld ss if the same had been done at any half-yearly general meeting of the ssid Corporation; provided, nevertheless, that at such special general meeting the discussion shall be strictly limited to the objects mentioned in the requisition.
13. And be it further enacten, that any General Meeting may be adjourned from time to time, but no other buaineas ohall be traisacted at any adjourned Meeting than that left unfinished at the previous meeting, and if guch adjournment be for more than two days, then seven days notice must be given previous to such adjourned Meeting being held.
14. And be it further enacted as aforesald, that no business shall be transacted at any General Meeting, uniess Twen-ty-Ave Proprietors, holding in the aggregate, at least, Two Ifundred and Fifty Shares in the Stock of this Corporation, shall assembie and procced to business within one hour after the time appointed for holding such Meeting.
15. And be it further enacted, that at every General Mecting of the Proprietors of the aaid Corporation, a Proprietor of Two Shares shall have One Vote; of Ten Shares, Two Votes ; of Twenty Shares, Three Votes; of Fifty Shares, Four Votes; of Nincty Shares, Five Votes: and of One Hunired and Fifty Shares and upwards, Six Votea ; and that no person holding less than Two Shares, shall be entitled to any Vote, at any General Meeting of the Proprictors of the said Corporstion, and further, that in the case of Proprietors, of the said Corporation, residing in the Colony ten or more miles from Georgetown, and all resident female Proprietors, such Votes may be given by proxy, provided such proxy be in the form to be hereafter prescribed by the Board of Directors, and signed by the Proprictor, and provided it be entrusted to a Shareholder in the Corporation ; but no Shareholder ahall by proxy represeut more than six Votea.
16. Provided alwsys, and it is hereby further enaeted, that at all future Mectings after the General Meeting in January next, no Shareholder ahall be admitted to vote, elther in person or by proxy, nuless he sholl have registered as Proprietor four months at least before the Meeting, and shall have pald uy all calls for instalments, and unless he shall at the time declare thst be is bonu fide Proprietor of the Shares in virtue of which he claima to vote.
17. And be it further enacted, that at every General Meeting, all questions suhmitted shall be decided by a majority of votes taken by ballot ; and that the Minutes of the several transactions at auch Mectings shall he prepared during the progress of the business, and be signed by the Chairman of the Meeting. And further that the Chairman of the Board of Directors shall be Chairman of Meetings, or in case of his absence, then one of the Directors, or no Director belng present, then any Proprietor holding Twenty Shares may he called to the Chair; and if, at any Meeting, the votes on any question be balanced, the Chairman of such Meeting ahall have a casting vote, in addition to his individual votes, and votea by proxy.
i9. And be it further enacted an aforesaid, that at each half-yeariy Meeting, the Chairman and Directors, for the time being, shall lay over, for the inspection and consideration of the Sharcholders, a full statemeut of the affairs of the said Corporation, elgned by the proper offleers, which statement the Proprietors may, if so they deeide by votea of two-thirds of the number present, refer to any two of their Body as Auditors, for examluation and report at an adjourned Meeting, with all necessary powers to the sald Auditors to call in the Oincers and Servants of the Corporstion, and to eniploy neceasary assistants to enable them to make auch audit and report. And that at every auch half-yearly Meeting or some adjournnent thereof, a dividend or dividends shall, if recommended by the Court of Directors, be paid out of the profts of tho sald Corporation, vnless such Meeting shall declare otherwise, but in no case shall such dividend exceed thrce-fourths of the apparent proit, and the remaining one-fourth siali be allowed to accumuiate as a surpius fund to be disposed of as may hereatter be agreed on at a General Meeting of the Proprietors of eaid Corporation.

## APPENDIX II.-SOUTH AMERICA.

30. And for the better ordering and governing the afinirs of the said Corporation, and for making and establishing a continual succession of persons to be Directors of the said Corporation; be it hereby further enacted, that thereshall be from time to time constituted, in manner hereinafter mentioned, ont of the Members of the and Corporation, Chaimsin who shall also be a Director, and Eight other Directors, which Nine Directors or any three of them shall conotitute and be called a Court of Directors, for the ordering, managing, and directing in the manner and under the provisions herein contained, the aftairs of the said Corporation, and that the sald Jonn Cmoal shall be the first Chairman, and the sadid Johy Gioscumt Rexd, Chagles Bunjamin, William Johnston, Alexandrb Glen, John lank, Ellis John Throvonton, Junior, Ampaham Garnetp, and James Aachianli) Holmeg, the firgt Eight Directors of the said Corporation in addition to the sald Chairman.
31. And be it further enacted as aforesaid, that any Member of the said Court of Directors may at any time vacate his office by sending in his reslguation, in writing, to the office of the said Corporation, and that in the event of any Member of the said Court ceasing at any time to hold Twenty Shares of the Capital Stock of the said Corporation, his appointment shall instantly cease, and that in either of these cases, as also in case of the death or departure from the Coiouy of any of the Directors, the Cuurt of Directors shall fill up the vacancy, and elect a person to serve for the unexpired term of service of the party who has resigned utice, died, or ceased to hoid the necessary amount of Stock.
32. And be it further enacted as aforesaid, that in case the conduct of any one Director shali at any time be auch that his continuance in otrice shall appear to his Co-directors for the time being prejudicial or infurious to the interest of the Corporation, it shall be iawful for the Co-directors at a special Court to be convened for that parpose, by a majority of votes, to Euapend such Director from his office, until s special General Meeting can be heli, which Meeting must be forthwith simmonct. And further that it slall be lawful for the Proprietors at any half-ycarly or special Meeting to remove any Director or Directors, and elect in his or their room and atead any other duly qualified Proprietor, and auch Director or Directors so clected, ahall aerve only for auch period as the party in whose room he was elected would have had to serve by rotation.
33. And be it further enacted, that the remuneration to be received by the Court of Directors for the time helng for their aervices, shali be fixed by the Shareholders from time to time, at any General Meeting, payable out of the profits of the Corporation, and such remuneration shali be apportioned among them, the said Directors, as they shall decide.
34. And be it further elacted, that the Directors above appointed shall hold office until the first General Meeting is 1838, when Six of them shall go out in rotation; gnd further thit at the first yearly General Meeting to be held each succeeding year, the six Directors whose names stand first on the list shall go out by rotation; and further that the vacancies caused by the Directors going out in rotation shall be filled up by the Proprictors at the frat General Meeting In esch year from auch of their Body as may own at lcast Twenty Shares of the Capltal stock of the said Corporation. But the Directors, whose period of acrvice has expired, shall always be eligible to be re-elected.
35. And be it further enacted, that the Court of Directors shall choose their own Chairman, and shall meet one day at least in every week, and any one of the said Directors may at any time call a Meeting of the said Court by notice in writing, ent to the residence or office of every member of the anil Court; but no business sball be transacted at any Meeting of the said Court, unless three Members shall be prescnt, and that all questions at any Court shall be decided by the votes of the Majority in number of the Members present ; and in case of en equal divialon of votes, the Chairman, or in his abseace the Member chosen to act in his stcad, shall have the casting vote; and that the proceedings of every Court ahall be entered in a Book kept for that purpose, and be slgned hy the Member ln the Chair; and further that the aaid Court of Directors ghall have full power to Direct, Manage, Superintend, Regulate, and Controul, all the affiairs and concerns of the said Cor. poration, and to appoint all the Agents, Officers, and Servants of the aaid Corporation, as well in British Guiana, or elsewhere, and at their discretion to remove them and appoint others in their steal, and from time to time to fix the remuneration to be paid to their Manager, Agent, Oflicers and Servants ; to use and diapose of the Scal of the Corporation as they see fit, and to sign, seal and cxecute all necesaary deets, contracts, and agreementa on behalf of the said Corporation, and to malie all auch rules reguiations, and bye-lawa, as may be nccessary for the good Government of the Corporation, and the same from time to time to alter and repeal, provided always that such rules, regelations, and bye-lawa, as ahall from time to tims be in force, be fairly entered in a Book kept for that purpose and open to the inspection of the Proprietors, and provided ther be not contrary to law or repugnant to the Rules and Regulations herein set forth, and provided the same be not disaliowed by the Proprietors at a subsequent General Meeting.
36. And be it further enacted, that no Director shall he permitted to vote on the propriety of refusing or authorising the advance of any money to himself or partner, or In which he is interested as principal or uecurity; but the propriety of grantIng such accommodation shall be decided apart by his Co-Directors.
37. And be it further enacted, that the Court of Directors shall have power, to call for instalments on shares in such sums and at anch times as they think fit; bint no auch call shall at any one time be for more than One Hunired and Forty Guilders for each share of Seven Hundred Guilhers, nor shall the money callcd for be payable untll one month's previons notice thered shall have been given in the public papers, nor shall any auch subsequent call be made until two months at least after the date at which the previoua call was payable.
38. And be it further enacted, that all Proprietors who neglect to pay the instalment on their shares as called for by the Directors, shall pay intercat on the came from the date fixed for payment, and in aldition thereto, if the same be not paid within one month thereafter, they shall be fined forty-two guilders for each share, and still, not paying within a further period of one month, the share shall be forfelted to and vested in the Corporation, but the Directors ghall, nevertheless, have power to waive the forfeiture, and accept in lieu thercof a further fine of not less than Forty-Two Guilders per share.
39. And be it further enacted, that the Shares forfited may be sold by order of the Directors, either by putblic or private male, and that transfer of the aame under the Seal of the Corporation, shall be good and valill : Provided alwayg, that if there be a surplus from this sale it may be given, should the Directors see fit, to tha former hulder; and provided also, that no greater amount of stock shall tic fortelted and sold than what is neccssary to pay the amount of arrears on the whole shars beid toy the party with the penaities, hiterest, and cost thereon due: so nevertheless, that nothing in this proviso coutained, thall be conatrued to compel the said Corporation to seli any fractional part of Seven Hundred Gullders of the said Stock.
40. And be it further enacted, that in case any person or persons who aball hava subscribed for, or lic eutitied to any
are or sharea in the Capital of the said Corporation, shall neglect or refnse to pay the instalment on lifs, her, or theirshare share or sharea in the Capital of the said Corporation, shall negiect or refnse to pay the instalment on lifs, her, or their share
or shares, as called for by the Directors, the Corporation shall be entitied, If they see fit, to sue for and recover the amount called for, with the intereat and penalties.
41. And be it further enacted, that in case of the death of any Sharebolder, three montha ahall be allowed for the pay. ment of the amount called for in reapect of his Shares, and ahould the amount not then be paid, any other party shall be admitted to take over the Shares and make the payment, on ahowing that he has paid the Executor or other person, properly qualified the amount already advanced on sncil Share.

35. And be it further enacted, that if the saik Corporation shali become insolvent, all and every the Proprietors, for the time being, of any interest or uhare in the capital thereof, shall be liabic to be called on to contribute to the payment of the debts and llabilities of the said Corporation, to the full amount of all the stock beld by them in the said Corvoration, and no more, although the same ahail not have been theretofore called or and paidup; and that all the powera, privileges, and authorities hcreby given, stail utteriy cease and be void, in the event of the said Corporation Euspending Cash payments, for the space of sixty days, whether such susjension shall take place at any principad or branch Bank.
36. And be it further enacted, that If, at any time, the Votes of two-thirds of the Shareholders, convened at any General Meeting, should be in favor of an application for an amendment of this Ordinance, or for an Ordinance dissolving the Com. pany, a special general meeting thal be convened, and a day be ixed for submitting the queation, whether such amendment, or such Ordinance shain, or shail not, be appied for; and in case it be then determined by two.thirds of the Votes at auch meeting to make such application to the Leglslature, the same shall be done with all possible expedition; and such amendment or Ordinance being aanctioned and enacted by the Legislature, the same shall be binding on the Shareholders gene. rally.
37. And be it further enacted, that on the termination of the asid term of twenty-one vears the businems to be carried on by the said Corporation shall cease, and the debts and engagements thereof shall be lifuldated and discharged, and the assets and property sodi, their respective share and interest in the Capital thereof.
38. And be it further enacted and declared, that this Act of Incorporation shall be taken, construed, and adjudged in the most favourable and heneficial sense, and for the best advantage of the aaid Corporation, in all Courts, and by all Judges, ustices, and others ; nor shail this Act of Incorporation be prejudiced or injured by any non-recital, misrecital, uncertainty, or imperfection therein.
39. Provided, however, that this Ordinance, In as far as it authorizes the circulation of Promissory Notes or other Pajer payable hy the said Corporation, shall not come into operation until His Majesty's sanction be obitained thereon.

Thus done and Enscted at Our Ordinary Assembly, held at the Guisua Putbic Buidings, George Town, Demerary, this Eleventh Day of November, One Thousand Eight Ifundred and Thirty Six, and publishei on the Twelfth following.

## By Command of the Court.

H. E. F. YOUNG, Sccretary.
[The preceding document was submitted for approval to the Secretary of State for the Coionies; and the foliowing amended ordinance was issued in conformity with instructions from England.]
an ordinance to amend an ordinance entitled an ordinance to incorporate a bank to be
CALIEJ TIIE BRITISH GUIANA BANK.
By His Eicellency Colonel Thomas Bunhury, K. H., Acting Gonernor, \&c., of Brilinh Guiana, by and with the advice und consent if lite Honourable Court of Policy of aclid Colony.

To all to whom these presente do, may, or shall come greeting! be it known :
Whseras an Ordinance to incorporate a Hank to be calicd the British Gniana Bank was, on the ith November, i836, madc and passed by His Excellency the Leutenant Governor, by and with the advice and consent of the Court of Policy of British Guiana :

And whereas it has been deemed cxpedient by Her Majenty's Government that certain other provisions should be made therein for the better reguiation and quvernment of the said bank;

And whereua such further provisions have been communicated to the proprictors of the Capital Stock of the said corporation at a Pubic meeting oi the said Proprietors, heid in George. town on the Nincteenth day of February instant, and have been duly assented to by the said proprietors

And whereas it appears from a statement firnished by the Chsirman of ssid Corporation, and coantersigaed by tha proper officers, that of the said Capital Stock of the said Corporation, there liadit. 7 paid into the Bank the sum of One Militon Five hundred and seventy-five thousand Guilders, being one helf the Car,": innbscribed up to the 3ist December, 1837 ; sod that since that period there hath been yaid in the further aum of $\boldsymbol{f} 2 \mathrm{~g}$. sing one haif of the capital sai) scribed sloce the 31st December, 1837 ;

1. Be it therefore cnacted by His Exceilency the Governor, and with the adv. $;$, and consent of the Court of Pollcy of the Colony of British Gulana, that the following words, that is to any ;

And be it further enacted as aforessid, that one half at the least of the Capital subecribed, bo paid ap immediately" shall be, and shall form part and parcel of the 6th Ciause of the said Ordinance.

And b 位 further enacted, that ine proviso contained in the conciusion of the 10 th clause of sald Act of Incorporation shall be, and the same is herelby declared to be repealed, and in lieu thereof shall be subatituted, the proviso following that is to eny :-
"Provided aiways, and be it further enacted, that no sharc of the said Capital Stock shifll be transferred from the day of the date of the publication of this Ordinance, until three hundred and fifty guilders at least shall have been paid thereon, anil that no transfer of any share or thares be permitted after acall for money ia made by the Directors under this Act, until the moner called for is paid thereon

And lastly, notwithstanding such transfer, the party transforring ahall for the period of one year from the date of registering such trauafer, remain liable for the amount unpaid to the Curporation on the shares transferred.'
3. And be it further enacted, that the following worda ahall form and be part and parcel of the 26 th clauae of the said Act of locorporation, that is to say :-

That the said Curporation shall not discount any Bilis of Exchange, Promissory Notes, or other negotiable paper on which the Dame of any Director or Officer of the said Corporation ahali appear as Drawer, Acceptor, or Endorser, to an amount excceding one third of the whole amount of the sum for the time being under discount of the said Corporution.
4. And be it further enacted, that the gand ciause of the said Act of Incorporation ahall be, as the same is hereby deciared to be, repeaied, and in lieu thereof the following words shall be inserted and stand and be Clause Thirty-second of the said Ordinance, viz.
" And be it further enacted that it shall and may be lawful for the said Corporation, or for the period of Twenty-one years from the Eleventh of November, One Thousand Eight hundred and thirty-six, to carry on the buainens of Bankers by lending money on Bonds, Blils of Exchange, Promissory Notes, Acceptances, Open Accounts, Government 8ecurity, and all other Becurities whatever connected with Banking 1 discounting Bills of Exchange, Promissory Notes, or other Commereisl paper, buying and seiling Bills of Exchange, receiving depoits at such rate of interest as may from time to time be fixed by the Dlrectors, not exceeding the legal rate; borroving or taking up money on Receipts, Blif, Promis. sory Notes, or other obligations; also by investmenta, purchases, sales, or any dealings in Builion or Government, or
pibilc funds of Great Britaln, Navy or Exchequer Bills, or the stock of any Chartered Company, atse oniy the stock of
 and to make lasue, and circulate Notes payable to Bearer on demand, or otherwise, provided that mosuch note be lasued for lese than the sum of Five Dollars, and that all such notes shall be payable Io Dollara of the acknowledged welght
 Corporalion to carry on any other business or trade whatever than that of Banking, and they are hereby strictly forbid. den to lend money or to make adpances on real securlty, whether the same be Jands, houses or plantations : And fur. ther, that the Directors of the sald Bank for the time heing aliali, as they are hereby required to, publiah, for the infor. mation of the Proprietors, In the Royni Gazelfe of this Colony, In the months of February and August, genersi Half yeariy Accounts ending on the alst December and aoth June last, reapectively showing the whole amount of Its Debts and Asnets at the close of each half year, and showiog afso the total amonnt of Ila Notes payable on demand, which had been in clrculation In each week of such half year, together with the amnunt of the Specie, distinguishing each kind and other Assets immediately available In each week for the dacharge of sueh Notes and that coples of auch Half-yemiry Aecounts thall be Jald before the Governor and Court of Policy by the Directiors aforesadd, and that aimilar accounts ohall be furnlahed at any time by aueh Dlrectors as aforeatd to His Exeellency the Governor whenever required."

And lastly, be it further enacted, that Clause 39 of the sald Aet of Incorporation aball be, an it fa hereby declared to
be, repealed.
And that no ignoranee shall be pretended of this our Ordinance, these presents shall be printed and puhlished is the enstomary manner.

Thus done and Enacted at our Extrmordinary Assembly, held at the Guiana Puhilc Buildigge, George Town, Deme. mry, this 6th April 1838, and published on the 7th following.

By Command of the Court.
Thomas Bunbwry.

## F. E. F. Young, Secretary

The ordinance and the mmended ordinance constitutes the charter of the Bank of Brifinh Gufama, which was conirmed by the Gueen In Counelf on the 6th Ortober, 1838, without any alteration, except that the Janues of the bank shall not exceed three tlmes that of the paid up caplal of the bank. The bank recelves the benefit of the ordera in councli of the 14th september, 1638. The following ahewa the atate of the bank at Its half-yearly meeting in June, $18: 18$ :-

The whole capltal of the bauk is now aubseribed for In 6,000 shares, whleh have all been taken np by parties withla the colony, and 80 per cent has been pald thereon, amovnting to the sum of $f, 9,100,000$.

The progreasive Jncresse of deposits from $f$. $1,153,16210$ eents-to their present amonat $f .1,612,208$ g6 centa is also trons manitestation of public confidence In the bank as well as in colonial propurty in general.
The Directors sabmit the followiat Abstraet Bummary, exhlbiting a General Statement of the Aftair of the British Dr.

Guiada Bank of the 30th of June 1838.

0 , and Berbice were united
vernor and Commander-in.
t Britain and Ireland King, night, Commander of the reas, for divers good causes n the northern coast of the sequibo and the colony of , In the manner hereinatter The prudence, courage, and owledge, and mere motion, e and appoint you, the said ommander-in-Chief in and nerica, comprising all such ed colony of Demerara and endencies, and all forts and ithin the same, and which 1 be cailed "The Colony of ernor, to do and execute all e reposed in you, according resent commission and the structions, and authonties and sign manual, or by out State: And we do further tablished in the said united in and throughout the suid heretofore lawfully exitited

In the said united colony of Demerara and Essequibo, shall in like manner exist in and throughout the said colony of British Guiana, and at 'I In and throughout the said colony have, exercise, and enjoy all such powers and authorities as have heretofore been lawfully had, exercised, and enjoyed by them respectively in the united colony of Demerara and Essequibo: Provided nevertheless, and we do hereby declare our will to be, that the number of the members of certain of the said bodies politic and corporate heretofore existing in the said united colony of Demerara and Essequibo, shall in the aaid colony of British Guiana be augmented and eniarged in such manner as by your said instructions is directed in that behalf: Provided also, and we do further declare our pleasure to be, that nothing herein contained shall extend, revoke, or abrogate any law or lawful ussge, or custom now in force in the said united colony of Demerara and Essequibo, or in the said colony of Berbice respectively, save only in so far as relates to the separate constitution and form of civil government heretofore established and in use in the sald colony of Berbice, which said constitution or form of civil government we do hereby abrogate and dissolve, and do declare that the same hath become and shall henceforth be extinct and merged in the government of the sald colony of British Guiana: Provided also, and we do further declare our will and pleasure to be, that nothing herein contained extends or shall be construcd to extend in anywise to alter or interfere with the provisions of a certain Act of Parliament passed in the fifth year of the reign of our late Royal Brother and predecessor King George the Fourth, intituled, "An Act to consolidate and amend the Laws for the Abolition of the Slave Trade," or to render legal any transfer or removal of any siave which would have been illegal if these presents had not been made, it being our pleasure that for the purposes and within the meaning of the said Act of Parliament, the said united culony of Demerara and Essequibo, and the said colony of Berbice, shall still continue and be distinct and separate colonies : And we do hereby give and grant to you, the said Sir Benjamin D'Urban, full power and authority, with the advice and consent of the Court of Policy of our said colony of British Gulana, to make, enact, ordain, and establish laws for the order, peace, and good government of our said colony, subject, nevertheless, to aill such rules and regulations as by your said general instructions we have thought fit to prescribe in that behalf: Provided, nevertheless, and we do hereby reserve to ourselves, our heirs and auccessors, our and their undoubted right and authority to disallow any such laws, and to make and establish from time to time, with the advice and consent of Parliament, or with the advice of our or their Privy Council, all such laws as may to us or them appear necessary for the order, peace, and good government of the said colony, as fully as if these presents had not been made: And we do hereby grant to you, the said Sir Benjamin D'Urban, the custody of the public seal appointed for the sealing of all things whatsoever that shall pass the seal of our said colony : And we do here give and grant to you, the said Sir Benjamin D'Urban, full power and authority, in our name and in our behalf, but subject nevertheless to such provisions as are in that respect contained in your said general instructions, to make and execute in our name and under the public seal of our said colony, grants of waste land to us belonging within the said colony to private persons for their own use and benefit, or to any persons, bodies politic or corporate, in trust, for the public uses of our subjects there resident, or any of them : And we do hereby give and grant unto you full power and authority, as you shall see occasion, in our name and in our behalf, to remit any fines, penalties, or forfeitures which may accrue or become payable to us, so as the same do not exceed the sum of $50 l$. aterling in any one case, and to respite and suspend the payment of any such fine, penalty, or forfeiture exceeding the said sum of $50 l$. until our pleasure therein shall be known and signified to you : And we do hereby give and grant unto you full power and authority, as you shall see occasion, in our name and in our behalf, to grant to any offender convicted of any crime in any court, or before any judgc, justice, or magistrate within our said colony, a free and unconditional pardon, or a pardon aubject to such conditions as by any law in force in the said colony may be thereunto annexed, or any respite of the execution of the sentence of any such offender, for such period as to you may seem fit : Provided always, that in cases of treason or murder, no pardon, either absolute or conditional, be granted until the case shall have been first reported to us by you for our information, and you shall have received the aignification of our pleasure therein: And we do hereby give and grant unto you, the said Sir Benjamin D'Urban, as such Governor as aforesaid, full power and authority, upon sufficient cause to you sppearing, to suspend from the exercise of his office within our said colony any person exercising any such office under or by virtue of any commission or warrant granted or to be granted by us, or in our name or under our authority, which suspensinn ahall continue and have effect only until our pleasure therein shall be signified to you: And we do hereby strictly require and enjoin you, in proceeding to any such suspension, to observe the directions in that behalf given to you in and by our said general instructions accompanying this your commission : And in case of your death or absence from the said colony, our will and pleasure is, that this our commission, and the several powers hereby vested in you, shall be exercised by such person as may by us be appointed to be our Lieutenant-Governor of our said colony, or by such person as may be appointed by us under our signet or sign manual, to administer the aaid government ; but if at the time of such your death or absence, there shall be no person within our said colony commissioned to be such Lieutenant-Governor, or administrator of the government as aforesaid, then our pleasure is, and we do hereby direct that the senior officer for the time being in the command of our land forces within our said colony, shall take upon himself the administration of the government thereof, and shall execute this our commission, and the several powers herein, and in the aforesaid instructions containcd; and if any such officer shall, during such his administration of the government, be suspended in the command of our said forces by any senior officer, then our pleasure is, that such senior officer shall assume the administration of the said government, and the execution of this our commisaion, and of the several powers aforesaid, and 80 from time to time as often as any such case shall arise : And we do hereby require and command all officers, civil and military, and ail other our subjecta, and persons inhabiting our said colony of British Guiana, to be obedient, aiding and assisting unto you, or to the officer administering the said government for the time being, in the execution of this our commission, and of the powers and authorities herein contained : And we do further declare our pleasure to be, that the changes established in tre constitution and form of civil
government in the said colonies of Demerara and Eosequibo, and of Berbice reapectively, by this our com. mission, shall not take effect until this our commission shall actually have been by you received in our said colonice or one of them: And we do hereby declare, ordain, and appoint that you, the sald Sir Benjamin D'Urban, shall and may hold, execute, and enjoy the office and place of our Governor and Commsnder-in. Chlef, in and over our colony of British Guiana, together with all and aingular the powers and authorities hereby granted unto you for and during our will and pleasure. In witneas, \&c. \&c. Given at our Court at Brighton, the 4th day of March, 1831, in the first year of our reign.

