## FRENCH MAGNETIC OIL.

There is no field in which medical science is cultivated which is so fruitful in new facts, or useful deductions therefrom, as the great medical schools

prepared, by the internal and external use of which upon the human body, deficient nervous energy or magnetism may be restored to the system, and the painful effects of its loss obviated.

Among the simplest, and yet most useful articles of this class, is the celebrated FRENCH MAGNETIC OIL, which has established for itself a reputation in the old world, but is now for the first time introduced to the people of America. It is a combination of powerful vegetable oils, which exists naturally in a state of opposite magnetic condition, but which when brought together in contact with the nervous system of the body, penetrates it readily, and brings about a state of magnetic equilibrium, and thus cures the pain, which was the result of this deficient and disturbed magnetism.

of Paris—from which the FRENCH MAGNETIC OIL has emanated.

Even among justly celebrated physicians, there is oftentimes evinced in their practice, a want of appreciation of the great part which the nervous system plays, in the daily nutrition and growth of our bodies, and more especially of the influence of nervous force in disease and its cure.

*Nerve Force, Animal Magnetism, Electricity*, call it what you will—for daily observation of the effects prove that they are different manifestations of the same power acting through diverse organisms—has for a long time attracted the attention of medical scientists; but it is only within a very late period, that it has been well understood, as to be intelligently brought under command for the cure of diseases.

We all know, for we have all observed in our own persons, that even with such common complaints as *Colds, Cramps and Pains* in the stomach, and more especially in *Rheumatic Pains, Lumbago, Sciatica, Neuralgia, &c.*, that it is not only the application of cold, or the indigestible food into the stomach, which induces these disorders. At one time wet feet, food of an indigestible character, or at an unsuitable time, will be borne with impunity by the same person, who at the time will suffer excruciating agony, or intense distress from what would seem to be a much less amount of cause.

Why is this? we answer, it arises from a different state of animal magnetism. Why, this is just what makes the difference between the living and the dead body. In the dead body, the parts are all there, the skin, the muscles, the flesh, the blood, the blood vessels, the heart, the brain; but then all the nerve machinery, the life, the force, the nervous energy, the magnetism is gone, and nought remains but cold inanimate clay.

Now, it is a well established fact, that magnetism is stored up in a quiescent condition in many mineral and vegetable productions, and it is now understood, that by making use of certain combinations of these different articles, medicines may be

It is thus that the FRENCH MAGNETIC OIL exercises so powerful an influence in *Cramps and Pains in the stomach and bowels*. Taken internally, in the dose of one teaspoonful in a little molasses and water, every half hour as long as the pain lasts, it will soon be found to give permanent relief, because it supplies the magnetism which was wanting. At the same time it should be rubbed in freely on the outside of the pained organ, because in this way the cure is much more rapidly and certainly brought about.

*Flatulence, or Wind in the Stomach and Bowels, in Diarrhoea, Dysentery, Cholera and Colic*—all allied diseases, and all owing to deficient or disturbed animal magnetism—the FRENCH MAGNETIC OIL will be found to be the great remedy. Take it in teaspoonful doses, always adding molasses and water to it, to keep it in combination, and repeat every half hour till relief is experienced, at the same time rub it in outside thoroughly and persistently, and it will not fail.

For *Colds, Coughs and Influenza*, all of which are the result of cold acting on a body temporarily deprived by overwork, anxiety, loss of sleep, or some other cause of its animal magnetism, its nerve force, the FRENCH MAGNETIC OIL given in doses of one teaspoonful in molasses and hot water, frequently at first, till it brings on sweating, and afterwards at intervals of two or three hours, will be found to be the surest and speediest remedy; at the same time bathe the throat and chest freely and frequently with it, smelling the bottle frequently also, if there is *Headache*.

*Chronic and Subacute Rheumatism* have long ago earned for themselves the name of the *opprobrium medici*; the doctors dis-

## ECLIPSES DURING THE YEAR 1878.

During this year there will be four Eclipses, viz. : two of the Sun and two of the Moon.

I.—On the 2nd of February there will be an Annular Eclipse of the Sun, but not visible in these parts.

II.—On the 17th February there will be a partial Eclipse of the Moon, and partly visible. Begins at Halifax, N.S., 4h. 27m. in the morning, and at Montreal 3h. 47m. It will end at Halifax 9h. 26m., and at Montreal 8h. 46m.

III.—On the 29th of July there will be a total Eclipse of the Sun, visible in North America as a partial Eclipse. It begins on the Earth 3h. 4m. evening, mean time at Halifax in Longitude 144° 50' east of Greenwich, and Latitude 41° 21' north. Central Eclipse begins at 4h. 10m. evening in Longitude 117° 42' east, and Latitude 54° 14' north. Ends on the Earth 8h. 1m. evening in Longitude 69° 45' west and Latitude 30° 37' north. This Eclipse begins at Halifax about 5h. 30m. evening, and at Montreal about 5h. 10m. The greatest observations will occur a few minutes before the setting of the Sun.

IV.—On the 12th of August there will be a partial Eclipse of the Moon, and it will be visible in part. In Halifax it begins in the evening at 5h. 8m., and in Montreal at 4h. 37m. The Moon rises about 7 o'clock, and the last contact with the shadow will be about 9.

A transit of Mercury will occur on the 6th of May. It will be visible between 11 in the morning and 7 in the evening.

### DR. WILSON'S PERSIAN SALVE.

Among the numerous "ills to which flesh is heir" the different DISEASES OF THE SKIN take no contemptible rank. Although they are not generally or often fatal, they produce no small amount of pain, uneasiness, and unsightliness, and therefore call for remedies no less than more fatal diseases.

