

## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for scanning. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of scanning are checked below.

L'Institut a numérisé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de numérisation sont indiqués ci-dessous.

- 25d.** Return to an Order of the House of Commons, dated 9th February, 1885, for a statement and plan showing the grades and curves on the temporary or permanent line actually constructed by the Canadian Pacific Railway Company, from the foot of the Rocky Mountains as far as the rails are laid; and the proposed grades and curves on the continuation to Kamloops; showing also the proposed grades and curves on the permanent line at a point at which a temporary line of about nine miles has been constructed. Presented to the House of Commons, 5th March, 1885.—*Mr. Blake*.....*Not printed.*
- 25e.** Return to an Order of the House of Commons, dated 5th February, 1885, for map or maps showing: 1. The location of the Canadian Pacific Railway, so far as approved of or constructed. 2. Its location, so far as proposed to Government, but not yet approved. 3. The location of any branches constructed or acquired and of any now contemplated by the company, so far as the Government is advised. 4. The lands set apart for the company, but not yet granted. 5. The lands granted. 6. The lands applied for, but not yet set apart. Presented to the House of Commons, 5th March, 1885.—*Mr. Blake*.....*Not printed.*
- 25f.** Return to an Address of the House of Commons, dated 5th February, 1885, to His Excellency the Governor General, praying that he will cause to be laid before the House a copy of: 1. Correspondence between the Canadian Pacific Railway Company and the North Shore Railway Company, for the purchase, by the said Canadian Pacific Railway Company, of the said North Shore Railway from St. Martin's Junction to Quebec, or to obtain control of the same, or to make such arrangements as would allow the said Canadian Pacific Railway to extend its railway to Quebec. 2. Of all correspondence between the Government and the Canadian Pacific Railway Company concerning the extension of their railway from St. Martin's Junction to the Harbor of Quebec. 3. Of all correspondence between the Government and any other persons for the purpose of incorporating such persons for the construction of a railway from the terminus of the Canadian Pacific Railway, at St. Martin's Junction, to the Harbor of Quebec. Presented to the House of Commons, 5th March, 1885.—*Mr. Laurier*.....*Not printed.*
- 25g.** Return to an Order of the House of Commons, dated 17th February, 1885, for a copy of separate report or finding of Judge Clarke, one of the arbitrators on the claims for damages of contractors for Section B, Canadian Pacific Railway, in regard to such claims or to the award in reference thereto, signed by Messrs. Brydges and Light, the other arbitrators. Presented to the House of Commons, 5th March, 1885.—*Mr. Casey*.....*Not printed.*
- 25h.** Return to an Order of the House of Commons, dated 17th February, 1885, for a copy of the case submitted by the Government to counsel, and opinion given by counsel consulted by the Government, as to the validity of the award of damages to contractors for Section B, Canadian Pacific Railway, and as to the action that should be taken in reference to such award. Presented to the House of Commons, 5th March, 1885.—*Mr. Casey*..... *Not printed.*

- 25i.** Return to an Order of the House of Commons, dated 16th February, 1885, for a statement of sums paid to the Canadian Pacific Railway Company up to date, for constructions on those portions of the Canadian Pacific Railway between Port Arthur and Winnipeg, the contract for which has been transferred to them from the original contractors, with dates of payment; also, copies of estimates on which such payments have been made, showing quantities and rates. Presented to the House of Commons, 5th March, 1885.—*Mr. Casey*.....*Not printed.*
- 25j.** Supplementary Return, under resolution of the House of Commons, passed on the 20th February, 1882, on all subjects affecting the Canadian Pacific Railway, respecting details as to:  
1. The selection of the route. 2. The progress of the work. 3. The selection or reservation of land. 4. The payment of money. 5. The laying out of branches. 6. The progress thereon. 7. The rates of tolls for passengers and freight. 8. The particulars required by the Consolidated Railway Act and amendments thereto, up to the end of the previous fiscal year. 9. Like particulars up to the latest practicable date before the presentation of the Return. 10. Copies of all Orders in Council, and of all correspondence between the Government and the Railway Company, or any member or officer of either, relating to the affairs of the company. Presented to the House of Commons, 5th March, 1885, by Hon. J. A. Chapleau.  
*Printed for Sessional Papers only.*
- 25k.** Return to an Address of the House of Commons, dated 5th February, 1885, for a statement showing the date and rate at which the ten million dollars of Canadian Pacific Railway stock formerly pledged for a loan of about \$4,950,000 was sold, and the net amount received by the company in respect of such sales. Presented to the House of Commons, 9th March, 1885.—*Mr. Blake*.....*Not Printed.*
- 25l.** Return to an Order of the House of Commons, dated 4th February, 1885, for copies of all reports of Government engineers, made previous to and on this day, in relation to the survey of the several proposed lines for the extension of the Canadian Pacific Railway from Montreal to a port on the Atlantic Ocean. Also the instructions and the official correspondence which passed between the several engineers and the Government. Presented to the House of Commons, 11th March, 1885.—*Mr. Lesage*.....*Not printed.*
- 25m.** Return to an Address of the House of Commons, dated 17th February, 1885, for a plan of the proposed route or routes of the Canadian Pacific Railway from Port Moody, or the neighborhood thereof, to English Bay or Coal Harbor, showing the point at which the route chosen diverges from the main line, and the distance thereof from the present terminus at Port Moody; also an estimate of the cost of constructing the proposed line to the new Pacific terminus, and of the cost of the terminal accommodations there. Presented to the House of Commons, 13th March, 1885.—*Mr. Blake*.....*Not printed.*
- 25n.** Return to an Address of the House of Commons, dated 23rd February, 1885, for copies of the report of Mr. Van Horne, Vice-President of the Canadian Pacific Railway Company, of September last, and of Mr. S. B. Read, C.E., of the same month, with reference to the Canadian Pacific Railway in British Columbia; and also reports of engineers of high standing, as to the route of the Canadian Pacific Railway at the point where a temporary line has been built, referred to in the letter from Mr. Van Horne to the Minister of Railways and Canals, of 19th May, 1884, and for any report of Mr. Fleming on the subject, in the possession of the Railway Company. Presented to the House of Commons, 13th March, 1885.—*Mr. Blake*—  
*Printed for Sessional Papers only.*
- 25o.** Return to an Address of the House of Commons, dated 17th February, 1885, for a copy of the claim put in by the contractors of Section B, on which the award to them of \$395,600 was based; and of Order in Council of 2nd April, 1883, in reference to submission to arbitrators. Presented to the House of Commons, 13th March, 1885.—*Mr. Casey*.....*Not printed.*
- 25p.** Supplementary Return to an Order of the House of Commons, dated 17th February, 1885, for a copy of the case submitted by the Government, as to the validity of the award of damages to contractors for Section B, Canadian Pacific Railway, and as to the action that should be taken in reference to such award. Presented to the House of Commons, 16th March, 1885.—*Mr. Casey*.....*Not printed.*

- 25q.** Return to an Address of the House of Commons, dated 5th February, 1885, for copies of all correspondence, reports and Orders in Council not covered by the previous Address, relating to the allowances proposed to be paid to the Canadian manufacturers of certain goods required by the Canadian Pacific Railway; of all applications for such allowances, and correspondence in connection therewith; a statement of the calculations on which the allowances have been based, and an estimate in detail of the probable sums payable out of the Treasury in respect of each class of goods, assuming them to be made in Canada, to the extent of the company's requirements, and of the *ad valorem* percentage of all allowances on each such class. Presented to the House of Commons, 18th March, 1885.—*Mr. Blake*.....*Not printed.*
- 25r.** Return to an Address of the House of Commons, dated 12th March, 1885, for a statement showing the names and addresses of all shareholders in the Canadian Pacific Railway Company, with the amount of stock held by each, as of the date of 16th February, 1885. Presented to the House of Commons, 18th March, 1885.—*Mr. Blake*.....*Not printed.*
- 25s.** Return to an Order of the House of Commons, dated 16th February, 1885, for a copy of the report of the engineers appointed to re-measure and re-classify the work on Section B, Canadian Pacific Railway, in connection with the claims of the contractors for said section for increased remuneration for such work and for damages. Also all reports of the engineers in charge of said section, or of the Engineer-in-Chief or any other Government engineer, in reference to the questions of measurement, classification or damages at issue between the Government and the contractors. Presented to the House of Commons, 23rd March, 1885.—*Mr. Casey*—  
*Printed for Sessional Papers only.*
- 25t.** Return to an Address of the House of Commons, dated 9th February, 1885, for a statement showing the number of passenger trains, freight trains and mixed trains, distinguishing each class, run daily, or weekly in cases in which there was not a daily train, over each division of the Canadian Pacific Railway, in each week of the years 1883 and 1884 respectively. Presented to the House of Commons, 26th March, 1885.—*Mr. Blake*.....*Not printed.*
- 25u.** Return to an Order of the House of Commons, dated 12th March, 1885, for copies of all memorials, letters and other representations, in writing, received by the Government on the subject of the non-payment by the Canadian Pacific Railway Company of amounts due to contractors, sub-contractors or laborers engaged in the construction of the Canadian Pacific Railway. Presented to the House of Commons, 26th March, 1885.—*Mr. Charlton*—  
*Not printed.*
- 25v.** Supplementary Return to a Standing Order of the House of Commons, passed on the 20th February, 1882, for full information on all subjects affecting the Canadian Pacific Railway up to the latest date, and particularly all details as to: 1. The selection of the route. 2. The progress of the work. 3. The selection or reservation of land. 4. The payment of the moneys. 5. The laying out of branches. 6. The progress thereon. 7. The rates of tolls for passengers and freight. 8. The particulars required by the Consolidated Railway Act and amendments thereto up to the end of the previous fiscal year. 9. Like particulars up to the latest practicable date before the presentation of the return. 10. Copies of all Orders in Council and of all correspondence between the Government and the railway company, or any member or officer of either, relating to the affairs of the company. Presented to the House of Commons, 23rd April, 1885, by Hon. J. H. Pope.....*Not printed.*
- 25w.** Return to an Address of the House of Commons, dated 12th February, 1885, for a statement in detail of the present position of land grant and the land grant bonds of the Canadian Pacific Railway Company, showing, by the number of the section, the township and range or other description, the lots granted to the company. Also the lots sold by the company. Also the amount of land grant bonds in the hands of the Government; the amount in the hands of the company; the amount in the hands of the public; the amount pledged by the company for loans, or otherwise, with details, and the amount cancelled; showing also the sum received by the company for lands sold in each calendar year and in the course of the present year; and the amount now due to the company in respect of lands sold, with a separate statement showing the amount received by the company from sales in town sites, and

the amount now due on such sales, distinguishing between the receipts and debts on account of town sites comprised in the land grant, or in any arrangement with the Government, and the receipts and debts on account of other town sites. Presented to the House of Commons, 23rd April, 1885.—*Mr. Blake*.....*Not printed.*

**25z.** Return to an Order of the House of Commons, dated 2nd March, 1885, for copies of all reports, plans, specifications, estimates, contracts, correspondence and other papers in connection with the construction of the Canadian Pacific Railway wharf and freight shed at Port Moody, B.C., and relating to its deterioration and repairs or reconstruction. And like papers as to the bridge on the railway near Spuzzum, B.C. Presented to the House of Commons, 23rd April, 1885.—*Mr. Blake*.....*Not printed.*

**25y.** Return to an Order of the House of Commons, dated 24th February, 1885, for any information in the possession of the Department as to the character of the work done near Lytton, B.C., on the Canadian Pacific Railway, on that portion of the road for which Mr. Hugh J. Keefer had a sub-contract, and which was under the inspection of his brother, Mr. George Keefer, Government engineer; also copies of any statements as to the character of the material allowed as rock or as other than earth, in this part. Presented to the House of Commons, 24th April, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*

### CONTENTS OF VOLUME No. 10.

**25z.** Return to an Order of the House of Commons, dated 23rd February, 1885, for all reports, plans and other information in the possession of the Department in reference to the work on the Canadian Pacific Railway at or near Maple Ridge, a short distance above Hammond, on the bank of the Fraser, B.C.; for all reports and information in the possession of the Department as to the condition of the work on the Government sections of the Canadian Pacific Railway in British Columbia; and as to the extent of work remaining to be done before the completion of the contract; also for all correspondence with the Canadian Pacific Railway Company as to the taking over by them of these sections of the railway; also for a statement of the names, salaries and period of service in that region, of the Government engineers who have been employed on the Government sections in British Columbia of the Canadian Pacific Railway, with the dates at which any of them were relieved, a statement of the cause of their removal, and of their present occupation, if any, under the Government. Presented to the House of Commons, 5th May, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*

**25aa.** Return to an Order of the House of Commons, dated 2nd of March, 1885, for copies of all applications, statements, estimates or letters sent from the Canadian Pacific Railway to the Government, or any of its officials, in relation to the change made by the Government between 7th April, 1884, and 16th May, 1884, in the dealing with rolling stock in progress estimates and payments in the Eastern Section, Western Division, and copies of all correspondence and papers upon the same subject. Presented to the House of Commons, 5th May, 1885.—*Mr. Edgar*.....*Not printed.*

**25bb.** Supplementary Return to a Standing Order of the House of Commons, passed on the 20th February, 1882, for full information on all subjects affecting the Canadian Pacific Railway up to the latest date, and particularly all details as to: 1. The selection of the route. 2. Progress of the work. 3. The selection or reservation of land. 4. The payment of moneys. 5. The laying out of branches. 6. The progress thereon. 7. The rates of tolls for passengers and freight. 8. The particulars required by the Consolidated Railway Act and amendments thereto, up to the end of the previous fiscal year. 9. Like particulars up to the latest practicable date before the presentation of the Return. 10. Copies of all Orders in Council and of all correspondence between the Government and the Railway Company, or any member or officer of either, relating to the affairs of the company. Presented to the House of Commons, 5th May, 1885, by Hon. J. H. Pope.....*Not printed.*

**25cc.** Letter and statements from George Stephen, Esq., President of the Canadian Pacific Railway Company, to the Hon. the Minister of Railways and Canals, accompanied by Mr. Miall's condensed balance sheet on the affairs of the Canadian Pacific Railway Company on the 1st January, 1885. Presented to the House of Commons, 7th May, 1885.—*Sir J. A. Macdonald*.....*Printed for both Distribution and Sessional Papers.*

- 25dd.** Return to an Order of the House of Commons, dated 6th February, 1885, for a Return of the names of persons in the employ of the Government along the line of the Canadian Pacific Railway during the year 1884, the date of their engagement, the length of time employed, the work assigned them and the salary, fee or allowance paid; also the amount of travelling expenses paid to each. Presented to the House of Commons, 8th May, 1885.—*Mr. McMullen*.....*Not printed.*
- 25ee.** Supplementary Return to an Order of the House of Commons, dated 2nd March, 1885, for copies of all applications, statements, estimates or letters sent from the Canadian Pacific Railway to the Government or any of its officials, in relation to the change made by the Government between 7th April, 1884, and 16th May, 1884, in the dealing with rolling stock, in progress estimates and payments in the Eastern Section, Western Division, and copies of all correspondence and papers upon the same subject. Presented to the House of Commons, 16th May, 1885.—*Mr. Edgar*.....*Not printed.*
- 25ff.** Return to an Order of the House of Commons, dated 2nd March, 1885, for copies of all the estimates, in detail, furnished to the Government by the Canadian Pacific Railway Company, and by the Government engineer, upon which the estimated cost of \$23,000 per mile was based for the portion of the Eastern Section from the 100th mile to the 120th mile west of Callander, giving quantities, classification and prices; also for a statement of the actual quantities, description and classification of the work from the 100th mile to the 120th mile west of Callander on the 12th August, 1884, when the subsidy and loan were paid by the Government as a completed line. Presented to the House of Commons, 16th May, 1885.—*Mr. Edgar*.....*Not printed.*
- 25gg.** Return to an Order of the House of Commons, dated 2nd March, 1885, for copies of the report of survey by Vernon Smith, C.E., in relation to the extension of the Canadian Pacific Railway to Canadian ports on the Atlantic. Presented to the House of Commons, 16th May, 1885.—*Mr. Lesage*.....*Not printed.*
- 25hh.** Return to an Address of the House of Commons, dated 12th March, 1885, for copy of all offers made to the Government for the construction of a railway connecting the Ontario railway system, at or near to Gravenhurst, with the Canadian Pacific Railway. Presented to the House of Commons, 9th June, 1885.—*Mr. Mulock*.....*Printed for Sessional Papers only.*
- 25ii.** Return to an Address of the House of Commons, dated 12th February, 1885, for a Return showing the amounts contributed to the Canada Central Railway between Ottawa and Brockville, either by the Government of Canada, the Provincial Government of Ontario, or by the municipalities along that line of railway. Also showing what securities were taken for the amounts so advanced to the said railway company, and what disposition has been made of the said securities. Also for similar returns concerning the St. Lawrence and Ottawa Railway from Ottawa to Prescott, together with the conditions upon which such grants were made to both railways; also statement showing the present train service on both lines of railway. Presented to the House of Commons, 9th June, 1885.—*Mr. Landerkin*...*Not printed.*
- 25jj.** Supplementary Return to an Order of the House of Commons, dated 5th February, 1885, for map or maps showing: 1. The location of the Canadian Pacific Railway, so far as approved of or constructed. 2. Its location, so far as proposed to Government, but not yet approved. 3. The location of any branches constructed or acquired, and of any now contemplated by the company, so far as the Government is advised. 4. The lands set apart for the company, but not yet granted. 5. The lands granted. 6. The lands applied for, but not yet set apart. Presented to the House of Commons, 11th June, 1885.—*Mr. Blake*.....*Not printed.*
- 25kk.** Return to an Address of the House of Commons, dated 12th March, 1885, for a copy of all correspondence between the Government of Quebec and the Government of Canada concerning the application of the sum of \$960,000 reserved by the statute 47 Victoria, chapter 8, for the extension of the Canadian Pacific Railway from its terminus at St. Martin's Junction to the Harbor of Quebec. Presented to the House of Commons, 15th June, 1885.—*Mr. Laurier*—*Printed for Sessional Papers only.*
- 25ll.** Return to an Address of the House of Commons, dated 9th February, 1885, for a statement showing the gross earnings, expenses and net earnings of the Canadian Pacific Railway for each month of the years 1883 and 1884, distinguishing between the main line and the lines now

worked under the lease from the Ontario and Quebec Railway Company; and distinguishing also between the main line east of Port Arthur or Fort William and the main line west of that point, giving in each case the mileage open for traffic during the month specified. Presented to the House of Commons, 16th June, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*

- 25mm.** Return to an Address of the House of Commons, dated 12th February, 1885, for a statement showing: 1. The expenditure by the Canadian Pacific Railway Company upon its main line of railway between Callander and Port Arthur and between Selkirk and Kamloops, since the expenditure of \$23,078,950, shown by the letter of Mr. Stephen to the Minister of Railways and Canals on the 15th January, 1884. 2. The materials on hand in respect of the described main line of railway. 3. The receipts by the company since the account given in the said letter in respect of—(a.) Cash subsidy; (b.) Government loan; (c.) Land grant bonds or land sales, or from the pledging of land grant bonds. 4. The amount, if any, due by the company in respect of construction of the described main line. 5. Estimates of the cost of the work of construction remaining to be done on the described main line, showing whether the materials on hand are taken into account in such estimates or not. 6. An estimate of the whole cost of construction of the described main line when completed. 7. Statement of the cost of equipment of the described main line at the date of the account in Mr. Stephen's letter. 8. Statement of the cost of equipment of the described main line since that date. 9. Estimate of the further cost of equipment of the described main line when completed. 10. Estimate of the complete cost of equipping the described main line. All such statements and estimates being separate for each of the described divisions, viz., (a) that between Callander and Port Arthur, and (b) that between Selkirk and Kamloops. Presented to the House of Commons, 16th June, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*
- 25nn.** Return to an Address of the House of Commons, dated 24th February, 1885, for a statement of the cost of the Canadian Pacific Railway from Winnipeg to a point 615 miles west of Winnipeg, divided under the usual sub-headings of cost of railway construction; or in case the company has not recorded the expense under the usual sub-headings, then divided in such a way and in such detail as the company has recorded it. Presented to the House of Commons, 16th June, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*
- 25oo.** Return to an Address of the House of Commons, dated 8th April, 1885, for a Return showing the date of completion of the main line of the Canadian Pacific Railway from Winnipeg to Brandon, from Brandon to Moose Jaw, from Moose Jaw to Calgary, the dates on which each section was opened for traffic, the dates on which such section was inspected by the Government engineer, with all Orders in Council, papers and correspondence affecting the tariff rates for passengers and freight upon such line, not already brought down. Presented to the House of Commons, 15th June, 1885.—*Mr. Watson*.....*Not printed.*
- 25pp.** Return to an Address of the Senate, dated 25th February, 1885, for all correspondence had since the 1st January, 1884, between the Government of Canada and the Government of the Province of Quebec, concerning all sums of money granted by the Government of Canada to the Province of Quebec, and all claims of the Province of Quebec, by way of indemnity on account of the construction of the North Shore Railway, heretofore called the Quebec, Montreal, Ottawa and Occidental Railway, together with a copy of all memorials presented to the Federal Government during the same period by the Government of Quebec, respecting all claims or demands of indemnity for the same cause. Presented to the Senate, 16th April, 1885.—*Hon. Mr. Trudel*,.....*Printed for Sessional Papers only.*
- 25qq.** Return to an Order of the House of Commons, dated 13th February, 1885, for a statement showing: 1. The total number of permanent timber trestles and the total number of wooden bridges constructed, or under contract for construction, upon the line of the Canadian Pacific Railway. 2. The length, in feet, and the maximum height of each of said trestles and of each of said bridges. Such statement to identify the trestles and bridges by numbering them consecutively from Sudbury westward. Presented to the House of Commons, 14th July, 1885.—*Mr. Edgar*.....*Not printed.*
- 25rr.** Return to an Address of the House of Commons, dated 17th February, 1885, for: 1. A statement of the present position of the debt of six hundred thousand dollars, due last Session

by the North American Contracting Company to the Canadian Pacific Railway, with information as to whether the same has been settled, and if so, when and upon what terms, and if unsettled, what steps have been taken, or are being taken, to procure a settlement; also a statement of the present position of a sum of about six hundred thousand dollars invested by the Canadian Pacific Railway Company in stock of the Canada North-West Land Company, with a statement of its value, at the average price for the month of January, 1885. 2. Also plan and statement showing the grades and curves on the line of the Canadian Pacific Railway as far as constructed, including all the Government sections, but exclusive of the line constructed by the company from the foot of the Rocky Mountains to Kamloops. 3. Also a copy of the prospectus, advertisement and other papers in connection with the recent proposal for the issue of bonds of the Ontario and Quebec Railway Company, guaranteed by the Canadian Pacific Railway Company, with a statement of the amount sold and the average rate. 4. Also an estimate of the cost of the Canadian Pacific Railway between Callander and Port Arthur, divided under the usual heads of sub-divisions in railway construction, with separate estimate for equipment. 5. Also a like estimate, in similar form, of the cost of the construction of the Canadian Pacific Railway between Calgary and the summit of the Rocky Mountains, and from the summit of the Rocky Mountains to the junction with the Government section, each separately, with a statement of the items in which a saving of four million dollars upon the estimate of last Session is calculated by the officers of the company. 6. Also a statement of the expenditure by the Canadian Pacific Railway Company on any account, except the construction and equipment of the contracted line between Callander and Port Arthur, and between Selkirk and Kamloops. Presented to the House of Commons, 14th July, 1885.—*Mr. Blake*.....*Not printed.*

**25ss.** Return to an Address of the House of Commons, dated 17th February, 1885, for: 1. A statement of the expenditure of the Canadian Pacific Railway Company since the account in Mr. Stephen's letter to the Minister of Railways and Canals, 15th January, 1884, upon branch lines, specifying each line, the expenditure thereon, the purpose thereof, and the additional mileage beyond 269 miles completed at the date of Mr. Stephen's letter. 2. Statement of the cost of equipment of such branch lines; (a.) At the date of said letter; (b.) Since that time. 3. Estimate for any further cost of equipment for such branch lines so far as completed. 4. Statement in detail of the further sums paid in respect of the extensions or branches east of Callander, since the date of said letter, when they amounted to \$3,203,050. 5. A statement of the present condition of the account for advances towards acquiring a line to the seaboard, and for other purposes, alleged to be within the charter, shown by the said letter at \$3,482,251; with a detail of any further payments of a like character. Presented to the House of Commons, 18th July, 1885.—*Mr. Blake*.....*Not printed.*

**25tt.** Return to an Address of the House of Commons, dated 17th February, 1885, for copies of all correspondence and agreements between the Government and the Canadian Pacific Railway Company on the subject of immigration to Manitoba and the North-West, together with a statement showing the amount expended by the company in promoting such immigration, giving amounts paid, with dates, to whom paid, and the nature of service rendered; also estimate of the company of number of persons from foreign countries who have actually settled there in each year since date of charter. Presented to the House of Commons, 18th July, 1885.—*Mr. Paterson (Brant)*.....*Not printed.*

**25uu.** Supplementary Return to an Address of the House of Commons, dated 17th February, 1885, for: 1. A statement of the present position of the debt of six hundred thousand dollars due last Session by the North American Contracting Company to the Canadian Pacific Railway, with information as to whether the same has been settled, and, if so, when and upon what terms, and if unsettled, what steps have been taken, or are being taken, to procure a settlement; also a statement of the present position of a sum of about six hundred thousand dollars invested by the Canadian Pacific Railway Company in stock of the Canada North-West Land Company, with a statement of its value at the average price for the month of January, 1885. 2. Also plan and statement showing the grades and curves on the line of the Canadian Pacific Railway as far as constructed, including all the Government sections, but exclusive of the line constructed by the company from the foot of the Rocky Mountains to Kamloops. Presented to the House of Commons, 20th July, 1885.—*Mr. Blake*.....*Not printed.*

- 26.** Return to an Order of the House of Commons, dated 2nd February, 1885, for a Return of the receipts and expenditure, in detail, chargeable to the Consolidated Fund, from the 1st July, 1883, to the 31st January, 1884, and from 1st July, 1884, to 31st January, 1885. Presented to the House of Commons, 9th February, 1885.—*Sir Richard Cartwright*—  
*Printed for Distribution only.*
- 27.** Return to an Order of the House of Commons, dated 2nd February, 1885, for a statement showing the amount of money on deposit to the credit of the Government of Canada on the 1st February, 1885, whether in Canada or elsewhere, together with the names of the banks wherein the said moneys are deposited, with the amount in each bank respectively; also the amount at interest and the rate of interest allowed on the said deposits in each case. Presented to the House of Commons, 9th February, 1885.—*Sir Richard Cartwright*—  
*Printed for Distribution only.*
- 28.** Return to an Address of the House of Commons, dated 30th January, 1884, for copies of all Orders in Council, despatches, correspondence and telegrams relating to the negotiations between Canada and British Columbia, not already brought down; and for a statement of the estimated net cost to Canada of the dry dock in British Columbia. Presented to the House of Commons, 10th February, 1885.—*Mr. Blake*.....*Not printed.*
- 29.** Return (*in part*) to an Address of the House of Commons, dated 24th January, 1884, for copies of all Orders in Council, reports and correspondence, not already brought down, in reference to the exercise or non-exercise of the power of disallowance as to any Provincial Acts; with a statement of the dates of prorogation of each of the Provincial Assemblies; and of the dates at which the Acts of the Session were received at Ottawa; and copy of the despatches addressed to the Lieutenant-Governors on the subject of the transmission to the Government of Canada of such Acts. Presented to the House of Commons, 10th February, 1885.—*Mr. Mulock*.....*Printed for Sessional Papers only.*
- 30.** Return to an Order of the House of Commons, dated 25th February, 1884, for a detailed statement of all moneys expended upon the Dominion steamer "Sir James Douglas," in connection with the hauling out, lengthening of, repairs to, and launching of said vessel, from 1st January, 1882, to 31st December, 1883. Presented to the House of Commons, 10th February, 1885.—*Mr. Baker (Victoria)*.....*Not printed.*
- 30a.** Return to an Order of the House of Commons, dated 25th February, 1884, for a statement showing numbers of officers and crew of steamer "Sir James Douglas," their names, rank, pay and date of first appointment, the average cost per month of maintaining said vessel for the twelve months ending 31st December, 1883, nature of service in which she has been engaged for the period mentioned, increased speed obtained by lengthening, date on which she was last swung for adjustment of compasses and copy of deviation table made therefrom. Presented to the House of Commons, 10th February, 1885.—*Mr. Baker (Victoria)*.....*Not printed.*
- 30b.** Return to an Order of the House of Commons, dated 28th March, 1884, for all correspondence of a date subsequent to 1st January, 1883, upon the subjects of repairs to, hauling out, and launching of the steamer "Sir James Douglas," in the early part of said year, between the Department of Marine and Fisheries and their agents at Victoria, B.C., or between the Department and any other person or persons, in the Province of British Columbia, upon said subject; also copies of reports sent in to the Department by the agent of the Department in British Columbia, and the master of the steamer above referred to, in connection with the serious and unpleasant difference of opinion which arose between them, reflecting discreditably upon themselves and the Department. Also all correspondence upon that or any other subject between the Department and any British Columbia member or other person, in any way reflecting upon the agent of the Department in British Columbia, to date. Presented to the House of Commons, 10th February, 1885.—*Mr. Baker (Victoria)*.....*Not printed. See 30d.*
- 30c.** Return to an Address of the Senate, dated 9th April, 1884, for copies of all documents and correspondence in possession of the Government relating to the establishment of a line of steamships between France and Canada. Presented to the Senate, 24th February, 1885. *Hon. Mr. Pelletier*.....*Printed for Sessional Papers only.*

- 30d.** Return to an Order of the House of Commons, dated 28th March, 1884, for all correspondence of a date subsequent to 1st January, 1883, upon the subject of repairs to, hauling out and launching of the steamer "Sir James Douglas," in the early part of said year, between the Department of Marine and Fisheries and their agent at Victoria, B.C., and between the Department and any other person or persons in the Province of British Columbia, upon said subject; also copies of reports sent in to the Department by the agent in British Columbia, and the master of the steamer referred to, in connection with the serious and unpleasant difference of opinion which arose between them, reflecting discreditably upon themselves and the Department; also all correspondence upon that or any other subject between the Department and any British Columbia member or other person, in any way reflecting on the agent of the Department in British Columbia, to date. Presented to the House of Commons, 14th April, 1885.—*Mr. Baker (Victoria)*.....*Printed for Distribution only.*
- 30e.** Return to an Order of the House of Commons, dated 24th February, 1885, for copies in full of the accounts and vouchers of all provisions, coal and other supplies furnished the Hudson Bay steamer "Neptune" at Halifax, in July last, and copies of all the tenders upon which all the contracts were based. Presented to the House of Commons, 14th April, 1885.—*Mr. Vail*.....*Not printed.*
- 30f.** Return to an Address of the House of Commons, dated 23rd February, 1885, for copies of all reports, correspondence, contracts, Orders in Council and other papers, in connection with the arrangements under which public moneys have been paid by the Government to the Halifax Steam Navigation Company. Presented to the House of Commons, 30th April, 1885.—*Mr. Blake*.....*Not printed.*
- 31.** Return to an Address of the House of Commons, dated 28th March, 1884, for a statement showing the present constitution of the North-West Council, the number of elected members, the district for which they are elected, the number of votes polled, the names of the candidates, and the qualifications required of the voters. Presented to the House of Commons, 19th February, 1885.—*Mr. Mills*.....*Printed for both Distribution and Sessional Papers.*
- 32.** Return to an Address of the House of Commons, dated 28th March, 1884, for a statement of all moneys paid by the Dominion Government to the Local Government of Ontario since Confederation; stating the amounts in each year and stating on what account. Presented to the House of Commons, 10th February, 1885.—*Mr. Farrow*.....*Printed for Distribution only.*
- 33.** Return to an Order of the House of Commons, dated 28th March, 1884, for: 1. Correspondence, papers, draft, notarial transfer and telegram respecting Survey Contract No. 10, of L. J. E. Garon, of the season of 1881, by which Joseph Adhemar Martin, merchant, of Rimouski, has received the sum of \$800. 2. Correspondence, papers, draft, notarial transfer and telegram, between the Minister of the Interior and the said Joseph Adhemar Martin, concerning the balance remaining due on the said transfer of the said Survey Contract No. 10, of L. J. E. Garon, of the said season of 1881. Presented to the House of Commons, 19th February, 1885.—*Mr. Billy*.....*Not printed.*
- 34.** Return to an Address of the House of Commons, dated 7th February, 1884 for copies of all correspondence between the several Provincial Governments and the Dominion Government, respecting the readjustment or increase of the money subsidies paid, or to be paid, by the latter to the former, in pursuance of the confederation agreement, or of any other arrangements since made. Also copies of all petitions from the several Provincial Legislatures to the Government, or to the Parliament of Canada, and of any memorials received by the latter from the several Provincial Governments, asking for aid or assistance in money or otherwise. Also statement showing all that has been granted in money, or otherwise, by the Government of Canada to the several provinces since 1867. Presented to the House of Commons, 10th February, 1885.—*Mr. Ouimet*.....*Printed for Sessional Papers only.*
- 34a.** Return to an Address of the House of Commons, dated 5th February, 1885, to His Excellency the Governor General, praying that he will cause to be laid before the House any correspond-

ence or papers touching applications by Local Governments for advances of money on debt account, and for any papers throwing light on the reasons for the pending Bill on that subject. Presented to the House of Commons, 27th February, 1885.—*Mr. Blake—*

*Printed for Sessional Papers only.*

- 34b.** Return to an Address of the House of Commons, dated 2nd March, 1885, for copies of all correspondence since 1st January last, between the Dominion Government and the Government of the Province of Quebec, in relation to an increase or readjustment of the Dominion subsidy to the province, including any letter written to that end by one of the said Governments to the other, or by any of the Ministers thereof in relation to the subject; also of any such correspondence with any of the other Provinces of the Dominion. Presented to the House of Commons, 23rd April, 1885.—*Mr. Amyot.....**Printed for Sessional Papers only.*
- 35.** Return to an Order of the House of Commons, dated 1st February, 1884, for copies of all correspondence and papers relating to any proposed or suggested reduction in letter postage in the Dominion of Canada. Presented to the House of Commons, 10th February, 1885.—*Mr. Charlton.....**Not printed.*
- 36.** Return to an Order of the House of Commons, dated 11th February, 1884, for copies of all correspondence or complaints to the Postmaster-General, relative to delays or neglect of postmasters in transmitting newspapers and periodicals to the office of destination, since 1st January, 1883. Presented to the House of Commons, 10th February, 1885.—*Mr. Sproule—*  
*Not printed.*
- 37.** Reports relative to the manufacturing industries in existence in Canada, submitted to the House of Commons for its information. Presented to the House of Commons, 11th February, 1885, by Sir Leonard Tilley.....*Printed for both Distribution and Sessional Papers.*
- 37a.** Return to an Address of the House of Commons, dated 6th February, 1885, for copy of the commission or other authorization, Order in Council, correspondence and instructions in relation to the commission issued for the investigation of certain facts as to the condition of the industries of Canada during the last recess. Copy of the report of the commissioners, and the evidence and data obtained by them. Statement in detail of all moneys paid in respect of the commission, and an estimate in detail of all moneys payable, but as yet unpaid; dated 11th February, 1885. Presented to the House of Commons, 12th February, 1885. *Mr. Blake—*  
*Printed for both Distribution and Sessional Papers.*
- 37b.** Return to an Order of the House of Commons, dated 4th February, 1885, for all returns, statements or correspondence in possession of the Government, showing the number of operatives employed in factories in the Dominion in 1878 and in 1884, together with the amount of capital invested and wages paid. Presented to the House of Commons, 16th February, 1885.—*Sir Richard Cartwright.....**Not printed.*

## CONTENTS OF VOLUME No. 11.

- 38.** Return to an Order of the House of Commons, dated 5th February, 1885, for copies of all correspondence relative to any payments, claims or allowances on any account whatever, in respect to the office of High Commissioner, not already brought down; and separate statement in detail, with dates and sums of all payments made on any such accounts in respect to the office, during its tenure by the present incumbent; an estimate in detail of all sums payable on any such accounts up to this date and yet unpaid; also copies of all correspondence not yet brought down, as to the letting or purchase of a residence for the High Commissioner, and as to the repairs and furnishing thereof, with copies of all accounts in connection with the same; a statement in detail of all sums paid in respect of such letting or purchase, or furnishing or repairs; and an estimate of all sums payable, but not yet paid, in respect thereof. Presented to the House of Commons, 12th February, 1885.—*Mr. Blake.....**Not printed.*
- 38a.** Return to an Address of the House of Commons, dated 2nd March, 1884, for a copy of all correspondence between this Government and the High Commissioner in England or the representatives of the Belgian Government in this country, or from the Belgian authorities at home,

or any other correspondence and papers concerning the International Exhibition in Antwerp; and also copies of the existing tariff between Belgium and England. Presented to the House of Commons, 12th March, 1885.—*Messrs. Bergeron and Amyot*.....*Not printed.*

- 38b.** Return to an Address of the House of Commons, dated 23rd February, 1885, for a copy of any further commission or Order in Council, or correspondence touching the position or salary of the High Commissioner of Canada, not already brought down. Presented to the House of Commons, 13th March, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*
- 38c.** Return to an Order of the House of Commons, dated 23rd February, 1885, for a Return showing amount paid out on account of High Commissioner to London since the creation of the office; showing separately the amount paid on account of residence, furniture and all fittings and additions thereto, and amount of salary paid to 1st January, 1885, and all items or allowances on account of taxes, light, fuel, travelling and other expenses, including salaries of private secretary and other servants or attendants, each item separately set out up to 1st January, 1885. Presented to the House of Commons, 7th April, 1885.—*Mr. McMullen*—*Printed for Sessional Papers only.*
- 39.** Return to an Address of the House of Commons, dated 4th February, 1885, for copy of all correspondence between the Government of Canada and the several Governments of the Australian and Tasmanian colonies, or anyone acting on their behalf, in relation to the establishing of a more direct communication and extension of trade between these colonies and Canada; also all correspondence between the Government of Canada and the British Government on the same subject. Presented to the House of Commons, 12th February, 1885.—*Mr. Mitchell*.....*Not printed.*
- 40.** Report of the operations and money expended, since the report of last Session, for the year 1884, with respect to the Census of 1881, in accordance with the provisions of section 25 of the Census and Statistics Act; also relating to mortuary statistics. Presented to the House of Commons, 12th February, 1885, by Hon. J. H. Pope.....*Not printed.*
- 40a.** A form of Census Return for the year 1885. Presented to the House of Commons, 13th February, 1885, by Hon. J. H. Pope.....*Not printed.*
- 41.** Return to an Order of the House of Commons, dated 4th February, 1885, for amount of sums advanced to the Government of the Dominion by way of loan by any banks or persons in Canada or England, as appearing on the 1st February, 1885. Presented to the House of Commons, 13th February, 1885.—*Sir Richard Cartwright*—*Printed for both Distribution and Sessional Papers.*
- 41a.** Return to an Order of the House of Commons, dated 4th February, 1885, for a Return giving names of all newspapers in which the loans of 1874, 1875, 1876, 1878 and 1884 were advertised, together with statement of length of time during which the said advertisements appeared. Presented to the House of Commons, 16th February, 1885.—*Sir Richard Cartwright*—*Not printed.*
- 41b.** Return to an Address of the House of Commons, dated 4th February, 1885, for copy of the prospectus of the loan recently issued in London; also a statement showing the amounts of the commission and other charges paid thereon, and to whom paid, together with the amount of the said loan subscribed for by the financial agents of the Dominion, or by the Bank of Montreal, with the dates of the said subscriptions, and copies of all Orders in Council connected with the said loan. Presented to the House of Commons, 16th February, 1885.—*Sir Richard Cartwright*.....*Printed for both Distribution and Sessional Papers.*
- 42.** Return to an Order of the House of Commons, dated 6th February, 1885, for copies of all correspondence, memorials, petitions or other documents relating to the abolition of the duty on grain, flour and coal during 1884 and up to the present time. Presented to the House of Commons, 13th February, 1885.—*Mr. Cameron (Middlesex)*.....*Not printed.*
- 42a.** Return to an Order of the House of Commons, dated 12th March, 1885, for a Return of the amount of duty collected on wheat, flour, cornmeal and corn, in the several ports of the Province of Nova Scotia, between the 30th June, 1884, and 31st December, 1884. Presented to the House of Commons, 18th March, 1885.—*Mr. Vail*.....*Not printed.*

- 42b.** Return to an Order of the House of Commons, dated 27th April, 1885, for: 1. Duties imposed on various articles in the old Province of Canada and duties now imposed. 2. Tariff in force in British Columbia and in Manitoba, respectively, at the time of Union. 3. Length of time such tariff continued in force after Union. Presented to the House of Commons, 15th June, 1885.—*Mr. Watson*.....*Not printed.*
- 42c.** Papers and telegrams respecting the Imperial Act for granting to Her Majesty certain duties on goods, wares and merchandise imported into this colony and its dependencies. Presented to the House of Commons, 11th July, 1885, by Hon. M. Bowell.....*Not printed.*
- 43.** Message from His Excellency the Governor General, transmitting to the House of Commons copies of all petitions, resolutions, correspondence and memorials on the matter of bankruptcy, which have been submitted to His Excellency in Council for consideration. Presented to the House of Commons, 13th February, 1885, by Sir John A. Macdonald..... *Not printed.*
- 44.** Return to an Address of the House of Commons, dated 9th February, 1885, for copy of memorial from the county council of Grey, praying for a refund of bonuses paid by municipalities of that county in aid of railways which are now used for Dominion purposes or tributary to such. Presented to the House of Commons, 13th February, 1885.—*Mr. Landerkin*—  
*Not printed.*
- 44a.** Return to an Address of the House of Commons, dated 18th March, 1885, for copies of petitions from the county council of the county of Elgin, presented to the Governor General in Council or the Minister of Railways and Canals, praying for a general measure of relief to municipalities of Ontario which have aided railways declared to be for Dominion purposes, by granting bonuses to them; and of all correspondence in reference to such petitions. Presented to the House of Commons, 8th April, 1885.—*Mr. Wilson*.....*Not printed.*
- 44b.** Return to an Address of the House of Commons, dated 16th March, 1885, for a copy of the memorial presented to the Government by the county council of the county of Simcoe, Ontario, praying for a refund of bonuses granted by the different municipalities of that county to railways that have been declared by this Parliament to be works for the general advantage of Canada, together with copies of all correspondence and other papers relating thereto. Presented to the House of Commons, 20th April, 1885.—*Mr. Cook*.....*Not printed.*
- 44c.** Return to an Address of the House of Commons, dated 27th April, 1885, for copies of the memorials presented to the Government by the delegates who waited on the Government in reference to the bonuses granted to railways declared to be for the general advantage of Canada. Presented to the House of Commons, 16th May, 1885.—*Mr. Watson*.....*Not printed.*
- 45.** Return to an Order of the House of Commons, dated 17th February, 1885, for a Return showing the quantity and value of wheat and flour imported into, and exported from the Dominion, by Provinces, during the six months ending 31st December, 1884—distinguishing, in the imports, the quantity entered for home consumption; and, in the exports, the product of Canada. Presented to the House of Commons, 24th February, 1885.—*Mr. Paterson (Brant)*...*Not printed.*
- 45a.** Return to an Order of the House of Commons, dated 6th February, 1885, for a Return showing the quantity of wheat, flour, corn and cornmeal imported into and exported from the various Provinces, from the 1st of July to the 31st December, 1884. Presented to the House of Commons, 24th February, 1885.—*Mr. Cameron (Middlesex)*.....*Not printed.*
- 46.** Return of the names and salaries, &c., of all persons appointed to or promoted in the Civil Service during the year ended the 31st December, 1884, specifying the office to which each has been appointed or promoted under the Canada Civil Service Act, 1882, section 55, sub-section 2. Presented to the House of Commons, 16th February, 1885, by Hon. J. A. Chapleau—  
*Printed for Sessional Papers only.*
- 46a.** Report of the proceedings of the Board of Examiners for the year 1884—presented to Parliament in terms of section 55 of the Canada Civil Service Act, 1882, 45-46 Victoria, chapters 4-7. Presented to the House of Commons, 16th February, 1885, by Hon. J. A. Chapleau—  
*Printed for both Distribution and Sessional Papers.*

- 46b.** Return to an Order of the House of Commons, dated 27th April, 1885, for a Return of all officers of the Civil Service, from the resident Dominion Government agent down to the messenger, in each and every Department (by Departments) in British Columbia, giving full Christian and surnames, their ages, present rank, pay, allowances, dates of appointment and promotion, made up to the 31st December, 1884, or nearest possible date. Presented to the House of Commons, 15th June, 1885.—*Mr. Baker (Victoria)*.....*Not printed.*
- 47.** Return to an Order of the House of Commons, dated 28th March, 1884, for copies of all correspondence, reports of engineers, with maps and plans, relating to the improvements required to be made in order to secure a better supply of water to the Rideau Canal, as well as to open up a large section of the country bordering on lakes in the counties of Frontenac and Addington. Presented to the House of Commons, 17th February, 1885.—*Mr. Bell*.....*Not printed.*
- 47a.** Return to an Order of the House of Commons, dated 28th March, 1884, for copies of all correspondence and reports of engineers, with maps and plans, relating to the extension of the Rideau Canal from the village of Morton to Charleston Lake and the village of Gananoque, in the county of Leeds. Presented to the House of Commons, 17th February, 1885.—*Mr. McDougald*.....*Not printed.*
- 48.** Return to an Order of the House of Commons, dated 2nd February, 1885, for all papers relating to the resignation of Capt. Ludger Bolduc, after the collision which occurred on the 20th May, 1884, between "La Canadienne" and the brig "Alliance," of Jersey; covering complaint, enquiry, report, &c., and all correspondence relating to the matter. Presented to the House of Commons, 17th February, 1885.—*Mr. Landry (Montmagny)*.....*Not printed.*
- 49.** Return to an Order of the House of Commons, dated 5th February, 1885, for a statement showing sums expended on capital account, from the 1st day of July, 1884, to the 1st day of February, 1885, and the purposes for which said sums were expended. Also for statement of the gross amount of the debt of the Dominion on the 1st day of February, 1885; and a statement of debts and assets to that date, as given in Public Accounts, pages 13 and 14. Presented to the House of Commons, 17th February, 1885.—*Sir Richard Cartwright*—  
*Printed for Distribution only.*
- 50.** Return to an Address of the House of Commons, dated 5th February, 1885, for a copy of the resignation of the Hon. Judge Meredith as Chief Justice of the Superior Court of the Province of Quebec, and of the correspondence which followed that resignation. Presented to the House of Commons, 17th February, 1885.—*Mr. Laurier*.....*Not printed.*
- 50b.** 1884. Return to an Address of the House of Commons, dated 25th January, 1884, for copies of all Orders in Council, correspondence and departmental orders, with reference to the granting, cancellation and suspension of licenses to cut timber on lands of the Indians near Fort William, on the Fort William reserve. Presented to the House of Commons, 8th April, 1884.—*Mr. Blake*.....*Printed for Distribution only.*
- 51.** Return to an Address of the House of Commons, dated 25th February, 1884, for: 1. A copy of all Orders in Council, departmental orders and correspondence, respecting the sale, lease or other disposal of the grist and saw mill owned by the Dominion and situate south of Calgary, North-West Territories, to whom disposed, when, at what price, and how paid or payable? 2. Statement showing the original costs thereof, the costs expended thereon, when the same was erected, including working expenses. 3. Statement showing the quantity of agricultural land or timber limits disposed of with said mill or mills, or to the person who purchased or obtained the same. 4. All applications for the purchase or leasing of said farm, lands and limits. 5. Statement of the machinery in said mill or mills, and the cost thereof. 6. All other correspondence in respect to said mill or mills, land and limits. Presented to the House of Commons, 17th February, 1885.—*Mr. Cameron (Huron)*.....*Not printed.*
- 52.** Return to an Order of the House of Commons, dated 28th March, 1884, for all correspondence between the Hon. P. Mitchell and the Minister of the Interior, in relation to a timber limit or limits on Jack Head River, with the plans submitted in connection therewith; also in relation to timber limits on the Lake of the Woods. Presented to the House of Commons, 19th February, 1885.—*Mr. Mitchell*.....*Not printed.*

- 52a.** Return to an Order of the House of Commons, dated 30th January, 1884, for a Return showing: 1. The total number of timber licenses or permits applied for and granted or refused, since 1st February, 1883; the estimated area covered by each license or application, and the total number of square miles estimated to be covered by the timber licenses issued during the period named. 2. The amount of bonuses or premiums per square mile, and on the aggregate, paid to and received by the Government on each such license, and the total amount of bonuses or premiums received. 3. The name and residence of each applicant for a license. 4. The date of application for each license and the number of years each license is granted for. 5. The Crown dues or stumpage charged or chargeable on each license, and the kind and estimated quantity and quality of timber on each area so licensed. 6. Whether in each case, where a license or permit was granted, the berth was put up at public auction, after public notice inviting tenders was given, and was sold to the highest bidder, or whether granted upon application or tender from the grantee without inviting public competition. 7. Copies of all claims made on the Government for any such area or timber by any persons, and all petitions, remonstrances or communications sent or made to the Government respecting such areas, licenses or timber, and copies of all correspondence had with the Government respecting such claims, or in any way respecting such areas, lands, licenses or timber, and the action of the Government therein; also a copy of all maps and plans showing the location or areas of such licenses or permits. Presented to the House of Commons, 19th February, 1885.—*Mr. Charlton*.....*Not printed.*
- 52b.** Return to an Order of the House of Commons, dated 23rd February, 1885, for a Return showing: 1. The total number of applications made, and not granted, for licenses or permits to cut timber, saw-logs, cordwood, ties and poles, within the territory lately in dispute between the Province of Manitoba and Ontario. 2. The date of each rejected application and the name and residence of each applicant. 3. The geographical location of the area applied for and not granted. 4. The offer of bonus, and of Crown dues or stumpage, in each or any case accompanying such application. 5. The reason assigned for refusal in the case of each of such rejected applications. Presented to the House of Commons, 23rd April, 1885.—*Mr. Blake*—*Printed for Sessional Papers only.*
- 52c.** Return to an Order of the House of Commons, dated 23rd February, 1885, for a Return showing: 1. The total number of timber licenses and permits to cut timber, sawlogs, cordwood, ties or poles, on lands not within the disputed territory, applied for and refused since 1st February, 1883. 2. The date of each rejected application, and the name and residence of each applicant. 3. The geographical location of the area applied for and not granted, and the area of the same. 4. The offer of bonus, and Crown dues or stumpage in each or any case accompanying such application. 5. The reason assigned for refusal in the case of each of such rejected applications. Presented to the House of Commons, 23rd April, 1885.—*Mr. Blake*—*Printed for Sessional Papers only.*
- 52d.** Return to an Order of the House of Commons, dated 9th February, 1885, for copies of all correspondence and regulations, not already brought down, respecting timber for settlers' fuel, applicable to the neighborhood of Moosomin, N.W.T. For all correspondence as to the demands made during the winter of 1882-83 by the Mounted Police, of twenty-five cents a load for settlers' firewood. For all correspondence concerning the demand made by a sub-agent of Mr. Stephenson during the winter of 1883-84, for fifty cents for a permit, in addition to the charge of twenty-five cents a cord. For all correspondence as to the demands made during the winter of 1884-85, including the demands of the present sub-agent, of twenty-five cents for affidavits as to how much wood each settler had burned since he first came to the locality; and for all letters and instructions from the Department or from the Winnipeg office upon these subjects. Presented to the House of Commons, 5th May, 1885.—*Mr. Blake*—*Printed for Sessional Papers only.*
- 52e.** Return to an Address of the House of Commons, dated 23rd February, 1885, for copies of all permits, liberties or other papers given to any person or persons to cut timber in any part of the territory declared by the Order of the Queen in Council to be within the Province of Ontario; and of all Orders in Council, departmental regulations or orders relating to the matter. Presented to the House of Commons, 15th July, 1885.—*Mr. Mills*.....*Not printed.*

