HEALTH where 'tis SOUGHT!

Holloway's Pills.

CURE OF A DISORDERED LIVER AND
STOMACH, WHEN IN A MOST
HUMILIATED STATE.
Extract of a Letter from Mr. Matthew Harvey, of
Chapel Hill, Airdrie, Scotland, dated the
15th of January, 1849.

Sir—Your valuable Pills have been the means
with God's blessing of restoring me to a state of
perfect health, and at a time when I thought I was
on the brink of the grave. I had consulted several
famous doctors, who after doing what they could
for me, stated that they considered my case as hope-
less. I was a last resource, got a Box of your Pills,
which soon gave relief, and by persevering in their
use for some weeks, together with rubbing night
and morning your Ointment over my chest and
stomach, and "right side," I have by their means
atone got completely cured, and to the astonish-
ment of myself and every body who knows me.
[Signed] MATTHEW HARVEY.

CURE OF A CASE OF WEAKNESS AND
DEBILITY, OF FOUR YEARS' STANDING.
Extract of a Letter from Mr. Smith, of No 5, Little
Thomas Street, Gibson Street, Lambeth,
dated Dec. 12th, 1849.

To Professor Holloway.
Sir—I beg to inform you that for nearly five
years I have known what it is to have a day's
health suffering from extreme weakness and debility,
with constant nervous headaches, giddiness,
and sickness of the stomach together with a great
depression of spirits. I used to think that nothing
could benefit me as I had been to many medical
men, some of whom after doing all that was in their
power to do for me, they considered that I had
some special complaint beyond the reach of cure,
together with a very disordered state of the stom-
ach and liver, making my case so complicated that
nothing could be done for me. One day being un-
usually ill and in a dejected state, I saw your Pills
advertised, and resolved to give them a trial, more
perhaps from curiosity than with a hope of being
cured, however I soon found myself better by tak-
ing them, and so I went on persevering in their
use for six months, when I am happy to say they
effected a perfect cure.
[Signed] WILLIAM SMITH.

CURE OF ASTHMA, OF TWENTY YEARS
STANDING.
Extract of a Letter from Mr. J. K. Heydon, 78 King
Street, Sydney, dated 10th of November 1849.

To Professor Holloway.
Sir—I have the pleasure to inform you that
many extraordinary cures of Asthma have been
effected here by means of your Pills. One of the
most striking cases was that of the "Kozorback," who
after having for twenty years been unable to
make the slightest exertion, suffering very
greatly from shortness of breath, coughing, and
spitting, and is now, to use her own
expression, able to run up to the top of that
mountain. Another case is that of Mr. Cap. Tal-
lor, His Majesty's Buildings, Clarence Street,
who was so dreadfully bad that he was confined
entirely to his bed-room for six months, and
to his commencing with your Pills, and attended
regularly by his medical man, who pronounced
him to be in a dying state, yet he, likewise, by my
knowledge, has been restored to perfect health by
the use of your Pills, and rubbing your Ointment
night and morning into his chest.
[Signed] J. K. HEYDON.

ASTONISHING CURE OF THE EARL
OF ALDBOROUGH.
By this Miraculous Medicine after every other
means had failed!!!

A Copy of a Letter from the Earl of Aldborough
dated Villa Messina, Leghorn, 21st Feb. 1845.

To Professor Holloway.
Sir—Various circumstances prevented the pos-
sibility of my thanking you for the time before the time for
your politeness in sending me your PILLS as you
did. I now take this opportunity of sending you
an order for the amount, and at the same time, to
add that your PILLS have effected a cure of a
disorder in my Liver, which all the
most eminent of the Faculty at home, and
and all over the Continent had not been able to
effect; nay! not even the waters of Carlsbad and
Marienbad. I wish to have another Box and a
Pot of Ointment in case any of my family should
ever require either.
I remain, with much respect,
Your most obliged and obedient servant,

POETRY.

O WOULD I WERE I BOY AGAIN.

BY M. LEMON.

O would I were a boy again,
When life seem'd form'd of sunny years;
And all the heart then knew of pain,
'Was wept away in transient tears;
When ev'ry tale hope whisper'd then,
My fancy deem'd was only truth.
O would that I could know again,
The happy visions of my youth.

'Tis vain to mourn that years have shown
How false those fairy visions were,
Or murmur that mine eyes have known
The burden of a fleeting tear.

