ard of Trade or other bodies, urging the necessity for an improved immigration policy, and if so, what steps have been taken to give effect to them. Mr. Hawkes was prominent during the last election campaign when he rallied the "British-born" against the reciprocity agreement. He is at present on the parliamentary press gallery at Ottawa.

LIGHTS TURNED OFF **ON SCOTTISH COAST**

LONDON, Saturday, Feb. 26, 2.04 a.m.-Scotland, from Aberdeenshire to the English barder, was darkened last night for the first time, as a result of a stringent lighting order.

Aberdeenshire is on the eastern coast of Scotland. From there to the Eng-lish border, on the North Sea coast, are the Counties of Kincardine, Forfar. Perth, Fife, Edinburgh, Haddington and Berwicks. Included in this territory are the important Cities of Aberdeen. Dundee, Perth. Edinburgh, Leitn, Dunbar and Berwick.

tomarily Gravely Exaggerated By Foe.

LONDON, Feb. 26 .-- While the confidence of the military critics has not been shaken by it, the seriousness of the German thrust toward Verdun don, who

are favorable and probably with re-The military writers are skeptical as to the claim of the Germans that of children of French origin hold an they have taken 10,000 prisoners in the course of the battle. They allege

that it is the German custom to count wounded and civilians as The Times' Paris correspondent roflects the feelings of the French people as of equal anxiety, tho, he says, there is less apprehension than prevented during the says of the

concord between the different elements of this confederation shall receive in prevailed during the great Marne struggle. The correspondent adds that all accounts from the front. agree that the tremendous artillery fighting in the Champagne offensive

was as the mere firing of squibs when compared with the pitiless bombardment which has been going on thruout the Meuse heights during the past week, largely owing to the 12-inch and 17-inch guns brought back from the Russian and Serbian

fronts to swell the chorus. "Never before," says the corres-pondent, "has a battle been so minitely prepared for or an army so abundantly provided with the

terial necessary for victory. Nothing has been neglected that is likely to lead to success. The Germans doubtless noting the slow but sure efforts of the allies toward a co-ordination of their tremendous industrial mobilizing and the prospect of a flood of new troops from Great

Britain, have realized that unless they get the knock-out blow in soon they are bound to be beaten."

FLEET IN KIEL CANAL **REVIEWED BY KAISER**

Emperor Reported at Wilhelms haven as Well as at West-

ern Front. COPENHAGEN, Denmark, Feb. 26 via London .-- The Wilhelmshaven Zei via London.—The Wilhelmshaven Zei-tung states that Emperor William ar-rived at Wilhelmshaven on Wednesday morning and inspected the warshing morning and inspected the warships there. He conferred with the commanders of the North Sea fleet, The Zeiting says, and departed the same evening.

It was reported unofficially early this parted from the Verdun sector to Wil-

miles distant. There have been reports recently of unusual activity the part of the German fleet, which has given rise to speculation whether dash into the North Sea was conemplated.

PREMIER SCOTT GOES SOUTH.

REGINA, Sask., Feb. 26.-Premier Scott left the city last night for Nassau in the Bahamas. The premier, it is understood, had been planning the trip for some time for the benefit of

his health. He usually spends the spring season out of Saskatchewan, morrow morning.

supplied an all-star cast, has renamed it "The Great Pursuit." The original theme has been retained by Mr. Chambers in making his play meet Second Battalion Will Be Recruited From Among O.A.C. GUELPH, Ont., Feb. 26 .-... Two new batteries of artillery, to be known as the 55th and 56th Batteries, are to be organized and recruited in this division at once, both batteries to have Guelph as their headquarters. This revive another famous play this year and with a cast of unusual merit. ement was made at the armories today by Capt. Cameron, of Lon-

PIANO CLUB THERE were only twenty-four of the 150

piano memberships left in this club Saturday noon. When these twenty-four pianos are taken the club will close. At the present rate this will probably be some time Saturday or Monday at the latest. and when it has closed,

this opportunity for saving nearly \$100; for getting easy lerms; prolective and relief insurance and guarantees, will be gone!

Club Meets Conditions

This club is particularly timely this year, being in keeping with the spirit of economy and caution so prevalent just now. Anyone can purchase high-priced pianos on regular terms in good times, but it is in times like these that this club plan appeals, the basic, primary principle of which is saving money for you; giving you every protection and precaution against loss, and making it easy-very easy-to meet the payments of \$1.25 weekly.

Even though you want a more expensive instrument, you can, as a matter of caution, purchase one of these Ennis Club Pianos under this club plan on Club terms and with Club special privileges. Then within a year

if you feel you want a more expensive instrument or

a Player-Piano you turn in your Ennis Piano and every

dollar you have paid on it is applied on your new in-

Many families who long for the comfort, cheer and

happiness that a piano adds to a home are depriving

themselves of this blessing through fear of the obliga-

tion.' Because this Williams Club dispels this fear, be-

cause it gives members so many special privileges and

advantages not generally accorded piano purchasers,

strument. (See Club privileges as listed here.)

because it gives all the benefits and pleasure without the usual obligation, it has struck a responsive note in the hearts of the people, and will close with a rush and enthusiasm that stamps it as the greatest piano event of Canada.

RAILWAY OPERATION WAS SPLENDID FEAT

Britain Worked Wonders With Transportation Lines Since War Started.

ARE PUBLICLY OWNED

Record is a Great Compliment to Success of Public Ownership.

LONDON Feb. 26.—(New York Tribune cable).—Exclusive calcula-tions just finished for the first year of the war show that the working of the British railroads has been prob-ably the greatest feat of British or-configation during the war. The cost MORE THAN BATTALION panization during the war. The cost to the government has been com-paratively trifling-\$10,000,000. Millions of British troops have been transported to all parts of the country while the regular passenger service has scarcely shown signs of incon-venience. All the railroads under

venience. All the railroads under government control are being worked by a committee of managers. Cost Very Small. Payment is calculated by the dif-ference between the net receipts of 1913 and the receipts during war time. Considering that some of the railroads have carried occasionally 50 railroads have carried occasionally 50 troop trains in one day, as well as furnishing innumerable trains for military suplies, the cost to the gov-ernment has been amazingly small. This is only attributed to the econoprevious week. methods of the committee abolished all wasteful compemical which while maintaining adequate tion, passenger service.

The success of the committee is bound to lead to a strong agitation in favor of nationalizing the railroads after the war, which is likely now meet with little opposition from the directors and shareholders.

RECIPE TO DARKEN GRAY HAIR

Home Made Mixture Darkens Gray Hair and Removes Dandruff.

To a half pint of water add: Bay Rum 1 oz. Orlex Compound a small box

you can buy from any druggist at very little cost, and mix - them yourself. Apply to the scalp once a day for two weeks, then once every other week

Macdonald of Pictou Would Take Sir George Foster at His Word.

By a Staff Reporter. OTTAWA, Feb. 26.—When Sir George Foster made his great speech during the budget debate he made the collowing statement:

"I wish now that I might speak from the heart out, and make an agreement in this country between both parties that hereafter patronage shall not be applied by political parties in the construction of our public works." E. Macdonald, of Pictou, taking this as a text, has filed a question asking if the government intends submitting to the house a definite proposal by which means the evils of patronage may be done away with, and if not what action

the government proposes to take to do away with the evil. He also asks what departments of the government maintain a patronage list, and what departments do not.

ACTION OF CONGRESS

QUITE A CONTRAST CONCERNING CAFES

marine Controversy Halts Those in Germany Seriously Affected by War, But Not So

in Canada. 🖌 The cafes of Berlin and the larger cities of Germany are forbidden to sell

meat or the better quality of foods oftener than about once a week, and the prices of these have been greatly increased. Here in Canada the war has not touched our tables at all. Sea and lake and farm have combined to furnish princely production. One has only to visit the Cafe Royal at 14 East

King street for iuncheon and read the menu for either a 35c or 50c meal, to he convinced that neither in price nor in quality has the war affected values. At least if it has it is not apparent here. A full course dinner is virtually claration of war by Italy on Austria in May, 1915. He volunteered for ser-tice and was appointed lieutenant in the army and has that output and has the set of the s in May, 1915. its shelters to make an attack, they can keep the guns trained on this in-fanity for a longer period than they could, if the trenches had been main-tained at their old distance apart. If the Germans finally lose out, the lost around can sheddly be recovered Sir George Reid, M.P., is to be pre-sented with a marble bust of himself as a gift from the staff of the Australian Commonwealth offices here. the German antilery is said to be still formilable, but the German in-fantry has lost a great deal of its early The Prince of Wales has given his an-nual subscription of \$500 to the King Ed-ward Hospital Fund, and Prince Albert, Prince Henry, Prince George, Prince John and Princess Mary have given a guinea dash and staying power. The French are probably better provided with guns than the Germans. Reaction Against Trenches Priscilla Cecilia, Lady Annesley, widow of the fifth Earl of Annesley, is now liv-ing in a cottage at the Model Village. Purley, Surrey. She does practically all her own work, I am told. The contest is said to be in one aspect the result of a reaction against the war of trenches, which finally has become unbearable for the Germans. If more trenches are levelled by high-explosive shells, fighting will be more in the open field, where shrappel will come more into use. Troops with good nerves are not easily shaken by the bursting of the big shells. Altho it is said that the Germans have brought 300,000 men into action, it is certain if they aim at securing big results, they have as many more, in re-serve. Metz is not far distint from The contest is said to be in one **RACE HORSES IN FRANCE** ARE GIVEN WAR NAMES pernaps, twice as many more, in re-serve. Metz is not far distint from Verdun, and it is said that part of the Metz garrison has been withdrawn and thrown into the combat. Names of Favorite Generals

war, it is fighting men. It is a war of extermination. From hints thrown out in Paris, the French have provided beforehand for action in case Verdun should fall and their defences are multifarious, so that if the German's persist in their orfensive and endeavor to assault Ver-dun, they will pay the penalty in ini-mense loss of lives, and if Verdun does fall, it wil be at a prohibited cost. Paris Very Confident A Paris view of the situation on Friday midnight, was that Germany's offensive at Verdun has so far result-ed in failure. The net result of the

By Henri Ferrer.

PARIS, Feb. 26 .- A racing friend gave a look over the French stud-

book where the names of all race. horses are listed, and he asked me to note how many names were inspired by the war. There were literally scores which owed their baptism cognomen to the world war.

The names of famous generals, Juf free, French, are common; battles in which the allies came out on top had favor, such as La Marne; Tipperary also is in th field; while names of the French cannon, '75, cent-cinq, Rimailho, are very popular. French love of irony is seen in such names as Chiffon-de-Papier (scrap of paper), Finis Teu-tonice and Le Censure.

Air of Depression and Desolation

Exists, According to Letters Found on Captives.

A present victims of grippe. That dread disease is epidemic, and yet a simple remedy is at hand, and is a sure pre-ventive. At the first appearance of a old—the forerunner of grippe—a Smo-Ko Cligarette will open the passages of the head and news multiple target and the charget of the Charget the Charget the charget of the Charget the char

slected. Everywhere I found an air of depression and desolation. "Here, since A have been back with my company, the atmosphere is no better. The morale of the troops is not brilliant. The lack of food and equipment is becoming more and more noticeable. Everybody ardently wish-es for peace, but, unhapply, one can-not as yet perceive the least hope of it on the horizon." It is interesting to remark that this reservist was decorated with the Iron Cross in July of last year. It may, therefore, be taken that he is a good soldier, "brave, conscientious and of more than average morale." Old and Gray at 27 Young and happy at 33 Let me send you full information that will enable you to restore your own hair to you that been gray, or how many things have falled. Just write me today giv-ing your name and address plainly, stating wother stamp for return postage, and I will send you full pasticulars that will enable you to restore the natural color of youth to your hair, making it soft, natural and easily managed. Write today. Address Mrs. Mary K. Chapman, Office 143 D. Exchange Street, Providence, R.I.

Formidable Attack

After four days of heavy fighting, French war experts were able to fur-nish additional details of the formid-able character of the German thrust of the French and German positions At the beginning of the struggle, the French outer lines on the northern and eastern slopes of the plateau were directly commanded by a ring of Gerat Verdun. The enemy had brought man guns on the hills outside of them As a result of the French withdrawal

their gunners on the hills nearer the fortress have an easy task to blast the **RESTORE YOUR HAIR** German infantry the moment they debouch on open ground. If the Ger-mans push on further, they will pro-TO YOUTHFUL COLOR

Let Me Send You My Free Proof That Gray Hair Can Be Restored to Natural Color and Beauty.

No Dyes or Other Harmful Method. Results in Four Days.

At 27 I was prematurely gray—and a failure, because I looked old. Today, at 35, I have no trace of gray hair and I look younger than I did eight years ago. I re-slored my own gray hair to its natural color and beauty of youth, and am a living ex-ample that gray hairs need no longer exist. No dangerous dyes, stains or other forms of hair paint are necessary to keep your hair young.

Old and Gray at 27 Young and happy at 35

the Germans have been constantly de-tected in greatly exaggerating the numbers of their captives for the saks of political effect. The French have also taken a number of prisoners. By the absence of mention of cap-tured guns on the part of the Germans, and they would mention it if they suc-ceeded in taking any, it is plain that whatever withdrawals the French have had to make, they have made in good order. It is therefore to be deduced that they have fallen back so as to many were becoming more and more visionary, and very likely we should soon be told that they never had ex-isted at all.

isted at all. Germany was making her first ef-forts towards Asiatic domination, but much remained to be done before her dreams were realized. The same dream filled the mind of Napoleon, but as with him, it would fade away in that they have fallen back so as to preserve the lives of their men as much as possible, instead of throwing them away to hold exposed positions, it is not positions that count in this the mists.

The war might have been brought to a conclusion before this if there had been a really clear idea. More than seven precious months were wasted from the order-in-council to March 11, and the action of the navy was crip-pled. We now saw the clear signs that the economic pressure was telling heavily on the side of the allies, and we could be quite sure that that economic pressure would be successful and hasten the end.

Not a Pimple Anywhere in Sight ENGLISH SOCIALISTS And Any Woman May Become Free From All Blemishes of Face or Skin by Using Stuart's Calcium Wafers.

One of the greatest blessings a woman can have is to be possessed of a fine, fair skin on face, neck and arms. A little attention now and then to the blood con-dition makes this possible. Women are great sufferers from blood disorders, and hence their complexions are marred be-cause of this fact.

bably try to move along the ravine road from Beaumont to Vacherau-ville, so as to outflank hill 354, and at the same time to obtain shelter from the French 75's. The French havo great numbers of reserves ready to go Held Up By Small Force

So far the German advance of 300,-000 men has been held up by oneseventh of the French troops now on the spot, or about 30,000 men. It is believed that from the new positions on the heights the French will be able to check the German advance by in-funtry, as they will be able to check

into action.

German advance from an artillery standpoint has Leen a virtual reversal

it elsewhere by cannon, and that the Germans will admit defeat in a few One French editorial writer says: The French editorial writer says: "Then what a groan of agony will rise from all Germany at the failure of what General Deimling has truly called their last supreme offensive." That cry will be the precursor of a term that will reak the Hebenroller.

storm that will rock the Hohenzoller throne.

These words may be over-sanguine but they typify the indomitable spirit of the French. of the French.

Find Main Body of Turks In the Caucasus, the Russians have been engaged in pursuing the defeated Turkish force which evacuated Erze-rum. It is believed in Petrograd, irom

rum. It is believed in Petrograd, from latest advices that Kiamil Pasha, former Turkish grand vizier, got his main body of troops from Erzerum, and started them on the march westward during the earlier period of the

ward during the earlier period of the Russian assault on the Deve-Boyun heights. The advance of the Russians was held up by rear guards which have been disposed of, and the Rus-sians have now come up to close grips with the main body of the Turks. As a result of the defeat of the Turks in the Caucasus, Constantinople has become greatly worked up and a

inveighed against the way in which the inveighed against the way in which the great corporations with large issues of watered stock may evade the bur-ien of taxation. The force of this criticism will entirely depend upon the phraseology of the bill to be intro-ouced by the minister of finance, our Thomas White, says that pro-vision will be made to prevent any advantage being gained by over-capitalization. How far this can be ac-commished remains to be seen. Oppocomplished remains to be seen. Oppo-sition members contend that the government is ouying its way into endess and expensive integation. They say it will require an army of lawyers, bookwhet is the paid up capital of any corporation. They quote from the buaget speech to prove that only a fortnight ago but Thomas himself declared that was impracticable to go behind capitalization

Hon. George P. Graham made a good speech Thursday night, furnishing tacts and f.gares to show that "industry and integrity" were to be taxed and "wealth and water" escape. Mr. racaud, the Liberal memoer for Me-gantic, delivered an excellent speech n excelient English, which caught the attention of the house and has caused many to inquire whether he may not be the coming man from the Province of Quebec. Mr. Boivin, of whom we hard a good deal a year or two ago, has taded into the background. On behalf of the government de-cidedly the most interesting speech of

the debate was delivered by Col. John A. Currie, of North Simcoe. The colonel repeated some serious charges respect. ing German control of the Internation al Nicken Company. He joined with Sir George Foster in commending Aus-tralia for nationalizing her copper and zinc deposits, but he went further than Sir George when he advocated that Canada might profit by her example. We have enough nickel in Ontario, he said, to pay our share of the cost of the great war and have dividends left when the war is over. The colonel thinks that we ought to be doing a great deal more than we are doing just now in conserving our raw material and stimulating our manufacturing inter-ests. He thinks everything Canada pays for should be made in Canada. After the war he says Australia, New Zealand and South Africa will get great slices of rich territory but Canada will set nothing except the conscientious-ness of duty well performed unless she makes the war pay by doubling he manufactures. From the standpoint of news value

perhaps Col. Currie's speech derived its chief interest from what he had to say about his experiences at the front. He feels that he has been placed in an equivocal position and that the minis-ter of militia should take up the matter with the/imperial government. Nat-urally, what the colonel had to say on this subject occasioned considerable gossip, and we have not yet heard the end of it. In this connection it is rumored that the government trenches may yet be enfiladed by an attack on the Ross rifle.

