

Chignecto Post.

Sackville, N. B., January 9, 1879.

Exportation of Beef from Westmorland to England.

At the Farmers' League Meeting on Thursday, the capabilities of this County to raise beef of a quality adapted to the English markets were discussed, and though no formal resolution was passed, the fullest confidence was expressed in the resources of this district of country to produce beef of a character to suit the palates of the beef-eaters of old England.

At the head of the Bay of Fundy there are not less than two hundred and fifty square miles of marshes, reclaimed from the sea by dykes, built up through the ages by deposits from the tides. For purposes of grazing and of producing clover and various kinds of upland and salt grasses this soil has no superior on this continent. Its fertility is not only surpassingly great, but is also practically inexhaustible.

The "Sun" vs. the "News."

The Sun makes some grave charges against the News. It says the News was potted and patronized by the first Government more than any other St. John paper; that when that party went out it deserted its colors and went over to the enemy; that during the late election, it misrepresented, ridiculed and assailed the Liberal-Conservative party and Mr. Tilley in every issue, and that it is now actually in the receipt of Government patronage, and has been for weeks past. The Sun concludes by inquiring whether any distinction is to be made between those who stand squarely by their colors and their Party and those who, Judas-like, kiss only to betray.

The relation between the density of population and the duration of life was discussed by Dr. Parr, at a meeting of the Chignecto Agricultural Society, recently. He had on the principle, the greater the density, the shorter the duration of life; the poorer people live to each other, the shorter their lives. He showed that the two factors are exact mathematical ratios. When we stand 40 feet from each other we live on an average 50 years; when we are 80 feet, we live 30 years; when we are 160 feet, we live 20 years; when we are 320 feet, we live 15 years; when we are 640 feet, we live 10 years; when we are 1280 feet, we live 5 years. No less than 80 out of every 1000 animals die in 12 years. The duration of life is reduced to 25 years from that of density, where life is not possible, there is a surplus of population, following a mathematical law, theory we can conceive of according to the number of lives per acre, the number of years of life.

The Central Railway scheme to construct a line from St. John's, N.B., to the C. P. R., and to the branch from Grand Lake to Westford, Kent, is again being agitated. It is now proposed to abandon the Well's branch, and to cross the Kennebec at Westford, crossing and ending at St. John, in order to avoid the transfer of freight at New Brunswick, which must result from connecting a branch with a broad gauge. The scheme for building this railway, as stated by the St. John Globe, is to restore to St. John the trade which is going by the construction of various lines of traffic, which have resulted in cutting off and diverting our trade to Maine, Quebec, etc.

De ALLISON and the HALIFAX High School. The Report of Saturday contains the following summary, necessary reference to the opening of the new High School, in its budget of the week's news.

The new High School was opened with some 200 scholars, and many of the speakers were of the highest quality. The demand for beef there is practically unlimited as to render the province independent of any supplies that Canada is capable of sending. The Toronto Mail, in its issue of the 10th inst., says that the prospect of next season are excellent. For fat beefers and steers, contracts are being entered into for the next three months at five cents per pound live weight, and shaggy farmers will have no difficulty in disposing of animals of this class. Good beef is estimated to be worth 50 per cent more for exportation than can be obtained for home consumption.

A great advantage possessed by this country in the trade in its main line position. Cattle from Texas and the prairies of the South are driven to Omaha, Cheyenne and other stations on the Union Pacific, where they are carboxed, and then shipped. A long railway journey wears and tires them and the most becoming and abundant. Some of the cattle dealers at Omaha, Denver and Cheyenne own herds consisting of many as 15,000 head and they now make sales either to the Chicago market or for direct shipment to England about two-thirds of the beef shipped from Ontario is obtained in Chignecto, where extensive stock sales enable the English dealer to obtain a cargo and save him the trouble of going into farming districts and picking up isolated carloads.

The Permissive Act.

Enthusiastic Meeting at Sackville.

On Tuesday afternoon a large and very respectable gathering from all parts of the County took place at the Methodist Chapel. All the parishes were well represented, Moncton sending about 25 delegates. Probably 200 were present.

