BUCHANAN'S DEATH.

With two electric contacts, consuming not over a minute, Dr. Buchanan was put to death in Sing Sing prison on the 1st inst., just before noon. Like all the others who have preceded him, he went to death calmly and did not say a word in the death chamber. The only appearance of fright or weakness was the fact that he closed his eyes when he entered and did not open them again. Two contacts were made, but all the physicians and electricians claim that the second contact was merely precautionary, and that the victim died instantly. There were no burns and no unpleasant features, and every physician present declared the execution a success. The body had been claimed by friends, and the case will go down into

history as a cause celebre. Seldom, if ever before in the history of criminal procedure in this country, has there been such a determined and untiring legal fight made to save or prolong the life of a condemned murderer, as that which has been made in behalf of Dr. Robert W. Buchanan, the convicted wife poisoner. Buchanan has practically been on the threshold of death no less than three times since he was sentenced. On two of these occasions his life was proonged by the clemency of Gov. Morton, and the other respite was due to legal technicalities. It was a very early hour on the morning of the execution when a messenger arrived at the prison with the opinion of the Attorney General, to the effect that the warden would not be in the wrong if he carried out the sentence in the case of Dr. Buchanan. As Buchanan sat on the edge of the iron cot in his shirt sleeves, he could hear the guards in the death house arranging the room and electrician Davis getting his wires ready. This made him nervous, and he paced up and down the cell, chewing a cigar and talking to himself occasionally. His nervousness increased as the minutes went by, until at last Warden Sage entered the death house.

Early on the morning of the execution, Mrs. Buchanan, wife of the condemned murderer made one last but unencocceful effort to induce Gov. Morton to commute Gov. Morton was plainly overcome by the woman's pleadings, and tears stood in his eves as he lifted her to her feet and told her that he could not grant her request. Mrs. Buchanan left Ellerlie and took the eight o'clock train for Sing Sing in order to see her husband for the last time alive. When she arrived at Sing Sing, Warden

Dr. Robert W. Buchanan was born of Scotch parents on October 17th, 1862, and began business as a drug clerk in Halifax. N. S., shortly after he left school. He was graduated from the College of Physicians and Surgeons in Chicago, and returning to Halifax married Miss Helen J. Patrson, a young woman of good family. In 1890 she separated from him and he ecured a divorce and married Annie Sutherland, a Newark, N. J., brothel reeper, reputed to be very wealthy. She was old enough to be the doctor's mother, and made a will in his favor. She died suddenly in April, 1892, and he started on a debauch, telling his friends she had left nim \$40,000. Within a month he secretly re-married his divorced wife at Windsor, N. S. The suspicion that he had oisoned his first wife grew, until the authorities had the body disinterred and an autopsy held. The trial lasted six

items of production on a farm is that of labor; therefore it is obvious that the least labor, compatible with good results, that is necessary in producing a product,

the more profit will that product yield. There has been a good deal spoken and written, during the last few years, in favor of soiling dairy stock, which practice we all agree as being commendable, especially in these days of more or less summer drought. The advantage, however, in soiling dairy stock is not in lessening labor, as it often increases it, but by enabling farmers to keep more stock and in better condition than could otherwise be

supported on the same amount of land. Soiling hogs might well be practiced much more than it now is with good results. During the early part of the season, while the grass is green and succulent, hogs do well on pasture, but when the grass becomes dry, feeding of some sort must be done in order to keep them thriying. Feeding hogs largely upon grain every day they live is an expensive 'plan, because of what the food costs besides the labor involved in preparing it. If provision were made to have some of the soiling crops always coming in, pigs could be very cheaply raised. The first crops fit to mow will be the clovers, red, and lucerne, either of which is much relished and productive of rapid growth until near the blossoming stage. If these are mown early in the season, it will be only the course of a month or so till a second cutting will be ready. This is especially true of lucerne, which may be mown five or six times during a season. When these are not accessible, oats, peas, vetches, etc., serve as suitable substitutes if cut in the green state; of these oats are the least palatable, but they serve a good be obtained, it may take the place of all out a car about midway between the castalks, leaves and ears, until they become side of it, gripped the iron bar and swung Europe. finely, but the pigs will not refuse the is quite an accomplishment in itself, and THE MOST APPROVED WAY OF quite hard. Of course, this bars out invalids. Again, it would be very foolish for a person who has enough money to live comfortably in civilization to contemplate the journey. The reasons that made me take the step were all good. Summer had almost set in and I found myself in the city, out of work and no mmediate prospect of any. I was not feeling up to the mark. Besides all these reasons, there was a longing in my heart, to see the green fields, and so I started. My outfit consisted of a tooth brush, a piece of soap, a razor, a comb, some ground coffee in a tin cup that had a tight-fitting cover, and a large Sunday edition of a which is made of 438 diamonds. CHRISTIAN UNION.

