The Exhibition of Grain, Domestic Manufactures and Dairy Produce on Tuesday, 22nd of November.

The "Queen's" Agricultural Society will hold their Annual Fair in the Temperance Hall, New Jerusalem, on Wednesday, 26th October, at 10 o'clock, A. M.

The St. John Co. Exhibition.

The Exhibition of the St. John Agricultural Society, which took place on Tuesday, 4th inst., was not so good as it very well might have been. The bad weather prevented some exhibitors from taking part in it, and a number of visitors from attending, and this, in its measure, detracted from its success.

Speaking of one feature of the attendance, the St. John says:—"One feature of such gatherings as these should not be overlooked. We are not agriculturists; we are men of other occupations, and some of our law is an amateur farmer, but is not the real cause of the interest shown in these displays of cattle and sheep, produced by our citizens to be found in the fact that a large proportion of them were brought up on farms? Take out of St. John the men who in their youth assisted in farm work, and what a gap would be made? How many amongst us but can recall the days when they pitched hay, planted potatoes, fed the cows, groomed the horses, or, if specially clever, were allowed to try their hand at ploughing? Many of our leading merchants and professional gentlemen graduated from that excellent school, the farm, where they were taught patience, economy and the meaning of hard work. It is not surprising that those who are following the stony straits of their present occupations, their thoughts turn to the old pursuits and they sympathize with those who are following the calling which they rejected."

The show of horses and cattle was fine and saved the Exhibition from falling below par. Yet, the entries of cattle were not so numerous as they were in 1879, when the last St. John Co. Show was held—being 419, of which 107 were horses, and 312 cows, (L. Donovan) were exhibited, and no Devon. Jerseys and Ayrshires are the favorite breed in St. John Co.

The Jerseys attracted much attention, and were quite largely represented in the bull, cow, heifer and calf classes. The principal exhibitors were A. C. Fairweather with his herd of three cows and the bull "Lord St. Vincent," J. Pritchard, Fred Hathaway, Wm. Maynes, L. S. Almon, H. T. Dunn, Magee Bros. and Dr. J. Berryman.

"Ayrshires are a favorite stock in St. John County and there was a good display of that breed, although not so good, perhaps, as has been seen on the same ground in former years. In the class for bulls of any age, there were three entries, the 1st prize being taken by Mr. Thos. Davidson's bull Charlie, H. B. 52, six years old a very fine animal, with excellent points. Mr. L. Donovan's bull "Fear of St. John," being 419, the 2nd prize, and the 3rd prize, owned by Mr. Jer. Donovan, Duke of Simonds, 3 years old, is also a fine animal, with good points, but rather low on the legs. Some people fancied it quite as much as either of the others.

In Ayrshire cows and heifers there was a good display, the prize winners in these classes being L. Donovan's Creighton and R. McLean, all of whom showed good stock, although the entries were not so full in these classes as in former years."

The display of horses, in thoroughbred, draught, carriage, and saddle

AGRICULTURAL SHOWS.

Andover Agricultural Society.
The Andover Agricultural Society fair at Hillandale on Friday, on the grounds of Mr. Pickett, was a decided success. The day was very fine and a great number of visitors were present. The exhibits were very much superior to those of last year, the stock in particular showing a marked improvement.

The committee of management deserve credit for the manner in which the grounds were laid out. The judges and members of the Society sat down to a sumptuous dinner prepared by Mrs. Pickett.

Sussex and Studholm Society's Show.
The Annual Fair held by the Sussex and Studholm Society, came off on Wednesday, 6th inst., in the Park. There was a large show of horses, cattle, sheep and swine, and the agricultural produce was of excellent quality. The cattle chiefly Ayrshires, Jerseys, and grades were not so good as those shown last year, but the horses and sheep were fully so. The show of fruit, apples, crab-apples and grapes attracted much attention. On the manufacturing side, the display of the Sussex Boot and Shoe Company was a great improvement over that of last year, and the articles were much admired for their style of workmanship. White, Upham, & White's show of leathers was very good. Altogether, the show was an improvement over that of last year.

