Vol. 3.

Toronto and Montreal, Canada, February 20, 1892.

No. 2

THE CANADIAN CONTRACT RECORD.

Workly Journal of Public Works, Ten-ders, Advance Information and Municipal Progress.

PUBLISHED EVERY SATURDAY As an Intermediate Edition of the "Canadian Architect and Builder."

Subscription price of "Canadian Architect and Builder" (including "Canadian Contract Record"), \$2 per annum, payable in advance.

C. H. MORTIMER, Publisher,

44 KING ST. WEST. - TORONTO, CANADA. Telephone 2362.

64 Temple Building, Hell Telephone 2549. Montreal.

eation solicited from any part of the Dominion regarding contracts open to

ADVERTISING RATES ON APPLICATION.

At its Concention held in Toronto, Nor. O and 21, 1889, the Ontario Association 30 and 31, 1225, tan Interior American of Archierta signified its approved of the CANADIAN CINIZACT RECORD, and piedged its members to use this journal as their medium of communication with con-tractors with respect to advertisements for Tenders.

Tenders.
The following remistion was unanimously adopted at the First Annual Meeting of the Freeiner of Queber Association of Architects, held in Montreat, but, 10th and 11th, 1890: "Moved by M. Permult, seconded by A. F. Dunlop, that ue the Architects of the Province of Queber unto assembled in Convention being patiafied that the CANADIAN CONTRACT RECEINT Spends us a direct communication with the Contractors,—Resolved, that we wieden our assumet is it by solved, that we pledge our support to it by using its columns when calling for Ten-ders."

The publisher desires to ensure the regular and compt desirery of this Journal to every subscriber. in pucisiner desires to ensure the regular and prompt desirery of this Journal to every subscriber, and requests that any cause of complaint in this particular be reported at once to the office of publication. Subscribers who may change their address should also give prompt notice of same, and in doing so, should give both old and new address.

TO CONTRACTORS.

TORONTO ATHLETIC CLUB, LIMITED.

Plans and specifications can be seen and all other formation obtained at the office of the Architect.

E. J. LENNON, Architect.

TO CONTRACTORS.

Scaled tenders will be received by the undersigned up to 12 o'clock noon on SATURDAY, FEBRUARY 27TH, for the different works required in the crection of a TWO-ROOM SCHOOL HOUSE in the village of Tyrone, according to plans and specifications prepared by Mr. Win. Bunney, Registered Architect, Bowmanville, Plans and specifications can be seen at Mr. Bunney's office on end after Saturday. art. Man. manney, registered architect, rown annulle. Plans and specifications can be seen at Mr. Bunney's office on and after Saturday. February 20th. Tenders must be separate for the different works. The lowest or any tender not necessarily accepted.

W. R. CLEMENS, Sec. to the Board,

TENDERS

TRE HOSE

Tenders addressed to the City Engineer will be received by registered post up to 11 o clock a.m. on TUESDAY, THE 23kD DAY OF FEBRU-ARY, 1892, for the furnishing of 600 feet of 23 inch Fire Hose. The hose to be, in sections of fifty feet lengths, the weight of each section, without couplings, not to exceed 40 pounds avordupois and guaranteed to bear a water pressure of at least 300 pounds to the square inch. Forms of tender can be obtained on application at the City Engineer's office, Toronto.

A cash deposit or marked cheque equal to 5 per cent, of the total amount of the contract, must accompany each and every tender, and the same will be forfeited to the city in the event of the Tenders addressed to the City Engineer will be

will be forfeited to the city in the event of the person whose tender is accepted failing to exe-cute the necessary contract or give satisfactory sureties for the due fulfilment of the same.

The lowest or any tender not necessarily accepted.

TOHN SHAW. Chairman Committee on Works. Commutee Room, Toronto, Feb. 13, 1892.

Notice to Contractors.

Tenders will bereceived by registere I post, addressed to the City Engineer, Toronto, up to Eleven o'clock a.m. on TUESDAY, FER UARY 23MD, 1892, for the following works:

CEDAR PAVEMENTS

On Halton Street, from Hunday Street to Shaw Street.

On lane between St. Patrick Street and D'Arcy, from Beverley Street to Huron Street.

On Lowther Avenue, from Brunswick Avenue to Howland Avenue.