After J. J. Anderson, Esq., was appointed Chairman, and H. Trueman, Esq., Secretary, the minutes of the meeting held on 17th December, were read. The first resolution, proposed by Dr. Moore and seconded by S. Sharpe, Esq., was as follows: Whereas at the late session of the Dominion Parliament an Act was passed entitled the "Canada Temperance Act," therefore:

Resolved, That it is the opinion of this meeting that all proper steps should be taken to put into force the said Act in this County. The second resolution, proposed by W. J. Robinson, Esq., and seconded by H. J. McGowan, Esq., was as follows: Whereas in order to carry out the object of the foregoing resolution, it will be necessary to appoint committees, therefore:

Resolved, That a committee of five be appointed for each parish with power to add to their number, and a central committee composed of two members of each parish committee. The following parish committees were then appointed:

Barrington: Alfred Rayworth, P. Riley, Wm. Auld, J. Wm. Dunlop, Wm. Watson, Esq., Wm. Ellmore, Samuel Sharpe, Hon. A. McLean, S. Tremblay, Wm. Case. Sackville: Geo. Campbell, Dr. Moore, H. Timbrey, Harvey Phinney, Prof. Barwash. Westford: C. E. Knapp, Hon. P. A. Landry, R. A. Chapman, J. A. McFarlane, J. C. Bishop. Moncton: D. R. Lindsay, J. A. Harris, W. W. Keith, D. A. Bourgeois, Hugh Hamilton. Sackville: Robt. Wright, Jos. Little, John Goodwin, Alex. Knight, Abram Allen. Sackville: Wm. Crow, F. Bourgeois, J. I. Evans, Wm. Campbell, R. G. Harshman. Sackville: Wm. Crow, F. Bourgeois, J. I. Evans, Wm. Campbell, R. G. Harshman.

The case of Robert Thompson vs. Patrick Trueman, Mr. Gilbert said he appeared for the plaintiff. His Honor ordered the cause to be struck from the docket. The next case was John Doe vs. the demise of Edward L. Jones, vs. Jacob Trueman, Mr. Gilbert said he appeared for the plaintiff. His Honor ordered the cause to be struck from the docket.

The trial of Kate Cobb is still proceeding in New Brunswick, Conn. The commission of Eschew is on, first page. Since then Kate Cobb had admitted to a rigid cross-examination. The series of balls attended with Bishop, the arsenic eating habit of Cobb, the relation of the families, the cross-examination, the local attorney, the chemical analysis and the final inquiry were all gone over, without the witness being once discovered in her testimony, although in many points it may be considered fairly. The cross-examination lasted nine hours, and by old members of the bar it is considered one of the most remarkable tests any witness was ever subjected to, and the fact that her direct testimony is not materially shaken has produced a strong feeling in her favor.

The Permissive Act will be carried in this country by an overwhelming majority. The trouble is not in carrying it, but in enforcing it after it has been carried. That is the grand objective point, to obtain which, the Legislature will have to be urged to pass a law which will be enforced. The trouble is not in carrying it, but in enforcing it after it has been carried. That is the grand objective point, to obtain which, the Legislature will have to be urged to pass a law which will be enforced.

Westmorland Circuit Court.

The Osborne case to be Discharged on their own Recognizances.

DORCHESTER, Jan. 15.—Supreme Court opened here yesterday at 9 o'clock p. m., His Honor Justice O'Cluck presiding. The grand jury was discharged as soon as impaneled, as there were no new criminal cases.

Dr. Clark called His Honor's attention to the Osborne case, and said that having conferred with His Honor the Chief Justice, and with his colleagues, he would ask that the Osbornes be released on bail, the recognizance to be that they appear not at any particular time but whenever called on by the Crown to do so; that John and Eliza Osborne be released on their own recognizance, and that Harry and Martha Osborne be released on the recognizance of John Osborne, and also that Annie Parker be discharged from custody. His Honor ordered the Osbornes and Annie Parker to be brought into Court.

The Osborne family were then brought in, Eliza having been remanded in discharge of her bail. After conferring with the prisoners, Mr. Dickson, their Counsel, stated that owing to the poverty of the prisoners, induced by the trials through which they have passed, they had not sufficient means to pay the fees incidental to obtaining their discharge on bail, and that under any circumstances they would prefer either a new trial or to remain in prison rather than be liberated on the conditions proposed, with suspicion pointing to them and liable to be thrown into prison again at the first firing rumor.

