| 2nd Mates do do .....   |  | 1    |
| At Halifax, N.S., on 4th and 5th November :   |  |      |
| Masters who obtained certificates.....  |  | 1    |
| Mates do do .....   |  | 3    |
| One candidate for the grade of Master having failed in navigation.                            |  |      |
| At Quebec, on 10th and 11th November :  |  |      |
| Masters who obtained certificates.....  |  | 2    |
| Mates do do .....   |  | nil. |
| At St. John, N.B., on 14th and 15th November :  |  |      |
| Masters who obtained certificates.....  |  | 2    |
| Mates do do .....   |  | 1    |
| One candidate for the grade of Master having failed in navigation.                            |  |      |
| At Yarmouth, N.S., on 18th and 19th November :  |  |      |
| Masters who obtained certificates.....  |  | 3    |
| Mates do do .....   |  | 1    |
| At Halifax, N.S., on 1st and 2nd December :   |  |      |
| Masters who obtained certificates.....  |  | 1    |
| Mates do do .....   |  | nil. |

At St. John, N.B., on 18th and 19th December :

|  |     |
|--|-----|
| Masters who obtained certificates..... | nil |
| Mates do do .....                      | 2   |

One candidate for the grade of Master having failed in navigation.

At Yarmouth, N.S., on 29th and 30th December :

|   |     |
|---|-----|
| Masters who obtained certificates. .... | 2   |
| Mates do do .....                       | nil |

Two candidates for the grade of Mate having failed in navigation.

Thus it will be seen that during the year there were 192 applications made at the several ports, with 62 failures, an average of 30 per cent. unsuccessful and 70 per cent. successful candidates.

At Halifax, N.S., 20 Masters and 33 Mates passed, and 3 Masters and 19 Mates failed.

At St. John, N.B., 17 Masters and 24 Mates passed, and 4 Masters and 15 Mates failed.

At Yarmouth, N.S., 16 Masters and 16 Mates passed, and 2 Masters and 17 Mates failed.

At Charlottetown, P.E.I., 1 Master and 1 Mate passed, and 2 Mates failed.

At Quebec, 2 Masters passed, not any failing.

Twenty-six service sea-going certificates have also been issued during the year, 14 to Masters and 12 to Mates.

I am, Sir,

Your most obedient servant,

P. A. SCOTT,

*Chairman.*

The Deputy Minister of Marine,  
Ottawa.

LIST of Certificates of Competency and Service granted to Masters and Mates of Foreign Sea-going Vessels by the Department of Marine of the Dominion of Canada, for the Year ended 31st December, 1884.

| Buoys and beacons.....   |         |      | 8,198   | 78   |
| Harbour debentures, series DD paid.....                                  | 100,000 | 00   |         |      |
| do do EE do.....   | 41,000  | 00   |         |      |
|  |         |      | 141,000 | 00   |
| Total expenditure.....   |         |      | 660,249 | 82   |

The revenue statement, as compared with the previous year, shows a net decrease of \$17,177, viz.: in the sea-going traffic, \$14,167.64, and in the local, \$3,009.36, or, say under 7 per cent.

In looking at this falling off in the receipts, it must be borne in mind that the harbour dues on grain were reduced, for a period of three months, from 7½ cents per ton to the merely nominal rate of 1 cent per ton.

A copy of the Chief Engineer's report on the works, &c., within the harbour, is now in course of preparation, and will be forwarded you in a few days.

Copies of the following reports have already been transmitted to you, viz.:—The Harbour Master's, with comparative statements of the trade of the port, &c.; the Superintendent of Pilots', with reference to the placing, maintaining, &c., of the buoys and beacons in the River St. Lawrence; and the Secretary's, giving particulars as to matters concerning this pilotage district.

The ocean tonnage for the year, as shown by the Harbour Master's report, was 649,374 tons, as against 664,263 tons for 1883, or 2½ per cent. less. The inland tonnage amounted to 726,015 tons.

Operations for deepening the ship channel between Montreal and Quebec, to 27½ feet at low water, have been carried on satisfactorily during the season, and a report on the same for the past fiscal year has, as heretofore, been sent the Department of Public Works.

I have the honour to be, Sir,

Your most obedient servant,

H. D. WHITNEY,

Secretary.

WM. SMITH, Esq.,  
Deputy Minister of Marine,  
Ottawa.

## PORT OF MONTREAL.

COMPARATIVE Statement showing the number and tonnage of Inland Vessels that arrived in port the past ten years, with the greatest number in port at one time.

## APPENDIX No. 9.

## REPORT OF THE QUEBEC HARBOUR COMMISSIONERS FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

QUEBEC, 9th January, 1885.

SIR,—In compliance with the provisions of section 14 of the 38th Victoria, chapter 55, I have the honor to report as follows on the doings of the Quebec Harbour Commissioners for the year 1884:—

*Chief Engineer to the Graving Dock appointed Chief Engineer to the Harbour Works.*

In order to simplify the duties of the Engineer in Charge, Mr. John E. Boyd, it was deemed advisable to place the harbour works under the control, as Chief Engineer, of Mr. Henry F. Perley, Chief Engineer of the Department of Public Works of Canada, and that gentleman, with the permission of the Honorable the Minister of Public Works, consented to undertake the duties in connection therewith, in addition to those of the graving dock which, you are aware, he assumed during the summer of 1883.

## CHIEF ENGINEER'S REPORT.

The enclosed report from the Chief Engineer, Mr. Henry F. Perley, on both the harbour and graving dock works, gives a full and most interesting detail of the progress of the work during the year.

*Further shortening of the Graving Dock and Supplementary Contract for its completion.*

A few weeks after the works of the graving dock were resumed, at the opening of the season, the Chief Engineer, Mr. Perley, addressed to the Commissioners a report, in which, after alluding to his previous communication, he expresses himself as follows:—

“I have now to report that on Wednesday and Thursday, the 14th and 15th inst., attempts were made to pump out the area enclosed by the works and dam, as per contract, and the auxilliary dam, which resulted in a failure in the concrete flooring at points where it joined the rock, to withstand a pressure due to a head of 15½ feet, and I had to direct the pumping to cease, as the pump in position was not sufficient to pump against any greater head, nor was it desirable to continue, because, with the influx of water, quantities of sand and pure gravel were brought in, evidently from under the concrete flooring, the tendency of which was to weaken, if not to destroy, the purpose for which it has been put in.

“The area enclosed was, however, pumped dry enough to enable me to locate the position of the blow holes, and to determine the volume of water they permitted to enter. I was also able to see the bottom, the state it is in, and the position of the rock.

“In the report alluded to herein, I stated the reasons why it was desirable to shift the entrance works 30 feet inwards, so that they might have a bearing on the rock. The examination made last week showed that shifting them, this would not place them on the rock, and that the blow holes, which will have to be stopped or enclosed, are directly under the flashing culvert leading to the caisson chamber, and under the north wall of the chamber itself, and that the solid rock lies to a greater distance inwards.

"I have previously stated that the dock, as originally designed, was 549 feet in length between the face of the caisson and the circular head, and that by shifting the entrance works 30 feet inwards the length would be reduced to 519 feet, a length long enough to accommodate any vessel which can pass over the Dock Sill; and I instanced the 'Circassian,' which is 465 feet in length, as being the longest steamer frequenting the port.

"To insure the efficiency and future usefulness of the dock, and to place the entrance works on the solid rock, it will be necessary to shift them inwards a further distance of 25 feet, thus reducing the length of the dock to 495 feet, which would be still long enough to accommodate the 'Circassian.'

"In view of the great benefits which will arise by shifting the entrance works a further distance of 25 feet inwards, and the completion of the dock this year, I have to state that I have, after mature consideration, decided upon making the change in question, and I now submit my action for the approval of the Board.

"In connection with this matter, I would state that if, at a future date, it be found that the dock is too short to accommodate the class of vessels then frequenting the port, it can be easily and cheaply lengthened, by extending it from the southern end."

In the mean time, the engineer transmitted, for the consideration of the Commissioners, a copy of a correspondence that had taken place between himself and the contractors for the graving dock, Messrs. Larkin, Connolly & Co., on the subject of an offer by the latter for the completion of the dock this year, such offer to be a bulk sum, which would include all moneys paid to date on account of the dock, for the execution of all works that were or would be required for its completion, it being understood that all the works were to be built according to the plan and specification, except that the concrete backing of the caisson chamber walls would be increased 50 per cent. in thickness, and that the foundations of the chimney, pumping engines and boilers shall be of rubble masonry, founded on rock. The offer to be based on the assumption that the caisson chamber will be moved 25 feet to the southern end of the then present site; that the discharging culvert be increased that distance in length; that the flushing culvert on the east side be of the length shown on the drawings; and that the cost of all the works, in the shape of coffer dams, the maintenance of the then present auxiliary dam, pumping, dredging outside of the dam, thus clearing the entrance to the dock, and the clearing up the site of the works, &c.

All these recommendations were accepted by the Commissioners, subject to the approval of the Minister of Public Works. Subsequently they were sanctioned by an Order in Council.

The contractors, by their supplementary contract, have undertaken to complete the dock, as above stipulated, for the sum of \$64,080, and for a further sum of \$10,000 to erect the caisson.

The contractors have failed to complete the dock in accordance with their supplementary contract. They have been protested, and have answered to the protest that their failure in completing the work was due to grave defects in the auxiliary dam, which had been designed by and constructed under the supervision of the Commission's late engineers, and for other reasons which they could not control.

Mr. Perley, in his report accompanying the present, alludes to this failure, and declares that "it is due to the contractors to state that they made every exertion in their power to bring the work to completion this year, &c."

*Messrs. Peters, Moore & Wright's claim in final settlement of their Contract for the Harbour Improvements.*

In the report for 1883, alluding to the arbitration which had taken place in connection with Messrs. Peters, Moore & Wright's claim for a final settlement of their contract, it is stated that the Commissioners had decided not to recognize as valid the award of the Dominion Arbitrators, and that, on being informed of the decision, the contractors, instead of suing the Commissioners for the recovery of the

Arbitrators' award, had instituted an action for the sum of three hundred and fifty-two thousand four hundred and thirty-seven dollars and twenty cents (\$352,437.20) representing their new claim in settlement of their contract.

In April a communication was received from Messrs. Peters, Moore & Wright, praying the Commissioners to consent to transfer their case from the courts to a board of arbitration, to be chosen as follows: one by the Commissioners, one by them, and these two to select a third, and their decision to be final and binding on both parties.

The commissioners, after having given the most due Consideration to this communication, replied that, in their desire of avoiding litigation they would be willing to pay the amount awarded by Messrs. Kinipple & Morris, with interest at 6 per cent. from the date of such award, the payments made since to be, of course, deducted. This offer was made in order to meet, if possible, the wish of the contractors for an amicable settlement, and was without waiving the Commissioners' defence as pleaded to the writ.

A judgment has been recently rendered by the Superior Court rejecting with cost the *réponse spéciale* of the plaintiffs to the various *réponses en loi* of the defendants, which have been maintained.

By this judgment the contractors were compelled to procure the engineer's final certificates under the clauses 55, 56 and 57 of the specification attached to their contract. They, therefore, through their attorney, addressed, on the 18th November, a letter, praying the Commissioners to take the necessary means to obtain them the certificate in question.

To this letter the Commissioners have replied that they did not recognize any obligation incumbent on them to obtain the certificate required, reminding them, in the mean time, that on the occasion of Mr. Morris' visit to Quebec, in July, 1882, they had declined an offer from that gentleman to grant them such certificate.

In the same communication Messrs. Peters, Moore & Wright's attorney was informed that nevertheless the Commissioners were quite ready to aid his clients with a letter to Messrs. Kinipple & Morris, asking these gentlemen to furnish the desired certificate on hearing that such letter will meet his clients' wishes.

No answer having been sent to this last communication, the question is therefore still pending.

#### *Erection of a Building on the Louise Embankment.*

The contractors have been allowed to erect a large brick building on the Louise Embankment, in conformity with a plan and specification approved by the Commissioners. It has been built on a site chosen by the Engineer in Charge.

In case, at the expiration of their contract, an arrangement could not be agreed upon for the transfer of the building to the Commissioners at a valuation, the contractors have a right to retain it, by paying for the ground used an annual rent not exceeding the yearly amount which will be charged to other parties who will occupy similar ground, exclusive of all right of mooring crafts in front of the embankment, and of landing and loading goods of any description whatever.

The building, which is very substantial and covered with tin, is now used by the contractors as workshops and storehouse. It is large enough to be used as a railway station and depot.

#### *Proposed laying of a Railway Track on the Louise Embankment.*

The levelling of the sand, which is now in full progress, will permit the laying of one or two railway tracks, early next spring, on the Louise Embankment. The Commissioners have decided that no railway company whatever will be allowed to run on the embankment, except on the tracks laid by the Commission's engineers. All the railway companies, on their application, will be granted the permission of running by paying a uniform tariff which will be established to that effect.

*An Illustrated Description of the Harbour Works.*

"Le Génie Civil," an important review, published in Paris, in its Nos. 20 and 21, of 1884, contains a most remarkable and interesting description of the harbour works, illustrated with drawings. It is due to the pen of Mr. C. E. Gauvin, Civil Engineer, who is attached to the Crown Lands Department of this city. Mr. Gauvin cannot be too much praised for this work of his, which indicates that he is thoroughly acquainted with all the details of our harbour improvements. Mr. Gauvin, having done this work on his own accord, and without any remuneration, is entitled to the thanks of the Commissioners for the services he has rendered in thus placing before the public abroad, and especially before those interested in the shipping, the advantages which will be offered to vessels of all descriptions when those improvements will be completed.

*Lifting Barge.*

The lifting barge, which had been transferred to the Public Works Department after she had completed the removal of the nests of anchors and chains, and other obstructions in the harbour, was, by the kind permission of the Minister of the Department, placed at the disposal of the Commissioners, for the purpose of removing obstructions which has been discovered opposite the Upper Block of Indian Cove, and also for the purpose of resuming the removal of boulders inside the Fly Bank.

The master of the lifting barge, Captain Giguère, has reported that he has raised 11 boulders, measuring 10.63 cubic yards, at Indian Cove, and 279, measuring 191.02 cubic yards, inside the Fly Bank.

The removal of the boulders inside the Fly Bank, which was commenced in 1879, discontinued in 1881 and resumed this year, is not entirely completed, and according to Captain Giguère's report it will take another week to finish the work. It is the intention of the Commissioners to request the Minister of Public Works to further allow them the use of the barge for a week or two, previous to the resumption of her operations next season, in order to complete the so-long-needed improvement of freeing this channel of its boulders, which have always been a source of great inconvenience to the navigation.

The removal of those boulders will greatly facilitate the movement of vessels reaching the inside of that bank through this channel.

The number of boulders previously removed from that channel, amounting to 610, added to the 279 raised this year, gives a total of 889 boulders, representing an aggregate weight of at least 2,050 tons.

This channel has been buoyed for the first time this year, and will continue to be buoyed every season.

*By-Law.*

Verbal complaints having been frequently made that there exist no regulations concerning the anchoring and mooring of vessels in the channel of the River Saguenay, the Harbour Master was, on the 25th June, directed to proceed to that river, in order to examine the anchorage for vessels all along its navigable places, with the view of reporting on the advisability of enacting regulations concerning same.

The Harbour Master reported that he had made the examination required, and had established the necessity of regulating the anchoring and mooring of vessels frequenting the River Saguenay between Pointe des Roches and Government wharf, in the town of Chicoutimi.

A by-law was therefore prepared and published, in conformity with the law, and no opposition to same having been lodged it was duly passed by the Commissioners and submitted to the sanction of His Excellency the Governor General in Council. The required sanction having been obtained the by-law was immediately put in force. Its usefulness has already been demonstrated by three months' application, and during this period not a single complaint has been uttered.

*Surveys.*

By direction of the Commissioners a survey has been made, during the winter, of the foreshore at Lévis, from Begin's Hill to the eastern side of Glenburnie Cove, a distance of 3,960 feet.

The object of this survey has been to establish the cost of improving that part of the harbour, with the view of utilizing it for the dumping of the dredged materials from the Louise Basin, and also for the discharge of ballast from ships, which is now thrown into the ballast ground.

A similar survey has been ordered and made of Beauport Flats, East Dorchester Bridge, for a length of about 1,000 feet, and of Palais Harbour as far as Dorchester Bridge.

The object of this last survey is to establish the cost of building cribworks, which could be utilized as a place of deposit for the surplus spoil dredged in the Louise Basin.

The engineer's report, with plan on the first survey, is in the hands of the Commissioners. The other is expected daily. They will be both taken into consideration as soon as the latter will have been laid before them.

*Building Destroyed by Fire.*

The brick building on Pointe-à-Carey wharf was, on the 20th October, between 9 and 10 o'clock p.m., destroyed by fire. It was insured for five hundred dollars (\$500) at the National Assurance Company of Ireland, represented here by Owen Murphy, Esq. The amount of insurance has been promptly settled.

This building, which formed part of the property leased to the North Shore Railway Company, has being re-built and will be, in a few days, returned to the company.

*Repairs to Property.*

The long contemplated repairs to Atkinson's wharf have been put into effect this year. The works, commenced on the 19th March, were completed early in July, and the wharf was handed over to the tenant on the 9th of that month. Its coping level has been raised 4 feet, in order to avoid the great flood, which, of late, have happened almost twice a year, and which have caused considerable damage to all the wharves.

During its repairs nine hundred (900) tons of stone ballast, four hundred (400) tons of rubbish, taken from ballast ships, and sixty-six (66) boulders were dumped into the wharf. It will require a few hundred tons more of ballast to complete its filling.

This property is now in the best condition.

The expenditure connected with the repairs of this wharf has been so extensive and of so permanent a character that it has been decided to distribute the amount—\$6,287.32—over five years, including the present.

The whole length of the south face of Pointe-à-Carey wharf has been lined with spruce deals. This work has been done for the purpose of protecting its ballast.

One thousand and seventy tons (1,070) of stone ballast have been dumped into that wharf during the season. Its ballasting is progressing steadily, although not as rapidly as the Commissioners would desire, on account of the difficulty of procuring the filling material.

One large shed, covered with sheet iron has been erected, on Raynar's wharf. It has been built at the request of the tenant of the wharf, for the purpose of storing hard coal, he, the tenant, having agreed to pay 10 per cent. on its cost. Three dumping holes for the discharge of the coal had been made at the front of the second story facing the street, which have since proved useless, on account of a city by-law prohibiting impediments of any kind whatever on sidewalks. The tenant has been brought before the Recorder's Court; he has proved that the complaint lodged against him for the use of those dumping holes was of little or no importance, inasmuch as

greater impediments of all sorts are daily allowed on other sidewalks of the city. Notwithstanding his plea, the court has interdicted the use of the holes in question, on the ground only that a complaint had been lodged.

In consequence of this decision the tenant is refusing to pay the 10 per cent. agreed upon. It will therefore be necessary either to allow him a reduction on his agreement or to restore the building to its intended purpose, by moving it inwards.

Store No. 6 has been tarred; store No. 8 and half of store No. 11 have been painted during the summer.

The other stores and wharves under the control of the Commission have, as usual, been inspected and kept in the best state of repair.

#### COASTING TRADE.

The following statement conveys the detail of the coasting trade of the harbour for the season of navigation :—

|                           |        |
|---------------------------|--------|
| Cargoes by schooners..... | 1,345  |
| do bateaux.....           | 1,096  |
| do barges.....            | 227    |
| do steamboats.....        | 267    |
| Passengers .....          | 80,063 |

The aggregate tonnage of the crafts engaged in the coasting trade during the season is represented by 430,740 tons, served by crews numbering 16,848 men.

The accompanying annexures contain all the information yearly furnished to your Department, also a complete statement of the Commissioners' accounts for the year.

#### REVENUE.

The following is a comparative statement of the revenue of the Commission for the two last years :—

|                                | 1883.     | 1884.     | Difference in 1884. |           |
|--------------------------------|-----------|-----------|---------------------|-----------|
|                                | \$ cts.   | \$ cts.   | \$ cts.             |           |
| Tonnage dues.....              | 26,008 34 | 18,811 80 | 7,196 54            | Decrease. |
| Import do.....                 | 3,919 86  | 3,452 23  | 467 63              | do        |
| Export do.....                 | 8,872 34  | 6,447 10  | 2,425 24            | do        |
| Harbour do.....                | 2,932 62  | 2,739 19  | 194 43              | do        |
| Property receipts.....         | 21,677 93 | 19,943 95 | 1,733 98            | do        |
| Interest.....                  | 1,144 55  | 975 17    | 169 38              | do        |
| Beach and deep water lots..... | 1,977 37  | 2,362 96  | 385 59              | do        |
| Sundries.....                  | 61 81     | 37 45     | 24 36               | do        |
|                                | 66,594 82 | 54,768 85 | 11,825 97           | do        |

I have the honour to be, Sir,

Your most obedient servant,

A. H. VERRÉT,

*Secretary-Treasurer.*

To the Honourable A. W. McLELAN, Minister of Marine and Fisheries, Ottawa.

## THIRTY-FOURTH ANNUAL REPORT.

To the Chairman and Commissioners of the Toronto Harbour Trust:

GENTLEMEN,—I beg to lay before you this my Annual Report for the year 1884.

The last of the ice left the bay on Tuesday, the 8th April, and the bay was frozen over again on the 19th December.

The first vessel to arrive was the "Minnie," of St. Catharines, on the 28th March, and the last to arrive was the propeller "Myles," on the 11th December.

The number of vessels that arrived at this port this season was 1,780, or 48 vessels more than last year.

|                        | 1884. | 1883. | Increase. | Decrease. |
|------------------------|-------|-------|-----------|-----------|
| Steamboats loaded..... | 109   | 490   | .....     | 381       |
| do light.....          | 405   | 38    | 367       | .....     |
| Propellers loaded..... | 105   | 153   | .....     | 48        |
| do light.....          | 97    | 87    | 10        | .....     |
| Schooners loaded.....  | 1,015 | 863   | 152       | .....     |
| do light.....          | 49    | 101   | .....     | 52        |

The number of vessels wintering here is 64, representing a tonnage of about 11,015 tons.

The receipts for harbour dues were \$7,104.42, a decrease of \$868.29 as compared with last year.

The balance to the credit of the Trust on the 1st January was \$1,257.70, the revenue for the year \$10,293.02, making a total of \$11,555.72. The expenditure was \$5,814.62, leaving a balance of \$5,741.10 at the end of the year.

The amount of coal received by water was 98,223 tons, or 17,312 tons less than last year.

The amount of coal imported by rail, as per information received from the Custom House, was: Hard coal, 106,673 tons; soft coal, 131,314½ tons; total, 237,987½ tons. Amount received last year, 187,042 tons.

The water rose on the 22nd of May to 40 inches above zero, or 4 inches higher than it was last year and 1 inch lower than in the year 1876, which year, with five exceptions, was the highest in thirty years. The lowest water was 9 inches above zero on the 24th November, or 11 inches higher than the minimum last year.

Dredging was done in the slips at the foot of Brock, Yonge and Scott streets, at a cost of \$911.76.

Dredging will be necessary in the spring at many of the slips, more especially at the Yonge street slip, and I would strongly urge, as a sanitary precaution, as well as a saving of continual expense, that the sewer be carried, if possible, under Milloy's wharf out to the Windmill line. A good portion of the sewage will then be carried out of the harbour by the current.

It was the intention of the Commissioners to finish the work commenced last year, viz., making a cut from the south of the River Don into the marsh, for the purpose of diverting the current of the said river into Asbridge's Bay, by placing stop logs, &c., across the river, immediately to the west of the new cut, but to do so they would have been obliged to trespass on a strip of land belonging to the Grand Trunk Railway Company, and that company declined to permit them to do so, except on condition of the Commissioners building crib work or close piling from the railway bridge to the the point from which the stop logs would cross the river, along the front of their property, which would have added \$1,200 to the expense, making the whole amount for the proposed work come to \$5,330. The Commissioners decided not to carry on any further work there at present.

The buoys were all placed out by the 25th of April, and taken up on the 12th December, all except two of the western channel buoys, which were buried 3 or

4 feet by the encroaching sand, and could not be lifted by the boat. They were, however, got up through the ice on the 6th of January, 1885.

The lights at the Queen's Wharf were lighted on the 7th April and discontinued on the 13th of December.

As the lights at the Queen's Wharf are no longer now what they were intended to be, range lights, owing to the fact that the entrance to the channel is more to the south than it was formerly, I would recommend the removal of the red light from its present position to the crib to the north of the wharf, which will then bring them into range with the entrance of the channel.

The contractors for the Toronto harbour improvements, Messrs. Cook, Jones & Innis, have completed the greater portion of contract "A," or that portion along the marsh and extending out into the gap.

Contract "B," or that portion commencing at the eastern end of the island and running westward, is also almost completed.

The repairing of the breaks caused by last year's storms to the unprotected piling was finished last summer and made secure.

This year the contractors hope to finish both contracts.

An appropriation was made during the last Session of the Dominion Parliament, tenders called for, and I believe awarded, for the erection of a steam fog-horn on Gibraltar Point, which will, when erected, supply a want long felt.

I have to record, with regret, the death of Mr. E. G. Helliwell, who, for the last fourteen years, occupied the position of Deputy Harbour Master. He died on Sunday, the 14th December, of typhoid fever. Mr. C. W. Postlethwaite was appointed Deputy Harbour Master in his stead.

All of which is respectfully submitted.

MORGAN BALDWIN,

*Harbour Master.*

12th January, 1885.

-----  
TORONTO HARBOUR WORKS,  
TORONTO, 10th January, 1885.

SIR,—I have the honour to report that the quantity of dredging done during the last season has been as follows:—

| Scott do do ..         | 289          |
|                        | <hr/>        |
| Total .....            | 5,381        |

The price was 15½ cents per cubic yard, the same as in 1883, the former contractors, Messrs. Hunter & Murray, having agreed to continue the work at the same rate for which they tendered the previous season.

Some slight repairs were made to the Don breakwater and to the Queen's Wharf.

I would again call the attention of the Trust to the necessity for the construction of the trunk sewer along Front street, as recommended by the late city engineer, F. Shanly, Esq., and would recommend, as I reported in 1875 and 1881, "The Board to co-operate with the city council for its early construction, thereby avoiding the increasing annual expenditure for dredging at the several slips on the front of the bay."

In connection with the above, the diversion of the water of the River Don into Ashbridge's Bay, by means of crib work and stop logs across the river, through the

---

new channel recently dredged at the expense of the Trust, in accordance with the recommendations in the report and estimate on the 18th February last, should also be considered.

Should these improvements be made, the annual expenditure for dredging in the slips and the Don channel would be saved, and the pollution of the waters of the bay by sewage, which is now a just cause of general complaint, and consequent unhealthiness, would be avoided.

I have the honour to remain,

Your obedient servant,

KIVAS TULLY,

*Engineer.*

A. B. LEE, Esq.,  
Chairman Toronto Harbour Commissioners,  
Toronto.

## APPENDIX No. 11.

REPORT OF THE HARBOUR COMMISSIONERS OF PICTOU, N.S., FOR THE  
CALENDAR YEAR ENDING 31st DECEMBER, 1884.

PICTOU, 22nd January, 1885.

SIR,—I have the honour to enclose account of Harbour Commissioners' receipts and expenditure for the year ending 31st December, 1884.

Also, the Harbour Master's report for past season, which shows a total arrival of 1,530 steamers and sailing vessels, aggregating 264,394 tons, against 1,540 steamers and sailing vessels of 247,605 tons, during 1883.

The Commissioners expect to make some required repairs to both east and west wharves this season.

I have the honour to be, Sir, your obedient servant,

J. A. GORDON,

*Chairman of Harbour Commissioners.*

WM. SMITH, Esq.,  
Deputy Minister of Marine,  
Ottawa.

Wm. McKERRON, Notary Public.

APPENDIX No. 13.

REPORT OF THE HARBOUR COMMISSIONERS OF NORTH SYDNEY, C.B.  
FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

NORTH SYDNEY, 8th January, 1885.

SIR,—In accordance with the provisions of section 4 of the 42nd Victoria, chapter 30, we have the honor to submit our report for the year 1884.

The following statements contain the usual particulars furnished your Department :—

*Coal Export.*

The coal shipments from the harbour show a falling off of 8 per cent. The following are the coal shipments from the port since 1879 :—

COAL SHIPMENTS.

| Years.    | Tons.   |
|-----------|---------|
| 1879..... | 147,051 |
| 1880..... | 187,818 |
| 1881..... | 258,961 |
| 1882..... | 313,257 |
| 1883..... | 330,748 |
| 1884..... | 303,748 |

*Shipping.*

The arrivals show an increase of 10 per cent. over that of 1883.

The following include vessels for cargoes orders, and bunker coals.

The arrivals and tonnage for the year ended 31st December, are as follows :—

|               | No.   | Tons.   |
|---------------|-------|---------|
| Steamers..... | 392   | 275,977 |
| Sail.....     | 1,215 | 193,212 |
|               | 1,607 | 469,189 |
|               | 1,607 | 469,189 |

A large number of the steamers and a number of the sailing vessels that entered at this port also entered at Sydney—having had freight for each place, they both being in the same harbor.

*Receipts from Shipping.*

There was an increase in the receipts from shipping of \$11.62 over the year 1883.

Of the 1,607 vessels reported, only 755, representing 166,850 tons, paid harbour dues.

The receipts and disbursements are as follows :—

| RECEIVED.                      | \$ cts.  | PAID.   | \$ cts.  |
|--------------------------------|----------|---|----------|
| From Collector of Customs..... | 1,668 50 | To A. C. Bertram, for printing.....                 | 10 50    |
| Wharfage.....                  | 78 95    | Harbour master.....                                 | 400 00   |
| M. J. Phoran.....              | 55 50    | do boat expenses.....                               | 50 00    |
| G. H. Dobson.....              | 172 50   | W. H. Moore & Co.....                               | 111 04   |
|                                |          | Alex. Campbell, diver.....                          | 5 00     |
|                                |          | Office rent.....                                    | 50 00    |
|                                |          | Paid labour, ballast.....                           | 1 25     |
|                                |          | James Desmond.....                                  | 3 10     |
|                                |          | M. S. Brown & Co.....                               | 10 00    |
|                                |          | Bart. Musgrave, \$2.00; H. R. McKenzie, \$8.00..... | 10 00    |
|                                |          | Gouthro, for wharf account.....                     | 287 17   |
|                                |          | Geo. Murray.....                                    | 55 00    |
|                                |          | Mosley & Chisholm.....                              | 49 80    |
|                                |          | Office fuel, stationery and cleaning.....           | 10 50    |
|                                |          | M. J. Phoran.....                                   | 185 50   |
|                                |          | Caring for seamen.....                              | 420 00   |
|                                |          | Geo. H. Dobson, Secretary.....                      | 87 26    |
|                                |          | W. H. Moore, Treasurer, Commissioners.....          | 210 57   |
|                                |          | Interest on loan.....                               | 16 76    |
|                                |          | Balance on hand.....                                |          |
|                                | 1,973 45 |   | 1,973 45 |

We send you copies of the Harbour Master's report, giving comparative statement of the tonnage of the port since 1879, also Mr. Phoran's report of the seamen cared for.

We have the honour to be, Sir, your obedient servants,

M. J. PHORAN,  
W. H. MOORE,  
GEO. H. DOBSON. } *Harbour Commissioners.*

To the Honorable A. W. McLELAN,  
Minister of Marine and Fisheries,  
Ottawa.

The following is the number of Seamen cared for and assisted on board their respective vessels during the year 1884:—

| Dates.  | Men put on board Ship. | Names of Vessels.     | Dates.   | Men put on board Ship. | Names of Vessels.      |

WM. SMITH,  
Deputy Minister of Marine, &c.

OTTAWA, 1st January, 1885.

## APPENDIX No. 15.

REPORT OF THE PILOTAGE AUTHORITY OF MONTREAL, FOR THE  
CALENDAR YEAR ENDED 31ST DECEMBER, 1884.

MONTREAL, 19th January, 1885.

