and warmer.

## FRENCH on Alert for German Offensive North of Aisne—Ally Recovers Lost Positions Wauxaillon—British Repel Many German Raids—Russians Advance Further in Caucasus—Congress Approves Stringent New Regulations for Control of Food.

### GERMANS LOSE GROUND TAKE IN AISNE AREA

French Recover Greater Part  
of Territory Northeast of  
Moisy Farm.

### ITALIANS INACTIVE Operations in Russia Mostly Continue to Be Patrol Affairs.

London, June 24.—Aside from several  
sectors in the region between Soissons  
and Rheims and in the Cham-  
pagne near Mont Cornillet, little fighting  
of moment is taking place.  
The French, continuing their smothering  
tactics against the Germans, have  
now retaken the greater part of the  
territory lying northeast of the Moisy  
farm in the region of Wauxaillon,  
which the army of the German crown  
prince, reinforced by picked men, cap-  
tured last week in attacks in which  
they suffered extremely heavy casualties  
under the fire of the French artil-  
lery and infantry. To the east  
of the region of Hurtebise and Cra-  
cotte, the violent artillery duel con-  
tinues, and the French guns have put  
down several raiding attempts of the  
Germans by the intensity of the fire  
and the accuracy of the aim, keeping  
them picked for the onslaught fast  
to their trenches.  
The German war office asserts that  
west of Mont Cornillet, in Champagne,  
the French have been compelled under  
heavy concentration of artillery action  
to evacuate ground they captured  
from the Germans in two attacks last  
week.

### CANNONADE INCREASES UPON CANADIAN FRONT

Both Sides Engage in Bombardments With Throwing of  
Heavy Barrages—Presentation of Decorations  
Takes Place in Rear.

By Stewart Lyon.  
Canadian Headquarters in France,  
via London, June 24.—There has been  
a marked increase in artillery fire all  
along the Canadian front during the  
last twenty-four hours. Early this  
(Sunday) morning the enemy began  
shelling Vimy and Flixes wood with  
vigor. About 10 o'clock the Canadian  
guns began to hammer Coulotte, Avion  
and Mericourt. A heavy barrage was  
also thrown upon the enemy's front  
line, and gradually moved toward his  
support trenches. This put the Ger-  
man artillery commander on his mettle,  
and by 11 o'clock he turned on a  
very creditable barrage of his own,  
using for it guns from all parts of

### SINN FEINERS IN CORK SET LAW AT DEFIANCE

Republican Flag Hoisted and Windows in Recruit-  
ing Offices Smashed—National Irish Con-  
vention Denounced as Trap.

Cork, Ireland, June 24.—The Sinn Feiners were active here early  
this morning, when they smashed the windows in a number of recruiting  
offices, and by means of a fire escape hoisted the republican flag on the  
court house flagstaff and smashed the scales held by the figures of justice  
over the court house. They committed many other acts of violence.  
The Sinn Feiners, at a big meeting this afternoon, passed resolutions  
denouncing the national convention as a diplomatic attempt on the part  
of the government to place Ireland in a false position and prevent the  
fulfillment of Ireland's claim to sovereign independence. The resolutions  
demanded that the executive convene the council to express the opinions of  
the people and elect representatives to a peace conference.

### RUSSIANS SOLVE PROBLEM OF ARMY

Albert Thomas Finds Offens-  
ive Both Material and  
Moral Possibility.

SITUATION IMPROVES  
Financial and Economic Diffi-  
culties Lessen — Difficul-  
ties Await Surmounting.

Paris, June 24.—All thoughts that  
Russia may conclude a separate peace  
must be set aside, declared Albert  
Thomas, French minister of munitions,  
on his return to Paris last night from  
an extended trip to Russia. An  
offensive by the Russian army is  
both a material and a moral possibil-  
ity, he said, and the situation as re-  
gards Russia is financial and economic  
difficulties is improving every day,  
Mr. Thomas declared.  
The whole tone of the French cabi-  
net member's talk was optimistic; al-  
though he did not minimize the difficul-  
ties with which Russia is still con-  
fronted.  
It is admitted that these are ex-  
tremely grave moments for the army,  
because of the antiquated and very  
brutal discipline that had been en-  
forced and a lack of understanding of  
the new movement on the part of a  
certain number of officers. Today,  
however, the masses comprehend the  
necessity of a disciplined army and a  
firm military organization for the  
preservation of the nation's liberty  
and to assure its permanence.  
"I found that materially and mor-  
ally an offensive is possible. I can-  
not specify the date. If I knew it,  
you can well understand I would not  
mention it. But that an amelioration  
of the general situation in Russia has  
set in under the influence of these  
shifts of opinion seems to me indisput-  
able."

### EXPLOSIONS DESTROY FOE MUNITION PLANTS

Paris, June 24.—Several disasters  
have recently occurred in munition  
plants in Germany, according to the  
Zurich correspondent of The Matin.  
The correspondent telegraphs that  
he has learned from private German  
sources that the hand grenade ar-  
senal at Nuremberg exploded on June  
16, and that seven ammunition shops  
at Marienhall were destroyed by fire  
on the 18th. Some ammunition fac-  
tories at Nuremberg also have been  
turned down, according to this  
authority.  
Spandau is nine miles west of Ber-  
lin. Large government munition  
works are there. Nuremberg, rich in  
historic traditions, is more noted for  
its varied industrial plants than as a  
munition-making centre. By Marien-  
hall, Marienhall in Saxony may be  
meant.

A huge shipment of wheat on a wharf at an Atlantic port in the United States awaiting transport to Europe.

### FOOD POLICY HITS U. S. LIQUOR TRADE

The Foodstuffs Conserva-  
tion  
Measure Goes to Senate  
by Decisive Vote.

### BROAD POWERS GIVEN Wilson to Have Full Author- ity to Handle This Year's Crops.

Washington, June 24.—President  
Wilson's request to congress for food  
control legislation in time to deal with  
this year's crops promises to be re-  
alized.  
With the background turning to  
the senate, following the overwhelm-  
ing passage of the control bill by the  
house, senate leaders—including those  
opposing as well as those leading the  
administration's fight—tonight pre-  
dicted action there late this week or  
early next week.  
The administration food control bill,  
giving the president broad authority  
to control the distribution of food,  
feed and fuel for war purposes and  
appropriating \$152,500,000 for its en-  
forcement, was introduced in the sen-  
ate by the administration, adopted  
would prohibit the use of foodstuffs  
for the manufacture of alcoholic bever-  
ages and would give the president  
authority to take over for war pur-  
poses all liquor now on hand.  
Retention by the senate of the drastic  
prohibition amendments proposed  
by the house, or at least provisions  
prohibiting the use of foodstuffs for  
the manufacture of distilled spirits,  
generally is deemed probable. The  
principal light on the prohibition  
question is expected to come from  
the manufacturers of malt  
liquors and wines.

### PLANTA AND SHATFORD GET SEATS IN SENATE

Government Announces Appoint-  
ments to Represent British  
Columbia.

By a Staff Reporter.  
Ottawa, June 24.—The government  
on Saturday appointed two senators  
to represent British Columbia. They  
are E. A. Planta of Nanaimo and L.  
W. Shatford of Hadley, on the main-  
land.

### QUEBEC CITY HAS SHELL MYSTERY

French-Canadian Arrested in  
Toronto Who is Wanted  
as Witness.

### SUNK IN ST. LAWRENCE Loaded Shells Which Had Been Condemned Disap- peared From Arsenal.

With the arrest of Philippe Ber-  
thiaume here Saturday night by De-  
tectives Taylor, Levitt and Maurer, it  
is believed in Quebec, where the man  
is wanted on a charge of theft, that  
he will be able to throw considerable  
light on the theft of condemned shells  
from the Dominion arsenal at Quebec.  
The explosives in question were con-  
sidered too highly charged, and it was  
decided to sink them in the middle of  
the St. Lawrence River, opposite the  
Ross Rifle factory, to obviate danger  
at the hands of inexperienced persons.  
But while the shells were carried to  
the river a large number of them disap-  
peared and were finally traced to the  
boats of the B. and O. Company, where  
they were being shipped to Montreal.  
Berthiaume is alleged to have been ac-  
tively in conjunction with certain em-  
ployees of the Dominion Arsenal.  
The information for Berthiaume's ar-  
rest was sworn out by High Constable  
Thomas Gale, of Quebec Province, and  
local headquarters was notified that he  
was thought to have come to Toronto  
to the home of a comrade. To this  
man's home the detectives went, and  
were met at the door by Berthiaume  
himself. When taken into custody and  
questioned as to the reason for his  
charge against him, he stated that he  
believed it was in connection with cer-  
tain shells sunk in the St. Lawrence  
River.

### BLACK SEA FLEET MUTINY IS ENDED

American Admiral and Staff  
Given Cordial Reception  
by Sailors.

### KOLTCHAK DISTRUSTED All Officers Save Russian Ad- miral and Staff Restored to Posts.

Petrograd, Saturday, June 23.—Rear  
Admiral James H. Glennon, U.S.N.,  
and his staff returned to Petrograd  
today from a visit to the Black Sea fleet  
at Sebastopol. The cordiality of  
their reception was not affected by  
the mutiny among the sailors of the  
fleet, which started just before their  
arrival and which is now at an  
end, tranquility having been restored.  
Admiral Glennon, who had been de-  
legated by the admiralty to visit the  
councils of workmen, soldiers and  
sailors who accompanied him, Admiral  
Glennon and his party also were en-  
thusiastically welcomed on board the  
sloop by the sailors, who showed the  
visitors every courtesy.  
At the request of the sailors Ad-  
miral Glennon addressed them, urging  
a continuation of the war without  
cessation. He was heartily applauded,  
simultaneously the former voted to  
replace Admiral Koltchak in com-  
mand of the Black Sea fleet, and the  
councils of workmen, soldiers and  
sailors who accompanied him, Admiral  
Glennon and his party also were en-  
thusiastically welcomed on board the  
sloop by the sailors, who showed the  
visitors every courtesy.  
The meeting of representatives of all  
the councils of soldiers, sailors and work-  
men of Sebastopol, which was held  
simultaneously, the former with the  
exception of Admiral Koltchak and his  
staff, who were distrusted by the  
sailors. The meeting also voted to  
support the provisional government.  
Since then conditions with the fleet  
have been tranquil.

### PROVISIONAL CABINET IS FORMED IN VIENNA

Called "Transition Ministry."

### ALL AUSTRALIAN WHEAT UNDER STATE CONTROL

Four and One-Half Million Tons  
Available for Export.