But still the heart will fondly cling
To hopes no longer prized as truth,
And memory still delights to bring
The happy visions of my youth.

THE PLOUGH BOY.

The sun is set

Day lingers yet,

And homeward I am creeping;

The evening guide,

On the other side,

Just through the woods is peeping

I'll leave my plough

And labor now,

Till morning dawn is breaking;

And then with seed,

Away I'll speed,

Before my friends are waking,

I love the lawn,

At early dawn,

That leads me to my labor,

Where fresh winds blow,

And flowers grow,

Sweet nature is my neighbor,

I'll plough and sow,

And reap and mow,

And fill my barns to overflowing;

The country's health—

The country's wealth—

Is in earth's bosom growing.

Then let me raise

My heart in praise,

So God the gracious giver;

Of mercies all,

Both great and small.

O, let me praise for ever,

And then to Christ,

My heart high lift,

I'll pay, who lives in heaven;

For he hath died—

Was crucified.

That I might be forgiven.

THE LACE MERCHANT'S DOG.—Who would

have imagined that a dog had been made ser-

vicable of a clerk, and thus have made for

his master upwards of a hundred thousand

pounds? And yet an incident like this hap-

pened a few years since. One of those in-

dustrial beings who know how to make a

child of cool out of a billet of wood, deter-

mined, in extreme poverty, to engage in

trade. He preferred that of merchandise,

which occupied the least space, and was cal-

culated to yield the most profit. He borrow-

ed a small sum of money from a friend, and

repairing to Flanders, he there bought pieces

of lace, which, without any danger, he

smuggled in France in the following man-

ner:—

He trained an active spaniel to his purpose.

He caused him to be shaved, and procured for

him the skin of another dog, of the same hue

and the same shape. He then rolled the

lace around the body of his dog, and put over

it the garment of the stranger so adroitly, that

it was impossible to discover the trick. The

lace thus arranged in his pedestrian band-box,

he would say to his docile messenger—"For-

ward my friend." At these words the dog

would start and pass boldly through the

gates of Malines or Valenciennes, in face of

legs of travellers, he would thus accomplish

his aim. One day, however, while swim-

ming in a stream near Melines, he was shot

and died in the water. There was then no

him about five thousand crowns worth of lace

the loss of which did not affect the master,

but he was inconsolable for the loss of his

faithful dog.

ENCOUNTER WITH A LIONESS.

The lioness having a long start of me, we

went over a considerable extent of ground be-

fore I came up with her. She was a large

full grown beast, and the bare and level na-

ture of the plain added to her imposing ap-

pearance. Finding that I gained upon her,

she reduced her pace from a canter to a trot,

carrying her tail stuck out behind her, and

slewed a little to one side. I shouted loudly

to her to stop, as I wished to speak with her,

upon which she suddenly pulled up, and sat

on her haunches like a dog, with her back

towards me, not even deigning to look round.

She then appeared to say to herself, "Does

this fellow know who he is after? Having

then sat for half a minute, as if involved in

thought, she sprang to her feet, and facing

about, stood looking at me for a few seconds,

moving her tail slowly from side to side,—

showing her teeth and growling fiercely.—

She next made a short run forwards, making

a loud, rumbling noise, like thunder. This

she did to intimidate me; but, finding that I

did not flinch an inch, nor seem to heed her

hostile demonstrations, she quietly stretched

out her massive arms, and lay down on the

grass. My Hottentots now coming up, we

all three dismounted, and drawing our rifles

from their holsters, we looked to see if the

powder was up in the nipples, and put on our

caps. While this was doing the lioness sat

up and showed evident symptoms of uneas-

iness. She looked first at us, and then be-

hind her, as if to see the coast was clear;

after which she made a short run towards us,

uttering her deep drawn, murderous growl.

Having secured the three horses to one an-

other, by the reins, we led them on as if we

intended to pass her, in the hope of obtaining

a broadside. But this she carefully avoided

to expose presenting only her full front. We

had given Stofolus my Moore rifle, with or-

ders to shoot her if she should spring upon

me, but on no account to fire before me.

Kleinboy was to stand ready to hand me my

Parlay rifle in case the two growled. Dixon

should not prove sufficient. My men as yet

had been steady, but they were in a precious

stew, their faces having assumed a ghastly

palleness; and I had a painful feeling that I

could place no reliance on them. Now then,

for it, neck or nothing. She is within sixty

yards of us, and she still keeps advancing.