W.M. SMITH, Esq.,  
Deputy Minister of Marine and Fisheries,  
Ottawa.

SIR,—I have the honor to submit herewith, for the information of the Honourable the Minister of Marine and Fisheries, the Annual Report of the Pilotage District of Montreal, for the year ended 31st December, 1884.

There was no increase in the number of apprentices during the year.

The following apprentice pilots having passed successful examinations in March, 1883, received their branches as pilots on 20th February, 1884, in accordance with the harbour by-laws regarding pilotage, viz. :—

Nestor Arcand, John Naud and Joseph Dussault.

There were no deaths among the pilots on the active list, but the following superannuated pilots died during the year, viz. :—F. A. Mayrand, aged 66 years, on 6th January, 1884; Edward Naud, aged 43 years, who had become insane and been placed on the pension list, died on 15th April, 1884, and P. M. Mathieu, aged 66 years, on 10th December, 1884.

The following is a list, giving the name and age, of each Pilot acting in this District under the authority of this Trust, with the earnings of each for the Season of 1884.

| No. | Name.                    | Age. | Earnings. |      | Remarks.                   |

| 16  | Narcisse Paquet .....   | 30   | do                                     |
| 17  | J. B. Nadeau.....       | 26   | Lévis.                                 |
| 18  | Arthur Brière .....     | 27   | Portneuf.                              |
| 19  | Aubert Naud .....       | 30   | Deschambault.                          |
| 20  | J. S. Labranche .....   | 28   | Portneuf.                              |
| 21  | Alexis Perrault.....    | 22   | Deschambault.                          |

It is satisfactory to be able to state that only two accidents to vessels occurred during the season, into the causes of which it was deemed necessary to hold investigations.

On the 21st October, the ss. "Lake Huron," belonging to the Beaver Line of steamships, while on her way up from Quebec, in charge of Pilot Joseph Chandonnet, grounded at Pointe aux Trembles (*en haut*). She was floated after a short detention, without having sustained any apparent damage.

After hearing the evidence in the case the Commissioners decided that the pilot was not to blame in the matter.

On the following day the ss. "Lake Champlain," of the same line of steamships, while on her way from Montreal to Quebec, in charge of Pilot Louis Bélisle, grounded in the Lavaltrie channel. The vessel was obliged to discharge several hundred tons of her cargo, and was floated on the 26th October, and proceeded to Quebec. She sustained no serious damage.

At the investigation, the pilot admitted that he had made a mistake and had taken the wrong channel. In view of this admission of the pilot, and in consideration of the previous satisfactory performance of his duties, extending over a number of years, the Commissioners decided to suspend him until the 1st July, 1885.

The following is the Tariff of Pilotage now in force in the Pilotage District of Montreal, viz. :—

| Quebec to Montreal, or <i>vice versa</i> .  | Upwards.     | Downwards.   |
|---|--------------|--------------|
| Pilotage of vessels in tow of steamers, for each foot of draft of water .....   | \$ cts. 2 00 | \$ cts. 2 00 |
| do propelled by steam do do .....   | 2 50         | 2 50         |
| do under sail do do .....   | 4 20         | 2 80         |
| Moving a vessel from one wharf to another in the harbour of Montreal, or from foot of the current St. Mary into the harbour ..... | 5 00         | 5 00         |

The amount received by the Commissioners, as the Pilotage Authorities for this District, was as follows :—

|  |                   |
|--|-------------------|
| For Poundage, 5 per cent. on the earnings of pilots..... | \$2,077 48        |
| Sundry poundage from Three Rivers, for 1883.....         | 66 71             |
| Sundry poundage.....                                     | 5 05              |
| Interest on investments.....                             | 1,905 00          |
|  | <u>\$4,054 24</u> |

|   |                   |
|---|-------------------|
| The disbursements for pensions to old and infirm pilots<br>and widows of pilots were..... | <u>\$3,131 61</u> |
|---|-------------------|

I have the honour to be, Sir,

Your most obedient servant,

H. D. WHITNEY,

*Secretary.*

## APPENDIX No. 16.

REPORT OF THE PILOTAGE AUTHORITY OF QUEBEC FOR THE CAL-  
ENDAR YEAR ENDED 31st DECEMBER, 1884.

QUEBEC, 9th January, 1885.

To the Honorable A. W. McLELAN,  
Minister of Marine and Fisheries, &c., &c., &c.,  
Ottawa.

SIR,—In compliance with the requirements of section 24 of the "Pilotage Act, 1873," 36 Victoria, chapter 54, I have the honor to submit the following Report of the Quebec Harbour Commissioners, as Pilotage Authority, for the year, 1884:—

This year's operations have commenced the 22nd April by the departure of nine pilots, who were sent, through the Intercolonial Railway, for the purpose of boarding the pilot schooner No. 4, which had been placed in a winter berth on the first station. On the 3rd of May following the schooner No. 5 left with twenty-six pilots, and was followed, on the 7th of same month, by schooner No. 1, with thirty pilots. On the 9th twenty-two pilots were despatched by railway to Rivière du Loup station, and on the 10th forty-three were sent to the same station by the same way.

The service of supplying with pilots the various stations during the season has been, as formerly, performed with satisfaction through the Intercolonial Railway and the pilot schooners.

## OLD PILOTS.

The examination of the old pilots under the 36th Section of the "Pilotage Act, 1873," took place on the 2nd day of May. Thirty-six old pilots having attained the age of 65 and over, appeared on that day before the Commissioners, and were all examined, with the view of establishing whether they could be kept on the active list for another year. With the exception of one, Maurice Pepin dit Lachance, of the age of 70, they were all considered fit to be continued in the exercise of their duties, and a new license, for one year, was consequently granted to each of them.

## PILOTS SUPERANNUATED.

Five old pilots have been placed on the pension list during the year. They are respectively named as follows: François Vézina, Jean Audet dit Lapointe, Maurice Pepin dit Lachance, Hilaire Jovin and Pierre Pepin. The three first had attained the age of 70, the fourth 68 and the fifth 69.

## TRIALS.

Five pilots have been tried during the season on complaints lodged by ship masters.

One of the annexures accompanying the present Report contains all the particulars as to the nature of the complaint and the result of the trial in each case.

The Pilotage Authority are happy to state that no complaints have been lodged this year, by the Corporation of Pilots, against pilots for infringement of their regulations.

## DEATHS.

Two deaths have occurred this year among the pilots. The deceased names were Edouard Marcoux and Barthélemi Lachance. The first had attained the age of 76 and had been on the active list for the space of fifty years, and the other had attained his 63rd year, and had completed his 41st year of service at the time of his death.

## APPRENTICE PILOTS.

Eight apprentices, after undergoing the examination required by law, have been admitted to practise as pilots.

Sixteen apprentices remain on the list, who are entitled to undergo their examination at the expiration of their apprenticeship, under the section 8 of the 45th Victoria, chapter 32, which provides for the reduction of the number of pilots. The two apprentices formerly reported as absent have not yet made their appearance, and it is more than probable that they will never return. The number of apprentices under this statute may consequently be considered as reduced to fourteen. Four of them will have completed their time in 1887, and the ten others in 1888.

The Board of Corporation of Pilots have, on the 9th January, addressed a copy of a resolution adopted by them, requesting the Pilotage Authority to cause the law regarding the apprentice pilots to be amended, so that they will be compelled, for the future, to effect only two voyages to and from Europe, instead of four they are now obliged to make.

This request was referred to a Committee of the Whole of the Pilotage Authority. After a very careful consideration of same, the committee transmitted their report, which was unanimously adopted, and which resulted in the adoption of the following resolution:—

“That the Honorable the Minister of Marine and Fisheries be respectfully requested to cause the section 21 of the 12th Victoria, chapter 114, to be amended so that, for the future, the apprentice pilots will have the option of making two or four voyages to and from Europe or to and from any other ports of the world, from and back to Quebec, of an equal or more distance by sea, and not less; but in case each or any of them would choose to make only two voyages, he be compelled to make them in sailing vessels, both outwards and inwards, from and back to Quebec, and to produce a mate's certificate before undergoing his examination to be admitted as pilot. It being understood that all the restrictions regarding the voyages the apprentices are compelled to make, specified in the section 20 of the by-laws of the Trinity House, in force since the 1st April, 1871, be maintained, inasmuch as same have been enacted to constrain the apprentices to qualify themselves as mariners.”

On the 29th January a communication embodying the foregoing resolution was most respectfully submitted to you, and subsequently a letter was received from your Department, in which it was stated that it would not be advisable to propose any alterations to the law at that time. The Commissioners hope that, when you will be satisfied that it is desirable to amend the 12th Victoria, chapter 114 and the 36th Victoria, chapter 54, you will consider favorably their request, as also the various amendments to the last mentioned statute already recommended by them.

SURVEY OF THE NORTH AND SOUTH CHANNELS OF THE ST. LAWRENCE BY THE  
APPRENTICE PILOTS.

The most important question of reviving the old practice of sending the apprentice pilots on a survey of the north and south channels of the St. Lawrence, within the pilotage limits, has been *de novo* under consideration this year, and it was decided to make a new attempt, with the view of obtaining the revival of the practice in question.

A copy of the Harbour Master's report on the subject, dated the 11th June, 1878, the same which was annexed to the report to your Department for same year, was

addressed to you, with a respectful request to give your consent to the reviving of said practice, by placing, for that purpose, at the disposal of the Pilotage Authority, one of the Government steamers, at any time of the season when one of them had no work to perform.

The answer received was that it would interfere with the business of the Department to detach a steamer for the purpose referred to, and it was suggested, in the same answer, that one of the schooners belonging to the Corporation of Pilots might be used for that purpose.

The Commissioners are unable to put into effect the suggestion of using one of the pilot schooners for the purpose required, inasmuch as it is impossible to detach a single schooner from the stations, where they have to remain all the season. The process of using a sailing vessel for such a survey would be very slow, and would entail a great loss of time to the officers, who would be obliged to accompany the apprentices, without taking into account the expenses which would have necessarily to be borne by the Corporation of Pilots, the Pilotage Authority having no funds to affect towards such an expenditure.

The Commissioners are therefore convinced that, owing to the great importance of the subject, the Government will reconsider their decision, with the view of placing for the future at the disposal of the Pilotage Authority, for that purpose, one of their steamers, at any time of the season when one of them has no work to perform

#### COMPLAINTS OF DETENTION OWING TO WANT OF PILOTS.

During July two complaints of detention of vessels at Bic, owing to want of pilots, have been laid before your Department by the firm, Messrs. Anderson, McKenzie & Co., of Montreal, and referred to the Pilotage Authority for report; the first was made on behalf of Captain Kitchim, master of the "James Kitchim," and the other on behalf of Captain Barnard, master of the "Premier McKenzie."

Subsequently the same firm addressed to your Department a communication, which also was referred to the Pilotage Authority, in which, adverting to the two previous complaints, it was represented that one pilot schooner in the vicinity of Bic was not sufficient to meet the requirements of shipping, and that four schooners should be cruising about in that locality, waiting for incoming vessels, and to receive pilots from outgoing vessels.

These matters have been most thoroughly investigated by the Commissioners, and it has been established to their satisfaction that the two first complaints were entirely unfounded.

With reference to the last complaint, although of opinion that three schooners, instead of two at the Bic station, would be more effective when there is a rush of incoming vessels, which, during the last eight years, has not happened more than ten times, the Commissioners are satisfied that the five schooners engaged in the service of the stations are quite sufficient to meet the requirements of the shipping.

There is no doubt that a proper look-out, on their arrival at the Bic station, would lead, without trouble, the ship masters to the nearest pilot schooner on duty.

#### DIRECTORS OF THE CORPORATION OF PILOTS.

At their last annual meeting, held the 10th December, the pilots have elected as directors to their corporation, for the ensuing year, Messrs. Nestor Lachance, Auguste Couillard Després, Cyprien Langlois, Laurent Godbut, Arbel Bernier and Onézime Noël, and at a meeting of the newly elected directors, held on the following day, Mr. Nestor Lachance was elected president.

The accompanying annexures contain all the information yearly furnished to your Department by the Commissioners in their capacity of Pilotage Authority.

I have the honor to be, Sir,

Your obedient servant,

A. H. VERRET,  
Secretary Treasurer.

**QUEBEC HARBOUR COMMISSION.**

*(Annexed to the Quebec Harbour Commissioner's Report as Pilotage Authority for the year 1884.)*

**STATEMENT of Trials** held during the year 1884, before the Quebec Harbour Commissioners, under the authority of the Pilotage Act of 1873, 36 Vic., chap. 54.

| Names of Pilots tried. | Nature of Complaints.   | Dates of Trials.       | Result.  |
|------------------------|---|------------------------|--|
| Alfred Larochelle...   | For having, on the 10th June, collided the ss. "Lake Champlain" with the Grand Trunk wharf at South Quebec.   | 16th June....          | The complaint was dismissed, on the ground that there was no case against the pilot.   |
| Chas. F. Brown....     | For having, on the 11th June, collided the ss. "Delhi" with Davie's dock, at Levis.                           | 30th June....          | Found guilty, and suspended for the space of 20 days.  |
| Pierre Lemieux....     | For having, on the 11th July, ran ashore, inside of Burstall's wharf, at South Quebec, the barque "Cavalier." | 21st July....          | Acquitted on the ground that the evidence had established that the pilot was not guilty of the charge lodged against him.  |
| Pierre Pepin.....      | For having, on the 13th July, ran ashore, on the N.E. reef of Green Island, the ss. "River Ettrick."          | 24th July....          | The pilot has pleaded guilty and has been suspended for the remainder of the season of navigation, with the understanding that he will be superannuated at the expiration of his suspension. |
| Narcisse Forgues...    | For having, on the 21st August, ran ashore, at or near St. Fabien, the barque "Electric."                     | 4th and 8th September. | Found guilty, and suspended till the 31st day of December.   |

Certified,

A. H. VERRET,  
*Secretary Treasurer.*

## APPENDIX No. 19.

REPORT OF THE PILOTAGE AUTHORITY FOR THE DISTRICT OF  
BUCTOUCHE, N. B., FOR THE CALENDAR YEAR ENDED THE 31st  
DECEMBER, 1884.

BUCTOUCHE, N. B., 8th January, 1885.

To Wm. SMITH, Esq.,  
Deputy Minister of Marine and Fisheries,  
Ottawa.

SIR,— As required by the provisions of the 24th section of the Act 36 Vic., chap. 54, respecting pilotage, I herewith transmit to you the pilotage returns for the District of Buctouche for the year ending 31st December, 1884, and which I hope you will find satisfactory.

I am, Sir, your obedient servant,

JOHN C. ROSS,  
*Secretary to Buctouche Pilotage Authority.*

PILOTAGE RETURNS, DISTRICT OF BUCTOUCHE, PROVINCE OF NEW BRUNSWICK, FOR THE  
YEAR 1884, ACT 36 VIC., CHAP. 54, SEC. 24.

1st. Names and ages of pilots licensed :—

|                      | Age. |
|----------------------|------|
| John S. Dixon.....   | 51   |
| Caliste Logère ..... | 51   |
| Thadée Pellerin..... | 48   |
| Matthew Smith.....   | 45   |
| John G. Smith.....   | 38   |

2nd. The above named pilots are all licensed to undertake the pilotage of vessels of every description within and without the Pilotage District of Buctouche.

3rd. Pilotage dues are charged as per section 12 of rules and regulations for the District, viz.: One dollar and fifty cents (\$1.50) per foot draught of water, both inward and outward bound.

4th. Total amount of pilotage dues paid during the year, \$174; of which there was paid by British vessels, \$31.50, and by Foreign vessels, \$142 50, all at the rate of \$1.50 per foot for inward and outward pilotage.

5th. The pilotage dues, as above, were paid to the different pilots, who performed their duties as such to the respective vessels.

6th. No new licenses were granted or expenses incurred during the year by the Pilotage Authority.

JOHN C. ROSS,  
*Secretary to Buctouche Pilotage Authority.*

BUCTOUCHE, N. B., 8th January, 1885.

APPENDIX No. 23.

---

REPORT OF THE PILOTAGE AUTHORITY OF LOUISBURG, C.B., FOR  
THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

LOUISBURG, C.B., 2nd January, 1885.

To WM. SMITH, Esq.,  
Deputy Minister of Marine,  
Ottawa.

The Pilotage Authority for the District of Louisburg have the honour to submit the following report for the year 1884.

There have been no changes made in the pilots, and pilotage rates are the same as heretofore.

I regret having to inform you that only two vessels paid pilotage dues in this port during the year.

The falling off is owing to the fact that the Sydney & Louisburg Coal and Railway Co. have ceased to ship coals from this port.

I have the honour to remain,  
Your obedient servant,

P. O'TOOLE,  
*Chairman, P. Board.*

## APPENDIX No. 24.

REPORT OF THE PILOTAGE AUTHORITY OF PICTOU, N.S., FOR THE  
CALENDAR YEAR ENDED 31st DECEMBER, 1884.

To Wm. SMITH, Esq.,  
Deputy Minister of Marine,  
Ottawa.

SIR,—I have the honour herewith to submit to you the Pilotage Returns for this District, for the year ending 31st December, 1884.

I am, Sir, your obedient servant,

WM. H. NOONAN,

*Sec'y. Pilotage Commissioners.*

*Secretary.*

BURRARD INLET, B.C., 31st December, 1884.

## APPENDIX No. 26.

## REPORT OF THE PILOTAGE AUTHORITY OF VICTORIA AND ESQUIMALT FOR THE CALENDAR YEAR ENDED 31ST DECEMBER, 1884.

VICTORIA, 6th January, 1885.

WILLIAM SMITH, Esq.,  
Deputy Minister of Marine,  
Ottawa.

SIR,—I have the honor to transmit herewith the Pilotage Returns for the District of Victoria and Esquimalt, B.C., for the year ending 31st December, 1884, as required by the Act 36 Vic., chap. 54, sec. 24, and trust that they will reach you in good season to be embodied in the supplement to the annual report, and also that the Honorable the Minister may be pleased, this year, to publish them in full as they are useful, for reference, to many persons.

I have the honor to be, Sir,

Your obedient servant,

EDGAR CROW BAKER,

*Secretary-Treasurer.*

## APPENDIX No. 27.

REPORT OF THE PORT WARDEN FOR THE PORT OF MONTREAL, FOR  
THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.OFFICE OF THE PORT WARDEN,  
MONTREAL, 31st December, 1884.*To the President and Council of the Board of Trade, Montreal.*

GENTLEMEN,—In accordance with the Act 45 Vic., chap. 45, sec. 31, I have the honour to submit this my Annual Report of the affairs of the office for the present year, accompanied by financial statement showing receipts and expenditure during that period.

Navigation opened this year about the usual time; the ice moved out of the harbour on the 18th April, and on the 22nd the river and coasting craft began to arrive from winter quarters at Boucherville. On the 27th April the ice jam at Cap Rouge gave way, and on the following day we had clear water from here to sea.

The first arrival from sea was the Beaver Line steamship "Lake Champlain," from Liverpool. She came into port on the 2nd May, and was followed later in the day by the Allan mail steamship "Peruvian."

The early arrivals met with some ice in the Gulf, but some of the ships that arrived later saw very little, and others saw none.

By the 8th of May we had quite a large number of ocean steamships in port, and the business of the harbour was in vigorous operation.

The first sailing ship to arrive was the barque "Venus," from London. She came into port on the 11th of May.

The steamship "Titania," of the Donaldson Line, which arrived here from Glasgow on the 21st June, was the first vessel to pass through the Straits of Belle Isle this season, which she did on the 17th June. She saw no field ice, but passed a great many icebergs, some of them of great size. She was not delayed by them.

The Allan steamship "Norwegian," for Glasgow, was the last sea going ship to depart this season. She left port on the 21st November. At that time there was no ice in the harbour.

The water in the river has kept well up this year. There was depth enough for the largest of our ships. Lighterage of cargoes to Quebec may now be considered a thing of the past.

The steamship "Brooklyn" left port on the 3rd of July for Liverpool, drawing 26 feet 1 inch. I believe this is the deepest draft that ever left Montreal.

On the 14th August last the Allan steamship "Norwegian," for London, left port, drawing 25 feet 6 inches. This is unprecedented at that time of the year, when the water in the river is considered to be lowest.

There is a very slight difference in the number of sea-going ships and amount of tonnage which arrived at this port this year and last.

Three hundred and twenty-two ships were entered at this office this year, with an aggregate of 488,753 tons, against 335 ships, measuring 483,741 tons, in 1883. Of the 322 ships, 242 were steamers, of 433,806 tons, being an average of 1,792 tons each, and 80 were sailing ships, of 44,947 tons, making the average of each sailing ship 562 tons. These figures do not include vessels from Newfoundland and places within the Dominion, as such vessels do not come under the jurisdiction of this office.

On the 17th of August the steamship "Silkworth," loaded with a cargo for Liverpool, left port without having received from this office a certificate of seaworthiness. Immediate steps were taken, according to law, to prevent her proceeding to sea, until the master accounted to the proper authorities for his illegal conduct. The ship was stopped at Quebec by the officials of the Government. She was detained there three days, pending the decision of the case by those in authority. She was ultimately allowed to go to sea, on payment of the expenses incurred in her arrest and detention at Quebec, without the infliction of the fine imposed by the Act of Parliament relating thereto.

The import trade of the port has not been quite up to last year in volume, except in the article of sugar, which has been largely in excess of previous years. Thirty-four thousand seven hundred and seven tons of shipping have been employed in bringing sugar from Java, Brazil, the West Indies and other places of growth, this year, against 18,960 tons thus employed in 1883, and 21,636 tons in 1882.

In exports a fair business has been done, for although the export of grain has fallen off in quantity this year, nearly 2,500,000 bushels, as compared with last year, it has been made up by an increase in other exports, such as flour, phosphates, bacon, cheese, deals and other things, flour being largely in excess. The total quantity of grain shipped this year was 7,421,152 bushels, against 9,781,001 bushels last year, and 8,293,830 in 1882; 446,480 barrels of flour were shipped this year, against 294,353 barrels in 1883, being an increase of 152,127 barrels.

The shipment of deals to Great Britain has been in excess of previous years—26,559, St. Petersburg standards, equal to 52,587,205 feet board measure, were shipped, against 23,094 standards last year, and 22,467 in 1882.

Lumber shipments to South America were also in excess of previous years, giving employment to a large amount of tonnage; 24,385,378 feet were shipped from the Hochelaga wharves this year, being an increase of about 20 per cent. over 1883.

The phosphate shipments show a steadily increasing business. The total shipments this year were 20,461 tons, against 17,160 tons last year, 15,556 tons in 1882, and 7,500 tons in 1880, or an increase of nearly 300 per cent. in four years.

Every year shows how steadily and surely steamers are supplanting sailing vessels in the deal and phosphate carrying trades, as well as in the carriage of grain, while to South America steamers have not yet ventured into the lumber carrying trade, but I predict that ere long steamers will be found competing with sailing vessels for this trade also.

The cattle export trade goes on steadily increasing year by year, although there was not so many sheep exported this year as last; 56,643 head of cattle and 63,143 sheep were shipped this year, against 50,345 head of cattle and 102,347 sheep last year, and 28,491 head of cattle and 64,590 sheep in 1882.

Other articles of export require no special notice.

So far as I know, there are no missing ships from this port this year, or ships lost by being overloaded or from shifting of cargo.

I have been ably assisted by the members of my staff, all of whom have rendered good service, and with their aid the public requirements have been fully met.

I am, Gentlemen,

Your obedient servant,

DAVID ROSS KERR,

Port Warden.

## APPENDIX No. 28.

REPORT OF THE PORT WARDEN OF THE PORT OF QUEBEC FOR THE  
CALENDAR YEAR ENDED 31st DECEMBER, 1884.PORT WARDEN'S OFFICE,  
QUEBEC, 31st December, 1884.To WM. SMITH, Esq.,  
Deputy Minister of Marine, Ottawa.

SIR,—I have the honor to submit this my Annual Report of the affairs of this office during the year ending the 31st December, 1884.

The following enumerated class of vessels have been examined and surveyed in the harbour and in the port of Quebec, and in compliance with the Acts relating to the Port Wardens of Montreal and Quebec, established in 1871 and 1873:—

Six steamships, inwards, with general cargoes, have been surveyed, in compliance with the 8th section of the said Act.

One hundred and four steamships, outwards, with general cargoes, have been surveyed, in compliance with the amended Act of 1873.

Fifteen sailing vessels, inwards, with general cargoes, have been surveyed, in compliance with the 8th section of the said Act.

One sailing vessel, with outward cargo, has cleared.

Fifteen lots of merchandise and goods and wrecked materials surveyed and sold in compliance with the 16th and 18th sections of the said Act.

Thirteen vessels, under general average, estimate and valuation, in compliance with the 15th section of the said Act.

Three sales of vessels examined, condemned and sold as wrecks, materials saved and brought to Quebec and sold on account of underwriters and others concerned, and in compliance with the 16th section of the said Act.

Twenty-two copies of reports issued, as per section 21 of the said Act.

Forty-seven vessels of all classes examined and surveyed on account of stranding, collision, &c., and in compliance with section 10 of the Act.

On the 28th of August, 1884, Capt. Munch, master of the Norwegian barque "Aurora," applied to the Council of the Board of Trade to examine into and report on the certificate granted on the above named barque "Aurora," dated 25th August, 1884; also the declaration of François Xavier Paré, diver, of this city.

And on the 29th, at eleven o'clock a.m., attended the meeting convened in the Council Chamber of the Quebec Board of Trade, there to take into consideration the complaint of the above named J. Munch, as under certified by the annexed letter, certified by F. H. Andrews, Secretary.

"We the undersigned President and Councillors of the Québec Board of Trade do hereby certify that, at a meeting of the Council of the said Board, held this day, at your request, to consider a decision of the Port Warden of Quebec, rendered and contained in his certificate *re* barque 'Aurora,' dated Quebec, 25th August, 1884, the said certificate, and also a declaration of François Xavier Paré, diver and salvor, were duly laid before the Council for its consideration, and it was resolved that the certificate of the Port Warden be approved of and confirmed, and that a fee be charged to the said Capt. Munch of ten dollars.

"(Signed) J. SHEHYN, *President.*  
do R. R. DOBELL, *Councillor.*  
do WM. BRODIE, *Councillor.*"

The above is a true copy.

(Signed) F. H. ANDREWS, *Secretary.*

## APPENDIX No. 29

REPORT OF PORT WARDEN FOR THE PORT OF HALIFAX FOR THE  
CALENDAR YEAR ENDED 31ST DECEMBER, 1884.PORT WARDEN'S OFFICE,  
HALIFAX, N. S., 31st December, 1884.WM. SMITH, Esq.,  
Deputy Minister of Marine, Ottawa.

SIR,—I have the honour to submit my Report of the affairs of this office, accompanied by a statement of the receipts and expenditure for the past year.

Surveys have been held by me during the year upon forty-six vessels.

The ship "Henry," of and from St. John, N.B., bound to Liverpool, G.B., and the brigantine "American Union," of Philadelphia, Pa., from Brunswick, Ga., bound for Bahia Blanca, which put in here in distress, were sold, as the expense of putting them in a seaworthy condition would exceed their value after the repairs had been effected.

The steel-built steamship "Colonsay," of Glasgow, G.B., deal-laden, from St. John, N.B., bound to Penarth Roads, G.B., arrived here in a damaged condition, having been stranded on Mud Island, near Yarmouth, N. S. The cargo was discharged and the vessel placed upon the marine railway, where, having associated with me a competent mechanical engineer, I held survey upon her. We found a number of plates in the outside bottom fractured, and the inside plating—the vessel having water ballast tanks—uninjured. The owners of the vessel cabled to their agents here that if temporary repairs could be made sufficient to put her in a seaworthy condition to proceed with her cargo to her destination, to have them effected. After due consideration, we decided that the vessel could be temporarily repaired so as to be seaworthy. The repairs were executed in accordance with our recommendations, and after their completion the inboard cargo was reloaded. The master, officers and crew, who, up to this time, had apparently been perfectly satisfied, now objected to proceed to sea in the vessel if the deck load was reloaded. It was decided to leave the deckload behind, and a ticket of seaworthiness was given the vessel. After the vessel was cleared at the Custom house the officers, engineers and crew refused to proceed in her, alleging that she was unseaworthy. A new master and engineers were procured from Great Britain, who, upon their arrival here, were informed of the extent of the damage and of the nature of the repairs made. After examining the hull and machinery they expressed themselves as satisfied that she was seaworthy. A new crew, with the exception of the first officer, who (unsolicited) returned to his duty, was shipped, and the vessel proceeded upon her voyage, and arrived at her destination after a passage of average duration, during which she encountered very heavy weather. The deck load was subsequently sold by order of the parties interested.

Vessels repaired here, having cargoes for other ports, re-loaded them and proceeded to their destinations, where all, now due, have arrived safely.

The cargo saved from the SS. "Daniel Steinmann," which was wrecked at Sambro' Island, N. S., was brought here in a damaged condition, and was sold for the benefit of all concerned.

The cargo saved from the SS. "Amsterdam," which was wrecked at Sable Island, was brought to this port. The sound portion of it was forwarded to its destination, and the damaged portion sold for the benefit of all concerned.

I have the honour to be, Sir,

Your most obedient servant,

DAVID HUNTER,

Port Warden.

*Receipts and Expenditure of the Port Warden, Halifax, N.S., from 1st January to 31st December, 1884.*

|  |          | Amount reverting to Port Warden .....                | 1,749 91 |
|  |          |  | 2,785 95 |

I hereby certify that the above is a true and correct statement of the receipts and expenditure of the Port Warden at Halifax N.S., during the year 1884.

DAVID HUNTER,  
Port Warden.

APPENDIX No. 30.

REPORT OF THE PORT WARDEN FOR THE PORT OF PICTOU, N.S.,  
FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

PICTOU, N.S., 31st Decembee, 1884.

To WM. SMITH, Esq.,  
Deputy Minister of Marine, Ottawa.

SIR,—I have the honour to submit this my Annual Report on the affairs of this office during the year ended 31st December, 1884, accompanied by the amount of fees collected and expenses during the past year :—

|  |              |
|--|--------------|
| Amount of fees received (all from vessels arriving in damaged condition) ..... | \$285 00     |
| Amount paid to assistants.....   | \$ 95 00     |
| Amount paid for office rent, stationery, &c. ....                              | 5 00         |
| Balance to Port Warden.....  | 185 00       |
|  | ————— 285 00 |
|  | =====        |

I certify that this is correct.

Respectfully submitted,

DANIEL McDONALD,  
*Port Warden.*

Sworn before me at Pictou, N.S., this 29th December, A.D., 1884.

RICHARD JAMES, *J.P.*

APPENDIX No. 31.

REPORT OF THE PORT WARDEN FOR PORT HAWKESBURY, N.S., FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

PORT HAWKESBURY, N.S., 31st December, 1884.

To WM. SMITH, Esq.,  
Deputy Minister of Marine,  
Ottawa.

SIR,—I have the honour to submit Annual Report of the doings of this office, accompanied by a statement of the fees collected by me, and also the attendant expenses during the past year. Enclosed please find a list of vessels arriving at this port in a damaged condition, on which surveys have been held during the year 1884, just ended. The damaged vessels have been all repaired here, and arrived safely at their ports of destination, except the "Elizabeth Ann," of Pictou, whilst on her passage to Boston, sprung her mainmast off Sambro, and put into Halifax.

I have the honour to be, Sir,  
Your obedient servant,

D. W. HENESEY,  
Port Warden.

---

 APPENDIX No. 32.
 

---

 REPORT OF THE PORT WARDEN FOR THE PORT OF NORTH SYDNEY,  
 C.B., FOR THE CALENDAR YEAR ENDED 31<sup>ST</sup> DECEMBER, 1884.

NORTH SYDNEY, C.B., 10th January, 1885.

 To Hon. A. W. McLELAN,  
 Minister of Marine and Fisheries,  
 Ottawa.