### ORDER INQUIRY INTO SALMON FISHERIES

Sanford Evans, H. D. Thompson  
and F. T. James Make Up  
Commission.

Ottawa, June 24.—W. Sanford Evans,  
Ottawa, H. D. Thompson, Victoria, B. C.,  
and F. T. James, Toronto, have been ap-  
pointed a royal commission to make an  
investigation and prepare recommenda-  
tions with regard to the regulation of  
the salmon fisheries in British Columbia.  
The old "hook rating" was abandoned this  
year and the use of motor boats permit-  
ted, causing to the growth of the indus-  
try. The commission has been per-  
mitted on the ground can take care of the  
catch, arguing that as the fishing is re-  
stricted, the number of canneries should  
be restricted as well. It is at their re-  
quest that an independent probe is grant-  
ed, traffic less perilous.

### FOE'S ATTACKS MAY FORECAST BIG OFFENSIVE

Germans Show Signs of Pre-  
paring Drive North of  
Aisne.

### CHIEF FEELER FAILS Enemy Strives Unsuccessfully to Cut Breach at Wauxaillon.

(By the Associated Press Correspondent.)  
Grand Headquarters of the French  
Army in France, Saturday Evening,  
June 23.—There are signs on many  
parts of the French front that the  
Germans are either nervous concern-  
ing the French intentions or are pre-  
paring an offensive. A series of  
"feeler" attacks has been carried out by  
Field Marshal von Hindenburg at vari-  
ous points, principally around the  
Laon plateau. One of the chief of  
these was a raid to cut a breach in  
the French line at Wauxaillon, where  
the German "shock" units temporarily  
ousted the French from a short trench  
system on the slopes of Monkey Moun-  
tain, on which it was important that  
both armies should possess observa-  
tories.  
French counter-attacks immediately  
regained all the ground lost except a  
salient measuring a few yards, in  
which the German position is most  
precarious. On this occasion the Ger-  
man shock troops advanced in their  
whirl sleeves without packs after a  
terrible bombardment, in which every  
yard of the adjacent ground was  
searched by shells.  
Fail to Hold Gain.  
The German "shockers" as they  
succeeded in their determined  
and courageous effort turned over the  
trenches they had gained to the 74th  
German infantry division, who, how-  
ever, failed to hold them when called  
upon for a defensive effort. The cor-  
respondent visited the entire position  
in this sector today and found the  
French firmly established, while the  
Germans on the other side of the hill  
were deprived of observation posts,  
and their artillery was blind.  
Another lively affair occurred in the  
vicinity of Mont Cornillet, where the  
Germans and French attacked almost  
simultaneously, the former with the  
object of recovering prominent points  
they had lost some weeks ago, and the  
latter with the intention of getting  
feet on the ground.  
As it happened, a unit consisting of  
only 63 German grenadiers and pow-  
erful machine gunners, occupied the  
position coveted by the Germans, and  
not only drove off the attacking forces,  
but pursued them and captured a  
considerable length of German trench-  
es, and in doing so killed more than  
200 Germans.  
On the Chemin des Dames also the  
Germans launched yesterday a num-  
ber of attacks, some of which re-  
sulted in most desperate engagements.  
In the neighborhood of Le Royer  
farm the ground was covered with  
German bodies, while the only suc-  
cess the Germans achieved was to  
gain possession of a short section of  
a front French trench.

### RUSSIANS ENTICE FOE INTO CLEVER AMBUSCADE

In Bayonet Fighting Ally's Troops  
Kill Some Germans.

### Aviation Service of Russia To Be Thoroughly Reorganized

Petrograd, June 24, via London.—  
The war office issued the following  
official communication today:  
"Western (Russian) front: In the  
Stokhod River region near the Vil-  
lage of Pozog our scouts prepared an  
ambush, and, surrounding the  
approaching Germans, showered hand  
grenades upon them. In the bayonet  
fighting that followed some German  
were killed. Owing to the approach  
of German reinforcements, however,  
our scouts returned to their own  
trenches. On the rest of the front  
fighting became more intense in the  
region of Krevov."  
Aviation Service of Russia  
To Be Thoroughly Reorganized  
The executive council of the work-  
men's and soldiers' deputies has de-  
cided to convocate an all-Russian as-  
sembly of aviators and manufacturers  
of aircraft, with the object of improv-  
ing the fighting capacity of Russian  
aviation and the reorganization of the  
whole aviation service. The date has  
not yet been fixed, but the congress  
will be held in Petrograd.

ONTARIO STREETS BEING IMPROVED

Deputy Minister of Highways Issues Report Upon Methods of Building.

A comprehensive report, entitled "Street Improvement in Ontario," and compiled from information derived from a survey of street improvement in the larger towns and cities of the province by the Ontario Department of Public Highways, was issued Saturday by W. A. McLean, deputy minister of highways.

According to the report there are in 21 cities and 11 towns in Ontario 2281 miles of streets of which 27.1 per cent. are permanently paved.

Mr. McLean deals with the street improvement in each town and city individually. Permanent street improvement, he said, has its beginning in Toronto in 1881, when the first contract was awarded for a cedar block pavement.

Motor traffic is making an unprecedented demand upon the carrying capacity of city streets. In 1904 there were registered in the province 585 motor cars; in 1916, 54,875 cars; and in 1917 it seems probable that the number may exceed 65,000.

An important development in the treatment of paved streets which has arisen on account of the use of the automobile is the design of intersections.

SERGT. HILL DECORATED FOR HEROIC SERVICE One of the Famous "Princess Pats" Rewarded for Brave Conduct Under Shell Fire.

Before a full parade of the soldiers at the Spadina Hospital, Sgt. H. Hill, one of the famous "Princess Pats," was yesterday morning decorated with the distinguished Conduct Medal by Capt. J. McCarthy, adjutant of the hospital.

GUIDES' RALLY AND GARDEN FETE

Gathering at Casa Loma on Saturday Afternoon Despite Rain.

Many brought disappointment to hundreds who went to Casa Loma on Saturday afternoon to attend the rally and garden fete for the Girl Guides.

The unfavorable weather, however, was not sufficient to deprive the girls of the beautiful grounds, the flags which they dropped, the bright spots in the landscape, the great turreted house topped by the hill being all part of the enjoyment.

Flags Presented. A feature which was prettily carried out was the presentation of flags by a number of Toronto and outside companies and platoons, among those taking part in the ceremonies being the 1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32nd, 33rd, 34th, 35th, 36th, 37th, 38th, 39th, 40th, 41st, 42nd, 43rd, 44th, 45th, 46th, 47th, 48th, 49th, 50th, 51st, 52nd, 53rd, 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62nd, 63rd, 64th, 65th, 66th, 67th, 68th, 69th, 70th, 71st, 72nd, 73rd, 74th, 75th, 76th, 77th, 78th, 79th, 80th, 81st, 82nd, 83rd, 84th, 85th, 86th, 87th, 88th, 89th, 90th, 91st, 92nd, 93rd, 94th, 95th, 96th, 97th, 98th, 99th, 100th.

Wonderful Sale of Lingerie Blouses Several Models, All Sizes, Today, Each \$1. Lingerie Blouses at \$1.00—and such blouses! It's one of the most attractive of our Midsummer Sale offerings.

Children's Rompers, Of Various Fabrics, \$1.25. These are just what the little ones love; they're so cool and comfortable.

Here's Neckwear—All New and Charming, to \$1.25 Lines, at 50c. We're uncommonly well pleased with this lot of Neckwear; 'twas bought for our Midsummer Sale.

Lillian Russell's Toilet Preparations 75c Worth of the Famous Actress' Goods, Today 50c. You know of Lillian Russell's Toilet Preparations; perhaps you use them regularly.

A Sale of Pumps and Oxfords Odd Lines, Regularly to \$6.00, at \$1.95. Anyone on the look-out for a good odd footwear bargain will find it here; it's a miscellaneous assortment of Oxfords and Pumps.

Fine Mull Envelope Chemises With Lace Yokes, \$2.50 Value, at \$1.69. Here's a Midsummer Sale Special that will bring you hot-foot to our Lingerie Section today.

Sale of Natural Leghorn Hats Each Trimmed for the Sale, Price \$3.95. A Hat Sale, of course. Without such a feature we could hardly hope to set our Midsummer Sale off with a good swing.

You'll Want Some of Them—Bedspreads, Values to \$5.00, at \$2.50. The Linen Section comes forward enthusiastically with two splendid items for today, the first day of our Midsummer Sale.

Four Pairs of Socks Knitted Free From Wool at \$2.50 a Pound. Have your boys' Socks Knitted Free of Charge from our best quality imported "Purity Brand" yarn.

The Smartest Summer Suits For Women. Splendid Values at \$15.00. Just as attractive an array of Summer Suits as you could want to see—bought for the Sale, not even shown before—and each model wonderfully good value at \$15.00.

Suggestions for the Boys' Summer Outfitting. Here's the boys' list of clothing needed for the camp, and we are headquarters for its purchasing.

Demonstration. Have you visited our Toilet Goods Section lately? If not, come soon and let us show you Ingram's Toilet Goods, which are now being demonstrated.

MURRAY-KAY, LIMITED. Murray Store: 17-31 King St. E. Kay Store: 36 and 38 King St. W. STORE HOURS DURING JUNE: 8.30 a.m. to 5.30 p.m. every day but Saturday, when closing hour is 1 p.m. Tel. Adelaide 5100.

The Lunch Room. Don't make the effort to go home for lunch when you're shopping. Just visit our Lunch Room, where you will find dainty fare and courteous service.