A long experience in the treatment of these diseases has proved to Dr. Wilson that the difference between them, whether they make their appearance in the shape of PIMPLES, ULCERS, PUSTULES, SCARS, REDNESS or DISCOLOURATION of any kind, are only differences of degree, not of kind, and in fact they are but the outward expression and visible sign of IMPURITY OF THE BLOOD, which impurity not being cast off through the natural emunctories, the liver, the kidneys, and the bowels, and being carried by the circulation of the blood into the minute glands of which it is, in great part made up, are there cast off, either by being pushed off in bran-like scales, or if in greater

(See page 5.)

agree, because so much time, patience and skill has been expended upon them with so little relief. This, in a great measure, results from the tendency of the faculty to look for the cause of the pain in some change in the fluids and solids of the body, to a great extent overlooking the fact that the true difficulty lies in the *Magnetic* state of the nerves of the part.

It is because the *French Magnetic Oil* well rubbed into the painful part, as well as taken internally, at such intervals as may be required by the severity of the pain, supplies the *Magnetism* which is wanting, and brings about a state of equilibrium, that it is powerful in relieving all forms of *Chronic Rheumatism, Lumbago, Sciatica, and Neuralgia*. These are all allied diseases—all produced by the same cause, and all relieved by the same means.

The *French Magnetic Oil* in the same way gives speedy relief to *Local Muscular Pains, the Growing Pains of Children, Pain in the Side, Back Ache, Cramp in the Limbs*. In any of these cases rub the *Magnetic Oil* well into the part affected, wet a piece of flannel in the Oil, and keep it applied to the part, and give one or two doses internally. *Bruises and Contusions* will speedily disappear under the application.

Those who have recently become mothers will find that by the use of the *French Magnetic Oil* upon their breasts, they will prevent the occurrence of *Lumps and Gathering in the Breasts*. If the Breasts become at all hard and painful, have them well rubbed down from the root of the breast to the nipple with the *French Magnetic Oil*, and then apply it on a fold or two of flannel, repeating it every two or three hours. It will soon be found that the pain and heat is relieved, the glands are softened, and the milk can be drawn thoroughly and without pain.

For *Chilblains and Frost-bites* the *French Magnetic Oil* will be found to be the very thing needed. It restores the *Magnetism* to the filaments of every nerve, so profusely scattered through the skin, and so promotes the activity of the circulation of the blood in the small capillary vessels, which connect the arteries and veins, and which have been deprived to a greater or lesser extent of their proper circulation of blood and nerve force by the loss of their normal calorific.

In *Sore Throat, Quinsy and Diphtheria* the *French Magnetic Oil* will be found to be of great service. By its powerful influence on the nerves of the parts affected, it exerts a healing and emollient effect on the glands which are gorged with blood—what is called inflamed. It should be rubbed into the outside of the throat

thoroughly, then applied on some folds of linen—used as a gargle, one or two teaspoonfuls diffused in a half teacupful of milk or barley water, frequently. Where the pain is at all severe a teaspoonful in molasses and water may be taken with advantage every three or four hours.

The *French Magnetic Oil* will be found to exercise a very healing and soothing effect on those cases of *Enlarged Veins* in the lower extremities, which are so frequent and so painful. They should be bathed well two or three times daily from the foot up towards the body, and then supported by a well-fitted bandage, or an elastic stocking. The frequent use of the *Magnetic Oil* relieves the inflammation which is so apt to result in those terrible *Chronic Ulcers*, which are so hard to cure, and so weakening.

In *Milk Leg* no better application can be found than the *French Magnetic Oil*. Bathe the sore limb well, but softly, with it, and then encase it in a sheet of batting, and keep it lying as high as the body. Repeat the application every six hours or thereabouts, till the pain is relieved. After attending to the state of the bowels, if there is much pain, give the *French Magnetic Oil* internally in teaspoonful doses, mixed with molasses and water, every three or four hours, or as often as may be needed to keep the pain easy.

In fact, as a *safe, cheap and effectual Household Remedy*, the *FRENCH MAGNETIC OIL* cannot be surpassed. It is applicable to all sorts of *Pains, cures Bruises and Strains, Rheumatism, Neuralgia, Cramps internal and external, Toothache, Earache*, and a host of other diseases to which we are all frequently liable.

The *FRENCH MAGNETIC OIL* is also an excellent remedy in very many diseases of Cattle and Horses. For *Bruises and Strains, Garget, Colic, and Belly-ache* it is very effectual. The dose for a Horse would be a full bottle, and may be repeated every hour or two until relieved.

We would ask of what we have always found to be an appreciative public, a fair trial of the *FRENCH MAGNETIC OIL*. We know by our own experience that it is a boon to suffering humanity. We do not puff it, but tell the plain, unvarnished tale of its powerful efficacy in the removal of pain. And day by day, science makes more clear to us the great influence exercised by the subtle but unseen force of *Magnetism*. We shall no doubt attain to a surer command over many of the diseases which afflict our frail bodies. Then it will be seen how large a step in advance the *FRENCH MAGNETIC OIL* is over any other preparation of its time.

## WILSON'S TONIC AND SARSAPARILLIAN ELIXIR,

The Great Alterative Remedy for Diseases of the Blood, Specially Designed for the

Cure of Scrofula, Scurvy, Cancerous Sores and Ulcers, Scald Head, Syphilis, Salt Rheum, Skin Disease, Catarrh, Canker, Epileptic Fits, Sick Headache, Erysipelas, Female Diseases, Ulceration of the Womb, Kidney Diseases, Gravel, Irritability of the Bladder, Jaundice, Liver Complaint, Indigestion, Dyspepsia, Chronic Constipation, Piles, Spinal Irritation, Palpitation of the Heart, Dropsy, Prostration of the Nervous System, General Debility, and all diseases whose origin is in a depraved condition of the blood.