## By His Majesty's Command.

## (Countersigned) GODERICH.

Shortly after the colonies of Demerara, Essequiho, and Berbice had been united under one goverminent the following Orders in Council were issued, abolishing the ancient courts, and appointing perfectly new judicial estalilishments, not only for the colony of British Guiana, but for those of St Lucia and Trinidad. At the end of these orders will be found a summary of the alterations they have effected in the courts for the administration of justice in British Guiana, and this will be accompanied by the regulations eatablished by the Governor and Court of Policy as to the appointment of Assessors and the jurisdiction of inferior Courts.

> C.-CHARTER OF JUSTICE FOR BRITISH GUIANA, TRINIDAD, AND ST. LUCIA. Copies of the Orders in Council of the 23rd April and 20th June, 1831 , for the Administration of Justice in British Guiana, Trinidad, and St. Lucia. At the Court of St. James's, the 23rd day of April, 1831; Present, The King's Most Excellent Mnjesty in Council.

1. Whereas His Majesty's Court of Criminal and Civil Justice in Demerara and Essequibo, and Ilis Majesty's Courts of Civil Justice and of Criminal Justice respectively in Berbice, and His Majesty's Courts of Criminal Trial, and of First Instance of Civil Jurisdiction respectively in Trinidad, and His Majesty's Royal Court in the island of St. Lucia, are respectively holden by Judges the majority of whom in each of such courts are persons unlcarned in the law: And whereas it is fit that the said courts respectively should henceforth be holden by persons of competent legal education; it is therefore ordered by the King'a Most Excellent Majesty, by and with the advice of his Privy Council, that henceforth the Court of Criminal and Civil Juatice of Demerara and Essequibo, and the Court of Civil Juatice and the Court of Criminal Justice of Berbice, and the Court of Criminal Trial, and the Court of First Instance of Clvil Jurisdiction in the island of Trinidad, and the Royal Court of St. Lucia, shall be resprectively holden by and before three judges and no more; that is to say, each of the said courts shall be holden by and before the President for the time being of the Court of Criminal and Civil Justice of Demerara and Essequibo, and the Chief Judge for the time being of Trinidad, and the First P'resident for the time being of the Royal Court of St. Lucis, or by and before the persons who, during the vacancy of any such offices, or during the absence or incapscity of any of the said judges, may have received a previsional or temporary appointment to act as and in the place and stead of any such judges or judge.
2. And it is hereby further ordered that no Judge in any of the several courts aforesaid, and no Vice-Pre. sident thereof, shall be the owner of any slave, or shall have any share or interest in, or any morteage or security upon any slave, or shall be proprictor of, or have any share or interest or mortgage or security upon, any land cultivated by the labour of slaves, or shall be or act as the manager, overseer, agent, or attorney of, for, or upon any plantation or estate cultivated wholly or in part by the labour of slaves.
3. And it is further ordered, that for the purpose of hoiding the respective courts aforesaid, the ssid three judges shali from time to time repair to the said reapective colonies of Demerara, Berbice, Trinidad, snd St. Lucia.
4. And it is further ordered, that two sessions at the least shali be holden in each year and in each of the said courts, and that the times of holding such sessions in such respective colonies, and the duration thereof In each, shall be determined by proclamations to be from time to time for that purpose issued in the said respective colonies by the respective Governora thereof.
5. And it is further ordered, that the Governors of the said respective colonies shall, and they sre hereby authorized to arrange with each other the times of holding such sessions as aforesaid in such manner as may best promote the administration of jastice therein, and the common convenience of the said respective colonies; and in case of any difference of opinion between such Governors as to the time of holding any such sessions, or as to the duration thereof, the judgment of the Governor of British Guiana ahall prevail and be observed until His Majesty's pleasure therein shall have been signified through one of his principal Secretaries of State.
6. And it is further ordered, that in each of the said courts the President for the time being of the Court of Criminal and Civil Justice of Demerara and Essequibo shall preside and take precedence over such otber two judges as aforesaid; and the said Chief Judge of Trinidad shall in like manner, in each of the said courth, take precedence over the First President of St. Lucia.
7. And it is further ordered, that in each of the said courts the said three judges shall in all civil cases have, possess, exercise, and enjoy such and the same jurisdiction, powers, and authority in every respect us the present judges of the said courts now have or lawfulty possess, exercise or enjoy, and that the decision of the majority of such three judges shall in all civil cases at any time depending in either of the said courts, be taken and adjudged to be, and shall be recorded as, the judgment of the whole court.
8. Provided nevertheless, and it is further ordered, that upon the trial of any persons or person in any of the said courts for any crime or offence with which they, he, or she may be charged, three assessors shall be associated to the said three judges, in the manner thereinafter provisect for, which assessors shall be entitied to deliberate and vote with such judges upon the final judgment to be pronounced in every such
criminal ment by judges a be necess such proc in the me such Gove respectivel criminal. shall be $b$ such Vicecriminal su inquire int by such jud of such juı any such ge tioned.
9. And to review, r may be mad hereby veste without any as now are o
10. And i and they are them shall respectively, to be therein concerning concerning t of advocates cerning all ot courts ; and occasion ms. this present dition in the succinct, and the most pub at least befor and regulatio for the time $b$
11. And w civil cases of therefore furt with the adv Council of Gd time to time criminal cases not be extend sterling mone, or any fee, du that the juria may be accuse lawful for any without hard exceeding 39
criminal casc; and no person shall be convicted of any crime or offence, or adjudged to suffer any punishment by any judgment or sentence of any of the said courts, unless a majority of the total number of such judges and assessors shall in open coutt vote in favour of such judgment or sentence.
12. And it is further ordered, that in each of the said courts the sald three judges and assessors shall in sll criminal cases have, possess, exercise, and enjoy such and the same jurisdiction, powers, and authority in every respect as the present judges of the sald courts now have or lawfully possess, exercise, or enjoy, and that the decision of the majority of the total number, of such judges and assessors shall in all criminal cases at any time depending in any of the said courts, be taken and adjudged to be, and shall be recorded as, the judgment of the whole court.
13. And it is further ordered, that the Governor of each of the sald colonles shall by proclamations to be by him from time to time for that purpose lssued within the same, make and prescribe such rules and regulations ss may be necessary to determine the qualificstions of such assessors, the mode of convening them, the penslities to be infilcted on persons refusing to sct as such assessors when thereunto lawfully required, and the mode of challenging such assessors, and what shall be lawful ground of challenge, and how the valldity of any such chsillenge shall be determined, together with every other matter and thing which may be necessary to the effective discharge by such assessors of the duty thereby committed to them; and every such proclamstion shall forthwith be transmitted by such Governor for His Majesty's spprobation, and shall In the meantime, and unless disallowed by His Majesty, and untli such disallowance shall be made known to such Governor, be of the same force and effect as If the same had been contained in this present order.
14. And it is further ordered, that none of the judges nor any Vice. P'resident of either of the said courts respectively, shall be liable to challenge or recusation in or upon ang action, sult, or proceeding, civil or criminal.
15. And it is further ordered, thst during the absence of any of the said judges from the colony to which he may belong, for the purpose of holding such sessions as aforesaid, the Supreme Court of such colony shall be holden by a single judge, to be called the Vice-President of such court, and it shall be the duty of such Vice-President tr hear and determine all such Interlocutory matters arising in or upon any civil or criminal suit, action, or proceeding depending in the sald court, as may be brought before him, and also to inquire into and report to the said judges in any such sessions as aforesaid upon any questions whlch may by such judges at their sessions have been specially referred to any such Vice-President; and in the exercise of such jurisdiction, such Vice.President shall and he is hereby required to conform himself to and observe any such general rules or orders of court as may be made for his guidance in the manner hereinafter mentioned.
16. And it is further ordered and declared, that it shall be lawful for the sald Supreme Courts respectively to review, reverse, correct, or confirm, as occaslon may require, any judgment, sentence, rule or order which may be made, given, or pronounced by any such Vice.President ss aforesaid, in the exercise of the jurisdiction hereby vested in him, and that in the exercise of such jurisdiction, such Vice-President shall act alone and without any colleague or assessor, and shall have all such and the same powers and authority in that behalf as now are or is vested in the said courts respectively for the sald respective purposes.
17. And It is further ordered, that it shall and may be lawful for the judges of the said courts respectively, and they are hereby authorized and required to make and establish such rules, orders, and regulations as to them shsll seem meet concerning the forms snd manner of proceeding to be observed in the said courts respectively, and the practice and pleadings in all actions, sults, and other matters, both civil and criminal, to be thereln brought, and concerning the duties and jurisdiction of the aaid reapective Vice-Preaidents, and concerning the proceedings of the executive and ministerial offices of the said courts respectively, and concerning the proceas of the said courts, and the mode of executing the same, and concerning the admisslon of advocates, barristers, attornles, solicitors, notaries, and proctors in the said courts respectively, and concerning all other matters and things which relate to the conduct and dispatch of business in the said respective courts; and all such rules, orders, and regulations, from time to time, to revoke, alter, amend or renew, as occasion may require. Provided always, that no such rules, orders, or regulations shall be repugnant to this present order, and that the same shall be so framed as to promote, as far aa may be, economy and expedition in the dispatch of the business of the sald courts respectively, and that the same be drawn up in plain, succinct, and compendious terms, avoiding all unnecessary repetitions and obscurity, and be promulgated in the most public and authentic manner in the colonies to which the same may respectively refer, for 14 daya at least before the same shall be binding and take effect therein ; and provided alao that all auch rules, ordera, and regulations shall forthwith be transmitted to Hls Majesty, under the seal of the court, by the Governor for the time belng of auch colony, for his approbation or disallowance.
18. And whereas it may be expedient to establish within the said culonles courts having jurisdiction in civil cases of small amount and in cases of breaches of the peace, assaults, and other petty offences; it is therefore further ordered, that it shall be lawful for the Governor of each of the said colonies respectively, with the advice of the Court of Policy in the said colony in Britistı Guiana, and with the advice of the Council of Government in the said colonies of Trinldad and St. Lucia, by any laws and ordinances to be from time to time made for that purpose, to erect, constitute, and establish cuurts having jurisdlction in civil and criminal cases within the said respective colonies, provided that the jurisdiction of such Civil Courts ahall not be extended to any case wherein the sum or matter in dispute shall exceed the amount or value of $20 l$. sterling money, or wherein the title to any lands or tenements, or the title of any person to his or her freedom, or any fee, duty, or office may be in question, or whereby rights in future may be bound; and provided also that the jurisdiction of euch courts in criminal cases shall not be extended to any case wherein any person may be accused of any crime punishable by death, transportation, or banishment ; and that it shall not be lawful for any such Criminal Court to Inflict any greater or other punishment than Imprisonment, with or without hard labour, for a term not exceeding three months, or fine not exceeding 20l., or whipping n:at exceeding 39 stripes, or any two or more such punishments within the limits aforesaid.

## APPENDIX II.-SOUTH AMERICA.

16. And it is further ordered, that the Judges of the said Supreme Courts of the said colonies respectively shall be and they are hereby authorized to make, ordain, and establish all necessary rules, orders, or regulations respecting the manner and form of procceding to be observed in the aaid Petty Courts, and respecting the manner and form of carrying the judgments and orders of such courts into execution, with all such other rules, orders, and regulations as may be necessary for giving full and perfect effect to the jurisdiction of such courts respectively, and auch rules, orders, and regulations from time to time to revoke, alter, and renew, as occasion may require.
17. And it is hereby further ordered, that it shall and may be lawful for any person or persons, being a party or parties to any civil suit or action depending in any of the said Supreme Courts of any of the said colonies, to appeal to His Majesty, his heirs, and successors, in his or their Privy Council, againat any final judgment, decree, or sentence of any of the said courts, or against any rule or order made in any such civil suit or action having the effect of a final or definitive sentence, and which appeals ahall be made subject to the rules and limitations iollowing; that is to say, in case any such judgment, decree, order, or sentence shall be given or pronounced for or in respect of any sum or matter at iasue above the amount or value of 500l. aterling; or in case such judginent, decree, order, or sentence shall involve, directly o: ". lirectly, any claim or demand to or question respecting property, or any civil right amounting to or of the value of 500 l . sterling ; or in case auch judgment, decree, order, or sentence ahall determine or affect the right of any person to his or her freedom, the person or persons feeling aggrieved by any such judgment, decree, order, or selltence may, within fourteen daye next after the same shall have been pronounced, made, or given, apply to such court by petition for leave to appeal therefrom to His Majesty, his heirs, and successors, in his or their Privy Council; and in case auch leave to appeal ahall be prayed by the party or parties who ia or are directed to pay any sum of money or perform any duty, such Supreme Court shall and is hereby empowered either to direct that the judgment, decrec, order, or aentence appealed from shall be carried into execution, or that the execution thereof shall be suspended pending the said appeal, as to the said court may in each case appear to be most consistent with real and aubstantial justice; and In case such Supreme Court ahall direct such judgment, decree, order, or sentence to be carried into execution, the person or persons in whose favour the same shall be given, shall, before the execution thereof, enter into good and sufficient security, to be approved by the said Supreme Court, for the due performance of such judgment or order as His Majeaty, his heirs and successors, shall think fit to make thereupon ; or in case the said Supreme Court shall direct the execution of any judgment, decree, order, or sentence to be suspended pending the said appeal, the person or persons against whom the same shall have been given shall, in like manner, upon any order for the suspension of any such execution being made, enter into good and aufficient security, to be approved by the said Supreme Court, for the due performance of such judgment or order as His Majesty, his heirs, and successors shall think fit to make thereupon; and in all cases security ahall also be given by the party or parties appellant, to the satisfaction of such court, for the prosccution of the appeal and for the payment of all such costa as may be awarded by His Msjesty, his heirs and successors, to the party or parties respondent; and if such last-mentioned security shail be entered into within three montha from the date of auch petition for lcave to appeal, then, and not otherwise, the said Supreme Court shall allow the appeal, and the party or partics appellant shall be at liberty to prefer and prosecutc his, her, or their appenl to His Majesty, his heirs and auccessors, in his or their Privy Courcil, in such manner and under such rules as are observed in appeals made to His Majesty in Council from his plantations or colonies.
18. Provided always, and it is hereby declared and ordered, that nothing herein contained doth or shall extend, or be construed to extend, to take hway or abridge the undnubted right or authority of His Maiesty, his heirs and successors, to admit and receive any appeal from any judgment, decree, sentence, or order of any of the said Supreme Courts, on the humble petition of any person or persons aggrieved thereby, in any case in which and subject to any conditions or restrictions upon and under which it may seem meet tu His Majesty, his heirs and successors, so to admit and receive any such appeal.
19. And it :- further ordered, that in all cases of appeal allowed by any of the said Supreme Courts, or hy His Majesty, his heirs and successors, such court shall, on the application and at the coats of the party or parties appellant, certify and transmit to His Majeaty, his heirs and successors, in his ur their Privy Council, i true and exact copy of all proceedings, evidence, judgments, decrees, and orders, had or made in such causes so appealed, as far as the same have relation to the matter of appeal, such copies to be certified under the seal of the said court.
20. And it is further ordered, that the said Supreme Courta respectively shall, in all cases of appeal to His Majesty, hls heirs and successors, conform to, execute, and carry into immediate effect such juulgments and orders as His Majesty, his heirs and successors, shall make thercupon, in such manner as any original judg. ment or decree of the said Supreme Court can or may be executel.
21. And whcreas there are in the said courts, or some of then, divers unnecessary officers, being or ciaming to be entitled to fees of large amount for services by them rendered to suitors and others concerned in the proceedings of the said courts, to the great charge of his Majesty's subjects, and to the obstruction of the due administration of justice; it is thercfore hereby ordered, that the office of Sworn-Accountant, as at present existing in Demerara and Essequiho, and in Berbice respectively, shall be the aame and is hereby abolished, and that the duties heretofore performed by such sworn-accountanta shall henccforward, but subject to the rules of court to be made as hereinbefore mentioned, be performed by the Vice-President of the Court of Criminal and Civil Justice of Demerara and Essequibo, and by the Vice-President of the Court of Civil Justice and of the Court of Criminal Juatice of Berbice; and it it is herehy further ordered, that the office of Father-General of Minors, and the office of Defender of the Absent, and the office of DepositarioGeneral, and the office of Tnxador, and the office of Judicial Referee, Liquidator, and Partidor, as st preent existing in the sald Island of Trinidad, shall be and the same are hereby respectlvely abolished; and that the duties of the offices of the sald Judicinl Referee, Liquidator, and Partidor and Taxador, shall henceforward, but aubject to the rules of court to be made as hercinbefore mentioned, be performed by the Vice.President
of the Cou Curateur a shall be an henceforw Vice Presid

9. And it is hereby further ordered, that all orders heretofore made by His Majesty, or by any of his royal predecessors in his or their Privy Cuuncil, and all laws, customs, and usages now or at any time heretofore established or in force in any of the said colonies, so far as such orders, laws, or usages are in anywise repugnant to or at variance with this present order, shall be and the same are hereby revoked, abrogated, rescinded, and annulled.
10. And it is further ordered, that for the purpose and within the meaning of the present order, any person lawfully administering for the time leing the government of the said colonies shall we deemed and taken to be the Governor thereof.
(Signed)
C. C. GREVILLE.

At the Court of St. James, the 20th day of June, 1831 ; Present, The King's Most Excellent Majesty in Council.