We turned the horses tails to her. I knelt

on one side, and taking a steady aim at her

breast, let fly. The ball cracked loudly on

her tawny hide, and crippled her in the shoul-

der, upon which she charged with an appal-

ling roar, and in the twinkling of an eye she

was in the midst of us. At this moment Sto-

folus's rifle exploded in his hand, and Klein-

boy, whom I had ordered to stand by me,

demanded about like duck in a gale of wind.

The lioness sprang upon Colesberg and fear-

fully lacerated his ribs and haunches with

her horrid teeth and claws; the worst wound

on his haunch, which exhibited a sickening

yawning gash, more than twelve inches

long, almost laying bare the very bone. I

was very cool and steady, and did not feel in

but ornamental to the City.—New Bruns-

wicker.

Digestion.—Of all articles of food, boiled

rice is digested in the shortest time—an

hour. As it also contains eighteenth parts

nutritious matter, it is a valuable substance for

diet. Tripe and pigs' feet are digested al-

most as rapidly. Apples if sweet and ripe,

are next in order.—Venison is digested al-

most as soon as apples. Roasted potatoes

are digested in half the time required by the

same vegetables boiled, which occupy three

hours and a half—more than beef or mutton.

Bread occupies three hours and a quarter.—

Steved oysters and boiled eggs are digested

in three hours half—an hour more than

is required by the same article raw. Tur-

key and goose are digested in two hours and

a half sooner than chicken. Roasted veal,

pork and salted beef occupy five hours and

half—the longest of all articles of food.

How to Enlarge Vegetables.—Vast in-

crease of food may be obtained by managing

judiciously, systematically carrying out for a

time the principle of increase. Take for in-

stance a Pea. Plant it in very rich ground

Allow it to bear the first year, say half a doz-

pods only.—Remove all others. Save the

largest single pea of these. Sow it the next

year, and retain of the product three pods

only. Sow largest one the following year,

and retain one pod. Again select the largest,

and the next year the sort will by this time

European Intelligence.

From papers by the Europa.

Business at Liverpool during the week ending on the 15th, had been inactive. For produce generally the demand was limited, the state of affairs on the Continent causing parties to hesitate in their operations, which, to some extent, had produced the dullness; but as later accounts gave hopes that these difficulties would be settled, a return of healthy state of trade, which had prevailed during the year, was confidently expected.

The Cotton market had recovered the decline of the preceding week—having advanced 44 per lb. from the lowest point on the 9th.—Sales of the week 32,740 bales.

Literary there had been a strong disposition to purchase manufactured iron for the spring demand, and some descriptions, more especially bars and nail rods, had improved in value.

Freights at Liverpool were dull, especially to the Cotton ports. Passengers were rather more abundant, but rates continued low.

Liverpool Timber Trade.—Estimating the general supply of colonial wood to this port since 1st February last, by the amount of register tonnage that has been occupied in conveying it hither, there continues to be a great falling off when compared with the corresponding portion of last year, the deficiency up to this date being 35,000 tons; keeping this in mind, and that 67,000 tons more are required to place the import of the year ending 1st February next equal to that of last, or 53,000 tons to be equal to an average supply of the last five years, there are good grounds to believe the ultimate deficiency will be as important as to have the effect of still further depressing the market.

The No Popery cry continues to sweep over the land. Every place is stirring, every body is in earnest to put down pretensions of the Papal supremacy; and, while England is thus stirred through its length and breadth on a subject of intense interest, rumors are abroad that the Presbyterianism of Scotland is to be shocked by a bull from Rome, appropriating the northern part of the kingdom into Catholic Bishops. In the meantime, Cardinal Wiseman has arrived from the city of the Caesars, taking Belgium in his route, where, he made a short stay; but leaving, probably for the first time, the state of feeling in this country, he pushed boldly on, and, while London was in the slumber, reached the capital where his policy has produced such an outbreak.

All parties are stirred to their center, and, believing that political capital can be made out of the excitement, the leader of the Protestants, Mr. Disraeli, has published a magazine, accusing the Whigs of countenancing in Ireland, the policy on the part of Rome which they now find it convenient to denounce in England. One of the new Catholic Bishops, in a pastoral charge, goes further than this, and states broadly that the new hierarchy was arranged with the fullest sanction of the Government; and Cardinal Wiseman is also said to have declared that the whole scheme was submitted to and approved by the Cabinet some time ago—European Times.