Scripture tells us that the BLOOD IS THE LIFE. Physiology teaches us the same lesson, that as our bodies are being constantly used up by every breath we draw, by every action we make, so they are being constantly renewed from the vital currents which circulate through our arteries and veins. Our Blood is our Life, and such being the case, it follows as a corollary that *Pure Blood must mean Strong, Healthy, Vigorous Life; Impure Blood must mean Weak, Sickly, Attenuated Life, gradually fading into Death.*

This being true, to *Purify the Blood* becomes at once a necessity, and a duty, if we would be ready to do the work assigned to us in this world, if we would wish to procreate vigorous offspring, if we would ourselves enjoy a healthy old age, and not wish to be a burthen to our friends.

There is a large class of diseases, many of which are enumerated at the head of this article, but of which the list might readily be increased, whose special local origin science has yet been unable to determine. Some of them, such as many skin diseases, are seldom incompatible with labor, though most inimical to comfort; others, such as Epileptic Fits, are not apt to be very dangerous to life, but they terminate in mania or idiocy; and others, such as Prostration of the Nervous System, General Debility, Dropsy, &c., make life almost unendurable, and then at last end in premature DEATH.

But though medical science has not been able to put its finger in all cases upon the spot where these diseases originated, though she cannot tell why in one case one disease makes its appearance, and another in another case, long and patient watching of the effect of these diseases, and their mode of attack and progress, has led to the proof that the seat of the origin of these diseases lies in the *minute glands*, which are scattered everywhere throughout the system, and whose office it is to assist in changing the

daily food, by which our bodies are nourished, into the blood which circulates through our vessels, and to remove from the blood the worn out effete particles, which are used up in the wear and tear of the system, and which, if left in contact with the living tissues, after their vitality was expended, would infallibly act as a foreign body, and induce *impurity of the blood*, and consequently putrefactive disease.

Further patient research and experiments have also proved that there are certain remedies, known to art, which have a special cleansing, stimulating action on these glands, both the minute ones, and those which are of larger size, and more obvious to the anatomist. These medicines are called *Alteratives*, because they *alter* the unhealthy sluggish action of these glands, which allows the *blood to become impure*, into a quickened vital action, which purifies the *Blood* by taking from it the worn out, the putrefactive particles.

Some of these *alterative medicines*, of undoubted force, are minerals, such as Mercury and Iodine; but though powerful, they are not safe, as they are apt to accumulate in the system and produce a poisonous action, one sign of which is excessive salivation.

But in Wilson's Tonic and Sarsaparillian Elixir there are no *mineral medicines*; it is composed of the *most active, the most sure, the most efficacious vegetable alteratives*,—those which long and patient experimental use have proved best suited for *purifying the Blood*, without any detrimental poisonous action of their use.

Wilson's Tonic and Sarsaparillian Elixir has now been before the public for a long time, and has constantly gained in popular favor. It has accomplished many wonderful cures, so that it has attracted the attention of many eminent physicians, who after seeing its beneficial action, and enquiring into its composition, have given it their unqualified approbation, and used it freely in their practice, to their own great satisfaction and that of their patients. It operates upon all the secretions and excretions of the body through the glands, it stimulates the purifying action of the Liver and Kidneys—promotes a mild but certain cathartic effect; not a powerful cathartic such as weakens the system, but rather one which, carrying off the effete particles, enervates and gives tone to the whole system.

In Dyspepsia or Indigestion, where the appetite is variable, the stomach weak, the food apt to lie like a lead in the pit of the

stomach, and there become sour, with the frequent belching up of acrid or bitter water and gas—where the bowels are inflated, frequently costive and troubled with colic pains—the tongue coated, and the whole system weak and languid, the ELIXIR will give quick and permanent relief, and if continued for a sufficient length of time, will certainly cure. The trouble here is in the glands of the stomach, the Liver and the Spleen, and this ELIXIR is especially adapted to their disorders.

CACOUNA, P.Q. Aug. 8, 1876.

This is to certify that I was taken with the dyspepsia colic last March, and for a period of eight months was one of the most miserable creatures you could see in a day's walk, not being able to eat, drink or sleep with any comfort. I was nearly deprived of my reason, and hope had entirely left me, as all the efforts made for my recovery proved fruitless. By the first of May last I had become so weak and feeble that I could scarcely stand alone, and to all appearances would soon die. About this time I made preparations to visit this place with a friend to take care of me, and on my arrival in June was induced to try DR. WILSON'S TONIC and SARSAPARILLIAN ELIXIR. I have taken but two bottles, and am now enjoying as good health as any one. I have no doubt that it was this ELIXIR alone, under divine Providence, that effected this wonderful cure.

E. D. HARRIS.

HARVEY, N.B., Sept. 22, 1875.

I feel myself a thousand times obliged to you. I have for some years been afflicted with Dyspepsia in its most aggravated form, and from the good effects already produced by WILSON'S TONIC and SARSAPARILLIAN ELIXIR in my case, I am persuaded that the use of it will effect a thorough cure. I therefore wish you to send me another bottle, which I think will be sufficient. Send by the bearer of this letter.

J. D. HOVEY.

MILTON, N.S., March 2, 1876.

I think it due to the public that I should make a statement respecting myself, and the great benefit I have derived from the use of WILSON'S TONIC and SARSAPARILLIAN ELIXIR. I have been dyspeptic since 1868. My disease is subject to aggravations of the most distressing kind, and during part of this long period, I have been under the care of several eminent physicians of this place and also in large cities, and have taken from them a good deal of medicine, for which I have likewise paid large sums of money, and all without benefit. I had, too, tried, with less expense

but no profit, many of the remedies I saw advertised in the papers for my disease. Some time during last spring or forepart of summer, upon my return from a sea voyage to which my severe afflictions had driven me (but like everything else hitherto tried without benefit), I found a friend who had been taking this ELIXIR for a short time, and with great benefit. He saw me moping about half bent with pain and vomitings; with a fellow sympathy he noticed my condition, and asked me some questions, and then recommended to me this ELIXIR, saying with confidence it was a remedy that would cure me.