# The Toronto World

FOUNDED 1886.  
A morning newspaper published every day in the year by The World Newspaper Company of Toronto, Limited, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, 346, 348, 350, 352, 354, 356, 358, 360, 362, 364, 366, 368, 370, 372, 374, 376, 378, 380, 382, 384, 386, 388, 390, 392, 394, 396, 398, 400, 402, 404, 406, 408, 410, 412, 414, 416, 418, 420, 422, 424, 426, 428, 430, 432, 434, 436, 438, 440, 442, 444, 446, 448, 450, 452, 454, 456, 458, 460, 462, 464, 466, 468, 470, 472, 474, 476, 478, 480, 482, 484, 486, 488, 490, 492, 494, 496, 498, 500, 502, 504, 506, 508, 510, 512, 514, 516, 518, 520, 522, 524, 526, 528, 530, 532, 534, 536, 538, 540, 542, 544, 546, 548, 550, 552, 554, 556, 558, 560, 562, 564, 566, 568, 570, 572, 574, 576, 578, 580, 582, 584, 586, 588, 590, 592, 594, 596, 598, 600, 602, 604, 606, 608, 610, 612, 614, 616, 618, 620, 622, 624, 626, 628, 630, 632, 634, 636, 638, 640, 642, 644, 646, 648, 650, 652, 654, 656, 658, 660, 662, 664, 666, 668, 670, 672, 674, 676, 678, 680, 682, 684, 686, 688, 690, 692, 694, 696, 698, 700, 702, 704, 706, 708, 710, 712, 714, 716, 718, 720, 722, 724, 726, 728, 730, 732, 734, 736, 738, 740, 742, 744, 746, 748, 750, 752, 754, 756, 758, 760, 762, 764, 766, 768, 770, 772, 774, 776, 778, 780, 782, 784, 786, 788, 790, 792, 794, 796, 798, 800, 802, 804, 806, 808, 810, 812, 814, 816, 818, 820, 822, 824, 826, 828, 830, 832, 834, 836, 838, 840, 842, 844, 846, 848, 850, 852, 854, 856, 858, 860, 862, 864, 866, 868, 870, 872, 874, 876, 878, 880, 882, 884, 886, 888, 890, 892, 894, 896, 898, 900, 902, 904, 906, 908, 910, 912, 914, 916, 918, 920, 922, 924, 926, 928, 930, 932, 934, 936, 938, 940, 942, 944, 946, 948, 950, 952, 954, 956, 958, 960, 962, 964, 966, 968, 970, 972, 974, 976, 978, 980, 982, 984, 986, 988, 990, 992, 994, 996, 998, 1000.

MONDAY MORNING, JUNE 25.

## For Aldermanic Endorsement.

Today's city council has several important matters to decide upon before adjourning for the summer vacation. The most important of these is the passing of a bylaw for the expropriation of that portion of the Metropolitan Railway within the city limits. It will be necessary to do this before July 15, according to the legislation passed last spring. It is understood that the negotiations looking towards the transfer are going on smoothly. The price may be greater than it was some years ago, but it is likely to increase as the years pass, and the sooner the city acquires the control of its own streets the better for its plans of a future unified street car system.

Another point upon which labor has already been spent is the proposal to ratify an arrangement come to with the C.P.R. touching the policy to be observed in connection with the double-tracking of that road across the northern part of the city and over the Reservoir Park ravine.

The C.P.R. has offered in lieu of the plan to build an additional bridge alongside the present one, to erect a new reinforced concrete bridge for double tracks at an additional cost of \$40,000. The object is to do away with level crossings, and the city's contribution is an agreement to convey portions of McLennan avenue and Summerhill avenue, over which the tracks cross at present at a dangerous level.

The new subway will eliminate all danger, and the C.P.R. offers to pay towards it a sum equal to the amount which the railway would have been ordered to pay by the railway board to the subway originally planned. The new project is of the nature of a compromise, and Commissioner Harris thinks the agreement is fair to all parties. The city will not be called upon to do any work or go to any expense at present.

Most of the business, while important, is of the nature of clearing off delayed or routine matters, about which there can only be assent or objection, as the principles involved have already been settled.

## Fixing Coal Prices.

Washington is determined on drastic action in regard to the high prices by which the big interests are fleecing the public. The first important step has been decided upon by the senate committee on interstate commerce, which has resolved of an investigation into coal prices, preliminary to reporting a resolution authorizing the president to fix the price of coal at the mines. This fixed price will be for the general public as well as for the government, and is the first real step towards abrogating the divine right of the commercial kings of the corporations and vested interests to do what seems right to them, irrespective of the rights of their "subjects," the common people.

That there is opposition to this proposal goes without saying. The men who take the big business view have naturally an opinion different from that of those who take the consumer's view. They believe that measures for increased production of coal would tend automatically to reduce prices. The public have not so found it, however, and in a matter so essential to the very life of the nation the public view must eventually be accepted. The nationalization of the coal mines is in sight just as soon as the big interests raise obstacles to the freest access to this necessity of life.

The operators from the Pittsburgh district are to appear tomorrow before the senate committee to explain, for example, why the price of bituminous coal has been advanced from a range of prices between \$1.50 and \$2 a ton to \$4.50 and \$5 a ton in the face of a wage increase of less than 20 cents a ton and with freight rates the same as they were three years ago. And this advance will take some explaining.

It is proposed to fix the prices of bituminous and other coal, and the operators will be compelled to furnish coal at these prices, and if they are not satisfied they can sue for the difference in open court.

The cost of the run of mine coal, it is stated, was, at the mine three years ago, 90 cents a ton. Labor rates have gone up from ten to twenty cents a ton. The difference between \$1.70 delivered and \$5, the present price, less this wage increase, represents war profit. It simply howls for investigation.

Kingcraft has exploded itself by its unreasonable and unrighteous demands. Corporation-craft is taking a similar course, and will inevitably meet a similar fate. Corporation methods as applied to increased efficiency, diminished cost, and whole-sale economy, all of which produced

huge increased profits of themselves, would have served to protect and maintain the corporation system for generations. But the corporation kings were not satisfied with moderation. They decided to use their power for extortion and while denouncing socialism, headed the nation towards socialistic measures under the pressure of their exactions.

A great deal of light is going to be thrown on the coal business one of these days; and those who accuse us of misrepresentation should keep their eyes on Washington. The coal producers are now asking a price to be fixed of \$3.50 a ton. Perhaps they could do with less. But even at that Toronto should be able to do better than \$10 or \$12.

## A Great and Good Man.

The World today reprints from The Winnipeg Tribune a well-deserved tribute to Rev. Dr. Salem G. Bland upon his retirement from the staff of Wesley College, Winnipeg. It is but one flower in a general garland of praise, as many other papers in western Canada speak in the same strain.

No man is more loved or revered in the west than Dr. Bland. Altho born in eastern Canada, he has dedicated the best years of his life to the sympathetic service of the people who dwell in the prairie west. Thousands of young men and women have been his disciples at Wesley College, and many thousands more have been influenced and uplifted by his precept and example as a minister of the gospel. But a still wider constituency that he may claim as his own stretches from the lakes to the mountains, and includes the right-thinking and the well-intentioned people of Manitoba, Saskatchewan and Alberta.

For years every movement for the common weal that has made headway in the west has been helped and pushed forward by Dr. Bland. At every public meeting his presence is in demand, and those who have been privileged to hear him have no hesitation in saying that he is the greatest orator in Canada today.

No man will perhaps be more surprised to hear how highly his fellow citizens regard him than Dr. Bland himself. This pioneer missionary leads a simple, ascetic life. He neither claims nor desires reward or distinction, yet because he has been forgetful of self and entirely devoted to his fellow men he has achieved an influence in the west that is almost commanding and always unique.

A good many big men and big corporations fear Dr. Bland. He is a radical in the sense of wanting everyone to mix with evil, but on the other hand he will not insist upon the unattainable or sacrifice a real advantage in the quest for an impossible ideal.

Dr. Bland is not a politician, but no one is more keenly interested in the problems that confront the nation. He wields a commanding influence among the grain growers of the west, and he is universally beloved in the City of Winnipeg. Hence many believe that he ought to enter public life, and it is no secret that he can be returned for the asking from almost any riding in the Province of Manitoba. His retirement from Wesley College may not mean that he has at last consented to enter public life, but his many friends and admirers, both east and west, hope to see him returned to the next parliament.

## A Valued Citizen.

The semi-official announcement of the probable retirement of Rev. Dr. Bland from the staff of Wesley College comes as a great surprise to the general public. It is stated that the reorganization plans of Wesley College Board involve this action.

As Wesley College is a great institution and fills a large space in the higher life of western Canada, so there are the men—the creators and the tenders of this usefulness—who have become part of the very soul and life of our people.

Dr. Bland has been, and is today, an outstanding, fearless, progressive and righteous figure in the life of Wesley and the whole educational field of the west. In a nation where idealism has struggled hard to keep its head above water, and where the fight against complete submersion has been hard, the very soul of the country has often turned to Dr. Bland, and in and thru him has found true expression. And the climax of it all is that the principles—the honor and good name of Canada, for which he has stood—are now in their day of triumph. Puppet politicians, with their patronage, their scheming, their undermining, their misleading and misrepresentation, are being cast aside, and the dawn of the stronger and cleaner and nobler life, as present highly personified in the sacrifices of our soldiers, is upon us.

And the man who has been a champion and a leader of purity and uprightness in the national life of Canada, and western Canada in particular, is about to retire!

We cannot think it is true. Dr. Bland is in the full vigor and maturity of his usefulness. We know of no one, in any denomination, or in any educational position, whom we could not more easily spare.—Winnipeg Tribune, June 6.

## ATTRACTIVE MUSKOKA.

A very pleasing trip to Muskoka at very low cost can be made by taking advantage of our travelling with those attending the Epworth League Summer School, Elgin House, June 27th to July 7th. Tickets on sale June 27th to July 2nd, valid for return to July 11th. Special party leaves on C.N. R. 9:00 a.m. train June 30th. Muskoka Navigation Company will honor such Elgin House tickets to other points. For particulars of service and special attractions of the trip apply to City Ticket Office, Can. Nor. Ry., 52 King St. East, Main 5179.

## Young Man! Aim at That First Thousand

"The thing that counts," said a man of independently large means, accumulated by hard work, saving, and wise investments, "is the first thousand dollars. When you've got that amount together you are beginning to get somewhere, and with that start you will want to keep on."

In saving to acquire the "first thousand" you are creating the capital necessary to enable you to avail yourself of some of the opportunities constantly presenting themselves for increasing and multiplying that capital. We credit interest at three and one-half per cent. on every dollar deposited with us, thus materially assisting in its accumulation. One dollar opens an account. Begin today.

nobody else believes and no one else on earth cares a snap for.

I've seen that light shine from the eyes of an old mother in a police court when her son was led away to jail. I've seen it flame a deathless light in the eyes of a rich woman, proud and worldly. I've seen it flash desolate in the look of a woman who stood at the foot of the gallows and cried aloud over the heads of the crowds to the doomed murderer who had been her baby.

I'm glad Jim wrote home to his mother. She'll keep the letter in her box, and when she dies she'll tell the world that she'll tell her will by it next her heart. Poor Jim! He saw the light his old mother kept burning and he answered, her at last.

## Secrets of Health and Happiness.

### Reversal of Dexterity Proposed As Cure for Defects of Speech

By DR. LEONARD KEENE HIRSHBERG, A.B., M.A., M.D. (Johns Hopkins University).

The multiplicity of treatments for stutters and stammers is good proof that there is no sure cure or royal road to relief for such conditions. When you hear of a dozen or more different remedies for one disease, make up your mind that not all of the treatments are a success, even when they sometimes seem to be.