His Grace the Archbishop of Canterbury, in reply to an address from Darford, says: "It is gratifying to perceive the spirit which has been roused in our church and people by this unwarrantable assumption of spiritual power; and I trust that, in the good providence of God, this new assault upon national faith will result confirming more strongly the principles of the reformation."

The Bishop of Exeter has published another letter on the new Papal intrusion, in reply to some clergy of Plymouth. His Lordship ascribes the late conversions from the Church of England to Rome, to the wanton disregard of the principles of that Church, which is too often exhibited by many even of her clergy, many of whom, he says, "keep holy" none of her prescribed festivals in commemoration of apostles, and saints, and martyrs, &c.

Several meetings to denounce papal aggression have been held in London during the week, but most of them the harmony was disturbed by attacks on the Bishop of London, Oxford, and Exeter, and the Presbyterians, of a very personal nature.

The Dublin correspondent of the Times, states that no document of a similar import ever created so intense a feeling of excitement in the Irish metropolis as the manifesto of the Prime Minister of England against the recent intrusions of the Papal power.

Although at home the no popery agitation exclusively occupies the public mind, that question is rapidly yielding itself, as all such questions in the end do, with parties religious and political. The masses remain unaffected by the noise around them, and the liberal have discovered that in pursuing the prey, they were hunting with a pack who were sure to devour it, when caught. The Times has slackened its thunder, and now deprecates the matter being considered as polemical, a religious dispute as to the merits of their respective churches by Protestants and Roman Catholics. Some of Lord John Russell's best friends lament the publication of his letter, regarding it as pregnant with evil consequences to his party; and parish officers in many instances, declare that there was too much anger excited against the lord bishop of this Pope and Cardinal Wiseman.—Liverpool Journal.

Cardinal Wiseman commenced his duties in London on Wednesday, by performing the eight o'clock mass at the Roman Catholic Cathedral, St. George's-in-the-Fields. The congregation was very small.

The account of the trade and navigation presents gratifying results. The declared value of exports, for the month ending October 10, is £6,434,000 against £5,000,027 last year, and £1,501,000 in 1845. For the nine months ending October 30, the declared value of exports is £50,286,000 against £44,830,000 in the same period last year, and £6,534,000 in 1845. Number of vessels entered inward, during the nine months this year, 21,020, against 23,672 in same time last year; and the clearances outward, this year, 28,542 with a tonnage of 4,671,000 against 21,781 ships, with a tonnage of 4,301,000 last year. The increase of exports is distributed with remarkable uniformity in almost all departments of industry.

The return shows the import of flour and meal to be 512,000 cwt., against 245,000 cwt. in same period last year, and the quantity taken for consumption, 512,000 cwt., against 291,000 cwt. last year.

Messrs. Cooper, Walker & Co's cotton-spinning mill, Glasgow, has been destroyed by fire.

A most important discovery has just been made at Applecross, on the west coast of Scotland. A large mountain, called "Tore More," on being accidentally excavated the other day, presented a sub-stratum of pure lime, within five feet of the surface, and it was ascertained beyond a shadow of doubt that the whole mountain, except an average surface of twenty feet, consists of lime fit for the field, or for the mason, the result of organic heat.

DESTITUTION IN THE ISLES OF SCOTLAND.—The last accounts from the West Highlands and Isles announce the failure of the potato crop, to a very considerable extent, and the probability that severe and very general distress will prevail early in 1851, particularly in some of the islands, and the coasts of Ross and Inverness.

The Queen, it is said, has designed a carpet and Prince Albert has executed some pieces of sculpture for the great exhibition.

Lord Mowbray is said to have become discontent and gone to Madrid with a view of entering a monastery.

A proposition has been lately made to the French Government to follow the example of Sweden and Holland, and to submit a bill to the assembly to modify the navigation laws.

The expenditure for the national schools was last year, £145,663. The number of scholars 505,355,456.

IRELAND.—A new cotton house and post office are to be erected at Bellefleur.

The "Tribune Rights" agitation has already been mentioned in a reduction of the right of the whole country.

A stout opposition is being made in Dublin against anticipated removal of the altar to the new cathedral.