Col. Currie's indictment of the nick-el situation had to be stepped down to some extent because he is a supporter of the government. Mr. Turriff, the Liberal member for Assinibola, had no curb bit in his mouth. He reiterated Col. Currie's charges that the Inter-national Company was under German control, but he was inclined to blame the Borden government rather than the German government for permitting our nickel matte to be exported to the The farmers, he said

were not allowed to export horses and a good many other commodities to the United States for fear they might find their way to Germany, but there was

THE TORONTO SUNDAY WORLD

FEBRUARY 27 1916

TH

ugitation always acute as a focal problem in Ottawa, is beginning to invade the precincts of parliament. The Quebec members of both parties address meeting at La Monument Nationals, and then they find themselves called upon to repeat what they have said on the platform from their places in the house. During the budget debate the references to the language question were noticeable. They came not only from Mr. Boulay, the fiery Nationalist Laurier

of Rimouski, but also from the more inoderate Mr. Pacaud of Megantic. Of course only one side is presented. Quebec members in French and Eng-Ish complain of injustice, but no one from Ontario rises to say that the in-justice does not exist. It is so far as parliament goes an undefended case. True, parliament has no jurisdic. True, parliament has no jurisdic-tion: no federal question is involved; education is exclusively a provincial affair. Yet the school question has before now forced its way into the arena of federal politics, and with mewhat disastrous results.

Sir Lorner Gouin is thought to have placed himself definitely out of the Funning for heir apparent to Sir Wil-frid Laurier by the bill which he recently put thru the legislature of Que-bec. That bill authorizes municipalthat Mr. Rowell will come to the next parliament as Sir Wilfrid's lieutenant and heir apparent. It is even said that a seat may be found for him in the near future, and that he will pace a trial heat at the next session. Much, of course, will depend upon the way in which Mr. Rowell handles the bi-lingual situation. Can he satis-ty the conscience of Ontario and keep on terms with Quebec? parliament as Sir Wilfrid's lieutenan ities to subscribe 5 per cent, of their receipts to the support of the bilingual agitation. If some of the county councils of the Eastern Townships at-tempt to vote the money there will be trouble, ending no one knows where. Perhaps we may yet be taking up col-lections in Ontario for the "wounded" in Quebec on terms with Quebec? That Sir Lomer intends to go to the

cople again in a short time is evident. that he will be returned again to powe:

OT TAWA, Feb. 26.—The bi-lingual himself impossible as a candidate for premier of Canada. So far the bi-lingual situation has been to some extent bi-partisan. The Liberals of Manitoba will have to be dencunced as well as the Conserva-tives of Ontario. Still, it is claimed that the agitation is designed to help the provincial Opposition in Ontario, and keep Quebec solid for Sir Wilfrid

But how about Mr. Rowell? If Sir Lomer Gouin is not to be coadjutor with the right of succession

Altho Monday was private members' day, the order paper was called thru without getting up any business that to Sir Wilfrid, then a Moses must be found in the Province of Ontario. Mcre than once the search has been made, but without avail. ever had. An apeal was made approximately \$1,250,000 was se-

rea. "Bince then the work has progressed is leaps and bounds. The big thing indemark of the work is hut build-g. These huts go up as fast as the oney comes in and are placed whernoney comes in and are placed wher-ever there are soldiers or sailors. They have big social rooms where planos, phonographs, billiards, chess and checker boards and writing tables make the place home-like and cozy. At one end of the hut is a dry canteen where wholesome and hot food can be secured, and soft drinks, candy, ake, etc., which are the rarest kind of luxuries to the men. "Money has been coming into the as-

ation's national treasury at the rate which is given free to the men to write still to make.

home. "These huts are made of wood, which article has soared to a fancy price, and so these structures, which are not able and cheery, average nearly \$5000 aplece in cost. They are placed right in the training camps in England, and at the base camps a few miles from the front in France. In London there is one at every railroad station, beck-oning the men to places of safety and fair-dealing in competition with men and women sharpers, who try to get bld of the lads in khaki as soon as they alight from the trains on furlough. At Victoria Station there is not only one hut in a small park across from the station, but the railroad company has out one inside of the station there is not only one hut in a small park across from the much for looks, but mighty comforttation, but the railroad company has put one inside of the station, right over the trains in the big train-shed. When you first look at it you think it is hang-ing in mid-air until you see the gird-ers supporting it. New Inventions the traine in the big train-shed. When fore long to go overseas. "How To Conduct Battles," was the topic. Denotical Instruction Practical Instruction

Huts Fill a Need

"These huts fill a need that is as ential as any function of the army. They form in most cases the only so cial centres at all for the men, and in other instances are the only places that are not dives or brothels. The usual program of sociability and get-acquaintedness is carried on in them, and sane, cheerful, helpful meetings of a religious nature are big items in the program. Concert parties and lectures ing. There were two special reasons are also popular.

"I have visited many huts like the ones at Bordon, where the South African troops are quartered, and at Park Royal, where a lot of Army Service Corps men are located, and it would the gratitude of the men for such places. As I mentioned earlier in this account, it is rain, rain over here, and you flounder around the mentioned the such as the intervals were utilized to keep the enemy guessing. The period could be and you flounder around those camps up to your ankles, and sometimes near up to your ankles, and sometimes near- ment of the troops to new positions, ly to your knees in mud. In addition so that the energy artillery would to that, the men live in draughty lean-shell vacated positions.

tos, which are damp and gloomy. Most of them, not being professional soldiers, have not been used to roughing it, and if the Y.M.C.A. (meaning must come again), huts were not there it would be unbearable for the

"At big mobilization camps like Aldershot and Salisbury Plain there are a half a dozen huts scattered over the area. There are huts also at the munition centres. I spent a very enjoyable evening at the Y.M. hut for munition workers at Enfield Lock. Mrs. Winston Churchill, wife of the former first lord of the admiralty, is head of the lady workers there. She is not only a very charming and clever woman, but a very hard worker as well.

On Firing Line

.

"There are very nearly four hundred of these huts in the British Isles, and over one hundred and thirty in France. I cannot give the exact number, for the number is on the increase almost faily, and any figure I would give you Why is it that so many Canadians "There are very nearly four hundred of the enemy's fire, but it also com-pelled the enemy to entirely change his formation to a corresponding ex-tent. This always took a considerable time with large bodies of men. Why is it that so many Canadians "Says Peter to Johnny House."

Grace Cunard Challenges Mary Pickford in Popularity Contest

W^{HILE} the standing this week in The Sunday World's Motion Picture Popul- ity Contest underwent only a few changes, it is apparent ...at Mary Pickford has a strong contender for the leadership in Grace Cunard, for whom 40 votes were recorded since last week in comparison with Miss Pickford's total for the since last week in comparison with Miss Pickford's total for the week of 18.

While Miss Pickford has still a good lead, Miss Cunard's followers are rallying in her favor and the contest from now on should prove really exciting.

Space this week prohibits the publication of the many letters company an inquiry as to his health received from film fans who have recorded their names on the ballot. G lfether replied as follows: "Take a They are to be published next week, together with the answers to a whole lot of questions which readers of The Sunday World are asking about the candidates and the contest.

The Standing Mary Pickford 123 Grace Cunard 89 F. X. Bushman 39 Wallace Reid 49

Above are the leading contestants.

Following come Marguerite Clark 26, Pearl White 24, Mary Fuller 23, Anita Stewart 23, Blanche Sweet 15, Lillian Walker 13, Mary Miles Minter 13, Olga Petrova 11, Jane Novack 9, Cleo Madi-son 7, Warren Kerrigan 5, Ella Hall 4, Herbert Holmes 3, Theda Bara 2, Pauline Frederick 1, Helen Holmes 2, Lottie Pickford 2, Billie Rhodes 2, Anna Little 2, Clara Kimball Young 1.

Conditions

One person may vote once.

Names and addresses are subject to confirmation by city or telephone directory.

The competition is open to readers of The Toronto Sunday World, thruout Canada.

It will continue until in the estimation of the Managing Editor of The Toronto Sunday World the number of votes recorded is representative of the opinion of the motion-picture patrons of the Dominion.

The prize will be the publication on the first page of the Illustrated Section of The Toronto Sunday World of a full page photogravure portrait of the winning star, who will thereby be designated the most Popular Artist on the Screen.

I carry a woman up a flight of stalrs, and am the chief factor in as lively a fight as you ever saw." Despite his sixty-four years the major is as lively as a cricket and always on ments for a successful feature photoplay? This is the question that has bother ed producers for a long time, because

MADISON THEATRE

The Madison's bill for the first half of the week will be Valeska Suratt in "The Immigrant." This picture has al-ready created a sensation of its own in Toronto and is sure to be appreciated by the Madison's patrons. Accompany-ing it will be the Charlie Chaplin comedy, "A Night At the Show," which is guaranteed to make a dead man

laugh. The latter half of the week will bring Dustin Farnum, in "The Call of the Cumberlands," a story of outdoor adventure, which has action in every foot of the film.

U-KUM THEATRE

Manager Stonge of the U-Kum, Dovercourt and College, is building up a remarkable neighborhood patronage, due to the excellence of both the films and music provided in his attractive house. For this week, he will present on Monday and Tuesday, Edna Mayo and Bryant Washburn in "The Blind-ness of Virtue," the wonderful six-act version of the celebrated play of the same name. In addition to a story of engrossing interest, this film has an educative value which motion picture pstrons will not be slow to appreciate. The Wednesday-Thursday bill will be Francis X. Bushman and Beverly Bayne, the noted Metro stars in "Graustark," dramatized for the screen from the best-seller of the same name. This is one of the finest stories of romantic adventure at a foreign court which has ever been produced, and is sure to be watched with interest. The Friday-Saturday offering will be a Vitagraph picture, "The Man He Used to Be," featuring Naomi Child-ers and Willam Dunn, in a thrilling screen drama. Miscellaneous comedy features are also to be added as an extra attraction

ber of applicants. who are ever ready

ininds of as many directors as possible,

BY BEVERLY BAYNE. not the overwhelming egotism which is In the first issue I suggested some so often fatal, and this carried her undamentals and primary principles thru the weeks of failure. for those young girls who have their for those young girls who have their hearts set upon entering the motion picture profession. Perhaps it would who were not known around the picture profession. Perhaps it would be wise briefly to outline them here egain, and in a manner lend emphasis to a few hard, cold facts. A young girl must first of all, possess talent. Then she cannot afford to miss any opportunity to uppear in theatricals, either privately or publicly. I also much as possible, in order to master the art of pantomime, the chief re-quisite in the silent drama. It is as important to do this as it is for a girl to practice long, tedious hours at the to practice long, tedious hours at the covered. It is one of the most difficult things

New York and Toronto, contends that the technique of expression and tons in the world to get the ear of a di-fector when he is casting for a pro-duction. He has a million and one things on his mind, and the large numit is the skillful blending of theme, coloring.

setting, star, and direction into one harmonious whole, that attracts the mind, the eye and the imagination. The Blue Bird people contend that a photoplay, that attracts because of the Then, again, she should be a con-sistent "movie fan." Never neglect a chance to ge to the motion picture heatres to study your favorite stars, as well as the work of all the others who appear. But it is not only on the screen that a girl can study for the pictures. It is well to be a student of to give a glorified account of them-selves, is very annoying to him. But in the storehouse of his memory he alphotoplay, that attracts because of the star alone is but half a play, in that its appeal is not universal, many people probably not caring for that in-dividual work. Then, again, the finest star, is valueless without an appropri-ate story and settings, and it is the producer's task to gather all these factors and so combine them that everybody is attracted by some side of the filmed story, when seen on the screen. human nature at all times. Watch the facial expression and gestures of

In the storehouse of his memory he al-ways has a picture of the many actors and actresses who work in pictures. It is a big asset for any director to be able to muster up a company of play-ers at short notice. This her monot do, unless he knows who he wants, and where he can get them without delay. So this little girl determined to break into the private books and the minds of as many directors as possible. those around you. Even now, I never ride on a street car, or on any other public conveyance, that I do not love to study types and the mannerisms of the various persons

I see around me. As a child I was forever imitating someone, and the spirit is just as strong as ever. Anscreen. The foregoing is aptly illustrated in the releases of this latest recruit to the ranks of the big feature companies. The first Blue Bird release, "Jeanne Dore," starring Sarah Bernhardt, is a mound of cluver dimetion councils a minds of as many directors as possible, and in a small way prove what she could do. He first engagement was "just a girl" in a ballroom scene, where more than two hundred persons were used. Along with this great crowd of supernumeraries she received five dollars a day for her services. But it was a beginning, and altho in a very small and obscure way, it was something. She was allowed the free-dom of the studio, if nothing else, for she was now at least a small and not very essential cog when the mahinery began to turn. other point which I touched on in my last article is that it is important to have some new photographs made, to be delivered or sent around to the casting directors of the various studios. If possible, it is best to pre-sent oneself in person, but a good photograph and a description of your-self is often a great help in obtaining marvel of clever direction, superb act-ing and appropriate setting to a plot rich in dramatic qualities. Every qualification of the successful photo-play is there, and so skillfully handled, that the film attracts by its own merit, rather than by any individual self is often a great help in obtaining an entrance into the profession.

component. Helen Ware, who stars in the second release of the Blue Bird Company is a famous Broadway star, but that has not prevented the producer from put-ting her into the story. tempered girl who is most apt to win out in the end. Those who are easily discouraged had better save their time and humor by not making the atting her into the story, where the marvelous attention to detail in settempt. obviously doing so, presently she oined then in the small talk in which they were indulging. It goes without saying, of course, that she only did so on invitation. Her refreshing and charming manner made a distinct impression, and before she left the studio that night the director had engaged

that night the director had engaged her for the part of a maid in a scene scheduled for the next day. She was complimented for her work, and the director told her that he would probably use her again, from time to time. She thought she had surely ar-rived. But she put this thought out of her mind, when for three weeks she patiently waited to be called. Then it was that she had an awakening. If one director picked her out of a crowd, why not cultivate a number of directors in the same man-ner? She set about to do this very thing. For the next five or six weeks she appeared in nearly every big "mob" scene made in the many studios around the city.

around the city.

The result was that she met and impressed, if only in a small way, a dozen or more directors. From that time on her services were in constant demand for small parts. It was not long before she was given better roles, and today she is playing leading in-genue roles at a very handsome salary.

In order to make the play as realistic as possible, A. Berthelet, the director, accompanied by Mr. Walthall, Miss Mayo and other prominent characters. made a trip to the Adirondachs to take several scenes. The scene where the heroine is kidnapped was staged there in the exact setting as in the play.

experiences its first genuine happi-The homes of several of Chicago's wealthiest citizens were employed in For the remainder of the week the taking the house party scenes and other scenes which take place in the popular Yonge street house announces "Tennessee's Pardner," with the internomes and on the estates of the national comedienne Fanny Ward in The play has a stirring theme, with the stellar role. The production tells a story of the far west in the days

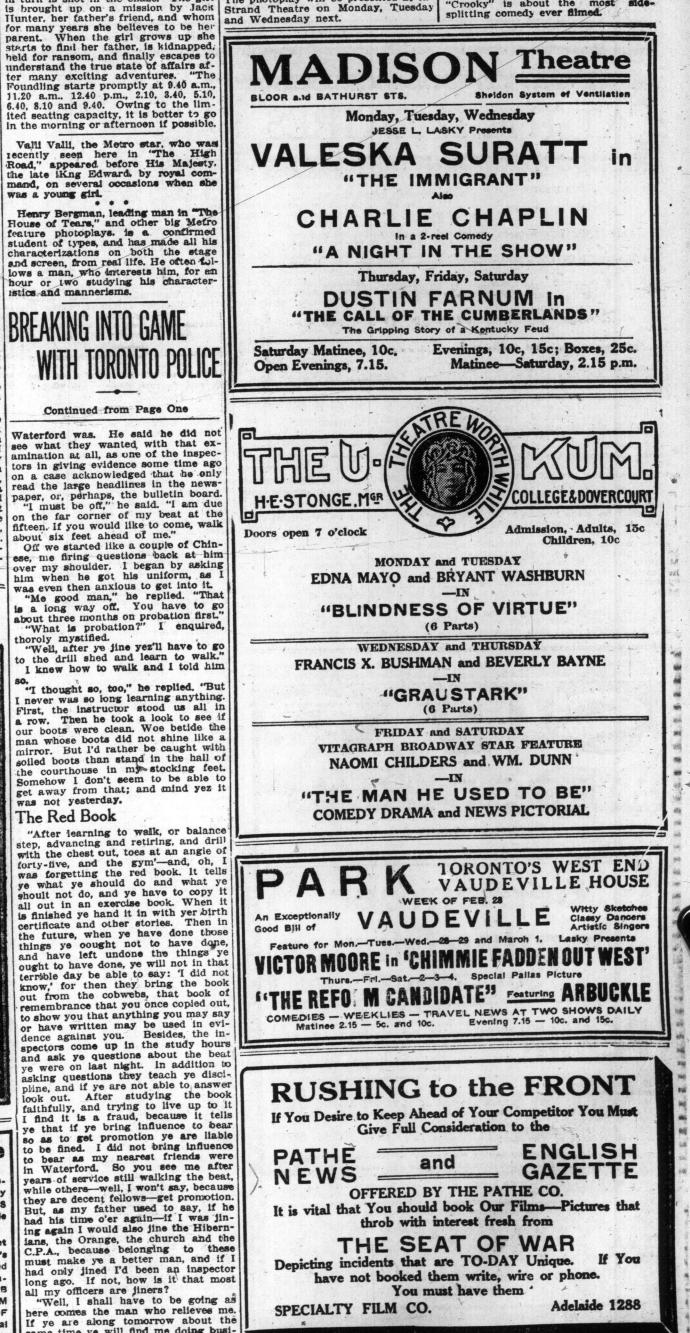

a cave man in evening clothes, a wo-man primitive as the first mother, and a story of the far west in the days when the forty-niners founded a new empire on the Pacific coast, and is based in part on the play of the samo name by Scott Marble. Miss Ward appears as "Tennessee," a walf of the plains. The story opens when "Ten-nessee" and her parents make the trip over the desert in a prairie schooner. The mother deserts her husband, who in turn is shot in the chase. The girl the crashing, merciless battle of the sexes in the wooing of the pair "Scratch the veneer of civilization and you bare the naked savage soul of man." Such is the theme of "The Misleading Lady," a strong story of primi-tive passions, and of cave-man instincts introduced into modern society. The photoplay will be presented at the n turn is shot in the chase. The girl Strand Theatre on Monday, Tuesday and Wednesday next.