- 52f.** Return to an Order of the House of Commons, dated 16th February, 1885, for copies of all permits, licenses or liberties given to any person or persons to cut timber in any part of the territory declared by the Order of the Queen in Council to be within the Province of Ontario. Also the name or names of the person or persons obtaining such permission, the extent of territory embraced, the amount received by the Government, and the amount, if any, still unpaid by the party or parties for such permission. Presented to the House of Commons, 15th July, 1885.—*Mr. Mills* .....*Not printed.*
- 52g.** Return to an Order of the House of Commons, dated 23rd February, 1885, for a Return showing: 1. The total number of applications for timber licenses or berths in the Province of British Columbia, and within 50 miles of the line of the Canadian Pacific Railway; the date of such application; the place from which it was made; the name and address of the applicant; the area applied for and the geographical situation of the same; whether the application was rejected or granted, and, if rejected, the reasons assigned for the same. 2. The total number of applications for timber licenses or berths in the Province of British Columbia and transmitted to the Department of the Interior at Ottawa; the date of such application; the place from which it was made; the name and address of the applicant; the area applied for and the geographical situation of the same; whether the application was rejected or granted, and, if rejected, the reason assigned for the same. 3. A summary statement showing the number of licenses or permits granted either upon applications made at Ottawa or made at Victoria and transmitted to Ottawa, designating when the application was made, the date of the application, and the name and address of the grantee. 4. The geographical location of the area covered by each license or permit issued, and the number of square miles embraced in each, and the aggregate amount of the same. 5. The amount of bonuses or premiums received upon each and the aggregate amount of the same. 6. Full particulars as to the Crown dues or stumpage charged or chargeable upon each license or permit issued as to whether by percentage of values or specific charges. 7. A statement in case of each license or permit issued as to whether the Government had caused a survey to be made of the same and was in possession of estimates made by its own surveyors, woodsmen or bushrangers, as to the kinds, the quantity and the quality of timber upon each area covered by such license or permit. 8. Whether in each case where a license or permit was granted, the berth was put up at public auction, after due public notice was given inviting tenders, and was sold to the highest bidder, or whether granted upon application or tender from the grantee without inviting public competition. 9. In case of application by two or more parties for the same berth, and competition between them for the purchase of the same, the name and residence of each applicant and the particulars of the tender made by each. 10. Copies of all claims, petitions, remonstrances, letters or communications made to the Government respecting such permits or licenses applied for or granted, also a copy of all maps or plans showing the location and areas of such licenses or permits. 11. A minute of all assignments of such licenses or permits recorded with the Government, with the names and residence of the assignor and the assignee and the consideration in each case paid. Presented to the House of Commons, 15th July, 1885.—*Mr. Charlton*.....*Not printed.*
- 53.** Return to an Address of the House of Commons, dated 26th March, 1884, for copies of all documents, statements, &c., of a nature to afford the information asked for by the following questions:—Whether the Government has, by sale, grant, location or otherwise, disposed of the lands belonging to it in the county of Richelieu? If so, what are the lands; what is the extent of each lot; to whom was it disposed; what are the conditions of each such grant, location or sale; what are the prices paid in each case, and when and how were the amounts paid? Also of all documents relating to the subject matter of the said questions, and of those evidencing the said transactions. Presented to the House of Commons, 19th February, 1885.—*Mr. Amyot*—*Not printed.*
- 53a.** Return to an Order of the House of Commons, dated 17th February, 1885, for a list of all the unsold Indian lands in the township of Toronto, in the county of Peel. Presented to the House of Commons, 9th March, 1885.—*Mr. Paterson (Brant)*.....*Not printed.*
- 53b.** Return to an Order of the House of Commons, dated 17th February, 1885, for a statement showing all properties, islands and other lands, whether built upon or not, belonging to the Dominion Government, and situated within the limits of the county of Richelieu, the names of

the parties occupying the said properties as tenants or otherwise; the time for which such properties are leased, the annual rent and the arrears due, if any, on each such property, up to the 1st January, 1885. Presented to the House of Commons, 9th March, 1885.—*Mr. Massue*—*Not printed.*

- 53c.** Return to an Order of the House of Commons, dated 23rd February, 1885, for a statement showing: 1. All sales of coal lands since 23rd April, 1883; the name and residence of each party to whom sales have been made; the number of acres sold to each; the price per acre received from each; the location of the land sold; the total number of acres sold, and the total amount received from such sales. 2. All leases of coal lands made since 23rd April, 1883; the name and residence of each lessee; the number of acres leased to each; the payments made by each; the location of each leasehold; the total number of acres leased; and the total sum derived from such leases, the considerations paid and royalties collected; and also from all other charges, if any. 3. Copies of all applications, correspondence, protests and written communications, in relation to coal lands sold or leased since 23rd April, 1883. Presented to the House of Commons, 31st March, 1885.—*Mr. Charlton*.....*Printed for Sessional Papers only.*
- 53d.** Return to an Order of the House of Commons, dated 12th March, 1885, for a detailed list of all the unsold Indian lands in the township of Trafalgar, in the county of Halton. Presented to the House of Commons, 31st March, 1885.—*Mr. McCraney*.....*Not printed.*
- 53e.** Return to an Order of the House of Commons, dated 18th March, 1885, for a return of all properties owned by the Government for military purposes in New Brunswick disposed of or leased, since the transfer from the Imperial Government; the parties to whom sold and at what price, and as to leased properties, to whom leased, for what period and at what rents. Presented to the House of Commons, 22nd April, 1885.—*Mr. Weldon*.....*Not printed.*
- 53f.** Return to an Order of the House of Commons, dated 4th February, 1885, for a statement showing the several amounts collected by the Dominion Government for lands sold or leased; for timber, logs or staves, cordwood, telegraph poles or other product of the forest; with the names of persons making such payments, within the bounds and limits of the western part of Ontario, as determined by the decision of the Privy Council against the claim of the Dominion Government. Presented to the House of Commons, 23rd April, 1885.—*Mr. Mackenzie*—*Printed for Sessional Papers only.*
- 53g.** Order in Council, of the 4th June, 1883, respecting allotment of lands of various colonization companies under the land regulations, and to accord to railway companies the privilege of purchasing land south of the 54th parallel of latitude, &c. Presented to the House of Commons, 29th April, 1885, by Sir John A. Macdonald.....*Not printed.*

Presented to the House of Commons, 26th February, 1885.—*Mr. Vail*.....*Not printed.*
- 67.** Return to an Order of the House of Commons, dated 9th February, 1885, for copies of all correspondence, documents and reports of engineers relating to improvements of the entrance into McIsaac's Pond, Inverness, Nova Scotia. Presented to the House of Commons, 27th February, 1885.—*Mr. Cameron (Inverness)*.....*Not printed.*
- 68.** Return to an Order of the House of Commons, dated 17th February, 1885, for a statement of the amounts paid by the Government to Messrs. George and Andrew Holland, or any other persons, for services as official reporters of the Senate, or for the short-hand work of any kind outside of parliamentary reporting, since 1st January, 1882. Presented to the House of Commons, 16th March, 1885.—*Mr. Auger*.....*Not printed.*
- 69.** Return to an Order of the House of Commons, dated 6th February, 1885, for a Return showing the number of dredges, tugs and dumping scows built in the United States for the Government of Canada during the years 1883 and 1884, showing where they were built, giving the contractor's name, and the price paid for the same. Presented to the House of Commons, 27th February, 1885.—*Mr. Jackson*.....*Not printed.*
- 69a.** Return to an Order of the House of Commons, dated 8th April, 1885, for copies of all correspondence and contracts entered into relative to the purchases of tug-barges, dredge and machinery used on Red River; a detailed statement of the cost of the same, the time when the work of dredging was commenced and discontinued, the quantity of dredging completed and the depth of water drawn by the Government tug "Sir Hector." Presented to the House of Commons, 23rd April, 1885.—*Mr. Watson*.....*Not printed.*
- 70.** Return to an Order of the House of Commons, dated 9th February, 1885, for copies of departmental instructions and correspondence on the subject of apportionment of sea lots to individuals desiring to place lobster traps in the open sea off the coast of Prince Edward Island. Presented to the House of Commons, 27th February, 1885.—*Mr. Blake*—  
*Printed for Distribution only.*
- 71.** Return to an Order of the House of Commons, dated 17th February, 1885, for a statement of the amount expended in repairing the breakwater at Tracadie, Nova Scotia, from 30th June, 1884, to 31st January, 1885, giving the names of all persons to whom any portion of the expenditure has been paid, together with the amount paid to each, and for what. Presented to the House of Commons, 2nd March, 1885.—*Mr. McIsaac*.....*Not printed.*
- 71a.** Return to an Order of the House of Commons, dated 17th February, 1885, for a copy of the report made by the engineer since January, 1884, on the cost of erecting breakwaters at New Harbor and Indian Harbor, in the county of Guysboro', Nova Scotia, and also copy of report on White Haven boat canal. Presented to the House of Commons, 2nd March, 1885.—*Mr. Kirk*.....*Not printed.*
- 71b.** Return to an Order of the House of Commons, dated 9th February, 1885, for copies of all tenders for the construction of breakwater at Parrsboro' lighthouse station, in the county of

- Cumberland, N.S. ; copies of letter from Deputy Minister of Marine and Fisheries accepting the tender of one Neil McRay, and of telegram postponing the work ; also all letters objecting to the said Neil McRay as contractor and to the bondsmen offered by him, and letters tendering other names as bondsmen if required, and all other correspondence on the subject. Presented to the House of Commons, 2nd March, 1885.—*Mr. Robertson (Shelburne)*.....*Not printed.*
- 71c.** Return to Order, correspondence, reports of engineers and others, in reference to the construction of a breakwater at Salmon Point, together with lists of tenders and amount of each, and all other documents in the possession of the Government relative to the above mentioned work. Presented to the House of Commons, 23rd March, 1885.—*Mr. Platt*.....*Not printed.*
- 72.** Return to an Order of the House of Commons, dated 12th February, 1885, for a statement for the last fiscal year of the cost connected with the heating of public buildings (including wages as well as fuel) now paid under a lump vote, such statement to show the costs under the same sub-headings as those in which it was formerly included in the Public Accounts before the change in the system. Presented to the House of Commons, 2nd March, 1885.—*Mr. Blake*.....*Printed for both Distribution and Sessional Papers.*
- 73.** Return to an Order of the House of Commons, dated 6th February, 1885, for a statement showing the number of seizures made at each port of entry in the Dominion during the last fiscal year ; also during the six months ending the 31st December last ; the amount of fines exacted at each port during each of the said periods ; and the manner in which the said fines were disposed of, giving the names of the officers receiving any portion thereof, and the amount received by each of such officers out of the said fund. Presented to the House of Commons, 2nd March, 1885.—*Mr. Blake*.....*Printed for Distribution only.*
- 73a.** Return to an Order of the House of Commons, dated 2nd March, 1885, for a statement showing the seizures made at the port of Winnipeg by the Department of Customs or any of its officers or officials, between 1st January, 1883, and 1st January, 1885 ; giving the estimated value of each of such seizures, the amount of fine imposed in each case and the manner in which the said fines were disposed of, and stating, in detail, the amount paid to each officer or employé of the Government, the name of such officer or employé, and when paid, also the salary paid to each such officer or employé ; the disposal made of all such goods seized, and if sold—when, for how much, and how the proceeds were disposed of. Presented to the House of Commons, 10th March, 1885.—*Mr. Paterson (Brant)*.....*Printed for Distribution only.*
- 73b.** Return to an Order of the House of Commons, dated 12th March, 1885, for a statement showing the number of seizures made at each port of entry in Nova Scotia during the last fiscal year ; also during the six months ending the 31st December last ; and the names of the parties from whom such seizures were made, the amount of fines exacted at each port during each of the said periods, and the manner in which the said fines were disposed of, giving the names of the officers receiving any portion thereof, and the amount received by each of such officers out of the said fund. Presented to the House of Commons, 17th April, 1885.—*Mr. Stairs*—  
*Not printed.*
- 73c.** Return to an Order of the House of Commons, dated 27th April, 1885, for a Return showing seizures made at the Port of Winnipeg by the Customs officers or officials between 1st January, 1883, and 1st January, 1885, in which deposits were forfeited or goods sold after seizure ; giving the amount of each sum forfeited and the amount realized in each case in which goods were sold ; and stating in detail the name of each officer to whom any portion of the money so realized was paid, and the amount in each case thus paid to the said officer ; and also stating the salary paid such officer. Presented to the House of Commons, 18th July, 1885. *Mr. Paterson (Brant)*.....*Not printed.*
- 74.** Return to an Order of the House of Commons, dated 23rd February, 1885, for copies of all correspondence, reports, &c., in connection with the weighing and measuring of potatoes and other roots in the Province of Prince Edward Island. Presented to the House of Commons, 2nd March, 1885.—*Mr. Macdonald (King's)*.....*Not printed.*
- 75.** Return to an Order of the House of Commons, dated 12th February, 1885, for a Return of all claims presented for drawback on materials used for shipbuilding, for the year ending 30th

June, 1884; also for the six months ending 31st December, 1884; giving the name of the applicant, the name and tonnage of the vessel, the amount claimed and the amount paid. Presented to the House of Commons, 2nd March, 1885.—*Mr. Burpee (Sunbury)*—

*Printed for Distribution only.*

- 75a.** Return to an Order of the House of Commons, dated 17th February, 1885, for a Return of all claims presented up to the 1st February, 1885, for drawbacks on goods manufactured for export (since the date of the last return made to that House), showing the names of all applicants, their place of business, the articles on which the drawback was claimed, and the amount of each claim, distinguishing between the claims which have been allowed and those which have been disallowed, and those under consideration and not yet decided, and giving the reason for such disallowance. Also copies of all regulations made by the Department with reference to such claims, together with a copy of one allowed claim and the sworn declaration thereto of each exporter. Presented to the House of Commons, 6th March, 1885.—*Mr. Paterson (Brant)*—  
*Printed for Distribution only.*
- 76.** Return to an Order of the House of Commons, dated 30th January, 1884, for copies of any correspondence, documents, contracts or agreements with the Pullman Palace Car Company, in relation to the company's cars running over the Intercolonial Railway; also any contract or agreement with express companies as to conveyance of express matter over the said railway. Presented to the House of Commons, 2nd March, 1885.—*Mr. Weldon*—  
*Printed for Sessional Papers only.*
- 76a.** Return to an Address of the House of Commons, dated 20th February, 1885, to His Excellency the Governor General, praying that he will cause to be laid before the House a copy of the Order in Council appointing Mr. L. K. Jones secretary of the Intercolonial Railway Commission, also a copy of the recommendation on which such Order in Council was based. Presented to the House of Commons, 5th March, 1885.—*Mr. Rykert*.....*Not printed.*
- 76b.** Return to an Order of the House of Commons, dated 12th February, 1885, for a return of the casualties to trains on the Intercolonial Railway arising from collision, broken rails, or otherwise, for the calendar year 1884; the respective causes and dates; the amount of damages (if any), in each case, to property; the amount of compensation paid to owners of property destroyed or damaged, as well as amount of claims for loss or damage to property (if any) unsettled. Presented to the House of Commons, 5th March, 1885.—*Mr. Burpee (Sunbury)*—  
*Not printed.*
- 76c.** Return to an Order of the House of Commons, dated 23rd February, 1885, for a comparative statement of the cost of working the Intercolonial Railway for each of the years 1874, 1875, 1876, 1877, 1878, 1879, 1880, 1881, 1882, 1883 and 1884, and the number of miles operated in each year, giving for each year the cost for locomotive power, under the seven sub-headings given in the Minister's report, appendix, page 37; for car expenses, under the seven sub-headings given in the same report, same page; for maintenance, way and works, under the ten sub-headings given in the same report, page 37; for station expenses, under the three sub-headings given in the same report, same page; and for general charges, under the seven sub-headings given in the same report, page 39. Presented to the House of Commons, 9th March, 1885.—*Mr. Blake*.....*Printed for both Distribution and Sessional Papers.*
- 76d.** Return to an Order of the House of Commons, dated 12th February, 1885, for a statement of the revenue and working expenses of the Intercolonial Railway, accrued for the six months of the year ending 31st December, 1884, under the several divisions, similar to Annual Statement B, Intercolonial Railway, in the Public Accounts. Presented to the House of Commons, 9th March, 1885.—*Mr. Burpee (Sunbury)*.....*Not printed.*
- 76e.** Return to an Order of the House of Commons, dated 17th February, 1885, for copies of all correspondence between the Intercolonial officials or the Government and the Canada Shipping Company, or the Beaver line of steamships, with reference to the terms for through rates of freight over the Intercolonial. Presented to the House of Commons, 10th March, 1885.—*Mr. Blake*.....*Not printed.*
- 76f.** Return to an Order of the House of Commons, dated 17th February, 1885, for copies of the claim of J. B. Plante, of St. Charles, Bellechasse, in relation to certain horses which he alleges

- have been killed by a train of the Intercolonial Railway, and of which he demands the value ; copies of the order referring the said claim to the official arbitrators, and of their enquiry, report and award ; of the second reference to the said arbitrators, and of their enquiry and further report ; also all documents and papers relating to the matter in question. Presented to the House of Commons, 13th March, 1885.—*Mr. Landry (Montmagny)*.....*Not printed.*
- 76g.** Return to an Order of the House of Commons, dated 12th February, 1885, for a return showing the quantity of rolling stock purchased for the Intercolonial Railway during the six months of the year ending 31st December, 1884, giving each kind of rolling stock, and whether purchased under contract or otherwise, the parties from whom bought, and the cost of each kind ; also a statement showing what has been built during the year in the Government workshops, giving each kind. Presented to the House of Commons, 23rd March, 1885.—*Mr. Burpee (Sunbury)*.....*Not printed.*
- 76h.** Return to an Address of the House of Commons, dated 12th February, 1885, for copies of all Orders in Council, instructions to and correspondence with the commissioners under the commission issued in connection with the claims arising out of the construction of the Intercolonial Railway, and a statement of the matters referred to them, and of the moneys paid to them and to the secretary, and of the number of days during which the commissioners sat, all subsequent to the period covered by the return to the Address of last Session. Presented to the House of Commons, 31st March, 1885.—*Mr. Burpee (Sunbury)*.....*Not printed.*
- 76i.** Return to an Address of the House of Commons, dated 27th April, 1885, for copies of all memorials or correspondence presented to or sent the Government by the mayors or city councils of the cities of St. John and Portland, relating to the interruption of traffic between these cities by the railway crossing on Mill Street, and for the erection of a bridge across the said street. Presented to the House of Commons, 22nd April, 1885, by Hon. J. H. Pope.....*Not printed.*
- 97d.** Copy of an Order in Council, under date the 6th May, 1885, respecting the Manitoba and North-Western Railway Company. Presented to the House of Commons, 15th June, 1885, by Sir Hector Langevin.....*Not printed.*
- 98.** Return to an Order of the House of Commons, dated 2nd March, 1885, for a statement showing the earnings and working expenses of the Eastern Extension Railway, from New Glasgow to Port Mulgrave, Nova Scotia, for each month of the calendar year 1884, respectively. Presented to the House of Commons, 13th March, 1885.—*Mr. Cameron (Inverness)*.....*Not printed.*

- 99.** Return to an Address of the House of Commons, dated 17th February, 1885, for copies of all petitions, letters and other correspondence between the Government and any other parties, relating to the payment of wages due the laborers employed on the construction of the Cape Traverse Branch of the Prince Edward Island Railway. Presented to the House of Commons, 13th March, 1885.—*Mr. Hackett*.....*Not printed.*
- 99a.** Return to an Address of the Senate, dated 20th March, 1885, showing, in detail, the total cost of the Cape Traverse Branch Railway; including the sums paid to engineers and for superintending its construction, the rolling stock, stations and other buildings. Presented to the Senate, 20th April, 1885.—*Hon. Mr. Botsford*.....*Not printed.*
- 100.** Return to an Address of the House of Commons, dated 2nd March, 1885, for copies of all correspondence between the Government of British Columbia or any other person and the Dominion Government, in reference to the troubles among the Indians at Metlakatla, in the year 1884; also all correspondence, including the Order of Council, referring to or recommending the commutation of the sentence passed by the court in British Columbia upon the murderer of Mrs. Yeomans. Presented to the House of Commons, 18th March, 1885.—*Mr. Shakespeare and Mr. Gordon's amendment*.....*Not printed.*
- 100a.** Return to an Order of the House of Commons, dated 12th March, 1885, for: 1. Copy of form of tender for Indian supplies in the North-West for the year 1884. 2. Copies of all tenders received by the Government for such supplies in 1884. 3. The action or decision of the Government on such tenders, and the reasons therefor. 4. Copies of all contracts made by the Government with parties whose tenders have been accepted. 5. All correspondence with the Government respecting all tenders and contracts. Presented to the House of Commons, 29th April, 1885.—*Mr. Paterson (Brant)*.....*Printed for Sessional Papers only.*

## CONTENTS OF VOLUME No. 13.

- 101.** Return to an Order of the House of Commons, dated 2nd March, 1885, for a Return of all fish taken in the bay and river of Miramichi and its branches for the year ending 1st February, 1885, defining the separate quantities of each kind by weight, the places to which they were exported, and the route of transport in each case, and the average price received for each kind of fish; together with an estimate, in detail, of the several kinds of fish taken in that time. Presented to the House of Commons, 20th March, 1885.—*Mr. Macmillan (Middlesex)*—*Not printed.*
- 101a.** Return to an Address of the House of Commons, dated 6th February, 1885, for copies of all minutes of Council, reports to Council, and of correspondence between the Canadian Government and the British Government, or any of its officers or members, not already laid before Parliament, relating to the so-called fishery question, from the 1st of July, 1867, up to the time of the signing of the Washington Treaty. Presented to the House of Commons, 22nd April, 1885.—*Mr. Mulock*.....*Printed for Sessional Papers only.*
- 101b.** Return to an Order of the House of Commons, dated 12th March, 1885, for copies of all documents, plans and reports furnished to the Department of Marine and Fisheries by J. U. Gregory, in relation to the porpoise fishery of Ste. Ann la Pocatière. Presented to the House of Commons, 28th May, 1885.—*Mr. Blondeau*.....*Not printed.*
- 101c.** Return to an Order of the House of Commons, dated 27th April, 1885, for a statement of amounts paid in bounty in the years 1883 and 1884 on fish caught in Bras d'Or Lakes, in the counties of Cape Breton, Inverness, Richmond and Victoria, and number of boats drawing such bounty in each county. Presented to the House of Commons, 28th May, 1885.—*Mr. McDougall (Cape Breton)*.....*Not printed.*
- 101d.** Return to an Order of the House of Commons, dated 12th March, 1885, for a return of all leases or licenses issued by the Department of Marine and Fisheries to fish on non-tidal waters in the Province of New Brunswick; the names of the lessees or licensees, and the respective territories and streams leased or licensed, and the respective amounts of rent paid by each lessee or licensee annually. Presented to the House of Commons, 28th May, 1885.—*Mr. Weldon*.....*Not printed.*

- 101e.** Return to an Order of the House of Commons, dated 12th March, 1885, for copies of the report of Mr. Jules Gauvreau, fishery overseer, and all details relating thereto, for the year 1884. Presented to the House of Commons, 28th May, 1885.—*Mr. Blondeau*.....*Not printed.*
- 101f.** Return to an Order of the House of Commons, dated 12th March, 1885, for copies of the report of the enquiry made by J. U. Gregory against Mr. Clovis Caron, fishery overseer, and of all documents relating thereto. Presented to the House of Commons, 28th May, 1885.—*Mr. Blondeau*.....*Not printed.*
- 101g.** Return to an Order of the House of Commons, dated 12th March, 1885, for copies of the report of Mr. Clovis Caron, fishery overseer, and all details therewith connected, for the year 1884. Presented to the House of Commons, 28th May, 1885.—*Mr. Blondeau*.....*Not printed.*
- 101h.** Return to an Address of the House of Commons, dated 27th April, 1885, for copies of all correspondence, Orders in Council, reports and other papers in connection with the removal of Mr. J. E. Starr, of Port Williams, Nova Scotia, from the office of fishery overseer, and the appointment of his successor; and a statement of the distance between the residence of Mr. Starr and that of his successor, and of the length of the coast line of King's County, N.S. Presented to the House of Commons, 5th June, 1885.—*Mr. Blake*.....*Not printed.*
- 101i.** Message from His Excellency the Governor General, transmitting to the House of Commons copies of despatches, correspondence and papers having reference to the negotiations at Washington with respect to the termination of the fishery clauses of the Treaty of Washington during the year 1884 and to the present date in 1885. Presented to the House of Commons, 9th July, 1885, by Sir John A. Macdonald.....*Printed for Sessional Papers only.*
- 102.** Return to an Address of the House of Commons, dated 2nd March, 1884, for copies of all correspondence, reports, Orders in Council, statements of accounts and other documents in the possession of the Government relating to the claim of the Government against the Allan Steamship Company for services rendered by the steamer "Newfield," in 1881, with a statement of the Government claim and the amount received in liquidation thereof. Presented to the House of Commons, 20th March, 1885.—*Mr. Forbes*.....*Not printed.*
- 103.** Return to an Order of the House of Commons, dated 2nd February, 1885, for copies of the complaint, correspondence, documents and reports, relating to the enquiry respecting Captain Alphonse Miville DeChêne about the year 1879, at St. Roch des Aulnets. Presented to the House of Commons, 20th March, 1885.—*Mr. Casgrain*.....*Not printed.*
- 104.** General statements and returns of baptisms, marriages and burials for certain districts of the Province of Quebec, for the year 1884. Presented to the House of Commons, 20th March, 1885, by Hon. J. H. Pope.....*Not printed.*
- 105.** Return to an Order of the House of Commons, dated 2nd March, 1885, for a statement of the quantity and value of coal purchased in 1883 and 1884 for the use of the public buildings at Ottawa, including Rideau Hall, showing from whom purchased, the price paid per ton, the kind of coal, and where produced. Presented to the House of Commons, 23rd March, 1885.—*Mr. Kirk*.....*Not printed.*
- 105a.** Return to an Order of the House of Commons, dated 12th March, 1885, for a Return of all animal charcoal imported into the Dominion, whether as fertilizers or for manufacturing purposes, the value of each kind, and the duties collected thereon at the respective ports of the Dominion, for the last fiscal year ending 30th June, 1884. Presented to the House of Commons, 27th April, 1885.—*Mr. Stairs*.....*Not printed.*
- 105b.** Return to an Order of the House of Commons, dated 12th March, 1885, for copies of all notices asking for tenders for supplying the fog-whistles and lighthouses in the Bay of Fundy and on the south shore of Nova Scotia with coal; copies of tenders submitted, names of party or parties whose tenders were accepted; copies of all vouchers, bills of lading and receipts upon which moneys were paid, and all other information in the Department in reference to this service. Presented to the House of Commons, 27th April, 1885.—*Mr. Robertson (Shelburne)*—*Not printed.*

- 105c.** Return to an Order of the House of Commons, dated 12th February, 1885, for a return giving a full statement of all coal entered ex-warehouse, free for exportation, during the year ending 30th June, 1884, showing the quantity so entered at each port; the names of persons having entered; the quantities ex-warehoused by each person, and, if exported, the name of the vessel or railroad by which exported; the place to which exported, and copies of all the cancelling certificates, showing that such coal had been landed in the ports to which exported. Presented to the House of Commons, 7th May, 1885.—*Mr. Burpee (Sunbury)*.....*Not printed.*
- 105d.** Return to an Order of the House of Commons, dated 12th March, 1885, for a return of the quantity of coal carried from the Spring Hill Coal Mines by the Intercolonial Railway from 1st January, 1884, to 31st December, 1884, showing the distance carried, the several places where delivered, and the rate per ton or per car for the carriage thereof from the mines to the several points of delivery. Presented to the House of Commons, 14th July, 1885.—*Mr. McMullen* .....*Not printed.*
- 106.** Return to an Order of the House of Commons, dated 24th February, 1885, for copies of all correspondence exchanged between the Department of Public Works and any person whomsoever, in relation to the construction of a wharf at Pointe aux Trembles, in the county of Portneuf. Presented to the House of Commons, 23rd March, 1885.—*Mr. De St. Georges*—*Not printed.*
- 106a.** Return to an Order of the House of Commons, dated 12th March, 1885, for a return of the wharfage collected at the Digby Pier from the 1st January, 1884, to the 31st of December, 1884. Also a return of the wharfage collected at the Metaghan River Pier, in the county of Digby, for the same period. Presented to the House of Commons, 16th April, 1885.—*Mr. Vail*—*Not printed.*
- 107.** Return to an Order of the House of Commons, dated 23rd February, 1885, for copies of correspondence, petitions, reports of engineers, lighthouse inspectors and others, in reference to change in dimensions of location of the lighthouses known as "Range Lights," at Weller's Bay, Ontario. Presented to the House of Commons, 23rd March, 1885.—*Mr. Platt*—*Not printed.*
- 107a.** Return to an Order of the House of Commons, dated 27th April, 1885, for a return of any memorials or correspondence with the Department of Marine and Fisheries in reference to the site of the new lighthouse at Quaco, built in place of a former one destroyed by fire; showing what was the purchase money paid for the present site, and to whom paid; and showing also who is the present keeper of the light, when appointed, and at what salary. Presented to the House of Commons, 5th June, 1885.—*Mr. Weldon*.....*Not printed.*
- 107b.** Return to an Order of the House of Commons, dated 27th April, 1885, for copies of all correspondence and complaints regarding the management of Bird Island Light, Victoria, Nova Scotia, during the past two years. Also the reports of the several superintendents of lights during the above period, and the evidence taken before the several superintendents regarding the management of the said Bird Island Light. And also the name of the person (if any) now in charge of said light, and the amount of salary paid to such keeper, and if he is permanently engaged. Presented to the House of Commons, 8th June, 1885.—*Mr. Campbell (Victoria)*.....*Not printed.*
- 108.** Return to an Address of the House of Commons, dated 23rd February, 1885, for copies of all Orders in Council, leases, correspondence and other documents in possession of the Government, in reference to the leasing of the piece of property in the city of Kingston known as the Market Battery. Presented to the House of Commons, 23rd March, 1885.—*Mr. Platt*—*Not printed.*
- 109.** Return to an Order of the House of Commons, dated 17th February, 1885, for a copy of the document or instrument containing the assurance received by the Government on or about the 17th day of April last from the Grand Trunk Railway Company, referred to by the Right Hon. Sir John A. Macdonald on that day in his place in this House, to the effect that the Grand Trunk Railway Company would set aside one million pounds sterling for the purpose of double

tracking the line of the Grand Trunk Railway between Montreal and Toronto. Also copy of the report of the denial of the said assurance and of the statements alleged to have been made in respect of it, by Sir Henry Tyler, the president of the said company, at the meeting thereof held in London, England, shortly after the said announcement; and copies of all correspondence between the Government and any official of the said company respecting the said assurance. Presented to the House of Commons, 23rd March, 1885.—*Mr. Mitchell*.....*Not printed.*

**109a.** Return to an Order of the House of Commons, dated 28th March, 1884, for a statement showing the names of all stockholders in the Grand Trunk Railway of Canada, with the amounts of stock held by each of said stockholders, at the close of the first year after the charter was granted or operations commenced. Also the names of all stockholders in said company and the amounts of stock held by each on the first day of the current year. Presented to the House of Commons, 31st March, 1885.—*Mr. Mitchell*.....*Not printed.*

**109b.** Return to an Order of the House of Commons, dated 24th February, 1885, for a statement in detail of the several casualties or accidents, whereby passengers were injured or killed, which have occurred on the Grand Trunk Railway and any of its branches, and the Canadian Pacific Railway and any of its branches, from the 1st day of January, 1884, to the 1st day of January, 1885, stating in detail where and when such casualties occurred, the number of persons killed in each casualty, also number injured, stating whether seriously or otherwise, the several amounts paid, and to whom paid, as damages in each accident, whether any law suits for recovery of damages are pending, and stating in detail what amounts are still claimed thereon; also the causes of such accidents. Presented to the House of Commons, 16th April, 1885.—*Mr. Mitchell*.....*Not printed.*

**109c.** Supplementary Return to an Order of the House of Commons, dated 24th February, 1885, for a statement, in detail, of the several casualties or accidents, whereby passengers were injured or killed, which have occurred on the Grand Trunk Railway and any of its branches, and the Canadian Pacific Railway and any of its branches, from the 1st day of January, 1884, to the 1st day of January, 1885, stating, in detail, where and when such casualties occurred, the number of persons killed in each casualty, also number injured, stating whether seriously or otherwise, the several amounts paid, and to whom paid, as damages in each accident, whether any lawsuits for recovery of damages are pending, and stating, in detail, what amounts are still claimed thereon; also the causes of such accidents. Presented to the House of Commons, 20th April, 1885.—*Mr. Mitchell*.....*Not printed.*

**109d.** Return (*in part*) to an Order of the House of Commons, dated 24th February, 1885, for copies of the returns as required to be made under the Consolidated Railway Act of 1879, and the Acts in amendment thereof, of 1881 and 1884, by the Grand Trunk Railway Company, for the fiscal year 1883-84, in each year separately; and—1. The number of miles of main line of Grand Trunk, with statement of actual total cost of construction and equipment thereof. The separate cost per mile of construction thereof, without rolling stock. The total amount of capital account now standing against the said railway, including its equipment. 2. A statement, in detail, showing the several branches or side lines now owned by the said company, including the number of miles in each, with the amounts severally paid for each. How such amounts were paid; whether paid in cash or securities, and the statement and character thereof, in detail. The amount for which each of such securities was sold, and the net amounts which were realized in each. 3. A statement, in detail, of any railway line or lines leased by the Grand Trunk Company or agreed to be worked by them on a percentage of earnings or other terms, with the length of each of such lines and the conditions, in detail, of the agreements in relation thereto. 4. A statement, in detail, of any interest the Grand Trunk Railway may have in any other railway or railways, with the securities, in detail, that they may hold in relation thereto. 5. A statement in detail of the net earnings of each of the railways mentioned in the four preceding clauses, after the payment of working expenses, for the past financial year, of each of the said railways, with a statement, in detail, of the percentage that working expenses bear in each case to the gross earnings. 6. Whether any and what amounts were paid by the Grand Trunk Company towards the construction of the Toronto and Ottawa Railway, and the amount thereof, with the statement of the gross, as well as the net, earnings of the said railway for the past financial year of the said railway; and a statement of where

- these funds came from; also a statement as to where they appear in the accounts of the Grand Trunk Company's accounts or returns. Presented to the House of Commons, 5th May, 1885.—*Mr. Mitchell*.....*Not printed.*
- 110.** Return to an Order of the House of Commons, dated 12th March, 1885, for a Return showing all properties or rooms leased by the various branches of the Public Service from private parties or companies in the city of Ottawa, stating the amount of rental paid in each case; also the purposes for which such properties or rooms are used. Presented to the House of Commons, 24th March, 1885.—*Mr. Somerville (Brant)*.....*Not printed.*
- 111.** Return to an Address of the House of Commons, dated 6th February, 1885, for copy of the lease of the Northern and Pacific Junction Railway Company to the Northern Railway Company of Canada and Hamilton and North-West Railway Company, or either of them. Presented to the House of Commons, 24th March, 1885.—*Mr. Mulock*—  
*Printed for Sessional Papers only.*
- 112.** Return to an Order of the House of Commons, dated 9th February, 1885, for a statement in detail showing amount of work done, contracts made and with whom, moneys paid and to whom, and all expenditures in connection with the improvements of Great Village River, in the county of Colchester, Nova Scotia. Presented to the House of Commons, 24th March, 1885.—*Mr. Robertson (Shelburne)*.....*Not printed.*
- 113.** Return to an Order of the House of Commons, dated 12th March, 1885, for: 1. The names of all persons who tendered for the construction of the drill shed at Quebec. 2. The amount asked by each person so tendering. 3. The amount of the cheque deposited by each such person in support of his tender, with the names of the signers and endorsers of each cheque, and the names of the several banks by which such cheques were accepted. Presented to the House of Commons, 26th March, 1885.—*Mr. Landry (Montmagny)*.....*Not printed.*
- 114.** Return to an Order of the House of Commons, dated 12th March, 1885, for a copy of report of the Superintendent of Burlington Bay Canal of the soundings taken during the summer of 1884, the plottings and cross-sections made, showing the present conformation of the bottom of the said canal, together with a statement showing the depths on both sides, as well as all plans giving information in reference to said soundings. Presented to the House of Commons, 26th March, 1885.—*Mr. Robertson (Hamilton)*.....*Not printed.*
- 115.** Return to an Order of the House of Commons, dated 17th February, 1885, for a report of the Auditor General and also one McGee, as well as for all papers, letters, accounts, cheques and newspapers connected with any claim of Staff Commander Boulton against the Department of Marine and Fisheries or the Government for any amount of money which he alleges to be due him for salary or otherwise, or which he asserts has been withheld from him, or in relation to any dispute between said Boulton and any officer of the Marine and Fisheries Department in regard to cheques drawn in favor of said Boulton. Also a Return to an Order of the House of Commons, dated 2nd March, 1885, for a return of any papers or letters in the hands of the Government signed by Deputy Minister Smith, bearing on the subject of dispute or irregularity between Deputy Minister Tilton and Staff Commander Boulton, or in any way relating thereto; also copies of any letters addressed to Mr. Tilton by Mr. Smith, as Deputy Minister, on the subject. Presented to the House of Commons, 30th March, 1885.—*Mr. McMullen*.....*Not printed.*
- 116.** Papers and correspondence, up to the present time, with respect to the commission recently appointed to investigate and report upon the claims existing in connection with the extinguishment of the Indian title preferred by half-breeds resident in the North-West Territories outside of the limits of the Province of Manitoba, previous to the 15th day of July, 1870. Presented to the House of Commons, 20th April, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*
- 116a.** Copy of commission appointing commissioners to make enumeration of half-breeds in the North-West Territories previous to the 15th July, 1870. Presented to the House of Commons, 22nd April, 1885, by Sir John A. Macdonald.....*Printed for Sessional Papers only.*
- 116b.** Certified copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 19th April, 1885, for instructions

given to the three commissioners appointed to proceed to the North-West to enquire into and adjudicate upon the claims of the half-breeds and others in the Saskatchewan settlement. Presented to the Senate, 20th April, 1885.—*Hon. Mr. Alexander*—

*Not printed. See 116.*

- 116c.** Papers and correspondence in relation to claims for land in the Prince Albert district, North-West Territories. Presented to the House of Commons, 27th April, 1885.—*Mr. Blake*.  
*Not printed.*
- 116d.** Return to an Order of the House of Commons, dated 7th March, 1883, for copies of all correspondence and memorials relating to the claims of the inhabitants of Prince Albert and the neighboring districts, in the North-West Territories, in respect of the lands they occupy, and to other matters affecting their condition. Presented to the House of Commons, 5th May, 1885.—*Mr. Blake*.....*Not printed.*
- 116e.** Papers and correspondence in connection with half-breed claims and other matters relating to the North-West Territories. Presented to the House of Commons, 11th June, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*
- 116f.** Papers and correspondence in connection with half-breed claims and other matters relating to the North-West Territories. Presented to the House of Commons, 22nd June, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*
- 116g.** Papers and correspondence in connection with half-breed claims and other matters relating to the North-West Territories. Presented to the House of Commons, 30th June, 1885.—*Mr. Blake*.....*Not printed.*
- 116h.** Copy of the Official Report from Major-General Middleton, C.B., commanding the North-West field forces, concerning the engagements at Fish Creek on the 24th April, 1885; Pound-maker's Camp (near Crees' Reserve), 2nd May, 1885; and Batoche, 9th, 10th, 11th and 12th May, 1885. Presented to the House of Commons, 6th July, 1885, by Hon. J. P. R. A. Caron—  
*Printed for Distribution only.*
- 116i.** Plan and Views of Engagement at Fish Creek on the 24th April, 1885. Presented to the House of Commons, 16th July, 1885, by Hon. J. P. R. A. Caron.....*Not printed.*
- 117.** Return to an Order of the House of Commons, dated 12th March, 1885, for copies of all reports, correspondence, petitions, &c., in reference to the seizure of the schooner "Lion," of the Port of Barrington, in Nova Scotia, in December, 1883. Presented to the House of Commons, 31st March, 1885.—*Mr. Robertson (Shelburne)*.....*Not printed.*
- 118.** Return to an Order of the House of Commons, dated 12th March, 1885, for all correspondence with reference to the making of a road on the Indian Reserve at Fort William, Ontario, and the expenditure thereon of funds belonging to the Indians, and particularly with reference to the payments to be made to the licensees, for stumpage or otherwise, for the timber required in the construction of the bridges on the road. Presented to the House of Commons, 7th April, 1885.—*Mr. Blake*.....*Not printed.*
- 118a.** Return to an Address of the House of Commons, dated 27th April 1885, for copies of all correspondence and Orders in Council in any way bearing upon the subject of purchase or offers of purchase of Indian reserve lands in British Columbia, of a date subsequent to 1st June, 1882. Presented to the House of Commons, 30th June, 1885.—*Mr. Baker (Victoria)*—  
*Not printed.*
- 119.** Return to an Order of the House of Commons, dated 23rd March, 1885, for a Return showing, if any, and, if so, what sum or sums of money have been paid to J. E. Collins for services rendered to the Government; also showing travelling and other expenses paid him, if any; and showing in what position or capacity he is employed. Presented to the House of Commons, 8th April, 1885.—*Mr. McMullen*.....*Not printed.*
- 120.** Return to an Order of the House of Commons, dated 23rd March, 1885, for copy of the record in the matter of Eugene Gosselin, of St. Charles de Bellechasse, *versus* the Queen, as it stands

- in the office of the Supreme Court of Canada, including the proceedings before the Exchequer Court and before Dominion Arbitrators. Presented to the House of Commons, 8th April, 1885.—*Mr. Amyot*.....*Not printed.*
- 121.** Return to an Address of the House of Commons, dated 12th March, 1885, for copies of petitions or correspondence in reference to making Ridgetown a port of entry. Presented to the House of Commons, 21st April, 1885.—*Mr. Casey*.....*Not printed.*
- 122.** Return to an Order of the House of Commons, dated 23rd March, 1885, for a Return of all sums (apart from his salary as county judge) which have been paid to G. M. K. Clarke in each of the years 1879, 1880, 1881, 1882, 1883 and 1884, respectively, and for what services in each year; also what sums, if any, have been paid him from the 1st January, 1884, to this date. Presented to the House of Commons, 13th April, 1885.—*Sir Richard Cartwright*—  
*Not printed.*
- 123.** Return to an Address of the House of Commons, dated 23rd March, 1885, for copies of all correspondence having reference to the appointment of a joint commission with the United States Government for surveying the boundary line between the Province of British Columbia and the United States Territory of Alaska. Presented to the House of Commons, 13th April, 1885.—*Mr. Gordon*.....*Not printed.*
- 123a.** Return to an Address of the House of Commons, dated 12th March, 1885, for copies of all correspondence with the Government of British Columbia and Imperial Government, in relation to the eastern boundary of that province. Presented to the House of Commons, 5th May, 1885.—*Mr. Mills*.....*Not printed.*
- 123b.** Return to an Address of the House of Commons, for copies of all Orders in Council, Imperial, Canadian or provincial, in the hands of the Government, and not already laid before Parliament, relating to the disputed boundaries of Ontario. Also all despatches and correspondence with any of the provinces and with the Imperial Government upon the same subject. Presented to the House of Commons, 23rd June, 1885.—*Mr. Mills*—  
*Printed for Sessional Papers only.*
- 124.** Return to an Order of the House of Commons, dated 4th February, 1885, for all Customs collections in Algoma during the six months ending 31st December, 1884, showing the amount collected at Port Arthur and its outports, and at Sault Ste. Marie and its outports, respectively; also the amount collected at Spanish River and such other stations in Algoma as report to Collingwood. Presented to the House of Commons, 13th April, 1885.—*Mr. Dawson*.....*Not printed.*
- 125.** Return to an Order of the House of Commons, dated 17th February, 1885, for all correspondence from 1st January, 1884, to 1st January, 1885, between W. H. Rogers, inspector of fisheries for Nova Scotia, also Mr. Sellon, overseer of river fisheries for Liverpool, Queen's county, Nova Scotia, also between John Millard, J. Newton Freeman, S. J. R. Bill and others, and the Government or Department of Marine and Fisheries, in reference to a breach of the "Sawdust Law," by putting mill rubbish and shingle shavings into the Mersey River; showing also what fines have been imposed and how many collected; if not collected, whether remitted. Presented to the House of Commons, 16th April, 1885.—*Mr. Forbes*.....*Not printed.*
- 125a.** Return to an Order of the House of Commons, dated 1st April, 1885, for copies of all correspondence and reports from W. H. Rogers, inspector of fisheries for Nova Scotia, to the Department of Marine and Fisheries, relating to the adoption of Rogers' patented fish ladder, and the places at which the said inspector recommends that it should be placed; also any instructions from the Department concerning the same. Also a statement of moneys claimed or paid, as a royalty or otherwise, on account of patent fishway, stating by whom and to whom such moneys were paid, together with an account of any other moneys paid by the Department, and to whom, towards the construction of Rogers' fish ladder, the Return to cover the years 1880, 1881, 1882, 1883 and 1884. Presented to the House of Commons, 30th June, 1885.—*Mr. Robertson (Shelburne)*.....*Not printed.*
- 126.** Return to an Order of the House of Commons, dated 9th February, 1885, for the names of all Government officials in the North-West Territories, the date of their appointment, and the

date upon which they entered upon their respective duties; the salary, fee or other allowance granted to each, including travelling or other expenses; the names and respective locations of sheriffs and registrars, the date of their respective appointments, and the date upon which they entered upon their duties, and the date from which their salary commenced to run; the receipts of their respective offices, monthly or annually, from their establishment up to the 1st of January, 1885. Presented to the House of Commons, 16th April, 1885.—*Mr. McMullen*.....*Not printed.*

**127.** Return (*in part*) to an Order of the House of Commons, dated 2nd March, 1885, for copies of all advertisements for tenders, of all specifications, and of all tenders received for fog horns and letter box fronts, from 1st January, 1884, to 31st January, 1885; also of all correspondence, contracts, accounts, receipts and documents relating to the furnishing of such fog horns and letter box fronts. Presented to the House of Commons, 16th April, 1885.—*Mr. Laurier*—

*Printed for Distribution only.*

**127a.** Supplementary Return to an Order of the House of Commons, dated 2nd March, 1885, for copies of all advertisements for tenders, of all specifications, and of all tenders received for fog horns and letter box fronts, from 1st January, 1884, to 31st January, 1885; also of all correspondence, contracts, accounts, receipts and documents relating to the furnishing of such fog horns and letter box fronts. Presented to the House of Commons, 22nd April, 1885.—*Mr. Laurier*.....*Not printed.*

**127b.** Return to an Order of the House of Commons, dated 2nd March, 1885, for copies of all correspondence between the Government and one Captain Conally, or any other person, in regard to placing a fog horn or fog whistle on what is called the Dummy Lighthouse, near the head of Lake Erie. Presented to the House of Commons, 5th May, 1885.—*Mr. Jackson*—

*Not printed.*

**127,** 1880. Return to an Address of the House of Commons, dated 23rd February, 1880, for a copy of any Order or Orders in Council approving of the treaties made with the Indian tribes at Forts Carlton and Pitt in the year 1870, and of all despatches from the Minister of the Interior or his Deputy to the Commissioners, or any of them, communicating the same to them, and having reference to the terms embodied in such treaties, together with the replies of the said Commissioners, or any of them, to such despatches. Presented to the House of Commons, 5th April, 1880.—*Mr. White (Cardwell)*.....*Printed for Distribution only.*

**128.** Return to an Order of the House of Commons, dated 17th January, 1885, for copies of all correspondence between the Government and the Captain of the Life Saving Service at Port Rowan, Province of Ontario, not already brought down. Presented to the House of Commons, 22nd April, 1885.—*Mr. Jackson*.....*Not printed.*

**128,** 1880. Return to an Address of the House of Commons, dated 23rd February, 1880, for copies of all despatches from the Lieutenant Governor of Manitoba, relating to the reserve promised under the provisions of Treaty No. 1, relating to the reserve stipulated thereby to be assigned to the band of Indians in Manitoba of whom Yellow Quill was Chief; and of all correspondence and despatches from the Secretary of State, the Minister of the Interior, or the Deputy Minister of the Interior, addressed to the said Lieutenant Governor in reply or in relation thereto; also correspondence between the Government of Canada and the Hudson Bay Company on the subject. Presented to the House of Commons, 5th April, 1880.—*Mr. White (Cardwell)*.....*Not printed.*

**129.** Return to an Order of the House of Commons, dated 3rd March, 1884, for a Return showing the names, rank, present positions occupied, length of service at sea, of each individual who has received a certificate of either competency or service under the Act passed last Session, making provision for the examination of masters and mates of coasters and inland waters, from the passage of said Act to the nearest possible date, for each and every province of the Dominion; as also a statement giving dates and names of applicants who have been refused certificates of service, or whose certificates have been for some reason withheld, and the reasons for such refusals or retentions. Presented to the House of Commons, 22nd April, 1885.—*Mr. Baker (Victoria)*.....*Not printed.*

- 130.** Return to an Address of the House of Commons, dated 17th February, 1885, for copies of all Orders in Council, despatches and correspondence between the Government of Canada and the United Kingdom, and between the Government of Canada and Her Majesty's Ambassador at Washington, not already brought down, relating to the subject of extradition and extradition arrangements. Presented to the House of Commons, 23rd April, 1885.—*Mr. Blake*—*Printed for Sessional Papers only.*
- 130a.** Return to an Address of the House of Commons, dated 9th February, 1885, for a statement with reference to the cases in which demands for extradition have been made by or upon the Government of Canada, or in which extradition proceedings have been taken in continuation of, and in the same form as, the statement transmitted by the Government of Canada to the Government of the United Kingdom, in or about the year 1876. Presented to the House of Commons, 5th May, 1885.—*Mr. Blake*.....*Printed for Sessional Papers only.*
- 131.** Return to an Address of the House of Commons, dated 20th February, 1885, for a copy of the Order in Council creating the Forestry Commission, and appointing Mr. J. H. Morgan as such commissioner; also a copy of the recommendation on which such Order in Council was based. Presented to the House of Commons, 23rd April, 1885.—*Mr. Rykert*.....*Not printed.*
- 131a.** Return to an Address of the House of Commons, dated 17th February, 1885, for a copy of Order in Council appointing J. H. Morgan as Forestry Commissioner; also copy of instructions accompanying the same; also date of report from the said J. H. Morgan which appears as part of the last report of the Minister of the Interior, and copies of any subsequent reports and the date on which the same were received by the Department; also statement of any payments made to the said J. H. Morgan subsequent to those appearing in the Public Accounts of 1884. Presented to the House of Commons, 26th May, 1885.—*Mr. Paterson (Brant)*—*Not printed.*
- 132.** Return to an Address of the Senate, dated 6th March, 1885, for a Return of all exports from ports on Hudson and James Bays, other than York Factory, of furs, fish, whale, seal or porpoise oil. Presented to the Senate, 20th April, 1885.—*Hon. Mr. Schultz*.....*Not printed.*
- 133.** Return to an Order of the House of Commons, dated 27th April, 1885, for a Return of all correspondence and petitions from mariners, vessel owners and others, not already brought down, relative to the selection of a route for the construction of the Murray Canal, or the character of the harbors afforded by Presqu'Isle and Weller's Bay respectively. Also all offers made by tenders or otherwise to construct said canal by any other than the adopted route, together with all reports as to progress of work of construction in possession of the Government. Presented to the House of Commons, 14th July, 1885.—*Mr. Cockburn*.....*Not printed.*
- 134.** Return to an Order of the House of Commons, dated 23rd March, 1885, for a Return of any orders or instructions of the Railway Department as to the sale of return tickets, limiting the periods in which such tickets can be used; also of any claims made by persons holding such tickets for damages for being ejected from the cars, and what amounts, if any, have been paid for such claims. Presented to the House of Commons, 5th May, 1885.—*Mr. Weldon*—*Not printed.*
- 135.** Return to an Order of the House of Commons, dated 12th February, 1885, for copies of all correspondence and petitions to the Postmaster General, or any member of the Government, with reference to the adoption in Canada of a system to encourage small savings, similar to that brought in by the late Mr. Fawcett in England. Presented to the House of Commons, 7th May, 1885.—*Mr. Blake*.....*Not printed.*
- 136.** Return to an Address presented by the Senate to His Excellency the Governor General, dated 17th March, 1885, praying His Excellency to cause to be laid before this House, copies of the reports of the various surveys made by engineers under the direction of the Government, for a line of railway connecting Montreal with the harbors of St. John and Halifax by the shortest and best practicable route (including the reports of Messrs. A. L. Light and Vernon Smith on the lines surveyed by them, respectively, running up the valley of the Etchemin River and from Canterbury, New Brunswick, to the northern end of Chesuncook Lake, in the

