MANHOOD

HOW LOST, HOW RESTORED!

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the radical cure of Nervous Debility, Mental and Physical Infirmities, Impotency, Sterility, etc.

The Celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the use of the knife, pointing out a mode of cure, means of every sufferer, no matter what his condition, and how long he has been afflicted, privately and radically.

The Culverwell Medical Co., 41 Ann St., New York.

The Weekly Monitor.

WEDNESDAY, JULY 16, 1884.

It has often been remarked of the agriculturists of this country that they are land poor. The highest ambition of the average farmer appears to be to become the possessor of as much land as he can possibly obtain. Ordinarily, even at least, so it appears to us. A small farm well tilled, will give as large, if not larger, returns than a farm twice the size, poorly cultivated. The expenses of a large farm are far more, proportionately, than on a small farm. Fencing is a large item, also the taxes, the general supervision of so much land requires a large amount of valuable time, consequently the farmer has so much to see after, that he can not give the attention to each portion of his farm, that is necessary to bring it to a proper state of cultivation.

A small farm can be thoroughly tilled and every square foot of it made to reach its highest state of productive-ness. If this principle were followed out and our farms divided into small holdings, a far different state of cultivation would be seen in the valley than at present obtains. Many farmers mortgage their farms to purchase more land, when they already have more than they can properly attend to. The money would return them ten-fold more if invested in improved breeds of cattle, sheep and pigs, and in labor saving machinery, fertilizers, etc., to be used on the land they already own. An English paper called the Journal of the Royal Agricultural Society, in an article on fruit growing in the British Isles, speaks of a peer named Lord Ludley who has planted on his estate in Gloucestershire 500 acres with fruit trees, and contemplates planting 200 more. This, of course, is a large amount of land, but his lordship's income enables him to cultivate thoroughly every portion of it and we quote from the Journal to show how land in England is made to yield the fullest possible returns. It says:—

Before planting, the land was deep-ploughed with a six-furrow and well manured. Standard apples, pears, plums and cherries were put out 16 feet apart each way, making about 50,000 trees in all. Between these were planted gooseberries, raspberries, currant bushes and strawberry plants—150 acres of standard fruit and 100 of raspberries. The gooseberry bushes numbered 130,000, the red and black currants 228,000. Among the trees at regular intervals are planted wind-breaks of Scotch fir, and by the sides of roads growing, from which are manufactured baskets for carrying the fruit to market.

Should the enterprise prove successful, and orchards on similar affluents become numerous, our American and Canadian growers will be compelled to seek other markets. The Nation's Golden Opportunity. The following article from the Indus-trial World, a United States paper, is worthy of perusal. Many of the sug-gestions set forth can be applied with equal force to Nova Scotia:—

The time is passed when those en-gaged in agricultural affairs were the modest producers of provisions and raw materials for the employment of those engaged in more advanced oc-cupations. The time when a man must toil in the broiling sun, in the inclement seasons of winter and early and late, for a mere pittance, is happily passed away. While railroads and machinery and manufacturers have brought anxieties and comforts and oc-casional advancement to his door, machinery and a high advancing civilization have largely overcome the hardships, de-privations, toil and isolation of the farmer's existence. In every farming region there is something else besides tilling the soil, and there is some other source of profit beyond that of shipping raw material and transporting it to distant markets at profits which pay no returns to keep the farm in condition. The farmer's pursuit is not only to produce and sell the improved machinery, but he may know the exact character of his soil, may grow and produce the most profitable crops, and may be able to in-sure a profitable result, in spite of droughts or rains or overstocked mar-kets, and when there is an over-pro-duction of any crop he can readily turn to others. Beyond this wide field of productive enterprise open to the farmer and his boys, and the engineer-ing and manufacturing operations of the country may be their well, if they will be awake to their opportuni-ties. The time is coming for the dissemina-tion of a sentiment which shall destroy the imaginary dividing line between the tiller of the soil and the manu-facturer and transporter of the raw prod-ucts. The farmer need no longer be the isolated being, nor his world the narrow one bounded by his fences and his forest; his hand may no longer be against every other pursuit, nor every other pursuit in seeming opposition to his welfare, but he may become a part of the great movement which is mak-ing every pursuit the creature of the steam engine and the latest mechanical invention. The farmer who raises rice or cotton may raise sugar, fruit, ve-getables, milk, furs, hemp, flax, corn and wheat and flax, and hold stock in cotton mill, flour mill, the iron furnace, the implement and textile factory, the oil mill and sugar refinery. The farmer located in the more northerly cli-mate may own his spinning factory, his packing house, his implement factory, his sugar refinery, starch works, flouring mill, and have them located upon or near his land, adding ten fold to his value and bringing his family in con-tact with all the institutions of civiliza-tion. The farmer has been too much given to seeing nothing but his own crops, and while he wanted the highest price and delighted in the wheat and corn and cotton and pork corners, he could not see that the presence of manufac-tures and populous towns gave him bet-ter markets and brought civilization nearer to him. While the Southern States grow poor raising but the single crop of cotton and the West, poor, rais-ing wheat alone, and skimming off the top of the fertile soil and shipping to foreign lands, they should see that they were better to encourage the growth of a dozen other crops, and work them in up-rates, instead of selling their raw prod-ucts and provisions cheap and buying dear in a foreign land.