His Honor said in that case he should order the prisoners to be remanded to jail. It is difficult to conjecture what turn matters will take from now on. Some predict a new trial in March, but there is no authority for such supposition. The trial of O'Brien, for indecent assault, is set down for tomorrow. The following is the docket:

1. Smith vs. Calhoun—P. A. Landry, 2. Smith vs. Ayr—D. L. Hanington, 3. Thompson vs. Gray et al.—R. B. Smith, 4. Doe et al. vs. Harris et al.—R. B. Smith, 5. Doe et al. vs. Harris et al.—R. B. Smith, 6. Doe et al. vs. Harris et al.—R. B. Smith, 7. Doe et al. vs. Harris et al.—R. B. Smith, 8. Doe et al. vs. Harris et al.—R. B. Smith, 9. Doe et al. vs. Harris et al.—R. B. Smith, 10. Chignecto Post.

Sackville, N. B., January 9, 1879. Exportation of Beef from Westmorland to England.

At the Farmers' League Meeting on Thursday, the capabilities of this County to raise beef of a quality adapted to the English markets were discussed, and though no formal resolutions were passed, the fullest confidence was expressed in the resources of this district of country to produce beef of a character to suit the palates of the beef-eaters of old England.

At the head of the Bay of Fundy there are not less than two hundred and fifty square miles of marshes, reclaimed from the sea by dykes, built up through the ages by deposits from the tides. For purposes of grazing and of producing clover and various kinds of upland and salt grasses this soil has no superior on this continent. Its fertility is not only surpassingly great, but is also practically exhaustless.

The hay crops gathered on this marsh district is enormous. By the census of 1874, (including upland hay) they were as follows:

Table with 2 columns: Location and Tons. Locations include Sackville, Dorchester, Westmorland, Hillsboro, Hopewell, Amherst, Amherst Head, River Hebert.

The above would show that the yield of marsh hay at the present time, which is largely beyond the requirements of the country, because from seven to ten thousand tons are pressed and sent away annually.

The production of this sea alluvium is being yearly improved by ditching, draining and flowing, so that 80,000 tons is but a percentage of its possible yield, under better conditions of farming.

Thus, only 15 per cent. of the present production will be sufficient for two cargoes each 250 head. The successful exportation of beef will not only make our farmers richer by the higher prices paid for the part exported, but in reducing the home supply will tend to render the prices better all round.

A great advantage possessed by this locality for the trade is its maritime position. Cattle from Texas and the prairies of the South are driven to Ontario, Chignecto and other stations on the Union Pacific, where they are carrailed, and then shipped. A long railway journey worries and frets them and the meat becomes hard and fibrous.

own herd containing as many as 15,000 head and they now make sales either to the Chicago market or for direct shipment to England. About two-thirds of the beef shipped from Ontario is obtained in Chignecto, where extensive stock sales enable the English dealer to obtain a cargo of well selected beef.

The deterioration of beef by a long railway journey, combined with the expense, places the Western stock raiser at an enormous disadvantage with respect to Eastern rival. The latter has only the ocean voyage, during which cattle generally improve in condition.

The "Sun" vs. the "News." The Sun makes some grave charges against the News. It says the News was petted and patronized by the first Government more than any other St. John paper; that when that party went out it deserted its colors and went over to the enemy; that during the late election, it misrepresented, ridiculed and assailed the Liberal Conservative party and Mr. Tilley in every issue, and that it is now actually in the receipt of Government patronage, and has been for weeks past.

The relation between the density of population and the duration of life was discussed by Dr. Parr, at a Science Congress at Cheltenham, England, recently. He laid down as a principle, the greater the density, the shorter the life; the nearer people live to each other, the shorter their lives. He showed that the two follow an exact arithmetical ratio.

The Central Railway scheme to construct a line from St. Mary's, York, through Sackville and Queen's to the I. C. R., at Norton, and a branch from Grand Lake to Weldford, Kent, is again being agitated. It is now proposed to abandon the Weldford branch and cross the Kennebecas at Berry's Crossing and run direct to St. John, in order to avoid the narrow with a broad gauge. The main line for building this railway, as stated by the St. John Globe, is to restore to St. John the trade she is losing by the construction of various lines of traffic, which has resulted in cutting off and diverting her trade to Maine, Quebec, etc.