SIR,—The undersigned Port Warden for the port of North Sydney, C.B., begs to report as follows:—

In the port of North Sydney, during the year 1884, the following surveys on vessels and steamers loaded, or having sustained damage, numbering in all 27, were held, viz.:—

 15 on sailing vessels and 12 on steamships, amounting in  
 all to..... \$271 00

The expenditure amounted to—

|                      |         |       |
|----------------------|---------|-------|
| For office rent..... | \$50 00 |       |
| Stationery, &c.....  | 10 00   |       |
|                      |         | 60 00 |

|                           |          |
|---------------------------|----------|
| Leaving net proceeds..... | \$211 00 |
|---------------------------|----------|

The falling off in the business of the office has been caused by scarcely any grain loaded steamers having called at this port requiring certificates during the past season.

 DANIEL McKAY,  
*Port Warden.*

## APPENDIX No. 35.

REPORT OF THE PORT WARDEN FOR THE PORT OF CHATHAM, N. B.,  
FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

To Wm. SMITH, Esq.,  
Deputy Minister of Marine, Ottawa.

CHATHAM, N. B., 29th December, 1884.

SIR,—Enclosed herewith please find reports for the year 1884, also Annual Return of the receipts and expenses.

I am, Sir,

Your most obedient servant,

H. A. MUIRHEAD,

Port Warden.

PORT OF CHATHAM, N. B., 6th June, 1884.

At the request of capt. F. Moggile, master of the Italian barque "Ricardo," of Genoa, we, the undersigned, H. A. Muirhead, Port Warden, P. Schroppacom, Master Mariner, E. Bertolotte, Master Mariner, inspected the said barque "Ricardo," lying at the Canada ballast wharf.

We found about 5 feet of outer stem or pipe gone, having come in contact with ice.

The vessel otherwise is in good order and tight, and we consider her perfectly seaworthy to load cargo and proceed to her destination.

Fees..... \$5 00

H. A. MUIRHEAD,

Port Warden.

P. SCHROPPACOM,

E. BERTOLOTTE,

Master Mariners.

PORT OF CHATHAM, N. B., 2nd July, 1884.

At the request of Capt. F. Pettersen, Master of the barque "Mary Durtee," of Yarmouth, N.S., we, the undersigned, have this day surveyed the said barque, on account of her having been on shore at Sandy Hook, Magdalen Islands. We could not find any indication of ship having strained. Had the ship pumped out; while the pumps sucked, sounded the port well and found 15½ inches of water. Sealed the pumps at 5:45 p.m.

July 3rd, 6:25 p.m.—Again visited said vessel, and on sounding the pumps found 23 inches of water, the vessel making 7¾ inches in the 24 hours, not allowing anything for drainage. At the same time and place a diver went under ship's bottom and examined keel and bottom, fore and aft. He reports having found the copper and shoe (about 15 feet from stem) somewhat chafed; found rudder and rudder irons in good order, and in our opinion the vessel is in good order and seaworthy to load cargo and proceed to her destination.

Fees ..... \$30 00

H. A. MUIRHEAD,

Port Warden.

J. L. DELAP,

Master of Barque "Mistletoe."

WM. SINCLAIR,

Master Shipwright.

CHATHAM, 3rd July, 1884.

PORT OF CHATHAM, N.B., 8th July, 1884.

At the request of Captain F. Beauche, master of the barque "Maccabio," of Genoa, we, the undersigned, H. A. Muirhead, Port Warden, James Allan, Master Mariner, and L. Olwari, master of the barque "Guiseppe Emanuel," visited said vessel lying at anchor at Black Brook, Miramichi River. We found the vessel loaded and ready for sea, but crew refusing to proceed, saying vessel was too tender. No other fault. The vessel at the time having her fore and main top-gallant mast and mizzen top-mast on deck, and only about a streak and a-half of list to starboard, which may be caused by having a little extra weight (such as anchors, spars) on the starboard side, otherwise the vessel is well found and in good trim, and, in our opinion, perfectly seaworthy.

Fees..... \$30 00

H. A. MUIRHEAD,

*Port Warden.*

JAMES ALLEN,

*Master Mariner.*

L. OLWARI,

*Master, "Guiseppe Emanuel."*

CHATHAM, N.B., 9th August, 1884.

We, the undersigned, H. A. Muirhead, Port Warden, J. J. Brown, Master Mariner, at the request of Captain John Cox, master of SS. "Hector," of Sunderland, G.B., proceeded in tug "Relief" to Outer Bay of Miramichi, in order to examine and survey the steamer, and to ascertain what damage (if any) the ship received while on the ground at the Horse Shoe. On reaching the vessel, at 5:20 p.m., we sounded the well and found 1 inch of water. We also carefully examined waterways and about the masts, and could not find any mark of straining whatever, the sea at the time vessel was on the ground being perfectly smooth. We carefully examined the hull above water and could not notice anything strained. We are of the opinion that the vessel is in every respect seaworthy, but as the facilities for sighting her bottom are not obtainable at present, we therefore recommend the steamer to proceed to her destination with her cargo, and to be there docked and bottom sighted.

Fees..... \$20 00

H. A. MUIRHEAD,

*Port Warden.*

J. J. BROWN,

*Master Mariner.*

PORT OF CHATHAM, N.B., 28th October, 1884.

At the request of Captain Charles Ganion, Master of the schooner "Mary Eleanor," we, the undersigned, H. A. Muirhead, Port Warden, and James Allen, Master Mariner, went on board said schooner, then lying in the river at Chatham. Captain reported vessel sprung a leak in a gale of wind between North Cape, P. E. I., and Rescuminac, while on passage from Sydney, C.B., bound to Alberton, P.E.I. We find the galley and boat had been washed away, and the Captain reported losing 7 fathoms of 5-inch manilla. Had vessel pumped out; sounded the port well and found she had sucked at 9 inches. After waiting an hour sounded again, and found 19 inches—vessel making at the rate of 10 inches per hour. The Captain informed that he had just received a telegram from the underwriters, ordering him to discharge cargo of coals and caulk vessel, as they would take no risk unless he did so.

Considering the time of the year, and crew refusing to proceed in vessel, we advised him to discharge his cargo and caulk vessel. On examining the vessel we found the iron fastenings of the main sheet-block torn out, also part of pin-rail forward on both sides, all of which will require to be repaired. The main sail and jib also torn, which will also require repairing.

Fees..... \$10 00

H. A. MUIRHEAD,  
*Port Warden.*

JAMES ALLEN,  
*Master Mariner.*

PORT OF CHATHAM, N.B., 12th November, 1884.

At the request of Earl D. Chase, master of the barquentine "Vigilant," of Chatham, N.B., office No. 85,698, we, the undersigned, H. A. Muirhead, Port Warden, James Allen, Master Mariner, and James Carter, Shipwright, proceeded to Tabusintac on Monday, the 10th day of November, 1884, to survey said barquentine "Vigilant," which went ashore in a south-east gale, on the 5th of November, while on a voyage from Bathurst, N.B., for Boston, with a cargo of laths. We arrived at vessel on the morning of the 11th November; found her ashore, bottom up, with head towards shore, on the inside edge of the bar, on the north side of Lower Tabusintac Gully, Crab Island lighthouse bearing west about a-half mile.

We found the mast, sails and rigging floating alongside, the vessel back-broken, stem started from keel, rudder gone, part of the outside planking on port side gone, some of the planking on the starboard bottom started from the timbers, and the greater part of the oakum out of the butts and seams.

We could not tell how much cargo remained in the vessel, but a large quantity of it was scattered along the beaches.

We consider the vessel a total wreck, and owing to the season of the year and the exposed position of the wreck, we recommend the hull, materials and whatever portion of the cargo remains in the vessel (if any) to be sold immediately for the benefit of all concerned.

Fees..... \$42 50

H. A. MUIRHEAD,  
*Port Warden.*

JAMES ALLAN,  
*Master Mariner.*

JAMES CARTER,  
*Shipwright.*

REPORT OF THE PORT WARDEN FOR THE PORT OF ST. ANDREWS,  
N.B., FOR THE CALENDAR YEAR ENDED 31ST DECEMBER, 1884.

St. Andrews, N.B., 2nd January, 1885.

To Wm. SMITH, Esq.,  
Deputy Minister Marine, Ottawa.

SIR,—There has been no business connected with the Port Warden's office for the Port of St. Andrews for the year ending 1884.

I remain, Sir,

Your most obedient servant,

JOHN WREN.

Sworn to at St. Andrews, N.B., the 2nd day of January, 1885, before me,

JOHN S. MAYER,

*J. P. for the County of Charlotte.*

---

APPENDIX No. 37.

REPORT OF THE PORT WARDEN FOR PRINCE EDWARD ISLAND FOR THE CALENDAR YEAR ENDED 31st DECEMBER, 1884.

CHARLOTTETOWN, P.E.I., 31st December, 1884.

To WM. SMITH, Esq.,  
Deputy Minister of Marine,  
Ottawa.

SIR,—I have the honour to submit my Annual Report of the business of my office during the past season.

During the past year three barks have arrived in a damaged condition, upon which surveys have been held, and after receiving the necessary repairs took in cargoes and sailed for foreign ports, with the exception of the bark "Lucy Pope," Joseph McDonald, Master, which vessel sailed from the Port of Souris on the evening of the 18th of this month, and when about half way across the Straits encountered a severe gale of wind and snow; the captain put the ship about to run for the port of Georgetown, and in doing so struck on Boughton Island Reef; the ship came off (she then became unmanagable, being iced up in rigging, &c.) and was towed into Georgetown by SS. "Northern Light" in a leaky condition, and will have to discharge cargo.

The brigantine "Grace," laden with a cargo of oats, and ready for sea, on the 19th of this month, dropped down to the harbour's mouth and came to anchor and intended going to sea the following morning, but the severe frost of that night froze the vessel hard and fast, and she will have to remain here for the winter.

We have had an unusual sudden close of navigation this season and severe gales of wind, and regret to say causing damage to shipping. The loss of the brig "Lauretta," of and from this port, abandoned at sea, is reported; crew saved and landed in New York.

I wish to bring to the notice of the Department a gross violation of the 9th and 11th sections of the General Port Warden's Act, on the part of Captain Bowie, master of the schooner "Annie Roy" of Guysboro', N.S., of 90 tons register. The said vessel was chartered to load at Cascumpec for Newfoundland, and did so with oats and other produce. The captain ignored the services of my Deputy at that port and took in cargo, and when loaded applied for a clearance, which was refused, not having the Port Warden's certificate; the captain then took a clearance for Halifax, N.S., and sailed direct for Newfoundland, and has since arrived there.

I have the honour to be, Sir

Your obedient servant,

H. P. WELSH,  
Port Warden.

RECEIPTS and Expenditure of the Port Warden of Prince Edward Island.

APPENDIX No. 38.

---

REPORT OF THE PORT WARDEN FOR THE PORT OF RIMOUSKI, P.Q.  
FOR THE CALENDAR YEAR ENDED 31<sup>ST</sup> DECEMBER, 1884.

RIMOUSKI, 10th December, 1884.

To the Hon. A. W. McLELAN,  
Minister of Marine and Fisheries,  
Ottawa.

SIR,—I have the honour to submit my Report as Port Warden for the Port of Rimouski. No vessels were examined, and I have collected no moneys.

I have the honour to be, Sir,

Your obedient servant,

ELZÉAR HEPPEL,

*Port Warden.*

APPENDIX No. 39.

STATEMENT showing results of certain Returns respecting Shipping and Discharging of Seamen, received by the Department of Marine and Fisheries in accordance with the provisions of the Act 36 Vic., Chap. 129, from Shipping Masters throughout the Dominion, for the half-years ended 30th June and 31st December, 1884.

## APPENDIX No. 40.

REPORT OF THE MONTREAL HARBOUR POLICE FOR THE FISCAL YEAR  
ENDED 30TH JUNE, 1884.

MONTREAL, 3rd December, 1884.

WILLIAM SMITH, Esq.,  
Deputy Minister of Marine, Ottawa.

SIR,—I have the honour to submit the Annual Report of the Government Harbour Police for the fiscal year ended 30th June, 1884.

As regards the number of persons arrested, there has been a decrease of 41, the total being 871, against 913 last year. A schedule showing the nature of the offences committed is annexed.

It having been found impracticable to give the police protection called for to the shipping visiting the port, and loud and persistent representations having been made to the Department by the merchants and shipowners of the injustice of levying a tax for which no equivalent was given, a further increase to the number of constables was granted in August, when the force consisted of 1 Chief, 3 Sergeants and 34 men, making, with the Inspector, who is also Agent of Marine, 39 all told.

The distance to be patrolled, from above the Wellington Bridge, on the Lachine Canal, to the wharf at Victor Hudon's cotton factory, is over five miles, and, as you are practically aware, the present number cannot give the surveillance demanded and required by the port.

During the present season 22 persons were drowned, and about an equal number rescued from a similar fate.

Permit me to thank you for the support afforded to me in the carrying out of the details of my office, as well as for the valuable information so freely given for my guidance in the performance of my combined duties.

I have the honour to be, Sir,

Your very obedient servant,

H. ST. A. ORMOND,

*Agent Marine, and Inspector Government Harbour Police.*

Return of prisoners arrested by the Government Harbour Police of Montreal for the fiscal year ended 30th June, 1884.

|           | Broaching ship's cargo. | Drunk. | Sailors refusing duty. | Drunk and fighting on the wharves. | Sailors deserting their ships. | Sailors drunk on board. | Sailors drunk and fighting on board. | Sailors placed on board ship. | Drunk and resisting the police. | Assaulting the police. | Sailors threatening their officers. | Cruelty to animals. | Drunk and disorderly on the wharves. | Sailors assaulting their officers. | Crimping. | Suspicion of deserting. | Obstructing on board ship. | Interfering with the police. | Carters impeding on the wharves. | Attempting to commit suicide. | Bathing in the river. | Assault and battery. | Vagrancy. | Passing bad money. | Stowaways. | Protection. | Total. |       |

GEORGE MURPHY,  
Chief G. H. P.

To H. St. A. ORMOND, Esq.,  
Agent Marine and Fisheries, and Inspector of Police.

## APPENDIX No. 41.

REPORT OF THE QUEBEC RIVER POLICE FOR THE CALENDAR YEAR  
ENDED 31st DECEMBER, 1884.

QUEBEC, 10th December, 1884.

WILLIAM SMITH, Esq.,  
Deputy Minister of Marine, Ottawa.

SIR,—I have the honor to submit, for the consideration of the Hon. the Minister of Marine and Fisheries, my seventh Annual Report as Chief of the Government River Police at this port.

On the first of May the force resumed its duties with the following staff, viz:—  
The Chief, who is also Shipping Master, at a salary of \$1,500 per annum for joint offices, with Mr. James Cunningham acting as Deputy Chief, at \$2.40 per day, for the season.

Five coxwains, at \$1.90, and 26 constables, at \$1.50 per diem, and 2 engineers, at \$50 per month.

From the above rate of wages the amount of 25 cents per day was monthly retained as guarantee of their good conduct, and same having proved satisfactory, this amount was paid them at the close of the season's service.

Nothing worthy of the special attention of the Department occurred during the season, which has been an exceptionally quiet one.

I have the honour to be, Sir,

Your most obedient servant,

BENJ. TRUDEL,

*Chief of Government River Police and Shipping Master.*

## APPENDIX No. 42.

LIST of Persons to whom Rewards have been granted by the Government of the Dominion of Canada, from 1st January to 31st December, 1884, for gallant and humane services rendered in Saving Life from Shipwrecked Canadian Vessels, or by British or Foreign Governments for similar services in Saving Life from Shipwrecked British and Foreign Vessels for same period.

# PRELIMINARY REPORT

—ON THE—

# FISHERIES OF CANADA

FOR THE YEAR

1884.

---

Printed by Order of Parliament.

---

OTTAWA:  
PRINTED BY MACLEAN, ROGER, & CO., WELLINGTON STREET.  
1885.

FIRST REPORT  
OF THE  
DEPUTY MINISTER OF FISHERIES,  
FOR THE YEAR 1884.

To the Honourable

ARCHIBALD WOODBURY McLELAN,  
Minister of Marine and Fisheries.

SIR,—I have the honour to submit herewith a preliminary report on the Fisheries Service of the Dominion for the past calendar year, together with statements of official transactions for the fiscal year ending 30th June, 1884.

Owing to the remoteness of several districts and the difficulty of access to others, it is impossible to collect and compile all the returns in time for submission to Parliament on its meeting.

In the Province of Ontario, fishing operations extend to the close of navigation, while in Nova Scotia, New Brunswick and Prince Edward Island, fishermen are actively engaged up to the end of the year. It is, however, expected that the returns will be available in season to admit of a complete report being issued, before the close of the Session.

ORGANIZATION OF THE DEPARTMENT OF FISHERIES.

The Statute 47 Vic., cap. 18, divided what was hitherto known as the Department of Marine and Fisheries into two Departments, to be respectively called the Department of Marine and the Department of Fisheries, over both of which the Minister of Marine and Fisheries, for the time being, shall preside and of which he shall have the management, charge and direction.

On the 1st July 1884, a Deputy Head was appointed, with the title of "Deputy Minister of Fisheries," and the necessary staff of officers allotted from what formerly constituted the Department of Marine and Fisheries.

DUTIES.

The duties of the Department of Fisheries consist principally in the administration of all laws relating to the subject of sea, coast or inland fisheries; the management, regulation and protection thereof, and all matters and things relating thereto or assigned by the Governor in Council to the said Department.

Under this latter head is included the payment of Fishing Bounties, necessitating an enormous amount of labour which could not conveniently and satisfactorily be performed outside the Department.

### PRODUCE OF THE FISHERIES.

The total value of the Fisheries of Canada, for the year 1884, may be approximately stated as follows:—

|                                |              |
|--------------------------------|--------------|
| Nova Scotia . . . . .          | \$8,736,264  |
| New Brunswick . . . . .        | 3,730,453    |
| Quebec (estimated) . . . . .   | 1,800,000    |
| British Columbia do . . . . .  | 1,500,000    |
| Ontario do . . . . .           | 1,000,000    |
| Prince Edward Island . . . . . | 1,086,004    |
|                                | —————        |
| Total                          | \$17,852,721 |

Showing a total value of \$17,852,721, exclusive of Manitoba and the North-West Territories, from which there are yet no returns.

The value for 1883 was given at \$16,958,192. This would probably show an increase of over \$1,000,000, were the yield of Manitoba and the North-West Territories added.

### GENERAL REMARKS.

#### *Nova Scotia.*

From the returns already received, there are good grounds for expecting that the fisheries of this Province will not only maintain the improvement of the last few years but will show a large increase over any former year.

The indications are that, while this improvement will be found to embrace nearly all kinds of fish, it is expected to be most marked in mackerel, cod, herring and lobsters.

The encouragement offered by the bounty has largely increased the number of vessels and boats engaged in the deep-sea and shore fisheries. There will probably be a decreased catch of shad in Nova Scotia, but the falling off which marked the previous year's catch of alewives will be more than compensated by the improved catch of the past year.

Pollock, hake and haddock may possibly fall short, but this is to be attributed more to local causes than to a scarcity of these fish.

#### *New Brunswick.*

From this Province the returns now in would indicate a large increase in the yield of its fisheries.

A most gratifying feature of these returns is the general improvement shown in the salmon fishery, which extends to almost every district in which this fishery is pursued.

Bass, smelt, herring and lobsters will show largely increased catches.

Shad and alewives also share in the general improvement, but the sturgeon fishery will show a large falling off from former years.

In some districts the herring fishery will not be so productive, while in others it will show a largely increased catch. This is no doubt due to the erratic movements of the schools of this fish, which, while never leaving our coasts, change their habitat according to temperature, weather and the location of their favourite food.

#### *Quebec.*

The late date at which the ice left in spring and the stormy weather which almost constantly prevailed in the Gulf during the fishing season of 1884, will cause a considerable decrease in the catch of all kinds of fish.

Herring and lobsters may possibly show a slight increase.

The decrease in the catch of salmon on the south shore in Gaspé and Bonaventure will probably be more than counterbalanced by the increased catch on the north shore.

More interest than usual was taken in the mackerel fishery and considerable outlay was made by local fishermen; but the unfavourable weather doubtless affected the movements of the schools, which did not go to the west of Cape Breton, and the catch made was inconsiderable.

The inland fisheries will probably show a large decrease as compared with the catch of 1883.

This falling off, which was noticeable in almost every kind of fish, is due more to a prevalence of contrary winds and stormy weather than to any scarcity of fish.

All the fishery overseers on the south shore agree upon this point.

On the north shore, especially in the Saguenay division, fishing was not carried on so extensively as heretofore; other industries giving employment to the population.

Above Quebec, and in the interior, the stormy weather being less felt, the yield of the fisheries will be about the same as last year.

#### *Prince Edward Island.*

The stormy and unfavourable weather that prevailed in the Gulf extended also to the Straits, and had the same effect on the Island fisheries.

The returns will probably show a large falling off in all kinds of fish, but will be most marked in mackerel.

The single exception will be the lobster fishery, which, contrary to general expectation, has been good, and the returns will, in all likelihood, show a considerable increase over the very large catch of last year.

The enormous extent to which this fishery has been developed and the constantly increasing number of factories and fishermen have led to much confusion. It will be advisable, in the interest of this fishery, as well as of those engaged in it, to make such amendments in the Fisheries Act as will bring this and all other fisheries under the more effective control of the Department.

#### *Ontario.*

The total value of the fisheries in the Province of Ontario may be fairly estimated at \$1,000,000.

On Lake Superior and Georgian Bay, the individual catches will not much exceed those of last year, but the number of fishermen was larger and the aggregate yield must consequently have increased.

The severe stormy weather which prevailed during the first part of November, greatly interfered with the fishermen's operations by damaging or destroying a large amount of twine and driving the runs of fish off the reefs; but it is expected that, on the whole, the result will be satisfactory.

A large increase in the catch of whitefish is expected on Lakes Erie and Ontario.

The early completion of the Canada Pacific Railway and the settlement of the country north of Lakes Huron and Superior will necessitate the appointment of additional officers to enforce the fishery laws and regulations and protect the valuable fish of these regions.

#### *British Columbia.*

No returns were received from the above named Province in time to be available for this report, but reliable information leads to the conclusion that a considerable increase in the yield will be shown.

A fish hatchery, measuring 100 x 40 feet, was built during last season on the Fraser River. It will easily accommodate 3,000,000 *Quinnat* salmon eggs, or 5,500,000 *Sax-quái* salmon ova. By doubling the trays, double this number of eggs can be laid down. The catching of parent salmon began about the beginning of July, and by the close of the season 3,000,000 eggs were on the trays. The operations, although novel, were highly successful and reflect credit upon the officer in charge, Mr. Thomas Mowat.

#### *Manitoba and the North-West Territories.*

The dates hitherto determined upon as close seasons for whitefish in the Province of Manitoba and the North-West Territories having proved utterly inadequate,

others will have to be substituted so as to afford full and complete protection to this valuable fish during its breeding season.

An Inspector, Mr. Alex. McQueen, of Winnipeg, vested with magisterial powers, has been appointed, as well as a resident Fishery Overseer, Mr. F. C. Gilchrist, of Fort Qu'Appelle, for the Qu'Appelle district and vicinity. The system will be gradually extended, as circumstances may demand, and other officers located at places where most needed.

#### EXPENDITURE.

The total expenditure for the Fishery Service during the financial year ending 30th June, 1884, amounted to \$116,531.66, as follows:—

|  |             |
|--|-------------|
| General service.....   | \$69,011 06 |
| Fish breeding.....   | 27,585 07   |
| Maintenance of fisheries protection steamer, "La<br>Canadienne"..... | 19,935 53   |

This expenditure is sub-divided as follows:—

#### *Nova Scotia.*

|  |                   |
|--|-------------------|
| Fishery officers' salaries and disbursements.. | \$15,600 01       |
| Fish-breeding .....                            | 4,728 11          |
|  | ————— \$20,328 12 |

#### *New Brunswick.*

|  |                 |
|--|-----------------|
| Fishery officers' salaries and disbursements.. | \$14,388 02     |
| Fish-breeding .....                            | 2,327 06        |
|  | ————— 16,715 08 |

#### *Quebec.*

|  |                 |
|--|-----------------|
| Fishery officers' salaries and disbursements.. | \$13,186 26     |
| Fish-breeding.....                             | 8,512 11        |
|  | ————— 21,698 37 |

#### *Prince Edward Island.*

|  |                |
|--|----------------|
| Fishery officers' salaries and disbursements.. | \$2,767 98     |
| Fish-breeding.....                             | 771 40         |
|  | ————— 3,539 38 |

#### *British Columbia.*

|  |                |
|--|----------------|
| Fishery officer's salaries and disbursements.. | \$2,231 97     |
| Building Fish Hatchery.....                    | 3,704 31       |
|  | ————— 5,936 28 |

*Ontario.*

|  |             |                 |
|--|-------------|-----------------|
| Fishery officers' salaries and disbursements.. | \$15,192 73 |                 |
| Fish-breeding .....                            | 8,011 17    |                 |
|  |             | ————— 23,203 90 |

*Manitoba.*

|  |           |
|--|-----------|
| Fishery officers' salaries and disbursements.....  | 872 40    |
| Fisheries protection vessel " La Canadienne "..... | 19,935 53 |

*Miscellaneous.*

|  |            |                |
|--|------------|----------------|
| Legal and incidental expenses.....           | \$1,003 72 |                |
| Advertising .....                            | 63 66      |                |
| Fish-breeding, salary of Superintendent..... | 1,999 96   |                |
| do building fishways, &c.....                | 1,235 26   |                |
|  |            | ————— 4,302 60 |

Total..... \$116,531 66

The expenses incurred for fish culture are also sub-divided as follows, among eleven fish hatcheries :—

*Ontario.*

|                |            |                  |
|----------------|------------|------------------|
| Newcastle..... | \$4,985 05 |                  |
| Sandwich ..... | 3,026 12   |                  |
|                |            | ————— \$8,011 17 |

*Quebec.*

|   |            |                |
|---|------------|----------------|
| Tadoussac.....                          | \$2,232 25 |                |
| Gaspé Basin.....                        | 1,932 43   |                |
| Magog.....                              | 2,009 32   |                |
| Ristigouche (Quebec and New Brunswick). | 2,338 11   |                |
|   |            | ————— 8,512 11 |

## RECEIPTS.

The collections made during the fiscal year are arranged under the following heads:—

*Ontario.*

Rents, license fees and fines..... \$11,345 14

*New-Brunswick.*

Rents, taxes on nets, and fines..... 3,905 66

*Quebec.*

Rents, license fees and fines.. ..... 2,715 02

*Nova Scotia.*

Fishery licenses and fines..... 1,833 18

*British Columbia.*

Salmon fishery licenses..... 127 50

*Prince Edward Island.*

License fees..... 80 00

20,006 50

## LICENSES ISSUED.

The number of fishery licenses issued during the season of 1884 is as follows:—

*Ontario.*

|                               |       |       |
|-------------------------------|-------|-------|
| Gill-net license.....         | 472   |       |
| Hoop-net do .....             | 75    |       |
| Pound-net do .....            | 111   |       |
| Seine do .....                | 304   |       |
| Angling permits.....          | 1,909 |       |
| Spearing licenses.....        | 72    |       |
| Dip-nets and night lines..... | 46    |       |
|                               |       | 2,989 |

| <i>Quebec.</i>                   |       |       |
|----------------------------------|-------|-------|
| Salmon-net fishing licenses..... |       | 367   |
| Brush-weir do .....              |       | 45    |

|                                  | ————— | 6,195 |
| Total.....                       |       | 6,195 |

FISH-BREEDING.

Twelve establishments for the artificial propagation of fish are now in actual operation in the several Provinces of the Dominion of Canada. These are at the present time largely filled with fish eggs, collected at various points throughout Canada during the spawning season of 1884. The Fraser River hatchery, in British Columbia, was only completed in time to receive the crop of eggs gathered in the fall of 1884, consequently returns of the distribution of fish will be given from the eleven other nurseries that were constructed previous to the season of 1884.

The total number of young fish of various kinds hatched and distributed from these eleven fish-breeding institutions, in 1884, amounted to 53,143,000, and the total quantity of fish eggs laid down in all the hatcheries during the fall of 1884 was 66,033,000.

The particular numbers and descriptions of young fish bred in each of the nurseries in the several Provinces during the season or spring of 1884, were as follows:—

|   |            |               |
|---|------------|---------------|
| Newcastle hatchery, Ontario.....          | 5,150,000  | Salmon Trout. |
| do do do .....                            | 50,000     | Speckled "    |

| Total fish-eggs of all kinds.....                  |           | 66,033,000 |

These are divided by species as follows:—

|   |            |
|---|------------|
| Salmon, <i>Salmo Salar</i> .....              | 5,983,000  |
| do <i>Salmo Quinnat</i> .....                 | 3,000,000  |
| Salmon Trout, <i>Salmo Namaycush</i> .....    | 4,000,000  |
| Speckled Trout, <i>Salmo Fontinalis</i> ..... | 50,000     |
| Whitefish, <i>Coregonus Albus</i> .....       | 53,000,000 |
| Grand total.....                              | 66,033,000 |

Full details of the operations at the several fish-breeding establishments in the Dominion, as also the returns from the several officers in charge of the hatcheries will be given in the general report now in course of preparation.

#### FISHING BOUNTIES.

The total number of Bounty Claims received in 1883 was 13,604. Of this number, 523 were rejected for non-compliance with the requirements of the law and instructions.

The total number of Claims paid during the above named year was 13,081; an increase of 1,109 over the year 1882.

The total amount of Bounties paid to vessels and boats was \$130,227.35.

The number of Vessels claiming the bounty was 902, with a tonnage of 34,549 tons, as against 116 vessels, with a tonnage of 6,938 tons, in 1882.

This large increase is chiefly made up in the Province of Nova Scotia and was the means of distributing among the owners and crews of that Province a sum of \$10,000 in excess of the previous year.

The number of Boats which received the bounty was 12,272, as against 11,225 in 1882; an increase of 1,047 boats.

Owing to the inadequacy of the grant, it was found impossible to continue the system of doubling the rate, inaugurated in 1882, and the former rate of \$2.50 per man had to be adhered to.

Full details showing the amounts paid to Vessels and Boats in each Province are given at pages 54 and following, of this report.

For the better information and guidance of fishermen claiming Bounty for the year 1884, and others engaged in the transmission of claims and the distribution of the money, the following circular was distributed amongst claimants :—

### FISHING BOUNTIES, 1884.

#### INSTRUCTIONS TO CLAIMANTS.

##### *Boats.*

1. Claimants to fishing bounty must have been engaged at least three months in sea-fishing, exclusive of Salmon, shad, lobster and other fish and fisheries exempted from the operation of the Washington Treaty, and have caught not less than 2,500 pounds of sea-fish per man;
2. No bounty will be paid to boats measuring less than 14 feet keel, and not more than three men (the owner included) will be allowed as claimants in boats under 20 feet;
3. Dates and localities of fishing must be stated in the claim, as well as the quantity and kinds of sea-fish caught;
4. Ages of men must be given;
5. Returns must be sworn to as true and correct in all their particulars;
6. Only one claim will be allowed in each season, even though the claimant may have fished in two vessels, or in a vessel and a boat, or in two boats. Any person or persons detected making false returns will be debarred from participation in the bounty;
7. Claims must be filed on or before the 31st December;
8. Customs officers and fishery overseers will supply the requisite blanks free of charge, and after certifying the same, will transmit them to the Department of Fisheries.

##### *Vessels.*

9. Canadian registered vessels of 10 tons and upwards (up to 80 tons) which have been engaged during a period of three months in the catch of sea-fish not exempted under the Washington Treaty, are entitled to a bounty of \$2 per ton, one-half of which is payable to the owner or owners, and the other half to the crew;
10. Owners of vessels may, after the present season, and before proceeding on a fishing voyage, be required to procure a license from the nearest Collector of Customs who will, subsequently, grant a certificate stating that all the requirements of the Statute have been complied with, and upon this certificate being filed with the claim, the bounty will be paid;
11. Directions contained in paragraphs 3, 4, 5, 6, 7 and 8 apply to vessels as well as to boats.

