Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

			<input checked="" type="checkbox"/>								

The copy filmed here has been reproduced thanks to the generosity of:

D. B. Weldon Library  
University of Western Ontario  
(Regional History Room)

The images appearing here are the best quality possible, considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contains the symbol → (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

D. B. Weldon Library  
University of Western Ontario  
(Regional History Room)

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminent par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaît sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

# Preston Furnaces

As they appear when encased in Galvanized Iron.

\* ——— MANUFACTURED E. ——— \*

CLARE BROS. & Co., - Preston, Ont.

# Pleasant Home with Radiator.

A Tubular Dome Furnace for Coal or Wood.

# Preston Furnaces.

Owing to our system of **Patent Fused Joints** being embodied in all our furnaces constructed of cast iron and steel we guarantee them to be absolutely gas and dust proof. Bolted, riveted and cemented joints are all right for a time, but owing to the unequal expansion and contraction they gradually give away and in a comparatively short time there is nothing to prevent the escape of gas and dust. They also possess the following **important** features :

**Draw Centre, Anti-Clinker Dumping and Shaking Grate,** which can be completely dumped and is so set that surface can readily be raked. This grate can easily be removed and replaced without disturbing any other part of the furnace.

**Double Low Radiator,** affording long fire travel and vast radiating surface.

**Large Adjustable Water Pan,** which can be regulated to evaporate as much water as desired.

**Upright Shaker Bar** to operate grate without stooping.

**Large Dust Escape,** direct with chimney and operated from front of furnace.

**Extra Large Ash Pit,** which contains Ash Pan and Sifter.

**Heavy Fire Pot** and large Feed door.

**Handy Regulator** to adjust dampers from room above.

See that you understand the importance of the **Fused Joints.**

We supply them brick set or portable and guarantee them to be free from imperfections.

# Combination Heater.

(Hot Air and Hot Water.)

Modern architecture often requires an apparatus by which provision can be made for warming such rooms as can not be reached by warm air pipes from Hot Air Furnaces, and economy forbids the use of more than one furnace. To meet this demand we produced our Hot Air and Hot Water Combination Heater. As will be seen by the illustration the arrangement is quite simple and its operation positive and certain.

These Heaters have been fully tried and tested for several years and are giving splendid results. As regards economy and convenience we believe they are unequalled. We will gladly give special information when required regarding arrangement of Registers, Radiators, Piping, etc., for any building.

The boiler, it will be seen, is so constructed that the amount of hot water supplied may be varied by using one, two, three or more sections as requirements may demand.

We make Boilers in two sizes. The smaller to heat from 300 to 400 ft. inch pipe, and the larger 400 to 500 ft. Each section added to either size will heat 100 ft. additional.

**Small Boiler, \$13.33.**

**Sections each, \$5.33.**

**Large " 18.66.**

**" " 5.33.**

The strongest guarantee as to the merits and  
superiority of the

# Preston Furnaces.

Is the Genuine and Universal Endorsement by those  
who are using them.

We have made a specialty of **Heating** and it has been our  
aim to supply the . . . . .

## . . Best Line of Furnaces . .

On the market, furnaces of the most durable construction and  
with heating surfaces to produce the best possible results from  
fuel consumed.

That we have been successful is well demonstrated in the fact  
that there are . . . . .

## More Preston Furnaces in Successful Operation

Throughout Canada than those of any other make.

If you purchase a Preston Furnace you make no experiment.  
Every Heater guaranteed.