King's County Central Agricultural Show.
The Exhibition of the King's County Central Agricultural Society was held on Thursday and Friday, last week. The attendance was large, and the weather all that could be desired, and the interest taken by the visitors in the different exhibits shows that the efforts of the Society to improve the county are not without fruit. The exhibit showed a marked difference over that of other years. There were a lot of very fine colts of Hambletonian and Charta stock, and while in numbers of entries this class was not quite up to former years, it was in the quality of stock far excelled that of other years. The entries of working cattle were away ahead of other years both in number of entries and quality. The cattle were all in prime condition and looked well. In proportion to the size of the place they cannot be surpassed in the Province. The Ayrshire and Devons were the principal breeds exhibited, and only three or four Jerseys were exhibited by James Trueman at Foxcroft.

THE IMPORTED RAMS.
Bought by the Society at the late Government sale, were sold at auction on Friday. The Border Leicester was bought by H. W. Warnerford, of Norton, for \$21. The Shropshire Down, by A. B. Hayes of Norton, for \$23.50. The terms are twelve months with approved security, the rams to be kept in the parishes of Hampton and Norton for three years.

St. Mary's Agricultural Society.
The second annual show of the St. Mary's Agricultural Society was held on the usual grounds at Gibson, Thursday 6th inst. The display of

perhaps was as good as could be soon met with any show of similar dimensions. The Percheron stock which was so much admired at Halifax was very fully represented. Boyce Clements of St. Mary's, exhibited an eight-year-old Percheron only three years old, each weighing 1,400 lbs. Robert Macklin, Gibson, also showed a three-year-old Percheron weighing 1,400 lbs, an animal fully as good as was met with as Mr. Neil's. These animals are all from the well-known Sanbury horse. In other classes, Coan, W. H. White, of Gibson, exhibited an eight-year-old Mangold, a very pretty horse. Wm. Smith's Nashua Village, showed a two-year-old horse, and James Wisely, of Gibson, a mare and sucking calf. There was quite a large exhibit of

CATTLE.
All grades of Ayrshires and Darbams. The exhibitors were—John Miles, Gibson, who showed a bull two years old, a bull calf, two cows, a heifer calf, W. A. Barker, St. Mary's, a bull calf, a two-year-old heifer and a yearling heifer; Robert Macklin, Gibson, a yearling bull; John Kilburn, Mackinac, a calf; T. F. Barker, St. Mary's, a calf, a cow and a two-year-old heifer; and Chas. Wade, St. Mary's, a cow, a two-year-old heifer, a yearling heifer, a heifer calf and pair of two-year-old steers. The exhibit of Leicester

was also very fair and was made by T. F. Barker, who had two each of two-year-olds, 1 year, and lambs, W. A. Barker and B. N. Goodspeed, Nashua, do. J. W. Smith, Nashua, and L. Goodspeed also had fine lambs and Chas. B. Harrison, Mangrove, exhibited in pure bred Leicesters two ram lambs and a shearing. The exhibit of swine was small.

THE DISPLAY OF FARM AND DAIRY PRODUCE, AND DOMESTIC MANUFACTURES.
Was made in Coan, Close's new warehouse and was fairly good. This has been a bad season for roots of all kinds, and St. Mary's farmers felt it as well as others all over the Province. In domestic manufactures there was quite an ordinary exhibit. B. N. Goodspeed showing white flannel, filled cloth, cloth for women's wear and woolen mitts. Mrs. J. C. Barker was also a prominent exhibitor in this class. She had white flannel,

FRANKLIN, N. B., October 13, 1881.

The Dominion Exhibition.

The Exhibition lately held in Halifax deserves more than a passing notice.

The greatest success made by the recent exhibition in Halifax, over any show heretofore held in the Lower Provinces, was the admission of exhibits from all parts of the Dominion.