1. Whereas, on the 23d day of April, 1831, an order was made by His Majeaty, with the advice of his Privy Council, for improving the administration of justice in His Majesty's colonies of British Guiana, Tridad, and St. Lucia; and for that purpose it was thercby ordered, that the Chief Judges of the said three colonies should from time to time repair to the said colonies, for the purpose of holding in succession therein the Supreme Courts of such colonies respectively: An" whereas unforesecn difficulties may arise to delay the execution of the said order, and it may be necessary to make provision for the administration of justice thercin; in the meantime it is hereby ordered by the King's Most Excellent Majesty, by and with the advice of his Privy Council, that it shall and may be lawful for the Governors for the time being of the said colonies of British Guiana, Trinidad, and St. Lucia, or for any two of them, by a proclamation to be by them issued in His Majesty's name in the said respective colonies, to suspend the execution of the said order of the $23 d$ day of April, 1831, and the same shall thereupon be and remain suspended, until His Majesty's further pleasure shall be signified to the said respective Governors.
2. And it is further ordered, that during any such suspension of the sald order of the 23 d day of April, 1831, and no longer, the rules, orders and regulations hereinafter made and contained shall be observed in the administration of justice in the said respective colonies; that is to say, in the first place, it is ordered, that henceforth the Court of Criminal and Civil Justice of Denserara and Essequibo, and the Court of Civil Justice, and the Court of Criminal Justice of Berbice, shall henceforth be holden by and before three judges and no more, and that the first or presiding judge of the said court ahall be called and bear the style and title of Chief Justice of British Guiana, and that the second and third of such judges ahail be called and bear the respective styles and titles of First Puisne Judge and Second Puisne Judge of British Gaiana.
3. And it is further ordered, that the court for the trial of criminal prosecutions, and the Court of First Instance of Civil Jurisdiction in the ialand of Trinidad, shall henceforth be holden by and before three judges and no more; and that the firat or presiding judge of the said court shall be called and bear the style and title of Chief Justice of Trinidad, and that the second and third of such judges shall be called and bear the respective styles and titles of First Puisne Judge and Second Puisne Judge of Trinidad.
4. And it is further ordered, that the Royal Court of St. Lucia shall henceforth be holden by and before three judges and no more; and that the first or presiding judge of the said court shall be called and bear the style sud title of Chief Juatice of St. Lucia, and that the second and third of such judges ahall be called and bear the respective atylea and titles of First Puisne Judge and Second Puisne Judge of St. Lucia.
5. And it is further ordered, that whenever and so often as the office of any chief justice or puisne judge of any of the said colonies shall become vacant by the death, absence, incapacity, resignation, suspension, or removal of any such chief justice or judge, the Governor of such colony for the time being shall be and is hereby authorized to supply and fill up such vacancy by the appolntment of aome proper peraon, by a commission under the public seal of such colony, which commission shall be made to continue in force only until His Majesty's pleasure shail be known.
6. And it is hereby further ordered, that none of the said judges of any of the colonies aforesaid shall be the owner of any slave, or shall have any ahare or interest in, or any mortgage or security upon any alave, or ahall be proprietor of, or have any share or intereat in, or mortgage or security upon any land cultivated by the labour of slaves, or shall be or act as the manager, overseer, agent, or attorney of, for, or upon any plantation or estate cultivated wholly or in part by the labour of slaves.
7. Provided nevertheless, that noth ${ }^{-\quad} \cdot \mathrm{g}$ herein contained shall prevent any such judge from acquiring any such property or interest as aforesald under any legal process, for the recovery of any debt or demand, or by testamentary or other succession, inheritance, donation, or other involuntary title, but all auch property or interest as aforesaid which any such judge may so acquire, shall, within one calendar month next after the acquisition thereof, he by hlm communicated to the Governor of the colony, and shall be alienated and disposed of within six calendnr months, unless Hla Majcaty shall In any case be pleased to grant to any such judge a longer jeriod for effecting any such alienation or disposal thereof.
8. And it is further ordered, that In each of the said courts reapectively, the sald three judges of the said respective colonies shail in all civil cases have, possess, exercise, and enjoy auch and the same jurisdiction, powers, and authority, in every respect, as the judges of the said courts have heretofore lawfully posscssed, exprcised, or enjoyed; and that the decision of the majority of such three judges shall in all civil cases at any time depending in the said respective courts, be taken and adjudged to be, and shall be recorded as the judgment of the whole of such court.
9. And it is further ordered, that upon the trial of any person or persons in any of the said courte respectively for any crime or offence, three assessors shall he associated to the said three judges, in the manner hereinafter provided for, which assessors shall be entitled to deliberate and vote with such judges upon the final judgment to be pronounced in every such criminal case, or no person shall be convicted of any crime or offence, or adjudged to suffer any punishment by any judgment or sentence of any of the said courts, unless a majority of the total number of auch judges and assessors shall in open court vote in favour of such judgment or sentence.
10. And it is further ordered, that in each of the said courta the said tbree judges and assessors shall in all criminal cases have, possess, exercise, and enjoy such and the asme jurisdiction, powers, and authority in every respect as the judges of the said courts respectively have heretofore lawfully possessed, exercised, and enjoyed, and that the decision of the majority of the total number of such judges and assessors shall in all criminal cases at any time depending in any of the said courts, be taken and adjudged to be and shall be recorded as the judgment of the whole court.
11. Aud it is further ordered, that it shall be lawful for the judges of any of the said courts respectively to reserve the consideration of any question of law arising upon any such criminal trial as af reseaid, and to make order for the suapension or arrest of the judgment or sentence of the court, until the decision of such question of law, which shall be adjudged and decided by such judges alone, or without the concurrence or interference of such assessors therein.
12. And it is hereby further ordered, that the assessors of the said courts in Demerara and Berbice shsll be chosen and appointed in such and the same manner as the members of the Court of Civil and Criminal Justice of Demerara have heretofore been chosen and appointed ; and that the assessors of the said court for the trial of criminal prosecutions in Trinidad shall be chosen and appointed from and out of the members of the Cabildo of the town of Port of Spain in the said island; and that the assessors of the said Royal Court of St. Lucia shall be chosen and appointed in such and the same manner as the members of that court, other than the First President, have beretofore been chosen and appointed.
13. And it is liereby further ordered, that none of the judges of either of the said courts shall be liable to challenge or recusation in or upon any action, suit, or proceeding, civil or criminal, but that such assessora shall be liable to be challenged on such and the like grounds as may be alleged as lawful ground of challenge against any petit juror empannelled for the trial of any indictment in England, and the validity of every such challenge shall be decided by the judges presiding at any such trial, without the concurrence or interference of the assessors or any of them.
14. And it is further ordered, that it shall and may be lawful for the judges of the said courts respectively, and they are hereby authorized and required to make, ordain, and establish a tariff or table of fees, to be had, taken, allowed, and paid by the suitors in the said reapective courts, for and in respect of every aentence, judgment, order and proceeding which may be pronounced, made, or had in any suit or action depending therein, or which may or shall be paid or payable to any of the officers of the said court respectivels, or to any advocate, barrister, solicitor, attorney, proctor or notary, or other practitioner of the law therein, and which tariff or table of fees shall, by the Chief Justice of each of the aaid courts respectively, be transmitted to the Governor for the time being of the colony to which such court may belong; and any such tariff or table heing ratified and confirmed by any ordinance to be for that purpose made by the Governor and Court of Policy of British Guiana, or by the Governor, with the advice and consent of the Council of Government in the said colonies of Trinidad or St. Lucia, shall be binding upon all persona interested therein ; and all persons receiving any greater or higher or other fee or reward than shsill by any such tariff or table be allowed, shall be liable to refund the same by such summary process or proceeding as shall seem good to the said courta respectively in that behalf.
15. And it is further ordered, that it shall and may be lawful for the said Governor and Court of Policy of British Guiana, and for the Governors of Trinidad and St. Lucia respectively, with the advice and consent of the respective Councils of Government thereof, by any ordinances to be by them for that purpose msde, to prescribe the form and manner of proceeding to be observed in the said respective courts for the prosecution and trial therein of all persons charged with the commlssion of any crimes and offences cognizable within the said courts respectively : provided nevertheless, that every such ordinance shall be transmitted for His Majesty's approbation in the manner required by law in reference to all ordinsnces passed and enacted in the said respective colonies.
16. And it is further ordered, that it shall and may be lawful for the judges of the said courts respectively, and they are hereby authorized and required to make and establish such rules, orders, and reguistiona as to them shall seem meet, touching the distribution of the business of the sald courts between the respective judges thereof, and concerning the forms and manner of proceeding to be observed in the said courts respectively, and the practice and pleadings in all civil actions and other civil matters to be therein brought, and concerning the process of the said courts and the mode of executing the same, and concerning the admission of advocates, barristers, attornles, solicitors, notaries, and proctors in the said courts respectively; all which rules, orders, and regulations shall be framed in such a manner as to promote, as far as may be, economy, method, and expedition in the despatch of the businesa of the said courts respectively; and the same ehall be drawn up in plain, succinct, and compendious terms, aviding all unnecessary repeetitions and obscurity, and shall be promulgated in the most public and authentic manner in the colonies to which the same may respectively refer, for fousteen days at the least before the same shall be biading and take effect therein.

17. Provided always, and it is further ordered, that wo such rules, orders, or regulations as aforesaid be repugnant to this present order, and that the same be forthwith transmitted under the seals of nuch respective courts to the respective Governors of the said colonies.espectively, to be by them transmitted to His Majesty for his approbation or disallowance.
18. And whereas there are established within the said colonics, or some of them, courts having jurisdic. tion in civil cases of small amount, and in cases of breaches of the peace and other petty offences, and it is expedient that provision be made for the better administration of justice in such courts; it is therefore hereby ordered, that no court within any of the said colonies other than the supreme courts hereinbefore mentioned, shall be competent to hold jurisdiction in any civil case in which the sum or matter in dispute shall exceed the amount or value of $20 l$. aterling money, or in which the right of any allcged slave to his or her freedom, or the title to any lands or tenements, or any fec, duty; or office, or His Majesty's Royal Pre. rogative inay be in question, or whereby rights in future may be bound; and that no court within any of the said colonies, other than the Supreme Courts aforesaid, shall be competent to hold jurisdiction in any crminal case whercin any person shall be accused of any crime punishable by death, transportation, or banishment; and that it shall not be lawful for any court in any of the said colonics, other than the Supreme Courts aforesaid, to inflict any greater or other punishment than imprisonment, with or without hard labour, for a term not exceeding three months, or fine not exceeding $20 l$. or whipping not ex. ceeding 39 stripes, or any two or more of such kind of punishments together, within the limita aforessid.
19. And it is further ordered, that it shall be lawful for the Governor of Britiah Guiana, with the advice and consent of the Court of Policy thercof, and for the Governors of Trinidad and St. Lucia, with the advice and consent of the respective Councils of Government thereof, to establish, constitute, and erect within the said respective colonies, inferior courts having jurisdiction in civil and criminal cases within the limits aforesaid, and for that purposc may abolish any such inferior courts as may be now existing therein, or modify the constitution of such courts as may be found expedient.
20. And it is further ordered, that the judges of the said Supreme Courts of the said colonies respectively shall be and they are hereby authorized to make, ordain, and establish all nccessary rules, orders, and regulations respecting the manner and form of proceeding to be obaerved in the said inferior courts, and respectjing the manner and form of carrying the judgments and orders of such courts into exccution, with all such other rules, orders, and regulations as may be necessary for giving full and perfect effect to the jurisdiction of such courts respectively, and such rules, orders, and regulations from time to time to revoke, alter, and renew as occasion may require ; provided always, that all such rules, orders, and regulations as aforesaid shall be promulgated, and aliall be transmitted to His Majesty for his approbation or disallowance, in the manner hereinbefore directed and required with respect to the rules, orders, and regulations of the said Supreme Courts.
21. And it is further ordered, that the office of Father-General of Minors, and the office of Defender of the Absent, and the office of Depositario-General, as at present existing in the island of Trinidad, shall be and tbe same are hereby respectively abolished; and that the office of Taxador, and the office of Judicial Referee, Liquidator, and Partidor, as at present existing in the said island, shall be and the same are hereby consolidated, and shall constitute one office.
22. And it is further ordered, that the offices of Curateurs aux Successions Vacantes, and Regisseur des Biens des Absens, as at present existing in St. Lucia, shall be and the same are hereby abolished.
23. And whereas various juriadictions have heretofore been exercised by certain courts in the island of Trinidad, which, by reason of the changes hercby introduced into the administration of justice there, it is no longer necessary to retain ; it is therefore hereby ordered, that the several courts or tribunals following, that is to say, the "Court of Criminal Inquiry," the "Tribunal of Appeal, in all cases of condemnation ta death," the "Superior Tribunal of Appeal of Civil Jurisdiction," the "Tribunal of the Royal Audiençia," and all offices in and connected with the said courts reapectively, shall be and the aame are hereby respectively aboliahed.
24. And it is further ordered, that the Court of Sénéchaussée, in the island of St. Lucia, and all offices in and connected with that court, shall be and the same are hereby abolished ; and that the Royal Court of the ssid island shall hencetorth liave an originnl jurisdiction in all causes arising withln the said island, in such and the same manner and to such and the same extent as such original jurisdiction was heretofore veated in the said Court of Sénéchaussec.
25. And it is hereby further ordered, that it ahnll and may be lawful for any person or persons, being a party or partiea to any civil auit or action depending in the said Court of Civil and Criminal Justice of Demerara snd lissequibo, or in the said Court of Civil Justice of Berbice, or in the said Court of First Instance of Civil Jurisdiction of Trinidad, or in the aaid Royal Court of St. Lucia, to appeal to His Majesty, his heirs, and successors, in his or their Privy Council, against any flaal judgment, decree, or sentence, or against any rule or order made in any such civil suit or action, and having the cffect of a final or definitive sentence, and which appeala shall be made aubject to the rules and limitations following: that is to say,

First, Such judgment, decree, order, or sentence shall he given or pronounced for or in respect of a sum or matter at issue above the amount or value of $500 l$. sterling, or shall Involve directly or indlrectly the title to property, or to some civil right, amounting to or of the value of 500 l . aterling, or shall determine or affect the right of some alleged slave to his or her freedom :
Secondly, The person or persons feeling aggrieved by such judgment, decree, order, or sentence, shall, within fourteen days next after the same shail have been pronounced, made, or given, apply to the court by petition for lcave to appeal therefrom to His Majesty, his heirs, and successors, in his or their Privy Council :

Thirdly, If such leave to appeal shall be prayed by the party or parties who is or are adjudged to pay any sum of money or to perform any duty, the court shall direct that the judgment, decree, or sentence appealed from shall be carried into execution if the party or parties respondent ahall give security for the inmediate performance of any judgment or sentence which may be pronounced or made by His Majesty, his heirs, snd successors, in hia or their Privy Council, upon any such appeal, and until such security be given, the execution of the judgment, decree, order, or sentence appealed from shall be stayed:

Fourthly, Provided nevertneless, that if the party or parties appellant ahall establish to the aatisfaction of the court, that renl and substantial justice requires that pending such appeal, execution should be stayed, it shall be lawful for such courts to order the exceution of such judgment, decree, order, or sentence, to be suspended pending such appeal, if the party or partica appellant shall give security for the immediate performance of any judgment or sentence which may be pronounced or made by His Majesty, his heirs, and successors, in his or their Privy Council, upon any such appeal:

Fifthly, In all cases security shall also be given by the party or parties appellant for the prosecution of the appeal, and for the payment of all such costs as may be awarded by His Nlajesty, his heira, and successors, to the party or parties respondent :

Sisthly, The court from which any auch appeal as aforesaid shall be brought, shall, sulject to the conditions hereinafter mentioned, determine the nature, amount, and sufficiency of the several securities so to be taken as aforesaid:

Seventhly, Provided nevertheless, that in any case where the subject of litigation shall consist of immoveable property, or of any slaves, atock, utensils, or implements, held therewith or attached thereto, and the judgment, decree, order, or sentence appealed from shall not charge, affect, or relate to the actual occupation thereof, no security shall be demanded either from the party or parties respondent or from the party or parties appellant, for the performanee of the judgment or aentence to be pronounced or made upon such appeal; but if such judgment, decree, order, or sentence, shall charge, nffect, or relate to the occupstion of any such property, then auch aecurity shall not be of greater amount than may be necessary to secure the restitution, free from all damage or loss, of such stock, utensils, or implements, or of the intermedinte proft which, pending any such appeal, may probably accrue from the intermediate occupation of such property; and each of the said courts is hereby authorized and required to sequestrate any auch immoveable property, slaves, stock, utensils, and implements, in order atill further to reduce the amount of auch sccurity, if the party or parties by whom auch security is to be given shsll make application to such court for that purjose, and the other party or parties shall not ahow good eause to the contrary :
Eighthly, In any case where the subject of litigation shall consist of money or other chattels, or of any personal debt or demand, the security to be demanded either from the party or parties respondent, or from the party or parties appellant, for the performance of the judgment or sentence to be pronounced or made upon auch apjeal, shall be either a bond to be entered into in the amount or value of such aulject of litigation by one or more aufficient surety or sureties, or such security shall be given by way of mortgage or poluntary condemustion of or upon some immoveable property or slaves aituate and being within such colony, and being of the full value of such subject of litigation, over and above the amount of all mortgages and chargea of whatever nature upon or affeeting the same:
Ninthly, In any case where the aubject of litigation shall be the right of any alleged alave to his or her freedom, the amount of the aecurity for the performance of the judgnient or sentence to be pronounced snd made upon any such appeal, ahall in no case exceed the pecuniary value of such alleged alave, and shall be given either by such surety or aureties, or by such mortgage or voluntary condemnation as aforesaid:
Tenthly. The aecurity to be given by the party or parties appellant for the prosecution of the appeal and for the payment of costs, shall in no case exceed the sum of 3001 . sterling, and ahall be given cither by such surety or sureties, or by such mortgage or voluntary condemnation as aforesaid:

Eleventhly, If the security to be given by the party or parties appellant for the prosecution of the appal and for the payment of such costs as may be awarded, shall, in manner aforesaid, be completed within three months from the date of the petition for leave to appeal, then, and not otherwise, the court from which such appeal ia brought shall make an order allowing such appeal, and the party or parties appellant shall be at liberty to prefer and prosecute his, her, or their appeal, to His Majesty, his heirs, and successors, in his or their Privy Council, in such manner and under such rules as are observed in appicals made to His Majesty ia Council from the plantations or colonies:
T'welthly, Pıovided nevertheless, that any person, or persons feeling aggrieved by any order which mas be made by, or by any proceeding of any of the said courta respecting the aecurity to be taken upon any such appeal as aforesaid, shall be and is hereby authorized, by petition to His Majesty in Council, to apply for redress in the premises.

Provided alwnys, and it is hereby further ordered, that nothing herein contained doth or shall extend or be construcd to extend to take away or abridge the undoubted right or authority of His Majesty, his heirs, and auccessors, to admit and receive any appeal from any judgment, decree, aentence or order of any of the said Supreme Courts, on the humble petition of any person or persons aggrieved thereby, in any case in which, and subject to any conditiona or restrictions upon and under which it may seem meet to His Majety, his heirs and succeasors, so to admit and receive any auch appeal.
26. And it is further ordered, that in all cases of appeal allowed by any of the said Supreme Courts or by His Majcaty, his heirs and auccessors, such court shall, on the application and at the costs of the party or parties appellaint, certify and transmit to His Majeaty, his heirs and successors, in his or their Privy Council, a true and exact copy of all proceedings, evidence, judgments, decrees and orders had or made in such causa so appealed, so far as the same have relation to the matter of appeal, such copies to be certified under the seal of the anid court.
27. And it is further ordered, that the said Supreme Courts respectively shall in all cases of appeal to ilit

## INFERIOR COURTS OF CIVIL JUSTICE.

## (This aummary is derived from Mr. Clarke's excellent Work on Colonial Law.)

Under the authority of the 19th section of the preceding order, an ordinance was passed by the Governor and Court of Policy on the 13 th day of September 1832, to repeal the ordinance passed on the 23d of May 1832, entitled "An Ordinance to estallish and constitute Inferior Courts of Civil Justice in British Guiana," and to make other provisions for such inferior courts. It recites and repeals the former ordinance, and then proceeds as follows:-
Whereas by an order of His Majeaty in Council, bearing date 20th June 1831, His Majesty has been graciously pleased to authorize the establishing of Inferior Courts of Civil Justice within this colony, having jurisdiction to a certain extent as therein described.
2. Be it therefore further Enacted, that there shall be one Inferior Court of Civil Justice for the district of Demerara and Essequibo, and another Inferior Court of Civil Justice for the district of Berhice.
3. And be it further enacted, that the said Inferior Courts shall be held by and before the Chief Justice or one of the Puisne Judges, at such times as the Judges of the Supreme Court shall direct and appoint.
4. And be it further enacted, that the said Inferior Civil Court shall have jurisdiction in cases to the amount or value of twenty pounds sterling, all claims in currency not excceding 300 guilders being comprehended in this limitation.
5. And be it further enacted, that the Registrar or Sworn Clerk and Marshal of the respective Supreme Courts of Civil Justice shall attend the sitting of the said respective Inferior Civil Courts, and shall be entitled to receive certain fees for services respectively performed by them.
6. And be it further enacted, that when the Judges of the Supreme Court ahall have made, ordained, and established all necessary rules, orders, and regulations respecting the manner and form of proceeding to be observed in the said Inferior Civil Courts, and respecting the manner and form of carrying the judgments and orders of the said Inferiur Civil Courts into execution, with all such other rules, orders, and regulations as may be necesaary for giving full and perfect effect to the jurisdiction of the said courts respectively, and as soon as the said rules, ordera, and regulations shall have heen duly promulgated this court shall thereupon frame the tariff fixing the amount of fees to which the respective officers of the snid court shall be entitled for services performed by them in their respective offices; and on promulgation thereof by this court, the said tariff shall have force of lnw, and become binding on all parties concerned.
7. And be it further enacted, that this ordinance shnll come into full operation on the first day of November next coming. And that no ignorance may be pretended of the several orders contained in this ordinance, the same shall be printed and published as customary.

## Practice of the Courts.

In consequence of the Orders in Council remodelling the Supreme Court, and the subsequent establishment of Inferior Courts, local regulations were made directing the mode of proceeding in the Supreme Court and in the Inferior Courts of British Guiana. Many of these regulations can he of use only to the practitioners of law in the colony itsell; hut there are some which, as they may affect contracts made in this country, deserve to be extracted. The first three will give some idea of the jurisdiction of the courts now established in the colony.

Manner of Proceeding to be observed in the Supreme Courts of Civil Justice in British Guiana, made and established by the Justices of the said Courts, in pursuance of His Majesty's Order in Conncil, bearing date 20th June 1831.
Sect. 1. A Court of Civil Justice shall be held in George-town four times in each yenr, for the district of Demerara and Essequibo, and twice or three times, if necessary, in cach year, in New Amsterdam, for the district of Berbice.
2. A Roll Court shall be held in each district before a puisne judge, on such days as shall from time to time be appointed by the Judges of the Supreme Courts, and shall be continued from day to day until the busineas brought before it shall be disposed of. Provided however, that no Roll Court shall be appointed to be held in the months of August, September, and October.
3. Before the firat Roll Court of every month, in which there shall be one or more Roll Court, shall be returnable all and every citation in civil causes over which the Supreme Court has jurisdiction, except in cases of re-auditlon from the Roll to the Supreme Court.
27. It shali and may be lawful for the judge of the Roll, and he is hereby required to make, if need be, a
special report to the court, touching the examination, and the conduct or absence of any witness or wit. nesses, or other persons therein, or relating thereto; a copy of which report, in the event of any appcal to His Majesty in Council being granted, and the papers taken out shall be delivered with the same; and it shall and may be lawful for the court, after the case shsll have been closed on both aides and pleaded, to call up and examine any witness who shall have been examined in the cause.
43. No plantation under execution shall be sold until one year after levy, and the particular description thereof and notice of the sale shall, at least six months previously to the day of sale, have been three times advertised in the London Gazette and Amsterdam Courant.
44. At the expiration of the year after due notice, as in s. 43 , the court or chief juatice, during non-ses. sion, upon petition of the marshal, shall fix a precise day of ale of such plantation, and after advertisement of such precise day for four successive Saturdays in the government newspaper of the colony, such plantation shall be sold at a credit of three, six, nine, and twelve months from the day of sale, payable in manner here. inafter stated; and in the event of the property to be sold consisting of aeveral lota of land, with or without slaves or appurtenances, or of several lots of slaves, with or without buildings, and upon which lots respectively there shall be separate or diatinct mortgagcs, liens or claims, the holdera of such diatinct mortgages, liens or claima, shall be at liberty to petition the court or chief justice during non-eession for an order to sell, as it shall seem most advantageous to all partiea under the circumstances of each particular case, and to enable the court to ascertain the rights of the respective parties on the decision of preference and concurrence.
55. If the purchaser of a plantation or other immoveable property sold at execution sale, be a holder of a first or second mortgage on the aame, he shall not be bound to furnish security, or pay, save snd except to the extent of such claims as shall appear to the court to be preferent to such firat or second mortgage, and of the amount for which the purchase-money shall exceed the amount of the sum due on such first or second mortgage, provided auch first or second mortgage, in virtue of which exemption from security or any part thereof shall be claimed, ahall be deposited with the registrar.
72. Every barrister, advocate, attorney, and solicitor, upon his admission to practise, shall bave administered to him, and shall take the following oath :-
"You sball swear that well and truly you shall serve the King's subjects, according to the best of your learning and knowledge in the law, and you ahall truly counsel and advise them that shall retain you according to the best of your akill, and you ahall not defer, protract, nor delay their cause willingly, for lucre or hope of reward. So help you God."

And no practitioner at the bar shall be allowed to appear for a plaintiff, without filing at the time of his appearance, a power, ad lites, unless by leave of the court, nor for any defendant without filing, at the time of his appearance, a copy of the citation served upon the defendant, or some other authentic voucher, ss evidence of his being employed for and on behalf of such defendant.
73. Whenever the aecretary ohall be called upon to pass or execute a power ad lites, in favour of any practitioner, care ahall be taken to inaert therein authority to receive monies and to grant receipts, and unless such authority be inserted in the powera ad lites, the same shall be considered to have been intentionally withheld.
76. Edictal citations at the inatance of an executor, adminiatrator, curator, guardian, or truatee, shall be confined to two, that is to aay, the first edictal citation ahall be issued in the colony within one month after datc of the order obtained from the chief justice, and the second, or last, so soon as the marshal shall have made his return of the edictal citation having been published three times in Europe, as in section 43 , or in one month after the first shall have been called at the roll, if the publication in Europe be not required.

Manner of proceeding in the Inferior Courts of British Guiana, as established by the Judges of the Supreme Courts in pursuance of His Majesty's Order in Council of 20th June, 1831.
Section 19. There shall be no appeal from any sentence of these courts, and cight clear days after sentence shall have been pronounced, the party in whose favour the sentence is shall be at liberty to proceed in execution thereof.
28. Every one shall be at liberty to appear personally in the Inferior Courts, to conduct his own cause, or to employ by power ad lites a duly admitted barrister, advocate, or attorney, and no other person to appear for him ; it being however understood that whenever such barrister, advocate, or attorney is emplojed, he shall be renunerated by his own client, and no fee or remuneration paid to any barrister, advocate, or attorncy, for nppearing in the Inferior Courts, shall furm any part or parcel of the bill of costs to be taxed against the party condemned.