"Truth ever lovely since the world began, the foe of tyrants and the friend of man."

To the Editor of The Herald. Please allow me space in your valuable journal to make a few remarks in referance to that sermon preached by Bishop Courtney at the celebration of the 50th anniversary of the late Bishop Medley at the Cathedral in Fredericton. I, for one, admire his Christian charity extended to those who differ from him, as well as to those who agree with him. But there are some things in his sermon that are hard to understand, for instance: He says the theory that the Church cannot err, is a pleasant one, but not true. It seems to me the reverend gentleman does not understand what the church is. The Church is the gospel of Christ, the Revelation that God gave to man, and a Christian is one that takes the gospel for his guide and the divine examples for his rule. He learns one and tries all he can to imitate the other. If he does not do that he is only Christian in name. That is the doct-

rine of the Church, not my individual Now, if he had said the theory that a king can do no wrong is a pleasant one but not true, he would have been hitting the mark. When he says the Church of Christ can err, he says what is not true. He, claiming to be a Bishhp of the Church of Christ, and at the same time acknowledge to the world that he does not believe in the infallibility of the Church, is a mystery to me. If he believes in the Apostle's Creed, he must believe in the Holy Ghost, he must believe in the Holy Catholic Church; they are one and the same thing. Without the Holy Ghost, the spirit of truth, there is no Church. We may have temples, we may have meeting houses, or club rooms, but no Church. All those things are the work of

man, but the Church is the work of God. "Thou art Peter," says the Son of Gods and upon this rock I will build my church, and the gates of hell shall not prevail against it." So you see our dear Lord and Saviour did not even trust to His Apostles to build His Church, He His promises that He made to His Church. that also would be blasphemy.

him, but when he says the Church can err, or did err, he says more than he or any one else can prove. British law says Prove it." I most respectfully call on him to produce his proof for his assertion; until he does, he leaves the public indebted to his magination for his facts. I have many things to say in reference to this questions as I, in common with others, desire to see Christian Union. If I can help the cause

#### WASTED ELOQUENCE.

The Church of England Synod at Moncton last week wasted an afternoon discussing the school question. The matter was brought up by Archdeacon Brigstock of St. John, moving that "religious teaching in our public schools is absolutely necessary in order to fulfil the true purpose of education, and conserve the highest interest of the nation at large, and trusts that the day is not far distant when Biblical instruction will form a regular part of education."

The mover, in speaking to his resolution, admitted that under the school law and regulations of this province a teacher is privileged to open or close school by reading the Bible and by reciting the circumstances, Premier Fielding and other Lord's Prayer or any other prayer on receiving sanction for its use, and that they are also required to instil into their pupils the principles of Christian morality; but this did not go far enough to suit him. He wanted regulations compelling teachers to read and teach the Bible in the schools, and his seconder, Rev. Mr. Lloyd of Rothesay, would make the Bible a school text book.

These propositions are entirely impracticable among a mixed population such as we have in New Brunswick. We can see no possible objection to Bible lessons after school hours, but to make it a compulsory text book, to permit clergymen of different denominations to occupy the time of the schools in present ing, perhaps, their own peculiar views of Freddie Doherty; "Hurrah for Canada," the Scripture would, to say the least, sang by the whole school. create a revolution — a religious war which would soon convulse the province. Mr. Town, a St. John teacher, led the