When last year, our government proposed to the governments of Nova Scotia and P. E. Island, that the role of general admission should be adopted, so many difficulties were raised that it was not carried out.

At a special meeting, our government admitted competition from the other Provinces, for honors, and a large number of awards were made to parties residing in Nova Scotia, P. E. Island and Quebec.

But it was found that anything about full competition, would not do. Now however that exhibitors from all the Provinces have been for the first time allowed to compete on equal terms, we have no fear of the future.

One of the leading men from the Island, while viewing the stock in the ring, when the Judges were in fact, remarked that "in future exhibitions there would be a more rivalry and competition between the different Provinces." This is exactly what is wanted.

The country derives little, we might say, no benefit from the practice of giving a certain amount of money for prizes in the improvement of the first small but hard bred animals to contest the prizes with.

The greater the competition is, the greater the merit in carrying of the honors. When there is a keen and generous rivalry between competitors, the money becomes a secondary object.

At Halifax the greatest interest was felt by exhibitors of the different Provinces in the destination of the highest prizes. A group of P. E. Island farmers were seen to be much elated over the report that the Island had been awarded first prize in butter, but when the error was corrected, and they heard that New Brunswick had carried off the palm, their joy was turned to disappointment, and they returned home carrying with them a sense of personal defeat, but also, no doubt a determination to win the coveted prize at the next competition.

New Brunswick and P. E. I. may be said, with truth, made a very creditable display at Halifax. Our remarks are written with our thoughts chiefly in the agricultural department, but as regards New Brunswick, the display of manufactures was equally to its credit.

Most of the visitors from these Provinces, were well pleased with what they saw, but not so satisfactory, certainly, as they would have been, had they seen the display at Jersey cattle. In this field the Island has a long way ahead of the other Lower Provinces. She is also quite able to hold her own in Ayrshire. But in Short horns she is deficient, and her exhibit in this class in Halifax was not satisfactory.

Both Nova Scotia and P. E. Island have got the start of this Province, in this noble breed. The work done by the Stock Farm was clearly shown in the exhibit, in this class, from the Island. The animals sent from the Farm were really magnificent, and yet all, as far as we are concerned, they were not the very best of this breed raised in the Province. A very beautiful horse was left on the farm. As every future show our Stock Farm may make it more difficult for the Island to obtain the first awards in this class, that it was for her in September in Halifax. We are very hopeful.

We may give here a few particulars with regard to one of New Brunswick's most successful exhibits. In horses this Province did very well; it carried off the Mon. Mr. Pope's prize for the best horse of any age or breed. And the show of Percheron horses got the general admiration. Those noble animals appeared to great advantage when shown all together. Very few of this grand, shaggy sturdy breed had been seen in Nova Scotia. So that the sight of them was a kind of revelation to most of the visitors. Large crowds were attracted by them, than by any other part of the show, and the caretakers were actually besieged by persons anxious to inspect and learn all they could of the noble greys from Normandy and Picardy.

My object in attempting to show off the horse was not good. The ground was not in order and the ring was far from being completed. And the drivers, had many difficulties to contend with, owing to the lateness of the arrangements. But we cannot be so scrupulous as to find fault as the managers had much to do, and were hard pressed to accomplish it. Let us be grateful for what was done. The fact that it is possible to hold an Exhibition for the Maritime Provinces, was established, and that was enough, if nothing else was done.

The buildings, sheds, yards and track in Halifax, and all well planned, and are very compact. When they are finished the holding of an exhibition there in the future, will be no easy matter.

As appears to be quite settled that New Brunswick will not ask for an exhibition until 1883, it is fairly within the right of the Islanders to have the show next year. The P. E. I. government should advance their claim at once. It is a mistake to delay making the announcement of the place, until time when an exhibition is to be held until the time of holding is close at hand. A long notice is absolutely necessary for manufacturers, and in fact it is better for all classes of exhibitors. There should always be at least a year's notice, and now when so many Provinces are interested, a larger time is required. We hope to hear before long, that the Island is up and doing, as it is for its own interest that it should move early and energetically in the matter.