In preparation for "The Misleading | Frank Daniels, the inimitable come-Lady," in which she appears with dian, who has made thousands laugh, Henry Walthall late ator is with by the comedy he has sent over the tootlights, is now making millions laugh by his appearance in motion ing visit to New York for gowns and pictures. Mr. Daniels makes his first appearance on the screen in "Crooky," a five-real picture, and if he does not give an upward twist to the down-

ward wrinkles at the corners of your mouth, there is something seriously the matter with you.

In this big slient comedy, Mr. Daniels gives abundant proof that he knows as well how to entertain without his voice as he does with it. As a matter of fact, his droll expressions and humorous antics are more eloquent than any words of humor he ever uttered on the speaking stage. In the title role as convict 999, alias "Crooky,' Mr. Daniels makes a sentrom prison. The rough treatment he as a vehicle for his escape would, under ordinary circumstances, be a "ery serious matter, but as performed by Mr. Daniels, it is excruciatingly

funny. After his escape, Mr. Daniels gots into all sorts of grotesque difficulties that in their sequence keep the specta-tors in a state of continuous hilarity. Frank Daniels' great stage success always lay in his action. It takes an extraordinary comedian to keep an audience in convulsions for even a few minutes without speaking a word. And yet Frank Daniels can do it for an hour and a half, as you will say when you see "Crooky," which will be pre-sented at the Strand Theatre on Thursday, Friday, and Saturday next, it is sofe to say that the general ver-Frank Daniels' great stage su It is safe to say that the general ver-dict of the Strand patrons will be that "Crooky" is about the most side-splitting comedy ever filmed.

For every lady we can use, and that is several in each hut, we could get ten if we could use them Their services, like most of the men in the work, is given free, and they bear all of their expenses as well. had never been to America. Eut was a great admirer of Alexander Hamil-ton, one of the builders of the United states, whose life she had studied carefully. Her assistants at the hut, who did even the most irksome and menial work when it came their turn, included lords' and earls' wives and daughters, the sister of one of the coalition cabinet members, and ladies of that walk of life who had never been used to the 'common touch,' if I may call it that, but who were willing and anxious to do anything and everything they could for the Knights of the Knapsack, rifle and gas helmet. Latchstring Out "The most of the huts close at 10 p.m. on account of 'taps,' the big city never sleeps, so the huts in Londonseven of them—at the railroad sta-tions never close, but leaves the latchstring out twenty-four hours a day. in fact, the rush hours at Waterloo were from 10 p.m. to 2 a.m. We had beds for seventy-eight men, and blankets for two hundred more to roll up on the floor. Every night all of these were taken, all seats taken by men who sat up all night, and scores turned away. Dr. F. B. Meyer, who is as well known in America from / his annual visits and by his writings as he'is in Fingland, was a regular visitor to the hut. His tabernacle was only five minutes walk away, and he kindly conducted short, snappy meetings in the hut several times a week. He saw the great need of added sleeping accommodation at the hut, and wrote a letter to 'The Times for \$2000 to build an addition to the structure. It was only a short letter, taking up as much space as a newspaperman would call a 'stic's,' but inside of two days \$3250 was sent by people reading the appeal to Lord Haddo. chairman of the fund. As I write this letter they are working night and day on the addition. **Right From Trenches** "Men came into the hut everyday straight from the trenches, the mud and sometimes the blood—of Flanders and Northern France on their boots, and Northern France on their they looked like 'moving-day,' and they were carrying the whole house. It was their 'whole house.' for the duration of the war, if they are lucky enough to durate that long themselves. Some of them would engage beds, and an hour or two after they had been in them come out with a sheepish sort of look and ask for permission to sleep on the floor, saying they had become so used to the hard ground at the front that they couldn't sleep in a bed, it was tool comfortable! That wasn't an ex-ceptional case, it used to happen over and over again. NEW IDEAS IN DRESS THAT THE WAR MAY BRING

W HAT fashions will be made by the present war? That is an in-teresting question. Every pre-vious war in the world's history has left the army, and to the present day no the army, and to the present day no without buttons on sleeves. And wo-men often wear them, too. The frock-coat is a descendant of the waferrock a long carment falling the stirrups. The stirrups. The stirrups. The stirrups. The present war had not been raging many weeks until distinctly military notes began to show themselves in women's hats and gowns. Which of women's hats and gowns. Which of these are merely passing fancies and which will become permanent fashions vious war in the world's history has left the wafenrok, a long garment falling the wafenrok, a long garment falling its impress on the clothes which men and women wear, and in some cases this has lasted to the present day. Altho it is not generally known, the custom of wearing buttons on sleeves originated ir the French army.

custom of wearing buttons on sleeves criginated in the French army. Early in the eighteenth century a French general became greatly an-noyed at the way his soldiers spoiled the sword-belt. The Norfolk coat was copied from the chain-mail hauberk which the knights of old fastened round the waist

the appearance of their uniforms by wiping their mouths on their sleeves. To break them of this slovenly habit he ordered rows of buttons sewed on. The custom quickly spread outside arbiters of fashion will not try to adapt

By W. H. CARD

THE Buff Plymouth Rock has a strong heritage of longevity, stamina and high productive power from a mingling of the blo ds of the Rhode Island Red, the Buff Co-chin, the White Plymouth Rock and the Light Brahma. Some authorities believe the Buff Plymouth Rock an off-shoot of the old-fashioned tan-colored barnyard fowl that was prevalent thru-out New England and New York in the seventies and eighties. The writer

purposes and in time they were lost track of in mongrel flocks. Not until along toward 1890 did the Buff Plymouth Rock appear with suff-ctent proof of ancestry. Two separate strains were originated at about the same time. One, containing Buff Co-chin and Light Brahma blood, top-crossed by some clean-legged fout much smaller than the Asiatics, was originated by F. S. Wilson, of Worcesoriginated by F. S. Wilson, of Worcester, New York. The other strain, or-iginated by the late Dr. N. B. Aldrich and R. G. Buffington, of Fall River, Massachusetts, was composed of Rhode Island Red and White Plymouth Rock bloods.

Some breeders claim that they are infi the direct descendants of Rhode Island is Reds, bred and developed by selection from the best buff-colored birds of that breed; but Buff Plymouth Rocks were recognized by the American Pourtry Association quite some time before the Rhode Island Reds were admitted. There are strong indications that Mediterranean blood was used at the outset, as white lobes were quite fre-quent in flocks of the early days of the

A Boy Breeder's Strain

They were first listed as a breed in the Standard of 1894, tho they were then far from Standard color or type, especially the New England strain. Black tails and black in the wings was the rule, with sometimes 'ack stripes in the hackle; surface color was of mixed shades, from lemon to deep tan, with occasionally a specimen of brick-red color. The last-named sort carried the evenest shade and the best built under color; but breeding operations soon proved that under color in bird of red plumage was a far differand fix that elusive goicen-out proposition from under color in a and fix that elusive goicen-buff-colored plumage, and this changed the trend of opinion as regards the Egg Production High

Buff color was not new to the poul-try fraternity: Buff Cochins had been

Standard demands an even shade in every section, including the tail, and reckons different shades on the one bird as a serious defect.

the seventies and eighties. The writer can remember specimens of this fowl in 1879 that were of clear, even buit, with single combs and clean, yellow legs, tho in size they were much small-er than the Plymouth Rocks. No atten-tion was paid to breeding for show purposes and in time they were lost track of in mongrel flocks. cess.

Rock blood. Birds of these strains are more of a phlegmatic disposition and inclined to better flesh production; their combs are more perfect and low er set than those of the more active, nervous strains, whose beefy, imperfect

combs again mark the Mediterranean infusion. The baffling color problem for much that is lack.

ing in breed type in this variety, as shape has been sacrificed in many breeding operations in order to fasten and fix that elusive golden-buff shade

In the utility field they rank with the try fraternity: Buff Cochins had been bred for many years and had appear-ed in the first Standard, issued in 1874, skin, with a quick natural growth, with a clear and concise description of make them especially adapted for the developed what buff color should be. How to tone broiler trade. Their fine, plump, hand- of berries.

A Novelty That Has Become a Staple By FRANK E. BEATTY

D URING the past few years many new varieties of years many new varieties of fruit have been originated, and many of the old varieties have been improved thru bud selection. Among the straw-lorries there have been innumerable new originations, among them the everbearers.

When these varieties were first in troduced few growers had any faith in them, because they thought they were nothing but novelties. Those who have had experience with them, however, have learned that these everbearing berries are more than lovelty-they are a pronounced suc

Strawberry growing is my specialty, have had twenty-five years' experi-nce in the work, during which time I have been a close student of this pro-fitable branch of horticalture. In all my experience I never have worked with varieties that have won greater

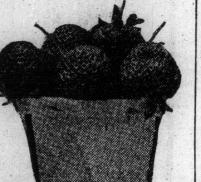

admiration than the everbearers. "Everbearing" is hardly an appro-priate name for these varieties be-cause they fruit only five -to six months in the year. But they should not be called fall-bearers, because they fruit in the early summer as well as in the fall. But what's in a name? What concerns the grower most is "Will they fruit continually from early summer until late fall?" To this question I unhesitatingly answer:

Yes." I am willing to stake my reputation as an authority on strawberries that within the next few years the ever-bearers will be as popular and as universally grown as the most popu-lar and most profitable of the standard varieties. When the everbearers are properly grown there is absolutely no question of their success. On account of their prolonged heavy fruiting habit it is essentiat to have fruiting habit it is essential to have the soil where the plants are set made tich and mellow. If any grower has ever failed to get satisfactory returns from these varieties, that failure has

come thru neglect to furnish the re-quired amount of fertility. It requires a certain amount of building material to develop straw-berries, just as it requires a certain amount of material to construct a machine or building. The more build-ing material the grower puts into his ing material the grower puts into his soil the more strawberries he will get, whether he grows standard varieties

or overbearers. The materials that build straw-berries are nitrogen, phosphorus and

potassium. The most essential of these, as far as the everbearers are concerned, is nitrogen. But it must be understood that nitrogen builds only the vegetative parts of the plant; ments a large plant growth would be developed without a satisfactor

A Box of Handsome Everbearers. carrier. Twenty to twenty-five tons

carrier. Twenty to twenty-five tons of stable manure, two hundred pounds of subhate of potash, and four hun-dred pounds of bone meal may profit-ably to used on each acre. The fertilizing materials should be applied after plowing whenever pos-sible, and should be thoroly incor-ported with the soil before the plants

porated with the soil before the plan's are set. This work is best done with such an implement as the disk or spring-tooth harrow, but any imple-ment that will mix these materials thoroly with the soil will answer the

Such heavy fertilizing as I recommend hers will, of course, incur con-siderable expense. But it makes possible the growing of as many as 14. 000 hills on a single acre, and each hill will have an ample supply of ma-terial from which to build and perfect its full share toward the berry crop. By following this method I make each acre do the work of two. And I wish to emphasize the fact that the most

to emphasize the fact that the most profitable and, in my judgment, the best way to grow the everbearing va-ricties is by the hill system. The pleasure and profits of any business comes thru success, and suc-cess in growing strawberries comes thru following intensive, rather than extensive, methods. No fruit will give higger or quicker returns than straw-berries, and this is especially true of the everbearing varieties. Everbearthe everbearing varieties. Everbear-ing plants that I set during April and May begin to fruit in August. In Sep-tember the hills are loaded with the finest of berries.

The everbearing varieties - mature their principal crop of berries during the late summer and fall—just when strawberries are in great demand and prices rule high. I have in my possession sales reports from more than a dozen cities showing that Superb fall berries sold at thirty to fiorty-five

tensive methods has proved so profit-able that I have prepared the soil 'or this year's planting more intensively than ever before. The more fertility I give these plants the more they give

Hardy All Way Thru

I am frank to say that Superb is my favorite market variety among the verbearers. I favor it because the berries are large, perfectly formed, beautifully colored, deliciously flavor-ed, good keepers and exceptionally good shippers. Berries of this variety are grown in clusters and they circle round the plant under the ioliage, which insures even ripening of the

The fruiting babits of Onward, Forward and Advance so closely resemble those of Superb that I am confident they wil soon become as popular and as profitable for market purposes as uperb.

For home use Progressive is my choice When plants of this variety are grown in hills in rich soil they develop to enormous size, and no variety can beat them either in quantity or

quality of fruit. The berries, while not so large as those of the other everbearing varieties I have mention-ed, fully equal and I believe surpass them in quality.

Americus is a heavy fruiter, but my principal objections to this variety are that the berries grow close to the are that the berries grow close to the ground and their fruiting stems ex-tend above the foliage, giving them no protection against frost and other elements. The berries, however, are of splendid quality, and in some sec-ticus especially the State, of New York and the New England States, Americus is a strong favorite. I can-pot say anything in favor of Produc-

not say anything in favor of Produc-tive, except that it is a heavy fruiter in the spring. In a very few localities it has some admirers, but I should not recommend it either to the commercia

while I am very enthusiastic over the everbearers, I would not advise anyone to set them exclusively. The etandard varieties still hold the important place which they justly deserve and I am confident that it will be mistake for any grower to ignore the standard varieties, which always have been and I believe always will be pro-

I hope this article will remove any doubt regarding the value of the eve-bearing varieties which may exist in the minds of any growers. I know there are many who have never tested these varieties who question their fall fruiting, because many letters came to me asking if it is true that these vari-eties wi" fruit from summer to lato fall. This question is answered with

When pruning has been neglected for several seasons and the tops of the bushes are tall and scraggly, they THE most common and most ne-glected of the ornamental shrubs is the lilac. It is primarily a do-mestic plant that adapts itself well in should be cut back in early spring to within three or four feet of the mestic plant that adapts itself well in filling up bare corners of the yard, screening unsightly objects and mass-ing about the boundaries of the pro-perty. Beautiful both in foliage and in flowers, its very commonness em-phasizes its desirability. Being ex-tramely hardy and year composition ground. Altho this will sacrifice he flowers of that season, dense, hand. some bushes will be formed and they should flower freely the next year.

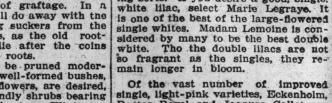

By C. P. HALLIGAN

After blooming, all flower clusters should be cut off and a moderate pruntremely hardy and very cosmopolitan, it may be found thriving in all kinds ing may be given. Straggling shoots of exposures and on all types of wellthat spoil the symmetry of the bush drained soil. The lilac is among the first of the may be cut back and the branches thinned out where they seem to be deciduous shrubs to begin growth in the spring. Therefore, if it is to be crowded.' During the remainder of the

growing season it may be necessary to prune away suckers that spring from the bases of the plants. transplanted, the earlier the work is done the stronger will be the resulting growth of the season. As the new improved varieties are usually grafted

With all the desirable, improved, large-flowering varieties of lilacs now upon common lilac or privet stock, deep planting is desirable, that the plants may send out roots of their own upon the market you cannot afford to plant the old-fashioned, small-flowering sorts. If you desire a good, single, above the points of graftage. In a few seasons this will do away with the bother of removing suckers from the bases of the plants, as the old rootstocks gradually die after the coins produce their own roots.

The lilac should be pruned moder-ately every year if well-formed bushes, well covered with flowers, are desired, rather than tall spindly shrubs bearing a few flowers at the top. Winter or early spring pruning, however, should be moderate, as the lilac flowers on ers. Weak branches may be cut back and crowded shoots may be thinned out, but the general cutting back or heading in of the plants should be de-ferred until after the blooming season

single, light-pink varieties, Eckenholm, Doctor Regel and Jacques Callot are worthy of choice, while Ludwig Spaeth, Toussaint Louverture and Doctor Lindley are dark-flowered singles that

By GEORGE W. KERR

T IS almost impossible to have small | ing quite an area in the course of a ferns look at all well for any length of time when they are kept in a living-room. Changes of temperature, gas fumes, drafts, and so on, very soon tell on the young fronds, and the plants begin to look shabby. Well-established plants in large pots are easily kept in good condition with care, but they are usually of such size

When the roots are in a circum scribed area the plant does not make such long growths, but branches free-ly, the growths hanging over the pot in graceful trails. It may be grown in quite a small pot or flat for several as to preclude their use, say, for table decoration. The plant to which I years, but I recommend repotting each

Some Early Errors

The most serious mistake of the early breeders was to mate dark or reddish buff males to lemon-colored females, believing that such matings would pro duce the desired shade between the Instead, it produced nothing but birds of mixed shades, from splashy light cream to deep chestnut. Rich, even buff under color was the prime isite, to which surface color was subordinated; then shade breeding was followed. In shade breeding the breast of the male is matched to the body color of the female to produce

The

Buff Plymouth Rock Rooster.

the right color. But the method em ployed and the fowls used brought failure, because birds in no way related were used with matching colors the requirement.

The admirers of the breed were in despair until line breeding, with its certain results, was practised with care and due patience. Then in course of time the golden-buff color became the rule and purity of color became recog-nized as akin to purity of blood, which is accomplished only by line breeding.

Give Plants Plenty of Food The females have the admirable

In all my experience in strawberr work I have found nothing so valuable as stable manure for furnishing the nitrogen content. Sulphate of potash will furnish the potassium more economically than any other material; and bone meal is the ideal phosphorus round fowls for the general farmer

Feeds That Grow Squabs.

Pigeons' feed should be thoroly dry and wholesome without any trace of moldi-ness. It should be of different varieties and of the proper proportions. For instance, in summer time, 20 per cent. whole Indian corn, 30 per cent. kafir, 20 per cent. Goadia peas or hard, winkled green peas. In winter a good ration for the pigeons is composed of 40 per cent. Indian corn, 20 per cent. kafir, 15.per cent. wheat and 25 per cent. peas. These grains should never be fed on the ground, but on dry boards or in dry feed troughs or boxes; for even tho the feed may be dry when it is put on the ground to the pigeans, any that is not consumed at once may become damp and moder in a very short time.

poultry breeders. The number of eggs produced is not all that should be consumed at once may become damp and ldy in a very short time. sidered, for an egg to be of value

TO RENOVATE THE LAWN.