Quantities and forms of tender can be chained on and after rebruary 26, 1892, at the City Engineer's office.

omce.

A. Apposit in the form of a marked cheque, payable to the order of the City Treasurer, for the sim of 5 per cent. on the value of the work tendered for under \$1,000, and 2\(\frac{1}{2}\) per cent. over that amount, must accompany each and every tender, otherwise it will not be entertained. All tenders must bear the hona fide signatures of the contractor and his sureties (see specifications), or they will be ruled out as informal.

The Committee to an thind absolute.

The Committee do not bind themselves to accept the lowest or any tender.

IOHN SHAW

Committee Rooms, Toronto, February 12, 1892.

CHANGE OF DATE.

The attention of our readers is drawn to the fact that the date for the reception of tenders for the Athletic Club building, Toronto, has been extended to the 27th inst., as per advertisement.

TENDERS.

Sealed tenders will be received up to February 29, 1892, for the building of an

IRON OR STEEL BRIDGE

on boundary line between the Townships of Downie and Blanshard, in the County of Perth, same to be completed by August 1st, 1892. Span 77 feet in the clear, 80 feet over all, square abunments; roadway 18 feet in the clear, timber for the floors and joists to be of best white oak. Tenders will be opened in the Committee Room, Stratford Court House, March 1st, at 2 p.m. Bridge Committee do not bind themselves to accept the lowest or any tender. Tenders to be addressed to

JOHN CORRIE, Bridge Inspector, County of Perth. Stratford, February 16, 1892.

CONTRACTS OPEN.

PICTON, ONT. A new Roman Catholic Church will be erected here.

BRIGHTON, ONT A canning factory is shortly to be erected in this town.

WALKERVILLE, ONL-Mr. Thos. Rod will erect a hardsome residence.

MALOES, ONL .- Mr. Thos. H. Parks will erect a residence at a cost of \$2,500

TORT WILLIAM, ONLY The school trustees are talking of creeting a new school building. KISGSTON, ONL. The Thousand Island In-

vestment Company will erect a club house on Murray Hill Park, INDIANTOWN, N.B. Mr. Chas. Miller will in

all probability erect a new saw unit on his propetty near this town, COLBORNE, ONT .- A by-law has been curred

by the ratepayers to issue debentures for the pur chase of an electric light plant. NORTHFIELD, B.C. - The works of the Ham-

ilton Powder Company wid shortly be enlarged to meet the requirements of their business.

GULLPH, ONT. - Mr. Geo. Gray, of Harnston. has been selected architect for the new hospital to be crected in connection with the county poor

CLINTON, ONT. - Mr. las. Howe has decided to purchase an electric light plant, -Mr. Whitehead, mayor of this town, will erect a brick block on the site of the buildings recently destroyed by

DAKIMOUTH N.S -Tenders will be received by the Water Commissioners until the 25th inst. for the supply of service and valve boxes, corporation cocks and lead pipe. Specifications at the Engineer's office.

NELSON, B. C. - Messts. Houston & Ink. have purchased the Hills lots at the corner of Baker and Josephine streets. They will at once commence the erection of a building with a frontage of 60 feet on Baker and 70 feet on Josephene

CLAREVILLE, ONT. -The trustees of school section No. 5. Toronto Gore, 9 Etolocoke and 22 Vaughan, will receive separate tenders until the 22nd inst, for the erection of a school house. Plans at the residence of Mr. Wm. Porter, this village.

COOKSHIRF, QUE, A company composed of Messrs, W. B. Ives, M.P., of Sherbrooke, R. H. Pope, M. P., Albert Hazelton, of this town, has been formed for the purpose of building a pulp mill. The Council has voted a bonus of \$1,500 for 8 aid purpose.

HAMILTON, ONT. Mr. James Balfour, architect, will receive tenders until this (Siturday) noon for the erection of a dwelling on Jackson St. west. (Mr. W. A. Edwards, architect, will receive tenders until the 1st of March for the erection of a brick church and school on the Plans hast road, near this city. Mr. Robert Campbell will erect a brick warehouse on Lock-St., between Canada and Jackson Sts - The promoters of the new theatre are negotiating for the purchase of the old Government rite.