## Qualifications of Assessors.

The order in Council of the 20th June, 1831 , having directed that in certain cases therein mentioned, asaessora should sit with the Judges of the Supreme Court, another order in Council of the date of the 15th August, 1832, was issued declaring the qualificationa of auch assessors. The aecond order was published in the colony by the proclamation of the Governor, dated on the 25 th October in the same year, and was in the following terms :-
" Whereas on the 20th day of June, 1831, an order was made by His Majesty with the advice of his Privy Council, for improving the administration of justice in His Majesty's Colonics of British Guiana, Trinidad, and St. Lucia, whereby it was, amongst other things, ordered, that the assessors of the courts therein mentioned in Demerara snd Berbice should be chosen and appointed in such and the same manner as the members of the Court of Civil and Criminal Justice of Demerara have heretofore heen chosen and appointed, and that the assessors of the said court for the trial of crininal prosecutions in Trinidad should be chosen and appointed from and out of the members of the Cabildo of the town of Port of Spain, in the said island; and that the assessors of the said Royal Court of St. Lucia should be chosen and appointed in such and he

ssme manner as the members of that court, other than the First President have heretofore heen chosen and appointed. And whereas it is expedient to admit to the discharge of the duties of assessors in the said courts respectively, all free adult male lnhabitants of the said colonies possessing such qualification as hereinafter is mentioned: it is therefore hereby ordered by His Majesty, by and with the advice of his Privy Council, that so much of the asid order as is herein before recited ahall be, and the same is herehy revoked and repealed. And it is hereby further ordered, that every free man, except as hereinafter exempted, between the ages of 21 years and 60 yeara, residing in any of the said colonies, who stall have or be beneficially entitled to, for his own use and benefit, either in his own name or In trust for him, within the same colony, 10l. by the year above reprises in any immoveable property either in perpetuity or for the life of himself or some other person; or who shall have within the same colony for his own use and benefit, either in his own name or in trust for him as aforesaid, 20l. by the year above reprises in any immoveable property held by lease or leases for the absolute term of 21 years, or some longer term, or for any term of years determinable on any life or lives; or who being a householder should be rated or assessed to any direct tax or impost, or to any rate for the relief of the poor, or other local object, on a value of not less than 20l. per annum; or who shall occupy a house of the annual value of 20 l ., shall be qualified and liable to serve as an assessor, within the meaning and for the purposes of the said recited order, in the colony in which every man so qualified respectively shall reside, and for the purpose, and within the meaning of that order, a.: slaves whether praedial or personal shall be considered as iminoveable property. Provided always, and it is further ordered, that all members of the legislative bodies of the said respective colonies, all jurors of the Supreme Courts of Justice therein, all clergymen in holy orders of the Established Church of England and Ircland, all ministers of the Kirk of Scotland, and of the Lutheran and reformed churches, all priests of the Roman Catholic faith, all persons who shall teach or preach in any congregation of Protestant dissenters, and who shall follow no secular occupation except that of schoolmaster, all doctors of law, advocates, counsel, and barristers actually practising, all attorneys at law, solicitors, and proctors actually practising, all officers of the said courts actually exercising the duties of their respective offices; all jailors and persons actually employed by and under them in the custody of prisoners; all physicians, surgeons, and apothecaries actually practising by virtue of any diploma, license, or certificate granted by any competent authority ; all officers in His Majesty'a navy or army on full pay, all pilots duly licensed by any competent authority; all officers of customs, and all officers actually employed as deputies or assistants to the marshals, or other executive officers of the said courts, shall be and are hereby absolutely freed and exempted from serving as such assessors as aforesaid. Provided also, and it is further ordered, that no man who hath been, or shall be convicted of any crime that is infamous, unless he shall have obtained a free pardon, shall serve as such assessor. And whereas it is necessary that provision should be made for ascertaining the names, places of abode, and descriptions, of all persons within the said respective colonies qualified and liable to serve as such assessors, for making and revising from time to time, proper lists of such persons, and for the due summoning of them in sone settled rotation to serve as such assessors, and for the impartial selection of a sufficient number of persons from those so sunmoned to serve on every criminal prosecution.

It is further ordered, that the chief justices and other judges of the Supreme Court of the said colonies respectively, shall be, and they are hereby authorized, to make, ordain, and establish all necessary rules, orders, and regulations, respecting the manner in which the naınes, places of abode, and descriptions of persons within the said respective colonies, qualified and liable to serve as such assessors as aforesaid, shall be ascertained, and respecting the making and preserving in the different districts and quarters of the said respective colonies lists of all such persons, and respecting the public and other notices to be given preparatively to the compiling of any such lists, and the publication of any such lists when so compiled; and respecting the manner in which all persons whom it may concern shall be called upon or permitted to oppose or object to the insertion or omission of any such list; and respecting the manner in which every such opposition or objection shall be heard, tried, and determined; and respecting the manner of reforming, correcting, or allowing any such list ; and respecting the manner and form of all such lists, when cor. ected and reformed, shall be recorded; and also respecting the manner, order, and form in which all persons, whose names shall he comprised in any such record, shall be suminoned to attend at any sessions of any such court, there to serve as assessors, and respecting the times at which, and the manner in which such summons shall be served; and also respecting the mode in which a competent number of assessors shall be chosen, either by ballot or otherwise, from among the number so summoned to serve as assessors in the said courts; and also respecting the proper method of proceeding to preserve a due rotation amongst such assessors; and also respecting the several officers by whom, and the times and places at which the before-mentioned duties respectively ahall be done and performed; and all such rules, orders, and regulations from time to time to alter, revoke, and renew, as occasion may require. Provided always, that no such rules, orders, and regula lations as aforesaid be repugnant to this present order, and that the same be forthwith transmitted under the seals of auch respective courts to the respective Governors, to confirm or disallow the whole or any part of such rules, orders, and regulations, as to auch respective Governors may in their discretion seem fit; and the same when so confirmed by such respective Governors ahall take effect and be in full force within the said respective colunies until His Majesty's pleasure ahall be known; and the same shall be transmitted to His Majesty for his approbation or disallowance, in the manner directed and required by the said recited order of the 20 th June, 1831 , with respect to the rules, orders, and regulations of the said Supreme Court therein mentioned.
And it is further ordered, that if any public officer or other person within the said colonies respectively, who, by any such rules, orders, and regulations as aforesald shall be required or directed to perform any duty, or to do any act In or about or connected with the several matters aforesaid or any of them, shall refuse or neglect to perform any such duty, or to do any such act, every such officer or other person shall, for every such offence, forfeit a sum not exceeding 10l. nor less than 40 s , as to the judges of the Supreme Court of such colony wherein the same shall occur shall seem reasonable.
$f$

And it is further ordered, that every person who, under the provision of this present order, or of any such rules, orders, and regulations as aforesaid, ahall be duly summoned to serve as an assessor for the trial of any criminal prosecution in any of the said colonles, who shall not appear and serve as such assessor after being openly called three times, snd on proof being made on oath of his having been duly summuned, shsll forfeit and pay for every such his default, such fine, not exceeding $10 l$. nor less than 11 ., as the court shall deem reasonable to impose, unless some just and sufficient cause for such defaulter's abaence shall be made to nppear, by oath or affidavit, to the satisfaction of the court. And it is further ordered, that every fine which shall be imposed by virtue of this present order ahall be imposed by a summary proceeding before the said courts reapectively, on the motion of the public proaecutor of and for any such colony, and shall, when so Imposed, be levied and recovered in auch and the same manner and by all such ways and means as any other fine or penalty imposed by a judgment of any such court ; and ahall, when so recovered, he paid over to the treasurer or other receiver of His Majesty's revenue within such colony, in aid of the expenses of the civil government thercof and the administration of justice therein.

And it is further ordered, that in all criminal prosecutions before the said courts respectively, it shall be a good cause of challenge of any perann summoned to serve as an assessor, that he is not qualified according to the provisions of this present order, or that he is an illiterate person and unable to read or write, and that ar. other cause which according to the law of England would be a good cause of challenge of nny man
noned and returned to serve as a common juror on the trial of any issue joined between the King and
prisoner on nny indictment for felony or misdemeanor, shall also be gooll cause of challenge to any assessor summoned to aerve on the trial of any criminal prosecution in any of the said colonies, in so far as that part of the law of England is capable of being applied in the said colonies; and if any such cause of challenge shall be alleged, either by the public prosecutor or by any such person or persona againat whom any such prosecution may be brought, the judges of the court shall forthwith proceed to enquire of, and consider the grounds of any auch challenge, and shall either allow or overrule the same, as may be just; and upon such challenge being so allowed, another persons shall be choaen to serve as assessor in the place and stead of the person so challenged, and so on, until a sufficient number of assessors shall appear against whom no cause, or no just cause, of challenge shall be alleged.
And it is further ordered, that after deducting six from the whole number of the persons summoned and actually appearing to act as assessors on any criminal prosecution, the public prosecutor and the person or persons against whom the prosecution may be brought, shall each have as many peremptory clallenges as shall be equal to one half of the remaining number, or should the remaining number not be an even number, then the person or persons against whom the prosecution may be brought shall have one peremptory challenge more than the public prosecutor.

And it is further ordered, that before proceeding to the trial of any such criminal prosecution, each assessor shail, in open court, audibly pronounce and take the oath appointed by the law of England to be taken by petit jurors imparinelled for the trial of any issue joined between the King and any person or persons arraigned upon any indictment in His Majesty's Court of King's Bench at Westminster.
And it is further ordered, that the assessors so to be summoned and chosen as aforesaid, shall have, exercise, and enjoy all such and the same rights, powers, and privileges, and shall perform all such and the same duties as according to the provisions of the said recited Order in Council might be exercised, enjoyed, and performed by the assessors therein mentioned.
And it is further ordered, that this present order shall take effect and come into operation in the said respective colonies so soon as the same shall have been promulgated within any such colony by the Governor thereof, and not before; and that for the purposes and within the meaning of this present order, the officer administering the government of any such colony shall be esteemed and taken to be the Governor thereof.
And the Right Honourable Lord Viscount Goderich, one of His Majeaty's principal Secretarics of State, is to give the necessary directions herein accordingly.
C. Greville.

## ASBESBORS.

An Ordinance to provide a sufficient number of Assessors to be associated with the Julges of the Supreme Courts of Criminal Justice of British Guiana, as enucted by the Governor and Court of Policy on the sth December, 1831.
Whereas, by an order made and passed by His Majesty in Council, hearing date the 20th June, 1831, it was amongst other matters provided that three assessors shall be associated with three judges ujon the trial of any person or persons in either of the Supreme Courts of the colony for any crime or offence, such assessors being entitled to deliberate and vote with such judges upon the final judgment to be pronounced in every auch criminal case.

And whereas it was further provided that assessors shall be liable to be challenged on such and like grounds as may be alleged as lawful grounds of challenge against any petit juror impannelled for the trial of any indictment in England:
And whereas the number of persons to be elected, chosen, and appointed to serve as assessors must be sufficient to provide for cases of challenges held to be valid:
Cl. 1. Be it therefore enacted, that there shall be for the Supreme Criminal Court of Demerara and Esserquibo a number of twelve assessors, and for the Supreme Criminal Court of Berbice a like number of twelve assessors.
2. And be it further enacted, that the right to elect assessors is and shall be vested in the College ol Kiezers of British Guiana, and in the exercise of this right the college shall be bound to make a doble nomination of plersons for the office of assessor, to be transmitted through the hands of His Excelleney the Governor to the judges of the Supreme Court, and that it shall be lawful for the said judges to select one d

the persons nominated to serve as an assessor, and the like form shall be olsserved on each and every occasion of a vacancy occurring in the complement of the said assessors for the said courts respectively.
3. And be it further enacted, that notification shall be sent by the secretary of the Court of Justice to each person who shall be selected in manner aforesaid, and in casc of any person who shall have been selected for an assessor refusing to accept the office, or neglecting to signify his acceptance by written communication delivered to the secretary uforesaid, within fourteen days from the date of notification, such person shall be liable to a fine of 1,500 guilders in behalf of the colony, and the judges of the Supreme Court shall certify to the Governor and Court of Policy that such a fine has been incurred, whereupon, unless good and valid reason for such non-acceptance or neglect be shewn to the aatisfaction of the Governor and Court of Policy, the said court ahall order and direct the Colonial Receiver to proceed for the fine according to law.
4. And be it further enacted, that each and every person who shall be selected in manner aforesaid to serve as an assessor, ahall, within the period of one week from the expiration of the term of fourteen days allowed to signify his acceptance of office, and whose acceptance shall have been notified to the aecretary, or within such period of fourteen days if he shall have accepted the office and desires to be sworn, appear before His Excellency the Governor, the Chief Juatice or one of the Puisne Judges of the Supreme Court, and take and subscribe the following oath :
"You shall faithfully and truly discharge the duties of an assessor in the Supreme Court of Criminal Justice for Demerara and Essequibo (or for Berbice, as the case may be), and shall deliberate and vote on the final judgment to be passed on all criminal trials on which you may ait, without partiality, favour, or affection. So help you God."
After which his appointment shall be publicly notified in the Royal Gazette of the colony; His Excellency the Governor or one of the judges being, nevertheless, empowered to extend the time for taking such onth, if sufficient reasons be alleged to either of them to grant such extension of tine.
5. And be it further enacted, that the Puisne Judges of the Supreme Court ahall have the same power to administer oaths in all cases, civil and criminal, as the Presiding Judge of the Court of Justice, atyled under the said Order in Council the Chief Justice, now has, and heretofore had.
6. And be it further enacted, that it shall lie the duty of each and every aasessor to attend the sittings at each session of the Supreme Criminal Court; those assessors who are appointed for the Supreme Court of Demerara and lissecjuibo to attend the sittings to be held in George Town, and those assessors who are appointed for the Supreme Court at Berbice to attend the sittings in New Amsterdam respectively; and the proclamations of His lixcellency the Governor for the time being in the Royal Gazette of British Guiana, appointing the time of hoiding such sessions respectively, shall be due and sufficient notice to all such assessors.
7. And be it further enacted, that previous to the bringing up of any person for trial, the names of all the assessors who may be in uffice for the time being, in the aforesaid jurisdictions respectively, written on similar pieces of paper, shall be placed in a box by the secretary of the Supreme Courts respectively, to be drawn therefrom in succession by the second puisne judge, and after three assessors are found to whom there is no legal ground of challenge or objection, the trial shall proceed.
And that no ignorance may be pretended of the several orders contained in this ordinance, theae presents shell be published, affixed, and sent round for general inforination.
There were two other clauses in this ordinance, but they liave been repealed by the following ordi-nance:-

An Ordinance passed by the Governor anil Court of Policy on the $23 d$ day of Augrest, 1832, to amend an Ordinance entitled "An Ordinance to provide a sufficient number of Assessors to be associated with the Judges of the Supreme Court of Criminal Justice of British Guiana."
Whereas we have deemed it expedient to amend an ordinance enacted on the 21st December, 1831, and published on the 22 d following, intituled "An Ordinance to provide a sufficient number of Assessors to be associated with the Judges of the Supreme Court of Criminal Justice of British Guiana :"

Be it therefore enacted that the 8 th and 9 th clauses of the said ordinance are hereby amended to the effect -that instead of the said clauses, the following shall be and are hereby substituted in lieu thereof respectively :-
Cl. 8. And be it further enacted, that if any person, who having been appointed an assessor and whose name having been drawn as already prescribed in clause 7 , slall not be present to answer thereto, or shall declime to sit as an assessor on any such trial, he shall be liable to a fine of 100 guilders, unless good and sufficient cause be shewn to the satisfaction of the judges that such assessor is absent from unavoidable cause, or has good reason for declining to sit on such trial ; and the judges shall, when they see fit, certify to His Excellency the Governor, that such fine or fines has or have heen incurred; and His Excellency may thereupon, if he see fit, either grant authority to the colonial receiver to proceed by summary execution for the recovery of the aaid fine or fines, or submit the consideration of this proceeding to the Honourable Court of Policy.
9. And be it further enacted, that each assessor shall he liable to serve two years, and until the aession is closed in which auch two years may expire, ahould the same take place during any such session; and after having served for such period of two years, shall not be compellable to acecpt the office of assessor, until after the expiration of two years from the end of such service, provided nevertheless, that any person who has been elected and accepted the office of assessor may, at any time during such period of two years, be relieved from further aervice on payment of a fine of $1,500 f$., or may apply by petition to the Governor and Court of Policy to be relieved from such further service without the payment of such fine, and it shall be competent to the Governor and Court of Pulicy, on good and valid reasons being adduced, to reiieve such person from
such further service. But any person elected an assessor, and who may have paid the fine, shall be liable to be re-elected and to serve at the expiration of two years from the perlod of his former election.

And that no ignorance may be pretended of the several orders contained in this ordinance, theae presents shall be published, affixed, and sent round for general information.

## D.-THE FALKLAND ISLANDS. [See Book II. page 142.]

In consequence of the desire now so generally evinced to settle permanently these islands, and their eligibility as penal settlements being very apparent, the following information is given in addition to that con. tained in Book II.-South America. (These documents and many others relating to the suhject have been placed in my hands by Henry Moreing, Esq., a gentleman well qualified for carrying into effect his sound views as to the eligibility of the Falkiand Islands for a penal settlement) :-

The Falkland lslands, called the Malouine by the French, and the Maloina Islands by the Spaniarde, fmm their pretended discovery by Bouchesne de Gouin, a native of St. Malo's, are situated between lat. $62.26 .$, and 51. 6. South, and long. from London 57. to 61. 30. west. They are very numerous; beling stated by some persons to be 300 and by others 90 in number; most of them are very small, but two, called generally east and weat Falkland Islands, are large ; the former being about 80 miles long by 50 broad, and the latter 100 by 50 .

These Islands were first discovered by Captsin Davis, who sailed under the command of Sir Thomas Cavendish, in 1592; but he was too much distressed at the time to make any particular obscrvations on them, nor did he even give them a name, which was reserved for Sir Richard Hawkins to do; who having two years after, sgain discovered them, called them Hawkins's Msiden Land. In 1598, Sebald de Waert who commanded one of Van Nooit's squadrons, fell in with these islands, and imsgining himself to be the discoverer, called them after himself, the Selaldine Islands, and by this name they were placed in the maps. For upwards of a century no further notice of this land is to he found until in 1689, Captain Strong, whose M.S. Journal is in the British Museum (sd. M. S. Cotton, 672), in his voyage to the aouth sea, met with, and gave them their present name in honour of the then Lord Falkland. Dampier and various other navigators subsequently touched at them, but appear to have considered them of too little importance to merit an accurate description.

Lord Anson's "voyage" first publicly pointed out the great importance it would be of to England to have a friendly port and place of refreshment for her ships nearer to the aouth than the Brazils. The editor of the "voyage" enters very fully into the subject, and every argument there made use of applies as strongly to the present day, as when it was written. We find that soon after his Lordship was placed at the head of the Admiralty, preparations were made for sending out a frigate to examine with precision the state and condition of these islands; but from some cause or other the expedition never sailed. The design of sn establishment on or near the coast of Patagonia was not, however, then a new scheme; Charles the 2nd was fully alive to ite advantages, and had despatched Sir John Narborough at his own expense to carry it into effect. The Dutch also long before had attempted to make a settlement in this quarter, but failed for want of proper information. It wss not until 1764, or 172 years after we had discovered the islands, that active measures were taken to settle them. In that year, Commodore Byron was sent out for that purpose by Lord Egmont, but after formally taking possession and surveying the harbours, January 1765, he seiled without leaving any one in them.

About the same time, or rather a little before, a spirit of adventure had arisen in France directed to the south sea, and Mons. de Bougainville was encouraged by the French government to undertake at his own expence the colonization of the Falkland, or as they called them, the Malouïne 1sinnds.

The jealous policy of the Spaniards could not see a foreign settlement so near the coast of South America without uneasiness; they accordingly set up a claim to these islands, under the pretence that they had been discovered by Americus Vespucci, and in 1766, Monsr. de Bougainville, having received a very large sum of money to compensate him for the expense incurred, the French settlers returned to France, and their plsces were occupied by aome Spanish troops commanded by a Colonel Catani. The same year the first establishment by the British was formed at Port Egmont, on the weatern island, by Captain Macbride, and whst is very singular, the two colonies seem to have gone on until $\mathbf{1 7 7 0}$, a period of four yesrs without either having been aware of the others vicinity ; or nt any rate without any communication. However in February 1770, two Spanish frigates arrived at Port Egmont, the commanding officer of which expressed much surprise st seeing the Enghah Hag flying, and protested sgainst the occupation, at the same time stating that he would refrain from any other mode of proceeding until he had acquainted his Catholic Majesty with the disggreeable transaction.

These vessels were followed on the 4th of Junc by a fleet of five frigates having 1,700 troops on board and the English were ordered by the commander of the expedition, Don Ignacia Msdariaga, immediately to depsrt from that port, and totally to evacuate all the islands known by the name of Falkisnds. The Favourite sloop of sixteen guns, with the crew of tise Swift, which had been lost, forming our whole force on the station, werc obliged after a show of resistance to capitulate to 80 supcrior an armament, and on the 10 th of June, articlea were signed by the respective commanders, by which the Engliah were permitted to depart, taking with them as many stores as they could carry, and receiving receipta for the rest, for which the Spanish Go. vernor of Port Solidad became answerable. These proceedings excited a great sensation in England, snd very decided measures were taken to avenge the affront which had in a time of peace been offered tu ourflgg. Party spirit ran high on the occasion, and the subject gave rise to some brilliant debates, in both Housa of Parliament. An address was moved for and carried in the House of Lords on the restoration of the islands to Great Britain, and a long and able protest against leaving open the question of sovereignty wa drawn up aud signed by Lord Chatham, the Dukes of Richmond and Devonshire, and 15 other Peers.