To renovate lawns that have become worn out, the whole surface should first be scratched over with a sharp steel rake. After stirring the surface without unduly injuring the grass roots, lawn grass should be sown on the surface, one pint for every three hundred square feet. Now rake over so as to cover seed. The seed should then be rolled or beaten down.

Lobella, snapdragon, forget-me-not, salvia and verbena may be sown in the greenhouse late this month for early

shape, color, comb, earlobes, shanks, or any other characteristic, for they are not the same with different breeds. but the size and shape of all eggs should be the same. Therefore, this is one of the most important points to e considered in breeding.

An ideal egg should be an oblong oval slightly tapering from one end to the other and should weigh two and one-sixth ounces, or twenty-six ounces to the dozen. Egg markets require them to weigh at least twenty-four ounces to the dozen. Eggs of this size and shape are the correct size to fill

the standard egg case filler, and if incubated will give better results than where various sizes and shapes are incubated together. The old idea that round eggs hatch pullets and the long eggs hatch cockerals is incorrect, for a hen lays uniformily shaped eggs regularly, which hatch approximately an equal number of cockerels and pul-

lets. Nothing can be told from the size and shape of an egg whether it is fer-

\$506.64 tile or infertile; or whether it would hatch a cockerel or a pullet, but the shape of an egg is a characteristic which is transmitted to the offspring. Therefore, use as breeders only the hens which produce eggs of correct mize and shape.

CONCERNING OUR THE CARE AND FEEDING ✤ OF CHILDREN By ELINOR MURRAY You must realize, of course that no hard and fast rales, which will suit every baby, can be given. Each baby Feeding the Infant is a study in himsolf, and the formula must be adjusted to suit each specia TRE is only one ideal food for the infant, and that is the healthy mother's milk. Every child according to the way food is di-gested and assimilated. I will give you should be made to secure that for every child. Unfortunately some general directions about dilut-ing whole or plain milk. The formula are many instances where thru se, death, or other unavoidable as the child is deprived of its al nourishment. The question for every is simple and suits most babies. For the first month take eight ounces of thoroly mixed milk from a quart bottle, nine ounces cf water boiled and cooled, 1 tablespoonful of of course is simply one of proper of or starvation. In response to this mand of necessity hundreds of dif-ent preparations have been manu-tured and placed on the market as milk sugar and one ounce of lime water. . . . For Six Feedings. So extensively have these prepara-IVIDE this into six bottles of three ounces each and feed baby sults. tions been advertised and so largely have they been commended by physi-cians and others that mothers are oftat 6 a.m., 9 a.m., 12 noon, 3 p.n., nm. and 9 nm. in tempted to deny the infant its own The baby may not take three ounces nourishment and to substitute at a feeding at first, probably only one and a half, but by the end of the and so freely offered. point of fact the so-called infant should be regarded as materials first month he should be draining his bottle. During the second month he will take about four punces and the which are to be used only in cases of necessity. If regarded from that point formula for twenty-four hours will be eleven ounces of whole milk, tweave of riew and precautions taken ac-ingly, the infant foods is a matter water, one tablespoonful of milk, of view sugar and one ounce of lime water. of proper consideration. It will be impossible in a short article to enter During the third month he will take from four to four and a half ounces into any general discussion of the vari-ous forms of infant foods which are manufactured and offered to the pubeach meal; fourin month, five ounces: fifth month, five and one-hall ounces; sixth month six ounces; seventh month, six and one-hall I may say, without any desire to ounces, eighth month, seven ounces I may say, without any dosine only one discriminate, that there is only one proper substitute for mother's milk, and that is the milk of the cow or the goat modified in a scientific manner to goat modified in a scientific manner to ninth, month, seven and one-half ounces; tenth, eleventh, and twelfth nonths, eight ounces at each meal. After the fifth and sixth months the calories per day. ble as nearly as possible the amount of water is steadily decreased, nik of the normal mother. Let me explain in a few words what and the pure milk increased until at the twelfth month the baby can take

modification of milk means. Analysis shows the normal composition of mother's milk: It contains a high perplain, undiluted milk. starts out on a three-hour interval, I have found this time much more satismother's milk: It contains a nigh per-centage of milk sugar, a very low per-centage of protein, commonly known se casein, and milk albumin, and a moderate proportion of fat. Normal cow's milk contains much less sugar actory than the old two-hour interval with ten meals in 24 hours. mother's milk and quite a great

CHILDREN BY ELINOR MURRAY. Diet for School Children BSERVATIONS on thousands of school children show the retarding effect of poor feeding. Both

the kind and the amount of food must APT be considered if the child is to abe nourished properly, and increase in weight as he should. The body is a ceaselessly working machine, engaged in the constant, work of respiration, irculation, digestion and more or less continuous muscular activity. In additicn to supplying fuel for this machine. certain other substances are required for body-building. Every thoughtful mother knows this:

but, her difficulty is in knowing just what food she must give her children in order to produce the desired re-The fuel requirements of the body and the fuel values of food to satisfy

these requirements are measured in terms of a standard unit—the caloric. The requirements of children vary with their age and weight as shown by the following figures: Children of one and two years require about 40 calories for each pound in weight and a total of from 900 to 1200 calories per day. Children from two to five require about 35 calories per pound and a total of from 1200 to 1500 per day. a total of from 1200 to 1300 per day. Children from six to nine require about 30 calories per pound and a total of from 1400 to 2000 per day. Children from ten to twelve require 25 calories per pound and a total of from 1800 to 2200 per day.

That is: if your boy is nine years old and weighs 65 pounds he requires 1950

* * * What Kind of Food

AVING determined the energy re-quirements of the particular people whom you have to feed it is necessary to find out what foods will supply this energy. Since several hundred (calories are required each day, it is most conven-ient to think of food in 100-calorie portions.

portions.

The Journal of Home Economics supplies this table: The following amounts of food each

odi, or other fat. 1 tablespoon; bread, 1 slice 3 inches by 3 inches by 1 inch; soda cwackers, 4 crackers; fresh fruit; 1 large orange or apple; 1 medium ba-rana or bunch of grapes; 2 large pea-ches or pears; dried fruit, 4 or 5 prunes or dates, 2 dozen raisins, 1 large fig; eggs, 1 exceptionally large; 1¼ med-ium; meat (beef, lamb, mutton, veal, chicken), about 2 ounces of cooked lean meat; 'bacon (cooked crisp), about 1 ounce (4 small thin slices); potatoes, 1 medfum; sugar. 1 tablespoon granu-lard chesse, ½ cup; rice pudding, ½ try; ice cream (made with milk), ½ cup; rream of bean soup, ¼ cup; macaroni and chesse, ½ cup; milk sherbet, 1-3 cup; sponge cake, 1 large individual caker nuts, (shelled almonds, peanuts, pe-cans), about ½ ounce; sweet choco-a. about ¾ ounce.

Dear Aurelia: We received your colsteamer. For only a little expense one can get

up a series of pleasant surprises sim-liar to one planned for a trip to Menu for a Day F OLLOWING this table, a day's menu for the nine-year-old prev-iously mentioned might run like California last winter. The good na-tured porter was entrusted with the

several neat looking packages tied up in blue barred paper and wide blue ribbon. Each morning while the small niece was at breakfast the package was laid in her seat and the same exthis: Breakfast: Three-quarters of a cup of oatmeal with 3-5 of a cup of milk or it; (200 calories), 1 jeilled egg (100 calories) a dish of stewed prunes (100 calories) 2 slices of bread and butter (200 calories). Total, 600 calories. perience repeated at luncheon. All of the passengers became equally interested in the opening of the pastime surprise planned by a devoted aunt. Dinner: A cup of cream soup (200), 2 ounces of meat (100), 2 potatoes (200), one-half cup of rice pudding There was an ordinary tablet and pencil, a cloth scrapbook with a tube of glue and a supply of pictures to paste with one-quarter cup thin cream (200); bread (100), butter and fat of meat (50). Total, 850 calories. in, a book of comic pictures and the crayons with which to color them.

Then there were sweets mixed in among the practical gifts, such as a quaint black and white box containing little cakes, then a tiny crate full of

miniature candy oranges, chocolate hars. dates. etc. For the single gift one can think up any number of things sure to be a source of entertainment to a child. B are needed, the most important elements being nitrogen, phos-phorus, iron and calcium. Nitrogen is worth while. An assortment of colored beads and a few coarse threaded needles amused a small girl all the way to Florida last winter. A fancy sewing bag, a spool of crochet silk and

a crochet hook did equally good ser-vice on another long trip. Dear C. A. Macphie: I wish to join the S. F. C., for I am going to keep smiling. My father brings home The Now that knitting is so much in rogue and children are being in-Sunday World every Saturday night, and I always look to find the Smiling structed in the old art any little girl would welcome a "wonder ball," which is a large ball of colored yarn. ADVICE TO GIRLS CURRENT COMMENT Miss Annie Laurie Answers Letters From Sunday World Readers on Problems of Everyday Life, Helps Girls in Their Love Affairs and Straightens Out Love Tangles.

Toronto.

AFFODIL, I think if you know about the family of the young man and he wants to call upon you, there is no reason why he should not do so. The fact that you were introduced over the telephone need not be taken so seriously, probably, as the is a friend of the young woman did the introducing and she is your friend as well. However, if I were in your place, I would ask my mother and father to be present when he first calls.

Annie Laurie.

O NE WHO HAS BEEN A TRUE

FRIEND: It is a pity that all this has come about, but I would not let it make me miserable. To be-gin with, the little lady is quite right

in eaving that she ought to meet other men before promising to be your wife -you don't want to feel that she is fond of you because you are the only man who had paid her any attentions, Fir. sure. However, when you have sifted your own personal jealousy all out of the matter, if you honestly feel that she is going with a set of young people who will be a detriment, why den't you bring up the subject some time when her mother is present and have a good, plain talk about it? If she's the girl you think her, she'll meetthis honest interest on your part with a straightforward kindliness on hers, and together you can dispel the un-happiness which the girl friend has, herhaps quite unconsciously, brought into your peaceful friendship. Annie Laurie.

DEAR ANNIE LAUREE: We are two girls 18 years of age

and are great chums and haven't anyone else to go with. We al-Ways go out together, but, seeing other girls of our own age going out with some boy friends, we feel we would like to have boy friends too. It seems we cannot make friends with any girls as they

consider us too quiet. Now, Dear Annie Laurie, would you kindly tell us how we could make friends with other girls as vell as boys?

Lonesome Doves. ONESOME DOVES: Don't you be

discouraged in the least-there are still a lot of people left in the world who like "quiet girls" and you'll find them, I'm sure, tho, I confees there are times when it seems as if the old-fashioned home and the old-fashioned home products were not nuch in demand. It's just one of those instances, probably, where we notice the disagreeable and forget all about the pleasant because it is so close all around us and so "every-day" that we have ceased to notice it. Start in to "ay trying to find the way to the haver of these who are never to hearts of those who are nearest you, and thru them you'll swell the circle till the Lonesome Doves will be lone-

some no longer.

taken out. I have been over to his place quite a few times, and he sel-dom speaks. If I ask him over to my place, he always says he is too shy. If I am talking to his younger bio-ther, he hardly speaks. It seems he don't want me, and yet does not want me to go out with any other person. I am broken-hearted when he refuses to come over to see me. How do you think I could manage it, as he is the only fellow I ever took any interest in? Yours truly.

-I THINK what he says is true--I THINK what he says is true-that he is bashful. He seems to like you, even to prefer you to other girls so undoubtedly in time he will get over his shyness. You are too young to be in love with a boy. Do not take yourself too seriously. You have years before you in which romance and love can come to you. Keep sweet and mod-est and womanly. Do not try to force anyone to be interested in you. Then you will not lack the companionship you wish. Annie Laurie.

Toronto, Canada. DEAR ANNIE LAURIE: Please tell me if you think it is wrong to kiss a boy good-.ye when he is leaving for the front? I have a friend who is leaving shortly, and he has asked me to kiss him good-bye, and I don't know what to do. I like this boy very much, and wouldn't like to offend him. I don't think it is right to kiss any boy unless you are engaged to thim. Anxious. NXIOUS : No; a girl shouldn't kiss

A a boy unless she is engaged to him. One might feel inclined to make an exception in such a case as you make an exception in such a case as you name. You say you do not want to of-fend him. I like to not want to of-ter. It shows that you are a kind, thoughtful little girl. Be a sweet, wom-anly, modest girl, always, and you will have the wisdom to settle these perplex-ing questions as they come up. When we desire to do right, we make few mis-takes. Annie Learrie.

DEAR ANNIE LAURIE: I am a young man of 27, and am going with a young lady, who has been asking me to take her to the show two or three times a week. She wants me to buy a ring for her, for about a hundred dollars. tell mo if I may truet this girl?

"A Reader."

READER: I would find some gir A for my comrade who was less in-terested in what I could afford to buy her, than one who liked me be-cause of the good in my heart, not for the coin in my purse, as this girl seems

10 do.

Annie Laurie

Toronto

DEAR ANNIE LAURTE: DEAR ANNIE LAURIE: We are three girl chums who meet lots of nice boys but never seem to be able to keep them. We do not act stiff, nor are we foolish or sentimental, but the boys all sem to get tired of us after the second or third time they have been out with us. We always try to act natural, and treat them as

Even those who generally speaking tention in the homes would show th have a fair idea of things in the inegislators in what direction the minds of people are bent. A late despatch from Winnipeg states that the Political Educational lustrial and labor life of the country, have erroneous impressions regarding League, of which a woman is presi-dent, have passed a resolution calling for the abolition of bilingual schools, the same to be forwarded to the govthe remuneration which comes to the professional nurse working in Ontario. Many a time it has been said that the

ON WOMEN'S WORK

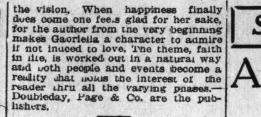

BY M. L. HART

nurse earns her money casily, that ernment. The meeting also declared itself in favor of compulsory education. many who work harder receive far less financial returns than does she, It is a lamentable pity that the ques and to this is sometimes added the tion of bilingual schools ever went into politics for of all the things in which statement that the nurse is arbitrary as to her privileges and careful to do is to her privileges and careful to do nothing more than comes properly within her province. This attitude of the public, or the part of it where such prevailed, is changed very much of lato, and with the example of the heroism displayed by the war-nurse before the eyes of the world, is under-going a perfect upheaval in public opinion. Still there are some even amongst those most favorable to the profession who imagine that the nurse Canadians are deficient there is noth ing which stands out so conspicuously as does our lack of language. Perhaps not more than two per cent. know any-thing of any tongue but their own, and in the majority of instances the vocabulary in this is very limited. We pose as great lovers of grand opera and pay high prices to hear high-priced eingers who, as a rule, are heard by amongst those most favorable to the profession who imagine that the nurse who does not retire at the end of a few years with plethoric purse and substantial bank-account must have been amongst the thriftless ones of the sisterhood. Information given us thru the medium of the report of the Onears that hear not because the understands not, and yet there hose on every side of us trying to cu those on every side of us trying to cut off the opportunities which would benefit so materially if we would but embrace them. This paucity of lan-guage is something which seems to be-long to us exclusively. It is not com-mon to the countries of Europe, nor to those who countries of Europe, nor to the medium of the report of the Ontario Commission on Unemployment throws some light in the subject which seems to point to the fact that hose who come to our shores the nursing profession is by no means the lucrative work generally supposed.

those who come to our shores and whom we look upon somewhat con-temptuously as "foreigners." Many of those have two or three languages to their credit and are, the younger ones at least, more than anxious and ambitious to accuire a speedy knowambitious to acquire a speedy know-leage of English. Just now especially it would seem that a joint knowledge of both English and French is a very of both English and French is a very valuable asset, one which our nurses and soldiers are trying to acquire, in many cases often thru much labor and Jespondency of spirit, whereas, if they rad taken up the work as part of their everyday life in the school, the pos-session would have been theirs with-out much trouble out much trouble.

the lucrative work generally supposed. The report states that there are pro-bably between two and three thousand nurses in Ontario, tho a correct esti-mate is hard to reach. If nurses on the staffs of hospitals are included, the number should be increased. Then we are told there has been a marked 'alling off in the demand for nurses since the beginning of the present business depression. People at the time when the report was written--October, 1915-were said to be doing without nursing care wherever pos-sible. Figures seem to show that there is an over supply of aurses, this in spite of the fact that five bundred Canadian nurses are said to have gone to Great Britain and France. The public nas naturally taken for granted that the war has largely re-leved any condition of unenployment among the nurses, but this belief seems to be mistaken. Information furnished by the central registry in Toronto shows that a nurse is em-pleyed on an average not more than eight monthsh in the year. A nurse in private nursing is not physically able to be employed constantly thru-out the year. But altho the graduate nurse while engaged receives \$21 a week, her income for the yeat aver-ages about \$600. At the private regis-is given as \$400. Concluding this por-tion of the more than buse out much trouble. On the matter of compulsory educa-tion there are few on the face of things that would do anything but endorse it, but conditions in Ontario show that legislation without means of enforcing it is far from being effectual. In our larger centres, by strict supervision of teachers, the law is pretty well ob-served, but in outside districts there is no way of enforcing school attend-ance. This was brought up at a meet-ing of the National Council of Women when it met in Montreal some two years ago, when Miss Machar of Kingston asked for night-schools in rural parts of Ontario to supplement the very irregular attendance of guplls under fourteen years of age. Boys and sirls after this period often recognize their deficiencies and would voluntar-ily attend night school if it were with-un their reach. Even with our compul-sory law not more than fifty per cent of the population ever get beyond the third book. It would almost seem then chat what is wanted is not alone legis-lation for compulsory attendance at achool, but also legislation to enforce

ages about \$600. At the private regis-tration the average income for a nurse is given as \$400. Concluding this por-tion of the report the comment is made that considering the fact that the nurse has to give two or three years for training, and that her working years are limited, this is a smaller income than might reasonably be exlation for compulsory attendance at school, but also legislation to enforce the carrying out of the first measure.