LONDON, ONE "The directors of the V. M. C.A are discussing the erection of a new build ing, at an estimated cost of \$50,000 - The Uits Engineer has been instructed to call for tenders for block paying Hyman, Wellington and Clarence streats, and also for sidewalks and materials, Moore & Henry, architects, will receive tenders until 5 p m on I radio, the 26th inst. for the erection of a brack. I piscopal church at 1 deaton

Mr. O. Graydon, induced City Hall well receive tenders until the 2 all inst. for the coefficient of a residence for Mr. S. H. Gravdon.

WINNIPEG MAN. Local capitals for contemplate the building of an electric trady of from this city to Selkirk. It is said that the Northern Pachet omisery we the promoters of the scheme.

The South Eastern Robert Company has engaged Mr. Stewart, engineer to make a complete survey of the line, which has been approved of at Ottawa. It is the intention of the company to commence operations when spring opens, and to build at least thirty unles during the season,

Superintendent White, of the C.P.R. recently visited Montreal and conterred with Mr. Van Home regarding the projected works to be carried out this summer, which will include the building of branch lines and the erection of several new stations.

VASCOUVER, B. C. The Butish Columbia Iron Works Co, has decided to erect additional buildings and increase their plant. Plans have been prepared for the erection of a 3-story brick building on the corner of Pender and Richard Six. - An award of \$300,000 was made last sexsion by arbitration, against, the Government for defects in the construction of the Onderdonk sections, of this Province, said sum to be expended by the Canadian Pacific tailway company mon the improvement of these sections under the supervision of the Government, Arrangements have been made by which the repairs to these sections will be begun at once, and Mr. Lynch, C.E., of the railway department, Ottawa, has been despatched to supervise the work --lt is said that the Canadian Pacific radway company will erect extensive repair shops in this city

MONTREAL, QUE, "Plans are completed for the widening of Notre Dame St. The Water Department of the City Council have furnished the following list of streets on which mains are to be laid during the coming summer. Ontario, from Cuviller east: St. Catherine, from Harbor

St. east; John lane; Burnett St., Bern St., from Commissioners to Notre Dame, Panet, Sherbrooke St. hill; Marie Ann, Rivard to Champlain, Pine Ave., Arcade to St. Denis; Cadieux. Prince Arthur to Rachel; Fortier, eastern section, German, Fortier to Sherbrooke; Perreault, lane; Prince Arthur, Cadieux to Shuter; Park Ave., Sherbrooke to Pine Ave.: Hutchison, Prince Arthur to Pine: Durocher, throughout: Dowd St., Sherbrooke, University to McTavish; St, Maurice, McGill to Dupre lane, Grey Nun. throughout; Common, Grey Nun to Duke and under the canal to Mill St.; Queen, Common to Ottawa; Nazareth, throughout; Duke, William to Ottawa: Dalhousie, throughout; Ann, throughout; Murray, McCord to William; Bruchest; Inspector, Chabodlez Sq. to St. James; St. Maurice, McGill to Dupre lane; Versailles, Barre to Notre Dame; Guy, from Notre Dame southwards: Argyle Ave.; Aqueduct, Overdale Ave. to St. Antoine; Richmond, from Richmond Sq. to St. James; St. Matthew, from C.P.R. track to St. Antone, Basin, from Richmond westward; Congregation, from Wellington southwards; Notre Dame, from city limits west to Atwater Ave., Grand Trunk, west of Napoleon, and part of Butler St. Ald. Jeannotte is urging the erection of new police stations for Hochelaga and St. Lawrence wards.-Ald. Germain, Gauthier and Clendenning have been appointed a sub-committee to report on sites for incinerators.