I was very gloomy and depressed in spirits, and having spent nearly my whole living in trying to recover my health without doing it, was very incredulous in believing his hopes; but I got a bottle, determined it should be the last. These remarks are a hasty outline of my condition, which in its details are very much like many other of the worst forms of dyspepsia. The rest of my story is soon told. I took WILSON'S TONIC and SARSAPARILLIAN ELIXIR to the number of nearly three bottles, and am now well, I mean in perfect health, and what ELIXIR remains is set by as unrequired. I have more call for beef than medicine.

And now let me say, no person who has not recovered his health under similar circumstances can have any idea of the grateful sense of obligation I feel towards those concerned (particularly my friend who recommended it to me) in the circumstances of my restoration to health, the world, and business.

W. K. SCOTT.

In Jaundice and Liver Complaint, where there is a dull, heavy aching in the side, and at the pit of the stomach, a more or less yellow or greenish tinge of the skin and whites of the eyes, where the stools are clay colored, the urine almost black, the head aching or feeling dull and stupid, this Elixir is the best remedy. These diseases, that is—Dyspepsia, Jaundice, and Liver Complaint—are apt to be most troublesome in spring and early summer, and should be prevented by an early resort to the Tonic and Sarsaparillian Elixir, before the symptoms begin to exhibit themselves, in conformity to the time-honored maxim, "*That in the Spring is the time to purify the Blood.*"

ST. JOHN, Sept. 4, 1877.

I think I am only doing my duty when I testify to the great benefit I have received from WILSON'S TONIC and SARSAPARILLIAN ELIXIR in curing me. In 1871, while out West, I had a very severe bilious

quantity, ulcerate the skin and are passed away in the shape of humour, or else produces little isolated MATTERY SPECKS called PIMPLES or large MATTERY SORES called BOILS or CARBUNCLES. The evident means of cure, then, is to cut off the supplies of morbid matter by PURIFYING THE BLOOD, and of this we have spoken fully in our articles on the subject of WILSON'S ANTI-BILIOUS PILLS and WILSON'S TONIC AND SARSAPARILLIAN ELIXIR, which possesses a power of renovating impure blood belonging to no other medicine.

It is necessary, then, to attack the

disease locally and for this purpose Dr. Wilson has devised the PERSIAN SALVE, than which from his own long experience in its use, and spontaneous testimonials of others, he is certain no better application can be found.

In preparing this Salve, he uses as a base a perfectly pure emollient, in order to restore the natural elasticity of the skin, which want of elasticity is ALWAYS THE EARLIEST SYMPTOM of every skin disease, Dr. Wilson has combined with this base several balsams, whose HEALING AND FEVER PREVENTING VIRTUES experience has taught him. Lastly he has added CHEMICAL

attack which left me very weak and settled into Dyspepsia in its worst form. I came home and was advised to try WILSON'S TONIC and SARSAPARILLIAN ELIXIR. I procured one bottle, and it worked like a charm on me; within a week I had gained two pounds of flesh, and by the time I had finished the bottle had gained twelve pounds. I seemed to have new life instilled into me. This summer I had another very bad bilious attack, and was so much reduced that I called in our best physicians—but no use. I again resorted to the ELIXIR and with the same good results. I am now as well as ever.

A. C. Jost.

In Scrofula or King's Evil, or Syphilis—diseases which are destructive to health, comeliness and life, and which are often handed down to the unfortunate offspring of those affected by them, there is no more reliable remedy than this ELIXIR. These two diseases have a strong similarity in some of their symptoms, though of different origin. Both produce swelling of the glands like knots under the skin; in both there is a tendency to forming cold abscesses, or slow gatherings, which break after a long time, and then discharge a peculiar ichor, different from the matter of an ordinary abscess. Both are apt to break out in the skin in scaly or mattery eruptions, slow to heal; both affect the bones, the first, Scrofula, being most apt to affect the joints, as in hip-joint disease, the other the bodies of the bones; and both, if not cured, are very likely to attack the children of those who suffer from them. The ELIXIR is specially prepared for the cure of these diseases, which affect so large a portion of our people, and which are producing a decidedly injurious effect on the vigorous vitality of our race.

In Female Diseases, especially in Ulceration of the Womb, from which so many women suffer, and which affects their general health so severely, this ELIXIR will be found an admirable medicine. In most of these cases there is an accompanying irritation of the bladder, with frequent calls to urinate, and slight relief therefrom. A short trial of WILSON'S TONIC & SARSAPARILLIAN ELIXIR in these cases will do more to prove its efficacy than volumes of written assertion. We could publish many certificates of the benefit to be derived from it in these cases, but refrain, as it is a delicate subject to handle in a public pamphlet.

In Cancerous Sores and Ulcers, in Scald Head, Salt Rheum, and in fact

in all the varieties of this disease, WILSON'S TONIC AND SARSAPARILLIAN ELIXIR has no equal. These are all manifestations of an internal Blood Poison, which nature unable, unassisted, to get rid of by reason of some affection of the natural emunctories—the glands—throws out through the skin. WILSON'S TONIC & SARSAPARILLIAN ELIXIR cleanses out those glands, and thus carries off this *Blood Poison*, allowing the skin ulcerations to heal, a process which may be much quickened and made more permanent by the use of WILSON'S PERSIAN SALVE, an Ointment of great efficacy.