WAYS OF WOMAN.

With the modern woman as the subject, Ida M. Tarbell, in seven essays, contends that with all the changes and feverish upheavals of the present time, the few things that are worth while flow on uninterruptedly in their old channels. She argues that as eighty-seven women out of every hundred marry, there should be special training to fit them for the business of matrimony, just as there is to fit women for salesmanship, stenography, or any other dopartment of business. Despite the fact, then, that thousands of women the world over are crowding into every sphere

for women, marriage, claims them to-day as it has from the beginning. If Mirs Tarbell's calculation is correct, only thirteen women out of every hundred remain permanently in business Her argument that women are su-preme in meeting emergencies is well born out by recent events in connec-tion with the war. She says: "A woman turns from binding up the broken head of a dare-devil boy to cheering a hushand whose effects are broken head of a dare-devil boy to the broken head boy to the broken head broken head boy to the are cheering a husband whose affairs are going to smash. She turns from en-tertaining her daughter's friends to meeting the crisis of her son's first drink or cigar or questionable comand panion She does it regularly, steadly, nsturally, and under the nocessity the develops until she is ready for

the develops until she is ready for anything. If the house burns, five times out of ten she saves the haby and the family records; while nine times out of ten the husband saves the coal path and the looking glass. The mass of women can be depended upon when the crisis arises, whether it is to should a save it is to shoulder a gun or run a street. car. They are trained to it, trained by life, and whatever experiments tuey make they will never find a sub-stitute for their ancient school." Miss Tarbell, with all her knowledge of the world, still places matrimony before world, still places matrimony before ousiness as an occcupation for women

CONTINGENT DITTIES.

Frank S. Brown, author of this little volume of poems, is a son of the Rev. S. G. Brown of Almonte. Mr. Brown went to England at the beginning o went to England at the beginning of the war as a sergeant in the Princess Pat's Light Infantry. An attack of influenza kept him in England until just a year ago this month, when ne joined his regiment in France. His first day in the trenches proved to be his last, as he gave up his life at st. Elol, where so many brave Canadians were killed. Mr. Brown's poems ap-oeared from time to time in Canadian peared from time to time in Canadian and English papers, and the editor of T. P's Weekly who gladly published a number of these ditties speaks of him in the following eulogistic language "Foir. slight, but sturdy: keen-eyed, self confident but unassuming; such is my impression of the young soldier who came into my room on that gray January morning. He was the type of the British soldier: healthy, cheerful, untroubled by mental subtity or over-weening ambition, but willing to peared from time to time in Canadia

Secrets of Health and Happi less A Regular Life the Cure For Mild Heart "Flutter" By DR. LEONARD KEENE HIRSHBERG A.B., M.A., M.D. (Johns Hopkins University). W HAT did the classical writers mean by "flutter-

ing" hearts? The blushing maid or matron was very well understood to be excited and all agor. but if she was as full of health and vitality as the descriptions of some authors would have us believe, her heart was not all "wobbly." Hearts need not be bowed down, dangerously sick nor excited to the extent that they actually flutter.

The heart is like a house with a small attic, in which are the large veins-the pulmonary and the vena cava. The two bedrooms in the upper storey are called auricles, and the "first floor front" is the right ventricle and the "first floor back" the left ventricle. The whole

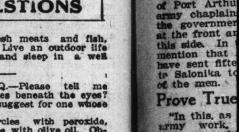

DR. HIRSHBERG house, including the partitions between the four chambers, is made of thick music, with portieres of thin tissue between the first and second storeys.

made, many are astonished to told that some heart distempers hark back to childhood's unhappy hours when joint fever. scarlatina, diphwhen joint fever, scarlatina, diph-theria, tonsilities and similar abomi-nations sat unpleasantly upon the youligster's brow

While these causes explain all sorts of heart ailments, heart "flut-ter" limited to one auricle or bed preciate that discretion and tem-perance in living will prolong our chamber, or to the "front porch"the ventricle of the heart-is days. It is wise to be beforehand with a always so easily accounted for. When semi-annual hospital examination the "flutter" loccurs at such rare intervals that the person who and learn whether or not you have any disturbance of the "first floor front," the "second storey back," the portieres or "valves" of the heart or its tough muscles. Ailments of the "mitral" valve of the heart affect the curtains re-sembling the Pope's mitre, which lie between the auricle and the wentricle; and aortic valve diseases are relatively of the heart muscles, called a "flut-ter," however, are rare. loss of sleep, worry, emotional over-flow and excessive loss from certain glands are controlled; if foods exercise and habits are, readjusted,

Ottawa, London and Toronto this work done in eastern Canada. The Patriotic work distributed thru Hamilton. Ottawa, London and Toronto this work done in eastern Canada. The Patriotic work distributed thru Hamilton. Ottawa, London and Toronto this work, Straighten out that man's men tal attitude, help him, lift the work, and you Army Is Notified The old gentleman who lived on the corner commented on it. "Did ye: ever notice," he said, "that for the last few weeks there's been no men that term may be found equally fitting, for it is not the greatest service any mun can yield his country in times of peace or war, that of saving and de-fending his fellow countrymen? taking these services, only the lasses." The curious one did notico, and later sought out Brigadier

Frank Morris of the S. A. Territorial Staff to make inquiries. The result Lesson in Co-operation

of half an hour's chat was intensely The whole organization of this interesting, as showing the splendid splendid army system is a wonderful esson in the good results that may be obtained by co-operation of all social factors to the one end, regeneration patriotic spirit which has been displayed by the men of the Salvation Army. Year in and out, in times of peace, its members wage a splendid and heroic war against the vicious and powerful forces of evil, but since the European war was started many and the building up of a strong com-nunity. Two weeks ago an eminent sociologist from Chicago, Raymond Roberts, was telling Toronto men and women that they needed more unity of interests and control on the strong stron of interests and centralization of their soldiers of the Cross, withreligious work. Here in the army such methods have been demonstrated. What other religious body aims so thoroly at these ends?

of these soldiers of the Cross, with-out laying down their weapons of spiritual warfare, have manfully taken up arms for their earthly King. Many Go to War

The social side of the army work which embraces industrial and prison work, rescue, and lodging-homes for both men and women, and homes for children, is so full of interest that it "Yes we have lost a great number of our men by the war," said Bri-gadier Morris, " and every week the both men and women, and homes for children, is so full of interest that it would take more than the space allow-children, is so full of interest that it would take more than the space allow-difterent is so full of interest that it would take more than the space allow-ed for this article to tell of all its activities; but one particular phase of the women's social work is well worth side. The bands have been the great-est sufferers by this depletion, as our men are pretty well sought after for their knowledge of band instruments, and tho we feel sorry to lose the.n, we are proud of the success which has come to some of these men. Quite a round dozen of our bands-men have been made conductors of after birth as in some cases, and the mother sent out to service slone, but the presence of thet lither slone, but men have been made conductors of military bands. Two hundred and ry bands. Two hundred and men enlisted in one week east the presence of that little child is used as a magnet of inspiration for higher of Port Arthur, and we have six things to the girl who has fallen on evil days, and she is helped to feel that altho she has the responsibility army chaplains so far appointed by the government, three of whom are at the front and three with troops on of this little life attached this side. In this connection 1 might mention that Australian salvationists yet it may become a great blessing, and that behind her, as a shield and friendly guard, stands the motherly heart of the Army with its wisely chosen councilors of spiritually-mindhave sent fifteen or sixteen chaplains to Salonika to minister to the needs

within the first constraint of the partial sector of the provide hore on Bellevine, every constant to go start in fig eagin and to give them the mothers, and to give them them them the mothers, and to give them them the setter the the mothers, and to give them them the setter the setters. This end the the work should the work should the setter the the setters. This end the mothers the setter the the setters the the setters. This end the the work should the setters the the setters the setters. This end the the work should the setters the the setters the setters. of Killed in Action.

"The listener" shifted the weight of | rights. "Nothing to report." That his pack a bit more on to the other shculder and fumbled with the left. hand in the pocket of his service jacket th. oat last night. No chance of that, for the loose tobacco which lay there. tho. Nothing doing....

but it was something, and in these nights it is the wise man who spits Russia. One fleet of these was named by the Queen Mother herself, as the 'Alexandra Unit' "At the Exhibition Camp we have been able to build and equip a special control of the Children's Home, is been able to build and equip a special control of the Children's Home, is been able to build and equip a special control of the summit, he felt cound with his feet for the projecting piece with his evidentity been part Gudetly. Then, with the stealth born

and had been buried who knows when. Recently heavy shell fire had laid bare this, and other things, to the light of day. And, anyhow, notched with a knife, it made a comfortable foot rest during the hours of vigil, and Williams 9068, Private, 29th Battalion the London Regiment, was glad of it. To say it was cold would be to dally idly with words. It is true that innum-erable stars stabbed the sky. But there was also a very wet wind which blew odd wits of paper from time to time across his face. One such came to rest on the foresignt of his rifle, and in

so slightly. A guttural voice forty yards ahead muttered something unintelligible, and Weidams, at his listening post, prayed fruit. ssy for a knowledge of German. spectre, slightly blacker than the void, loymed up ahead, and Williams raised his rifle slowly. Was it a head and shoulders, or a sandbag-or both? The shapeless mass moved off to the right amid an echo of whispering men. He was now a good mark. Should

No, it wasn't certain enough. Be-sides, three platoons of his own men rules, three platons of his own men lay behind him making up arrears of sleep. How pleased they would be! He lowered his rifle, the magazine resting on his discarded cap, and -11.10.

percolate thru the greatcoat. Presently Williams knew she lied. nothing to report." It was one of those Daily Chronicle.

these men are earnest and eager to swe others.

There was an awful squash now in There was an awful squash now, in the Tube lifts at the "Circus." "Passen-grs off first, please"... and the hiss of escaping air as the steel gates clanged back "Passing Brompton-road."... He would give a tidy little sum to "pass" Brompton road. They say it is horribly dark in London, now. Horribly dark! Williams nearly laugh-ed. Would have, had it been safe. And they talk of closing the night clubs. they talk of closing the night clubs. "So bad for young officers."

He shifted the quid from the left cheek to the right, and his thoughts wandered unfettered in the silence.

Wandered unrettered in the shence. The poultice spread. Was that black shape appearing again—this time nearer? Or did he dr.am? He raised himself higher on the ground and sniffed two or three times. He found this always helped his eyes. Yes. He was moving back along the set of the transport way showly the edge of their trench, very slowly. What for? Probably bringing some-thing back from further down; a mes-sage Likely, or tobacco, for which better men than he have risked their lives fore.

Williams fingered the trigger-guard lovingly. Point-blank range. But the distance is deceptive. And if he misses, But the and the flash of his own rifle gives away the game. Well, he knew that meant if there were two of them. But there weren t. Only one. Right. He would have a cut at it. That chap was simply asking for it. He took long and

careful aim. Crack! from the other side, and a sang ag hit Williams on the shoulder, knocking him backwards into a pool of

water below. There had been two. One decoy, moving a sack filled with feathers, supported on bamboo poles from the salety of the trench. The other lying stared hard into nothingness. The night slipped by. Curious that he felt no desire for sleep. He often wondered why this was. Tension too great, he supposed. Funny, tho. He slipped back the nickel cap and looked at the luminous dial on his wrist (gleaned from a recent 96 hours' leave) safety of the trench. The other lying out, waiting for the tell-tale flash. Wil-liams did not know this. That is why he fell into the puddle. Three men and a sergeant, cursing in whispers, crawled up and collected him. One took the vacant place in the crater, and prepared to receive cold crater, and prepared to receive cold poultices until just before dawn.

They were coming out of the Empire row. Coven.ry-street was a maze of crawling taxis; and that everlasting crowd jostled past the Corner House. Far above he heard the thresh of en-

rar above ne neard the thresh of en-gines. One of ours by the sound. Com-ing back, no doubt, from a "look see" buy," and she returned the sage wink over the lines. He couldn't have seen nuch. But you never know. The moist clay on which he lay was beginning to to write home about." She lied, and there would be a feeling as of a cold built there was no need to tell him he would be eating chicken jelly in Lon-dor comorrow. He knew it. That is

Wasted Lives Ke-made Waste lives remade, did you say? Who can doubt it after a visit to this department? Two men are busily working at packing and baling goods; wtud you guess that each had done over 18 years in prison for violation of the law? One. indeed, 28 years, and for the most fearful of all crimes—murder. He has been a steady and conscien-tious worker for the army for three years now. The other had been a life-hang slave to drink and after 19 years spent in prison, fell under the influence of the army. Today he is a bright, cheerful worker and has kept sane and sober all of the $3\frac{1}{2}$ years that he has been under their care; in fact, both of these men are earnest and eager to

It is one thing to shut men behind prison bars, and an easy matter to say such a man is removed from temptation because it is not possible for him to satisfy his cravings for the unlaw-ful, but, to take such a man, place him back in the world, and teach him to respect and control himself, is a work

year. Here again is system. Two men force each route, one the canvasser, who calls to ask a promise of old goods or vaste, and he is followed after two days by the driver who collects the which can only be done by those who are i spired with Divine ideals. Any ower vision would fail of its end, for gifts. Does it speak well for the pat-riotic spirit infused by the army when the works of reformation and building one hears that, out of all the nen now left, after many enlistments from this which are being carried out in this de-partment are none other than miracles. Those who have read Harold Begbie's department. only two remain who are eligible for the front? "Broken Earthenware" will remember als wonderful stories of reformed crim-Encouraging Cases

Interesting Scenes Are Witne ssed By British Press Repre-

FOSSILIZED DRAGONS DISCOVERED IN CHINA

Find Has Caused Greater Excitement Among Celestials **Canadian Officer With First Contingent Gives Interesting Description** Than Their Recent Series of Political Upheavals Have Been Able to Furnish.

to restore the monarchy has caused such widespread and profound excitement as the discovery of some fossilized dragons in the Yangtso gorges, near Ich'ang

Indeed, the emotions evoked are far deeper than those produced by a mere political change The dragon is the ol of the empire and was obliteraved from the flag, where it had so long appeared as the emblem of power, by the revolutionists. Now it is likely to be restored with renewed

The discovery of the dragons came about in a remarkable manner. An English physician and his wife, resi-dent in Tientsin, where on a visit to the Yangtse region and came upon the Yangtse region and came upon these creatures, with the representa-tion and significance of which their long residence in China had made then familiar. In a cavern which they were exploring they found five or size dragons, each measuring about seventy feet in length, and about as thick as the hereor prover of a men's arm each

BRIGHT COLORS TO BE SCARCE. the largest part of a man's arm, each dragon having two pairs of legs.

It is predicted that the coming sum-mer will see a great scarcity of the deeper shades of blue, brown and bright colors. This is due to the fact The British consul was immediately notified, and he in turn sent word to the Chinese authorities. Yuan Shih-kai ordered a guard placed over the dragons until arrangements could be made for their ultimate disposition. It may require a stronger guard, how-ever, than can be easily spared for the purpose in these times to protect the creatures from the people, whose be-lief in the power of the dragon to heat all fils will impel them to get a scale or some other fragment of the sacred The British consul was immediately

come as a surprise.

Those Who Have Rare Old Instruments Should Cherish Them, As Many Have Been Destroyed in European War.

T IS the fashion of our day for us ford. Stradivarius, made in A.D. 1683, to feel that the Twentieth Century by Antonio Stradavarius, and valued by its present owners, the R. S. Wilstands for progress and improve-ment in man's handiwork. And yet in liams & Sons Co., at \$10,000. We are ment in man's handiwork. And yet go the realm of the violin we must go back to the Seventeenth and Eigh-teenth Centuries to the Stradivarians teenth Centuries to the Stradivarians It would be impossible to find words It would be impossible to find words and Amati of Cremona, Italy, to find the specimens par excellence of the world, such masterpieces of the violin maker's art as the workers today have quisite amber colored varnish and artistic construction of this specimen. but few and vague hopes of ever successfully reproducing. It also goes with the times for us to imagine that the demand for these works of art, and also the values attached to such treasures, are and will be still further on the decrease. But such are not the conditions. On the contrary, the finer specimens of violins are daily becoming more and more valuable by leaps and bounds. Even in the ordinary course of events, this would be the case, as at all times the supply of really good violins falls so far short of the demand. But at this time there is a still more potent rea The great juggernaut of war, which passing over Europe, with ruin in its wake, spares the objects of art no more than human lives. In and around Liege, Louvain and other great art centres, many beautiful children of the violin makers' creation lie silent in an oblivion of ashes and decay. The bows which woke their strings to music, have become offerings on the funeral pyre of lost art. Many of the makers themselves have left their gentle trade to engage in the hardier business of war. Of these, many will lay down their lives far from the scenes of their former labors. Many will return with poor maimed hands that cannot even old the delicate tools of their craft. Just here, to quote a specific case, we might pause to mention the sad death of Eugene Sartory, the French bow maker, in the battle of Mons. In the near future, it is inevitable that Sartory violin and 'cello bows (always objects of value), will be considered by their fortunate owners in the light of priceless possessions. Let the owners of Stradivari, Amati, Piques, and Villaumes violins keep them as the most cherished of possessions. Let the same spirit which causes us to love our country, our people, as we have never done before, rouse us to a fuller appreciation of the extant creations of great artists. Certain it is that the truest monuments to such men as Antonius Stradivarius, Nicola Amati, Josef Guarnerius, their own violins, will increase in value to The famous violin, known as the an extent which we little realize. Earl of Aylesford, made by An-It is interesting to observe that even tonio Stradivari, Cremona, 1683, during this period of monetary stress and valued at \$10,000. some remarkably fine specimens of violin craft have recently changed Made in 1683, at a time when the inhands in our own city. Karl Ondricek, fluence of Amati was very pronounced quondam teacher of Kubelik, perhaps in all its work, yet the characterisbest known to many of us as former tics of Stradivari stands out in the concert master of the Boston Symdelicately and beautifully constructed phony Orchestra, and member of the Knelsel Quartet, has bought a speciholes, arching, scroll, etc. This instrument is in a remarkable men Antonius Stradavarius, valued at \$5000. His instrument, dated A.D. 1720, has a varnish of a nice red state of preservation, and shows the care and reverence that has been bestowed upon it by its late owners. The color. The back is in two pieces of earliest record we have of this violin wood marked by a faint, small curl, dates back to the latter part of the slanting upwards, that of the sides, Eighteenth Century, when it was in which have been raised, is similar, and the possession of the Earl of Aylesthe head plainer. This violin was, ford, who we have every reason to believe, obtained it from Italy, thru the medium of Gardini, the celebrated prior to its coming into Mr. Ondricek's hands, one of the famous collections of R. S. Williams & Sons. violinist, with whom he was acquaint-Within the last sixty days or so, the following violins have been sold from the same collection by Mr⁴ Williams: ed. Lord Aylesford retained posession of this instrument until 1822, when it passed into the hands of George Ware, A Nicolo Amati, dated A.D. 1657,

