HOUSE TO RENT
To rent on Park Avenue, house of seven rooms, good supply of hard and soft water, with garage and hen-house. Apply at Transcript office.

STRAYED
Came into the premises of the undersigned on or about July 12, a two-year-old steer. Owner may have same on proving property and paying expenses. John F. McLean, Ekfrid.

HOUSE FOR SALE
Nine-room frame cottage on lot 2, con. 7, Mosa, for sale. Apply to Mrs. Rose Munroe, Walkers.

GLENCOE LODGE, No. 133, meets every Tuesday evening at eight o'clock sharp in the lodge room, opposite Royal Bank building, Main street. All brethren of the Order cordially invited to attend. Fred Gough, N.G.; Ross McEachren, R.S.

Great War Veterans' Association of Canada (Incorporated)
Glencoe Branch meets every Saturday evening at 8.30 in I. O. D. E. rooms, Main St. All Veterans Welcome.—W. A. Currie, Jr., President; J. Tait, Sec. Treas.

CREAM AND EGGS WANTED
Cream received, tested and paid for daily at the Glencoe Butter Factory. Phone 73 if you want our delivery truck to call. Cash for eggs.

LAMBTON CREAMERY CO.
Alex. McNeil, Local Manager.

PIANO INSTRUCTION
THEODORE R. GRAY, Organist and Choir Director, Glencoe Presbyterian Church, teacher on staff of Institute of Musical Art, London. Junior and senior pupils accepted in piano and theory, temporarily at Presbyterian school room Monday. Pupils prepared for examinations.

GARDEN PARTY LIGHTING
Committees in charge of this work will do well to make early arrangements for good lighting.

THE DELCO LIGHT
is the only satisfactory light for this purpose. Terms on application. Satisfaction guaranteed.

M. C. Morgan,
Delco Light Products, Kerwood

JAMES POOLE
Fire, Life, Accident and Plate Glass Insurance Agent, representing the greatest fire insurance companies of the world and the leading mutual fire insurance companies of Ontario. Office at residence, first door south of the Presbyterian church, Glencoe.

INSURANCE
The Ontario Farmers' Weather Insurance Mutual Co., Grand Valley, and the Great-West Life Assurance Co.—Mac M. McAlpine, agent, Glencoe, Ont.; Box 41.

INSURANCE
H. J. JAMIESON
District Manager of
CANADA LIFE ASSURANCE CO.
at GLENCOE
Also the leading Companies in Fire and Automobile at low rates.

DISTRICT AND GENERAL

Tobacco growers are looking for 80 cents per pound for this year's crop. Strathroy's hydro street lighting was reduced \$75 last month or \$900 a year.

Four hundred different styles of automobiles are produced in the United States.

One hundred and sixty school teachers started a tour of Northern Ontario this week.

It is stated that whiskey is being torpedoes under the water from Windsor to Detroit.

The Sunday schools of Newbury had a picnic at Port Glasgow Wednesday afternoon of last week.

Two degrees of frost was reported in the Regina district on Thursday night, with but slight damage.

Miss Ida Horton of St. Thomas was drowned while bathing in the creek at Port Talbot on Friday evening.

The main street of Zion City, Ill., is covered with deep sand to prevent automobile speeders from annoying the town.

Hon. T. W. Crothers, former Minister of Labor, and West Elgin's representative in the Commons, is mentioned as one of those likely to be chosen to fill one of the Ontario vacancies in the Dominion Senate.

A plot of six acres in Dawn township is reported to the Lambton Agricultural Department as being partly destroyed by the army worm. It is seven years since this insect pest did damage in Lambton county.

The National Safety Council declares a person is killed by an automobile every 35 minutes and that three times as many persons are killed by motor accidents as in all factories, mines, railroads and other industries in the United States.

Comment is made in the current issue of the Dominion Fruit and Vegetable Crop Bulletin on the serious shortage of fruit baskets and apple barrels in all parts of Ontario. In some places the situation has reached an acute stage.

During the week ending August 2, anthracite coal production in the United States was 1,757,000 tons compared with 1,870,000 tons same week last year. Output to date is 52,318,000 tons, against 49,177,000 for corresponding period last year.

Living prices in June had increased 136 per cent. over pre-war rates. The largest single increase is in food prices, which have increased 33 per cent. since last December. The same rates of increase apply to the United States and Canada.

During the first six months of this year 12,859 immigrants from Europe and the United States passed through Winnipeg on their way to homes in the West. The settlers brought with them more than \$6,000,000 in cash, and goods worth about \$2,000,000.

The Strathroy Age would have the Sydenham river in that town dammed up and a lake created on the flats in the centre of the town, following the example of Stratford, where the Avon river was converted into Victoria Lake, in the heart of the city.

Many Oshawa men employed in the motor industry have been laid off, and most of them, as the next best thing in sight, have gone West on the harvesters' excursions. The reasons assigned are the high wages insisted upon and a falling-off in the demand for motor cars.

After long delay and several refusals of assistance from Washington, federal prohibition officers in Detroit have secured provisions for a patrol for the Detroit river to guard the shores of Michigan from run runners and smugglers and have now three boats in operation.

Out of 600 cars examined at the corner of King and Ekfrid streets in Chatham on Saturday evening last, over 100 were improperly lighted. The provincial authorities are making a widespread campaign to have the provisions of the Motor Vehicles Act enforced to the letter.

While driving on the Currie road in Metcalfe township the auto of ex-Warden John Currie of Middlesex was completely wrecked by fire. A short circuit caused a blaze which Mr. Currie extinguished without much trouble but while doing so the car ran off the road a short distance and tilted slightly. While engaged in repairing some damage caused by the fire a gentleman in a passing automobile volunteered assistance, and lighted a match to look for something in the grass that was lost, when the whole thing went up, vapor from escaping gasoline causing an explosion.

A visitor in Bothwell from Detroit said to a friend: "When I made sixty cents an hour I paid for a comfortable home, but now I am getting a dollar and fifty cents and can hardly make ends meet. I want to get back to the farm." Commenting on the above, the Times says: "It might be opportune to mention that this gentleman once lived on a farm and was enterprising and a good worker, but things looked rosy in the city and he went there, and in twenty years made a five thousand dollar home. Would he have done as well on the farm among the Hessians by San Jose scale and the wire worm? They like the profiteer in the city—live on someone else. But, after all, plenty of money has been made and is now being made farming, and no doubt if our city friend had remained on the farm he would have been able to ride in an automobile, the same as he does now, only a Chalmers instead of a Ford, if he so desired."

"IDLE RICH" MUST WORK

New York, Aug. 26.—The "idle rich" and all persons of large property holdings in the United States must go to work if Bolshevism is not to grip America," declares Mrs. Seth Barton French, prominent in New York society, who has been engaged in work abroad for the last five years.

Mrs. French said emphatically that it was time for those with money to get busy and correct the wrong impression now existing in this country concerning those who are favored with the good things of life.

"Although I have only been here a short time on private business, I have found out that there is a wrong attitude here toward Bolshevism," she said. "While I hold no brief for it, it is generally understood here to stand for murder, rapine and seizure of private property. Many fail to see that it is only a sort of advanced Socialism and that it must be examined from that angle, too. The people in America must wake up."

"When people drive a high-powered car at full speed, endangering the lives of children of workers playing in the streets, they are making Bolshevists, and making them fast, for the workers do not see why the rich are not working as they are. It is time that young men who are spending the wealth made by their fathers wake up to the danger that is threatening."

"America has made great wealth from the world war and has suffered but little in comparison with England and France, which count their dead above a million each. The least that can be done here is to come to a realization of the responsibilities that come with wealth. Work is the true correction of things for a long time to come."

FIRST CONSOLIDATED SCHOOL
Six school sections in the township of Lobo, Middlesex county, have united to form a consolidated school. This will be the first consolidated school in this part of Ontario. A building will be secured for temporary use until a permanent one can be erected. The latter probably will be built on a portion of Memorial Park, Parkhill, which is centrally situated.

BASKET PICNIC
The annual picnic of the United Farmers of Mosa and Ekfrid will be held in the grove of Herbert Weekes, 3 miles south of Glencoe, Tuesday afternoon, August 31st.—The program of entertainment will include addresses by R. H. Halbert, M. P., and several members of the Legislature from the surrounding ridings, as well as the County Director of West Middlesex and some lady speakers. Music will be given by the Strathroy brass band, Harvey Lloyd, comedian, of Toronto, has been engaged. J. G. Lethbridge, M. P., will act as chairman. Following the platform entertainment there will be a series of sports and games, including baseball match between West Lorne and Glencoe, and tug-of-war between Mosa and Ekfrid teams. Admission—adults, 25 cents; children, 10 cents.

THE PROPER CONCEPTION
At an important meeting in Canada recently to arrange for a campaign of a civic patriotic nature the suggestion was made that the newspapers be asked to support it in as large a measure as possible. The suggestion brought a vigorous statement from a prominent business man present.

"It's up to us to pay our way," he said with emphasis. "We have a good cause here and I hope and expect the newspapers will support it. But there is far too much of this business of expecting the newspapers to carry the whole burden of every patriotic or charitable movement. Advertising space is all a newspaper has to sell, and it's up to us to buy it to advance a cause we are interested in."

Strange to say, the sentiment was re-echoed by every man present. The people generally seem to be getting something of a new conception of the newspaper business and obviously a proper one.

The poetry of motion is portrayed by the picture of a beautiful girl with a bug down her back.

EVILS OF CATALOGUE BUYING

When a newspaper carrying advertising from retail merchants advocates buying at home its attitude is apt to be misunderstood, since some of the persistent buy-away-from-home sinners will charge it with favoring its advertisers. No such charge can be made against the Farmers' Sun. Its editorial writers know the danger of diminishing local and national trade for the benefit of large urban and foreign trade. Here is what the Farmers' Sun thinks about catalogue buying.

A dollar spent out of own is a dollar lost to that town, it being deposited in the city and kept there. The money you spend with Toronto mail order firms detracts from the natural progress of your town. Be fair to the home manufacturers, contractors and merchants. They have invested their capital here with reasonable expectation of patronage and a fair profit. Many of them put every cent they make back into their business, adding to stock and improving the premises. Repeatedly it has been demonstrated that you can buy to advantage at home. There is also this fact to consider—and it is important—if goods are not right you can always go back to the home merchant or dealer for an exchange or adjustment; whereas you have to keep the out-of-town "junk" that you thought was a bargain. The big mail order catalogues may look pretty and all that, but their best use is first-aid in relieving the fuel situation. Keep all the money you can circulate in your own locality and when money gets scarce there will be much more available to you than there would be if you sent your money away from your town or locality.

MURDER AND THE MOVIES
The Japanese have gone far in their demand for censorship of the moving pictures. They have set up in Japan not one censorship, but two: one for movies for adults, who are presumably able to take care of their own morals, and another for pictures for those under sixteen, to which children alone will be admitted.

The cause of this wholesale discrimination in favor of impressionable immature minds was shocking, but the complaint seems to rest on a single case, the Japanese not having waited for the piling up of evidence of evil effects. Two boys carried off and murdered two school girls, and the police became satisfied that they were inspired to the crime by a moving picture which they had seen. Thereupon followed the rule for the separation of adults and children at moving picture shows and the different sets of restrictions upon the films shown to the adult and the juvenile audiences.

Some uplifters on this continent have based their demand for a closer censorship of the movies upon the statement that some pictures now shown are demoralizing to childish imaginations and result in harm. Others have asked for special pictures for children, on the ground that pictures should be made a source of inspiration and uplift for the young.

Admission—adults, 25 cents; children, 10 cents.

SAY FARM LABORERS DESERTED
The lack of sufficient and efficient farm labor is keenly felt by the farmers in Kent county, and especially in the southern section. The large number of men who left the county last week to help in the Western harvest has caused much bitter feeling among the Kentish farmers, some of whom declare that they will not take back the men who deserted them at harvest time and left some of their crops to rot in the fields.

H. I. Johnston, local druggist, agent for Templeton's, Limited, has samples of Rheumatic Capsules, and RAZ-MAH for Asthma and Hay Fever.

Honey is scarce this season and is selling at 30 to 35 cents a pound.

Address communications to Agronomist, 73 Adelaide St. West, Toronto

Free Range Poultry Problems.

There are many advantages to raising the young stock on free range, but this does not mean that they can be turned loose without care and ready for the laying-houses. The colony houses should be located on well-drained ground near some form of shade that will act as a protection against sun and wind. An orchard or near an evergreen windbreak makes an ideal spot.

The watering of the free range poultry is an important factor in their development. Allowing birds to be without water for a few hours on a hot summer day will seriously injure them and retard growth. The water supply must be adequate. It must be given frequent attention to be sure the supply is sufficient and if automatic fountains are used they must be examined to see that the feed pipe is not clogged up.

Poultrymen with a spring or brook in their meadows have an ideal method of watering the growing birds. Some poultrymen haul the water to the range each day in barrels on a stone-boat. The water is then dipped into the galvanized pails or crocks. Occasionally a poultryman has the water supply piped to the range in order to save labor. When large barrels of water are inverted on the range with the idea of furnishing several days' supply, a danger exists. The water may become warm and stale or the barrels covered with a dirty scum which seems to make it unhealthful for the birds. Unclean drinking water is one of the common causes of digestive troubles in poultry during hot weather and the important point is not so much to save labor as to furnish these birds with a supply of pure fresh water at all times.

Pests and thieves are another of the free range poultry problems. Wensels and rats can be eliminated by raising the colony houses about a foot from the ground. This furnishes no breeding places beneath the houses. Stone heaps and brush piles should also be removed to keep pests away from the range. A good watch dog that will run at hawks which swoop near the ground is a great protection to the poultry. Steel traps on poles will snare some of them. Hanging a dead hawk to a pole on the range will also help to keep them away. One poultryman reports hanging some bits of bright tin to a pole on the range. The flashing of the sun against the tin seemed to keep the hawks away from the range.

Locking each colony house at sundown seems to help in preventing poultry thieves. Then the poultryman can tell if any thief has entered the house. The lock seems to keep them from trying to enter. A good dog kenneled on the range will usually give the alarm promptly and frighten away any prowlers after poultry.

Colony houses on free range give the poultryman a chance to raise his

birds under ideal conditions. But the same sanitary precautions must be taken as with laying-houses. The small houses must be frequently cleaned and sprayed and the roosts painted with kerosene or some like paint to keep down the red mites.

Utilizing Fall Pastures.

