THE ANNAPOLIS ORGAN COMPANY, MANUFACTURERS OF Parlor and Church Organs.

For Power and Quality of Tone, Rapidity of Action, and Promptness to Respond, they are Unsurpassed.

A careful examination of the instruments will convince the public that both interior and exterior are honestly made. In beauty and elegance of case they far exceed any Organ manufactured in the Maritime Provinces. They are AS LOW IN PRICE as is consistent with first-class workmanship, and are FULLY WARRANTED.

Parties Desiring a FIRST-CLASS INSTRUMENT. Will find it their advantage to Correspond with THE ANNAPOLIS ORGAN COMPANY, or visit their Warerooms, George St., Annapolis.

MANHOOD: HOW LOST, HOW RESTORED!

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excesses. Price, in a sealed envelope, only 6 cents, or two postage stamps.

The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine, or the use of the knife; pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

This lecture should be in the hands of every youth and every man in the land. Address: The Culverwell Medical Co., 41 Ann St., New York. Post Office Box 4586.

PURE WATER. Pure water is obtained by using Corey's Patent Expansion Rubber Bucket Chain Pump.

It is the best chain pump ever invented and warranted to give entire satisfaction. All orders promptly attended to. N. H. PHINNEY, Lawrencetown, Annapolis Co.

GREAT BARGAIN! The Subscriber offers for SALE or RENT by Private Contract, His Beautiful Residence

LOWER MIDDLETON. The house contains 11 rooms, all in thorough repair, Good Stabling for 3 or 4 Horses, Carriage House and Wood House. The grounds consist of 2 acres in a high state of cultivation with a very fine orchard of 100 or more superior trees, (choice varieties of fruit) producing yearly 25 to 30 barrels, and with care will produce yearly 3 Barrels or more. The grounds are also well stocked with a good variety of Fruit trees. The situation is convenient to Railway Station, Post Office, and within 5 minutes walk of three places of worship. Location desirable, and very healthy.

ALSO, Small Farm, situated in NORTH WILLIAMSTON, about two miles from Lawrencetown Railway Station. The Farm consists of about 70 acres, 20 of which are in hay and under cultivation. A good Orchard, in bearing, producing yearly 25 to 30 barrels, and with care will soon increase to 100 or more barrels. Cuts about 14 tons Hay yearly, with a superior quality of Hay. Location public, healthy, convenient and desirable particularly to a person of moderate means. Possession at once if desired. Terms for both places easy.

EDWARD H. PHINNEY, Middleton, Annapolis County, May 1st, 1880.

Boots & Shoes Hats & Caps! LADIES' Kid, Goat, Serge and Leather Boots, MEN'S Boots Shoes and BROGANS, MISSES' Boots and Slippers, Boys' Boots & Shoes, Children's Shoes.

HATS! LADIES' Hats, Misses' and Boys' Hats, Men's Fur, Felt and Straw Hats, In all the leading STYLES of the day. At the LOWEST POSSIBLE PRICE for CASH or Prompt Pay.

SPRING STOCK consisting of Staple and Fancy Dry Goods, Millinery, Ready-made Clothing, Boots and Shoes.

Groceries, Groceries, Glass Ware, Stationery, Book Paper, &c., &c., &c. All of which have been personally selected. And notwithstanding the great rise in prices, we will continue to sell at very low rates as we are determined to keep up our reputation.

Cheap Cash Store. The highest market prices paid for produce in exchange for goods.

S. L. FREEMAN & CO. Middleton Corner, April 20th, '80.

Poetry. "Holmgang."

Holmgang! So the German people Whisper when they hear the bell Tolling from some gray old steeples Death's familiar tale to tell; When they hear the organ dirges Swelling out from chapel doors, And the singers chanting stanzas, 'Holmgang!' Always going home.

Holmgang! Quiet and tender saying In the grand old German tongue That hath shaped Melancthon's praying With his stanzas and Luther sang; Blessed is our loving Maker, -That where'er our feet shall roam, Still we journey toward 'God's' care - 'Holmgang!' Always going home.