- State of Maine); together with a statement showing the height of the summit level, the maximum grade per mile, the number of miles with a grade exceeding 42 feet, the average grade per mile, and the number and position of the curves with a less radius than 1,910 feet, upon each of such surveyed lines, as well as upon any existing railway proposed to be used in connection with any such surveyed lines; and also a detailed statement of the distances from Montreal to St. John and Halifax by each of such surveyed lines and the existing railways proposed to be used in connection therewith. Presented to the Senate, 5th May, 1885.—*Hon. Mr. Power*.....*Printed for both Distribution and Sessional Papers.*
- 136a.** Return to an Address of the House of Commons, dated 3rd February, 1885, for copies of all Orders in Council, instructions given, reports of engineers, and all documents whatsoever, in relation to the selection of the shortest and best line for a railway between the present terminus of the Canadian Pacific Railway and one of the seaports of the Maritime Provinces. Presented to the House of Commons, 20th July, 1885.—*Mr. Landry (Montmagny)*.....*Not printed.*
- 137.** Return to an Address of the House of Commons, dated 17th February, 1885, for copies of all correspondence, Orders in Council, contracts, and other papers in connection with the projected railway between Oxford and New Glasgow, in Nova Scotia, or in relation to any of the companies or individuals negotiating for the construction of any part of the projected short line within the bounds of the Province of Nova Scotia, and particularly an instrument signed by Sir Charles Tupper, the Minister of Railways, about the 9th May, 1884, whereby he, as representing the Crown, entered into certain engagements with Norvin Green, president of the Montreal and European Short Line Company, or with that company; and of all Orders or arrangements cancelling the said agreement; and of the evidence as to the ability of the company on which said agreement was made; and of all Orders and authorities under which the Oxford Branch Railway was completed or money thereon expended out of the Intercolonial appropriation; and of all agreements in connection with such expenditure, and of all statements, representations and letters made by or on behalf of contractors, companies, railway companies, construction companies, laborers, merchants or others, who have been concerned in the work, and of all reports made to any department or to Council upon any of the above subjects. Presented to the House of Commons, 8th May, 1885.—*Mr. Blake*—  
*Printed for Sessional Papers only.*
- 137a.** Supplementary Return to an Address of the House of Commons, dated 17th February, 1885, for copies of all correspondence, Orders in Council, contracts and other papers in connection with the projected railway between Oxford and New Glasgow, in Nova Scotia, or in relation to any of the companies or individuals negotiating for the construction of any part of the projected Short Line within the bounds of the Province of Nova Scotia; and particularly an instrument signed by Sir Charles Tupper, then Minister of Railways, about 9th May, 1884, whereby he, as representing the Crown, entered into certain engagements with Norvin Green, president of the Montreal and European Short Line Company, or with that company; and of all Orders or arrangements cancelling the said agreement, and of the evidence as to the ability of the company on which said agreement was made; and of all Orders and authorities under which the Oxford Branch Railway was completed, or money thereon expended out of the Intercolonial appropriation, and of all agreements in connection with such expenditure; and of all statements, representations and letters made by or on behalf of contractors, companies, railway companies, construction companies, laborers, merchants or others, who have been concerned in the work; and of all reports made to any department or to Council upon any of the above subjects. Presented to the House of Commons, 14th July, 1885.—*Mr. Mills*—  
*Not printed.*
- 137b.** Return to an Address of the House of Commons, dated 11th February, 1885, for copies of all reports made by engineers employed by the Great American and European Short Line Railway Company in Nova Scotia and Cape Breton, with the plans, papers and correspondence connected therewith; also for copies of all correspondence with the Dominion Government and the Government of Nova Scotia on the same subject; also copies of all contracts by and between the said company and other persons; also a statement of all moneys paid out and expended on contracts for salaries, wages and labor; showing also the amounts, if any, still due and owing by the said company to their contractors, agents or workmen; and also a statement of the

- number of miles completed and graded in each of the counties of Cumberland, Colchester and Pictou. Presented to the House of Commons, 14th July, 1885.—*Mr. Paint*.....*Not printed.*
- 138.** Return to an Order of the House of Commons, dated 23rd March, 1885, for copies of all reports, correspondence, and surveys, if any, in the Department of Public Works, as to the improvement of the North Saskatchewan River, for the purpose of navigation. Presented to the House of Commons, 28th May, 1885.—*Mr. McCallum*—  
*Printed for both Distribution and Sessional Papers.*
- 139.** Return to an Address of the House of Commons, dated 27th April, 1885, for all letters and correspondence had between the Dominion Government or any of its members and the Local Government of New Brunswick or any of its members, on the subject of the building of a foot and carriage bridge on the St. John River, at or near Fredericton. Presented to the House of Commons, 11th May, 1885.—*Mr. Landry (Kent)*.....*Printed for Distribution only.*
- 139a.** Supplementary Return to an Address of the House of Commons, dated 27th April, 1885, for all letters and correspondence had between the Dominion Government or any of its members and the Local Government of New Brunswick, or any of its members, on the subject of the building of a foot and carriage bridge on the St. John River, at or near Fredericton. Presented to the House of Commons, 9th June, 1885.—*Mr. Landry (Kent)*.....*Printed for Distribution only.*
- 140.** Reports of Messrs. Perley and Guerin as to works respecting which application has been made on the River Ottawa and Lake Temiscaming; together with the memorandum of the Reverend Father Paradis, O.M.I. Presented to the House of Commons, 11th May, 1885, by Sir Hector Langevin.....*Printed for Distribution only.*
- 141.** Return to an Order of the House of Commons, dated 28th March, 1884, showing the total cost of old and new works, with expenditure for repairs and maintenance in each year since Confederation: 1. For cost of Welland Canal. 2. For new works, repairs, and all incidental expenses connected therewith. 3. For maintenance. 4. For revenue derived therefrom. 5. For return similar to that contained in 1, 2, 3 and 4, connected with the St. Lawrence Canals. 6. For estimated cost for deepening and completing the St. Lawrence Canals to a depth of twelve and fourteen feet, separately. Presented to the House of Commons, 16th May, 1885.—*Mr. McCraney*.....*Not printed.*
- 142.** Return to an Order of the House of Commons, dated 27th April, 1885, for a Return of instructions to the health officers of the ports in the Province of New Brunswick, and quarantine regulations issued by the Department of Marine and Fisheries or the Department of Agriculture relating to these ports. Presented to the House of Commons, 16th May, 1885.—*Mr. Weldon*.....*Not printed.*
- 143.** Return to an Order of the House of Commons, dated 27th April, 1885, for a Return showing the actual cost of laying the telegraph cable from Clover Point, Victoria, British Columbia, across the Straits of Juan de Fuca to a point at or near Dungeness, W.T.; said return to give the names of persons to whom sums have been paid; the nature and extent of services rendered, entitling them to such payments; the cost of the cable, time occupied in laying said cable, and its length. Presented to the House of Commons, 18th May, 1885.—*Mr. Baker (Victoria)*.....*Not printed.*
- 144.** Return to an Address of the House of Commons, dated 9th March, 1885, for: 1. Copies of all demands and claims made by the town of Emerson on the Government for financial or other aid, and all correspondence respecting the same. 2. Copies of all Orders in Council or departmental orders respecting such demands or claim, and the action or decision of the Government thereon. Presented to the House of Commons, 18th May, 1885.—*Mr. Cameron (Huron)*.....*Not printed.*
- 145.** Return to an Order of the House of Commons, dated 17th February, 1885, for a statement showing the names of all persons employed by the Department of Public Works or other department of the Government as inspectors or clerks of works on any building or other public work since 1873-74 until 1883-84 inclusive, with statement showing the amount paid to

such persons for services as such officials, and the rate per month or per diem to each; also the gross amount expended by the Government in each year on such works under the inspection of each clerk of works; also a statement showing the actual profession or calling of each such clerk of works. Presented to the House of Commons, 26th May, 1885.—*Sir Richard Cartwright*—*Not printed.*

- 146.** Return to an Address of the House of Commons, dated 27th April, 1885, for all the correspondence, papers and report of the officers of Customs at the port of Halifax and any other port, in connection with the entry by A. & W. Mackinlay, as agents of Thomas Nelson & Son, of school books at an undervaluation. Presented to the House of Commons, 26th May, 1885.—*Mr. Rykert*.....*Not printed.*
- 146a.** Return to an Address of the House of Commons, dated 27th April, 1885, for all papers, correspondence and reports with reference to Nelson & Son's consignment of school books to the late firm of James Campbell & Sons, Toronto. Presented to the House of Commons, 26th May, 1885.—*Mr. Wallace (York)*.....*Not printed.*
- 146b.** Return to an Address of the House of Commons, dated 27th April, 1885, for all the correspondence, papers and report of the officer of Customs for the port of Toronto, in connection with the seizure of school books entered at an undervaluation by Thomas Nelson & Son, Edinburgh. Presented to the House of Commons, 26th May, 1885.—*Mr. Rykert*....*Not printed.*
- 146c.** Supplementary Return to an Address of the House of Commons, dated 27th April, 1885, for a Return of all papers, correspondence and reports with reference to Nelson & Son's consignments of school books to the late firm of James Campbell & Sons, Toronto. Presented to the House of Commons, 26th June, 1885.—*Mr. Wallace (York)*.....*Not printed.*
- 146d.** Supplementary Return to an Address of the House of Commons, dated 27th April, 1885, for a Return of all the correspondence, papers and report of the officer of Customs at the port of Halifax, and any other port, in connection with the entry by A. & W. Mackinlay, as agents of Thos. Nelson & Son, of school books at an undervaluation. Presented to the House of Commons, 26th June, 1885.—*Mr. Rykert*.....*Not printed.*
- 146e.** Supplementary Return to an Address of the House of Commons, dated 27th April, 1885, for a Return of all the correspondence, papers and report of the officer of Customs at the port of Toronto, in connection with the seizure of school books entered at an undervaluation by Thos. Nelson & Son, of Edinburgh. Presented to the House of Commons, 26th June, 1885.—*Mr. Rykert*.....*Not printed.*
- 147.** Return to an Order of the House of Commons, dated 27th April, 1885, for a Return showing:  
1. The detailed amounts actually due to the Supervisor of Cullers at Quebec for culling and measuring. 2. The names of all parties indebted, and the date of incurring of each liability. Presented to the House of Commons, 28th May, 1885.—*Mr. De St. Georges*.....*Not printed.*
- 148.** Return to an Address of the House of Commons, dated 12th March, 1885, for copies of all Orders in Council, agreements and correspondence in the possession of the Government since 1872, respecting the Windsor Branch Railway; also copies of pleadings and verdicts in the various suits at law respecting the same branch. Presented to the House of Commons, 9th June, 1885.—*Mr. Kinney*.....*Not printed.*
- 149.** Return to an Order of the House of Commons, dated 9th March, 1885, for all correspondence between the Auditor-General and the Department of Marine and Fisheries, relating to an Order of this House made on the 28th March last, for a return showing all sums received by the Department of Marine and Fisheries on account of rental of rivers and streams, &c.; or in any way relating to any irregularity or inaccuracy connected with matters of the said Department. Presented to the House of Commons, 28th May, 1885.—*Mr. McMullen*—*Not printed.*
- 150.** Return to an Address of the House of Commons, dated 8th April, 1885, for all papers concerning the appointment, instruction and salary of Mr. Hector Fabre, as Canadian agent at Paris, France, and the reports from that gentleman to the Government since his appointment. Presented to the House of Commons, 2nd June, 1885.—*Mr. Bergeron*—

*Printed for Distribution only,*

- 151.** Return to an Address of the House of Commons, dated 12th March, 1885, for copies of all correspondence which has taken place between the Dominion Government and the Local Government of New Brunswick, with reference to the Northern and Western Railway, since May, 1884, up to February, 1885. Presented to the House of Commons, 11th June, 1885.—*Mr. Temple*.....*Not printed.*
- 152.** Return to an Address of the Senate, dated 20th April, 1885, for copies of all memorials, letters or telegrams addressed to the Railway Department, respecting the establishment of the York station on the Prince Edward Island Railway, and the answers thereto; also copies of any memorials, letters or telegrams, which may have been received by that Department, having reference to the abolition of the said station, and the replies, if any, made thereto. Presented to the Senate, 16th June, 1885.—*Hon. Mr. Haythorne*.....*Not printed.*
- 153.** Return to an Order of the House of Commons, dated 11th March, 1885, for a Return showing the amount of money paid for injuries to parties in the Mounted Police since 1878, specifying the names of the parties injured, the nature of the injuries, the amount of money paid, and to whom paid. Presented to the House of Commons, 7th April, 1885.—*Mr. Somerville (Brant)*—*Not printed.*
- 153a.** Annual Report of the Commissioner of the North-West Mounted Police Force for the year 1884. Presented to the House of Commons, 23rd June, 1885.—*Sir John A. Macdonald*—*Printed for both Distribution and Sessional Papers.*
- 154.** Return (*in two parts*) to an Order of the House of Commons, dated 12th March, 1885, for a return showing:—1. Total number of depositors in the Savings Banks, Post Office, or other banks holding deposits of \$1,000 or upwards; also the amount so held. 2. Total number of depositors having deposits of less than \$1,000 and more than \$500 each; also the total amount so held. 3. Total number of said depositors holding less than \$500 each; also total amount so held. Presented to the House of Commons, 30th June, 1885.—*Sir Richard Cartwright and Mr. Fairbank*.....*Not printed.*
- 155.** Return to an Order of the House of Commons, dated 27th April, 1885, for copies of all correspondence and papers relative to the dismissal of George E. Cherrier from the Indian Agency in Caughnawaga; also of the reports of the investigation into the affairs of the agency held by Mr. de Boucherville in 1883, and by A. Dingman in 1884, with copies of all instructions at any time given by the Department to Mr. Cherrier. Presented to the House of Commons, 30th June, 1885.—*Mr. Bain (Wentworth)*.....*Not printed.*
- 156.** Return to an Order of the House of Commons, dated 12th March, 1885, for a Return of all hardware purchased at Halifax by the Department of Marine and Fisheries, from 1st July, 1878, to 31st December, 1884; the names of the firms who furnished the supplies, amount supplied by each firm in each year; the names of the firms who supplied stoves, galvanized and tinware, in each year from 1st October, 1878, to 31st December, 1884, showing if by tender, whose tender was accepted, and if tenders asked for each year. Presented to the House of Commons, 30th June, 1885.—*Mr. Forbes*.....*Not printed.*
- 157.** Return to an Order of the House of Commons, dated 11th March, 1885, for a Return showing the number of days W. Ingles Bradley, a clerk in the Department of Railways, has been registered on the Departmental Attendance Book since 1st July, 1884; also showing the number of days' attendance for which he has received payment, and the total amount paid, together with the name of the departmental officer certifying the account. Presented to the House of Commons, 14th July, 1885.—*Mr. Somerville (Brant)*.....*Not printed.*
- 158.** Return to an Order of the House of Commons, dated 27th April, 1885, for copies of all correspondence of a recent date between the Superintendent General of Indian Affairs and the agent of the Department in British Columbia, or any other person, upon the subject of establishing Indian schools in said province. Presented to the House of Commons, 14th July, 1885.—*Mr. Baker (Victoria)*.....*Printed for Sessional Papers only.*

- 158a.** Return to an Order of the House of Commons, dated 27th April, 1885, for a Return showing :  
 1. How many industrial schools for the instruction of Indian half-breed youth have been established in the Province of Manitoba and the North-West Territories respectively, under the authority and by permission of the Government of Canada, and where they are located. 2. At what places lands have been surveyed and set apart for Indian half-breed schools in 1884, and what quantity at each place. 3. Through whose representations and recommendations these half-breed schools are established from time to time, and whether any request from the Indian half-breeds themselves is required for the establishment of a school. 4. What subjects of instruction are provided for these schools in regard to industrial pursuits, moral and religious, and are both sexes included in the general school provisions. 5. Whether any of the Indian half-breed schools are placed under the care or supervision of any religious body or denomination ; if so, what are the conditions upon which such control is granted, and what is the extent of the denominational control, and is it, to the extent granted, a temporary or permanent control ; if there are denominational schools, what is the number belonging to each denomination, where they are located, and what quantity of land is owned or controlled by each, and what is the number of pupils. 6. Whether, when the moral and religious instruction of an Indian half-breed school is placed under the supervision or control of any denomination, it gives to the denomination control of the land and buildings of such school. 7. At whose cost the Indian half-breed school buildings are erected and furnished, and under whose directions the text books are selected or compiled, and by whom they are paid for. 8. What standing of attainment is required of teachers in these schools ; how and from whom they receive certificates of qualification, and whether there is a system of Governmental inspection of these Indian half-breed schools. 9. Whether the teachers and trustees or managers of these schools are required to make any periodical returns to the Government of the attendance, general condition, progress and expenditure of each. 10. Whether any of the religious denominations have obtained lands for church or school purposes from the Government or from any Indian reservation by treaty or otherwise. 11. Whether any of the religious bodies, on their own responsibility, have established schools among the Indians or half-breeds, and if they have, whether they receive any assistance directly or indirectly by land grants or otherwise for the support of such schools from the Government. Presented to the House of Commons, 18th July, 1885.—*Mr. Kirk* ..... *Not printed.*
- 159.** Return to an Address of the House of Commons, dated 12th February, 1885, for copies of all correspondence, petitions and Orders in Council, relating to any applications by or on behalf of any railway company elsewhere than in Manitoba or the North-West, for aid or additional aid. Presented to the House of Commons, 14th July, 1885.—*Mr. Blake*..... *Not printed.*
- 160.** Return to an Address of the House of Commons, dated 2nd March, 1885, for : 1. Copies of all correspondence between the Government and the North-West Council respecting the representation of the Territories in this Parliament. 2. Copies of all petitions, representations and correspondence addressed to the Government, or any member of it, on the same subject, and any replies thereto. 3. Copies of all petitions, representations and correspondence with the Government, or any member of it, on the subject of the establishment of Local Governments in the Territories, and of all replies thereto. Presented to the House of Commons, 15th July, 1885.—*Mr. Cameron (Huron)*..... *Not printed.*
- 161.** Return to an Address of the House of Commons, dated 23rd March, 1885, for a Return of all correspondence, papers and documents which have passed between the Imperial Government and the Dominion Government or the Dominion Government and the Government of British Columbia, relative to the public reserves of British Columbia and to the claim of the Crown to the land between high and low water mark, and generally all information as to "fore shore" rights of the Dominion. Presented to the House of Commons, 15th July, 1885.—*Mr. Baker (Victoria)*..... *Printed for Sessional Papers only.*

SEVENTEENTH  
ANNUAL REPORT

OF THE

DEPARTMENT

OF

MARINE AND FISHERIES

BRING FOR THE

FISCAL YEAR ENDED 30TH JUNE,

1884.

---

Printed by Order of Parliament.

---

OTTAWA:

PRINTED BY MACLEAN, ROGER, & CO., WELLINGTON STREET.

1885.

To His Excellency the *Most Honourable Sir Henry Charles Keith Petty-Fitzmaurice, Marquess of Lansdowne, in the County of Somerset, Earl of Wycombe, of Chipping Wycombe, in the County of Bucks, Viscount Caln and Calnstone, in the County of Wilts, and Lord Wycombe, Baron of Chipping Wycombe, in the County of Bucks, in the Peerage of Great Britain; Earl of Kerry and Earl of Shelburne, Viscount Clanmaurice and Fitzmaurice, Baron of Kerry, Lixnaw and Dunkerron, in the Peerage of Ireland; Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George; Governor General of Canada, and Vice Admiral of the same, &c., &c., &c.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to submit herewith, for the information of Your Excellency and the Legislature of Canada, the Seventeenth Annual Report of the Department of Marine and Fisheries, and the financial statements connected therewith, being for the fiscal year ended 30th June, 1884.

I have the honour to be,

Your Excellency's most obedient servant,

A. W. McLELAN,

*Minister of Marine and Fisheries.*

DEPARTMENT OF MARINE AND FISHERIES,

REPORT  
OF THE  
DEPUTY MINISTER.

---

To the Honourable

ARCHIBALD WOODBURY McLELAN,  
Minister of Marine and Fisheries.

SIR,—I have the honor to report on the transactions of this Department for the fiscal year ended the 30th June last, and to give an account of a considerable portion of the business up to 31st December, 1884. One supplement will be issued with this Report, comprising the reports of the Chairmen of the Boards of Steamboat Inspection, and Examiners of Masters and Mates, the reports of the Toronto, Montreal, Quebec and Pictou Harbour Commissioners, the Pilotage Authorities, the Harbour Masters, the Shipping Masters, the Port Wardens and the Harbour Police of Montreal and Quebec, together with statements of wrecks and casualties, and list of rewards for saving life.

The total amount expended on the various branches of the Public Service administered by this Department, including the salaries of the establishment staff, during the fiscal year ended 30th June last, was \$1,257,723.58, while the total amount voted was \$1,274,709.56, which last named amount includes the Departmental salaries.

The whole number of persons engaged in the Outside Service of the Department at the close of the calendar year was 1,363.

The Lighthouse Service of the Dominion is divided as follows, viz:—The Ontario Division, embracing lights above Montreal; the Quebec Division, extending below Montreal and including the River and Gulf of St. Lawrence; the Nova Scotia Division; the New Brunswick Division; the Prince Edward Island Division and the British Columbia Division. The total number of light stations in the Dominion on the 31st December last was 507, and of lights shown, 597; the number of steam fog-whistles and automatic fog-horns 33, and the number of light-keepers, engineers of fog-whistles and other assistants, with crews of lightships, was 652.

The following is the number of light stations, the number of lights shown, of fog-whistles and of automatic fog-horns in the several Provinces in the Dominion at 31st December of each year, from 1868 to 1884, inclusive. In these numbers are 3 light stations on the coast of Newfoundland, maintained by the Dominion.

|                          | Light Stations. | Light-houses. | Fog-Whistles. | Automatic Fog-horns. |
|--------------------------|-----------------|---------------|---------------|----------------------|
| 31st December, 1868..... | 193             | 227           | 2             | .....                |

#### ONTARIO LIGHTHOUSE DIVISION.

This division includes the lighthouses and lightships in that part of the Province of Quebec lying between Montreal and the boundary line between the Provinces of Ontario and Quebec, as also all the lights and lightships in the Province of Ontario, embracing the lights on the Ottawa River, the St. Lawrence River above Montreal, the Thames River and Lakes Ontario, Simcoe, Erie and Huron, the Georgian Bay and Lake Superior.

The number of lights in the Ontario Division, inclusive of two in Manitoba, was 165. This number comprises lighthouses and light-beacons, lightships maintained by the Dominion, and one lightship maintained under contract by the Dominion. There are 216 buoys and 18 beacons.

The number of light-keepers in this division, paid directly by the Government, was 130, but in several cases assistants were employed by keepers, and paid by them out of the allowance made by the Government for that purpose.

The lights in this division, with the exception of those on the Ottawa River, were inspected during the months of July and August by Mr. Patrick Harty, the Superintendent of Lights, and supplied with the necessary stores, the steamer "Celtic"

being chartered for the purpose, for the sum of \$2,750. From the report received, it appears that the lighthouses are, on the whole, well attended to and their general condition satisfactory.

The following new lights have been established during the past season:—

A beacon light in Collingwood Harbour, on the Georgian Bay. The light is a fixed red dioptric, elevated 23 feet above water, and visible from all points of approach. The structure consists of a small pier, surmounted by a shed, painted white, and a mast on which the lantern is hoisted. It stands on the starboard side of the curved dredged channel, at its most south-westerly point, the light being intended to show the dredged channel, and to show only within the limits of the harbour. The sum of \$1,431.80 was expended in the construction of this light, as will be seen by reference to the accounts of the past year.

A lighthouse upon the extreme north-easterly point of Hope Island, in the Georgian Bay. A revolving white light is shown, attaining its greatest brilliancy every minute. It is elevated 54 feet above water mark, and should be visible 12 miles from all points of approach, except where interrupted by the trees on the island. The illuminating apparatus is catoptric. The building is of wood, painted white, and consists of a square tower 57 feet high from the ground to the vane on the lantern, with keeper's dwelling attached. The sum of \$1,864.08 was expended on this lighthouse, as will be seen by reference to the accounts of the past fiscal year, and further expenditure will be shown in the accounts of the current fiscal year.

A lighthouse on Mississauga Island, North Channel of Lake Huron. The light is situated on the south end of the island, is revolving white, attaining its greatest brilliancy every 45 seconds. It is elevated 53 feet above water mark, and should be visible 12 miles all around the horizon, except where interrupted by trees on northerly bearings. The illuminating apparatus is catoptric in character.

The building is of wood, painted white, and consists of a square tower, 50 feet high from the ground to the vane on the lantern, with keeper's dwelling attached. As will be seen by reference to the accounts, the sum of \$4,394.20 was expended on this light during the past fiscal year.

A lighthouse on Gravenhurst Narrows, Lake Simcoe. This, a small beacon, is situated on the south-east point of Denison's Island, at the northern entrance of Gravenhurst Narrows. It is a fixed white dioptric light, shown from a lantern hoisted on a mast 25 feet high, and is elevated 23 feet above water mark, and should be visible 10 miles from all points of approach. The sum of \$524.22 was expended on this light during the past fiscal year, as will be seen by reference to the accounts.

During the past season a contract was entered into with Mr. John Waddell, of Kingston, for the construction of lighthouses in the District of Algoma, at the following points, viz.: the North Sister Rock, the head of Wilson's Channel, and Shoal Point, west of Richard's Dock, all in the north channel of St. Mary's River,

and also for a lighthouse in the village of Manitowaning, and one at the extremity of Cape Robert, both on the Great Manitoulin Island. Considerable progress has been made with these works, and it is expected that the lighthouses will be completed and the lights shown on the opening of navigation next season. The contract price for these lighthouses, together with a dwelling for the light-keeper at North Sister Rock, and a wooden crib with beacon in Wilson's Channel, is \$9,023.

Reference was made in the report of last year to the suspension of the work of constructing the new pier and lighthouse at Colchester Reef, Lake Erie, owing to the destruction by storm of the iron caisson. The contractor, Mr. George Wilson, having abandoned the work, a contract was entered into with Mr. John E. Askwith, of New Edinburgh, for \$17,465, who has commenced operations, and expects to complete the work next season. A contract was entered into with Mr. F. B. Hackett, of Amherstburgh, to maintain a lightship on the reef during the season of navigation, for the sum of \$1,800. At the close of the season this lightship unfortunately filled and rolled over on being towed to winter quarters on the 26th November, and had to be abandoned. She has since been recovered.

During the past season tenders were invited for the construction of an engine house for a fog-horn on the Isle of Coves, Georgian Bay, and the contract was awarded to Mr. Henry Harmer, of Southampton, at \$850. One of the improved Neptune fog-horns will be placed at this station early next season. The horn was supplied by the Neptune Fog-Horn Company, of Quebec, at a cost of \$2,118.

A fog horn of similar description will also be placed next season at Gibraltar Point light station near Toronto. The contract for the necessary building has been awarded to Mr. Henry Harmer, at \$1,100.

Tenders were also invited last season for the erection of a lighthouse at Loyal Island, in the County of Bruce, Lake Huron, and the contract awarded to Messrs. John George and David Currie, of Port Elgin, at \$3,575. Considerable progress has been made with the erection of this lighthouse, and it is expected that the light will be shown early next season.

A contract was also entered into with the Rathbun Company, of Deseronto, for the erection of a lighthouse at that place, for the sum of \$437.49, and the lighthouse has been completed and the light will be shown on the opening of navigation next season.

Tenders have been invited for the erection of a lighthouse at Tobermory Harbour, in the north riding of Bruce, to replace the old building, from which a temporary light has been shown for some years past. Tobermory Harbour has been pronounced one of the best in the Georgian Bay, and it is important that a good light should be established.

Appropriations were made by Parliament at its last Session for the erection of lighthouses at Caribou Island, Lake Superior; Rainy River entrance, Lake of the

Woods; Victoria Island, Lake Superior, and the Upper Ottawa in the County of Pontiac; and tenders will be invited for these works as soon as the necessary plans and specifications have been prepared.

During the past season it was found necessary to renew the shed of the pole light at Cobourg, which had been washed away in a storm.

A new lantern was supplied during the past summer to the light at Point Peter, Lake Ontario, and a new revolving apparatus will shortly be sent to this station.

The new lighthouse on Swampy Island, off the mouth of Beren's River, Lake Winnipeg, to which reference was made in the report of last year, was put in operation on the 12th June last. The light is fixed white, elevated 34 feet above water, and should be visible 11 miles from all points of approach. The illuminating apparatus is dioptric of the sixth order. The building is of wood, painted white, and consists of a square tower 33 feet high, with dwelling attached. The sum of \$435.49 was expended on this lighthouse up to 30th June last, and further expenditure will be shown in the accounts of the present fiscal year.

The following changes have occurred in the list of keepers in this division, since the date of last report, viz. :—

By Order in Council of the 7th January last, Mr. Henry Darke was appointed keeper of the light at Muskoka or Fox Island, at a salary of \$250 per annum, in the room of Jeremiah Cole Darke, left the locality.

By Order in Council of the 15th February last, Mr. Richard Davis was appointed keeper of the lighthouse at Pigeon Island, at a salary of \$300 per annum, in the room of James Wm. Davis.

By Order in Council of the 9th April last, Mr. Robert Philip Boyd was appointed keeper of the lighthouse at Cole Shoal, at a salary of \$250 per annum, in the room of Erastus John Rowsome, resigned.

By Order in Council of the 19th April last, Mr. Joseph Lamondin was appointed keeper of the lighthouse at Byng Inlet, Georgian Bay, at a salary of \$250 per annum, in the room of James Milne, resigned,

By Order in Council of the 19th April last, Mr. Henry Scott was appointed keeper of the lighthouse at the Narrows, Lake Muskoka, at a salary of \$100 per annum. Mr. Scott having declined the appointment, Mr. David Schell was placed in temporary charge.

By Order in Council of the 10th July last, Mr. Neil McDonald was appointed keeper of the light at Mississauga Island, at a salary of \$300 per annum.

By Order in Council of the 3rd October last, Mr. Benjamin Jones was appointed keeper of the lighthouse at Manitowaning, Algoma, at a salary of \$150 per annum.

By Order in Council of 12th October last, Mr. H. E. Plunkett was appointed keeper of the lighthouse at Swampy Island, Lake Winnipeg, Manitoba, at a salary of \$350 per annum.

By Order in Council of the 19th October, Mr. Charles Tizard was appointed keeper of the lighthouse at Hope Island, at a salary of \$450 per annum.

By Order in Council of the 19th October last, Mr. Henry Joseph Cartier was appointed keeper of the lighthouse at River Thames, at a salary of \$425 per annum, in the room of Thomas Cartier, deceased.

By Order in Council of the 27th October last, Mr. John McKay was appointed keeper of the lighthouse at Lyal Island, at a salary of \$450 per annum.

By Order in Council of the 24th November last, Mr. Arthur K. Nesbitt was appointed keeper of the lighthouse at Cape Robert, Algoma, at a salary of \$350 per annum.

By Order in Council of the 24th November last, Mr. Evan Rains was appointed keeper of the lighthouse at Shoal Point, Algoma, at a salary of \$250 per annum.

By Departmental Letter of the 23rd February last, Mr. Godfrey Ouellette was appointed temporarily keeper of the light at Buckom's Point, Deschênes Lake, at a salary of \$100 per annum.

The total cost of maintaining the lights, light vessels, fog-bells, buoys and beacons in the Ontario Division, including the Manitoba lights and lightship for the last fiscal year was \$70,788.27, and the expenditure for construction of lights during the same period was \$18,447.34.

#### QUEBEC LIGHTHOUSE DIVISION.

This division comprises the lighthouses and lightships below Montreal, on the River St. Lawrence, and on the Richelieu River and Lake Memphremagog, as well as all the lighthouses, lightships, steam fog-whistles, buoys and beacons in the River and Gulf of St. Lawrence below Quebec, the Straits of Belle Isle, and on the north-west coast of Newfoundland. This important division is under the charge of Mr. J. U. Gregory, Agent of this Department at Quebec, who has also under his superintendence several of the Dominion steamers, the Quebec River Police Force and the Fisheries Protection Service.

At the close of navigation there were in this division 148 fixed and revolving lights; 8 lightships, three of which are supplied with steam fog-whistles; 7 steam fog-whistles or horns, 10 fog-guns, 91 buoys, 59 beacons, and 9 life canoes for service amongst the ice.

The light service between Montreal and Quebec, and in the River St. Lawrence between Quebec and Point des Monts, was performed during the past season by the steamer "Druid," under the superintendence of Mr. William Barbour, Inspector o

Lights for this division; and from Point des Monts to the Straits of Belle Isle by the steamer "Napoleon III.," also under the supervision of Mr. Barbour. A number of the light stations were also visited by the agent.

The following is a synopsis of the principal repairs and improvements effected at the lighthouse stations in this division during the past season.

*North of Half-way Point.*

Repairs and alterations have been made at this station, the distance between the lights and the difference between the heights increased to make the range more efficient.

*Ash and Bloody Islands.*

At the former island a breakwater has been built as a protection to the light, and at the latter a new crib has been built to replace that destroyed by the ice. These works, together with those of North of Half-way Point, were carried out under contract by Mr. James Sheridan, of Montreal, for the sum of \$1,940.

*Isle à la Bague.*

A new tower and pier were constructed at this station.

*Isle Ste. Thérèse.*

The two upper range lights at this station were removed during the past season, under a contract entered into with Mr. John Black, of Hull, for the sum of \$3,150. The removing involved the building of two piers to receive the light buildings. The back tower has been moved 700 feet from its former position, and the light shown from it on the pier is now 54 feet above the ordinary summer level of the river. The front range light has been removed from Isle Ste. Thérèse, and is now located upon a low islet further up stream, known as Isle aux Vaches. It is now distant 5,900 feet from the back light. The new tower is a small hexagonal wooden building, and stands upon a timber work pier, showing a light at an elevation of 29 feet above water.

*Isle de Grâce.*

At this station a new foundation was made for lighthouse.

*Isle à la Pierre.*

Damages by the ice to the tower and oil shed were duly repaired

*Grondines Range.*

The large tower at this station was supplied with a new lantern.

*L'Islet Richelieu.*

Tower at this station painted and the top tinned.

*Lotbinière.*

A new foundation supplied to the tower at this station.

*Belle Isle.*

The upper tower of this station repaired and the lower tower painted.

*Crane Island.*

A contract has been entered into with Mr. Miville Deschênes, of Rivière Ouelle, to build a new lighthouse, and also a dwelling house, at this station. Contract price for both, \$1,795. Considerable progress has been made with the lighthouse, and it is expected that both buildings will be completed early next season.

*Cape Bauld.*

The light and fog-whistle at this station were put in operation on the 15th August last, and the tower and outbuildings completed in October last. The amount expended on this lighthouse and fog-whistle, up to 30th June last, was \$8,675.77.

*Cape Norman.*

The tower and dwelling sheathed and clapboarded, and a wharf built for the better landing of supplies.

*Cape Ray*

Tower at this station re-clapboarded and put in good order.

*Kamouraska.*

A boat slip built at this station and other necessary repairs effected.

*Lower Traverse Lightship.*

Considerable repairs to engine and boiler effected before placed at station on opening of navigation.

*Matane.*

Owing to the action of the sea on the bank, it was found necessary, for the safety of the tower, to remove it further inland.

*Cape Chatte.*

The tower at this station was also removed from the edge of the cliff for safety.

*Point Rich.*

Extensive repairs made at this station to the lighthouse, and the building re-clapboarded and painted.

*South Point, Anticosti.*

A breakwater has been erected at this station, to protect the lighthouse from the inroads of the sea.

*South West Point, Anticosti.*

The tower re-clapboarded, repaired and painted.

*Grand River, Gaspé.*

The new lighthouse at this station, to which reference was made in the report of last year, is in course of erection, and it is expected that it will be completed early next season. The contract is being carried out by Mr. J. O. Boucher, for \$950.

It was deemed advisable during the past season to mark the dangerous shoal in the Traverse, Lower St. Lawrence, with one of the Pintsch gas and bell-buoys, which have been in use for some time past, both in the United Kingdom and the United States, and also to place another of these buoys on the Pilgrim Shoal. These buoys were delivered under contract at Quebec by the Pintsch Patent Lighting Company of London, complete in every respect and charged with compressed oil gas for 90 days' burning, for £750 sterling each. The buoys were placed at their stations on the 27th September last, but it was found necessary to withdraw them on the 15th October, owing to defects in the gas pipe, caused by breakage. Gas works for the manufacture of gas for these buoys are in course of erection at Quebec. The whole of the machinery and apparatus for these works, with high pressure store holder, was supplied under contract by the Pintsch Lighting Company at a cost of £700 sterling.

The following changes have taken place in the keepership of the lights in this division since the date of my last report, viz. :—

By Order in Council of the 24th March last, Mr. Thomas D. Bond was appointed keeper of the lighthouse on Plateau Rock, at a salary of \$350, in the room of Benjamin Asselin, resigned.

By Order in Council of the 1st April, Mr. Louis Marceau was appointed keeper of the St. Francis lights, east end Island of Orleans, at a salary of \$75 per annum, in the room of Joseph Marceau, resigned.

By Order in Council of the 3rd April last, Mr. Louis Boisvert was appointed keeper of the upper range lights at Grondines, at a salary of \$100 per annum, in the room of Epiphane Trottier, deceased.

By Order in Council of the 19th October last, Mr. E. H. Rennie was appointed keeper and engineer of the lighthouse and fog-whistle at Cape Ray, Nfld., at a salary of \$800 per annum, in the room of Robert Rennie, superannuated.

The total amount expended for the maintenance of lights, lightships, provision depôts, buoys and beacons, and fog-whistles in this division during the year ended 30th June last, amounted to \$117,248.78.

The sum of \$3,168.48 was expended on construction of lights during the same period.

#### NOVA SCOTIA LIGHTHOUSE DIVISION.

This division, in charge of Mr. H. W. Johnston, Agent of the Department for the Province, includes, at this date, 144 lighthouse, exhibiting 156 lights, 1 light vessel, 12 steam fog-alarms, 6 hand fog-alarm stations, 2 fog bells, 3 signal gun stations, 7 automatic signal buoys, 5 iron bell buoys, 71 iron can buoys, about 420 spar and other small buoys, 7 stationary beacons, 7 life boat stations, 3 humane establishments, 4 signal stations.

At the opening of navigation, the Government steamer "Newfield" was at once employed in placing in their respective positions the eastern coast buoys—whence she proceeded to Sable Island with supplies. She was subsequently employed in supplying the lights in this division, and in repairing the telegraph cable between Magdalen Islands and Cape North.

The work of coaling the fog-alarm stations was performed by schooners chartered for the purpose. The coal for the Bay of Fundy and most of the western stations was procured from the Joggins mines, that for the eastern stations from the Gowrie mines, and that for Sambro and Shelburne, from the Acadia mines.

The light stations were inspected by Mr. C. A. Hutchins, the Inspector of Lights.

The steam fog-alarm stations were also visited by the inspector, accompanied by Mr. Warren, the chief engineer of the "Newfield," who made a careful examination of the machinery and boilers.

#### *Abbot Harbour.*

New lights put in operation this year: Abbot Harbour, on the south extremity of Abbot Island, Yarmouth County, to guide into Abbot Harbour. The light is fixed white dioptric, exhibited from a lantern hoisted on a mast. It is elevated 40 feet above high water mark, and should be visible eight miles from all points of approach.

#### *Advocate Harbour, Cumberland County.*

A new lighthouse was erected this year on the north-west side of the entrance to the harbour, under contract, by Mr. Sydney Smith, for the sum of \$1,000, and was put in operation on the 1st August. The light is fixed red, elevated 36 feet above high water mark, and should be visible all around the horizon, a distance of seven miles. The illuminating apparatus is dioptric of the 6th order. The building is a square wooden tower, 27 feet high, painted white, and stands on a small crib on the bar. The light is intended for a coast light, and to indicate the entrance to the harbour over the bar.

---

---

*Lennox Passage and St. Peter's Inlet Beacon Lights.*

The yearly increasing traffic since the opening of the St. Peter's Canal, and especially the increasing number of steamers carrying passengers and mails between Port Mulgrave and Sydney through the canal, having rendered the establishment of lights a necessity for the safe navigation of this route at night, the erection of pole lights to mark the principal turning points was ordered. This work was completed in the early part of the summer, and the lights were put in operation on the 5th August.

Each light is fixed red, shown from a small dioptric lantern, hoisted on a mast 25 feet high, with a shed at its base painted white, and should be visible five miles. They are located as follows in Lennox Passage: One on Glasgow Point, one on Seal Island, or Dog Island, one on Grand Digue Beach. In St. Peter's Inlet: One on Marjorie's Isle, or Gooseberry Island (off Sandy's Point), one on S. E. point of Beaver Island, one on west point of Freestone or Gregory Island.

At Seal Island and Freestone Island, respectively, there has been erected, in addition, a shelter shed 12 x 16 feet, for the accommodation of the keeper, as these two stations are remote from habitations.

*McNeil's Beach.*

A beacon light similar to those placed in Lennox passage has been erected on McNeil's beach, on the north side of Boularderie Island, in Victoria County, Cape Breton, and was put in operation on 5th August last. The light, which is fixed red, is shown from a small dioptric lantern, hoisted on a pole 25 feet high, with a shed painted white at its base. The light is elevated 33 feet above high water mark, and should be visible 8 miles from all points seaward. The light is intended for the guidance of vessels navigating the Great Bras d'Or.

*Whycocomagh.*

A pole light has been erected on Fraser's Point, in St. Patrick's Channel. Owing to a difficulty in obtaining a deed of the land from the owner, this light will not be put in operation till next spring. The light, which is fixed red, is shown from a small dioptric lantern, hoisted on a pole 25 feet high, with a shed painted white at its base. The light is elevated 31 feet above high water mark, and should be seen 7 miles. It is intended for the guidance of vessels navigating the head waters of St. Patrick's Channel as far as Whycocomagh.

*Piper's Cove.*

A lighthouse has been erected on the western end of Derby Point, near Piper's Cove, in the Grand Narrows, Bras d'Or Lake, in the County of Cape Breton, and was put in operation on the 1st October. This lighthouse was erected, together with an oil store, under contract, by Mr. James Macdougall, for the sum of \$718.

The light is fixed red, elevated 77 feet above high water mark, and visible 11 miles from all points seaward. The illuminating apparatus is dioptric of the sixth order. The tower is a square wooden building, 38 feet high from the ground to the lantern vane, and is painted white. This light is to guide vessels to the Grand Narrows, on Bara Strait from the westward.

*Mabou Range Lights.*

Two range lights were erected at the entrance to Mabou Harbour, in the County of Inverness, Cape Breton, and were put in operation on the 15th July. Each of them is shown from a small dioptric lantern, hoisted on a mast, with a shed painted white at its base. The outer or front light is fixed white, and stands on the outer end of the breakwater pier, on the south-west side of the dredged channel. It is elevated 25 feet above high water mark, and should be visible 9 miles from all points seaward.

The inner light is fixed red, and is distant 3,000 feet from the front one. It stands on the shore at McFayden's Wharf, is elevated 30 feet above water, and should be visible 7 miles. The two lights in range lead directly into the harbour, through the dredged channel, past the pier or breakwater.

*Maitland or Green Cove.*

A beacon light has been established on the outer end of the pier or breakwater at Maitland, on the south side of St. Mary's Bay, in the County of Yarmouth, N.S., for the guidance of vessels and fishing boats seeking the harbour. The light is fixed white, shown from a dioptric lantern, hoisted on a mast 25 feet high, with a shed painted white at its base, and is visible 9 miles from all points seaward. This light was put in operation on the 15th August.

During the past year a steam fog alarm has been erected by Mr. Henry Watt, of Halifax, on McNutt's Island, Shelburne County, near the lighthouse, and was put in operation on the 15th March last.

The alarm is operated by air through a reed trumpet known as the "Neptune fog-horn," which, in thick weather sounds a blast of 10 seconds' duration with intervals of 110 seconds between the blasts. The building also contains a brick tank of 6,400 gallons capacity, into which the water is pumped through pipes leading from a reservoir built about 100 yards from the engine room. A coal shed of 80 tons capacity adjoins the building. An additional coal shed has also been erected at Windlass Cove, about three-fourths of a mile from the station, and a tramway and winch have been fitted, for the purpose of conveying coal and supplies from the beach to the top of the bank, where they are provisionally stored, and hauled to the station when opportunity offers over a new road which has been made during the past year from the Cove to the lighthouse.

During the past year a fog-bell has been attached to the light station on Bunker's Island in Yarmouth Harbour.

*Pilley's Mechanical Hand Fog Alarms.*

One of the above very effective hand fog-alarms has been placed at each of the following light stations, viz.: Jerome Point, Egg Island, Barrington Lightship, Pease's Island, Gull Rock and Cape North.

Repairs and improvements have been made at the different light stations as follows, viz. :—

*Jeddore Rock.*

The stone wall foundation pointed with cement all around, and the landing slip-carried away last fall during the heavy gales repaired.

*Sheet Rock.*

A boat house built during the past season.

*Beaver Island.*

A boat slip built.

*Country Harbour.*

The stone foundation of this lighthouse was taken down and rebuilt with cement mortar, the wall extended farther out all around, in order that the sill might rest more in the centre of the wall. A water table was provided to shed the rainwater clear of the wall. The building was stripped, all decayed wood removed and replaced with sound wood and the building shingled. An addition was also made to the dwelling for the accommodation of the keeper and his family. A new set of lamps, with oil fountains, was likewise fitted up.

*Cranberry Island.*

The boat slip, which had been destroyed by the ice and sea last winter, has been replaced and more securely fastened with iron bolts to the solid rock.

*Pictou Island.*

A new foundation wall under kitchen has been built, and the foundation wall under the tower pointed with cement.

*Amet Island.*

The foundation stone wall surrounding the Island having been very much undermined and fallen away in places, it was deemed advisable to have the wall repaired, and the whole front surrounded with a wooden cribwork, properly secured and ballasted. The work has been performed in a most thorough and substantial manner, and it is hoped will withstand the action of the heavy seas and ice which have hitherto been so destructive to this station.

*Mullen's Point, Wallace.*

The stone wall foundation has been repaired, and galvanized iron rope guys set up in order to steady the building, which was found to shake very much in heavy gales.

Oil stores have been erected at Kidston Island, Grand Narrows and Point Aconi.

*St. Esprit.*

A small breastwork, built of logs filled with stone ballast has been built at this station for the protection of the landing slip.

*Battery Point, Lunenburg.*

This light, being a harbour light, has been changed from a fixed white to a fixed red, in order to distinguish it from shore lights. The change came into operation 1st August.

*Little Hope.*

Iron stays have been fitted, securing the lantern which was found to vibrate dangerously in heavy storms.

*Argyle.*

A road from the landing to the lighthouse, a distance of 400 yards, has been made by the keeper, at a cost of \$28.

*Yarmouth, Cape Fourchu.*

Four sides of the tower were stripped and re-shingled, and also the roof and south end of the dwelling house.

*Church Point.*

The upper part of dwelling never having been finished when the building was erected, this work has been done and two bedrooms partitioned off and plastered, thus affording the necessary additional accommodation for the keeper's family.

*Meteghan.*

The lighthouse has been moved out to the end of the new addition made to the pier last year, a distance of about 80 feet.

Tenders were invited during the past season for the construction of a break-water at Hobson's Nose, extending from the slip to the embankment, a distance of 75 feet. Mr. Abraham Zinck has agreed to do the work for the sum of \$285.

*Parrsboro.*

Since the last report, considerable repairs have been effected at this station. The dwelling and outbuildings have been re-shingled, the deck around lantern repaired and covered with zinc, and the verandah and steps around dwelling and tower

repaired. The western end of breakwater, extending from the lighthouse to the mainland, and which forms the protection to the harbour on that side, has been considerably damaged by storms within the past year, and will require to be rebuilt in a more substantial manner.

*Sable Island.*

Extensive repairs have been made this year to the east end lighthouse at Sable Island. The keeper having reported the tower to be leaking at the sides, and the discovery of decayed places in the timbers and planking, a more thorough examination was made in June last by the inspector, accompanied by Mr. Jacob Bowser, builder, of Halifax. The result was such as to render the stripping of the outside of the building expedient, in order that all the decayed parts might be made good. Accordingly men and materials were sent down, and the work of repairs performed under the superintendence of Mr. Bowser. After having finished the work at the east end light, Mr. Bowser effected necessary repairs at the other stations on the Island.

The fog-alarm stations also received necessary repairs. At Scatterie, the centre joint of boiler was repaired by placing soft patches over seams and rivets.

At Sambro, the condensing boiler, which leaked, was chipped and caulked and soft patched where required. The operating boiler was covered with felt and canvas.

At Cross Island, a set of new tubes was furnished and put in boiler, and other minor repairs effected.

At Cape Sable, a new set of tubes was furnished to boiler.

At Cape Forchu, an extension to coal shed has been built, in order to provide necessary inside storage accommodation for the coals required at this station. The stone wall at back of engine room and reservoir, which had been deranged by the sea during the gales of last winter, was also repaired. An iron band has been fitted around the reservoir as an additional security.

Repairs to engine and boiler have also been made.

A Judson governor has been fitted to engine to regulate the blasts.

At Brier Island, 600 feet of iron pipe was furnished, for the purpose of conveying the water from tank to whistle house.

At Point Prim, a patch on boiler renewed, seams chipped and caulked and legs repaired.

Tenders have been invited for the erection of a lighthouse, with keeper's dwelling attached, on Westhaver's Point, Hubbard's Cove, Lunenburg County, for the guidance of vessels navigating St. Margaret's Bay and seeking an anchorage in Hubbard's Cove, and the contract has been awarded to Mr. C. Albert Smith for the sum of \$1,435.

Tenders have also been invited for the erection of a lighthouse at Margaree Harbour, in the County of Inverness, Cape Breton, and one at Shafner's Point, on the north shore of the Annapolis River. The contract at Margaree Harbour has been awarded to Mr. Duncan McFarlane, for the sum of \$254, and that at Shafner's Point to Mr. John Wagstaff for, \$900.

It is also proposed to erect a lighthouse during the next year at Cape Sharp, in Cumberland County, and a pole light on Shipley's Head, or Tenant Point, for the purpose of guiding vessels seeking an anchorage in Terence Bay, Halifax County, west.

The following changes have occurred in the keepership, &c., of the lights in this division, since the date of my last report, viz. :—

By Order in Council of the 18th February last, Mr. C. A. Hutchins was appointed Inspector of Lights, at a salary of \$1,200 per annum, in the room of the late Lieut. Browne, R. N.

By Order in Council of the 15th February last, Mr. Uriah Young was appointed keeper of the lighthouse at Chester, at a salary of \$400, in the room of Mr. Edward Young, deceased.

By Order in Council of the 15th February last, Mr. Wm. Whalen was appointed keeper of the lighthouse at Quaker Island, at a salary of \$300 per annum.

By Order in Council of the 10th March last, Mr. John Prescott Mosher has been appointed keeper of the lighthouse at Burntcoat, at a salary of \$250 per annum, in room of Mr. Wm. Falkner, deceased.

