THE COURIER.

TUESDAY, APRIL 30, 1850.

But a few years since it was the opinion of many sincers and enlightened, men, that the Cours should possess the power of nominating the Legislative Council, or intermediate estate of the Legislative; and that to conduct the administration of the Government so as to ensure the confidence of the people, the Executive Council should be composed of individuals selected from various parts of the country, with the view of imparting to the head of the Executive a knowledge of the people's wishes and wants. The re-construction of the Legislative Council, and the additions subsequently made to it, have thoroughly disabused the public mind, and trained them to regard it with indifference, if not contempt; and, heally, when it failed to sindicate a high constitutional principle, and descended from its legiti-But a few years since it was the opin tutional principle, and descended from its legit netions to yield a slavish obedience to a Ministerial junto, the voice of an outraged people demanded a fundamental change in its constitution—that change is the adoption of the Elective principle. The few years, during which Responsible Government has existed, have been almost sufficient to reduce the Colony to a state of year summent to reduce the cotony to a state of the salage, and render the population, one and sill by cunningly deviced lurks of dependent interest acessery to their own degradation, to the prostra on of all that is respected in the human charac fer, and to the elevation of whatever is base in principle and in conduct. No argument in favor of an Elective Legislative Council has yet been presented so conclusive as the blank mandamuses of Lord Elgin. If the people sometimes err in their choice of servants, the blunder is almost alwayaghe result of a generous but blind and un-suspicious confidence. When the Executive in-troduces acknowledged ignorance and imbecility to the public councils, the deviation is invariably the result of design. If the Council were made Elective, the evils of an injudicious choice would be short-lived. The right of election returning to the people at stated intervals, intelligence and patriotism, ignorance and venality, would find consults its own objects, at the expense of the public security, will have little regard in the exercise of its choice to those qualities which render men deservedly popular.

It would appear that the Auti-Renters are less fluctant than they formerly were to enter into on with the landlords; the some accommod VanRansellars, Livingstons, and others. The old seen sounded in their ears by the State, and they have taken the alarm. It is quite evident that, if the lands do not belong to the VanRansellars and other landlords, they must belong to the State; hence the query-Would the State sell upon as moderate terms as the long-resisted landlords i The tenure by which the property is held in the Dutch grants has many features in common with our fendal tenure, and we are not surprised that the restless and enterprising race who now occupy those lands should feel the hampering restrictions thensome. The English Minister at Washington, Sir Henry Lytton Bulwer, delivered a speech before the Historical Society of Maryland, which is well the Historical Society of Maryland, which is well calculated to captivate the fancy of the Ameri-cans, though, in rising to the height of fever head in the atmosphere of popular prajudice, he may, by yielding to the seductions of a fervid imagination, have sacrificed the fidelity of the historian read other men's minds and mask his own the motives which lured him from the seclusion of It was decorous and becoming on the part England's representative to make honorable men-tion of the stout-hearted old man who fills the Presidential Chair; but when he institutes a Presidential Chair; but when he institutes a studied, long-drawn comparison between Buena Vista and Agincourt—between honest Zachany Taylor and King Henry—we are reminded of that significant phrase of Western growth called "Bunkum." We are willing to award our neighbors unstituted praise when the men or the country slates it. We admit the calm courage and events claim it. We sainit the calm courage and military skill of General Taylor, qualities which he shares in common with a long list of promiment American leaders; but we enteen the un-tried valor of the Saxon race on this Continent above the coldly contested field of Buena Vista— the supple and effeminate Mexicans, deteriorated by the softening influences of a Southern climate, by the softening influences of a Southern climate, are not the antagonists by whose resistance we can measure the vigor of the North. The battle of Baena Vista cannot bear comparison with the combat of Craon, either with respect to the generals, the soldiers, or the carnage that ensued. Yet to how few of those who laud the Mexican victorian with the combat of the chief of the carnage that ensued. Yet to how few of those who laud the Mexican victorian victorian with the name of (Craon)? (profiler the carnage that ensued.)

If we condemn the military comparisons which Sir H.