In Sick Headache and Epileptic Fits, which have a closer relation than most people imagine, WILSON'S TONIC AND SARSAPARILLIAN ELIXIR should have a fair trial. We say that these diseases have a more intimate relationship than many imagine. By this we mean it will be found in many cases, if enquired into, that the child of a parent affected by frequent attacks of Sick Headache, is more apt to be a sufferer from Epileptic Fits than another. We have so often seen good effects from its use in both of these diseases, that we always now recommend a trial of it to those affected, together with occasional doses of WILSON'S ANTI-BILIOUS PILLS.

In Heart Disease, characterized by Palpitation of the Heart, Shortness of Breath, Faintness, Pain in the region of the Heart, with an irregular pulse, and an indescribable feeling of distress, the ELIXIR will be found to give relief to the severity of the symptoms in all cases, if there is no organic change in the heart.

In General Debility and Nervous Prostration, which are characterized by a great variety of symptoms, arising from a want of tone and strength in all the organs of the body, this ELIXIR acts like a charm. In these diseases the heart is apt to be distressed by vague uneasiness and nervous palpitation, the circulation is languid, the skin sometimes dry and feverish, sometimes bathed with a clammy perspiration, the muscles are flabby and easily tired, the stomach and bowels disordered, and often affected by wind colic; in fact, mind and body are alike weak, nervous, and out of joint. WILSON'S TONIC AND SARSAPARILLIAN ELIXIR is the cure for these complaints—its depurative action, exercised through the Liver, Kidneys, Skin and Intestines, increasing the natural discharges with a general tonic, strength-producing influence on the nerves and muscles.

ANTISEPTICS, or medicines which prevent sloughing or mortification of tissue and consequent formation of PUS or MATTER, thus bringing into connection all the curative means required in the local treatment of diseases of the skin.

The power of the PERSIAN SALVE is astonishingly great. There is no Salve now in general use that can surpass it in prompt and energetic action. If applied in sufficient quantity to the surface of the body, in the vicinity of the most highly inflamed part, externally, it at once subdues the inflammation and pain. It will quiet the most "angry" looking wounds, soften and reduce swellings of the hardest kind, and purify and restore to perfect soundness old and inveterate sores.

Among diseases to which this ointment is adapted are the following:—SWELLED BREAST and SORE NIPPLES of Nursing Women, FELONS and RINGWORMS, SCALD HEAD and an invaluable dressing for BURNS, SCALD and DRAWN BLISTERS, SHINGLES, ERYSIPELAS, and PILES. Inflammation of the Eye yields to its power immediately. All BRUISES and FRESH CUT WOUNDS are cured with great rapidity, FEVER SORES and SCROFULOUS SORES are soon changed into a healing condition, and frequently entirely cured. The first great and distinguishing power of this ointment is its ability to REDUCE INFLAMMATION. It is vain to hope for relief in any complaint unless the inflammation attending it be conquered or cooled.

## WILSON'S ANTI-BILIOUS and PRESERVING PILLS

are confidently offered to the public as a safe, mild, and yet certain vegetable cathartic and blood cleanser. They are suited to all climates and all constitutions, they exercise their curative properties on a great variety of disorders, because they are composed of a number of vegetable extracts, from which everything but the active medicine itself has been separated, thus allowing a large amount of curative material to be put into very small space.

WILSON'S ANTI-BILIOUS AND PRESERVING PILLS strengthen the Stomach, assist in the process of DIGESTION, prevent the fermentation of food in the stomach, and thus cure HEARTBURN, WATERBRASH, INDIGESTION, DYSPEPSIA, &c. They not only increase the appetite, but also give the weakened stomach strength to carry on the work of digestion so that the food taken may answer its intended purpose of giving nourishment to the body, while they stimulate the intestines to carry off the waste matter.

Wilson's Anti-Bilious and Preserving Pills act energetically upon the Liver—they stimulate its secretions of bile, soothe its irritation, and allay the spasm of its duct which often closes its outlet and thus prevents the bile from being carried away into the intestines, producing Congestion of the Liver or a Bilious attack, or in its more severe form, Jaundice and Chronic Liver Complaint; in its milder form, Congestion of the Liver, by not allowing the supply of Bile, which is the natural purgative, to get into the intestines and work off the waste material in the stomach and bowels; induces Costiveness, and costiveness, if long continued, almost certainly brings on Piles, which are either Blind or Bloody Piles, according to the extent to which they arrive. Piles consist in the enlargement of the veins which carry the blood to the Liver from which the Bile is secreted; if the Liver is clogged up, so that the current cannot flow on, the increased quantity of blood stretches the coats of these vessels especially at their lowest part, that is at the fundament, till they swell out in bunches and inflame, and then burst in order to give exit to the contained blood.

EEL RIVER, N.B., June 11, 1877

I am hardly able to express my gratitude for the benefit which my daughter has derived from the use of DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS. She had been troubled with what the physicians call *Liver Complaint*, but our doctor failed to give her any permanent relief, although she tried his prescriptions effectually. She

had become melancholy, unhappy, and her constitution was much broken down by the use of mercury. She tried these PILLS, and soon began to get better. I am happy to say she has entirely recovered her health.

W. T. COBB.

WILSON'S ANTI-BILIOUS and PRESERVING PILLS used regularly in small doses prevent the Congestion of the Liver, by keeping up its secretions, and thus prevent costiveness and its consequence—PILES

ST. MARY'S, July 31, 1876.

I have been troubled with a torpid state of the bowels for six or seven years, which has been the cause of a good deal of suffering to me, and I had to deprive myself of many kinds of food, and used much oatmeal, &c., till I got Dr. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS, and the use of them at once began to regulate my bowels. I can now eat anything my family does, without suffering any inconvenience. It is about six months since I had occasion to use them or any other medicine. I most cheerfully recommend them to those who are troubled with constipation of the bowels.