Tedious, slow, painstaking discipline and re-education of the vocal muscles, much in the manner of learning to play a piano, is one helpful method. Dr. J. Herbert Clairborne of New York, however, is convinced that stuttering and stammering are often the result of teaching left-handed children to use their right hands and vice versa.

He therefore proposes a change of dexterity for children who stutter. The parents of one left-handed boy when old enough for this defect to attract the notice of others, began to teach their son to use his right hand.

About this same time they noticed that he began to stutter and stammer. This continued until he became wholly right-handed, when his stammering and stuttering stopped. He still, however, retained a certain amount of ambidexterity, and would use his left hand for important acts. At this period there would be a relapse into stuttering.

While one blurbist always wrong draw a general conclusion from one child's condition, Dr. Clairborne, like many others before him, left his observations as worth a trial for all children who stammer.

Long Practice Necessary. Complete reversal of dexterity is a difficult thing to accomplish in many cases. The victim must practise for weeks, months and per-

haps years before he is able to use the opposite hand.

It is certain from several observations reported by observant school teachers to Prof. Edward B. Titchener, the psychologist, that small boys who are left-handed when forced by their parents to use their right hands exhibit speech defects equivalent to stuttering and stammering as well as "word blindness" or confusion of written or printed words.

It seems likely that this particular variety of speech disorder is directly ascribable to a double confusion of muscle messages sent thru the central exchange or brain, thence into the other parts of the individual.

Besides the cure of a left-handed boy by Dr. Clairborne of New York, Dr. E. Bosworth McCready of Pittsburgh also effected a brilliant cure of a boy who had combined stuttering with letter and word blindness.

This boy was considered a backward child, much below par mentally. He was very shy and self-conscious. His movements were awkward, and he was very stupid. The attempt to speak often threw him into a state of panic.

Stuttering is Overcome. This boy was right-handed, but Dr. McCready had him taught gradually to use his left hand. His improvement became apparent, and has with the other measures used been most satisfactory.

Prof. E. Jordan of the University of Virginia says he has frequently noticed that students naturally left-handed, trained to use the right hand, have considerable difficulty in speech. He thinks that left-handedness is also associated with other defects.

Dr. S. P. Goodhue says that the reason stammerers often have a "poor ear for music" is because their memory and auditory associations are limited with faulty muscular vocal memories.

All of these new facts will contribute greatly toward the cure of stuttering and eye defects, and ought to be given a trial since they are harmless.

## WINIFRED BLACK

WRITES ABOUT The Light in the Window

Copyright, 1917, by Newspaper Feature Service, Inc.

TWENTY years ago a woman out in Wisconsin was sitting in the window. She lit it at dusk and every night she rose once at two or three o'clock as the roosters in the barnyard began to crow and trimmed and radiant lit full daylight.

The neighbors noticed the light at first and once in a while some one drove over in the dark and knocked at the old farmhouse door to ask if any one was in. The woman who lit the light and tended it would call cheerfully from her window:

"No, neighbor, there's nothing wrong. That's Jim's light. I always kept it burning for him. He was always kind of an unexpected boy. Jim was, and he's liable to come round the turn of the road most any night now. I don't want him to stumble in the dark."

Soon the light in the window grew to be a landmark. Men driving home late after a day in the market, or thirty miles or so away watched for the cross-roads tavern, ceased their singing and hushed their hoisterous

laughter. There were always some among them who took off their hats as if they stood before a shrine. Young fellows and their sweethearts driving home late from the country, danced watched for the light and spoke of it—Jim's light, as they called it, up and down the valley—and no one ever laughed at the idea.

Always Burning There. Jim's mother was a rosy, cheery, pleasant little body, known from one apple butter and her chicken pie. She raised the best broilers in the market and there was nothing fanciful or sensational about the ham and bacon she cured.

She had a garden full of old-fashioned flowers in the summer, phlox, verbena, marigolds, sweet williams, bachelors buttons and clove pink for a border. In the winter, if any of the neighbors' children were "taken down with a cold," Jim's mother made them a tea out of the herbs she kept in the garret—and the doctors said the tea she made weren't so bad, either.

Jim's mother danced at all the weddings, mourned at all the funerals and helped at all the christenings. She led a busy, useful, happy life, but no one need have fear. He said the St. Paul's lack of fear during the shipwreck while on his way to Rome, the rector pointed out how God's protection was sufficient to eliminate fear. In his service, the speaker said, no one need have fear. He said the St. John's Ambulance Association appealed to the interest and sympathy of everyone because its work was done in peace times as well as during a prominent factor in war times. Members of the association are prepared at all times to administer first-aid," he said.

Besides the cure of a left-handed boy by Dr. Clairborne of New York, Dr. E. Bosworth McCready of Pittsburgh also effected a brilliant cure of a boy who had combined stuttering with letter and word blindness.

This boy was considered a backward child, much below par mentally. He was very shy and self-conscious. His movements were awkward, and he was very stupid. The attempt to speak often threw him into a state of panic.

Stuttering is Overcome. This boy was right-handed, but Dr. McCready had him taught gradually to use his left hand. His improvement became apparent, and has with the other measures used been most satisfactory.

Prof. E. Jordan of the University of Virginia says he has frequently noticed that students naturally left-handed, trained to use the right hand, have considerable difficulty in speech. He thinks that left-handedness is also associated with other defects.

Dr. S. P. Goodhue says that the reason stammerers often have a "poor ear for music" is because their memory and auditory associations are limited with faulty muscular vocal memories.

All of these new facts will contribute greatly toward the cure of stuttering and eye defects, and ought to be given a trial since they are harmless.

## EIGHT HUNDRED RECRUITS OFFER

Two Hundred New York Men Help to Swell Toronto Enlistments.

### KILTIES AT RANGES

Highland Regiment Holds Sunday Target Practice at Long Branch.

Toronto mobilization centre recruiting depot at the armories reports substantial increases in the offerings for enlistment during the week just ended.

A total of 899 volunteers came up for examination, compared with 715 during the preceding week. The number of men actually sworn in for active service last week was 467, this being an increase of 120 over the week before. Altho over 400 recruits were dealt with at the mobilization centre last week, only 49 were rejected as totally unfit for military duty. Three hundred and seventy-two of the week's recruits were not ready to commence service until a later date.

The Royal Flying Corps by attesting 154 recruits won the week's enlistment honors by a big margin.

Infantry units came a good second, enrolling a total of 130 recruits. These were credited to the Canadian expeditionary force battalions of Toronto regiments as follows: 10th Royal Grenadiers, 27; Queen's Own, 26; 48th Highlanders, 23; 109th Regt., 15; 110th Regt., 15; Canadian Officers Training Corps, 14. Thirty-one recruits signed up with the cavalry, 23 going to the Canadian Mounted Rifles and eight to the Royal Canadian Dragoons. Other active service units gaining many men last week were the railway construction drafts, which enrolled 47, the Army Medical Corps, and York and Simcoe Foresters' Construction Draft, with 36 each. The Signalling Corps and the Canadian Engineers also did well, the former unit obtaining 14 recruits, and the latter 11.

New York Recruiting Brief. The arrival of 205 recruits in Toronto from the British mission at New York City was a feature of last week's activities at the armories depot. Several of the men from the United States joined the C.E.F. sections of Toronto infantry regiments. A large number also went to the Royal Flying Corps. Seventy-two of the New York men arrived in one day.

Three hundred and forty-two members of the 48th Highlanders Regiment put in a day of musketry practice at the Long Branch rifle ranges yesterday. The regiment assembled at 9 a.m. at the armories and then marched, headed by the pipe band, in time to entrain at 10 o'clock. Lieutenant C. W. Darling was in command. Instruction at the ranges was directed by officers of the school of musketry of Toronto military district. At 2 p.m. the men ceased target practice.

## AMBULANCE ASSOCIATION PARADES TO ST. ALBAN'S

Rev. Canon A. W. Macnab Preaches Stirring Sermon on "Service" in Peace and War.

The importance of the work of St. John's Ambulance Association in times of peace, as well as in war, was emphasized by Rev. Canon A. W. Macnab in his sermon at the annual service for the members of the association in St. Alban's Cathedral, yesterday morning.

Preceding the service, the members marched from their York street headquarters to the church, under the leadership of Dr. C. J. Copp. Besides the congregation, about 150 members of the association, including 110 uniformed nurses, and their friends and members of the voluntary aid department were present, making an attendance which taxed the seating capacity of the church.

The organization is an international association with a large membership. The Canadian branch, of which Sir Henry Pellatt is head, has contributed a total of 600 members to various branches of the military service of the allies.

STORE CLOSSES SATURDAYS 1 P.M. DURING SUMMER MONTHS.

Sport Coats

Lovely collection of this popular garment in big variety of newest styles...

CAPT. A. H. MILLER GAINED 23 POUNDS

Says His Restoration to Health is the Talk of the Railroad Yards.

"Yes, sir, it is a fact. I have taken seven bottles of Taniaic and have gained twenty-three pounds," said Capt. A. H. Miller, one of the best known railroad men in Knoxville, Tenn.

"Before I began taking it," he continued, "I only weighed 151 pounds. I now weigh 174 pounds, and feel like a 15-year-old boy."

Captain Miller, who is a conductor on Trains Nos. 73 and 74, running between Knoxville and Harrison, on the Southern Railway, had just arrived in Knoxville, checked out his train and reached his home on Scott street, when he was met by the Taniaic man.

"I am indeed glad you called," said Captain Miller. "For several weeks Mrs. Miller and myself have been reading the testimonials of Knoxville citizens regarding the beneficial effects derived from this wonderful medicine, and I had promised my wife that I would try it."

"I had for years been afflicted with catarrh and stomach trouble," continued Captain Miller, "and when spring came I was in a wretched run-down condition—a wretched condition of the railroad yards, and every day I am being congratulated by my friends upon how well I look."

"I had for years been afflicted with catarrh and stomach trouble," continued Captain Miller, "and when spring came I was in a wretched run-down condition—a wretched condition of the railroad yards, and every day I am being congratulated by my friends upon how well I look."

"I had for years been afflicted with catarrh and stomach trouble," continued Captain Miller, "and when spring came I was in a wretched run-down condition—a wretched condition of the railroad yards, and every day I am being congratulated by my friends upon how well I look."

Society—Conducted by Mrs. Edmund Phillips

The engagement is announced in London of Lord Stanley, eldest son of the Earl of Derby, to the Hon. Sibyl Cadogan, the eldest daughter of the late Viscount Chelsea. She has been an extra maid of honor to the Queen since 1914. Miss Cadogan is granddaughter of Earl Cadogan and H.K.H. the Princess Royal is her godmother, which accounts for her second name—Louise.