To Agricultural Societies

We would direct the attention of members of the Agricultural Societies to the notice in another column, reminding them of the provisions of the Law in regard to the nomination of members of the Board for the ensuing year. The Law requires that this shall be done in October every year. There is no particular day named, so that each Society must appoint the time for their own meeting. There should be some combined action on the part of the Societies of each district for the selection of the proper person. Should each Society merely send the name of the person on whom its own choice has fallen, without previous understanding with the other Societies, the election may not amount to much. Societies should recollect that the seat is vacant at the end of this month, and if they fail to nominate, the government must fill the position. The present member cannot hold the position, unless re-appointed.

The Indian Question in the Northwest.

The poor red Indians since first the white man planted his foot on this continent, have received little mercy, the scantiest justice, and at the very best, only contemptuous pity and charity from the white people who have not ceased to drive them further and further towards the setting sun and final extinction.

Their right to the soil of the vast country, over which his ancestors freely roamed long ago before Columbus, or Cortez, or the American continent, or Cortez, ascended the St. Lawrence, and have never been acknowledged, and they have been looked upon and treated for the most part as wild animals or vermin, whose existence was worse than unnecessary, and whose only fate was extermination. The treatment by the United States of the Indians is a lasting disgrace to that nation, and often has that ill-treatment been terribly avenged.

Much more humanely have the British behaved to the red men, and the policy that the Canadian government has pursued towards them has been, in the whole, fair and kindly. Trouble from the Indians in the old settled portions of the Dominion no one anticipates, but, in the vast Northwest Territory, which, at present, is attracting so much attention, and into which the tide of immigration is pouring, and will continue to pour in greater volume in the coming years, trouble may arise, unless the government take measures to keep the Indians quiet, and protect the settlers. The not to be despised element of once powerful and warlike tribes are being dispossessed of their heritage and gradually driven to the base of the Rocky Mountains. The herds of buffaloes, from which the Indians have their chief sustenance, are disappearing from the Northwest prairie, and starvation is threatening them. When herds of domesticated species in the plains, which once they held to be their own, instead of the wild Indians, the starving Indians will make feuds and there will be bad blood between them and the settlers, which may lead to the worst of all kinds of wars.

When herds of domesticated species in the plains, which once they held to be their own, instead of the wild Indians, the starving Indians will make feuds and there will be bad blood between them and the settlers, which may lead to the worst of all kinds of wars.

The Land Act

The Land Act has not given as much peace and content as could be desired to Ireland.

The great proportion of the respectable portion of the people are thankful to Mr. Gladstone for his recent measure. The Irish clergy have emphatically endorsed it, and counselled the people to peacefully take the benefits of its provisions. But there is still a bad discontent and irreconcilable. Paragon and discontented and extremely bitter and proportionately unjust to Mr. Gladstone. He will neither receive, or think it possible to receive justice to Ireland at his hands. Nothing he now declares will satisfy him but legislative independence for Ireland, and the cover of his ardent desire for complete disunion from England. The Land Act is determined to obstruct the working of the Act, and has prepared a number of test cases to be tried before the Land Court, with the object of showing that the Act cannot be carried out, and of rousing him up to set it, the Court, and the Land-owners at defiance. In some of the countries outraged and "boycotted are still the order of the day. Unsatisfactory as the state of Ireland is, it is very much improved from what it was some months ago. The present discontent is the result of the hearing of the Land Act, and not the result of the storm at its height. In two or three months a calm may be expected.