T. C. DELAFIELD.

WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure Bilious Headache, or as it is commonly called, Sick Headache. This is always produced by want of action of the Liver and Stomach, the fermenting food generates acid which gets into the blood, the retained particles of vitiated Bile also find their way into the circulation, and through it to the brains and nerves, poisoning them and producing pain in them. A dose of Wilson's Anti-Bilious and Preserving Pills taken at such intervals as the system requires, prevent these distressing symptoms, or if it has gone too far, one or two full doses are effectual for its cure.

MAITLAND N.S. April 30 1877.

I always was a strong opponent of patent medicines, calling them, as I thought them to be, a money-making imposition. But, sir, my wife, a woman of sixty years of age, and as much opposed to doctors as I was to patent medicines, has for several years past been afflicted with a *severe headache*. The unwelcome guest would renew his most insupportable visits frequently, and would remain for days at a time, during which my wife would have to be in bed, often in a state of derangement, caused by the violence of the pain. While she was in this state of suffering, a friend, who had been benefitted by them, chanced to come to my house, and he advised me to get a box of DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS, which I did, and the result was that it so relieved my wife

Dame Nature will not give healing or health to any part or junction of the body while throbbing or fretting with inflammation. The moment inflammation subsides, nature comes kindly to the sufferer's relief, and at once institutes the healing process.

Another important effect is, that ITS EFFECTS ARE ALMOST IMMEDIATE. It is generally the case with other Ointments, and the like, that for a time they rather increase the pain and inflammation. People generally suppose that the increase of pain is a good sign,—that it shows that the application is doing good; BUT THE

CONTRARY IS THE FACT. If an application is adapted for inflammation, it should allay inflammation, not increase it, not even for a minute. It is sheer nonsense to talk of an anti-inflammatory Ointment increasing inflammation and pain. It should commence its soothing influences at once, or it is not worthy of its name. The throbbing, festering, feverish, angry wound or sore will be quieted by this Salve, beyond the shadow of a doubt. For BURNS, over which it has SOVEREIGN POWER, apply the salve at once, and it gives immediate relief. Keep the part entirely covered, and there will be no scar.

that I was induced to get another box, which, having been used effectually, so relieved her, that since that time (one year ago) until this date, the disease has not re-appeared, and my wife is now enjoying good health. Dr. Wilson will ever have my warmest gratitude. C. V. WALLER.

But more than this, WILSON'S ANTI-BILIOUS and PRESERVING PILLS are effectual in preserving the system from attacks of Diarrhoea, which is almost always produced by derangement of the stomach and liver allowed to go on unchecked. It is in almost every case preceded by nausea, occasional colicky pains, and a feeling of want of circulation in the bowels, something like a load there. If on the first of these symptoms making themselves felt, a full dose of the Pills be taken, they will carry this off by causing a free flow of bile, purging away the offending material, and relieving the irritation consequent upon it. If the symptoms continue in a modified form after the first dose has acted, repeat them, and the resulting cure is certain.

KINGSTON, N.B., Jan. 4, 1877

I have used DR. WILSON'S ANTI-BILIOUS and PRESERVING PILLS in bilious attacks, and found them to be the best pills I ever used for that purpose, and I have also used them as a cathartic medicine, and have found but little use for a physician since I had them in my family. A. S. FRENCH.

WILSON'S ANTI-BILIOUS and PRESERVING PILLS, by their powerful and cleansing action upon the blood, their stimulating and tonic action on the Stomach, the Liver, the Kidneys and the Bowels, are admirably suited to prevent Fits, Apoplexy, and Fevers. These are all brought about by poisonous matter which is introduced into the blood either from the food or the surrounding air. These poisons act after their kind; some expend themselves chiefly up in the Brain and Nervous System, and then we have a train of symptoms, such as Headache, Congestion of the Brain and bursting of the blood vessels into the brain, producing Fits or Apoplexy and subsequent Paralysis. Many a valuable life has been saved by a timely use of these Pills when the commencing symptoms of an apoplectic attack begins to be felt.

HALIFAX N.S. April 15, 1877

For the space of almost twelve years I have been troubled with the *Liver Complaint*. At times I have been altogether unable to attend to my business, with great distress in my sides, and have been at great expense in employing eminent physicians, but I obtained no real relief from any of their prescriptions. I obtained

from the store here a box of DR. WILSON'S ANTI-BILIOUS and PRESERVING PILLS, which had been recommended to me by a previous fellow sufferer, and when I had taken a box I found great relief, and before I had finished three boxes I found myself entirely cured. This was about a year ago, and I have not had any return of said complaint since. I consider myself entirely well.

P. T. KNOX.

Often blood poisons expend their force upon the whole system—all parts of the body are affected, all the secretions are vitiated. These are cases which are known as Fevers; and in almost every case a timely use of these Pills would and will prevent them, because they are powerful upon all the internal glands, whose office it is to eliminate these poisons from the blood. They contain the most active remedies known to the world for increasing the action of the liver, the glands of the stomach and bowels, the skin, and kidneys; and it is by the action of these that the poison once introduced into the system must be got rid of, if it is carried off at all.

Wilson's Anti-Bilious and Preserving Pills are composed of the concentrated juices of extracts of FIVE DIFFERENT MEDICINAL ROOTS. The first is a certain and safe cathartic—it does not, like some other medicines, act so powerfully upon the coats of the stomach and bowels as sometimes to induce inflammation, and always to produce an amount of irritation, the weakening effect of which is felt long after, but they act by inducing a flow of the natural purgative.—ASSISTING NATURE, NOT FORCING IT, and thus their good effect is permanent.

The second is a sudorific, which stimulates the glands of the skin to pour out perspiration, and thus get rid of too large an amount of water in the blood, with effete material, which it holds in solution.

The third acts chiefly on the Kidneys, causing a free flow of urine, which is water with certain salts produced in the body, and harmful, if retained. It is in virtue of this position, chiefly, though not altogether, that WILSON'S ANTI-BILIOUS and PRESERVING PILLS are so efficacious, as experience proves them to be in DROPSY, STOPPAGE OF WATER, INFLAMMATION OF THE KIDNEYS, &c.