DR. ALLISON AND THE HALIFAX HIGH SCHOOL.—The Reporter of Saturday contains the following supplementary reference to the opening of the new High School, in its budget of the week's news: The new High School was opened with great success on Monday last.

The Halifax Chronicle says that Mr. John Livingstone has had much experience in running newspapers into the ground. The Chronicle is wrong. Mr. Livingstone is by all odds the ablest and most successful newspaper man in the Maritime Provinces. The position of the Telegraph as the leading daily, is a monument of his industry and ability.

A RAILWAY INVESTIGATION.—The Carleton (St. John) people look \$40,000 stock in the Carleton Branch Railway Company eight years ago and have never received any dividend. Now they have had a meeting and appointed a committee to ascertain the reason why.

The Permalive Act.

Enthusiastic Meeting at Sackville.

On Tuesday afternoon a large and very respectable gathering from all parts of the County took place at the Methodist Chapel.

All the parties were well represented, Moncton sending about 25 delegates. Probably 200 were present. After J. J. Anderson, Esq., was appointed Chairman, and H. Trueman, Esq., Secretary, the minutes of the meeting held on 17th December, were read.

The first resolution, proposed by Dr. Moore and seconded by S. Sharpe, Esq., was as follows: Whereas in the late session of the Dominion Parliament an Act was passed entitled "The Canada Temperance Act, 1878."

The second resolution, proposed by W. J. Robinson, Esq., and seconded by H. J. McGowan, Esq., was: Whereas in order to carry out the object of the foregoing resolution, it will be necessary to appoint committees, therefore Resolved, That a committee of five be appointed for each parish with power to add to their number, and a central committee composed of two members of each parish committee.

The following parish committees were then appointed: Botsford—Alfred Rayworth, P. Riley, Wm. Averil, Jas. McW. Duncan.

Westmorland—Jas. Filmore, Samuel Sharpe, Hon. A. McQueen, S. Tremblay, Wm. Carey. Sackville—Geo. Campbell, Dr. Moore, H. Humphrey, Harry Phinney, Prof. Burwash.

Dorchester—E. K. Knapp, Hon. P. A. Landry, R. A. Chapman, J. A. McFarlane, J. C. Bishop. Moncton—D. B. Lindsay, J. A. Harris, W. W. Keith, D. A. Bourgeois, Hugh Hamilton.

Salisbury—Robt. Kay, Jos. Little, John Gowland, Alex. Wright, Abraham Allen. Sackville—Wm. Crow, F. Bourgeois, J. E. Evans, Dr. Chapman, E. G. Harshman. Some discussion took place as to whether the meeting of the parish committees should nominate the central committee, and Mr. Pickard moved that the parish committees appoint the central one.

The following were appointed members of the central committee: Hon. P. A. Landry, R. A. Chapman, James Filmore, Hon. A. McQueen, Dr. Moore, Rev. Prof. Burwash, Sackville. J. L. Evans, F. Bourgeois, Sackville. Robt. Kay, John Gowland, Salisbury. Wm. Dunn, Alfred Rayworth, Botsford.

Westmorland Circuit Court.

The Osborne case, and the discharge of the Osborne family, were the principal features of the Westmorland Circuit Court.

On Tuesday afternoon a large and very respectable gathering from all parts of the County took place at the Methodist Chapel. All the parties were well represented, Moncton sending about 25 delegates. Probably 200 were present.

The first resolution, proposed by Dr. Moore and seconded by S. Sharpe, Esq., was as follows: Whereas in the late session of the Dominion Parliament an Act was passed entitled "The Canada Temperance Act, 1878."

The second resolution, proposed by W. J. Robinson, Esq., and seconded by H. J. McGowan, Esq., was: Whereas in order to carry out the object of the foregoing resolution, it will be necessary to appoint committees, therefore Resolved, That a committee of five be appointed for each parish with power to add to their number, and a central committee composed of two members of each parish committee.

The following parish committees were then appointed: Botsford—Alfred Rayworth, P. Riley, Wm. Averil, Jas. McW. Duncan.

Westmorland—Jas. Filmore, Samuel Sharpe, Hon. A. McQueen, S. Tremblay, Wm. Carey. Sackville—Geo. Campbell, Dr. Moore, H. Humphrey, Harry Phinney, Prof. Burwash.