Holmgang! We are all so weary, And the willows, as they wave, Softly sighing, sweetly, dreary, Woo us to the tranquil grave. When the golden pitcher's broken, And the tender words are spoken, - 'Holmgang!' We are going home. -A. A. Dugan.

Select Literature. "With this Ring I Thee Wed."

CHAPTER XXV. (Continued.)

"If you please, m'm, here's another letter of the same tenor as the first, received that whilst old Dan Tragon thought it best to write to Miss Challacombe, he had written to me. I found the letter on your work-table; master had opened the drawing-room window."

"The Challacombe had grown a little pale about the lips, but she slipped half-a-crown into the girl's hand, and spoke without the least agitation.

"She tore it open, and read the letter which had come from post, and she read it with a look of mingled horror and indignation. It was a letter from Dan Tragon, and it was a letter which she had never expected to see. It was a letter which she had never expected to see. It was a letter which she had never expected to see.

"The moment she was gone Mrs. Challacombe locked her door softly; then she opened the letter which had come from post, and she read it with a look of mingled horror and indignation. It was a letter from Dan Tragon, and it was a letter which she had never expected to see. It was a letter which she had never expected to see. It was a letter which she had never expected to see.

"The moment she was gone Mrs. Challacombe locked her door softly; then she opened the letter which had come from post, and she read it with a look of mingled horror and indignation. It was a letter from Dan Tragon, and it was a letter which she had never expected to see. It was a letter which she had never expected to see. It was a letter which she had never expected to see.

would go to the fort he had twice escaped. Brown was an easily-persuaded man; he would give up the duty if asked in a proper manner.

This resolve Harwood carried out; and thus in the early morning Lillian saw him riding gloomily away, carrying a heavy heart, and with a frowning brow.

Death's familiar tale to tell; When they hear the organ dirges Swelling out from chapel doors, And the singers chanting stanzas, 'Holmgang!' Always going home.

Holmgang! Quiet and tender saying In the grand old German tongue That hath shaped Melancthon's praying With his stanzas and Luther sang; Blessed is our loving Maker, -That where'er our feet shall roam, Still we journey toward 'God's' care - 'Holmgang!' Always going home.

Holmgang! We are all so weary, And the willows, as they wave, Softly sighing, sweetly, dreary, Woo us to the tranquil grave. When the golden pitcher's broken, And the tender words are spoken, - 'Holmgang!' We are going home. -A. A. Dugan.

Holmgang! We are all so weary, And the willows, as they wave, Softly sighing, sweetly, dreary, Woo us to the tranquil grave. When the golden pitcher's broken, And the tender words are spoken, - 'Holmgang!' We are going home. -A. A. Dugan.

WEEKLY MONITOR

General News.

A lad seven years old, son of Andrew Stephenson, care-taker of the old Episcopal burying ground, St. John, N. B., was killed last week in that yard by a tomb-stone falling upon him.

CHERRIES.—Six and one half tons of cherries have been carried by the cars from the Digby station this season, besides a large quantity from the Jordon and other stations along the line, and it is estimated some fifteen or twenty tons shipped by steamer "Empress," and packets, all or nearly all grown at Bear River.—Digby Courier.

The Scottish Earl of Cathness, in a scientific lecture on coal mining, states that several millions of tons of coal are annually extracted from the English mines alone. In order to give some adequate notion of this quantity, he says that it would form a solid pyramid having a base of more than forty acres and a height exceeding 3000 feet.

FRANCE OF MINA.—A New Brunswick woman escaped certain death from an advancing train, which she met on a bridge, by letting herself down between the sleepers, and hanging to them by her hands until the train passed, when she raised herself up and resumed her journey as if nothing had happened.