The Land agitation has extended to Scotland and England, and all nations have been formed, and the demands of the farmers there are nothing short of the concessions which have been granted to Ireland. These demands have been drawn up in the form of bills, and it is safe to say that, measures of Land reform, giving the tenant farmer as much security for their capital as immunity from capricious exactions as will encourage them to make improvements on their farms, and in the methods of tillage, will sooner or later be brought before Parliament. Whether Mr. Gladstone is prepared to grapple with the large question in England and Scotland, and bring in a bill or bills next session, is not authoritatively stated. It can hardly be thought, that after his experience this year with the Irish Bill, and now that his strength is falling, that he will care to take the storm, which his bringing in a Land reform measure would cause. The question will have to be agitated long and hotly before it is made a matter on which the government will determine to stand or fall.

The Conservative party aided by that portion of the Liberal party who have social sympathies with it, will offer an uncompromising opposition to any radical measure of reform. An attempt has been made to distract the attention of the farmers from the question of land reform by raising the cry of "fair trade" and "reciprocity" and creating the conviction that the distress they labour under is really caused by competition from America, against which a modified system of protection would safeguard them. The farmers as a body, though they have suffered from that, and know also that much of the distress under which they labor, has been caused by bad seasons, are not to be drawn away by what they consider a delusive cry, from seeking a reform of the tenure under which they will hold their land, which will enable them by improved system of agriculture to bear or better against both competition and bad seasons when they occur.

The North-West Movement

Canada has, within the last three or four months, received a great deal of complimentary and the reverse—from all sorts of people. It has sprung into notoriety, and to the ordinary Briton, at home, it cannot, now, be termed "terra incognita," a country unknown. The riches of its boundless North-West, have attracted the regard of the world; its prairies have been driven over by savans from Germany, and bishops and priests from Ireland and Ontario, invaded by hosts of newspaper correspondents, and journeyed over by the Governor General, accompanied by a retinue of scientific men and journalists.

If it has, on the one hand, been libelled by Truth, flouted at by the World, and assailed by Goldwin Smith, in the Contemporary, it has, on the other hand, had the fertility of its prairies, the rigorous healthiness of its climate, described in glowing terms by Sir Alex. Galt, Archbishop Lynch, and by the principal papers of England and Canada. The boundless riches of the North-West, as unveiled by friendly hands, has been a kind of revelation to the world. Those who have written of it have been, to the many who have read of it for the first time, as discoverers, and as if it had been on the heels of the first discoverers of America, those who followed them, believed that by navigating the St. Lawrence, or the northern river, the Ottawa, to their sources, they would enter a sea on which they would be borne to a land of marvellous riches and beauty. They were terribly disappointed and many died the victims of their delusions. But those who follow in the track of the new discoverers are certain to come into a country of "reciprocity" and creating the conviction that the distress they labour under is really caused by competition from America, against which a modified system of protection would safeguard them. The farmers as a body, though they have suffered from that, and know also that much of the distress under which they labor, has been caused by bad seasons, are not to be drawn away by what they consider a delusive cry, from seeking a reform of the tenure under which they will hold their land, which will enable them by improved system of agriculture to bear or better against both competition and bad seasons when they occur.

The Conservative party aided by that portion of the Liberal party who have social sympathies with it, will offer an uncomp

Town and Country

A meeting of the Curling Club was held on Tuesday night.

The October term of the Supreme Court, opened on Tuesday.

We are glad to see Alderman Simmonson again after his illness.

Moncton, Truro and Yarmouth have water works, and why not Fredericton?

Geo. E. Fenner, Esq., has been elected a life member of the Nova Scotia Historical Society.

Water number of new buildings have been erected in Gibson, this season, than in Fredericton.

Patrick Bradley paid his fine of \$100 into the Police Court for a second offence against the Street Act.

Prof. Trapp had a small but select audience to his course of interesting lectures on recent European history.

The annual election of Councilors for the Municipality of York will be held next Tuesday, the 19th inst.

Annual meeting of the Stockholders of the Gibson Leather Company, Tuesday Nov. 1st. See advertisement.

Mr. W. T. Whitbread has been elected Secretary of the New Brunswick Land and Lumber Company for the current year.