There is not a single newspaper that has not been seized and in the Encumbered Estate Court for many lots there are no bidders, and several estates have been sold at a price—some twelve years' purchase; but this estimate is very delusive, for twelve years' purchase at present rates, may be in reality equal to twenty years'.

AFFAIR OF HONOUR.—A hostile meeting on Saturday morning, in the Phoenix Park, Dublin, between the Marquis of Sigo and Mr. G. O'Higgins, M.P., was interrupted by the police as the parties were about taking their places. They were bound over in heavy recognizances. The misunderstanding arose out of a late election of ex-officio guardians in the county of Mayo, the Marquis objecting to Mr. Higgins's qualification in his absence.

Repeal Association.—The report on Monday last, that Mr. John O'Connell, in the speech of the day, attacked, with much vehemence, the letter of Lord John Russell and the no-popery agitation in England. The learned gentleman suggested the virtual sinking of "Repeal" by the reorganization of the "Catholic Association." The project seemed to have been favourably received, and a Roman Catholic clergyman present promised the Premier that, if he persisted in his threat of persecution, they (the association) would have the ardent and powerful aid of 4,000 priests. Another speaker called on the meeting to support Lord John Russell's letter by taking off their hats, and giving three cheers for the Pope!

FRANCE.

The Legislative Assembly had met. The President's speech at the opening is highly spoken of by the public and press generally; it disclaims all personal ambition, and professes great veneration for the constitution. M. Dupin has been elected President of the Chamber; the proceedings have not yet far been very important. The majority are well disposed towards the Government, and the President's Message has tended greatly to pacify the opposition.

The Ministers of France at the Courts of Austria and Berlin have been instructed to announce that although France desires to observe strict neutrality, as regards the affairs of other States, she could not regard a war between Austria and Russia but as opening the way to a convulsion in Europe.

GERMANY.

The first blood has been shed by the Prussians. It appears the Prussian troops had got possession of a small village, upon which the advanced guard of the Austrians were marching with their muskets unloaded and their sabres sheathed, not expecting any opposition, when the Prussians immediately fired upon them killing one and wounding several. After few rounds the Austrians succeeded in driving them out.

England, France and Russia have offered their mediation on the German question, and affairs have assumed a more peaceful aspect. Hanover thus far stands aloof from the strife.

Lloyd's newspaper considers it impossible to preserve peace, yet the general opinion on change in London on Friday afternoon was that the peace of Europe would be preserved.

Ministers intend immediately after the re-assembly of Parliament, to introduce a measure for the extension of electoral qualification to cities, boroughs and counties.

The new Baron of the Exchequer, Mr. S. Martin, is the first Irishman who ever filled a similar post in England. He is soon to be promoted to the Lord Chief Baron.

Admiralty Courts.—Among a batch of recent publications from the Hydrographical office, is a chart of a portion of the Bay of Fundy, from Quoddy to Point Lepreau. The survey is stated to have been admirably executed by the H.M. Sloop, "Penguin," Owen, in 1848, and is engraved with great distinctness and neatness.

Arrival of the Steamship

EUROPA AT HALIFAX.

The steamship Europa arrived at Halifax on Wednesday evening, in a little over 11 days from Liverpool, bringing dates to the 16th inst. She had 7 passengers for Halifax and 45 for Boston. The Asia was passed off Holyhead. The America arrived at Liverpool on the 16th, in 10 days and 19 hours from New York.

Considerable fluctuation had taken place in English securities during the week, in consequence of the threatening aspect of the German question, but the latest news from the continent, which is of a more pacific character, has tended to settle the market.

Flour was firmer at former prices.

Parliament has been further prorogued to the 17th of December.

We learn from Constantinople that a riot against the Christian population had broken out at Aleppo in the course of which a large number of Christians were killed and their houses sacked and burnt.