At the Democratic Convention held in Chicago last week Governor Cleveland of New York was nominated by an over-whelming majority for president and Thomas A. Hendricks of Indiana for vice-president. The Democratic nomination of Cleveland is a popular man, and Hendricks is a man of high character. The usual course of this convention was unusual.

Local and Other Matter.

Wm. Reed Esq. launched a very fine schooner from his yard, last Wednesday, which he named in honor of his young son, Percy H. Reed. She is about 150 tons register, and said to be by judges, of the model.

The cucumbers are an average crop and the late rains have greatly im-proved the crops, and have extinguish-ed the blights, which were doing much damage in the south-woods.

Fish have been coming late, the month of our river in abundance dur-ing the last week, and large quantities have been "stopped" along the shore.

Baptist.

Two candidates who were baptised in the river at Torbrook, on Sunday last, by the Rev. J. Clark.

It is estimated that the yield of apples in Western New York will be 4,000,000 barrels.

An uncorroborated report has reached us that a house and barn was struck by lightning in Albany during a recent thun-der storm.

Sher. A. M. Hall, Capt. Graves, he laid up for repairs at Gesner's Creek. She will resume the route shortly, time of which due notice will be given.

The only real genuine, American Clipper, Silver Steel and Emerald Sweep-stake Sycamore is to be had at J. W. Beckwith's.

S. Churchill & Sons, of Hantsport, have sold the steamer Evangeline to A. W. Corbett of Annapolis, who will use her for a tug and passenger boat on the Annapolis river and basin.

Go to J. W. Beckwith's for gen-eral American Fish Bakes. They are selling rapidly.

Thomas Foster, father of the re-nowned Dudley, the dwarf, has purchas-ed the farm at Melbourn, near, where an account of his health is obliged to give up the life of a farmer. Consider-able notice.

T. Murphy, Esq., Provincial Engi-neer, and J. W. Longley, M. P., were in town on Saturday. They are mak-ing a tour of inspection of the Govern-ment Bridges under construction in this county.

Two carloads of No. 1 & 2 Hem-lock, Spruce and Pine saved shingles, sawed by Alfred McNeil, Esq., of Mill-prices, for cash only at J. W. Beckwith's. The superior quality of these shingles is well known.

James Hillis, Esq., proprietor of the Richmond Iron Foundry, Halifax, arrived in town last Saturday and re-turned home on Monday. He is doing a prosperous and rapidly increasing business.

Mr. McCann, well and favorably known to the travelling pub-lic in his connection with the Bell Telephone Co., has been engaged by the New England and Acadia Steamship Com-pany. He was in the town yesterday morning distributing circulars and advertising his line generally.

Sher. Ives has arrived at St. John N. B. from Digby with a quantity of the remaining gear and rigging be-longing to the wrecked Princess Louise which is to be used on the new steamer now being constructed by Mr. J. W. Beckwith's. Some of the rigging it is stated is badly chafed.

Hon. J. P. Newcomb, editor of the Evening Light and Post-master of San Antonio, and member of state of Texas, was the orator at that place on Decoration Day. He is a native of Annapolis, and a son of Thomas Newcomb, of Wallace.

