## INDEXER CLAIMS LABOR FEDERATION WOULD SET UP A GOVERNMENT OF AUTOCRACY

Senator Says: Coterie of Dishonest Leaders  
Moves to Displace Present Heads of  
Country—States That Gompers' Criti-  
cism is Not Specific, Seeks Explanation  
of Phase Free Institutions Are Menaced

UTICA, N. Y., Feb. 13.—Charges behind the announced plan of the American Federation of Labor to displace the present heads of the country, a sinister movement of a coterie of labor leaders, who have grown powerful by the contributions they have levied upon labor, are set up a "government within a government," were made here last night by United States Senator Miles Poindexter of Washington in an address before the Utica Republican club.

"The farmers and laboring men of America," he asserted, "have in every crisis been the great bulwark of free institutions, and they will follow the mistaken leadership which would place the government under the despotic control of a 'government within the government.'"

"Ruled by Few Leaders"  
"This government within the government" is not ruled by labor, but is an autocracy of a few leaders who would not only impose their will upon labor itself, but would extend it, not only by the ballot, but by strikes and starvation of the entire people of the United States. It is as obnoxious as the 'invisible government' against which the people protested in 1912. There is no question of the right of the American Federation of Labor to gain control of Congress and of the President by way of the ballot box, if it can do so in accordance with the programme it has just issued. It would be an ill day for the United States and that of all for labor itself, if any such a government were established in this nation, whether employers or employees in industry, capital or labor, should succeed in carrying such a program; but that is one of the perils which the nation must face as the price of free government.

"Mr. Gompers curses Congress," he continued, "but is not specific in his complaints. On the contrary, the announcement stated that 'all of the essential legislation in labor's bill of 1916 was enacted. This proclamation states that the 'free in-

stitutions of the country are menaced,' but the only specific reference is to the proposed anti strike legislation. The right to throttle the transportation of the nation on which the lives of the people depend is not one of 'our free institutions.'"

"The officials of the American Federation of Labor, oppose not only the anti strike legislation, but oppose the establishment of a government tribunal for the hearing and settlement of industrial disputes. The position of Mr. Gompers is that these questions must be left to the labor unions themselves to settle under the compulsion of tying up transportation and essential industries. This would seem to present clearly the issue of government by due process of law or government by coercion. To claim the right of any private organization to lay an embargo upon the people's supply of food and other essentials of life, is to claim the right of private and civil war by one class in the community against the community itself."

"Labor Deserves Much"  
"Labor, as the foundation of our industrial structure, is entitled to every consideration—perhaps the first consideration—at the hands of the government, and, in general, it has received such consideration. The railroad bill as reported, contained liberal provisions for profit sharing and other benefits for labor. These were opposed and stricken out at the instance of the officials of the American Federation of Labor, presumably because it would tend to lessen the control of these leaders over labor."

The American Federation of Labor the senator declared, "claims the right to enforce its demands by taking the control of transportation out of the hands of Congress, where it is vested by the constitution, and to assume such control itself. If this question is submitted to the ballots of the farmers, and of labor itself, and, to all classes of American people, who in the last analysis must decide it, there is no question that the constitution will be preserved."

## Arrest Made in Connection With Beamsville Outrage; Girl is in a Bad Condition

Dennis Macion, a Beamsville man, was arrested yesterday afternoon by High Constable Boyle in connection with the assault on 16 year old Ida Moore near Beamsville the previous night. He was remanded by the Beamsville Magistrate and will be taken back there for his preliminary trial as soon as the girl is able to go to court to testify. He is now in jail here.

The unfortunate girl is still suffering from her terrible treatment. She was savagely beaten over the head with the fence picket found lying beside her, an attack giving evidence that a maniac had been her assailant. She kept to her bed yesterday and will be under the doctor's care for some time. High Constable Boyle says the girl is in a very serious condition.

Macion who is an unmarried man about 28, stoutly denies all con-

nection with the matter. He has a crippled hand, several fingers being missing. That fact may have much to do with connecting him with the affair, the authorities state.

The girl says she saw a man approaching her on the road and she was surprised when as she stepped aside to let him pass he stepped the same way and seized her by the throat. She says she remembers nothing more. Her brother was on his way to look for his sister and he heard her screaming but did not suspect who it was until he arrived at the place and found the girl lying unconscious in the snow with a heavy fence picket an inch and a quarter in thickness lying beside her.

Assistance was proctored and the girl was carried to her home still in an unconscious state.  
(Continued on Page 3.)

## Report of Lifting Of Ban at Falls Was Foolish Error

The despatch from Niagara Falls printed in Toronto papers that there had been an easing up of the restrictions at the International bridges with reference to vaccination, proved to be quite erroneous as a Journal representative found out personally at the Bridge yesterday.

American officials laughed at the statement and said that it was merely another of the wonderful stories which have come out of the Falls, Canada, of recent months.

They declared that the only easing up in the restrictions was that you no longer must show your vaccination to the U. S. officials. You still must have your certificate of successful vaccination.

The U. S. men said there was no likelihood of the ban being lifted before the first of April at the earliest and then the date sound significant.

## RUSSIA IS A BIG BATTLEFIELD; REDS AND BOLSHEVISTS ARE FIGHTING FOR SUPREMACY

ISSUES FOOD WARNING  
Deaths From Bipe Olives Cause of  
Message to Officers.

WASHINGTON, D. C., Feb. 13.—Formal warning against foods that show any evidence of decomposition was sent out yesterday by the public health service as an aftermath of the recent cases in which fatalities followed the eating of ripe bottled poison generated by decomposition.

"Persons are warned," telegrams sent to state health officers said, "not to eat any food that is off in color or odor when opened, shows an accumulation of gas or evidence of decomposition."

## Reds Are Making Progress and May Gain Two Important Seaports; British Detachment is Withdrawn From Batum to Constantinople.

LONDON, Feb. 13.—The pursuit of the Bolsheviki of the remnants of General Denikene's forces into the Crimea, the launching of an expected Red attack on the north Russian front in the Dvina sector, and the conclusion of the Lettish operations against the Reds are pointed to by the military observers as the most salient developments of the past week's operations in Russia, reported to the War Office here.

On the western sector of the south Russian front the resistance of the volunteers against the Bolsheviki appears entirely to have collapsed with the Red occupation of Odessa. The Reds now are pushing toward the Dniester along a front of 120 miles.

The reports show that the Bolsheviki suffered disaster in their attempts to force the line of the Don and Manitch Rivers, having lost heavily in men killed or made prisoner. The Reds, however, are making rapid progress in the Steppe region, probably attracted by the possibility of occupying Sebastopol and Theodosia, Black Sea ports in the Crimea, and seizing the Petrovsk railroad. The taking of this line would constitute a serious threat to the anti Bolshevist communications with the volunteer fleet in the Caspian Sea, which has its base at Petrovsk.

The British detachment is withdrawing from Batum to Constantinople. The advices do not state whether the situation at Batum, which recently had been regarded as threatening, had improved, warranting the withdrawal of the British, or if it has grown worse and the British were compelled to withdraw.

There have been no operations of great moment on the Polish front.

Following the virtual dissolution of Admiral Kolchak's armies in Siberia, Vladivostok did not resist occupation by the rebels. Authority there has been taken over by the Provincial Zemstvo. The city is reported quiet.

FLU MORTALITY RATE  
About Half That of 1918, Says Public Health Service Report

WASHINGTON, D. C., Feb. 13.—The mortality rate due to the influenza epidemic this year was about half of the tin 1918, said a statement yesterday by the public health service, announcing that the present epidemic apparently had reached its peak.

With the exception of some cities in Massachusetts and New York state, exclusive of New York city, practically all of the reports indicate a decline, the statement says.

## NO PROGRESS MADE IN THE DISPUTE OVER FIREMEN'S UNION AT CONFERENCE WHICH WAS HELD THURSDAY EVENING

Not much progress was made in settling the difficulty which has arisen between the city firemen and the city council with reference to the firemen forming a union, at the conference held last night by the Fire and Light Committee with J. E. Dalphond, Vice President of the International Association of Firefighters who is in the city to assist in straightening out the tangle.