QUEBEC AND PORTLAND RAILWAYS.—In the British Colonist of the 26th ult. we noticed a communication signed "Nova Scotia" in which the relative advantages of these two Railways are carefully considered, and ably advanced. The writer, who appears to understand the subject well, states what is very probable, that the Nova Scotia Legislature may consider that while the American tariff and of the British N. A. Colonies differs so materially the advantage to be gained by the Portland Railway will accrue to the Americans, and the traffic on the line must terminate at Portland, and the people of those Colonies must then look to passengers and the carriage of the mails for their remuneration. He shows that there are no commercial advantages which these Colonies can gain by the

Portland line, which cannot be doubled by the direct line to Quebec, and points to the fact that the State of Maine has no power of allowing the subjects of these Provinces to participate equally with itself as shareholders in the Railway. He then compares the position of Maine in the federal government, and clearly demonstrates that "it holds a far inferior situation in the federal government, than these Provinces enjoy under the British Government, proving that they have no control over the duties upon Commerce, and cannot appropriate one penny, while we receive and appropriate the duties collected upon Commerce in our respective Provinces." Attention is then directed to the fact that a transit duty of 21 per cent of value is to be levied upon all foreign produce passing through the United States and that while this exists Portland must be the grand terminus and Halifax is completely cut off as if the Railroad were not made.

The writer then shows the decided advantage of the Quebec and Halifax line, an extract from which we give in his own words: "Turn we then for a moment to the consideration of the superior advantages which the Railroad to Quebec presents in a Colonial point of view, as the British Government have repudiated all support as of Imperial utility, there is a land snail of Five Millions of acres of land, equal at least upon the most moderate estimate of value, to make one half of the road. This Province has pledged its resources for £20,000 per annum. The three counties of Halifax, Colchester, and Cumberland are ready to contribute in all £12,000 per annum, and the other Colonies have agreed to contribute as largely. The Railroad would pass entirely through British territory, and the commerce would be harassed by conflicting tariffs. It will pass on to the Great West, and the Railroads, Canals and Lakes, will be calculated to receive the produce of some of the greatest exporting States of great stuffs in the Union, Ohio, Michigan, and Indiana. The former of which, although in comparative infancy, has this year raised 35 millions bushels of wheat, and the Canadas can transmit to Halifax a like quantity. The circumstance of Halifax being 600 miles nearer to the European market than New York and 400 miles nearer than Portland, will ever operate in favor of Halifax as a shipping port."

He then alludes to the navigation of the Upper Colonies being closed up for six months in the year, the large amount of labor required to harvest, thrash and grind the Corn, in so short a period, that the flour is necessarily injured by being made before the grain is in a proper state for manufacture, and argues that if the article can be brought by Rail, road in the winter all these evils might be obviated. He then states that a million of emigrants might be comfortably settled in the Colonies, during the progress of the work, and that feelings of affection and loyalty to the Mother Country would be cherished and perpetuated.

The St. Andrews & Quebec Railroad will possess all the advantages pointed out by the Nova Scotia as likely to accrue to the Halifax & Quebec Road, and many more;—and the probability is that our Line, will be the Main Trunk Line, with by and bye a branch to Halifax, connecting near the Grand Falls, and possibly branches to Fredericton and St. John. In the mean time our Rail, road is making the first section finished ready for the iron rails, which must now be close upon our coast, as we observe that the ship Andale sailed on the 9th ult. from Newport, and the ship Arvon on the 15th from Liverpool, with the rails, switches Engine and tender &c. as before noticed. The work we are happy to state, is rapidly progressing under the superintendence of A. L. Light, Esq., the Engineer of the Road.

"INDUSTRY AND IMPROVEMENT" is the title of a very well executed Engraving, presented by the proprietor of the New York Atlas, to his patrons. Our thanks are due for a copy of this beautiful print, presented us by Mr. Cleveland, the Traveling Agent from Albany.

TO MESSRS. J. ANDERSON AND MATTHEWS.—Notice has been published by the Privy Council for Trade, to Messrs. J. and M. of vessels, to make their claims for certificates of competency or service, so that certificates will be required after the 1st January next. Although these are no doubt necessary by officers of vessels belonging to this Province and trading between our ports and Britain, yet before proceeding on any other voyage from the Mother Country, they will have to be procured. The Courier is, we are informed correct.

The New Brunswick Almanac for 1851. The Publishers of this useful work will receive our thanks for a copy, kindly sent us. It contains a mass of useful information in a cheap form, and for mechanical execution is not surpassed in the Colonies.

GENERAL ORDER OF 1st BATTALION Royal Grenadiers.—The Officers, Non-commissioned officers and men of the 1st Battalion Royal Grenadiers, which callant corps is stationed at Halifax, have volunteered towards the sufferers by the disastrous fire at Fredericton the sum of £20 10s.