PERPETUAL MOTION has at last been effected, it is said, by Capt. John Ericsson, of Monitor fame, who has perfected a calorific pumping engine which, if placed in the ever burning sacred fires of Hades, on the Caspian Sea, would go on forever, or till it fell to pieces of old age, like the deacon's one horse shay. It has no valves. Within a cylinder, with solid bottom like a pot, work a piston, within the rod of which is the rod of a displacing loose plunger, moved by the piston by means of an ingenious series of cranks. The engine is simplicity itself, requires no engineer, infrequent lubrication, can scarcely get out of order, and does not need insurance, as the cost being within the means of anyone owning a home. It makes an excellent pumping engine, and, in case of need, a most efficient fire extinguisher.

People who think the Canadians are a people very much behind the times will be interested in the "Dividend Sheet" issued in the case of an insolvent. Three Rivers, in the Province of Quebec. The estate amounted to \$381. The provisional assignee took \$7.18 for fees and disbursements, and the official assignee \$17.55. The city taxes to the amount of \$5.95 and the school tax of \$5.75 had to be paid, leaving a balance of \$24.08. The assignee called in to assist in winding up the business obtained \$136.50. There were thus left for distribution among the creditors precisely \$100. This is not quite so artistic a statement as that filed in a Western city, where the officials ate up the estate and came on the creditors for the cost of their fees, but for conservative and an enterprising country like Canada it is by no means bad.—N. Y. Herald.

ANOTHER WARNING.—A postal card received yesterday from a young man who formerly occupied a responsible and lucrative position in St. John, but who a few weeks since became imbued with the spirit of excess and went to Kansas, reads: "Kansas is just as bad as anyone says it is. Nat. Harwood and myself have only had a day's work since we came, and it was to make a coffin for J.—s, of Miramichi, who used to know you very well, he said; but he died four days after he reached here of fever. Tell Will he better be an Indian-tom hick-driver than come here. There is a big excursion east in August and I shall probably take advantage of it to get part way home. The wheat crop which was expected to come up so big this year will be very thin, and there won't be any work to be had here for anyone this fall."—St. John News.

TERRIFIC THUNDER AND LIGHTNING STORM.—One of the most terrific storms of rain, thunder and lightning that ever visited these parts began last night and raged till about four o'clock this morning. The oldest inhabitant does not remember that the lightning was so vivid or the thunder so heavy. Warnings of the storm were given at intervals last evening, and about eleven o'clock there was the appearance of a severe storm coming. About three o'clock in the morning the heavens were a sight to behold, for those who were not asleep, the lightning, East and west, north and south, there appeared to be a ball of solid fire and lightning flashes of varying colors followed one another with great rapidity. The whole country was illuminated and distant points could be seen with the greatest distinctness. At the same time rain fell in torrents, and in some places a continuous fall of three to four inches of rain. The heaviest shower of thunder occurred shortly before three o'clock, and houses were rocked as by a great gale of wind. The scene was truly awe-inspiring. No damage to speak of appears to have been done in town. In some gardens delicate plants were beaten down by the wind or rain. But it is thought that the storm will be greatly beneficial to agriculture generally, especially to root crops, which have not had quite enough rain for rapid development.—Moncton Times.

The shortest and most profitable railroad in the world is probably to be seen at Coney Island, the famous suburban summer resort of New York. This is the "Marine Railroad" which connects the Manhattan-beach Hotel and the Brighton-beach Hotel. It is two thousand feet in length, is laid with steel rails, and has a handsome station at each end. Its gauge is three feet. Its equipment consists of two locomotives and four cars, open at the sides and having reversible seats. A train of two cars is run every five or six minutes, and at quite a rapid rate of speed, a flying switch being made at each end. The cost of this miniature road, including station and equipment, was \$27,000, and it paid for itself in very few weeks after it was opened for business. The operating expenses are \$30 a day, and the average receipts are \$150 a day the entire season, \$500 being sometimes taken in. The fare charged is five cents. The road runs quite near the water at high tide, yet leaves an abundance of space for those who prefer to walk. It is owned by the same parties who own the New York and Manhattan Beach Road, chief among whom is Mr. Austin Corbin. The proprietor paid a profit last year of 500 per cent. on the cost.—E-

A Whole Family Struck by Lightning—The Mother killed.