War, for which great preparations had been made, was however averted by the acceptance by the Ministry, of a declaration dated June 22nd 1771, and aigned by the Prince de Maserano, the Spanish Ambasmador, in which the violence compluined of was disuvowed by the Spanish government, and restoration of the islands agreed to [see next page]. We accordingly again took possession, and the Spaniards returned to Buenos Ayres; we subsequently abandoned the settlement as useless on the 20th March 1774, leaving the following inscription engraved on a piece of lead affixed to a conspicuous object :
"Be it known to all Nations that Falkland Islands with this Fort, the storehouses, wharf, harbours, bay, " snd crecks thereunto belonging, are the sole right and property of His Most Sacred Majesty George the
"Third, King of Great Britain, France, and Ircland, Defender of the Faith, \&c.; in wituess whereof this
"Plate ls set up, and His Britannick Majesty's Colours left flying as a mark of possession by S. W. Clay-
" ton, commanding officer at Falkland Islands, A. D. 1774."
From this time until 1820, a period of forty-six ycars during which the most extraordinary changes had taken place in every part of the world but particularly in the neighbouring continent, nothing further is to be found mentioned of the Falkland Islanda. Sealers and whaling vessels of various nations seem occasionally to have touched there, attracted by the immense herds of cattle (which had wonderfully increased from a few left by the Spaniards) and hy the numerous marine animals on the coasts, but claim to the sovereignty of the islands was not disputed until the period above mentioned; when Captain Weddell an intelligent commander engagel in a whaling voyage, while laying at Port Egmont received a letter from the Commander of a South American Patriot National frigate named the Heroine, saying that the "Supreme government of the United Provinces of South America, had taken possession of these islands in the naine of the country to which they naturally appertain."
This communication if made known to our government met with no attention, and in 1825 the BuenosAyrien government proceeded to assign to a German named Louis Vernet the whole of the eastern island with ail its cattle and produce as well as the neighbouring island called Staten island in perpetuity upon condition of his discharging certain arrears of pay which had accrued to some military officers in the patriot service. Vernet who appears to have cmharked considerable capital in the speculation, took possession of this grant and for five or six years carried on a profitable trade in hides, oil, salt fish, \&c. He endeavoured to encourage settlers, and divided the island into eleven sections, which he offered for sale, one was purchasell for a small sum by a Mr. Langdon.
Don Vernet (so called) at length rather injudiciously exercised the powers which he had conferred upon himseif. In 1831 in virtue of his authority as owncr, governor, and commander-in-chief of the island he took upon him to scize some American vessels, which had contravened his territorial or maritime regulations, and carried them to Buenos Ayres for adjudication. They were condemned, and a garrison placed at Port Louis, this proceeding leading to an angry remonstrance and a claim to the Falkland islands, nearly caused hostilities between the two republics. While the dispute was at its height, Jan. 1833, the English government settled the question by sending the Clio, Commander Onslow, to take possession of the islands on our account, and to remove any strangers who might be located there. The wrath of the Argentine rulers was turned from Washington to St. Jamea'a, and very strong language used on the subject; but as Lord Palmerston continued firm in his views on the subject, the Cabinet of Bucnos Ayres did not think it prudent to withdraw its envoy or come to a rupture, and an English vessel of war has ever since continued on that station.

This short account (in addition to the statements at Chapter III. page 142) will serve to point out the high estimation in which these islands are held by all nations as a port of shelter for their ships. Our rising empire in Australia places us in the position occupied by the Spaniards previous to the revolt of their South American colonies, and every motive which could operate as an inducement to them to occupy the Falklands by violence and the risk of war, becomes of double weight in our case from the isolated position and greater distance of our colonics.
A single glance at the map will suffice to shew the ndvantages of their situation. In the direct track of our ships-as nearly as possible half way between New South Wales and the mother country-in a boisterous latitude-with numerous and admirable harbours-they seem placed by nature for our especial use. Weddell gives the following latitudes and longitudes :-Ship Harbour, New Island, lat. 51.42.36. long. 61.9. West Point Harlour, lat. 51. 24. 15. long. 60.36.30. Port Louis, lat. 51.32. long. 58.3.30.

It unfortunately happens that almost every published account which we have of this spot has been written to serve a purpose, and must be look at with suspicion. The first detailed description of the Falklands to be met with is by Dom Pernetty, an ecclesiastic, who accompanied De Bougainville. The next is given by De Bougainvilie himself, in his account of his voyage round the world. Both these accounts were written after the French had given up the islands, and are evidently intended to reconcile the Spaniards to their purchase.

In the present century, the only persons who have written on the Falklands are three captains of whalers. Weldell, an Englishman, in 1825 ; and Murrell and Fanning, Americans, in 1832 and 1833.
Weddell, who passed two winters among the islands, says but little about the soil or climate, confining himself principally to an account of the harbours; but aupposes the seasons to be much milder than they were forty years ago, which he attributes to the immense bodies of ice then found in 50 . S. lat. having now almost entirely disappeared.

Morrell says "It is my opinion that something might be made of these islands; the soil is good, clear of rocks, snd susceptible of easy tillage, and high cultivation. Luxuriant meadows in the interior afford exccllent grazing for cattle all the year round. Though destitute of trees, there is no want of fuel, the low ground producing an abundance of excellent peat or turf, which burns well. The climate is temperate and salubrious, free from the extremes of heat or cold, though subject to frequent rains and storms of wind."
It will be apparent from these accounts that no obstacles of sufficient importance present themselves to prevent the aucressful formation of a penal settlement at the Falkland isles; on the contrary, every circum-

## APPENDIX 11.-SOUTH AMERICA.

stance seems to point out the peculiar ellgiblity of the Falklanda for this purpose. They combine in them. selvee almost all the advantages, without any of the inconveniences which attach to Norfolk Isjand and Tasman's Peninsula, the two places recommended by the Select Committee on Transportation to be chosen as the apots on which to carry into effect their views on this important auhject. Their healthiness is undoubted; while their comparative proximity to England, the total absence of Inhabitants, the great abundance of cattle existing on them, and their insular position and limited extent, otfer iniluecments to their occupation as an asylum for unfortunate criminals not to be met with In any other quarter of the globe. In fact there is no reason why these islands might not, under judicioua management, become, as well as a great self-supporting penitentiary, a source of profit to the country, and an incalculable benefit to commerce. As the Eastern and Western Jaland are 12 miles apart, the one island might be made a place of atricter discipline than the other; and a removal from the one station to the other be a source of punish. ment nr reward to the prisoners. There ia abundance of building stone ; and wood may be obtained in any quantitica, and adapted for every purpose, at Staten Island and on the shores of the Straits of Magellan, Water abounds of excellent quality, and admirably situated for the construction of mills. The coast tevins with fish, of which large quantities have been exported dried; and amphibious animals and whales yield oil and whalcbone to a vast extent. Every circumstance therefore combines to favour the immediate colonization of these islands.

Esfraet of a Lefter from Capfain George Farmer to Mr. Stephens, duted on bonrd the "Fuvourife," September 2, 1;io.
Sir, -The 4th of Jane, the "Industry," a Spanish frigate, anchored in Port Egmont Hariour, having been, they said, 33 dayn from Buenos Ayrea, put in for water, nud hound th irort Solediad. On the 7th, anchored here four spanish frigatea, which had been 26 days from Buenos Ayres, came out in commpany with the "Industry," and parted with her fonr days before. On the arrival of thene ships, the " hidnatry" hoisted a broan pennant. I now orilerei mast of the officers and men beinging to the iste " Swift " on shore to defend the settlement, und ordered Captain Malthy to get tie "Favonrite" nearer in to Jason's Cove. One of the frigates sent an ofticer on board to acquaint Coptain Maltby that if weighent they would fire into him, which he took no notice of, but got unier sail. The sjanish fripate fired twinshots, which fell to lreward of the "' Favourite." Three of them got under weigh, and kept woiking to the windward, as did the "Favourite." Captain Maltby sent an officer on board the spaniali commodore to know why one of the ahipy under his command had fired two shots at the "Favourite." His answer was, they were not fired at the "Favourite," but as signais to him.
since the first appearance of those ahipa, I began to clear the stores ont of the block-house. The four 12 -pounders at the battery were sinnk so low in water and mud, that they were entirely useless. I had them transjorted to the block. house, and had port-holes cut out for them, with a piatforn before, covered round with the cordage.

We now wrote to the Spanish commotore, desiring, as be hatt received the refreabments he stond in peed of, that he would depart from hence. IHs answers, with the preparations they were making, left ua no doubt of their reai lutention. The Spanish commodore in one of his letters dealred un to aend to view the troops that were ready for landing, which we did on the evening of the gth.

Onr officers reported them to be (seamen nnd all included) about 1,000 , with a train of artillery oufficlent to reduce a reguiar fortification, and five frigates from 20 to 32 tons. By this time the frigates had warped in shore, and moored head and atera oppoaite to the block-loonse anit battery.

At night Captain Mathy, with 50 of the "Favourite's" men, eame on ohore, and brought with them two six-jounders, swivels, smali arms, ammunition, \&c. The next morning, a part of the Spauish troopa ami artiliery landeri abont half a mile to the nortiward of us. When they had advanced about half way to us fiom where they hat landed, the rest of their boats, with the remainder of the troops and artilery, put off from one of the frigates, and rowed rigit in for the cove, covered by the fire of the frigates, whose shot went over the bhock-house.

We fred some shot, and (not aceing the least probability of being able, against such a ouperior force, to defend the settlement) hoisted a fiag of trnce, and desired articles of capitulation, which were in part granted. Their troops then landed, and took possession of the place.

I send you by Mr. Gower (late ileutenant of the "Swift"), who goes exprese, coples of all the iettcra, articies, and capitulation, recejpts, \&c. that passed between the Spaniards and us.

1 am, \&e. \&c.
George Farmer.
Copy of a Letter from the Spnnish Commodore, John Ignario Manhringa, to Captain George Farmer, dafed in the Bay of Cruisudth, 8th Jane, 1770.
My dear Sir,-Finding myself with incomparable superior forces of tronpa, train of artillery, utensils, ammunition, and all the rest corresponding, for to reiuce a regular fortifcation, with 1,400 men for disembarking, for which 526 are of choice regular troopa, as you may see, I see myseif obilged in this case to Intimate to yon, according to the orders of my conrt, that you shonid quit that began ostabiskment: for, if yon dion't execute it amicably, I will obige you by force, and you will be anawerable for all the ili reanlta of the action and measurea I ahali take. I an always at your service; pray unto God to preacrve you many yeara.

I kisa your hand, \&c. \&c.
John Ignacio 3fadaringa.
Transiation of the Deciarafion signed and delivered by Prince de Maserano Ambussador from His Catholic Bajesty, dated 22d January 1771.
His Britannic Majesty having complained of the violenee which was committed on the 10th of Jnne 1770, at the island commoniy cailed the great Malouine, and by the English, Falkland's Island, in obliging by force, the commander and subjects of His Britannic Majesty to evacuate the port hy them calied Egmont, a step offensive to the honor of his Crown, the Prince de Maserano, Ambassador Extraordioary of His Catholic Majesty, has received orders to declare that His Catholic Majesty, considering the desire with which he in animated for peace, and for the maintenanee of good barmony with Illa lbritannic Majesty, and refiecting that this event might ioterrupt it, has seen with displeasure this expedition teniing to disturb it ; and in the persuasion in which be is, of the reciprocity of sentiments of lis Britannic Majesty, and of its being far from hin intention to anthorize any thing that might disturb the good understanding between the two courts, Hie Catholic Majesty toes disavow the said violent enterprize; and in conseguenee, the Priece de Maserano declares, that His Catholic Majesty engages to give immediate orders that things ohall be restored in the great Maiouine, at the port calied Egmont, precisely to the atate in which they were before the 10 th of June 1770; for great Maiouine, at the port calied Egmont, precisely to the atate in which they were before the loth of Jnine 1770 ; fir
which purpose His Catholic Majesty will give orders to one of his officers, to deliver up to the officer authorized by His Britannic Majesty, the port and fort calied Egmont; with ail the artillery, stores and effecta of Ilis Britaonic Majeaty and his subjects, whicli were at that place on the day ahove named, agreeabie to the inventory which has been marle of them.
The Prince de Mascrano deciares at the aamo time in the name of the King bia master, that the engagement of his said Catholic Majesty to reatore to His Britannic Majesty the possession of the port aud fort called Egmont, cannot, dor onght, anywise to affect the question of the prior right of soverelgnty of the Malouine Isisnds, otherwise called fallsland lalands. In witneas whercof, I the underwitten, Ambabsador Extraordinary, have sigaed t.ue present declaratiga with my usual signature, and caused it to be scaied with onr arms. ## APPENDIX III.-NORTH AMERICA.

ditto, Montreal, 501. ; ditto, Argenteuil, 100l.; Roman Catholic bisnop, Quebec, $1,000 l$. Nova Scotia : Biahop, 2,000l.; archdeacon, 300l.; Presbyterian minister 75l.; pension of the president of King's College, 400l.; archdeacon of New Brunswick, 300l.; ditto of Bermuda, 200l.; ditto of Newfoundland, 300l.; Roman Catholic bishop, Newfoundland, 75l. ; to foreign missionaries of the Society for the Propagation of the Gospel in Nova Scotia, 3,500l.; minister at Prince Edward's Island, 100l. Total, 11,790l. 18s. 6d.
This estimate is amaller by $2,350 l$. than that re-
quired for the service of the year 1837-8; the diminution is caused, first, by the suhatitutica of a vote of $1,000 l$. for the bishop of Montreal for the $3,000 \mathrm{l}$. voted in former years for the bishop of Quebec; and, secondly, by the resignation without pensions of two misaionaries of the Society for the Propagation of the Gospel, each of whom reccived $150 l$. per annum, and by the retirement of Dr Porter, whose balary from that society was $150 l$. per annum, on a pension of 100t. per annum.

- For a further statement of the coins circulated in Lower Canada, their weights and value by law, see "Observa. tions on a Metallic Currency," publlshed at Montreal in 183\%, p. 5 to 7. Mr. Chapman in his pamphlet on the Money and Exciange of Lower Canala, $p, 89$, after giving a statement of the colns in circulation, and their valucs, gays, "Calling the whole currency 1,000 , no less than $6 ; 1$ parts are of the sound thereof, the rest being composed of coins more or lesa depreciated." See tables of gold and silver coins eircuiated in Lower Canada, in pares 10 and 11 of Observations npon the Metallic Currency of that Province. Thesc tables are full and ciaborate. I refer also to Porter's Tables for the information contained in the Blue Books.

United States.-The gold coins of the following countrics are legal tender by weight, viz., Great Britain, Portugal, and Brazil, at 94 8.10th dol. per dwt. ; France at 931.10 th, and S pain at 89 9-10ths. For the sake of comparison, the weights given in the Upper Canada Act sre assumed for the British coins, and the weights in the Lower Canada Act, for the other gold coins. The Amcrican Eagle, coined before the lst of July, 1834, although nominally of the value of ten dollars only, sells at a price equal to its excess of weight over the new coinage. Silver dollars, crowns, five franc pieces, and pistareens, are legal tender by tale.
Lower Canada.-The rates given in the table are for gold coins, weighed by the single piece; allowance to be made on every piece weighing more or less than the given standard, at 2 d $d$. currency per grain, if British, Portuguese, or American, and 2 1-5th d. cyper grain, if French or Spanish. In payments above 20l. cy., in gold coins, either party may require it to
be weighed in bulk, at 89 . cy., per ounce troy, for Britisb, Portuguese, or American; and $87 s .8 \frac{1}{2} l$. cy. per ounce, for French and Spanish, deducting half a grain for each piece so wcighed, to compensate the receiver for the losa in re-weighing separately. The currency law was passed prior to the coinage of Sovcreigns and new Eagles. The silver coins are rated by tale. All the higher and lower denominations of gold and silver coin rated above are to be received in their respective proportions.
Upper Canada.-Gold and silver coins, if depreciated in weight more than one-twenty-fifth part of their full weight, not to be legal money, with thia proviao, they are receivable by tale. All the higher and lower denominations of rated gold and silver coins are to he received in their reapective proportions. The act is to remain in force until the 20th of Aprii, 1840, and to the end of the then next ensuing session of the Provincial Parliament.
Nova Scotia.-The Currency Law of this province

## APPENDIX III-NORTH AMFRICA.

having expired on the 31st of December, 1835, I have inserted the rates at which coins are received and pald at the Colonial Treasury by virtue of the Acts 6 Wm .1 V . cap. 32 and 41 , and which are generally adopted in mercantile transactions ; the banks, however, refuse to receive British silver at the excessive ratea given above. About $57,000 l$. in notes (principally of $1 l$. each) issued by the Province Treasury are in circulation, and as they are not redeemable in specic, they are at a discount in the adjoining province; their credit and circulation are supported in Nova Scotia, by their being receivable in payment of provincial dutics, and by an act of the legislature which prohibits the issue of any other notes of less denomination than $5 l$.
New Brunswick.-British gold and silver coins are not specifically rated by the currency law of this province, and they are inserted in the table at one-ninth more than their sterling value, being the only rate at which they are legal tender. A bill was introduced into the Provincial Legislature in the Session of 1837, fixing a rate on the suvereign, but 1 do not know whether it has received the royal assent. The dollar and ita aliquot parts, and the French crown, are all legalized by tale, but not the half-crown.
Prince Edward Island. There is no specific regulation of the currency in the island, the British coins are consequently inserted at one-ninth more than their sterling value. The moncy of account has been depreciated by the issue of irredeemable treasury notes, which are in circulation to the extent of $14,500 \mathrm{l}$., and pass at the rate of 30 s . to 20 s . in British coin. These notes have been sold by auction in Halifax at 11 s . Halifax currency per pound.

Newfoundland. - I am indebted to Thomas H . Brooking, Esquire, of London, for the following information upon the currency of this island. From his mercantile intelligence, his local knowledge, and long familiarity with the domestic trade and foreign relations of that island, I am glad to refer to his valuable authority for the following facts :-
"The currency of this island is composed chiefly, almost entirely, of Spanish dollars, which circulate at the rate of 5 s. each; their sterling value being fixed under a treasury order at $4 s .4 d$. each. (To shew the unsoundness of this standard, the fictitious sterling value which the dollar has received, the following additional extract from the letter of Com.-gen. Routh is given:-
"The current value of the Spanish dollar in the colonies having heen rated at the English mint price of silver, and that price being $2 d$. per ounce more than the market price, has beun obviously over valued at 4 per cent,-what is really worth $4 s$. $2 d$. in England payed $4 s .4 d$. , in the colonies, equally as well as $4 s$. $4 d$. British money, which conventionally passes for, and in point of fact can only be had in England in exchange for a value equivalent to $4 s .4 d$. .")

The difference between the two is $15 l .7 s .8 \mathrm{~d}$. per cent., and this is considered to be the par of exchange. To reduce the currency to sterling, two-fifteenths are deducted; to advence sterling to currency, two-thirteenths are added. Doubloons have been recently introduced to some extent, and although not generally received, their value may be stated at $76 s .6 d$. currency, or 66s. sterling. Bills of exchange are bought nt a premium, which, supposing it to be quated at 20 per cent., would require 480 dollars to pay for a bill of 100\%. sterling, and 1 refer to this as the most simple method of computing the rate of exchange in Newfoundland. With reference to the money of account,
it may be said generally, that all transactiona and contracts between merchants, dealers, planters, trades. men, fishermen, servants, \&cc., are kept in currencysay four Spanish dollars for one pound. Small coins are extremely scarce, and change in consequence difficult to be met with in sufficient quantity to meet the demand and carry on the ordinary business of life. Fractional parts of dollars, in proportion to the value of the whole dollar, and Britizh silver, circulate generally ; the latter at the following rates :-the sixplenny piecc at $7 d$., the shilling at 1 s . $2 d$. , sometimes 1 s . 3d., and the half-crown at 2s. 9 d . or 3 s ., according to the demand. They have no fixed rate, so far as I know. There is thus great irregularity in the currency of the island, and the mode of transacting ordinary business is fraught with scrious and inconvenient anomalies. The introduction of a sound standard, and uniformity in its monetary affairs, would be productive of many benefits in thia valuable dependency of the Crown."
N.-Grants and Sales to Individuals exceeding 5,000 acres, with names of township and grantee, number of acres, and date of the patent.
Tract of land to the south of Chaleur Bay and mouth of the River Caraquet in Nova Scotia; John Martieth; 20,000 acres; 10th February, 1764. Thomas Dunn, 11,600 acres, 17th May, 1816. Ely, Isaac W. Clarke, Esq., 11,000 acres, 18th May, 1816. Potton and Sutton, William Osgood, Esq., 12,000 acres, 16th May, 1817. Ascot, Hon. W. B. Felton, 5,200 acres, 31st May, 1824. Brandon, Edward Antrobus, 9,700 acres, 8th January, 1827. Granby, Shefford, Stukely, Hatley, Compton, Barnston, Stanstcad and Shipton; François Langueduc, 9,000 acres, 30th June, 1837. Jersey, Edward Bowen, Esq., 5,200 acres, 21 st July, 1829. Ascot, Brompton, Hatley, and Orford, Hon. W. B. Felton, Esq., 5,013 acres, 20th November, 1830.

For many ycars subsequent to 1796 a practice obtained of granting large blocks of the waste lands of the Crown to a leader and associates, as it was termed. In many of these cases, it is believed that the names of the associates were only introduced for the purpose of augmenting the grant to the leader; they having previously arre ، "e" with him, for some trifling consideration, to reiuruish their shares after the issue of the letters patent, by which means the leader became possessed of the whole grant.

It is therefore apparent that this return cannot convey a correct idea of the number of persons who have acquired grants from the Crown exceeding 5,000 acres, nor is it possible from the records of this office to give a correct stntenent of the grants over 5,000 ncres which have been thus obtained.

t that this return cannot e number of persons who the Crown exceeding 5,000 m the records of this office of the grants over 5,080 is obtained．

It is，I believe，generally known that the leaders of townships，or parts of townships，in many instances， did take a reconveyance from their associates to the extent of 1,000 acres，in consideration of the expenses incurred and borne solely by the leaders，for surveys and patent fees，upon the issue of warrants of survey in favour of such leaders and thetr associates，which warrants were directed hy the Governor to His Ma－ jesty＇s surveyor－general of the province，to cause the same to be carried into execution，and contained the condition that all the expenses should be borne by the parties applying．The deputy provincial sur－ veyors，who received the instructions from the sur－ veyor－general＇s office，to carry those surveys into execution in the field，were also enjoined to transmit to the aaid office a faithful and exact report of their aurveys，with plans and field books of their operations．

Previous，however，to the year 1795 the expenses of survey of the exterior lines of townships were borne conjointly by the Government and the leaders of townships；several of the leaders，however，did not conform to this rule．It is proper here to state， that a township of 10 miles square contnins about 44,000 acres of grantable land；and a township of nine miles front by twelve miles depth（being the dimensiona of a township fronting on a river）is about 48,000 acres，more or less，according to its locality （exclusive of the usual reservations for crown and elergy）；according to which data the townships and parts mentioned in the foregoing list will bear a pro－ portion or nearly so．

O．－－Statemed showing the Quantly of Crown Lands sold， whether to private Individuals or to the British American Land Company，with the Average Price per acre，in Counties．

S．－General Statement by Districts of the Conceded and Unconceded Lands within the Seigneuries and Fiefs in the Province of Lower Canada．

| Districts， | Contents <br> in Arpents． | Quantum <br> of Arpents <br> Conceded． | Remaining <br> Unconceded |
| :--- | ---: | ---: | ---: |
| Quebec ． <br> Three Rivers | 6181740 | 2204278 | 3977462 |
| Montreal ． | 3380537 | 2425400 | 939499 |
| Total ． | 11007140 | 5135042 | 5872098 |

The first column of this statement is from correct data，and the second and third are calculated from the best general information that could be collected， as well as from correct data in many seigneuries．It appears there remains about the aggregate quantity of $5,872,098$ superficial arpents of unconceded land in the three districts，including the whole of the island of Anticosti ；but exclusive of that island， about $4,059,098$ superficial arpenta unconceded，one third part of which quantity，at least，may be con－ sidered as unfit for cultivation，and at least seven eighths of the island of Anticosti is considered un－ arable．
T.-Statement exhibiting the actual Condjion of the Waste Lands of the Crown comprised within the Sarveyed Districta, incinding the Reservations set apart for the support of a Proteatant Ciergy, as they appear on the 20th day of December, 1835.