The fourth part has the power of assisting to eliminate unhealthy phlegm and humors from the blood, thus rendering them more useful than any other purgative in Congestion of the lungs and Lung Fever.

The fifth part makes Wilson's Anti-Bilious and Preserving Pills superior to

The great principle to be remembered is, that inflammation accompanies the great majority of human ailments, and DR. WILSON'S PERSIAN SALVE is a safe, sure, and speedy cure for any species of INFLAMMATION. Nor does it matter how the inflammation is caused; the pain, heat, redness, and swelling are the same, and are all cured by the Persian Salve. There is no other salve can be compared to it in prompt and energetic action.

"BIS DAT QUICQUID DAT".—The old proverb that what is promptly given in charity has a double value, is equally true of medicine. The timeliness of the prescription

is half the battle. Whoever doubts this, let him, on the first occasion of Headache, Indigestion, Disordered Liver, or Depressed and Irritable Spirits, try the virtue of Wilson's Anti-Bilious Pills, the best anti-bilious medicine in the world. *Standard, St. Andrews.*

"Dr. Wilson's Anti-bilious Pills are adapted to all ages and conditions, in all climates. Containing neither calomel nor any deleterious drug, they may always be taken with safety. They remove obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and correct such derangements as are the first origin of disease."—*Christian Visitor, St. John.*

all others, inasmuch as in it is the tonic strength producing quality, which prevents the cathartics and blood cleansers contained therein from weakening the system. In NO OTHER PILLS offered to the public will be found this union of the CATHARTIC, the CLEANSING, and the STRENGTH PRODUCING, because as a general rule these qualities are opposed to each other. It was Dr. Wilson's good fortune, after long study and laborious researches, to find out how to unite them all in one, without allowing the one to interfere with the other.

In Female Diseases Wilson's Anti-Bilious and Preserving Pills are of great service, and may be safely trusted. They correct IRREGULARITIES, relieve STOPPAGES, cure Leucorrhœa or Whites, and are especially useful about the TURN OF LIFE, when so many chronic diseases are apt to take their first beginning. STOPPAGES or SUPPRESSION is often relieved by these Pills by sympathy. They should be given in frequent doses, and aided by a hot bath, or bathing the feet in warm water with mustard in it before going to bed. The PILLS are more likely to bring on the Catamenia if taken when due than if delayed a few days.

ST JOHN N.B., Nov 14 1877

This is to certify that myself and wife had a severe attack of the Bilious Fever in August, 1876, and by the use of DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS we were cured when other medicines failed to effect any good. I also had what was thought to be the ring worm, on the abdomen, which had been there for six years, and I had employed all the means I could hear of to cure me, and which had cost me over twenty dollars, besides years of pain; and when I recovered from the fever, this was also well, and I do verily believe that it was cured by the use of these pills.

J. G. ARBEDGE.

ST JEAN BAPTISTE, P.Q., Dec. 29 1876

I feel it a duty I owe to humanity, and particularly to Dr. Wilson, to certify that DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS, I bought last winter, I consider the best pills I ever used, for I had been afflicted with Liver Complaint and Piles for nearly twenty years, and could find nothing but temporary relief from any other medicine. To my great surprise, by the use of two boxes of his pills, I found myself entirely cured of the disease. I therefore recommend them to all who are similar sufferers.

J. G. PICHÉ.

CARLETON, March 6 1877

Having been afflicted many years with Liver Complaint and pains in the side, and having tried doctors' medicine from

time to time without getting any benefit, I was induced by your agent here to try DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS, and find my health fully restored. I have also used them in my family, and always with good effect. You will therefore say to Dr. Wilson that I consider them the best medicine ever sold in this county.

C. P. LANDON

A somewhat similar train of symptoms, only characterized rather by a yellowish or greenish colour of the face and skin, palor of the lips, sunken eyes, surrounded by black circles, and accompanied by costiveness, loss of appetite, and either a stoppage of the menses, or an exceedingly light coloured discharge, are relieved by small doses of the Pills taken frequently and for a length of time.

In Rheumatism and Gout they are very valuable. These diseases have their foundation in the faulty secretions of the stomach and bowels, being poured into the blood, and by it disseminated through the system, producing the acute pains in the muscles which we call *Lumbago* and *Local Rheumatism*, or in the joints accompanied by *Swelling, Redness and Fever*, which we call *Articular Rheumatism*, or *Rheumatic Fever*.

The virtues of these Pills penetrate the fountains of the blood, and thus effect cures which could not be believed if they had not been proved. All who use them can see they have curative properties equalled by nothing which has been known before, and are astonished to find a medicine of such wonderful power over diseases, which is harmless—perfectly harmless even to infants.

Their great excellence consists in this, that they are compounded from the concentrated virtues of medicinal substances. Consequently they have far greater potency and remedial effect than the same medicinal substances, whether mixed or administered singly. This is the secret of the extraordinary cures they have produced and are producing. We do not wish to over-estimate their value or their usefulness, but we do desire that the public should know what they have done and are doing for those who are suffering from the disorders they cure.

We have abundant evidence to prove that they are superior as a purgative pill to any other. They are surer in their operation, more effectual as a remedy, and safer than any preparation which has ever been made available to the people. The enormous consumption of them, and constantly increasing demand, show that their virtues are not unknown, and we shall spare no pains in maintaining their high quality.