By Order in Council of the 19th April last, Mr. Joseph Edward Bancroft has been appointed keeper of the lighthouse on Brier Island, at a salary of \$400 per annum, in the room of Mr. Joseph Suthern, deceased.

By Order in Council of the 19th April last, Mr. Moses G. Scott has been appointed keeper of the lighthouse at Guysboro', at a salary of \$220 per annum, in the room of Mr. Godfrey S. Peart, deceased.

By Order in Council of the 8th May last, Mr. George Sterling Livingstone has been appointed keeper of the new lighthouse at Advocate Harbour, at a salary of \$150 per annum.

By Order in Council of the 27th June last, Mr. John McFarlane has been appointed keeper of the lighthouse at Margaree or Sea Wolf Island, at a salary of \$400 per annum, in the room of Mr. Farquhar McRae, resigned.

By Order in Council of the 29th August last, Mr. Edward Alexander McNeil has been appointed keeper of the new lighthouse at Piper's Cove, at a salary of \$100 per annum.

By Order in Council of the 11th September last, Mr. Murdoch Matheson has been appointed keeper of the pole light at Whycomagh, at a salary of \$60 per annum.

By Departmental letter of the 31st May last, Mr. Allan McLean was appointed keeper of the Mabou range lights, at a salary of \$50 per annum.

By Departmental letter of the 31st May last, Mr. John McDonald was appointed keeper of one of Mabou range lights, at a salary of \$50 per annum.

By Departmental letter of the 4th July last, Mr. Laughlin Morrison has been appointed keeper of the pole light at Freestone Island, at a salary of \$150 per annum.

By Departmental letter of the 4th July last, Mr. Daniel Clough has been appointed keeper of the pole light at Grand Digue, at a salary \$60 per annum.

By Departmental letter of the 4th July last, Mr. Charles Forest has been appointed keeper of the pole light at Glasgow Point, at a salary of \$60 per annum.

By Departmental letter of the 4th July last, Mr. Norman McDonald has been appointed keeper of the pole light at Marjorie's Isle, at a salary of \$80 per annum.

By Departmental letter of the 4th July last, Mr. Simon Joyce has been appointed keeper of the pole light at Seal Island, at a salary of \$80 per annum.

By Departmental letter of the 4th July last, Mr. James D. Corbett has been appointed keeper of the pole light at South Beaver Island, at a salary of \$80 per annum.

Mr. Lauchlin McNeill was placed in charge of the light on McNeill's Beach, from the 6th August.

The total cost of maintenance of the lights, steam fog-whistles, &c., in the Province of Nova Scotia, including humane establishments at Sable Island, St. Paul and Scatterie, for the last fiscal year, amounted to \$141,907.53, and the amount expended during the same period on construction of lights was \$12,489.35.

#### NEW BRUNSWICK LIGHTHOUSE DIVISION.

This division comprises all the lighthouses, fogwhistles, buoys and beacons on the coasts and rivers of the Province of New Brunswick, and is under the charge of Mr. J. H. Harding, Agent of this Department at St. John, N. B. In this division there were, at the close of navigation, 99 light-houses, including 2 light-ships, and 12 fog-whistles, under the charge of 82 light-keepers and engineers.

During the past year new lights have been established as follows:—

A beacon light at Little Belledune Point, in the Bay des Chaleurs, in the County of Restigouche. A fixed white dioptric light is shown, elevated 38 feet above

---

high water mark and visible 11 miles from all points seaward. The lantern is hoisted on a mast 28 feet high, which has a white shed at its base.

A beacon light on the public wharf known as Palmer's Landing on the River St. John, King's County. This is a fixed white light shown from a tubular lantern hoisted on a mast. It is elevated 37 feet above high water and should be visible for a distance of five miles. It is intended to show the position of the end of the pier and to guide through the channel of the Belle Isle Bay. The mast 25 feet high is set back 35 feet from the front of the pier and has a shed painted white at its base.

A fixed red dioptric light on the Lime Kiln Bank, on the north side of the Miramichi River, below the town of Newcastle, in the County of Northumberland. This light is elevated 87 feet above high water mark and should be visible 9 miles. The building is a square wooden tower, 23 feet high from ground to top of roof, painted white with red roof.

A fixed red dioptric light on the south side of the Lower Jemseg entrance, on the River St. John, in Queen's County. This light is shown from a lantern hoisted on a mast and is elevated 34 feet above the ordinary level of water and should be visible 3 miles. The mast is 21 feet high and at its base is a shed painted white. It stands upon a timber pier built 30 feet back from the water's edge. This light is intended to guide vessels navigating the River St. John through the channel at the entrance to the Jemseg, and is a short distance above No Man's Friend light.

A beacon light on the wharf at Williams' Landing on the south-east side of the River St. John, in King's County. This light is fixed white, shown from a tubular lantern hoisted on a mast, and is elevated 30 feet above the ordinary level of the river, and should be visible from all points of approach 10 miles. The mast is set back 42 feet from the front of the wharf. The light is intended to show the position of the end of the wharf and to guide up and down the Long Reach.

During the past season tenders were invited for the construction of a fog alarm building and engineer's dwelling at Martin Head, on the north shore of the Bay of Fundy, in the County of St. John, and the contract awarded to Mr. Thomas B. Carson, of Quaco, at \$3,330. The work is in progress at present, and will be completed next spring. An improved Champion fog horn has been procured for this station, at a cost of \$2,169.60.

The lighthouse on Mulholland's Point, on the southern end of Campobello Island, opposite the Lubec Narrows, has lately been completed and the light will shortly be exhibited. The contract for this lighthouse was awarded to Mr. Angus Fisher, of St. George, at \$790.

Tenders were also invited for a new dwelling for the engineer of the fog alarm at Head Harbour, on the Island of Campobello, Bay of Fundy, and the contract awarded to Mr. Angus Fisher, at \$1,100. This work is almost completed.

In addition to ordinary maintenance, the following repairs and improvements have been effected during the past year:—

*Beacon Light, St. John Harbour.*

The top work being badly decayed, it was found necessary to take down the top of the block to high water mark and rebuild it. This has been carried out at considerable cost.

*Cape Enrage Fog Alarm.*

The water tank at this station and engine house were repaired during the past season.

*East Head Musquash.*

The lighthouse at this station was painted and repaired.

*Grindstone Island.*

The fog-trumpet and machinery were thoroughly overhauled and repaired.

*Gannet Rock Light Station.*

Extensive repairs were carried out. The wharf on the north side was rebuilt with heavy timber and a better landing arranged; a large derrick was built on the wharf and an iron derrick erected on the east side to discharge supplies. An iron frame for the house of refuge was also erected and the foundation prepared.

*Head Harbour.*

A new boiler was supplied for the fog-alarm and considerable repairs effected at the light station.

*Machias Seal Island.*

Boiler of the fog-whistle repaired and new lamp supplied to the towers, which have added largely to the efficiency of the light.

*McMann's Point.*

New sills and flooring supplied to lighthouse.

*Oromocto Shoals.*

A new lantern erected and foundations of lighthouse repaired and strengthened.

*Point Lepreau.*

A new lantern and lighting apparatus supplied to this station and a new boiler for the fog-whistle. Complaint has been made that the fog-whistle is misleading, owing to its position, and it is proposed, next season, to remove it to the extreme end of the point. An automatic buoy has been placed off this point, in the interests of navigation.

*Quaco.*

A block has been built at this station to facilitate the landing of supplies.

*Swallow Tail.*

Lighthouse repaired, new roof placed on dwelling, buildings painted and brick tank built under dwelling.

*Southern Wolf.*

A derrick and landing platform erected at this station for landing supplies.

*North Head Grand Manan.*

Considerable improvements effected at this station. A new boiler supplied for fog-alarm, engine house enlarged and lined inside with brick, the two boilers connected, the chimney lengthened and new whistles supplied to the boilers.

*Partridge Island.*

Extensive improvements at this station in connection with placing a new boiler, lighthouse painted and lantern repaired.

*Preston's Beach.*

New lanterns supplied the beacon lights and repairs and painting effected.

*Escuminac Point.*

Considerable repairs made to the road leading over the barren to the lighthouse.

*Bay du Vin.*

A small dwelling erected at this station, at a cost of \$300.

*Middle Island.*

This station thoroughly repaired and painted.

*Neguac Gully.*

A dwelling house for keeper erected at this station.

*Tabusintac.*

The building repaired and painted during the past year.

*Dalhousie Beacons.*

Owing to the erection of a freight shed by the railway authorities, it has been found necessary to remove and add to the height of the beacons.

*Pokemouche.*

A beacon light, to range with the main light, was erected during past season.

An appropriation was made by Parliament, at its late Session, for the erection of a light at Clifton breakwater, in the County of Gloucester. Tenders have recently been invited, and the contract awarded to Mr. Richard Peters, at \$620.

The bell buoy moored off Partridge Island, which has done good service for many years, has been rebuilt and put in efficient condition.

The following changes have occurred in the keepership of the lights in this division since the date of my last report, viz. :—

By Order in Council of the 21st June last, Mr. Henry Bélonie Robichaud was appointed keeper of the Buctouche range lights, at a salary of \$150 per annum, in the room of Mr. Thadée B. Robichaud, resigned.

By Order in Council of the 21st June last, Mr. Beverley Emerson Palmer was appointed keeper of the lighthouse at Palmer's Point, at a salary of \$30 per annum.

By Order in Council of the 21st June last, Mr. Wm. Roherty was appointed keeper of the Belledune River light, at a salary of \$100 per annum.

By Order in Council of the 30th June last, Mr. Wm. Merry was appointed keeper of the lighthouse at Newcastle, at a salary of \$150 per annum.

By Order in Council of the 29th August last, Mr. George W. Thomas was appointed keeper of the lighthouse at Point Lepreau, at a salary of \$400 per annum in the room of Mr. George Thomas, deceased.

By Order in Council of the 24th November last, Mr. George Nevers was appointed keeper of the lighthouse at Jemseg, at a salary of \$80 per annum.

By Order in Council of the 24th November last, Mr. George Adie Briggs was appointed engineer of the fog-alarm at Martin Head, at a salary of \$400 per annum.

By Order in Council of the 25th November last, Mr. Robert C. Williams was appointed keeper of the light at Williams' Wharf, at a salary of \$80 per annum.

By Order in Council of the 25th November last, Mr. Charles Brown was appointed keeper of the lighthouse at Quaco, at a salary of \$400 per annum, in the room of Mr. Wm. Love, superannuated.

The total cost of maintaining the lights, fog whistles, buoys and beacons, in the Province of New Brunswick, for the fiscal year, amounted to \$86,670.70, and the amount expended during the same period on construction of lights was \$2,868.70.

#### PRINCE EDWARD ISLAND LIGHTHOUSE DIVISION.

This division is under the charge of Mr. Artemas Lord, who is Agent of the Department at Charlottetown. From the report received, there were in this division, at the close of navigation, 44 lights under the charge of 34 keepers. The majority of these lights being situated on prominent headlands, serve the general purposes of navigation. The remainder are harbour lights, erected chiefly in the interests of fishermen.

The lighthouse at Cape Egmont, to which reference was made in the report of last year, was completed and put in operation in September last. The lighthouse is situated on the extreme point of the Cape, 100 feet from its south and west banks. The light is fixed red [catoptric, placed in an octagonal iron lantern. The centre of the light has an elevation of 72 feet above high water, and should be visible in clear weather 10 miles from all points seaward. The buildings consist of a square white tower, with cottage attached, and an oil house distant about 50 feet. The sum of \$1,585.17 was expended on this lighthouse during the past fiscal year, as will be seen by reference to the accounts.

During the past season the range lights at the entrance to Savage Harbour, in King's County, on the north coast of the Island, to which reference has been made in previous reports, were completed and put in operation. They are shown from fixed white dioptric lanterns, hoisted on poles, and should be visible 5 miles in the line of range. The outer light stands near the water's edge on the inner shore of the harbour, and is elevated 22 feet above high water, The inner light stands 330 feet distant from the outer, and is elevated 30 feet above high water.

During the past winter the lighthouse on the west end of St. Peter's Island, in Hillsborough Bay, on the west side of the entrance to Charlottetown Harbour, was removed and placed on the south side of the Island, about a mile east by south from the old site. On the opening of navigation next season, it is proposed to change the catoptric apparatus to a sixth order dioptric, to show a fixed red light. The light will be 70 feet above high water, and should be visible 10 miles.

The lighthouse at North Rustico was also removed during last winter 510 feet from its former site on the middle of the beach to the north side of the entrance to the harbour. The red light shown from a window below the main light has been discontinued and replaced by a fixed red dioptric light hoisted upon a mast 225 feet from the main light. The old upper light shown from the light building has become the back light of a range, and shows a fixed white light, as heretofore. It is elevated about 40 feet above high water and is visible 8 miles. The front range is elevated 22 feet above high water, and is visible 5 miles.

During the past year it was found necessary to erect a breakwater for the protection of the lighthouse lately established at Indian Point, in Summerside Harbour. The work was satisfactorily carried out under contract by Mr. Ronald Campbell, at a cost of \$3,950.

During the past year a brush and stone foundation has been built under contract at Cove Head, in Queen's County, and extensive repairs have been carried out at Sea Cow Head and Blockhouse Point stations, and the lighting apparatus at North Cape, West Point and Fish Island stations greatly improved.

An appropriation was made by Parliament, at its last Session, for the erection of a fog-alarm at the important light station at East Point, and it is probable that this improvement will be effected next season.

The following changes have occurred in the keepership of the lights in this division since the date of last report, viz.:—

By Order in Council of the 21st July last, Mr. Bruno Perry was appointed keeper of the light at Cape Egmont, at a salary of \$200 per annum.

By Order in Council of the 9th August last, Mr. Charles McAdam was appointed keeper of the lighthouse at Savage Harbour, at a salary of \$100 per annum.

By Order in Council of the 4th September last, Mr. Augustin McDonald was appointed keeper of the lighthouse at Savage Harbour, at a salary of \$100 per annum, Mr. Charles McAdam having declined the appointment.

The total cost of maintaining the lights in the Province of Prince Edward Island for the fiscal year was \$19,059.62, and the expenditure for construction was \$2,158.60.

#### BRITISH COLUMBIA LIGHTHOUSE DIVISION.

This division is under the charge of Mr. Frederick Revely, agent of this Department at Victoria. There are seven lighthouses in this Province and one fog whistle under the charge of seven keepers, who provide the necessary assistants.

The new lighthouse of North Sand Heads of the Fraser River, to which reference was made in the report of last year, was completed and put in operation in May last, and the lightship heretofore maintained at the mouth of the river withdrawn. A fixed white dioptric light of the third order is shown at an elevation of 52 feet above high water, and should be visible 12 miles all around the horizon. The building consists of a hexagonal wooden tower, 49 feet high from its base to the vane on the lantern, supported above water on an iron pile foundation. The light, besides serving as a general coast light, indicates the entrance to the channel of the Fraser River through the Sand Heads. A fog-bell attached to the building is sounded during thick and foggy weather. The sum of \$9,754 was expended on this lighthouse during the past fiscal year, as will be seen by reference to the accounts.

During the past year the water tank, tramway and woodshed at Cape Beale station were rebuilt and the machinery repaired. A brick chimney was also erected at Race Rocks, for the purposes of the fog-whistle, and some necessary repairs effected.

The following changes have occurred in the keepership of the lights in this division since date of last report, viz.:—

By Order in Council of the 19th April last, Mr. Joseph Dare was appointed keeper of the lighthouse at Figgard, at a salary of \$500 per annum, in the room of Mr. Henry Cogan, resigned.

By Order in Council of the 21st July last, Mr. Henry Georgeson was appointed keeper of Plumper Pass lighthouse, at a salary of \$500 per annum.

By Order in Council of the 22nd April last, Mr. John Sproat was appointed keeper of the lighthouse at Sand Heads, Fraser River, at a salary of \$800 per annum. Mr. Sproat having declined the appointment, the light was placed in temporary charge of Mr. Hugh H. Fraser, who, together with his assistant, Mr. Frederick Williams, was unfortunately drowned.

#### OIL.

A contract was entered into last February with the Imperial Oil Company, of London, Ont., for the supply of the oil required for the purposes of the lights, at the following rates, viz. : 22½ cents per gallon delivered at Halifax and St. John; 22 cents delivered at Quebec, 21 cents at Montreal, and 20 cents delivered at Hamilton and Goderich. The oil is required to be of the best quality of double distilled, standard white, extra refined petroleum, free from acid or other impurities; to weigh, at 62° Fahr., not less than 7.85 lbs., nor more than 8.02 lbs. per gallon; to withstand a flash test of 115° Fahr.; and in all other respects to comply with the provisions of the Petroleum Inspection Act of 1880.

The quantity of oil supplied to the lights above Montreal during the past fiscal year was 19,001 gallons; to the lights in the Quebec district, 22,176 gallons; to the lights in the Nova Scotia district, 35,117 gallons; to the lights in the New Brunswick district, 13,182 gallons; and to the lights in the Prince Edward Island district, 5,265 gallons—making, in all, 94,741 gallons.

#### DOMINION STEAMERS.

The steamers under the control of this Department consist of the screw steamer "Napoleon III.," the "Druid," paddle wheel; the "Newfield," screw; the "Sir James Douglas," screw; the "Northern Light," screw; the "Lansdowne," screw; the "La Canadienne," now transferred to the Department of Fisheries; and the small steam launch "Dolphin," employed at Quebec in connection with the river police service.

Reference was made, in the report of last year, to the loss of the new steamer "Princess Louise," near Point Prim, a few days after being launched, while being towed to Halifax. Tenders for the construction of another vessel were duly invited, and the contract awarded to Mr. Jotham O'Brien, of Maccan, N.S., for the sum of \$34,300. The engines and boilers were supplied, under contract, by Messrs. Rankin and Blackmore, of Greenock, Scotland, for the steamer "Princess Louise," at £4,760 sterling. The vessel was completed, to the satisfaction of the Department, and launched on the 4th November last, and has since been employed in the lighthouse and coast service of Nova Scotia, as the "Newfield" has been laid up for repairs. The

dimensions of this vessel are as follows: length, 188·6 feet; breadth, 32·1 feet; depth, 15·8 feet. Gross tonnage, 680·31 tons, and registered tonnage, 462·62 tons.

The steamer "Napoleon III." was employed during the past season in supplying the lights in the lower St. Lawrence, and made three trips for this purpose, one in June, another in July and August, and another in October. She also supplied the lights on the north shore of New Brunswick; and at the close of navigation was employed for a short season as a lightship in the Traverse.

The steamer "Druid" was employed in supplying the lights between Quebec and Montreal, and some of the lights between Quebec and the Bay des Chaleurs, and in attending to the buoy service in the upper and lower St. Lawrence.

This vessel is old, and requires new boilers and engines, and also extensive repairs to her hull, to put her in good condition, and the question of repairs is under consideration.

The steamer "Newfield" was employed as usual, during the past season, in attending the buoy and light service in Nova Scotia, and also in serving lights in the Bay of Fundy, New Brunswick. She was also employed in repairing the telegraph cable between Magdalen Islands and Cape North, and in assisting in saving cargo of SS. "Amsterdam," wrecked at Sable Island.

This vessel is at present undergoing extensive repairs. A new boiler is being supplied, under contract, by Mr. John Patterson, of Halifax, at \$5,480.

The steamer "Sir James Douglas," stationed at Victoria, B.C., was employed in attending light stations, buoys and beacons, and occasionally in special service for other Departments. She was also employed in laying the Clover Point and Dun-geness cable.

The "Northern Light" is employed in maintaining winter communication between Prince Edward Island and the mainland during the winter season. She was employed from the 2nd November, 1883, in performing the usual mail service, owing to the withdrawal of the boats of the Prince Edward Island Steam Navigation Company, and made three trips a week from Charlottetown to Pictou, until the 17th December, 1883, when she began the winter service between Georgetown and Pictou. Forty-two round trips were made from 2nd November, 1883, to 16th January, 1884, when obliged to discontinue owing to the ice. On the 16th March she succeeded in breaking out of Georgetown Harbour, and continued to make regular trips up to the 23rd May, when her services were no longer required. In July last it was found necessary to place her on the marine slip at Pictou for repairs. The earnings of this vessel for the last fiscal year amounted to \$6,206.10.

The amount expended during the fiscal year ended 30th June last, as will be seen by reference to Appendix No. 9, for the maintenance of "Napoleon III." was \$26,384.42, of the "Druid" \$16,634.71, of the "Newfield" \$25,726.60, of the "Sir

James Douglas" \$16,111.83, of the "Northern Light" \$19,539.52, and of the "La Canadienne" \$19,935.53,—making a total expenditure of \$124,332.61.

#### HARBOUR POLICE.

A police force has been established for a number of years past at the harbours of Montreal and Quebec, for the purpose of keeping order among the shipping and restraining crimping, and a tax of 3 cents per ton for its support was levied, under the provisions of the Act 31 Vic., chap. 62, on all vessels arriving at these ports, vessels of 100 tons and under being required to pay the tax once in each year, and vessels of more than 100 tons twice in each year. This Act was repealed by the Act 45 Vic., chap. 48, which provided for the establishment of the force at Montreal and Quebec, and the appointment of superintendents and constables. The duty, which remains as under the former Act, is required to be levied on all vessels, whether sea-going or inland, whether entering at Quebec or Montreal.

##### *Quebec.*

The River Police Force at Quebec, under charge of Mr. B. Trudel, was sworn in for duty, as customary, on 1st May last, and constituted as follows, viz.:—The Chief Constable, who is also Shipping Master, at a salary of \$1,500 for the joint offices; a Deputy Chief Constable, at \$2.40 per diem; five Coxswains, each at \$1.90 per diem; twenty-six Constables, at 1.50 per diem, and two Engineers, at \$50 each per month; making in all thirty-five.

From the statements appended to the annual report of the Chief, which appear in the Supplement to this Report, it will be seen that 577 arrests were made by the force during the past season at the port of Quebec, of which 181 were for desertion, and 1,381 seamen received care and assistance from the force.

The total amount expended in connection with the maintenance of the Quebec River Police Force, for the fiscal year ended 30th June, 1884, was \$22,958.79, while the dues collected during the same period amounted to \$18,441.12, showing a deficiency of \$4,517.67.

A detailed statement of this service, showing the amount paid for maintenance the force, police steamer and contingencies, will be found in Appendix No. 15, to this Report.

##### *Montreal.*

From the report of Mr. H. St. A. Ormond, Inspector of the Harbour Police Force of Montreal, who also holds the position of Agent of the Department, the force, as constituted during the last season, consisted of one Chief Constable, with a salary of \$3 per diem; three Sergeants, at \$1.90 each per diem, and thirty Constables, at \$1.50 each per diem, making a total, including the Inspector of thirty-five. The Inspector and Agent receives a salary of \$1,400. An increase of four men was made to the

Force in the month of August, as it was found that the existing force was unable to give the necessary protection required by the shipping visiting the port.

From the returns transmitted by the Inspector, it appears that 871 persons were arrested by the force at Montreal, during the past fiscal year.

The total expenditure on account of this service at Montreal, during the fiscal year, amounted to \$19,021.93, and the Harbour Police dues collected to \$10,056.13, showing an excess of expenditure over receipts of \$8,965.80.

The total amount expended during the past fiscal year, at Quebec and Montreal, on account of Harbour Police Service, was \$41,980.72, and the amount collected was \$28,497.25, showing an excess of expenditure over receipts of \$13,483.47. The collections of the past year exceeded those of the preceding year by the sum of \$137.23, and the expenditure was \$3,662.07 in excess of that of the preceding year.

The receipts and expenditure on account of this service during the past fifteen years are as follows, viz. :—

|  | Receipts.    | Disbursements. |
|--|--------------|----------------|
| For fiscal year ended 30th June, 1870..... | \$ 23,996 68 | \$ 18,461 83   |
| do do 1871.....                            | 21,235 06    | 17,400 73      |
| do do 1872.....                            | 27,215 80    | 20,348 00      |
| do do 1873.....                            | 26,618 50    | 32,653 87      |
| do do 1874.....                            | 28,650 39    | 38,897 52      |
| do do 1875.....                            | 25,620 09    | 37,895 00      |

|  |              | <hr/> <hr/>    |

## SICK AND DISTRESSED MARINERS.

Under the provisions of the Act 38 Vic., chap. 31, amending the Act respecting the treatment and relief of sick and distressed mariners, vessels of greater burthen than 100 tons register are liable to pay a duty of 2 cents per ton three times in each calendar year, instead of twice as formerly; vessels of 100 tons and under paying the duty once in each year.

By the provisions of the Act 47 Vic., chap. 21, passed at the last Session of Parliament, vessels employed exclusively in fishing, which were exempt from the payment of sick mariners' dues and not entitled to the same benefits as those vessels on which the dues are imposed, have now the same rights as other vessels, if dues are paid before leaving on a fishing voyage.

The receipts for the fiscal year ended 30th June last amounted to \$48,667.07' being an increase, as compared with the receipts of the preceding year, of \$1,093.65.

The Sick Mariners' Act does not apply to the Province of Ontario, and consequently no dues are collected from vessels in that Province and no expenditure incurred on account of sick seamen. For a number of years past, however, a grant has been made by Parliament of \$500 to the General Hospital at Kingston, and a similar amount to the General and Marine Hospital at St. Catharines, for the care of such seamen as may be received. In the Province of Quebec the expenditure on account of sick and distressed seamen, including the total expenditure for the Marine and Immigrant Hospital at Quebec, amounted to \$23,143.03, as will be seen by reference to Appendix No. 18. Of this sum, \$621.19 was expended on account of shipwrecked and distressed seamen, and \$1,357 for sick seamen, at ports other than those of Montreal and Quebec.

At the Port of Montreal sick seamen are cared for at the General Hospital, under an arrangement made by the Department, by which 90 cents per diem is paid for the board and medical attendance of each seaman. The amount paid the hospital during the past fiscal year was \$1,174.50. The sick mariners' dues collected during the same period at the Port of Montreal amounted to \$2,970.28.

At the Port of Quebec, sick seamen are cared for at the Marine and Immigrant Hospital. The sum of \$20,000 was appropriated by Parliament for the maintenance of this hospital, and the expenditure, as shown by Appendix No. 17, amounted to \$19,990.34. A grant of \$2,400 was received from the Government of Quebec and \$199 from rent of beach lots, board of patients, &c., making the total amount deposited to the credit of the Receiver-General \$2,599, thus reducing the cost of maintenance to the Government of the Dominion to \$17,391.34. In this sum the cost of maintaining sick immigrants as well as seamen is included, and estimating the cost of immigrants, of whom 109 were treated and retained in hospital, in all 1,499 days, at

\$1,680.06, the cost of sick seamen would amount to \$15,711.28. By reference, however, to the report of the resident physician, it appears that during the past fiscal year, out of 729 patients treated 418 were seamen having 6,328 days' treatment, 109 were immigrants, having 1,499 days' treatment, and 202 were residents of Quebec, having 7,690 days' treatment, thus showing, as stated in former reports, that the amount contributed by the Government of Quebec, viz., \$2,400, towards the support of residents in the hospital, is altogether inadequate. A fair proportion of the cost of the institution for the past fiscal year would be as follows, viz.:—For seamen, \$8,152.27; for immigrants, \$1,931.14, and for residents \$9,906.92. The Commissioners report a falling off of 105 during the year in the number of admissions, and a decrease of 4,525 days' attendance, and state that result is due in some measure to a falling off in the arrivals at the port and the excellence of the sanitary state of the crews and passengers, but principally to the rigid control exercised in the admission of sick patients from the city. Taking the total number of days' treatment of all patients during the year as 15,517, the cost per diem of maintaining each patient is \$1.28.

The amount of sick mariners' dues collected at the Port of Quebec, during the last fiscal year, was \$11,584.64, being \$1,105.56 less than the previous year, and the total amount collected in the Province of Quebec, for the same period, was \$17,368.48, instead of \$18,205.18, collected in the previous year. The expenditure for sick and distressed seamen at the different ports in the Province of Quebec, estimating the actual charge to the fund for the Marine Hospital at Quebec at \$17,391.34 amounts to \$20,544.03, showing an excess of expenditure over receipts of \$3,173.55.

The expenditure on account of sick and disabled and distressed seamen in the Province of New Brunswick amounted, during the last fiscal year, to \$9,033.99, while the receipts for the same period amounted to \$11,038.64.

Marine hospitals are established in New Brunswick, at the Ports of St. John, St. Andrews, Miramichi, Richibucto, Bathurst and Saackville, and returns received weekly from the medical superintendents in charge. Details of expenditure at the different hospitals will be found in Appendix No. 18. The sick mariners dues collected at the Port of St. John, during the last fiscal year, amounted to \$5,240.08, and the cost of maintaining the Marine Hospital, at that place, to \$1,236.22. A new Marine Hospital has been built at St. John by the Department of Public Works, and has lately been opened.

In the Province of Nova Scotia marine hospitals have been established at the Ports of Yarmouth, Sydney, Lunenburg and Point Tupper. At Halifax, provision is made for sick seamen at the Provincial and City Hospital, under arrangements made with the managers of that institution. The sum of 90 cents per diem is at present allowed for board and medical attendance. The sum of \$6,040.22 was collected

---

at Halifax, during the past fiscal year, as sick mariners' dues, and the sum paid the Provincial and City Hospital for the same period was \$4,352.95.

At ports in the Province, where no hospitals exist, sick seamen are cared for under the direction of the chief officer of Customs, and details of the expenditure thus incurred will be found in Appendix No. 18. The total expenditure for sick, disabled and distressed seamen in Nova Scotia, during the past fiscal year, amounted to \$12,006.42 and the receipts to \$16,220.33 showing an excess of receipts over expenditure of \$4,213.91.

In the Province of Prince Edward Island the expenditure on account of sick, disabled and shipwrecked seamen, during the last fiscal year, amounted to \$1,226.21, and the receipts from sick mariners' dues to \$684.46. Sick seamen at the Port of Charlottetown are cared for under an arrangement entered into with the managers of the Charlottetown Hospital. The amount paid under this arrangement was \$610. A marine hospital is established at the Port of Souris.

In the Province of British Columbia the sum of \$4,048.19 was expended during the year, and the receipts of the Sick Mariners' Fund amounted to \$3,355.16. A marine hospital is established at the Port of Victoria.

During the past fiscal year the sum of \$918.56 was paid to Her Majesty's Government to re-imburse expenses incurred in caring for shipwrecked and distressed Canadian seamen at foreign ports.

The total expenditure by this Department on account of sick, disabled, shipwrecked and distressed seamen during the past fiscal year, including the grant of \$500 to each of the hospitals at St. Catharines and Kingston, and the entire expenditure on account of the Marine Hospital at Quebec, amounted to \$51,391.64, being \$2,512.33 in excess of the previous year, and \$10,608.36 less than the amount appropriated by Parliament for the service.

It will be seen, however, that as the entire collection of the Sick Marine Fund amounted to \$48,667.07, the excess of expenditure over receipts amounted to \$2,724.57. Should a deduction, however, be made, of a fair proportion of maintaining residents and immigrants in the Marine Hospital at Quebec, which amounts, as above stated, to \$11,838.06, the expense would amount only to \$39,553.58, and there would be an excess of receipts over expenditure of \$9,113.49.

The receipts and disbursements in connection with this service during the last sixteen fiscal years are as follows:—

|  | Receipts.    | Disbursements. |
|--|--------------|----------------|
| For fiscal year ended 30th June, 1869..... | \$ 31,353 78 | \$ 26,987 64   |
| do do 1870.....                            | 31,410 46    | 27,029 34      |
| do do 1871.....                            | 29,683 41    | 28,971 22      |
| do do 1872.....                            | 34,911 64    | 38,947 60      |
| do do 1873.....                            | 37,136 10    | 41,016 43      |
| do do 1874.....                            | 41,500 16    | 59,778 90      |
| do do 1875.....                            | 37,801 46    | 50,684. 76     |

#### IMPROVEMENT OF HARBOURS.

Under the provisions of the Act 32 and 33 Vic., cap. 40, a tax of 10 cents per ton was formerly imposed for the improvement of harbours, on all vessels arriving at the ports of Bathurst and Richibucto, N.B., Amherst and House Harbour, Magdalen Islands and Cape Chatte, Quebec, these ports having been proclaimed to be under the operation of the Act referred to. By Order in Council of the 7th May, 1877, the tonnage duty was reduced to 4 cents for every ton of the registered measurement of vessels entering the ports in question. As stated in the Report for the year 1880, the Port of Bathurst was exempted, by Order in Council of 12th April, 1880, from the provisions of the proclamation referred to, and the tonnage duty has not been collected since that date.

By Order in Council of 1st May, 1877, the Port of Southern Bay, Ingonish, N.S., was proclaimed under the operation of the Act, and a tonnage duty of 6 cents a ton imposed.

The amount collected at the different ports under the operation of the Act, for the year ended 30th June last, was as follows:—

|  |          |
|--|----------|
| Amherst and House Harbour, Magdalen Islands..... | Nil.     |
| Cape Chatte, Gaspé .....                         | \$105 43 |
| Richibucto, N.B.....                             | 717 24   |
| Southern Bay, Ingonish.....                      | 32 74    |
|  | —————    |
|  | \$855 46 |
|  | =====    |

The amount collected for the year ended 30th June, 1883, was \$758.60.

The sum of \$759.82 was expended by the Department of Public Works at Southern Bay, Ingonish, and \$1,000 at Richibucto.

#### STEAMBOAT INSPECTION.

The report of the Chairman of the Board of Steamboat Inspection, for the year ended 31st December last, will be found in the Supplement to this report, together with statements showing the names of engineers examined and to whom certificates had been granted and renewed; the amount of fees paid for such certificates; the steamboats inspected, and the amount of duties and fees collected; also statements showing the number of steamboats added to the number in the Dominion, and those broken up, lost or rendered unfit for service during the year.

During the year Mr. Edward S. Vigor, who had served temporarily as Inspector in Western Ontario, was appointed Inspector of Steamboats for the Province of British Columbia, and Mr. Richard Collister, Inspector of Hulls of Steamboats for the Port of Victoria, Mr. Vigor acting in that capacity for the other ports in the Province. Mr. Oliver P. St. John was appointed an additional Inspector of Boilers and Machinery for the West Ontario, Huron and Superior Divisions, and Captain James Dick an additional Inspector of Hulls for the Province of Ontario.

By the provisions of the Act 47 Vic., cap. 20, amending the Steamboat Inspection Act, the fee payable on the renewal of an engineer's certificate was fixed at \$1, instead of \$5, as provided in the Act.

Meetings of the Board of Inspectors were held during the year at Toronto, St. Catharines, Collingwood, Sarnia, Montreal, St. John and Halifax. At the meetings held at the two last named places, rules and regulations were adopted which appear in detail in the report of the Chairman.

The amount received during the last fiscal year, on account of tonnage dues, inspection of steamboats and certificates to engineers, was \$15,371.79, of which sum \$12,521.79 was for tonnage dues and inspection fees, and \$2,850 for certificates to engineers. This shows an increase in the receipts, as compared with the previous year, of \$2 791.43. The increase in tonnage dues and inspection fees, was in reality, \$3,609.43; the fees for certificates falling short of the amount received the previous year by \$215. The expenditure for steamboat inspection during the last fiscal year, as will be seen by reference to Appendix No. 11, amounted to \$21,893.28, and as the receipts amounted only to \$15,371.79, there is a deficiency of \$6,521.49. The large increase in expenditure is accounted for by the increase in the number of inspectors required to carry out the provisions of the Consolidated Steamboat Inspection Act.

From the report of the chairman, with accompanying statements, it will appear that during the last calendar year 705 certificates were granted to engineers as follows:—First-class, 27; second-class, 203, and third-class, 475.

The total number of steamboats in the Dominion is given by the chairman as 891, having a gross tonnage of 150,111 tons. Of this number, 256 steamers belonged to the Western Ontario, Huron and Lake Superior Division; 126 to East Ontario; 132 to Montreal Division, 150 to Quebec Division, 117 to Maritime Provinces, 50 to Manitoba, and 58 to the British Columbia Division.

During the last calendar year 92 new steamers were added to the list, and 36 lost or put out of service, showing a gain in steamers of 56. The principal increase was in the Division of Western Ontario, Huron and Lake Superior, where 36 steamers were added to the list, having a gross tonnage of 10,282 tons.

The chairman reports that the operation of the Steamboat Inspection Act, so far as relates to the manufacture and construction of marine boilers, has been in the highest degree satisfactory, and the boilers turned out unsurpassed for safety and durability. During the past season only one casualty occurred, attended with loss of life, viz.: that of collision between the Canadian Pacific Railway steamer "Alberta" and the American steamer "J. M. Osborne," where four persons perished.

It will be seen by the following comparative statement of receipts and expenditure on account of Steamboat Inspection Fund for the past 15 fiscal years, that during that period the entire receipts, \$210,619.03, have exceeded the expenditure, \$187,380.98, by the sum of \$23,238.05, which remains as a balance to the credit of the Fund:—

|  | Receipts.    | Expenditure. |
|--|--------------|--------------|
| For fiscal year ended 30th June, 1870..... | \$ 12,521 29 | \$ 7,399 18  |
| do do 1871.....                            | 10,369 96    | 8,321 00     |
| do do 1872.....                            | 11,710 43    | 8,500 00     |
| do do 1873.....                            | 15,412 75    | 11,205 54    |
| do do 1874.....                            | 15,603 19    | 10,291 58    |
| do do 1875.....                            | 15,011 90    | 12,199 81    |
| do do 1876.....                            | 13,811 24    | 13,081 86    |
| do do 1877.....                            | 15,859 42    | 13,073 01    |
| do do 1878.....                            | 12,431 25    | 13,228 28    |
| do do 1879.....                            | 12,331 16    | 13,076 46    |
| do do 1880.....                            | 15,424 02    | 11,854 34    |
| do do 1881.....                            | 16,905 49    | 12,211 65    |
| do do 1882.....                            | 15,277 78    | 14,835 97    |
| do do 1883.....                            | 12,577 36    | 16,209 02    |
| do do 1884.....                            | 15,371 79    | 21,893 28    |
|  | \$210,619 03 | \$187,380 98 |
| Deduct expenditure from receipts...        | 187,380 98   |              |
| Excess of receipts over expenditure..      | \$23,238 05  |              |

#### *CERTIFICATES TO MASTERS AND MATES.*

The Report of the Chairman of the Board of Examiners of Masters and Mates of seagoing ships, for the Calendar year, ended 31st December, 1884 will be found in Supplement No. 1 to this Report.

During the past Calendar year, as will be seen by reference to the Report, the Board of Examiners have held meetings for the examination of Candidates at the ports of Halifax, N. S., St. John N. B., Quebec, Yarmouth, N. S. and Charlottetown, P. E. I. At the Port of Halifax thirteen meetings were held, ten at St. John, one at Quebec, ten at Yarmouth, and one at Charlottetown. At Halifax the number of masters who succeeded in passing and obtaining certificates of competency was twenty, and the number of mates thirty-three, while three failed as master and nineteen as mate. At the port of St. John N. B., seventeen candidates passed for the grade of master, and twenty four for mate, while four failed as master and fifteen as mate. At the port of Yarmouth, N. S., sixteen candidates passed for the grade of master and sixteen for mate, while two failed for master and seventeen for mate. At the Port of Charlottetown, P. E. I., one candidate passed for the grade of master and one for mate, while two failed as mate. At the port of Quebec two masters passed the Board. It will thus be seen that during the past year out of sixty-five candidates that presented themselves at the ports named for examination as master fifty-six succeeded in passing and nine failed, and that out of 127 that applied for examination as mate seventy-four passed and fifty three failed.

The number of candidates who have passed and obtained master's certificates of competency since the Act went into operation, viz., 16th September, 1871, to the 31st December 1884, is 1,374, and the amount paid for these certificates, at the rate of \$10 each, \$13,740. During the same period 808 candidates received certificates of competency as mate, and the amount paid, at the rate of \$5 each, was \$4,040. In the supplement referred to, a list will be found of all who have obtained certificates of competency and service, either as master or mate, during the year ended 31st December, 1884.

During the calendar year fourteen certificates of service for the grade of master and twelve for that of mate have been granted. The total number of certificates of service issued since the Act came into operation is 893 for the grade of master and 321 for that of mate, making a total of 1,214 certificates of service granted. These certificates, as stated in previous reports, are granted to masters and mates who are unable or unwilling to undergo examination for certificates of competency, and who have held situations as masters and mates previous to 1st January, 1870, and can produce certificates of experience and general good conduct. The fee charged for certificates of service is at the rate of \$5 for master and \$3 for mate.

The fees received on account of certificates of competency and service during the fiscal year ended 30th June last, was \$1,387.50; and the amount, in detail, expended on account of this service, as will be seen by reference to Appendix No. 1 to this Report, was \$3,909.59.

A list of certificates cancelled during the last calendar year will also be found in Supplement No. 1 to this Report.

The following statement shows the receipts and expenditure on account of this service since the Act came into operation, viz. :—

|  | Expenditure. | Receipts.   |
|--|--------------|-------------|
| For fiscal year ended 30th June, 1871..... | \$ 1,410 45  | \$ ..... 00 |
| do do 1872.....                            | 4,312 07     | 1,344 00    |
| do do 1873.....                            | 6,466 18     | 4,963 00    |
| do do 1874.....                            | 4,520 19     | 2,995 00    |
| do do 1875.....                            | 5,696 62     | 2,715 00    |
| do do 1876.....                            | 4,672 08     | 2,021 87    |
| do do 1877.....                            | 4,050 00     | 1,740 50    |
| do do 1878.....                            | 4,249 76     | 1,296 50    |
| do do 1879.....                            | 4,250 12     | 1,334 50    |
| do do 1880.....                            | 4,253 43     | 1,547 00    |
| do do 1881.....                            | 3,888 41     | 1,333 50    |
| do do 1882.....                            | 3,965 19     | 1,152 50    |
| do do 1883.....                            | 4,021 20     | 1,314 00    |
| do do 1884.....                            | 3,909 59     | 1,387 50    |
|  | <hr/>        | <hr/>       |
| Receipts.. .....                           | \$59,665 29  | \$25,144 87 |
|  | 25,144 87    |             |
| Excess of expenditure over receipts....    | \$34,520 42  |             |

It having come to the knowledge of the Department that in several instances masters of vessels had engaged certificated mates and, after clearing at the Custom House, had proceeded to sea without a certificated mate, thereby evading the requirements of the law, it was deemed advisable to amend the Act, and it was therefore enacted, during the last Session of Parliament, that any master who, after having obtained his clearance by representing that he had engaged a person possessing a mate's certificate, for the voyage, and afterwards proceeds to sea without such person or some other duly qualified mate, should incur a penalty of \$100, and that any person who knowingly allows his certificate to be produced as aforesaid, and does not proceed to sea on the voyage for which the clearance is obtained, shall incur a like penalty. The Act was also amended so as to provide for the issue of certificates of service to the Masters and Mates who had served as such, previous to 1884, in vessels registered in Canada over 100 tons, and not exceeding 150 tons register.

At a court of inquiry held at Liverpool on the 25th August, 1884, to enquire into the cause of the collision between the "Belle Star" and "Richard Owen," in which the last named vessel was sunk, George W. Croscup, who was mate of the "Belle Star" at the time, and who held a certificate of competency, No. 1,864, was found in default for keeping an insufficient look-out, and therefore suspended his certificate of competency for the space of three months.

The certificate of competency, No. 740, held by Charles P. Johnson, was suspended for the space of three months, from 11th November, 1884, by the Board of Trade, on account of Mr. Johnson's conviction, at Greenock, of drunkenness and disobedience to orders when first mate of the "Vale of Nith."

At a court of inquiry at Halifax on the 3rd October, 1884, into the circumstances attending the abandonment of the brigatine "Annie," of Maitland, Nova Scotia, on the 17th December, 1883, the court, after having carefully weighed and considered the evidence, came to the conclusion that the loss of the vessel was owing to the gross ignorance of duty, as a seaman, of the master, D. T. Cameron, who held a certificate of service, No. 475, and therefore recommended that his certificate be cancelled, which was accordingly done.

#### INLAND AND COASTING CERTIFICATES.

During the last calendar year the number of candidates who have passed and obtained masters' certificates of service was 1,661, and the amount paid for these certificates, at the rate of \$4 each, was \$6,644, while four failed. During the same period 443 candidates received certificates of service as mate, and the amount paid, at the rate of \$2 each, was \$886, while four failed. The number of candidates who succeeded in passing for certificates of competency as master was 83, and the amount paid for these certificates, at the rate of \$8 each, was 664, while 23 failed. Thirteen

mates obtained certificates of competency, and the amount paid for the same, at the rate of \$4 each, was \$52, while 18 failed.

The amount voted by Parliament for certificates of competency and service to masters and mates of sea-going, inland and coasting ships, was \$6,000, and the amount expended to the 30th June, 1884, was \$5,580.79, leaving an unexpended balance of \$419.21, which reverted to the Treasury. The total amount of fees received for certificates of competency and service of inland and coasting vessels, during the fiscal year ended 30th June, 1884, was \$8,050, and the amount expended was \$1,671.20.

WRECKS AND CASUALTIES.

The total number of casualties to British, Canadian and foreign sea-going vessels, reported to the Department as having occurred in Canadian waters, and to Canadian sea-going vessels in waters other than those of Canada, during the year ended the 31st December, 1884, was 199, representing a tonnage of 83,410 tons register, and the amount of loss, both partial and total, to vessels and cargoes, so far as ascertained, was \$2,396,753.

The number of lives lost in connection with these casualties was 209, namely, 160 in Canadian waters, and 49 in waters other than those of Canada.

The disasters reported to this Department as having occurred to vessels on the inland waters of Canada, and to Canadian vessels on American inland waters during the year 1884, were 20, and the tonnage involved was 8,360 tons register. The number of lives lost was four only, and the total amount of loss and damage to vessels and cargoes is estimated at \$107,372.

When the Wreck Register closed in 1883, a large number of casualties had been reported, of which the Department had not sufficient particulars to enable it to publish them in the list for that year. Returns have subsequently been received for many of these casualties, and a detailed list of them will be found in Supplement No. 1 to this Report. These casualties have been added to those previously reported, with the result of largely increasing the amount of loss and damage sustained by the mercantile marine in 1883, as the following totals will show:—

|   |             |
|---|-------------|
| Total number of disasters for 1883..... | 366         |
| do tons involved.....                   | 158,826     |
| do lives lost.....                      | 259         |
| Total loss and damage.....              | \$2,029,752 |

There were no wrecks reported to the Department as having occurred on St. Paul's Island during the past year, but two disasters, both involving loss of life, and one a very heavy loss of property, occurred on Sable Island, viz., the steamship "Amsterdam" and the brigantine "A. S. H."

The fine steamship "Amsterdam," of 3,000 tons gross tonnage, hailing from Rotterdam, commanded by Captain T. M. Lucas, and owned by the Netherlands-American Steamship Company, stranded during a dense fog on the eastern bar of Sable Island, about 9.45 p.m., on 30th July, 1884, having been carried out of her course by the strong currents prevailing in that vicinity. The steamship had on board a general cargo, 212 passengers and a crew numbering 48 all told. Owing to the fog she was not observed from the island until 1.30 p.m. of the following day, when boats were immediately despatched to her assistance. Previous to their arrival, however, Captain Lucas had, by means of his own boats, safely effected the landing of all his passengers except three, who were unfortunately drowned in the surf through carelessness on the part of those in charge of one of the boats, this being the only loss of life in connection with the wreck. The shipwrecked people were at once cared for by the superintendent of the island and his staff, and everything possible done to make them comfortable. On the 5th August the Government steamer "Newfield" fortunately happened along on one of her supply trips, and the passengers were immediately put on board her and forwarded to Halifax. The "Newfield" then returned, and every effort was made to save the ship and cargo. A large portion of the latter was secured undamaged, but a change for the worse in the weather foiled all attempts to get the steamer off, and she became a total loss. The loss on the vessel was estimated at \$200,000, and on the cargo at \$240,000.

On the afternoon of 19th December, during a tremendous gale, accompanied by snow, the brig "A. S. H." of St. Malo, France, was driven ashore at Sable Island, and out of a crew of seven men only the first mate succeeded in saving his life. The thermometer was 12° below zero at the time, and the cold, combined with the blinding snow and hurricane, compelled the unfortunate sailors to succumb. The wreck was not known at the station until 2 a.m. the next day, when the mate, after terrible suffering, made his way thither, having, for the last quarter of a mile, dragged himself upon his hands and knees. The "A. S. H." was commanded by Captain Le Marchand, owned by Omeyers & Cie., of St. Pierre, and was bound from the latter place to Boston with a cargo of fish. The loss on the vessel and cargo has not been ascertained.

The "Daniel Steinmann" a fine iron steamer of 1,330 tons, from Antwerp, bound for Halifax, struck the "Broad Breaker" rock at Sambro, off the mouth of Halifax Harbour, on the 3rd of April, became a total wreck, and 124 persons were lost. An investigation was held, in accordance with instructions from the Department, at which it was ascertained that the catastrophe was caused by the master mistaking Sambro light for Chebucto light, on a dark, foggy and rainy night. It would seem that he had taken no observations on that day, and should not have attempted to enter the harbour under the circumstances. The "Daniel Steinmann" had a general cargo, and 98 passengers on board, and was owned by Messrs. Steinmann & Ludwig, of Antwerp. The loss on the vessel was estimated \$180,000, on the cargo unknown.

The barque "Georgie" of Windsor, N.S., 646 tons, 8 years old, was abandoned at sea on 6th February, about 50 miles off Pernambuco, being then in a water-logged and helpless condition. She was on a voyage from Penarth to Hong Kong, with a cargo of coals, sprang a-leak on 4th February, and although the pumps were kept going incessantly the water steadily gained until the crew had only time to save their lives. The vessel was valued at \$25,000, and the cargo at \$3,000.

The barque "Ocean," of the burden of 651 tons, registered at Liverpool, N.S., and owned by Messrs. Black Bros. & Co., of Halifax, was totally destroyed by fire at Krum Bay, St. Thomas, D. W. I., on the 1st of March. The British Consul at St. Thomas caused a thorough examination of the entire crew to be had before him, and also visited the ship during the progress of the fire, and finding not the slightest ground to suspect that she had been purposely set on fire, did not deem it necessary to hold a court of enquiry. On the return of the master and mate of the vessel to Halifax, they were both, under instructions from the Department, examined before Captain Scott, and the conclusion at which he arrived was, that the loss of the ship was entirely due to the negligence of the steward, who acted as cook. The value of the vessel was estimated at \$7,000, that of the cargo unknown.

The Government steamer "La Canadienne" while entering the harbour of Gaspé, on the night of the 20th May, ran down the brigantine "Alliance," of Jersey, causing the latter to sink immediately.

An investigation was held by the Department, from which it appeared that the light was dark, but fine and clear; that the brigantine was lying at anchor, with regulation lights burning, and that the steamer was proceeding at full speed. Under these circumstances, the captain of the steamer, who was on the bridge at the time of the collision, was held to be entirely to blame, and was accordingly dismissed. The "Alliance" was subsequently raised and repaired, the loss to the vessel being estimated at \$2,000, and to the cargo at \$400.

The brigantine "Annie," of the tonnage of 203 tons, registered at Maitland, N. S., and owned by Mr. George J. Troop, of Halifax, while on a voyage from Montreal to Buenos Ayres, laden with lumber, was abandoned on the 16th December, 1883, in about latitude 4°, 34 N., and longitude 38°, 9, W., under circumstances which led to a formal investigation being held at Liverpool, G.B., in February, 1884, before T. S. Raffles, Esq., with the result, that in the opinion of the court the master had not been justified in the abandonment, and had not taken proper measures to secure the safety of the ship. Subsequently, in obedience to an Order in Council, an investigation was held before Captain Scott at Halifax, on the 3rd of October, 1884, and the court recommended to the Department that the master's certificate be cancelled, which was accordingly done. The loss on the vessel was estimated at \$6,000, and on the cargo at \$1,500.