U.-An estimate of the quantity of waste lands in the Province Unsurveyed, of the quantity fit for Cultivation, of the forest and quality of the timber. North of the St. Lawrence, Montreal district ; in the country north and east of the Ottawa, from the rear of Grenville to a point about 100 miles above the falls of the Chaudiere, in Hull, extending back from the surveyed tract about 30 miles; about 4,500 square miles of waste lands; quantity fit for cultivation, unknown; quality of timber, principally pine of two sorts red and white; extenaive lumbering transactions are carrying on in this tract. A strip of land lying
in the rear of the preaent townships on the margin of the above-described tract, with the average depth of three quarters of a township, or seven miles and a half, making about fifteen townships; quantity fitfor cultivation, 900,000 square niles; quality of timber, mixed timber; some white pine, spruce and hard wood.
South of the St. Lawrence, Quebec district, the country on the river St. John, comprised within the diaputed territory ; $5,000,000$ square miles of waste land; quality of timber, spruce and white pine. Io the rear of the seigneuries south of the St. Lawrence,
thin the Survejed Districtn， appear on the 20th day of

B B．－General Statement of the Grants of Land made in Nova Scotia from the year 1749 to 1826，show－ ing the reservation of Mines and Minerals to the Crown．
Periods of grants from 1749 to $1752,12,000$ acres of land granted； 500 acres has been escheated； 11,500 acres still held by grant．In some of these grants，mincs of gold and silver，precious stones and lapis lazuli are reserved，but in most of them there is no reservation whatever．These grants include the town，suburbs，and peninsula of Halifax．Farm lots on the harbour and vicinity of Halifax．

Periods of grants from 1752 to 1782，2，890，062 acres of land granted； $1,945,372$ has been escheated； $\mathbf{9 5 6 , 6 9 0}$ still held by grant．Mines of gold and silver， precious stoncs，and lapis lazuli are reserved，and no other．These lands were escheated for the reception of the great bodies of loyalists and dishanded corps， who settled in this province in the years 1783 and 1784，aud consisted chiefly of large tracts，situate in the county of Shelburne，Sidney，Pictou，County of Hants，Cumberland，and Halifax．

Periods of grants from 1783 to $1808,1,873,941$ acres of land granted； 206,790 has been escheated， $1,667,151$ still held by grant．Mines of gold，silver， lead，copper，and coals are reserved，and no other．

Periods of grants from 1809 to the present time， $1,343,936$ acres of land granted； $1,343,936$ still held by grant．All mines and mincrals of every descrip－ tion are reserved to the crown．
Total amount of acres granted，6，119，939；ditt0 has been escheated， $2,152,662$ ；ditto still held by grant，3，979，277．
C C．－No．of Acres of Land Granted and Uugranted in the North American Colonies．［Estimste by Mr．Bliss．］

* Variations of the compass, established in 1829 by Captain Bayfield, R. N., in the surveying sehooner Gulnare, those laid down in the charts being erroneous. Brandy pots $16 \frac{1}{2}$ deg. W. Island of Bic, $17 \frac{1}{2}$. Cap Chat, 21. Bay of the Seven Islands, 23. West end of Anticosti, $23 \frac{1}{2}$. East end of ditto, $24 \frac{1}{2}$.

A lighthouse has been erected on Pointe des Monts (or Cape Monts Pelés), on the north side of the River St. Lawrence, nearly opposite to Clap Chat, the lantern standing 100 feet above the water.

The lighthouse lays with the outermost part of Caribou Point, north 52. east, and south 52 west by compasa, and it can be seen over that sint and to the eastward of it. Ships approaching the light from the eastward, as they draw towards the Caribou Point, must bring it to bear west by south, they will then be in a good fair way, and if necessary they can near the land by their lead. After passing Carihou Polnt, and as they draw towards the lighthouse, they must come no nearer than 12 fathoms water to avoid two ledges of rocks, one of which lays E.S E. from the light, with only 12 feet water on it; the other lays $S$. W. from the light, and E. S. E. from the western extremity of Pointe des Monts, with 16 feet water on it; but these rocks do not lay further from the shore than half a mile at low water.

The lighthouse lays with the west extremity of Pointe des Montes, north 64 east, and south 64 west, and distant about one mile; and when ships are to the westward of the Point ; the lighthouse is in one with the outermost rocks off the Point; and in the day-time it forms a bold distinct land-mark; and on this line of bearing ships are in the best possible fair way for the general purpuses of navigation, whether bound up or down. For any particular purposes of navigation, ships may safely stand to the northward, until the light bears east by north, they will then be draw. ing near the north land, and when it bears east half north it is time to tack, for when it bears east it will be shut In with the highland, and cannot be seen to the aouthward of east, and then they will he only one mile from the land, and if they ere off Godbut River, Pointe des Monts will bear from them east by south two leagucs distant. When ships are off St. Nicholas Harbour, and the light bearing east by north, they are in a good fair way from the north land.

The S. W. spitt of Manicougan Great Shosl, the ship and the lighthouse are then all in one line of bearing.

Lighthouse on S. W. Point of Anticosti--Kerper Lt. Harvey, H. P. Royal Navy. A lighthouse having been erected on the S. W. point of the Island of Anticosti, notice is hereby given that a grand revolving light, on the Argand principle, was shewn thereon, for the first time, on the 25th of August, 1831, and that the said light will continue to be shewn evcry night from sun-set to sun-rise, from the 25th day of March to the last day of December in each year. When ships are to the castward of the lighthonse, they may safely stand toward the island until it bears N. N. W. by compass, they will then be in a good fair way, and if they wish to make more free with the land, they can do so by their lead. The land trends from the lighthouse $S$. E. by south, or nearly so.

Lighthouse on Green Istand in the River St. Lallrence, keeper, Mi, Robert Noel Lindsay.-The lsntern of the lighthouse on Green Island shows a light every evening irom sun-set to sun-rise the next morning, from the 15 th day of April to 10th day of December, inclusive; and the following are the bearings of it by compass from the respective places.

Red Island, E. S. E. $\frac{1}{2}$ S.
White Island, E. N. E. $\frac{1}{4}$ E.
Brandy Pots, N. E. by E. $\frac{3}{3}$ E.
Apple Island, W. S. W.
Barque Island, W. S. W. $\ddagger$ W.
The shoal at the N. E. end of Green Island, S.W. $\frac{1}{2} S$.
The shoal at the west end of Green Island, X. E. 4 E.

Louser Canala Lighthouse fees in 1833.-For vesch going to Three Rivers or Montreal, of 100 to 150 tons inclusive, $2 l$. currency ; of 151 to 201 tons in. clusive, $3 l$. do.; of 201 tons to 250 inclusive, th. do.; of 251 tons and upwards, $5 l$. do.

On settling with pilots, masters or commanders of

ouse fees in 1833 .-For vesselh
or Montreal, of 100 to 150 ency; of 151 to 201 tons in1 tons to 250 inclusive, th. pwards, 5l. do.
ts, masters or commanders ol
vessels, or the consignces of such vessels, are to deduct one shilling in the pound for the amount of the sums to be paid for pilotage, which will be exacted by the Naval Officer at clearing out, the same being founded hy law, under the direction of the Trinity House, for the relief of decayed pilots, their widows and children.

Rates of Pilotage for the River St. Lawrence in 1833.-From Bic to Quebec per foot. From the 2nd to the 30th of April inclusive, 16. Gol.; from the 1st of May to the 10th of November inclusive, 18s.; from the llth to the 18th November inclusive, $1 l$. $3 s$.; from the 19th of November to the 1st of March, 16. 8 s.

From Quebec to Bic. - From the 2nd to the 30th April inclusive, 18 s.; from the 1st of May to the 10th November, $15 s .9 i l$. ; from the 11 th to the 18 th November inclusive, $1 l .9 d$; from the 19 th November to the 1st March inclusive, $1 l .5 \mathrm{~s} .9 \mathrm{~d}$.

Rates of pilot, water and poundage of pilot money are payable at the Naval Office, by masters and commanders of vessels, viz :-
For every foot of water for which masters or commanders of vessels are bound to pay their pilots from Bic to Quebec, and from Quebec to Bic, $2 s$. 6d. currency per foot.
11.-Lightiouses on Nova Scotia and New Brunswick Shores.

Cape Sabte Seal Island light.-The first light in approaching the Bay of Fundy, is on the south point of the Seal Island. This light is clevated about 80 ft . above high water-mark, and may be seen in approaching the island from any point of the compass. A very dangerous rock, under water, but upon which the sea always breaks, called the Blonde Rock, is about two miles S. S. W. by compass, from the lighthouse. Between this rock and the island there are some dangers, the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

Bryer Island Light.-In advancing up the bay, the next light is situated on Bryer Island, about half a mile N. E. from the N. W. point thereof, with an improved lantern and lamp; this light, therefore, will be much more bencficial to the trade of the bay than formerly.
Annapolis Gut light.-The next light on the coast of Nova Scotia is placed at the west side of the Gut of Annapolis, from Bryer Island north-eastward; this const is very bold, and not indented; this light is, therefore, chiefly intended as a guide into Annapolis Basin.

Gannet Rock light.-This light bears from the light on Bryer Island N. W. half west, 21 miles. It is in. tended to warn ships of their npproach to a very dangerous range of shoals and 1 , idges, which extend l'rom the Old Proprictor to the Scal Island, off Machins, $n$ distance of about 20 miles. Bearings of Gannet Rock lighthouse. To the Old Proprietor, which dries at three-quarters ebb (very dangerous), enst by north a quarter north, seven miles. To the Black Rock (always above water 25 feet), oll White Head, N. E. a quarter E. To the S. W. head of Grand Manan N. W. half north. To the northernmost of the Murr Ledges, dry at two-thirds ebb, N. W. by west n quarter west. To the southernmost of ditto, called St. Mary's Ledge, always out of water, S. W. by west half west. Machin's Seal Island lights, distant about 13 miles north by north a quarter north.

Note.-Between the northernmost and southernmost of the Murr Ledges, there is a rance of dangerous rocks and shoals, many of them always ahove water, and which extend westward from the lighthouse about four miles; from this range, farther westerly, ahout three miles, lies a dangerous breaker called the Roaring Bull: this may be avoided hy keeping three remarkable headlands near the $S$. W. end of Grand Manan open.

The red glass having been removed from the lantern, this light is now a hright white one.

Heal Herbour light.-Next in orrler nfter passing Grand Manan is Heat Harbour light. This is placed on the N. F. extremity of Campo Bello, and is n guide to vessels entering the main channel to West Isles, Moose Island, and the inner Bay of Passamaquodlly; it enables vessels also at all times to enter Head Harbour.

Point le Preau lights.-Upon this projecting headland two lights have lately been placed, one above the other, and distant eighteen feet. Both lights inay be seen from every point of the compass, where they may be useful.

Portivige Island lights.-Thls light at the entiance of the River and Harbour of St. John, having heen estahlished upwards of forty years, require no particular notice.

Beacon light.-Within Partridge Island and upon a spit, or bar, which extends about half a mile S.S.E. from Sand Point, nnd which dries at two-thirds ebh, stands the Beacon Tower. Upon this tower a light is established which is eminently useful to the coasting trade of St. John, find to all other vessels having pilots on board, as it enables them to enter the harbour at all hours of the night.

West Quoddy light.-This is an American light, and is placed on the west side of the entrance :ato the St. Croix, by Liehee and Eastport ; a new light.house has lately been erected here, and the light much improved.
T'wo fixed lights upon the Machin's Seal Island were put into operation in October last; they are elevnted ahout 45 above high water and bear from each other E.S. E. and W. N. W., distant 200 feet, by which they will be immediately distinguished from all other lights upon the const (British or American); the following are the bearings from them, viz.-To the southernmost Murr L.edge (St. Mary's) E. S. E. easterly. To the Gannet Rock light cast by south a quarter, thirteen miles. To the southern head of Graud Manan east by uorth hall north. To the northern ditto N. E. half east. To the North-east Rock, distant two miles, N. E. by north. To the Little River Head north by west. To the Libby Island lighthouse (American) N.W. by west. Vessels in standing in to the northward, between these lights and the Gamnet Rock, should tnck, or haul off the mnment they bring these lights in one, as they will then be not more than three quarters of a mile from the Murr Ledges, if more than five miles to the eastward of the light.
The commissioners of lighthouses for Nova Scotia, under date of the 30 th of October, 1832, gnve notice, that the lighthouse huilding on Low Point, at the entrance of Sydney Harhour, Cape Breton, would be finished on the lst of Noveniber, and lighted in or ahont the 15 th of that month. It would be a fixed light on the enst point of the eni rance of the harbour. A white beacon has been crected on the east head, Ieading into Louishourg Harbour, upori the site of the Old French lighthouse, which may be seen at a very considerable distunte.

KK.-Newfoundland Executive Council met in 1825, 3 times ; 1826, 6 t. ; 1827, 7 t. ; 1828, 4 t. ; 1829, not met ; 1830, 4 t. ; 1831, 3 t, ; 1832, 25 t. ; 1833, 12 t.; 1834, 18 t . [Appendix House of Assembly.]

L L.-Articles exported from the Colony of Cape Breton in 1834.-Beef and pork, 87 barrels; 56 firkins of butter, 8,374 tons of coals, 142 bushels of corn, 12,329 quintals of dry cod fish, 1,876 barrels of wet cod fish, 72 hides and skins, 400 seal skins, 14 tons of unwrought iron, 22,697 gallons of train and apermicetti oil, 100 tons of oak timber, 3,024 tons of pine timber, 120 tons of ash and birch timber, 82 masts and yards, \&c.; 243 oars, 2,873 feet of deal, \&c.; 12,500 shingles, 27,581 staves. Total value, 22,188l. [From Official Paper of 1834, for H.B.]

M M.-An account showing the amount of duty levied in the Ports of the United Kingdom, and of the British Colonies and Dominions beyond Sea respectively, upon each article imported from the North American Provinces, and upon similar articles imported from Foreign Countries, so far as relates to the duties levied in the Ports of the United Kingdom.-3d Feb. 1838.
Rates of duty levied in the United Kingdom on the resper:ive articles when imported from the British free; Corn, Wheat (by 9 Geo. IV.cap. 60 .), when the average price for the regulation of the duty is under 67 s ., 5 s . per qr . ; ditto, at or above $67 \mathrm{~s} ., 6 \mathrm{~d}$. per qr. ; Wheat Flour, for every barrel of 196 lbs . a duty equal in amount to the duty payable on $38 \frac{1}{2}$ gallons of wheat ; Gypsum, $1 s .3 d$. per ton ; Hides, not tanned, dry, 2 s .4 d . per cwt. ; ditto, wet, 1s. 2d. ; Honey, 5s.; Isinglass, 15 s . 10 d. ; Oil, train, 1s. per ton, if of British fishing; Pitch, 9d. per cwt.; Skins and Furs undressed, viz. Bear, 2s. 6d. each; Beaver, 4d.; Calf and Kip, not tanned, dry, 2s. $4 d$. per cwt.; ditto, wet, 1s. 2d.; Deer, 1s. per 100 ; Fisher, 3d. each; Fox, 4l. ; Martin, 3d.; Mink, 2d.; Otter, 1s.; Racoon. 1d.; Seal, Id. per dozen, if of British taking; Wolf, 3d. each; Wolvering, 6d.; Spirits, not sweetened, $9 s$. per gallon; Tar, 12s. per last; Tobacco, unmanufactured, $2 s .9 / l$. per lb.; Wax, Bees, unbleached, $10 s$. per cwt.; ditto, bleached, 1l.; Whalefins, 1l. per ton, if of British taking; Wood, viz. Battens (on importation into Great Britain), 6 and not exceeding 16 feet long, and not exceeding 23 inches thick, $1 l$. per 120; ex. 16 and not ex. 21 ft . long, and not ex. 23 in . thick, $1 l .3 s$.; ex. 21 ft . long, or if ex. 23 in . thick, 2l.; Battens (on importation into Irelatid), 8s, 3d. per 120 on all sorts; Batten Ends (on importation into Great Britain), under 6 ft . long, and not ex. 23 in . thick, 7 s . Gd. per 120 ; under 6 ft . long, and ex. 23 in. thick, 15s.; Batten Ends (on importation into Ireland), $8 s .3 \mathrm{ll}$. per 120 on all sorts; Dcals (on importation into Great Britain), 6 and not above 16 ft . long, and not ex. $3 \frac{1}{4} \mathrm{in}$. thick, $2 l$. per 120 ; above 16 and not ex. 21 ft . long, and not ex. 34 in . thick, $2 l .10 s$; 6 and not above 21 lt . long, and ex. 34 in. thick, $4 l$.; ex. 21 ft . long, and not ex. 4 in . thick, $5 l$.; ex. 21 ft . long, and ex. 4 in . thick, $10 l$.; Deals (on importation into lreland), $8 s .3 \mathrm{~d}$. per 120 on all sorts; Deal Enda (on importation into Great Britain), under 6 ft . long, and not ex. $3 \frac{1}{4} \mathrm{in}$. thick, $15 s$ per 120 ; under 6 ft . long, and ex. 3 t in. thick, $16.10 s$.; Deal Ends (on importation in Irclaind), 8s. 3 cl . per 120 on all sorts; Handspike, under 7 ft . long, 2s. 6al. per $120 ; 7 \mathrm{ft}$. long or unwards, $5 s$. ; lathwond, under 5 ft . long, 15 s . per fathom; 5 ft . long or upwards,

1l. 5s.; Masts, Yards, and Bowsprits, 6 and under 8 in . in diameter, $1 \mathrm{s}$.6 d . each; 8 and under 12 in . in diameter, $4 s . ; 12 \mathrm{in}$. in diameter or upwards, 10 s . per load; Oak Plank, 2 in. thick or upwards, $15 s$; Oars, 19s. 6d. per 120 ; Spars, under 22 ft . long, and under 4 in . in diameter, 9 s . per $120 ; 22 \mathrm{ft}$. or up. wards, and under 4 in . in diameter, 16s.; 4 and unde 6 in. in diameter, 16. 15s.; Staves, not ex. 36 in long, $2 s$. ; above 36 and not ex. 50 in . long, 4 s . above 50 and not ex. 60 in . long, 68. ; above 60 and not ex. 72 in. long, $8 s$. ; above 72 in. long, 10 s. and not above $3 \frac{1}{3}$ in. thick, but if not ex. $1 \frac{1}{2} \mathrm{in}$. thich one third part only of the above rate is chargeable; Timber (eight inches square or upwards), Fir and Oak, 10s. per load ; other sorts, $5 s$. ; Wainscot Logs 8 in . square or upwards, 12 s.

Rates of duty levied in the United Kingdom on similar articles when imported from foreign countries. -Ashes, pearl and pot, 6s. per cwt.; Corn, Wheat, when the average price for the regulation of the duty is $66 s$. and under $67 s ., 1 l$. 0 s. $8 d$. per qr. [For every shilling by which the average price falls short of 66 . an additional duty of 18 . is imposed.] When 6 .i. and under $68 \mathrm{~s} ., 18 s .8 \mathrm{~d}$.; when 68 s . and under 69 s 16 s .8 d .; when 69s. and under 70s., 13s. 8 dl .; when 70 s . and under 71 s. , 10 s .8 l .; when 71 s , and under 72s., 6s. 8d.; when 72s. and under 73s., 2s. 8d, Hides, not tanned, dry, 4s. 8d. per civt.; ditto, wel, 2s. 4l.; Honey, $15 s$. ; Isinglass, 2l. 7s. 6d. ; Oil, train, $26 l$. 12s. per ton, if of foreign fishing; Pitch, 10 d. per cwt. ; Skins and Furs undressed, viz. Bear, 48.6 d. each ; Beaver, $8 d$.; Calf and Kip, not tanned, dry, $4 s .8 d$. per cwt. ; ditto, wet, $2 s .4 d$. ; Deer, ld. each; Fisher, 6d. ; Fox, 8d. ; Martin, 6d.; Mink, 4d.; Otter, 1s. 6d.; Racoon, 2d.; Seal, 1s., if of foreign taking; Wolf, $6 d$.; Wolvering, 1 s .; Spirits, not sweetened, 1l. 2s. Gd. per gallon; Tar, 15s. per last; Tobseca, unmanufactured, 3s. per lb.; Wax, Bees, unbleached, 1l. 10s. per cwt.; ditto, bleached, 3l.; Whalefins, 95l. per ton, if of foreign taking; Wood, viz. Batteas (on importation into Great Britain), 6 and noterceeding 16 feet long, and not exceeding 29 inches thick, $10 l$. per 120 ; ex. 16 and not ex. 21 ft . long, and not ex. $2 \$$ in. thick, 11 l .10 s .; ex. 21 and notes. 45 ft . long, and not ex. $2^{3}$ in. thick, $20 l$.; ex. 4 ff long, or above 23 in . thick, $6 l$., and $2 l .10 s$. per load; Battens (on importation into Ireland), 8 and notes. 12 ft . long, and not ex. 34 in. thick, 8l. 6s. 3 d . per 120 ; ex. 12 and not ex. 14 ft . long, nad not ex. 34 in. thick, $9 l .14 \mathrm{~s}$.; ex. 14 and not ex. 16 ft . long, and not ex. $3 t$ in. thick, $11 l$. 1 s .8 d .; ex. 16 and not ex. 18 ft . long, and not ex. $3 \pm$ in. thick, 12l. $9 s .4 d$; $\mathrm{E}_{\mathrm{L}}$ 18 and not ex. 20 ft . long, antl not ex. 31 in . thict, 13l. 17s. $2 d$.; ex. 20 and not ex. 45 ft . long, and not ex. $3 \ddagger \mathrm{in}$. thick, $34 l .6 s .1 \mathrm{~d}$. ; ex. 45 ft . long, or abort $3 \ddagger \mathrm{in}$. thick, 6l., and 2l. 10s. per load; Batten Ends (on importation into Great Britain), under 6 ft long and not ex. $2 \ddagger$ in. thick, $3 l$. per 120 ; under 6 ft. 100 g and ex. $2 \frac{3}{\mathrm{i}} \mathrm{in}$. thick, $6 l$.; Batten Ends (on import. tion into Ireland), under 8 ft . long, and not ex $3 i$ in. thick, $4 l$. $14 s .5 d$. ; under 8 ft . long, if ex. 31 in thick, $9 l .3 \mathrm{~s}$. 1 d. ; Deals (on importation into Grat Britain), 8 and not above 10 ft . long, and not abont

## O O.-THE BRITISH AMERICAN LAND COMPANY.

Copy of the agreement concluded between his Majesty's Government and the British American Land Company in the year 1833 , with an account of the sums paid by the company under that agreement.
Memorandum of agreement between the Right Honnurable Edward Geoffrey Smith Stanley, His Majesty'a principal Sccretary of State for the colohial depnrtment, on hehnlf of his Majesty's government on the one part ; and George Richard Robinson, m.P., governor, Nathaniel Gould, deputy-governor, Patrick Maxwell Stewart, m.p., William Petrie Crawfurd, Alexander Gillespie, junior, William Inglis, John Kirkland, Fdward Wheler Mills, John Shuter, Lewis Stride and James Wilson, the Court of Dircetors nominated and appointed by the merehants and others who have united together to establish a company for purehasing, improving, settling and disposing of land in his Majesty'a colonies and provinces in North America and their dependencies, and for other purposes connected therewith, under the name of the British American Land Company, and intended to he incorporated by royal charter, on the other part.
Whereas the said court of directors having made application to his Majesty's government to sell, grant and convey to the said company, for a valuable consideration, certain lands known by the name of crown reserves, and certain other crown lands situated in the eastern townships of the province of Lower Canada, as the commencement of their operations, and bis Majesty's government having acceded to the said application, this memorandum, embodying the terms upon which auch sale and grant is to be made, has been concluded between his Majesty's government and the company as follows:

1. Mr. Secretary Stanley, on behalf of his Majesty's government, has agreed to sell, grant and convey to the said company the crown lands and crown reserves hereinafter described, situated in the eastern townships of the province of Lower Canada, in consideration of the sum of money, and upon the terms and conditions hereinater mentioned, viz.