The River was closed by ice at Fredericton on Tuesday night the 26th ult. Two

steamers, which left Indian Town during the day, were unable to get above Gagetown and have since returned.

We have had considerable rain yesterday and to-day, which, if it extends to Fredericton, may open the River again.—Courier.

A PERILOUS SITUATION.—On the afternoon of Wednesday last, while the ice was forming on the river, and while it was yet moving downwards with the current, a man was heard calling for help, being then about one third the way from the Douglas side of the River. He was endeavoring to work a skiff across, but was rapidly drifting downwards. Every effort was made both by the Officers and Men of the 97th Regt., and the Citizens to rescue him, but the dark night closed in, and a cold steady rain commenced falling. During the whole night, as he passed downwards, the efforts to save him were continued, but all without avail; and it was not until nine o'clock next morning that he was brought ashore on the Fredericton side, about a mile below the City. He was dreadfully exhausted, having frequently given himself up for lost, and again raised himself from the temporary death-step upon such occasions. The sufferer turned out to be Mr. David Thompson, wheelwright of this City; and what is very extraordinary, he is not frozen although he had no neither overcoat nor mittens.—Fredericton Reporter.

Lieut. Munroe having barely reduced a daughter of the Captain of his Company—Captain Hamilton—has been prosecuted in Toronto by Captain H. "The Jury after a short deliberation, found a verdict of £700 damages—Quebec Chronicle.

"How fortunes are made."—The Circleville Herald, under this head, has the following, which we copy for the benefit of those who would know how to make a fortune:—"Dodd, the celebrated Hatter of Cincinnati, has within the last eighteen years, not only acquired an unparalleled popularity as a Master all over the country, but has amassed a fortune of seventy thousand dollars. The secret of his success is this: he is a printer by trade, and in 1830 left New York and settled in Cincinnati. Not finding the prospect very flattering for his success as a hatter, he secured the services of a practical hatter, and commenced that business. He then did, as every printer would do—advertised liberally in many places and many ways. The public see the results."

LYNCH LAW IN CALIFORNIA.—The Sacramento Transcript has the following: "An instance of this summary mode of dispensing justice took place on Monday last at Georgetown, where the execution was going on. It seems that a man by the name of Devine had taken to gambling, and as he was in the habit of losing his money, his wife hid all that came in to her possession. On Sunday, when he gambled, he demanded the money which she hid. She refused to deliver it if he intended to use it in gambling, whereupon Devine threatened to kill her. As he seized his gun she blew out the candle and fled into another room; he however discharged it at her. An enraged crowd, several hundred strong, assembled for high, set Devine on a horse, and rode him off to a tree. Here they made him kneel upon the horse's back, put the rope around his neck, and drove the horse off, leaving him hanging from the branch of the tree."

Messrs. T. Vojna and Frax. Bellean, conjointly, have entered into contract with the government to build the new wing of the Parliament building. There were two parties, who offered to do the work for less than Messrs. Vojna and Bellean, but the securities of the one were not considered sufficient, and the other, when called upon, would not come forward. Messrs. V. & B. undertake the work for £7,995, and have engaged Messrs. Jean Paquet and Perry Chateaubert, and the mason work and Mr. Holehouse the Painter.—Quebec Chronicle.

Discovery of a Third Ring to Saturn.—We learn from the Boston Traveller, that on Friday night, the existence of a third ring around this Planet, which had been for some time suspected, was ascertained by the astronomers of Cambridge. It is interior to the two others, and therefore its distance from the body of Saturn must be small. The eighth satellite of this Planet was also discovered at Cambridge, by Mr. Bond, about two years since.—Ibid.

Mad Legs of fourteen years' duration cured by Holley's Ointment and Pills.—Mrs. Priscilla Waters, of Penney, near Lynn, had been a dreadful sufferer, for upwards of fourteen years, with bad legs, which several of the faculty had tried to cure, but without success. Her digestion was also much impaired, and at times her health was so bad as to render her quite incapable of attending to her household affairs. As the medicines which she had been taking afforded her no relief, she was recommended to try Holley's Ointment and Pills, which completely cured her, since which, for more than two months past, she has been able to attend to her domestic duties, and could, if necessary, walk ten or twenty miles with ease.