During a thunder shower on 29th inst., Mr. Leahy and wife, with their daughter and nephew, living on the Pleasant River road, about twelve miles from Bridgewater, were in the field getting in some hay. The whole family were struck by lightning, killing Mrs. Baker instantly. The others were for some time paralyzed but are recovering. An inquest will be held tomorrow.—Chronicle.

Notice to Mariners.

A Bell Buoy, surmounted by a steel cage, and colored red, has been placed 530 yards S S W (magnetic) from the Brig Rock, off Jeddore, Halifax County; Nova Scotia.

Lat. N. 44° 37min. 20sec. Long. W. 62° 55min. 50sec.

It is whispered in society that the approaching departure of the Princess Louise from Canada is final. Her dislike for the country and the climate is said to be unchangeable.

The removal of the dangerous Diamond reef from New York harbor has been completed after eleven years' work, and expenditure of \$300,000. Four acres of submarine rock have been drilled away, and the depth of water at that spot is now twenty-five feet.

The brig "Edmund," owned by E. Burnham, Esq., and chartered by the firm of Burns & Longstaff, sold her cargo of lumber in Barbados at \$22.75 per thousand for pine and \$17.11 for spruce. She is daily expected with a cargo of molasses.—Digby Courier.

FRACK OF NATURE.—Mr. Isaac D. Harris, of this town, has shown us a curiosity, it being a double headed chicken. It had a large head, with three eyes, and perfectly formed limbs. The neck bones were double, but merged into one at the back. Otherwise it was perfectly formed.—Annapolis Journal.

William Carlin, of Philadelphia, a young man of moderate circumstances, has received intelligence that he has fallen heir to a forty million estate of an uncle in Australia. The testator, Alfred Carlin, was king of the Australian stock breeders, and a conscientious witness for the claimant of the Tibbourn estate, having had Arthur Orton for a long time in his employ.

VALERIE GIFFY TO DALHOUSIE COLLEGE.—We are glad to learn that Mr. George Munroe has intimated to the Governors of Dalhousie College his intention of placing at their disposal the sum of one thousand dollars a year for four years, to give five bursaries of two hundred dollars a year to students from different sections of the province. The terms on which the bursaries will be given will be published shortly for the information of students. Last year, it will be remembered, Mr. Munroe gifted the College with the sum of \$40,000 for a professorship. He now greatly enhances the obligation under which the College stands, and the educational community.—Presbyterian Witness.

The case of Prevost et al. ex Dussault, has just been decided in the Supreme Court at Montreal. The defendant is a store-keeper at Sherbrooke, who failed in '77, and the action of the plaintiff was to recover the sum of \$1,262 for goods sold and delivered, accompanied by a demand for the imprisonment of the defendant, under the clauses of the late insolvent act, which provide for the punishment of insolvents who purchase goods on credit knowing themselves to be in insolvent circumstances. The judge ordered the plaintiff and defendants extended from March 78, to April 77, and the defendant failed in June of the latter year. The Court decided that the facts of the case established fraudulent intent, and that the demand for imprisonment should hold, not to exceed six months.

A NOVELTY IN WHEAT.—A new sort of wheat, which is said to have been discovered in Arkansas about two years since is attracting great attention amongst the agriculturists in the United States. It is called wheat rice, and appears to be a marvel of hardness. It will live and thrive in ground so dry that other cereals would perish. It is said to be able to stand eight months' drought, and besides this, is unaffected by the attacks of insects. The grain, which is somewhat smaller than that of corn, yields a very fine and nutritious flour, and makes an excellent food for cattle. Its cost of cultivation is much less than that of maize, wheat, rye, or oats. Add to this that it contains 7 per cent. more starch and only matter than wheat. It will be no matter for surprise that it is exciting attention.—Liverpool Journal of Commerce.