The July Quarterly Meeting of the Nova Scotia Fruit Growers' Association, will be held at Bridgetown, on the 21st morning at 7 o'clock, p. m. Business of importance, concerning the ex-hibition of Nova Scotia fruits at London and New Orleans, will be discussed. A large attendance is requested. The usual arrange-ments have been made.

We are indebted to G. C. Miller, Esq., of the River Side Small Fruit Farm, of Middleton, for a box of very fine Sharpless Seedling strawberries. They certainly are the largest and one of the finest varieties grown. We hope to be able to give an account of Mr. Miller's successful operations at the close of his season.

St. John Globe says that Miss Hazen, now a resident in England, for-merly of St. John, has joined the Roman Catholic Church. She for some years past resided in the city, and her be-liefs were of the liberal and liberal kind. She founded and liberally en-dowed the mission church of St. John the Baptist, with whose aid she has been instrumental in the erection of the Church of England Synod has had some trouble, because of the alleged infringe-ment of the rights of another parish.

The Rev. William Hamilton, will again conduct the services in the Pres-byterian Church, here, on Sabbath, at 11 o'clock a. m., and 3.30 p. m. The communion will be dispensed in the church, Sabbath week, the 27th inst. A preparatory service will be held on Saturday evening, beginning in the af-ternoon, at 3 o'clock.

The building known as St. James Church has been placed on the site it is to occupy, a few rods south of our office. The building is to be erected by Messrs. Chute and formed the work in their usual thor-ough manner. The building is 60 x 32, and will be ready to occupy in a few weeks. It is estimated to weigh nearly 200 tons. Yet this heavy structure, chimney and all, was taken from its site, turned four or five times, and set up on its new position, without any injury or jar. The first, and it appeared to us, the most difficult part of the work, was done by the younger Chute, with the aid of four men and single gear. At the end of an hour and a half his father arrived, and brought another gear. Nine working days in all, were occupied in the work. Considerable delay was occasioned by wet weather that has recently prevail-ed. Mr. Salis has secured an excellent building for his organ factory.

A flattering address, accompanied with the works of Shakespeare, hand-somely bound in 24 vols., and a hand-some dressing case were presented to Mr. Geo. E. Croesop Esq., A. B., late Principal of the Model School, Fredericton, N. B., on his retiring from that position. Mr. Croesop is a native of Lower Grandville, in this County. A number of ladies and gentlemen were present on the occasion of the presen-tation, and several of the latter made short congratulatory addresses to Mr. Croesop regarding the efficient manner in which he had discharged his duties. From the Fredericton Reporter we make the following extracts:—

The Chief Superintendent congratulated Mr. Croesop upon the honor he ever had upon the pupils and thank-ed him for the interest he had always taken in the school giving him much credit for his present efficient condition. While wishing him every success in the future he ventured the remark that his opportunities for doing good were greater in the schoolroom than they could be elsewhere.

Sheriff Croesop on behalf of the Trustees look forward to Mr. Croesop by assuring him that while his removal was regretted, he wishes him every success in his proposed new calling. He congratulated him upon his success in the teaching profession, and complimented him upon the evidence of love borne to him by the pupils and teachers of the Model School.

Mr. Croesop is at present in Grandville but leaves in a few days to accept a loca-tive position in New York city.

Cattle and sheep are dying in Texas

for want of food. Mrs. St. Clair, of this town, drew an easy chair, from the list of prizes given in connection with the late Catholic fair at Annapolis.

—A lad about twelve years old, a son of Miller Ritchie of Annapolis, while fishing for lobsters on the Queen's wharf on Monday last fell into the water and was drowned. The body had not been recover-ed when we received the news of the accident yesterday.

—The potato beetle has made its appearance in New Annapolis, Colchester Co.

—The Lunenburg Progress says:—"Counterfeit five and ten dollar American notes are in circulation in this County. The notes have an ap-pearance of old bills, but poorly execu-ted on common paper.

—PROTECTOR CANADA.—We have re-ceived Nos. 20 and 31 of this fine work. It is highly recommended and has been fully maintained throughout. It should have a place in every library in the land.