NOTHING that has happened in China since the movement to replace the empire with a re-publican form of government and later to restore the monarchy has caused toward placing them historically and zoologically. One explanation of the fact that the

One explanation of the fact that they have remained undiscovered thru many, many centuries is that one of the many recent landslides which fre-quently occur in that region may have uncovered them. and their excellent preservation may be due to the fact of this being a limestone region. It is an interesting coincidence that in this locality also there is the famous Temple to the Dragon. To the Chinese there will be nothing Inspector-instructor of National Guard

inspector-instructor of National Guard of New York, recently published in The New York Times, states that very few who have not been on the ground have any real conception of matters pertaining to modern warfare. The smallest implement in the Bri-tish Army that in proportion to its size accomplishes the most good to the soldier is the intrenching tool that hangs at his back, the letter states. In open work it is indispensable in mak-ing cover for the infantryman, and even where there are trenches partially Temple to the Dragon. To the Chinese there will be nothing incredible in the discovery of fossilized dragons. That it should come at this moment will be considered a highly favorable omen for the empire. To the denizen of western lands the claim that there really were dragons on the earth, and that they were not con-ined to the realms of mythology will come as a surprise. even where there are trenches partially

or entirely constructed that same little intrenching tool is a great friend, espe-cially if the bombardment is on or a trench mortar has blown down a sec-tion of a trench. At Ypres I found

before the Germans opened a severe bombardment of high explosive shells as well as shrapnel, but every man had not only dug a hole for himself down and into the trench as protection against shrapnel, but had also found cover for the dead. The shell-burst of German shrapnel is backward and legman shrapnel is backward, and many a brave man has been taken from the allies' trenches seriously wounded, but furious lest the wounded

back might suggest trepidation flight. I know one man who had led a really rough career and feared neither God, man, nor devil, who had six shrapnel wounds from his neck to his heels. Oh, how that fellow cursed his "rotten" luck, but stuck like the rare game old rooster that he was, right to the last, until he finally keeled over from exhaustion. While I am on the subject of intrenching I must add that regiments in the British Army that have done the greatest service to the

A soldier should never forget that his firearms are his best friends. Keep them clean and sufficiently oiled, see to it that the bayonet fits easily, and

kep your ammunition cleaned and Much has been written about pericopes for the rank and file, but for the most practical periscope that I have yet seen is a pocket affair about three inches long and one and one-half inches wide when folded. A metal top

opens on a hinge away from the metalacked mirror, and can be attached to stick, a cane, or bayonet by a small clasp back of the mirror portion, and then placed at the rear of a trench. The question of considering others, altho of little importance to some,

is of the utmost importance to men in active service. A good shot or a zeal. ous marksman is very apt to forget his mates. Why draw the e enemy's fire when it isn't imperative, and' when your own brother chum may be on a working party back of where you are firing? Many times in the spirit of zeal and patriotism a man is led to Liake moves that are detrimental liose around him. Save your ammuniion. You might hit your target, tho a very difficult one, on your second

shot, but your first shot would tell your range and draw fire from several of the enemy, causing unnecesrifles sary casualties among those working in the rear of your line.

Bayonet Charges English violin maker, to a Mr. Hunter, Are No Pastimes

Men enthuse over descriptions of

Men enthuse over descriptions of bayonet charges. They are no idle pas-times, so it behooves all soldiers not only to become absolutely perfect in bayonet exercises, but to practice get-ting under way, keeping abreast with your mates and having a firm hold on your rifle. The soldier may say "Oh another English violinist, who retained it for many years, and at whose by the well known London dealers, your rifle. The soldier may say, "Oh the most factuating of romances, could added that the late owner, having that bayonet exercise isn't practical in a spoonful of constarce nave produc-stories, we might have tales well worth withheld, the R. S. Williams & Sons the telling. Take for instance, the Earl of Ayles- to supply us with this information.

inch sections by means of red strips, Each man receives a portion consist-ing of nine 2 by i inch pieces. By experience the size of these pieces has been determined as suitable to care-fully clean the rifle.

I firmly agree with you that the field service in time of peace is the real work in training men to become soldiers. It is the individual aptitude that is developed and broadened by field work, and this, in conjunction with the close order work in the ar-mories, will develop the man into a soldier.

cers. Every now and then one man would shout across the cafe in tones of astonishment and pleasure at per-ceiving a friend whom, perhaps, he ceiving a friend whom, perhaps, he had not seen since the war began. For The question was a poser, and no this cafe is a famous meeting-place, and during the present war civilians one ventured to reply. Finally the teacher detected a gleam suddenly converted into soldiers have for a long time lost sight of friends

for a long time lost sight of friends whom they used to meet regularly in their favorite cafe. That night there was a great cele-bration in honor of a young officer who had just received the Croix de

From the front line of trenches di-rect to the Bank. "There and "to no "buses running from the Benk to Mandalay," Mr. Kipling assures us in his familiar cong. But there is regular communications between our fighting line in France and Flanders and the Bank. It was at the Bank station of the City and South London Tube that I met some fifty South London tube that I met frage and whe now clattered into the tube train for Kings Cross, St. Pancras, and Euston with the whole paraphermalia of trench the tronches chung to their uniforms, and the whole paraphermalia of trench their books look ike like lumps of dough, But they were as blube and merry a set of soldier boys as one would wish to meet. What did the mad matry a set of soldier boys as one would wish to meet. What did the mad matry a and when the got there it would wish and when the got there th would wish to meet. occasion, playing with temperament and good technical mastery. The pro-gram opened with an authoritive per-formance of the Bach-Tausig Tocatto and Fugue in D minor, followed by the Chopin B flat minor Scherzo, the mid-nerte of which were played with Smith and Winifred Hicks-Lyne, con-siderable, public interest is evinced in the several younger artists whose the several younger artists whose work, already well and favorably known, gives promise of considerable achievement for the future. Bredna Macrae, contraito, will be heard with especial pleasure since her recent ex-Chopin B hat minor Scherzo, the mid-parts of which were played with especial poetry and beauty of tone. In Grieg's seldom played sonata Miss Cockburn especially revealed her tem-peramental talent, and "The Lark," by Pedatings perience in several most successful tours with the Russian Symphony Orchestra, as will also Mona Bates, the Balakireff, was a charming bit of tone painting. The program closed with Macdowell's E minor Polonaise effecbrilliant young planiste, who will give her own recital early in March in the Conservatory of Music concert hall, Madge Murphy, the gifted Irish vio-linist, Flora McDonald, who has studied

tively played. Lorenzo Perosi, the famous monk composer, has just completed a new oratorio, which he has dedicated to the abroad under the direction of the celebrated Polish teacher, Ignatz Fried-mann, and Rita Haynes, whose gracebishop of the Italian army. The oraful dancing and well known musical ability will contribute a very striking torio deals with the present war, and will soon be produced in Rome.

and popular feature to this quite re-markable program. Patrons of the concert are assured of an entertain-. . . Mme. Melba is in New Zealand, were she will give a series of concerts ment of unusual merit. It is hoped that the proceeds realized will be suffifor the Red Cross.

cient to provide a recreation room in F. S. Welsman's pupils gave a recital the new hospital for convalescent solof more than ordinary interest at the diers to be domiciled in the old Knox College, and for which the Speranza Club is working indefatigably. The program will include the Rondo and not devoted entirely to Chopin, was largely given up to his compositions. The Allegro maestoso from the con-certo in E minor was entrusted to Con-Capriccioso, Saint-Saens; Aria, Goldnark; variations on a Cornelli theme, Tartini-Kreisler, for violin; songs from stance Martin, a highly gifted and exthe cycle "Dodecameron," by Virginia stance Martin, a highly gitted and or perienced pianiste who won a pro-nounced success by reason of the ad-mirable taste and finesse displayed in the interpretation. Edith Buckley was also equal to the demands made upon Cline, and others by Salter, Scott, Handel, Bishop and Cowen; solos for Handel, Bisnop and Cowen; solos for plano by Grieg, Weber, Chopin, Saint-Saens, and a group of interpretative dances, including "To Spring," Grieg; Valse, op. 18, Chopin, and Moment her in the opening movement of the sonata in B flat minor. While the interpretation of the movement as a

whole was eminently satisfactory, the James Quarrington announces second theme was perhaps particularconcert recital to be given by his vocal pupils in the Oddfellows' Temple, ly well done in regard to sheer beauty of tone and phrasing. Lily Timmins Thursday, March 2nd. A number of musical novelties will be sung. includ-ing the famous trio, "Ti Pregro Padre," gave a brilliant rendition of the B flat minor Scherzo in which a musical conby Campana, and the "Sexuette" from Lucia. The accompaniments will be Lucia. The accompaniments will be played by a quartet of instruments. was again at the second piano when Boris Hambourg has announced his New York recital, to take place on March 30 at Acelian Hall, when his

reading, fresh, buoyant, and free from ricgram will include a group of his affectation or mannerisms. Dorothy Adams played the Schumann Novelette

Op. 21, No. 1, with effective shading and well defined contrasts of mood in KATHARINE GOODSON the different themes, and Anne Bellamy showed excellent judgment and intellectual poise in her playing of the Brahms Intermezzo, and Saint-Saens' Le Cygne. Marjorie Brush, a pupil of Dr. Broome lent pleasing var-iety to the program by her artistic singing of two well chosen groups of Arthur Bodansky, Alexander Lambert, and Mr. and Mrs. Josef Hofmann.

A pleasant and varied program of The Polish Victims' Relief Fund, orrecitations, songs, piano and violin soganized by Mr. Paderewski, last week reached the sum of \$230,575.00, the los was given last Saturday afternoon amount of \$40,000 having been realized by students of the Canadian Academy of Music. These were Ruth McNeil at his Chicago recital.

Viola Gillette, who has been residing in Toronto for some months during which time she was studying with Signor Morandc of The Canadian Academy of Music, has returned to New York to take part in rehearsals for the Scotch play "Heart O' The Heather," which opens in Boston on the 28th inst. This play will pro-bably be seen in Toronto before the end of the season. Miss Gillette's manager 's delighted with the marked insprovement in her voice. She has been engaged to sing at a special re-ception for D. H. Crane in the Wal-

dorf Astoria on February 27. She writes, "I want to always take up my during vacation."

seasons "out," when his youthful Storm-and-Stress style and his quite fine programs which are being given every Saturday at Foresters' Hall, by every Saturday at Foresters hal, by the pupils of the Hambourg Conser-vatory. On Saturday, the 4th of March. Caroline Danard and Helen Flughes will present their pupils in the elementary grades of vocal and instrumental music. Storm-and-Stress style and mis quite extraordinary technical equipment caused boundless amazement. If he can mill a concert half eight times in a winter in London in war-time-and it seems probable that this second series of concerts will be quite as successful of concerts will be duite as successf

A unique recital wil be given at the Canadian Academy of Music on Wed-netsday, March 1, by Edith M. Turn-bull and Naomi Wedd, pupils of Luigi as the first—he would indeed be ill-advised to come over to this country this winter, as he had intended, and swell the noble army of martyr-pian-swell the noble army of martyr-pianvon Kunits' ronata class. They in co-operation with Mr. von Kunits will play piano and violin sonatas by Bach, Fried Bachman Add. The State of the remaining three Loudon recitals are the 26th of this month, Grieg, Brahms and Max Reger. Ad-ditional interest will be given to the program by the singing of Douglas Stanbury, pupil of Signor Morando. March 11 and April 1.

. . . Jessie McAlpine, one of the most week. This young lady's virile and

poetic style, her splendid technic, sen-sitive imagination and beautifully of more than ordinary interest at the Toronto Conservatory of Music on varied tone found abundant scope in Thursday, Feb. 17. The evening, the a program of great variety and ex-2 Frogram of great variety and ex-celence, embracing the Sonata in C major, op. 53, Beethoven; a Chopin group consisting of the Berceuse, four etudes, Nocturre op. 62, No. 2, and Tarantelle, op. 43;) and in a closing group, a lovely Gavotte-Intermezzo by Louis Victor Saar, which the com-

group, a lovely Gavotle-Intermezzo by Louis Victor Saar, which the com-poser dedicated to Mr. Forsyth; Dance Vegre, Cyril Scott; Song of the Silver Night, by W. O. Forsyth, and the bril-tiant Dance of the Gnomes, and Sixth Hungarian Rhapsody by Liszt. In all these pieces Miss McAlpine displayed chose virtues one has learned to as-sociate with superior playing, and the large audience was not slow to realize sociate with superior playing, and the large audience was not slow to realize that a pianiste of quite distinctive gowers and elastic technic was before them Mrs. Harvey Robb, a charming ringer a pupil of Arthur Blight, sang Mulder's Staccato Polka, The Pipes of

Pan. Monckton ,and Deep in My Heart, Aylward, to the admirably played ac-companiments of her husband, Harvey Robb, Mrs. Robr's voice is flexible and pure, and she sings with refined na-

turalness and ease. Even celebrated musicians, it seems,

are not exempt from "showers," as Leopold Godowsky discovered a few evenings ago when he found his Fifth avenue home in New York inhabited by mysterious, white-garbed persons who moved stealthily about in the semi-darkness. It proved to be noth-ing more serious than a sheet and pillow-case shower. Among the score or more of guests were Walter Damrosch,

Grace Burnill, Alice Grocott, Dorothy McQuillan, Josephine Cornforth, Louis . . . Gesensway, Josephine Barrington, Muriel Dunning, Erminie Hurst, Neva Barnes and Marjorie Ball. . . .

Special efforts are being made to obtain the release of Josef Lehvinne, the Russian pianist, who has been detained in Germany since the outbreak of the war. If Mr. Lehvinne does regain his liberty he will open a studio in New York next summer.

The following reference to Mark Hambourg is clipped from Musical America of last week: With the success of his series of four concerts before Christmas, which attracted numerically exceptional audiences, as an incentive, Mark Hambourg

bis head. Sam, steadying his arm against the house-edge, fired again. This time his shot found a mark, but not that at which he had fired. Patroiman O'Hara, charging along the alley to re-enforce Lamar, was so unfortunate as to catch the ball in the calf of the legs He sprawled headlong. Most decidedly this was not O'Hara's hacky night.

Sam, adming with better judginess, pulled the trigger again. The hamme-fell with a click upon an exploded carr-ridge. The pistol was empty. Throwing it away, he took to his heels.

it cway, he took to his heels. Lamar followed at racing speed, halt-ing only now and then to fire. Up the alley came a second patrol-man and several civilians. They halted at sight of the wounded O'Hara. The latter trised himself on his hands, stam-mered out the gist of the story, pointed in the direction whither Lamar and Eugan had disappeared, then slumped to earth in a dead faint. The hue and cry reached the street at the alley's far end, looked up and down, saw no one in either direction, then ran

the alley's far end, looked up and down, saw no one in either direction, then ran valiantly to westward. Lamar and his quarry had turned east. Lamar, more than once, in the vague moonlight and black shadows, missed sight of the man he followed. Once he completely lost him, and was about to give up the chase, when a glimpse of somethong black, silhouetted against the skyline and moving heavily, like a would bull, set him off in hot chase again.

By this time they had left the villa

By this time they had left the village behind them. Sam, running with no sense of direction, found himself at the shoreward base of the ridge that culmin-ated in the oceanside cliffs. Up the ridge he scrambled, grunting bid heaving with fatigue. It was then that Lamar, two hundred yards behind, caught sight of the broad, squat body against the skyline. Up the ridge toiled Eagan, seeking some cavern or rift of rock wherein to ride until morning. Ever upward he worked his way. Clamoring as nimbly as a cat, Lamar swarmed up the steep slope behind him. Once only he paused. That was when stared dazedly around. Lamar, resting his pistol barrel on a ledge of rock, pulled the trigger. The revolver was empty. He dropped it and continued his swift climb.

Sam, gradually recovering his breath, heard a stone rattle just beneath him. He wheeled about, as Lamar bounded up to the flat summit-rock beside him. No word was spoken. Breath was too scant and too precious for that. The two men sprang at each other Unarmed, forced to rely on r

youth and down to make sure no one was Max Lamar knew enough of thug

in direct line of vision with him. Then, with an adroit swiftness, odd nature to realize that this sort of in-terrogation might go on for an hour in one so heavy, he jerked open the bar of the car door, slid back the no results. Meanwhile precious door itself, a yard or two, clambered inside and shut the big reddish door time was passing. "One of you take him to headquar-

ters," he ordered. "The chief will find a way to make him talk. You two behind him. Late that night his car was coupled others go thru the building, cellar with thirty others and puffed out of the yard. Early next day the freight

to roof. I'm going back for another look around the shop. It'll be worth while, if I can find what I want." train rumbled slowly past a suburban station and on into the sand-swept Find what you want?" snarlingly hicked Tom Dunn. "When did a snarlingly "Find waste beyond. Sam, truly a crack in his "aide-

with a bound and set him to tugging open the sliding door of the car. "Aw, lay down! snapped Dunn, "you're all a bunch of cheap dubs. Boneheads, the lot of you. We-" "Quite right!" assented Max. re-The train was still moving goodly pace-for a freight train. But

Sam Eagan would have taken far greater risks in order to carry out the daring plan that had just oc-curred to him. He took a flying leap into a track straining a dual impulse of the policemen to manhandle the prisoner still further. "Quite right, my successful We are a lot of bonecell-candidate. We are a lot of polic-heads. Most human beings are. But when I see where your cleverness has landed you-and where it's going to land you-why, I'm content to keep side pile of sand. The impact of his leap and his two hundred and forty pounds of muscular weight drove him into the sand up to his knees. But, unhurt, he shook his legs free and made off at a smart stride toon being a bonehead. Boneheads stay on the right side of the bars longer ward the village itself. "This'll be worth a dozen reg-lan than young fellows who are too clever for their own good. Take him along, hide-out places to me," he chuckled. officer. You others search the house. "Just let me find June Travis and A minute later Lamar was back in spring the right sort of hard luck the wrecked cobbler's shop. He had remembered the shoe that had rattled whine and she'll help me out, all right, all right!" idly played with it on his

visit to Sam the previous day. And he set to work looking for it. Meanwhile, at Surfton, June Travis One disreputable piece of footgean had just done what Mary characteriz-ed as "a foolish, dangerous thing, if after another, he picked up from the

heap in the corner of the room. And ever there was one." The girl had sent the following teleat last he found the shoe he sought. by the fact that gram to Lamar-first showing it mis-He recognized it

cne of its laces had three times been broken and that the breaks had been mended by queer "granny knots." He had carelessly noted this when he had swung it to and fro by the end of its notted lace.