opposition to the resolution, and presented some very plain facts. He pointed out that in the Normal School teachers were encouraged to read the Bible, and showed what was done in the schools under his charge to inculcate religious and moral ideas. The school is opened with Bible reading, prayers and the singing of a hymn. The lessons in the text books were full of good moral lessons and it was free to any teacher to use the Bible to illustrate his lessons. He believed that the teachers, male and female, of all religious denominations, were earnest men and women, most of them devoted Christian workers, and declared they let no opportunity pass to put forward the doctrines of right as taken his place. outlined in the Bible. He believed the school law was intended to, and did permit of religious instruction, that was free

from any denominational bearing. These are common sense, practical views and will carry more weight than the utterances of some clergymen perhaps just out from England, and entirely new to the conditions of the country. What, for instance, does young Mr. Dicker, who railed against the adminis tration of the school law, know about the practical working of the system and the difficulties and dangers which would surround the systematic and compulsory giving of religious instruction in the schools, and yet it is men like that who a tour to the Northwest in a few days. are always prepared to stand up and deliver an opinion. Better let well enough alone. The children are taught religion at home and in the Sunday schools from the standpoint desired by their parents; these means it is not the fault of society, men and women. There is enough in- vited and a very pleasant afternoon and represented in the cabinet, and no adminsane agitation already from another less evening was spent. Rev. Wm. A shocking and terribly fatal collision occurred at 3.15 yesterday morning on the Grand Trunk between two special excursion trains from Norton Mills and Sherbrooke at Craig's Road station, some twenty miles west of Levis, Quebec, where they were due at 3.45. The first train. which had a party of three to four hundred pilgrims from Norton Mills and vicinity for La Bonne Ste. Anne, was standing on the main line waiting for the Quebec freight to pass up, when the second train, which was also conveying about an equal number of pilgrims from Sherbrooke, crashed into the rear end of the first train, demolishing its own engine, own pullman and three first-class cars of the first train, smashing them into splinters and carrying death and destruct ion before it. Thirteen persons were killed and more than fifty received ser-

SUNDAY BICYCLING. And What Some Montreal Clergymen

The bicycle is more used on Sunday than on any other day of the week in Fredericton, and those who take a run on their wheels on Sunday, will be interested in reading what two of the leading clergymen of Montreal think on the matter. Recently the Montreal Herald submitted to all the Hammondville and its People and a clergymen of that city the question, "Do

you approve of bicycle riding on Sunday to

attend divine service or for other pur-

Rev. A. J. Mowatt, of Erkskine Presbyterian church, formerly of Fredericton, said Bicycling! hitherto has been a pastime, and it is largely that yet, and that being so, I would discontinue its use on the Lord's day. But then it is very evident that every day it is coming to be more and more an ordinary mode of conveyance, not a mere next Sunday morning, will preach a ser pastime but a necessity, and as such, I can see no harm in people coming to church that way. I believe it will very soon displace the horse and buggy, and ministers will take to it as a convenient way to fulfil their appointments, and I for one, will not

lift my voice in censure."

said: "If the distance to church be too great to walk, I can see as little objection to attending service by means of a bicycle as by means of a horse, or a horse and carriage; less indeed, if anything, as the use of the bicycle tends to give rest to horses and coachmen. So far as the bicycle rider is cerned, in other cases, the use of the bicycle on Sunday will be determined by each one's sense of propriety and the fitness charge of their religious duties on Sundays in order to go bicycle riding, would abacton branch of the Dominion Savings' bank stain anyway; if there were not the excuse else equally available as a reason for neglecting the worship of Almighty 3od. Those who are religiously disposed, will not neriding they do, to church or anywhere, will be governed by religious principle. To those who are pent up in offices and workshops and factories all week, a walk on Sunday afternoon in the green fields, or a spin of a few miles on a bicycle, along highways perfumed with flowers, must be very healthful and refreshing, and I think can be indulged in without effacing the good impressions received at the morning ser vice of the church. In saying this, I cannot be accused of bias in fayor of the bicycle, I did both."