L. Bulwer institutes, we admire the scholar-like taste with which he points the compliment to Webster and Clay, the lights of the political horizon—the classic allusions to Ulysses, Nestor, and Achilles fall gracefully from his lips, and the ideality of the past is happily applied when sketching the characteristics of the American

We make one extract from the speech in question, for it gives expression to opinions in which the majority of this population concur. Our condition as Colonists, even when nursed in the lan of protection, and pampered with Imperial gold, implied an alliance in time of war which involved us in the calamities incident to the military occupation of our soil-maritime rivalry fomented angry feelings, and Canada was invariably the selected battle field. The Annexationists seeks a political existence which would preserve the country from a repetition of the calamity, and Sir H. L. Bulwer confirms the value of the exemption. A subscriber to the Avenir lately presented himself at the holy confessional, to fulfil one of the commandments of the Church. It was in a Farish that one hundred miles from Moutreal, nor very far from a Sault.

The Vicar of the Parish, from whom our subscriber saked absolution, replied to him that he could not give it, because he took the Avenir.

"My dear child," said the Vicar, "it is not the reading it which is evil, it is subscribing to it, and paying for it: that is the crime." "Oh—he! I understand," cried the Penitent, "we shall not come to terms to-day!"

The above anecdote is authentic, and we shall furnish, if required, the names of the Penitent, the Vicar, and the Parish. The recital of it is painful to us, disgraceful to our adversaries, and humiliating to the country which is the scene of such scandalous apertacles.

Black & Ca., Toronto, Abraham quoted esperal passages, some of them as old as the reign of Edward I., which went to show, from the Statutes relating to "Churchwardens," that it was customary and legal for Churchwardens in the earlier reigns to levy taxes upon persons holding a mart or stall for wares within the precincts of Church property or existe in land. Now that this right was inherent in the office under question during the reigns when ecclesistical power was fairly established, and extended to eages appertanting solely at the present date to civil authority, was one thing, but to prove irrefragably that a Churchwarden could exercise the same power in the same number of cases in the Reign of Edward I. as in the Reign of Queen Victoria was quite different. Nevertheless, the line of distinction between the sucient and modern office has to be clearly ascertained in cases like this, otherwise no Jury could oome to a decision. The indictment stated that the tax in question, amounting only to 12s. 3d. was levie d on groom occupied by the complainant lying mar and contiguous to the Couvent b longing to the Nuss of the Parish of St. Martin. If that property belonged to the Church, of which Mr. Papinesu was Churchwarden, then, since the law of the land, now in force, authorized the Church, of which Mr. Papinesu had exercised no feigned right. If, upon the contrary, it could be made apparent that the place, specified in the indictment was not the property of the Church, of which Defendant was the officer, then he had laid himself open, without doubt, to a charge of extertion. In either of these two cases, nevertheless, no Jury could come to say vardiet upon the indictment. This, the learnied gentleman remarked, could easily, and beyond a doubt, he made apparent. This indictment, for unstance, accused Andre Bergiamht Papinesu of extertion, because he had levied 12s. 3d, upon a vender of small the same tongue are not into cut such others throats."

THE Advantages offered to the Public by this Institution are MANY and IMPORTANT, and the Itstitution are MANY and IMPORTANT, and the Issue LOW as security to the Assured, will admit of.

The following are some of the advantages offered by the Society:

The peculiar Benefits secured to the Assured by the principle of the LOAN Department.

One half of the Premium for the first fave years may be paid by the Assured's own Note. These Notes need not be paid, but may remain on Interest, to be deducted from the Policy on the death of the Assured.

CONNECTICUT MUTUAL LIFE INSURANCE COMPANY, HARTFORD.

Incorporated by the Legislature of Connecticut is 1846. Guaranty Fund and Accumulated Premium \$ 100,000.

Guaranty Fund and Accumulated Premiums \$100,000.