Fireman Clambert was also present on behalf of the firemen and all the members of the city council were on hand but Aldermen Rose and Beattie. Ald. Rose is ill and Ald. Beattie had another meeting. The rest of the council outside of the Fire and Light Committee were present on invitation from Ald. Avery, chairman of the Committee, who also asked them to take part in the discussion.

Mr. Dalphond presented affidavits to show that it would be impossible for the members of the Firefighters Union to go out on strike, as such an action would endanger lives and property. The recent case in Montreal was instanced when in the waterworks strike the firemen stood by the city and refused to strike. All the Montreal firemen belong to the Firefighters Union.

Other instances were named, showing that the Firefighters are a non-striking organization and the Association exists merely for the sake of mutual profit to its members in the matter of discussion of vital subjects and with reference to placing its members in good standing at conventions.

Mr. Dalphond said the city firemen were willing to recede from their attitude to the extent of withdrawing from the Trades and Labor Council, but he feared they would not be willing to quit the Firefighters.

After considerable discussion it was decided that the members of the city council who opposed the union would meet this morning to talk over the situation and see if anything could be done. The question of salary increase was not taken up as it was mutually agreed that the union question must be settled.

At this morning's meeting of the Aldermen no progress was made except in that it was agreed that a special committee of the city council will go into the whole question of wages and union.

This committee is to be appointed at a special meeting of the city council to be called for perhaps Monday night.

Meantime the whole matter is in abeyance.

In view of the fact that the resolution put through by the Council recently says that the firemen must disband their union, the situation is indeed complicated.

## 400 Miles of Wire To Guard Forests

OTTAWA, Feb. 13.—Four hundred miles of telephone lines are to be laid through the forests of the upper Ottawa district as part of the scheme of the Ottawa River Forest Protective Association for the prevention of forest fires. The decision to proceed with the construction of 200 miles of these lines at once was reached at the annual meeting of that organization, which concluded here yesterday.

Arthur H. Graham, Chief Fire Inspector, in the course of his report, stated that last session was one of the worst for forest fires in many years. He said that 20,000 acres or 31 square miles of valuable forest was burned by unextinguished lunch fires, careless smoking by campers, travellers and berry pickers, slash burning without fire rangers' permit.

The construction of 200 miles of telephone lines in the western section of the Ottawa River district, which is in the neighborhood of Fort Coulogne, was authorized by the association and will proceed with out delay.

Mr. J. W. Walsh, president of the Fort William Tsades and Lobos Council, is in the city on official business.

Brownell's Profit sharing sale ends Saturday night. Don't miss it. 357 3rd St., and 2121 Main St., Niagara Falls, N.Y.

## The Flu

I'm the Flu, the Spanish Flu  
And to all good people:  
"How do you do?"  
I was here before  
A year or more,  
And I'm back to find  
If I left behind  
Anyone who  
Should have had the Flu  
The last time I visited you.  
I'm not  
They say—ch, what?  
As I used to be,  
But just wait and see.  
I'll rack your bones  
I'll write your sores  
And shoot your constitutions  
Full of holes;  
I'm a persistent pest—  
I never rest—  
If there's work to do  
I dig till I'm through.  
So, watch my smoke—  
I'm the Spanish Flu—  
I've got all the rest  
And I'm bound to get you.

Lindsay defeated Toronto Conoco Club in an O.H.A. junior game last night by 6 to 5.

## Farmers Will Fight H. C. L.

National Fund of \$2,000,000 Will Be Raised For Scientific Study of Food Situation—Won't Join With Unions.

CHICAGO, Feb. 13.—A "war fund" of \$2,000,000 to be used by farm organizations throughout the nation in a fight against the high cost of living is to be created with a meeting of the American Farm Bureau federation in Chicago, March 3.

"This money," said Howard Leonard, a farmer of Eureka, Ill., a new president of the Illinois association, "is to be used for scientific study of the food situation as it affects the farmer and consumer in the handling of foods. It is to be hoped that prices to the consumer for foods will be brought down, but at the same time the farmer cannot suffer a loss on his production. He must make a profit (Continued on page 2.)"

## Grimsby Man is Made the Richer By \$50,000 in the Death of a Scotch Uncle

Thomas Little of Grimsby has been bequeathed \$50,000 in his uncle's will.

Little was born in Halton county about fifty five years ago, the son of Thomas and Mrs. Little. His father was born in Dumfrireshire, Scotland, and married a lady of English birth and they came to Canada and settled in Halton. The father had two brothers, William and Franklin.

Franklin had one son named William who now resides in Hanover, Mass., and who is a joint heir to the fortune. William Sr. remained in Scotland and followed up the profession of clog making and later branched out into the leather and shoe business. He never saw either of his nephews and it is doubtful if he ever heard from them to any extent.

According to the letter received by Little the old uncle died about the first of January and left twenty thousand pounds to be divided equally between himself and his cousin in Hanover. No other particulars were given, except that further information and documents would be forwarded in due course of time.

The recipient of this legacy came to Grimsby about twenty years ago to manage one of the late Henry Smith's farms, later going to Niagara Township to manage a farm. He came back to Grimsby about seven years ago and took charge of one of Mr. John Hewitt's farms and is still connected with the late gentleman's estate. The late Mr. Hewitt in his will left Little \$200 and his eldest son \$200, so that this legacy is the second windfall in four months that he has received.

## Numbers of the City Have Placed Approval on the New Chamber of Commerce

A striking tribute, to the value of the modern Chamber of Commerce work-  
clergymen have co-operated by declaring a Sunday as CIVIC SUNDAY and on that day referred to, this community betterment plan, in their sermons. We would recommend to all our brethren therefore that Sunday, February 29th, 1920, be declared Civic Sunday and suitable observance made on that day in so far as is compatible with the season and the observances of that day.

Signed by the following clergymen:  
L. W. B. Broughall, Rector, St. George's Church. A. H. Howitt, Rector, St. Thomas Church. F. W. Stewart, Pastor, Queen Street Baptist Church. R. D. Hamilton, Pastor, Welland Ave. Methodist Church. J. H. Ratcliffe, First Presbyterian Church. George H. Smith, Knox Church. T. Urghart, Commandant, of Salvation Army. E. J. Harper, Rector, St. Barnabas Church.

We, the Ministers of the City of St. Catharines, after hearing the aims and ideals of the Chamber of Commerce movement explained, do heartily endorse such a movement for St. Catharines and commend the Board of Trade in its effort to give this city such an institution. We, therefore, pledge ourselves to do all in our power to support Mr. E. C. Graves and the Campaign Committee in this work.

In the cities of London, Sarnia, Brantford, Chatham, Guelph and Belleville where this movement has

Montreal-Ontario River Cost Would Be \$250,000,000

Buffalo May Be Meeting Place For Developers of St. Lawrence.

NEW YORK, Feb. 13.—Development of the St. Lawrence river between Montreal and Lake Ontario, which is being considered by the International Joint commission on waterways in session here, probably would cost more than \$250,000,000 Obadiah Gardner, former United States senator from Maine, chairman of the American section of the commission, said yesterday. Making that part of the river navigable for deep draught ocean steamers would cost more than \$50,000,000 and development of unused water power—about 2,000,000 horsepower—would cost about \$200,000,000, according to rough estimates reported to Mr. Gardner. Consideration of the St. Lawrence development included a programme of commission hearings during April and May at "interested localities" on both sides of the boundary, Mr. Gardner said. A preliminary meeting in about four weeks at "some central point like Buffalo" probably will be called he added. Engineering surveys of the St. Lawrence by government engineers will begin in the spring.

The commission devoted today to deciding on the best way to carry into effect its recommendations of last year to stop pollution of international streams at Detroit and Buffalo. Consensus of opinion was said to favor drafting of a treaty for adoption by the governments of the United States and Canada. Joint legislation by the two countries was called inadequate and the calling of a convention of representatives to consider effective measures was characterized as impracticable, it was stated.