OF SCROFULA OR KING'S EVIL.
Extract of a Letter from Mr. J. H. Allday, 200,
High Street, Cheltenham dated the
22nd of January, 1850.
To Professor HOLLOWAY.
SIR,—My eldest son, when about three
years of age, was afflicted with a Glan-
dular swelling in the neck, which after a short time
broke out into an Ulcer. An eminent medical
man pronounced it as a very bad case of Scro-
fula, and recommended for a considerable time
without effect. The disease then for four
years was gradually increasing in viru-
lence, when I met you in the press, and
after turning over the left knee, and a third
under the eye, besides seven others on the
left arm with a tumor between the eyes,
which was expected to break. During the
whole of the time my suffering child received
the constant advice of the most celebrated
medical Gentlemen at Cheltenham, besides
being for several months at the General Hos-
pital, where one of the surgeons said that he
would amputate the left arm, but that the
blood was so corrupt, that if that limb were
taken off it would be then even impossible to
salvage the disease. In this desperate state I
determined to give you, Holloway, a trial,
and after two months perseverance in
their use, the tumor gradually began to
disappear, and the discharge from all the
years perceptibly decreased, and in expec-
tation of the cure, they were perfectly healed,
and the boy is now restored to the bless-
ings of health, to the astonishment of a large
circle of acquaintances, who would testify to
the truth of this miraculous cure. Three
years have now elapsed, without any recur-
rence of the malady, and this boy is now as
healthy as heat can wish. Under these cir-
cumstances I consider that I should be truly
grateful were I not to make you acquainted
with this wonderful cure effected by your
medicines, as every other means had failed.

CURE OF ACUTE RHEUMATISM OF FOUR
YEARS STANDING.
Extract of a Letter from Mr. John Pitt, Dudley,
11th Nov. 1850.
To Professor HOLLOWAY.
SIR,—It is with the greatest pleasure that
I write to thank you for the benefit I have
received from your Pills and Ointment, which
have completely cured me of the Rheumatism,
under which I suffered for the last four years
at intervals, and in the most excruciating
manner. I had tried every kind of Medicine that
was recommended without receiving any bene-
fit. At last though, I would give your medi-
cines a trial, and purchased from Mr. Holden,
Chemist, of this Town, two Boxes of Pills,
and two of Ointment, and in three weeks
I found them and the blessing of God, I was
restored to health and am now as well as well
as was ever. I was a private. I am well at
own in this parish having been sixty-five years
in it, with an exception of ten years I served
in the 24th Regiment of Foot.

CURE OF A BAD LEG OF SIXTY
YEARS STANDING.
Mr. BAKER, of No. 5, Graham Place, Drap-
pers Hall, had a letter on his leg from the 22nd
of May, which he had sought the first advice in
the country, nothing was found to cure them.
He ever often suffered most excruciating pain
from attending to his business. He had given up
all hope of getting a cure, when at last he was
persuaded to try Holloway's Pills and Ointment,
which he used, and in three weeks he was
restored to health and am now as well as well
as was ever. I was a private. I am well at
own in this parish having been sixty-five years
in it, with an exception of ten years I served
in the 24th Regiment of Foot.

CURE OF A DEEPERATE CASE OF RING
WORM (F. S. X. V. A. S. F. C. V. D. N. G.).
Jama, 18th of November, 1849.
One of the most eminent Surgeons in Lima (the
Capital of Peru) had a child covered with Ring-
worm for more than 6 years; in vain he exhausted
all means in his power to effect a cure. Not
succeeding he consulted among his brethren, the
most celebrated medical authorities of the City,
but nothing was found to do the child service.
When he had despaired, he wrote to Joseph P. H. Esq.
of the English Church and Druggists, residing at No.
24, Colaba, Calcutta, to try Holloway's Pills and
Ointment, which was done, and after using six
in all of the Ointment, and six of the Pills, the
child was radically cured, to the surprise of the
parent, from motives of delicacy, in
writing.
The Pills should be used conjointly with the
Ointment, in most of the following cases:—
Bad Legs, Bad Breasts, Burns, Blisters,
Itch of Muscles, and Sand Furs. Venereal
Gonorrhea, Strain, Gonorrhea, Scalding,
Pain, Rheumatism, Scalds, Sores, Suppu-
rations, Catarrhs, Chapped Hands,
Corns (soft), Cancers, Contracted & Stiff Joints,
Lymphatic Swellings, Skin Diseases,
Cancer, Bone Heals, Tumours, Ulcers, warts,
Yaws.