The services were conducted by Rev. Mr. King, and the funeral arrangements were in charge of John G. Adams of this city. The St. John Globe in noting Mrs Colter's death, observes: "A generation and more ago the Colter farm was noted throughout York for its broad acres, its rich meadows, its fertility, and from the farm house was dispensed a generous hospitality. The travelling musician, itinerant preacher, the glib tongued book agent, the roving doctor, the wandering writer, were cordially welcomed and kindly bade to stay, and many people yet live who will think tenderly of the honest farmer and his pleasant wife and pleasant hours spent with them. Mrs. Colter had lived to see some of her hopes well realized, for one of her sons became a member of the House of Commons, another was Commis ioner of Public Works in New Brunswick for some time, and a third was recently a member of

#### the Provincial Legislature." Base Ball Yesterday.

The base ball match yesterday afternoon between the press team of Fredericton and the actors of Mr. Harkins company was discontinued in the middle of the fourth inning on account of rain, but the newspaper men had before them the assurance of a rattling victory. In the three innings they were to bat they pounded out fifteen runs, and in the field they showed great form. James Tibbitts, of the University Monthly. and Harry McLeod, society editor of the Religious Intelligencer, were the battery for the press men, and both played well. The other members of the nine were Fred Wilson, 1st b; G L Fenety. 2nd b; Amos Wilson, 3rd b; Shea, ss; L C Macnutt, If; F H Risteen, cf; O S Crocket, rf. Fred Payne, who pitched for the actors, was pounded out of the box in the second inning and Barnum took his place. The score, when the game was called, was press, 15, actors 5, the scribes being at the bat in their fourth inning with nobody out. EH Allen was the umpire, and his decisions were generally correct. Beautiful Spots in York County in which to pass a Holiday.

Word About Lunt's.

One of the prettiest spots on the St. John river is Hammondville, seventeen miles above this city, and almost at the upper end of the fine parish of Kingsclear. Particularly at this season of the year is the place beautiful in the garb of Nature's green, and nestling among the hills which look down upon the smoothly flowing St. John river, winding around the fertile intervals and islands of that locality. The village has its store, post office, public hall, Baptist church, hotel, etc., and in its vicinity rereside many of Kingsclear's most prosperous and intelligent farmers. The Elmwood hotel, kept by Squire George McEwen and Dr. John Kerr, rector of Grace church. his hospitable wife, is admirably situated on an eminence, and furnishes

Most Comfortable Accommodation for the weary and dust covered traveller. A representative of the Herald spent Sunday at Mr. McEwen's hostelry, and was treated like a king. The proprietor and his amiable wife give their personal attention to the comfort of their guests. The meals are well cooked and well served, and on Mr McEwen's beautiful grounds, replete with easy chairs, hammocks, etc., one meets the leading men of the village and the surrounding settlements who intelligently discuss matters of politics, religion, etc. If the citizens of Fredericton knew of the comfort and conveniences to be had at the Elmwood hotel it would be constantly thronged with visitors during the summer season. As it is the proprietor does an excellent busines and is constantly enlarging

The Number of His Patrons. DIED. At Mouth Keswick, July 3rd, Eleanor, wife of the late, Alexander Colter, aged 85

The Presbyterians of Fredericton and their popular Pastor, Rev. Willard Macdonald, so report says, were made the object of prayer at the Salvation Army Sunday evening. The Mrs. Wesley VanWart is visiting at His burden of the prayer was that the Presbyterian church might be purged from the sin of pride, and that the pastor, Rev. Willard McDonald, might be led to see the wickedness and folly of wearing a gowa at service. The Army, which has

CHAPTER II.

His good friend Mr. Vane, who during luncheon had been paying particular attention to some old and remarkable Madeira which was on the table, did not seem at all to relish this plan. At first, he seemed inclined to make some open resistance, but a glance from underneath Delabole's bushy eye-brows dissuaded him therefrom, and he contented himself by shrugging his shoulders and indulging in other mild signs of dissent and objection. Previously to retiring with Delabole, Sir Geoffry, with punctilious courtesy, accompanied Mr. Vane to the halldoor; pointed out to him where were the pleasantest walks in the grounds, how best to reach the spots from whence the favorite views were to be obtained, and ane handed him the keys of the conservpark. Vane received all this politeness very cooly, inwardly determining to take the first opportunity of revenging himself on Delabole for the unceremonious treat-

ment received at that gentleman's hands. Left to himself, Mr. Vane strolled idly about the grounds, switching the heads off the flowers with his cane, and cursing Delabole's impudence for having relegated him to the duties of the second fiddle.