#### APPENDIX B

Contains the report and expenditure in connection with the International Fisheries Exhibition, held in London in 1883, the result of which, as regards the Canadian Exhibit, cannot but be most gratifying to every Canadian.

Many of the most valuable specimens, which had been obtained at much trouble and cost, were brought back to Canada on the close of the Exhibition. The idea was suggested that they should be arranged at Ottawa as a permanent Exhibit, the

---

collection containing specimens of almost every fish that is found in Canadian waters. This was done, and the specimens arranged in the lower part of a building on O'Connor Street, known as the Victoria Hall, making a most interesting and instructive Exhibit.

Several thousand persons have visited the collection since it was opened to the public in March last and have expressed great satisfaction therewith, and it is considered as affording much valuable information as to our Fish and Fisheries.

It is proposed to replenish the collection from time to time, and to this end an appropriation will be asked from Parliament, with a view to making the Canadian Fisheries Exhibit one of the permanent objects of interest at the Capital.

I have the honour to be, Sir,

Your obedient servant,

JOHN TILTON,  
*Deputy Minister of Fisheries.*

DEPARTMENT OF FISHERIES,

OTTAWA, 31st December, 1884.

## APPENDIX A.

STATEMENT of Fines imposed and moieties thereof received by the Department of Fisheries, for violations of the Fisheries Act and Regulations, during the Year 1884.

| Names.                    | Nature and Place of Offence.                                  | Amount of Pen- | Amount received | Remarks.   |

OTTAWA, 24th November 1884.

SIR,—I have the honour to submit a report of Canada's exhibit at the International Fisheries Exhibition, held in London, in 1883, compiled from the reports of the Board of Managers—Messrs. Wilmot, Jones and Honeyman—together with a detailed statement of the expenditure incurred in connection with such exhibit.

I have the honour to be, Sir,

Your obedient servant,

W. D. DIMOCK,

*Secretary.*

The Hon. A. W. McLELAN,

Minister of Marine and Fisheries,

Ottawa.

## APPENDIX B.

## CANADA

—AT THE—

## International Fisheries Exhibition.

The question of an International Fisheries Exhibition had been for some time before the minds of many of the leading and enterprising men of Great Britain. It took a definite and practical shape at a meeting called in the month of July, 1881, under the presidency of the Marquis of Exeter, "to fully discuss the holding of such an exhibition." Great enthusiasm was displayed by the nobility and gentry in this preliminary work. At a general assembly, presided over by H. R. H. the Prince of Wales, held on the 27th of February, 1882, it was finally decided that such an exhibition as proposed should be held. After an introductory speech by H. R. H. the Prince of Wales, it was moved by H. R. H. the Duke of Edinburgh, and carried amid applause: "That seeing the ever increasing importance of the fishing industry throughout the world, an International Fishery Exhibition should be held in London in 1883, under the patronage of Her Majesty the Queen, and the presidency of H. R. H. the Prince of Wales." This proposition was heartily endorsed by all present, and supported by approving speeches, especially by Sir A. T. Galt, G. C. M. G., High Commissioner of Canada, in London.

It was soon announced that Her Most Gracious Majesty the Queen had graciously consented to become the Patron of the Exhibition, H. R. H. the Prince of Wales the President and the Dukes of Edinburgh, Connaught and Albany were to be among the Vice-Presidents. Among the Vice-Presidents were also many of the noble and illustrious names in Great Britain and the Colonies. Canada being represented by the Right Hon. Sir John A. Macdonald, K. C. B., Premier of Canada, and Sir Alexander T. Galt, G. C. M. G., High Commissioner, and latterly by Sir Charles Tupper, K. C. M. G., High Commissioner.

The principal exhibits to be admitted were comprised in certain classifications, which were intended to include all specimens and kinds of fish life, and to illustrate all modes by which the marine and fresh water animals of economic value were captured and utilized, together with the commercial, social, scientific, historic and legislative aspects of such fisheries. To show the comprehensive scope of this great exhibition, the prospectus is herewith annexed:—

## CLASSIFICATION.

### CLASS I.—FISHING.

#### *Sea Fishing.*

#### Section I.

1. Gear of every description and of all nations used in trawl, herring, long line, hand line, and every other mode or system of fishing, including all nets, lines, hooks, harpoons, tackle, &c., employed in the same.
2. Oyster dredges, crab, lobster, prawn, &c., pots, and other appliances for catching fish of this description.
3. Fishing craft of all nations; models and representations of the same.
  - i. Steam fishing vessels and steam carriers.
  - ii. Fishing vessels and boats other than steam vessels.
4. Ropes and canvas suitable to fishing vessels.
5. Steam capstans, compasses, barometers, telescopes, lights, lamps, fog-horns, systems of signaling at night for fishing fleets and vessels, electric lights, luminous paint, and other equipment of fishing vessels, charts for fishermen.
6. Models of harbours, piers and slips, for fishing purposes.
7. Fishing tackle and netting in different stages of preparation, and machinery used for working up the raw material.
8. Life-boats, their equipment, and life-saving apparatus of every description.
9. Appliances and methods for breaking the force of the sea at the entrance of harbours and elsewhere.
10. Methods of communication from the shore to light-ships and fishing fleets by submarine cables.
11. Methods of protecting submarine cables from injury by fishing operations (illustrated by models and drawings).

#### *Fresh Water Fishing.*

#### Section II.

1. Salmon nets and fixed appliances for catching salmonidæ in all their varieties.
2. Salmon rods, reels, lines, artificial flies and baits, gaffs, spears, creels, &c.
3. Trout rods, reels, landing nets, lines, artificial flies, baits, baskets, bags, &c.
4. Pike, barbel and other coarse fish-rods, reels and tackle, artificial spinning baits, &c.
5. Traps, nets, bucks, wheels, and all kinds of apparatus for catching eels, lampreys, &c.
6. Hooks, &c.
7. Anglers' apparel of every description.
8. Boats, punts, cobsles, collapsible, portable, &c., in models or otherwise.

NOTE.—The above classification is suggested as a convenient one for this class, but it is not intended to exclude any objects which come within the class.

### CLASS II.—ECONOMIC CONDITION OF FISHERMEN.

1. Apparel and personal equipment.
2. Food and medicine chests.
3. Models and plans of dwellings.
4. Contracts of partnerships; insurances of life, boats, gear, &c., benefit societies.

### CLASS III.—COMMERCIAL AND ECONOMIC.

1. Preparation, preservation, and utilization of fish.
  - (a) For edible purposes—
    - i. Models of fish-curing establishments. Methods of, and models and other representations of any appliances for drying, curing, salting, smoking, tinning, cooking, &c.

- ii. Fish dried, smoked, cured, salted, tinned, or otherwise prepared for food.
- iii. All products prepared from fish, such as oils, roes, isinglass, &c.
- iv. Antiseptics suitable for preserving fish for food.
- (b) For other than edible purposes—
  - i. Oils, manures, and other products prepared from fish.
  - ii. Methods of, and models and other representations of appliances for, preparing oils and manures from fish.
  - iii. Sea and fresh water pearl shells; mother of pearl manufactured; pearls sorted.
  - iv. Preparation and application of sponges, corals, pearls, shells, and all parts and products of aquatic animals, &c., to purposes useful and ornamental, with specimens.
- 2. Transport and sale of fish.
  - (a) Appliances for carrying fish and for preserving fish during transport or otherwise, and models of the same.
  - (b) Models of fish markets, and appliances connected with the same.

#### CLASS IV.—FISH CULTURE.

- 1. Models or drawings of fish-hatching, breeding and rearing establishments, including oyster and other shell-fish grounds; and all apparatus and implements connected with the same, and for transporting fish and fish ova. Food for fry.
- 2. Representations illustrative of the development and progressive growth of fish.
- 3. Models and drawings of fish-passes and fish-ladders.
- 4. Scientific investigation.
  - i. Models and drawings of diseases of fish, with special reference to their origin and cure.
  - ii. Processes for rendering streams polluted by sewage and chemical or other works innocuous to fish life (illustrated by models and drawings).
  - iii. Physico-chemical investigation into those qualities of salt and fresh water which affect aquatic animals; investigation of the bottom of the sea and of lakes, shown by samples; aquatic plants in relation to fishing, &c.; researches into the aquatic fauna (animals of the several classes preserved in alcohol or prepared, &c.); apparatus and implements used in such researches.
- 5. Acclimatisation of fish.

#### CLASS V.—NATURAL HISTORY.

##### [*Aquaria.*]

- 1. Specimens, living (marine and fresh water), fresh, stuffed or preserved, casts, drawings and representations of—
  - (a) Algæ arranged according to their various species and localities.
  - (b) Sponges, in their natural state.
  - (c) Corals, in their natural state, polyps, jelly-fish, &c.
  - (d) Entozoa.
  - (e) Mollusca of all kinds and shells not included in class 3.
  - (f) Starfishes, sea urchins, holothuriæ.
  - (g) Worms used for bait, or noxious; leeches, &c.
  - (h) Perfect insects and larvæ of insects, which are destroyers of spawn or serve as food for fish.
  - (i) Crustacea of all kinds.
  - (k) Fish of all kinds.
  - (l) Reptiles, such as tortoises, turtles, terrapins, lizards, serpents, frogs, newts, &c.

- (m) Aquatic and other birds hostile to fish or fishing.  
 (n) Aquatic and amphibious mammalia (otters, seals, whales, &c.), and others detrimental to fish.
2. Works on ichthyology. Maps illustrating geographical distribution, migration &c., of fishes and spawn.
  3. Specimens and representations illustrative of the relations between extinct and existing fishes.

**CLASS VI.—HISTORY AND LITERATURE OF FISHING—FISHERY LAWS—FISH COMMERCE.**

1. Ancient fishing implements, or their reproductions, models, pictures, books, emblems, charters and seals of ancient fishermen guilds.
2. Fishery laws of different countries.
3. Copies of treaties, conventions, &c., dealing with International fishery relations.
4. Reports, statistics and literature of fish, fishing and fisheries.
5. Reports on acclimatisation of fish, and of attempts in this direction.

**CLASS VII.—LOAN COLLECTIONS.**

Collections within the scope of the foregoing classes.

Foreign nations and all the colonial dependencies of Great Britain were immediately asked to co-operate in this great work, and to give all assistance possible, by contributions or otherwise, to make the International Fisheries Exhibition a success and redound with something of practical utility to all concerned. The Dominion Government readily granted £500 to the prize list fund and through the Premier, who was in England while certain of the preliminary work was going on, promised to take as active a part in the exhibition and be present with as representative a display of the fisheries resources of the country as the short time for collecting and preparing the specimens would permit. The Parliament of Canada, when the matter was brought before it and the object and aims of the exhibition explained, immediately voted the necessary appropriation to enter upon the work.

The exhibit contemplated naturally came under the supervision of the Department of Marine and Fisheries and the Minister, the Hon. A. W. McLellan, at once took active measures to carry out the wish of Parliament to have a creditable representation of the fishing resources of the Dominion. He called to his aid the fisheries inspectors of the different Provinces and others, and gave the direction of the work largely into the hands of Samuel Wilmot, Esq., Superintendent of Pisciculture in Canada. The Provinces were to supply whatever specimens were peculiar to each, bearing upon the contemplated exhibition, and the work of collecting was chiefly performed by the following:—

- Nova Scotia, W. H. Rogers, Esq., and Dr. Honeyman.  
 New Brunswick, W. H. Venning, Esq.  
 Prince Edward Island, J. H. Duvar, Esq.  
 Quebec, J. U. Gregory, Esq.  
 Ontario, S. Wilmot, Esq.  
 British Columbia, A. C. Anderson, Esq.

The work of these officers was indefatigable and highly creditable to one and all. Every suggestion for the success of the work was readily taken up and prosecuted with most praiseworthy vigor. Most valuable assistance came in from other sources, but as a general thing the whole onus of the work had to be borne by the Minister and the officers mentioned. Much credit is due to Hon. P. Fortin, who rendered valuable aid in obtaining specimens that exemplified the variety and great value of our deep-sea fisheries, and also the methods by which most of our economic and commercial fishes are taken. The Department is also indebted to Dr. Dawson, President of McGill University, for valuable specimens of marine invertebrate animals; to Robt. Morrow, Esq., Halifax, for five skeletons of the angler (*Copias*

*piscatorius*), cod and other fishes; and to Wm. Saunders, Esq., President of the Ontario Entomological Society, for forty cases of "insects and larvæ of insects, which are destroyers of spawn or become food for fish."

The nature of the exhibition, its aim and object, were advertised throughout the Dominion as generally and as freely as possible. Circulars were sent, not only to the fisheries officers, but to the Provincial Governments and to those in responsible and permanent positions, who, it was thought, would take an interest in having Canada thoroughly represented in London. A great drawback in the matter of getting together a large collection of representative specimens was, not only the shortness of time for the work, but also the want of some institution or national museum from which collections of fish specimens could at once be obtained. With the exception of the few specimens most kindly loaned by the Ontario Entomological Society, by Laval University, Quebec, by the Provincial Museum, Nova Scotia, and by the Prince Edward Island Government, the collection sent to London, as representative of our fisheries, had to be obtained by constant labour, and from new channels, by those to whom the work was entrusted. In this respect we were placed at a great disadvantage in comparison with our fellow competitors in the neighbouring Republic, who had the almost inexhaustible resources of the celebrated Smithsonian Institute and other national museums from which to draw the specimens required for their purpose. At similar future exhibitions we will not be so unprepared, as the specimens now in hand, that have been returned from London, will make a creditable nucleus for a museum in this branch of natural history. This new and unusual work was, therefore, accomplished with a greater expenditure than if the materials had been already in hand, or if a longer time and a more favorable season of the year had been given for operations.

After the work of collecting had been about finished, a careful inspection of the specimens, as far as possible, was made, and they were ordered to Halifax, to be shipped by the SS. "Newfield," for London direct. The specimens so carefully prepared by J. H. Duvar, Esq., Inspector of Fisheries, of Prince Edward Island, were greatly injured by their long confinement in the "Northern Light," which steamer, with the Island specimens aboard, was caught and held in the ice off Georgetown for some ten weeks. The SS. "Newfield," Captain Guildford, sailed from Halifax on the 5th of April, with some 500 tons of specimens and material, and arrived safely in London on the 19th of the same month. The specimens bearing upon the fisheries of our Pacific coast were a most interesting collection, and were obtained through the indefatigable exertions of the late A. C. Anderson, Esq., Inspector of Fisheries for British Columbia, though valuable assistance was given by the salmon packers of the Province and others. His Excellency the Marquis of Lorne also contributed rare specimens of barnacles and a large chiton collected by himself in that Province. All these specimens were forwarded by the ship "Latona," which sailed from Victoria on the 19th of December, 1882, and arrived in the Thames on the 12th of May following. These very fine specimens were considerably injured by the six months' sea voyage, and on this account did not show the great fishing industries of our Western Provinces to as good advantage as was intended by the inspector when he made his careful collection.

The *personnel* of the staff representing Canada at the exhibition consisted of the following:—

#### ADVISORY COMMISSIONERS.

Hon. A. W. McLelan, Minister of Marine and Fisheries.

Hon. Hugh Nelson.

Sir Charles Tupper, K.C.M.G., C.B., &c., &c.

Sir Alex. T. Galt, G.C.M.G., &c.

Sir Philip Cunliffe-Owen, K.C.M.G., C.B., C.T.E., &c.

Henry Coppinger Beeton, Esq.

## BOARD OF MANAGERS.

Samuel Wilmot, Esq.  
 Prof. Honeyman, D.C.L., F.R.S.C., &c.  
 L. Z. Joncas, Esq.

## JOINT SECRETARIES.

W. D. Dimmock, Esq., B.A.  
 J. G. Colmer, Esq.

Those of the staff who first arrived in London immediately commenced to unpack the specimens and arrange them in position for the grand opening which was to take place on the 12th of May. A most eligible pavilion had been chosen for the display of the exhibits from Canada through the then High Commissioner, Sir Alex. T. Galt. The Canadian court, containing 10,000 square feet of floor room, with wall space the full height of the building, was situated in the western part of the centre gallery, running parallel to the United States court, from which it was separated by a narrow aisle. Adjoining the annexe was a small pond, afterwards utilized for our boats and canoes, beyond which was a terrace, with handsome shade trees, where was erected the birch-bark wigwam of our Milicete Indian, surrounded with the rude appliances for the capture of fish, as used by the Indians in this country.

The Executive Committee of the Fisheries Exhibition handed over to the respective nations their courts finished, but without decoration or ornamentation. The generous rivalry of the different exhibitors was apparent in the manner in which the courts were decorated. Canada was at very considerable expense to get up its department neatly and tastefully, and to decorate it in a manner becoming the position she expected to take. The issue showed that the expense incurred in this respect was necessary, and the general appearance of the court was most favourably commented upon by hundred of thousands of visitors during the six months the exhibition was open. The following memorandum, taken from the fourth edition of the *Official Catalogue*, issued by the Executive Committee, will give some faint idea of the general appearance of the court, after the very laborious work of unpacking and locating the specimens had been finished:—

“The collection of specimens from the Province of Prince Edward Island was unfortunately detained in the Government steamer ‘Northern Light,’ from the 9th of January until the 20th of March, and was much injured by this delay, and cannot therefore be exhibited in the condition in which it was shipped. The long voyage of the ship ‘Latona,’ around Cape Horn, from Victoria, from the 19th of December until the 12th of May, with the British Columbia specimens, has greatly injured also the exhibit of that distant Province of Canada.

“With few exceptions the specimens from Canada are shown and owned by the Dominion Government.

“In the centre of the Canadian court is erected a large trophy, representing the economic and commercial products of the fisheries of Canada.

“The form of the trophy is circular, with a base of 24 feet diameter, and a superstructure of 54 feet in height. The lower platform contains salted, cured and pickled fish of various kinds, as sent to the markets of the world. Pyramids of original packages and cans of salmon, lobsters, mackerel and other fish, are here shown as put up for export trade from British Columbia and the Atlantic Provinces. Above these are suspended in circular form smoked salmon, dried cod and other fish; with a large circle above hung with native lobsters in their natural and preserved state, surmounted again by more pyramids of canned goods and mounted fishes. Following up the structure is seen a stuffed beaver, the national emblem of Canada, upon whose back rests the great shield of Canada emblazoned with the insignia of the several Provinces of the Dominion, and encircled by another emblem, the maple leaf of Canada. Projecting outwards from this are representative illustrations of fishing implements, interwoven with nets, bunting, &c. Following upwards is the large blue banner with ‘Canada’ upon it, and the cross fishes, on the summit is the Crown of England.

"There is also in the inner part of the court a scientific trophy, containing illustrative specimens of marine mammals, fishes in alcohol, mollusca and crustacea."

Besides the specimens forwarded by the Government, and the few loaned by public institutions or private parties in Canada, quite an addition was made to the general exhibit by the agents of certain Canadian firms, resident in London. In this connection were thankfully received a large supplement to the Government exhibit of tinned fish of various kinds. Messrs. H. C. Breton & Co., of 36 Finsbury Circus, London, agents for some of the largest and best known canneries in British Columbia, filled two or more large glass cases with pyramidal heaps of canned salmon. Their exhibit was exceedingly well arranged, and attracted much attention. Henry Howard, Esq., 21 Lime street, London, agent for many brands of preserved lobsters from our Maritime Provinces and also for the celebrated Golden Crown Packing Company, Halifax, N.S., arranged a very large display of canned goods in such a manner that it was one of the most attractive features in the court. Both of these exhibits were awarded medals at the close of the exhibition.

Recognition is also here made of the kindness of friends of Canada in England, who loaned any exhibits for the decoration or improvement of the court. Lieut.-Gen. Hardy, R A., a few years ago stationed at Halifax, now of Tonbridge, London, G.B., kindly loaned a miniature beaver house of most unique construction, and three or four oil paintings, his own work, representing fish-spearing by the Indians, and similar subjects, on one of the rivers of the Atlantic slope of the Province of Nova Scotia. M. A. Burrous, of Summer Hill, Ulverston, Lancashire, formerly of Port Rowan, Ontario, placed in the court a handsome model of a Canadian log house, situated on property owned by him four or five miles from Port Rowan, Long Point Bay, Lake Erie. It gave strangers a most favourable idea of the "log house" home of the early settlers of Canada. Messrs. H. C. Beeton & Co. also loaned a fine collection of photographic views of cities, towns, villages and magnificent natural scenery of the Province of British Columbia.

The ceremonies of the opening of the Exhibition on the 12th of May were carried out on a scale worthy of the illustrious Prince who, surrounded by nearly all the Royal Family, in Her Majesty's name, declared the Fisheries Exhibition open, and worthy of the place and occasion that had called so many distinguished personages together. Nearly 50,000 people were admitted by ticket on the opening day. The opening was attended by nearly all the members of the Royal Family, the ambassadors of foreign countries resident in London, the members of the British Cabinet, the Executive Committee of the exhibition, the foreign and colonial commissioners, and a large representation from the nobility and gentry of Great Britain. When the Prince of Wales and suite had taken their places, the Duke of Richmond and Gordon, President of the General Committee, read the following address:—

**MAY IT PLEASE YOUR ROYAL HIGHNESS:**

"The purpose of the International Fisheries Exhibition, which Your Royal Highness is graciously pleased to open this day, on behalf of Her Majesty the Queen is to illustrate the present and past condition of one of the most ancient, extensive and important of industries, and to promote that careful collection and discussion of facts, by means of which alone we can hope to deal in a satisfactory manner with the many difficult, practical and scientific problems connected with fish and fisheries. These buildings, which, large as they are, have proved hardly adequate to contain the vast contributions which have poured in upon us, are stored with the animal productions of the seas and rivers of the habitable globe, and with the multitudinous contrivances devised by human ingenuity for their capture. Every article of commerce yielded by fisheries is represented, and the agencies by which these articles are transported, distributed and prepared for our use, are exemplified. On our premises the consumer may not only become acquainted with the organization of a h market, but may form a judgement, based on practical examination, of the vast possibilities open to judicious fish cookery. The various modes of preserving and

multiplying aquatic animals, which come under the designation of fish culture, will be seen in action; while those who are interested in fishery law and in the history of fishing, will find that the subject of their studies has not been neglected.

"It has been our special aim to direct the attention of the public at large to the perils and hardships necessarily connected with the mode of life of those sea fishermen, by whose labours they profit so largely; and we are not without hope that the creation of a general interest in their affairs may have a favourable influence on the condition of the fishing population. The melancholy loss of life suffered by sea-faring people may certainly be diminished by the use of life-saving apparatus. The unprecedentedly large prize which we have offered for the best life-boat has stimulated the ingenuity of inventors, and we are able to afford the public the opportunity of examining an unequalled collection of life-boats and of life saving apparatus. It is obviously undesirable that the many experts who will be present during the exhibition, should go away without being afforded the opportunity of exchanging views on the complicated and disputed questions which arise in connection with fish and fisheries; and we therefore propose that an International Fisheries Congress, for the discussion of such matters, shall be held during the exhibition. It would have been impossible for us to have got together anything comparable to the great mass of objects illustrative of fisheries which we are able to exhibit, without the countenance which has been afforded to us by Her Majesty's Government; and without the generous spirit in which our applications for aid, supported by the Foreign and Colonial Offices, have been met by the Government of foreign nations and those of our own colonies. The contributions to the exhibition derived from these sources, must be seen and studied, if their magnitude and importance are to be properly appreciated. We desire to take this earliest public opportunity of offering our thanks to the respective Governments, and to their able and zealous representatives in charge of the vast and available collections which have been entrusted to our care. Our thanks are also due to those Colonial Governments, public bodies and private supporters, who have not only made munificent donations to the general funds of the exhibition, but also, following the precedent of the exhibitions of 1851 and 1862, have become guarantors to a large amount and have thereby enabled us to carry out our undertaking. Finally, Sir, permit me to make our grateful acknowledgment to yourself, and to your Royal Brother, the Duke of Edinburgh, for the unwearied interest which Your Royal Highnesses have taken in our work; and we desire to offer our especial thanks for the very powerful and effective support which Your Royal Highness has, from the first, been pleased to give to an undertaking which, we trust, may not only promote the interests of fisheries, of fishermen, and of fish consumers, but may also confer a lasting benefit on the sea-faring population all over the world."

To this Address His Royal Highness responded as follows:—

*"My Lord Duke, my Lords and Gentlemen :*

"It gives me great pleasure to open this International Fisheries Exhibition on behalf of the Queen, although I feel assured that it is a matter of sincere regret to all present that Her Majesty finds herself unable to undertake a duty which it would have afforded her much gratification to have performed. In view of the rapid increase of the population in all civilized countries, and especially in these sea-girt kingdoms, a profound interest attaches to every industry which affects the supply of food; and in this respect the harvest of the sea is hardly less important than that of the land. I share your hope that the exhibition, now about to open, may afford the means of enabling practical fishermen to acquaint themselves with the latest improvements which have been made in their craft in all parts of the world: so that, without needless destruction, or avoidable waste of any kind, mankind may derive the fullest possible advantage from the bounty of the waters. I am glad that your attention has been directed to the condition of the fishing population. It is a subject in which my brother, the Duke of Edinburgh, was led to take a particular interest during his tenure of office as Admiral Superintendent of the Naval Reserve; and as he is compelled to be absent during the sittings of the Congress to which you allude, I shall

have the pleasure of reading a paper on this topic, which he has prepared, at the first meeting. Life-boats and life-saving apparatus undoubtedly fall strictly within the province of a fishery exhibition: but I may congratulate you on the circumstance that, without overstepping your proper limits, you have been able to confer a benefit, not only on all fishermen and all sailors by profession, but also on all who travel by sea; and in these days of rapid and extensive locomotion, this means a large proportion of civilized mankind.

"On behalf of the Queen, I add my thanks to those which you tender to the Governments of foreign nations, and of our own colonies, for their coöperation; and to their representatives, whose untiring exertions you so justly acknowledge, I offer not only thanks, but an English welcome."

In the evening of the same day, at a grand banquet which was given by the Fish-monger's Guild of London, to commemorate the opening, His Royal Highness the Prince of Wales said, in replying to "the success of the Great International Fisheries Exhibition," when referring to the exhibit from this country: "The Canadian exhibit was specially remarkable and the products surpassed that of other countries." This expression of opinion from so illustrious a source, almost at the inception of the show, was exceedingly encouraging, and inspired confidence in those who had in hand the mounting and arrangement of the specimens. The Official Guide Book, issued by the authority of the executive committee of the exhibition, referring to the Canadian and United States courts, said: "These two great displays lie conjointly off the centre gallery, balancing the space occupied by Sweden and Norway, on the ground plan; and they afford, together or separately, piscatorial information of the highest character. For completeness of representation it is difficult to award the palm between them." That the appearance of the Canadian court at this Exhibition, when all the specimens had been placed in position and named, was unique and brought out most practically the objects of the exhibition, can be readily seen by reference to the following extracts from English newspapers of the time.

"The Canadian court is one to which Englishmen may turn with a feeling of satisfaction, for it is a collection exemplifying the race characteristics that make Englishmen, Scotchmen and Irishmen good colonists. The sea fisheries of the Dominion of Canada, in their commercial and industrial aspect, receive various illustrations in the portions of the collection arranged under the care of L. Z. Joncas, one of the commissioners. The methods of artificial hatching are shown by the exhibits brought over in charge of Mr. Wilmot, whilst scientific preparations of great interest to the naturalists have been contributed by Dr. Honeyman. Canadian fishermen do much more than supply the demand of their home population, and there are to be seen here both the methods of preparing fish for export and models of a class of vessels specially built to carry this fish to Spain, Portugal, Italy and other countries. In one of the cases will be seen a breakfast delicacy not unknown to epicures in this country, the bright golden Digby Chicken, a small smoked herring prepared in Nova Scotia. At the end of the court are some very cleverly stuffed and mounted birds that live on or eat fish. Among the four-footed enemies of fish there are shown the otter, mink, muskrat, &c., and around the walls is a remarkably fine collection of stuffed fish. These are only a few of the very many objects illustrating the natural history of the subject, and the commercial and industrial bearings. There are, for example, samples of fish oils used in medicine, for leather dressing and other purposes; there are specimens and models of the hooks, lines, nets, baits and gear used in the several fisheries, and fully fitted up boats; refrigerators in which may be seen, still fresh and in perfect condition, fishes that have been frozen since June, 1882.—London *Times*, 17th May, 1883.

"Separated from the United States by a narrow corridor is the court which exhibits the fishing resources of the Dominion of Canada. To a peculiar degree the exhibits speak for themselves to even an ordinary visitor. There are 250 admirably set up specimens of fresh water fish. The natural history specimens, which begin with the lowest form of animal life and take us through the complete range of birds, beast and fishes, are arranged in scientific order and with elaborate care. The trophy of

tinned and cured fish in the centre of the court denotes the commercial respect in which the Dominion holds the salmon, lobster, cod, herring, mackerel and other fishes as founders of a thriving industry."—*Daily News*, 19th May, 1883.

"The Canadian exhibits are shown alongside those of the United States and are quite as valuable. The Canadian section is particularly rich in methods for preserving fish, and there are also many general exhibits of practical and scientific value in the Canadian section."—*Glasgow Herald*, May, 1883.

"In the friendly international competition at South Kensington, for the credit of making the best show, the Canadians press closely upon their neighbors from the States. A central object in their display is a trophy of tinned lobster and salmon, piles and strings of fish in a dried state and barrels of the same commodity in the wet. As in the American, so in this court, the exhibition for the culture of fish forms a prominent feature. There is an admirably set up lot of fresh water fish, and the specimens of sea fishes are not less interesting."—*Herts Guardian*, 16th June, 1883.

"The extent and variety of the general fisheries of Canada are co-extensive with its rivers, vast lakes and surrounding seas, and the illustrative exhibit is worthy of the Dominion and the contributors."—*Standard*, 21st June, 1883.

"The Canadian exhibits at the international exhibition of fisheries are in a scale of importance second to none, not even to those of the United States, and the display is of much and varied interest."—*Morning Post*, 6th July, 1883.

"The collection of preserved fish in the Canadian court has been long acknowledged to be the finest in the exhibition. Mr. Joncas tells how they are taken and cured and what industries they support, the general result being to show that the fisheries of the Dominion are second to none in the world."—*Liverpool Mercury*, July, 1883.

"Within the walls of the Fisheries Exhibition may be seen the methods and appliances used by the various nations in the culture, capture and preparation of the different kinds of fish. In this respect the Dominion of Canada is taking the lead, as she has one of the largest and most interesting displays in the buildings."—*Centaur*, 14th July, 1883.

"Next to Great Britain, Canada has probably the best display at the Fisheries Exhibition, which is, in itself, striking evidence of the energy and intelligence of her people, as well as showing the great natural resources with which nature has endowed her."—*Kent and Sussex Times*, 21st July, 1883.

"Of the greatest importance is the telegraphic system established by the Government of the Dominion, covering about 27,000 square miles of the most prolific fishing grounds around the coast of Canada. By this system all the stations are connected, and bulletins are displayed at the different telegraphic offices, and are distributed daily, indicating weather probabilities for the next twenty-four hours, and the existence of bait and of shoals of fishes in particular localities. Much assistance has in this way been rendered to fishermen, and the safe navigation of the river and gulf of St. Lawrence has been also greatly facilitated. In Canada alone we believe such a system is in force."—*Canadian Gazette*, July, 1883.

The object in view of those in charge of the exhibit was to present to foreign nations every phase of our great deep sea, river and lake fisheries, the commercial value of such, artificial propagation of such fish as attention had been given to since the establishment of our hatcheries, the various modes of capture and the methods of preparing our fish for home and foreign markets, either by drying, pickling, smoking, canning or freezing. That the object aimed at was, to a large extent, attained, may be gathered from the almost universal expression of opinion, that the Canadian court was the most practical, in its bearing upon the real object of the Exhibition, of all competing nations, from the large list of medals and awards obtained from competent and disinterested jurors.

It may be of interest to mention more in detail some of the leading lines of specimens exhibited, the manner in which they were shown, and how they ranked with similar specimens in other courts.