The whole of the crown lands in the county of Sherbrooke unsurveyed, and as represented on the plan กегейо acres; the crown reserves and surveyed crown lands in the counties of Sherbrooke, Shefford and Stanstead, supposed to amount in all to 251,336 acres : total, 847,661 aeres.

Mr. Stanley is willing to take one entire sum of 120,000 . for the whole of these lands, subject to the conditions hereinafter mentioned respecting the elergy reserves; 75,992l. to be considered as the purehase-money of the unsurveyed lands $44,008 l$. that of the aurveyed lands.

Mr. Stanley considers that he is selling the whole of the before-mentioned crown reserves and surveyed lands at 3s. $6 d$. per acre, and somewhat more than 500,000 acres of the unsurveyed land $3 s$. per acre, leaving to the company about 90,000 acres as an allowance for any unavailable land which on survey may be found in the block, and it is distinctly understood that no claim can be admitted hereafter on the ground of lands found unsuitable to the purposes of the company.
2. His Majesty's government, however, excepts from this sale any town lots or sites already laid out or reserved as such (not exceeding in the whole 10,000 acres), which his Majesty's government may, at any time within a period of two years from the date of the eharter to be gidnted to the company, declare its intention to take up; and for all or any lots which may be so taken up a corresponding deduction, at the rate of 3 s .6 d . per acre, shall be made from the amount of the purchase money liereby agreed to be paid by the said company.

The company shall be debnrred from selling any town lots or sites already laid out or reserved, withe t t giving intimation to his Majesty's government; and the government on their part shall be bound within a limited period to announce their decision in regard to auch lota.
3. If means can be found of legally accomplishing the ohject, one-seventh of the unsurveyed lands sold in the county of Sherbrooke shall be deemed a sale of clergy reserves, and the purchase money be set apart, amounting to one-seventh of $75,992 l$. or $10,856 l$., which in that case will not be subject, like the rest, to the condition that one-half be expended in public works and improvements, as hereinnfter mentioned in clause 6. But this modification of the sale will be dependent on the practicability of executing this armagement; and unless its practicability be secured within one twelvemonth from the present date, no such modification shall have effect.
4. One-tenth part of the whole purchase-money (including the portion proposed to be treated as the price of a sale of clergy reserves) shall be paid within 12 months from the date of the charter. The payments of the remainitg amount to be completed within 10 years from the same date, and in the meantime to bear interest at the rate of four per cent. per annum ; the company, however, having the option of anticipating the whole or any part of the payments.
5. The payments shatl be made to such officer, connected with the reccipt of the crown revenues in the said province of Lower Canada, as bis Majesty's governinent shall from time to time appoint to receive the same, and a rcceipt under the hand and seal of such oflicer, attested by one witness, shall be a good and suffieient discharge to the said company for every sum of money acknowledged in any such receipt to have been received by the officer granting the same. And for obviating any doubt as to the proper officer into whose hands such moncy is to be pail, notice will be given by bis Majesty's government, informing them of the officer who may be appointed to discharge this duty and grant the proper receipts.

And upon producing to the governor-in-chief or officer administering the government of the provincel receipt, signed, sealed and attested as abovementioned, a grant will be issued to the said company for such portion of the lands as may be equivalent to the purchase money actually paid. And every such grant shall be made to the said company gratuitously without any fee of oflice, demand or duty being due or payable to any public officer for prepuring, expediting, sealing and issuing the same.

To prevent unnecessary trouble, the company shall not be entitled to require a grant to be made out for any portion of land less than 5,000 acres.
6. One half of the money so to be paid by the company shall be expended, at the discretion and on the sole responsilility of His Majesty's Secretary of State, on public works and improvements in that part of the province of Lower Canada in which the land sold to the company is situate. But His Majesty's Governinent will always be ready to receive any suggestions of the company for expending this moiety. By the terms public works and improvements will be understood canals, bridges, high roads, market-houses, courtlouses, school-houses, the crection of churches and parsonage houses, the clearing and improvement of glebe lands, and any other works undertaken and calculated for the common use and benefit of His Majesty's subjects, in contradistinction to works intended for the use and accommodation of private persons.
7. His Majesty's Government will instruct the Governor-in-Chief or officer administering the government of the province of Lower Canada to direct the proper departments of the proviicial government to furnish the company with maps and diagrams, showing the situation of the lands herehy agreed to be sold, without any fee of office, demand or duty being due or payable to any public officer for the same; His Majesty's Government will also instruct the Givernor-in.Chicf or officer administering the government to facilitate the inquiries of the servants of the c.rnpany.

Signed by Mr. Secretary Stanley, Downing-street.
(signed) E. G. Stanley.
Signed ly Nathaniel Gould, chairman of a General Court of Proprictors, in pursuance of a resolution passed this day, 1, Freeman's-court, Cornhill, 3d December, 1833.

Nathaniel Gould, Depy. Govr.
Chairman of the Court of Proprietors.

Supplementary Article of Agreement between the Right Honourable Thamas Spring Rice, His Majesty's Principal Secretary of State for the Colonial Department, on behalf of His Mnjesty's Covernment on the
 Maxwell Stewart, m. p., John Peter Boilean, junior, William Petrie Crausford, Russell Ellice, Alexander Gillespie, junior, John Kirklant, Edward Wheeter Dfills, John Shuter, Lewis Strite, and James Wilson, the Court of Directors of the British American Land Company, on behalf of that Company, on the other part.

With reference to the sixth article of the memornndum of agrcement between His Majesty's Government and the company of the third day of December last, which stipulated that one half of the purchase-money to be paid by the company shall be expended in the public works and improvements therein mentioned; it is further agreed between the parties,

That the company are to prepare, at their own expense and charges, the plans and estimates of the works to be undertaken, whether propused by Government or the company, and submit the same to the governor or person administering the government of the province of Lower Canada.
If the governor or person administering the government approve of the contemplated undertaking, either as originally submitted or as amended upon consideration, the company wiil then be authorized by the governor or person administering the government, to expend such sum as may be determined upon under any instructicis that may he considered recessary.

The company will thereupon proceed with the undertaking, and on its completion lay before the governor or person administering the government, a statement of the actual expense incurred in effecting it, with the vouchers, and if he is satisfied, the company will then cither reccive payment of the nmount, if there is money in the hands of government belonging to the Improvement Fund, provided by the sixth article of the memorandum of agreement before referred to, or be allowed credit for the amount in the next ensuing payment of the purchase-money, arcording as it may have been previously arranged. It is understood that the company are to make no charge lor or on account of their officers superintending the undertaking, or expending the money in the manner authorized by the governor or person administering the governinent.
In case of such protracted diflerences of opinion between the governor or person administering the government and the company, on the node of laying out the amount to be expended on public works, as shall appear to the governor or person administering the govermment to render any further attempt to conclude a mutual agreement in the colony useless, the question shall be referred to the Secretary of State, whose decision shall be final.

## APPENDIX III.-NORTH AMERICA.

The above is presumed to he a correct statement of the sums paid by the British American Land Company. As, however, no late accounts on the subject have been received from the Earl of Gosford, His Lordship has been directed to furnish a report forthwith.
Downing-street, 1st April 1837.
The British Anerican Land Company has ita location in the Eastern Townships, or English Lower Canadn, which, situated on the south side of the St. Lawrence, between 45 and $45 \%$ N. lat., and 71 and 73 west long., and divided into eight counties or parts of counties : these again are subdivided into about one hundrad thousand townships estimated to contain hetween five and six millions of aeres.
The'British American Land Company is incorporated and established by a royal charter, dated at West. minster the 20th March, 1834 , and an Act of Parliament, to which the royal assent was given on the $22 d$ May following. The capital of the company is declared in the charter to be 300,000 ., held $\mathbf{m 1} 6,000$ shares of $50 l$. each, but with power to the proprictors to increase it to $600,000 l$. :-of this capital a deposit of 36 . per share has been paid by the proprietors, and upon paynent of a call of $5 /$. per share, which has been made by the directors, and falling due on the lst December next, the capital paid up will amount to $48,000 l \mathrm{By}$ a clause in the charter the proprietors are to receive interest on the capital advanced by then, at the rate of 4 per cent. per annum.
The ohjects for which the company has been established, and the powers conferred on it, are declared by the charter; namely, for the purpose of purchasing and caltivating Waste Lands, \&e. in Lower Canada, Upper Canada, Nova Scotia, New Brunswiek, Prince Edward's Islani, and the Island of Newfoundland, in North America, and their Dependencies, and in or upon any such land, to make, erect and build roads, drains, hridges, and other interual communications, houses, schools, chapels, mills, wharfs, and other buildings and works necessary or expedient for the occupation, plauting, and profitable cultivation or improvement of any such lands \&e., to open, search for, win and work in or under any of their said lands any mines, pits, beds, veins and seams of copper, tin, lead, iron, iron ore, stones, clay and all other ores, minerals, metals, metallic substances, matters and products, other than and except gold and silver, and also other than and except coal and culm, unless such coal and culm should be granted or dernised to them at any time or times hereattar hy His Majeaty, His heirs or successors, or should be by them acquired from any person or persons who should have lawfully consented theteto, \&ic. \&e.
In pursuance of these oljects the Company have purchased from Llis Majesty's Government as the commencement of their undertahing, nearly a million of acres situated in the three most southerly counties of the Eastern Townships, viz. Sliefford, Stanstead, and Sherbrooke, and have made arrangements for the sale of the same to settlers already in the country, and to emigrants who intend to proceed to Canada.

The landa offered for sale by the Company are of diderent deseriptions.

1. Crown Reserves and surveyed Lanis. 300,000 acres and upwards in the surveyed parts of the counties of Shefford, Staustead and Slerbrooke.
These lands are situated for the most part in detached lots or farms of 200 acres cach, scattered through. out the settled parts of the country, and from their contiguity to villages, mills, shops, schools, and churches, are exceedingly eligible for settlement. In many of the townships, several of these lots lie together, so that settlers and emigrants may purchase larger farms from 400 to upwards of 1,000 acres in extent. Besides these detached lots the Company have for sale several blocks of surveyed land, which are well suited to parties who may be desirous to possess large properties. [See Colonial Library, $2 d$ Edition, vel. I., Canada, for a full account of this Company.]

## PP.-TIE CANADA COMPANY,

is incorporated by Royal Clarter, under the provisions of an Act of Parliament passed in 1826, with a sibseribed capital of $100,000 l$. sterling.

The company contracted with the government for the purchase of the fine Huron tract, comprising about $1,100,000$ acres, and situate on Lake Huron; other lands such as crown reserves, and school and church landa have alao been purchased by the company, amounting in the whole to $2,484,413$ acres, the total amount of purchase meney being $348,680 \%$., of which about $120,000 l$. have been paid up to the 31 st December, 1833, and $20,000 l$. is paid annually to Government until the year 1842, when the whole sum will have been liquidated. $45,000 l$. of the purchase money for the Huron tract, is to be expended in improving the company's own lands in the Huron tract, or county.

Nearly half a million of acres of land have been sold by the company, producing 210,0002 ., upwards of half a million acres have been paid for by the company, and not yet sold, leaving $1,400,000$ acres unpaid for, and of course unsold. Not more than 18l. has been paid on each share, which is now, however, worth 50 . and may be naturally expected to be doubled in a few years, as the colony of Upper Canada advances in prosperity.

The rate at which the company lave sold some fine lands in the Huron county in 1834, averaged 7s. 8d. per acre, and 50,000 acres of crown reserves brought 138 . par acre.

The rate at which the Canada Complany first purchased land was 3s. 6 d . average per acre, which was then considered high. The terms on which their lands (of which they have allotments in every township in the province) are sold, are one fifth down and the remainder in five annual instalments, benring five per cent interest.

 a aforesaid, shail ipso facto cease to he such governor, deputy-gnsemer, director, anditor, or sceretary
Yrovided, newertheless, that all acts done by such governor, demety-governor, director, anditer, or secretary, in his official harecter on behalf of the eompany hefore steh suceessors be clected, shall be valid and binding.

And we do further direct and appoint, and our will in, that intersst ealeulated to the 'renth thay of Jaly, One thousand cight humbed and twenty-six, shall within one ment, from the date hereot he payable to the members of the said eompany st and atter the rate of four per centum fer anmm from the respective perioks at which the said deposit and subserfuent ealls if any) shall have theen padd, to de calcuhted upon and in rexpect of such ticposit and calls; and on the Tenth day of January and Tenth day of July, One thousand eight hundred and twenty-selen, and on each and every Tenth day of Jamary and Tenth day of July, until and ending with the Tenth day uf Janary, One thousand eipht humdred and thirty one, further interest at the like rate shall be caleulated and beeone payable to the raid members upon the said deposit, aud upon the amount of the several ealls which shall or may have been made upon and paid by them; and from and after the Tenth day of Jannary, in the year One thousand eight humbed and thirty-one, it shall and may be lawtin to and for the said court of proprietors twiee in every year, in the said months of June and herember, if the state of the attairs of the saill company shatl warant the same, to declare such dividend to aud amonest the members of the said company for the hat year ending on the Tenth day of July and on the Tenth day of Jannary nest sueceding such resjective general eourt, as to the said eourt of proprietors hall appear proper, in addition to such jayment of interest as atoresaid; and in declaring such dividends respectively, due regard shall be had to all the dehts and cograrements of the sail compmy, and the risks nod eontingencies aftiecting, their assets and secerities, and so as tu dividend nor interest ater the sail Tenth day of January, One thousand eight hondred and thirty-ane, be in any case paid out of the capital of the said eompany, or otherwise than as a division of the whole or a part of the gaina and profits of the said company.

And we do further will and direct, that all conveynnees wheth shall be made hy the said company to any individual or iadividuals of any part of the lands to be granted to, or purchaved, or held by the said company, may be made in manner and may be in the form preserihed in and tey the said Aet of Parianment.

And we do, tor us, our heirs, and sucessors, grant and weelare, that these our letters patent or the curollment thereof shall be in all things valid aad effectual in the law according to the true intent and meaning of the same, and shall be raken, construed, and adjudged in the most favourable and benefieial sense for the bext advantage of the said cortroraton, as welfin onr conrth of record as essewhere, notwhintantung any non-rectai, mivecial, ancertainy, or impercetion in these our letters patent; and our will and pheasire is, that these presents to the company horesain, under the reat seal of the United Kinglom of Great Britain apd Ireland, ahali be in due manner made and sedled without fine or ee, great or small, to us ia our Mana.cr or elsewhere, to our use thercof, or any wass to be rendered, paid, or made.
in witness whereof, we have caused these our letters to be made patent, witness ourself at our palace at Westminster, this Nineteenth das of Aogust, in the Seventh Year of our Reign

By Writ of Prisy Scal,
scoter

## Q Q.-THE NEW BRUNSWICK AND NOVA SCOTIA LAND COMPANY

was established in London about February, 1832. From the want of information prevailing in the public mind, it may be almost said, as to the geographical position of this province, but certainly as to the value of its fertile soil, so well adapted for agricultural purposes, more time than usual was consumed in forming the company ; this point being settled, a contract was concluded, under which the crown agreed to sell this com. pany about 500,000 acres of land, lying in the centre of the province, at the price of $2 s .6 d$. sterling per acre, the company to pay the money by instalments in four years, in sums of about $7,000 l$. half yearly.

The supreme Board of Management sits in London. The affairs of the company are delegated to a chief and sub-commissioner and other agents resident in the province. The capital is $200,000 \mathrm{l}$. stock, with a power to increase the capital to $400,000 l$. The company's powers are comprised in a charter of Incorporation from the crown, and on an act of parliament passed in 1833.

The land included in the grant is found, on examination, to be equal in fertility to the best land in New Brunswick; its position is in the centre of the province, from south-west to north-east; approaching the St. John's River, within about eight miles of Fredericton, and bounded on the N. E. by the Northumberland county line, a few miles beyond the course of the S. W. branch of the Miramichi, a considerable portion of which is included in the grant; other strcams and branches of rivers running generally in a direction N. W. to S. E. intersect the grant, by which the pine and other timber eleared from the lands may be rafted to the St. John's or Miramichi rivers.

## ABSTRACT OF THE CHARTER INCORPORATING THE NEW BRUNSWICK AND NOVA SCOTIA LAND COMPANY.

## [There is also an Act of Parliament granting ccrtain powers, dated 22nd May, 1834.]

The Charter, ufter the usual preamble, "William the Fourth, by the Grace of God," \&c., and reciting that divers persons had united together for purchasing lands, and beseeching a charter of incorporation, contains (in brief', the following provisions for establishing the company.

1. Ordains, constitutes, declares and appoints, that John Labouchere, Esq., and others therein named, together with such cthers as may herealter become proprietors of the company's capital atock, " shall be one body politic and corporate in deed and in name, by the name of "The New Brunswick and Nova Scotia Land Company,' and by that name shall and may suc and be sued," Rc.

That the company "shall and may have and use a common seal," \&c.; "and that it shall and may be lawful for the said company and their successors, the same common seal from time to time at their will and pleasure to break, change, alter or make anew, as to them shall seem expedient ;" and declares, "that by the name of the New Brunswick and Nova Scotia Land Company, they shall have perpetual succession."
2. Declares and grants, "that the said corporation shall be and is established for the purpose of purchasing, holding, improving, clearing, settling, cultivating, letting, lèasing, exchanging, selling and disposing of waste lands and other lands, tenements and hereditaments in our provinces of New Brunawick, Nova Scotia, including Cape Breton and Prince Edward Islnud, in North America, and the dependencies of the said provinces."

That the company may invest such part of their capital as may be necessary in purchasing, clearing, sic. such lands as may be granted by the crown, or otherwise acquired by them in the provinces; "and build ror ds, canals, drains, bridges, and other internal communications, houses, schools, chapels, mills, wharfs and otner buildings and works" necessary for the improvement of the lands; "and export, sell and dispose of all auch merchandise, matters and things" requisite for the same; " and to import and receive, sell and dispose of all goods and merchandise which may be consigned or remitted to them, or in payment and sntisfaction of any rent or purcliase-money arising from the occupation or sale of nny such lands, and to purchase, hold, hire, build and charter ships and other vessels for the purpose of conveying and transporting persons willing and desirous to emigrate to our said provinces and their dependencies, nnd also exporting such merchandise, matters and things, and importing such goods, and merchandise and produce from or to our said provinces and their dependencies, to or from any other place or places."
3. Further declares and grants, that it shull be lnwful for the aaid company to open, search for win and work in or under any of their said lands, any mines, pits, beds, veins and seams of copper, tin, lead, iron, iron ore, stones, clay, and all other ores, mincrals, metals, metallic substances, matters and products, other than and except gold and silver, and also other than and except coal and culm, unless such coal and culm shall at any time or times hereafter he granted or demised to them by our heirs or successors, or shall be by them acquired from any person or persons to whom such coal and culm may have been so granted or demised, in which cnses it shall he lawful for the said company to open, search for, win, and work any such coal or culm in the manner authorized by such grants and demises respectively; the said compuny paying the rent or rents, royalty or royalties, and performing and fulfilling the covenants, agrcements and conditions in such grants or demises to be reserved and contained; and to do all other acts for effectually working the said mines. "And that it shall be lawful for the said company to rective monies and other depoaits of emlgrants, settlers or other jersons, in or proceeding to or from our said provinces, for the purpose of transmitting the same from or to our said United Kingdoin to or from our said provinces," or any other of the said provinces; and that it shall be lawful for the said company "to make loans and advances of money to emigrant settlers and others resident within our said provinces," upon lnuds or other legal security within the provinces, also to contract for and execute any jublic works undertaken by or on behalf of government in any of the said provinces.
4. Further grants the royal license to purchase any lands, tenements, dic. whatsoever in the provincts

NSWICK AND NOVA

2nd May, 1834.]
God," \&c., and reciting that er of incorporation, contains
, and others therein named, ay's capital stock, " shall be , Brunswick and Nova Scotia
and that it shall and may be ime to time at their will and ;" and declares, "that by the erpetual succession."
$d$ for the purpose of purcharing, selling and disposing of New Brunswick, Nova Scothe dependencies of the said
y in purchasing, clearing, \&c. the provincea; " and build Is, chapels, mills, wharfs and export, sell and dispose of all and receive, sell and dispose an payment and satisfaction of ands, and to purchase, hold, tramsporting persons willing exporting such merchnndise, from or to our said provinces
y to open, search for win and ams of copper, tin, leal, iron, matters and products, other m , unless such coal and culm or successors, or shall be by may have been so granted or 1 for, win, and work any auch ely; the said company paying enants, agreements and condither acts for effectually work clive monies and other depo provinces, for the purpose of d provinces," or any other of loans and advances of mone ands or other legal security ndertaken by or on behalf of
from the crown, as well as from grantees or other perans now or hereinafter holding of the crown, or " who hold or may hold in any other manner or by any other title;" also to purchase and hold "any frechold, copyhold or leasehold lands and tenements within our United Kingdom, any rights, penalties or forfeitures which might otherwise by the statutes of mortmain, or any other statute, law, custom or usage accrue to us, our heirs or successors, or to be incurred by the said company notwithstanding," \&c.
j. Declares and ordains, that " the present capital or joint-stock of the said company" for carrying on the undertaking, 8cc. " shall be a sum not exceeding Two hundred thousand pounds sterling."

That subscribers shall be entitled to share in the capital stock in proportion to their subscriptions, (" no such subscription being less than twenty-five pounds,") and "shall be entitled to a proportionable share of the profits," \&c.

That the names of proprietors be entered in a book, with the amount of their share.
That all persons subscribing, shall pay the sum or sums respectively subscribed, or such parts thercof "as shall from time to time be called," pursuant to the powers of this charter, and " at such times and places, and to such person or ; prsons, and in such manner as shall be ordered and directed by any court of directors for the time beir $y$.'

That all transfers of catics int the capital stock, shall be registered by some authorized officer of the company in a book, "and a fee shall be paid to and for the use of the said company not exceeding two shillings and sixpence for every such registry;" and that until the transfer be registered in the company's books no person shall be deemed a proprietor, " or be entitled to any dividend or beneficial interest" therein; "nor until six calendar months after such transfer shall have been made and registered," be entitled to vote at any meeting as a proprietor, \&c.
That after any call for money shall be made, no person can sell or transfer their share or shares in the atock until auch call has been naid, " and notwithstanding that the time appointed for the payment thereof may not have arrived."
6. Further declares and ordains, that persons claiming any shares in the capital or profits in right of marriage, a copy of the register of such marriage shall be left with the proper officer, and on entry thercof made " before such person, shall be entitled to sell or assign any such stock, or to claim payment of dividend or dividends in respect thereof, or to vote as proprietor of such stock."
That persons claiming any share in the capital, \&cc. " by virtuc of any will or bequest, or in course of administration, the probate copy of the will or letters of administration, in case the proprietor shall have died intestate, shall be produced," and an entry made by the proper officer " of such will, or 80 much thereof as shalt relate to the disposition of the share of the testator of and in such stock, or of the letters of administration, in case the proprietor shall have died intestate," before any persons can sell, claim dividend, or vote as a proprietor; and that " for every such entry of marriage, will or letters of administration, a fee not exceeding the sum of ten shillings" shall be paid.
7. Further declares, that the directors for the time being, or so many as shall form a court, or the major part of them " shall have full power to make such call or calls, for money from the several subscribers and proprictors for the time being," their executors, \&cc. for their shares, or the court of directors may find necessary, the sums so called for to be paid to the company's bankers, or as the court shall appoint, "of which time and place, twenty days notice shall be given in the London Gazette, and in such four or more daily newspapers usually published in the city of London or county of Middlesex, is the said court of directors shall direct."