At present prices for grain feeds every effort possible should be made to make profitable use of late fall pasturage. Horses and cattle that are in good condition at the beginning of the winter will pass through the cold season without falling away in flesh condition or milk yields.

Pastures that have been stocked up to maximum capacity during the late summer and early fall should be given a chance to recover and make a vigorous fall growth to serve as a protection to the grass roots during winter.

The practice of pasturing clover and timothy meadows during the fall depends largely upon the fertility of the land and the amount of growth that the meadow has made. If a heavy growth has been made a reasonable amount of pasturing when the ground is dry will prove beneficial. The fresh green growth of clover and timothy furnishes a very acceptable addition to the food supply at this season.

On the average farm, however, it is very doubtful if the amount of pasturage furnished will pay the expense of maintaining interior fences. In some fields this condition may be overcome by erecting temporary fences, woven wire or barbed wire, strung on posts driven into the ground. Such fences can be shifted so that the stock can gather considerable food. If the grass has made a rank growth after haying, a limited amount of pasturing leaves the meadow in better condition for the summer season.

New seedlings of clover and timothy should be pastured lightly. Sheep are better suited for this purpose than horses and cattle, but care must be taken to prevent them grazing the meadows too closely. Stalk fields, from which the corn and stover have been removed, furnish considerable feed in the form of grasses, weeds and an occasional stalk and ear of corn. It is well to allow the stock to clean up this feed that would otherwise go to waste. In order to provide more good fall grazing it is a good plan to sow rye at the last working of the corn crop.

The practice of pasturing wheat and rye is open to criticism unless one has a large acreage and only a few head of stock. It is certainly preferable to seed a stalkfield in rye and keep the stock off from the wheat and rye crops that are to be harvested for grain. Rye sown in the corn field furnishes good grazing, a good cover crop and a good green manure and there is no danger of a crop of grain growing in the regular crop rotation being damaged.

service it is vitally important that the clutch be kept in absolutely efficient order. This part has a very strenuous part to perform and needs careful attention. In the case of an oil disk clutch it should be drained once a month and then filled with kerosene. Then with the engine started the clutch pedal should be operated about a dozen times to insure the kerosene getting to all the surfaces. Next drain out the kerosene and refill the clutch with fresh cylinder oil.

Every thrashing crew should carry along two or more approved chemical fire extinguishers to combat incipient fires.

Poultry

Nature has decreed that all fowls shall throw off their old plumage in the summer and put on a new coat of feathers in the fall. Those hatched early in the spring usually molt in the second summer following and every summer after that so long as they live. Those that are hatched later, molt later and very late hatched birds sometimes molt so late in the fall that they are not sufficiently protected from the cold weather and do not recover their strength and get on their new coats before it is too late to be profitable for egg production that season.

For example, a fowl of any medium-size variety hatched about April 1st, 1920, will molt usually in August or September, 1922. Those hatched later are likely to molt later unless, as sometimes happens, the owner undertakes to hasten the molting period. Hens seldom lay while molting on account of the strain on the system involved in the production of new plumage. No effort should be made to induce them to lay because they need the rest from egg-production to keep themselves in good condition.

Some poultry keepers have practiced what is known as the forced molt. The method is to put the hens on free range and feed them very lightly for two weeks until they are a little below medium flesh or really thin in flesh. Then they are confined in houses and small yards and fed heavily on food that is more or less fattening; that is, food containing considerable corn or corn meal or both, and some beef scrap. The sudden fattening seems to loosen the feathers and cause them to fall out. Then of course new feathers come in more quickly because Nature does her best to protect the fowl. Special care is taken of these birds during the time they are growing their new plumage and a very wide variety of food is furnished so that they may have every opportunity to keep well and strong and to produce the new coat a little out of Nature's season.

Hogs

Shade and clean water during the summer months are essential to successful pork production. All kinds of hogs must have shade. Too much direct sunlight and heat is a frequent cause of hogs falling to thrive and is often the cause of hogs dying. During warm weather small pigs often blister on the backs and about the ears from which causes, in some cases, severe infections and bad sores.

Expensive shelter is not necessary. Shade trees provide ample protection. Where no trees exist temporary shade may be provided by the covering of a frame with canvas, under which the hogs may go for protection. Some producers build individual hog houses with sides that may be lifted to provide an increased amount of shade during the summer months. This plan furnishes shade for hogs where only a few are kept.

Clean fresh water for drinking and wallow is equally as important as, or more important than, shade. The old-time wallow hole covered with acorns, which was once the drinking fountain, is no longer in high favor. Hogs must have water to drink, and if they cannot have fresh clean water in the trough or fountain, they will drink where they can find it, regardless of its condition. This fact has caused some to believe that hogs prefer drinking better but they do and will demonstrate the fact when they are able to get fresh water from the well.

The clean wallow hole is also important. Hogs may use the muddy wallow if no other is available; but, again, if clean water is provided in a concrete wallow they will prefer it to the mud hole. An excavation six to eight feet, or larger, and about fourteen inches deep, walled and floored with concrete and filled with water, will prove a profitable attraction to the hogs on hot days.

The Dairy

We need to get into our country the idea that work is the most inspiring thing in life. Any kind of work with milk is hard, steady and confining and many of us who have it to do under discouraging conditions find it easy to drop into the mood that makes it drudgery. When such a mood overtakes us, perhaps it is time to take stock of ourselves and our conditions. Are we submitting to unnecessarily hard conditions? Would a little planning change the picture of a tedious outlay of money, or maybe, just a little more tact and "jolly" contribute towards better, easier work?

Are we holding the high ideal of "the very best" as our standard of achievement, rather than letting our dairy work be an unpleasant but necessary side-line of endeavor? Are we spending strength, both nervous and physical, in any way that is not necessary? Who have less to do and more to do with? Then let us remember the great dignity and honor of work that is contributing a necessary thing to human welfare! In these days when work seems to have lost its dignity and the people who most loudly denounced the luxury and idleness of the rich are more eagerly grasping for the same luxury and idleness, let our dairy women steadily change the picture of a world that needs our service; of little children who cannot grow into strong citizens without pure milk; of communities that must degenerate without dairy foods and so do our honest best.

Wintering Bees in the Cellar vs. Outside.

Whether to winter in the cellar or outside is a question that every beekeeper has to settle. Where the winter is long and steadily cold, the cellar is usually more satisfactory, but outside wintering succeeds in some moderately cold places if proper precautions are taken. At the Central Experimental Farm, Ottawa, the two methods have been compared during the last five years. Wintering outside has been done in an apiary protected from wind by a board fence 8 feet high, the hives placed in cases made to hold four colonies each with packing material around the sides, beneath, and above the hives. The cellar was a low dry one under the Administration Building, which was heated all winter. The results have been very close, but outside wintering has brought the colonies forward slightly earlier in the spring.

In the wide belt where both cellar and outside wintering are about equally satisfactory, the deciding factor appears to be convenience. If the beekeeper has a well insulated and dry cellar, by using it he will save the expense of constructing wintering cases, and also a wind-break, if this is not present. For a few colonies in a cold region, a boarded-in part of the dwelling house basement makes a good cellar for the bees, and it is an advantage if the basement contains a furnace. Such a cellar should have a steady temperature somewhere between 42 deg. and 50 deg. F. In outside wintering, it is very important to protect the apiary from wind. Outside wintering has the advantage that

The Welfare of the Home

Common Sense Regarding Food, Work and Rest in Hot Weather.

By IDA M. ALEXANDER, M.D.

In summer days, every one should have some knowledge of how best to keep cool, not just because the heat is an unpleasant sensation but because it robs us of our energy and "pep."

Many summer kitchens are far too hot in summer but at least the windows should be opened at the top so the heat rising from the stove can blow out of the window and not form a layer of hot air at your head. The bedroom, too, should have the windows open at the top.

When the night is so hot that sleep is difficult, try a bag of cold water placed at the back of your neck. Use just cool enough to give you a chill, or place the cool water just over the heart.

Even should you feel very tired at night, dip a towel into a bowl of water, then a tablespoonful of baking soda in it and then sponge over the whole body.

If you should find on a hot day, that the perspiration has suddenly stopped and the skin becomes dry and hot and yourself feeling "queer," get busy. You have what is called a heat stroke. Your heat-regulating mechanism is tired out trying to keep you cool and you must now cool yourself or have trouble. Do this by emptying the contents of the water pail over your head and wet clothes and all, get out in the shade of the house, lie down and rest flat on the ground.

Few farmers are as wise about feeding the human engine as they are about feeding the stove. There are certain foods as there are certain woods that give out a great deal of heat. These foods should be eaten in winter. There are certain other foods that, like willow and poplar, burn up (digest) quickly and without much heat. For that reason we should eat these foods in summer.

Oatmeal and cornmeal are heat-making foods. Wheat meal and rice are better for summer.

Pork, butter, rich cream and greasy gravies are heat-making foods and green vegetables are the "coolest" thing you can eat. It is just ordinary good sense not to put heating food into the body when there is too much heat everywhere; but how many families there are who use salt pork all

summer long! There is very little muscle-making element in pork but there is much heat made from it.

Dried beef is a better summer meat than pork. Buttermilk is the very best summer drink. City folk are wise to this and the soda fountains get ten cents or more for a glass.

If you eat the greens which grow everywhere during the summer, you will not need to spend money for blood tonics, for green food makes red blood, just as surely as green grass makes red blood for the cow and the milk of the red-blooded cow makes yellow butter. This yellow butter colored by the green grass, has a medicinal value which the pale butter does not have.

The young children especially need the yellow butter for their proper growth. Did you ever raise carrots to give your cows because you had discovered that feeding the yellow carrots made the butter yellow? We have now discovered that the yellow carrots are just as valuable for small boys and girls, making red blood and stimulating growth. There is something more than color in the yellow carrots, cream and butter.

The growing foods carry color signs that say to the children, "Come and eat me! I will make you grow! I will make you strong and rosy!" and as children like to grow and be strong they will accept the invitation if you will just translate it to them.

Then, too, if the child is to stay healthy in hot weather, you will sometimes have to make them lie down to rest, especially during the hot part of the day.

On a recent trip to the West I met a farmer's wife and her husband. They had nine children, the oldest nineteen, and all of school age attending school. The mother was the picture of health. She was beautifully, that is to say, suitably, dressed. Her husband thought it very foolish to have a woman do work that machines can do as well. "Five cents worth of gasoline will rub the clothes, why make the woman do it?" he said to me, and I agreed with him.

Because this woman's strength had been saved where it could be saved, the whole family was healthier, happier and better citizens.

Financial Notes

Ottawa—It is rumored here that a very heavy investment of British capital is likely to be put into the development of the Canadian pulp and paper industry.

Winnipeg—A ready market has been found for the recent offering of \$800,000 of the City of Winnipeg being made by Canadian bond houses. The present is regarded as about the quietest period of the year, but notwithstanding this, practically the entire issue has been placed.

Nelson, B.C.—By a big margin the largest ore total received at the Trail smelter for a ten-day period this year, the receipts for the closing ten days of July touched the record mark with 12,863 tons of smelter feed, of which 194 tons was concentrates. This brings the total receipts for the year to date at Trail up to 181,157 tons of smelter feed, 3,934 tons of this total being concentrates and 177,223 tons crude ore. The Caledonia mine, at Adamant, joins the shipping list with a small trial shipment.

Guelph—A new industry is shortly to be established here. This will be known as the Guarantee Battery Corporation of Canada and will be capitalized at \$400,000. The company will operate under a Dominion charter and will be managed solely by Canadians. They will manufacture chiefly the kind of batteries made by the Guarantee Battery Corporation of Denver, and will employ a large number of workmen. Arrangements have been completed for the site, and work will commence shortly upon the plant.

St. John's, Nfld.—The Newfoundland Ritz Hotel Co. has been incorporated here for the purpose of erecting a million dollar hotel in the famous Ritz chain.

Reviving Old Meadows.

To renovate old meadows, harvest the hay crop early. Just as soon as the field is clear, disc, harrow or cultivate the surface sufficient to break some of the sod surface so that seed will come in contact with the soil.

Sow a mixture of the following: Timothy, 6 lbs., Red Top, 6 lbs., Alsike, 6 lbs. per acre.

When the seed has been sown, run a spike-tooth harrow over the surface to cover the seed. Next apply a top dressing of barnyard manure at the rate of 12 tons per acre. This work should be done immediately after the seed is sown. The earlier the seed is sown the stronger the growth of plants will be to withstand the winter. Manure applied early will force the growth of the young plants, revive the parts of the old meadow that is broken and will be well incorporated in the soil before winter sets in. Low pasture lands may be revived in the same way and seed early in August.

Agriculture is Canada's premier industry.

REAL PEOPLE

Halfway through the hedge, Jessica Tyrrell looked at the figure bending over the panny bed.

"I need you so much more than the pannies do, Mrs. McLeod!" Mrs. McLeod looked up with a smile. "May I wash my hands first?" she asked.

"No, I can't wait." Mrs. McLeod laughed. It was so like Jessica: she never could wait. "What's the crisis?" she asked, dropping a handful of purple and gold into Jessica's lap.

"The same old crisis—just me!" the girl answered, her fingers playing with the velvet petals. But in spite of the pannies and Mrs. McLeod's sympathetic silence, it was hard to speak out. "Hard, because it's so selfish," she declared, as if the first part of the thought had been spoken. She could always trust Mrs. McLeod to understand.

Mrs. McLeod nodded. "I know; that's where most of our battles are fought: Would you mind telling me about this particular selfishness, Jessica?"

"It's staying in this little dead village when it seems to me that I'll die if I don't get out into life! I feel like a heathen when I think of Aunt Hettie and Uncle Jim, but it's the way I'm made. Please don't think I mean amusements—I'm not so small as that! I mean people who are really living—who are interested in the big things of life."

Mrs. McLeod smiled an odd, "remembering" kind of smile.

"Did I ever tell you why I settled down here?" she asked.

"Why, I supposed it was to have quiet for your painting."

"No. It was because I wanted to live among real people."

"You wanted—real people—here!" Jessica gasped.

"Of course they are everywhere; don't mistake me about that! But in the city there is so little time; it seems as if you never have a chance to know about the things that count. I wanted a place where I could be a real neighbor. I came here to rest one summer, and before three months were over I knew I had found my corner."