The marriage took place very quietly on Saturday at 2 o'clock at the archbishop's palace, Archbishop McNeil officiating, only the near relations and friends being present. Margaret Bowers Van Fyk, New York, to Mr. Harold Byron, New York. The bride looked very pretty in a frock of champagne and long coat to match, trimmed with brown marabout, and she wore a becoming hat of white georgette crepe with white ostrich plumes and a corsage bouquet of mauve orchids, and carried an ivory prayer book. Mr. Victor Byron was his brother's best man. The groom's presence was a surprise to the bride, who was in the city for the Quebec boat, Miss Alice Roseau motoring them down to the wharf.

The Ladies' Guild and Blanche Cavendish have given some books to the pupils of the public schools on kindness to animals, which will be presented under the direction of the humane society in Ottawa next week.

Margaret Bowers Van Fyk, New York, to Mr. Harold Byron, New York. The bride looked very pretty in a frock of champagne and long coat to match, trimmed with brown marabout, and she wore a becoming hat of white georgette crepe with white ostrich plumes and a corsage bouquet of mauve orchids, and carried an ivory prayer book. Mr. Victor Byron was his brother's best man. The groom's presence was a surprise to the bride, who was in the city for the Quebec boat, Miss Alice Roseau motoring them down to the wharf.

The marriage took place very quietly on Saturday at 2 o'clock at the archbishop's palace, Archbishop McNeil officiating, only the near relations and friends being present. ## THOMPSON LOSES PITCHERS' DUEL

### Baltimore Winning From Leafs on Sunday by Two Runs to One.

Baltimore, Md., June 24.—Baltimore and Toronto staged a championship game here this afternoon at the new Sunday grounds, and LaJoie's Leafs were at the wrong end of a 2 to 1 count. The set-to was a spirited one throughout and played in an hour and twenty-five minutes. Both Parham for the home team and Thompson for the visitors were in good form, and kept the hits well scattered throughout.

Owing to incalculable suffering from a crowd of 8000, attendance at the Detroit game last Sunday, this afternoon's attendance was not as large as expected, it being about 5000. The arrangements, however, were O.K., and the game was not marred in any way by ground ruts as was the case last week.

The manner in which the Leafs started after Parham made it look as if he was in for a beating, but his first round was his worst by far, and Toronto was really never dangerous after that. Baltimore managed to even the count in the second, but Thompson held the upper hand thereafter.

With one down in the first, Jacobson went on a rippling left field. It rolled down a bank out of sight of Umpire Hart and was naturally declared a home run. Whitehead then fanned, and LaJoie got a single, but Costello ended the inning by fouling to Barber, who played third on account of Biese, who was hit. With one down in the second, Schulz was hit, and after Kelly rolled out, Parham to Williams, Thompson was walked. Truesdale, however, tossed out Altenberg.

Williams started for the Birds in the second, bouncing a safe one off of Thompson's glove. Ripley went to bat and on a passed ball, and advanced to third while LaJoie was throwing out Bentley. Shannon fanned, but McWay sent Williams across with a slashing single to right.

With two down in the third, LaJoie and Costello singled, but Blackbush popped to Truesdale. Baltimore went ahead in the last. Truesdale walked for the second time. Acosta sacrificed, but Smith threw badly and Toronto tied the score with Truesdale going to third. Barber scratched away toward filling the bases. Williams singled, being still occupied. Bentley fanned, and Shannon hoisted to Jacobson. That ended the scoring for the game.

Kelly singled down in the fourth, but was stranded at first. The Birds went out in order. Jacobson opened the fifth with a single, but was hit by Whitehead. LaJoie popped to Shannon, and Whitehead then died stealing.

Barber doubled with one down in the fifth, but Lamar and Williams perished in order in the sixth, and the Birds managed to stick in a single. Kelly bled the seventh with a single. Thompson opened the eighth with a single. Thompson could not touch the triple play sacrifice, but Altenberg and Jacobson could not touch it either. In the ninth, Toronto went out in order in both the eighth and ninth, a single by Schulz, and a base on error by Thompson.

### Even Break With Orioles Saturday

Baltimore, June 24.—The Toronto Leafs split up today's double-header with the Orioles, but had a sufficiently long lead in the second game to have cleaned up the Orioles in the sixth. The home team won the first by a score of 3 to 1, after winning in the sixth. The seventh inning was a struggle, but the Leafs held on to their lead. The Orioles could not touch the triple play sacrifice, but Altenberg and Jacobson could not touch it either. In the ninth, Toronto went out in order in both the eighth and ninth, a single by Schulz, and a base on error by Thompson.

### GRANITE BOWLING TOURNAMENT TODAY

Owing to the rain it was impossible to start the Granite lawn bowling tournament on Saturday. It was postponed until today. The tournament will be held at the Granite Club. The first round will be played today, according to the following official revised draw:

- 1—Preliminary Round—4 p.m. Monday—Green.
- 1—Pekard (Can.) v. Grew (Gran.)
- 2—McKay (Can.) v. Wylie (Rush.)
- 3—Dr. Paul (Alex.) v. Morrison (Q.C.)
- 4—Hay (R.C.Y.C.) v. James (Vic.)
- 5—Nolan (Vic.) v. Boyd (This.)
- 6—Fuller (High Pk.) v. Skinner (Gran.)
- 7—Armitage (Can.) v. N. J. McEwen (Vic.)
- 8—Bowman (Gran.) v. Peasey (Vic.)
- 9—Howard (St. J.) v. Clark (How. Pk.)
- 10—Coutts (How. Pk.) v. Malcom (Mark.)
- 11—McDougal (Hiv.) v. Atkinson (H.P.)
- 12—McKay (St. J.) v. McEwen (Vic.)
- 13—Martin (Long B.) v. Dalton (Gran.)
- 14—Goodman (St. J.) v. Rice (Q.C.)

## N. L. A. LOSERS SCORE FOUR EACH

### Tecumseh Earn Thirteen and Shamrocks Sixteen, and Beat Ottawa and Cornwall.

Ottawa was no match for Tecumseh in the National Lacrosse Association fixture Saturday at Hamilton's Point, the Toronto Indians winning by 13 to 4 and leading at the end of every period, but not without, as the visitors registered the initial goal and then held. The rain kept the attendance down to a couple of hundred and the slippery grass marred the speed of the players.

## Easy for Shamrocks; Fine Day at Cornwall

Cornwall, June 23.—The Shamrocks beat Cornwall 16 to 4 in a league match here this afternoon, the weather being ideal. The match started on time by Referee Pigeon, Montreal. The Shamrocks formed by both teams was good. The Shamrocks scored two to Cornwall's blank in the first period, and two more to lead one to two in the second, leaving the half-time score 4 to 1. In the third period the Shamrocks out-scored Cornwall 11 to 3, and the final score was 16 to 4 for the Shamrocks. The teams are as follows:

**Shamrocks (16):**—Byrnam, goal; Brady, point; Blake, cover; H. Hyland, defence; McArthur, defence; Degan, defence; McCarthy, centre; Campbell, home; Pennington, home; Hyland, home; Walsh, outside home; Butler, inside home; Egan, Ryan, W. McEwen, substitutes.

## HAMILTON JOCKEY CLUB FIRST AND ONLY MEETING BEGINS TOMORROW DERBY DAY

Hamilton, June 24.—The races here today at the Hamilton Jockey Club will be the first and only meeting of the season. The meeting will be held tomorrow, July 3, and will continue until Tuesday, July 10. The races will be held at 11.30 a.m. and will include a Ladies' Day on Tuesday, July 10. The admission is \$1.50 for ladies and \$1.00 for gentlemen.

## SPECIAL RACE BOAT Steamer Corona

to Hamilton, daily during the Race Week, leaving Toronto each morning at 11.30 and returning after the race has been run. Arrive back in Toronto at 8.30 in the evening. Return fare \$1.00, to which must be added the Radial Fare, which is 25c. GET YOUR LUNCH AND DINNER ON THE BOAT! Canada Steamship Lines, Ltd. Tel. Ad. 4200.

## The World's Selections BY CENTAUR

### AGUEDUCT.

Maisonneuve Race Track, Montreal, June 23.—The races here today resulted as follows:  
**FIRST RACE**—Purse \$500, for three-year-olds and up, five furlongs: King Stalwart, 112 (Grand), \$25.60, \$12.80, \$6.40.  
**SECOND RACE**—Purse \$500, for three-year-olds and up, five furlongs: The River, 110 (White), \$57.50, \$28.75, \$14.37.  
**THIRD RACE**—Purse \$500, for three-year-olds and up, five furlongs: 1. Bunice, 115 (Ryan), \$6.90, \$4.40, \$2.80, \$1.90.  
**FOURTH RACE**—Purse \$500, for three-year-olds and up, five furlongs: 1. Moller, 115 (Taylor), \$6.50, \$4.00, \$2.50, \$1.60.

### LATONIA RESULTS

Latonia, Ky., June 23.—The races here today resulted as follows:  
**FIRST RACE**—Maiden, two years, five furlongs: 1. Travoite, 112 (Hanover), \$44.60, \$22.30, \$11.15.  
**SECOND RACE**—Purse \$500, for three-year-olds and up, five furlongs: 1. American, 109 (Goose), \$67.50, \$33.75, \$16.87.  
**THIRD RACE**—Purse \$500, for three-year-olds and up, five furlongs: 1. Water War, 102 (Callahan), \$56.50, \$28.25, \$14.12.  
**FOURTH RACE**—Purse \$500, for three-year-olds and up, five furlongs: 1. John St., 89 (Barrett), \$41.50, \$20.75, \$10.37.  
**FIFTH RACE**—Purse \$500, for three-year-olds and up, five furlongs: 1. Water War, 102 (Callahan), \$56.50, \$28.25, \$14.12.

## RUNES, FAVORITE, KICKED—RAN THIRD

### Fruit Cake First in Feature Race on Closing Day at Ottawa.

Ottawa, June 24.—The last war time meeting of the Connaught Park Jockey Club closed on Saturday, when the Chateau Laurier Handicap, for \$1000 added, was the feature. Fruit Cake, this being the second win of the meeting. Fountain Run, from the Thorncliffe stable, ran second, while Runes, the favorite, was third. The imported colt, Opera Glass, kicked Runes in the foreleg while they were at the barrier. Runes gamely ran the race lame, but was afterwards found to be in bad shape. He may have to be rested up for several weeks or more. The largest crowd in the history of the club witnessed the racing.