"Make the most of your time, my good friend," said he, stretching himself upon a bench shaded by the overhanging branches of a large tree, "make the best of your time, to swagger and give yourself airs, and show that you are the head of the concern; while I am, or supposed to be, one of its paid officers, for within a week or ten days at the outside, I shall be my own master, and if you attempt anything of that kind with me then, I shall be in a position to tell you my opinion of you in the very plainest language. Don't think I have not noticed of late, how very tightly you have drawn the rope whichs binds me to you! Telegraphed for when I am away, told to go here and there, to find out this and that, brought down here and shunted on one side, as though I were a mere clerk, whose busi- en bless you for your kindness." ness it is to make memoranda of what may pass between their excellencies! Oh, my good friend Delabole, you may take your oath I will not forget this. When once my marriage with Mrs. Bendixen is an accomplished fact, and I have the knowledge that I am beyond any harm which you could do me, then you shall taste the leek which you have compelled me so frequently to swallow. I will put my foot on your neck, as you have put yours on mine. I will-Hallo, who's this coming this way? One of the gardeners, I suppose. No, by Jove! the parson who was at the station. What can he want? He must be a friend of Sir Geoffry's, and makes his way through the grounds as a short cut from one part of his parish to the other. He will see I am a friend of the General's, and will want to enter into conversation. I hate parsons, and shan't take any notice of

With this amiable resolve, Mr. Vane curled up his feet beneath him on the bench, pulled out a cigar, and was just about to light it, when, glancing up from under the brim of his hat, he saw the clergyman standing beside him. Philip Vane dropped the cigar, and

sprang to his feet. "Who are you?" he cried, "and what

are you doing here?" "There is no occasion for you to disturb yourself, said the new comer, quietly lifting his hat. "My name is Drage, and I am rector of one of the parishes in Springside. I am speaking to Mr. Philip

"That's my name," said Vane, shortly, and resuming his seat, "thought I cannot imagine how you knew it, unless you read it off my portmanteau, when you were dodging about the station this

morning.' "I knew it before I was dodging about the station, as you are politely pleased to say," said Mr. Drage; "I know a great deal more about you, as you will find out, before this interview is at an end!" "The deuce you do!" said Philip Vane, with a cynical smile; "I did not your room?" know my fame had extended to these parts. And what do you know about me,

"Drage — Drage," muttered Vane. "Any relation of Drage, of Abchurchlane?"

"Your injured and deserted wife!" "Is the woman who once passed under that name still alive?" enquired Vane, anxiously

"The lady who has the terrible mis fortune to hold that position," said the rector, drawing himself up and looking at his companion with disgust, "is alive and well.'

"And you come from her?" "No, I am here on her behalf, but not with her knowledge."

There was a momentary silence, broken by Vane, who said: "And what is your object in seeking this interview with "To warn you that I am cognisant of the position in which you stand; to warn

you against the commission of the crime which you contemplate-" "And to ask for a round sum to buy off the opposition of yourself and your inter-

"You scoundrel!" said Mr. Drage. 'Do you dare to address such language to ne—a clergyman?" "If it comes to a question of language,

said Vane, with a laugh, "I believe that 'scoundrel' is scarcely a term much bandied about in clerical society. As a matter of fact, I have found many gentlemen of your cloth not less open to a bribe than the rest of the world." "You shall find one at least who scorns to discuss even the possibility of such an

argangement. Let us bring this interview to a close; you will clearly understand my object in seeking it. I came to warn you that if you persevered in carryatory and the gates opening into the home | ing out this marriage, I will most assuredv hand you over to the law!" "And I warn you that if you interfere

in my business, I will kill you!" said Philip, savagely.

"Such a threat has no terrors for me," said the rector. "Perhaps not," said Vane, with a contemptuous glance at his companion's feeble frame; however, I will find some

means of bringing you and your client to "Stay," cried Mr. Drage, "I did not come here to bandy threats, but simply to discharge a duty. I will take no answer from you now, irritated as you are by the discovery that your position is known to me. Think over what I have said, and save yourself from the commission of this great sin. If you have occasion to write me, you know where I am to be found." Philip Vane hesitated, then, bowing

his head, he said in a low tone: "You are right. Do not think any more of the wild words I uttered in my rage; leave me to think over the circumstances in which I am placed, and the manner in which I can best extricate myself from the danger into which I was about to plunge. Leave me, and-Heav-Dr. Drage looked at him with brim-

ming eyes, and lifting his hat, slowly walked off. "That was the best way of settling him," said Philip to himself, as he watched the rector down the path. "I must push this marriage on at once, and make some excuse for its being perfectly quiet."