TORONTO, ONT. - Messrs, H. A. Massey, L.T. Johnston, of this city, Mr. John Marder, of Marder, Luce & Co., Chicago, and others, are seeking incorporation as the Toronto Type Foundry, with a capital stock of \$150,000, to erect and operate a type foundry in Toronte.-At a meeting of the senate of Toronto University, held last week, plans and estimates were presented for the new chemistry buildings to be crected near the observatory, at a cost of \$60,000. A committee was appointed to estimate the cost of requisite accommodation for the proposed departments of influendogy and geology.-The estimates which have just been presented in the Ontario Legislature, include the following approprintions: Government and Departmental buildings, \$59,000; public buildings, \$418,350; public works, \$31,178 colonization roads, \$95,600, Under the head of public works \$14,000 is placed aside for repairs. Under the head of public buildings there is a new vote of \$50,212 for Minuco cottages, \$70,000 for an asylum for eastern Ontano, cottages at Brockville to accommodate 500 patients, the estimated cost of which is \$250,000, of which \$70,000 will be required for this year's operation, \$20 000 for six new dining rooms in the London a ylum, and at the Central Prison \$15,500 for a new building for extension of industries and \$25,000 for machinery for the same; \$6,500 for an iron fence to surround the Normal School, Toronto, - Messrs, Smith & Gemmell, architects, Bank of Commerce Builds ing, will receive tenders until Wednesday, the 24th inst., for the erection of a brick and frame residence on Summerhill avenue, North Toronto, -Building permits have been granted as follows, Mrs. E. Sexton, nine attached 4-storey brick stores and dwellings, n. w. cor. Prinswick ave. and College st., cost \$100,000; Geo. Murray, three attached 2-storey and attic bk, awellings, w. side of Ontario st., n. of Wellesley st.; James Hewlett, three det, a-storey and attic bk. dwellings, n. side Dale ave., cost \$10,000.

FIRES.

Mr. Langmaid's residence, near Whitby, Ont., was burned on Tuesday last. Insurance small, -The residence of Mr. John Redmond, at Oil City. Ont., was destroyed by fire on the 15th inst .-- The McKellar house at Glencoe. Ont., with all its contents, was burned to the ground on the 15th inst. The building was insured for \$1,000. - The residence and lakery of E. Stevens. at Wallaceburg, Ont., was entirely destroyed by fire on Saturday last. Insurance on building, \$1,500.-The grist mill belonging to Mr. W. L. Hicks, at Selkirk, Ont., was totally destroyed by fire on the 12th inst. Loss \$3.000; insurance \$1,000.-Mr. F. S. Ree's lakery shop on Princess St., Kingston, was destroyed by fire on Saturday last. Loss \$2,000.

CONTRACTS AWARDED.

OTTAWA, ONT.—The contract for the new lighthouse to be erected at Point Anglais whatf on the Ottawa river has been awarded to Mr. Chas, Christian, of this city, for \$1.950.

VICTORIA, B. C.—Messis. McGregor & Innes, of this city, have been awarded the contract for the erection of the new building for the Victoria Brewing Co. The contract price is said to be between \$60,000 and 70,000.

VANCOUVER, B.C.—Messrs, W. Archer & Co. have awarded the contract to Messrs. Franklin & Patterson for the erection of a large two-story building on Wesiminster Ave.—The City Council have accepted the tender of Messrs. Bell-Irving & Patterson, of this city, for supplies for the waterworks at the following prices: Special castings, \$60.20 per ton; pig lead, \$70.60; lead pipe, \$102.00.—Messrs. Doherty & Co., of Sarnia. Ont., are the lowest tenderers for valves and hydrants, but the contract has not yet been awarded.

USEFUL HINTS.

To STAIN WOOD BLUE—Boil a quarter of a pound of turnsole for an hour in three pints of lime water, and color the wood with it.

Aluminum has been substituted for cast iron in the specifications for the dome of Philadelphia's new City Hall. It will save the constant expense of painting and reduce the weight of the tower about 400 tons.

To frost brass work, boil in caustic potash, rinse in clean water, and dip in nitric acid till all oxide is removed; then wash quickly, dry in boxwood sawdust, and lacquer while warm. This will give brass an ornamental finish.

The method prescribed for cleaning brass in United States arsenals is said to be to make a mixture of one part common nitric acid and one-half part sulphuric acid in a stone jar, having also ready a pail of fresh water, and a box of sawdust. The articles to be treated are dipped into the acid, then thrown into the water and finally rubbed with sawdust. This immediately changes them into a brilliant color. If the brass has become greasy it is first dipped into a strong solution of potash and soda in warm water; this cuts the grease, so that the acid has full power to act.

The following recipe gives a useful white-wash for external walls coated with common plaster, as in lath-and-plaster houses. It is the kind used on public works in the United States, and is very reliable. Take ½ bushel of best line, slaked with boiling water; 1 peck salt, dissolved in warm water; 3 lbs. ground rice, boiled to a thin paste; ½ lb. ground whiting, and 1 lb. clear glue dissolved in warm water. Mix altogether, add hot water to bring to proper state for application, and let stand for several days. When required, heat and apply with a large brush.