"There was Miss Sally Little. Did you ever stop to think what it meant to love her poor sister's mind well? Think of the infinite patience of those three years. A great alienist whom she consulted at the beginning says it is one of the most wonderful things he has ever seen. Then there is your Uncle Jim. He has taught his Sunday-school class thirty-five years. Do you know how many boys he has made real Christians? I asked him one day. There are eighty-seven. And Luella Sheldrick! Do you know she is planning to go to college when her four brothers don't need her any more? She will be twenty-nine when she enters, but she is working and planning for it now. And—"

"Don't tell me another one!" Jessica cried out. "I want to prove that I am not utterly blind."

"Great adventures to you!" Mrs. McLeod called; but only the swinging bushes answered her. Jessica had gone.

Power Farming for Women.

Power farming makes work on the farm lighter and pleasanter for the farmer; that fact is well established. But—what does the farm woman think of the new wrinkle in agriculture? A salesman for one of the tractor companies said recently that farm women are fast becoming even more enthusiastic over power farming than the men. Machinery run by power means fewer hired men and consequently less work for her always well-filled hands.

Now and then we find farm hands who fit in pleasantly at the family dinner table and with the rest of home life but we all know—at least we women—that the average hired man and the service housewife has to give him as far from being un-mixed joys. So it has come about that the women's view of power farming, which did not seem to figure in the beginning, is now having a direct effect on installation of power farming, and wife smiles as broadly as husband when the tractor and motor truck do the work.

Daughter, too, of course, shares her mother's relief at less work in the house. In many cases she likes power farming for itself and enjoys having a hand in it. She has been driving her father's car, so when the tractor and truck are added, she is all ready to take her place at the wheel and is doing it on numbers of farms.

Brownies.

I watch the little brownies dance Upon the windowpane; At least that's what I say they are. Though mother says they're rain.

Sometimes the little brownies come All clad in coats of mail— At least that's how it seems to me, But mother calls them hail.

In wintertime come brownies, too; They crowd into the street. And trip the men and horses up. And mother says it's sleet.

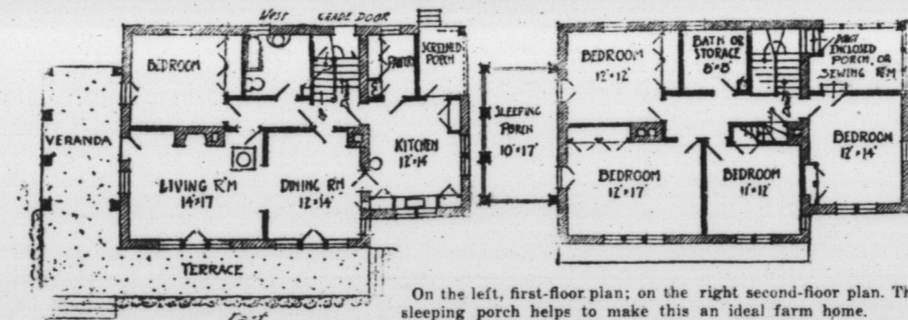

Oh, how I love the ones that come When Christmas candles glow! They're dressed in soft white coats of fur, And mother calls them snow.

PARTRIDGE TIRES
Game as Their Name

Economy is a savings bank into which men drop pennies and get dollars in return.

The economy of Partridge Tires is in their durability. By giving long service they save new tire costs, and their dependable wearing qualities eliminate the expense of repairs.

A Well-Planned Farmhouse

The designer of this well-arranged country home gives the following description:

"The plans explain themselves, mostly. In Ontario our winter storms and high winds are westerly; so I have placed living rooms on the east side of the house, and only enough windows on the west for light and ventilation. The kitchen I have set where the housewife can see the street—a great comfort to the woman in a lonely neighborhood; and for this reason the sink where one does so much of the daily work is placed under the front windows. The extra piping required is more than made up for by the comfort of the worker. The kitchen is well supplied with cupboards. In the pantry is a cooling cupboard with wire shelves and screened openings at bottom and top.

"The ground-floor bedroom is planned for the aged one, or the mother with little ones to care for. No tired

farm woman should be obliged to run up and down stairs to care for a sick baby or an invalid.

The closets are similar to some I saw in a city flat. Each one is a sort of built-in wardrobe about two feet deep, with two shelves at the top and a drawer one foot deep at the bottom. Narrow doors were placed across the front so that the whole interior could be opened up when necessary.

"The grade entrance provides a means by which the men may enter, going directly to the bathroom, or upstairs without tracking up the kitchen floor.

"A sleeping porch is a great boon in hot weather. At least a balcony should be provided where bedding may be aired and sunned, and bedroom rugs shaken.

"I would build this house of light yellow brick, though a farmhouse looks well clapboarded and painted white. I would finish the woodwork in ivory paint, except in the kitchen,

where pale sea-green is the best color I have ever tried. A refrigerator might be built in between the pantry and screened porch. Some would like a garbage chute in kitchen, but where parings and waste vegetables must be fed to stock, it is better to provide a receptacle for the edible portions, and burn the rest. A chute for soiled clothing could be provided in the upper hall.

"This house could be built by degrees; the kitchen part and the big two-story verandah could be left off at first. In that case, the dining room would serve as kitchen; a light, temporary back verandah could be built. The terrace would answer as a makeshift front verandah. Later the temporary verandah could be moved away and used as a shed, or some such thing.

"There is a low attic, used for storage, over the main building; small windows in either; the give plenty of light and air for all practical purposes."

THE RESOURCES OF NEWFOUNDLAND

CROWN COLONY OF THE BRITISH EMPIRE.

Besides Famous Cod Fishery the Island Possesses Mineral and Timber Wealth.

The island of Newfoundland, though so close to the shores of Canada and being indistinguishably Canadian in character, is a distinct Dominion of the British Empire with its separate legislature and government and regulated from within its own narrow confines. The area of the island, which is closer to the European continent than any other part of North America, is approximately 42,000 square miles, and its much indented coast line contains many fine bays and deep harbors.

Famous for its Cod Fisheries.

Newfoundland's chief resource is its cod fishery, the fame of which has extended to the corners of the globe. It is divided into three branches, the Shore, Labrador, and Bank fisheries. The Shore fishery follows round the 2,000 miles of coast which constitute the circumference of the island; the Labrador fishery engages about 25,000 men; and the Bank fishery is prosecuted on the great banks or ledges that lie off the southern and eastern coasts. The latter fields are harvested not only by Newfoundlanders but by Canadians, Americans, French, and Portuguese. About 60,000 people on the island are directly interested in the cod fishery.

Second in importance is the seal fishery, exclusively pursued by the islanders. It is a very profitable industry, which has increased considerably in importance of recent years, by the introduction of more modern methods and better ships. Despite the yearly slaughter, there is practically no decrease in the herds and no fears are entertained of their extinction.

The Herring fishery is almost equally valuable, the product of the island waters being considered as one of the "Scottish" A fleet of about 100 vessels, American, Canadian and local, take harvest every winter; thousands of barrels of the fish are frozen and find a ready market when exported to the American coast.

An Unfailing Harvest.

The waters of Newfoundland yield an unfailing harvest of cod, capelin, herring, salmon, halibut and lobster, as well as seal. Virtually all the fish product is salted and exported in that state.

Development of the interior has not been extensive, but as the country opens up, many rich mineral deposits are being revealed. Minerals of value now known to exist include various iron ores, pyrites, copper, galena, antimony, gold, asbestos, coal, barytes, mica, zinc, petroleum, manganese, and china clay. The Canadian steel industry receives practically the whole of the supply from Valparaiso. The greater part of the interior is unexplored.

Extensive Timber Areas.

More valuable than the mineral industries and equal to the fisheries in return, is the utilization of the island's forests for the making of pulp and paper. The first step was taken by the Hiramworth interests of London, who acquired 2,000 square miles of timber and established an enterprise with \$5,000,000 initial capital. Other firms have followed, but there are still extensive areas capable of supporting large pulp and paper concerns. The pulp and paper mills on the island are continually active and producing to capacity, and are almost entirely staffed and run by Newfoundlanders.

Baby Has Gone to School.

The baby has gone to school; ah me! What will the mother do. With never a call to button or pin.

Or tie a little shirt? How can she keep herself busy all day with the little "hinderling thing" away?

Another basket to fill with lunch. Another "good-bye" to say. And the mother stands at the door to see.

Her baby march away; And turns with a sigh that is half relief.

And half a something akin to grief. She thinks of a possible future morn. When the children one by one Will go from their home out into the world.

To battle with life alone. And not even the baby left to cheer The desolate home of that future year. She picks up garments here and there. Thrown down in careless haste. And tries to think how it would seem If nothing were displaced; If the hours were always as still as this. How could she bear the loneliness?

What Is An Egg?

"And what is an egg?" asked the missionary who was testing his hopeful pupil's knowledge of English. "An egg," said the boy, "is a chicken not yet."

If you can't spray then whack! An old brush broom will spread the spray materials on the insect and disease infected plants of your backyard garden.

PALLID CHEEKS MEAN ANAEMIA

New Health Can be Obtained by Enriching the Blood Supply.

When a girl in her teens becomes peevish, listless and dull, when nothing seems to interest her and dainties do not tempt her appetite you may be certain that she needs more good blood than her system is provided with. Before long her pallid cheeks, frequent headaches and breathlessness and heart palpitation will confirm that she is anemic. Many mothers as the result of their own girlhood experience can promptly detect the early signs of anaemia and the wise mother does not wait for the trouble to develop further, but at once gives her daughter a course with Dr. Williams' Pink Pills, which renew the blood supply and banish anaemia before it has obtained a hold on the system.

Out of their experience thousands of mothers know that anaemia is the sure road to worse ill. They know the difference that good red blood makes in the development of womanly health. Every headache, every gasp for breath that follows the slightest exertion by the anemic girl, every pain she suffers in her back and limbs are repeated signs that you have not taken the best steps to give your weak girl new blood, and the only sure way to do so is through the use of Dr. Williams' Pink Pills.

New, rich, red blood is infused into the system by every dose of these pills. From this new rich blood springs good health, an increased appetite, new energy, high spirits and perfect womanly development. Give your daughter Dr. Williams' Pink Pills and take them yourself and note how promptly their influence is felt in better health.

You can get these pills through any dealer in medicine or by mail post-paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville Ont.

A New Excuse.

A schoolmaster said to a small boy: "Why were you not at school yesterday, Morgan?" "I was very sick, sir," replied the boy.

"What was the matter with you?" asked the schoolmaster.

"Sore decay," answered the boy, adding: "It's very bad in our family just now. My grandmother died of it a fortnight ago, at I think our baby is sickening for it now, sir."

Minard's Liniment For Dandruff.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

Effort.

No endeavor is in vain. Its reward is in the doing. And the rapture of pursuing Is the pride the vanquished gain. —Longfellow.

Why He Fell.

"Mother," said Jim one morning, after having fallen out of bed, "I think I know why I fell out of bed last night. It was because I slept too near where I got in."

Musing a little while, as if in doubt whether he had given the right explanation, he added:

"No, that wasn't the reason; it was because I slept too near where I fell out."

Rooster Eggs.

A French scientist says that by examining an egg he can tell whether it will produce a male or a female chick. The egg that will hatch out a rooster is slightly heavier relatively to size.

Where Tortoise Shell Comes From

About the middle of February, when the north is shivering in wintry winds and buried in snow, the turtles of Nassau are getting their little vessels ready for the summer cruise in the waters of the Bahamas Islands, running as far south as Grand Turk and the Cales group, and even to the waters of Santo Domingo. In search of the highly prized hawkbill turtle—in zoology Eretmochelys imbricata. This is the turtle that furnishes the tortoise-shell, also called caret. These shells are worth from \$5 to \$30 a pound, according to thickness and markings.

A turtle boat is ordinarily a little schooner about thirty feet long and fourteen feet beam, but, of course, they vary in size. They are seaworthy and simple in rig. The merchants of Nassau fit out hundreds of these vessels, each of which carries a number of small boats, with two men to each boat, a cook, who has charge of the vessel, when off after turtle, and an extra man on the larger vessels.

The usual equipment is about as follows: For fifteen tons or smaller vessels, five boats and eleven men; twenty tons, eight boats and eighteen men; thirty tons, ten boats

Business is Sensitive !

It goes where invited and stays where well treated.

We won't talk about ourselves, we leave that to others. All we want to say is—That its our business to buy where we can get merchandise of Quality at the very best place where "Cash" counts for most. We make good everything that our customers may not find right. A child can buy as safely as an adult so far as price is concerned for we have but one price and that always the lowest. The day of asking "extra prices" and depending upon sharp salesmanship to "put it over" is gone in all reliable stores.

Autumn Merchandise

Arriving and being placed on display for early buyers. And it will pay well to be early buyers this year.

Opened This Week

A. E. Sutherland, Publisher.

THURSDAY, AUGUST 26, 1920

The 1920 voters' lists are now being prepared by the clerks of the various municipalities—in fact, some are already printed. The right to vote is a privilege that cannot be too highly prized, yet there are too many people who do not take the trouble to see if their names are properly recorded on the list. Practically every man or woman, 21 years of age, can vote in the Dominion elections. Copies of the municipal lists will soon be hanging in every post office. It is worth while to stop long enough to see if your name is on. If not, enter a protest with the clerk at once. You may be sorry enough if you find you have no vote when the voting time comes.

The town's new police force could not resist the importunities of several convivial spirits the other night and were led off to participate in a glorious toot, one of them being found next morning in a corn field and another in the railroad ditch. While no one is disposed to object to a little innocent sport, it is generally thought that the young men who were concerned in the episode carried their joviality a little too far, especially when at the same time they placed an electric light pole across one of the streets, thereby endangering life and limb. We believe the council made a very proper move when they decided to place traffic regulators at the most dangerous street intersections. In these days of much motor traffic anything that will lessen the danger of the public thoroughfare is to be commended, and not only so, but the laws of our country must be respected. It is therefore hoped that the reward of fifty dollars offered by the town council for the conviction of the offenders will not be without fruit.

LIKES THE OLD-TIME DANCES

Ex-Reeve Peter Stalker was one of the speakers at the Aldborough Old Boys' Reunion in Port Glasgow Friday afternoon. The sturdy Scotsman followed directly behind a pleasing interpretation of the Highland fling by two youthful London dancers. Mr. Stalker's eyes glowed with the fire of regenerated youth as he took the platform.

"That dancing delighted me," he said. "We should encourage Scottish dancing. All we have now is the shimmies, the trot, the jazy, and that kind of crazy stuff. Let us come right out and dance the way our fathers and mothers danced."

DAVISVILLE

Mr. and Mrs. Archie Sinclair of Glencoe visited her mother, Mrs. Robert Armstrong, on Sunday last.