THE CONNECTICUT MUTUAL LIFE INSURANCE COMPANY is established upon the purely mutual system, with a Tariff of Premiums as low as is justifiable with the permanence and security of an Institution of this character. Every person taking out a Policy is a member, and entitled to vote at the Annual Meetings The Dividends are declared annually on the 31st January. All persons insuring previous to that day, purticipate in the profits of that year, which are passed to his credit upon the looks of the Company; to be paid during the life of the insured, in the order of rotation, from the szesse of a capital of profits having been obtained, the Directors will be authorized to pay the first year? Dividends at the close of the present fiscal year; afterwards, each year's Dividends, in regular order, will be redeemed, as the funds of the Institution exceed the above two hundred thousains dellars. It is supposed that each person will be required to pay three annual Premiums before his Dividends will be redeemed. This tenture in the conditions of this Company, over those who do not redeem or pay the Dividends until the death of the insured, is peculiarly favorable to the member, as the redemption of Dividends will assist in the payment of the Annual Premiums, after a few of the first years have elapsed, or take up notes given for Premiums.

The assured, on surrender of his Policy, at any

up notes given for Premiums.

The assured, on surrender of his Policy, at any

The assured, on surrender of his Policy, at any time after three years, will receive its equitable value. All Premiums amounting to A/34 dollars, or more, on Policies running five years or longer, may be paid one half by Note; to remain a debt on the Policy, until cancelled by Dividends; or the Policy becomes a claim.

This Company was organized in December, 1846, and its prosperity has hitherto been unparalleled. It is now in the third fiscal year of its existence; and numbers (October, 1849) nearly sent thousand members; with a constantly increasing accession. Its losses have been small, compared with the numbers which might have en expected, according to the Tables of Mortality upon which Life Insurance is predicated. By an paralleled success in business, and a strict economy in the administration of its affairs, larger Dividends have been made to Policy holders than by any other Company in the United States; averaging more than 60 per cent. annually.

It was to their manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor, that they were indebted for their name.

Unlike the host of perulcuous quackeries which beast of vegetable ingredients, the LIFE HEDI-CIMES are purely and solely vegetable; and contain neither Hercury, nor Antimony, nor Arsimia, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmacoutiles chamists, are altegative unknown to the ignorant pretenders to medical science; and were never before administered in so happily officacious a combination.

The first operation is to loness from the coats of the stomach and bowels the various impurities and readilities constantly settling round them; and to remove the hardseed faces which collect in the convolutions of the small intestines. Other medicines only partially cleanes these, and leave such collected measure behind to produce habitual Continence, with all its train of evils, or sudden Diarrhesa with its imminent dangers. This fact is well known to all regular anatomists who examine the human bowels after donth; and hence the prejudice of these well-informed men against the quack medicines of the

THE MEDICINES are well known to be infallible:

DYSPEPSIA, by thoroughly cleaning the first
and account stomache, and creating a flow of pure
healthy bile, instead of the stale and acrid kind;
FLATULENCY, Loss of Appetite, Heartburn,
Headachi, Resileaniest, Ill-temper, Anxiety,
Languor, and Helancholy, which are the general
symptoms of Dyspepsia, will vanish, as a natural
consequence of its cure.

Contiveness, by cleaning the whole length of
the intestines with a nolvent process, and without
violence: all violent purges leave the howels contive
within two days.

Diarrhose and Cholera, by removing the
sharp acrid fluids by which these complaints are
occasioned, and by promoting the labricative secretion of the mucous membrane.

Fewers of all kinds, by restoring the blood to a
regular circulation, through the process of pempiration in such cases, and the thorough solution of
all intestinal obstruction in others.

The Lipe Medicines have been known to
cure RHEUMATISM permanently in three
weeks, and GOUT in half that time, by removing
local inflammation from the muscles and ligaments
of the joints.

Dropsies of all kinds, by freeing and strengtheaing the kidneys and bladder: they operate most
delightfully on these important organs, and hence

of the howels the slimy matter to which these creatures afters.

Asthma and Consumption, by relieving the air-vessels of the lungs from the mucous which even slight colds will occasion, and which, if not removed, becomes hardened, and produces these dreadful diseases.

Scurvy, Ulcers, and Inveterate Scres, by the period putity which these LIFE MEDI-CIPES give to the blood, and all the humors.

Sorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluid that feed the skin, and the merbid state of which occasions all cruptive complaints, sallow, cloudy, and other disagreeable complexions.

The use of these Pills for a very short time will effect an entire cure of SALT RHEUM, and a striking improvement in the clearness of the skin.