With an awl he pried loose the rundown heel. It was hollow. Empty tho he hollow now was, it corresponded in every way with that in the shoe Alman La Salle had been carrying un-"You're never going to send that crazy message?" Mary gasped as June, pausing in their morning walk, at the der her arm when she was arrested. No sign of Eagan, either in this huilding or the next," reported a po-liceman, coming in as Max stood exlocal telegraph office. scribbled aespatch and laughingly showed it to

amining the hollow heel. "Plenty of signs of him here, tho,"

answered Lamar, holding up the shoe, "I've found what I was looking for." to the desk clerk. Mary clasped her hands convulsive. "Were you just looking for a worn-it shoe?" asked the officer, suspectout shoe?" ing a joke. "Why, that, thing ain't worth five cents as junk."

"No?" queried Max. "perhaps not--as junk. But, as a jewel casket, it has held a good many thousand dollars' "No?" leading up to the Travis cottage, on the side of the bluff overlooking the worth of gems; or I miss my guess. the side of the Anythow, it's the link I needed to con- sea, Mary asked: nect Smiling Sam Eagan with the series of jewel thefts that have been bothering you people. This old five-cent bit of junk' will send Sam 'over precious She asked it for the fiftieth time in the road' for a five-year stretch, when

we get our hands on him. I'm going back to headquarters. Come along. There's no use wasting any more time

red-haired girl with blue eyes. It gave her a twinge of conscience to do this. But she steeled herself to the old task. Then, growing restless, she set out for a walk along the sand at the base of the cliffs, beyond the village. The sum was hot, but a sweep of bracing salt wind made the air a joy white against a dazzling blue sea. Along the beach curled a gleaming ribbon of slivery surf. The tide was at the turn. In its wake along the beach the sun, which soon the increeping wavelets would cover. June, full of the glory of the sky. strode along the beach with the tread of a young goddess. Above her the gray-white seagulls circled and whis-the garden gate. Lamar gladly hurried look after them and a mutsred excues to Mrs. Travis, followed elowly and at alistance. As June and Lamar went toward the pier, the girl drew from her belt the notes the asta scrubbled and handed them to lamar. With great professional gravity he read them, suppressing a smile at their amateurish tone, and then put them in his pocket. "The read is the pier," interrupted June "The Italian was leaning against that string-piece, asleep, Mary says, when the gray-white seagulls circled and whis-""Oh, June! June Travis!" broke in a

tled. The sea wind drove merrily against her face, whipping her hair

Midway in her walk June stopped to watch a queer tableau on the shore, a few yards away from her. A young man and a girl were standing facing man and a girl were standing facing each other, angry of eye, sharp of voice, duarreling violently. The man was clad in blue serge, and a camera was slung from his shoulder. The woman was in white. She carried a woman was in white. The the variant were sharply

stroyed the offending hat!" Think of that! It--" "What?" ejaculated Lamar, sharply. "Bed Circle lady? You're sure?" "Positive!" declared the groom. "We both saw it. She had written --" "Come!" ordered Lamar. "Show me the place. Give me your camera. We'll photograph what she wrote. Then we'll have a specimen of her handwriting. any-how." white parasol with which she was making impatient gestures. Her sailor hat was adorned by an enormous bird of paradise plume. At second glance June recognized the couple. They were a Mr. and Mrs.

Lake, newlyweds. The bride was an old school friend of June's. They had apparently come to Surfton for their how." He hastened off, guided by the Lakes. June stood transfixed with sudden panic. A light touch on her arm made her start violently. Mary stood at her s.de. honeymoon, and just at present they were engaged in a decidedly fierce dispute.

at

June Travis.

the

June went forward. The bride recognized her and greeted her eagerly. The groom bowed stiffly. He was still too angry to be more than barely civil.

"Mary!" panted the terror-stricken girl. "Listen! I'm in fearful trouble!" In a half dozen sentences she told her story, ending with the scared whisper: "He's going to photograph it. And-and he has specimens of my handwriting civil. "Oh, June Travis!" exclaimed the bride. "I'm so glad to see you! Har-yocket. Oh, what are we to do?" "To do?" echoed the valorous old "wo-man, breaking into a run. "We're to for active feathers in my hat. He nev-er noticed I had them till five minutes ago-just like a man!—and now he wants me to get rid of them. Did you ever hear of such a thing? And they cost.—" "Can you blame me, Miss Travis?" put in the groom. in Belgium were as nothing to the mis-

fighting with the rest. After a few days

we had military orders to evacuate the

place, and we got back to Kragujevatz,

and from there to Kraljevo, where the

railway ends. There were about four-

teen of us in our party ,and we fought Kraljevo absolutely crammed. We

stayed in a tent five days and then wer

advised to leave, and went on to Rash-

ka. Here I slept on boards. There was

no question of doing anything else. We

had no blankets, and the night was

most uncomfortable. From Rashka we got on to Mitrovitza, a three days'

tramp, our food and stores being car-

ried on bullock wagons. We camped

by the roadship at night. The weather was awful, rain falling in torrents all

the time. From Mitrovitza we went on

in the same way to Prizrend, where we

were told it would be unsafe to go thru

By this time we were getting into a sorry plight, but we decided to turn

back and make for Ipek, which was

five days' journey across very rough and wild country. But we got thru

the mountains to Monastir, as the Al-

banians were causing trouble.

bombardment of Antwerp, but Miss

ness and horror of war as she saw it

"Oh, June! June Travis!" broke in a voice just behind them. "What do you suppose has just happened?" June turned to see Mr. and Mrs. Lake hurrying toward them. Scarce waiting to acknowledge June's introduction of La-mar, the newlyweds burst into an inco-herent joint recital of the lost hat mys-

still befuddied. Eagan levelled the pie-tol at his stomach, the weapon's black muzzle a bare three inches from the polloeman's belt buckle. Patrolman O'Hara, in sudden fright, did as, he was bidden. He bolted down the alleyway as fast as his long legs would carry him. Meantime, as Sam had foreseen, the sound of shots had brought people from their homes on the jump. Several men-a polloeman among them-were running along the next street, calling confused questions as they ran. Eagan set off in the opposite directoin to that taken by Patrolman O'Hara. Clearly there was no time to squander in dreamy idleness. O'Hara, at the alley's mouth, collided with a man who was walking along the street from the beach. The officer, as he recied back from the collision, recognized Max Lamar-the great crime specialist, who had been pointed out to him one day in "Quick!" gurgled O'Hara, pointing up

SUNDAY MORNING FORECAST OF HIGHER PRICE **OF GAS---NEW FUEL NEEDED**

Consumption Is Increasing Rapidly, While Production Is Decreasing - Tremendous Increase in Cis-Atlantic and Foreign Demand Largely Responsible for Skyrocketing of Prices.

S ENSATIONAL as have been the advances in the price of gaso-line during the last six months, it is apparent to all well-informed ob-servers that the top has not been reached and that a continuation of the unlike the same time the fact that the Cush-ing the same time the fact that the Cush-

reached and that a continuation of the uplift may be expected for some time to come. Among the manufacturers of gaso-line there is an apparent difference of opinion as to whether the current prices are high enough. On one point at least all interests are agreed, and that point is that the rapid advance of gasoline has been-brought about by natural market con-ditions and not thru any combination of circumstances created by agree-ment or other manipulations. In analyzing the causes which have

In analyzing the causes which have operated to carry the price of gaso-line skyward, three principal factors are recognized, any one of which would have sufficient to cause a marked up-ward tendency in the market These The heavy percentage of the total production of the country which came from this field and the high gasoline yield of this oil-20 per cent as against o per cent. for California, and 12 to 14 ward tendency in the market. These

three factors are: 1. A sharp decrease in the produc-for the country as a whole-makes it easily understood why the decline in tion of crude petroleum having a high this one field should cause the price

of crude oil to advance. Motor More Popular. The 1914 registration of motor cars

2. The unprecedented increase in the demand for gasoline, brought about by the great number of new motor cars put in commission during the last year. 3. The increased foreign demand, caused by the needs of the nations now on Dec. 31, 1915, an increase of apat war, and the destruction or curtail-ment of the supply of gasoline from 500 gallons a year for each car this

gasoline content.

These three factors are set down in 000 gallons over the previous year's

FRENCH SENTRIES EXAMINING A PASSING MOTORIST'S PAPERS

All over Northern Fran and particularly within the war zone between Paris and the front elaborate precautions are rigorously enforced to preclude the possible communication of spiss. Sentries and gendarmes challenge all passers, and subject their passports and passes to close scrutiny. Many spies have been thus apprehended The French soldiers in the above cut are examining a passing motorist's papers by aid of the headlights'

FEBRUARY 27 1916

BRITISH MOTOR INDUSTRY FINANCIAL POSITION STRONG

Many of the Plants Have Been Increased and Dividends Have Been Above Normal-Some Firms Fear That Their Prestige Is Passing Because Plants Are Producing Munitions Exclusively.

A FTER a year and a hilf's opera-tion under war conditions, the British motor industry finds itself in a remarkably strong financial The few cases where the dividend

British motor industry tinds itself is a remarkably strong financial condition II is only possible to judge with any degree of certainty the strength of those companies register-ed under the limited liability law and in consequence having published a halance sheet. In practically every case the net profit earned during the financial year, ending on or about December. 1915, is greater than the curnings for the year 1914. In other words, the war has not had an ad-verse influence on the British motor industry. The most notable balance sheet is that of the Sunbeam Company, which shows a profit of more than \$1,200,000 and has paid a dividend of 25 per cent. The of income tax. At the same time, the company has placed \$600,000 to re-serve, bringing this account up to \$1.-100,000, and has carried forward a sum of \$378 335. The paid-up capital of the company is \$1,350,000, so that the profits of the year bear a very in portant relation to the capital em-ployed. Further, the amount placed to reserve fund is larger than the net profit in any year in the history of the company, while the amount carried forward exceeds by \$25,000 the profits for the year immediately preceding the war. The B. S. A. balance sheet, which In the few cases where the dividend this year is less than for the previous 12 months, in nearly every case it can be attributed to special circumstances, as for instance foreign investments, for which huge depreciations have to be allowed, or losses thru branch houses, or goods being held by the energy. These, however, bear a very small proportion to the whele. It should be noted, too, that many of these balance sheets include the inst two months of the war, when, owing to failure to realize the extent and

to failure to realize the extent and possible duration of the conflict, some of the factories were idle or running telow capacity. Financially, the position of the English and French motor manufac-turing concerns is unusually strong-

turing concerns is unusually strong. But this does not imply complete satisfaction on the part of those hold-ing interest in them. The govern-ment plan to tax a large proportion of the excess profits is not to the tasts of interested parties. One outcome of this has been that the Darracq Comrany has formed a French company to acquire the French factory, the

to acquire the French factory, the whole of the stock, with the exception of the small amount necessary to com-ply with the law, being held by the British company. The main advantage of this is that the French taxation of war profits will be lower than that of England. The greatest strength of the British motor industry is not revealed in the summaries of its dinancial situation. While reserve funds are being built up and adequate dividends are being paid on common stock, immense sums and additions to the factories. The new plant put down since the war costs more than in normal times, but in most cases its cost will be wiped off by the war contracts already in War. The B. S. A. balance sheet, which also includes the Daimler Company, is another conspicuous example of the prosperity of the British motor in-dustry The company shows a profit of more than \$2,000,000, and pays 20 present compared to 15 per cent for or more than \$2,000,000, and pays 20 per cent., compared to 15 per cent. for the previous year. The increased strength of the company is not reveal-ed, however, by the dividend paid to storkholders, for the earnings have inin most cases its cost will be wiped off by the war contracts already in hand. The result is that the end of the war ought to find the motorcar industry sounder financially than at any

previous period and at the same time in possession of more modern and more completely-equipped establish-ments.

ments. Despite this, British manufacturers are not particularly jcyful. There is a haunting fear that the end of the war-will find America in possession of the home and colonial markets; the good will and trade names, which have taken years to build up, are gradually diminishing. In this connection the war is tending to place the smallest firm on a level with the best. All, big and little, have to face the fact that American makers, who would nor-mally never have found a footing on the market, have now secured a strong position and will have to be competed against. In consequence, the feeling towards the American industry is far

Suggests Traffic Bureau For Highways Conservation

Authority Declares That Extent of Traffic Regulations Should Be Comprehensive in Scope, Including All Classes of Vehicles.

I an address on "The Regulation of Different Classes of Traffic On Public Highways," delivered at the Automobile (Jub of Amorico, Taletto, State and State a

Automobile Club of America. Edwin Duffey, State Commissioner of High-ways, advocated the establishment of a traffic bureau by the state, the duty of which would be to prescribe rules dations of the buildings along the and regulations for the protection of street. In addition to this, it is a comthe highways from damage caused by too heavy loading of vehicles. Mr. Duffey said in part: too heavy loading Duffey said in part: rubber, and each revolution of

"The scope of traffic regulations should be of such extent as to include wheel giving a terrific impact to the ravement. On many of the trucks they are also using wheels in which are set all classes of vehicles that are detri mental to the road. This would inlarge blocks of rubber. It is very prot clude regulation of horse-drawn as able that under the most well as motor-drawn traffic. The most conditions these blocks would be very destructive action on our highways is that caused by motor trucks, and yet the motor truck is here to stay. But its but increase materially the damage sauisfactory, but there is no question the motor truck is nere to stay. But its con-action is so destructive that its con-tinued use will mean the ruination of "It is our opinion that a possible "It is our opinion that a possible main.a.n them.

remedy for most of these ills would be the establishment of a traffic bureau "All that can be done in the way of preferably an adjunct of the highway regulation is to limit the weight borne lepartment, whose duty it should b by each inch in width of tire and not allow the use of any lugs or cleats to prescribe rules and regulations and direct the enforcement of the same. To which might tear up the road surface. In addition to this it is also necessary his end there should be conferences o limit the speed at which a given with automobile builders, studies and experiments of road surfaces, motor cars, trucks and horse-drawn vehicles load might be carried. The limiting of loads borne by horse drawn vehicles is the effects of varying loads on varying important because of the tendency to use narrow tires. Speed, of course, is not a factor with this type, but carry-ing heavy loads on narrow tires is a factor tending materially to factor widths of tires, etc. Without delay the tax on the heavy motor truck should be increased. "The rules and regulations adopted should be enforceable by law, and the

tending materially to destroy our pavements

prosecution of offenders and the colles and regulations were put for. ection of fines, etc., should be a part ward tentatively in the State of New of the duties of the attorney-general York with the expectation that inof the state. Even more important creasing experience would necessitate should be provisions of the law to make an offender liable to the state ditions thereto. Not only was the endeavor made to prohibit the use of a civil action for all damage caused these vehicles that would tend to tear. to the pavements."

these venicles that would tend to tear. apart or disrupt our roads, but also to limit the total load to be drawn, and then to restrict this total load in its relation to width of tire, thereby pre-cluding the carrying of a load that, even the it might be within the maxiautomobile mascot. country. There were 2,423,788 pleasure cars and commercial vehicles in use at the beginning of this year, representing an increase of 686,998, or 39.5 per cent. over the same period of last year.

Farmers and residents of small communities bought cars in rapidly increasing numbers all thru 1915, says "Motor World," which compiled these statistics, and such agricultural cen-tres as Illinois, Iowa, Indiana, Min-CARBURETOR FOR nesota and Wisconsin stand numeri-cally high in the registration list. Farmers are recognizing the fact that the motor car is really more useful to them than any other class of peo, ple, both socially and industrially. These rural increases took place despite continued inclement weather which adversely affected road conditions, the standing crops and other vital factors of the motor car market

There were 20,458 motor car dealers in the United States at the end of 1915, according to figures compiled by The Automobile Trade Directory. The total of car and supply dealers, repair,

shops, garages and charging stations is given by the same authority as 31,-793. Adding up the separate classifications, however-dealers, garages, repair shops, charging stations-does not give this figure, because in a number of instances one establishmen comes under several different headings. For instance, a single establishmen might be a car and accessory sales om, a garage and repair shop and charging station for electric vehicles. Similarly, the total of 512 manufac turers of motor cars, trucks and mo divided into 230 car builders 267 truck builders and 61 motor builders; some of the concerns build both

complete cars and motors. favorable **MILLION MONTHLY FOR**

are capitalizing the value of the dealer's personal relations with the pubcon

To build up his reputation the dealer must keep the public well informed regarding his car, his plans and hopes siderable money in competitive name nd those of the makers of the car. All these things are true because

He must keep the public acquainted with the reasons why his product will justify further and continued confi-dence. To put the sale solely on a basis of the dealer's word opens doubt. Having told what he has to sell, the dealer must deliver what he has prom-ised. On the basis of full accomplishment of what was promised and the personal relations kept up between the buyer and the seller, the sale becomes that of a standard commodity. And this—a standard commodity—

meaning a commodity which contains no inspiration for doubt—is what the He sells a man an intricate piece of automobile must be, and is coming But

rapidly to be. When this is attained there will be few men are expert or natural machinists. It is not the fault of the fewer bad years and more good years, and the competition for business will buyer, seller or maker. It is not a tauit, merely a reality. So the dealer be on the simple basis of giving the public the best for the money within a certain circle of standardization. It is this to which the buyer is entitled now.

not repairs, advice, not parts, will be obtained readily. To an amazingly rapid extent this tendency is growing. Many compan-ies now ask their buyers to run in once a week and let some one look over the

car. This makes important the relations between the two, creates a feeling of responsibility and dependability, re-moves doubt from prospective buyers and establishes regular business relations between trace and dealer.