Mr. and Mrs. Clarence Watterworth of Detroit are visiting her parents, Mr. and Mrs. Thomas Durfee.

Mr. and Mrs. Joseph Armstrong and Mr. and Mrs. Will Durfee and Mrs. Fred Armstrong motored to Inwood on Sunday and from Inwood to Dawn to attend tent meetings.

Miss Phoebe Durfee, with a friend from Detroit, visited her mother, Mrs. Thomas Durfee recently.

Mrs. Dan McLean is visiting her daughters here.

Dan King is improving in health very slowly.

Andy Armstrong has gone west for the harvest.

KILMARTIN

Dougald McKellar left for the West on Wednesday.

Mrs. Duncan McKellar left for a trip to the West Wednesday to visit relatives in Saskatchewan and Alberta.

Anniversary services will be held at Riverside Presbyterian church on Sunday, August 29th, at 11 a. m. and 7 p. m., conducted by Rev. J. Hosie of St. George's church, London. A garden party will be held on Monday evening following, for which the Strathroy band and other prominent talent has been engaged.

The management of the Western Fair, London, are printing a catalogue of the live stock entries for the exhibition. Exhibitors and visitors to the exhibition have been asking for this for several years. This will necessitate the closing of the entries earlier than usual in order that the book may be ready. The entries for all live stock will therefore close on Saturday, September 4. Prize lists, entry forms and all information regarding the exhibition may be obtained on application to the general offices, London: A. M. Hunt, secretary.

Some people like the town without doing very much to make the town like them.

The telephone damsel remarks in low tone, a ring on the finger is worth two on the phone.

Some women can sing a baby to sleep in two minutes and talk a husband awake all night.

Windsor issues the boast that no frauds were arrested on Sunday last for the first time in several months. They are learning how to hold their liquor.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Eclectic Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colic and many hundred ailments it has curative qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Why We Need New Money!

This year we are spending about ten million dollars to extend our system to accommodate new subscribers.

Year by year we must spend millions so that people requiring telephone service may be accommodated!

Such huge sums of course cannot be provided out of our revenue. The only way of obtaining money in such amounts is from investors seeking profitable employment for idle funds.

Investors naturally won't put their money into any enterprise that does not promise absolute security and a sure return. Nowadays security and a handsome return on investments are not difficult to find!

Our problem then is, in spite of the high cost of everything we buy in both labor and material, to pay such a return to present investors—our shareholders—as will attract new money. This must be accomplished while, at the same time, keeping our service up to the highest standard. If the rate of return is not attractive, then the supply of new money ceases.

This is the problem of telephone companies everywhere. None of them has found any other solution than to charge a fair and adequate rate to subscribers.

Now is the time to get ready for the fall fair. There will be an abundance of all kinds of field, orchard and garden products to exhibit this fall.
The Reeves of Mosa and Ekfrid have declared Tuesday, August 21st, a public holiday for their municipalities, the occasion being the annual farmers' picnic at Weekes' grove.
Mr. Yorke of Rodney, who will be in charge of the Glencoe high school the coming term, was in town last week preparing for the opening and doing some house-hunting.
The Fraser Mission Band are having a missionary service in the Presbyterian church Sunday evening, August 29th, at 7.30, conducted by Rev. Mr. McKillop of Tait's Corners.
A talent tea was held at the home of Mrs. J. Grant Wednesday afternoon of last week. A delightful afternoon was spent, Miss Margaret Morrison entertaining the ladies by piano solos.
The W. M. S. convention of the Hagersburg district will be held in the Methodist church Wednesday, September 1st. Two services will be given: Morning 9 o'clock and afternoon 2 o'clock.
Mrs. Alice Purdon, killed in an auto crash at Detroit last week, lived in Glencoe a number of years ago. Her maiden name was Rockett. She was 48 years old and leaves two sons and a married daughter.
Memorial services for the late Miss Sadie Leitch will be held in the Presbyterian church, Tait's Corners, on Sunday, September 5th, at 3 o'clock. Rev. W. L. Nichol and Rev. Dr. Stalker will assist the pastor.
When the general public restrict buying to absolute necessities there will be a real slump, irrespective of the latest market quotations for wool. Extravagant buying is one of the most potent reasons for the present high prices of everything.
There is complaint again that some of the poultry fanciers in town are becoming just a little negligent of the fact that one of the first steps in cultivating a neighborly spirit is to keep their chickens on the home side of the fence. Come, now, let's all be good neighbors!
The fixing of a definite date for Easter—or at least making it a certain Sunday in a certain month—is now seriously proposed in Great Britain and seems likely to be carried out in the comparatively near future. The change is particularly favored in the business world.
Many farmers were in fear lest the splendid oats crop this year would be spoiled by the continuous wet weather, but the portion of the grain still in the fields is but little damaged and a few more days of sunshine will see it all safely housed. Corn is doing well and the root crops are excellent.
The Transcript had a brief visit on Saturday from Harry Davenport of Detroit. Harry is one of the graduates of the Transcript office who is making good in the printing business. He is now engaged as foreman of the composing room of the recently incorporated Ferris-Fowler-Fosdick Printing Co. of Detroit, in which he is also a stockholder.
Clifford McLean, son of Wm. McLean, Metcalfe, is in Strathroy hospital suffering from a compound fracture of the left thigh and painful lacerations as a result of being struck by the G. T. R. boat train from Sarnia about 10 o'clock Monday morning. The accident occurred at a crossing just east of Kerwood station. The young man was driving a team, and the engine demolished the wagon, but the horses were uninjured.
Wm. McCallum, the well-known Overland dealer at Glencoe, received painful injuries in a motor accident near Beachville on Monday night. He was driving a new car from Toronto which skidded on an oily piece of the highway and crashed through the railing of a culvert. The car turned over onto the street railway tracks and was badly damaged. Mr. McCallum is now home and at business as usual. His escape from death is considered almost miraculous by those who witnessed the scene of the accident.

ANOTHER VICTIM OF RHEUMATISM

Entirely Well After Six Weeks' Treatment With "FRUIT-A-TIVES"

MR. AMEDE GARCEAU

82 Hickory St., Ottawa, Ont.
"I was for many years a victim of that terrible disease, Rheumatism. In 1913, I was laid up for four months with Rheumatism in the joints of the knees, hips and shoulders and was prevented from following my work, that of Electrician.
I tried many remedies and was under the care of a physician; but nothing did me any good. Then I began to take 'Fruit-a-tives' and in a week I was easier, and in six weeks I was so well I went to work again.
I look upon this fruit medicine, 'Fruit-a-tives', as simply marvellous in the cure of Rheumatism, and strongly advise everyone suffering with Rheumatism to give 'Fruit-a-tives' a trial."
AMEDE GARCEAU.
50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

Lamont vs. Archers.
Admission, 50c and 25c.

Young calf for sale.—F. C. McTear.
Girls wanted at the Glencoe evaporator.
Don't miss the good time at Appin town hall Sept. 3rd.
Young horse and 2 spring calves for sale.—T. C. Reynolds.
For a Bissell disc harrow, call at R. A. Eddie's Hardware.
The Glencoe evaporator will open September 6th.

For sale—fifteen yearling steers and heifers.—E. G. Humphries, Glencoe.
Pie and ice cream social, Appin town hall, Friday evening, Sept. 3rd.
Alex. McAlpine & Son, dealers in flour and feed, coal, salt, cement, etc.
Good range for sale, cheap. Burns coal or wood. Apply at Transcript office.
Flour and feed for sale at store corner of Main and McKellar streets.—J. D. McKellar.
23rd
Tomatoes for sale. Also potatoes by peck, bushel or bag.—W. R. Sutherland; phone 81.
all at Lamont's and see the bargains you can get in harness next Saturday, the 28th.
For sale—young large roan cow and calf; just freshened.—Dunc. Gillies, lot 5, con. 4, Mosa.
Splendid opening for strong, active boy with fair education to learn printing.—Transcript office.
A quantity of 847-12 Frost woven fence for sale at a bargain price at Galbraith Bros., Appin.
For sale—2 walnut chairs, walnut table, mahogany writing-desk. Apply to Mrs. Archer, Glencoe.
Tea, coffee, ice cream, lemonade, sandwiches and cake at Tea Garden Thursdays and Saturdays.
You can save \$18 to \$20 on a set of team harness by buying at Lamont's annual sale next Saturday.
Dwelling house to rent, upstairs apartment; hard and soft water convenient. Apply to A. B. McDonald.
Wanted—a moderate-sized cutting box. Must be in good working order. Apply Box No. 14, Transcript office.
For sale—first-class seed wheat, "Dawson," recommended, by the field crop judge. Apply to A. B. McDonald.
On Thursday evening of this week the garden party on Mrs. Currie's lawn will continue from 7.30 till 10.30. A continuous program of music, also an illustrated reading. Admission to grounds, 15 cents. Refreshments extra.
A. B. McDonald threshed 245 bushels of wheat off 5½ acres, and 928 bushels of oats and barley off 12 acres.
Lamont's annual sale of harness, etc., on Saturday next. These harness are our own make and the best quality of leather.

Driving horses for sale—1 three-year-old horse, 1 ten-year-old mare, 1 yearling. Apply J. A. McBrayne, R. R. 2, Newbury.

If in need of fertilizer for your fall wheat call and get our prices. Will endeavor to save you money.—Alex. McAlpine & Son.

For sale—the booth privileges for farmers' picnic at Weekes' grove on August 21st. Apply to John Reynolds, Route 1, Glencoe.

The Dominion Feather Mattress Co. of Newbury pays the highest cash price for old or new feathers. Drop a card and our agent will call.

Wanted—a girl to go to Windsor to help with general housework in small family. Good wages and railroad fare paid. Apply at Transcript office.

Acetylene gas lighting plant for sale at a bargain. Used only as emergency and practically new. See it in working order at The Transcript office.

Rev. Mr. Miller of Essex will preach in the Anglican church, Newbury, on Sunday morning, and St. James' (Anglican) church, Wardsville, in the evening.

For sale—the booth privileges for Glencoe race day, Wednesday, Sept. 1st. Apply to R. W. McKellar, Route 2, Glencoe, not later than Saturday, August 28th.

To the grain growers—I am buying grain as usual at the highest market prices for good grain. See me or L. Snitter before selling. Phone 92 or 22 or 58.—Neil McAlpine.

At the garden party on Mrs. Currie's lawn today Mrs. Leonard will give her address in the afternoon with music in the evening a special illustrated reading in colors, with a continuous musical program.

The Dominion Feather Mattress Co. are located in Newbury and are making the sanitary ten-roll feather mattress from old feather beds. A card will bring our agent to see you and show sample of work.
Remember the garden party this (Thursday) afternoon at Mrs. W. A. Currie's lawn. A good musical program and Mrs. Leonard's address will be given. Afternoon tea will be served. All for the admission fee of 35 cents. In aid of the memorial fund.

EXECUTOR'S SALE OF REAL AND PERSONAL PROPERTY IN THE TOWNSHIP OF CARADOC

The undersigned executor of the estate of Timothy Howe, late of the township of Caradoc in the county of Middlesex, farmer, deceased, will offer for sale by public auction on Friday, the 17th day of September, at the hour of one o'clock p.m., on the premises hereinafter described, the following real and personal property, namely:

Real Estate
The south half of lot number thirteen in the first concession of the township of Caradoc in the county of Middlesex, containing one hundred acres more or less. This is a well-improved farm, well situated in the township of Caradoc. The soil is a sandy loam of very productive quality. About four acres is under timber, the balance all cleared and under cultivation. This farm is well fenced and has on it a substantial modern brick house in first-class condition, with an attractive lawn and grounds; a large frame barn with stable and basement; implement shed, granary, hog pen, and other improvements; a good orchard in full bearing, and small fruits; good wells and never-failing spring of water; public school within sixty rods; continuation school, 2½ miles; 2½ miles from Mt. Brydges; good gravel roads.
Terms of sale.—One-tenth of purchase price to be paid on day of sale and balance within one month thereafter.

Personal Property
Horses.—1 Percheron gelding rising 4 years old, 1 Percheron gelding rising 3 years, 1 driver, 1 work horse 7 years old, 1 work horse 10 years old.
Cattle.—5 milch cows, 1 springer, 6 heifers 2 years old, 4 yearling steers, 6 yearling heifers, 4 spring calves, 1 three-year-old heifer.
Hogs.—1 brood sow, 5 shoats.
Implements, etc.—1 Massey-Harris binder, 1 Massey-Harris mower, disc drill, hay rake, spring-tooth cultivator, one-horse cultivator, set of disc harrows, plow, rubber-tired buggy, open buggy, lumber wagon, hay rack, cutter, buggy pole, wagon box, lumber wagon, democrat wagon, set of double harness, plow harness, single harness, halters, hobblehoes, pulper, fanning mill, set smoothing harrows.
Household effects, etc.—Parlor suite, 3 beds, 1 oak parlor table, 1 mattress, dishes and glassware, 50 fruit jars, kitchen utensils, marble top suites, common wash stands, dresser, 1 chest of drawers, 2 sideboards, 2 dining-room tables, 6 chairs, organ and stool, 2 kitchen tables, 2 lawn benches, plants, baseburner, heater, cook stove, scales, 4 stand lamps, 2 hanging lamps, 2 clocks, jardiniere, sewing machines, couch, kitchen chairs, rocker, base rocker, Brussels carpet, linoleum, rugs, churn, washing machine, matting, canary and cage, curtains.
Grain.—About 75 bushels fall wheat, about 600 bushels oats, 5 acres planted corn, 10 tons hay, 2 acres potatoes, 3 acres drilled corn, half acre peas, onions, quarter acre melons.
Fruit.—Apple orchard, pears, and other fruit.
Wood.—20 cords stove wood.
Fowl.—80 hens, 45 ducks, 75 chickens.
Miscellaneous.—Fence slats, tags, lumber and posts, forks, shovels, spades, etc.

Terms of sale of personal property: \$10 and under, cash; over that amount two months' credit will be given on furnishing approved joint notes. A discount at the rate of six per cent. per annum will be given for cash on all purchases entitled to credit.
For further particulars apply to A. D. Brown, Melbourn, Ont., executor of will of Timothy Howe, deceased; Elliott & Moss, Glencoe, Ont., solicitors for vendor; John Trotter, John Lockwood, Mt. Brydges, auctioneers; J. H. Matthews, clerk.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

The Saving Hate

By MARGARET BJORNSSON PEDROSE.

PART III.