FRUITS BY THE AMERICAN SUGAR REFINERS.—It is stated that the Scientific Commission appointed to inquire into the alleged fraudulent coloring of sugars by the American refiners has reported that the practice was much more than was even alleged. The Commission found that the whole thing was perfectly notorious in Demerara and other West India Colonies, and that sugar, which was in fact all but pure, and which went to England as Nos. 13 to 16, was so colored, as to be entered in the United States as No. 7. These sugars as No. 7 would be expected to have only 3 per cent. of foreign matter. But they contain 10 per cent. of foreign matter, and are a comparative trifling barrier for the refining, which was unnecessary, and that virtually a protective duty, which went into the pockets of the refiners instead of the Treasury, simply because the tariff prohibited direct importation of the article as shipped from the place of growth.—Moncton Herald.

The Silver Question.

Alex. Del Mar, of the United States silver commission, has written a paper on the "Present Phase of the Silver Question," in which he says: "Since the discovery of America and up to January 1st, 1873, there has been produced in the western world a mass of gold and silver equal in value to 13,000 million dollars; and this includes about 600 millions obtained from Japan by the Portuguese and Dutch, chiefly during the 16th and 17th centuries. To this must be added about 150 millions of gold which has been in the western world at the time of the great discovery; making a total supply of say 13,150 millions. Of this vast sum but 3,300 millions remain. What has become of the rest of it? Well, say 3,500 millions have been shipped to Asia, and India and China. As for the balance, or 6,350 millions, it must have been consumed in the arts. Some little has been lost in shipwrecks, and some has been forgotten, or lost. But that of the entire production nearly one-half has been consumed in the arts in fact, and can scarcely be doubted; and is of no little interest and importance. Of the present stock, France alone possesses from 1,000 to 1,100 millions, or one-third; Great Britain possesses 500 millions or little less than one-sixth; Germany possesses 400 millions or about one-eighth; and these three countries together possess no less than 2,000 millions, or nearly two-thirds of the whole!"

The Disaster in Afghanistan.

London, July 28.—Lord Hartington started the House of Commons this morning by announcing that the Government had received news from Candahar, stating that an engagement had taken place between the Afghans and General Burrows' brigade, in which the latter had been completely annihilated. Lord Hartington further stated that the Government was not yet in possession of full details of the disastrous engagement, but from what is known of the relative position of the British and Afghan troops, it is inferred that the Afghans, who are reported to have destroyed General Burrows' Brigade, were under the command of Ayob Khan, who is supposed to have been reinforced by the mutineers, consisting of the old Cabul regiment who deserted in the month of May, and from Sher Ali's command at Candahar, on Wednesday, the 14th inst. At that date, Ayob Khan was at Sar-i-twoch, distant from Candahar, with his whole regular force of Infantry, exclusive of the mutineers who are believed to have joined the Cabul contingent, of 4,000 bayonets, and 900 Sabres with 30 guns. In addition to these troops, Ayob Khan had a force of 1,500 to 3,500 men. Of these 1,000, under Shahbagh Khan, the late Governor of Turbat, who formed the main body of the force left Herat about the 19th of May and marched directly towards Candahar, with the Durand's impetuous force, mounted with the British garrison at that place, as soon as a favourable opportunity offered. Ayob Khan's force had a heavy artillery, and was estimated to be 1,500 to 3,500 men. Of these 1,000, under Shahbagh Khan, the late Governor of Turbat, who formed the main body of the force left Herat about the 19th of May and marched directly towards Candahar, with the Durand's impetuous force, mounted with the British garrison at that place, as soon as a favourable opportunity offered.

"Best of All."

BALTIMORE, Md., March 5th, 1879. Dear Sir—My family have used your Hair Preparation and it has done all that was to be expected of it. I have recommended it to my family, and I would recommend it to all families. G. S. WATKINS, Druggist.

TELEGRAPH NOTES FOR THE WEEK.

Constantinople, July 29.—The famine in the vicinity of the city is spreading. The Porte's reply to the collective note concludes by asking the Powers to authorize their representatives to meet in Constantinople, standing with the Porte, with a view to explaining negotiating in regard to the line of frontier. Whatever the Sultan's real intentions are he is continuing military preparations, and efforts are making to obtain a small advance from Galatz bankers on account of next year's tribute.