FARMERS WILL FIGHT H. C. L.

(Continued from page 1.)

Leonard said the plans did not contemplate doing away altogether with the middlemen. He said the farmers hoped to reduce their costs by co-operative buying and to raise costs to the consumer by co-operative marketing.

"The food problem," he continued "is not one for the farmers to decide alone. It is just as much a consumer's problem. The suggestion of a farmers' strike is absurd. Economic prosperity depends upon agricultural prosperity and the farmers do not intend to strike. They want to increase production. Production is going to decrease this year, because of high prices and high labor wages which have driven farm labor to the factories."

"There will be no affiliation with organized labor. We want to co-operate with labor to the fullest extent, but we have little in common and we do not believe that the best interests of society are to be served with a political alliance with trades union people."

THE WEATHER

TORONTO, Feb. 13.—Several depressions except on the Continent this morning the most pronounced one being situated on the coast of Virginia, an energetic cold wave now covers the western Provinces. A few light snow falls are reports chiefly in Ontario.

FORECASTS—Mostly fair today. Light local snow tonight, becoming colder on Saturday.

ST. VALENTINE'S DAY IS TOMORROW

Tomorrow is St. Valentine's Day the usual lot of mushy missives, like wise conical ones will find their way through the mails. The stationery shops report a good sale of all kinds of valentines, showing that the old custom is reviving. There will be the usual valentine parties tomorrow.

400,000 IN GERMAN ARMY. Government Able to Execute Treaty if it Desires.

PARIS, Feb. 13.—The German army is still 400,000 strong, according to a report received by the committee of foreign affairs yesterday from General Niessel, head of the Baltic mission. In addition there are 100,000 policing forces, officers and non-commissioned officers. Germany also is well supplied with tanks, machine guns and airplanes. In the neutral zone alone on the right bank of the Rhine, the policing forces number 15,000.

General Niessel adds that the German minister of defense, Noske, is in the hands of the general staff and that the German government is capable, if willing, of obtaining execution of the treaty clauses by the country.

Method of Spreading.—The disease is spread mainly by the discharges from the vulva of aborting animals. If a mare that has aborted is served before all discharges from the vulva have ceased and the genitalia have been carefully disinfected, then the stallion is liable to get contaminated with the bacillus and spread the disease to other mares which he subsequently serves. If the discharges from the aborting mare are allowed to contaminate the bedding or other materials that other mares come in contact with, then the mares are liable to contract the disease. If the discharges are allowed to contaminate water or food materials that are given to other mares, the latter are liable to contract the disease.

Measures for Control.—1. Three months must elapse between abortion and subsequent breeding. 2. Mares that have aborted must not be bred if there is evidence of uterine catarrh, even after three months. 3. Mares that have aborted must only be bred at the end of the stallion season. 4. Application of an efficient disinfectant to the external genitalia of the stallion after each service in affected districts.

Measures to be Employed at Time of Abortion.—1. Isolation of mare at first sign of approaching abortion. 2. After abortion the foetus and membranes should be burned, if possible, or buried deeply in quick-lime. 3. Those handling the foetus and mare should disinfect hands and clothing. 4. Bedding should be burned and the stall washed with a strong disinfectant. 5. External genitals, thighs and tail of mare should be washed daily with a good disinfectant. Two per cent. bacteriol, lysol, or cresol, is satisfactory for this purpose. 6. Isolation of mare should be maintained for at least a month or until all evidence of uterine discharge has ceased. Treating the animal with drugs, as carbolic acid, black haw and methylene blue, which are popular in some districts, cannot be recommended as being of any value.—Dr. J. H. Reed, O. A. College, Guelph.

Oyster-shell Scale. This is a very common orchard insect. It attacks not only apples but also pears, plums, currants and many ornamental and shade trees and bushes. Full grown scales are found almost exclusively on the bark and are easily recognized by their oyster-shell appearance. They are about 1/4 of an inch long, 1-24 inch wide, taper towards one end, and in color resemble closely the bark of the tree. The injury is caused by their sucking the juices out of the bark and thus weakening the trees. When very abundant they almost completely cover the bark and in that case may kill either the whole tree or portions of the branches. Most infested trees, however, are not killed but only weakened.

Control.—Spraying the trees just before or just after the buds burst with lime-sulphur solution, 1 gallon to 8 or 9 gallons of water, is a satisfactory remedy. The Regular Codling Moth spray with one gallon of lime-sulphur to about 39 gallons of water, to which two pounds of arsenate of lead paste or one pound arsenate of lead powder is added will also help greatly, because it will hit the young scale insects just after they have hatched, while they are still unprotected and easily destroyed. Dead scales may remain on the trees for several years after date of killing. Pruning the trees early makes it easier and cheaper to spray them well. Prof. L. Caesar, O. A. College, Guelph.

School estimates as passed by the Property Committee of the Board of Education, Toronto, totaled nearly \$4,000,000.

When dangerous illness occurs, a specialist is called into consultation. His thorough knowledge of specific ailments is the result of concentrated study and practice. His services are considered best at such times.

Our Dental Offices are founded on this very principle. We employ only specialists who give their entire attention to specific branches of Dentistry.

Regardless of this specialized form of treatment our prices are unsurpassed for modesty.

The filling of cavities is accomplished by specialists. Extractions are made by specialists. The most skilled crown and bridge work is done by specialists. All plates are made and fitted by specialists.

We believe that our is the only Dental Office in New York State that affords this specialized form of Dental treatments and the success of this principle of practice is written down in our 26 years of public service.

Free examinations and consultations are courteously granted to all.

Fillings 50c and up. Very good Plates, \$8.00.

CONTAGIOUS ABORTION A Too Common Trouble With Some Farm Mares.

Cause of the Disease Discovered—Method of Spreading Described—Measures for Control—Oyster-shell Bark Louse With its Treatment.

(Contributed by Ontario Department of Agriculture, Toronto.)

CONTAGIOUS abortion of mares is due to a specific bacillus (Bacillus abortus equinus) which gets established in the uterus, fetal membranes and foetus, setting up local inflammation leading to expulsion of the foetus dead or alive at any time during pregnancy.

The symptoms of approaching abortion are not usually in evidence until just before abortion takes place. Then the animal is seized with colic pains, restlessness and straining, and a swollen vulva with a mucous discharge is noticeable. After abortion, the symptoms are more specific. There is a chocolate brown fluid discharge from vulva which has a typical offensive odor, and the foetal membranes are inclined to remain intact, thus necessitating artificial removal to prevent blood poisoning.

The disease has been known in Europe for many years, but it was not found on the American continent until 1886 when it appeared in the Mississippi valley. Since then it has spread far and wide in the United States and Canada. Although many investigations were made both in Europe and America, it was not until 1912 that the cause of the disease was discovered. In that year E. S. Good, of Kentucky, discovered the bacillus which causes the disease. The same year Dr. Schofield, of Toronto, discovered the same bacillus in some cases of joint ill in colts which had developed in districts in Ontario where contagious abortion of mares was prevalent and the following year found the same bacillus in cases of contagious abortion of mares in Ontario.

Method of Spreading.—The disease is spread mainly by the discharges from the vulva of aborting animals. If a mare that has aborted is served before all discharges from the vulva have ceased and the genitalia have been carefully disinfected, then the stallion is liable to get contaminated with the bacillus and spread the disease to other mares which he subsequently serves. If the discharges from the aborting mare are allowed to contaminate the bedding or other materials that other mares come in contact with, then the mares are liable to contract the disease. If the discharges are allowed to contaminate water or food materials that are given to other mares, the latter are liable to contract the disease.

Measures for Control.—1. Three months must elapse between abortion and subsequent breeding. 2. Mares that have aborted must not be bred if there is evidence of uterine catarrh, even after three months. 3. Mares that have aborted must only be bred at the end of the stallion season. 4. Application of an efficient disinfectant to the external genitalia of the stallion after each service in affected districts.