# ITEMS FOR AND ABOUT THE FARMER

## YIELD OF CHEESE SHOWS DECREASE

Advanced Summary Based on Reports From Twenty-Eight Instructors.

## PROSPECTS FOR SEASON Increased Acreage of Grain and Fodder Forecasts Greater Production.

The dairy branch of the Ontario Department of Agriculture will shortly issue a statement of dairy conditions based on reports received from the various dairy instructors through the province—some 28 in number. Thru the kindness of Mr. George A. Putnam, superintendent, The World is able to give its readers the following advance summary.

The questions answered in the various reports deal with the comparison in quantity and quality of cheese as compared to the same period last year, prospects for the yield for 1917, conditions of feeding and the meadows, and the supply of labor. The following is a summary of the reports to date:

**Cheese**—Six instructors report gains in the production of cheese in their districts, while the remainder find the quantity to be either on a par with last year or a decrease varying from five to twenty-five per cent. Quality is uniformly reported good.

**Prospects**—With increased growth in pasture of the past few days prospects for the yield of cheese is uniformly reported good. Some reports exceptionally good prospects for their districts for this time of year.

**Feeding**—An increased acreage is generally reported, and the seed lots in the very best of condition. Fall wheat generally was injured and in many cases plowed up. Spring wheat is in splendid condition, and there is an increased acreage of corn, potatoes, and meadows.

**Meadows**—The meadows are in fine condition in all districts. Growth has been rapid of late, and the outlook is for a good hay crop.

**Labor**—In most districts farm labor is scarce, but everybody is working harder than usual, and the work is consequently being done more extensively to overcome the lack of manual labor.

**Some districts** have felt the high wages demanded by the help on account of the big money being paid by the army and navy. In some districts the labor is so difficult to handle.

**An extract** from one of the most interesting reports received from the Chatham County instructor, Mr. J. H. Miller, is as follows: "I have also received the leaflets on care of milk and will distribute them as I see fit. I might mention you, that the Maple Leaf condensed milk plant is in operation here now, and they take in 100,000 lbs. of milk daily. They are paying \$2.25 per cwt. for June milk. The pasteurizer is good in this locality, and everything indicates a big June make of cheese—Very truly yours, Thos. Ellis."

## LAMBING IN LINCOLN FLOCKS.

It is pleasing to be able to report a very satisfactory lambing season in the Lincoln longwool flocks. Dried lambs, milt culm and bran were responsible in price during the winter, and supplemented with some of the best of the ewes in fairly good condition. Reports from many of the largest breeders of Lincoln longwools in the counties of Lincoln, Nottingham, York, Leicester and Derby state that lambs arrived strong and healthy, though many complain that ewes have been short of milk. One flockmaster records a wonderful fall, there having been over one-third of his ewes with triplets, while he had more than a pair of lambs for each ewe. The total of the ewes in the reports numbered 68,912, owned by 37 breeders. Of the total of ewes 23,150 dropped twins or triplets and 19,787 single lambs. This gives an aggregate of 69,862 lambs, which must be regarded as remarkably good. What is more, the mortality among ewes is below the average, the slightly higher than last year.

## MILK FOR CHEESE

Good farms are being projected as a way of utilizing vast areas of free grazing lands along railroads in Arkansas, states The Christian Science Monitor. Goats thrive on undergrowth in Arkansas forests and their raising presents several distinct advantages. In the first place, goat meat is as good as mutton and there is an unlimited demand for goat lambs in city markets. In the second place, the goats produce a fine, rich quality of milk, which is especially valuable for cheese.

Charles A. Chambers, a railroad industrial agent, has called attention to the peculiar possibilities. "I am sure," he declares, "that a stock raiser who will utilize perhaps 100 acres of cleared land near some of the free grazing ranges that border the railroads to grow winter feed for five years. All he requires will be a good grazing range under the timber, a burro or two wearing bell and about three good colic sheep dogs."

## Section of Holstein herd on the farm of W. J. Currey at Aurora.

**Splendid Example of the Advantage of Milk Testing**  
What did your best cow earn for you last year? A seven-year-old grade in a herd near Oxford Mills, Ont., that milked over 3200 lbs. of milk in 1916, 39,197 lbs. in 1917, fat which at 15 cents per pound, equals the substantial sum of \$1037.50. Perhaps you got more. Fortunately, the owner of this herd is keeping records of each cow that he owns, and has the satisfaction of knowing the exact value of his fifteen cows earned over \$150 each.

With milk weighed every third day, and a composite sample tested once a month, the actual yield of each cow for shows and lactation can be found with but little trouble.

Milk and feed records forms are free on application to the dairy division, Ottawa. A study of records should mean an increase in your cows' earning capacity by at least fifty per cent. in three years.

## PRICES HIGHER ON MARKET.

**Special to The Toronto World.**  
Chatham, June 24.—Chatham citizens are indignant at the high prices which are being demanded on the local market, and which exceed prices in local stores. Butter was sold on the market Saturday from 25 to 30 cents a pound and eggs at prices one cent above these figures for the dozen. Butter could be purchased in local stores at thirty cents to thirty-five and eggs at thirty cents.

## NEWS OF OUR READERS

Mrs. Wm. Loveless, of Ellesmere, has 45 white Wyandottes and a number of Runner ducks. She and the children take a great interest in the poultry, especially the two hundred odd little chicks. Mr. Wm. Loveless has a nice herd of Holsteins, some twenty head, besides a few other cattle. He has been shipping between four to six cars of milk per day, and two weeks ago, installed a Burrells, Lawrence & Kennedy milking machine. He has two units, and they are working fine, though he intends getting a smaller gas engine, as the four horse power one, which he now has, is so powerful and expensive for the purpose.

Near Lansing, some of the farmers have, apparently, been somewhat nervous about the lack of growth. This is evidenced by their winter wheat to spring wheat, and are now considering plowing again with the tractor, and seeding buckwheat. Potatoes have made but little growth according to Mrs. Thompson. Perhaps the sun, which is becoming more reasonable, will put a different look on things generally.

W. H. Dennis, Burgessville, bought, recently, one hundred and one hogs of which Harry Armstrong bought in sixty-five, weighing 1,210 pounds, receiving a fine cheque, \$2,216.75.

J. H. Proctor and Sons, Yonge street, near Newmarket, sold 28 head of cat-tail weighing 95,000 pounds, for which they received \$4,375, for which the cat-tail averaged 1,415 pounds each. This is the finest lot of cattle that has been shipped from here for years. The Victoria Farmers' Club shipped from Thornbury, last Tuesday, three carloads of stock. The volume of business transacted by this progressive organization is rapidly increasing. \$102,000 worth of stock being shipped by them in the past year.

John Brown and Son, Galt, shipped, a carload of cattle from Freetown and a carload from Baden to the Toronto Stockyards. These cattle were purchased at from 10 to 11 1/2 cents per pound.

D. Temple and Son, Aylmer, last week, shipped the balance of their sixty fat cattle they sold to Ira Mabey. They were paid 12 cents per pound on the hoof for the herd.

Last week Sanger Brothers, Lakeside, took 18 head of good cattle to Midway. They would average nearly \$150 each. They were a fine bunch.

Wm. A. Thurston was allowed \$23 by the Verulam council, having had one sheep killed and two injured by dogs.

Orval Drewey claimed of the White-church township council, for three sheep killed by dogs, the sum of \$50.

The Mulmur council, at its last meeting, paid out for 11 sheep killed by dogs, the sum of \$235, and \$9 to valuers of same. It is thought that two dogs owned at Mulmur, were responsible for the damage.

Albert Johnson, 8th concession, delivered a fine team of Clyde mares to Thomas Sanderson, Wroxeter, for which he received the handsome sum of \$500.

According to the most reliable reports there is every likelihood of there being a good average crop of apples this year. The blossom is developing well and is not too heavy. On account of last year's yield being so poor the chance are that a higher and better crop will be secured this year.

Last week in the neighborhood of Richmond Hill grain crops were commencing to grow in response to the coming sun and the hay crop was coming along well. Indications are for a good average crop from this district.

F. Thompson, Oak Ridge, has fourteen acres in hoe crop, five of which are in potatoes. Mr. and Mrs. Thompson are examples of the progressive farmer, having their motor truck with which to bring their produce to market.

J. Proctor, Yonge street, near Newmarket, shipped as fine a bunch of fat cattle, twenty-four in number, recently as has been seen for some time. Mr. Proctor realized top market price which netted between \$4000 and \$5000.

Many farmers have been trusting to weather conditions to the last chance to bring along the winter wheat, and at last found it necessary to sow other grain to get a crop.

There appears to be an increased acreage for corn this year and the majority of farmers have their crop planted. Corn for ensilage was planted as late as June 20 last year, and yet there was a fair crop.

## CURRENT PUBLICATIONS VALUABLE TO FARMERS

Review of Interesting Features Contained in Catalogs and Bulletins Recently Issued.

On Wednesday a successful sale was held at Oakville, Col. Long was the auctioneer, and the bidders were somewhat slow in getting started, fair prices were realized and some excellent Holsteins changed owners. Consignors were Gordon S. Goodham, J. Alex. Wallace, R. M. Holtby, Anthony Gies and Major E. F. Oleski.

**Tractor Plows.**  
In these days of labor saving devices the book "Horseless Plowing" will naturally be read with interest. The World has not yet seen a better illustrated book on the construction of such devices as various plows and disk harrows working the ground behind large and small tractors, and the construction of each device is described. Address the Cock-shut Plow Co., Limited, Brantford, for copies.

**June Fruit Report.**  
The June fruit report is now printed and copies can be had from Donald Johnson, fruit commissioner, Ottawa. This Dominion Government review is issued monthly and is mailed regularly to any interested party who sends in his request.

## SOLDIER FARMERS AND NEW ONTARIO

### Government's Plans for Helping Returned Soldiers and Families.

A week ago Wednesday the first draft of thirty men left Toronto to eventually settle upon the land provided in the Township of Owens and O'Brien, being 70 miles west of Chatham on the National Transcontinental Railway, to provide all Transcontinental lands, to provide the 19 sections of the World there was set forth, the 19 sections of the official information, termed "Opportunities Available for Returned Soldiers."

Many farmers have been trusting to weather conditions to the last chance to bring along the winter wheat, and at last found it necessary to sow other grain to get a crop.

There appears to be an increased acreage for corn this year and the majority of farmers have their crop planted. Corn for ensilage was planted as late as June 20 last year, and yet there was a fair crop.

The June fruit report is now printed and copies can be had from Donald Johnson, fruit commissioner, Ottawa. This Dominion Government review is issued monthly and is mailed regularly to any interested party who sends in his request.