## DRIED FISH.

This exhibit consisted of codfish, haddock, capelin, boneless cod and hake, cod, sturgeon and hake sounds, &c., &c. The samples were shown in large glass cases, and the cod especially, for soundness, preservation of color, taste, &c., were not equalled by any in the exhibition. Whilst other countries had to replace or supplement their stock from time to time, on account of deterioration in the damp atmosphere of London, the samples from Canada remained unchanged and uninjured during the whole exhibition. For this class of exhibits the highest awards and three gold medals were given. It is believed that considerable trade will yet spring up between Canada and the fish markets of England, from the introduction of our staple fish through the channel of the Fisheries Exhibition. Inquiries have already been made by reliable English houses for consignments of our dried, pickled and canned fish.

## PICKLED FISH.

The samples of pickled fish were numerous, of great variety, well preserved, and were put up in barrels, half-barrels, kits or boxes. The wooden heads of the packages were taken out and glass ones substituted, so the whole exhibit was ever open to the public for inspection. The samples of this exhibit, from almost every Province of the Dominion, consisted of herring, mackerel, haddock, shad, salmon, trout, whitefish, eels, tongues and sounds, &c. These fish all kept well, as they were intentionally salted somewhat heavier than if they were to be placed at once on the markets, and received most favourable notice, not only from reliable fishmongers and practical fishermen, who frequently inspected them, but also from the jurors, who awarded the exhibit three gold medals, three silver medals and two diplomas of honour.

## CANNED FISH.

One of the most attractive features of the Canadian branch of the Fisheries Exhibition was the immense quantities of fish of every variety canned for commercial use, indigenous to the waters of the country. The exhibit owned by the Government was, as already stated, largely increased by numerous samples brought in by the London agents of Canadian canneries. The whole show was very neatly arranged, and at night time, under the powerful electric light of the Court, some 20,000 candle power falling upon great pyramids of tins, with brightly coloured labels, the sight was beautiful and attractive. The canned goods consisted of some twenty different brands of salmon, mostly from British Columbia, mackerel, finnan-haddies, lobsters, clams, &c. One gold medal for the general exhibit was awarded, besides some five or six silver medals for individual samples.

## SMOKED FISH.

The exhibit of smoked fish was small, and not as good as it might have been. Salmon, herring and ooláhans, constituted the only samples. The Digby chickens were admired and, after they had been well introduced, were eagerly sought after. It was conceded that a profitable trade might be established in this line of fish, between Nova Scotia and the countries of the old world, that are constantly clamoring for "cheap fish for the millions."

The specimens of smoked salmon were poor. Some curious samples of smoked salmon were shown from British Columbia, as preserved by the process of smoking by the Indians of that Province.

## FROZEN FISH.

Another very great attraction in the court, and one that was almost suspiciously viewed by the foreign visitor, were the three large freezers, constructed with glass fronts, filled with many varieties of frozen salt and fresh water fishes. There were salmon from the Restigouche River of 30 pounds and upwards, caught in June,

1883; halibut from Halifax harbour—one weighing 475 pounds, and another 275 pounds—cod, hake, bass, cusk, salmon trout, whitefish, pike, sturgeon, &c., &c. These freezers with their contents, all in a perfect state of preservation, drew vast crowds to the court, and doubts as to the soundness of the fish could only be dispelled by frequently giving away specimens for table use, to those who were skeptical as to the state of preservation. The report invariable was that the fish were fresh, sound in quality, and in a good state of preservation. At the close of the exhibition, samples were sent to the Prince of Wales, the Marquis of Hamilton, Sir Philip Cunliffe-Owen, Sir Charles Tupper, leading members of the Press, and some of the large caterers in London. All gave the most satisfactory reports of the condition of the fish.

A firm of the largest caterers in London was presented with a salmon from one of the freezers, at the close of the exhibition, and after testing it at a board of epicures, wrote:—

ROYAL AQUARIUM, WESTMINSTER, S. W.,  
26th November, 1883.

DEAR SIR,—We have to acknowledge with many thanks, receipt of the salmon caught in New Brunswick in 1882 (June), and since preserved in the Canadian freezers.

It is a very fine specimen, and is in good condition.

Yours faithfully,

W. D. DIMOCK,  
Secretary Canadian Court, I. F. E.

BERTRAM & ROBERTS.

#### OILS, GUANO, &c.

The collection of oils was of great variety, but with a few exceptions the samples arrived in poor condition. They all required careful classifying and straining, yet were shown to the best possible advantage in glass jars especially obtained for the purpose. They consisted of samples of cod, porpoise, seal, whale, sturgeon, dog-fish, ooláhan and shark oils. A gold medal was awarded for the exhibit of whale and porpoise oil.

The samples of fish guano, though not numerous, were of considerable variety, gave more than average analyses as fertilizers, and the collection was awarded a silver medal. Samples were sent from the Burrard Inlet Fishing Company (Limited) British Columbia. The agents in London are Messrs. Bell, Harrison & Co., No. 11 Clement's Lane. These samples were composed entirely of small herring and herring offal, and were injured considerably by the length of time they were on the sea voyage from Victoria to London. Two good samples from the offal of fish were shown by Mr. Oakes, of Digby, N. S. Mr. Emil Bonnemant also exhibited good samples of fish offal manure from the coast of Gaspé. The analysis he received from Messrs. Wills & Wootton, analytical chemists, of Westminster College of Chemistry and Pharmacy, showed that it was most valuable for artificial manure, from the large proportion of nitrogenous matter and phosphoric acid, and that it would be applicable for the manufacture of isinglass, from the presence of 50 per cent. of gelatinoid matter. The largest and probably one of the best exhibits in this section, was shown by Mr. W. P. Colchester, of Ellershause, Hants County, N.S., who manufactures it from herring and skate—in this latter case thus utilizing an almost worthless fish—on the island of Grand Manan, N.B. The analysis, which shows the samples to be unusually rich as a fertilizer, is from Mr. John Hughes, analytical chemist, 79 Mark Lane, London. It is given here in full:—

|  | Herring.      | Skate.        |
|--|---------------|---------------|
| Water dried at 212° . . . . .                    | 24.03         | 8.23          |
| * Organic matter . . . . .                       | 56.73         | 66.67         |
| ** Phosphoric acid . . . . .                     | 4.70          | 7.40          |
| Lime . . . . .                                   | 4.01          | 7.76          |
| *** Alkaline salt. . . . .                       | 10.37         | 9.38          |
| Insol. sil. matter . . . . .                     | 0.16          | 0.56          |
|  | <u>100.00</u> | <u>100.00</u> |
| * Containing nitrogen . . . . .                  | 8.08          | 9.46          |
| Equal to ammonia . . . . .                       | 9.81          | 11.48         |
| ** Equal to ticcasic phosphate of lime . . . . . | 10.26         | 15.16         |
| *** Contains chloride of sodium . . . . .        | 10.29         | 8.19          |

#### FISH HATCHING APPARATUS.

In the whole exhibition, it is safe to say, that there was no more attractive nor interesting feature than the miniature fish hatchery in the Canadian court, in full working order, in which the hatching and rearing of salmon fry, up to 6 inches in length, was successfully carried on during the whole six months of the exhibition. Some 50,000 salmon eggs were taken to England from one of the hatcheries in Canada, and until about the middle of July hundreds were daily hatched before the public gaze. The continuous crowd of interested visitors around the hatching troughs frequently rendered the court impassable. Numbers of the fry were given to prominent proprietors of rivers and pisciculturists in England, and the balance, at the close of the exhibition, was presented to the authorities of the British Museum and placed in the Buckland Aquarium. The jurors gave a gold medal for "young salmon (some 20,000) hatched from eggs brought from Canada and grown up to parrs 4 and 6 inches long, during the period of the exhibition." They also awarded a gold medal, "to the best and most complete fish-breeding establishment in the exhibition," which was also taken by Canada.

#### SPECIMENS IN TAXIDERMY.

Canada stood pre-eminent among all other countries in her collection of stuffed specimens, which included mammals of her seas, birds destructive to fishes and almost every variety of fish that inhabits the seas, rivers or lakes of the Dominion. The largest mammal was a white whale (*btuga leucas*) of 2,000 lbs. weight, from the River St. Lawrence, which had been carefully mounted by J. U. Gregory, Esq., of Quebec. This specimen obtained the special honour of a gold medal, being the largest in the whole exhibition. The display of Greenland, square-flipper and other seals, of otters, beavers, minks, &c., was not excelled by any competitors.

Birds destructive to fish were neatly mounted in showy glass cases. In numbers there were some 200 specimens, and a large quota of these was made up of the loan collections of Laval University and the local Governments of Nova Scotia and Prince Edward Island, though the best part of the exhibit was obtained by the Department from Messrs. T. Y. Egan and Andrew Downs, of Halifax.

Among the hundreds of specimens of stuffed fishes were to be seen almost every variety found in our waters, but especially the higher order of edible fish, and those that are of economic and substantial commercial value. The fine *salmo solar* of the Atlantic and the huge *salmo quinnat* of the Pacific coast—two of the latter weighing respectively 73 pounds and 79 pounds—eclipsed all others in the exhibition. The large specimens of salmon trout—one nearly 70 pounds—the well-known whitefish (*coregonus albus*) of the lakes, the speckled trout of the Nipegon and other rivers in the west, and the sea trout of the Maritime Provinces, were greatly

admired. These, with such well-known commercial fish as the cod, herring, mackerel, striped bass, halibut and sturgeon, formed a most important feature in the court and gave publicity to the superiority of Canadian fishes over every other country competing at the International Fisheries Exhibition.

The collection of stuffed fishes received from the jurors the following flattering notice when they made up their report:—"In summing up the merits of the different collections of stuffed fishes exhibited by all countries which have taken part in this great international exhibition, your jurors cannot refrain from recognizing the superiority of the Canadian exhibit, from making a unanimous award in its favour, and from recommending that the highest possible prize be given to it." The gold medal was awarded to Canada for the "best general collection of stuffed fishes in the exhibition," India coming second, with the silver medal, and New South Wales third, with the bronze medal. In the same class of specimens for individual samples, Canada also received seven other gold medals, besides a number of silver medals and diplomas.

#### FISHING BOATS AND MODELS OF BOATS.

The full-size fishing boats and the models of such, and the fishing steam tugs, as used on the great lakes of Canada, were considered fine specimens of marine architecture and much admired. The models of punts, dories, dug outs, lobster boats, seine boats, pikekeys, canoes and the ordinary fishing boats and schooners, were shown in large numbers, while there were also exhibited full-sized canoes, dories and fishing boats. Of the latter, one, built under the supervision of the Hon. P. Fortin, after the model of a Gaspé fishing boat, was considered a splendid sea boat by the jurors, and well adapted for the purposes intended. Another, built at the instance of Henry Paint, Esq., M.P., by the Messrs. Embree & Sons, of Port Hawkesbury, Cape Breton, and thoroughly equipped and fitted out for fishing, was highly appreciated by all versed in marine architecture. Numerous applications were made for its purchase, and the Prince of Wales having taken a fancy to it, the boat was presented by the Minister of Marine and Fisheries to his Royal Highness, who most graciously accepted it. Special mention was made of this boat by the jurors, and it received the award of a gold medal. The steam fishing tugs used in the western lakes, representing the act of setting and taking up nets at the same time, was the admiration of the fishermen from every quarter who visited the exhibition. Photographs and drawings of them were quite generally taken. The "bankers" from Nova Scotia were considered fine models, and were thought not inferior to the best of American build that were shown at the exhibition. The samples of sporting canoes were considered gems, and were easily bought up at the close of the exhibition. They were furnished by the Ontario Canoe Company, and by other builders in Peterborough and vicinity. This splendid collection received the gold medal—the highest award of the jurors.

#### FISHWAYS AND FISH-LADDERS.

In this section Canada had very few samples—being represented only by Duvar's fishway for small trout streams and Rogers' well-known fish ladder. The collection certainly was small, when compared with the twenty or thirty different models exhibited by the United States. The model shown by W. H. Rogers, Esq., Inspector of Fisheries for Nova Scotia, was considered by many competent judges to be the best and most efficient, but the jurors thought differently, giving it a silver medal, while the gold medal was awarded to the United States.

#### NETS AND OTHER APPLIANCES FOR CATCHING FISH, CORDAGE, &c.

The display of nets was not so extensive as that made by other countries, which make the manufacture of fishing nets a staple industry of their people. In Canada there is really no extensive factory for the manufacture of nets. Our fishermen depend largely upon the United States or British markets for their supply. There

is no reason why the 16,000,000 of feet of nets, valued at some \$1,200,000, used in the capture of our fish—as reported for 1883—should not all be manufactured in Canada, and with profit too. Some very good specimens, though, were shown by Mr. J. Leckie, of Toronto, including whitefish and herring nets. The former were especially prized. Quite a number of nets were shown, but, as it was merely to exemplify the variety used in catching our fish, and as they were not all of Canadian manufacture, further reference to the exhibit is not necessary. Those prominently engaged in the manufacture of nets in Great Britain were surprised to learn that net factories were not in operation in Canada, and some were making careful enquiries with a view to the establishment of such.

Many primitive and curious specimens of nets, as used by the Indians of British Columbia, were on exhibition. These consisted in part of “draw-nets” for salmon made of Indian hemp, with a main line made of cedar bark; “poke-nets” for catching the oolâhan, made of a nettle indigenous to the country, and “scoop nets” of the same material. Besides these nets, from the same Province were numerous spears, harpoons, gaffs, hooks, lines of cedar bark and kelp, &c., as used by the natives. The collection was so curious and unique that a gold medal was awarded it by the jurors.

From other Provinces there were good collections of weirs, traps of different kinds, oyster rakes, harpoons, spears and full and complete outfits of angler’s requisites. The fishing tackle of Messrs. Alcock, Laight & Westwood, Toronto, was first-class, while the rods of Messrs. D. Scribner & Sons, St. John, N. B., were considered extra and were much appreciated by the sportsmen who examined them. They received high awards.

The cordage exhibited by the Dartmouth Ropewalk Co., though a small exhibit, was pronounced by the very competent jurors as of unusually good quality. The hemp and manilla ropes received a silver medal, and it is thought that if the exhibit had been larger and of the same quality, with information attached as to market prices, &c., the highest award would have been given.

#### ECONOMIC CONDITION OF FISHERMEN.

The various articles that it was the intention of the Executive Committee to show under this division of the prize list, were meagrely represented in the Canadian court. The samples of fishermen’s “apparel and personal equipment” were inferior and the exhibit was small. What few articles were forwarded came from Inspector Duvar, of Prince Edward Island, and from Mr. Leckie, of Toronto. “Food and medicine chest,” “models and plans of dwellings,” “contracts of partnerships,” “benefit societies,” &c., were unrepresented by any noteworthy samples from Canada.

#### NATURAL HISTORY.

Besides the stuffed fishes already referred to, and which took so high a place in the exhibition, there were other varied and interesting specimens from almost every Province of the Dominion. Nearly all the commercial fishes of Canada were well shown, generally in alcohol—the salmon, trout, mackerel, ling, lobsters, being exceedingly fine specimens. A “scientific trophy” was erected in one part of the court, that contained, artistically and scientifically arranged, a great variety of specimens of marine mammals, fishes in alcohol, crustacea of all kinds, sponges, &c., &c. Many very fine specimens came from British Columbia. Those, perhaps, of the most scientific interest, were the alcoholic and dry samples of the *verrillii blakeii*—a polyp called in honour of Drs. Verrill and Blake, and kindly furnished through Mr. J. G. Swan. The nature of the scientific collection, its variety and its extent will be understood by reference to the list of specimens annexed to this report.

The extent of the great exhibition may be realized, when we consider the number of nations that was represented. Nearly every foreign country in the world was on hand with exhibits and the British colonies and dependencies were well to the front. The number of commissioners and representatives amounted to 138;

and the foreign countries and British colonies and dependencies competing were thirty-seven, as follows:—United States of America, Austria-Hungary, Bahamas, Belgium, Canada, Ceylon, Chili, China, Denmark, France, Gold Coast Colony, Germany, Greece, Hayti, Hawaii, Heligoland, India, Italy, Jamaica, Japan, Isle of Man, Morocco, Netherlands, Newfoundland, New South Wales, New Zealand, Norway, Persia, Russia, Salvador, Spain, Strait Settlements (including the Malay States), Sweden, Tasmania, Tunis, Venezuela, and Zanzibar.

Mr. Wilmot, in his report to the Department of Marine and Fisheries, says, in relation to Canada's position in the general competition:—

"It was pretty generally acknowledged that Canada, viewed from the practical standpoint, held quite an equal, if not the foremost, position amongst the foreign and colonial competitors at the great Fisheries Exhibition in London. The rank taken by her, also, in the number of first-class awards and gold medals, was most creditable. In the list of gold medals obtained, the United States stood first, Canada standing second, Norway and Sweden being the next in order, the remaining countries following in greatly lessened numbers of these awards.

"The whole of the exhibits in the Canadian court were entered and shown in the name of the "Dominion of Canada," thus presenting to the several jurors appointed to adjudicate upon the merits of the several exhibits but one name, or one exhibitor from Canada. On the other hand, the United States showed not only large collections in the name of the United States National Museum, and the United States Fish Commission, but also gave the names of 260 other exhibitors, with separate exhibits, who were permitted to receive awards or special mention from the jurors. Norway had also, inclusive of objects shown by public institutions and private individuals, the names of no fewer than 351 exhibitors who were entitled to awards; and Sweden, in like manner, had 293 exhibitors' names, with their individual exhibits, laid before the jurors. In this way it will be seen that these countries possessed many advantages over Canada in the awarding of medals by the several jurors, who, in many instances, gave but one award for a "collective exhibit" of objects to Canada, whereas several medals were granted to similar collections in these other countries, by reason of the names of several exhibitors appearing with them; and these individual competitors had also the privilege of setting forth the merits of their separate exhibits before the Jurors.

"It must also be borne in mind, as bearing specially on the comparative positions occupied by these countries for obtaining awards, that, in the general classification of exhibits of all kinds, as published, there were sixty-one divisions into which the various objects to be exhibited were classified. The United States were competitors in fifty-seven of these divisions; Canada competed in thirty-nine only. But notwithstanding all these evident drawbacks, the Dominion may feel well satisfied with the results obtained and the high position occupied by her at the great Fisheries Exposition in England."

Subjoined will be found a list, taken from the official catalogue of the exhibition, of the specimens taken from Canada and arranged under the divisions to which they respectively belong. There will also be found a correct list of the gold, silver and bronze medals and the diplomas of honor, as awarded to Canada by the final court of jurors.

The court of appeal, to which any objection to the jurors' awards could be carried, was constituted in the early days of the Exhibition. The colonial representation in this court consisted of Sir Alex. T. Galt, who was succeeded by Sir Charles Tupper, after the latter had assumed the duties of High Commissioner; Sir Saul Samuel, the Agent-General of New South Wales, and Sir Ambrose Shea, Commissioner of the colony of Newfoundland at the Fisheries Exhibition. The labors of this court were fortunately not very arduous, as the work of the jurors was generally satisfactory, but cases appealed to it received every possible attention and redress. Canada found it advantageous to be represented in the person of the High Commissioner at the court.

The great International Fisheries Exhibition is now a page in British history. The exhibition, for the success of which, on account of its limited scope when compared with other national expositions, fears were entertained, has passed away, and months ago one of the most unique, most successful and most instructive of the great national fairs that have been held in modern times, came to a brilliant close. Registering an attendance of some 3,700,000 during the six months it was open, carried on with an expense almost unknown in previous exhibitions, surrounded by a brilliancy of pageantry that royalty and royal support alone could bring, and resulting in a grand industrial, practical and financial success, the first really great International Fisheries Exhibition was closed in due form on the 31st of October, 1883. It is not too much to say that Canada has received good from the exhibition of the products of her fisheries, and from the experience gained by taking part in this great international competition. The extent of our fisheries, their great value, the variety of our fish and their almost unapproachable fine quality and flavor were, for the first time, brought to the notice of those in foreign countries who were interested in everything relating to the world's fisheries. On every hand, and almost daily, inquiries were made concerning our fisheries, their extent, value, method of capture, variety, artificial propagation, protective legislation and whatever related to them. Such inquiry was awakened that it cannot be doubted but that a commercial advantage will yet redound to the country that will repay for the trouble and expense consequent upon our exhibition in London. Our dried and pickled fish—certainly staple articles of our fish trade—were particularly sought after, and the details of preparing the same kind of fish for different markets were eagerly listened to. It was generally conceded that, with care in the first shipments, and with the largest obtainable specimens alone placed on the market, there was no obstacle to an extensive and profitable trade, especially between Canada and our Mother Country. The masses of Great Britain want cheaper fish. Such we can furnish in almost unlimited quantities; but, to a certain extent, we must educate the taste of the English people for the fish we have for exportation. In nothing is the Englishman so conservative as in his diet. When we have once proved to him the richness and delicacy of our cod, mackerel, salmon, white fish, &c., as placed in different forms upon our markets, then we are sure of success, and a profitable trade is guaranteed. The commencement of this easily-to-be-developed trade must be undertaken with judgment and with care. As stated, the best possible samples of our commercial and economic fish must first be presented. The demand once established for our choicest fish, an enormous trade must inevitably follow. There is no reason why the large trade of our distant Province of British Columbia, amounting to \$1,079,606.00, in tinned salmon, sent almost entirely to the London markets, may not be equalled by the great variety of commercial fish taken in the eastern waters of the Dominion and profitably placed before purchasers in foreign countries. Our contribution to the Fisheries Exhibition has done much to hasten the time when such a trade as is referred to may be profitably engaged in.

Besides the substantial grounds for anticipating a future trade with the old country in many lines of our fisheries products by the publicity given to them through the late International Fisheries Exhibition, it is safe to say that the Dominion received as favourable and as extensive an advertisement by her representation at this exhibition as through any channel or from any source heretofore. The large map of the Dominion of Canada that was shown in Paris in 1878, carefully corrected for recent explorations and especially for the settlement of the North West along the line of the Canadian Pacific Railway, was conspicuously shown, and occupied all the space in the north end of the court. An officer was constantly in charge who, thoroughly conversant with the topography, climate, soil, &c., of the country, explained daily to the visiting thousands the nature of our Dominion, pointed out favourable lands for settlement, local inducements for such settlements, and did much to dissipate the erroneous idea that we were placed in a region of perpetual snow. Books and pamphlets bearing upon our Dominion were gratuitously circulated, with maps by thousands. It must not be forgotten

that the agents of the Canadian Pacific Railway were also most indefatigable in their efforts to advertise our North-West and to disseminate reliable information as to the sections of the Dominion in which they are more particularly interested. This they did very effectually by an excellent representative exhibit of the capabilities of both field and forest, and by the judicious distribution of books and guide manuals. Intending emigrants were daily in the court, intelligently inquiring about the chances of settling in Canada. Valuable information was, as far as possible, imparted to all such, and for more detailed accounts they were referred either to the office of the High Commissioner or that of the Canadian Pacific Railway. One class of people seemed especially interested in the great extent of our country, with its valuable agricultural resources and with our seas teeming with limitless supplies of food fishes—it was the farmer-fisherman, as he may be called—the agriculturist, who was pleased to learn that in Canada he could successfully till the soil during part of the year, and at other times, from the water stretches near by, could get abundance of the best fish for himself and family and, to a considerable extent, could profitably place the products of sea, river or lake upon the neighboring markets. This was particularly noted by many who pursued similar avocations in Great Britain and who had intentions of making homes in the Dominion. They were glad to learn that their own handicraft could be carried on, and with larger scope for operations, in the new country to which they contemplated removing.

This representation, then, at the International Fisheries Exhibition, has been of benefit to the Dominion, and an exhibition of our commercial wealth, in a heretofore unknown line, has been prominently brought before the people of many countries. The extent and fertility of our lands have long been before the inhabitants of older countries; the wealth of our forests and mines and the greatness and value of our merchant marine are well known, and now the inexhaustible and varied resources of our waters have been fairly represented. This must give a favorable publicity to Canada as a nation and yet greater confidence in her internal resources and growing institutions among capitalists and others of the old world.

In conclusion, there is but to acknowledge the uniform kindness, courtesy and attention received by the Canadian officials from all connected with the Executive Committee of the Fisheries Exhibition. Everything possible was done on the part of the Executive Management to expedite work in connection with the opening of the court and to further the interests of the Dominion throughout the whole show. For both official and personal kindness, the representatives of Canada are deeply grateful and under lasting obligations to those associated in any way with the management of the late great International Fisheries Exhibition.

#### APPENDIX A.

No detailed list of the Canadian exhibits appeared in the first edition of the official catalogue, published by the Executive Committee of the Fisheries Exhibition, as the specimens had not arrived at the date of publication, but in all subsequent editions the following was given, together with the annexed introductory remarks:—

##### CANADA.

The Dominion of Canada, extending over half the continent of America, washed by the waters of three great oceans, and having within its confines innumerable rivers and lakes, stands almost unrivalled in the extent and variety of its fisheries.

What are generally known as the Maritime Provinces—Quebec, Nova Scotia, New Brunswick and Prince Edward Island—have every description of sea-fishes; whilst their rivers furnish an abundance of food-fish of great economic and commercial value and offer to sportsmen some of the best salmon and trout fishing in the world.

The great inland Province of Ontario, from her vast lakes and rivers, supplies to her own people and for export to other countries, large quantities of valuable freshwater fish; whilst the new Province of Manitoba and the whole of the great North-

West Territory have innumerable lakes and rivers teeming with choice food-fish, which are of great value to the settlers in that fertile region, while the rivers on the Pacific slope in British Columbia are literally full of salmon.

In a new country, where the machinery for obtaining official statistics is as yet somewhat imperfect, it is difficult to estimate with accuracy the annual value of the fish taken; besides, almost every farmer and settler near sea coast, lake or river, has a boat, net or other appliances for furnishing his household with fresh fish, no return of which is made to Government. The benefit of this great boon is especially felt by the settler, who often draws from the waters, within sight of his new home, supplies of rich fish for his family, even while his lands yield their rich harvests. The cash value of this widely-distributed privilege to the resident of Canada cannot be reached by the statistician, as his figures deal only with commercial transactions. The export of fresh fish is principally to the United States.

Of cured sea-fish, codfish, mackerel, herring, &c., large quantities are annually shipped to the West Indies, Spain, Portugal, Brazil and other countries. Lobsters and salmon, of which about 20,000,000 cans are packed, go mainly to the United States and Great Britain. The official returns show annually a steady increase in the value of the fisheries. In 1882 it reached the sum of \$16,088,672.

In some of the older sections of Canada, the former unrestricted fishing of streams, together with obstructions by mill-dams and otherwise, resulted in such depletion that the Government took up the matter, enacted laws for the regulation of inland fishing, provided for the erection of suitable fish-ladders or passes in mill-dams, and have established eleven fish breeding establishments for restocking and maintaining, by artificial means, the supply in the rivers and lakes. The extent of fish culture in Canada, under the superintendence of Samuel Wilmot, Esq., may be judged by the output of young fish in the last season, viz.:—Salmon, 5,783,000; salmon trout, 2,277,000; Californian salmon placed in Eastern waters, 471,000; speckled trout, 40,000; percidæ, 26,500,000; whitefish, 20,728,000. Total, 55,799,000.

In this year's operations there have been placed in the hatcheries—salmon eggs, 6,612,000; salmon trout eggs, 8,350,000; speckled trout eggs, 200,000; whitefish eggs, 43,000,000. Total, 58,162,000.

To which may be added at the proper season 20,000,000 of the percidæ family. The total distribution of young fish since the commencement of fish-hatching operations has been upwards of 175,000,000.

Telegraph wires and cables have been laid to the principal fishing stations and harbors on the sea-coast and adjacent islands; and in addition to the ordinary signal service for all shipping, fishery bulletins are issued and immediate information given of the appearance of fish at any locality. The sea-coast, rivers and lakes are well provided with lighthouses. The official returns of December 31, 1882, show 551 lights and twenty-nine steam fog-whistles and automatic buoys. Seven Government steamers are employed in the lighthouse, buoy and fishery service.

The Meteorological service is very extensive and efficient, giving weather predictions at all the principal ports. During the year 1882, 6,545 predictions were issued, 90 per cent. of which were fully or partly verified.

W. D. DIMOCK, *Secretary.*

Division I.—Nets and traps of all kinds used in deep-sea fishing, including the peculiar nets used for taking the porpoise, herring scoops, gear for harpooning whales, trawls, hand lines, hooks, &c., &c. Also Brand's bomb lance. Loaned by Hon. P. Fortin, of Quebec.

Division II.—Oyster dredges, tongs and rakes, lobster hoop-traps, cases, pots and spears.

Divisions III. and IV.—(1) Representation of ice boats, dory full size, row, lobster and seine boats, pinkey, "trawler," sectional models of different kinds of fishing crafts, dugouts, &c. (2) Banker, full size and equipped used in cod fisheries off Cape Breton coast, exhibited by Messrs. Embree & Son, Nova Scotia., (3) Gaspé fishing boat, full size, used in cod fishing off the Gaspé coast and on the Miscou

banks in the Gulf of St. Lawrence; containing nets, hand lines, long lines, mackerel lines, fishermen's clothing, &c. (4) Model of vessel used in transporting the dried and salted fish from the Gulf of St. Lawrence to foreign markets. (5) Model of the armed schooner "Le Canadienne," the first vessel employed in the protection of the fisheries of Canada. (6) Models of various kinds of boats, as used by the fishermen of the Maritime Provinces of Canada, are also exhibited.

Division V.—Cordage of all kinds, suitable for fishing vessels and for fishing purposes. Dartmouth Ropewalk Company, Nova Scotia.

Division VI.—Fog-horns—system of signalling fishing crafts at night.

Division IX.—Model of life-boat as used in Lake Ontario, designed and patented by Mr. J. H. Hatton.

Divisions XIII to XX.—Draw nets for salmon, oolshān nets, traps for eels, alewife nets, hooks, fishermen's knives, spears, sinkers, floats, hand lines, rods, flies, gaffs, poke and scoop nets for salmon, bass and smelts, with fishing lines made of kelp, cedar bark and spruce, spinner's with "night-lure" as used by the native Indians in British Columbia. Rods, flies, reels and a general assortment of fishing tackle are shown by Messrs. Alcock, Laight & Co., Toronto; and the celebrated trout and salmon rods of D. Scribner & Son, St. John, New Brunswick, are also exhibited. Fishing and sporting canoes, made by Messrs. Stephenson, English, and others of Ontario, are shown in large numbers. Birch-bark canoes of the Millicete and Micmac Indians. One of these can be seen daily on the little pond adjoining the Canadian court. Models of steam tugs and sail boats used in capturing fresh-water fish in the Province of Ontario and models of trap nets, as used in the same Province, are also exhibited.

Divisions XXI to XXIV.—Fishermen's outfits of all kinds; also contracts of agreement between employer and employee, as used especially in the Province of Prince Edward Island.

Division XXV.—i. Models of fish-curing establishments. Methods of, and models and other representations of appliances for, drying, curing, salting, smoking, tinning and cooking fish. Models of Gaspé and other fish-curing establishments, by Messrs. Chas. Robin & Co.

Division XXVI.—ii. Fish, dried, smoked, cured, salted, tinned, or otherwise prepared for food. Canned fish of all descriptions, especially salmon, from Victoria, British Columbia, from Findlay, Durham and Brodie, John Adair & Co., British American Cannery, British Union Cannery, Henry E. Croasdale, Thomas Earle & Co., English & Co., Ewen & Co., Haigh & Sons, Inverness Cannery (agent, H. C. Beeton & Co., 36 Finsbury Circus, London), Laidlaw & Co., Richmond Cannery, Windsor Canning Company; and samples of preserved lobsters from the following firms, of which Henry Howard, 21 Lime Street, London, E. C., is the sole agent:—Bain J. D., Chatham, New Brunswick; Bennet Henry, Alberton, Prince Edward Island; Brown W. S., Newcastle, New Brunswick; Bulyea W. H., Alberton, Prince Edward Island; Clark, Roblee & Clark, Summerside, Prince Edward Island; Gallant D. D., Cocagne, New Brunswick; Golden Crown Packing Company, Halifax, N.S.; McPhail Neil, Magdalen Islands; Northumberland Packing Company, Church Point, New Brunswick; Petitpas Samuel, Fifteen Point, Prince Edward Island; Robichaud & Gagnon, Shemogue, New Brunswick; Young J. & R., Tracadie, New Brunswick; Young Robert, Caraquet, New Brunswick; and samples of preserved finnan haddies from Thistle Haddie Canning and Curing Company, Digby, Nova Scotia. (2) Codfish sounds and tongues, dried and salted. (3) Salted salmon trout, salmon, herring, halibut, sea trout, fresh water trout, white fish, alewives, Labrador herring, shad, codfish sounds and tongues, eels, sardines, &c. (4) Boneless cod and boneless hake, specially prepared, in Prince Edward Island and sent to West Indies and other markets, smoked salmon, smoked trout, smoked herring (well known as Nova Scotia Digby chickens).