Dorchester—E. K. Knapp, Hon. P. A. Landry, R. A. Chapman, J. A. McFarlane, J. C. Bishop. Moncton—D. B. Lindsay, J. A. Harris, W. W. Keith, D. A. Bourgeois, Hugh Hamilton.

Salisbury—Robt. Kay, Jos. Little, John Gowland, Alex. Wright, Abraham Allen. Sackville—Wm. Crow, F. Bourgeois, J. E. Evans, Dr. Chapman, E. G. Harshman.

Some discussion took place as to whether the meeting of the parish committees should nominate the central committee, and Mr. Pickard moved that the parish committees appoint the central one.

The Afghan War.

London, Jan. 11.—A correspondent of the Quetta columns telegraphs from Tifodra, yesterday, that 140 British cavalry yesterday defeated a body of Afghans, killing twenty-four and capturing nine.

Twelve hundred Afghan cavalry were subsequently forced to abandon the heights by a cannonade, in which seven of the British were wounded. It is thought that this skirmish will cause the Afghans to decide not to defend Candahar.

St. Petersburg, Jan. 11.—The Journal "St. Petersburg" to-day says the Amer of Afghanistan entered Russian territory, not in consequence of the success of the British, but in order to invoke the mediation of Russia. The Amer will receive sympathetic hospitality, but the idea of mediation is an illusion, upon the clearing up of which will probably depend a continuation of his journey.

London, Jan. 11.—The Victoria of India telegraphs to-day that the Genl Stewart, on the 8th inst., received news that the Governor of Candahar, with most of the Cahul officials, fled, toward Herat and the garrison disbanded. The deputy Governor sent, offering submission, and the British troops will march through Candahar to-day.

London, Jan. 12.—"The Times" leading editorial says: "We have every reason to believe that Yakob Khan's attitude is not only friendly, but that he is prepared to make peace. Doubtless they are such as he can honorably accept. The Times' Lahore dispatch states there are strong reasons to believe that Yakob Khan's attitude is not only friendly, but that he is prepared to make peace."

Petticoat News.

The Sunday School here held a grand festival and entertainment on New Year's night. It was a success. The Petticoat Lumber Co will only get about a million feet of lumber this year. Their main enterprise being pool wood which they manufacture into ordinary finished spools. L. O. Merriam is agent for this Company, and H. B. Killam, the land surveyor.

The mill here is owned by B. DeVeber & Co., St. John, who also have a grist mill of six miles from Petticoat, at Wheaton Settlement, known as Victoria Mills. The grist mill is managed by Mr. Israel McFee, and satisfaction is of great value to the neighborhood. It is a water mill and is patronized by people at forty miles distant.

A tramp entered Daniel Turner's house during his (Turner's) absence and ordered his regular meal served in a private order. This was about to be done when Mr. Turner appeared and desired Mr. Tramp to seek such accommodation elsewhere. The tramp made his exit after three knock downs leaving Mr. Turner equal to heat custom made, and at half the price.

Mullin Bros., merchants, of Butterford Ridge, have closed their shop, it is said on account of their creditors coming too hard on them in such a depressed condition.

Next door to Weldon House, Dorchester, Jan. 16th, 1879.

THE WITNESS.

33rd YEAR.

ONE of the most important features of the WITNESS during the year 1878, will be its course of free lectures on agriculture, by W. F. Clarke, of Lindenbank, Quebec, late editor of the Canadian Farmer. These lectures already delivered by Mr. Clarke have been met with the greatest approval everywhere. The lectures will be reported in the WITNESS, the price as an agricultural paper has, within the past few months, been greatly enhanced.

The WITNESS is devoted to temperance, being the principal organ of that cause in Canada, and to all other sanitary and moral reform, as well as the furtherance of Evangelical religion. Another special feature of the WITNESS during 1878, will be the attention paid to its engravings, which already are numerous and important. Portraits of the prominent men throughout the paper, will be given, and the paper will contain numerous illustrated articles of much interest and value, as well as selections from the humorous art of the day.

The fullest attention will be paid to news, so that the WITNESS may retain its present reputation as a newspaper. The household and general literary departments of the WITNESS have always been a prominent feature of the paper, and they will be continued on the same plan as heretofore, giving the ladies much valuable information about everything necessary to make the household bright, pleasant, and prosperous.