**Galvanized Shingles.**  
Some interesting statements are made in "The Right Roof" with reference to the cleanliness of clean water, action of lightning and the value of the quality of permanence when considering roofing. The book is well printed and illustrated with photographs of various buildings and residences and has that personal touch which at once interests the careful reader. Issued by The Federal People, Limited, Ottawa, Ont.

**Crop Bulletin.**  
For those who desire a comprehensive review of crop conditions in Ontario a copy of Bulletin 131 will prove interesting. It includes a detailed statement of temperature for the last five years. Copies supplied by Bureau of Industries, Ontario Department of Agriculture, Building Material.

Sometimes the most casual examination of a catalog will leave the impression that care has been taken in compiling the information embodied therein. Such a one is the "Bishopric Stucco Board," issued by the Bishopric Wall Board Co., Ltd., Ottawa. The book goes into details of wall construction, points out errors to be avoided, presents copy tests of the product and is illustrated with some excellent photographs. A copy would be valuable to any intending builder.

**Silos.**  
Large books set out always the most valuable. One of the small variety written in a pleasing style, presenting the experience of a dairyman with who feeds silage, as told by himself, and also a good list of users of their silos is issued by Ontario Wind Engine and Pump Co., Ltd., Toronto. It is entitled "Profitable Live Stock Feeding."

## BRANTFORD MARKETS.

**Special to The Toronto World.**  
Brantford, June 24.—Prices eased on the market on Saturday, eggs falling off seven cents to 35c and butter falling down to 40c. Fruit crops are higher, but prices are easier. Vegetables were plentiful. Fruit prospects are good, but the first home-grown strawberries commanded 25c a box.

An Inland Township farmer sold a pig last week that brought him \$100.70. She was three years old and weighed 725 lbs.

Among the many fine herds of Holstein cattle in Ontario is that of W. J. Currey, R.R. 2, Aurora. Upon entering the farm, the visitor is immediately impressed. The World representative was the good condition and the contented disposition of the cows. They looked so happy and healthy, and the white coats and certainly appeared well cared for.

Mr. Currey is one of the enterprising men who have left the farm and been using a mechanical milker for about two years, having purchased his outfit in August, 1915. He has two units. His man makes which means that he can milk two cows at the same time. Each unit milks one cow with the other two units he milks eleven cows twice by himself, and has been shipping thirty-two cans of milk each week.

John F. Bingham of Erin Township was quite apparent to the World that much time was saved by the use of his mechanical milker as two cows were being milked at the same time and the teat cups were moved from cow to cow in a very simple manner, and this operation occupied but very little time. By the use of the milking machine time is also saved by the fact that all four teats are being milked at the same time, whereas by hand milking the best one can do is to milk two teats, one to each hand.

The point which specially interests the World in such devices as the milking machine, tractor, separator, gasoline engine, etc., is the extent to which they help to solve the labor problem, which is going to present the greatest opportunity for the application of progressive ingenuity in farm matters in Canada during the next ten years or more. Anything which can demonstrate its usefulness in saving labor is of great value to Ontario farmers of serious consideration.

Now a labor saving device not only saves time but it also saves manual labor. It means that a man who very evidently takes less manual labor on the part of Mr. Currey than if he were still milking by hand. In the first place four teats are milked at the same time with each unit whereas hand-milking would require the man to do the work twice over on each cow, once using a milk pail and once to milk by two teats at the same time. In the second place the tiresome job of milking is done by a machine instead of by hand. The only thing required of Mr. Currey is to change the teats as they become full and change the units from cow to cow as they are milked dry. This apparently is a duty which could be readily learned by any man of ordinary intelligence.

The tending of the machines is certainly a simple enough job to look at and in the case under discussion the man who operates the machine during the time that they were being milked.

Mr. Currey milks the cows by hand, taking the cups from the cow before she is milked dry. In the case of a cow with a short teat he finds it easier to extract the milk by the machine than by hand. This would appear to be a favorable point as at times it is almost impossible to milk some cows by hand as they are barely long enough to grasp with one finger.

Another point upon which there is more or less discussion in connection with milking machines is the question which is the cleaner, hand milking or mechanical? Some hand-milking which has been witnessed by The World could not be termed clean by the strongest advocate of hand-milking and it is a well-known fact that the hired man on the average farm cannot be expected to keep his hands scrupulously clean. While watching Mr. Currey the cows were noticeable during the milking time. The teats were not touched by the hand at all as the cups merely slid on by suction after being placed in contact with each teat. Once the cups were attached the milk simply was sucked thru the short rubber tubing and aluminum valve into the pail which remains covered till full, when the cover is removed and the milk is poured into the can. Manifestly the whole operation is possible of being conducted in a clean, simple manner and both the cows and the owner gave every appearance of satisfaction.

After the milking is completed the teats and tubing are cleaned in station. This cannot be said to be a tedious duty. Indeed, all that apparently is needed thruout the whole process is a man who is intelligent and which any farmer who takes a pride in his work will give under any circumstance. The impressive result of witnessing the milking of this herd by Mr. Currey was a future of great usefulness before us. To the very conservative man we would say, the automatic milker is still being improved, (even the Ford) and yet the farmer has learned that it is a greater business help to the farmer as it is both a labor and time saver and it adds interest to life on the farm. The same thing can be

## HOW TO PROMOTE STRONG COLONIES

Instructions for Securing Best Results From Your Bee-Hives.

## DISCOURAGE DESERTION

Weak Nuclei Not Desirable, But Rather Strong Natural Growth.

While a maximum production of honey is of pressing importance in this war-foot year, yet increasing the bees for next season must not be neglected.

A Rough speaking, the bees that are in the hives at the commencement of the honey-flow gather the crop, while the brood builds up the colony for next year, unless care is taken to do other important honey-flow. This brood is very valuable for forming nuclei, because these, started early in the year, have time to become established with a laying queen, while the brood will build up into strong colonies before winter. Increasing in this way with brood from strong colonies during the honey flow will give colonies that are sticky built up, while at the same time an almost full honey crop is secured.

In newly-formed nuclei containing brood in all stages, there is always a more or less desertion of bees and consequent death of the young brood and sometimes chilling and death of the old brood even to discouragement. Further, queens may not be immediately obtainable, or they may be lost in introduction. Robbing of the newly-formed nuclei has also to be guarded against, but during the height of the honey-flow only careful business will cause this; towards the end, however, the danger of robbing grows so great that it is difficult to avoid. A queenless nucleus, even when strong, will desertion may be checked by stopping the entrance with grass; the bees will make their way out while the grass dries and shrinks in about two days, but care must be taken to avoid overcrowding the confined bees, which would lead to stinging, and possibly to the loss of the good way to overcome the loss of young brood is to place the brood over a queenless nucleus a week before its removal from the parent colony. This may be done in the ordinary course of relieving congestion in the brood-chamber, as a frame or two of empty comb or of foundation being placed in the brood-chamber when the brood is raised.

**Eliminate All Risks.**  
All of these risks may be greatly minimized as follows: Have all the queens' nuclei shipped (this is not essential), and when a colony of similar kind it is desired to propagate swarms, move the parent hive to a new stand, especially in hot weather. For on the old stand, the queen having been picked off the ground and placed in the empty hive. The swarms will return to the new hive at the old stand. The field bees will join the swarm, and the super should be transferred from the parent hive to the swarm which will produce the crop of honey. The colony, now divided of bees but rich in brood, is placed in the empty hive at the new stand. The queen-cells containing queens soon to emerge with the adhering bees.

This method has the great advantage that it not only controls and satisfies the troublesome swarming instinct, but it helps to secure the desired ends by natural means. The bees gatherers are segregated into a strong force, and the brood, being mostly capped, is not likely to get chilled; the bees desert neither the queen-cells readily, and all trouble in raising and introducing queens is avoided. The bees in the newly-formed nuclei are in the post-swarming stage, when their instinct is to spread themselves over and incubate as much brood as possible, and especially the queen-cells.

The beginner should be warned not to divide the parent colony into too many weak nuclei, but the fact may be rectified in the autumn by uniting. The ideal conditions for building up nuclei are a slow honey-flow thruout August and early September. Fortunately these are supplied in most Canadian localities by goldenrods, asters and buckwheat.

Misplaced queens should be replaced any time up to the first or second week in October, preferably not during the robbing season.

At Midway the price of hogs dropped to \$14.50 last week.

Fred Ward shipped a carload of hogs from Claremont last Monday.

Local drovers in South Bruce who have been buying heavily in advance are having a somewhat unpleasant experience just now. Many of the dealers are dropping from one cent to two cents per pound on their shipments.

## RAISE YOUR OWN VEGETABLE SEEDS

### Turnips and Beans Should Be Grown Extensively, Says Expert.

Prof. Zavitz recently delivered a practical valuable address at Aurora, Puslinch Township, stating that much poor grass land and injured wheat land could be better used profitably in growing potatoes, turnips and beans than in mixed grains or oats, as the former were of much greater food value than the latter.

He urged the farmers to note that there is an unlimited demand for good shipping turnips, and the price will remain high. The average yield of beans in Ontario for a number of years past has been 17 bushels per acre; that they are not perishable and will ship any distance; they are ready for consumption without any manufacturing process; they are easily grown, cared for and harvested. The canners guarantee a minimum price of \$2 per bushel. Prof. Zavitz notes that there is an unlimited demand for good shipping turnips, and the price will remain high. The average yield of beans in Ontario for a number of years past has been 17 bushels per acre; that they are not perishable and will ship any distance; they are ready for consumption without any manufacturing process; they are easily grown, cared for and harvested. ANDREW BUCHANAN.

Toronto, Sept. 21, 1916. Little Andrew Buchanan's father, Dear Sir: I have had the pleasure of writing to you in regard to your "B'Well" medicine, which I can recommend to all sufferers. I have been cured myself by your wonderful medicine. Hoping this gets to you safely, I am Yours truly,

Streetville, Jan. 9th, 1917. Dear Sir: I am sending for some more of your "Mother's Friend". I thought of this time I would try it in the powder form, as your medicine has done Thomas and the baby so much good. No doubt, you remember I was there just about a month ago for the amount of \$1.25, and if it is any more let me know, and I will send it to you the next time. Yours truly,

R. R. No. 1, Blythe, Ont. Dear Sir: Enclosed you will find \$2.50 for two packages of your "B'Well". We think it helps my son, who is subject to epileptic fits. Yours truly,

74 Cremat St., Quebec, Oct. 19th, 1916. Dear Sir: Please send me two bottles of "Mother's Friend". I am giving it to my three children, and I think it is doing them good. Please send as soon as possible, as I have finished the bottle I have. Yours truly,

165 Perth Avenue. Dear Sir: Please find one dollar and twenty-five cents (\$1.25) for your "B'Well" powder, which are still in factory. Please send by return of post. Yours truly,

Tavistock, Sept. 6th, 1916. Dear Sir: As I have used your "Mother's Friend" medicine a while ago, and found it a good medicine, I would like to have \$2.50 worth again, by return mail.