—The liquidators of the Bank of P. S. Adams have advised the further divid-ent of ten per cent. payable on and after the 14th inst.

—Titus Langille, of Mahone Bay, has secured a patent from the United States government for construction of the Gila Anchor.

—The Grand Lodge of Odd Fellows will hold their annual session in the Legislative Council Chamber, Provin-cial Building, Halifax, beginning on the 21st August.

—The widow of the late James Melleson, Churchville, East River, Pictou has reached her one hundredth year. Her mother lived to see her 105th birthday.

—It is rumored, on good authority, that Premier Phipps has resigned, and that the Lieut.-Governor has called upon Hon. W. Fielding to form a new government.

—A BRUAL ACT.—A new mail coach, brought from along the Windsor route, Annapolis line, was left in the castle pen at Windsor Junction from eleven o'clock Thursday morning until Sat-urday afternoon, without food or water. It was then taken on board a freight train for Truro.

—We are requested to state that by the courtesy of Mr. Salis, the purchaser of St. James Church, now that it has been placed on its new site, the congregation will be enabled once more to worship in the use of Temperance Hall, for two Sundays while the church was being removed. The Rector and Wardens also take pleasure in expressing their thanks to Rev. Mr. Jos and his con-gregation for their kind offer of the Methodist Church for morning services.

—Since the death of Holloway, the pillar of the government and the publica-tion of facts about his advertising ex-penses, interesting facts about other great contractors coming to light. A well-known firm of real estate men are spending from \$100,000 to \$200,000 a year. The most profitable investment they have ever made is said to be Focardi's statue. "You Dirty Boy" for the marble of which they give \$2,500.

—A correspondent of the New York Sun in an article referring to Halifax says:—"Certain it is that Nova Scotia led all but this may not be altogether the fault of the government. The islands are rich in coal, and copper and gold are found in paying quantities; plaster abounds in quantity, as well as other fruits, culture, and the fisheries give good returns. There is a general impression that live people from the States can re-locate here, and that the time has now arrived when they will begin the work."

—Isaac Jacobs, a Polish Jew was re-cently arrested in Brooklyn, N. Y., for stealing a horse. He is a well known horse thief, and is said to have been suspected of being the murderer of Mrs. Carleton, of Westchester. No evidence of such a case, judging by the following dispatch:—

—Boston, July 9.—Isaac Jacobs, the Polish Jew, who was arrested in Brooklyn, was up before Judge Orcutt in the district court yesterday morning charged with stealing a watch from Robert Douglas, Cambridge. The case came up by con-tinuation and was again continued until Wednesday.

—George F. Baker, the officer working up the charge of murder against Jacobus Carleton, was yesterday morning held for murder. The Judge refused to entertain the request on the ground that it was in violation of evi-dence to hold Jacobs for murder.

The Oldest Man. A newspaper dispute has recently taken place with reference to the oldest Freeman on the Continent. A few days ago Dr. McDonald, of New Glasgow, N. S., wrote to the Halifax Herald as follows:—

—In your report of the laying of the corner stone of the Windsor post office, you mention the name of Col. Poyntz, says, "He is the oldest man in Nova Scotia, if not on the continent."

—We have residing in this County, J. W. Deane of Digby, who joined St. John's Lodge, No. 29, of St. John, N. B., in the year of the late war. He is now 84 years and three years later was made a royal arch. He is a veteran of the war of 1812 for which he draws a pension.

—We are informed that the oldest man in the County is now 84 years and three years later was made a royal arch. He is a veteran of the war of 1812 for which he draws a pension.

—The steamer, State of Maine, of the International Line, struck on the Point Lepreau rocks, on Saturday last, during a thick fog, and it is feared has become a total loss. There was but little sea running, and the passengers and crew reached the shore in safety. According to Capt. Pike's statement of the disaster, it simply occurred through his mistaking the western for the eastern point of the rocks. The fog was so dense that it was not possible to see the rocks until it was too late. The steamer was the usual one taken. The course, save that it was about 3 points further south, was the usual one. The steamer was going at full speed, and struck twice with prodigious force. Her bottom is evidently broken through, as the main deck, forward of the boiler, is shored up, but, it is said, is lying with a heavy list off shore and is full of water.