The price of the different editions of the WITNESS is as follows: DAILY WITNESS, \$5.00, per 14,000 WEEKLY WITNESS, \$1.10, per 28,000. In addition to these, the publishers of the WITNESS issue the NORTHERN MESSENGER, a semi-monthly illustrated family journal, which is published with great force all over North America, as its circulation of over 50,000, testifies. In homes remote from postal accommodations, it supplies the whole family reading, which in cities, towns, and villages everywhere, it is the favorite of the young people, who find it and endless sources of amusement and enjoyment. Its price is 30 cents a year, including postage. To Sunday-schools and clubs it is sent at the following rates: 10 copies to one address, \$2.50 per year; 25 copies to one address, \$6.00 " 50 copies to one address, \$11.00 " 100 copies to one address, \$22.00 "

All persons desiring to interest themselves in obtaining subscriptions to the WITNESS, will receive sample copies and terms on application. Every letter is answered. JOHN DOUGALL & SON, PUBLISHERS, Montreal, Q.

Flour, Raisins, &c.

Scribner's Monthly.

Conducted by J. G. Holland. The Handsome, Illustrated Magazine in the World.

THE American edition of the periodical is more than 70,000 monthly. And has a larger circulation in England than any other American magazine.

ANNOUNCEMENTS FOR 1879-80.

"Haworth," by Mrs. Francis Hodgson Burnett, author of "That Lass o' Leith's."

"A Story of New Orleans," by George W. Cable.

"Portraits of American Poets." These portraits are drawn from life by Wyatt Eaton and engraved by T. Cole.

"Studies in the Sierras," a series of papers (mostly illustrated) by John Muir, the California naturalist.

"A New View of Brazil," by Herbert H. Smith, of Cornell University, a companion of the late Prof. Hart, is now in press with Mr. J. Wells Chapman.

"The Leading European Universities." We are now having prepared, for Scribner's articles on the leading Universities of Europe.

"How Shall we Spell?" (two papers by Prof. Lounsbury) and "The Most Beautiful 'Lawn-planting for Small Places' (by SACRED PASSIONS, of Flushing), 'Canada of Today,' 'American Art and Artists,' 'American Archaeology,' 'Modern Inventors' also, Papers of Travel, History, Physical Science, Studies in Literature, Political and Social Science, Stories, Poems, 'Tales of the Time,' by Dr. J. G. Holland; records of New Inventions and Mechanical Improvements; Papers on Education, Decoration, &c.; Book Reviews; fresh bits of Wit and Humor, &c., &c.

Terms, \$4.00 a year in advance; 35 cents a number. Subscriptions received by the publishers of this paper, and by all booksellers and postmasters.

SCRIBNER & CO., 743 & 745 Broadway, New York.

New York Weekly Herald.

ONE DOLLAR A YEAR. THE circulation of this popular newspaper has more than tripled during the past year.

It contains all the leading news contained in the Herald, and is arranged in handy departments. The Foreign News embraces special dispatches from all quarters of the globe.

It contains all the news of the week from all parts of the Union. This feature alone makes the Herald the most valuable and complete chronicle in the world, as it is the cheapest.

Every week it gives a faithful report of political news, embracing complete and comprehensive despatches from Washington, including full reports of the speeches of eminent politicians on the questions of the hour.

The Home Department of the WEEKLY HERALD gives the interest as well as the most practical suggestions and discoveries relating to the duties of the farmer; hints for raising Cattle, Poultry, Grains, Trees, Vegetables, &c., with suggestions for keeping birds, hives and fanning gins in repair.

This is supplemented by a well edited department, widely copied and read, containing the Home giving receipts for practical dishes, hints for making clothing and for keeping up the latest fashions at the lowest price.

Every item of cooking or economy suggested in this department is practically tested by experts before publication. Letters from Paris, London and other foreign correspondents on the very latest fashions. The Home Department of the WEEKLY HERALD will send you a house wife more than one hundred times the price of the paper.

The interest of every Laborer is looked after, and everything relating to mechanics and labor saving is carefully recorded.

There is a page devoted to all the latest phrases of the Business Markets, Crops, Merchandise, &c., &c. A valuable feature is found in the special reports on the condition of the Produce Market.