On the 24th July, 1884, a collision occurred at sea between the "Richard Owen," of Great Britain, and the "Belle Star," registered at Digby, N. S., whereby the former vessel was sunk, and four out of a crew of seven, unfortunately drowned. A formal investigation was held on the 21st August, before the stipendiary magistrate, at Liverpool, G. B., and in the opinion of the court, George W. Crosscup, chief officer of the "Belle Star," had been in default, in not keeping a sufficient look-out, and his certificate was therefore suspended for three months, from 25th August.

The steamship "Inveralt," of the burthen of 841 tons, registered at Liverpool, G. B., while on a voyage from Montreal to Pictou, went aground on the East Point of Pictou Island on the 4th of August, 1884, the night being very thick and foggy. Under instructions from the Department, an informal investigation was held by Captain Scott, who found that the master of the steamer was in error, because, being unacquainted with the locality, he should not, in thick weather and without a pilot have endeavoured to make progress, but should have brought his ship to an anchor and waited until it cleared up. The loss on the steamer, (there was no cargo), has not been reported to the Department. Several attempts were made by a wrecking company to get her off, but they were all unsuccessful.

The iron steamship "Finchley," belonging to London, G. B., of 1,951 tons gross tonnage, and owned by Edward Harmay Watts, foundered in deep water off the Nova Scotian coast, near Isaac's Harbour, on the 20th of September, 1884, having first struck twice on shoals in very thick weather. The steamer was on a voyage from South Carolina to Dublin, laden with phosphate, and with directions to call at Sydney, Cape Breton, for bunker coal. A formal investigation was held at Liverpool, G. B., on the 12th of November, A. D., 1884, before H. C. Rothery, Esq., and the court found that the stranding and loss of the steamer were due to the wrongful acts and defaults of Jacob Garson, the master, and his certificate was accordingly suspended for six months. The loss on the vessel was estimated \$108,000, and on the cargo at \$12,000.

The iron steamship "Warwick" registered at Bristol, G. B., of 2,526 tons gross, was stranded at Fox River, in the Gulf of St. Lawrence, on the 14th July, 1884. The weather was very thick at the time. The steamer was on a voyage from Newport to Montreal, and was laden with iron. An investigation was held before Mr. J. U. Gregory, the agent of this Department at Quebec, on the 11th September, and the decision arrived at by him was that the casualty was due to unusual deviation of the compasses, caused, no doubt, by the nature of the cargo. At the time the vessel struck the captain believed he was 25 miles off shore, although, on account of the thick weather, he kept the lead going constantly, and took every other precaution. No default was proven against any of the officers of the vessel. The "Warwick" was subsequently got off after jettisoning a large portion of her cargo and proceeded to Quebec for repairs under her own steam. The amount of loss and damage has not been reported to the Department.

There were no casualties involving very serious damage reported as having occurred on the inland waters of Canada during the year 1884, and only one involving loss of life, viz., a collision which occurred between the Canadian Pacific Railway Co's steamship, the "Alberta," and an American barge the "Osborne," on the 27th July, on Lake Superior during a dense fog. By this casualty there were four lives lost, viz., three from the "Osborne" and one, a passenger, from the "Alberta." The amount of loss and damage to either vessel has not been reported to the Department.

COMPARATIVE STATEMENT of the Losses reported to the Department since 1870.

|   | Casualties. | Tonnage. | Lives Lost. | Damage.   |
|---|-------------|----------|-------------|-----------|
| For the Year ending 31st December, 1870. .... | 335         | 82,008   | 210         | 901,000   |

\* Of this number, 545 persons were lost by the wreck of the steamship "Atlantic," on the 1st of April, 1873.

SHIPPING MASTERS AND SHIPPING OF SEAMEN.

In the supplement to this report will be found a statement showing the returns received from the shipping masters appointed under the Act relating to the shipping of seamen, for the half years ended 30th June and 31st December last, and of the fees received under the Act.

The following change has occurred in the list of shipping masters since 1st January last, viz. :—

The appointment of Mr. Ronald McDonald as shipping master at Sydney, N.S., on the 20th April last, in the room of Mr. Jacob Ingraham, deceased.

The following is a summary of the reports received from the shipping masters at some of the principal ports in the Dominion :—

The shipping master at St. John, N.B., shipped during the year 4,056 seamen, discharged 2,791, and received as fees, at the rate of 50 cents for each seaman shipped and 30 cents for each seaman discharged, \$2865.30; out of which he paid for assis-

tance and incidental expenses, \$1,066.10, leaving the net income [of his office \$1799.20.

The shipping master at Halifax shipped, during the year, 3,065 seamen, discharged 2,149, for which he received \$2,177.20; out of which, after deducting expenses, he had as remuneration, \$1,002.20.

Owing to the death of Mr. Geo. Smith, the late shipping master, and the vacancy thus caused not being filled, full returns for the Port of Montreal, have not been received. The Collector of Customs reports that from 6th October to 31st December 1884—'0 seamen were shipped and 150 seamen discharged, while the fees, for that period, amounted to \$90.

At the Port of Quebec the total number of seamen shipped from the 1st January to 31st December last was 1,143, of which number 445 belonged to British, 491 to Dominion and 207 to foreign vessels; 760 were discharged and deserted during the same period, of whom 392 belonged to British and 368 to Dominion vessels. The total receipts during the calendar year amounted to \$771.25, and deducting the amount of incidental expenses, the balance of \$619.48 reverted to the treasury.

At the Port of Chatham, N.B., 156 seamen were shipped, 40 discharged, and fees to the amount of \$129 received by the shipping master.

At the Port of Pictou, N.S., 237 seamen were shipped, 160 discharged, and fees to the amount of \$166.50 received by the shipping master.

At the Port of Yarmouth N.S., 620 seamen were shipped, 429 discharged, and fees to the amount of \$438.70 received.

#### PILOTAGE AUTHORITIES.

The report of the Harbour Commissioners of the Port of Quebec, who are by law the Pilotage Authority for the Port of Quebec, will be found in the supplement. The annual statement of the Decayed Pilot Fund, which is under the conduct and management of the Corporation of Pilots, will be found in Appendix No. 37 to this report. From this statement it appears that, on the 31st December last, the Decayed Pilot Fund stood as follows:—

|                                     |             |
|-------------------------------------|-------------|
| Money invested .....                | \$53,352 71 |
| “ in savings bank.....              | 2,599 55    |
| “ in treasurer's hands .....        | 35 99       |
|                                     | <hr/>       |
|                                     | \$55,988 25 |
| Deduct arrears due in pensions..... | 274 82      |
|                                     | <hr/>       |
|                                     | \$55,713 43 |
|                                     | <hr/>       |

The number of decayed pilots on the list is 47, and the pensions range from \$47 to \$110; 119 widows receive pensions ranging from \$38 to \$68; and 17 children, pensions ranging from \$10 to \$15. The amount paid for pensions during the year was \$11,092.87, and the per centage on contributions of pilots to the fund amounted to \$8,121.47, and the sum of \$3.073 was received for interest. The total receipts on account of the fund, including a balance from the preceding year, amounted to \$14,614.15, and the expenses amounted to \$11,978.61. The total receipts of the Corporation of Pilots for the past season, as given by the secretary, amounted to \$114,417.32, the expenditure to \$20,255.20, and the net dividend paid to each pilot on the active list was \$549.

The number of pilots on the active list on 31st December last was 178, being the same number as last year, and the number of apprentice pilots 23, being eight less than last reported; 36 old pilots, having attained the age of 65 years and upwards, were examined by the Pilotage Authority before the opening of navigation, and being found qualified, were, with one exception, licensed for one year. Five pilots were pensioned, two died and five were tried during the season upon complaints lodged by ship masters. In three of the cases the pilots were found guilty and suspended, in another the pilot was acquitted, and the other case was dismissed. Of pilots on the active list, 29 were in the employ of steamship companies, and in charge of Dominion steamers and light vessels. During the year eight apprentice pilots, after undergoing the examination required by law, were admitted to practice as pilots.

#### MONTREAL.

The report of the Harbour Commissioners of Montreal, who are by law constituted the Pilotage Authority for this district, and possess the powers formerly vested in the Montreal Trinity House, will be found in the supplement. A statement of the Decayed Pilotage Fund will be found in Appendix No. 38 to this report. The fund continues in a prosperous condition and shows a net income of \$1,052.61 for the year, although the receipts for poundage, &c., were somewhat less than usual, amounting to \$2,141.84, and the interest on investments to \$1,905. The fund now amounts to \$39,656.80, \$28,000 of which is invested in Montreal Harbour bonds, \$2,000 in Water Works bonds, \$5,000 in City of Montreal Consolidated Fund, \$4,636.23 in City and District Savings Bank, and \$20.57 in hands of treasurer. There are 23 pensioners on the fund, viz., 19 widows and four old pilots. The amount paid for pensions during the year was \$3,131.61. The number of pilots on the active list is 48, and the earnings amounted to \$41,549.58. Of this amount, \$38,808.11 was received from British vessels, and \$2,741.47 from foreign. There are 21 apprentice pilots. Only two accidents occurred to vessels during the past season, and no serious damage was occasioned to the vessels. In the one case the pilot was found in fault and suspended, and in the other he was declared not to blame. The amount received by the Commissioners for poundage and interest on investments during the past year was \$4,054.24.

---

---

 HALIFAX, N.S.

The returns received from the Halifax Pilotage Authority, for the year ended 31st December last, show that the sum of \$17,365.26 was received as pilotage dues, of which \$13,146.63 was received from British and \$4,218.63 from foreign vessels. The receipts for commission on pilotage collected, outward pilotage on ships having no pilots, license fees, bonds, &c., amounted to \$2,003.43, while the expenses of commissioners, the secretary's salary, printing, &c., amounted to \$1,976.22. The surplus at credit of Pilotage Fund amounts to \$2,835.50, and the Superannuation Fund amounts to \$2,435.33. There are 22 licensed pilots in this district.

## ST. JOHN, N.B.

The returns of this district for the last calendar year show that the sum of \$24,181.09 was received as pilotage dues, of which \$16,035.26 was from British and \$8,095.83 from foreign vessels. There are 37 licensed pilots and six pilot boats. The receipts of the Pilotage Authority from licenses, fees and other sources amounted to \$2,214.02, and the expenditure to \$2,030.75.

## MIRAMICHI, N. B.

There are 31 licensed pilots and four pilot boats in this district. The total number of vessels reported inward and outward was 472, of which 136 were British and 336 were foreign. The total amount received from pilotage and other resources was \$15,898.88, and the expenditure amounted to \$15,918.55. Each pilot received out of the dues, &c., collected, the sum of \$490.44.

## PICTOU, N. S.

There are 13 licensed pilots and one certificated master in this district. The sum of \$4,452.67 was received as pilotage dues, of which amount \$3,944.67 was received from British and \$508 from foreign ships. The sum of \$4,200.17 was paid to pilots, \$150 to secretary for salary and \$93.75 for other expenses, leaving a balance on hand of \$202.52

## SYDNEY, N. S.

The returns received from the Pilotage Authority of this districts show that the sum of \$15,432.50 was received from 897 vessels at the ports of Sydney, North Sydney, Lingan, Glace Bay and Port Caledonia, included in the district. The amount paid pilots was \$14,660.88, commissioner \$150 and secretary \$100; the entire expenditure amounting to \$15,712.84. There are 35 pilots for the ports of Sydney and North Sydney, six for the Port of Lingan and 12 for Glace Bay and Caledonia.

## VICTORIA AND ESQUIMAULT, B. C.

There are 11 licensed pilots and nine certificated masters and mates. The total amount of fees received for the calendar year was \$10,145.36, of which \$1,847.62 was

received from British and \$8,297.74 from foreign vessels. Fees for certificates, examinations and surveys, with balance from previous years, make the entire receipts \$10,700.12, while the fees paid to pilots, salary of secretary, office and other expenses amounted to \$10,504.28.

In addition to the pilotage districts above mentioned, returns have been received from the pilotage districts of St. Mary's and Liscomb, N. S., Bathurst, N. B., Charlotte, N. B., and Buctouche, N. B.

#### WHARVES, PIERS AND BREAKWATERS.

The piers under the control and management of this Department are the following:—The piers at Goderich, Rondeau and Inverhuron, in the Province of Ontario; Rimouski, Rivière du Loup, Rivière Ouelle, Malbaie, Eboulement, L'Îlet and Berthier, in the Province of Quebec; Maitland, Oak Point, Digby, Delap's Cove, East Bay, Meteghan River, Picket's Wharf, Port Greville and Brooklyn, in the Province of Nova Scotia, Clifton, in the Province of New Brunswick, and Souris, in the Province of Prince Edward Island. At the Port of Cow Bay, Cape Breton, N. S., the pier or breakwater purchased under the provisions of the Act, 37 Vic., chap. 18, is also under the management of this Department, but the tonnage dues imposed on vessels calling at the pier, and tolls for goods landed thereon, which were formerly collected by the chief officer of Customs at the port, are now collected by Mr. Archibald McKinnon, wharfinger.

By referring to Appendix No. 26, a statement will be found of the amounts collected from the wharves and piers under the charge of the Department. The total amount collected was \$3,937.72.

By Order in Council of the 4th May, 1883, the tolls at Goderich wharf were remitted for five years and the services of a wharfinger dispensed with.

By Order in Council of the 16th May last, Mr. Ronald Gillis was appointed wharfinger of the pier at East Bay, N. S., to receive, as remuneration for his services, 50 per centum of the amount collected.

By Order in Council of the 30th June last, Mr. Bennett McEachern was appointed wharfinger of the pier at Souris, P.E.I., to receive, as remuneration for his services, 25 per centum of the amount collected.

By Order in Council of the 24th December last, Mr. Andrew Bishop was appointed wharfinger of the pier at Pickett's Wharf, N. S., to receive, as remuneration for his services, 25 per centum of the amount collected.

---

 HARBOUR COMMISSIONERS AND HARBOUR MASTERS.

In the supplement to this report will be found reports of the Harbour Commissioners at Toronto, Montreal, Quebec, Pictou and North Sydney, for the year ended 31st December last.

The report of the Harbour Master at Toronto to the Commissioners shows that the total receipts for harbour tolls amounted to \$7,104.42, a decrease of \$888.29 as compared with previous years. The total revenue of the year was \$10,298.02 and the expenditure amounted to \$5,814.62, and the balance in hand at the end of the year was \$5,741.10. The number of vessels that arrived at the port during the season was 1,780. Dredging was carried out at various places in the harbour at a cost to the Commissioners of \$911.76. The Harbour Master also reports that the contractors for the harbour improvements have completed the portion along the marsh and extending out into the gap.

The report of the Harbour Commissioners for the Port of Quebec shows that the revenue arising from tonnage dues, harbour dues property, interest, &c., during the year, amounted to \$54,768.85, and shows a decrease of \$11,825.97 as compared with the preceding year. Of the revenue received, \$18,811.80 was for tonnage dues. \$12,637.52 for export, import and harbour dues, \$19,943.95 for revenue from property, and the balance for interest and sundries. The expenditure, including salaries, of officials, interest, sinking fund on \$723,000, harbour debentures, repairs and improvements on wharves and sundries, amounted to \$53,381.83, showing an excess of revenue over expenditure of \$1,387.02. The total value of the assets of the corporation is given as \$2,744,206.01 the liabilities as \$2,507,000.

The Commissioners report that it was decided to make a further reduction of 25 feet in the length of the graving dock, thus making it 495 feet long, and an arrangement was entered into with the contractors to build and construct all the works and complete the dock during the season of 1884, but owing to the unexpected mishaps which took place, over which the contractors had no control, they were obliged to suspend operations on the 14th November, till next season.

During the past season dredging in the lower basin was prosecuted vigorously, and satisfactory progress also made in connection with the building of the cross wall.

From the report of the Harbour Commissioners, Montreal, it appears that the receipts from all sources amounted to \$582,275.49 and the expenditure to \$660,249.82. The sum of \$193,262.22 was received from wharfage and tonnage dues, \$100,000 from the Dominion Government for new channel works, and \$225,000 from sale of harbour debentures. The sum of \$74,575.34 was expended on interest Dominion Government, \$176,832.91 in new channel operations, \$61,850.35 in harbour dredging, \$28,574.74 in harbour expenses and management, \$114,842.50 as interest on harbour

debt, \$41,863.26 in harbour repairs, and \$141,000 on redemption of harbour debentures. The revenue statement as compared with the previous year shows a net decrease of \$17,177, but it must be borne in mind that the harbour dues on grain were reduced for a period of three months from 7½ cents per ton to the merely nominal rate of 1 cent per ton. The ocean tonnage for the year amounted to 649,374 tons, as against 664,263 tons for 1883. Number of vessels 626 in 1884, and 672 in 1883. The inland tonnage amounted to 726,015 tons, and shows a decrease of 38,706 tons for the previous year. Operations for deepening the ship channel to 27½ feet at low water were carried on satisfactorily during the season.

The report of the Harbour Commissioners for the Port of North Sydney will be found in the supplement, together with an account of receipts and disbursements. The receipts amounted to \$1973.45, and the disbursements to \$1,955.69. Of this amount \$450 was paid to the Harbour Master, \$420 to the secretary, \$185.50 for caring for seamen, and \$287.17 on wharf account; 1607 vessels, having a total tonnage of 469,189 tons, arrived at the port during the season.

In the supplement will also be found reports from a number of Harbour Masters at the more important ports, appointed under the Acts 35 Vic., chap. 42, 36 Vic., chap. 9 and 63, and 37 Vic., chap. 34, with a statement of the fees collected by Harbour Masters during the year ended 31st December last, and also a list of all the Harbour Masters appointed under these Acts.

The following Harbour Masters have been appointed by Order in Council during the past year, viz. :—

Mr. Francis Marmeau, for Arichat, N. S., on the 6th May last, at a salary not to exceed \$200 of the fees collected, in the room of Mr. Andrew Bellefontaine, resigned.

Mr. John Wren, for St. Andrews, N. B., on the 6th May last, at a salary not to exceed \$100 of the fees collected, in the room of Mr. John Balson, deceased.

Mr. Hugh McKay, for Murray River, P.E.I., on the 8th May last, at a salary not to exceed \$100 of the fees collected, in the room of Mr. John Lowe, who had declined to act.

Mr. E. Douglas Rigby, for Little Glace Bay, N.S., on the 8th May last, at a salary not to exceed \$200 of the fees collected, in the room of Mr. Henry Mitchell, whose appointment was cancelled on the 16th May, 1879.

Mr. John McInnes, for West Bay, N.S., on the 8th May last, at a salary not to exceed \$100 of the fees collected.

Mr. Philip Irving, for Cape Traverse, P.E.I., on the 23rd May last, at a salary not to exceed \$100 of the fees collected.

Mr. Conrad Marks, for Ship Harbour, N.S., on the 2nd June last, at a salary not to exceed \$100 of the fees collected.

Mr. Edward Davison, for Hantsport, N.S., on the 27th June last, at a salary not to exceed \$200 of the fees collected.

Mr. Charles Fields, for Tidnish, N. S., on the 30th June last, at a salary not to exceed \$100 of the fees collected, in the room of Mr. George Brunidge, resigned.

Mr. Harding E. Graves, for Harvey, N.B., on the 8th July last, at a salary not to exceed \$100 of the fees collected, in the room of Mr. Joseph McAlmon, superseded.

Mr. York Barrington, for Victoria Pier, Sydney, N.S., on the 25th July last, at a salary not to exceed \$200 of the fees collected.

Mr. George Burke, for Upper and Lower L'Ardoise, N.S., on the 29th August last, at a salary not to exceed \$100 of the fees collected.

Mr. Alexander Dick, for St. George N. B., on the 29th August last, at a salary not to exceed \$100 of the fees collected, in the room of Mr. James Dick, deceased.

Mr. Joseph Ritcey, for Ritcey's Cove, N.S., on the 29th September last, at a salary not to exceed \$100 of the fees collected.

Mr. Thomas Donovan, for South Bay, Ingonish, N.S., on the 9th October last, at a salary not to exceed \$100 of the fees collected.

Mr. Edward Quennell, for Nanaimo and Departure Bay, B. C., on the 24th October last, at a salary not to exceed \$500 of the fees collected, in the room of Mr. John Sabiston, jun., resigned.

#### METEOROLOGICAL SERVICE.

The annual report of the Meteorological Service, by the Superintendent, Mr. Carpmael, forms Appendix No. 31 to this report. By reference thereto it will be seen that the number of volunteer observers continues to increase, and that two first-class, fourteen second-class and seven third-class stations have been established during the year, and two telegraph reporting stations.

The storm signal service remains unchanged, with the exception of the addition of a new station. The warnings issued during the year were 727, of which 604 were verified.

The issue of weather forecasts has continued without interruption throughout the year; 6,715 predictions were issued, of which 5,008 were fully verified, 1,039 partly and 668 not verified. The sum of \$48,000 was appropriated, for the service and the expenditure, as will be seen by reference to Appendix No. 20, amounted to \$50,160.73.

## OBSERVATORIES.

The annual reports of the directors of the Magnetic Observatory at Toronto, and the Observatories at Montreal and Kingston, form appendices to this report. By reference to Appendix No. 21, it will be found that \$5,238.16 was expended on the Magnetic Observatory at Toronto, and \$500 each on the Montreal and Kingston Observatories. The total expenditure on the Meteorological and Observatory Service for the past fiscal year amounted to \$56,398.89.

## SIGNAL SERVICE IN THE RIVER AND GULF OF ST. LAWRENCE.

This service was organized in 1879, with eight stations, and since that date nineteen have been added, making the number now in operation twenty-eight. Fifteen of them are located on the River St. Lawrence, and the remainder in the Gulf. The service has been satisfactorily performed during the past season, and daily reports as to wrecks and casualties, state of weather, passing vessels, &c., have been supplied to the Boards of Trade and the Press, at Quebec and Montreal. The sum of \$7,500 was appropriated by Parliament for this service, and the expenditure for the last fiscal year amounted to \$6,704.17.

## HUDSON BAY EXPEDITION.

The report of Lieutenant Gordon, R.N., Deputy Superintendent of the Meteorological Service, on the conduct of the Hudson Bay Expedition, together with the report of Dr. Bell, who accompanied the expedition as medical officer and geologist, forms Appendix No. 30 to this report. The sum of \$30,000 was appropriated by Parliament for this service, but the sum of \$490.69 only was expended during the last fiscal year.

## GEORGIAN BAY SURVEY.

The report of Commander Boulton, R.N., as to the operations of the survey during the past season, forms Appendix No. 23 to this report. The sum of \$27,000 was appropriated by Parliament for the purposes of this survey, and the expenditure during the fiscal year ended 30th June last amounted to \$26,745.54, as will be seen by reference to Appendix No. 29.

## PORT WARDENS.

From the report of the Port Warden for Montreal, transmitted by the Montreal Board of Trade, it appears that the arrivals at the port show a slight decrease as compared with the previous year, both in number of ships and amount of tonnage, 322 ships with an aggregate tonnage of 488,753 tons being reported, as against 335 ships with a tonnage of 489,741 tons. In these arrivals vessels from Newfoundland and places within the Dominion are not included, as they do not come under the jurisdiction of the Port Warden. No missing ships were reported from the Port of Montreal during the year, nor any ships lost by overloading or from shifting of

cargo. The import trade is reported as not quite up to that of last year in volume, except in the article of sugar, which was largely in excess of previous years. The export of grain fell off nearly 2,500,000 bushels as compared with preceding year, but this deficiency has been made up by an increase in flour, phosphates, bacon, cheese and deals, flour being largely in excess; 7,421,152 bushels of grain were shipped, against 9,781,001 bushels in 1883, and 446,480 barrels of flour, against 294,353 barrels in 1883. The shipment of deals to Great Britain, and of lumber to South America, were in excess of previous years. The shipment of phosphates is steadily increasing, 20,461 tons being shipped, against 17,160 tons in 1883, and there is also an increase in the cattle export trade; 56,643 head of cattle and 63,143 sheep were shipped, against 50,345 head of cattle and 102,347 sheep. The receipts of the Port Warden's office during the year amounted to \$8,957.04, and the expenditure to \$8,267.46.

From the report of the Port Warden at Quebec, it appears that during the year he surveyed 125 steamships and sailing vessels with general cargoes; examined and surveyed 47 vessels on account of stranding, collision, &c.; surveyed and sold 15 lots of merchandise and examined, condemned and sold as wrecks three vessels, in compliance with the provisions of the Port Warden's Act. The fees received amounted to \$1,609.71, and the expenses to \$966.15.

The Port Warden at Halifax, N.S., reports that during the year he held surveys upon 46 vessels which arrived in a damaged condition. The fees for survey of these vessels amounted \$1,292, and for survey of hatches, stowage and damaged goods, to \$1,204, and for other services, \$289.95, making in all \$2,785.95. The expenses amounted to \$1,036.04.

The Port Warden at Charlottetown reports that he surveyed three vessels which arrived in a damaged condition. The fees derived from surveys amounted to \$611, and the expenses to \$147.90.

The Port Warden at Port Hawkesbury surveyed ten damaged vessels and received fees to the amount of \$272.

The Port Warden at Sydney surveyed 45 vessels and received fees to the amount of \$375.

The Port Warden at North Sydney surveyed 27 vessels and received fees to the amount of \$271.

The Port Warden at Chatham, N.B., held surveys on six vessels and received fees to the amount of \$137.50.

The Port Warden at Picton reports receipts of fees to the amount of \$285 for survey of vessels arriving in a damaged condition.

The Port Warden at Rimouski reports that he held no surveys and collected no fees during the year.

By Order in Council of the 24th October last, Mr. Edward Quennell was appointed Port Warden for the Ports of Nanaimo and Departure Bay, B.C., his salary to be the fees collected.

#### MERCHANT SHIPPING.

The total number of vessels remaining on the register books of the Dominion on the 31st December, 1884, including old and new vessels, sailing vessels, steamers and barges, was 7,254, measuring 1,253,747 tons register tonnage, being a decrease of 120 vessels and 13,647 tons register, as compared with 1883. The number of steamers on the registry books on the same date was 1,073, with a gross tonnage of 207,669 tons. Assuming the average value to be \$30 per ton, the value of the registered tonnage of Canada, on the 31st December last, would be \$37,612,410.

The number of new vessels built and registered in the Dominion of Canada during the last year was 387, measuring 72,411 tons register tonnage. Estimating the value of the new tonnage at \$45 per ton, it gives a total value of \$3,258,495 for new vessels

A statement follows, showing the number of vessels and number of tons on the register books at the different ports of registry in the Dominion, on the 31st December last, along with a comparative statement of the tonnage from 1873 to 1884. A statement is also published of the number of vessels built and registered in the Dominion during the last year, and a comparative statement of the number of new vessels built and registered from 1874 to 1884, both inclusive.

The following persons were appointed Measuring Surveyors of Shipping during the calendar year of 1884, viz. :—

Mr. Martin L. Oliver, Digby, N.S., in place of Mr. G. A. Viets, resigned.

Mr. Walter Dobson, Dorchester, N.B., in place of Mr. John Hickman, who was superannuated.

Mr. J. W. Binney, Moncton, N.B., in place of Mr. James Robertson, who died in October, 1883.

Permission was given to change the names of the following vessels during last year :—

Steamer "W. S. Turner," of Kingston, official number 83,300, changed to "Queen of the Isles."

Schooner "Phoenix," of Parrsboro', official number 85,620, changed to "Weatherspoone Brothers."

Steam yacht "Zenobia," of Montreal, official number 58,826, changed to "Evangeline."

Steam tug "W. H. Pringle," of Windsor, Ont., official number 88,623, changed to "International."

Steam tug "Charles Kellogg," of Windsor, Ont., official number 88,622, changed to "Charlton."

The following wrecked vessels were registered, by authority of His Excellency the Governor-in-Council, during the last calendar year, after being thoroughly repaired and made seaworthy, viz :—

| Name of Vessel.     | Official Number. | Port of Registry. |

**COASTING TRADE OF CANADA.**

By the provisions of the Act 33 Vic., cap. 14, respecting the coasting trade of Canada, no goods or passengers can be carried by water from one port in Canada to another, except in British ships, but the Governor in Council may from time to time declare that the Act shall not apply to the ships or vessels of any foreign country in which British ships are admitted to the coasting trade of such country. The Parliament of Canada was empowered to pass the Act alluded to under the provisions of the Imperial Act 32 Vic., cap. 11, intituled: "An Act for amending the law relating to the Coasting Trade and Merchant Shipping in British Possessions," which came into operation in this country on its proclamation by the Governor General, on the 23rd October, 1869.

It having been ascertained that the following countries, viz.: Italy, Germany, Netherlands, Sweden and Norway, Austro-Hungary, Denmark and Belgium, allowed British ships or vessels to participate in their coasting trade on the same footing as their own national vessels, the ships of Italy, by Order in Council of the 13th August, 1873; those of Germany, by Order in Council of the 14th May, 1874; those of the Netherlands, by Order in Council of the 9th September, 1874; those of Sweden and Norway, by Order in Council of the 5th November, 1874; those of Austro-Hungary, by Order in Council of the 1st June, 1876; those of Denmark, by Order in Council of the 25th January, 1877; those of Belgium, by Order in Council of the 30th September, 1879, and those of the Argentine Republic, by Order in Council of the 18th May, 1881, were admitted to the coasting trade of Canada.

**REWARDS FOR SAVING LIFE.**

In the Supplement will be found a list of persons to whom rewards or testimonials have been granted by the Government of Canada for humane exertions in saving life from Canadian waters, and for generous services in caring for shipwrecked crews, and also of rewards given for saving life on the shores of Canada.

**ESTABLISHMENT STAFF AT OTTAWA.**

In Appendix No. 27 a statement is given showing the names of the members on the Establishment Staff of the Department at Ottawa, the rank held by each, and the amount of salary they severally received during the fiscal year ended 30th June, 1884.

## OUTSIDE SERVICE.

The number of persons employed on the Outside Service on the 31st December, 1884, was as follows.—

|   |       |
|---|-------|
| Superintendent of Lights and Light-keepers, &c., in Ontario and above Montreal.....   | 131   |
| Officers of Agency in City of Quebec, and Light-keepers, Fog-whistle Keepers, &c., at and below Montreal, in the Province of Quebec.....            | 206   |
| Agent, Clerk, Messenger, Superintendent of Light, Light-keepers, Fog-whistle Keepers, Attendants at Humane Establishments, &c., in Nova Scotia..... | 207   |
| Agent, Clerk, Messenger, Superintendent of Lights, Light-keepers, Fog-whistle Keepers, &c., in New Brunswick...                                     | 82    |
| Agent and Light-keepers in Prince Edward Island.....  | 34    |
| Agent and Light-keepers in British Columbia.....  | 10    |
| Officers and Crews of Dominion Steamers and Vessels.....  | 167   |
| Inspectors of Steamboats.....   | 15    |
| Examiners of Masters and Mates, and Clerk to Chairman of Board.....   | 20    |
| Harbour Police, Montreal and Quebec.....  | 74    |
| Officers and Servants in Marine Hospitals.....  | 75    |

| Harbour Masters.....  | 170   |
| Officers of Observatories, Meteorological Observers, &c., receiving pay.....  | 96    |
| Receivers of Wreck.....   | 37    |
| Wharfingers.....  | 14    |
| Making a total of.....  | 1,363 |

For the previous year, prior to the division of the Department, the number was 1,991, including Fisheries officers. In addition to the 1,363 mentioned above, there are 76 Registrars of Shipping, who act under the direction and control of this Department, but are, at the same time, Collectors of Customs at the various Ports of Registration, and receive no salary or fees in their capacity of Registrars. There are 85 Measurers and Surveyors of Shipping at certain ports throughout the Dominion, who act as officers of this Department, and are remunerated from their fees of office, although, in addition to such office, many of them hold a position in the Customs Service. Also, in addition to the above, by Orders in Council of the 21st April and 2nd December, 1874, the Chief Officer of Customs at each port in the Provinces of Quebec, Nova Scotia, New Brunswick, British Columbia and Prince Edward Island,

---

where no separate Shipping Office has been established, is to be held and deemed a Shipping Master, is to receive the fees, make half-yearly returns to this Department, and act in that capacity under its instructions.

From the above statement it will be seen that there are 96 Officers of Observatories, &c., who receive pay for the performance of their duties, but in addition thereto, there are a large number of Meteorological Observers throughout the Dominion who give their services gratuitously.

I have the honour to be, Sir,

Your most obedient servant,

WM. SMITH,

*Deputy Minister of Marine.*

DEPARTMENT OF MARINE,

OTTAWA, 1st January, 1885.

APPENDIX No. I

To the Seventeenth Annual Report of the Department of Marine and Fisheries, being Statement of Expenditure on account of Maintenance of Lights above Montreal, for the Fiscal Year ended 30th June, 1884.

APPENDIX No. 16

TO THE SEVENTEENTH ANNUAL REPORT OF THE DEPARTMENT OF MARINE AND FISHERIES, BEING REPORT ON THE MARINE AND IMMIGRANT HOSPITAL AT QUEBEC, FOR THE FISCAL YEAR ENDED 30TH JUNE, 1884.

MARINE HOSPITAL, QUEBEC, 15th September, 1884.

To the Honorable  
The Minister of Marine and Fisheries,  
Ottawa.

SIR,—The trustees of the Marine and Immigrant Hospital at Quebec have the honor to submit the following Report:—

The expenses incurred in the maintenance of the hospital during the fiscal year 1883-84 amounted to \$19,990.34. Of this sum \$17,391.34 was a charge upon the Federal Government; the balance, viz., \$2,599.00, was met as follows:—

|  |            |
|--|------------|
| Grant from the Province of Quebec..... | \$2,400 00 |
| Rent of beach lots.....                | 120 00     |
| Board of patients.....                 | 76 00      |
| Sale of ashes.....                     | 3 00       |
|  | \$2,599 00 |

The report of the resident physician on the admissions, discharges and deaths which have occurred in the hospital during the year may be summed up as follows:—

|  |        |     |
|--|--------|-----|
| Number of patients in the hospital on the 30th June, 1883... | 75     |     |
| Number of admissions .....                                   | 654    |     |
|  |        | 729 |
| Number of discharges.....                                    | 640    |     |
| Number of deaths.....  | 25     |     |
| Number of patients in hospital on 30th June, 1884.....       | 64     |     |
|  |        | 729 |
| Total number of days' attendance in hospital.....            | 15,517 |     |
| Average of do do do .....                                    | 24     |     |
| Rate per cent. of mortality.....                             | 3.4    |     |

The report of the resident physician submits that with regard to the attendance of patients there is a falling off of 105 in the number of admissions, and a decrease of 4,525 days' attendance. This result is due somewhat to the limited number of vessels which have frequented the port, and to the excellence of the sanitary state of their crews and passengers, but principally to the rigid control the Commissioners exercised on the admission of sick patients of the city.

This diminution referred to by the Commissioners in the number of patients admitted, and their attendance, has enabled them to reduce to \$1,500 a deficit of \$2,800 they had last year.

The death rate has been lower than at any other period—3.4 per cent. These figures will be all the more significant if it is noted that, of the twenty-five deaths mentioned, several were the result of accidents, death occurring on the same day of admission, or the day following.

The trustees, under the apprehension that cholera would be introduced here, would have wished to devote, to the purchase of bed furnishings, &c., a sum proportionate to the presumed requirements of the hospital, but the state of their finances would not allow them to incur this expenditure. The trustees believe it their duty to take this opportunity to solicit a supplementary subsidy in the event of cholera visiting Canada.

All of which is humbly submitted.

P. WELLS, M.D.,  
*Secretary.*

-----

RETURN of Patients treated in the Marine and Immigrant Hospital at Quebec, for the year ending 30th June, 1884.

|   | Seamen. | Immigrants. | Residents. |
|---|---------|-------------|------------|
| Remaining in hospital, 1st July, 1883.....  | 46      | 6           | 23         |
| Admitted during the year.....               | 372     | 103         | 179        |
| Total treated during the year.....          | 418     | 109         | 202        |
| Discharged during the year.....             | 372     | 93          | 175        |
| Died during the year.....                   | 9       | 5           | 11         |
| Remaining in hospital, 30th June, 1884..... | 37      | 11          | 16         |
| Number of days in hospital.....             | 6,328   | 1,499       | 7,690      |

WM. SMITH,  
Deputy Minister of Marine.

F. GOURDEAU,  
Acting Accountant.

## APPENDIX No. 28.

TO THE SEVENTEENTH ANNUAL REPORT OF THE DEPARTMENT OF MARINE AND FISHERIES, BEING REPORT OF GEORGIAN BAY SURVEY DURING THE SEASON OF 1884.

OTTAWA, 13th November, 1884.

The Honourable

The Minister of Marine and Fisheries.

SIR,—I have the honour to inform you that since the date of my last Annual Report I have been employed as follows:—

During the winter of 1883-84 my time was fully occupied in office, in the computations resulting from the field work of the previous autumn, together with the preparation of my rough sheets for filling in during the summer of 1884.

On the 22nd of March, 1884, Mr. W. J. Stewart, Lieutenant Canadian Militia, First Graduate and Gold Medallist of 1883, from the Royal Military Academy, Kingston, was appointed my assistant. The manner in which he was able to take up and duplicate my previous calculations showed the sound mathematical training his abilities had enabled him to take advantage of at the Royal Military Academy.

On the 25th of April, having taken possession of the surveying instruments ordered by the Department from England, I left Ottawa for St. Catharines, to superintend the especial fittings necessary for a surveying vessel.

In order to get on my ground at as early a date as possible (the spring being now well advanced), exceptional means had to be adopted in the fitting out of H.M. Dominion surveying steamer "Bayfield."

In connection with the swinging of the ship for compass deviation, I established at Port Dalhousie posts, to enable masters of vessels, on their way through that great thoroughfare, the Welland Canal, to test their steering compasses on the four quadrantal points, so that by means of directions printed at the expense of the Department of Railways and Canals, the error on any course may be approximately determined.

On the 26th of May Georgian Bay was reached, and on the 28th of October, the weather being no longer suitable for profitable surveying work, the vessel was laid up at Owen Sound, as being the nearest harbour containing a dry dock and other facilities for refitting.

In the interest of the survey, I trust this will remain the winter port as long as the survey of Georgian Bay continues. Between the above mentioned dates the time was occupied in surveying in detail, on a scale of 1 inch to the nautical mile, that part of Georgian Bay bounded on the west by and including the south-east coast of Grand Manitoulin Island, and on the east by the meridian running through Cabot's Head, as far north as the parallel of Cape Smith.

This includes the various channels leading into Georgian Bay from Lake Huron. In addition to this, plans on a large scale were made of Tobermory (Collin's) Harbour, and Club Island Harbour.

The peculiarly irregular character of the bottom necessitated very close sounding, the number of linear miles being 2,120, and square miles 790. These figures but inadequately represent the amount of work, as in the especial examination of a shoal for the shallowest part (which is usually very small, and therefore easily missed), many more depths have to be taken than can be put down on the paper, as well as miles traversed, which can not be measured.

The number of miles of coast line chartered was 150.

Owing to the almost continuously breezy weather, much of the work which would otherwise have been done in the open boat had to be accomplished in the

vessel. This, among the many reefs in the vicinity of the entrance to the bay, was attended with considerable anxiety.

In consequence, however, of the local knowledge and vigilance displayed by my sailing master and pilot, Alexander McGregor, and the unceasing attention paid to the engines by my chief engineer, Mr. Charles Linter, I was enabled to take the vessel in closer proximity to those dangers than under less fortunate circumstances would have been prudent.

On Sunday, the 7th of September, hearing that a vessel was ashore on the Lake Huron side of Fitzwilliam Island, I proceeded to her assistance, and found her in a perilous position, on a reef I had just examined. The extent of the reef made it difficult to approach her with safety, but after sundry attempts, we had the satisfaction of extricating her. The particulars were reported to you in my letter of the same date.

The season was not favorable to hydrographical surveying, being as before stated unusually windy, even for Georgian Bay, together with the hazy weather, caused no doubt by bush fires.

As the correct knowledge of the magnetic declination, commonly called the variation of the compass, is an essential feature in a new chart, requiring, if possible, better instruments and more time than I can well spare out of a short summer, I would respectfully request that the Superintendent of the Toronto Observatory, where proficiency and interest in this particular branch of science is so well known, be instructed to take, with the delicate magnetical instruments in his possession, such observations as will give a more accurate position of the isogonics in this locality, where the Laurentian and Silurian formations impinge, and from which contiguity one would naturally expect abnormal changes.

In the interests of this survey, I think it advisable the Department should know that, to the crew, hydrographical surveying is extremely monotonous work, which is the hardest kind of all work—that, unlike seafaring men in other employments, they do not see their homes from the beginning to the end of the season.

That giving the depth of the water—a mistake in which may involve the loss of a vessel and lives—is a responsible duty, and can only be entrusted to intelligent and trustworthy men.

The season for hydrographical surveying is necessarily shorter than that on other employments in which they would be engaged.

I mention these circumstances to show you that, in order to induce first-class men to join and stay in this work, good wages must be given, and every material comfort that the circumstances can afford.

I am happy to say, for the credit of a Dominion Government vessel, that among thirteen working hands, placed occasionally in very tempting circumstances, that in the whole five months not the slightest suspicion of insobriety or disobedience occurred, and I trust that nothing will transpire which will prevent their rejoining, such being their present intention. The country suffers a great pecuniary loss by the time occupied in breaking in new hands.

The time of my assistant and myself will be fully occupied during the present winter in preparing, subject to your approval, for the engraver in London, under the auspices of the Hydrographer to the Admiralty, a coast sheet of the work done during the past season. This chart I trust will be in circulation by the opening of navigation. Accompanying sailing directions, being the commencement of "The Georgian Bay and North Channel Pilot," will also be prepared for the printer.

I propose next summer to continue the survey westward into the North Channel, more especially as I have my skeleton sheets for that locality, as far westward as Gore Bay, already prepared, and a portion of that district sounded. In these waters a small steam launch would be of service.

The size of the "Bayfield" will not admit of another boat's crew, which an additional assistant would necessitate.

I have the honour to be, Sir,

Your obedient servant,

J. G. BOULTON,

*Staff-Commander, R.N., in charge of Georgian Bay Survey.*

 APPENDIX No. 30.
 

---

 REPORT OF THE HUDSON'S BAY EXPEDITION, UNDER THE COMMAND  
 OF LIEUT. A. R. GORDON, R.N., 1884.
 

---

METEOROLOGICAL OFFICE, TORONTO,

1884.

 The Honorable A. W. McLELAN,  
 Minister Marine and Fisheries,  
 Ottawa.

SIR,—I have honour to submit, herewith, my report on the conduct of the Hudson's Bay Expedition of this year, under my command.

I desire to acknowledge the cordial assistance and co-operation which I received from Dr. Bell, who was appointed as medical officer and geologist to the expedition; and also from Mr. W. W. Fox, who accompanied the expedition as a volunteer. Both Mr. Fox and Dr. Bell took large numbers of photographs of the various posts and the scenery of the coast. Mr. Fox also made free-hand sketches of the coast profile, at many points, for me.

Dr. Bell's report forms Appendix A to this Report.

Appendix B is a series of tables showing temperature, &c., at Fort Chimo, in Ungava Bay, taken by Mr. Lucien M. Turner, of the United States Signal Service, which he has favored us with, by kind permission of General Hazen, the chief signal officer of the United States army.

Of the officers and men forming the staff of the expedition, it gives me much pleasure to report that they, each and all, performed the several duties assigned to them in the most satisfactory manner.

The Report submitted herewith is divided into the following sections:—

1st. Narrative.

2nd. Navigation—including Ice, Currents and Meteorological Observations.

3rd. Resources of the Region.

4th. Trade.

5th. Natural History, Inhabitants and Fauna.

6th. Proposed Work for next Year.

Appendix A.—Report of R. Bell, Esq., M.D., F.G.S.

Appendix B.—Observation, at Ungava Bay, by L. M. Turner, Esq., United States Signal Service.

I have the honour to be, Sir,

Your obedient servant,

ANDREW R. GORDON, Lieut., R.N.,

*Commanding H. B. Expedition.*

---

The Honorable A. W. McLELAN,  
Minister Marine and Fisheries,  
Ottawa.

SIR,—I have the honour to report, relative to the Hudson's Bay Expedition, that, in accordance with your letter of instructions, dated 5th July, I proceeded to Halifax, N.S., and took charge of the preparations for the expedition.

On the 14th of the same month I received the following note from Messrs. S. Cunard and Co. :—

“ HALIFAX, N.S., 14th July, 1884.

‘ Lieut. A. R. GORDON, R.N.,  
“ Halifax, N.S.

“ DEAR SIR,—In accordance with instructions received from Messrs. Job Bros., we “ this day hand over to you the S.S. ‘ Neptune,’

“ Yours truly,

“ S. CUNARD & CO., Agents.”

The “ Neptune ” having been placed at the disposal of the Department, the greatest dispatch was used in coaling and putting on board the supplies for the expedition, and at two o'clock in the afternoon of Tuesday, 22nd July, the coals, lumber and other supplies being on board, the members of the expedition embarked, and one hour later we left our moorings at the Marine Wharf for Hudson's Bay.

The staff of the expedition was composed as follows :—

Robert Bell, M.D., F.G.S., of Ottawa, geologist and medical officer.

Messrs. R. F. Stupart, of Toronto; C. R. Tuttle, of Winnipeg; W. A. Ashe, of Quebec; C. V. Deboucherville and A. N. Laperriere, of Ottawa; William Skynner, of Springfield, Ont.; H. M. Burwell, of London, Ont.; and H. T. Bennett, observers.

Mr. W. W. Fox, of Toronto, photographer.

Messrs. Yeadon, McNeill and Quigley, carpenters.

Messrs. R. Currie, J. E. Campbell, H. M. Rainsford, W. H. Jordan, M. W. Keating, Fred. Drysdale, Jno. W. Chaplin, John W. McDaniel, W. F. Esdaile, Andrew Inglis, Adam Maher and Robert Youill, stationmen.

The officers and men, who remained out all winter, had each of them been examined by medical men, and pronounced physically well-fitted to withstand the rigors of an Arctic climate.

The expedition touched at Blanc Sablon on the 26th of July, and on the evening of Tuesday the 29th anchored in Ford's Harbour, at the east end of Paul's Island. At this place I went on shore and arranged with Mr. Ford to pilot us into Nain. He boarded the “ Neptune ” at daylight the following morning, and by nine o'clock we had anchored off the Nain Mission House.

I visited this place in the hope of obtaining furs for the men who were to remain at the stations during the winter, and of being able to engage Eskimo interpreters. I secured a few articles of fur clothing, but there were no interpreters to be had. The Chief Superintendent of the Mission told me, however, that, in all probability, I would be able to procure some fur clothing, and interpreters as well at the Hudson's Bay Co.'s Post at Nachvak, still further to the north, on the Labrador coast.

We remained at Nain during the day and were kindly treated by the missionaries who, besides imparting religious instruction to the natives, carry on an extensive trade with them. They have six stations in all on this coast, of which Nain is the capital. The others are Hopedale, Zoar, Hebron, Okkak and Ramah. During the day I took observations to ascertain the dip of the magnetic needle and vibrations for horizontal force, but was unable to obtain sights for the error of the chronometer or variation, owing to the inclemency of the weather.

During the voyage from the Gulf of St. Lawrence to this place we met with a great number of icebergs, both in the Straits of Belle Isle, and off the Labrador coast, north of it.

The expedition left Nain about 4:30 o'clock on the morning of 31st July, and reached Nachvak Bay about noon on the 1st of August, and cast anchor before the Hudson's Bay Co.'s post at Nachvak, about 4 o'clock in the afternoon. Here I met Mr. George Ford, the agent of the Hudson's Bay Company and a brother of our Nain pilot. From him and from the natives in the vicinity I purchased some skin clothing, and through his kind assistance was enabled to procure the services of Mr. James Lane, an Eskimo half-breed of Nachvak Bay as interpreter.

I learned from Mr. Ford that ice takes over the harbour of Nachvak, latitude  $59^{\circ} 10' N.$ , longitude  $63^{\circ} 30' W.$ , about the middle of November in each year and that for the last seven years it has broken up within a day of the 26th of June in each year.

On the 2nd of August, at day light, we left the post at Nachvak, and after taking Mr. Lane on board at the mouth of the Bay, proceeded to sea for Cape Chidley. On the morning of the 3rd—Sunday—the fog was so dense that we were compelled to stand off to sea, and lie to. Noon position, lat.  $60^{\circ} 51' N.$ , long.  $64^{\circ} 14' W.$ , D. R.

The fog continuing, we were obliged to lay to all day Sunday, all night Sunday night, all day Monday, and all night Monday night, off the entrance to Hudson Strait. Noon position Monday, 4th August, D. R. lat.  $61^{\circ} 12' N.$ , long.  $64^{\circ} 13' W.$

At daylight on Tuesday, 5th August, the weather was clearing, and by sunrise it was bright and fair. At noon we were approaching Cape Chidley, having been carried some forty miles to the south whilst laying-to in the fog. We steamed through Grey Strait, between the Cape and the Button Islands, keeping a close look out for a harbour. At three o'clock in the afternoon we anchored in a fine harbour on the north-western shore of the Cape, at the entrance to Ungava Bay.

On the shore of this harbour I selected the site for Observing Station No. 1, and named the place Port Burwell, after the observer appointed to that station. Two families of Eskimos were discovered about six miles distant from Port Burwell.

The work of landing lumber and supplies was begun at once, and by 4 o'clock on the afternoon of Friday the 8th, the buildings were up and all was in readiness for departure. I placed Mr. H. M. Barwell, of London, Ontario, in charge of this station, with Messrs. Currie and Campbell as stationmen, and besides giving him full directions verbally, left with him, as also with each of the other observers, a copy of the following general instructions:—

#### INSTRUCTIONS TO OFFICERS IN CHARGE OF STATIONS IN HUDSON'S BAY AND STRAITS.

As the primary object of the whole expedition is to ascertain for what period of the year the Straits are navigable, all attention is to be paid to the formation, breaking up and movements of the ice.

Each station is supplied with a sun dial and time piece, and the clock is to be tested each day when there is sunshine about noon. A table of corrections is supplied for the reduction of apparent time to local mean time, to this the difference of time will be applied to 75th meridian, all entries being made in the time of this meridian, and observations will be taken regularly at the following times throughout the year, viz., 3 h. 08 m., 7 h. 08 m., 11 h. 08 m., a.m. and p.m.

Each morning the sums and means of the observations taken on the previous day will be taken out and checked over, they will then be entered in the abstract books supplied for the purpose.

After each observation during day light the observer on duty will take the telescope and carefully examine the Straits, writing down *at the time* all that he sees, stating direction and (when possible) velocity of tide, movement of ice, if any, also describe the condition of the ice, whether much broken up, solid field, &c., &c.

*Tidal Observations.*—Each day the time and height of high and low water is to be carefully observed, and during the open season the character of the tide will be carefully noted for two days before and three days after the full and change of the moon. For this purpose a post marked off in feet and fractions of a foot is to be placed in the water, at low water in some sheltered spot, if any such be available.

and the height of the water noted every half hour during the rise and fall of one tide on each of these days—the height to be noted most carefully every five minutes during the hour of high water and the same at low water—the five minute observations will also be taken for one hour during the most rapid portion of the rise. Special observations of barometric pressure are to be taken in connection with these tidal observations.

To check the zero mark for the tidal observation post, select a spot on shore from which the horizon line will be projected on the tidal post, and record the reading of this line when seen projected on the post by the observer, whose eye is to be placed at a measured height above the datum point selected on shore.

All remarks in regard to the movements of birds, fish, &c., and also as to the growth of grasses, will be carefully entered.

As it is impossible to give to the officers in charge of stations detailed instructions which would be of service in every contingency which might arise, the officers are required to observe and enforce the following rules:—

(a.) Every possible precaution is to be taken against fire, and as it is anticipated that the temperature can be maintained considerably above the freezing point inside the houses, two buckets full of water are always to be kept ready for instant use.

(b.) As the successful carrying out of the observations will, in a great measure, depend on the health of the party, the need of exercise is strongly insisted on during the winter months, and also that each member of the party shall partake freely of the lime juice supplied.