We have a little boy, who, at times, complains of his stomach, and I thought I would try it again. Yours truly,

Lewistown, Moncton, N.B., June 9th, 1917. Dear Sir: I have had the pleasure of writing to you in regard to your "B'Well" medicine, which I can recommend to all sufferers. I have been cured myself by your wonderful medicine. Hoping this gets to you safely, I am Yours truly,

Pleasant Street, Dartmouth, N.S., June 10th, 1917. Dear Sir: Your wonderful "tape worm cure" did all you said it would do. My little boy, who had been very sick, but some like a leech. I cannot say what it did, but it is, but little Andrew is doing fine, but since taking Mother's Friend, it has made a happy home, and you presented me with this picture, and I can use it as much as I wish. I will try your "B'Well" medicine. It is also doing great work. I see. Please send me \$2.50 worth of "B'Well" in powder form. I enclose money for same. Yours truly,

Box 31, Durham, Ont. Dear Sir: I am sending you \$2.00 for two packages of your "B'Well". I have finished the bottle I have. Please send as soon as possible. Yours truly,

Winnipeg, Man., Aug. 14, 1916. Dear Sir: I am sending for some more of your "B'Well" medicine. I have finished the bottle I have. Please send as soon as possible. Yours truly,

Russellville, Ont., May 18, 1917. Dear Sir: I am sending you \$2.00 for two packages of your "B'Well". I have finished the bottle I have. Please send as soon as possible. Yours truly,

Box 425, Shannonville, May 1, 1916. Dear Sir: I am sending you \$2.00 for two packages of your "B'Well". I have finished the bottle I have. Please send as soon as possible. Yours truly,

R. R. No. 7, Alvinston, June 18. Dear Sir: Please send me another package of "Mother's Friend". My little girl was never so well as when taking your remedy. Please send it by return of mail. Yours truly,

162 Dundas street, Belleville, Ont., Feb. 10. Dear Sir: I enclosed \$2.00 for your "B'Well" medicine. I have finished the bottle I have. Please send as soon as possible. Yours truly,

St. Ola, Ont., June 11th, 1917. Dear Sir: Enclosed please find postal note \$2.50, for which please send by return one bottle "B'Well", also one of "Mother's Friend". Twenty-signs, enclosed for postage on both. "B'Well" is a most wonderful medicine for nerves, and in fact everything. I am entirely out of the medicine, yours truly,

R. R. No. 3, Hanover, Ont., June 9th, 1917. Dear Sir: Enclosed find \$5.00 for six bottles of "B'Well". (Please send it by return of mail.) Yours truly,

Prof. Mulveney Examining the Head of Tape Worm.

Medhurst, Jan. 9, 1917. Dear Sir: Enclosed find \$1.25 for a package of your "B'Well". It is the stuff to make you feel you, alright. Yours truly,

Fairground, Ont., March 6th, 1917. Dear Sir: Your medicine that you sent me has done our girl a lot of good. She has never had any fits since we gave her the medicine. It has been a great relief for her and for us. Every-body says she is looking so much better, and I am glad to have found some help for her. As it is doing her so much good we thought we would send for another package of the medicine. Yours truly,

Millville, N.B., April 20th, 1916. Dear Sir: This is to state that I cannot say enough about your wonderful remedy, as it relieved me of tapeworm in a few hours, without any after effects. I expect to be in Toronto sometime around the first of May, and will call at your office and see you. Yours very truly,

47 Batters St., Belleville. Dear Sir: I am sending for some more of your "B'Well" medicine. I have finished the bottle I have. Please send as soon as possible. Yours truly,

542 Liverpool St., Guelph, March 12th, 1917. Dear Sir: I am sending you \$2.00 for two packages of your "B'Well". I have finished the bottle I have. Please send as soon as possible. Yours truly,

Pickering, Oct. 2, 1916. Dear Sir: I am sending you \$2.00 for two packages of your "B'Well". I have finished the bottle I have. Please send as soon as possible. Yours truly,

RALPH BOWMAN.

Toronto, April 15, 1917. This is to certify that Ralph Bowman was cured of tapeworm by Professor Mulveney's Tapeworm Cure, and would be pleased to recommend it to anyone suffering from tapeworm. MRS. J. W. BOWMAN, 89 Ravina Crescent.

### Boon to Suffering Humanity

(Hamilton Herald, April 2, 1915.) It will appear every reader of The Herald to carefully peruse the announcement of Professor Mulveney, Toronto, which appears on another page. To state that Professor Mulveney and his really wonderful Tapeworm Remedy has permanently relieved thousands of sufferers from this terrible malady is but stating a known fact. Letters and testimonials from all parts of the civilized world bear testimony to what he has done and the cure he has effected, not only in Canada, but in Great Britain, India, the United States of America, etc. Patients have been successfully treated, and Professor Mulveney is in possession of grateful letters from many of these patients, who thank him in most heart-felt terms for the relief that he has been able to afford them. His famous remedy for the removal of tapeworms is potent and without doubt. Read the numerous testimonials in this announcement. In Toronto, call at his office, 167 Dundas street, and see for yourself the wonders he has accomplished. If you cannot conveniently go to Toronto, write him at once for full particulars of his famous remedy. The evidence is an irrefutable fact that is certain.

### B'Well? It Makes People Feel Well

B'Well is a medicine that assists nature, made from roots, herbs, berries, leaves, etc. The concentrated extracts of these herbs, taken up the stomach, regulate the liver, act on the kidneys, and it contains a harmless worm destroyer that is sure death to worms, and can be used with perfect safety.

B'Well is not a tapeworm exterminator and is not recommended for this trouble. B'Well is restoring thousands of people to health. I am not going to enumerate the different diseases and complaints that people have been relieved of from the use of B'Well, as it would take up too much space. I can simply say that restlessness and disease cannot remain if you take this medicine for a time, and it will surely make you feel fine.

It does not contain poison in any form, or narcotic that only relieves pain, but the different roots and herbs that regulate the system, it stimulates the stomach, liver and kidneys into healthy action, helps digestion and keeps the bowels regular, expels all gases from the system, and takes away the bad feeling around the heart and fearful feeling from the head, depressed spirits and melancholy simply vanish and a cheerful spirit takes their place. B'Well is a blessing to those that feel life is a burden, to them that are down-hearted and unhappy from disease. B'Well carries the poison out of the system through the natural channels of health, and as the poison is carried out of the system, nature restores herself, and a cheerful spirit follows, as there is nothing like good health to make a person cheerful and happy. People treated for Epileptic fits have been restored by its use. Don't ask me if it cures this, that and the other disease. It is different from most medicines advertised as cure-alls, and I am not advertising this remedy as such, but simply advertising it as a medicine that has and will regulate the system, carry the poison out of the blood, and common sense must surely tell you the result. Men and women who have been nervous wrecks, with hollow cheeks and sunken brow, have become plump, healthy and cheerful from its use, and I can only say what has done for others it will surely do for you. Young men and women whose faces are covered with pimples and a sickening scum have been healed, and what is children for then it is likely to do for you. Professor Mulveney's World Famous Tapeworm Remedy is saving thousands of valuable lives, and B'Well is doing just as much for those requiring this kind of medicine.

B'Well is sent in powder form for convenience to send to foreign places by mail, which does away with all breakages. The concentrated powder makes twice as much medicine for the same amount of money. Full directions are included in each package. Price \$2.50 per package. Write for further information, free and send self-addressed stamped envelope with your address written plainly for reply. These remedies are sold only by Prof. R. L. Mulveney, 167 Dundas Street, Toronto, Ont., and 73 Niagara Street, Buffalo, N. Y.

### REMINISCENCES OF THE PAST

The Changes in the Market People—Old Characters Gone.

The following clipping is taken from The London Evening Free Press of Thursday, April 20, 1911. "A picturesque feature of the market of a few years ago was the Indian medicine man, Mulveney. For years a Saturday night crowd came down town to the market to listen to Mulveney sing and play the banjo, to watch him and his assistants, who charged, and to buy his Indian remedies. He has not been in London except occasionally for a day or so in the last few years, but he is still in the same business, and was at the last Winter Fair in Guelph, as active and busy as ever. Mulveney always said that he had been a cowboy, and he certainly wore his cowboy costume as if he were born to it. He kept a little shop at the market, and since he has been in London he has since been torn down, and one of the attractions for the curious and the small boy was a pile of cures that must have numbered into the thousands, which Mulveney had drawn from the jaws of suffering humanity. His dental work was a little rough, but very certain as to results. A tooth which he fastened his pincers never ached again.

### These Remedies are NOT Sold By Druggists

Where You Cannot Prophecy - PREPARE!

NOT even the best-informed man in government or business circles dares to attempt a prophecy of conditions after the war. We hope for the best—meantime wise men are preparing now for anything!

Canadian War Savings Certificates are issued in denominations of \$25, \$50 and \$100, repayable in three years. At the purchase prices of \$21.50, \$43 and \$86 respectively, they yield over 5% interest. Buy them at any Bank or Money Order Post Office.

WORKERS WIN TROPHY BY BUYING WAR BONDS

Much Enthusiasm at Adelaide Branch of Russell Motor Munitions Works Saturday.
Enthusiasm ran high at the Adelaide branch of the Russell Motor munitions works on Saturday afternoon when the workers were presented with a shield and group of beautiful silk flags of the overseas dominions as a trophy of their success in a 15 days' campaign in the buying of war loan certificates.

CHICAGO LIVE STOCK.
Chicago, June 24.—Cattle—Receipts, 4000; market weak. Beeves, \$8.50 to \$12.80; stockers and feeders, \$6.50 to \$11.00; cows and heifers, \$5.75 to \$11.70; calves, \$11.50 to \$15.75.

Where You Cannot Prophecy - PREPARE!

NOT even the best-informed man in government or business circles dares to attempt a prophecy of conditions after the war. We hope for the best—meantime wise men are preparing now for anything!

By regulating their expenditures according to their actual needs rather than by their prosperity—by husbanding the surplus—and by investing to the limit in Canadian War Loans that help so much to maintain present prosperity.

Money saved and loaned to Canada by Canadians is a two-fold safeguard for the future. The lenders will benefit directly from the excellent interest return and absolute security—and indirectly because the interest thus kept in Canada will help to keep business good after the war.