Vienna, July 29.—The Powers are fully determined to carry out to the last extremity the decisions of the Berlin Congress. The Austrians are making a passenger steamer was captured on Lake Bienna, Switzerland, and seventy persons drowned. Lake Bienna is a body of water in the canton of Geneva, about 16 miles northwest of that city, and 37 miles from Lake Neuchâtel. It is about 10 miles long and 2 miles broad. The steamer was from town of Bienna, at the northern extremity of the lake, and carried a party of excursionists. It is supposed that the steamer, which was small one, was captured by one of the sudden and terrific squalls which are not infrequently sent over the mountains and sweep the bodies of water. It is reported at Berne that the steamer had boarded some English tourists from London, but that she has not yet been recovered. ... Pesth, July 27.—Hodoboy reports from the camp of Tuel that many hundred Montenegrins were seen on the 23rd inst., but were repulsed after three hours hard fighting. ... Memphis, July 30.—The steamer City of Richmond was sunk this morning by a cyclone. The passengers and crew were saved. The boat was valued at \$50,000. The cargo comprised 7,000 packages of merchandise. ... Ottawa, July 30.—A telegram this evening says the town of Yale, B. C., has been destroyed by fire. ... Milwaukee, July 29.—A hail storm passed over the vicinities of Stevens Point on Monday, covering the ground to the depth of several inches with balls of great size. The hail was accompanied by a heavy rain. Hundreds of farms were cleared entirely of hay and grain, and crops and forests are left bare. The storm covered the entire country, and was accompanied by a heavy rain. ... Boston, July 28.—A number of horses in this city and vicinity are suffering from the disease called strangles, and the muscles of the throat and sublingual region of the body, with fatal results. ... New York, Aug. 1.—At night to-day Dr. Dean POTTS, of New York, was arrested. He slept last night, and appeared refreshed this morning. ... Halifax, Aug. 1.—A child was drowned in a well, which has been hushed up during the past three weeks, it is just coming to light. A negro, who has served a term in the State Prison for robbing a man, and who was a second one by the negro. The negro was jealous of the first child and frequently ill-used it, and urged its mother to get rid of it. One night about midnight the mother was awakened by the smothered cries of the child, and found it run from the room with blood. The mother had attempted murder by the side of its head. The affair came to the ears of the police, and the mother will be arrested. The child will recover.

SERVICES ON SUNDAY NEXT.

Episcopal Church, 10 o'clock, T. P. M. Baptist, 11 o'clock, T. P. M. Presbyterian, 11 o'clock, T. P. M. Methodist, 11 o'clock, T. P. M. Roman Catholic Church, 4th Sunday of every month.

To gain the public confidence is essential to business success, and it can only be gained by a steady course of faithful dealing with them. It is by this course that Messrs. Tuckett & Billing have secured the great success of their "Myrtle Navy" tobacco. This confidence is not only a source of business to the firm, but also a source of economy which the consumers get the benefit of. The merchant never loses a moment of time in examining the quality of the tobacco. The name fixes the quality as absolutely as the mint stamp fixes the value of the guinea. It is not even necessary for the commercial traveler's trunk to be burdened with a sample of "Myrtle Navy," all his customers know what it is, and know in an instant when it has been supplied. There is no room for any dispute about it. No waste of time or postage in writing complaints, as they are part of the reasons why the unfurnished, but they save money, and enable merchants to perform the work of distribution at the smallest possible cost. They are part of the reasons why the finest quality of tobacco grown can be sold at so cheap a price.

MOTHERS! Mothers! Mothers! Are you distressed at night and broken of rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it: there is no mistake about it. There is not a mother on earth who has ever the least doubt as to the value of this medicine. It will regulate the bowels, and give rest to the mother, and relief and health to the child. It is a safe and pleasant medicine, and is used in all cases, and is pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Full directions for using will accompany each bottle. None genuine unless the fac-simile of WINSLOW'S & PERKINS'S is on the outside wrapper. Sold by all Medicine Dealers. 25 cents a bottle. Beware of imitations.

MORRISON.—At Berth Granville, July 21st, the wife of James Morrison, Esq., of a daughter.