Measures to be Employed at Time of Abortion.—1. Isolation of mare at first sign of approaching abortion. 2. After abortion the foetus and membranes should be burned, if possible, or buried deeply in quick-lime. 3. Those handling the foetus and mare should disinfect hands and clothing. 4. Bedding should be burned and the stall washed with a strong disinfectant. 5. External genitals, thighs and tail of mare should be washed daily with a good disinfectant. Two per cent. bacteriol, lysol, or cresol, is satisfactory for this purpose. 6. Isolation of mare should be maintained for at least a month or until all evidence of uterine discharge has ceased. Treating the animal with drugs, as carbolic acid, black haw and methylene blue, which are popular in some districts, cannot be recommended as being of any value.—Dr. J. H. Reed, O. A. College, Guelph.

Oyster-shell Scale. This is a very common orchard insect. It attacks not only apples but also pears, plums, currants and many ornamental and shade trees and bushes. Full grown scales are found almost exclusively on the bark and are easily recognized by their oyster-shell appearance. They are about 1/4 of an inch long, 1-24 inch wide, taper towards one end, and in color resemble closely the bark of the tree. The injury is caused by their sucking the juices out of the bark and thus weakening the trees. When very abundant they almost completely cover the bark and in that case may kill either the whole tree or portions of the branches. Most infested trees, however, are not killed but only weakened.

Control.—Spraying the trees just before or just after the buds burst with lime-sulphur solution, 1 gallon to 8 or 9 gallons of water, is a satisfactory remedy. The Regular Codling Moth spray with one gallon of lime-sulphur to about 39 gallons of water, to which two pounds of arsenate of lead paste or one pound arsenate of lead powder is added will also help greatly, because it will hit the young scale insects just after they have hatched, while they are still unprotected and easily destroyed. Dead scales may remain on the trees for several years after date of killing. Pruning the trees early makes it easier and cheaper to spray them well. Prof. L. Caesar, O. A. College, Guelph.

School estimates as passed by the Property Committee of the Board of Education, Toronto, totaled nearly \$4,000,000.

"Go Teach All Nations Beginning at Jerusalem"

"THAT'S it" says a critic. "beginning at Jerusalem! You should correct paganism at home before going abroad to look for it. I do not believe in Foreign Missions."

Yet Jerusalem was not Christianized when the Apostles went to Antioch; when Philip was sent to the Ethiopian.

Remember This

The man who does not believe in Foreign Missions stands today clothed and educated because of Foreign Missions. When did English culture begin? With the visit of St. Augustine, a Foreign Missionary from Rome. Who Evangelized Rome? A Foreign Missionary named Paul of Tarsus and Jerusalem! What if he had gone to the Ganges instead of to the Tiber? Certainly Canada needs more Christianity, but the best way to improve our own spiritual life is to help bear the burdens of the world.

The Missions Established

Five Christian Communions in Canada—Anglican, Baptist, Congregational, Methodist and Presbyterian—have an extensive mission work abroad. They have sent overseas many devoted men and women. By their work, barriers have been broken down and in every land there is an eager call for more missions, more teachers, more doctors, more hospitals. Now, owing to the declining value of the dollar, it is necessary to double the expenditure in order even to hold the ground won. Until that is done, an advanced Missionary programme can not be undertaken.

Mass Movements in India

India is our brother-land, a loyal British dependency. Illiteracy is the rule. Caste imprisons the people and stifles all ambition. British administration has taught the folk the value of peace. English-speaking Missionaries from Canada are teaching them the value of education and the power of the Name which is above every name. Great masses of the people are asking for baptism, but there are not enough Missionaries to teach them.

A Mandate for Expansion

All men, who think honestly realize that the Gospel of Christ is unique in moral splendor, in spiritual force, in civilizing influence. It redeems the individual and exalts the nation. It has made the modern world of thought, of industry, of progress. It must go out over all the earth to ease international relationships, to put an end to cruelty and misery. There is free entry for the Gospel in every nation under Heaven. Lift up your heads, O ye Gates of India, and be ye lifted up, ye everlasting Doors of China and Japan and Africa, and the King of Glory shall come in.

The Chance in China

China is attempting to develop a democratic spirit before the nation is prepared for it. Many of the leaders got their first glimpse of true liberty in Christian Mission Schools. Now they talk of establishing one million Government primary schools. They look to Canadian Missionaries for help in the establishment of normal courses. Was ever such an opportunity before the Church—to help influence the school-teachers of a great, new nation of four hundred million people?

Oyster-shell Scale. This is a very common orchard insect. It attacks not only apples but also pears, plums, currants and many ornamental and shade trees and bushes. Full grown scales are found almost exclusively on the bark and are easily recognized by their oyster-shell appearance. They are about 1/4 of an inch long, 1-24 inch wide, taper towards one end, and in color resemble closely the bark of the tree. The injury is caused by their sucking the juices out of the bark and thus weakening the trees. When very abundant they almost completely cover the bark and in that case may kill either the whole tree or portions of the branches. Most infested trees, however, are not killed but only weakened.

Control.—Spraying the trees just before or just after the buds burst with lime-sulphur solution, 1 gallon to 8 or 9 gallons of water, is a satisfactory remedy. The Regular Codling Moth spray with one gallon of lime-sulphur to about 39 gallons of water, to which two pounds of arsenate of lead paste or one pound arsenate of lead powder is added will also help greatly, because it will hit the young scale insects just after they have hatched, while they are still unprotected and easily destroyed. Dead scales may remain on the trees for several years after date of killing. Pruning the trees early makes it easier and cheaper to spray them well. Prof. L. Caesar, O. A. College, Guelph.

The Call to Action

Canadians, Churchmen or non-Churchmen, you met the charges of the war with cheerfulness, since it was waged to establish righteousness in the earth. Now hear the call of the Churches for adequate means to continue by peaceful suasion the work which for four years was done by batteries and bayonets. Your Church appeals directly to you, civilized and educated by Foreign Missions of an ancient time, to meet your obligation to that same Great Cause today.

The Need of the World

Japan, Formosa, Korea, the South Sea Islands, South America, and not least, the pagans in our own land need the Gospel. The Missionary is welcome in all lands. Men everywhere appreciate the spirit of those Canadians who forget themselves in order to serve the suffering and the weak. Idealism in action counts.

HERE'S A GIRL WHO PREFERS MARRIAGE TO PAINFUL TEE

CHICAGO, Feb. 13.—Once upon a time Grace Amacker, Oak Park, shuddered at the thought of a dentist's chair. But that was before last November, when an aching molar sent her to the office of Dr. Fred C. Egan.

### THIS WOMAN KNOWS

#### She Proved that Lydia E. Pinkham's Vegetable Compound Does Help Suffering Women

Watertown, N. Y.—"Last fall when I was expecting to become a mother I was in very poor health. I suffered from a female weakness so I did not have strength enough to do my own work and could not stand on my feet for any length of time. Lydia E. Pinkham's Vegetable Compound corrected my trouble and I improved in health so that when my baby came the doctor said he never saw a woman get along any better than I did and I know it was Lydia E. Pinkham's Vegetable Compound that helped me."—Mrs. ENNEST DEBBE, 124 Wyoming Ave., Watertown, N. Y.

### NEVER HAVE SEEN A DOG OR A CAT

#### Children in War-Scarred Europe Never Even Hear the Birds Sing.

When you grinned at the six-year-old son of the house romping in the yard with his dog, or watched his mother miserably dividing her attention between ribbon bows for the house "tabby" and the robin on the lawn, did it ever occur to you that somewhere in the world there are little folks of the same age who have never seen a dog nor a cat nor heard a bird sing. Yet, there are some hundreds of thousands of youngsters in war-torn Europe to-day who are ignorant of the existence of the furred and feathered creatures which help to make a Canadian kiddie's day worth while.