They have a way in the North of correcting varnish when it blooms by remmoving it in this manner: They get a cup-full of flour and empty it into a silk handkerchief which they tie up lightly. With this pounce they gently rub the blooming varnish and then dust off any flour that may be clinging to the wall. It is said that this is an effectual cure and the blooming nuisance never troubles them any more. Some use fine sifted fuller's-earth in the same way (adding, in some cases, a little raw linseed oil), but

the flour plan is certainly the cleaner method and is said to be more effectual.

WHY TIN RUSTS .- An explanation of the rusting of block tin, as given in the Mineral Water Review, states that, on being exposed to the action of the air, pure tin is not affected at ordinary temperatures, but as soon as a portion of the tin is removed by injury so as to expose even a tiny speck of iron surface, corrosion at once sets in and proceeds very rapidly. The reason of this is of an electrical nature-that is, iron and tin together form what is a "galvanic couple," which will decompose the water, charged with carbonic acid, deposited upon them from the air; oxygen and hydrogen gases are liberated, and the iron, having the greater affinity for the oxygen, is the metal attacked; in particular, such corrosion is very rapid when the exposed iron surface comes in contact with water highly charged with carbonic acid, as in a mineral water factory.

According to A. Dannenberg, the washing of fat clays cannot be recommended, this process being of advantage only for the separation of sand and pebbles from calcareous clays, meagre clays, etc. By washing, fat clays are slowly dissolvedwhich to a considerable extent limits their effective capacity. Furthermore, fit clay-mud dries so slowly that notwithstanding all appliances and labor, the material washed in the Winter and Spring can in wet years rarely be used in Summer. However, when a clay-mill is used, the clay can be dug and spread out in Summer and in one or two days may, as a rule, be brought bone-hard into the claymill or the storage-shed. The construction of the mill is very simple. It consists of an iron frame, shaft with gearing, and six steel arms which comminute the clay. The latter is cleaned by falling into and passing through a conical cylindrical sieve.

SEWER VENTILATION.

The views of Mr. W. Santo Crimp, M. I. C. E., Assistant Engineer to the London County Council, are summarized as follows: -1. That the wind is the only agent which produces measurable movements of sewer-air in an ordinary system of sewers. 2. That the fullest use of the wind should be made in effecting the proper ventilation of sewers. 3. That the offensiveness of sewer-air should be lessened to the fullest practicable extent, by systematic flushing and cleansing of the sewers and by keeping them structurally in a thoroughly effective condition. 4. That small pipe-sewers need not be ventilated to the same extent as those large enough to admit of men working in them, vents high overhead being alone required. 5. That in all systems where practicable, ventilating pipes should be carried up high buildings or other objects, where they may discharge their foul contents into the atmosphere high overhead, and that street ventilators should then be reduced to a minimum. 6. That if every house were properly drained and proof against sewer-air, ventilation of sewers, as ordinarily practised, would be unneces-

Hubert Prevost, contractor, Montreal, has assigned with liabilities at \$18,917.

MUNICIPAL DEPARTMENT.

OUR MUDWAYS.

"The wealth and prosperity of a country May be seen in its well made and kept highway." —Ibid.

Editor Municipal Department.

SIR,-With the first meetings of the various County townships, and other councils throughout the land, is not the present time an opportune one to again call attention to the question of roads and their management? We need go no further than across the line south of us to learn how largely this question has increased in interest in as short a time as the past five or six years. This is conceded even in very small places (which might be named) where, as a rule, any outlay of over \$500 would have before created a furore in the village council, if asked for to be spent on road repairs, but where now the ratepayers cheerfully laying themselves under tribute for sums varying from five to ten times that amount, in order to procure the necessary machinery for their purpose. The conditions warranting such outlays as not only expedient, but in the end strictly economical in such cases, are not unknown here. On the roads north, east and west of us, what will be their condition in a few weeks other than the usual one of utter impassability from mud, and afterwords in the dry weather, almost as useless (for pleasure quite so) from dust.