Sporting News at home and abroad, together with a story every week. Sermons by some eminent divines, Literary, Musical, Dramatic, Personal, and Sea Notice, here is no paper in the world which contains so much news matter every week as the WEEKLY HERALD, which is sent, postage free, for one dollar. You can subscribe at any time.

NOTICE TO SUBSCRIBERS.—Remit in drafts on New York or in office money orders, and where neither of these can be procured send the money in a registered letter.

Richard Is Himself Again.

(Continued from first page)

the expedition, after wearing on the Holy Evangelists that they would return for their companions

quite, took to the boats after a painful break-taking. The mizen-mast of the "Renoume"—the vessel in which he had broken up piece-meal—had come ashore and been used up in mending the long boat. The ice was troublesome and the cold unparallelled, so that they could scarcely make any headway; indeed, on the 2nd of December they had only made nine leagues. That afternoon the long boat lost sight of the jolly-boat, and soon after was driven on shore. Landing, the party, which included De Frenescu and Father Crespel, built a fort on the cliffs to attract the attention of those in the missing boat, but without avail. On the 7th December they set out again, but after battling vainly with the ice for three hours were compelled to seek the shore, realizing to their horror that their progress was impossible. They placed their provisions in a hut built of pine branches, and so situated that no one could enter it without being seen by his companions, who camped in rude huts round about. Each man was served with four pounds of pemmican, and in addition two pounds of flour and such food and seal meat as they could obtain was made into a general mess, Father Crespel dividing it into equal parts. A spoonful of dried peas varied this scant bill of fare once a week. For water, they had eight feet deep on the level. Ophthalmia caused by the smoke of the huts, the glaring of the snow and the intense cold, soon set in among the party and was followed by dysentery and scurvy. On December 24th, Father Crespel, after having thrown a few drops of wine which he had religiously preserved, an celebrated midnight mass in one of the huts. "It was an affecting sight," he writes, "to see these poor creatures appealing to the Divine Son. They chanted psalms, and sang, and my congregation was filthy and ragged, but more heart-felt prayers were never uttered to the throne of grace." On New Year's Day, 1877, they were appalled on finding that their boat had been carried out to sea during a blizzard, and that the camp gave itself up to lamentation. They began to despair, and to succumb, but Father Crespel exhorted them not to enter the presence of their maker self-murderers, and held forth on the agony in the garden and the suffering of his Son. On the Epiphany he celebrated mass. De Spirito Sano, imploring heaven to give them strength to die as good Christian men. That afternoon two of the party while in search of foxes, came upon a deserted wigwag and a canoe containing the fat of a seal. This cheered the spirits of the men, and they were not far off. On January 23rd, their carpenter died, and the logs of many of the survivors began to swell. On the 16th of February De Frenescu gave up his intrepid soul, and then followed the other men, one by one. The master-gunner, a Calvinist, "who before his death abjured the heresy." Each as his last hour approached confessed to Father Crespel and then bade their survivors await their fate with resignation. As they were about to be buried, the fully filled the dead body and with feeble steps carried it to the door of the hut and buried it in the snow, for they had not strength left to carry it further and give it Christian burial. On the 6th of March, while they were all in one hut—they huddled together in a space of about six feet long, and arose and buried them, and for three days they remained in the tomb, five more dying. They were too weak to dig through the snow, and so they could not reach their storehouse nor bring in fire wood. On the fourth day lying on their backs, they made a passage out, and reached the provisions, but on their return their feet were frozen and soon mortified, dropping off at the ankles. The next day, being still without a fire, Lieutenant Vallant died of the cold. The next day, the cold was so intense that a passage out, and reached the provisions, but on their return their feet were frozen and soon mortified, dropping off at the ankles. The next day, being still without a fire, Lieutenant Vallant died of the cold. The next day, the cold was so intense that a passage out, and reached the provisions, but on their return their feet were frozen and soon mortified, dropping off at the ankles. The next day, being still without a fire, Lieutenant Vallant died of the cold.

Richard Is Himself Again.