It now appears there was no foundation in fact for the statements regarding the object of the Hon. Attorney General's visit to Boston.

York County Teachers Institute is in session to-day in Fredericton, and will give a report of its proceedings in our next issue.

Mr. Jerry Barry, who was severely injured by a blow from a sick on the day of the Sports, is, we are happy to say, much improved.

We have received McMillan's Almanac for 1882, a volume well filled with valuable information, which everybody should have.

Mr. Andrew Calhoun, of Gordonville, was in the city last week engaging men for the lumber woods. It is thought that good wages will rule this winter.

Application has been made to the Government at Ottawa for the grant in aid of erecting a Slaughtering and Curing Plant.

One of the men employed on the Westwood Street sewer, named Lutz, was seriously hurt on Wednesday morning by falling into the excavation on some lumber.

Owners of crabs plying on the river have been notified, that the dredge, "New Dominion," is now employed in dredging the channel between Cromocro and Hatch Islands.

Two or three juveniles at the Tea Meeting in the Exhibition building, relieved several of the ladies of their pocket books. They were too young to be taken charge of by the police.

A very handsome monument has been erected in the cemetery at Dochastere to the memory of the late Lieut. Governor Chandler by his sons. It consists of a large cross of grey granite, and is a beautiful piece of workmanship.

The Police Magistrate, we understand, has given orders to the policemen to arrest and lock up any person found intoxicated on the streets. This order, if carried out, will have the effect of preventing a good deal of rowdiness.

The ordinary course of growth was reversed this season in a potato field in Conn. Calhoun's farm, Glenora, near the river. The potatoes grew on the stalks, instead of underground. Specimens of this extraordinary growth were sent to the office.

Mr. Thos. F. Barker of St. Mary's will leave here Nov. 1st, to take charge of the Provincial Stock Farm, and intends leaving his wife and family with him and intends leaving his fine farm at St. Mary's. His removal will be much regretted in the community in which he lived.

Three small boys, the eldest not over ten, broke the Sabbath by breaking into Mr. Clynick's bakery and stealing two dollars worth of bread. The boys were arrested by Mr. McLaughlin, Angus McDonald, and Frank Douglas. Marshall Woodward arrested two of them on Monday.

We had a call one day last week from Mr. Henry W. Barker, of the enterprising and popular firm of F. B. Barker & Sons, wholesale and retail druggists, King St., St. John. Mr. Barker was in town looking after the large business of his office, which is fully advertised in our columns.

Three of the prisoners, who escaped from the lock-up on the 4th inst, gave themselves up to the Police Magistrate, and have been imposed a fine of \$15 on a young man that stole the police, and on the other two, whose crimes were not so serious, \$10 and \$8 respectively.

"The old fashioned tea-meeting" given by the Ladies of the Baptist Church, was held in the Exhibition Building on Tuesday evening. There was a very fair attendance of guests, and the well spread tables were nicely served and well patronized. Excellent music was furnished by the Fredericton Brass Band.

Among the students who are here this year for examination for the Bachelor's degree, are Mr. Geo. W. Allen, from Dr. Barker's office, St. John, and Mr. L. B. Tweedie, of Borden & Atkinson's office, Montreal. The two latter both these young gentlemen success in their examination.

Mr. Ross, of Campbell Settlement, parish of Southampton, who was charged with stealing money, was found guilty and sentenced to the penitentiary for the term of one year. His counsel, Mr. Lugin, has applied for his release on certain formalities in the trial, and the case is now being argued before the judges.

A new sewer is being constructed on Westwood St. from King St. The Carleton St. sewer has been completed, and pronounced an excellent job. These works are done under the immediate supervision of Ald. Burchill, the Chairman of the Board of Commissioners, who has given nearly his whole time during the summer to the service of the city.