(c.) Each party is supplied with a boat, but unless some emergency required it, it must be a rule that neither afloat nor ashore must any of the party leave the station for a greater distance than they can be sure of being able to return the same day.

(d.) As soon as possible after the houses are completed and the stores all in place, the party will set to work collecting sods, grass or any other non conducting material, and before the winter sets in the whole house is to be covered with this, boards overlaid and snow packed over all; the assistance of the Esquimaux should, if possible, be obtained, and the whole house arched over with snow.

ANDREW R. GORDON, Lieut. R.N.,  
*Commanding Expedition.*

OTTAWA, 5th July, 1884.

The expedition left Port Burwell at 5 o'clock on the evening of the 8th, and shaped course for the Lower Savage Islands, where it was intended that Station No. 2 should be placed. On the following morning there was a dense fog until 8 o'clock, when it lifted, and at 9 o'clock we sighted Resolution Island. We passed a number of icebergs in the forenoon, and passed between Resolution Island and the Lower Savage Islands to East Bluff, then going about and steering along the south coast of the Lower Savages.

We spent the day in looking for an anchorage at the Lower Savages, and on a portion of the north main coast, a boat was sent ashore twice to examine what appeared to be possible harbours; but, on both occasions, the report was unfavourable; there was a stiff breeze blowing all day. At nightfall we pushed out into the Strait and laid to until morning, when it was intended to renew the search. At daylight on the morning of the 10th, we steamed shorewards and examined part of the coast north of the Lower Savages, but a heavy snow storm setting in, with a fresh gale from the south-east, and a falling barometer, I decided to abandon Resolution Island Station for the time being, and push on towards North Bluff. The latter place was reached about 4 p.m., on Monday, the 11th, after working our way through some open stretches of ice. Here we found a good anchorage on Big Island (called by Schwatka, Turenne Island), which forms the southern side of North Bay.

A suitable place was selected for the station buildings, and the place was called Ashe's Inlet, after Mr. W. A. Ashe, the observer assigned to that station.

We found here a number of Eskimos, who seemed to be much pleased at seeing white people coming into their country.

We were delayed a good deal at Ashe's Inlet by bad weather and by the field ice coming into the harbour and interfering with the work of landing lumber and supplies, but at noon on the 16th all was in readiness for the start. I left with Mr. Ashe, for the time being, Mr. Skynner and his two men, Messrs. Rainsford and Jordan, whom I was unable to place on Resolution Island, and at 2:30 the "Neptune" was directed towards the south shore of the strait, and at 8 o'clock on the morning of the 17th we sighted the north-west shore of Prince of Wales Sound.

On approaching the land, we forced our way through about twelve miles of field-ice, more or less compact. Towards the shore the ice was more open, and much of it was aground in three and four fathoms of water. We anchored about 2 p.m. in a well-sheltered bay, about three miles along the north-west coast of the sound, from the south main shore of the strait. A few minutes later a number of Eskimos were seen on shore. They were very much delighted when they learned that we were going to establish a station among them. I named this place Stupart's Bay, after Mr. R. F. Stupart, the observer assigned to that station.

On account of the magnetic observations to be taken, two extra buildings were required at this station, but notwithstanding the extra work to be done, everything was in readiness for our departure on the evening of the 22nd.

Accordingly we left Stupart's Bay on that evening, and had to work our way through about eighteen miles of more or less compact field ice. We laid-to in the ice all night. On reaching the open water we shaped our course so as to clear the eastern point of Charles Island, after clearing which we steamed towards Nottingham Island, and succeeded in making a good harbor on the south-east shore of that island about 3 o'clock on the 24th.

On approaching Nottingham Island we found very heavy ice, extending for some fifteen or twenty miles eastward from that island and Salisbury, filling the channel between these islands and extending southward towards Cape Wolstenholme as far as we could see.

On approaching the harbour we had the misfortune to break one blade off the propeller. Fortunately a spare fan had been brought in the ship, and beyond the work entailed by unshipping the broken one, fitting the shaft in the new one and getting it into position, which occupied the engineers about three days, we suffered no damage in consequence.

Soon after our arrival at Nottingham we sighted four vessels in the channel between us and the south main shore. They were about twelve miles distant, and fast in the field ice. Later we passed near enough to one to observe that she was bark rigged, and probably the outgoing Hudson Bay Company's vessel, and to another, an American whaling schooner, to exchange salutes with her by dipping ensigns.

We met with no natives at Nottingham Island. The work of erecting station buildings and landing the supplies occupied us until the morning of the 29th, when, at 9 o'clock a.m., having taken leave of Mr. C. V. DeBoucherville, the observer assigned to that station, and his men, Messrs. Esdaile and Inglis, we left the harbour, which I had called Port DeBoucherville, and steamed out among the ice towards Mansfield Island.

We found the ice exceedingly heavy and closely packed, so much so that after ramming our way some five miles out, and while yet within sight of the harbour, we were compelled to lay to until the change of tide should loosen it. After three hours' waiting, we again went ahead with the engines, the ice having run abroad a little; but when darkness closed upon us, we were still in the ice and were compelled to lay to until the morning.

Soon after daylight on Saturday morning, the 30th, we got out of the ice into the open water of Hudson's Bay, and by 7 o'clock sighted the low, barren shores of Mansfield Island. According to the original plan, a station was to have been placed on this island, but after coasting its eastern shores without finding an anchorage, I decided, about 7 o'clock in the evening, to abandon it altogether, and push on across the bay, in the hope of being able to place a station on Cape Digges on the return voyage.

Meanwhile, however, I proposed to examine the shores of Southampton Island, which lies to the north-west of Mansfield, with a view of ascertaining if that would be a more suitable place for a station. I did this on Sunday, skirting the south-east shore from Cape Southampton, some fifty miles, without finding an anchorage.

We then directed our course towards the north-west of the bay, in order to visit Marble Island, and to see if the northern part of the bay was free of ice. At noon on the first day of September we were off the mouth of Chesterfield Inlet, no ice having been sighted.

We then bore up for Marble Island, where we arrived early in the morning of 2nd September, and anchored in the Whalers' Harbour at the south-west of the island, and remained until seven o'clock in the evening.

During the day I took observations to ascertain the latitude and longitude, the variation of the compass and the dip of the magnetic needle, and in the afternoon made a hurried survey of the harbour.

We were somewhat disappointed at not finding native or other inhabitants on the island, and surprised at seeing so many evidences of the dead, there being no less than nineteen graves on Dead Man's Island, which forms the southern side of the harbour, and a monument commemorating the death of six more who had been drowned in a whale boat, in the "Welcome."

While at Marble Island I found a letter that had been left in a bottle by Capt. Fisher, of the whaling bark "George and Mary," that had wintered in the harbour. The letter was probably intended for one of the out-going whaling vessels. I made a copy of the letter, which is as follows:—

"Aug. 7, 1884.—On board the bark "George and Mary," Marble Island. All well. Three whales. The north part of the bay has been filled with ice since the 10th of July. Could not get up the Welcome, nor to the east shore. Had a very cold winter and spring. On the 23rd of May the thermometer was 4° below zero. Got out the 7th of June. Laid in the outer harbour all winter. No natives came to the ship while we lay at Marble Island. Had plenty of scurvy, but came out of it all right. Shall stay in the Welcome until the last of August, then start for home if nothing happens.

"(Signed), E. B. FISHER,  
of the 'George and Mary.'"

From Marble Island we directed our course towards Churchill, meeting with heavy weather on the voyage, and arriving off the mouth of the Churchill River on the evening of the 3rd. Owing to heavy north-west winds, fog, and to our not being acquainted with the approach to Churchill Harbour, we were compelled to lay-to off Cape Churchill until the forenoon of the 6th, when, the weather clearing, we steamed into the harbour and anchored.

At this place I received and accepted the resignation, owing to ill-health, of Mr. C. R. Tuttle, who had been appointed observer at Churchill, and arranged with Mr. Spencer, the agent of the Hudson's Bay Company stationed there, to take the required meteorological observations, engaging, on behalf of the Government, to pay him a salary of \$120 per year.

We remained at Churchill, taking ballast, &c., until the 9th, when, about 7 o'clock in the evening, we started for York Factory.

I must acknowledge the extreme kindness and generous attention extended to the expedition by the officers of the Hudson's Bay Company at Churchill. They did all in their power to make our visit pleasant, and to supply me with fur clothing, &c.

We arrived in sight of the beacon at York Factory on the morning of the 11th, and anchored in the roadstead, some eighteen miles distant from the Factory, at ten o'clock in the forenoon, and signalled for a York boat, which was pushed off at once, but which, owing to contrary tide and wind, did not reach us until 5 o'clock in the evening.

Mr. Cowie, chief accountant of the post, accompanied the boat out, and he kindly undertook to take us in and bring us out again the next day. We arrived at the

Factory about 3 o'clock on the morning of the 12th, and left again at 3 in the afternoon.

Mr. Wood, storekeeper at York, has been observer in connection with the meteorological office for some years. I compared his instruments and adjusted them, and found his meteorological work all well done, and the observer much interested in the work.

I obtained some additional clothing from Mr. Fortescue, the chief factor at that post, and, as at Churchill, was most hospitably received by all the officers of the company.

We reached the "Neptune" in the York boat about 5 o'clock in the evening of the 12th, and weighed anchor at 7, and shaped our course for Cape Digges.

We found a good harbour on the south-western extremity of the larger Digges Island, and anchored on the morning of the 16th. Here I decided to place a station, in charge of Mr. Laperriere, and called the place Laperriere Harbor. I regarded the place as most suitable for a companion station to that of Port DeBoucherville. The distance between the two is about forty-five miles, and, as the vast stretches of ice that we met with between Nottingham and Digges on both the outward and homeward voyages, made that channel a point of the greatest importance, I consider it as desirable that the two stations should be established there.

On the morning of 20th September, the buildings having been completed and supplies landed, I prepared for departure. Mr. Laperriere was placed in charge of the station, with Messrs. Quigly and Maher as stationmen. I substituted Mr. Quigly, one of the carpenters, for Mr. Youill, whose condition of health rendered him unfit to be left there.

On the homeward voyage the expedition touched at Port DeBoucherville, Ashe's Inlet and Stupart's Bay, leaving such furs and other clothing as I had obtained for the comfort of the men. At Ashe's Inlet I took on board Messrs. Skynner, Rainsford and Jordan, and left with Mr. Ashe, Messrs. Keating and Drysdale, the men originally intended for that station.

From Stupart's Bay we made for Resolution Island, hoping to be able to place a station on the shores of that island. Arriving on the west coast of the island on the morning of the 26th of September, we coasted along in search of a harbour. At 9 o'clock a boat was sent in to examine a bay that promised well. The vessel followed some distance astern, going dead slow, with a look-out man on the jib-boom. Leads were going from both the boat and the ship. Presently the boat reported only four fathoms; a little distance astern we had ten fathoms from the ship. In canting the ship, there being a strong northerly breeze, and the tide setting to the southward, the vessel struck a sunken rock and remained there, grinding a little at each sea, for about nine minutes. She was, however, worked off without sustaining much serious damage. A piece of wood came to the surface, supposed to be one of the scarf pieces butting on the stem plates.

We steamed further down the coast to the south-east, when about noon another bay was discovered. The mate was again sent in, in charge of the boat, to make soundings. At length he returned and reported a good harbour. We steamed slowly in, following as nearly as possible, the boat track, the engines alternately going dead slow and stopping. The lead was going constantly, and there was a look-out in the fore-top and one on the jib-boom. At 1 o'clock while the leadsman was reporting "twelve fathoms and no bottom abreast of the main rigging, the ship suddenly struck forward and the men on the look-out shouted "go astern." The ship struck very heavily and rolled two or three times. As she rebounded her engines were reversed and she was put out to sea at once.

We coasted along to Cape Best, but as there were no signs of a harbour, and as the wind was threatening a gale, and a heavy cross sea running, and as the ship had struck twice and received considerable damage, Captain Sopp advised that the station on Resolution Island be abandoned, and I felt, under all the circumstances, bound to abandon it. We had examined over sixty miles of the coast, and altogether we had expended nearly three days steaming in search of a harbour. I therefore requested

the Captain to shape our course for Port Burwell, and in that excellent harbour, we anchored at 8 o'clock on the morning of the 27th of September.

At this place we took ballast and filled up the bunkers with coal from the hold.

On our return here, as at the other stations, we found all in good health and spirits, liking the work, and well satisfied with all that had been provided for them. The provisions, especially the evaporated fruits and vegetables were spoken of as being of an excellent quality.

We continued the homeward voyage from Port Burwell at 3 p.m., on 29th September, carrying the ebb tide with us through Grey Strait for Nachvak Bay.

At noon of the 30th we anchored in a cove on the north side of the entrance to the bay, and having selected a site for the house, proceeded at once with its erection and with the work of landing the stores.

On Saturday evening, the 4th October, the work was completed, but as it had been a week of unusually hard work for all hands, I lay in harbour till daylight on Monday morning, the 6th, when we proceeded to sea for St. Johns, Newfoundland, where we arrived on the morning of Saturday, the 11th, and having delivered the ship up to the owners, Messrs. Job Bros. & Co., I took passage for the entire party in steamship "City of Mexico," sailing that day for Halifax.

### *Navigation.*

The ice has been supposed, hitherto, to be the most formidable barrier to the navigation of the straits, but its terror disappears, to a great extent, under investigation. The ice met with on the cruise of the "Neptune" may be divided into three classes—having distinctly separate origins. They are: icebergs from the glaciers of Fox Channel; heavy arctic field ice from the channel itself, and what may be called ordinary field ice, being that which had been formed on the shores of the bay and straits.

We met no icebergs in Hudson's Bay, nor did I hear of any being seen there. In the straits a good many were seen, principally along the north shore, where many of them were stranded in the coves, and some were met with in mid-channel. Of those seen in the eastern end of the straits, some had undoubtedly come in from Davis' Straits, passing between Resolution Island and East Bluff; but all of those met to the westward had come from Fox Channel, as observations made by Mr. Ashe, at North Bluff, show, that an iceberg coming in sight from the westward will pass out of view to the eastward in from three to four tides, showing an easterly set of upwards of ten miles a day. The icebergs seen in Hudson's Straits, in August and September, would form no greater barriers to navigation than do those met with off the Straits of Belle Isle, nor were they more numerous in Hudson's Straits than they frequently are off Belle Isle.

The ordinary field ice was met with off North Bluff and the Upper Savages, on the 11th of August. This ice, though it would have compelled an ordinary iron steamer to go dead slow, gave no trouble to the "Neptune," the mate on watch running the ship at full speed through between the pans, rarely touching one of them. Just before entering Ashe's Inlet we had to break through a heavy string, which was, however, done without in the slightest degree injuring the ship. In the harbour (Ashe Inlet) the ice came in, with the flood tide, and set so fast that the Eskimo were able to walk off to the ship, a distance of three-quarters of a mile. On the south shore our experience was much the same, but no ice was met with through which the ship could not have forced her way without damage. In the centre of the straits, to the east of North Bluff, no field ice was seen at all, and after leaving Stupart's Bay, on the outward voyage, although the vessel lay-to for the night in the ice, it was only to wait for daylight, and not because the ice was too heavy. This pack extended about eighteen miles out into the straits, and after getting over this distance we came into clear water. From this point to Charles Island, and thence to the end of Salisbury Island, long strings of ice were frequently seen, but as their direction was invariably parallel to our course, or nearly so, we coasted round them. On the homeward voyage none of this field ice was seen. The Eskimo, both at Ashe

Inlet and Stupart's Bay, informed me that there was an unusually great quantity of ice in the straits this year, and that they had never seen the ice hang to the shores so late in the season.

**The Heavy Arctic Ice.**—After passing the east end of Salisbury Island the ice got heavier and closer, and when off Nottingham Island the pack was so run together that I determined to give up the attempt to force the ship through it, and working out again, headed more to the southward. In making in for the land here we broke the propeller, but succeeded in taking the ship into harbour with the stumps.

Viewed from the top of a hill on Nottingham Island the sea in every direction was one vast ice field, and to the southward, between South-east Point and Cape Digges, we saw four vessels fast. This ice was altogether of a different type to what we had hitherto met with. Some of it was over 40 feet thick of solid blue ice, not field ice, which had been thickened by piling of pan on pan, but a solid sheet of ice which had evidently been frozen just as we saw it. Much of it was 20 feet thick, and for the general average of all the field we passed through coming into harbour, I estimate that the thickness would have been upwards of 15 feet. The question as to the origin of this ice and whether it will be frequently met with in the west end of the Straits is an important one; for in such ice, when closely packed, a vessel even of the build and power of the "Neptune," was perfectly helpless. I do not consider that it is possible for ice to form in Fox channel to a greater thickness than 10 feet in a single year, and I feel convinced that much of the ice which we encountered was the accumulation of several years.

The depth to which water will freeze has, so far as I know, never yet been determined, but it is certain that ice being a very poor conductor of heat, when once a certain thickness of ice has been formed, the rate of thickening will be very slow. In regard to this point, measurements of the formation of ice will be made at some of the observing stations in Hudson's Straits this year, which will assist in finally determining this question.

If, as seems probable from the reports of the Hudson's Bay ships, this year and last year have been exceptionally heavy ice years, it is reasonable to conclude that only occasionally does this heavy Fox Channel ice appear in Hudson's Straits. Another piece of confirmatory evidence as to the exceptional nature of the ice met with in the northern part of the Bay this year is the statement in Capt. Fisher's letter, found at Marble Island and quoted in the narrative portion of my report, that he had been unable to reach, up to the date of his letter, the east shore, or to go up the Welcome on account of the ice.

The harbour ice forms at Churchill on the average about the middle of November and breaks up about the middle of June. As this is the only known harbour on the west coast of the bay, these times may be taken as marking the extreme limits of the season during which it would be possible for a ship to enter and leave the harbour.

It is only fair to state, that had I been making the passage from Cape Chudleigh, direct to Churchill instead of coasting and working across the straits, I do not consider that I should have been delayed by ice, more than forty-eight hours: but no ordinary iron steamship, built as the modern freight carrier is, could have got through the heavier ice that we met without incurring serious risk, if not actual disaster.

Since the foregoing was written, I have received a copy of the Report of Lieut. Ray, United States Signal Service, to the Chief Signal Officer, on the conduct of the observations at Point Barrow in the Arctic. He gives as the greatest thickness of ice formed in one season 6 feet 2 inches. At Point Barrow the formation of ice on the shore is certainly influenced by the passage of a current of warm water passing through Behring Straits and setting north-east.

Fox Channel has no such advantage, and I still think it possible that a sheet of ice 10 feet in thickness might be formed there in one season.

**The Compass.**—In working through the straits, especially at the western end, I found the ordinary compass so sluggish as to be almost useless. The Sir Wm. Thomson card, however, worked admirably when properly compensated.

The reason of the difficulty with the compass is, that from the proximity to the magnetic pole the horizontal directive force of the earth's magnetism, which alone directly affects the compass needle, is very small compared with the whole magnetic force; consequently, the effect of induced magnetism in the iron of the ship on the compass becomes very large in comparison with the direct action above mentioned; the result being, that in an imperfectly compensated compass the error due to local attraction is very greatly increased.

The means of correcting this error in the Sir Wm. Thomson binnacle are perfect and easily mastered, and the system is such that the compass can, after the first voyage or two, be perfectly compensated by using certain proportions of soft iron bars and magnets, as correctors, the proportion having to be determined by actual observation and experiment on the voyage.

All steamships making the voyage through the straits should have one of these compasses as a standard, and the captains should familiarize themselves with the methods of correcting them, and as often as opportunity offers take azimuth observations, both stellar and solar.

#### *Currents.*

Off the entrance of Hudson's Strait I found the current setting to the southward, During the two days whilst lying off in fog, the wind was very light, and the drift of the ship must have been almost entirely due to the current. In the forty-eight hours lying-to, the ship was set forty miles to the south of her position by dead reckoning. This is a somewhat greater amount of southerly set than the Admiralty directions indicate, and ships approaching the entrance of the straits would, in thick weather, have to do so with great caution.

At Port Burwell, near Cape Chudleigh, the tide rises and falls, at springs, about 19 feet, and the current in Grey Strait, between the Button Islands and the cape, flows at the rate of about four knots an hour; and when a strong breeze is blowing against the tide, a very nasty and confused and breaking sea gets up, which fishing schooners might find dangerous.

At Ashe's Inlet, near North Bluff, the tide rises and falls 32 feet at springs. There is a tide-race off the Bluff, and within three miles of the shore the velocity of the tide currents is very great, sometimes reaching six knots.

At Stupart's Bay, near Prince of Wales Foreland, the rise and fall of the tide is 28 feet. The tides of this coast do not show as high velocities as on the north side, probably owing to the water being shoaler.

At the western end of the straits the tides also run with great velocity. The rise and fall at Nottingham Island, at spring tides, is 14 feet, and Cape Digges about 10 feet.

At the entrance of Port Churchill there is a tide-race, the velocity of which, at half-tide, I estimate at seven knots.

#### *Meteorological.*

The meteorological work, which is to be done at the stations, is as follows:—

Observations will be taken six times a day, of height of barometer, temperature of the air, temperature of wet bulb thermometer, velocity and direction of the wind, reading of hair hygrometer, cloudiness, with record of amount and kind of cloud, and direction of its movement, and rain and snow fall. Water temperatures will also be taken. The times of observation are at equal intervals of four hours, and so selected that three of them are synchronous with the regular telegraphic series taken by the observers of the Meteorological Service.

Complete observations were taken on board during the voyage and, for the purpose of illustrating the weather which was met with in Hudson's Straits, I shall compare it with that experienced at Belle Isle, a station of the Meteorological Service, and in the regular trade route between Quebec and Europe.

For the first period from 1st to 31st August.—The “Neptune” was, on 1st August, at Nachvak Bay, within 100 miles of the east end of the Straits and, on 30th August, had just left Nottingham Island on the west end, so that the month of August was spent in the straits region.

The following table is compiled from the Meteorological Records:—

|  | Belle Isle Straits. | Hudson's Straits. |
|--|---------------------|-------------------|
| Number of days on which fog is recorded.....                             | 13                  | 9                 |
| Approximate number of hours of fog.....                                  | 220                 | 102               |
| Days on which snow fell.....   | 0                   | 4                 |
| Days on which rain fell.....   | 10                  | 8                 |
| Days on which wind exceeded 25 miles per hour, but did not reach 40..... | 6                   | 5                 |
| Days on which wind exceeded 40 miles.....                                | 2                   | 1                 |

The month of August thus shows favourably for Hudson's Straits, the fog there being reported on six days only, as against thirteen days in Belle Isle; and the total number of hours of fog being respectively 102 in Hudson's Straits, and Belle Isle, 220; and if the duration of the snow storms in Hudson's Straits, nineteen hours, be added to the number of hours of fog, it still shows favourably. The number of gales also is six at Belle Isle for five in the straits; and of heavy gales, two at Belle Isle, and only one in the straits.

The following comparison for September is between Station No. 1, at Cape Chudleigh and Belle Isle:—

|  | Belle Isle Straits. | Hudson's Straits. |
|--|---------------------|-------------------|
| Number of days on which fog is recorded.....                             | 7                   | 4                 |
| Approximate number of hours of fog.....                                  | 82                  | 34                |
| Days on which snow fell.....   | 3                   | 8                 |
| Days on which rain fell.....   | 15                  | 6                 |
| Days on which velocity of wind was between 25 and 40 miles per hour..... | 4                   | 5                 |
| Days on which velocity of wind was 40 miles or over per hour.....        | 11                  | 3                 |

Days on which any snow fell are put down as snow days, though rain as well as snow may have fallen on those days.

In the character of the weather, therefore, for the two months (August and September) so far as it affects navigation, Hudson's Straits compare favourably with the Straits of Belle Isle, there being eleven heavy gales at Belle Isle against three in Hudson's Straits, and more than double the amount of fog.

The mean temperature of the month at Cape Chudleigh for August was 39°; for Belle Isle, 49°·67; and for September, Cape Chudleigh, 32°·76; Belle Isle, 43°·1.

Reports formerly received from the Labrador Mission Stations give higher mean temperature for those months, but those stations may be considered as almost inland stations in the character of their weather, and would thus show both higher temperature in summer and lower in winter than an insular station like Belle Isle.

I have received, through the courtesy of the Chief Signal Officer of the United States Signal Service, copies of the observations taken at Fort Chimo, in Ungava Bay, by Mr. Lucien Turner, who has spent two years there, and the winter temperatures given in these will not, I think, greatly differ from those in the Straits.

These tables form Appendix B to this report.

The following table gives the weather experienced in Hudson's Bay, from the 1st to 16th September:—

|           |   | Mean temperature. |
|-----------|---|-------------------|
| September | 1.—Fair weather, light N.E. winds.....        | 43°               |
| “         | 2.—Fine and cloudy p.m. with strong N.E. wind | 42°               |
| “         | 3.—Rainy weather, moderate gale from S.E..... | 40°               |

*Cape Digges and Marble Island.*

*Off Churchill.*

|           |  |       |
|-----------|--|-------|
| September | 4.—Rainy weather, strong gale, from N.W.....               | 40°   |
| “         | 5.—Cloudy weather, strong gale from N.W.....               | 40°   |
| “         | 6.—Cloudy, light rain, light N.W. wind, thick weather..... | 39 5° |

*At Churchill.*

|           |   |     |
|-----------|---|-----|
| September | 7.—Fine weather, light S.W. wind.....         | 42° |
| “         | 8.—Fine weather, light N.W. and S.W. wind.... | 44° |
| “         | 9.—Fair cloudy weather, moderate N.E. wind... | 41° |

*York.*

|           |  |     |
|-----------|--|-----|
| September | 10.—Cloudy weather, light rain, mod. S.E. wind.. | 40° |
| “         | 11.—Fair weather, moderate N.E. wind.....        | 41° |
| “         | 12.—Fair weather, light S. wind.....             | 46° |

*York to Digges.*

|           |  |     |
|-----------|--|-----|
| September | 13.—Fair weather, light N.E. wind.....           | 42° |
| “         | 14.—Fog in a.m., fine p.m., light N.E. wind..... | 35° |
| “         | 15.—Foggy weather, strong N.W. wind.....         | 34° |
| “         | 16.—Fair weather, light N.E. wind.....           | 32° |

The above shows one gale lasting nearly three days, viz., the 3rd, 4th and 5th, and two days on which fog occurred. On the 14th the fog lasted from 9 a.m. to nearly 3 p.m., closing down again early on the morning of the 15th and continuing thick fog till about 3 p.m.

*Sea Temperatures.*

The temperature of the surface water off Belle Isle on 25th July was 41.6 which gradually decreased as we proceeded northward to 34.7 on 4th August, off the entrance to Hudson's Straits.

On the homeward voyage these temperatures were, off Hudson's Straits 32.5 on 29th September, and abreast of Belle Isle, but some distance to the eastward, 36° on 9th October.

In Hudson's Straits, the mean surface temperature, as obtained from observations taken when the ship was at sea, was, on the west-bound voyage, found to be 32.9, the highest mean of a day's observations was 33.3, and the lowest 32.6. On the homeward voyage the lowest daily mean was 31.8 and the highest 33°. The highest temperatures were in each case observed at the eastern end of the straits and the lowest off Nottingham Island.

In the bay the surface temperatures varied much with the geographical positions, being 39.4 off Marble Island, 41° off Cape Churchill, 39.7 about 100 miles north-east of York Factory, observed whilst steaming across to Cape Digges, and 36° off the south end of Mansfield Island.

Hudson's Bay may therefore be regarded as a vast basin of comparatively warm water, the effect of which must be to considerably ameliorate the winter climate to the south and east of it.

The resident factor at Churchill informs me that the bay never freezes over so far out from shore, but that clear water can be seen; and as the temperature of the water must be above 29.8 Fahr. (the freezing point of salt water) when at the same time the temperature on shore is below zero, we have a set of conditions which will cause a regular area of low barometric pressure to remain over the bay during the winter, with prevailing west and north-west winds and very cold weather on the west and north west of the bay, as shown by observations at York Factory; whilst on the opposite side of the bay winds from south-west, south and south-east would prevail.

In concluding this the meteorological portion of the report, I would point out that so far as meteorological conditions are concerned, the bay has been proved navigable early in June. The barque "George and Mary" sawed out on the 7th June of this year, and was cruising under sail from that date onwards in the northern part of the bay.

*Surveying Work.*

At Station No. 1, Port Burwell, near Cape Chudleigh, the harbour and part of the adjacent coast was surveyed by Mr. W. A. Ashe, D.L.S., who was one of the observers appointed to the expedition, and I have prepared sailing directions for entering the port. Mr. Ashe also surveyed the harbour at Station No. 3 (Ashe Inlet). At all the other stations in the straits I have myself, besides making determinations of position, variation and dip, made surveys of the harbors, and written out the necessary sailing directions for entering the ports. I also made a hurried survey of the harbour at Marble Island, and have obtained a copy of a plan of Churchill Harbour from one of the Hudson's Bay Company's officers. Copies of all these I will furnish you with hereafter, when I have had time to complete the final reductions and recopy the plans.

*Resources of the Region of Hudson's Bay and Strait.*

As to the resources of these waters, I have the honor to report:

1. That the economic fish and mammals of those waters are the whale, porpoise, walrus, narwhal, seal, salmon, trout, cod, and a variety of small fish.

2. That the only fishing industries developed so far are, the whale fishery by the Americans, and the porpoise, walrus, salmon and trout fisheries by the Hudson's Bay Company.

3. That the chief whaling ground is the Rowe's Welcome, a vast basin in the north-western portion of Hudson's Bay. Here the American whalers, chiefly from Massachusetts and Connecticut have been conducting a very profitable fishery for more than a quarter of a century, and are still in active operations.

The report of the United States Commissioners of Fish and Fisheries for 1875-6 states, that during the eleven years preceding 1874, about fifty voyages were known to have been made by whaling vessels from New England to Hudson's Bay, and their returns amounted to at least \$1,371,000, an average of \$27,420 per voyage, which, as most of the vessels engaged in the trade are comparatively small sailing vessels, shows a large margin for profit to those engaged in the business. And if we allow an average of three vessels per annum since the date of the returns up to the present year, we have \$822,600 as the value of the oil and bone taken by our neighbours from the waters of Hudson's Bay since the date of the report above quoted, making a grand total of \$2,193,600.

The wintering quarters of these whalers is at Marble Island, on the north-western coast of Hudson's Bay. The whaling ships, generally, leave Massachusetts or Connecticut in July, and reach the island some time in September, where they winter in a well sheltered harbour, and saw out of the ice in June of the following spring. They then press northward as fast as the moving ice will permit, until the whaling ground is reached, where they fish until the 1st September, and then sail for home, with their ships well loaded with blubber and bone. One or two whaling vessels, and occasionally more, winter at Marble Island each year.

Although this industry is, as yet, comparatively small, I am persuaded that, from the large profits realized by those engaged in it, from the ample opportunities for its extension, and the increased attention which is now being given to the resources of the Hudson's Bay region, a much larger number of vessels will, undoubtedly, be drawn into it at an early day. I am satisfied that there are large numbers of whales in these waters, from the fact that we met with them continually during the cruise of the "Neptune," and because, so far as I can learn, those engaged in the catch have never yet been compelled to return without a fair cargo. The bark "George and Mary," Capt. Fisher, of Connecticut, wintered at the Island last season, sawed

out of the ice on the 7th of last June, and succeeded in taking three whales in the open waters of Hulson's Bay before reaching the "Welcom." Considering that five or six of these mammals would complete her cargo, it is easy to see that this fishery is by no means falling off.

4. Of the fisheries carried on by the Hudson's Bay Company, that of the porpoise is the most extensive. The blubber of these mammals weighs from 250 to 400 pounds, and is very rich in the finest of oil.

Last year the company secured nearly 200 in one tide at Churchill, and a much larger number at Ungava Bay. They have established extensive refineries at several of their northern stations, and instead of exporting the blubber in bulk, as formerly, refine it, shipping the pure oil in casks. The porpoises are not shot or harpooned, as is the case with the walrus and whale, but are grounded on the flats in coves, where the tide rises 10 or 15 feet or more, and where, by means of trap nets, they are held in check until the water recedes, leaving them high and dry on the boulders and sand. The process is very simple and inexpensive. The company also carry on a walrus hunt, sending two sloops annually from Churchill to two very productive walrus grounds, north of Marble Island, where they have never failed to secure as much blubber, ivory and hides as their little vessels will carry in a few weeks. They took between twenty and thirty of those animals the present season. On this trip they also meet the northern Eskimo, and carry on a very valuable trade with them, exchanging powder, shot, &c., for ivory, oil, musk ox robes, and other furs.

One of the members of the expedition was furnished with an estimate of the value of the oil secured in the Hudson's Bay region last year by the company and the American whalers, which, although I had no means of verifying it, is probably within the mark. It places the value of the export at \$150,000. I am satisfied that the walrus and porpoise fisheries may be developed to almost any extent; and as increased attention is sure now to be given to this industry, we may rely upon its almost immediate extension. We met with walrus in great numbers at the western end of the strait. In one afternoon, while steaming from the Digges Islands to Nottingham Island, we found between fifty and a hundred of them on the ice.

5. The company is also engaged at several points, particularly at Ungava, in the salmon and trout fisheries. These excellent fish abound in vast quantities in nearly all the streams, and are generally most plentiful at certain seasons just above and near the head of tide, where the salt and fresh waters mingle. From what I could learn of this industry, I conclude that it is but the beginning of what will, in the near future, become an extensive and profitable business.

At the present time the Hudson's Bay Company have a steamer, called the "Diana," which goes from London to Ungava Bay direct. She is fitted out with refrigerating apparatus, by means of which they are enabled to send home the salmon fresh to the London market, where it realizes high prices, and has, I understand, proved a profitable business for the company. Cargo this year is reported to have realized \$18,000. This is the sole business that this little steamer is engaged in, as another steamer, called the "Labrador," carries all the freight required for Fort Chimo and the Ungava district.

6. Cod-fish. Up to the present time cod have never been found in the waters of Hudson's Bay or the western portion of the strait, but they are very plentiful in the bays round Cape Chudleigh, on both the east and west side. Newfoundland schooners, even now, work as far north as Nachvak Bay, and seem, year by year, to have been going further north.

The quality of cod found off Cape Chudleigh, though good, was not of the same high quality as that got on the banks.

7. In conclusion, I have the honour to urge that in any negotiations with the Government of the United States, relative to a treaty of reciprocal trade, due allowance should be made for the great value of the fisheries of Hudson's Bay.

If American whalers are to be permitted to continue to fish in those waters, arrangements should be made by which Canada would receive a substantial equivalent for the privilege.

I would further suggest that unless a very large consideration is granted in return for the privilege, the Canadian Government should reserve the right to make and enforce such regulations as will prevent the extermination of these valuable mammals from our northern waters. In support of this suggestion, I would call your attention to the fact that some years ago whale fishing was a thriving industry in the Gulf of St. Lawrence, some ten schooners being at one time engaged in it, but that shortly after the Americans were granted the right to fish in these waters, they had, by use of explosive bombs and other methods of capturing these animals, completely driven them out of the gulf, and the Canadian whaling business was destroyed.

#### *Trade.*

The trading station for the south side of Hudson's Straits is Fort Chimo, at the south end of Ungava Bay, and the Eskimo and Indians visit the fort regularly, to exchange their furs for powder, shot, &c.

At Nachvak Bay also, the company maintain a post, where a number of the most valuable furs, the black fox, &c., have been obtained from the natives.

The Nachvak station is one of the company's chain of posts on the Labrador coast, subsidiary to Rigoulette. These posts obtain their supplies by the steamer "Labrador," and I have been informed that the Newfoundland authorities claim and collect Customs duties on the whole ship's invoice at Rigoulette, thus collecting there duties on goods which are destined for consumption in Canada, inasmuch as all the goods for Fort Chimo are included. Canada is thus the loser, whilst the company derives no benefit, except what may arise from the difference of the tariffs of the two countries.

The exports from these and the Mission stations are principally, seal skins and oil, salted salmon and trout, codfish, ivory, bear, deer and fox skins. From Ungava, besides fur, porpoise oil is exported, and frozen salmon, as stated previously.

The Hudson's Bay Company, in trading, have to pay duties, and a considerable sum accrues to the Canadian Government in Customs dues on the importations to Churchill, York and Moose. Every American whaler, however, which enters the bay, is an unlicensed trader, carrying in American goods and trading with the natives in the north-west of the bay, where they compete with the Hudson's Bay Company, who have to pay duty on their importations.

A regular trading post has also been established by a Capt. Spicer, an American citizen, on the north shore of the straits, a little to the west of North Bluff, which I intended visiting, but was unable to do so.

I was, however, informed by the natives, that each year a ship went to the station, that an agent lived there through the winter, and that about fifty families traded with him. The Eskimo at North Bluff had an old whale boat of American build, but in good repair, and they informed me that they occasionally killed whales for Capt. Spicer, and that whenever they secured a whale that they were given spirits. The evil effects of such payment are too well known to need comment.

In reference to the value of the trade, I have heard it estimated, by men whom I considered competent judges, that a good Eskimo family would be worth \$500 a year to a trader. The Hudson's Bay Company rate some of their best Indian hunters as worth \$1,000 a year to the company, and, allowing that the straits region is a somewhat poorer region than the north-west of the bay, a family ought still to be worth nearly \$400 to a trader. This estimate gives the value of Capt. Spicer's station at \$20,000 a year, an estimate which I believe to be rather below than above the truth. All goods, destined for trade with the natives, on board of the American whalers, should be chargeable with duty, or a license fee charged them, before they are permitted to enter Hudson's Straits, which would be sufficient to cover the duty, so that they may be placed on the same footing as the Hudson's Bay Company; for the value of the trade in musk ox robes, cariboo robes, seal skins and ivory, forms no unimportant part of the profit of the whaling voyage.

The use of ardent spirits as an article of trade, or indeed its importation, should be absolutely prohibited.

There is room for the profitable establishment of trading posts on the south shore of the bay, as the natives there have to go upwards of 300 miles, to Fort Chimo, for powder, shot, &c.

I was also informed by the natives at North Bluff, that about the Middle Savage Islands we would find natives who had never traded with white men, and who had large quantities of ivory.

That a profitable business can be carried on in pursuit of whale and porpoise fishery and walrus hunting, together with the trade with the Eskimo, seems beyond doubt, and it is unfortunate that none of the profits derived from it are at present received by Canadians.

#### NATURAL HISTORY.

##### *The Inhabitants.*

With the exception of people who may be in charge of Capt. Spicers' station, the only inhabitants of the straits and northern part of the bay are the Eskimo.

On the north side of the Straits they are quite familiar with the ways of white men, and seem to be much pleased at the prospects of increased intercourse with them. Some one or two of them speak English, whilst some others understand easily what is said to them, but refuse to speak it. They are particularly fond of any article of clothing, either cotton or woolen, and the head man at North Bluff was arrayed in all the glory of a stand-up linen collar.

These natives are docile, amiable and willing to work. When landing the stores and coal at North Bluff they worked all day along with our men, carrying heavy weights up over the rocks, and working as cheerily and heartily as could be desired, taking their pay in biscuit, of which they are inordinately fond.

The number met with at the station here was about thirty, but during my absence a large number of them visited the station, maintaining the most friendly relations with our party.

They have no farinaceous food of any kind, and, as a consequence, the mothers suckle the children till they are from three to four years of age. The families are small, there rarely being more than two or three children, and although early marriages are the rule among them, I cannot help thinking that their numbers have sensibly diminished, inasmuch as we found signs of their presence everywhere; yet, except at Port Burwell, Ashe Inlet and Stupart's Bay, none were met with. About six miles south of Port Burwell there is the remains of what must once have been a large Eskimo settlement, their subterranean dwellings being still in a fair state of preservation. At the present time, so far as I can learn, there are only some five or six Eskimo families between Cape Chudleigh and Nachvak.

Along the Labrador coast the Eskimo gather in small settlements round the Moravian Mission stations. At these places their numbers vary considerably. Nain is reputed to be the largest settlement and its Eskimo population amounts to about 200 souls.

These are all educated. They can read and write in their own language and the missionaries informed me that they were regular attendants at church and are very fond of music. No alcoholic or other liquors are given to the natives by these missionary traders; but they occasionally procure small quantities from Newfoundland fishermen. It is, however, a rare occurrence, and there is no record of any disturbance or trouble ever having been caused.

These missions are self-supporting, the missionaries supplying the Eskimo on loan with the very best traps, fishing lines etc., and purchasing from them all their produce, whether it be seals, cod, salmon, furs or anything else. They are supplied by a sailing vessel called the "Harmony," which sails from London each year, visits all their Mission stations and then returns, taking with her the great portion of the season's catch. The Newfoundland mail steamer makes several trips to Nain during the summer of each year, but does not go any further north.

I have mentioned these missionary traders and their work, because I am of opinion that the system, when honourably carried out, as it has been and is on the Labrador Coast, is the one which best meets the wants of the natives and tends to the improvement of their condition.

In speaking of the inhabitants of the straits, I mentioned more particularly those living on the northern side, but those met with at Stupart's Bay were equally tractable and ready to assist in the work. They were, however, from less frequently meeting with white people more simple, but decidedly more demonstrative; their delight on being informed that we were going to build a station and leave a party among them was exhibited by their forming a circle round the interpreter and dancing and shouting like a lot of school children.

One word must be said in regard to their honesty. Although scraps of iron and wood possess a value to them which we can hardly appreciate, they would take nothing without first asking permission; not even a chip or a broken nail was taken without their first coming to the officer who was on duty at the building for permission to take it.

As to the pernicious effects of their contact with American whalers, I beg to quote from the report of Lieut. Ray, of the United States Signal Service, who was in charge of the Observatory at Point Barrow, premising that I have every reason to believe that the New England whalers carry on very much the same sort of trade that their brethren of the Pacific seem to have done. Lieut. Ray says:—

“The safety of the station would be very much increased if the law relating to the sale of contraband goods by the whale men and traders on this coast could be enforced.” \* \* \* \* \* “I believe the offenders in the fleet this year are confined to two or three ships. I met nearly all the captains when they first came up, and they promised a strict compliance with the law, but in spite of all that, the natives here have been drunk three different times during the last month.”

#### *Fauna.*

The terrestrial mammalia of Hudson's Straits and northern part of the bay are:

The polar bear, the fox (three varieties), the hare, the reindeer.

The skin of the polar bear is valuable, being held at \$12 by the agents of the Hudson's Bay Company. These animals, though reported by the Eskimo to be very savage, will not, I think, as a rule, attack a man unless first wounded or emboldened by hunger, when I can well understand that they would be dangerous to encounter. They prey chiefly on the seal. The Eskimo on the south side of the straits, at Stupart's Bay, informed me that at certain times of the year there were large numbers of them in that vicinity. The meat of these bears is not unpalatable, but the liver is said to be poisonous.

The Fox.—Judging from the number of white fox skins which the natives had, these animals must be very numerous. These skins, however, have no high commercial value, and are, indeed, almost valueless, unless captured at a certain season of the year.

The blue fox is a sort of a steel grey colour. Their skins are more valuable than those of the white fox, but they are much less numerous.

The red fox is valuable as indicating the probability of the presence of the black fox, whose fur is so very valuable. The red fox was seen on the south side of the strait, and black foxes are annually shot or trapped in the country south of Cape Chudleigh.

The reindeer are the food and clothing of the Eskimo, and their horns are used for making the spring bows of their fish spears and for many other purposes. We procured some of the venison from the Eskimo at North Bluff, which was pronounced by every one to be excellent.

The hare is a common animal over the whole coast of the straits, being especially numerous about North Bluff.

Game Birds.—Many kinds were seen. Geese, swans, duck and ptarmigan were plentiful, so that the officers and men at the station can easily procure a palatable change of diet.

*The Work of the Expedition in the Coming Year.*

Much will undoubtedly be learned from the observations taken during this winter as to the formation and breaking up of the ice and generally in regard to its movement, and also of the phenomena affecting navigation, but it would be impossible to state definitely from one year's observations what was the average period of navigability of the straits. I consider, therefore, that it would be desirable to continue certain of the stations for a second year, and might perhaps be desirable to keep on three of them for a third year.

For the year 1885-86, I have the honour to recommend that the following stations, Port Burwell, near Cape Chudleigh, Ashe Inlet, near North Bluff, Stupart's Bay, near Prince of Wales Foreland, Nottingham Island and Digges Island, be continued.

The station at Nachvak Bay could easily be disposed of, as the Newfoundland fishermen already visit the place for the cod fishing, and if it were advertised in the St. Johns, Nfld., papers, I do not doubt that the Department would get offers for the purchase of the house.

The expedition for next year should be ready to start from Halifax about the 15th of May—not later than this date—and arriving off Hudson's Straits about the 1st of June, if possible visit and relieve the stations. Should the ice prevent our getting on shore, the ship should push on so as to investigate once for all the condition of the ice in the straits and bay in the early part of the season. If successful in getting through the straits, the voyage should be continued to Fort Churchill, the endeavour being made to arrive there about the opening of navigation, the 15th of June.

After leaving Churchill the eastern shores of the bay should be visited, and a running survey made of such portions of the coast as practicable. Beacons should be erected on the north end of Mansfield Island and the south end of Southampton Island. Both these islands are low-lying, with shoal water running for some distance out; they are of a dark grey limestone formation and most difficult to make out at night, the mariner's only safety being in the constant use of the lead. Especially are they dangerous on account of the tides, which run along the east coast of Mansfield Island at the rate of about four knots per hour.

This work could, I think, be accomplished and the ship be back in the straits by the 15th August. The remainder of the time should be devoted to making a running survey of such part of the coast of the straits as may be possible. Capt. Spicers' station should be called at, and if time permitted, the Hudson's Bay post at Ungava should also be visited, the expedition returning to Canada in October.

If, however, the Government regard it as more important to investigate the fisheries of the bay and straits, the ship should push up north for Marble Island as soon as possible, thence to "The Rowe's Welcome." After spending a short time in "The Welcome," the porpoise fishery at Churchill should be examined.

After leaving Churchill, under any circumstances, the east shore should be visited, and its mineral and other resources examined and reported on.

The vessel should also be fitted with a deep-sea dredging apparatus, wire dredge rope and deep-sea sounding apparatus.

In the event of your deciding on sending out the expedition in May, it would be advisable to send to Ashe Inlet a schooner load of coal. If this vessel were to start so as to be in Ashe Inlet about 20th August, she would have but little difficulty from the ice. The harbour is an easy one to make, with no outlying shoals or rocks; inside it is well sheltered and good holding ground.

I have endeavoured in the foregoing pages to give all the information in my power in regard, not only to the navigation, but to the resources of the region of Hudson's Bay and Straits, and I trust that my efforts will meet with your approval.

All of which is respectfully submitted.

ANDREW R. GORDON,  
*Commanding Hudson's Bay Expedition.*

## APPENDIX A.

GEOLOGICAL AND NATURAL HISTORY SURVEY,  
MUSEUM AND OFFICE, SUSSEX ST.,  
OTTAWA, 19th January, 1885,

The Honorable A. W. McLELAN,  
Minister of Marine and Fisheries,  
Ottawa.

SIR,—In compliance with instructions received from the Hon. Sir David Macpherson, Minister of the Interior, I have the honor to transmit to you, as received by me on the 14th inst., the accompanying copy of the report, by Dr. Bell, of observations made on the shores of Labrador, Hudson Strait and Bay during the voyage of the steamship "Neptune," from the 22nd July to the 11th of November, 1884.

The botanical and marine zoological collections made during the voyage have been examined. The plants have been named by Professor Macoun, the crustaceans by Professor S. J. Smith, of Yale College, and the molluscs and echinoderms by Mr. J. F. Whiteaves. The plants are represented by 118 genera and 227 species. The crustacea by 13 genera and 16 species. The molluscs by 19 genera and 25 species, and the echinoderms by 5 genera and 6 species. The brachiopods, cirripeds or barnacles and the annelids each by 1 species.

Of the plants Professor Macoun states as follows:—

"The collection is a very interesting one and shows conclusively the Arctic character of the climate of the Straits and that part of Labrador north of Nachvak. North of Nain, all the plants obtained are exclusively Arctic, not one of them, except the Arctic Raspberry (*rubus chamaemorus*) and a couple of species of *Vaccinium* ranging as far south as the Gulf of St. Lawrence. The greater number, however, are widely distributed on the shores of the Arctic Sea, and are the characteristic plants of both Arctic Europe and America."

Mr. Whiteaves states that the marine invertebrata are well known Arctic species, most of which are common to the St. Lawrence Gulf, their range there being from about ten fathoms to fifty, where they form a large part of the food of the codfish—especial thanks are due to Professor Smith, of Yale, for the list of the crustacea.

I have the honor to be, Sir,

Your obedient servant,

ALFRED R. C. SELWYN.

OTTAWA, 24th November, 1884.

A. R. C. SELWYN, Esq., LL. D., F. R. S.

SIR,—Herewith I beg to submit my report as geologist and naturalist on the Hudson's Bay Expedition, sent out by the Government of Canada during the present season.

I have the honor to be, Sir,

Your obedient servant,

(Signed) ROBERT BELL.

---

---

OBSERVATIONS ON THE GEOLOGY, MINERALOGY, ZOOLOGY, AND BOTANY OF THE  
LABRADOR COAST, HUDSON'S STRAIT AND BAY.

BY ROBERT BELL, M.D., LL.D., B.A.Sc., F.R.S., CANADA, ASSISTANT DIRECTOR  
OF THE GEOLOGICAL SURVEY.

*Medical Officer to the Expedition.*

---

The question of sending a party by sea into Hudson's Bay, for scientific purposes, at the expense of the Government, has been before the public of Canada for some years. Without entering into the subject of the various useful purposes which it was believed such a party might accomplish, it may be stated that the main object of the expedition, sent out by steamship the present season, was to establish six observatory stations on the shores of Hudson's Strait. The parties to be left in charge of these stations were to remain one year and to keep regular meteorological records, and to note all seasonal events, especially with regard to the condition of the Strait itself in winter, the tidal phenomena, &c., all with a view to throw additional light on questions regarding the navigation of these waters. If time permitted, after having built the stations, the vessel was to visit certain parts of Hudson's Bay. Without interfering with the above mentioned objects, the expedition would afford an opportunity for obtaining much desirable information in regard to the geology and mineralogy and the zoology and botany of the places which might be visited. The writer, who had been on Hudson's Bay in previous years, and who had already passed through the Strait (see Report of the Geological Survey for 1880), was selected for this duty, and also to act as medical officer to the expedition. I also acted as taxidermist and photographer for geological purposes, and provided myself with the instruments necessary for various methods of surveying, in case opportunities for using them should occur.

The expedition was essentially a meteorological one, and Lieut. A. R. Gordon, R.N., of this branch of the public service, was selected for the command; and the general management fell within the province of the Department of Marine. Notwithstanding that I had neither men nor boat at my command, I managed, while the stations were being built, or while the ship was taking in ballast, to get ashore with the boats that were passing backward and forward between the vessel and the land, and in some cases I had the use of a boat and the assistance of officers and men, both of the expedition and of the ship's company.

The following letter from the Deputy Minister of Marine, in reply to one from Dr. Selwyn, will best explain my position with regard to the facilities to be expected :

“ DEPARTMENT OF MARINE AND FISHERIES,

“ Ottawa, 20th June, 1884.

“ SIR,—I have to acknowledge receipt of your letter of the 18th instant, making certain enquiries in regard to the Hudson's Bay Expedition and the employment of Dr. Bell, and in reply I am to inform you that the vessel will sail from Halifax about the 21st of next month. Nothing beyond board and berth accommodation can be given Dr. Bell, the vessel being chartered to the Department, and no special accommodation being guaranteed, but space will doubtless be provided sufficient for the storage of any specimens, &c., which Dr. Bell may collect or the stores provided for the preservation of the same. With reference to your enquiry as to what assistance, as regards men and boats, can be provided for Dr. Bell's work, I have to inform you that Dr. Bell will have the opportunity of landing at every place at which the vessel

may call, and every facility will be given him which the officer in charge may consider he is able to afford without prejudicing the primary objects of the Expedition, but no special boat or crew can be furnished for Dr. Bell's use. I am also to inform you that it is the intention that the vessel shall return this fall, but it is impossible to state positively that she will. I am also to state that no charge will be made for Dr Bell's maintenance while on board the vessel.