(Continued from first page)

mon. First was brought in also. On the 1st of May the Indians conveyed them to Mingan, and M. Volant, the chief of that post, at once fitted out an expedition for the Pavilion, Father Crespel accompanying it. On reaching the mouth of the river they fired a volley and immediately four emaciated objects emerged from the woods and knelt on the strand, extending their hands towards the boat. These were all that remained of the party of twenty-four, and a glass of brandy, and Tourillet, from joy. The sufferings of this party had also been terrible. They had eaten their shoes and even devoured their fur breeches. A stone cross, which stands to this day, was erected in a common grave into which the remains of the dead were thrust. A few miles from the Pavilion the bodies of the men who accompanied the De Frenescu party in the jolly-boat were found decomposed on the strand. He placed the fifty-four men of the "Renoume," only five survived the shipwreck and the sufferings of that winter.

In 1828 the passengers and crew of the "Granicus," from Quebec for the Cape of Good Hope, and even a more deplorable fate, was recorded. They were wrecked, forty souls in all, near the last point. Some were drowned, it is believed, while the rest sat out for Fox Cove, where there had been a provision depot. It had been a long time, however, and the castaways found only an empty hut and an iron pot. Of their sufferings there is no record, for none lived to tell the tale, but the Government schooner on its visit in the Spring gathered the main facts. The beams of the hut were shambled like a butcher's stall with human carcasses hanging from the rafters, and bones hung over an extinct fire, while round about lay the skeletons of two guests of this infernal feast. Two skeletons were found in the woods, where it is supposed the living men had sought to avoid the access to the hut. These are but two of the hundreds of wrecks this desolate shore has witnessed during the night, and hastens along the beach to give the mutilated bodies a grave.

In 1680 Antiochi was granted in fee to Louis Joliet, the discoverer of the St. Lawrence, and the first of the Pointe des Anglais, where he ruled the island. His garrison consisted of six vasalls all armed with muskets, and it is needless to say that, like Caius, Julius Cesar and Miles Standish, he knew the name of the bow in the hands of the Indians. He had taken prisoner by the English under Admiral Phips in 1690, but released on the failure of that expedition—which paid the tribute of one ship to the rocks of Antiochi—to take Quebec. He died there, or as some say at Mingan, in 1700, and the historian Charlevoix quaintly says his death was not due to old age, but that his heart was broken by the stubbornness of the globe and the misery of his surroundings on Antiochi.

The Most Valuable Gift—Restoration of the Health.

During the past ten years the Great Shonohone Remedy has faithfully rendered its services as a guarantee made to the public. Alarming and apparently hopeless cases of Lung Disease, Dyspepsia, Liver Complaints, Affections of the Kidney and Chronic Complications of every description, including Scrofula and Skin Diseases of long duration, have been cured and eradicated.

Those who volunteered their testimony to the efficacy of the Remedy are not bogus people unaccustomed to foreign states, but respectable citizens of the Dominion, easy of access and open to question, upon whose verbal report the reputation of the Great Shonohone Remedy. If you are afflicted do not delay in trying this medicine, for which the confidence after the lapse of sufficient time to test their efficacy.

Two other more orders, one residing at Huntington, and the other at Glen Cove, L. I., also purchase it by the dozen and for the same purpose; these men, as well as many others similarly engaged, know too well the value and importance of this medicine ever to be induced to purchase the name and see that the signature of Hurd & Co. is on each package. Northrop & Lyman, Toronto, Ont., proprietors for Canada. Sold by all medicine dealers.

From the Boston "Evening Traveller." It is, perhaps, but a simple act of justice to the proprietors of WISTAR'S BALM OF WILD CHERRY for us to say that our personal experience in the use of this article has impressed us favorably. One of the proprietors of the Traveller was entirely cured of his cough and cold by the use of this Balm, and several of our friends and acquaintances, who have tried the article, have found it equally efficacious in relieving their coughs and shortness of breathing, with which they have been afflicted. 50 cents per bottle.

HEALTH IN STRESS.—To prevent or conquer disease is one of the greatest attainments ever aimed at by man; and Bryan's Patent "Wafers" will assure you of this, by allaying the most distressing coughs, colds, tickling in the throat and pulmonary complaints, as well as the most distressing cases of whooping cough, not attended to sooner or later lead to incurable consumption, and the strength of the system soon falls if neglected. The greatest and best means known for the cure of these complaints is "Bryan's Patent Wafers," which have been found to be the most efficacious remedy for the last twenty years, and have never been known to fail. Singers and public speakers will also benefit from the use of this medicine. Sold by all medicine dealers at 25c. per box.