The attack and death of one of the wolves had a strange effect upon the woman. In that moment something—possibly tradition winging down through the ages—descended upon her and held her powerless to combat it. Perhaps in some long-forgotten era a cave-woman ancestress had stood thus and beheld her mate battling against unfair odds for her life and hers. A warm hand seemed to clutch her heart; there was a tightening of the walls of her throat. She lowered the rifle and dumbly held out her hand to her husband.

With a leap, he reached her side. "Run!" he panted, shifting the ax to his right hand and putting his arm across her shoulders protectively. "It's our only chance!"

Swiftly they ran toward the cabin. But before they had gone fifty yards, two other giant, gray monsters stole out of the scrub ahead of them, cutting off their escape. They halted abruptly. Quickly the man exchanged his ax for the rifle, threw up the weapon and pulled the trigger.

A sharp metallic click was the only result. The gun was empty.

With an articulate snarl, the man flung the useless weapon down and took back the ax. But this momentary delay had proved costly. Two other wolves had sneaked out of the scrub and joined the others. They crouched on their haunches, and with bared fangs and deadly eyes awaited the prospective victims. From the deeper woods behind the man and woman came a snarling chorus and clucking of tails where the other wolves of the pack were testing the strength of their fellows.

The man looked round for a possible avenue of escape. The woman pressed close to him and started to follow him. A few rods off to the right stood a jackpine that had outgrown its stunted mate. Its vines, crawling limbs offered a temporary refuge for one person. Forward this slender tree the man guided the woman. The wolves followed with zigzag movements, slyly attempting to lessen the distance between them and their quarry.

When they reached the tree, the man stood still and commanded the woman to mount to his shoulders and swing up into it. She obeyed. Then when she was perched safely on one of the sagging limbs, her feet above the level of his head, he placed his back to the trunk of the tree, and with an upraised, waited for the assault.

The snarling and snapping deeper in the woods had ended. In ones and twos, to the number of ten, gray monsters slunk out into the open and joined the four wolves facing the man and woman.

Tom Boardman silently contemplated the wolf-pack and prayed his strength and agility would prove equal to the impending task. In the tree, his wife clung tightly to the branches above her head, and watched the scene below. She tried to think, but could not. Fear, stark fear, gripped her, and she could only stare.

With tails dragging and bodies hugging the snow, the wolves began to circle the tree. The man found it difficult to watch all sides; at once, and the wolves, realizing their advantage, gradually closed in.

Suddenly one of the pack, evidently a leader, made a lightning swift leap at the man's legs. The ax was equally swift. A second and a third wolf emitted the manœuvre of the first, but the ax was too quick for them.

"Four!" cried the man excitedly. "Come on, you skulking cowards!" he challenged them.

The destruction of three of their number in rapid succession served to make the wolves more cautious. They adopted tactics that they had often employed successfully in pulling down a moose at bay. Two leaped at the man from opposite sides at the same moment. The ax put an end to one's career, but the other's fangs found their object. Raging keen, they slashed his leg from his knee half way down to his ankle, and their owner sprang back to safety. Two other wolves essayed the same feat, but they were not nimble enough. Both went down under the terrible ax.

"That's seven!" the man flung over his shoulder. "We're top dog yet!"

"Tom," his wife warned, "your leg—it's bleeding!"

"Yes," he grunted, and gritted his teeth. "It's only a scratch, but I guess I'll have to tie it up. See if you can tear a strip off your undershirt and pass it down to me." The shoe of the injured left foot felt hot. He wriggled his toes and his husband's hand resulted. "Tear off a good stout strip," he urged, careful to reveal no anxiety in his tones.

Standing herself by, pressing her

feet to the tree trunk, the woman tore a broad strip of cloth from her undershirt. "Make it into a loop," her husband directed, "and break me off a dend branch about a foot long." She complied.

He shifted the ax to his right hand, received the loop of cloth and stick with the other hand, and raising his injured leg, slipped the makeshift tourniquet over the foot, the while keeping his attention on the wolves. Just above the knee he settled the loop. The wolves, seemingly puzzled by his actions, had drawn back and he had time to wind the stick.

"Can you do it alone?" the woman asked anxiously.

"Yes," he responded; "another turn and it's done."

The knot in the cloth had tightened and stuck and all fell to the snow. Barely in time the man whirled and cut down a wolf that had sneaked up behind him and sprang at his back.

Suddenly the woman sprang from the tree and dropped to her knees on the crimson snow at her husband's feet. The wolves, startled, withdrew several yards. With deft fingers the woman tied another stronger knot in the strip of cloth and wound it tightly about her husband's leg above the wound.

When her task was finished she rose and showed no inclination to climb back into the tree.

"Tom," she said calmly, "if we leave the tree, won't those wolves eat the dead ones and give us a chance to reach the cabin?"

"I think so—if you are not afraid to try it," her husband replied.

The pair moved cautiously away from the tree. The wolves followed as far as their dead comrades, then set upon the stiffer bodies and began to tear them to pieces, whereupon the man and woman wheeled and sped down the trail as fast as they could run.

The distance to the cabin was covered in a few minutes. The man reached for the latch on the door and missed it. Passing his hand across his eyes as if to clear his vision he reached again, and finding the latch this time he slid it back and pulled the door open.

"Less—blood!" he mumbled and, staggering, fell. The woman bent to assist him. The touch of the snow served to steady his reeling brain.

"Look," he cried out, pointing; "the wolves!"

The woman grasped the ax which had fallen from his hand and wheeled to face the menace. Two long, gaunt wolves whose depressed stomachs distinguished them from the cannibalistic members of the pack. In the shadows, she saw the man and woman. The ax flashed downward as the foremost wolf slashed at the woman's thigh and would have cut him in two had he been less agile.

With a strength she never before knew she possessed the woman dragged her husband into the cabin, never taking her eyes off the vigilant wolves as she did so. Then, when she had closed the door, she darted to the fireplace and obtained a kettle of water; next she procured some clean clothes and a knife, and after cutting away her husband's shoe and opening the leg of his trousers, washed and dressed his wound.

When Tom Boardman awakened it was night. For a long moment he stared at the rosy reflection from the fireplace that played upon the rafters overhead, trying to comprehend why he should be lying in bed. Then came recollection, and he started at a sound that appeared to emanate from the adjoining room. He glanced through the doorway.

In the glow of the fireplace his wife sat snuggled in a large rustic armchair, her elbows on her knees and her chin in the palms of her hands as she stared at the dancing flames and softly hummed a tune.

"Virginia," he called, softly.

"I made a mistake, Tom," she returned, gently. "I thought you whipped me yesterday; then when I slept up this morning I found the pieces of the whip, and it was so rotten it couldn't have hurt me. Let's forget all that unpleasantness."

"You mean," he cried, amazed, "you are willing to start all over again?"

"I guess we have both learned a lesson," she replied. "By spring, when we go back to the city, I think we shall understand each other better."

From a point far back in the timber came the high-pitched, staccato cry of a wolf. Virginia Boardman trembled, and her husband's arm went about her and drew her closer to him.

(The End.)

MODERN ADVENTURE ON CRUSOE'S ISLE

WORK OF AN HAWAIIAN SCIENTIST.

Thrilling Experiences in Exploring South Sea Island of Storied Fame.

One by one the mystery spots of the earth are coming within the range of casual inspection. In this connection Prof. William Alanson Bryan, an Hawaiian scientist and explorer, whose latest effort in behalf of the common knowledge was an exploration of Robinson Crusoe's Isle and its neighbor, Mas Agera, contributes an interesting narrative.

Prof. Bryan is an upholder of the theory that in prehistoric times there was a great continent in the Pacific which was sunk in some natural cataclysm, which left only its highest peaks, now the volcanic islands, protruding above the waters.

What he found on Mas Agera, otherwise Juan Fernandez, or Crusoe's Island, and its near neighbor, Mas Agera, is best set forth in a letter he wrote to an Hawaiian friend, giving an account of his adventure.

Off for Crusoe's Island.

"It is a pleasure to believe that you will be interested to know of my safe return here from a very successful scientific expedition to the wonderful islands of Mas Agera and Mas Agera," he wrote. "My former trip to Easter Island required a journey of over 7,000 miles in a little sailing vessel and was a preparatory experience for this trip, which was made in a sixty-ton lobster boat, the only existing means of travel to or from the islands. It was a different experience, but by no stretch of the imagination could it be called travel de luxe.

"Mas Agera, commonly known as Juan Fernandez, is 290 miles off the coast. It is 12 miles long and 3-23 miles in the very widest part. Mas Agera is 90 miles further west and is 6 by 23 miles in extent. Both are high volcanic islands, deeply eroded by time into wonderful valleys. The scenery is grandeur, beauty and verdure is almost, if not quite, equal to what we know of the great islands of our beloved Hawaiian Islands.

"After eight days of indifferent sailing we arrived at Cumberland Bay, on Selkirk's Island, where we swung at anchor for a day while we took on board eight local lobster fishermen, with their boats and gear. We then set sail for the further island, arriving in twenty-four hours.

"It was a beautiful sight to see the island, cloud capped, rising 1,650 metres above the sea and looking for all the world like a giant round biscuit that had cracked and split open in the baking. An even score of very deep, narrow valleys opened to the sea on the west side. I shall never forget the impression of wild grandeur and picturesque beauty and the riot and color of it all, as the sun was sinking in the west directly over the summit. It needs a Howard Pyle to convey the picture—our little boat in the blue shadows, the fishermen hoisting their nets, and over and above and around all color, a veritable marine painter's palette, softened and made mystic by the slanting light.

Adventures After Landing.

"Leading the next morning with all my scientific gear was by no means a safe or simple task. However, by 9 o'clock my moose and I stood on shore with everything about us reasonably dry. Thus began what was to be at least two weeks of Alexander Selkirk's life on the rocks of a good 100 feet above the sea, and in the open air.

"The details of the adventures experiences and mishaps of that sojourn I will save to tell you in person. It was leaving the country, and the island on the island to do it justice. It will include seal shooting—we got thirty in one day—goat shooting—we shot nine out of one flock—the tragic death of our old goat dog, Amarillo (Yellow) who went over a cliff to his destruction on the rocks of a good 100 feet below, and finally the accidental shooting of my moose, which happily was not fatal, though it brought this expedition to a sudden close after twelve days, as luckily we got a return to Mas Agera in a tramp lobster boat that same day. As I dressed the twenty skin and flesh wounds of my companion I passed certain resolutions which, if put into execution, will make the world safe for camp servants, so far as I am concerned.

But we both felt that good luck came out of bad, for had we not caught the tramp Goleta we would have been marooned for a month longer, with an attending shortage of food, for our regular boat had to undergo repairs at Valparaiso.

In Alexander Selkirk's Cave.

"On our arrival at Juan Fernandez proper I went into residence, so to speak. Living in the home of one of the fishermen's families, I was made as comfortable as is possible on the island, spent four weeks in hard but profitable field work. Several short excursions to remote parts were made, spending two to four days in the open at a time. Of course, the real adventure here was that of spending two nights all alone in the cave inhabited

by Alexander Selkirk during the four years and four months of his solitary residence on the island (1704-1709).

"It is generally stated that Selkirk gave an account of his sojourn to Daniel Defoe in order to prepare it for the press, and from the ideas there given the classic 'Robinson Crusoe' was formed. It was certainly a realistic experience. 'Selkirk's for Science'—and I shall have a long story to tell of my observations, sensations and conclusions.

The majority of the men of the colony were there as penal colonists. My shoemaker had killed two men. My camp boy was a noted robber, and so on down the list. Certainly not high class society—but all kindly and attentive to me.

"Toward the close of the third day my man Friday came down over the mountains with a spare mule to bring me and my plunder back to the settlement. So while my solitude was not as long as Selkirk's, it was equally complete while it lasted."

Auto Part is 400 Years Old.

Perhaps the oldest design used in the modern automobile is that of the universal joint, which in principle is identical with the first universal developed by Cardan around 1529 A.D. For many years we called a propeller shaft and joints a Cardan shaft and even today all Europe refers to it as this type of shaft.

The original Cardan joint, however, employed the exact principles of the present day standard type, the latter is to be sure quite different in detail structure and modified for automobile use.

Were it not for Cardan, however, our engineers would be unable to design a shaft drive car. Like the original Cardan joint, the Spicer is all metal and composed essentially of a metal cross or spider. To each pair of ends of this cross a yoke is attached so that one yoke can move sideways and the other yoke, since each oscillates on its own spider ends. Of course this is covered by means of a housing to keep out dirt. Wiggle your thumb and you get universal joint action.

Such joints are used in all modern automobiles and trucks in order to allow the wheels to revolve and at the same time move up and down and sideways, relative to the rear axle. The axle houses up and down according to road conditions, but the propeller shaft must connect this bouncing part with another unit attached to the frame car.

Usually this is the transmission, and since this does not move up and down as the rear axle does, the propeller shaft must have these universal joints. One can see that without the joints the shaft would bend and then could not transmit power.

Roused Volcanoes.

It is not always possible to know when a volcano is extinct. After going out of business for thousands of years it may take a notion to start up again.

The army of rebels led by Spartacus, the gladiator, actually encamped in the crater of Vesuvius, which furnished a most serviceable ready-made fort. That famous volcano was then supposed to be extinct. Its ancient fires being forgotten.

In January, 1916, it really woke up, and in October, 1918, it emitted streams of lava, with an accompaniment of rumblings and earthquakes. In May of last year it threw molten rocks to a height of more than a mile, and coincidentally therewith Kioet, in Java, started to erupt, wiping out 2,000 human lives.

Java, of course, is not very far from the Philippines, and presumably Kioet and Bulusan are two chimneys with a subterranean connection. It is the same way with Mont Pelée (Martinique) and La Soufrière, on the nearby island of St. Vincent. Likewise also with Vesuvius and Etna, which act in sympathy.

Close Watch Kept on Old French Art.

France's art treasures are efficiently safeguarded by the newly superceded decree of last April, which will prevent anything dating prior to 1820 from leaving the country unless it has special permit of the Minister of Public Instruction and Fine Arts.

The closest watch is being kept on Paris art dealers, as it is known that hundreds of thousands of francs worth of paintings and bronzes have left France for England in the interim before the adoption of the law by Parliament.

Hereafter dealers or private buyers desiring to ship from the country will have to make a customs declaration a month beforehand and the Ministry will study the case. The fullest description regarding the origin and the value must be given, and the application is refused if the article will be barred from exportation for at least five years. Even where objects are admitted for exportation there are higher duties reaching 25 per cent on the value of anything worth more than \$2,000.

Great Britain has established a system of flares for guidance of nocturnal aviators.