On Wednesday morning, a party including the Provincial Secretary, left the city for Stanley to attend "the Fair," a number of prominent citizens have expressed the necessity that kept them from joining the happy company, and enjoying the hospitality of the society "the Ladies of the Baptist Church," but I am so busy that I cannot leave, so you must excuse me. Yours, &c., T. B. D.

Mr. H. G. Winter, of the Customs, has recovered from his illness, and is now attending to his duties.

Mr. Hugh O'Neill's mare "Sorilla" was defeated at the Sussex races on Tuesday by H. McKinnon's bay mare "Ira Gray."

The race was well contested. For the first half mile, in both heats, the horses were neck and neck, and the winner at the end of the race had barely half a neck to spare, and on the second half a length.

One who subscribed, wants to know what the Sports Committee intend doing with the money they have in their hands? We understand that it is the intention of the Committee, to purchase a new building, no doubt, be satisfactory to all who subscribed for the day's sport.

Comm. Gibson has completed a fine new building, nearly opposite his place of business. Its dimensions are 70 x 30 ft. with two stories. The lower flat, which is the full size of the building, is used for a storehouse, and the upper flat, 30 x 30 ft. for a hall, at present used by the Gibson Branch of the Royal Aquarium. The same space was put up by James Johnson of Robinson, and the Hall was finished by James White.

On Thanksgiving night, Thursday the 20th inst., the Fredericton Social Club will give a large entertainment in the Exhibition Building. A large attendance may be anticipated, as all previous dancing assemblies have been successful. The best of good order we have no doubt will be enforced. Nothing will be allowed to mar the harmony of the evening. Music will be furnished by the Fredericton Brass Band.

We call attention to the advertisement of Messrs. Tennant, Davies & Co., who are now opening up a large importation of goods, which has just arrived. The new firm has shown great promptitude in preparing for the demands of the Fall trade, and only three weeks have elapsed between their order and its arrival. Their long experience in the Dry Goods business in Fredericton, has enabled them to make such a selection as will suit all tastes and meet all wants.

Judge Steadman, Henry Thair, and Edgar Hamilton commenced an action against Fishery Inspector Venning for interfering with his rights to fish on the Miramichi as respects the head of the river in the Justice's Courts here a short time ago. The necessary documents for starting the suits have already been filed in the Clerk of the Peace's office. The damages in each case are set at \$5,000. In the case of Mr. Thair's dam, the suit is for the value of the fish lost, and the plaintiff presented a revolver as a threat.

The annual meeting of the Fredericton Curling Club was held at the Waverly House on Tuesday evening, when the following officers were elected for the ensuing year: A. F. Street, President. Jas. S. Neill, Vice Presidents. J. D. Hazen, Sec. Treas. Rev. A. J. Mowat, Chaplain. Mr. O. W. Bouchard, Rep. Men. Com. of Management—A. F. Street, J. B. Grievs, J. S. Neill, and T. G. Loggie. A committee of four was appointed to report at the next meeting, on the advisability of erecting a covered rink.

The Hampden Society Show This exhibition took place on Tuesday at the Society's buildings on the Farm of John Shipley, Esq. There was a grand exhibit of cattle, horses, sheep, etc., on the ground surrounding the buildings. The show was the usual display of farm and dairy produce, fruit, domestic manufactures and fancy work. It was a most successful and profitable occasion. The show was well patronized, and the early morning, when there was quite a fall of snow, nearly enough, we are told, to make sleighing. At noon the show was closed.

The awards were not all in, when we were obliged to leave to meet the boat, so that we cannot give the premium list until next week, when also the exhibition itself, shall have a more extended notice.