### AFTERBIRTH RETAINED

#### The Cause and Cure of a Not Uncommon Trouble.

Cows of All Ages Are Sometimes Affected—Remedies Suggested Where Veterinary Cannot Be Had—Grape Pruning For the Garden.

(Contributed by Ontario Department of Agriculture, Toronto.)

RETENTION of the afterbirth, foetal membranes or placenta, commonly called "the cleanings," is not uncommon in cows. Its cause is not understood. While it is probably more frequently met with in cows in low condition and unsanitary surroundings, no care, food, attention or surroundings act as preventives. It is noticed in cows of all ages, all breeds, cows in all conditions and at all seasons. We cannot understand why it occurs, or why it cannot be prevented, but experience teaches us that such is the fact. Good care, comfortable surroundings, avoidance of cold and dampness, especially in cold weather and giving a warm mash for a day or two after calving tend to aid expulsion of the membranes, but even all precautions frequently fail. The administration of medicines is ineffective. In ordinary cases the membranes are expelled shortly or in a few hours after parturition, while in other cases they are retained for 24 hours or longer and then spontaneously expelled. In other cases spontaneous expulsion does not take place until after decomposition, when they are expelled in pus and small pieces.

### CHAMBER OF COMMERCE ACTIVITIES

#### Mr. Hugh M. Bell, the director of the campaign for the organization of the St. Catharines' Chamber of Commerce, to-day said he had been asked so many questions about the methods which will be followed that he had prepared a little outline of these under the headings which the inquiries have suggested.

Charts and diagrams have been in the headquarters in the Union Bank Building which will explain in all their details the organization and operation of a Chamber of Commerce. These Mr. Bell said, he would be glad to explain to any callers. The outline of the campaign follows:—

Preparation of the "Machinery for the membership campaign of the Chamber of Commerce is rapidly advancing at the headquarters in Union Bank Building. Many callers drop in each day to ask questions and in other respects the show of interest among the citizens is encouraging to the campaign manager.

"So many people have asked me just how we are going to handle the task," he said to-day, "that I have drawn up this little outline of the whole campaign. It is arranged under the headings that have been suggested by the questions we have been asked:

1. Securing the necessary membership and income for three years.

(a) A carefully compiled list of the citizens of St. Catharines who should support such movement, made in card index form.

(b) The number of memberships that each should carry, based upon the benefit to be expected, and what corporation and men of similar standing in other cities are being indicated on each card.

(c) This list to be examined carefully by two separate committees and passed upon by the executive committee before it is used.

2. Creating a working membership.

(a) During the campaign for membership and afterwards, a systematic method of acquainting the public with the proper functions of a Chamber of Commerce to be put into operation.

(b) A series of luncheons which ultimately become schools of organization, to be held; these luncheons open to non-members. At these luncheons specialists will present the steps necessary in successful organization management.

(c) The speakers to be aided by charts and other methods of graphic presentation. Everything reduced to a common sense basis and hip-horror methods avoided.

(d) This definite and methodical way of presenting a sometimes misunderstood field of activity fortifies the optimist with a mass of intelligent arguments and smoothes the pessimist under a mass of carefully collected facts that leave no ground for just criticism of a real Chamber of Commerce.

3. The development of a program of work.

(a) With the completion of the membership and educational campaign, the development of a program of work will be the next step.

(b) Each member will be asked to express himself on what he thinks the organization should undertake for the welfare of the city as a whole and for the promotion of his line of work.

(c) The expressions thus received will be collated and written into concrete paragraphs, these forming the planks of the program of work.

(d) This method brings unity of action in the shortest possible time and enables the officers to reach out intelligently to the individual members for support and help.

4. Installation of committee organization and control.

(a) Special instead of standing committees.

(b) Careful analysis of work to be done.

(c) Definite schedule of action, preparation of needed date, limited committee appropriations, conferences between committees and directors at frequent intervals.

5. Outline of office system.

(a) Disbursement sheet and authorization of expenditures.

(b) Budget for proper distribution of expenditures.

(c) Card index for membership record and for proceedings of the directors and committees.

(d) Filing records for industrial, commercial and other information, photographs and data for publicity requirements.

A number of dog cases were dealt with by the Magistrate in police court today.

People are still falling on the treacherous ice on the sidewalks and there have been some more painful injuries reported. It would be a good thing if the city or private citizens themselves sprinkled some sand on the walks.

### NEVER HAVE SEEN A DOG OR A CAT

#### Children in War-Scarred Europe Never Even Hear the Birds Sing.

When you grinned at the six-year-old son of the house romping in the yard with his dog, or watched his mother miserably dividing her attention between ribbon bows for the house "tabby" and the robin on the lawn, did it ever occur to you that somewhere in the world there are little folks of the same age who have never seen a dog nor a cat nor heard a bird sing. Yet, there are some hundreds of thousands of youngsters in war-torn Europe to-day who are ignorant of the existence of the furred and feathered creatures which help to make a Canadian kiddie's day worth while.

Jewish relief workers who have returned from the Eastern and Central European countries cite the absence of domestic animals and birds to illustrate the desolate barrenness of the countries that were swept again and again by the warring armies for nearly five years. Jacob Bashein, who had charge of a unit for the Joint Distribution Committee, the sole agency disbursing relief funds raised by the Canadian Jewish Relief Committee, the Central Committee for Relief and the Jewish People's Relief Committee, has described the conditions there.

"In that bare stretch of country where there are scarcely any trees, no habitations other than the miserable dug-outs in which returned refugees exist,—the 'no man's land' of Poland—we did not see a single cat or dog, and in all the time we were there we never heard a bird sing. Armies have swept bare the country and trampled the ground to the consistency of mud, while shells have blasted the countryside. No animal, even domestic animal was left there. So there are children to-day of five or six years of age who have never seen a dog nor a cat and have never heard the singing of a bird!"

### DESTITUTE JEWS HAVE NO HOUSES

#### Six Million Unfortunates Compelled to Use Packing Cases, Cans and Sacks.

Patterning on the block houses that children build, the destitute Jewish refugees of Eastern Europe, whose homes have been destroyed during the war, are trying to solve their housing problem with the packing boxes in which relief supplies have been sent to them, according to reports received by the Canadian Jewish War Relief Committee from Jewish workers abroad.

Not only is every particle of food and clothing used to the utmost advantage in these stricken lands where 6,000,000 Jews are at the point of starvation, but the cans and sacks and wrapping cases in which the food and clothing come are made to do duty as well. There is neither lumber or nails in most of the countries of eastern Europe at present, and the packing boxes are handled as if they were the finest mahogany, when the shipments arrive. Not a nail is allowed to go to waste, when the boxes are taken carefully apart.

All over eastern Europe at present men, women, and children, many of them sick with typhus, are living in cellars, in dilapidated houses, in old freight cars, on roofless platforms, open to the wind, or in fields, unprotected from the elements. The clothing of these destitute Jews, consisting for the most part of the rags that they have worn for the five years of the war, affords them little warmth.

For this reason, the packing boxes, which might not be considered particularly luxurious homes at another time, are welcomed as life-savers. Just now, boards from them are used to rebuild broken houses, and even to make lean-to shelters where no building stood before. Some of the smaller boxes are piled one above the other, like children's blocks, and nailed together, to serve as temporary houses.

### MOTHERS PRAY THAT BABIES MIGHT DIE

#### Suffering Among Jews is So Bad That Death Alone Gives Relief.

Mothers begging for death to relieve their children's suffering, was the most tragic thing seen by Leo Wolfson, New York attorney and journalist, in seven weeks spent in Roumania, Galicia, Bessarabia and Bukovina. Mr. Wolfson, who has just returned to New York, made the trip in order to study political conditions in these countries.

"There are one and one-half millions Jews in this section of Eastern Europe who are in immediate want," declared Mr. Wolfson. "In every town I visited, I saw starving, naked Jews stretching out their hands to passers-by for a piece of bread. 'They hardly look like human beings. All one sees are living skeletons, covered with yellow skin. The children are small, worn-out, frightened, little creatures, who just drag themselves aimlessly around.