Woman's Interests

Jelly and Marmalade.

Is it not a delight, some early autumn evening, to take Father and the boys down into the cellar to show them the shelves stocked with jellies, jams and marmalades, with canned fruits and canned vegetables of every kind and combination on, and to hear Father say in his most appreciative manner, "Well, Mother, you've already done more for your share to supply us with food for the winter," and then to hear one of the boys say, "I've read that we must eat vegetables and fruits if we are to keep really well and strong; we should be the 'well' family in the township next winter, Mother;" and then the baby—"Gee, marmalade!"

Then maybe you shake your head and think of the delicious peaches and pears which might have contributed to the value of the shelves but for some reason, when you attempted to make jelly of them, as we all have at times, gave only a very secondary syrup for all your labor and pains.

There are two reasons for fruit juice not jelling; it may not contain enough pectin, the gelatine-like substance present in all fruit that jells easily, or it may not be sufficiently acid. As a rule, the two properties go together but there are fruits such as the quince, for example, that need only the addition of some very tart fruit juice or a teaspoonful of citric acid to each quart of fruit add a quart of water, let boil thoroughly and drain again. If the fruit is rich in pectin, as are currants and crab apples, the juice may be extracted yet again. You will probably wish to cook the first juice extracted for your first-quality jelly and combine the second and third extraction for making a product not quite so perfect. Test juice for pectin.

Alcohol Test.—To one tablespoonful of boiling hot juice add one tablespoonful of alcohol (the denatured will do quite as well as the pure) mix well and let it stand for five minutes. If the precipitate forms a large clump or mass, it indicates that it is present in large amount and that a comparatively large amount of sugar will be required.

Epsom Salts Test.—This is also a very satisfactory one. Mix together one teaspoon cooked fruit juice, one-half teaspoon sugar and the same of Epsom salts. Stir until all are dissolved and let stand five minutes. "Settling" will indicate a good jellifying juice.

Home-Made Pectin.—When fruit juice will not jell it is a good plan to combine it with other fruit—red currant, for example, pineapple with apple are good combinations. Another plan is to make orange pectin. Do it this way:

Cut or grate the yellow rind from oranges or lemons, take off the remaining white rind and chop it or put it through the food chopper. Mix 1/2 pound of the chopped white with one quart of cold water and 4 tablespoons lemon juice. Let stand 15 minutes, then add 1 quart of water and boil ten minutes. Let stand overnight, strain and cool. It may be used at once or be bottled and preserved.

Add in the quantity to any boiling juice to give a good pectin test.

Apple Pectin.—One pound apple skins and cores, juice of one lemon. Cover with one quart of water and boil one-half to three-fourths of an hour. Drain through a heavy flannel jelly bag without pressure. Use at once or bottle and process 15 minutes.

Sugar Measure.—If you are in doubt concerning the quantity of sugar to use, then the following general measurements are helpful although not absolutely reliable:

Use 3/4 to 1 cup of sugar to 1 cup of fruit juice for currants, sour apples, crabapples, blackberries, blueberries, quince and cranberries; 1/2 to 2/3 cup sugar to 1 cup of juice of ripe grapes and plums, using the larger amount of sugar (1 cup) only for the juice first drained off.

Too much sugar will cause a jelly with a tendency to run.

Too little acid will cause a tough jelly, or may prevent jelling entirely; add lemon juice, citric acid or sour fruit juice if tasting reveals lack of acid.

Over-cooking will give a stiff, gummy jelly, fit only to use in ices or puddings requiring such flavor.

Peach Marmalade.—Put ten pounds of peaches and three orange rinds through a food chopper or chop them very coarse. Add an equal measure of sugar and cook for two hours.

Carrot Marmalade.—2 cups sugar, carrot, 2 lemons, 1 1/2 cups sugar. Cook the carrot until tender, add sugar and lemons which have been cut in very thin slices and then in small pieces, cook slowly. When thick, put into sterilized jars and process for 15 minutes.

Fruit Butters.—Fruit butters are delicious and should be in every home as accompaniments for puddings, and so forth.

Use the pulp left from jelly making, unless you have extracted all its good, for jelly. Remove all skins and seeds by putting through a colander. Use one-half as much sugar as fruit and boil slowly until very thick and smooth, stirring constantly. Put into sterilized glasses or jars.

Apple Jelly with Syrup.—1 quart apple juice, 1 cup sugar, 1 cup light syrup. Heat syrup and sugar together and add to the boiling juice. Then make as any jelly.

Bread and Butter for Kiddies. Good white bread and butter. Bread with peanut butter. Graham bread and butter. Raisin bread and butter. Bran bread and butter. Or any of these healthful breads with pure jam or jelly—and a glass of rich, creamy milk!

How the children love it! How it brings rosy color to their cheeks, huskiness to their young limbs, tingling life to their bodies!

Older folks got it, of course—the "piece" between meals was a regular thing when we were youngsters, but too many kiddies of the present day have the candy or cookie habit in the place of real stuff of life.

Of course, candies and cookies have their place, but small children should have regular rations of bread and milk between breakfast and lunch and dinner—especially children of school and kindergarten age. The younger ones rarely let mother forget it, but older children frequently object to missing some part of their playtime to sit down and eat—especially bread!

It's very easy to cultivate this healthful habit in children, and if the bread-and-milk time menu is varied, if all the different kinds of bread are used, and then unsweetened graham or oatmeal crackers once in a while for a change, you'll find they'll get to like their little lunches tremendously.

Also, bread and milk are very inexpensive when compared with the return they bring and very easy to prepare.

Removing Summer Stains. The important factor in the removal of summer stains from clothing is attending to them immediately. The various agents for removing stains should be kept close at hand, so that it is convenient to apply at once.

A small cup, a dropper, brush of the size of a nail brush, some blotting paper and a little bowl should be kept together where they can be reached quickly. It is by making these remedies convenient that we get the habit of attending to the little stains promptly, and thus save many a piece of fabric that might otherwise have to go into the discard.

Deep Sea Origin of Man Wins Support.

That the original germ of humanity found its home in the deep sea, where it gradually evolved to its present form, long has been the theory of scientists who have been ridiculed as radicals, but there is interesting comment today in support of the theory advanced at the recent Strausburg Scientific Congress by Dr. Keesing Hart, who has spent years of research in physical phenomena, says a Paris despatch.

The doctor points out that the temperature of the human body reaches its maximum at 4 o'clock in the afternoon and twelve hours later, "if we accept the marine hypothesis," he says, "it is now easy to understand how the germ destined to become man was submitted to certain physical conditions. Dilution of human serum, which is the same composition as sea water but only one-sixth as salty, may be explained if the germ is released in the month of a great river. The temperature normal of 98 degrees probably was obtained from the water of ancient seas, which undoubtedly were warmer than they are today."

Dr. Hart continued to show that human temperature variation corresponds with the change of water temperature through the action of the sun, the maximum and minimum coinciding both at the same hour effected this degree of variation. "There is little doubt," he added, "that this rhythm of heat in humans is merely the persistence of the ancestral phenomenon of our marine parents."

A Colorful Chinese Wedding. I looked on at a Chinese wedding yesterday afternoon, celebrated at the Imperial Hotel, writes a tourist on July 6. At least this part of the ceremony was celebrated at the hotel. The festivities began several days ago with a reception to the bride, then a dinner to the bridegroom, and so on, culminating in the wedding yesterday.

There were about 200 guests, Chinese and some foreigners. The little bride was a darling. She wore a gorgeous red (red for happiness, the Chinese say) and gold costume, with a most marvellous head dress. The bridegroom wore our conventional evening clothes—a good looking chap. They say he himself is poor, but his father is worth \$5,000,000.

The bride's attendants were the dearest little pink and gold creatures, with the finest little feet I ever saw. There was a procession, of course, from the bride's home to the hotel, the bride riding in a red and gold sedan chair, with a retinue of coolies bearing banners and lanterns and playing weird music. There was a feast also, of which nothing was to be said as what the Chinese cannot eat they carry away in their hankies.

The bride's father and his four wives were there. The wives were richly dressed and were covered with all sorts of queer trinkets and flowers. After the ceremony the bride and bridegroom bowed three times to her honored parent and exchanged rings. Then the bridegroom went out with his attendant; then the bride went out with hers; then they went back, their pictures were taken; they went out together and rode away to a quiet dinner with their families—the first time they had been together since the festivities began.

I asked a Chinese man if they kissed and he said "No. By'm by they kiss, behind door, when they alone. They ashamed."

And let me tell you this: If the little bride does not present her husband with a son in due time he will go "enteebe mother wife!"

Bee Sting Facts. The poison injected when a wasp or a bee stings has a paralyzing effect on the nerve cells of a small victim such as a caterpillar. It acts like chloroform, making the victim unconscious. But its effect does not wear off; it lasts.

Sometimes the stinging is fatal to the victim, and one authority, M. Roubaud, suggests that the poison may act like an antiseptic, preventing the body from rotting in other words, the presence of the poison may counteract bacteria which cause decomposition. This is likely enough, for the poison contains formic acid, and this is not very far away, chemically, from formal, which is much used as a preservative.

It should also be noted that, several stinging by bees seems sometimes to relieve patients suffering from rheumatism.

Now, the particularly interesting point is this, that many predatory wasps make a larder of caterpillars and the like round about their eggs, so that their young may get food when they hatch out, and it is advantageous that this food should remain fresh. The poison secures this when the victim is paralyzed, for the cells of the body remain alive.

A French naturalist, M. Hollande, recently examined twelve small caterpillars from the larder of a fury wasp, and found that all were alive, except that their nervous systems were paralyzed. And, even if the victims die, it may be that the poison acts as a preservative, though this requires more testing.

Ants Guide Prospectors in Diamond Fields. As a result of the recent exploitation of the new diamond-bearing areas in northwestern Cape Colony, the ants of South Africa, long regarded as the worst of pests, are now coming to be recognized as invaluable allies of the diamond prospector.

STEAMERS COLLIDE IN LAKE SUPERIOR: TWENTY-NINE LIVES LOST

Only Four of One Crew Saved—Water Poured Into Boiler Room of Superior City and Explosion Hurled Men Into Water—Ship Sank Quickly With Cargo of Iron Ore.

Sault Ste. Marie, Mich., Aug. 22.—With practically no chance to save themselves, 28 men and one woman, members of the crew of the giant ore carrier, Superior City, were blown to their deaths in the chilly waters of Lake Superior off Whitefish Point, late Friday night, when the steamer, late Friday night, when the steamer Willis L. King collided with the Superior City, punched a hole in her side through which a torrent of water poured down into her furnace room, causing an explosion which virtually blew off the ship's stern.

In less than two minutes after the crash, according to the four survivors, the ship settled, her load of 7,500 tons of ore carrying her quickly to the bottom in about 200 feet of water. The collision occurred four and one-half miles northeast of Whitefish Point. The sea was calm, though the air was just a trifle hazy, according to survivors.

The survivors were: Captain Edward Sawyer, G. G. Lehne, second mate; Peter Jacobson, wheelman, and Walter Richter, boatswain. The King crashed into the Superior City aft of midships on the port side. All members of the crew of the Superior City were aft over the boiler rooms scrambling for lifeboats when the blast came. Not one of the four men saved knows more than that when he regained consciousness it was in the cold waters of the lake and fighting for his life.

All the survivors bear evidence of their experience in bruises and burns. Captain Sawyer, with his face and

head swathed in bandages to protect his wounds and raw skin, refuses to talk. He is heart sick over the fate of his crew and the vessel and wary of divulging more facts about the wreck than he must.

Walter Richter, boatswain, who was brought here on the J.J. Turner after being picked up from a hatch cover, says the explosion jerked the ship out from under him as he was attempting to get into a lifeboat. He had been in his bunk, but had run aft with his mates when the alarm was sounded from the vessel's bridge that she was about to be rammed.

He had nothing but his underwear on at that time, and this underwear was blown from him completely, not a stitch remaining. "I sank deep into the icy water, which evidently brought me to my senses," he said this afternoon. "I thought I would never reach the surface. Then I swam for about five minutes and up from the depths came a steamer's hatch cover, upon which I climbed and hung for a half hour until the Turner arrived."

The Captain's alarm signal rang just two minutes before the crash, said Richter. "If we had had two minutes more no lives would have been lost. The crew kept their heads and all waited calmly for the boats while men were attempting to launch them. The boat I was attempting to launch was thrown overboard, carrying me with it."

General Weyland, who was assistant to Marshal Pilsudski in the World War, has taken over the command of all Polish troops and already his work is being left in the rear, given to the Red Army. The General took the office on condition that he be allowed to run the campaign in his own way. He has transferred Polish troops from Galicia to the Warsaw front. General Weyland went to Poland at the head of 800 French officers.

Vote is Secured by All U.S. Women

A despatch from Washington says: Ratification of the Suffrage amendment by the Tennessee Legislature was hailed with great joy in the capital.

Secretary of State Cully, upon whom rests the final act of proclamation, all that is needed to confer the voting privilege upon 26,800,000 women citizens, announced that he would set at the earliest possible moment. Under State laws 19,000,000 women already hold the Presidential franchise, but only 7,800,000 were entitled to vote for members of Congress. The ratification of the amendment therefore gives Presidential suffrage to an additional 8,000,000, and the right to vote for Congress to 20,000,000.

Visit of H.R.H. to India Cancelled

A despatch from London says:—The Royal Proclamation to India states that the Prince of Wales will not visit India next winter to inaugurate reform legislation. The Duke of Connaught will undertake these duties.

H.R.H. COMPLETES TRIUMPHAL TOUR

Won Hearts of All Australia, Cemented Bonds of Empire. Sydney, Australia, Aug. 19.—(Delayed)—The Prince of Wales, sailing for England to-day, carries all Australia in his pocket. He has repeated here the same stunt that he did in Canada.

Excepting the railroad strike in New Zealand, the Prince met a super-generous treatment everywhere, even radical Queensland out-doing itself. Statesmen, laborers, sheep herders, and thousands of soldiers cheered the "Digger Prince." He has proven himself the most valuable asset of the Empire, cementing the cracks in the Dominion alliances.

The smiling Prince's visit has given a human touch to the overseas Dominions.

MAYOR OF CORK GUILTY OF SEDITION

He is Hunger-Striking and Wife Has Been Warned of His Condition.

A despatch from London says:—Terrence McSweeney, Lord Mayor of Cork, Ireland, who was arrested, tried and found guilty of making a seditious utterance, was sentenced to two years in prison. The Government announced on Thursday. He is hunger striking. His wife, in Cork, has been warned of his condition; she is holding herself in readiness to go to him should he grow weaker.