An Interesting Letter A prominent gentleman in this city has received the following letter from an inmate of the County institution on Brunswick Street. DEAR SIR,—I am boarding at Long's Hotel, the "Ironside" I mean, I suppose you expected I would be a regular register at "Barker," but I heard so much about "Long's," that I registered here for the reason that I can get my money when you pay in advance, and as my means are limited. I have a room 18 x 20, and I am walking thirty miles per day. The first of next month I am thinking of starting to make Woodstock in eight hours. I would like to start in a car, but I have no money. If you would consent to let me, I can go to it. It is a hard race I have but I can go to it. I would like to see you when you are in the city, and I am sure you would be glad to see me. I am sure you would be glad to see me. I am sure you would be glad to see me. Yours, &c., T. B. D.

A SURPRISED PHYSICIAN. A DYING PATIENT RECOVERS THROUGH THE INTERPOSITION OF A HUMBLY GERMAN. Some weeks ago Dr. G. was a very respectable and widely-known physician, living on C—street, was called to attend a very complicated case of rheumatism. Upon examining the patient he found a man about forty years of age, lying in a protracted and serious condition, with his whole frame drenched with sweat, and his face pale. He prescribed for the patient, but the man continued to grow worse, and on Sunday evening he was found to be in a very alarming condition. The knees and elbows and larger joints were greatly inflamed and could not be moved. It was only with extreme difficulty that the patient could be turned in bed, with the aid of three or four persons. The doctor saw that his assistance would be of no avail, and left the house, the members of the family following him to the door, weeping. At this critical hour, a neighbor, a poor and humble German shoemaker, appeared to the grief-stricken ones as a savior. He asked the doctor to let him try his remedy, and was allowed to try his remedy, and accordingly brought forth a bottle of "St. Jacob's Oil." At a drawing man's remedy, she had no hope, but would try anything, as a matter of duty. The first application cured the patient very much; after a few hours he was able to sit up, and, wonder of wonders, the pain vanished entirely. Great relief was experienced, and the patient, in two days he was well and out. When the doctor called a few days after, he was indeed surprised; for, instead of a corpse, he found a new-made man.—Exchange.

Horses to the value of over \$20,000 have been exported from England within the past few years to America. Breeding animals are becoming scarce.

The Rev. Mr. Green, who is in prison at Lancaster Castle, England, for contempt of court as regards its decision in ritual matters, has an altar fixed up in the easternmost window of his room with a gilt cross above it and candles and other ritualistic emblems and clerical furnishings, and frequently, when his friends visit him, practices his functions as a clergyman.

Deaths. In this city on the 8th inst., Thomas Paisley, aged 77 years, a native of Bingham, Lancashire, England, died at his residence at Rockland, Me., September 28th, 1881. He was a member of the Baptist Church, and a devoted and ardent Christian. He was a native of Bingham, Lancashire, England, and was a member of the Baptist Church, and a devoted and ardent Christian. He was a native of Bingham, Lancashire, England, and was a member of the Baptist Church, and a devoted and ardent Christian.

LENA RIVERS.

CHAPTER VI. THE ARRIVAL.

"Oh, mother, get up quick—the stage has driven up at last, and I feel as if I have come home," said Anna, bursting into the room where her mother, who was suffering from a headache, was still in bed.

"How you do talk! Well, I've seen folks that it served just so; but you'll find over it. Now there was Nancy Soandayke—did John ever say anything about her? Well, she had a small bill after her disappointment—John told you, I suppose?"

"No, no, no, my husband has never told me anything concerning his eastern friends, neither do I wish to hear anything of them," returned Mrs. Livingstone, her patience on the point of giving out.

"Never told you nothing about Nancy Soandayke's a few lines? Well, she had a small bill after her disappointment—John told you, I suppose?"

"I'm so glad," said she. "Now, come to my room and Corinda will fix you up with a new bonnet. I want you to wear a bonnet that is the latest style."

"This is Corinda, my dear," said Mrs. Livingstone, introducing her daughter to the young mistress, immediately commenced brushing and curling the bright, wavy hair which Anna had rightly called beautiful.

"This is Corinda, my dear," said Mrs. Livingstone, introducing her daughter to the young mistress, immediately commenced brushing and curling the bright, wavy hair which Anna had rightly called beautiful.