And further declares, that if any subscriber, their exccutors, \&c. " shall neglect or refuse to pay" their portion of the money called for by the directors, "during the space of three calendar months, next after the time appointed for payment thereof, together with lawful interest," in such case the subscribers will be liable "absolutely to forfeit his, her, or their respective share or shares, of, and in, the capital stock of the said company, and all profits and advantages thereof, and of all monies theretofore advanced by hiin, her, or them, on account thereuf, to and for the use and benefit of the said company," and that the court of directors may order at any time thereafter, that such forfeited shares " be sold at a public sale, for the most money that can be gotten for the same, and the produce shall go to, and make part of the capital stock of the said company, and such share or shares, 80 forfeited and sold, shall be assigned and transferred to the purchaser by an instrument under the common seal of the said company," but no advantage of such forfeiture shall be taken till after thirty days notice, under the hand of some duly authorised officer of the company, left at their place of abode, nor unless the aame be declared forfeited at aome general or special general meeting of proprietors, to be held not earlier than three calendar months after such forfciture shall happen, whereupon such proprietor is discharged from all further liability in respect of such share, but this does not deprive the power of compelling payment of any unpaid part if the directors prefer so doing.
8. Further declares, that there shall be " out of the members of the said company, a governor and a de-puty-governor, who shall also be directors, and ten other directors," also "three auditors," which "go. vernor, deputy.governor, and other directors, or any five of them shall institute, and be called a court of directors" for managing the affairs of the company.
And further ordains, that the court of directors for the tine being, may appoint "any one of their own number to be a sitting director," to attend inore immediately to the business of the company, subject to regulatious and removal by a court of directors, who shall be competent to appoint another if they see fit, and to make such allowances as they think right as remuneration.
9. Further ordains, that it ahall be lawful for "every the members or proprietors of the said company" to assemble together at any places in the cities of London and Westminster for the choice of governor, de-puty-governor, directors and auditors, and for other purposes, of which, "twenty-one days previous notice" must be given hy advertisement in " the London Gazette, and in three or more daily newspapers," and that such assembly shall be called, "n genernl court of the said company," and that such cunt have power to adjourn. That en the second Thursday in March 1836, and every succeeding year on the same day shall be
yearly chosen, all aucceeding directors and auditors out of and by the membera personally preaent entitled to vote.

The qualifieation to vote, being holders of atock $£ 100$ to one vote, $£ 500$ two votes, $£ 1000$ three votes, $\boldsymbol{£ 2 , 0 0 0}$ and upwards, " four votes and no more." The election to be by ballot or otherwise as may be determined. It being ordnined that " one half of the directors, and one of the auditors shall go out of office every year, to commence in the year 1836, the directors and auditors going out of office, for the time being, are, and shall at all times hereafter, be capable of being re-elected." The first directors and auditor going out, to be determined by drawing lots, in such manner, as the directors shall agree, and that the names of directors and auditors going out successively, be posted in a conspicuous part of the company's office in London or Westminster, at least fourteen days before the day of clection.

That the governor, deputy-govemor and directors, from time to time chosen, be elected for two years, and the auditor so chosen, for three years, unless they be chosen in the place of some other by death, resig. nation, or otherwise, in which case, they are chosen for the time such party had to serve, \&c. but that no person shall be an auditor while he shall be a director, or a director while ao auditor.
10. Further directs, that no person shall be chosen governor, deputy-governor, or director, " unless he shall, at the time of such election, be a natural born or naturalised subject of the United Kingdom, and shall also have in his own name, and in his own right, five hondred pounds or more, of the capital stock of the sajd company," and that no person can be chosen auditor except under the same restrictions, "and having in his own name, and in his own right, two hundred pounds or more of the capital stock." And that no director or auditor shall continue in their respective offices" longer than the continuance of such respective interest, and should any governor, deputy-govermor, director, or auditor, be divested of his stock, to reduce it to " a less amount than aforesaid," the directors may at this next meeting, after the knowledge of such fact, declare such office vacant, and the vacancy be filled up at the general court, " whieh shall be duly held next after such declaration."
And that in ease any governor, deputy-governor, director, or auditor, die, resign, or be removed before the annual elcetion, the meinbers qualified to vote at a general court, shall choose any other member qualified to fill such office, who shall continue therein for the period such governor, \&c. had to serve.
11. Forther ordains, that every proprietor intending to propose himself for any office of governor, director, \&e. " shall leave notice in writing," with the sitting diren'or or clerk of the company, "for the information of the proprictors at least 21 days before, and exclusively of the day of election," and a list of the candidates be fixed up in the principal office in London or Westminster, "at least 14 days before the day of election," and " 10 days before the day of election, make out a correct and alphabetical list of the mames and residencies of all the then proprietors," with the number of votes eacly is entitled to give, and to which each proprietor may have access.

And ordains, that in case of death, resignation, or failure, to elect directors, an insufficient number to compose a court of directors " shall not in any manner tend to work the dissolution of the said corporation," but that the general body of members may be convened by the surviving direetors to elect the requisite number of direetors.
And appoints that it may be lawful " at any general court to grant such salaries and allownnces to be paid" to the governors, directors, (except the sitting director) and anditors, "as may be deemed expedient," of which notice must be given in the Gazette and three papers, one month at least prior thereto, setting forth the purpose.
12. Further appoints there shall be held " one general court of the said company at least in each year on the second thursday in March," at which dividends may be declared, and in cose a general court fail to be held on such day, " any three or more of the directors for the time being" may summon the court whin six weeks ensuing the day on which it should have been held, giving the proper notice.

And appoints "that upon the requisition in writing of any fifteen or more of the members of the said company, ench having nut less than two hundred prounds in the said capital stock," the directors shall withia 30 days thereof, "call n special general court," with proper notice, "for the purposes to be mentioned in such requisition," in default of which "it shall and may be lawful' for the snid fifteen or more members" as aforesaid, upon fourteen days previous notice " by advertisement under their hands" in the london Gazette and four daily papers, "and by writing affixed on the Royal Exchange," to summon a special general court, and there debate upon any husiness mentioned in such requisition bat no other, and have power to adjoura the same to a day then to be fixed upon, and so from time to time to determine finally upon the questions to be discussed, \&c.

And further direets that no business shall be done nt any genernl or special general court "unless there shall be present within one half of an hour next after the time appointed for such court, and also at the time or times of making any election or putting any question or questions to the vote of at least fifteen members of the said company qualified to vote," and in default, the court to be adjourned to the next general court or some day not earlier than fifteen days from the day of adjournment as may be then determined, of which ten days' notice ahall be glven in the Gazette and four daily papers.

And further, gives full powers at any general or ajecial general court, to make, alter, and repeal any orders and regulations relative to the affairs and government of the company, to be recorded in a book which may be accesaible to the members of the company.
And further appoints "that the governor, or in his absence, the deputy-governor alsall preside and act as chairman of the said court of directors, and general, or special general courts." If either of these be absent, the directors present may appoint a chairman for the oceasion, and if no director be present, or they do not appoint, then the memhers present may appoint a chairman. The governor, deputy-governor, or other person presiding at any such courts, "in case of any equality of votea, to have a casting vote."
13. Appoints "that all sums of money paid and received in respect of the stock," together "with all sequisitions or investments, or purchases whatsoever whether real or personal," made by or on behalf of the
votes, $£ 1000$ three votes, otherwise as may be detors shall go out of office office, for the time being, ectors and auditor going e, and that the names of the company's office in
be elected for two years, ome other by death, resis. to serve, \&ec. but that no tor.
$r$, or director," unless he United Kingdom, and shall of the capital stock of the restrictions, " and having pital stock." And that no inuance of sueh respective ted of his stock, to reduce fter the knowledge of such " which shall be duly held
a, or be removed before the ay other member qualificd d to serve.

nries and allownnees to be nay be deemed expedient," least prior thereto, setting
pany at least in each year on sc a general court fail to be hy summon the court whin notice.
of the members of the said ," the directors shall within irposes to be mentioned in ifteen or more members" as ads" in the London Gazette mon a special general court, , and have power to adjourn tinally upon the guestions
general court " unless thcre court, and also at the time e of at least fifteen menhers to the next general court or en determined, of which ten
alter, and repeal any orders corded in a book which may
rnor shall preside and act as If either of these be absent, or be present, or they do not puty-governor, or other persting vote."
ock," together " with all acmade by or on behaif of the
empany, "shall form and constitute the joint or capital stock of the aaid company, and shall be liable and answerable for the debts, liabilities, and cngagements of the said company."
And further directs that in case the court of directors ahall hercafter consider it expedient to encrease the capital already subscribed, that it shall be lawful for the then members, "in pursuance of any resolution adopted at once and confirmed by a subsequent general or special general court to raise and contribute amongst themselves in such shares and proportions as they shall think proper, or by the admission of new subscribers, any further or other sum or sums of money not exceeding in the whole the further sum of two hundred thousand pounds sterling." That every subscriber to such further aum shall he a proprietor in respect of their share, shall be liable to such forfeitures, and be interested in such rights and profits in respect thereof, as if they had subscribed to the capital orizinally raised.

And further appoints that "the directors for the time being shall have the custody of the common seal," that the governors and directors, or nuy five may assemble at such places as they may think fit for the management of the company, and shall have power to enter into all contracts, execute all assignments, conveyances, " and all other acts to which the corporate seal is required to be affixed," to appoint secretaries and other agents or servants, to allow them fair and reasonable salaries, and to remove them, and do all things necessary for the management of the comprany.
Provided that in no case the corporate seal " be nffixed to any instrument whatsoever except by order in writing of the court of directors, and in the presence of at least two of the directors" who shall attest the same.
14. Further ordering that if the conduct of any director be such that his continuance in office might appear prejudicial to the company's interests, "it shall be lawful for each other of the dircctors, or any four fifths of them at a special court of directors to be convened for that purpose, to remove such dircctor from his office," and the vacancy to be supplied at the next general or at a special court of proprietors convened as aforesaid.

And further ordains that in all contracts entered into by the governor or other officers of the company in which any such governor or other officer shall be direetly or indirectly concerned for doing work or supplying any artieles for the use of the said comprny, they shall, "at the option of a court of directors," be declared null and void, and any such governor or other officer entering into such contracts, "shall ipso facto cease to be such governor or other officer, and a new election take place," \&c.
And further appoints that it may be lawful for the court of proprictors "once or twice in every year, if the state of the affairs of the suid company shall warrant the same, to declare such dividend or dividends" as the court of proprietors may think proper, having therein due regard to the liabilities of the company and contingencies, "and so as no dividend be in any ease paid out of the capital of the said company or otherwise than at a division of the whole or a part of the gains and profits of the said company."
And further directs that the governors and directors have power and are required to balance the company's books "on the 31st day of December in each year," or at such period of the year as any general or special general court may from time to time nppoint, and such balance be exnmined and signed by two or more audi. tors appointed by the snid governors Re., and an abstract shewing the debts and credits of the company, signed by two or more anditors " shall he produced at the general court of the said company, to be held on the second Thursday in the month of March in every year," for the inspection of the proprictors.

And further directs that lor the transfer of shares, the books of the company may he closed " from time to time previous to the payment of any dividend for any time not exceeding one month."
15. Grants and declares that if at any time it should be thought desirable by the court of directors for the time bcing to increase their number to " not exceeding fourteen," they may recommend the same at the next general court, or at a special general court for that purpose. Or if the court of directors think at any time the number of directors should be decreased to " not less than eight," the snme may be in like manner recommended, and the proprietors at such courts may carry such alterations into effect n.: the case may be, "reference being had to the change in the number of directors annually to vacate their offices, and the order of such vacating" in consequence.
And further appoints " that two suecessive general courts of the company specially called for the purpose," may resolve that the charter may be surrendered to the crown, provided there be personally present at ench such general court at the commencement and when the whole or any part of the business to be transacted shall be decided on, "two-thirds at least of the proprictors qualified to vote, and who shall hold amongst them not less than two-thirds of the capital stoek."
"Provided also that at each such genernl court, the concurrence of qualified proprictors holding threcfifths of the votes of the qualificd proprietors so present, shall he requisite in order to come to any decision," and that upon the surrender being made and accepted, "so much of the funds or property of the said company as shall not then consist of money," shall be converted into money, and so much of the funds of the company "as shali remain after answering the claims and demands thereupon, shall be prid to and distributed by the directors amongst the proprietors, their executors \&c.," according to their respective proportions.

And further directs and declares that in any of the provisions of the chnrter whether as to words used importing aingular or plural, or as to persons whether male or female, or "bolies politic nnd corpornte as well as individuals," that "these our letters pateut" shall be valid in law and adjudged in the "most beneficial sunse for the best advantage of the said corporation \&c.," ant that these presents shall be made under the great seal, \&c. \&c.
"Witness ourself at our palace at Westminster, this twentieth day of February, one thousand eight hundred and thirty four, in the fourth ycar of our reign."
"By writ of Privy Senl."

Mint Ofice, 14 February, 1834.

Coins in Circulation, in Upper Canada.-British gold and silver coins, Spanish and American gold and silver coins, gold coins of France and Portugal, and French ailver coins, British copper coinage has been introduced, but there are a great quantity of copper tokens in circulation, of an inferior value to the British halfenny, which they represent; they are brought to the province by speculators and persons in trade; the United State cent is circulated as one halfpenny.

6th Wm. 4th Ch. 27. in force for 4 years.

S S.-NOVA SCOTIA AND CAPE BRETON MINING COMPANY.
The General Mining Association as tenants of the Crown, and of His late Royal Highness the Duke of York, are lessees of all the mines and minerals of every description in the province of Nova Scotia Proper, and in the island and county of Cape Breton.
The operations of the Association commenced there in the year 1827, and have hitherto been confined to the working of coal mines, and the discovery of iron ore.
The coal mines opened and at work are three in number-the Albion, the Sydney, and the Bridgeport mines.

The Albion mines are situated on the banks of the East River, in the district of Pictou, or Poictou, and distant about eight miles and a half from the town of that name, a port of safe and easy access on the Gulf of St. Lawrence. A lighthouse has lately been erected on the coast, near Pictou.
The strata are similar in their formation to those of the Staffordshire coal ficlds, and like the latter produce a coal, which, good and serviccable as it is for household use, is, however, from its peculiar properties most remarkable for excellence for the purposes of steam, and manufactures, and especially for the manufacture of iron, on account of the abserice of sulphur in its composition.
The following return shews the quantities of coal shipped from the Albion mines, from the beginning of 1828 to September, 1834, distinguishing the quantity in cach year:-

In 1828, 4,467 chaldrons; $1829,5,841 ; 1830,6,426 ; 1831,8,345 ; 1832,12,020 ; 1833,19,890 ; 1834$, 14,927 ; 1835, 18,161; 1836, 36,322; 1837, 36,647.
The coal is raised from four ahafts by the aid of steam pumping, and winding engines.
The establishment at the Albion mines consists of upwards of 400 persons employed in and about the mines, the foundry, and the rail-road, stcam-boat, and barges, the brick kilns, \&c., and their several appurtenances. The number of divelling houses and buildings required for these various works is little short of 100 , and the small town of New Glasgow, owes its birth and existence to the presence and operations of the General Mining Association in this part of the country.
The Sydney and Bridgeport Mines are both in the island of Cape Breton, which is separated from Nova Scotia by the Gut of Canso.
The Sydney mines are situated on the N. W. entrance of Spanish River or Sydney harbour, a harbour equal if not superior to any in British America, and which is accessible in all winds. It is here that the most extensive operations of the Association are carried on.
The establishment at the Sydney mines consists of about 300 persons, and occupies 50 houses, including the buildings required for the works. Quantities of coal shipped from these mines from the year 1827:
$\ln 1827,8,77 \epsilon$ chaldrons ; $1828,10,266 ; 1829,9,903 ; 1830,11,898 ; 1831,13,882 ; 1832,19,949 ; 1833$, 15,302 ; $1834,11,693 ; 1835,15,459 ; 1836,31,486 ; 1837,35,154$ chaldrons.
The Bridgeport mines are situated on the southern shore of Indian Bay, one mile and three quarters from the harbour where vesseis load, and which is perfectly secure for shipping in the most boistcrous weather. The southern head of Indian Bay, which is called Cape Table, bears hy compass from Flint Island N. W. by W. distance $8 \frac{1}{2}$ miles, and the northern head of the Bay bears from the lighthouse on Flai 'oint at the entrance at Sydney harbour S. E. distance 4 miles. Vessels may run safely into 4 fathoms water between the northern and southern heads.
The coal from these mines is of excellent quality, of the same description as the Sydney, and not at all interior to it. A rail-road bas been laid from the pits to the shipping place, and along which the coal is carried and deposited at once in the holds of the vessels.
This establishment employs ahout 150 persons; the houses and buildings exceed 20 in number exclusive of wharfs, saw-pita, \&cc. The following quantities of coal have been shipped from the Bridgeport mines from the year 1829, when they were first opened :
$\ln 1829,1,325$ chaldrons ; $1830,3,425 ; 1831,6,851 ; 1832,10,890 ; 1833,9,805 ; 1834,7,142 ; 1835$, 8,$434 ; 1836,12,550 ; 1837,13,121$ chaldrons.

The extent and power of the veins or seams of coal already discovered in Nova Scotia, render them as it were inexhaustible, and when the capabilities of the mines opened by the association are fully developed, they will be equal to aupply any demand.
The bencfit and advantages accruing from the presence and operations of the General Mining As. sociation in Nova Scotia have hithert's been exclusively reaped by the colony and the Mother Coun. try.
The eapital of the General Mining Association is $400,000 l$. divided in 20,000 shares of 20l. each. Of this sum $340,000 l$. or 176 . per share have already been subscribed, of which $240,000 l$. or $12 l$. per share have been applied to the operations of Nova Scotia. On the otlicr hand the Association possess in Nova, Scotia considerable property in mines, machinery, implements, steam boats and other craft, wharfs, and houses, and about 14,000 acres of land.
The rail-road constructed by the Company has cost $40,000 l$. ; and locomotive engines are now being sent out for the first time to North America.

## T T.-THE ROYAL CHARTER FOR INCORPORATING THE HUDSON'S BAY COMPANY.

## Charles the Second by the Grace of God, King of England, Scotland, France and Ireland, Defender of the Futh, \&c.

## To all to whom these presents shall come, grecting :

Wuereas our dcar and entirely beloved Cousin, Prince Rupert, Count Palatine of the Rhinc, Duke of Bavaria and Cumberland, \&c.; Christopher, Duke of Albemarle; Villiam, Earl of Craven; Henry, Lord Arlington; Anthony, Lord Ashley; Sir John Robinson; and Sir Rohert Vyner, Kinights and Baroncts; Sir Peter Colleton, Baronet; Sir Edward Hungerford, Kinight of the Bath; Sir Paul Neele, Knight; Sir Jolin Criffith and Sir Phillip Carteret, Knights; James Hayes, John Kirke, Francis Millington, William Prettyman, John Fenn, Esquires; and John Portman, Citizen and Goldsmith of Iondon; have, at their own great cost and charges, undertaken an Expedition for Iludson's Bay in the north-west part of America, for the discovery of a new passage into the South Sea, and for the finding some trade for furs, mincrals, and other considerable commodities, and by such their undertaking, have already made such discuveries as do enceurage them to proceed further in pursuance of their said design, by means whereof there may probably arise ,ery great advantage to us and our kingdom.

And whercas, the said undertakers, for their further encouragement in the said design, have humbly be. sought us to incorporate them, and grant unto them, and their successors, the sole trade and commerce of all those seas, streigh ${ }^{4}$ s, bays, rivers, lakes, creeks and sounds, in whatsocver latitude they shall be, that lie within the entrance of the streights commonly called Hudson's streights, together with all the lands, countries and territories, upon the coasts and confines of the seas, streights, bays, rivers, lakes, creeks and sounds, aforesaid, which are not now actually posaessed by any of our subjects, or by the subjects of any other Christian Prince or State.

Now know ye, That we being desirous to promote all endeavours tending to the public good of our people, and to encourage the said undertaking have, of our especial grace, certain knowledge and mere motion, given granted, ratified and confirmed, and by these presents for us, our heirs and successors, do give, grant, ratify and confirm, unto cur said cousin, Prince Rupert; Christopher, Duke of Albemarle; William, Earl of Craven; Henry, Lord Arlington; Anthony, Lord Ashley; Sir John Robinson; Sir Rubcrt Vyner; Sir Peter Colleton; Sir Edward Hungerford; Sir Paul Necle; Sir John Griffith; and Sir Philip Cartaret; James Hayes, John Kirke, Francis Millington, William Prettyman, John Fenn, and John Portman; that they, and such others as shall be admitted into the said society as is hercafter expressed, shall be one body corporate and politique, in deed and in name, by the name of the governor and company of adventurers of England, trading into Hudson's Bay, and them by the name of the governor and company of adventurers of England, trading into Hudson's Bay, one body corporate and politique, in deed and in name, really and fully for ever, for us, our heirs and successors, we do make, ordain, constitute, establish, confirm and declare, by these presents, and that by the same name of governor and company of adventurers of England, trading into Hudson's Bay, they shall have perpetual succession, and that they and their successors, by the name of the governor and company of adventurers of England trauing into Hudson's Bay, be and at all times hereafter shall be, personable and capable in law to have, purchase, rcceive, possess, enjuy, and retain lands, rents, privileges, liberties, jurisdictions, franchises, and hereditaments, of what kind, nature or quality soever they be, to them and their suecessors; and also to give, grant, demise, alien, nssign, and dispose lands, tenements, and hereditaments, and to do and executc all and singular other things by the same name that to them shall or may appertain to do. And that they, and their successors, by the name of the governor and company of adventurers of England, trading into Hudson's Bay, may plead, and be impleaded, answer, and be answered, defend, and be defended, in whatsocver courts and places, before whatsoever judges and justices, and other persons and officers, in all and singular actions, plcas, suits, quarrels, causes and demands, whataoever, of whatsoever kind, nature, or sort, in such manner and form as any other our liege people of this our realm of England, being persons able and capable in law, may, or can have, purchase, rcceive, possess, enjoy, retain, give, grant, demise, alien, assign, dispose, plead, clefend, and be defended, do, permit, and execute. And that the aaid governor and company of adventurcra of England, trading into lludson's Bay, and their succesaors, may have a common scal to serve for all the causes and businesses of

Scotia, render them as it ation are fully developed,
the General Mining As. and the Mother Coun-
shares of 20l. each. Of $00 l$. or $12 l$. per ahare have on possess in Nova Scotia craft, wharfs, and houses,
engines are now being sent
'S BAY COMPANY.

Ireland, Defender of the
ine of the Rhinc, Duke of 1 of Craven ; Heary, Lord Knights and Baroncts; Sir 1 Ncele, Knight; Sir John Millington, William Pretty1 ; have, at their own great st part of America, for the or furs, mincrals, and other discuveries as do enceurage ere may probably arise , ery
id design, have humbly be. sole trade and commerce of itude they shall be, that lie er with all the lands, counrs, lakes, creeks and sounds, $y$ the subjects of any other
e public good of our people, dge and mere motion, given essors, do give, grant, rati?y lhemarle ; William, Earl of on ; Sir Rubert Vyner; Sir ; and Sir Philip Cartaret ; , and John Portman; that pressed, shall be one body conspany of adventurers of company of adventurers of nd in name, really and fully sh, confirm and declare, by nturers of England, trading iir successors, by the name n's Bay, be and at all times ess, enjoy, and retain lands, at kind, nature or quality e, alien, nssign, and dispose er things by the same name rs, by the name of the goay plead, and be impleaded, es, before whatsoever judges its, quarrels, causes and deits, quarrels, cather our liege may, or can have, purchase, lefend, and be defended, do, ers of England, trading into he causes and businesses of