Britain to Recognize Egyptian Independence

A despatch from London says:—It is understood that the terms of the peace treaty between Zogheul Pasha, the Egyptian Nationalist leader, and Lord Milner, include formal recognition of Egyptian independence and then surrender by Egypt to Britain of the control of foreign affairs, and certain financial measures. This will mean a substantial degree of self-government for Egypt in her domestic affairs.

Lord Jellicoe New Zealand's New Governor-General

A despatch from London says:—Viscount Jellicoe left on Thursday for New Zealand to assume his duties as Governor-General.

WITH THE IMPERIAL PRESS DELEGATES
The University of Toronto has fallen in line with McGill (Montreal) in paying recognition to the work of the Press of the British Empire in the late war. The four men seen above, who have received the degree of LL.D. are, from left to right: Mr. Geoffrey Fairfax; Sir Robert Bruce; Mr. Robert Donald; and Sir Gilbert Parker.

Cheese, new, large, 29½ to 30c; twins, 30 to 30½c; old, large, 33 to 34c; twins, 34 to 35c; Still-ton, old, 35½ to 36½c. Maple syrup, 1 gal. tin, \$3.40; 5 gal. tin, per gal., \$3.25; maple sugar, lb., 27 to 30c. Churning cream—Toronto creameries are paying for churning cream, 38 to 60c per pound fat f.o.b. shipping points, nominal.
Provisions—Wholesale.
Smoked meats—Rolls, 33 to 36c; hams, med., 48 to 51c; heavy, 41 to 43c; cooked hams, 65 to 68c; backs, plain, 54 to 57c; backs, boned, 60 to 65c; breakfast bacon, 49 to 50c; cottage rolls, 39 to 43c.
Barrelled Meats—Bean pork, \$4.3; short cut or family back at \$5.6; for same back, boned, \$5.6 to \$5.7; pickled rolls, \$6.00 to \$6.6; mess pork, \$4.7.
Green meats—Out of pickle, 1c less than smoked.
Dry Salted Meats—Long clears, in tons, 26 to 28c; in cases, 26½ to 28½c; clear bellies, 29½ to 30½c; fat backs, 24 to 26c.
Lard—Tierces, 26½ to 27c; tubs, 27½ to 28½c; pails, 28 to 29½c; prints, 29 to 30c. Shortening, tierces, 22½ to 23c per lb.
Montreal Markets.
Montreal, Aug. 24.—Oats, No. 2 C, W., \$1.16 to \$1.17; No. 3 CW, \$1.14 to \$1.15. Flour, Man. Spring wheat patents, firsts, new stand, grade, \$14.85 to \$15.05. Rolled oats, 90-lb. bag, \$5.60 to \$5.75. Bran, \$5.25. Shorts, \$6.15. Hay, No. 2, per ton, car lots, \$31. Cheese, finest eastern, 24½c. Butter, choicest creamery, 59 to 60c. Eggs, fresh, 58c. Potatoes, per bag, car lots, \$2.10 to \$2.15.

Improved Highways in Eastern Canada

A despatch from Ottawa says:—That it will be possible by next summer to travel over improved highways from Windsor, Ont., to St. John, N.B., is the hope of officials of the Federal Highways Aid Department.

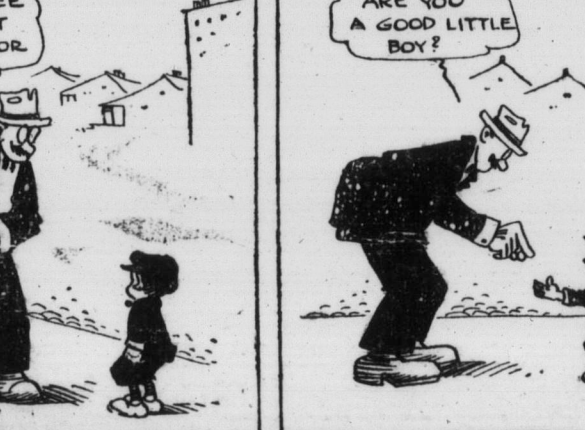

If present indications are borne out by subsequent construction there will be good roads all the way between these points, and also between Niagara Falls and St. John, N.B. There will remain, however, the necessity of ferrying across the Ottawa River on the highway between Ottawa and Montreal.

American motorists who took part in the recent Michigan hike took expressed surprise at finding the Canadian roads as good as they were. Some of them who had done extensive travelling over the famed Lincoln Highway declared that the roads they had encountered in Northern Ontario during their recent journey were better in their present state than were some parts of the Lincoln Highway.

MAKE CANADA THEIR HOME
This picture gives a good idea of the class of immigrants coming from Britain to settle in Western Canada. They have just arrived from the Old Land.

"REG'LAR FELLER S"—By Gene Byrnes

POLES PUT BOLSHEVIKI TO ROUT, TAKING 10,000 PRISONERS

Warsaw Sector Being Rapidly Cleared of the Invaders by Victorious Poles Following Up With Artillery—Succeeded in Retaking Several Polish Towns.

A despatch from Warsaw says:—The Polish offensive is now in full swing. More than 10,000 prisoners, 30 cannon, 300 machine guns and thousands of supply cars have been captured from the Bolsheviks. The Poles have occupied Pionak, Pulask and Wyskow, through which the Reds drove in their sweep toward the Capital.

Owing to the Polish pressure from the northeast it is reported that the Bolsheviks are withdrawing their forces which reached the Vistula south of the Prussian border and to the northwest of Warsaw.

The Warsaw sector is rapidly being cleared of the Bolsheviks. North and northeast of the Capital the Reds are being shoved back by the Poles who are following them up all along the front, using artillery in such quantities as to cause great confusion among the invaders, who are now on the run.

To the east the Bolsheviks are reported to be making their way across the Bug at various points.

Siedlce was taken by the Poles early Wednesday.

The Fifth, Seventh, Fifty-Eighth and Eighth Bolshevik Divisions, on the Warsaw front, have been annihilated, and thousands of Soviet soldiers made prisoner, Wednesday night's official statement says. The Russians lost their bearings in trying to meet attacks on all sides from the Polish columns on their flanks, the statement adds. The Poles, continuing their advance, have occupied Kalusyn, 35 miles east of Warsaw; Siedlce, 57 miles east of the Capital; Milyzec, 20 miles south of Siedlce; Wlodawa, on the Bug River, 125 miles southeast of Warsaw.

The Poles are reported to be regrouping before Lemberg for a counterstroke against the Bolsheviks, who are less than 30 kilometers from the city.

In the region of Thorn, about 105 miles northwest of Warsaw, the com-

DARING MURDER OF IRISH POLICEMAN

Was Implicated by Sinn Fein Jury With Killing of Mayor MacCurtain.

Belfast, Aug. 22.—Police Inspector Swanzy, against whom a verdict of wilful murder was given by a Coroner's jury in connection with the assassination of Mayor MacCurtain in March, was shot dead to-day while proceeding to his home from church at Lisburn, to which town he had been transferred after the finding of the Coroner's jury.

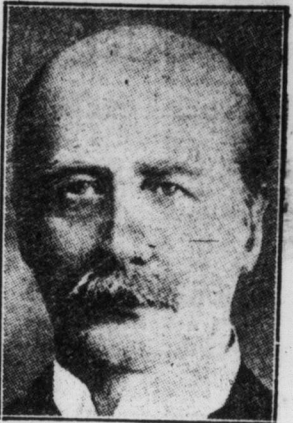

The killing of Inspector Swanzy was among the most daring of a long series. The congregations were leaving all the Protestant churches at the time and converging on the scene of the shooting. The officer had been with his mother and sister in attendance upon the services at Christ Church and had reached the corner of Railway street, where he resided. Here three men, armed with rifles, confronted Swanzy and fired on him in the presence of his horrified family. Swanzy fell, but to make doubly sure, the assassins discharged their weapons again into his body.

Repatriate Serbians in United States

A despatch from Paris says:—More than 1,000,000 immigrants in the United States want to return to Europe, according to a Serbian official in Paris, who is arranging a commission to go to America to arrange for the repatriation of 800,000 Jugo-Slavs, who are said to have signified their wish to return to their native land.

Threshing Commenced in Saskatchewan

A despatch from Regina, Sask., says:—The first threshing in Saskatchewan is reported from Radville, work having commenced on an oat crop. In this district the yield will be only fair.

Eminent Jurist Comes to Canada.
Right Hon. Viscount Cave, Lord of Appeal of the British Courts since January, 1919, and former British Home Secretary, who will be the chief speaker at the annual meeting of the Canadian Bar Association which opens Sept. 1st at the Chateau Laurier, Ottawa.

WILL REDUCE CANADA'S EXPENSES

Dominion's Share of League's Upkeep Will be Lessened.

A despatch from London says:—A revision of the financial scheme of the League of Nations under which Canada is required to pay the same contribution towards the upkeep of the League as Great Britain, France, or any other first-class power will be effected by the Executive Assembly of that body at a meeting which has been called for November 15 next at Geneva.

The rating of nations under the universal Postal Union, which classifies the Dominions as first-class powers, has hitherto been followed, but in view of the growing expenses of the League more equitable arrangements are to be made.

British newspapers have recently been making a strong point of the fact that the British contribution is one-third of the total of the original signatory states, but as a matter of fact the Mother Country pays only the same share of this one-third as Canada and the sister Dominions.

As far as Canada is concerned, one of the most important subjects which will come before the Geneva meeting for consideration will be the question of Oriental immigration. This question will be introduced in a report to be submitted by the International Labor Commission which has been created under the League's aegis. It also will be a factor in the matter of the renewal of the Anglo-Japanese Treaty which is to be submitted to the attention of the League.

EIGHT HOURS' WORK FOR SIX DOLLARS

27,000 Harvesters Garner the Western Crops.

A despatch from Regina, Sask., says: Of 27,000 harvesters arriving from the East in Winnipeg, approximately 10,000 have been absorbed in Saskatchewan. The supply to date is about equal to the demand, though there are some districts which have not yet commenced cutting, notably Yorkton, where a yield of 35 bushels to the acre is expected.

Harvesters are asking \$8 and \$9 a day, but most of them have signed up at the prevailing rate of \$6 per day. Many of them are exercised as to the amount of work they are expected to do.

"Will we work eight hours a day?" is the most frequent question with which officials of the Bureau of Labor have been pestered.

"You certainly will," is the inevitable reply.

Western Harvest in Full Swing

Regina, Aug. 22.—The weather in the West has turned warmer again, and harvesting will probably be general in the three Western Provinces during the week, so far as cutting is concerned. There were light frosts in some parts in the latter portion of the past week, and it is reported that the temperature went below freezing in central Saskatchewan but there has been no damage done to the crop so far. The outlook is brighter for the harvest almost everywhere again.

Germany Lost Two and a Quarter Million in War

A despatch from Berlin says:—The total losses in killed and missing suffered by the German army and navy in the great war were, at the first time at 2,243,364, in an announcement of a semi-official nature. Of this number 500,000 men were termed "missing and most likely dead."

War Made Orphans of 12,000,000 Children

A despatch from Paris says:—Twelve million children in Europe lost one or both parents during the war, it is shown by compilations gathered by representatives of the American Red Cross in 18 countries. Russia leads with four million, and France has one million. Albania is last on the list with seventeen thousand.

The Transcript.

THURSDAY, AUGUST 26, 1920

NEWBURY

Mr. and Mrs. Robert B. Andrews of Cleveland, Ohio, visited their aunt, Mrs. Sarah Yates, last week.

Mr. and Mrs. Peter Weaver of Thessville spent Sunday with their mother, Mrs. Yates.

Mrs. McCabe has arrived at her home in Goven, Sask., after a pleasant two months' visit with friends in Newbury.

Miss Anna Foster of Detroit is visiting her grandmother, Mrs. James Patterson.

Andrew Armstrong left on Wednesday for the West. He expected to go to Calgary.

Rev. Boyd York of Kewell, Ohio, occupied the pulpit in Knox church on Sunday afternoon. He also preached a splendid sermon. During his stay in town, with his wife and little daughter, they were entertained at the home of Wm. Bayne.

Mrs. Vanduzer left on Tuesday for her former home in Omecene.

Mr. and Mrs. Thompson and Mrs. Corlett of Thessville spent Sunday with Mrs. Sellers.

Miss Winnifred Parnall is visiting Chatham relatives.

Miss Irene Ralph and Mrs. Murphy of London are visiting friends here.

Born—August 23rd, to Mr. and Mrs. R. H. Moore, a daughter.

Misses Bessie and Hazel Fennell left on Tuesday for Mortlach, Sask., where they will teach.

Miss Dora Sinclair is home from Detroit for a two weeks' vacation.

Mrs. Manning of London is visiting her cousin, Mrs. Sellers.

Mrs. D. G. Archer and niece, Mary Gay, of Windsor are visiting Miss Laura Gay.

Miss Graydon and Miss Stotts arrived home Saturday evening from Muskoka.

Miss Marybelle McLaughlin and Miss Helen Douglas of Mosca are visiting Miss Margaret Bayne.

Miss Bessie Dobbyn of London is visiting her grandmother, Mrs. Lamb.

John Johnston and sister May of Windsor spent a few days here on their return from a trip to New York.

What was very nearly a tragedy happened at the home of Paddy Foley, Euphemia, on Tuesday afternoon, when Miss McKenna attempted suicide by cutting her throat with a butcher's knife. Mr. and Mrs. Foley were in the village and their two sons were cutting out in the field. Miss McKenna being alone in the house. On their arrival home Mrs. Foley, who was the first to go in the house, received a terrible shock, seeing the knife and pool of blood on the floor. Dr. Owens, who was telephoned for, arrived in a few minutes and found the unfortunate woman was alive. Dr. Gordon was then called to assist and the wounds, one in the front and others in the back, were sewn up and the patient made comfortable. After a few days she was removed to the Ontario Hospital at London, where it is hoped she may regain her health of mind and body. Miss McKenna had been ill at the home of Mrs. Foley, her niece, and then been in St. Joseph's Hospital, only returning from there the day previous, being, as her friends thought, much improved in health and no thought of her mind being affected, so that the shock to her friends was the more terrible. Miss McKenna has for years been a practical nurse and was always so quiet and kind that it seems past understanding that her mind should have given way so suddenly.

The vacations are over for the ministers. Rev. J. N. Murphy will resume his duty in Christ church Sunday at 11 a. m. and Rev. C. D. Farquharson his at 2.30 p. m.