This must and always will be the case so long as the present prevailing method of road construction and muntenance is pursued, and the universal horror against toll gates is not to be wondered at, since they fail to make any improvements in the purposes they were established for.

That the present annual waste (labor and material) now going on can be controlled, requires no loud assertion. Any road leading into Toronto, having a sufficiently energetic trust board, commissioner or other official that would adopt some ordinary specification, such as is now called for for country roads, and work closely to this for even say a distance of ten or twelve miles, will be more than amply repaid, it is to be believed, by the increased traffic and consequently largely augmented receipts in tolls.

To the farmer, good roads mean better prices for his product, consequent on less wear of vehicles and animals, with quicker transport to the citizens generally, healthful pleasure in many forms, besides the more frequent visits of their surrounding customers: to the country at large, universal and enlightened advancement.

FASCIA VAPORE.

IRON AND OAK PAVEMENT.

A block pavement composed of iron and wood was put down in Columbus, Ohio, on May 30, 1890 and has been in use ever since that time with satisfactory sults. The section laid is small, and is composed of blocks of wood about 5 inches long and 3½ inches square, set on end in suitable cast-iron pockets, which in turn are supported on cast-iron base plates. The blocks project about two inches from the cast-iron, and in August, 1890, after having been in service about three months, it was found that about one-eighth inch was worn off the wood.

In December, 1891, after a service of nearly sixteen months, about one-quarter inch was found to be worn away. The section is in front of the "Big Four" freight depot, and is subject to very heavy traffic. J. W. Cole, in a paper before the American Society of Engineers, considers that this pavement meets the requirements of good street pavements in that it is substantial for heavy traffic, affords a good firm foothold for the horse, and is practically noiseless.

LEGAL DECISIONS AFFECTING MUNICIPALITIES.

MUNICIPALITY-WHARI PROPERTY .-The power of a municipal corporation to aquire land for the purpose of erecting wharfs thereon and to charge wharfage is not a necessary incident of its charter, but must, like all its other powers, be derived directly from the legislature to be exercised within the limits and upon the conditions of its grant, according to the decision of the Kentucky Court of Appeals in the case of Roberts et al. vs. City of Louisville.

GAS AND WATER PIPES DECLARED TO BE IMMOVABLES. - Judge Tait rendered a most elaborate and very important judgment at Sherbrooke, a few days ago, in the case of the Sherbrooke Gas and Water Company and the Corporation of the City of Sherbrooke. Tms was an appeal from a decision of the municipal council homologating the valuation roll, in which the valuations placed on two parcels of land belonging to appellants were increased from \$6,000 and \$8,000 to \$36,000 and \$78,000 respectively. The increase represents the value put on the gas and water mains and pipes running through the streets of the city. The pretension of the appellants was that these pipes were not placed upon the lots and did not form part thereof, but were placed throughout the streets by special permission of the Legislature, formed no part of the real estate of the city and were not taxable property. The learned judge after quoting the leading authors and a number of precedents, here as well as in France and the United States, came to the conclusion that the pipes must be considered as an immovable, as, apart from the authorities quoted, common sense shows that they are but the limbs of the body and-a part of it. The Court must therefore decide that the respondents had a right to tax the mains and pipes as part of the real estate belonging to appellants, and the petition must be dismissed with costs.

SANITARY AND UNSANITARY RELA-TIONS OF UNDERGROUND WATERS.

BY W. R. BRYCE, M.D., TORONTO, CANADA.

It is not my intention to deal at any length with this subject, but rather to present some of the principles to be observed in the selection of drinking waters.

Much has been said with regard to the dangers of drinking water from wells; but it has not been until recently that the differentiation has been made as regards wells that are dangerous and those that are healthy.

As a general principle it may be said that practically all really underground waters are sanitarily good; but it must be clearly understood what is meant by underground water. For instance:

- 1. A water lying in a shallow due-out m prairie or bog land, down only to the impervious clay or rock below, cannot fairly be called underground water.
- 2. Neither can a well down even into a true water-bearing stratum of sand or gravel be called an underground water if the water of the upper organic soil layer is allowed to perculate toward the well latterally without really moving down-ward through the underlying beds of clay loam, sand or gravel, which serve to steri-lize the waters in their passage down-
- 3. Neither can a well be called underground if, as is commonly the case, the vell is covered with boards or a wooden framework, thereby allowing the filth washings from the surface of the boards to be carried down through cracks into the water of the well.