Large, medium and small-size dried codfish, known as Gaspé dried cod, prepared for Brazil and Mediterranean markets, by Chas. Robin & Co., Quebec.

Small dried codfish in drums, known as Gaspé small dried cod, as prepared for Brazilian market, by J. and E. Collas, Gaspé.

Dried codfish, hake, cusk, haddock, &c., in boxes, as prepared for West Indies markets, by Bremner & Hart, Halifax, N.S.

Division XXVII.—Sturgeon, hake and codfish, dried sounds, specially used in making isinglass

Division XXIX.—Oils of all kinds, such as whale oil, white and black porpoise oil, crude and refined cod liver oil, crude, refined and prepared for medicinal purposes, seal oil, sturgeon oil, &c., &c. Zingler's patent guano from fish offal, from Skeena River, British Columbia; H. C. Beeton & Co., 36 Finsbury Circus, E.C.

Division XXXIII.—(1) A fish carrying box, on small track wheels, used in Ontario on fishing tugs and railways for carrying several tons of fresh fish in ice direct from the fishing stations to distant markets. J. Leekie, Toronto. (2) Two large freezers for preserving fresh fish in a frozen state for any period of time, containing frozen salmon caught in June and July, 1882, and two large halibut, since March last, one weighing 475 lbs.; also containing cod, mackerel, bass, trout, cusk and other fish, all in good preservation.

A freezer, for freezing and preserving fresh fish in cakes of ice, containing samples of fresh water fishes. C. W. Gauthier, Sandwich, Ont.

A refrigerator, for keeping fish, meat, fruit, &c. (unfrozen), fresh and sweet for a length of time. Witherow & Hillock, Toronto.

A novel ice house, built with paper walls, inside the Canadian court, containing some sixty tons of ice, brought from Canada, for supplying the Canadian freezers and refrigerators during the exhibition. Designed by S. Wilmot, Esq.

Division XXXV.—XLI.—(1) A working model, showing the exact working of the Government fish breeding establishments in Canada. (2) A working section of full size fish breeding troughs and trays, in running operation, in which upwards of 50,000 salmon eggs were safely hatched into healthy fry during the exhibition. (3) Glass and metal fish incubators, in full operation, for hatching corregoni and other fish ova of the smaller kinds than salmon eggs, each incubator having 25,000 of ova. (4) Fish egg carriers in various forms, for transporting eggs short or long distances—one of which, by a process of retardation, conveyed the ova safely across the Atlantic, which were hatched out in the Canadian court. (5) Fish breeding apparatus of all kinds, including troughs, trays of glass, zinc and tin, safety cans, perforated guards, cans for carrying young fish long distances, cleansers, washers, &c., &c. (6) A plaster model or bird's eye view of a Canadian salmon breeding establishment, showing the fresh water ponds and reservoirs for rearing fry, the buildings in which hatching is carried on, and the salt water reservoir in which some 300 parent salmon are annually kept from May till November in a perfectly healthy state. Oil paintings and photographs of the several hatcheries in Canada. NOTE.—All the above-named fish-breeding appliances were originally designed and constructed by S. Wilmot, Esq.

A model, with drawings of the latest Canadian invention of a fish ladder or salmon pass, which permits of an underground (water) passage for salmon, to surmount dams or other barriers with great success. W. H. Rogers, Esq., Nova Scotia.

Models of fish ladders. J. H. Duvar, Esq., Prince Edward Island. (1) A model, and also a full-sized salmon register, for registering, by means of a clock dial, the number of salmon passing up a river or other waters. This register has been in actual use and practically tested with satisfaction and accuracy in Canadian rivers. Hon. D. E. Price, Quebec. (2) Specimens of acclimatised salmon from the salt waters of the Pacific to the fresh water lakes and streams of Ontario, by S. Wilmot, Esq.

Division XLII.—A large collection of algæ, arranged according to the various species and localities. Some of these specimens are new to scientists, and have consequently not yet been named. Prof. J. Macoun, Ottawa.

Division XLIII.—A collection of dry sponges, from Principal Dawson, Montreal. A collection, both dry and in alcohol, from Prof. Honeyman, Halifax.

Division XLIV.—Corals, in both dry and alcoholic collections. Also polyps and jelly fish.

Division XLV.—Collection of entozoa of fishes, from Robert Morrow, Esq., Halifax.

Division XLVI.—Mollusca (dry and alcoholic), from Nova Scotia Museum, and from Principal Dawson, Montreal.

Division XLVII.—Sea urchins and holothuria, both dry and alcoholic collections.

Division XLVIII.—Aphrodite aculeata (6½ inches long) and nereidæ.

Division XLIX.—Insects and larvæ of insects which are destroyers of spawn or become food for fish. A collection of forty cases, consisting of:—(1) Twenty cases of lepidoptera. (2) Five cases of neuroptera. (3) Two cases of diptera. (4) Ten cases of coleoptera. (5) Two cases of hymenoptera. (6) One case of hemiptera. From Entomological Society of Ontario.

Division L.—Collection of crustacea—dry. From Principal Dawson, Montreal.

Division LI.—(1) Fish of all kinds stuffed, some of the skins having stood the test of ten years' exposure without injury, comprising many of the fresh-water fishes of the great inland lakes of Ontario and of other lakes and rivers in Canada, including large specimens of salmon from British Columbia, of 75 lbs. and upwards. Amongst these are acclimatised *salmo salar* of Lake Ontario and *salmo quinnat* from the Pacific coast. Salmon trout, weighing 70 lbs.; muscalonge, 42 lbs.; the famous *corregonus albus*, or whitefish, of Canadian lakes, herring salmon; brook trout of 5 lbs.; pickerel or dore; black, white, and green bass; sturgeon and their young, a shovel-nosed sturgeon, 6 feet in length, winnoniche, carp, cat-fish, pike, salmon and trout from the Lower Provinces; codfish of 68 and 70 lbs.; shad, mackerel, herring, &c.; also a white porpoise or whale, 2,000 lbs.; a Greenland shark, 12 feet long and others of the shark species of great size; halibut of 220 lbs., and upwards, and various other specimens of sea and fresh-water fishes. (2) Skeletons of *lophius piscatorius*, the angler fish, and of the head of a codfish, exhibited by Robert Morrow, Esq., of Halifax, N.S. (3) A large collection of fishes preserved in alcohol and otherwise, including many of the known fishes of the waters of Canada, scientifically arranged, named, and classified. (4) Paintings, drawings, and photographs of fishes, by Prof. Fowler, Montreal. Varieties of fish are shown in glass cases, with photographs of such from British Columbia, also barnacles and other interesting specimens gathered and forwarded by the Marquis of Lorne.

Division LII.—Alcoholic collection.

Division LIII.—This collection consists of—(1) *Raptors*. White-headed eagle and ospreys (old and young). (2) *Grallatores*, coots, herons, egrets, sandpipers, turnstones, godwits. (3) *Natatores*, razor-bill, puffins, guillemots, divers (old and young) loons, &c. Gulls, terns, cormorants. Gannets, sea-ducks, eider ducks, sheldrakes, canvas-back duck and golden eye. Many of these have been lent from the Museum of Laval University of Quebec.

Division LIV.—Aquatic and amphibious mammalia in large numbers, consisting of taxidermal specimens of otters, fishes, minks, muskrats, weasels, seals; also, the famous white whale of the Gulf of St. Lawrence (the specimen shown weighing 2,000 lbs.), with basking, thresher, Greenland and white sharks, one of the Greenland sharks reaching the enormous weight of 600 lbs.

Division LV.—Maps of Canada, with fishing weirs carefully marked. Charts of the Provinces of Prince Edward Island and British Columbia. Transactions of the Nova Scotia Institution of Natural Science. Reports of the fisheries of Canada, and of the progress made in fish culture, with maps illustrative of the same, also a mammoth map of the Dominion of Canada, 15 feet by 30 feet, illustrative of the great agricultural, mineral and fishery sections of the country.

Division LVI.—Specimens showing the relation between extinct and living fishes, are shown in the collection of Devonian, Carboniferous and Post-pliocene fossils, with fishes (cetacea and mollusca).

Besides the exhibits specified, may be found many others, one of the most attractive being a complete Milicete Indian encampment. The rude appliances of the North American Indian for taking fish are shown, while the wigwam of birch-bark

is of full size and complete in every detail that is required to make up the Indian fisherman's home. On the same terrace are shown the handsome anglers' tents of the International Tent and Awning Company of Ottawa.

## APPENDIX B.

Besides the prizes offered by the Executive Committee of the exhibition for specimens bearing upon the fisheries of the world and the very valuable awards for the best essays upon subjects pertinent to the scope of the exhibition authorities of distinction were asked to compile a series of cheap handbooks upon subjects connected with fisheries, which were sold by thousands during the exhibition, and are now useful reference books. In addition, the Committee also arranged a series of conferences, at each of which one or more papers were read, which were afterwards debated with interest and profit. The last conference was held on the 12th of June, when His Royal Highness the Duke of Edinburgh contributed a masterly paper upon "the sea fisheries and the fishing population of the United Kingdom." During the conferences a very good paper on "the fisheries of the Dominion of Canada" was read by one of the Canadian representatives, Mr. L. Z. Joncas. This paper was well spoken of by the press and contributed not a little to the success and popularity of the Canadian court at the exhibition.

A list of the conference papers and handbooks, as published by the Executive Committee, is hereto attached. All can be obtained for the prices mentioned, from Messrs. Wm. Clowes & Sons (Limited) 13 Charing Cross, S. W., London, G. B.

*Fishery Laws.*—By Frederick Pollock, Barrister-at-Law, M. A. (Oxon), Hon. L. L. D., (Edin.); Corpus Christi Professor of Jurisprudence in the University of Oxford. 1s.

*Zoology and Food Fishes.*—By George B. Howes, Demonstrator of Biology, Normal School of Science and Royal School of Mines, South Kensington. 1s.

*British Marine and Fresh water Fishes* (Illustrated.) By W. S. Saville Kent, F. L. S., F. Z. S., author of Official Guide Books to the Brighton, Manchester and Westminster Aquaria. 1s.

*Apparatus for Fishing.*—By E. W. H. Holdsworth, F. L. S., F. Z. S., Special Commissioner for Juries, International Fisheries Exhibition; author of "Deep Sea Fisheries and Fishing Boats, British Industries, Sea Fisheries," &c. 1s.

*The British Fish Trade.*—By His Excellency Spencer Walpole, Lieut.-Governor of the Isle of Man. 1s.

*The Unappreciated Fisher-Folk.*—By James G. Bertram, author of "The Harvest of the Sea." 1s.

*The Salmon Fisheries* (Illustrated).—By C. E. Fryer, Assistant Inspector of Salmon Fisheries, Home Office. 1s.

*Sea Monsters Unmasked* (Illustrated).—By Henry Lee, F.L.S. 1s.

*The Angling and Preservation Societies of London and the Provinces.*—By J. P. Wheeldon, late Angling Editor of "Bell's Life." 1s.

*The History of Fishing from the earliest times.*—By W. M. Adams, M.A. (Oxon), late Fellow of New College. 1s.

*Fish Culture* (Illustrated).—By Francis Day, F.L.S., Commissioner from India to International Fisheries Exhibition. 1s.

*Fish as a Diet.*—By W. Stephen Mitchell, M.A. (Cantab). 1s.

*Angling in Great Britain.*—By Wm. Senior ("Red Spinner"). 1s.

*Edible Crustacea.*—By W. Saville Kent, F.L.S., F.Z.S., author of Official Guidebooks to the Brighton, Manchester and Westminster Aquaria. 1s.

*Indian Fish and Fishing* (Illustrated).—By Francis Day, F.L.S., Commissioner for India to the International Fisheries Exhibition. 1s.

*The Literature of Sea and River Fishing.*—By Jno. J. Marley, M.A. (Oxon). 1s.

*Folk-Lore of Fishes; their Place in Fable.*

*Fairy Tale, Myth and Poetry.*—By Phil. Robinson. 1s.

- The Outcome of the Exhibition.*—By A. J. R. Trendall, of the Inner Temple, Barrister-at-Law, Literary Superintendent for the Fisheries Exhibition. 1s.
- Inaugural Meeting: Address.*—By Prof. Huxley, P.R.S.; H.R.H. the Prince of Wales (President of the Commission) in the Chair. 6d.
- Notes on the Sea Fisheries and Fishing Population of the United Kingdom.*—By H.R.H. the Duke of Edinburgh, K.G. 1s.
- The Fishery Industries of the United States.*—By Prof. Brown Goode, M.A. 6d.
- Oyster Culture and Oyster Fisheries in the Netherlands.*—By Prof. Hubrecht. 6d.
- Principles of Fishery Legislation.*—By Rt. Hon. G. Shaw Lefevre, M.P. 6d.
- On the Culture of Salmonidæ and the Acclimatisation of Fish.*—By Sir James Gibson Maitland, Bart. 6d.
- Fish Diseases.*—By Prof. Huxley, P.R.S. 6d.
- The Economic Condition of Fishermen.*—By Prof. Leoné Levi.
- The Fisheries of the Dominion of Canada.*—By L. Z. Joncas. 6d.
- Preservation of Fish Life in Rivers, by the Exclusion of Town Sewage.*—By the Hon. W. F. B. Massey Mainwaring. 6d.
- Molluscs, Mussels, Whelks, &c., used for Food or Bait.*—By Chas. Harding. 6d.
- Coarse Fish Culture.*—By R. B. Marston. 6d.
- On the Food of Fishes.*—By Dr. F. Day. 6d.
- The Herring Fisheries of Scotland.*—By R. W. Duff, M.P. 6d.
- Line Fishing.*—By C. M. Mundahl. 6d.
- Fish Transport and Fish Markets.*—By His Excellency Spencer Walpole. 6d.
- Forest Protection and Shelter.*—By D. Howitz, Esq. 6d.
- Seal Fisheries.*—By Capt. Temple. 6d.
- Fish as Food.*—By Sir Henry Thompson. 6d.
- Storm Warnings.*—By R. H. Scott. 6d.
- On the Destruction of Fish and other Aquatic Animals by Internal Parasites.*—By Prof. Cobbold, F.R.S., F.L.S. 6d.
- Artificial Culture of Lobsters.*—By W. Saville Kent. 6d.
- Crustacea.*—By T. Cornish. 6d.
- Salmon and Salmon Fisheries.*—By David Milne Home, F.R.S.E. 6d.
- Scientific Results of the Exhibition.* By Professor C. Ray Lankester. 6d.
- The Fisheries of other Countries.*—By Commissioners for Sweden, Norway, Spain, &c., who took part in the Conference. 6d.
- Pulchard and Mackerel Fisheries.*—By T. Cornish. 6d.
- Fresh water Fishing (other than salmon).*—By J. P. Wheeldon. 6d.
- Basis for Legislation on Fishery Questions.*—By Lieut.-Col. F. G. Solà. 6d.
- Trawling.*—By Alfred Ansell. 6d.
- A National Fishery Society for Great Britain.*—By C. E. Fryer.
- On Facilities for the Improved Capture and Economic Transmission of Sea Fishes, and how these matters affect Irish Fisheries.*—By R. F. Walsh, of Kinsale. 6d.
- The Fisheries of Ireland.*—By Y. C. Bloomfield. 6d.

## INTERNATIONAL FISHERIES EXHIBITION.

## STATEMENT of Expenditure to 30th June, 1884.

|                                     |  | \$ cts.  | \$ cts. |

## PART 2.

**FISH-BREEDING.**—Report by the Superintendent.....

## FIRST ANNUAL REPORT

OF THE

## DEPUTY MINISTER OF FISHERIES

FOR THE YEAR 1884.

To the Honorable

ARCHIBALD WOODBURY McLELAN,

Minister of Marine and Fisheries.

Sir,—I have the honour to submit herewith my first annual report on the Fisheries Service of the Dominion for the past calendar year, together with statements of official transactions for the fiscal year ending 30th June, 1884.

## ORGANIZATION OF THE DEPARTMENT OF FISHERIES.

The Statute 47 Vic., cap. 18, divided what was hitherto known as the Department of Marine and Fisheries into two Departments, to be respectively called the Department of Marine and the Department of Fisheries, over both of which the Minister of Marine and Fisheries for the time being shall preside, and of which he shall have the management, charge and direction.

## DUTIES.

The duties of the Department of Fisheries consist principally in the administration of all laws relating to the subject of sea, coast or inland fisheries, the management, regulation and protection thereof, and all matters and things relating thereto or assigned by the Governor in Council to the said Department.

Under this latter head is included the payment of fishing bounties, necessitating an enormous amount of labour, which could not conveniently and satisfactorily be performed outside the Department.

---

---

 PRODUCE OF THE FISHERIES.

The total value of the fisheries of Canada for the year 1884 is reckoned as follows:—

|                           |                |
|---------------------------|----------------|
| Nova Scotia.....          | \$8,763,779 36 |
| New Brunswick .....       | 3,730,453 99   |
| Quebec.....               | 1,694,560 85   |
| British Columbia .....    | 1,358,267 10   |
| Ontario.....              | 1,133,724 26   |
| Prince Edward Island..... | 1,085,618 68   |

Showing a total value of..... \$17,766,404 24

as against \$16,958,192.98 in 1883; an increase of \$808,211.26.

This is exclusive of the quantity consumed by the Indian population of British Columbia, and also of the yield of Manitoba and the North-West Territories, from which, although steps have been taken to supply the information in future, no reliable data are available for the present report.

## DETAILS.

The following table shows the value of the principal kinds of fish, grouped for convenience:—

|                 |                |
|-----------------|----------------|
| Cod.....        | \$4,302,454 85 |
| Herring.....    | 2,645,447 00   |
| Lobsters.....   | 2,351,559 80   |
| Mackerel.....   | 1,826,681 03   |
| Salmon.....     | 1,357,727 64   |
| Haddock .....   | 758,245 70     |
| Fish oils.....  | 477,443 40     |
| Trout.....      | 464,653 00     |
| Sardines.....   | 384,600 00     |
| Smelt.....      | 370,644 60     |
| Pollock.....    | 275,222 50     |

## GENERAL REMARKS.

*Nova Scotia.*

The returns show that the fisheries of this Province do not only maintain the improvement of the last few years, but they show a large increase over any former year. While this improvement embraces nearly all kinds of fish, it is most marked in cod, mackerel, herring, salmon and lobsters.

The encouragement offered by the bounty has largely increased the number of vessels and boats engaged in the deep-sea and shore fisheries.

---

*New Brunswick.*

From this Province the returns show a large increase in the yield of its fisheries.

A most gratifying feature is the general improvement in the salmon fishery, which extends to almost every district in which this fishery is pursued. Smelt herring and lobsters show increased catches. Shad and alewives also share in the general improvement, but the sturgeon fishery shows a large falling off from former years. In some districts the herring fishery was not so productive, while in others it shows a largely increased catch. This is no doubt due to the erratic movements of the schools of this fish, which, while never leaving our coast, change their habitat according to temperature, weather and the location of their favourite food.

*Quebec.*

The late date at which the ice left in the spring and the stormy weather which almost constantly prevailed in the Gulf during the fishing season, has caused a considerable decrease in the catch of almost all kinds of fish.

The decrease in the catch of salmon on the south shore of Gaspé and Bonaventure is, however, counterbalanced by the increased catch on the north shore.

More interest than usual was taken in the mackerel fishery and considerable outlay was made by local fishermen; but unfavourable weather doubtless affected the movements of the schools, which did not go to the west of Cape Breton, and the catch made was inconsiderable.

The inland fisheries show a large decrease as compared with the catch of 1883. This falling off, which was noticeable in almost every kind of fish, is due more to a prevalence of contrary winds and stormy weather than to any scarcity of fish.

*Prince Edward Island.*

The stormy and unfavourable weather which prevailed in the Gulf extended also to the Straits, and had the same effect on the Island fisheries.

The returns show a large falling off in all kinds of fish, the decrease being most marked in mackerel.

The single exception is the lobster fishery, which, contrary to general expectation, has been good, and the returns show a considerable increase over the very large catch of last year.

The enormous extent to which this fishery has been developed and the constantly increasing number of factories and fishermen have led to much confusion. It will soon be necessary, in the interest of the fishery, as well as of the fishermen and packers, to bring it under the more effective control of the Department.

*British Columbia.*

The returns from the above named Province show a large decrease in the salmon catch of the Fraser River, where only six canneries out of thirteen were in operation. This result was not due to any scarcity of fish, but to the large quantity of preserved salmon on the market and the low prices obtained.

A fish hatchery, measuring 100 x 40 feet, was built during last season on the Fraser River. It will easily accommodate 3,000,000 *Quinnat* salmon eggs, or 5,500,000 *Saw-quidi* salmon ova. By doubling the trays, double this number of eggs can be laid down. The catching of parent salmon began about the beginning of July, and by the close of the season 3,000,000 eggs were on the trays. The operations were highly successful and reflect credit upon the officer in charge, Mr. Thomas Mowat.

*Ontario.*

The total value of the fisheries in the Province of Ontario is reckoned at \$1,133,724.26.

On Lake Superior, Lake Huron and Georgian Bay, the individual catches did not much exceed those of last year, but the number of fishermen was larger and the aggregate yield consequently increased. The severe stormy weather which prevailed during the first part of November greatly interfered with the fishermen's operations, by damaging or destroying a large amount of twine and driving the runs of fish off the reefs; but, on the whole, the result was satisfactory.

*Manitoba and the North-West Territories.*

The dates hitherto determined upon as close seasons for whitefish in the Province of Manitoba and the North-West Territories having proved utterly inadequate, others will have to be substituted, so as to afford full and complete protection to this valuable fish during its breeding season.

An Inspector, Mr. Alex. McQueen, of Winnipeg, vested with magisterial powers, has been appointed, as well as a resident Fishery Overseer, Mr. F. C. Gilchrist, of Fort Qu'Appelle, for the Qu'Appelle district and vicinity. The system will be gradually extended as circumstances may demand, and other officers located at places where most needed.

GENERAL RECAPITULATION

## EXPENDITURE.

The total expenditure for the Fisheries Service during the financial year ending 30th June, 1884, amounted to \$116,531.64, as follows :—

|  |             |
|--|-------------|
| General service.....   | \$69,011 06 |
| Fish-breeding .....  | 27,585 07   |
| Maintenance of fisheries protection steamer "La<br>Canadienne" ..... | 19,935 53   |

This expenditure is sub-divided as follows :—

*Nova Scotia.*

|   |                  |
|---|------------------|
| Fishery officers' salaries and disbursements. | \$15,600 01      |
| Fish-breeding.....                            | 4,728 11         |
|   | <u>20,328 12</u> |

*New Brunswick.*

|   |                  |
|---|------------------|
| Fishery officers' salaries and disbursements. | \$14,388 02      |
| Fish-breeding.....                            | 2,327 06         |
|   | <u>16,715 08</u> |

*Quebec.*

|   |                  |
|---|------------------|
| Fishery officers' salaries and disbursements. | \$13,186 26      |
| Fish-breeding.....                            | 8,512 11         |
|   | <u>21,698 37</u> |

*Prince Edward Island.*

|   |                 |
|---|-----------------|
| Fishery officers' salaries and disbursements. | \$2,767 98      |
| Fish-breeding .....                           | 771 40          |
|   | <u>3,539 38</u> |

*British Columbia.*

|   |                 |
|---|-----------------|
| Fishery officers' salaries and disbursements. | \$2,231 97      |
| Building fish hatchery.....                   | 3,704 31        |
|   | <u>5,936 28</u> |

*Ontario.*

|   |                  |
|---|------------------|
| Fishery officers' salaries and disbursements. | \$15,192 73      |
| Fish-breeding.....                            | 8,011 17         |

## RECEIPTS.

The collections made during the fiscal year are arranged under the following heads :—

*Ontario.*

Rents, license fees and fines ..... \$11,345 14

*New Brunswick.*

Rents, taxes on nets, and fines ..... 3,905 66

*Quebec.*

Rents, license fees and fines ..... 2,715 02

*Nova Scotia.*

Fishery licenses and fines ..... 1,833 18

*British Columbia.*

Salmon fishery licenses ..... 127 50

*Prince Edward Island.*

License fees ..... 80 00

---

\$20,065 50

---

## LICENSES ISSUED.

The number of fishery licenses issued during the season of 1884 is as follows:—

*Ontario.*

|                               |       |       |
|-------------------------------|-------|-------|

| Total ..... | 6,195 |
|-------------|-------|

## FISH-BREEDING.

---

Thirteen establishments for the artificial propagation of fish are now in actual operation in the several Provinces of the Dominion of Canada. These are at the present time largely filled with fish eggs, collected at various points during the spawning season of 1884.

The total number of young fish of various kinds hatched and distributed in 1884 amounted to 53,143,000, and the total quantity of fish eggs laid down in all the hatcheries during the fall of the same year was 66,033,000.

Mr. S. Wilmot's Report and other detailed statements connected with fish-breeding operations during the year 1884 will be found at Part II of the present Report.

## FISHING BOUNTIES.

The total number of Bounty Claims received in 1883 was 13,604. Of this number, 523 were rejected for non-compliance with the requirements of the law and instructions. The total number paid during the above named year was 13,081; an increase of 1,109 over the year 1882.

The total amount of Bounties paid to vessels and boats was \$130,227.35.

The number of vessels claiming the Bounty was 902, with a tonnage of 34,549 tons, an increase of 116 vessels, with a tonnage of 6,938 tons, over 1882. This large increase is chiefly made up in the Province of Nova Scotia, and was the means of distributing among the owners and crews of that Province a sum of \$10,000 in excess of that of the previous year.

The number of boats which received the Bounty was 12,272, as against 11,225 in 1882; an increase of 1,047 boats.

Owing to the inadequacy of the grant, it was found impossible to continue the system of doubling the rate to boats, inaugurated in 1882, and the former rate of \$2.50 per man had to be adhered to.

Since the publication of the preliminary report the sum of \$117.50 has been paid on suspended claims for the year 1883, as follows:—

### PROVINCE OF QUEBEC.

#### SAGUENAY COUNTY—VESSELS.

Full details showing the amounts paid to vessels and boats in each Province are given at page 54 and following, of this report.

For the better information and guidance of fishermen claiming bounty for the year 1884, and others engaged in the transmission of claims and the distribution of the money, the following circular was distributed amongst claimants :—

## FISHING BOUNTIES, 1884.

## INSTRUCTIONS TO CLAIMANTS.

*Boats.*

1. Claimants to fishing bounty must have been engaged at least three months in seafishing, exclusive of salmon, shad, lobster and other fish and fisheries exempted from the operation of the Washington Treaty, and have caught not less than 2,500 pounds of sea-fish per man.

2. No bounty will be paid to boats measuring less than 14 feet keel, and no more than three men (the owner included) will be allowed as claimants in boat under 20 feet.

3. Dates and localities of fishing must be stated in the claim, as well as the quantity and kinds of sea-fish caught.

4. Ages of men must be given.

5. Returns must be sworn to as true and correct in all their particulars.

6. Only one claim will be allowed in each season, even though the claimant may have fished in two vessels, or in a vessel and a boat, or in two boats. Any person or persons detected making false returns will be debarred from participation in the bounty.

7. Claims must be filed on or before the 31st December.

8. Customs officers and fishery overseers will supply the requisite blanks, free of charge, and, after certifying the same, will transmit them to the Department of Fisheries.

*Vessels.*

9. Canadian registered vessels of 10 tons and upwards (up to 80 tons) which have been engaged during a period of three months in the catch of sea-fish not exempted under the Washington Treaty, are entitled to a bounty of \$2 per ton, one-half of which is payable to the owner or owners, and the other half to the crew.

10. Owners of vessels may, after the present season, and before proceeding on a fishing voyage, be required to procure a license from the nearest Collector of Customs, who will, subsequently, grant a certificate, stating that all the requirements of the statute have been complied with, and upon this certificate being filed with the claim, the bounty will be paid.

11. Directions contained in paragraphs 3, 4, 5, 6, 7 and 8 apply to vessels as well as to boats.

CONCLUSION.

The importance of the interests administered by this Department renders it imperative that, the fishery laws and regulations be enforced in a firm, though considerate, manner. In this connection, it might be mentioned that fishermen, as a rule, do not fully realize the importance of protective measures, and fail in many cases to support the Department in its endeavors to carry out a wise policy for the preservation of breeding fish, and the ultimate benefit of fishermen themselves. The above remarks apply with special force to the salmon and lobster fisheries.

I have the honour to be, Sir,

Your obedient servant,

JOHN TILTON,

*Deputy Minister of Fisheries.*

No. 2.

NOVA SCOTIA.

ANNUAL REPORT ON THE FISHERIES OF NOVA SCOTIA FOR THE YEAR 1884, BY W. H. ROGERS, ESQ., INSPECTOR.

AMHERST, N.S., 31st December, 1884.

Hon. A. W. McLELAN,  
Minister of Marine and Fisheries.

SIR,—In submitting my report on the fisheries of Nova Scotia for the year just closed, I am pleased to be able to point to encouraging evidence of future increase, as well as a very largely improved yield for the past over any preceding year since the confederation of the Provinces, if not in the entire history of Nova Scotia. Prominent among the causes of this encouraging growth of our fishing interests, I hope to be able to show the work of your Department in protecting and cultivating our inland or river fish, no less than the inducements held out to the people to engage in this profitable industry, in bounties and in offering every encouragement and aid in the improvement of fishing appliances. The mackerel trap, which was introduced in the Counties of Shelburne and Yarmouth about the year 1870, amid much opposition, is rapidly coming into general use, and its advantages are not only being seen in the increased catch of mackerel, but also in that of herring and other fish, and indirectly in the regular and abundant supply of bait to the line fishermen.

The entire crop for the present year, at the prices uniformly given in these returns, amounts to \$8,763,779.36, being an increase of \$1,074,404.61, or about 14 per cent. over the previous year. The profits of the business, in consequence of the small prices obtained and the dullness of the markets, have been small, and our fishermen on many parts of the coast have a gloomy winter before them. I do not, however, anticipate much actual suffering.

The increase is confined chiefly to the four items following:—

|                      |            |
|----------------------|------------|
| Mackerel, about..... | \$ 660,000 |
| Cod " .....          | 270,000    |
| Herring " .....      | 230,000    |
| Lobsters " .....     | 70,000     |

These estimates include both Cape Breton and Nova Scotia proper. The river fisheries in both sections of the Province are rapidly improving, as the following facts and figures, the general accuracy of which I am prepared to say may fully be relied upon, will prove:—

SALMON.

This kind of fish, regarding whose movements and prospects there has been much controversy for some few years past, is behaving just about as I have always contended it would, and is subject to the same general laws of atmosphere and weather which influence the movements of all other fish, and which affect adversely or otherwise their annual or periodical productiveness. That there has been an annual

decline in the quantity of these fish taken all along the northern coast of the Atlantic, from Hudson's Bay to Cape Hatteras, no man can deny, and, because of this decline, many persons have been very freely and dogmatically predicting a speedy annihilation of our salmon fishery, and point to certain local abuses as the cause, and that because the few millions of fry put into the streams, from two or three small hatcheries, have not only not prevented the ebb-tide in our salmon product but have not caused a great boom, fish-culture, as conducted in Canada, is a failure. With such views I have no sympathy. On the contrary, I am fully satisfied that all the visible results that any person, having any accurate knowledge of salmon fisheries in this or any other country could expect, are to be seen, at all events in some of the rivers of this Province. The difficulty with these people is that they have been expecting altogether too much without looking into the subject.