"How they will live through the winter, no one knows. No one can begin to describe this picture of misery and want. But one can get an idea of it, knowing that mothers are actually praying at death to take their children, to relieve their terrible suffering."

Wilfred Mills was accidentally killed in Ontario Paper Company mill at Thorold.

Rev. Wm. Ivens must show why he shouldn't be punished for alleged contempt of Court.

### AFTERBIRTH RETAINED

#### The Cause and Cure of a Not Uncommon Trouble.

Cows of All Ages Are Sometimes Affected—Remedies Suggested Where Veterinary Cannot Be Had—Grape Pruning For the Garden.

(Contributed by Ontario Department of Agriculture, Toronto.)

RETENTION of the afterbirth, foetal membranes or placenta, commonly called "the cleanings," is not uncommon in cows. Its cause is not understood. While it is probably more frequently met with in cows in low condition and unsanitary surroundings, no care, food, attention or surroundings act as preventives. It is noticed in cows of all ages, all breeds, cows in all conditions and at all seasons. We cannot understand why it occurs, or why it cannot be prevented, but experience teaches us that such is the fact. Good care, comfortable surroundings, avoidance of cold and dampness, especially in cold weather and giving a warm mash for a day or two after calving tend to aid expulsion of the membranes, but even all precautions frequently fail. The administration of medicines is ineffective. In ordinary cases the membranes are expelled shortly or in a few hours after parturition, while in other cases they are retained for 24 hours or longer and then spontaneously expelled. In other cases spontaneous expulsion does not take place until after decomposition, when they are expelled in pus and small pieces.

The symptoms are usually evident by the protrusion through the vulva of a portion of the membranes, but in rare cases this symptom is not present, the membranes being wholly contained within the uterus. In such cases, provided the cow has been unwell it is hard to know whether they are retained or have been eaten by the cow. Cows have the objectionable habit of eating the afterbirth. We cannot account for this taste, and when possible it should be prevented. In some cases the consumption of the membranes does not appear to affect the health or general condition of the animal; in others it causes trouble, and in some cases death from various conditions.

Treatment.—When the membranes have been retained for 24 hours or over in warm weather or for forty-eight hours in cold weather they should be carefully removed by hand. Where a veterinarian can readily be procured it is probably wise for the ordinary stock owner to employ him, but a stockman who has some knowledge of the parts, and is not afraid of a dirty and sometimes tedious job can operate himself. The lining membrane of the uterus is covered with many little lumps (called polytelons) which are attached by constricted necks, with surfaces varying from one inch or less to three or four inches in diameter. The polytelons are attached. The operator should have an antiseptic lotion as a 2 per cent. solution of one of the coal tar antiseptics in warm water. A gallon of two of this should be injected into the womb. The operator then disinfects his hand and arm with the same, introduces the hand into the womb and carefully separates the membrane from each cotyledon, being careful not to tear off any of them. If a few are removed the consequences are not likely to be serious, but it is better to remove none. When the whole has been removed a little more of the antiseptic should be injected into the womb. It is good practice to give the cow 40 to 50 drops of carbolic acid in a pint of cold water as a drench, or sprinkled on her food three times daily until all discharge ceases.—J. H. R., O. A. College, Guelph.

### Grape Pruning For the Garden.

The average neglected grapevine is generally such a tangled mess that it is very difficult to describe how to prune it. The owner should determine what sort of trellis he means to fasten his vine on. If there are a number of vines in a row the general practice is to grow it on two wires these to be drawn tight on posts about 16 feet apart, first wire three feet and second wire five feet from the ground. If only one or two vines are in a place it can be grown on a trellis made of two narrow strips of board nailed to posts.

One thing never to be overlooked is all fruit is produced on last year's wood. Most neglected vines have too much old wood. Try to get one or two upright canes of two-year-old wood or older with four arms or younger canes equally distributed on the two wires. These arms should not be over six feet long, giving four arms of this length. This is sufficient bearing wood for any vine. Suppose the upright part is satisfactory and there are four arms on it, these arms laterals or side shoots will grow, on which the fruit is produced. A vine should be pruned after it freezes before winter and before it thaws in the spring. Pruning in mild weather causes bleeding from the cuts. The laterals that bore fruit should be cut back, only leaving one bud to sprout the following season and the fruit will grow on that sprout. It is quite easy to occasionally renew one or more arms by training a young branch to take the place of the old one. When that is done cut off the old branch. With a little practice pruning is easy; the common fault being to leave too much wood. If in doubt as to the above method of pruning, write for Illustrated Bulletin 237, "The Grape in Ontario."

### Scarcity of Feeder Cattle.

With the growing scarcity of feeder cattle and the advance in value of farm lands, the baby-beef industry is of increasing importance and is receiving the attention of farmers in all live stock sections of the country.

Rev. Wm. Ivens must show why he shouldn't be punished for alleged contempt of Court.

### CHAMBER OF COMMERCE ACTIVITIES

#### Mr. Hugh M. Bell, the director of the campaign for the organization of the St. Catharines' Chamber of Commerce, to-day said he had been asked so many questions about the methods which will be followed that he had prepared a little outline of these under the headings which the inquiries have suggested.

Charts and diagrams have been in the headquarters in the Union Bank Building which will explain in all their details the organization and operation of a Chamber of Commerce. These Mr. Bell said, he would be glad to explain to any callers. The outline of the campaign follows:—

Preparation of the "Machinery for the membership campaign of the Chamber of Commerce is rapidly advancing at the headquarters in Union Bank Building. Many callers drop in each day to ask questions and in other respects the show of interest among the citizens is encouraging to the campaign manager.

"So many people have asked me just how we are going to handle the task," he said to-day, "that I have drawn up this little outline of the whole campaign. It is arranged under the headings that have been suggested by the questions we have been asked:

1. Securing the necessary membership and income for three years.

(a) A carefully compiled list of the citizens of St. Catharines who should support such movement, made in card index form.

(b) The number of memberships that each should carry, based upon the benefit to be expected, and what corporation and men of similar standing in other cities are being indicated on each card.

(c) This list to be examined carefully by two separate committees and passed upon by the executive committee before it is used.

2. Creating a working membership.

(a) During the campaign for membership and afterwards, a systematic method of acquainting the public with the proper functions of a Chamber of Commerce to be put into operation.

(b) A series of luncheons which ultimately become schools of organization, to be held; these luncheons open to non-members. At these luncheons specialists will present the steps necessary in successful organization management.

(c) The speakers to be aided by charts and other methods of graphic presentation. Everything reduced to a common sense basis and hip-horror methods avoided.

(d) This definite and methodical way of presenting a sometimes misunderstood field of activity fortifies the optimist with a mass of intelligent arguments and smoothes the pessimist under a mass of carefully collected facts that leave no ground for just criticism of a real Chamber of Commerce.

3. The development of a program of work.

(a) With the completion of the membership and educational campaign, the development of a program of work will be the next step.

(b) Each member will be asked to express himself on what he thinks the organization should undertake for the welfare of the city as a whole and for the promotion of his line of work.

(c) The expressions thus received will be collated and written into concrete paragraphs, these forming the planks of the program of work.

(d) This method brings unity of action in the shortest possible time and enables the officers to reach out intelligently to the individual members for support and help.

4. Installation of committee organization and control.

(a) Special instead of standing committees.

(b) Careful analysis of work to be done.

(c) Definite schedule of action, preparation of needed date, limited committee appropriations, conferences between committees and directors at frequent intervals.

5. Outline of office system.

(a) Disbursement sheet and authorization of expenditures.

**RED ROSE TEA** is good tea

WE were among the first to put up tea in sealed packages.

We were the first to use automatic electric weighing machines so as to insure accurate weights.

We were the first to make known the qualities of the now world-famous ASSAM teas.

And we are now the first to adopt a new package for the better protection of these fine quality teas.

The lead package has served its purpose well for generations, but it was easily broken or torn, allowing not only a loss of tea from the package but exposing the tea to the air, odors and dust that it was so necessary to protect the tea against.