CHAPTER III.

Mr. Drage, smoking a sedative pipe in the rectory garden after breakfast the next morning, pondering over his strange interview with Philip Vane, and wondering when and how he should hear of its result, was startled from his reverie by the clanging of the bell, and looking up, saw Mrs. Pickering at the gate. This visit was not unexpected, nor, truth to tell, had it been contemplated without alarm. The rector felt tolerably certain that Mrs. Pickering would come to tell him how matters had progressed at Wheatcroft during the stay of the strangers from London; but it was by no means certain that he himself might not have seen talking with Vane by some of the servants on the premises, or even by the housekeeper herself, and that the reason for and the result of it might be demanded

There, however, she was at the garden gate, and, whatever happened, she must not be kept waiting. So Mr. Drage hurried down the path and gave her admittance, bidding her good-morning, with that strange mixture of earnestness and nervousness which always characterized his communications with Mrs. Pickering. "Well, now tell me about your guests,"

said he, after the ordinary salutation "They arrived according to promise They stayed with you and-" "And are gone," said Madge. "They went off by the express this morning, to my intense relief; for I felt bound, fettered, and as though I could scarcely

"I do not fancy matters went quite as smoothly as they anticipated," said Madge. "I spoke to Sir Geoffry just before coming out. He told me he had informed these gentlemen that he was not prepared to give them a final and decisive answer at once, but that he would write to them in the course of a few days."

"Deliberation on such a matter in man of Sir Geoffry's temperament, does not argue well for the success of those speculating gentry," said the rector." One would scarcely imagine that a man by nature so impulsive would be inclined to deliberate over even matters of business."

"I think that in this instance, at all events, the result of his deliberations will be to prohibit his friend from embarking in the project which Mr. Vane and his companion came here to advocate," said Madge. "I cannot tell you by what means, but a curious piece of information relative to this very affair has fallen into my hands. I shall lay it before Sir Geoffry prior to his writing his decision, and have no doubt of the way in which it

will influence him." "I hope there is no chance of-of your husband hearing of the part which you propose to take in this matter?" said the rector, nervously.

he said to himself. "He was evidently Meanwhile Madge, making the best of her way home, was wondering what the rector could have meant by his allusion to the possibility of Philip being induced, by any means other than threatened exosure, to give up the project on which his hoart was fixed. Although Mr. Drage had talked vaguely about seeking an interview in which he would warn Philip of the iniquity of the course he was pursuing, and of the danger which awaited him if he persisted in it, Madge had no notion that the quiet, nervous invalid would have had the courage to carry his plan into effect. What he had said arose from that simplicity and want of knowledge of the world, which she had often remarked in him. Madge did not rightly estimate the depth of the mine of love in that honest heart. Since the time when she had told him of the impossibility of her ever being more than a friend, the rector had carefully abstained from any exhibition of his feeling for her, and she imagined that it had died away, or at least had given place to that merely brotherly regard which he was able and

willing to accept. When she reached Wheatcroft, she found Sir Geoffrey engaged in his favorite occupation of superintending the gardeners, and driving them to desperation by the conflicting suggestions which he made, and impossible orders which he desired carried out. The old general looked up as she approached, and at once

advanced to meet her. "Good-morning, Mrs. Pickering," he said. "You were early astir this morning. I went to your room after breakfast, but found you already flown. So I came out here to give a few directions as to the way in which I wish this compound laid out by next summer. > A GOOD STORY. A story is going the rounds at the expense of one of the best known men of the place. We shall not mention his name, but you know him. Of rather determined mien, he has of late been showing signs of mental agitation. He wears a full beard, but a few days since his wife, much to her alarm, found him sharpening a razor. She thought his mind was unhinged and went into hysterics. Explanations followed and it was found that life had for him still some charm. He intended to use the razor upon painful corns. A friend who had used Putnam's Corn Extractor with success advised its use, with the following results: Man quite happy, wife ditto, razor sent away. Use Putnam's Corn Extractor.