But because purchasers do not, in many instances, demand from their dealers this close personal service they lose much of the use of their car, both at intervals and in its line period. Because some dealers do not keep

thus closed in touch with the buyers they lose business, both old and unreached. Because the trade relations are still strained and doubtful between buyer and seller the name value of the car becomes that which the maker must

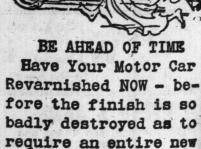

ceep alive becaus it is easier for the public to remember than a long lis of specifications. Carmakers can't sell their cars direct. They can't handle the cumberome machinery of such a sales force.

They must rely on dealers. For their own good they must have old, established dealers, for the com-pany becomes a vague, indistinct thing when a buyer pays his money down and then looks to the man to whom

Turning a set screw releases two seats. They come out. Cots may be laid from front to rear and the car suddenly houses—twin beds. In the spacious rear are camping he paid it to see that he has received the full value of the cash. This is true more because cars are

upon police departments to regulate ped-estrian travel, as well as vehicular traf-ide. Standardization of accident report blanks, and a method of compiling sta-tistics for the intelligent study and in-vesdgation of the most common form of accidents, is also to be undertaken. The adoption of the standard code, with the view to securing uniformity in traffic regulations, will be of much help to the authorities in many cities which have been slow to recognize the import-ance of the safety first movement, and will bring to them the axperience of the more progressive municipalities. It will afford a means of instructing all drivers, visitors, as well as residents, in the sim-ple rules of safety. If the standard code is adopted substantially in the form a approved in all of the larger cities, auto-mobilists touring from one city to an-other will have no excuse for violating traffic rules. The result of the committee's work, it is expected, will be to effect various economics, expedite the movement of traffic, permit police officers to give greater attention to pedestrians, and at the same time to advance the movement for the conservation of life, limb and property. The standard code of traffic regula-

years gone by. "For one thing, the automobile is a leveler of classes. The minute you add a motorcar, no matter what kind, to the list of your worldly possessions you revise your notions of a few ihings that in your mind seemed im-mutably fixed. You find, for instance, that there is nothing more enjoyable than to go out on the highways of the country, in utter oblivion of the dust that fils your system, and of the wind that puts a complexion on cheeks that had none before. Occasionally the goggles are the only means en-abling the roadhouse man and the hotel-keeper to distinguish the motor-ist from the rest of humanity, and it is criten said that some of our most ex-ciusive hotels would hesitate to turn away a fairly well dressed vagabond for fear that he might be a wealthy motorist. That, of course, may be a good deal of an exaggeration, but the fact is that the new motorist soon learns how much fun there really is in going out and becoming saturated with the dust of mother earth and then to wash up again. "Even milady of fastidious taste

CRUSTS AND CRUMBS

By Albert Ernest Stafford

Turks Are Defeated by an Enemy That They Despise

In view of recent Russian successes along the Turkish front, it would seem that the Turks must revise their estimate of the effiency of at least that portion of the Muscovite war machine. Late issues of two Constantinople journals, The Tamine and The

Hilal caustically comment on the forces put into the field by various nations opposed to the Central Powers and make particularly contemptuous reference to Russia's ability to effectively reinforce her armies with millions of new men in the spring. The same contempt, in a somewhat lesser degree, is expressed for the new armies being organized by Lord Kitchener. The view is taken that these untried men will be no match for the vastly infertor number of war-seasoned soldiers of the Central Powers, and the Turkish critics express the opinion that any attempt of a large offensive with these new forces would be foolhardy. Stress is also laid on the fact that the soldiers of the Central Powers will be operating inside lines near their base of supplies and will have the additional incentive of fighting and sacrificing for home and Fatherland. While it is gratifying to note that at least one of Germany's allies has learned what an impelling force the fact that a soldier is fighting for home and loved ones is—a lesson that Germany should have learned in her ruthless invasion of Belgium and had further driven home in the stubborn resistance encountered in Serbia-the Turkish writers have overlooked a more important factor that is spurring the armies of the Allies on to ultimate victory. They are battling to uphold the cause of freedom, of justice for individual and nation, and the brute force of the Central Powers which seeks to bend the entire world to its will, is about to learn that these are more to be prized than homeland, than loved ones, than life itself.

. . .

While Turkish writers, taking their cue from the apologists for the kaiser in the German press, are endeavoring to persuade their people that the nations of the Entente are tottering on the precipice of complete break-down, that France mistrusts England and that there is a

Germany Is Feared and Mistrusted by Turkey

noticeable friction among the nations opposed to the Central powers in the war which will soon result in a disruption of their forces and an overwhelming victory for the Teutonic alliance, evidence is not wanting that Turkey, herself, is anything but pleased with the position she finds herself in as an ally of Germany. In connection with this the finds herself in as an ally of Germany. In connection with this the French-Swiss Journal de Geneve, quotes a high Turkish authority who recently passed thru Switzerland, as stating that the German offensive in the Balkans, if it has stopped, has been halted at the demand of Turkey. Both Germans and Bulgarians are greatly distrusted in Constantinople and the people of Turkey understand German methods well enough to know that if once they gain a foothold a sanguinary conflict alone will remove them. For this reason Turkey is opposed to the Egyptian expedition and will only permits its being undertaken with Turkish forces, as they are determined to take no chances of the remote possibility of the Germans installing themselves on the Suez Canal. With the possibility of Bulgaria withdrawing her support from the Cen-With the possibility of Bulgaria withdrawing her support from the Central Powers unless her terms are met, and with the distrust of Ger-many by her Turkish ally it would seem that Germany has quite as much trouble keeping peace in her own household as she would have the world believe her opponents have in theirs.

. . . Not the least hopeful signs that Germany

German Peace Feelers a Hopeful Sign for Allies

has come to a point where she is not only willing, but anxious to see an end of the conflagration which she started, are the suggestions for a basis for possible peace which continue to emanate from Teutonic sources.

One of the latest of these peace-feelers made its appearance recently in The Neue Zurcher Zeitung, being supplied to the Swiss paper thru the German-owned Wolff news bureau and, notwithstanding denials to the contrary, was not only inspired, but prepared by a member of the German government, according to the unrefuted assertion of Garet Garrett in a despatch to The New York Times. The Zurich paper, after outlining the possible terms, expresses the opinion that it is the duty of neutrals to promote a discussion of conditions in order that the Central Powers may not have their offer set aside and make still greater demands and enforce those demands at the canon's mouth. The Swiss journal could well devote its space to a more useful purpose than an endeavor to frighten the neutral nations into using their persuasive powers on the Allies to make them yield to Germany's proposals. There will be no peace, the terms of which are dictated by Germany. The Allies will name the conditions on which they will accept peace and until Germany realizes this and acknowledges herself defeated, if there is a Germany left to make any acknowledgment when this time comes, any talk of peace is as impotent as the kaiser's fleet in the Kiel Canal.

* * *

Since the publication of the first photograph of a group of Canadian soldiers prisoners in Germany in The Sunday World, more than fifty homes in the Dominion have known a happiness that had been impossible since the brave khaki-clad sons of Canada stemmed the

Only a Frail Hope But Still It Is a Hope

German torrent at St. Julien, for they have been able thru this means to identify among the number, father, son, brother or sweetheart, who had long since been given up for dead, owing to the fact that they had been reported missing by the military authorities. Instances are on record where even those reported dead have been traced thru this means, their relatives receiving the first glad tidings that they are still alive altho in the hands of the enemy on seeing the reproduction of their photographs. In this way they have been able to get into communication with them. As time goes on there will doubtless be others, at present unheard of, who will be located and who knows but that when the war ends homes will be made glad by the presence of loved ones long given up as having sacrificed their lives for the cause of the There are a number of reasons why Canadians confined in Empire? the prison camps of Germany have been unable to communicate with their friends. As a result of what they have suffered, some may be afflicted with a lapse of memory that precludes the possibility of their letting their friends know where they are, and there is no possible way in which the Allies can trace those of their number held by the enemy. At the best their estimate of the number of their soldiers, who have been taken prisoners is more or less of a guess, and there is little likelihood of the German government attempting to supply information that can As one woman so tersely, but pathetically put it, be relied upon. who thought she recognized her husband, in a group of war prisoners, but was not sure, "It is a frail hope, but still a hope." Those who have loved ones who are reported missing should not give up hope yet, for there is still a chance that they may be in one of the enemy's prison camps.

. . .

Mobilizing Trade for Time When War Ends

British manufacturers are not going to rest with any government promises for a complete commercial mobilization to meet conditions when the war ends, but already have a movement on foot to include the furthermost overseas dominion in an organization for

commercial expansion that will preclude the possibility of Germany ever regaining the position she held in world commerce previous to the outbreak of the conflagration which is now sweeping Europe. Meetings of prominent manufacturers of the British Isles have been held at frequent intervals in the past few months to further this end, one of the latest being that of the British Electrical and Allied Manufacturers' Association, at which this topic has furnished the chief food for discussion. The suggestion was made at this meeting that the first thing required for an attack on foreign trade was adequate banking facilities. This should be followed up with the appointment of a committee of representative men to do for the manufacturing interests what Lord Derby has done for recruiting. This will be one of the many suggestions to be considered by the associated boards of trade of the British Isles which meet in London this week, when a plan will be formulated which will be submitted to the government for its approval, with the expectation of government co-operation in carrying it From the present outlook it would appear that the commercial out. interests of Germany are likely to encounter as strenuous opposition in the field of commerce as the Teuton armies are now meeting on the yarious battlefronts of Europe.

Is Obeyed

Members of the Royal North-

west Mounted Police are paid a splendid compliment in a recent issue of The Christian Science Monitor, of Boston. Mass., which considers it a matter for comment that thirty-one out of thirty-two residents of the prairie provinces guilty of capital offences during 1915 have been overtaken and brought to justice, while an unrelenting search is being continued to bring in the thirtysecond malefactor. Altho it is unquestionably noteworthy that such excellent results have been attained by the mounted police, their record for the past year differs very little from that of many years preceding. They are but living up to the traditions of the force and doing what the people in Canada have come to expect of them. The task they have accomplished is a stupendous one when the extent of the territory over which a mere handful of men have charge is contemplated, and the climatic conditions under which they have to operate for several months in the year is taken into consideration. Canadians who are accustomed to seeing wrongdoers brought to justice and duly punished, take the remarkable exploits of the mounted police, which causes wonder among our neighbors to the south, as a matter of course, but down in their hearts they also pay tribute to the courage and resourcefulness of these keepers of the law on the fringe where civilization and the Arctic winter meet. They realize, also, however, that the work of the mounted police would be to a considerable extent nullified if it was not backed up by the courts of the land. It is recorded that on one occasion there was a man with prominent political affilicommitted a 'capital ations offense in the Yukon. He got out over the trail with the mounted police in pursuit, and all they had to trace him by was a little button of a secret society known as the Arctic Brotherhood. All the way down to Mexico and back across the United States they followed him, finally arresting him within sight of the Canadian border in one of the states of the middle west. He was returned to the scene of his crime, tried by a competent court and paid the penalty with his life, notwithstanding the fact that all the political influence that could be brought to bear was used to secure at least a commutation of the sentence. The respect for law and order not only in the Canadian northwest, but thruout the Dominion, and the success the officers of the law bringing criminals to justice was tersely explained by an American in commenting on this particular case, which had come under his personal observation.

enforced them we would not be regarded as a nation with lax This seems to state the case in its most concise form. Canada expects good work from her police, be they civil or mili-tary, and she gets it because she enforces her laws after the criminals have been caught, as well as because the officers of the law take a special pride in seeing that their duty is properly discharged.

pected of being of enemy origin is that they broke out at a time when a minimum of human beings occupied the premises destroyed. That would make it appear that if they were of incendiary origin they were intentionally started with the purpose of destroying property with the smallest possible accompanying loss of human life. That is scarcely the way of the Hun. His aim on all occasions since the outbreak of hostilities in Europe has been to accomplish the maximum destruction of human life in the most frightful manner possible.

German Substitutes Proving Delusions

Germany precipitated the present world crisis thru substituting disregard for her treaty obligations for national honor and she has been busy manufacturing substitutes ever since. She substituted barbarism for civilization in her ruthless slaughter of noncombatants in Belgium and has on many occasions since the outbreak of the war substituted deception and dishonesty for truth in her dealings, not only with the nations with which she is at war, but with neutral nations as well. Reverses to her armies have been substituted in the German press by glowing reports of victories, and since the beginning of the Allies' blockade, which she states in one breath is starving her civilian population and is utterly ineffective, she has been busy devising commodities to take they place of the foods which she has unquestionably been deprived of. Like all her other substitutes, these are doubtless proving a delusion. Otherwise why should it be necessary to direct a new campaign of frightfulness on the sea and add to her already shockingly long list of submarine murders? The truth is that Germany is finding her dream castle of world empire crashing about her ears. She has not, and will not. be able to devise a substitute to replace her losses in the trenches, and, notwithstanding all protestations to the contrary, she seems to have about reached her maximum of military strength, while hor opponents have an almost limitless reserve force to draw would be well to trace them down from.

ment? "There is no death: what and 1771 in various writings, of authorities to take no chances, for seems so is transition," says Long-fellow, and all we need is the means of communication with those who are embodied in a finer vehicle than flesh and blood can provide in an ether more subtle than the cor-puscles into which we have analyzed our gross matter. if there are any enemy agents at liberty in the country they will stop at nothing to work destruction on both life and property of those who are doing their bit to stamp out militarism. A remarkable feature in connection with the fires susour gross matter. the "Secret Loctrine," with which he is substantially in harmony. It

Wherever classification. The names differ, but we make a start must there not we make a start must there not the ideas are identical. have been something before that? a septenary of Body, its Man is Vitality These considerations are sufficiently These considerations are sufficiently simple, but we have accustomed ourselves not to think about them nor to use our result and Divine degree (Diary, 3885; nor to use our reason or judgment, Apocalypse Explained, 726, 1056, until we mix ourselves up in a 1127). Man receives his body and maze out of which we cannot readily vitality from his parents The other evening I was Nature; the Sensual and Natural talking with a Swedenborgian who degrees he creates for himself; the pleaded his twenty years' study of Rational degree, or Human Sou the Swedish mystic as justification proper is the result of his for views which a little thought experiences; the spiritual degree would have shown him to be un- is, or will be, so to say, the tenable. In the first place he wished sweetness, the aroma, the fulness of to have the truth of reincarnation proven to him. I might as well have undertaken to demonstrate the Divine degree is the Divine the 47th proposition of Euclid to a Being, the Self-Infinite, or the God baby. We were talking different in man (Apocalypse Explained, 151; languages. I suggested that the Conjugial Love, 135; Worship and only persistent thing about him was Love of God, 33). My Hindmarhis Ego, or I. Everything else shian friend insisted that man changed in him but that. His derived his body and soul from his views had been modified from year parents. In Swedenborg's "Angelic to year. His experiences were Wisdom Concerning the Divine His memories were in Providence," 330, he says the Lord constant flux. The I was the only is the Heavenly Father of all men, unity about him, and it was a ray and men are His spiritual children; or manifested aspect of the and "the earthly father is the father only as to life's covering, which is Of course I claim the the body." right to interpret Swedenborg for

VE WERE IN DEEP water immyself as I do to interpret the Bible mediately. He could admit for myself, or the Bhagavad Gita, none of these things. What or the "Secret Doctrine." If we did I mean by unity? Was his body are to accept Swedenborg's statanot a unity? I held that our bodies ment about the degrees or principles were far from being a unity, but in the constitution of man we canwere rather complex diversities held not reject what is implicit in their together by the indwelling Ego. As existence, their office and functions. an illustration of unity I suggested The Divine, the Spiritual and the duration, of which we measure Rational degrees are certainly the sections and call it time, but which reincarnating higher triad, and the is really unmeasurable and in- other four are the lower quarternary I suggested space also born new in each life. The other as a unity, but he said he did not three, constituting the Ego, embody understand what I meant. It in themselves character, memory and seemed to be unreasonable to expect Life Eternal. Until we in our to discuss such a metaphysical lower brain consciousness are united question as reincarnation with one with that Highest Person, the who could not conceive the unity of Father in Heaven we cannot know space, duration, motion or the Ego. or shine, nor love nor live It transpired that he had not been eternally.

Better Investigate Alarming Reports Whether the government commission investigating the fire which resulted in the destruction of the Parliament Buildings at Ottawa eventually finds that the cause was of enemy origin or accident more than ninety per cent. of the people of the Dominion will refuse to accept any other theory than that it was started by Hun vandals. The same is true of the other fire which occured in Ottawa the next night and that which destroyed a part of the Hespeler munition plant the Saturday following. The majority of the residents of Toronto are also positive that the destruction of the American Club was the result of a pro-German plot. Still there may be ample evidence to prove that none of these fires were due to incendiary, but purely to either accident or carelessness. The result of this widespread suspicion is that in

every little fire that occurs there is some onlooker to interpret even the ordinary crackling of the flames as they eat their way thru the tinder-like timbers of the building being consumed as the bursting of bombs and the stories thus started increase with importance and terror in the exact ratio to the number of times they have been repeated from mouth to mouth, until Canada is in danger, of being reduced to a condition bordering on national hysteria. It would be well, when the stories of finding of bombs in public places and the bursting of explosives at fires is related, to bear in mind that the authorities, both military and civil are not asleep, and that if there was any evidence to substantiate such stories the alleged perpetrators would speedily be hunted wown and brought to justice. Before believing any reports of an alarming nature it