Carl Fraenkel and others have carefully examined into the water of pit-wells, and such have by Pflugge been called "hygenic monsters."

Clearly, then, underground waters mean those which have primarily fallen upon the surface, have there been contaminated with soil microbes, but which have, in their passage downward, through percolation to the water-bearing zone situated on some impervious stratum, been purified by the several natural agencies which are

PUBLICATIONS.

Mr. Chas. Baillairge, City Engineer of Quebec, has kindly favored us with a copy of his report for 1890-91, which shows the sum of \$68,260.58 to have been expended on street repairs and improve-

Mr. H. J. Jennings, who for years held the position of town clerk and treasurer, Division Court clerk, etc., at Penetanguishene, is reported to have left the town for parts unknown.

The town of Toronto Junction will ask for applications for the position of water superintendent, at a salary of \$1,000; two assistants, at \$500 each, and town engineer at a salary of \$1,500, out of which sum must come the salaries of

OF ST. JOHNS, P. Q. (LIM.)

Manufacturers of Salt-Glazed, **Vitrified SEWER**

Double Strength Railway Culvert Pipes, Inverts, Vents,

AND ALL KINDS OF FIRE CLAY GOODS.

Peterborough, Ont.

WM. H. LAW, Proprietor and Engineer, MANUFACTURER OF

RAILWAY AND HIGHWAY BRIDGES

Viaducts, Piers, Roofs, Turntables and Girders in Steel and Iron.

Tension members forged without welds. Riveting done by hydraulic or compressed air machines Spicialties Good workmarship and strict adherence to specifications and drawings.

CAPACITY 2,000 TONS PER ANNUM.

DEBENTURES WANTED.

Municipalities usuing delemures, no matter for what urpose, will find a ready purchaser by applying to A. STLMSON, B Toronto Street, Toronto, N.B. Money to loan at lowest rates on first mortgage

National Meter Go.

GOWER & CO.

204 St. James Street,

MONTREAL.

94,000 Meters sold and in use to date.

GOWER & CO. well also quote for FILTERS, STAND PIPES, CAST PIPES, SPECIALS, HVDRANTS, VALVES, and all Waterworks and Municipal Supplies

THE EXAMINATIONS

01 1111

ROYAL INSTITUTE OF BRITISH

NOTICE IS HEREBY GIVEN that after the close of the year 1893 all gentlemen who desire to qualify for candidature as ASSO-CIATE of the Royal Institute of British Architects (except in special cases submitted to and approved by the Council) will be required to enter for the PRELIMINARY Examination, and having passed it, work up through the INTERMEDIATE to the FINAL Examina-INTERMEDIATE to the FINAL Examination, which in 1894 will take the place of the
present "Examination in Architecture." The
only Examinations to which young Architects
who are in practice and who desire to become
Architects without passing the Progressive Examinations can enter, take place twice in the year
1892 and twice in the year 1893. Those therefore
who may not be prepared to enter for the
"EXAMINATION IN ARCHITECTURE"
before the close of 1893, should take immediate
steps to secure registration as Probationers, which
they can do by passing the Preliminary Examination or obtaining the GRANT OF EXEMPTION THEREFROM.

ASHTON WEBB, Hon. Secretary. WILLIAM H. WHITE, Secretary.

The Royal Institute of British Architects, 9 Conduit Street, Hanover Square, London W., 25th January, 1892.

CANADIAN

Architectural Ironwork a specialty. Pleased to furnish estimates.

St. George's Patent Sectional

CAST IRON STREET GULLEY.

THE undersigned begs to call the attention of town councils or those in-terested in the construction of sewerage. to the above mentioned patents, and will be pleased to send circulars and give any information required to those desiring such. The sectional sewer makes a CHEAPER and at the same time a more durable and efficient sewer than the or be nary brick. The cast non street gulley, of which there are 5,000 m use in M n real, Toronto, Ottawa, Quebec, Peterboro, Owen Sound, Sarma, St. Henri, St. Cuncgonde, and other places, is such a great improvement and saving on brick that corporations who have tried them never put in bricks again.

LEWIS SKAIFE.

Engineer and Contractor.

New York Life Building, - MONTKEAL. AGENT.