The union S. S. picnic of the Church of England and Presbyterians to New Glasgow on Wednesday last was a decided success. The supper was a real feast of good things and ample justice was done by the 58 children and over 30 adults. The motor ride over and

back, the paddling in the lake and the games made a full, delightful afternoon.

MOSA

James Munroe is suffering some severe bruises from being crowded in a stall when tying a horse.

Mrs. Wm. Munroe is visiting her brother in Strathroy.

Miss Minnie Corbett entertained a number of school girls on Thursday last in honor of little Miss Alice Liddle. Mrs. Robert Liddle and Mrs. Oliver Liddle of Rodney and Miss Lizzie Munroe were guests on the same day.

F. I. Abbott is better after a short illness.

Mrs. D. C. Gillies, who has been on the sicklist, is able to be out again.

Mrs. McIntyre of Walkers is visiting at John Secord's.

Wm. McCallum is moving to his new residence in Glencoe this week. Thomas Henderson's new house is nearing completion.

A. B. McLaughlin of Kilmartin and Mr. and Mrs. Hugh R. McAlpine of Shields visited at A. B. McLaughlin's last week.

Mrs. Neil L. Leitch visited at M. C. McLean's on Monday last.

Miss Alizena Mitchell of Chatham is visiting her sister, Mrs. McLean.

Master Fred Bowers of Chatham is visiting his cousin, Hector McLean.

A. B. McLaughlin and family attended the funeral of the late Mrs. Leitch at Strathroy.

Miss A. Mitchell of Chatham and Mrs. McLean visited at J. E. Corbett's on Sunday last.

A. Bayne of Newbury visited at Jas. Douglas's recently.

Mrs. W. R. Brown and son Royal of Chicago and James Patterson of Walkers visited at M. C. McLean's last week.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring all worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worm case and imparting a healthy tone to the system most beneficial to development.

WARDSVILLE

The annual convention of the Women's Missionary Society of Ridgeway district will be held at Wardsville on September 1. Miss Sherritt, missionary now on furlough, will be the principal speaker.

A team owned by Dr. Glenn and driven by Will Holloway ran away on Friday. The boy pluckily held on until the horses collided with a telephone pole near Charles Morrison's.

The pole was torn out, but escaped serious injury. The wagon was overturned and the horses thrown down.

Mr. and Mrs. Hopwood of Essex spent the week-end with Mrs. Cornell. Mr. Hopwood assisted in the song service in the Methodist church Sunday evening.

Miss Margaret McVicar of Detroit and Mrs. (Dr.) Clare and boys are visiting Miss McVicar.

Mrs. Hutchison returned home from Boston last week.

Rev. Boyd York of Ohio, an old Wardsville boy, preached in the Presbyterian church Sunday morning to a large congregation.

Mr. and Mrs. Roy Minna of Montreal are visiting the former's parents here.

Sunday evening, in the absence of the pastor, who is on his holidays, a song service was held in the Methodist church by the young people, assisted by Mr. Hopcot, leader of the Methodist choir at Essex.

Misses Jennie and Olivia Gordon are leaving on Wednesday for Junction City, Oregon, to make their home with their sister. Robert Yates has bought their lot near the Catholic church for \$150.

Rev. J. Sheppard and wife of Vineview church, Detroit, motored from that city and are stopping for a few days with the Misses McVicar.

James Mulligan motored over to Birr on Saturday, returning with Mrs.

NEWBURY CASH STORE

Mulligan and the children.

Dr. James Addison of St. George is visiting Rev. Mr. Farquharson. Dr. Addison's father had a tailor shop in the village some 60 years ago. The house is still standing and occupied by Charles Minna.

Rev. R. J. Murphy is away for a month's holiday.

John Stevely of London visited friends in the village last week.

Dr. Hauser and family have motored to Leamington and Harrow, spending a short holiday on his old circuit.

CAIRO

Mrs. Fred Moore and son Jack of London are visiting at the home of Mr. and Mrs. Ed. Arnold.

Several of our boys have left for the Canadian West. Among them are Melvin Addison and Henry Vogt.

Orville Huffman motored to London on Sunday, taking with him Mr. and Mrs. W. H. McKeown.

Miss Cora Smith of London, after enjoying a couple of weeks amongst friends here, left for home on Sunday.

Miss Jean McKeown is visiting friends in London at present.

The Tipperary Lassies of this place presented Miss Frances Ferguson with a silver casserole and a sterling silver salt and pepper shaker on Friday last, prior to her marriage on Wednesday next.

John Curran has returned after a visit to the home of his late brother, Joseph Curran of Sandusky, Mich.

A most enjoyable picnic or social was held in the Richard grove on the 17th. A pleasing feature of the day was a ball game between Bothwell and S. S. No. 9, in which the latter was successful. Pitcher G. L. Smith, Catcher Fred Burr and first baseman Mac Smith distinguished themselves by their clever playing.

Rev. G. W. Mylne of Ellicott City, Md., preached an eloquent sermon in the Presbyterian church here on Sunday last. A pleasing feature of the day was a solo by Rev. A. E. Wagborne, late pastor of this field, who rendered the selection "Happy Home" in a beautiful manner.

PARKDALE

James Haggitt has a new Ford touring car.

Miss Gregory of Strathroy is visiting her cousin, Miss Edythe Thompson.

Charles Haggitt has returned to his home in British Columbia after having spent a month with his parents here.

Mr. and Mrs. Thomas Haggitt and Mr. and Mrs. E. Blaine spent Monday evening in Glencoe.

The Women's Institute will meet at the home of Mrs. Ed. Haggitt Thursday evening. A good time is anticipated.

James Haggitt has purchased a new car.

NORTH EKFRID

Mr. and Mrs. Jim McDonald and family of Port Colborne are renewing old acquaintances here.

The Ladies' Mission Society met at Mrs. T. Hardy's Wednesday afternoon. There were ten members and four visitors present, one lady being from Windsor. The afternoon was spent in quilting, after which tea was served.

Mr. and Mrs. John Adair of Detroit are here on a visit.

Louis Ramey has gone to Alberta for the harvest.

Mr. and Mrs. Allen Perry of Windsor are holidaying in the vicinity of Strathroy Sunday and were accompanied by a little baby girl.

Mrs. Joseph Kettlewell and family of Windsor are visiting her brother, Ben Patterson.

Born—to Mr. and Mrs. A. Irwin, a son.

Born—to Mr. and Mrs. J. McLean, a son.

Mrs. Sam Kettlewell of Windsor is visiting her sister, Mrs. Levi Howe.

VILLAGE OF NEWBURY

BY-LAW NO. 235

To take the vote of the ratepayers of the village of Newbury entitled to vote on money by-laws on a question to be submitted whether the said ratepayers are in favor of a supply of electric power from the Hydro-Electric Power Commission of Ontario.

WHEREAS the municipal council of the corporation of Newbury deems it advisable to submit to the ratepayers of the village of Newbury entitled to vote on money by-laws a question as to whether the said ratepayers are in favor of a supply of electric power from the Hydro-Electric Power Commission of Ontario.

THEREFORE the council of the corporation of the village of Newbury enacts as follows:

1. That the following question be submitted to the ratepayers of the municipal corporation of the village of Newbury entitled to vote on money by-laws:

Are you in favor of obtaining from the Hydro-Electric Power Commission of Ontario a supply of electric power?

2. That the votes of the said ratepayers shall be taken on this question at the following time and place and by the returning officer and poll clerk hereinafter mentioned, that is to say: On the 14th day of September, A. D. 1920, between the hours of nine o'clock in the forenoon and five o'clock in the afternoon, at the town hall, by Charles Tucker, Returning Officer, and Duncan Stalker, Poll Clerk.

3. A true copy of this by-law shall be published in the Glencoe Transcript on the following dates, namely: the 19th day of August, 1920, and the 26th day of August, 1920, and the 2nd day of September, 1920, and copies of this by-law shall be posted in the following places, namely: The town hall and the post office.

4. On the 10th day of September, A. D. 1920, at the council chamber in the town hall in the village of Newbury at ten o'clock in the forenoon the reeve of the said village of Newbury will in writing sign by him appoint two persons to attend at the final summing up of the votes by the clerk of this corporation and one person to attend the polling place on behalf of the persons interested in and desirous of the answering of the question in the affirmative, and a like number on behalf of the persons interested in and desirous of the answering of the said question in the negative respectively.

5. The 15th day of September, A. D. 1920, at the said council chamber in the village of Newbury at ten o'clock in the forenoon, is hereby appointed for the summing up by the clerk of this corporation of the number of votes given in the affirmative and in the negative respectively.

MADE, PASSED AND ENACTED this 11th day of August, A. D. 1920.

A. HOLMAN, C. TUCKER, Reeve. Clerk.

Notice

TAKE NOTICE that the above is a true copy of the by-law passed by the municipal council of the village of Newbury on the tenth day of August, A. D. 1920.

AND FURTHER TAKE NOTICE that at the hour, day and place there fixed for taking the votes of the electors the polls will be held.

First publication the nineteenth day of August, A. D. 1920.

CHARLES TUCKER, Village Clerk. Council chamber, 10th day of August, A. D. 1920.

VILLAGE OF NEWBURY

BY-LAW NO. 236

To authorize raising the sum of \$9,000.00 for remodeling the existing municipal electric lighting system of the village of Newbury and constructing an electrical distribution plant for operation under the Power Commission Act.

WHEREAS the corporation has applied to the Hydro-Electric Power Commission of Ontario under the provision of "The Power Commission Act" for a supply of electrical power or energy for the use of the corporation and the inhabitants thereof for lighting, heating and power purposes, and for an estimate of the cost thereof.

AND WHEREAS the cost of remodeling the said existing electric lighting system and construction of an electric distribution plant for the village of

Newbury has been estimated to be the sum of \$9,000.00, such estimate having been furnished by the Commission.

AND WHEREAS it will be necessary to issue debentures for the amount of the debt intended to be created by this by-law, and it is desirable that such debentures shall be issued at one time and that the principal of the same shall be made payable in annual instalments during the period of twenty years, such instalments to be of such amount that the aggregate amount payable in each year for principal and interest shall be as nearly as possible equal to amount payable in each of the other nineteen years of said period.

AND WHEREAS the total amount required to be raised annually by special rate for paying the said debt and interest as hereinafter provided is \$798.10.

AND WHEREAS the amount of the whole rateable property of the corporation according to the last revised assessment roll is \$84,479.00 and the amount of the existing debenture debt of the corporation exclusive of local improvement debts secured by special rates or assessments is \$1,386.24, and no part of either the principal or interest thereof is in arrears.

Therefore the municipal council of the corporation of the village of Newbury enacts as follows:

1. That it shall be lawful for the purposes of remodeling the existing municipal electric lighting plant and construction of an electrical distribution plant for the said village of Newbury, pursuant to the estimate furnished by the Hydro-Electric Power Commission, that debentures of the corporation to the amount of \$9,000.00 in sums of not less than \$100.00 each shall be issued as required within two years after the date on which this by-law is confirmed by the vote of the duly qualified electors of the village of Newbury, and each of said debentures shall be dated on the day of the issue thereof, and shall be payable within twenty years at the office of the town treasurer of the corporation as hereinafter provided, and as to both principal and interest may be made payable in Canadian currency or in Sterling money of Great Britain and shall have coupons attached for the payment of interest; each debenture shall be signed by the reeve of the corporation or by some other person authorized by by-law to sign the same and by the treasurer of the corporation and the clerk, who shall attach thereto the corporate seal of the corporation.

2. Said debentures shall bear interest at the rate of six per centum per annum, payable yearly, and in such amounts that the aggregate sum payable in principal and interest in any year in respect of the debt shall be equal as nearly as may be to what is payable for principal and interest in each of the other nineteen years of said period.

3. There shall be raised and levied in each year for twenty years by special rate on all the rateable property in said municipality the sum of \$798.10, being a sum sufficient to discharge the several instalments of principal and interest accruing due on the same debt as the same become respectively payable according to the following schedule:

Year	Prin.	Int.	Annual pay't
1	\$ 258.10	\$ 540.00	\$ 798.10
2	272.30	525.80	798.10
3	287.26	510.84	798.10
4	293.67	495.03	798.10
5	319.74	478.36	798.10
6	337.32	460.78	798.10
7	355.80	442.30	798.10
8	375.44	422.66	798.10
9	396.11	401.99	798.10
10	417.90	380.20	798.10
11	440.87	357.23	798.10
12	465.13	332.97	798.10
13	490.71	307.39	798.10
14	517.71	280.39	798.10
15	546.18	251.92	798.10
16	576.23	221.87	798.10
17	607.91	190.19	798.10
18	641.85	156.25	798.10
19	676.61	121.49	798.10
20	713.83	84.27	798.10

\$9000.07 \$6961.93 \$15962.00

4. This by-law shall take effect and come into operation from and after the final passing thereof.

This by-law was read a first and second time 10th day of August, 1920.

A. HOLMAN, CHARLES TUCKER, Reeve. Clerk.

Notice

Take notice that the foregoing is a true copy of a by-law which has been taken into consideration and which will be finally passed by the council of the municipality (in the event of

the assent of the electors being obtained thereto) after one month from the first publication in the Glencoe Transcript, the date of which first publication being Thursday, the 19th day of August, 1920.

Further take notice that tenants who desire to vote must deliver to the clerk not later than the tenth day before the date appointed for taking the vote the declaration provided for by section 265, subsection 3, of the Municipal Act, R. S. O. 1914, Chapter 192.

And further take notice that the votes of the ratepayers shall be taken of the said by-law on the 14th day of September, 1920, commencing at the hour of nine o'clock in the forenoon and continuing until five o'clock in the afternoon at the following place and by the following returning officer: Polling division No. 1, Town Hall in the village of Newbury; Charles Tucker, returning officer.

Further take notice that on the 10th day of September, 1920, at the town hall, Newbury, at ten o'clock in the forenoon, the reeve will attend to appoint in writing, signed by himself, two persons to attend at the final summing up of the votes by the clerk of the said corporation, and one person to attend the said polling place on behalf of the persons interested in and desirous of promoting the passing of said by-law and a like number on behalf of the persons interested and desirous of opposing the passing of said by-law.

And further take notice that the said town hall at ten o'clock in the forenoon, is hereby appointed for the summing up by the clerk of the said number of votes given for and against said by-law.

Dated at the said village of Newbury this 10th day of August, A. D. 1920.

CHARLES TUCKER, Village Clerk.