—Capt. Pike has been in the Tabernacle at St. John's for 35 years, and is the oldest and one of the best officers.

—Several Nova Scotia veterans are on the list of the passengers who are to be the prize of the cool conduct of officers and crew.

—Very little of cargo is expected to be received from the New Brunswick coast.

—The State of Maine is a magnificent wooden steamer of 1410 tons, built on the 1st of August, 1882.

—Point Lepreau, struck on one of the boldest and most rugged of the various headlands that are recognized by sailors in the Gulf of St. John and Eastport. With exception of the Wolves, where the New York, it has been previous to the erection of the light-house, regarded as perhaps the most dangerous of any in the navigation, on the New Brunswick coast.

—but of late years it has rarely been the scene of disaster.

NEW ADVERTISEMENTS THIS WEEK.  
Dr O W Norton, Bridgetown, N.S., July 16, 1884.  
W W Saunders, Bridgetown, N.S., July 16, 1884.  
Dr M Souville's Offer, Bridgetown, N.S., July 16, 1884.

REMEMBER  
Dr. M. Souville's Offer.  
Spreometer Given Free!

Medicines alone to be charged for.  
Bridgetown, Grand Central Hotel,  
July 23rd and 24th.  
2 DAYS 2, ONLY 2.

The above liberal offer is made to com-pense the medical and surgical expen-ditures of the unfortunates who have been afflicted with the following diseases:—Catarrh, Gonorrhoea, Stricture, Hemor-rhoids, Asthma and Constipation. Re-member we do not claim to cure all pa-tients who consult us, because in a great number of cases the disease has gone too far and the consultation is too late, but we do try to permanently cure a large num-ber of cases that the ordinary physician in the general practice of his profession, can not cure.

A few testimonials which have come in through correspondence (out of the many thousands received during the past year) are inserted below:

Consumption Cured.  
An English Gentleman writes:—  
I am glad to be able to testify that my daughter is quite well again. As this is the second time she has been cured of grave bronchial trouble under your treat-ment when the usual remedies failed, I write to express my gratitude. Please ac-cept my sincere thanks. Yours truly,  
C. P. PALMER.

Consumption Cured.  
I was given up to die by several leading physicians of Halifax and elsewhere. I was falling fast; could not walk upstairs and after consulting you and taking the Spreometer the effect was at once perceptible. To your treatment alone I give all the credit of curing me. Yours truly,  
LONDON DRUGGIST.

Catarth Cured.  
Truro, N. S., July 16, 1884.  
I have spent hundreds of dollars in the past and over \$500 dollars in an institu-tion in Buffalo, without any good result. I had after consulting you and taking the Spreometer the effect was at once perceptible. To your treatment alone I give all the credit of curing me. Yours truly,  
A. S. SHUMWAY.

Cararthal Deafness Cured.  
St. Andrews, N. B.  
I am very happy to inform you that your instruments and medicines have entirely cured me. I think your treatment a won-derful cure. Yours truly,  
Mrs. JOHN GASSAWAY.

Asthma Cured.  
Yarmouth, N. S., June 9th, 1884.  
I have been seriously afflicted with Asthma for a great number of years, and found every kind of medicine and treatment, in which I have every confi-dence, and do heartily recommend all who are afflicted with this distressing disease, Asthma, to apply to you.

Enlarged Tonsils Cured.  
New Settlement, Caroline Co., N. B.  
My little boy's tonsils were entirely cured, there is not a particle of trouble in his breathing. Yours truly,  
R. R. WILLIAMS.

Loss of Voice and Consumption Cured.  
Fredericton, June 19, 1884.  
Dear Sirs.—I write you, under feelings of intense gratitude for your Spreometer and other instruments and medicines, which have entirely restored me to bloom-ing health, after suffering for many years with Consumption, and in fact, had no hope of ever recovering myself. I can only say that I am now in the enjoyment of the most robust health, and am in time to save my life, and it is for the benefit of others who are afflicted in this manner, that I feel it my duty to give to the public print. I can heartily recom-mend the treatment to all who wish to be saved from the same. Yours truly,  
Miss JEANETTE BERTON.