" I am, Sir,

" Your most obedient servant,

" W. SMITH,

" *Deputy Minister of Marine, &c.*"

A. R. C. SELWYN, Esq., LL.D., F.R.S.,

Director Geological and Natural History Survey.

The route followed by the expedition, in going out and returning home, together with a full narrative of occurrences, will no doubt be given in the report of Lieut. Gordon to the Minister of Marine; but in order to make the present report intelligible by itself, it will be necessary for me here to give a brief sketch of the round voyage.

The vessel which had been chartered by the Government for this service was the steamship "Neptune," belonging to the Messrs. Job Brothers, of St. John's, a wooden vessel of 684 tons burden, which had been built and fitted for the seal fishery. She was navigated by Captain William Sopp, as sailing master, and a competent staff of officers and men. We sailed from Halifax on the 22nd of July, our course lying between Cape North and Cape Ray, and through the Gulf of St. Lawrence and the Straits of Belle Isle. We anchored for an hour at Blanc Sablon, on the north shore, but did not land. On the way up the Labrador coast, we called at Ford's Harbor, Nain and Nachvak, for the purpose of engaging an Eskimo interpreter, which we succeeded in doing at the last named place.

The first station was built on the north-west point of the promontory between Ungava Bay and the Atlantic, or near Cape Chudleigh. The second station was to have been placed on the southern or western part of Resolution Island, but we did not succeed in finding a harbor on these shores, and could not land on account of the stormy weather; but we got a near view of the west coast of the island, and also of some of the Lower Savage Islands. We therefore proceeded to the locality which had been determined on for the third station, and found a suitable place on the south side of Big Island, which is just west of the Upper Savage Islands, at an inlet about two miles east of North Bluff. We next crossed the Strait to Cape Prince of Wales, south south-west of North Bluff, and erected a station on the shore of the bay, inside of the cape, or on its eastern side. From this place we next made the south point of Nottingham Island, and established a fourth observatory. Again crossing the Strait in a southerly direction, we passed close to Digges Island, and coasted down the eastern side of Mansfield Island, looking for a suitable place for another station, but without success. The south-east shore of Southampton Island was also coasted for some distance, after which we traversed the northern part of Hudson's Bay to the entrance of Chesterfield Inlet. We did not land in this neighborhood, however, but turned south and called at Marble Island, where we anchored and spent one day ashore. From this island we made Cape Churchill, and then entered the harbor of the same name, at the mouth of the Churchill River. A short visit was paid to York Factory, from which we recrossed Hudson's Bay to Digges Island, where a fifth station was built. On our homeward voyage through Hudson's Strait, we visited all the other stations in the reverse order in which they had been established. Another attempt was made to stop at Resolution Island, in order to build a station, but again without success. It was then decided to place the party intended for Resolution Island at Nachvak Inlet, and we called there for this purpose and to leave our Eskimo interpreter, on our way to St. John's, which we reached on the 11th of October, and immediately handed the

ship over to her owners, four days before the date fixed for the expiration of the charter. On the morning of our arrival at St. Johns, we happened to catch a steamer for Halifax, and so were enabled to continue our homeward journey without an hour's delay.

Before proceeding to give details of my special work, I may say that at every place we visited I obtained as full notes as my opportunities would permit in regard to the geology and mineralogy of the surrounding country. I also endeavored to obtain from the natives information as to the occurrence of useful minerals, which, although not very definite, may in some cases lead to valuable discoveries. The Eskimo are intelligent and good observers, especially of such matters as affect their own mode of living and although rocks and minerals would not be expected to interest them much, still I found that in some instances they had taken notice of them. In order to facilitate enquiries I had provided myself with a collection of all the ores, minerals and rocks which might be expected to occur in the regions we were to visit, and on allowing the natives to inspect them, they would point out those which they thought similar to certain kinds which they had noticed in their own districts. An interesting feature in the geological phenomena of these northern regions, is that a study of them will assist us in the elucidation of the superficial geology of the more southern portions of the Dominion, which forms so important a branch of the work of the Geological Survey.

In regard to zoology, efforts were constantly made to collect specimens in every class of animals and to obtain new information on all points with reference to them. Upwards of fifty specimens of mammals and birds were obtained, of which a portion were from Dr. Matthews, of York Factory. Some of these are rare and will prove to be very useful and interesting additions to our museum. Many notes were made on the habits and distribution of the mammals and birds. Attention was paid to the fishes and their food and to the subject of possible fisheries in these regions. A variety of mollusks and other invertebrates was secured by dredging. As we were living mostly on ship-board and in so cool a climate, but little could be done for the science of entomology. A small collection of butterflies and moths from the shores of Hudson's Strait have been sent to Mr. H. H. Lyman, a well known entomologist in Montreal, who has agreed to identify them. One of the missionaries on the Labrador coast has kindly promised to collect the Lepidoptera of that region and send them to me next year.

With regard to botany, as complete a collection of plants as possible was made at every place we touched at. These are in the hands of Professor Macoun and a catalogue of them will be found in the Geological Survey Report. Some new facts of interest in regard to the ranges of forest-trees in the Labrador peninsula and the country west of Hudson's Bay were ascertained from persons acquainted with these regions.

In addition to the technical assistance already acknowledged above, I take this opportunity of mentioning that Professor C. Hart Merriam has kindly aided me in making out from my descriptions, the local names, &c, with which he is familiar, the accompanying list of the seals of Hudson's Bay and Strait. I may mention that Professor Merriam, who is justly regarded as a high authority on the Pinnapedia, has himself gone to the Newfoundland and Labrador seal fishery, and travelled in the Gulf of St. Lawrence for the express purpose of studying these animals. It would appear from my observations that we have in both Hudson's Bay and Strait all the kinds of seals found at any season either in the Gulf or on the coast of Newfoundland and Labrador; and from all that we could learn, both seals and walrus are abundant in the Strait and the northern parts of the Bay. But in order to obtain them in large numbers for commercial purposes, their various resorts and the course of their migrations at different seasons of the year would require to be studied. The gentlemen in charge of the observatory stations were instructed to attend to such matters, and their notes will probably throw some light on the subject in the particular localities at which they are stationed. In the list of fishes, I have included species which I had in previous years ascertained to exist in Hudson's Bay or the waters immediately connected with it. Mr. Lucien M. Turner, who has spent two

years in the Ungava district in the interest of the Smithsonian Institution, has kindly determined some of the fishes which I collected, and added the names of others which he found in the district named.

I secured about sixty five photographs of a uniform size of 8 by 5 inches. These are illustrative of subjects of interest in connection with the expedition, of the nature of the country and more especially of points bearing on its geology.

I shall confine myself in the following pages to the subjects above referred to, as all others connected with the work of the expedition will probably be fully reported on by Lieut. Gordon. In regard to the arrangement to be adopted in this report, it has been considered best to state the facts and observations in the order in which they were noted, and in connection with them to give other information, bearing on the subjects referred to, which may have been gathered in previous years.

As already mentioned, we anchored for an hour at Blanc Sablon on the morning of the 26th of July. Here the horizontal strata of the Quebec group form a conspicuous feature in the landscape. They are described at pages 237 and 238 of the *Geology of Canada* as consisting of 231 feet of red and grey sandstones and fine conglomerates forming the lower part of the section, with 143 feet of grey, reddish and greenish limestones resting upon them. In Forteau Bay, a short distance east of Blanc Sablon, a considerable collection of fossils was made in these limestones by the late Mr. James Richardson, which proves them to belong to the Quebec group, and to be equivalent to the Red Sand-rock of Vermont. The Laurentian gneiss may be seen cropping out from beneath these sandstones at and near the sea shore, while the hills of the same formation rise above the level of the summit of the horizontal strata all along in the interior.

At the entrance to Chateau Bay on the Labrador side of the Straits of Belle Isle, opposite to the northern extremity of Newfoundland, are two islands, called Castle and Henley's Islands, which are capped by flat basaltic summits, the former being 200 feet above the sea. They form a striking contrast to the prevailing character of the shore rocks, which everywhere else in the neighborhood appear to be of Laurentian gneiss. Later in the season I was informed that some men had been mining mica on the shore of this bay, and in the autumn had brought about one ton of the mineral to St. Johns, on the way to Boston or New York, but that the plates did not exceed three by six inches in size, and that they were of a rather dark color.

After passing the Straits of Belle Isle, the Labrador coast continues high and rugged, and although there are some interruptions to the general rule, the elevation of the land near the coast may be said to increase gradually in going northward, until within seventy statute miles of Cape Chudleigh, where it has attained a height of about 6,000 feet above the sea. Beyond this, it again diminishes to this cape, where it is 1,500 feet. From what I have seen of the Labrador, and from what I have been able to learn through published accounts, Hudson's Bay Company's officers and the natives, and also judging from the indications afforded by the courses of the rivers and streams, the highest land of the peninsula lies near the coast all along, constituting, in fact, a regular range of mountains, parallel to the Atlantic seaboard. In a general way, this range becomes progressively narrower from Hamilton Inlet to Cape Chudleigh.

The distance from the Straits of Belle Isle to Cape Chudleigh, along the Labrador coast, is 760 English statute miles. This is divided into three principal courses, as follows: From Belle Isle to Porcupine Bay, due north (true), 120 miles; from Porcupine Bay to Nain, north-west (true), 290 miles; from Nain to Cape Chudleigh, north north-west (true), 350 miles. The coast-line is everywhere indented by inlets or fjords, and fringed with islands of all sizes, from mere rocks up to some measuring twenty-five miles in length. Most of the fjords are narrow and about twenty-five miles long; several are thirty-five miles, and Hamilton Inlet runs in from the open sea a distance of 160 miles. The general bearing of the fjords is at right angles to the coast line in the neighborhood. In a great many cases the islands are separated from one another, or from points on the mainland, by very narrow straits, with deep water, which have received the name of "tickles." With regard to the condition

below the level of the sea, it is stated in the *Newfoundland Pilot*, published by the Admiralty, that the shores from Davis' Inlet to Nachvak are comparatively free from reefs and sunken rocks, but that from Nachvak to Cape Chudleigh they are fringed with islets and rocks, to an average distance of five miles out. The coast of Resolution Island seems to be similarly studded with these impediments to navigation, and these circumstances appear to be connected with certain geological conditions, which will be referred to further on.

In approaching Ford's Harbor, which is on the eastern point of Paul's Island, the islands near which we passed consisted of bare rock, and although usually high and steep, they had rounded or glaciated outlines. Numerous perched boulders lay about, either singly or in groups or rows, on the naked surface of the rock, wherever they could find a resting place. A short distance off the entrance of the harbor, we passed an island which, on the top and one side was literally piled with rounded boulders. On this island I noticed a dyke of trap about 100 feet thick, cutting the gneiss in a west-north-westerly direction. On going ashore at Ford's Harbor, I found the gneiss to consist of common reddish and greyish varieties, some parts of it massive and others more finely and distinctly laminated. The average strike was south-east (true). The glacial striæ were quite distinct in many parts, but were best preserved near the shore. They run in two principal directions, S. 45° E., and S. 80° E. (mag.) Perched boulders were observed on all the surrounding hills. In going from Ford's Harbor to Nain we followed the channel on the north side of Paul's Island. The rock appeared to be dark, massive and crystalline.

Our stay at Nain was so short that I had only time to examine the high ridge or mountain to the north and north-west of the Mission Station. The first shoulder of this ridge, we were informed, has a height of 875 feet above the sea, but the summit, a short distance further inland, must be at least 200 feet higher. The rock here consists of a rather light grey gneiss, which strikes S. 45° E. (mag.) The glacial striæ, which were seen with greater or less distinctness, all the way to the summit, run S. 65° E. (mag.) or about parallel to the valley which extends inland from the head of the fjord up which we had sailed to Nain, and with the same general bearing. Well rounded boulders were scattered over the flanks and summit of this high ridge; and they were quite prominent on the high bare hills on both sides of the inlet, all the way from Ford's Harbor. The appearance of the top of this mountain, with the boulders resting on the bare, sloping rock, is shown in one of the photographs taken at this spot. Mountains of equal and greater height were seen in all directions from this summit, except towards the eastward, where they die down to the sea level in the distance. On the next hill to the north-west, the weathered surface of the rock showed a rusty belt of a brownish color, and of considerable extent, which was supposed to be due to iron pyrites. I was informed by the Moravian missionaries at Nain that the labradorite of this part of the coast is to be found at different places on Paul's Island, and at a fresh-water lake called Nunaingok, which lies at no great distance inland from the head of a bay to the north-westward of Nain. They said it was also reported to occur on a bay a short distance to the southward. I had not an opportunity of visiting any of these localities, but from specimens which I have seen, I have little doubt the mineral occurs as veinstones, in which there are also crystals of pyroxene, iron pyrites and magnetic iron. In this connection it may be mentioned that I have seen a large specimen of coarsely crystalline labradorite rock from Hamilton Inlet, in which some of the faces showed a blue iridescence. The rose-red variety of anorthosite, called latrobite by Gmelin, is stated to come from an island called Amitok, on the old charts of the Labrador coast, about forty-five miles northward from Nachvak. When at Nain I obtained specimens of amazon-stone, which the Eskimo told me came from Port Manvers, and of paulite, a variety of pyroxene or hypersthene, which has also been called "Labrador hornblende" and "metalloidal diallage." It was said to have been brought from Paul's Island. Mr. John Ford informed me that yellow mica, in flakes about the size of one's hand, was found on this island, about two miles north-westward of Ford's Harbor. In regard to the rocks and minerals of the Labrador coast, the fol-

lowing notes may be here given: I have received specimens of copper pyrites in a dark slate, which were labelled as having come from Indian Island, on the north side of the entrance of Hamilton Inlet, and I have been otherwise informed that slates or schists occur in that neighborhood. A man from Nova Scotia stated to me that he had been engaged, with others, two years ago in mining copper and lead ores on Deadman's Island, which is situated a few miles north of Hamilton Inlet. They occurred in a vein between a rock like granite and a sort of sandstone or quartzite. Mr. King, the second mate of the "Neptune," said that copper ore was also found at Iron-bound Island or "Makoubik" (probably Makkovik of the chart), not far from Cape Harrison. One of the gentlemen we met at Nain informed me that he had heard of copper ore being found somewhere to the southward of that place, but was not aware of the locality. These circumstances point to the possible occurrence of deposits of copper in quantities of economic value on this coast. It is well known that productive mines of copper were in operation for a number of years on the adjacent coast of Newfoundland.

At Nain I noticed some freshly split slabs of a grey felsitic slate, which were being used as flag stones, and, on inquiring, was informed that they had been brought from Ramah, in the bay next south of Nachvak, where there was said to be plenty of this rock in situ. The name of the bay is Nullataktok, or Slate Bay. Our Eskimo interpreter, Lane, who was well acquainted with this bay, afterwards informed me that slaty rocks were abundant there.

While at Ford's Harbor and Nain I collected as many plants as the limited time would permit, and Professor Macoun's list of them will be found in the appendix. The Rev. Dr. S. Weiz, who had long resided at Nain, had made a collection of the plants of the vicinity, which he had submitted to some of the leading botanists of Europe, who had attached the proper name to each specimen. He kindly allowed me to make a list of these and it is also given in the appendix, in one of the columns of the general list.

Although timber disappeared from the outer coast before reaching Nain, yet groves of trees may be seen in the valleys and on the more favorable slopes at the heads of the inlets, and we were informed that after going ten to twenty miles inland from Nain, or from the coast for a considerable distance north of it, the whole country may be said to be wooded, as far as the condition of the surface will permit of the growth of trees, and that in favorable situations the spruce and tamarac attain a sufficient size to be sawn into lumber. At Nain, the trees consist of spruce, tamarac, and small willows, but at no great distance inland, balsam fir, poplar, white birch and rowan begin to make their appearances.

In the gardens at Nain I observed the following vegetables: potatoes (a variety with low, flat, spreading tops), turnips, carrots, beets, cabbage, Scotch kail, a very rank variety of spinach, lettuce, peas, beans and onions. There was also a great variety of flowers. The peas and beans were arranged so that they could be protected by glass if requisite, and the potatoes were planted in narrow beds, arched over with bent rods so that long sheets of coarse canvas could be thrown over them on frosty nights.

Leaving Nain, our next stopping place was the Inlet of Nachvak, about 140 miles south of Cape Chudleigh. This inlet or fjord, with an average breadth of from a mile to two miles, runs in from the open sea a distance of about forty statute miles. The water in it is very deep, and the mountains on either side immediately overlooking it rise to heights of from 1,500 to 3,400 feet, but a few miles inland, especially on the south side, they appear to attain an altitude of 5,000 to 6,000 feet, which would correspond with the height of The Four Peaks, near the outer coast-line, about midway between Nachvak and Cape Chudleigh. The mountains around Nachvak are steep, rough sided, peaked and serrated, and have no appearance of having been glaciated, excepting close to the sea-level. The rocks are softened, eroded and deeply decayed. On precipices and steep slopes the stratification is well brought out by the weathering, so that the dips may be distinctly seen. The mountains on the north side proved to be mostly Laurentian

gneiss, notwithstanding their extraordinary appearance, so different from the smooth, solid and more or less rounded outlines of the hills composed of these rocks in most other parts of the Dominion. On the present occasion we stopped only at the Hudson's Bay Company's post, at a narrow part of the fjord, about twenty miles in from the open sea, and I had a few hours to examine the rocks, collect plants and take photographs in the neighbourhood. But in returning, in the month of October, we stayed for several days at a bight on the north side, a few miles from the entrance, where we built a station, and named the place Skynner's Cove. This enabled me to extend my explorations of the neighbourhood, and I shall now state the results of my observations on both occasions.

On the south side of the inlet at the Hudson's Bay Company's post, an escarpment rises to a height of 3,400 feet, as ascertained by Commander J. G. Bolton, R. N., but I had not time to visit it to determine the nature of the rock. A brook, which gathers its waters from higher ground further back, but which is not visible from the post, precipitates itself from the top of this great precipice in an almost perpendicular fall. The rock on the north side at this place consists of reddish gneiss, somewhat contorted and occasionally interstratified with dark micaceous layers. Two or three miles east of the post a good sized brook falls, in several almost perpendicular leaps, a height of 300 or 400 feet over these rocks. The strike of the gneiss in the neighborhood of the falls is S. 35° W. (true.)

At a point on the north side, estimated to be about nine miles from the open sea and eleven from the post, opposite to a bay on the south side, a mountain rises steeply to a height of 1,500 or 2,000 feet. It is composed of gneiss standing vertically and striking N. 25° W. (true), cut diagonally by a great many dykes of dark trap all underlying westward at an average angle of about 30° from the perpendicular. Some of them run together and others appear to die out in both directions on the cliff section. Some dykes of close-grained, almost black diorite, also cut the gneiss in the vicinity of Skynner's Cove. From the point above named to Skynner's Cove the rock along the north side appears to be all gneiss with a variable strike in different parts. Around this cove there is a variety of micaceous, and hornblendic schists passing into thinly bedded gneiss. The average strike is about S.W. (true). I was informed by our interpreter, whose home is on the south side of the inlet, that the Eskimo obtained a kind of soapstone for making their pots in the vicinity of Skynner's Cove before they were able to procure others of metal. Along the northern part of the entrance to the inlet or about North-Head of the chart, the rock is a coarse, dull red syenitic gneiss. At one place it encloses a mass, like a bed, of nearly white quartzite marbled with small elongated gray patches, but it appears to be cut off as it runs up the slope, although another exposure of white rock was seen some distance off in a north-easterly direction. Here the glacial striæ were seen on projecting points near the water, running with the axis of the inlet or about east. At Mount Razorback, which forms the outer point on the north side of the Nachvak Inlet the stratification is well seen, the dip being to the southward. The angle of dip on the outer or eastern part of the mountain is almost 60°, but this diminishes to 45° and finally to less than 10°, in going to the south-westward. Several large but somewhat irregular dykes of black-looking rock cut the strata of the mountain side at right angles to the dip in its varying inclinations.

On the opposite or south side of the entrance of the Nachvak Inlet, the dip of the bedding is S. S. W. (true), and the inclination, generally from 35° to 40°, but at one part it is 60°. Dykes were seen all along, cutting the face of the mountain range and running in a south-easterly direction.

On the west shore of the first cove, from the entrance, on the south side of Nachvak Inlet, the rocks consist of a coarse-grained slaty tufa or breccia, thickly studded with grains of quartz-opal. To the north, this passes into a sort of coarse cleavable grey syenite, which could be traced for two miles westward along the shore; while to the south of it is a coarse grey mica schist, running N. 25° W. (mag.) vertical. In this rock, and near the slaty breccia, a vein of quartz was found, from a foot to two feet in thickness, and holding patches of brown-weathering calcspar.

The rocks in the mountain, overlooking the south side of the inlet, opposite Skynner's Cove, have a slaty appearance, with some great bands of a light color and more solid aspect, the outcrop running nearly horizontally for some distance. I was unable to visit these bands, but our interpreter brought me a specimen, which he said he had broken off one of them, and which proved to be a fine-grained light grey, silicious schist, which makes excellent hones. These and the other rocks on the south side of the inlet in this neighborhood, which have just been described, as well as a part of those on the north side, may belong to the Huronian series. Slaty rocks have been mentioned as occurring at Ramah, in the inlet, about twenty miles south of Nachvak. From the specimens which I have seen, these are probably of the same age, and they may be connected as one area with the supposed Huronian strata of Nachvak.

We were informed, both by Mr. George Ford, the agent of the Hudson's Bay Company at Nachvak, and our Eskimo interpreter, that at a short distance beyond the more distant mountains, seen to the west of the company's post, the country falls rapidly on the inland side, and soon becomes comparatively level. This description agrees with other accounts of the interior of the Labrador in the Ungava district. A wide level tract embracing the country drained by the George, the Whale and the Koksok South, Big or Ungava Rivers, is said to extend southward a long distance from Ungava Bay. The surface is reported to be covered with a wet, peaty moss, growing upon barren sand, with the solid rock everywhere at a short depth beneath. The rivers and brooks are fringed with spruce and tamarac trees, but very little timber is to be met with between them. The mouth of the Ungava River is 155 miles south-west of Cape Chudleigh. In going by sea, from one to the other, Commander Bolton says, in the *Newfoundland Pilot*: "The high land of the Labrador shore could be seen towering above the scarcely discernable shore of Ungava Bay, for the first sixty or seventy miles." The Ungava River is navigable for sea-going vessels to a point three or four miles above the Hudson's Bay Company's post, Fort Chimo, and boats may ascend it for seventy or eighty miles. The river is from one-quarter of a mile to a mile and a-quarter in width. Its upward course is S. by E. (true), and it passes through a barren undulating country. Spring tides at Fort Chimo rise  $38\frac{1}{2}$  feet, and the rapid currents produce dangerous whirlpools. Salmon frequent the rivers of Ungava Bay in great numbers, and for some years the Hudson's Bay Company have annually sent a cargo of them, in a frozen state, by a small steamship, to the London market, in addition to a considerable quantity of the salted fish. Besides salmon, the trade of this port consists of furs, seal and white porpoise oil, and deer skins, and is carried on with the Eskimo of the coasts, Cree Indians from the south-western interior, and Nascope Indians from the south-eastward.

Spruce timber begins to be met with, according to all accounts, about thirty miles to the south-west of the Hudson's Bay Company's post at Nachvak. The tamarac follows a short distance further south. To the westward of Nachvak, the northern limit of the spruce, according to Capt. William Kennedy, reaches the shore of Ungava Bay, north of the George River. On the western side of this bay the Eskimo informed me it begins to be found in the neighbourhood of Bay of Hope's Advance, or five days' journey south-eastward of Cape Prince of Wales, on the south side of Hudson's Strait, and that in this neighbourhood it was found further north in the interior than near the coast. In addition to spruce and tamarac, balsam-fir, canoe-birch, aspen and balsam-poplar are reported, on good authority, to exist in the interior of northern Labrador, but at some distance further from the coasts of the Atlantic and the Strait than the first mentioned.

On the East-main coast of Hudson's Bay the northern limit of the spruce was found to be a few miles north of Richmond Gulf, but it was reported to extend much further north at a distance inland from this coast. On the west side of the Bay it was seen in considerable quantities all along the coast, from Cape Churchill to Button's Bay, and Mr. George McTavish, who has made several coasting voyages to the north, and who, at my request, has kindly made observations and collected information from the natives in regard to the distribution of timber, informs me that it

leaves the shore about twenty miles beyond Seal River. He was told by the Eskimo of these parts, who travel a good deal in the interior, that spruce timber begins to be met with at two days (say fifty-five miles) west of the mouth of Big River, and that it is considerably further inland, opposite to Eskimo Point, which is about in latitude  $61^{\circ} 40'$ . From this neighbourhood it runs west north-westward and crosses the Coppermine River about twenty miles from its mouth, and thence reaches nearly to the mouth of the Mackenzie River.

On leaving Nachvak, we sailed up the coast, passed round Cape Chudleigh, through Gray's Strait, which is between it and the Button Islands, and entered Ungava Bay. According to the chart and the *Newfoundland Pilot*, the cape rises to a height of 1,500 feet above the sea, and the highest point of the Button Islands has an equal elevation. The outlines of these islands and of the southern shore of Gray's Strait, although bold and steep, are rounded, as if they had been glaciated. At the west end of the south-eastern island of the Button group a great rock has been excavated into the form of a half arch, which rises out of the water and rests, at its summit, against the cliff which forms the extremity of the island. The rocks of the islands and the south side of the strait appear to be all gneiss.

On the Ungava Bay side of Cape Chudleigh we entered an inlet about ten miles southward of the extremity of the land, and discovered a harbour on its north side, which we named Port Burwell, after Mr. H. W. Burwell, the gentleman who was left in charge of the station (No. 1) which we built here. The hills, for a few miles around Port Burwell, are only moderately high and are not generally steep. Their outlines are rounded and their rocky surfaces have scattered upon them numerous boulders as well as finer rocky *débris*. The rock everywhere consists of ordinary varieties of gneiss, the commonest of which are massive reddish and dark hornblende and micaceous. The strike at the Port varies from  $N. 20^{\circ} E.$  to  $N. 40^{\circ} E.$  (mag.) The glacial striæ at the observatory station run  $S. 35^{\circ} E.$  (mag.), but among the hills in the neighbourhood they were observed to follow the trends of the valleys with a general south-eastward course by the compass. A short distance south of the station, a vein, varying from 8 to 13 inches in width, occurs in the gneiss. Its direction corresponds nearly with the strike, which is here  $N. 20^{\circ} E.$ , running with the stratification for a short distance, breaking across to other beds, following them for a short distance and then jogging off to others. It consists of light grey dolomite and white quartz, holding a little iron pyrites and some crystals of quartz, rendered ruby-colored by a layer of oxide of iron under the faces.

From Port Burwell I explored the inlet to the south-eastward, and found it to be a strait dividing into two branches at five miles from the Port, the northern of which was ascertained to run through to the Atlantic. The Eskimo whom we met in this strait informed us (through our interpreter) that the southern branch also continued through to the ocean. They also told us that there was no other channel to the south of this between Ungava Bay and the sea to the east. We named this newly found channel McLelan's Strait, in honor of the Minister of Marine and Fisheries, and the north-west point of the main land, Cape William Smith, in honor of the Deputy Minister. At six miles from Port Burwell the northern branch of McLelan's Strait has contracted to half a mile in width, and has become flanked by high and steep hills, rising from either side. The tides, which at springs have here a rise and fall of upwards of twenty feet, run with great velocity through this narrow part. The locality is called Nunaingok by the Eskimo, which means the Hidden Place, and the same name is applied to one or two other localities on the Labrador coast. In proceeding from Port Burwell to Nunaingok, our course was  $S. 5^{\circ} E.$  (mag.) or  $S. 55^{\circ} E.$  (true), and the country on either side of McLelan's Strait showed less and less evidence of glaciation. Even close to the shore, in approaching the higher hills which begin at Nunaingok, the gneiss is deeply decayed, the softening process having extended particularly along the joints which run both vertically and horizontally, leaving only hard kernels with a more or less rounded outline, between them. Nunaingok is situated on an alluvial flat, extending between the two branches of the strait. The hill which rises steeply on the south side of it is about 700 feet high; but

further in, between the branches and on either side of them, the mountains are from 1,500 to 2,500 feet high, and have rugged tops and sides. Rounded boulders were found scattered all over the side and top of the hill just referred to; but although it had probably been somewhat glaciated, it had not been planed down to hard surfaces, but had an irregular outline, and the rocks were much disintegrated. Among the transported boulders and pebbles scattered over its surface, some of brecciated drab limestone with clear quartz grains, pinkish red sandstone, red jasper and magnetic iron, were noticed. Fragments of grey, drab and yellowish limestone, with obscure fossils, were common around the base of the hill. The glacial striae were well seen on the southern side of the hill referred to, where, in one case, they were observed to groove longitudinally a vertical wall, and even the under side of an overhanging shelf of rock. The general direction was S. 25° E., or with the course of the south branch of the strait.

The fixed rocks around Nunainok, as far as I had the opportunity to examine them, were all gneiss, the average strike of which was N. W. (true.) On one of the mountains on the north side of the northern channel a wide belt of brown, iron-stained rock runs diagonally through the ridge, the color being probably due to the decomposition of iron pyrites, but I had not time to visit the place.

At Nunainok, on top of a bank of sandy earth, are the remains of an old Eskimo village. The roofs of most of the underground houses had fallen in, leaving only large circular pits. Some of these had become partially filled up, showing great antiquity. A few of the newest of them had been inhabited within a year. Some Eskimo camped in the vicinity informed us, through our interpreter, that this had once been a comparatively populous village, and a resort of their people as far back as their traditions extend. It is their custom to live in the underground houses from the commencement of winter, some time in November, till January, after which they leave them and spend the rest of the winter in igloos or snow houses. The water in the north branch of McLellan's Strait, they informed us, is open all winter at this point, and is much frequented by seals, which afford them a reliable supply of food. These animals they kill either from their kyaks or by spearing them from hiding places which they have built of stones on every ledge and point of rock past which the seals are accustomed to swim. Great numbers of bones of seals, walrus, reindeer, foxes, hares, birds, &c., lie scattered about on the surface and mixed with the earth around the old dwellings. The remains of stone pots and implements near others of European manufacture showed a transition from the barbarous to a civilized condition. I was told by one of the Labrador missionaries, who had had a long experience of these people, that the comforts and conveniences of civilization rendered the Eskimo less vigorous and healthy, and, as a consequence, their numbers are diminishing.

The "Neptune" was anchored in 15 fathoms at low tide in Port Burwell. The bottom was a sandy mud, and was found, by dredging, to abound with shellfish, echinoderms and crustaceans. During our stay, from the 5th to the 8th of August, the water teemed with fine cod, which were taken in great numbers by jigging. Many of them were tolerably large, and they were of excellent quality, contrasting, in this respect, with the cod we had got at Nachvak, Ford's Harbor and a fishing station on some islets we had passed to the south-east of it. Most of our crew had had more or less experience of the Labrador fisheries in previous years, and the superior quality of the Port Burwell cod was a subject of general remark among them. On our return to Port Burwell we found the fish still abundant on the 27th and 28th of September, and the party in charge of the station informed us that they could catch them any time they chose in the interval. At Nachvak the fishermen began to take cod on the 17th of July, and they were catching them in great numbers at the end of the month. During our stay in Skynner's Cove, in the inlet, from the 30th of September till the 6th of October, we caught as many as desired, by jigging from the ship's deck. From all that I could learn by enquiries along the Labrador coast and from our crew, it would appear that although the dates vary in different years and at different places, the average time for the cod to strike the shores is the middle of July, and that the particular time at any locality depends more on the presence or

absence of ice than on its latitude. If this condition happened to be the same all along, the fish would appear at the same time at every part of the coast. This would be the natural inference, since there appears to be no other difference in the conditions which would affect the cod along the whole coast. Bait is used as far north as Cape Harrison, but beyond that the fish are so numerous and voracious that the naked jigger alone is required. The fish are dried on flakes as far as Indian Harbor, but on the more northern parts of the coast they are spread upon the shingle or the smooth, rounded rocks.

Station No. 2 was intended to be placed on Resolution Island, or one of the Lower Savage Islands to the north-westward of it; but after spending part of two days in endeavoring to find an anchorage or a harbor on these islands, the attempt was abandoned until we should be returning after establishing the remaining stations. A near view of Resolution Island was not obtained on this occasion, but the southern shores of the Lower Savages were seen closely enough to determine the rocks to be massive gneiss, of which the prevailing color was red. The iron-bound shores of these islands rose abruptly several hundred feet above the sea.

On leaving the Lower Savages we proceeded up the Strait to the vicinity of North Bluff, but at a long distance from shore, until we came directly opposite to it. We anchored in a bay two miles east of the Bluff, which we called Ashe's Inlet, after Mr. W. A. Ashe, D.T.S., who was to have charge of the observatory station (No. 3) which we proceeded to erect on the eastern side of the bay.

The rocks on the west side of Ashe's Inlet consist of dark grey gneiss, composed principally of quartz and felspar in even beds. The general strike, which is pretty uniform, is east and west (true), and the dip, north at an angle of 40°. On the higher levels the surface of the rock is decayed into half isolated boulder-like masses. In the vicinity of the station, on the east side, a common variety of gray micaceous gneiss is met with, striking with regularity to the N.W. (true). A mile to the northward, however, on this side of the inlet, it has become east and west (true), corresponding with the strike on the west side. The country was examined for several miles inland, or what I judged to be about the centre of the (Big) island, and found to consist entirely of common varieties of gneiss, with a prevailing westerly strike. It contains many veins of "hungry" or barren milk quartz. Some of them hold felspar and black mica, giving them a somewhat granitic character. In one of them the felspar, which was white, was observed to be striated. The hills have a rounded sweeping outline, and their summits are a considerable distance apart. The wide even spaces between them hold shallow lakes, surrounded with green meadow-like flats and mossy slopes. Numerous rivulets and brooks run down the hills and discharge the waters of one lake into another. The general aspect of the landscape reminds one of some parts of the Highlands of Scotland. A shallow looking lake, with many low stony points, begins about three miles northward of our anchorage, and has a length of about three miles. It discharges south and westward into Ashe's Inlet by a wide, rapid and shallow stream, which we called Edith River. The Eskimo informed us that at certain seasons large trout were abundant in this lake and river.

Around Ashe's Inlet the glacial striæ run about S. 65° E. (true). On the tops of the hills the rocks are much weathered and only faint traces of the striæ remain. In these situations ridges of gneiss boulders, with an easterly direction, were occasionally met with. One of them, on a hill a short distance north of the observatory station, has evidently accumulated in the lee of a knob of rock which stands at its western extremity. Among the prevailing gneiss boulders scattered on the hills and plains were found several of grey dolomite like that of the Manitouink group of rocks (Cambrian. See Geological Survey Report for 1877, p. 11 C.) and of the soft buff grey dolomite like that of the Churchill River. (See Geological Survey Report for 1879, p. 18 C.). I also found a large decomposed boulder which had been made up of coarse radiating crystals of greenish grey hornblende. A bed of the same rock was afterwards found interstratified with the gneiss at Cape Prince of Wales, on the south side of the Strait, opposite to Ashe's Inlet. A small piece of greyish crystalline limestone was picked up near

Ashe's Inlet, which bears a very close resemblance to a variety common in the Laurentian bands of the Ottawa valley.

Some heavy field-ice had drifted into Ashe's Inlet before our arrival there. The Eskimo informed us that this was the first time in their knowledge that such a thing had occurred, and this circumstance afforded us another proof of the unusual abundance of this kind of ice the present summer. Several of the pieces or "pans" were upwards of 20 feet thick, and as the tide has here a rise and fall of more than 30 feet, some of them were left dry at low water and were found to consist of solid blue ice. The outlines of these pans, as seen floating in the sea, more frequently approach a quadrilateral form than any other. This kind of ice was afterwards seen in great quantities around Salisbury and Nottingham Islands, in the mouth of Fox's Channel, down which there appears to be no doubt, all the heavy ice of Hudson's Strait, comes. On reaching the Strait it projects towards the south shore and breaks off in fields of greater or less extent which float up and down with the tide, always working to the eastward, and part of it finally escapes into Davis' Strait. Hudson's Strait, however, being about 500 miles long, the tendency of the wind and tide is to drive much of it ashore, or to imprison it in bays and inlets. Once it has reached such situations, the lee afforded by the high lands often prevents it from being drifted out to deep water again. In this way, during the present season, a large quantity of it became fixed in Ungava Bay and detained the Hudson's Bay Company's steamer "Labrador" for twenty-one days, being the first time, I understand, that any detention of the kind has taken place. Mr. L. M. Turner, of the Smithsonian Institution, who was at Fort Chimo at the time, informed us that the thickness of some of these blocks of ice was measured, and in one case found to be as much as 42 feet. Mr. Burwell, at Station No. 1, on the west side of Cape Chudleigh, reported that, during August and September, he observed these heavy pans floating south-westward into Ungava Bay, but never returning past his station. At Ashe's Inlet the observer reported that the ice always floated back, or westward, a short distance, with each tide, but finally disappeared to the eastward. Some of this heavy ice was stranded about Cape Prince of Wales in the latter part of August and the first half of September, but it had all gone when we re-visited the station here on the 23rd of September. At Nottingham Island we observed some of the heaviest "pans" stranded in 6 fathoms of water, and they would, consequently, be about 40 feet thick.

I tested the ice of the stranded pans in some places, and always found it fresh. This would be the case, notwithstanding that the ice formed in sea water, for most of the salt would be thrown out in the freezing, and what might remain would drain away near the surface on exposure to the mild air of summer. Owing to the somewhat poor heat-conducting power of ice, it is not possible that so great a thickness as 40 feet could form in one winter in Fox's Channel. It is probable that a good many years would be required. In regard to the quantity of ice which has been observed in Hudson's Strait, a study of the experience of the vessels which have navigated these waters, as well as of that of the ships of the Moravian Brethren coming to the coast of Labrador, would seem to show that there is a succession of good and bad years, with a minimum, and a maximum at perhaps seven or eight years apart, or in cycles of some fourteen or fifteen years; also, that there may be a maximum intensity in these cycles themselves, so that perhaps every third one will be more favourable in the minimum of ice and more severe in the maximum than the two intervening ones.

The fact that most of the ice-pans of Hudson's Strait, when not covered with fresh snow, are colored with dust and earth, points to their formation near shore, and also to their remaining there during one summer at least, when the ground is bare of snow and the surface not frozen. The dust appeared to be in too great quantity to be of cosmic origin. These pans sometimes carry gravel on their backs, a circumstance which was noted in my report for 1880, p 20 C. When at Ashe's Inlet, a fact was observed which may explain the last mentioned phenomenon. Some tolerably thick ice still remained attached to the shore at high tide mark. During the melting of the snow on the hills above it, torrents had carried a quantity of stones and earth

out of an adjacent bank and deposited them upon the surface of the ice. The connection between this ice and the shore being sufficiently weakened, the next spring-tide would carry it out to sea, as previous tides had already carried parts of the adjoining ice, similarly laden.

The icebergs of Hudson's Strait are of comparatively small size and are or have been mostly flat-topped. The original appearance of some of them has been altered by foundering and canting, which have occasionally been repeated several times, the various positions which the berg has occupied being indicated by water-lines now standing at different angles to the surface. These small icebergs are most numerous along the northern side of the Strait, and they have never been observed west of Fox's Channel, out of which they proceed. They are supposed to originate from glaciers on the shores of this channel, but it is possible that they may come through the passages which are believed to run into it from Baffin's Bay and Lancaster Sound, or through Fury and Hecla Straits, in all of which the current is known to set southward.

✶ The soil or drift material of Hudson's Strait is probably permanently frozen at a certain depth below the surface, although our interpreter told me it was not so at Nachvak, nor does it appear to be the case at Nunaingok, in McLellan's Strait. On Nottingham and Digges Islands, when the gneiss has been glaciated and its hard surface exposed to the cold, it appears to have become so deeply chilled that its temperature does not rise above the freezing point in summer, except in the direct sunshine. Whenever water in small quantities had flowed over these rocks at night or in the shade during the day it had become frozen.

While the "Neptunæ" was lying at Ashe's Inlet a party of Eskimo from the eastward came on board. They brought with them plates of good, light coloured mica and pieces of pure foliated graphite, also a small piece of iron pyrites, and one of amorphous graphite. In reply to questions, they stated that they came from a place called Kimnirook, about two days' journey by kyak, to the eastward, and that they had gathered these specimens in that vicinity. They further stated that there was plenty, both of the mica and the foliated graphite. Having assembled these visitors, and also the Eskimo of North Bay, who were already at the Inlet, a party of thirty-eight in all, I exhibited to them my collection of minerals, and passing them round, one at a time, enquired successively if any of them had ever seen a mineral like that. In return for any information which they might give, I offered them tobacco, ammunition, kettles, &c., all of which they coveted very much and might easily have invented stories as to the occurrence of minerals in these regions in order to gain the articles offered. But the only kinds they recognized, besides those of which they had brought the specimens above mentioned, were a bright red hæmatite occurring inland from Kimnirook, and a rather hard and inferior variety of soapstone, which they used for making pots before they obtained metal ones from the white men, at the western end of Big Island (in which this inlet and North Bluff are situated). They said they had observed plenty of hard white stones, like the quartz exhibited, in various localities, but no soft white ones such as the marble, gypsum, barytes, &c., the hardness of which they tested with their knives.

During our stay at Ashe's Inlet, the Eskimo killed two reindeer in the vicinity, and, judging from the numerous tracks, of these animals they would appear to be common; but the natives informed us that they were much more abundant on the mainland to the north, where they are in the habit of hunting them most of the summer, coming again to the sea shore to live on seals and walrus during the winter. Three young harp seals were killed in the inlet during our visit, and as we steamed out of it we saw two walrus. One of our party obtained the tusk of a narwhal from the Eskimo who visited this inlet. Arctic hares were numerous on a small island, to which the foxes could not gain access. Gulls, gannets, guillemots, eider ducks and ptarmigan were the commonest birds. The young of the last named were about three parts grown on the 15th of August, and could fly with the adult birds. The Eskimo informed us that large trout were abundant, at certain seasons, in what we named Edith Lake and River, a few miles north of the observatory station.

Driftwood, all spruce, of which a considerable quantity had been seen at Port Burwell and in McLelan Strait, was entirely absent at Ashe's Inlet, and Nottingham Island, and was scarce at Digges Island and Cape Prince of Wales.

We left Ashe's Inlet on the evening of the 16th August, and arrived at Cape Prince of Wales, on the opposite side of the Strait, on the morning of the 17th, the distance being about 60 geographical miles, and the course about S. S. W. (true). Prince of Wales Sound lies to the south-eastward of the cape, and appeared to be about 15 miles broad. We selected a place on the inner side of the cape for building the observatory station, and named it Stupart's Bay, after Mr. R. F. Stupart of Toronto, who was to have charge of it. The highest hill on the west side of the bay was ascertained to have a height, according to the barometer, of 340 feet, and the highest to the south of it to have a height of 180 feet. The rocks in the vicinity of the bay were found to consist entirely of Laurentian gneiss. In the hills on the west side of Stupart's Bay, the strike is from S. to S. 40° E. (mag.), or nearly east and west (true). The gneiss in the hills, both to the south and west, is cut by numerous veins and bunches of milk-white quartz, which in various parts are so conspicuous on the bare surface as to be seen from considerable distances. In one place on the eastward slope of the hill to the west a group of parallel veins of this mineral, varying from a foot to two feet in width, is traceable for some distance. Their course is slightly sinuous, but the average run is N. 55° W. (mag.). Red felspar occurs in some of these, and occasionally a little black mica. The top of this hill is rounded and striated. The glacial grooves are quite distinct. On the highest point their direction is S. 60° E. (mag.). A little below the summit, on the south side, they run S. 50° E., while at the observatory station, near the sea shore, their course is S. 40° E. (mag.).

Viewed from the top of the hill just referred to, the slopes and valleys to the north-eastward are full of ponds resting in basins of solid rock. Boulders are perched on the summits and slopes of all the hills around. Beaches of shingle, as fresh looking as those on the present sea-shore, except that the stones are covered with lichens, may be seen at all levels, up to the tops of the highest hills in this vicinity. The long sloping hillside to the south of the observatory station is covered with fields of shingle and small round boulders, all blackened by the lichens. At the northern base of the ridge, to the north-west of the station, is a large dry basin-like depression, with a notch on the outer side, through which it has formerly communicated with the sea. From the notch, the shingle and mud are spread over the floor of the basin in a fan-like fashion, as if the tides had rushed violently in through this opening. The materials of the raised beaches above referred to consist principally of gneiss with milk quartz from the veins of the neighbourhood, together with a few fragments of yellowish grey dolomite, with obscure fossils, a hard and nearly black variety of silicious clay-slate, with an occasional boulder of dark, hard crystalline diorite.

Prince of Wales Sound has a breadth of, apparently, about fifteen miles, in a due S. E. bearing from Stupart's Station, on the inner side of Cape Prince of Wales, and of probably eight or ten miles in a southerly direction. A long arm, the north shore of which I reached at two and a-half miles due S. W. from the station, runs due west from the western side of the sound. This appeared to be the favourite resort of the Eskimo, and I propose to name it, for convenience, Eskimo Inlet. A small rapid river was crossed between the station and the inlet. The Eskimo informed me that another river enters the head of this inlet, and that it passes through two good sized lakes not far from the sea. Some large trout, which they had brought to the ship, were stated to have been caught in this river. Salmon were said to be found in another river entering the sound at a point about south of Stupart's Bay.

The hills of gneiss between Stupart's Station and Eskimo Inlet are pretty thoroughly glaciated. The ridges and hummocks, as a rule, present smooth gradual slopes to the west and abrupt craggy faces to the east, showing that the movement of the ancient ice was from the west. The striae are well seen in many places on the hills, the average direction being S. 40° E., (mag.) or about due east, astronomically. On the shore of the inlet they run a little north of true east or parallel with the course

of the inlet itself. Here I found a good many boulders of grey and yellowish limestone on the beach.

The gneiss along the northern shore of Eskimo Inlet is of the ordinary variety, and has an average strike of N. 20° W. (mag.) One of the veins of white quartz in this locality contains purplish red calcspar, in rather coarse crystals of a uniform size, both the color and texture closely resembling some varieties of the banded crystalline limestones of the Laurentian series in the County of Lanark. Dark crystals of epidote occur along with it. Light green amorphous epidote and a bright red felspar are associated in some of the quartz veins of the vicinity. One of the Eskimo had a small lamp made of a soft, grey variety of schistose mica rock, which he said occurred on an island in Prince of Wales Sound.

From a hill near Eskimo Inlet a view was obtained far inland to the west. The surface of the country in that direction appears in long sweeping outlines, terminating in mountain ranges in some of the higher parts, and resembles the landscapes in various parts of Newfoundland.

The Eskimo report reindeer to be plentiful around Prince of Wales' Sound at certain seasons, being most abundant, I understood, in the winter. During the interval between our two visits to the sound, the natives killed several, and a member of the observatory party shot one in the vicinity of Stupart's Bay. These people also told us that the polar bear was common on the southern shore of the Strait, to the west, and that Ane-ugi, or Snow Island, about eight miles above Cape Prince of Wales, was a favourite place for them to land. The walrus is found at this cape at most seasons of the year. We saw several in going out and in with the "Neptune," and our interpreter killed one while we were lying in Stupart's Bay.

The Greenland, or harp seal, (*Phoca grœnlandica*, Fabricius) was the species on which the Eskimo were living during our visit to Prince of Wales' Sound, but they had in their possession the skins of a good many harbor and square-flipper seals. (*Phoca vitulina*) (Linn.) and *Brignathus barbatus* Fabricius). Some of the last mentioned were very large, stretching from the apex of a wigwam to the ground, and measuring 11 or 12 feet in length.

In reply to questions put to the Eskimo here, through our interpreter, they informed us that not only the Strait itself, but even Prince of Wales' Sound, did not freeze over in the winter, but that ice drifted up and down with the tides. They stated that ice formed in the coves and around the shoals and islands off the cape. The chief reason why they live in this vicinity is that Cape Prince of Wales being "a good place for ice" they are more certain of a steady supply of seals and walruses than elsewhere.

As to the supposed passage or channel between Bay of Hope's Advance and Mosquito Bay, they did not appear to have any personal knowledge. Our interpreter did not think it existed, but as he came from the eastern Labrador, he had no definite idea on the subject. Being an egotistical individual, and wishing his own opinion to prevail, it was impossible for me to get a fair expression of the views of these people on this important matter.

We left Stupart's Bay at Cape Prince of Wales, on the evening of the 22nd of August, and arrived at the southern part of Nottingham Island on the morning of the 24th. In passing the south-side of Salisbury Island, the hills of the western part were observed to have more even outlines than those of the eastern, as if the glacial force had come from the westward. We anchored in 5 fathoms of water, in an inlet a few miles east of the most southern part of Nottingham Island, and found a suitable place for the station close to our anchorage, and on the north side of the inlet, which we named Port DeBoucherville, after Mr. C. DeBoucherville, of Ottawa, who was to have charge of this observatory.

Around Port DeBoucherville, and for some distance to the westward, the country consists of island-like hummocks of rock, more or less separated from one another and surrounded by clayey mud. The lower parts of these muddy intervals are partly overflowed by the tide, rendering the water turbid in all the bays and inlets of this part of the island. The clay is mingled with boulders and gravel, and it extends below the bottom of the sea on the one hand, and up the valleys to a height of 50 to

100 feet. In preparing to leave the port, it was found difficult to start our anchor out of the mud, some of which came up on one of the flukes, and proved to be an exceedingly tough bluish-grey clay, containing grains of coarse sand disseminated through it.

I explored the country to a distance of about three miles in various directions from our anchorage, and found the rocks to consist of common varieties of gneiss, the only exceptions noticed being patches of a fine-grained red syenite on both sides of the inlet. The average direction of the strike is south-west (true) but there are numerous local variations which, however, seldom carry its course outside of the south-west quarter of the circle. The joints in the gneiss run about east, or nearly parallel with the glacial striæ, and this is also the direction of a number of long cuts and straight valleys or gorges in the gneiss, which have, therefore, an oblique angle to the strike. The bottoms of these depressions are filled with boulder clay, which, on the surface, has a structural arrangement parallel with the walls, apparently due to a process of expansion and contraction and of heaving, on account of the intense frost of this region. In narrow cuts or gorges the heaving of the clay was greatest along the sides, which had the effect of sorting out and throwing the boulders to the centre, where they formed rows as regular as if they had been placed artificially.

The direction of the joints in these rocks may also be that of dykes and veins, which, owing to decay and subsequent glacial action, would now be concealed in the bottoms of the depressions above referred to. At a projecting point on the side of one of them, however, and running parallel to its walls, I found some strag-gling veins of hard gray dolomite, weathering brown and holding scales of mica.

The rocks of the lower levels are well glaciated, and from upwards of twenty trials in various situations around Port DeBoucherville, the average course of the striæ across the south end of Nottingham Island was ascertained to be S. 30° E. (mag.), or only a few degrees southward of true east. That the direction of the glacial movement was towards the east is obvious from the contour of the *roches moutonné*, the mode of the fluting of perpendicular walls and of channels cut in the rocks, as well as by the direction of the curves of the semi-circular lines across the larger grooves themselves. A valley, with a south-eastward bearing, enters the head of Port DeBoucherville, and along it the grooves partake of the same direction, showing that while the low southern portion of the island was swept by a great glacier from the west, another was traversing it from the north-west. Nearly half of the boulders, stones and gravel of the drift are grey limestone, like that of the Manitounik (Cambrian) group, indicating the proximity of these rocks to the westward. The grey quartzite of this series is also well represented. One piece of this rock contained the characteristic spherical spots of a softer nature and lighter colour, which usually weather out into hollows on exposure. There are also fragments of black slate and red jasper, both of which have been found in the Manitounik group. Two pieces of fine-grained white quartzite were noticed, which may have come either from rocks belonging to this group or to the Huronian series. A fragment of red sandstone conglomerate was also observed, of the same kind as that which underlies unconformably the Manitounik rocks, and is so largely developed at Little Whale River and Richmond Gulf. (See Report of the Geological Survey for 1877, pp. 13 and 14 C.) No shells were found in the boulder-clay, but a few common species were abundant in a bank of stratified sand, having a height of about 8 feet above high-water mark at the head of a bay.