Our new package—the waxed board carton—is stronger, more secure and more completely air tight; altogether the best container for tea that has yet been devised.

**RED ROSE TEA** is good tea

# Four Good Reasons for a National Forward Movement

"For God so loved the world, that He gave His only begotten Son, that whosoever believeth on Him should not perish but have everlasting life."

**D**ESPITE the four years' fury of War, and the year of uncertainty just ended, the people of Canada have prospered. Yet, spiritual glories revealed to us in the great Conflict are being clouded by drifts of class-hostility, mutual suspicion and cynical materialism.

The world is troubled. Old conceptions are giving place to new. Yet, the Kingdom of God remains, firmly grounded on the great principle of love. It has the one remedy for a world diseased:—"Believe on the Lord Jesus Christ and thou shalt be saved."

Five Christian Communion—Anglican, Baptist, Congregational, Methodist and Presbyterian—call their various constituencies and the whole nation to a livelier and more sacrificial Christianity. They are making a great financial appeal. It is fitting that the public should know the reasons.

**1 The Decline of the Dollar** The sharp rise in prices the world over has affected injuriously the position of every man working for a fixed salary. Missionaries are in this category. Stipends that were ample in 1900, and nearly adequate in 1912, are utterly insufficient in 1920. There has been no general increase in these stipends. There cannot be, until the Canadian people scale-up their giving to balance the decline in purchasing-power of the Canadian dollar.

International exchange has been unstable. Money for export has been subject to heavy discounts. In view also of the increased cost of materials and of labor, any new building programme abroad has been out of the question. But the need for new buildings is imperative. Some missionaries are living in clay-floored huts.

**New Standards are Necessary** The Anglican Synods, the Baptist Conventions, the Congregational Union, the Methodist Conferences, and the Presbyterian General Assembly, have set new standards for the salaries of Clergymen actively engaged in Canada. But, for the Missionaries, and for the Superannuated Ministers, no increases have been possible.

One of the aims of the Forward Movement is to show the fine-spirited, generous, Christian people of Canada that the old standards of giving for Missions must be revised. It is impossible to maintain existing stations, even on a pre-War basis, without more men and much more revenue.

**2 The Call from Abroad** Coincident with this financial difficulty, new and glorious opportunities for the extension of Christian teaching have appeared. In India, literally millions of "outcasts" are pleading for Missionary preachers and doctors. In China, a new National spirit has been born. Missionary teachers are urgently required to help formulate the National system of education. Hospitals, Missionary nurses, doctors and dentists, are heartily welcomed by the people. From Japan, Africa and the Islands of the Sea, comes the same story.

**3 The Home Responsibility** Here in Canada, the work of evangelizing Indians and Eskimos must now be undertaken wholly by the Canadian Church. The rapid growth of our cities, the expansion of the West, the great immigration of the last twenty years, and the depopulation of rural areas, make a four-fold problem which can be solved only by radical readjustments of policy and greatly increased resources of men and money.

**4 The Pressure on the Colleges** Finally, the decline of the dollar has created difficulties in financing the Colleges and Universities established and maintained for the training of the Clergy. Last year, one College which had been able before the War barely to subsist, faced an additional charge for coal alone of \$1600. All other expenditures have risen in like proportion. Christianity has been the mother of Higher Education. A thoroughly trained Ministry is the great need of the times.

The men of faith, filled with the Holy Ghost, who proclaim the Gospel story by the frozen Coppermine, beneath the cone of Fujiyama, along the banks of the Yangtse and the Ganges are the product of our Canadian Colleges. There the Vision first appeared to them. The Church must stand behind these institutions.

**The Unity of Faith and Prayer** These are the facts. Faced with such conditions, the Church leaders, at first, were appalled. They went to their knees, first in separate denominational groups, then in company. Putting aside for the time being differences of religious temperament, considering only their common belief in the Everlasting Father, the Almighty Son, and the everpresent Holy Ghost, they prayed together. Then they arose, thrilled with a glimpse of the wonderful Missionary opportunity, to appeal together to the whole body of Christians in Canada.

**The Greatest of All Gifts** You are a believer in the Lord Jesus Christ, and in the Gospel He proclaimed. Your country has become great through Christianity. The hope and love of the Gospel have warmed your heart and illumined your life. Next week you will be asked by the representatives of your Church to show practical proof of your convictions. Be prepared—not to give a trifle out of your abundance, but to taste the full sweetness of Sacrifice.

Announcing Red Rose Orange Pekoe Tea

During our twenty-five years in business, Canada has made wonderful progress in education, refinement and wealth.

The scale of living and the tastes of the people are more luxurious than a quarter of a century ago.

Realizing this we have decided that in addition to our well-known standard brands of Red Rose Tea, the sales of which are increasing faster than ever before, the time is opportune to introduce a tea of extra quality.

Mountain grown Orange Pekoes from the best plantations. A tea of extra quality at a little extra price.

grown teas are very superior to low-land teas.)

They are gathered at the time of the year when the flavor is most fully developed in the leaves.

The manufacture and final preparation are carefully and skillfully done.

When brewed, Red Rose Orange Pekoe Tea has all the characteristics of fine quality tea.

It has a bright, sparkling amber color in the cup.

The aroma is delicate and delightful.

After the liquid is poured off, the leaves in the pot are a greenish copper color.

The flavor is of rare charm and distinction. The more cultivated your taste the more you will appreciate it.

The strength is rich, satisfying and invigorating.

Red Rose Orange Pekoe Tea is sold only in our sealed waxed board cartons which fully protect its fine quality.

Ask for it by the full name: Red Rose Orange Pekoe Tea. The words "Orange Pekoe" are in orange on our new waxed board cartons.

T. H. ESTABROOKS COMPANY, LIMITED St. John, Montreal, Toronto, Winnipeg, Calgary, Edmonton, St. John's, Nfld., and Portland, Maine.

To Grocers: Our travellers are on the road taking orders for the NEW tea. If our traveller hasn't reached you, better phone or mail an order immediately to our nearest office. There is sure to be a considerable demand at once for this fine quality tea.

Our well-known Red Rose package, the sale of which is increasing faster than ever before. Red Rose consists chiefly of Assam teas, the richest and strongest in the world and therefore very economical.

(The Red Rose Orange Pekoe package is a little different in design.)

# Children Cry for Fletcher's CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

## What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

## CITY AND DISTRICT

We buy everything you want to sell. McGuire & Co.

The Board of Education will meet tonight at 8 o'clock at the city council chamber.

Men's \$7.00 Shoes, Black or Brown Round or pointed toes. Sale Price \$4.95. Brownell's, 357 3rd Street, 2121 Main St., Niagara Falls, N.Y.

This is Friday the Thirteenth. It is unlucky to fall and break an arm or a leg today, likewise to lose money or get in wrong, anywhere.

Ladies' \$7.00 Shoes, Black or Brown, High or Low Heels. Sale Price \$4.95. Brownell's, 357 3rd St., 2121 Main St., Niagara Falls, N.Y.

At a meeting of the Niagara Falls G.W.V.A. a resolution was passed asking that the Dominion Government place a ban on all newspapers, periodicals or any publications belonging to Hearst or any subsidiary company. A copy of the resolution will be sent to the Provincial and Dominion Command and the Prime Minister.

Brownell's Profit sharing sale ends Saturday night. Don't miss it. 357 3rd St., and 2121 Main St., Niagara Falls, N.Y.

Marshall Arnold, U.S. Immigration Officer on the lower bridge at Niagara Falls, was fined \$200 and costs in Police Court yesterday on a charge of breach of the O.T.A. He was arrested by Officer Farrel, and found to have a full bottle of whiskey in his possession.

Save money on Footwear at Brownell's Profit Sharing Shoe Sale. 357 3rd St., and 2121 Main St., Niagara Falls, N. Y.