I claim that much has been done towards the increase in this fishery by the protection during the close season, and in the opening of the mill-dams for the easy ascent of the fish to their natural spawning grounds. I am ready to admit that the hatcheries have contributed their small percentage to the general improvement as above referred to, and I expect before many years, a much larger crop of salmon than has ever been taken in the Province.

The salmon crop of Nova Scotia and Cape Breton has been for the years—

|           | Lbs.    |
|-----------|---------|
| 1880..... | 383,550 |
| 1881..... | 279,943 |
| 1882..... | 580,061 |
| 1883..... | 575,940 |
| 1884..... | 730,984 |

So that we are clearly on the flood-tide of increase, which, I think, is likely to continue for some time yet, with probable slight annual fluctuations, caused, not so much by the scarcity or abundance of fish, but by the influence of the weather upon the modes of catching them.

The protection of the salmon fishery from the operations of the poacher, and the opening of the mill-dams as rapidly as possible for the easy ascent of the fish to their natural spawning beds, are essential, if a continued improvement is looked for. Artificial culture, properly and economically conducted, for the purpose of restocking rivers, entirely depleted of fish, as in the case of Wallace River, must, however, pay well in the end.

As the salmon have free water to ascend the rivers after the 15th August, with the exception of the hinderance offered by poachers, I do not think that the spring fishing legally conducted will materially exhaust the supply, because in this Province, at least, the great bulk of the spawning fish do not enter the rivers until the fall rains swell the streams.

I here reproduce a letter just received from James A. Tory, Esq., Overseer for Guysboro', as good an authority as there is in Nova Scotia in fishery matters, and he will be seen to corroborate my views as to the decline of the salmon fishery up to 1882:—

"In reply to yours of the 22nd inst., in reference to the catch of salmon, I can only speak of this County, but I have no doubt the same reasons are applicable to the other Counties. Formerly a considerable portion that appeared in the returns were taken on the coast of Labrador and Cape Breton, as well as on the shores of this county; but the fishery in the two former places has been totally given up, and to a large extent in the latter. This will account for the falling off during the past ten years. The catch upon the coast will vary from year to year, and my experience is, that when the season for fishing is wet or the rivers high, the catch is short. This, to my mind, proves that the fish escape the nets by entering the rivers. Another reason is the nets are dirty and foul, so the fish will not mesh in them. The most of the catch is about the mouth of the rivers. I think the salmon are as plenty on the coast as they were ten years ago, only the facilities for catching are not so great."

Before dismissing this subject, I beg to say that in my opinion the penalties for illegal salmon fishing are not sufficiently heavy. Fines should be from, say \$30, upwards, with a term of imprisonment, and those killing salmon in a fishway should be given not less than twelve months imprisonment. This sort of vandalism is on the increase, and the worst feature of it is that the culprits receive, in too many cases, the countenance and moral support of respectable citizens, which emboldens them in their illegal and dishonest operations. I am very decided in the belief that these people will never be properly checked until the vice of the law is given another turn or two, that the sting may be the more painful.

## ALEWIVES.

This branch of the fisheries maintains the large increase of the past four years. The average annual yield of the four years from 1876 to 1879, both inclusive, was 7,050 barrels, and of the last five years, from 1880 to 1884, both inclusive, was 20,000 barrels, nearly three times as much as the former; and yet, in the face of facts of this kind, there are those who assert that the river fisheries of Nova Scotia are rapidly declining. If the above fact is evidence of decline, the more of it the better. I venture to predict a still further increase in the immediate future. The following table will show the annual yield of this item since 1875:—

|            | Barrels. |
|------------|----------|
| 1876 ..... | 7,616    |
| 1877 ..... | 5,443    |
| 1878 ..... | 5,733    |
| 1879 ..... | 9,409    |
| 1880 ..... | 16,145   |
| 1881 ..... | 22,474   |
| 1882 ..... | 21,656   |
| 1883 ..... | 18,346   |
| 1884 ..... | 20,688   |

## SHAD.

I am again, contrary to my expectations, compelled to report a still further decline in this branch of the fisheries, but I think we are now at the lowest and may, as in the alewife, salmon, and Digby herring fisheries, expect an annual increase for some years to come. During the four years, from 1870 to 1873, both inclusive, we caught 20,870 barrels; from 1874 to 1877, 25,732 barrels, and from 1878 to 1881, 34,650 barrels. The next four years will end with 1885, but as the past three have only realized 12,850 barrels, we will need to catch over 20,000 barrels the coming year to hold our own, and this I do not expect. Still the increase will come, particularly so as the Americans are very extensively cultivating these fish. It is my belief that shad move along the coast southwardly in the fall and enter the rivers of the southern States to spawn in the month of January, coming, as the fishermen of Florida affirm, from the north, while they enter the Bay of Fundy in the middle of June, coming from the south. If, as some persons hold, the Bay of Fundy shad fishery is the product of the St. John and other provincial rivers, the decline should be most marked in these rivers; but this does not seem to be the case, particularly with the St. John River, and I presume the people catch all they can while they are ascending the streams. According to the returns of shad taken in the St. John River Counties, there appears to be no decline, while the few which it is said escape the harbour weirs and go up the bay to feed must multiply marvellously on their short journey, because from ten to twelve thousand barrels per annum have been taken up the bay which do not enter the rivers there. Where do they come from, then, if not from rivers further south? The native shad are few in number in any of our rivers, and spawn early in the spring, coming down about the last of June and 1st of July, spent and unfit for food, while the bay shad are caught about the 15th and 20th June and are then quite fat.

The shad fishery is, however, pursued with much enterprise, and the natural source of supply is probably overtaxed, but I still think this will be fully met by artificial culture, so extensively conducted in the United States.

#### HERRING.

This fishery has given a largely increased crop. As stated in my last annual report, the annual average yield for the ten years, from 1869 to 1879, was 147,105 barrels, and for the four years, 1880 to 1883, 183,443 barrels, being an average increase of 36,338 per annum; but the catch of 1884 outstrips all past experience, amounting to 250,554 barrels, an increase of 65,111 barrels—35 per cent. over the average of the previous four years. The catch of

#### “DIGBY CHICKENS”

Continues to increase also. They have, during the past season, been more plentiful than for many years, and thus my expectations, often expressed in my reports and other correspondence with your Department, have been most effectually confirmed, in reply to predictions of impending ruin from local abuses. During the years previous to 1880, the annual yield averaged but 28,000 boxes, and during the years from 1880 to 1883, inclusive, 92,803 boxes. This year, we have a yield of no less than 112,785, and so great was the catch in some of the weirs that large numbers were used as manure; the people not being able to cure them before they spoiled.

#### COD.

This fishery shows an increase of 57,277 quintals over the previous year, but the markets have been very dull and prices have ruled low. Hence, the business, during the latter part of the season, was not pursued with as much energy as it otherwise would have been. The bounty annually paid the fishermen is stimulating enterprise, particularly in this branch of the fisheries. On the coast of Labrador the cod fishery was almost a total failure, and those of our own fishermen who went there came home empty-handed, while those who fished on the banks got two and three full faros. The catch along the shores of this Province was generally rather light.

#### MACKEREL.

Our returns this year show the largest crop of mackerel reported since 1871. This is what I confidently expected last year, when I advised the fishermen to have their mackerel gear ready and in good order as I was looking for a large run around our coasts during 1884. The yield amounts to no less than 156,000 barrels. The fish were generally small, however, and sold at low rates. Still the quantity taken was double the average of the three previous years, and the run will probably continue two or three years more; but these fish are so uncertain in their movements, that it is very difficult to establish any plausible theory regarding them.

#### LOBSTERS.

This fishery has been very productive, and 5,145,273 cans have been put up—an increase of 274,934—in addition to which, some 375 tons have been shipped to the United States alive and consumed fresh by the people. There is some difference of opinion as to the proper close time for lobsters. It is quite certain that, during five or six weeks in midsummer they are unfit for food, the time varying from two to three weeks, between the extreme east and west of the Province. I am of the opinion that a uniform close time of six or seven weeks, from the 20th of July to the end of August, or 25th July to the 5th of September, would be preferable to the present law. This would give those fishermen, on coasts obstructed with ice late in the

spring, an opportunity to fish some six or seven weeks in the fall months, when the fish are perfectly good.

#### BASS AND SMELT.

fisheries are annually increasing in importance, and regulations governing them are very necessary. I think those in force in New Brunswick should be extended to this Province. We had no little difficulty in controlling the fishermen at Tidnish, where an important bass fishery was discovered last winter. I have already called the attention of the Department to this subject.

#### FISH-WAYS.

The summer has been so continuously wet, and the streams in consequence so swollen, that nothing could be done until late in the season. Still, with Mr. J. B. Kinney's efficient aid, I have been able to construct seven new ladders, and to repair two or three others, so that we have now in the Province over twenty fish-ways on the model of the new patent, and all are working well. Many more are needed in the Province, and it is to be hoped a good number of these may be built next season. This is, without question, a most important part of our work, and its beneficial effect upon our river fisheries can hardly be over-estimated.

The cost of these structures is proving to be much less than I anticipated it would be at the time of their invention, and in this regard Mr. Kinney deserves the chief credit. He, and all others who are placed in a position to know, are becoming quite enthusiastic over the value, importance and effectiveness of the new ladder.

#### GENERAL REMARKS.

It will be observed that I have discussed the fisheries as including Cape Breton. This could not be well avoided when referring to the comparative yield of the various items with former years.

In regard to fish consumed fresh by the people, I have to say that instructions to Overseers, in pursuance of departmental suggestions, have been variously construed. It will be noticed by the returns that some have entered an estimate for home consumption in value, others more in detail, while others, and, to a certain extent, all have included all consumed by the people in their general figures. It is impossible to attain uniformity in this regard, and I confess that it must be a matter of the greatest difficulty for the Overseers to separate what is consumed by the people from that which enters into commerce. In some counties almost all the fish caught are used by the people where they are taken, and the officers have, as heretofore, entered the whole in the different columns. In my opinion it would be preferable, in many ways, to have all the fish, no matter where or how consumed, entered opposite their proper localities and in their respective columns in the returns, and to ask the overseers to make an estimate in their written reports of the proportion of the total catch used for home consumption. I may remark here that the increase in the general account of the fisheries for the year is not owing to any former omissions in accounting for what has been consumed fresh, as this has always been included by overseers in former years, as above suggested. Hence, all additions to our returns on account of this supposed omission are made in error. The increase for the present year fairly represents the improvement in the fisheries, and is not owing to inaccuracy in the statistics heretofore, a glance at the returns showing that the increase is confined almost entirely to the four items—mackerel, cod, herring and lobsters.

Abuses still exist, to a certain extent, in this Province, but have been so frequently referred to in former reports that a repetition here will be unnecessary. The tendency is strongly towards improvement, especially in districts in charge of active officers.

I append, as usual, synopses of the overseers' reports, which will be found interesting and useful. Many erroneous notions, so prevalent in the early part of our work, have been abandoned, and as our proper work is becoming better understood, the different officers are enabled to give much profitable information regarding the various branches of the fisheries. Nor can I close this report without again referring to the inadequacy of the remuneration these officers receive, and I would strongly urge the necessity of an increase in the scale of salaries paid the Nova Scotia fishery Overseers and Wardens.

I have the honor to be, Sir,

Your obedient servant,

W. H. ROGERS,

*Inspector of Fisheries for Nova Scotia.*

## SYNOPSIS OF FISHERY OVERSEERS' REPORTS.

### ANNAPOLIS COUNTY.

*Overseer W. T. Carty*, of Tupperville, reports that the hook fishing is gradually decreasing in the Bay of Fundy. The catch is largely made up by small vessels which frequent the mouth of the bay. The fishermen attribute the falling off to the great amount of trawling. Herring have been very plentiful on the coast of the Bay of Fundy, and in the Annapolis Basin. The fishermen have not been able to handle one-half of those caught; the Basin being fairly alive with them. Markets have, however, been so low, that great quantities still remain on hand, and those sent away have hardly paid expenses.

The fish-ways at Round Hill, Lequille, and Lawrencetown, are all in good working order. The Beals' dam at Nictaux has been down for two years, thus giving the fish a clear passage. It has been impossible to get a correct account of salmon taken at Round Hill. They have been very plentiful in the brook. There has been no fishing carried on in the Annapolis River; the late freshets having made it impossible.

### ANTIGONISH COUNTY.

*Overseer John McDonald*, of Doctor's Brook, reports that a much larger amount of fish has been taken in Antigonish County this year than for many years past. This he attributes principally to the energy and perseverance of the fishermen along the shores; all the fish being caught in boats. The demand for fish has been good and prices have been on the increase. The fishermen are well satisfied with the system of licensing the salmon fishery, and Mr. McDonald finds that it keeps the best of order among them; quarrelling and rowing for berths being unknown. Spring herring and alewives were more plentiful than for many years past, but the fishermen, not expecting them so abundantly, were not sufficiently prepared. He believes that the catch of mackerel, lobsters and hake would have been double the amount reported had the weather been less stormy. The lobster packers are generally well satisfied with the season's business. *Overseer McDonald* examined all the fish-ways in the County and found them in good repair, but as they do not do their work properly, he would ask the Department to have them rebuilt after the Rogers' model. Owing to the lateness of the fall freshets, it is feared that salmon and other fish did not, this year, reach their proper spawning grounds, and that in consequence a decrease may be looked for.

### COLCHESTER COUNTY.

*Overseer J. W. Davison*, of Upper Economy, regrets to report a still further decrease in shad. It is difficult to explain the continued decrease, but Mr. Davison

thinks that the wind and weather has had much to do with it, the past season being very unfavorable in this respect. He also thinks that between the large numbers of weirs set and of boats with long nets there has been a great deal of over-fishing. In opposition to the opinion of many of the fishermen, Mr. D. believes that these fish will again be as abundant as formerly. There always has been periodical fluctuations, and when there is a large run the number of persons who rush for them and the increase in the number of boats and weirs, the latter set on the flats, where the fish come to feed, are so great that it is not to be wondered at that there follows a decrease. While there are stringent laws for the protection of other fish, shad have been to a large extent entirely unprotected. Mr. Davison strongly recommends that there be a close season while shad are full of spawn, and believes that they should not be caught from 1st November to 15th June.

The close season for salmon has been generally well observed. There are known, however, to be poachers, with the most destructive means of killing fish known—dynamite—who are watching their chances.

There are six fish-ways on the old model in his district, which he hopes will soon be replaced by new ones.

*Overseer Henry Blair*, of North River, also regrets to report a greater scarcity of fish in the bay than usual. The catch on the whole, however, was fair. The run of shad early in the season was very good, but later it was much smaller, when the fishermen became discouraged and gave up. Afterwards, however, there was another good run, which was entirely lost.

Salmon came into the rivers in July, and have been going up ever since, but owing to the wetness of the season and the consequent great height of the river, the catch of both salmon and alewives has been small. The latter were abundant in the Shubenacadie.

*Overseer R. J. Pollock*, of Lower Stewiacke, attributes the small catch of shad on the Stewiacke River to the fact that it was impossible to set nets, owing to the height of the water.

Very few salmon came up this river until after the close season. From September to November they were very plentiful. All the fish caught in his district were used for home consumption.

*Overseer Henderson Gass*, of Tatamagouche, believes that the decreased catch of salmon in his district is owing to the extent to which this fishery is pursued further down the coast for canning purposes. He also believes that the clearing up of the country, in causing the soil to find its way into the rivers, destroys the spawn or prevent its maturity.

Mackerel were very plentiful in the bay during the summer, but so few people were prepared for them that the catch was small.

The only fish-way in his district, at the Balfour Mill, was thoroughly cleaned out in the fall, and is now in good order.

Mr. Gass recommends that an extension of the open season for salmon be made. They do not enter the rivers on that coast until about the 1st of October, when it is unlawful to catch them. He believes that were the people allowed to catch them for a short time after they enter the rivers, to stop poaching afterwards would be a matter of little difficulty.

All the fish caught in his district were consumed by the people.

#### DIGBY COUNTY.

*Overseer William Hanley*, of Digby, reports a decrease in the catch in his district, which he attributes to low prices in the markets, and the consequent non-prosecution of the business. Mackerel entered St. Mary's Bay in large quantities, and the people were so unprepared to cure them that large numbers had to be utilized as compost. From the most reliable authority to be obtained, Mr. Hanley finds that not less than 10,000 barrels were taken in seines by foreign vessels.

Herring were quite as plentiful as usual in the Basin, but not many were taken in the weirs. Very few shad were taken in the weirs in St. Mary's Bay during the past season. The weather has been very unfavorable for fishing. The Salmon River fish-way is in good condition. The county line trap has done well, though taken up before the mackerel entered the bay.

*Overseer J. A. Collins*, of Westport, attributes the decrease of this over the past year's catch, according to the returns, to the facts that the amount reported last year was excessive and that a large number of those heretofore engaged in line fishing this year followed the lobster business. There was a large catch of lobsters, and it is probable that in future this business will be much more largely followed. The catch of mackerel was also large, they being taken principally in St. Mary's Bay. As the head waters of this bay form spawning beds for mackerel and herring, Mr. Collins recommends that some measures be taken for their protection. During the past summer, large quantities of mackerel were allowed to die in the weirs along Digby neck and around St. Mary's Bay, caused by the negligence of the weir owners. The throwing overboard of fish gurry by American and other vessels is a great injury to the mackerel fishery and unless stopped it will destroy the fishing in St. Mary's Bay.

#### GUYSBORO' COUNTY.

*Overseer James A. Tory*, of Guysboro', reports that, although the amount of the season's catch has been about the same as that of 1883, owing to the decline in price of nearly all kinds of fish the business has not been nearly so profitable as last year. Owing to the myriads of squid which swarmed the coast and destroyed them as fast as they meshed in the nets, the catch of fall mackerel was, contrary to confident expectations, almost a total failure. The decrease may appear small, but is very important as to value. Were it not for the causes stated, the catch would doubtless have been far in excess of last year's catch.

The lobster fishery shows a deficiency of 64,200 lbs. This falling off is severely felt by a class of persons unable to bear it, besides the general loss in a commercial point of view. The steady decline of the catch for several years past confirms the fears Mr. Tory has formerly expressed that the over-prosecution and want of efficient protection would ultimately destroy it. The decline in the hook and line fishery is attributed to low prices, which caused the withdrawal of some of the bankers from that fishery, and the shore or boat fishermen turning their attention to the net fishery. Otherwise, this branch of the fisheries would have exceeded former years, as fish were very plentiful.

The herring fishery has, in some portions of this district, far exceeded the catch of former years, and the excess will, to a certain extent, make up the loss on the short catch in other branches; but, at the same time, the low prices given for them has been a serious drawback.

Squid and other bait fish was in very little demand after the bankers were first supplied. Although very abundant during the latter part of the season, very few were taken.

The fishermen of Chedabucto Bay complain of the damage done their fishing gear by the American seiners, and with justice, as from forty to fifty sail could be seen at one time sailing to and fro through the nets, &c. for several weeks, and the fishermen say that whenever and wherever their gear came in the way of the Americans, who were casting their seines, it was "out knife and cut away." Mr. Tory fears fatal results will follow a continuation of such acts, as the fishermen will not endure it. It calls for protection on the part of the Government.

Salmon and alewives entered the rivers in large quantities during the spring and fall, and owing to the height of the rivers they were unmolested, and an increase in these fisheries may be expected. Mr. Tory again urges the necessity for a small out-lay for the purpose of clearing obstructions in the rivers and building proper fish-ways.

*Overscer Allan McQuarrie*, of Sherbrooke, reports a small decrease in the total catch in his district, and that owing to small prices many of the fishermen are sufferers. Fishing in the early part of the season was almost a total failure, but why it is difficult to state. The weather was dark and foggy, and what the fishermen term unfavorable winds prevailed. In the latter part of the season fish were abundant, but the low prices and the destruction of herring in the nets by squid caused a relaxation of effort. The catch of lobsters was an average one, but those of small size were very numerous. The catch of salmon was about the same as usual, but they have not been fished for so persistently as heretofore. The fine rivers of Guysboro' County and the inland lakes would afford excellent opportunities for the artificial culture of these fish; they could be bred to almost any extent, and would prove a great source of wealth to the county. The re-stocking of the lakes and rivers would be universally appreciated by the people.

Trout in the St. Mary's River were much more plentiful than of late years, and were of large size and excellent quality. Alewives and smelts could be largely increased by the removal of obstructions to their ascent of the rivers. Indian Harbour beach is in need of especial attention. The Country Harbour River, so famous for its salmon, trout and alewives, is so badly obstructed in the upper district with jams of driftwood and rubbish that fish cannot ascend to the beautiful clear lakes and sandy bottoms above.

The fish-way at Fisher's mills is a subject of much dispute among interested parties. The very best form is needed, and also a resident warden to guard it properly.

Mr. McQuarrie notified mill owners on the McKeen Brook to cease putting saw-dust in the stream, which has been fast filling up, to the great injury of the fish.

#### HALIFAX COUNTY.

*Overseer Isaac Gaetz*, of Musquodoboit Harbour, reports that the fishermen complained bitterly of the unpropitious character of the past season for the prosecution of their work. While there have been only a few storms that were very severe, and by which the fishermen lost many nets and other material, it has been rough enough almost continually to prevent fishing in small boats. The depression in the West India market for some time past has had a serious effect on the fishing interests, as prices have ruled very low. Mr. Gaetz states that he has taken all the pains possible to get accurate returns of the season's operations, and believes that the figures given are as nearly correct as possible. The salmon fishery has been about the same in extent as last year. There was a heavy freshet about the 1st of July, when the salmon were running, and a great many went up the rivers. Sea trout seemed to be more abundant than for some years past, but he regrets to have to report a falling off in alewives. He hopes, however, the decrease is only temporary, and has been assured from most reliable sources that multitudes of young fish went down the rivers. Mackerel have been more abundant this season than for some years past, and the fishermen say that, had the weather been favorable, they could have got all they wanted. The falling off in herring is owing entirely to storms that prevailed about the time they made their appearance on the coast. The cod fishery has not been a success on the Halifax coast this year, and were it not for the bounty that encourages the building and employment of vessels, there would have been a very light catch of cod to report. The fact that the lobster business has been so active that most of the fishermen have devoted their attention almost exclusively to it, until the canneries closed, accounts in part for the decrease in cod. There has been a large increase in canned lobsters. Nine factories have been in operation in Mr. Gaetz's district during the past year, and he believes that two or three new ones are to be erected for the coming season. He used his best endeavors to keep the rivers and streams unobstructed. There are a number of lawless creatures he has to deal with, who lie around all day and grumble about hard times, while they spend their nights, or a part of them, in poaching the rivers. Mr. Gaetz rebuilt the fish way at Moser's

River, which was partly destroyed by freshets, and also made a small expenditure on Salmon River, in order to allow salmon, trout and other fish to get up. The sawdust trouble is making an appearance, notably at Sheet Harbour, but he cannot see that it injures the fisheries to any extent, with the exception of the annoyance it causes the fishermen by getting into their nets.

*Overseer John Fitzgerald*, of Portuguese Cove, reports that the catch of fish in his district is about the same as that of last year; that no abuses exist of which he is aware, and that the close season has been strictly observed. There are five fish-ways in his district, all of which have been kept open, and all are in fair working order. The fall fishing proved a total failure, owing to the prevailing high winds, which kept mackerel off shore.

#### HANTS COUNTY.

*Overseer T. B. O'Brien*, of Maitland, reports a slight decrease in the catch of salmon and shad, but an increase in other branches sufficient to make up for the decrease. More attention is being paid to the alewife fishery than heretofore. The shad caught this season were of the best quality and readily sold for nearly double the price at what they are rated in the returns. Squid have been very plentiful in the bay, but have proved most destructive to the shad after they had meshed in the nets. He believes that they will have a tendency to keep shad from the bay.

#### KING'S COUNTY.

*Overseer R. F. Reid* reports an increase in the alewives fishery in his district over that of several years past. Now that two new ladders, after the new model, have been placed in the Benjamin mill-dam, which appear to be all that can be desired in the way of a fish-pass, he has hopes there may continue to be an increase. He suggests, however, that a ladder be placed in the Dodge mill-dam near the lake, which would give the fish a free passage to their spawning grounds, they having now to go up a small brook to get to the lake.

Mr. Reid is pleased to state that there has been quite an improvement in the catch of salmon this season over that of the last, but he is unable to assign a cause for the increase in either alewives or salmon.

*Overseer James S. Miller*, of Canning, reports an almost total failure in the shad fishery in King's County for the past season, and also in the herring fishery of Medford. The cause of failure seems to be a scarcity of fish rather than a less vigorous prosecution of the fisheries. This does not prove that the fisheries in these places are becoming exhausted. Experience goes to show that there is a continual ebb and flow in the catch of fish in any given place, and there can be little doubt that the shad fishery will again prove a profitable industry in King's County.

#### LUNENBURG COUNTY.

*Overseer George Redden*, of Chester, reports that, since obstructions have been removed from Larder's River, the rivers in his district are in good order and there can be no difficulty in the fish ascending to their spawning grounds. There has been a marked increase in alewives this season; the amount caught being double that of last year. There has also been an increase in the catch of salmon, which Mr. Redden accounts for by the restocking of the rivers by the Department. He has had all the fish-ways in his district that were out of order repaired, and hopes to see the new ladder placed in Upper Gold River. The close time has been well observed, but the greatest difficulty is to prevent dipping in Gold River. Mr. Redden hopes that a regulation may be made forbidding it, as it is the source of great injury to the salmon fishery.

There has been a large increase in mackerel this season, but the fish have been of a poor quality. The increase is principally owing to the traps. The increase in

cod is owing to a more vigorous prosecution of that fishery. There has been a decrease in the catch of herring, owing to small prices obtained for them.

There are three small streams that alewives frequent, which should be cleared of obstructions, and were they properly opened, there would doubtless be a large increase in the alewife fishery in this district.

*Overseer C. E. Goddard*, of Bridgewater, reports that the catch of salmon in the LaHave River has been greater than in any year before, since his appointment. The water in the river was at times very high and, to the chagrin of the poachers, gave the salmon an excellent opportunity to pass the dams. The estimated catch of salmon from the mouth of the LaHave to Davison's lower dam was about 3,000 lbs. Mr. Goddard believes that a warden is very much needed there to assist him in his onerous duties. It is now impossible to get a local constable to arrest offending parties, but a warden would be expected to obey instructions of the Overseer, and poachers would no longer violate the law with impunity. During May he visited all the mills on the river and its tributaries, and notified the owners that they must prepare a proper place for depositing their sawdust and mill rubbish.

#### PICTOU COUNTY.

*Overseer A. C. Pritchard*, of New Glasgow, regrets to report that the run of salmon in the rivers of this district last season was exceptionally small. This he attributes to the unusual lateness of the freshets. During the ordinary spawning season there was not sufficient water in the river to admit of the passage of fish; consequently, when the freshets came but few made their way to the spawning grounds. Large schools lay for weeks in the basins at the head of the tidal waters, and it is generally believed they spawned there.

A quantity of fresh salmon was brought from the French River from time to time during last close season and sold at the Vale Colliery, and although Mr. Pritchard has made every effort to have the offending parties arrested he has been as yet unsuccessful.

The fish-ways on Middle and East Rivers have been well tested by the late freshets, and although logs and a quantity of other material were carried away, no damage was done. He would suggest that the old dam at Alma, Middle River, be destroyed or a fish-way put in there.

*Overseer Robert Sutherland*, of River John, says that he has taken every available means at his disposal to obtain correct accounts of all fish caught in his district. There has been no instance of illegal practises brought to his notice. He accounts for the scarcity of salmon from the fact that the dams are without fish-ways, and he hopes that efficient ones may be built there next season.

#### QUEEN'S COUNTY.

*Overseer S. T. N. Sellon*, of Liverpool, reports that the line fishery would be fully up to what it has been in the past, but that a different mode is necessary for a successful catch. Vessels fitted for the work are now being built, and the bounty is giving an impetus to further advance.

Labrador fishing has been a failure, not, says Mr. Sellon, because the fish are not there, but because our system is like the old Dutch plan—not up to the times. For want of bait, boat fishing has not been remunerative. Herring are as abundant as ever in deep water, but do not come into the bays and harbours as usual. They are a clean fish, and in his opinion keep outside of lobster pots, nets, ropes and the filthy garbage used for bait.

After lobster fishing was over, mackerel were abundant, and, although of small size, were of good quality. There can be no question that salmon have been on the increase. This must be patent to every one who will believe what they can see in the ladders, in the river, and in the lakes. The ladders are in good working order, and since they have been in use no salmon have been seen under the dams. They

serve as open doors for the fish to pass through on their way to the spawning grounds.

More alewives have been taken and more seen in our river than for many years. It is supposed that many went up when the freshet was high and too strong for dipping. A very great number of young alewives came down, and they were seen below the dams in the harbour and around the docks. The fishery law has been reasonably respected. Lobster fishing is an important and profitable business for many families all around the shores. No extension of time should be given this fishery on the southern shore of this Province. The Department saw fit several years ago to dispense with the services of a number of wardens for incompetency, and since that time Mr. Sellon has had to do the work, extending from the county line at Lunenburg to Shelburne. The fishery interest has increased in importance in the county, and a willing and interested warden is necessary to aid him in guarding the harbour and river at night. The great increase of American fishing vessels in the harbours requires extra vigilance, that they may be prevented from throwing garbage inside the line allowed.

*Overseer John Fitzgerald*, of Mill Village, reports an increase in the catch of sea-fish—herring, cod, and mackerel—also a small increase in the catch of salmon in the Medway River. The increase in the latter was in the upper reaches of the river, showing that the fish have an unobstructed course. There is good reason for the belief that the long period of easterly winds in April and May had the effect of diminishing the catch of salmon and alewives, and during their continuance scarcely any of either fish were caught, while the catch largely increased after the winds changed. The number of young fish which have come down the river is a gratifying proof that an increase may be looked for in the future. Smelts were very plentiful and sea trout, some of which were very large, are on the increase. There are no artificial fish-ways in any of the dams on the Medway. The mill-owners, as well as the rest of the people, appreciate the value of the fisheries, and vie with each other in efforts for their preservation. Some trouble has arisen between owners of adjoining properties on the Port Medway Harbour as to the rights of fishing berths; but, for the present, the disputes have been amicably settled.

#### SHELBURNE COUNTY.

*Overseer William J. McGill*, of Shelburne, reports about the same number of vessels engaged in the fisheries this year as last, but their trips show an increase of 10,181 quintals of cod. A number of fine schooners have been launched this fall, intended for bank fishing. The shore fishery has not been very productive, and many boats were unable to claim the bounty, not having taken the necessary quantity of fish. The reason assigned for the failure is the fact that squid have been unusually abundant, and their presence tends to keep other fish off shore. Lobsters were as plentiful as usual, and show no signs of exhaustion. An action was entered against one person for taking undersized lobsters, but failed owing to technical objections. Upon hearing of the issue of a second summons, the offender fled and has not since reappeared.

The catch of alewives compares favorably with that of other years, and an increase is reported in Roseway River. The new fishway has proved satisfactory, as a large number of both alewives and salmon were seen passing up. The early fall freshet gave the young alewives a favorable opportunity to return to the sea, and they were well protected. The fish-ways are in good repair, and Warden Holden reports salmon above the Jordan River dam.

*Overseer E. S. Goudy*, of Barrington, reports that four new vessels were added to the bank fishing fleet in his district during the past year. The bank fishermen returned with full fares, but the total catch of cod, in comparison with that of last year, is less, owing to the small catches in boats on the shore, and low prices offered. Both the mackerel and herring fisheries of the district show considerable improvement.

The new business of shipping lobsters to the United States alive has been carried on quite extensively, and has amounted to about \$14,761. The close season and the law respecting small lobsters have been well observed. Both packers and fishermen are well-satisfied with the present regulations, and desire nothing better.