During the interval between our two visits to Nottingham Island, the observatory party saw a few reindeer, but the numerous tracks and droppings of these animals show that they exist here in considerable numbers. Several of their shed antlers were found, and all of them had the upper tines curiously hooked and curved inwards—a peculiarity which would be incompatible with forest life. We saw a few walrus when first approaching the island, and while the station was building, but they were quite numerous upon the ice which we passed through to the south of it on our return on the 20th of September. These animals accompany the ice during the summer, and its unusual prevalence in this quarter the present season was shown by the blighted condition of even the Arctic vegetation of the island. Arctic hares and foxes were seen, and both appeared to be abundant.

Among the more noticeable birds which breed on Nottingham Island, are the Arctic loon (*colymbus arcticus*, Linn), and the whistling swan (*cygnus americanus*, Sharpless). We killed four old swans, all moulting, and two young ones, nearly full grown, on the 27th of August, and the male, female and young of the Arctic loon.

At Port DeBoucherville I found distinct remains of a very ancient Eskimo camp in the form of heaps and circles of stones, like those of the modern Eskimo, on a raised beach at the head of what had been a cove. From what I have seen of the situations, which the Eskimo, in various places in Hudson's Bay and Strait, choose for their camps, there appeared to be little doubt that they had lived here when the sea-level was 20 to 30 feet higher than it is at present. On the rocks facing the open Strait, just south of the inlet, the more recent works of these people are well preserved, although they are probably upwards of 100 years old. Besides numerous rings of tent-stones and some shapeless heaps, there are here several rectangular walls a few feet high, and caches of a bee-hive form, each about 6 feet in height and 7 feet in diameter. Two of the latter are nearly complete, and are adapted either for storing meat or as hiding places or "stands" from which to kill game. A good photograph of one of them was obtained.

When we left Nottingham Island, it was proposed to place the next station on the south point of Mansfield Island, but the locality having been found unsuitable, the station was built on Digges Island, off Cape Wolstenholm, on our return voyage. As the geographical position of this station comes next in order, I shall now state the observations which were made during our visit to the locality. Heretofore the name Digges or Cape Digges has been applied on the sketch charts to several islands, represented as lying off Cape Wolstenholme. Our explorations went, however to show that there is only one island from ten to fifteen miles in length. The bare hills of which it is composed are divided into several detached groups by straight, transverse valleys, cutting well down towards the sea-level, thus giving the appearance of separate islands, when viewed from a distance. The greatest length of the island lies about east and west (true). As this is also the commonest direction of the strike of the gneiss, most of which is red, and also of the glacial striæ, the island has become divided by longitudinal valleys, some of which, too, were traced in nearly straight courses for several miles.

We found a good harbour on the south side of the island, about a mile from its western extremity, well sheltered from all quarters except the south-west, with good holding-ground and a convenient depth of water. The station was built on its south-east side, and placed in charge of Mr. A. N. Laperrière of Ottawa, after whom the harbour was called Port Laperrière. Only a narrow neck of land separates the head of the harbour from Hudson's Strait to the north. Between this and the western extremity of the island the hills have a rounded outline, and raised beaches, composed mostly of coarse shingle, form a prominent feature on their slopes, all the way from high tide mark to their summits, the highest of which is between 300 and 400 feet.

On the north side of Port Laperrière a light-colored quartzose band of gneiss contains numerous claret-colored garnets. Here the strike is N. 35° W. (mag.), but to the eastward of the harbour it is N. 45° W. (mag.), the bedding running in straight lines over a considerable area. At four miles east of the harbour, and towards the north side of the island, the gneiss strikes N. 50° W. (mag.). A well marked valley, with a chain of lakes along its bottom, comes to the south side of the island, about two miles east of Port Laperrière. It runs about east by north (true), and was explored for five or six miles without coming to the end of it. The general strike of the gneiss was parallel with the valley all along.

The red gneiss, which rises from the shore on the north side of the valley, running eastward from the head of the harbour, is cut by two parallel fissures, only 3 or 4 feet apart, with well defined, slickensided walls, the intervening mass simulating a vein; but it is composed of red gneiss, all divided into small, sharp, angular pieces by a multitude of joints intersecting each other in all directions, and often lined with green epidote, which in this region very frequently accompanies veins and

dislocations. These fissures run in a north-easterly direction, but curve about a good deal. They are accompanied by a small quantity of a handsome variety of red pegmatite, the quartz of which is blue, and the mass is occasionally streaked with bright green epidote.

Around the western part of Digges Island the course of the glacial striæ is from S. 70° E. to S. 75° E. (mag.); but in the interior it averages S. 55° E. (mag.), or with the general direction of the valleys.

We saw no Eskimo about Digges Island, but they appear to have visited Port Laperrière in recent years, as the remains of their camps were found in two or three places close to high tide mark. Some ancient camping places were also observed around this harbour, which, from their elevation above the present beach, the decayed nature of the larger bones lying about and the manner in which the circles of stones were embedded in the moss and overgrown with lichens, were supposed to be from 100 to 300 years old. Still more ancient works of the Eskimo were discovered in the valley which comes down to the head of the harbour. These consist of a row of stones lying in the vegetable matter at the surface, touching each other and running at right angles to the brook, at a contracted part of the bottom of the valley, which would be suitable for the Eskimo method of trout-fishing if the sea were 75 or 80 feet higher than it is at present. If the sea has receded as rapidly as 7 feet a century, these works would be upwards of 1,000 years old, and if the rate has been less they must be even more ancient.

The same day that we arrived at Port Laperrière (16th September) a she polar bear and her two cubs were killed in the interior of the island, about two miles from the ship. The cubs were somewhat larger than sheep, and were probably between seven and eight months old. Our party having approached them cautiously, one of them was observed sucking its mother. I examined the stomachs of all three, and found them to contain nothing but partially chewed grass. About four quarts of this were found in the stomach of the old bear and two and a-half and one and a-half respectively in the cubs' stomachs. I had been informed by some Eskimo and Hudson's Bay Company's people that the polar bears sometimes eat grass, and I had occasionally seen along with their tracks, dung which could scarcely have been dropped by any other animal, and which was made up of the remains of comminuted grass and other vegetable matter. The three bears referred to were killed on a grassy spot where they had spent some time, apparently for the purpose of eating grass, and this was probably their only object in wandering away from the sea. The presence of the newly swallowed grass in such quantity in the stomachs of all three convinced me that these creatures live, to some extent, on vegetable food. On the 30th of August, while sailing down the east side of Mansfield Island, we saw a large polar bear and cub running along the rocks about a mile back from the shore. Walruses were numerous around Digges Island during our stay there. They were always in the water and were generally seen in groups of from three to seven or eight.

We arrived at the eastern part of Mansfield Island, about mid-way down, on the morning of the 30th of August. Its even outline presented a remarkable contrast to the shores of Hudson's Strait. It resembled a gigantic ridge of gravel; but stratified rocks, in low horizontal ledges, appeared here and there, through the *débris*, at different levels. At one place, four or five miles inland, the island rises to an elevation of about 300 feet above the sea, and this was the highest point observed upon it. Small streams appear to run out upon the eastern shore, as narrow cañons are cut in the rock in a few places. The monotony of the eastern slope of the island is broken at one locality by the rocks projecting through the *débris* in a form resembling an old castle, with three towers on the left, and a wall broken through by embrasures on the right. A short distance to the south of this there is a cliff, with a distinct pillar on the left. These points are considered worth noting, as they have a bearing on questions as to the glacial phenomena of these regions. For many miles, the whole of the eastern slope of the island presents a succession of steps or small terraces, mostly too low to be distinctly counted, but there might be a hundred of them

between the sea level and the highest parts of the island visible. These appeared to be partly ancient beaches, and partly the outcropping edges of nearly horizontal strata. I landed at a point about the middle of the eastern shore of the island, and found the shore very flat, with shallow water for a considerable distance out. The rock proved to be a fossiliferous grey limestone, in rather thin horizontal beds. The fossils were obscure and scarce at the place referred to. Those collected, Mr. Whiteaves thinks, are Silurian. The rocks themselves resemble the Lower Silurian limestones of the Red and Nelson Rivers. I landed again near the south end of the island, and found the water very shallow in approaching the shore. No rock was detected in situ at this place; but a great extent of gravel and coarser shingle, derived from limestone like that found in situ further north was thrown into a succession of long, low ridges and terraces, all curving with the contour of the land. Behind most of the ridges I met with long ponds of clear, fresh water. A number of caches and "stands," built by the Eskimo, were seen along the shore of Mansfield Island, but none of these people were observed.

From the southern extremity of Mansfield Island we steamed to Cape Southampton, and thence coasted north eastward, in the hope of finding a suitable site for building an observatory station, but without success; and after making between twenty and thirty miles in that direction, we returned to the cape and passed round it to the westward, shaping our course thence for the opposite side of Hudson's Bay. The general character of this island, and the part of its shore which we examined, are quite like the eastern side of Mansfield Island. It has rather more vegetation upon it than the last named island, and much of the surface has a brown colour in consequence. Shallow water, having a light green colour, extends some distance out all along. The island slopes gradually up from the beach and is thrown into a great many small terraces. The highest point seen did not exceed 200 feet above the sea. I noted that the limestone is evidently exactly the same as that of Mansfield Island. Low cliffs in the upper levels break through the decayed mass and the *débris*, and horizontal ledges also make their appearance through the loose materials near the sea beach.

We did not observe any natives on the part of the island which we saw, but at four miles north-east of Cape Southampton there were three fresh houses of the Eskimo, covered completely with sods and moss, and having the doors built round with stones. About three-quarters of a mile to the north-eastward of these were five old Eskimo houses, built of stones and sods, with some sticks and bones lying on their tops.

Our first landing place on the western side of Hudson's Bay was Marble Island, but we had a distinct view of the land between it and Chesterfield Inlet. Judging from specimens which I have received through the kindness of Mr. George McTavish, of the Hudson's Bay Company, a portion of this coast is occupied by rocks, which may be referred to the Huronian series, among them being diorites, hornblende-schists and glossy mica-schists characterized by numerous cubes of iron pyrites. On the coast opposite to Marble Island, the last named rock appears to contain the veins of granular iron pyrites, an assay of a specimen from one of which, from Inari, was made by Mr. Hoffmann in 1879. (See p. 23 H., Report Geological Survey, 1878-79.) These glossy mica-schists were found on Deadman's Island, near the west end of Marble Island. From all that I have been able to learn on the subject, a set of rocks, very like those of the Township of Ascot, in the Province of Quebec, and holding similar pyrites veins, which are of great economic value, will be found in this part of the western coast of Hudson's Bay.

The harbour on Marble Island, which is resorted to by the American whalers, and in which we also anchored, is situated on the south side of the island, about two and a-half miles from the western extremity. The outer harbour is formed by Deadman's Island, about quarter of a mile long, lying across the front of a small bay. The inner harbour is a basin, which connects with this through a narrow gap in the rock with only about one fathom of water at low tide.

Deadman's Island consists of white and light grey quartzites and glossy mica-schist, striking N. 75° W. (mag). The glacial striæ on this island are well marked and run

S. 10° E. (mag). In the course of the day which we spent at Marble Island, I rowed round its western end and thence eastward along its northern shore for some miles. I also explored the interior and took some photographs between this side of the island and the harbour. The whole of the western part of the island consists of white and light coloured quartzite, bearing a strong resemblance to white and veined marble, from which circumstance it has no doubt received its name. Viewed from sea, the shores have a very white appearance, the rocks being free from lichens, &c., and the hills in the interior, which are rounded, are also pure white, and contrast strongly with the dark brown of the peaty flats and hollows. Even the boulders and coarse shingle forming the raised beaches remain quite white, and these beaches appear as conspicuous horizontal lines against the dark vegetable matter. The beds of quartzite are usually very massive. Their surfaces are often ripple-marked, the ridges and hollows varying much in size, being sometimes as fine and regular as the fluting on a washboard, and at others two or three inches apart. On the south side of the island, near the west point, the quartzite is of a beautiful lilac tint, some of the beds being more deeply coloured than others. The strike is here N. 80° W. (mag.), the dip being to the northward, at an angle of 80°. The surface of the rock at this place is marked by large green stains of carbonate of copper, some of them being 3 or 4 feet in diameter. They appear to be due to the decomposition of small quantities of copper pyrites in the quartzite.

At the north-west point of the island the dip is N. 75° W. (mag.), angle 45° and the strise here run S. 20° E. (mag.). This is also the prevailing dip in the interior of this part of the island. On the north shore of the island, opposite to the harbour on the south side, the dip is N. 60° W. (mag.), angle 40°. Not only does the strike vary considerably on the large scale, but the lines of stratification were in places observed to undulate a good deal on a small scale, while the general course of the beds was pretty straight, the minor variations appearing as mere corrugations of the darker lines of stratification on smooth sections.

Although quartzite was the only rock found in situ on the main island, so far as I had time to explore it, the *debris* of the glossy mica-schist with cubes of iron pyrites, was so abundant along the north side that I have no doubt it exists "in place" close by. A fragment of the peculiar brown-weathering dolomite with white quartz, strings of the Huronian series, was also found on this part of the island.

We left Marble Island in the evening of the same day that we arrived there (2nd September), and entered the harbour of Churchill on the 6th. The geology of this locality is described in my report for 1879, pages 19 to 21. After leaving Churchill we paid a visit of twenty-four hours to York Factory, from which we sailed for Digges, where we built station No. 5, as already stated, and after visiting all the other stations and building the one at Nachvak, which has been described in a previous part of this report, we continued our homeward voyage to St. John's, Newfoundland, which we reached on the 11th of October, and left the same evening for Halifax, where we arrived on the 14th and at Ottawa on the 16th of the same month.

#### GENERAL REMARKS ON GLACIATION.

It will be seen by an inspection of the chart, that Fox's Channel, in respect to width, general direction, &c., is a continuation of Hudson's Strait, and that the outlet of Hudson's Bay joins this great channel at right angles. It is much deeper than Hudson's Bay, the comparative shallowness and the uniformity of the bottom of which are remarkable features. If the sea in these latitudes were only about 100 fathoms lower than it is at the present time, James' and Hudson's Bays would become dry land, while the Strait would remain as a long bay, but with a slightly diminished breadth. The bottom of the Bay would have become a plain, more level in proportion to its extent than any other on the continent. The numerous rivers which now flow into it would traverse this plain, converging towards the north-east and falling into the Strait near Cape Wolstenholme, after having, perhaps, formed one immense river, flowing northward down the centre of the Bay, or probably nearer the East-main side.

---

During the "great ice age" the basin of Hudson's Bay may have formed a sort of glacial reservoir, receiving streams of ice from the east, north and north-west and giving forth the accumulated result as broad glaciers, mainly towards the south and south-west. It has been shown, in a preceding part of this report, that the direction of the glaciation, on both sides of Hudson's Strait, was eastward. That an extensive glacier passed down the Strait may be inferred from the smoothed and striated character of the rocks of the lower levels, the outline of the glaciated surfaces pointing to an eastward movement, the composition of the drift, and also from the fact that the long depression of Fox's Channel and the Strait runs from the north-westward towards the south-east, and that this great channel or submerged valley deepens as it goes, terminating in the Atlantic Ocean. Glaciers are said to exist on the shores of Fox's Channel and they may send down the flat-topped icebergs which float eastward through the lower part of Hudson's Strait into the Atlantic. During the drift period, the glacier of the bed of Hudson's Strait was probably joined by a contribution from the ice which appears to have occupied the site of Hudson's Bay, and by another also from the southward, coming down the valley of the Koksok River, and its continuation in the bottom of Ungava Bay. The united glacier still moved eastward round Cape Chudleigh into the Atlantic.

Throughout the drift period, the top of the coast range of the Labrador, stood above the ice and was not glaciated, especially the high northern part. Further south on this coast, the range is lower and there may also have been more ice in this direction. Here the valleys and the hills, up to the height of 1,000 feet, at any rate, have been planed by glacial action, the course followed by the ice on the eastern slope having been down the valleys and fjords directly into the sea. In the southern part of the Labrador peninsula, the general course of the ancient glaciation appears to have been southward, varying to the eastward or westward with the courses of the rivers and valleys, and coming to the north shore of the Gulf of St. Lawrence, in a general way, at right angles to the coast line. On the island of Newfoundland, the glaciation appears to have been from the centre towards the sea on all sides.

ROBERT BELL.

## APPENDIX No. 31

TO THE SEVENTEENTH ANNUAL REPORT OF THE DEPARTMENT OF MARINE AND FISHERIES, BEING THE REPORT OF THE METEOROLOGICAL SERVICE OF THE DOMINION, FOR THE CALENDAR YEAR ENDED 31ST DECEMBER, 1884.

TORONTO, 24th December, 1884.

The Honourable

The Minister of Marine and Fisheries.

SIR,—I have the honour to submit herewith my Annual Report of the Meteorological Service for the calendar year 1884, being the fourteenth report which has been made on this service.

I am pleased to be able to state that the number of volunteer observers who are co-operating with this service continues to increase. The following is a list of stations which have been established during the year:—

Class I (a full set of instruments)—

J. G. M. Christie.....Norway House.  
\*Dr. Gun.....Durham.

Class II (rain and temperature)—

W. T. Livock.....Victoria, B.C.  
J. S. Tarbolton.....Crescent, Assa.  
Agent C.P.R.....Chaplin, N.W.T.  
do.....Gleichen do  
do.....Maple Creek, N.W.T.  
do.....Elkhorn, Man.  
W. E. Trail.....Lesser Slave Lake.  
Ven. Archdeacon Reeve.....Fort Chipewyan.  
Dr. Kitchen.....St. George, Ont.  
W. J. Clarke.....Trenton, Ont.  
C. T. Van Wagner.....Stoney Creek, Ont.  
Rev. Jas. Carmichael.....Norwood, Ont.  
J. Parker.....Owen Sound, Ont.  
Dr. S. W. Ward.....Arnprior, Ont.

Class III (rain and snow)—

W. J. Steeves.....Shediac, N.B.  
J. Caldwell.....Coventry, Ont.  
J. Kay.....Paris, Ont.  
A. McKenzie.....Beggaboro', Ont.  
Mrs. A. Lillie.....Sturgeon Falls, Ont.  
J. H. Carnegie.....Coboconk, Ont.  
R. McGee.....Michael's Bay, Ont.

Two telegraph reporting stations have been added during the year, viz., Fort Calgary, Messrs. Armour and Braden, and Prince Albert, the Rev. Canon Flett. The station at Port Arthur, which formerly only reported twice a day, was raised to the standard of an ordinary telegraph station, reporting fully the regular tri-daily series.

\* Durham is now classed under this head, Dr. Gun having kindly undertaken to perform the work of a station of the 1st class.

In climatological work we have now, in connection with the Ontario Government Bureau of Industries, 72 stations reporting rain and snowfall, and in Manitoba Mr. Acton Burrows, Deputy Minister Agriculture in the Province, has established, in connection with his Department, stations at—

Foxten, Morris, Selkirk, Ossowa, Lintrathen, Portage la Prairie, Pembina Crossing, Pilot Mound, Gladstone, Cartwright, Eden, Milford, Lorne, Heaslip, Souris, Turtle Mountain, Strathclair, Grisswold, Shoal Lake, Deloraine, Fort Ellis, Ste. Anne, Norquay, Glendinning, Neepawa, Birtle, Shell River, at which a record is made of rain and snowfall, with weather and seasonal changes, and an abstract of these observations is forwarded to this office.

I have also agreed to furnish Mr. Burrows, to whose exertions are due the extension of the work in Manitoba, with fifty additional rain gauges, for use in that Province.

Ontario and Manitoba are the only Provinces which are, as yet, co-operating with this service in the collection of climatological statistics, but it is to be hoped that before long the other Provinces will join in the work of extending meteorological observations.

The arrangement so far carried out with Ontario and Manitoba has been that this office has supplied the instruments, and examined and checked the returns when received. The Local Government finds the observers and pays for the stationery; they then receive each month, or as required, copies of the results, deduced from the observations, for publication in the papers issued from their respective departments.

The following gentlemen have, from various causes, ceased corresponding with this office:—

Mr. Heckman, C.E, Spences' Bridge; Rev. Father McBride, Penetanguishene, Ont.; Mr. W. LaPenotiere, Elora, Ont., and Dr. Passmore, Conestogo, Ont.; but Mr. George A. McIntyre has, however, undertaken to continue the class of observations made by Dr. Passmore.

**STORM SIGNAL SERVICE.**

A storm signal has been erected at Trenton, Ont., since my last report. Other wise, this branch of the service remains unchanged.

TABLE No. 1.

The following table shows the total number of warnings issued and the percentage verified:—

| Year.      | No. issued. | No. verified. | Percentage verified. |
|------------|-------------|---------------|----------------------|
| 1877.....  | 743         | 510           | 68·6                 |
| 1878.....  | 860         | 673           | 78·3                 |
| 1879.....  | 712         | 591           | 83·0                 |
| 1880.....  | 889         | 736           | 82·8                 |
| 1881.....  | 854         | 727           | 85·1                 |
| 1882.....  | 841         | 658           | 78·2                 |
| 1883.....  | 1,085       | 858           | 79·1                 |
| *1884..... | 727         | 604           | 83·1                 |

\* This does not include the month of December.

In addition to the above verifications as to force, the predictions of the direction from which the winds were expected have been separately examined, with the following results:—

Out of 717 predictions of direction, 602, or 84.0 per cent. have been fully verified, and 699, or 97.5 per cent. fully or partly verified.

As in former, so in the present year, many special "forecasts" have been asked for, by private persons, and their value gratefully acknowledged.

In last year's report your attention was directed to the desirability of extending the storm signal service to Lake Superior, and special mention was made of Port Arthur and Algoma Mills, the importance of having storm signals erected at these places cannot be over-estimated.

Your attention was also directed to the great advantages that would accrue, if storm signals were established at certain points on the lakes, and the following were suggested as being most suitable places: On the Georgian Bay, Cove Island Light-house, or Tobermory Harbour; Point Pelee Light and Long Point Light, on Lake Erie; and South Bay Point and Presqu'Isle Point, on Lake Ontario. These are points which vessels are frequently compelled to make for shelter, through stress of weather, and signals established there would be of the greatest utility.

Short telegraph lines would, in each case, have to be constructed, but the expense incurred in the construction would be as nothing compared to the lives and property which would, in all probability, be saved by this means. The claims of the Lake Marine are, in this respect, therefore well worthy of your favourable consideration.

I have also to call to your notice the benefit that would be derived from making all coast telegraph stations available as storm signal stations. This could be done at a trifling cost, and the advantage to shipping, especially since the direction as well as the force of the expected storm is given, would be very great.

#### PROBABILITY SERVICE.

The issue of weather forecasts has been made continuously during the year, and published in the leading newspapers in Ontario, Quebec, and the Maritime Provinces. Forecasts could also be made for Manitoba, as the telegraph service in the North-West is now in a fairly efficient state, but I have not sufficient funds at my disposal to permit of this being done, and I would respectfully suggest that an appropriation be made in the Estimates to cover the cost of issuing forecasts for Manitoba and storm warnings for Lake Superior.

Weather predictions have also been disseminated throughout portions of the country by means of large discs, having the image of the sun, the crescent moon, and a star painted on them. The sun represents fine weather, the moon showery, and the star rainy weather. Besides these symbols, the words "fine," "showers," "rain," are also painted on them. These discs are attached to the railway cars, and are regulated according to directions from this office, the signal word to be exposed being telegraphed each day, at about 1 a.m., to the railway agents.

I have been informed that these weather signals are eagerly looked for by the farmers along the route of country through which the different railways travel, and the thanks of the Department and the general public are due to the following gentlemen for the trouble they have taken in having these signals placed on the cars of the railways with which they are connected:—

Mr. W. Whyte, Ontario Div. C. P. R.; Mr. W. J. Spicer, G. T. R.; Mr. Charles Stiff, G. T. R.; Mr. D. C. Lindsley, Canada Atlantic Ry.; Mr. A. White, G. T. R.; Mr. S. Barker, Northern Ry.

I have also communicated with the Department of Railways, and obtained permission to have these signal discs placed on the Government railways; and I hope to do this next spring, when I anticipate that the forecasts thus made known along the Intercolonial Railway will render great assistance to the farmers in the Maritime Provinces.

Weather predictions have been asked for by many persons—brewers, merchants and others—whose business is affected by the weather, and the information courteously acknowledged, the benefit derived therefrom being admitted in all cases.

The following table (No. II.) shows the number of predictions and the percentage of fulfilment in each district in each month in the year up to November. December not being completed when this report is transmitted, cannot be given.

The percentage of verification is very satisfactory.

TABLE

NUMBER of Predictions and Percentage of Fulfilment

| 1268  | 920          | 200           | 148        | 72.6             | 88.3                         | 1372           | 1104         | 228           | 130        | 73.9             | 90.5                        | 6715           | 5008         | 1039          | 668        | 74.6             | 90.1                        |       |

## TELEGRAPH SIGNAL SERVICE.

I would recommend additional stations being established at the summit of the Canada Pacific Railway, and on the line of that railway to the north of Lake Superior.

## CENTRAL OFFICE.

It is my melancholy duty to report the death of Mr. George F. Hector, who departed this life in June last, after a protracted illness.

Mr. Hector's death, and the prolonged absence of Messrs. Gordon and Stupart (the latter gentleman being still absent in Hudson's Straits), has entailed a great deal of additional work on the remainder of the staff, who have borne the extra burden uncomplainingly, and performed the additional duties imposed on them with efficiency and zeal.

## TIME SERVICE.

The time service has been carried on as formerly, and the reports of the Directors of the Observatories at Quebec and St. John, N.B., form Appendices A and B to this report. Details of the work will be found in my report as Director of the Toronto Observatory.

## CHIEF SIGNAL OFFICER, U. S.

To Major General Hazen, U.S.A., Chief Signal Officer, the service is again' in debted for the courteous manner in which he has supplied all information asked for, and for his ready acquiescence in all suggestions made to him for the advancement of the service.

## VOLUNTEER OBSERVERS.

I have to tender my sincere thanks to the gentlemen who take observations for the service as volunteers, and who give their time and labour for the advancement of meteorological knowledge without remuneration.

Without the assistance of these gentlemen our observations would be disconnected, and so few as to almost preclude the possibility of making any accurate climatological deductions, and to these observers we are principally indebted for the information which enables this office to compile monthly and furnish the Board of Health of the Province of Ontario with a map, showing isothermal curves, curves of mean, daily temperature range, and rainfall in Ontario.

These maps in themselves form a valuable climatological contribution to the Province of Ontario.

I may here add that a very considerable amount of climatological data exists in this office, which, if arranged and printed, would be very useful; but owing to the small number of the staff who are more than fully occupied in keeping the ordinary routine work from falling in arrears, it is impossible for me to attempt doing so, unless I am authorized to employ, temporarily, such assistance as may be necessary to perform this work; and I respectfully suggest that I may be empowered to obtain the requisite assistance to enable me to carry out this proposal.

## G. N. W. TELEGRAPH COMPANY.

I also wish to acknowledge the valuable assistance rendered to the service by the officers of this company, who have always used the utmost despatch in forwarding our messages, and the greatest energy in endeavouring to discover and remedy the cause of failures, when any occurred.

All of which is respectfully submitted.

CHARLES CARPMAEL,  
*Superintendent.*

---

**APPENDIX "A."**

---

THE CITADEL, QUEBEC, 10th, December 1884.

SIR,—I have the honour to submit the Annual Report of the Quebec Observatory for the year ending 31st December, 1884.

The time and meteorological service at this station has been carried on during the past year more to my satisfaction, owing to the improvements which were made to the gear of the "time ball and storm mast early last spring."

Substituting a rope "fall" and wooden blocks for the chain in the hoisting gear of the "time ball" has proved a success.

The storm drum when hoisted is now much better seen from all points in the harbour than when the mast was in its former position.

During the past year His Excellency the Governor General visited the Observatory, also the Honourable the Minister of Militia and Defence, the Major-General Commanding the Militia, the latter during his official inspection of the battery to which I have the honour to belong.

A number of the members of the British Association also visited the Observatory during their stay in Quebec.

The Observatory building requires some repair, which I hope will be made during the coming year, as it will add much to the appearance and comfort.

The telegraphic work has been carried on by Sergeant-Major Walters, without the aid of outside operators.

I would be glad if you would recommend the purchase of a larger and more accurate transit instrument.

I have the honour to be, Sir,

Your obedient servant,

C. W. DRURY, Capt. C.A.,

*Director Quebec Observatory.*

To the Superintendent, Meteorological Service,  
Toronto.

---

 APPENDIX "B."
 

---

THE OBSERVATORY,  
ST. JOHN, N.B., 1st December, 1884.

SIR,—I have the honour to submit the following report on the St. John Observatory:—

The duties of this Observatory consist in giving correct time to the shipping in this port by means of a time ball dropped every day (Sundays excepted) at 1 p.m., St. John time. The city council are about connecting the fire alarm bells with the ball. When this is done the bells will be rung at the same instant the ball drops.

The correct time is determined by observations of stars in the meridian with a transit instrument, our work being checked by telegraphic time exchange with Toronto Observatory.

The meteorological work has been regularly performed, observations are taken at intervals of four hours commencing at 3:44 a.m., and reports sent to the Superintendent at Toronto.

The storm signals have been promptly hoisted and notices of approaching storms put up in conspicuous places. The storm warnings are acknowledged by those engaged in shipping to be of great service to them.

During the past year ship-masters have brought their barometers to this office for comparison with the standard instrument used here, and many of the ship-masters have expressed their willingness to keep a record for the service, were they supplied with the proper forms, &c.

Since my last report the mean time clock used in the Observatory was purchased from me by the Department. The Observatory has, during the past year, been supplied with a new transit instrument, made by Negretti & Zambra, London. This is an excellent instrument, and has been mounted in place of the old one used by me for many years in connection with the time service.

A sidereal clock has lately been set up in this office, and is now being adjusted to sidereal time. This will enable me to make comparisons with the greatest amount of accuracy.

As it is not possible to place a clock in the transit room, it would greatly increase the accuracy of our transit work were a chronograph purchased for the use of this Observatory and connected with sidereal clock.

I have also to report that a suitable room has been fitted up and furnished for the use of the Observatory, by the Department of Public Works. The stairs leading to the transit room have also been much improved.

I have the honour to be, Sir,  
Your obedient servant,

GEO. HUTCHINSON,  
*Director of Observatory.*

To CHARLES CARPMAEL, Esq., M.A.,  
Supt. Meteorological and Time Service,  
Toronto, Ont.

## APPENDIX No. 32

TO THE SEVENTEENTH ANNUAL REPORT OF THE DEPARTMENT OF  
MARINE AND FISHERIES, BEING THE REPORT OF THE MAGNETIC  
OBSERVATORY, TORONTO, FOR THE CALENDAR YEAR ENDED 31ST  
DECEMBER, 1884.

Hon. A. W. McLELAN, M.P.,  
Minister of Marine and Fisheries,  
Ottawa.

SIR,—I have the honour to submit herewith my Annual Report for the year  
1884.

During the year the regular routine observations have been carried out as formerly, and the self-recording magnetographs have been kept in operation, as have also the barograph, thermograph and other self-recording instruments.

I have this year constructed and put in operation a photographic recording inclinometer, the principle of which is my own invention. It is an inclinometer with a bifilar suspension for the magnet, which is turned, as in the ordinary horizontal force instrument, into a position approximately at right angles to the meridian. The induction bars are placed with their acting poles north and south of the centre of the suspended magnet and at such a distance that at the mean dip the induced magnetism is alone sufficient to keep the magnet in the above mentioned position. The bifilar suspension can now be adjusted so as to produce any scale coefficient required.

In my last report I mentioned that I had been invited to attend the meeting of the Polar Commission at Vienna, to assist in determining the system to be adopted for the final reduction and discussion of the observations taken in connection with the International series. I have now received the decision of the Commission, and our observations will have to be printed and forwarded to Dr. Wild, President of the Commission, at St. Petersburg, for distribution among those who are to undertake the work of discussing the results of the observations made at all the stations. The preparation of that work will occupy some time, as the staff is already too small for the work which we have to undertake.

## TIME SERVICE.

This service is now thoroughly organized, and the exchanges of time between the various observatories and Toronto has been carried on throughout the year. The following is a table showing differences between time as determined by Toronto and

the time as given by the various observations. The sign + indicates that Toronto time is faster than time sent by stations.

|                  | Montreal. | Quebec. | St. John. | Charlotte-<br>town. |
|------------------|-----------|---------|-----------|---------------------|

\*Weekly exchange of time, Quebec clock being re-adjusted.

The time exchanges are effected by means of a chronograph, on which is registered the time sent by each station, side by side with the time at the Toronto Observatory. The exchanges have been fortnightly with St. John, Quebec and Montreal, with the exception of a weekly exchange with the former place while the clock there was dismantled.

The observers are notified, on the day appointed, to be on hand at a certain time, generally from eight to nine in the evening, when direct telegraphic connection with these places can be more easily obtained.

The errors of the Toronto clock and the different time-pieces used by the observers are computed from the latest observations.

The increased work which is entailed by the rigid examination of the clock and chronometer comparisons and observations sent in from the observatories at St. John and Quebec, has been performed, and I would urge upon you the necessity of appointing to the staff here an astronomical assistant. At the time the new system was commenced the work was undertaken by Mr. Gordon and myself, and since Mr. Gordon left for Hudson's Bay, Mr. F. L. Blake, D.L.S., who was temporarily employed, has continued, under my direction, to carry on the work.

No regular and systematic astronomical observations, other than those for time, have been, as yet, undertaken; but I am now making preparations for regular spectroscopic observations of the solar flames.

All of which is respectfully submitted.

CHARLES CARPMAEL, *Director.*

## APPENDIX No. 33

TO THE SEVENTEENTH ANNUAL REPORT OF THE DEPARTMENT OF MARINE AND FISHERIES, BEING REPORT OF THE SUPERINTENDENT OF THE MCGILL COLLEGE OBSERVATORY, MONTREAL, FOR THE CALENDAR YEAR ENDED 31<sup>ST</sup> DECEMBER, 1884.

MCGILL COLLEGE OBSERVATORY,  
MONTREAL, 1st January, 1885.

SIR,—I have the honour to report on the work of the McGill College Observatory for the year now closed.

The base or chief station series of meteorological observations has been carried forward, without interruption, throughout the year. The object of these observations is to deduce the laws of diurnal and annual variation of the meteorological elements for this district. The telegraphic observations, forming a part of the Canadian series of observations upon which the weather predictions are based, have been regularly dispatched each day to the Meteorological Office at Toronto. The temperature observations have been greatly improved this year, by the addition of one of Negretti & Zambra's thermographs to our apparatus. The instrument was furnished by the Meteorological Office, Toronto. It contains six thermometers, which are at present arranged as a bi-hourly series. A summary of the meteorological results for the year is presented herewith.

The time service has received the usual careful attention. Determinations of clock errors have been made on 120 nights during the year. An observation for clock error comprises the measurement of the collimation of the transit, the inclination of the axis, and the observation of at least six stars—one polar star and one low south star, from the combination of which the azimuth is determined, and four time-stars distributed as symmetrically as possible with reference to the zenith. From these observations the error of the timepiece employed is computed, and from comparisons with the standard clock, made both before and after the observations, its error is deduced and, if necessary, a correction applied to its rate. The observatory time signals have been distributed as described in my report for last year. The time-ball service has been improved by the erection of a new line of covered or insulated wire between the Observatory and the ball. All the time signals have been on the standard of the 75th meridian since 18th November, 1883, when, in consonance with the railroad companies and at my suggestion, the change was authorized by the Mayor and Corporation of Montreal.

It is a matter of congratulation that the International Conference, for fixing upon a meridian to be employed as a common zero of longitude for the world, which met at Washington in October last, has, by an almost unanimous vote, adopted the meridian of the transit instrument at Greenwich. This decision is of especial value in astronomy, geodesy and navigation. For the latter it will, by harmonizing the charts of the various nations, greatly simplify the computations of navigators. Another decision of importance, incidental to an agreement by the Conference, that there shall be a universal time reckoning, the origin of the day being the midnight of the initial meridian, is, that the hours are to be counted from zero to 24. This method of reckoning time, both for astronomical and civil purposes, will be adopted in the Greenwich Observatory on 1st January, 1885. I believe that the railroad companies of this continent will also shortly adopt it, and thus entirely remove the possibility of mistaking an afternoon for a forenoon hour, or *vice versa*. The new

method of counting the hours is to be adopted in our work here, from this date; and I would earnestly recommend that the influence of your Department and the Government be given towards its adoption generally.

The reductions of the observations for the determination of difference of longitude between this Observatory and the Harvard College Observatory have been completed, in so far as my observations are concerned. Owing to unusual pressure of work, Professor Rogers has not been able to finally complete his reductions; but from the preliminary results which he has obtained, I feel justified in stating that the resulting longitude of our transit instrument will be within two-tenths of a second of 4 hours 54 minutes 18.5 seconds West of Greenwich. The reductions of the observations made by me for the difference of longitude between Montreal and Toronto, and also those made by Mr. G. H. Chandler, M. A., and myself for Toronto and Cobourg, have been completed, and the final report only awaits the results of Mr. Carpmael's work. The difference of longitude between the Observatory at Toronto and the dome of the Farady Hall at Victoria College, Cobourg, is 4m. 55.2 sec.

The latitude of the dome of this Observatory, as determined from a trigonometrical connection with the United States Coast Survey station on Mount Royal, is  $45^{\circ} 30' 17.0''$ .

The assistance of this Observatory has been promised in a system of seismographic observations, recently proposed by the "Science" magazine.

I have the pleasure of acknowledging that the Observatory has been presented with a set of the celestial charts, made at the Litchfield Observatory, by Professor C. H. F. Peters.

In February last you were petitioned to recommend to Parliament an increase in the special grant to this Observatory. This application was made on grounds, the justice of which was admitted on all hands; but, unfortunately, you were obliged to refuse it "for the present." The lack of additional assistance, so urgently required, has very much interfered with the efficient working of the Observatory during the past year, and I would very respectfully urge that the renewal of the application, which will be made in a formal manner by the Governors of the University during the next Session of Parliament, be complied with.

I have the honour to be, Sir,  
Your obedient servant,

C. H. McLEOD,  
*Superintendent.*

The Honourable  
The Minister of Marine,  
Ottawa.

YEARLY ABSTRACT

saturation being 100. The monthly means are derived from observations taken every fourth hour, extreme range of temperature was therefore 114°·5; greatest range of the thermometer in one day was mean temperature being 81°·15; the coldest day was December 20th, mean temperature 17°·3 below giving a range of 2.004 inches for the month and year. The lowest relative humidity was 23 on April gust was at the rate of 80 miles per hour (this is the greatest velocity ever recorded here). Auroras Lunar coronas on 2 nights. Thunder storms on 12 days, and lightning without thunder on 6 days. brightness, but has been observable up to the end of the year.

C. W. McLEOD,  
Superintendent.

## APPENDIX No. 34

TO THE SEVENTEENTH ANNUAL REPORT OF THE DEPARTMENT OF MARINE AND FISHERIES, BEING THE REPORT OF THE DIRECTOR OF THE KINGSTON OBSERVATORY, FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

KINGSTON, 12th January, 1885.

SIR,—I have now to submit, for the information of the Department of Marine, the report of the Kingston Observatory.

The usual observations have been made during the past year, besides giving the time to the city and port.

The dome of the equatorial tower having been found, on several occasions during violent gales, to be shifted from its proper position, it was found necessary to secure it against the recurrence of such an inconvenience. This has been done, and the dome is now unmoved by the heaviest storms.

A very troublesome alteration in the adjustments of the transit was noticed last winter, in consequence of the severe frost in January slightly displacing the stone foundation. Although the adjustments during the greater part of the year are not liable to be affected by this cause, I purpose, during the summer, to have the instrument dismantled, and have the foundation made of the most stable kind.

I have been for some time training two or three intelligent young men in the theory of astronomical calculations and the use of the instruments of observation, and I intend to pursue the same course in future.

I am, Sir,

Your most obedient servant,

JAS. WILLIAMSON,

*Director of Kingston Observatory.*

WM. SMITH, Esq.,  
Deputy Minister of Marine,  
Ottawa.

## APPENDIX No. 35

To the Seventeenth Annual Report of the Department of Marine and Fisheries, being the General Summary of Expenditure for the Fiscal Year ended 30th June, 1884.

| Vide Report Page | Service.   | Amount. |      | Total.    |      |

## APPENDIX No. 37.

TO THE SEVENTEENTH ANNUAL REPORT OF THE DEPARTMENT OF MARINE AND FISHERIES, BEING REPORT OF THE DECAYED PILOT FUND OF QUEBEC, FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

QUEBEC, 2nd January, 1885.

SIR,—I transmit herewith a Statement of the Decayed Pilotage Fund of Quebec for the year ended 31st ult., and I have moreover the honour of supplying you the following information, viz. :—

The total receipts of the Corporation of Pilots for and below the Harbour of Quebec, for the year 1884, were as follows :—

|                     |              |
|---------------------|--------------|
| Total receipts..... | \$114,417 32 |
| Expenditure.....    | 20,255 20    |
|                     | <hr/>        |
|                     | \$94,162 12  |

171 pilots received \$549 each.

190 foreign vessels paid \$24,421.88, and 675 British vessels \$89,995.44.

I have the honour to be, Sir,

Your most humble servant,

F. X. DION,

*Treasurer.*

WILLIAM SMITH, Esq.,  
Deputy Minister of Marine and Fisheries,  
Ottawa.

DAVID DUMAS.

F. X. DION, Treasurer.

THOMAS BOISSINOT,  
Accountant.

## APPENDIX No. 38.

TO THE SEVENTEENTH ANNUAL REPORT OF THE DEPARTMENT OF MARINE AND FISHERIES, BEING REPORT ON THE DECAYED PILOT FUND OF MONTREAL, FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

HARBOUR COMMISSIONERS' OFFICE,  
MONTREAL, 22nd January, 1885.

SIR,—I have the honour to transmit herewith, for the information of the Honourable the Minister of Marine and Fisheries, statements of the receipts and disbursements of the Montreal Decayed Pilot Fund, for the year ending the 31st December, 1884. Also a statement shewing the state of the said Fund at that date.

The Fund, as stated in former reports, is in a good condition, and shows a net increase of \$1,052.61 for the year, although the receipts for poundage, etc., were somewhat less than usual, viz. :—

|                              |            |
|------------------------------|------------|
| Poundage.....                | \$2,141 84 |
| Interest on investments..... | 1,905 00   |
| Total.....                   | \$4,046 84 |

I have to report the following changes in the list of pensioners :—The widow of Jos. Lacourière, died on the 2nd January; old pilot F. A. Mayrand, on the 6th of the same month; pilot Ed. Naud, (reported last year as having become insane) on the 15th April; widow of Alex. Trottier, on the 30th June, and old pilot P. M. Mathieu, on the 10th December. The widow of Ed. Naud, above referred to, continues to receive the usual pension.

There are 23 pensioners on the Fund, viz. :—19 widows and 4 old pilots. The amount paid for pensions during the year was \$3,131.61.

I have the honour to be, Sir,

Your most obedient servant,

H. D. WHITNEY,

Secretary.

WILLIAM SMITH, Esq.,  
Deputy Minister Marine,  
Ottawa.

Dr.

H. D. WHITNEY, Treasurer, in account with the Decayed Pilot Fund.

## SUPPLEMENT.

---

The Hon. A. W. McLELAN, M.P.,  
Minister of Marine and Fisheries.

SIR,—I have the honour to submit herewith Supplement to the Seventeenth Annual Report of the Department of Marine, being for the year 1884, containing the Reports of the Chairmen of the Boards of Steamboat Inspection and Examiners of Masters and Mates, the Toronto, Montreal, Quebec and Pictou Harbour Commissioners, the Pilotage Authorities, the Harbour and Shipping Masters, certain Port Wardens, and on the Harbour Police of Montreal and Quebec, together with Statement of Wrecks and Casualties and List of Awards for Saving Life.

My remarks on the subjects specified in the above mentioned Reports will be found in the Annual Report of this Department, submitted on the 1st January last.

I have the honour to be, Sir,

Your most obedient servant,

WM. SMITH,

*Deputy Minister of Marine.*

## APPENDIX No. 1.

## REPORT OF THE CHAIRMAN OF THE BOARD OF STEAMBOAT INSPECTION FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

BOARD OF STEAMBOAT INSPECTION,  
CHAIRMAN'S OFFICE, TORONTO, 1st January, 1885.

Hon. A. W. McLELAN,  
Minister of Marine and Fisheries.

SIR,—I have the honour to submit herewith my Annual Report for the year ended the 31st December, 1884.

During the year Mr. Edward S. Vigor was appointed Inspector of Steamboats in British Columbia, along with Mr. Richard Collister as Hull Inspector, for the Port of Victoria.

Mr. Oliver P. St. John, was also appointed for the West Ontario, and Huron and Superior Division, and Captain James Dick, Hull Inspector for the Province of Ontario.

## BOARD MEETINGS.

Sittings of the Board were held for the examinations of engineers, and renewal of certificates to qualified engineers, in February, at Toronto, St. Catharines, Collingwood and Sarnia.

A quorum of the Board was convened the 24th March, at Montreal, for the further examinations of Mr. Francis Gendron for the office of Inspector of engines and boilers of steamboats for the district of Three Rivers. Mr. Gendron again failed to pass. The following resolution was passed at the meeting.

## RULES AND REGULATIONS.

RULE.—Moved and unanimously approved, that Rule 5, of Rules and Regulations, requiring the tops of combustion boxes, supported by solid, rectangular girders, that three-fifths of the pressure shall be sustained by hanging stays.

On the 4th April a meeting of the Board was convened at Toronto to examine Mr. Arthur Vipond, of Victoria, British Columbia, for the office of Inspector of Steamboats for that division. Mr. Vipond failed to appear before the Board, deciding to return home without being examined.

As no sitting of the Board had been held in the Maritime Provinces for several years, and as the Act of 1882 was likely to give rise to enquiries among steamboat people in respect to its operation, I deemed it expedient to convene a meeting at St. John, N.B., and Halifax, N.S. Accordingly, the Board met at the former place on the 1st September, and at Halifax on the 9th following. Besides the examination of engineer candidates and renewal of certificates to qualified engineers, the following rules and regulations were adopted:

1st.—That tugs towing rafts and carrying the raftsmen shall not be classed as passenger boats;

2nd.—That Rule 20, of Rules and Regulations be amended by substituting  $2\frac{1}{2}$  inches in place of 3 inches for safety valves for steamboat boilers, under 42 inches diameter.

3rd. Referring to fixed hooks in blocks used for lowering the life-boats referred to in Rule 20 of Rules, that the same shall remain in force. See "Life-boats."

4th. Steamers under 60 tons register, provided with a pony pump, may dispense with a hand engine pump, using the main engine pump for testing the boiler.

A resolution directing the attention of the Department to the enforced inspection of Canadian steamers in United States waters by inspectors of that Government, recommending a discontinuance of it, or, failing to obtain that, a similar inspection of United States steamers trading in Canadian waters, be enforced.

A proposal to recommend a re-enactment of the Act providing first assistant engineers is disapproved, it being decided to leave the matter with owners of steamboats, they being the most interested in its adoption.

The recognition of Canadian engineers' certificates, first and second-class, by the Imperial Board of Trade, was considered, and the conclusion come to that it might be safely done; that in knowledge, experience, time of service, and general qualifications, our engineers compare favourably under the Board of Trade examination rules, upon which these certificates are granted. It was also recommended that Board of Trade certificates be recognized in Canada.

At a meeting of the Board at Toronto, 24th October, referring to engineers holding second and third class certificates, who have allowed their certificates to lapse, and desire their renewal, but are not qualified, under the Act of 1882, to pass examination, it is decided that such candidates may obtain a renewal of their papers, on proof of good character and competency for the position.

#### BOARD MEETING AT MONTREAL.

A quorum met at Montreal, 18th November. Present—Messrs. Burgess, Samson, Adams, and the chairman.

The business of the meeting was chiefly confined to the examination of engineer candidates, and renewal of certificates to qualified engineers.

You will be pleased to learn that the operation of that portion of the Act of 1882 which applies to the construction and manufacture of marine boilers has been in the highest degree satisfactory. Assuming the material to be of the best quality, we may safely say that the boilers turned out, under the provisions of that Act, as first-class, cannot be surpassed for safety and durability. This is generally acknowledged by owners and engineers of steamboats, while the manufacturer is assured that good workmanship and material is recognized.

#### CASUALTIES INVOLVING LOSS OF LIFE.

Except the loss of four lives by collision of the C. P. R. steamer *Alberta* with the United States steamer *J. M. Osborne*, in July last (three of these belonged to the *Osborne* and one to the *Alberta*), we have cause to be grateful for exemption in this respect over previous years.

#### CASUALTIES NOT INVOLVING LOSS OF LIFE.

##### ONTARIO, HURON AND SUPERIOR DIVISION.

Steamer *Europe*, burnt 20th April.

Steamer *Argyle*, sunk in May, raised and repaired; *California* stranded.

C. P. R. steamer *Alberta* collided with the United States steamer *Pacific*.

Steam barge *C. N. Pratt*, engine disabled.

Steamer *A. Neff*, engine disabled.

Tug *Jerome*, burnt.

Steam barge *Victoria*, stranded in Lake Huron, in October.

Steam ferry *Essex*, upper works burnt.

Steam barge *Tecumseth*, stranded in Michael's Bay, Lake Huron, late in November.

Passenger steamer *City of Owen Sound*, stranded at Michipicoten River, 24th November, where she now lies.

Steam barge *Isaac May*, lost her rudder on Lake Superior.

Steam barge *Fortune*, stranded off Long Point, Lake Erie. Total loss.

Steam barge *Erin*, struck a rock off Keewenaw Point, Lake Superior, 2nd December. Was got off.

Steam yacht *Lively*, burnt at St. Catharines.

## KINGSTON DIVISION.

Steamer *Victoria*, Kingston, Ont., burnt when fitting out in the spring.

Steam ferry steamer *Prince Edward*, burnt at the wharf, Belleville. Total loss.

Steam tug *H. B. Sherwood*, burnt on the Bay of Quinte. Total loss.

Steamer *Hastings*, broken shaft.

Steamer *John A. McDonald*, broken shaft.

## MONTREAL DIVISION.

Steamer *Alhure*, partially burnt at Carillon.

## QUEBEC DIVISION.

Steamer *Saguenay*, burnt at the wharf, Quebec; supposed to be caused by the explosion of a coal oil lamp.

Steam tug *C. G. Jones*, burnt while under way near Quebec.

## MARITIME PROVINCES DIVISION.

Steam tug *Victor*, run into and sunk at St. John, N. B.

Steamer ferry boat *Maggie Noble*, burnt at the wharf at Rothesay, N. B.

## MANITOBA AND KEEWATIN DIVISION.

Steamer *Lily*, sunk at the South Saskatchewan.

## BRITISH COLUMBIA DIVISION.

No casualties reported.

| St. Andrew .....  |  |      | do do do                   | Maid of Canada...  |  |      | do pass. do              |
| Samson.....       |  |      | do do do                   | Abyssinian .....   |  |      | do do do                 |
| Tiger.....        |  |      | do do do                   |                    |  |      |                          |

Of the 150 steam vessels above mentioned, 29 have not been inspected, nor been fitted up, and fees not paid last season, the most of them being tug-boats; due from the decrease of the number of sailing vessels, which is caused from the freight being carried by ocean steamers, which left nothing for them to do.

JOS. SAMSON,

*Steamboat Inspector.*