Tonight the Orientals pay a fraternal visit to Welland, leaving on special cars at 7 o'clock. There will be a parade to the N. S. and T. station from Queen street via King, James and St. Paul, headed by the two bands, brass and jazz.

Men's \$7.00 Shoes, Black or Brown Round or pointed toes. Sale Price \$4.95. Brownell's, 357 3rd Street, 2121 Main St., Niagara Falls, N.Y.

The funeral of the late Mrs. Margaret Sarah Flumerfelt took place on Thursday afternoon from the residence of her son, Oscar Flumerfelt, 87 1/2 Queen street, and was largely attended. The services were conducted at both house and graveside by Rev. A. H. Howitt, rector of St. Thomas church. The bearers were, Oscar Flumerfelt, Edward Flumerfelt, Alexander Christie, Roy Christie, Thomas Bradley and Captain Robert Chestnut.

Ladies' \$7.00 Shoes, Black or Brown, High or Low Heels. Sale Price \$4.95. Brownell's, 357 3rd St., 2121 Main St., Niagara Falls, N.Y.

A large number of sympathizing friends were in attendance at the funeral of Verla Margauriete, little daughter of Mr. and Mrs. Thomas Coley, of Merriton, on Thursday afternoon. The service was conducted by Rev. George Extence, pastor of the Presbyterian church, and the little casket which was covered with beautiful flowers was conveyed to Lakeview cemetery, Thorold, where the remains were very tenderly laid in their last resting place.

Brownell's Profit sharing sale ends Saturday night. Don't miss it. 357 3rd St., and 2121 Main St., Niagara Falls, N.Y.

Last night the masquerade ball given by Umberta Lodge 785 Sons of Italy at Prince of Wales hall was very largely attended and it was a complete success in every way. Guests were present from all parts of the district. Some very handsome costumes were worn and some very comical ones. The committee in charge was A. R. DeConza, V. Chierzo, Doro Maria, Frank Cretico, S. Popolito and S. Madena. Nothing was lacking to make the affair enjoyable to everyone present.

## Old Boys Assn. Of Citizens' Hose Co. to Be Formed

A meeting held in the Grand Central last night of the former members of the Citizens' Hose Company with a view to forming an Old Boys Association. Charles Chapman was voted to the chair and Sheriff O. Loughlin acted as secretary pro tem. A committee was appointed composed of Charles Chapman, Sheriff O. Loughlin, James Aadie and H. W. Hodgins to consider the question of forming such an association, the committee to report to another meeting to be called soon. About twelve ex-members were at the meeting and it was noted that out of 27 members when the company was disbanded in 1902 there are still 24 alive.

Traffic was tied-up on the main line of the G.T.R. for about three hours on Saturday morning last, due to a wreck which happened inside the yards at the Grimby station. About 10.50 a fast freight going east, was highballing along at about fifty miles an hour when it was suddenly seen to start to wobble in the middle of the train and one of the cars took a shoot out into the atmosphere and rolled down the bank, at the end of Robinson street south and twenty others left the track and piled up across the west-bound track. The accident was caused by a boxing on a heavily loaded car of stone dropping down out of position just west of the station.

Members of the Chamber of Commerce of Niagara Falls, Ont. have committed themselves to the forming of a company for the erection of houses in Niagara Falls. At a meeting held last night, seventeen members pledged themselves to take blocks of stock in the new company. There was some discussion as to whether the Chamber build houses or a factory tenement building, but it was felt that the house shortage was a more immediate problem. The company will apply for a charter with a capital of \$250,000 in shares of \$50 each. The new company will be called the Niagara Falls Homes, Ltd. T. F. Battle was authorized to go ahead and apply for a charter.

The big vaudeville bill drew a large crowd to the Grand last night and the show which is of rare excellence was much enjoyed by everyone some of the entertainers being repeatedly called. One of the most attractive features is the musical "O'Perin", "Mamma's Birthday," in which eight good-looking and clever girls take part. The Mabel Fonds Duo do a good manipulating act, which was well received. Capman and Mooney are an amusing pair. Hussey and Carroll in their novel racing stunt please everybody, while the Quaker City Flour brought down the house with their fine singing. Knapp and Murray well bear out their reputation as the boys behind the fun. The show concludes with Charlie Chaplain's latest picture, "A Day's Pleasure," which is certainly as good as its reputation says of it. The show will be repeated to-night and to-morrow.

## Mail Contract

Sealed tenders addressed to the Postmaster General will be received at Ottawa until noon on Friday, the 19th March, 1920, for the conveyance of His Majesty's Mails, on a proposed contract, for four years, thirty times per week, on the route St. Catharines and Niagara, St. Catharines & Toronto Electric Railway Station, from the 1st July next.

Printed notices containing further information as to the conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office at St. Catharines and at the office of the Post Office Inspector, Toronto Post Office Inspector's Office, Toronto, Feb. 5, 1920.

## Eat Less Meat If Back Hurts

TAKE A GLASS OF SALTS TO FLUSH THE KIDNEYS IF BLADDER BOTHERS YOU.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority, because the uric acid in meat excites the kidneys, they become overworked; get sluggish, clog up and cause all sorts of distress, particularly back-ache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders. Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.

## "Seein' Things At Night"

TO MOTHERS! Guard your kiddies against torpid liver, sour stomach, constipated bowels which generate poisons. These "inside" poisons circulate to the brain, producing bad dreams, then a feverish head. Unless you "work" out these poisons you will have a real sick youngster shortly. Cascarets are a candy cathartic, ideal for children. Cost only 10 cents a box. Read below!

Children love Cascarets because they taste like candy. When your child has a white tongue, feverish breath, foul stomach, give Cascarets anytime to "work" the nasty bile, souring food and bowel poison from the clogged-up places. You needn't coax even cross, sick children to take these harmless candy "Cascarets." They never gripe—never injure! Cascarets never disappoint the worried mother. Each 10 cent box contains directions and dose for children aged one year old and upwards.

## BE A TIE UP

N. S. & T. R. LINES  
MEN THREATEN

Will Not Accept the Arbitration Board, Which Simply An Invitation to Strike.

It is likely to be a tie up in question. S. and T. R. Lines The Journal is disconcerted today and it would not be surprised if it came tomorrow or the day after. The men as stated before are very disgruntled over what the arbitration board gave them in the matter of wage increase, and have decided to go out on strike. This time, the men state, it will be a real tie up with no let up until they get what they consider they have a right to. When the strike was settled last year it is stated by the men that they would have the wages increase of the

## COUNTY COUNCIL

IT WOULD BE ILLEGAL TO MAKE GRANT TO

The Finance Committee of the County Council has reported as follows: Our Committee on Finance began to submit this report, and recommended as follows: That the matter of a grant to the Canadian National Institute for the Deaf be dealt with later, after the Committee, appointed to go to Toronto on Educational matters, have visited the Institution. That a grant of \$50 be made to the Toronto Sick Children's Hospital. That the Chairman instruct the Clerk to write the Navy League of

## Efforts Being Made to Save

Of Ontario By R

as the buffalo vanished from western plains, so will the deer disappear from Ontario's forests unless some drastic action is taken by the Government. The slaughter of deer aggravated by that foolish persistence to kill two instead of one, in the autumn of 1918, reached alarming proportions. As a result, last fall animals were very scarce and hunters who for years had never been able to get their deer, went home very disappointed and disgruntled. Many had not even seen "stag" in districts where deer were plentiful.

Save Game For People. The annual increase in the number of hunters, the indiscriminate shooting of does and fawns, and above all, the hunting of deer with dogs, is to blame for the growing scarcity. Action will have to be taken if deer hunting is not to become an extinct sport.

Those live wire sportsmen who compose the Essex County Wild Life Conservation Association, whose object is to stop pothunting and the slaughter so that the fish and game of this province may be preserved for the enjoyment of the average citizen, has submitted resolutions to the Ontario Fish and Game Committee, which in a few days meets in Queen's Park, to make the game laws of the coming year. There are some of the restrictions: In view of the belief that deer will be exterminated within five dog