The only fishway in this district—that at Clyde River—has been kept well opened and has given entire satisfaction. The catch of alewives shows an increase over that of last year.

YARMOUTH COUNTY.

*Overseer Enos Gardner*, of Tusket, says that the returns have been made from most careful enquiry at the different fishing districts, and are as nearly correct as possible. The amount for home consumption included in the return is about \$50,000. The bank and shore fishermen have all made extra large fares this year, and a much larger catch of cod has been made. The return of fish oil is also larger, and the new machinery used for extracting the oil has been found to be a great advantage. The prices for all kinds of fish have ruled low and, notwithstanding the large catch, matters are not so prosperous among fishermen as they have been the last two years.

In regard to river fisheries, alewives show a small increase. The high freshets prevented many from being taken, but they were then the better enabled to ascend to head waters. The young fish have come down in large numbers, and *Mr. Gardner* looks forward for a large increase in this fishery in the future. Salmon fishing was a little better than last year. The fish struck in early and were at first plentiful, but afterwards they became scarce, and there was not again a good run until June. The price was this season low, and the greater part was used for home consumption. In April last *Mr. Wilmot* brought some ova from the Bedford hatchery and put up a small hatchery, which he left in charge of Warden *John A. Hatfield*. The ova hatched out successfully and was distributed by the warden in the lakes. Should the artificial re-stocking of the rivers be continued, *Mr. Gardner* believes that in a few years the rivers of Yarmouth will be alive with salmon, as in former years. It would be a great advantage to have a permanent hatchery erected on the river. Last year the patent fish-way was put in at Carleton Mills and has given entire satisfaction. The fish ascend readily, and he has no doubt that in a few years the fish will be back in that river, as they were before the erection of the dam. Parties at Carleton say that quite a number of young fish came down in the fall. The new ladder put in at the gang mill, *Kemptonville*, he inspected with Warden *Hatfield* shortly after it was finished, and it appeared to him to be thoroughly and substantially built, and, as the other, will no doubt give a good passage for fish. As the rivers are now comparatively free from obstructions, *Mr. Gardner* can see no reason why the fish should not largely increase.

The lobster fishing was prosecuted with energy and large quantities were taken. The prices for live lobsters in the United States was low and business was not, therefore, as profitable as in past years. The factories put up a much larger quantity than last year. The regulations were strictly observed throughout this county. It is the opinion of many intelligent fishermen, and *Mr. Gardner* agrees with them, that July and August should be a close time for lobster fishing, as a large proportion are soft and unfit for food.

The shingle machine owners at Carleton have kept their sawdust from drifting into the river, and burnt it. The other mills, however, still continue to allow it to drift in, and in time the lake will be filled, unless a stop is put to it. Of the four mackerel traps in this district, two were successful, the others not. The large catch of cod is, however, attributed to the traps, they giving a good supply of bait. The experiment of catching mackerel by a floating trap net was tried, but owing to the strong tides, proved unsuccessful.

*Overseer George H. Robertson*, of Yarmouth, reports that the past season has proved a good one for trap nets, nearly all having taken a fair quantity of mackerel.

Herrings were plentiful, but owing to the large number of what are called dog-fish, which destroy the nets, it was almost impossible to catch them. The net regulation has been generally well observed, but it will be difficult to enforce it unless a penalty is fixed in case of violation. Shad have been scarce, and the catch was much smaller than that of last year. The bank fishermen have all had full fares, but owing to low prices the business has not been very remunerative. Lobsters have been plentiful, and the close season has been well observed. If the fishermen were allowed to catch lobsters in the months of February and March it would be a great benefit to them and no injury to the fisheries. Lobsters caught in fall and spring are better for food and bring a higher price than those caught in July and August.

## CUMBERLAND COUNTY.

*Overseer Robert Goodwin*, of Baie Verte, N. B., who has a portion of the above county under his charge, reports that after the ice left the bay, in April, herrings were quite plentiful and good catches were made. The ice, however, returned and carried away quite a number of nets. The catch was, on the whole, good, notwithstanding, and the quality of the fish excellent. Mackerel were plentiful and of good quality, but they are not fished for energetically. There is a small lobster factory in his district, which did a good business, and preparations are being made to extend this branch of the fisheries next year. A discovery of a bass fishery was made in Tidnish River last winter under peculiar circumstances. About the middle of January two nets were put in the river for smelts, when, much to the surprise of all, a large catch of bass was made—a thing never before known there. A large net was used and during two weeks it was with the greatest difficulty that wholesale slaughter was prevented. Over thirty tons of these valuable fish were taken in that small stream. They found ready sale in both Provinces, and many were shipped to Boston at good prices. As the season advanced, the bass seemed to move down stream and finally disappeared. The last were taken in March.

---

## CAPE BRETON.

---

### REPORT OF A. C. BERTRAM, ESQ., FISHERY OFFICER, ON THE FISHERIES OF CAPE BRETON ISLAND.

---

NORTH SYDNEY, C.B., 31st December, 1884.

HON. A. W. McLELAN,  
Minister of Marine and Fisheries.

SIR,—I have the honour to submit herewith the first annual report of the fisheries of the island of Cape Breton—embracing the four counties of Cape Breton, Richmond, Inverness and Victoria, as forming a distinct district from that of Nova Scotia proper—for the calendar year ending this date.

It will be observed, from the tabulated statements following, that the aggregate quantity and value of the fish caught on the coast and inland waters of the island, for the year 1884, exceed those for the year 1883. The increase in quantities of the leading branches prosecuted were: Salmon, over 35 per cent.; alewives, 90 per cent.; herring, 45 per cent.; codfish, about 4.25 per cent.; haddock, over 45 per cent.; and the total increase in the value of the catch of all kinds was \$153,612.

COMPARATIVE STATEMENT of the product of the Fisheries in the Island of Cape Breton, for the Years 1884 and 1883 respectively.

| Kinds of Fish.  |        | Catch in<br>1884. | Catch in<br>1883. | Increase. | Decrease. |
|-----------------|--------|-------------------|-------------------|-----------|-----------|
| Salmon.....     | Lbs.   | 146,400           | 109,072           | 37,328    |           |
| Codfish.....    | Qntrs. | 133,609           | 128,109           | 5,500     |           |
| Haddock.....    | "      | 39,750            | 27,506            | 12,244    |           |
| Herring.....    | Brls.  | 57,263            | 39,418            | 17,845    |           |
| Alewives.....   | "      | 2,801             | 1,503             | 1,298     |           |
| Shad.....       | "      | 52                | 20                | 32        |           |
| Mackerel.....   | "      | 26,172            | 25,757            | 415       |           |
| Lobsters.....   | Cans   | 619,069           | 525,099           | 93,970    |           |

Of the increases above noted, the chief portions have been realized from the fisheries of the counties of Cape Breton and Richmond.

The total value of the fish product for 1884 was \$1,421,787, and the capital invested in vessels, boats, nets and all floating material, was \$5,325,390.

GENERAL REMARKS ON THE SEVERAL FISHERIES—SEINE FISHING—  
FISHING BY FOREIGNERS—TRANSPORT OF FISH—BRAS D'OR  
LAKE FISHERIES, &c., &c.

SALMON.

The marked increase in the catch of this fish, for the year 1884, whilst gratifying, is not owing to any circumstances, either extraordinary or accidental; on the contrary, for reasons hereinafter mentioned, there is good reason for believing that this most valuable branch of fishery will go on to develop into much larger proportions than at present for many successive years yet to come. One or two localities which experienced a falling off in the catch of the year owe the misfortune to merely temporary local causes, not likely to prove a permanent injury.

COD AND HADDOCK.

These continue to yield about 50 per cent. of the total yield, in value, of the fishery product of the island. This branch of fishery is very prolific on the Cape Breton coast, and with more energy than at present exercised by the resident fishermen, this invaluable industry is capable of a development manifold its present product.

HERRING.

The gratifying increase for the year just closed in the herring fishery over the product of the previous year, was profitable beyond the ordinary *pro rata* market.

value of the increased quantity. The signal failure of this fishery on the coast of Labrador and adjacent shores gave rise to a demand for Cape Breton herring, in Montreal and other markets which used to be supplied from Labrador and the Newfoundland shores. This foothold in new markets is quite likely to be, to a certain extent, retained by the Cape Breton product, owing to its superior quality. The herring caught around the entire coast is of a superior quality, but there occurs "a run" of herring along the eastern coast, in the month of July, which for quality and size is said to be unequalled among all known herring fisheries. The remarks already made in reference to the possible further development of the cod and haddock fisheries apply with equal force to herring fishery, and if Cape Breton fishermen persevere in the care and honesty they have hitherto exercised in the curing, packing and grading of their herring, they are tolerably sure not only to retain the entrance they gained last year in new markets, but will also make their herring the most generally enquired after, wherever such are bought for local consumption.

#### ALEWIVES.

The quantity of this early spring fish actually caught is not fully represented in the foregoing table—much more being actually caught than is there represented. It is, indeed, impossible to obtain more than fairly approximate returns of the actual quantity caught, because, first, they are retailed to consumers directly out of the weirs, fresh, where taken, and after they ascend the streams considerable numbers are taken in small quantities not accounted for. Secondly, they are caught and purchased for the purposes of bait only, and are not salted down to any extent, except for export, not being so much in favor for domestic consumption as most of the other species referred to. They ascend the rivers from the sea in early spring, as soon as the ice moves from off the shores, frequently to long distances, before reaching the spawning resorts, where they remain unmolested until autumn, at which time they return seawards, in vast numbers, and although at this time unfit for food, serve an important use to the fishermen, by attracting landwards into bays and estuaries vast schools of mackerel which prey upon them.

#### SHAD.

The shad fishery has hitherto been almost entirely overlooked by Cape Breton fishermen, who seem to have regarded it as something that did not exist in sufficient quantity to warrant giving it special attention. A closer investigation shows this opinion to be utterly fallacious, and that this valuable and favorite fish does frequent certain localities in such numbers as to warrant a closer attention to the catching of it. This new branch of fishing will, doubtless, be henceforward stimulated into much greater activity than in the past, owing to the remunerative prices it readily commands. The increase in the catch for the year just closed, over that of the previous year, although but slight—20 barrels—is the more hopeful from the fact that Cape Breton County stands almost alone in any effort at an experiment in this direction, as of the 52 barrels enumerated in the preceding table, 47 barrels were secured in this county. The fact is now realized that this valuable fish visits the shores of this island in several localities and in large quantities, so that, owing to the superior inducements referred to, there is good reason for believing that the fishing of this species will, at no distant day, make an important addition to the general income derived from the fishing industry of the island.

#### MACKEREL.

The run of mackerel all around the coast was, in general, plentiful, and in some localities extraordinary in abundance. Notwithstanding this, the catch made by the fishermen resident on our own shores was not at all in proportion to what might have been expected from the general abundance of the fish; in fact, it fell short of the catch of some years in which mackerel were, apparently, much less abundant.

The shortage of this year was owing almost solely to a phenomenon long known to fishermen, viz., that there are times when these fish are met with in vast schools, yet will not take bait. Cape Breton fishermen, who prosecute this fishery mainly with hook and line, felt, this year, the full force of the phenomenal circumstance referred to, as it was widely characteristic of the mackerel fishery of the year, and the consequence has been a very much more diminished catch than might otherwise be reasonably expected.

The United States fishermen, who now prosecute this fishery chiefly by seining, derived the full advantage of the abundance of fish, and made large and remunerative catches on the shores of Cape Breton. This seining by the fishermen of the United States, which proved to them so prolific of rich fares, was prosecuted almost entirely inside the headlands and within the bays of the coast, *i.e.*, the three-mile limits; yet it is a fact capable of proof that they had private instructions from home to report, on their arrival there, in their own ports, that their cargoes were taken entirely outside of the three-mile limit. Such an unworthy resort as this, to endeavor to mislead the public in reference to the value of our shore fisheries to them, would be almost incredible, was not the information derived from unmistakably reliable sources.

A circumstance very greatly enhancing the convenience and dispatch for the export of fish from the shores of this island has arisen within the last two years, and which has largely increased the length of time for which United States vessels can remain on the coast of Cape Breton during the fishing season, and thereby securing to them larger catches than they possibly could before. This will be referred to hereinafter, under the head of "Means of Export."

#### LOBSTERS.

The fishing and canning of lobsters is a branch of industry now assuming large proportions in the commerce of the island fisheries. The factories engaged in this business in Cape Breton are placed under serious disadvantages, on account of the date of the close season, as compared with similar industries on the south and western sea-boards of Nova Scotia proper. This comparative disadvantage arises from the late date of the spring season at which the drift ice is found on the eastern, northern and western shores of Cape Breton Island. This is the last coast which the ice, going down the Gulf of St. Lawrence and from the western part of the Straits of Belle Isle, touches upon in southern-bound course, before being caught by the Gulf stream, and sometimes it is found lingering on this coast as late as the 1st of June. Consequently, these waters are at so low a temperature that lobsters do not make their appearance near the shores until some time after the last ice has passed away, so that in the most favorable seasons there is no catch of this fish before the 1st of June, but frequently much later. The present legal period for lobster fishing is from the 1st of May to the 1st of August, which, however well adapted to the prevailing circumstances on the southern and western shores of Nova Scotia, where operations can be begun as early as the 1st of May, and where, from the earlier warming up of the waters, the lobster spawning season commences as early as the 1st of August, and the fish then becomes worthless, the later period at which lobsters appear or can be caught on the coast of Cape Breton, gives a correspondingly later date at which they are found in suitable condition for canning, and here they are found in prime condition on the 1st of August, when the present legal date for the close season commences. By the present uniform date for the close season extending to all the Provinces, the lobster canning around the coast of Cape Breton is deprived of a full month's less privilege than similar industries in other parts of the Province. I respectfully submit that the close season for lobster fishing might, with very much advantage to those engaged in the business, and with no injury to the fishing itself, be extended to, at least, the 21st of August, and I venture to recommend that the "close season" for the shores of Cape Breton Island be extended accordingly.

## SEINE FISHING.

This injurious method of catching fish is monopolized almost entirely by the fishermen of the United States fishing on the coast of Cape Breton, and is strongly protested against by the resident fishermen on the coast, as being very destructive of fish. This is undoubtedly too true. By this method a school of fish is enclosed that would make, say, 200 barrels, if all taken in and cured, but instead of this the fish taken are culled, and all fish too small to furnish the required grade are thrown over into the sea again, dead, and the result is, that probably no more than 50 barrels are retained out of the 200 barrel bulk, thus killing 400 fish for every 100 preserved. This is an enormous waste of fish. The evil is further aggravated from this seining being done, almost solely, inside the headlands, within the calm waters of the bays and harbours, so that this quantity of dead fish, together with the offals cleaned from those retained, are thrown upon the bottom, thereby polluting the fishing grounds and, in consequence, the fish are scared away to seek purer waters and cleaner pastures. This, with the devastating destruction of young and undeveloped fish is an evil the effects of which are already alarming, but which will be felt more severely with the lapse of time, in the inevitable depletion of fish that must follow. This application of seining to codfish and mackerel—"trapping," as it is familiarly called—is a matter well worthy of some practical legislation, with a view to staying the evil.

## THE COAST LINE OF CAPE BRETON IN RELATION TO FISHERIES.

The coast line surrounding the entire Island of Cape Breton is unsurpassed for the abundance, variety and excellent qualities of its fishery production, whilst one stretch of it, viz., that portion commencing with the harbour of Louisburg, on the south, thence around to the east, and northwards to Cape North, on Bay St. Lawrence, is pronounced, by parties having personal experience of fisheries on both sides of the Atlantic, to be unequalled in Europe or America. Not only do the varieties of fish most valued in commerce swarm around the headlands, but strike far inland to the head waters of the large bays and harbours for which this stretch of coast is physically remarkable. Besides this, there lie at short distances from the headlands, seawards, numerous banks, at all times prolific in the largest and heaviest varieties of fish most valued for export. It is only on this section of the coast that the large "July herring," referred to in the preceding remarks on the herring fishery, are found. Numerous indentations, forming coves, bays and harbours, extending far inland, give the island an extraordinary length of coast line in comparison with its area, and all these inland waters, without exception, abound in varieties of fish.

## STREAMS.

The rivers of Cape Breton are somewhat numerous, but, as might be expected, comparatively small, with the exception of two—the Mira, on the south, and the Margaree, on the north, both of which are considerable rivers compared with the average of rivers in Nova Scotia. The Mira is classed as the second river in the Province, and abounds in fish throughout its entire length. It is in the large and beautiful estuary of this river, or rather Mira Bay, that the best shad fishing on the coast is found. Whilst it affords, in some parts, good angling, the Margaree is regarded as the angler's paradise for trout and salmon fishing. All the streams are visited by such fish as nature prompts to seek an annual change of residence from salt water to fresh. The fish visiting all these streams are very much less in number than at an earlier period, and those which have most declined, in other words, have come nearest to extinction, are the salmon and the large speckled sea-trout. The former of these is in a fair way of having its numbers amply restored, through the instrumentality of the fish hatchery. Thus far no artificial means have been called to aid recuperating the trout fisheries; hence the greater necessity for increased con-

tinuous vigilance against pot fishers and poachers, in their mischievous practice of netting and spearing this fish, as well as salmon, within the narrow precincts of the rivers, and after the fish have ascended to and settled in their favorite pools for spawning. It must be said that there is a growing intelligence among the people of most localities as to the necessity for abstaining from a wholesale and cruel slaughter of the parent fish in the spawning pools. One locality, however, yet occupies an unenviable notoriety in respect to wanton and illegal fishing by nets and spears.

In some cases there are partial obstructions to the ascent of fish, from mill-dams, and refuse from mills improperly thrown into the water. The latter is now the more special evil, inasmuch as fish are lovers of pure water, and they invariably forsake waters rendered disagreeable to them by the deposit of foreign matter, such as saw-dust, &c., &c.

Serious obstructions have occurred in a few streams from the torrent rush of the swollen waters in times of sudden freshets, by which trees, rocks, &c., are borne down, causing "jams" to form, of sufficient material to turn the stream aside from its original channel and force it over such places as form into bars and shoals. These are serious impediments and are immediately followed by a diminished catch in the net fishery of the estuary and its vicinity, of such varieties as were wont to ascend the stream. A small expenditure in removing these obstructions, so as to restore these streams to their original course, and in generally restoring the channels to their former depth, would, in a very short time, prove to be a profitable public investment.

#### FACILITIES FOR FISH TRANSPORT.

Hitherto our island fishermen have had no facilities for moving their fish to market, except by sea, and this had to be effected within the navigation season, and however much overstocked the markets might be, they were compelled to ship before the close of navigation. Within the last two years a partial relief to these compulsory conditions has come in, by a small ratio of their fish finding an opportunity of getting to market over the Eastern Extension Railway and thence over the Inter-colonial Railway. This relief, however, has been chiefly useful only by its enabling fish exporters to reach a given market or fill a direct order on time, without having to wait for shipping, not always available at short notice. But this benefit is, however, still dependent on navigation, as the fish has, in most cases, considerable distances for transport before reaching the railway terminus at Port Mulgrave, and can at present reach there by the aid of navigation only.

It is my desire, in this connection, to direct attention to the fact that the fishermen of the United States have thus far been the greater gainers by this new outlet. In the case of a vessel from a United States port fishing on the coast of Cape Breton or eastern Nova Scotia, when her fare is completed there may yet be a most valuable portion of the fishing season to lapse; but return home, to unload and deliver cargo, means the loss, probably, of the whole of the remainder of the fishing season. Particularly is this the case with the fall mackerel fishery. Hence, the masters and owners of these vessels have found that it is very much better to unload at the railway terminus of Port Mulgrave and forward their fish by rail, home to the United States, as another full fare is likely to be secured within the time that it would take such vessels to make the voyage home to Gloucester, Portland or Boston, unload and return to the fishing grounds. Thus by connecting with the railway at Mulgrave station, or the Boston weekly line of steamers calling at Port Hawkesbury, the value of our fisheries is tripled to United States fishermen, as compared with the late necessity making the run home to discharge cargo. That this is likely to be very largely utilized by them is confirmed by the following statement, showing the vast increase by railway carriage of fish over the Eastern Extension in 1884, compared within 1883 which may be called the initiative year of this system.

STATEMENT of fish forwarded *via* the Eastern Extension Railway, from Mulgrave Station to United States and Markets of Canada, for 1883 and 1884.

|   | To United States Ports. |        | To points in Canada. |       |
|---|-------------------------|--------|----------------------|-------|
|   | 1883.                   | 1884.  | 1883.                | 1884. |
| Pickled fish..... Brls.                 | 510                     | 13,762 | 1,250                | 6,552 |
| Salmon, frozen, in boxes..... Tons.     | 10                      | 20     | .....                | ..... |
| Dried fish, in bundles and boxes..... " | .....                   | 20     | .....                | 30    |

The Boston line of steamers which calls weekly at Port Hawkesbury carry very much more of this freight to Boston, &c., than is forwarded by railway. I applied to the agent for this steamship line at Port Hawkesbury, but could not obtain the figures; but, from observation, the quantity is known to be in excess of that shipped at Mulgrave station. In the above table the quantities sent "to United States ports" consist entirely of fish forwarded "home" by United States fishing vessels. That indicated "to points in Canada" are the quantities forwarded by our own fishermen.

BRAS D'OR LAKE FISHERIES.

The important inland sea designated as the Great Bras d'Or Lake, intersecting Cape Breton Island from end to end, with its numerous bays and inlets, forms a large and important fishing area. Its waters abound, at all seasons, with cod, herring, trout, smelt and eels, which make these waters their permanent home. Besides these, it is visited by migrations of mackerel and salmon in summer and autumn. This arm of the ocean being so closely land-locked, very little drift ice finds its way in, and then only for very short distances. The great value of this fishing ground lies in the exceptional fact that the fish named, which reside in it permanently, is that all of these species are found present in their prime condition in the winter season, and are caught to any desired extent through the smooth native ice, although, as yet, no more are sought after than can find ready sale in the home consumption of the island; a market too limited to develop this fishery into a large trade.

When, however, the contemplated railway from the Strait of Canso to Sydney or Louisburg will, as expected, pass along the line of a considerable portion of this lake shore, it cannot fail to develop an immense trade in frozen fish for the supply of western Canada as well as to markets in the United States.

Annexed hereto are the tabulated returns from the several fishery overseers on the Island of Cape Breton, which show the extent of the fisheries, kinds, value, &c., &c., for the respective districts, in detail.

I have the honor to be, Sir,

Your obedient servant,

A. C. BERTRAM,

*Fishery Officer for Cape Breton.*

## SYNOPSIS OF FISHERY OVERSEERS' REPORTS.

## COUNTY OF CAPE BRETON.

*Overseer Francis Quinan*, of Sydney, reports an increase in the catch of salmon, alewives, shad, halibut and oysters, in his district. Had the people been prepared for the shad and alewives, the catch would have been much larger, as those kinds of fish had not frequented, in any great numbers, his district in former years. Their appearance this season in large numbers took the fishermen by surprise, and found them unprepared. Herring were very scarce. There is a good deal of superstition amongst fishermen in consequence of the non-appearance of herring on our coast during the last two years, but this is owing to the fact that those fish are intercepted on their way to our coast, and those that reach our shores are now pursued by over double the number of boats and vessels that were in the business a few years ago. In this district there is but one fish-ladder, which is located at Grand Lake. It is a good ladder and has served its purpose well since it was placed in that river, five years ago. Some of the rivers in his district are filling up with *debris* caused by heavy fall and spring freshets, and he recommends that a sum of money be expended in cleaning the principal rivers.

*Overseer Alexander McDonald*, of East Bay, reports an increase in the catch of codfish and mackerel in his district over that of last year. Codfish were very plentiful during the season, and considerable more could have been caught were it not for the scarcity of bait. The fishermen depend chiefly on capelin for bait during the month of July, as it is the best bait they can use during that month. Capelin, however, did not approach the shores in such large quantities as formerly, and, as a consequence, the scarcity was much felt by fishermen. He regrets to report a large falling off in the catch of herring in his district. Many of the fishermen fitted out extensively for the latter fishery, but did comparatively nothing. The catch of salmon is about the same as last year. There is not as many people engaged in the salmon fishery in his district as formerly, owing to the scarcity of these fish of late years. Fishermen, as a general thing, now give more attention to the prosecution of the cod and mackerel fishery, as they find the latter to be more remunerative than the former. He reports an increase in the catch of alewives in his district. Lobsters were very plentiful during the season, and the two canning factories in his district did well. There is now a new lobster factory in course of erection, and will be ready for operation next spring. There were no violation of the law in his district during the year.

*Overseer Y. A. W. Barrington*, of Sydney Mines, reports an increase in the catch of cod in his district, and a slight falling off in the catch of herring. He reports the halibut fishery a failure, and cannot give any practical reason for the scarcity of these fish. The catch of salmon was much larger than last year. The first lobster factory in his district began operations last season, and was quite successful. Owing to drift ice, canning cannot commence before the second week in May, which makes the season very short. He recommends an extension of the close season.

## INVERNESS COUNTY.

*Overseer D. F. McLean*, of Port Hood, reports an increase in the following branches of the fisheries in the district under his supervision during the year closed, viz. :—Salmon, herring, eels and oysters, and a decrease in the following branches, viz. :—Mackerel, codfish, alewives, hake, haddock, trout and smelts, making a total decrease in the value of our fisheries of \$25,061.80, as compared with the year 1883. The cause which led to the falling off in the different branches of the fishery named are unaccountable, even to the most scientific enquirer. For instance, fishermen and fish dealers in this district contend that codfish was as abundant as last year on the coast, but they would not take bait. The same assertion is made in reference to mackerel. The prosecution of the fishery was fully as vigorous as during the past and preceding years, but prices were less remunerative.

The principal abuse which exists on our shores is fishing mackerel and herring with seines. This mode of fishing proves very injurious to our fisheries, and in consequence thereof a large number of young fish is destroyed every year by vessels which frequent this coast for the purpose of catching fish in no other manner than with seines. He strongly recommends that a law be enacted to prevent this abuse in future; otherwise, in a few years our mackerel fishery particularly will be completely exhausted. The close season has been well observed in this division of Inverness County. The total value of the fisheries in the various districts stated in the annual report herewith, according to the most reliable statistics which he could obtain, amounts to \$217,945.45. Of this amount he has valued the quantity entered for home consumption at \$36,500. The lobster fishery was about the same as last year, the returns showing a very slight decrease. The lobster canning establishment on Port Hood island was opened on the 19th day of May and closed on the 11th day of August, and the one at Mabou Harbour commenced operations on the 24th day of May and closed on the 23rd day of July, 1884. In the former 44 hands were employed, besides fishermen; 32 boats and 4,000 traps were used—and 106,372 one-pound cans were put up. The price paid for lobsters was 55 cents for 100 lbs. At the latter (Mabou Harbor) 28 hands were employed, besides fishermen; 13 boats and 1,600 traps were used, and 34,147 one-pound cans put up. The price paid was 50 cents for 100 lobsters. All right-thinking men concur in the opinion that the fishing bounty granted by the Government of the Dominion is a wise and just provision, and it is to be hoped that, in the interest of the fishermen of the Maritime Provinces, the grant will be continued from year to year. The beneficial results of the money so paid are noticeable in every fishing community.

*Overseer James Coady*, of South-West Margaree, reports that his statistics show a decrease, compared with that of last year, chiefly due to a large falling off in the catch of cod and haddock. This he attributes to two causes—first, not being so vigorously prosecuted on account of the small price obtained; secondly, the weather being unusually stormy, fishermen had not as much success in prosecuting their avocations, yet they all admit that fish were plentiful on the coast.

There is a small falling off in the catch of mackerel, while herring show an increase over last year of 500 barrels. Salmon fishing on the coast was the best for the past ten years, but these fish were scarce in the river the first part of the season; afterwards they came in the rivers very plentiful. From the last of July to the first of November the rivers were well stocked with fish. There is an increase of over 1,000 barrels in the catch of alewives; trout also have been very plentiful. Poaching is yet practised to a small extent. We had much trouble the first part of the close season with a gang of masked poachers, but finally succeeded in taking and destroying some of their boats. This prevented further poaching during the season. The value of fish used for home consumption is estimated at \$18,250.

*Overseer David Ross*, of North-East Margaree, reports that the general catch of fish for his district is below the average, owing to the unfavourable state of the weather, especially during the latter part of the season. The catch of herring during the month of September was unusually large, surpassing that for a number of years. The close season was strictly observed. The salmon spawning grounds were never more frequented by the parent fish. There were 210 salmon taken from the Margaree River for spawning purposes for the Sydney hatchery. The parent fish were afterwards returned to their native element. The value of fish used for home consumption is estimated at \$28,000.

#### RICHMOND COUNTY.

*Overseer D. Cameron*, of St. Peter's, reports in his district a very decided improvement this year over that of last year, there being a large increase in the catch of every kind of fish caught on this shore—the fishing of cod, haddock and herring being attended with remarkably good results, the catch being nearly double that of

last year. The following is a comparative statement of the yield of fish in his division for the year 1883 and 1884 :

| Kinds of Fish.    |      | 1883.  | 1884.  | Increase. |
|-------------------|------|--------|--------|-----------|
| Salmon.....       | Bbls | 25     | 37     | 12        |
| Mackerel.....     | "    | 4,948  | 6,511  | 1,563     |
| Herring.....      | "    | 3,877  | 8,843  | 4,966     |
| Alewives.....     | "    | 53     | 111    | 58        |
| Codfish.....      | Cwt  | 10,907 | 14,803 | 3,896     |
| Haddock.....      | "    | 3,153  | 14,700 | 11,547    |
| Lobster cans..... | "    | 62,000 | 78,000 | 16,000    |

Large as is the quantity of fish caught this year over that of last year, it would have been much larger had it not been for the roughness of the weather during a part of the fishing season, as gales of wind were so successive that fishermen were unable for many days to go to the fishing grounds. Fish have been very plentiful this season, and the fishing bounty has stimulated fishermen to greater exertion and perseverance in their occupation; hence the large catch. The number of lobster cans would have been greater, had it not been that the supply was poor, owing to the prevalence of high winds during a part of the season. He has no abuses to report, as the law has been strictly complied with. Fair prices have been realized for pickled fish; and although prices for dry cod have been low, yet the large increase in quantity more than makes up for the low prices. Fishermen in this district have never been in better circumstances than they are this year.

*Overseer Francis Marmean*, of Arichat, reports a most prosperous season for fishermen generally, and a decided improvement over last year in the catch of the principal fish. A most gratifying increase is shown in the catch of codfish and herring. He thinks that the fisheries in his district will be prosecuted more vigorously next season than any previous year, as a large number of nets are being made and boats built for next season's operations. The fishing bounty given to the fishermen by the present Government proves a valuable boon to fishermen; and he attributes the increased energy now being put forward in his district to the bounty. The fishery laws have been so well observed, that he has no violation to report.

#### VICTORIA COUNTY.

*Overseer D. McRae*, of Baddeck, is pleased to report an increase over last year's catch of all kinds of fish in his district. Herring were very plentiful during the month of July. About the first of August codfish were in great abundance, and the fishermen did well. The bounty had the effect of stimulating the fishermen on to the more vigorous prosecution of their calling. He reports that the rivers in his district have been carefully protected, although there was a disposition, on the part of certain parties to violate the law.

*Overseer Malcolm McIntosh*, of Aspy Bay, reports an increase in his district of 2,000 quintals of codfish over the catch of last year. The catch of salmon doubled that of 1883. The herring catch exceeded that of last year, but the catch of mackerel was smaller. Fishermen are of the opinion that both the herring and salmon fishery are ruled by prevailing summer winds. Fishermen also contend that mackerel have been driven off the coast by American seiners in the months of August, September and October. The season was very boisterous in comparison with former years; nevertheless, the fishermen did fairly well. The season for lobster canning is too short, as the drift of ice which blocks the coast until the middle of May prevents the catching of lobsters before that date. The close season was well observed throughout the district. Two new fish-ways were erected on Middle Harbour River, where two new grist mills are in operation. The dispute which arose in the early part of the season between local fishermen and seining crews was settled, and since peace and quietness prevail.