"Cold and changeable weather is very apt to undermine the health and bring on Coughs, Colds, Influenza, &c. Dr. Wilson's Pulmonary Cherry Balsam should always be given on the first appearance of any of the above complaints. It will also strengthen the Lungs so as to enable them to resist disease being forced upon the system. We know this Balsam to be good, and our duty as a journalist compels us to make it known. It is clean, safe, and grateful to the taste, and if you use it, it will do you good."—*Onpe Briston News.*

"THE BODY'S BULKWARK. The unusual duration and severity of our Northern winters of course exercise the worst effect over the delicate, infirm, and aged, rendering them exceedingly liable to pulmonary disorders; and on the first approach of such complaints Dr. Wilson's Pulmonary Cherry Balsam should be taken to avert the ill consequences of such a trying season. Nothing beyond this is necessary for any invalid to root out the most confirmed cough, and enjoy lasting good health."—*Liverpool Advertiser.*

## WILSON'S PULMONARY CHERRY BALSAM

is superior to all other remedies for Coughs, Colds, Sore Throat, Asthma, Bronchitis, Influenza, Whooping Cough, Croup, Congestion and Inflammation of the Lungs, and in fact for all the ordinary *Diseases of the Chest and Lungs*. It relieves the inflammation quickly, causes a free raising or expectoration of phlegm, heals the raw soreness of the throat and pipes, while at the same time it allays the accompanying fever, strengthens the general system, and prevents the serious symptoms which are apt to follow a *neglected cold*.

All of the inflammatory diseases of the Pipes, Lungs and Throat, and air passages, differ from one another, not so much in kind as in intensity. They are all characterized by a very similar set of symptoms, only that in one, one group of symptoms are more prominent than in another. In all of them there is more or less difficulty of breathing, hoarseness, soreness of the throat and chest, cough more or less spasmodic, dry, or accompanied with an expectoration of tough, stringy phlegm, or greenish or bloody matter. In Asthma the difficulty in breathing, sometimes amounting to almost complete choking, is the prominent symptom, with but a limited amount of expectoration, and but little cough.

St. JOHN, Dec. 20, 1876.

I have had the Asthma for a number of years, and at times have been very low. I was sixteen or seventeen years in various places trying all the medicines I could procure. I offered, during that time, physicians any reasonable sum that would undertake to cure me. After trying some experiments they all concluded it was too hard a case, and gave it up. From seeing some notice of WILSON'S PULMONARY CHERRY BALSAM, I determined to try it, and by the use of it found immediate relief and permanent benefit, as I have had no return of disease. T. A. ROBBINS.

HARVEY, Jan. 17, 1877.

Being severely afflicted with Influenza, a hard cough and asthma, and finding no relief in anything I could get—Consumption appeared inevitable, but by taking two forty cent bottles of WILSON'S PULMONARY CHERRY BALSAM, I was restored to perfect health. W. K. ARNOLD.

In Bronchitis, soreness of the throat, lameness in the chest, chiefly under the breast bone, and around it, a hacking cough, with expectoration of a tough, stringy phlegm, often tinged with blood, but frequently only greenish, are the prominent symptoms; but there is a good deal of oppression of breathing, especially in wet

weather, a weakness of the general system, which it is very hard to shake off, and sometimes a considerable amount of feverishness at nights, often accompanied by cold sweats. These are the cases which are especially apt to run into Consumption, and are just the cases in which WILSON'S PULMONARY CHERRY BALSAM produces the most admirable effects.

QUEBEC, Oct. 10, 1876.

My father has just recovered from one of the most severe attacks of Bronchitis ever known in this place, and so acknowledged by all who saw him. His physician, who is an able practitioner, considered his case hopeless, and beyond recovery. I induced him, knowing from past experience its virtues, to try WILSON'S PULMONARY CHERRY BALSAM, and the effect was astonishing. His case was alarming, and a description of it would almost challenge belief. I was with him night and day and watched the progress of the disease and the effect of the CHERRY BALSAM, which worked like a charm. I could challenge the world to produce a medicine that would have so good an effect. T. T. BACKER.

Influenza is noted especially as being a spasmodic, that is a great many persons in a community are affected by it at the same time. It is characterized by sneezing, coughing, rawness of the throat and air passages, with a profuse running at the nose, and an equally profuse expectoration of an acrid phlegm, which exoriates the nose openings, making them raw and red, to the great annoyance of the sufferers.

Whooping Cough is a very distressing complaint, chiefly among children, and is known by its convulsive cough, accompanied by long drawn out *whoops*. The little sufferers will be noticed frequently to leave their play, which occupies them during the intervals, and catch hold of something to support themselves by, while strangling, and then cough till they turn black or blue in the face and hands, at last bringing up a greater or less quantity of this phlegm, often bloody in streaks or spots.

Croup is a disease of children, scarcely ever known to occur with an adult, but it is very fatal before nine years of age. The patient generally wakes up suddenly in the night, with a prolonged choking cough, accompanied by a crowing sound, and imminent signs of suffocation.

Congestion and Inflammation of the Lungs, or Lung Fever, are all different stages of the same disease. It almost always comes from a sudden cold, which causes a filling up of the air vessels of the Lungs

"DANGEROUS DISEASES. How many life-long maladies spring from neglecting trifling causes! The cough readily cured by Dr. Wilson's Pulmonary Cherry Balsam, becomes, through carelessness, the irremediable torment for after life. With a knowledge of the curative powers this Balsam possesses, those who fail to use it for extirpating the first symptoms of a cough, which, if now neglected, may end in consumption, will have to bear the punishment of their own folly."—*Eastern Chronicle, Pictou, N. S.*

"FEAR NOT! — Though troubled with what seems an incurable cough, Dr. Wilson's Pulmonary Cherry Balsam will cut short all Lung Complaints which have their origin in affections of the chest. The superiority of this medicine over all others for subduing a harassing cough, has been so fully and widely proved, that it is only necessary to ask those afflicted to give it a trial; and, if fairly tried, no disappointment will ever ensue. It will arrest the increasing cough, allay disquietude, and perfectly cure."—*The Islander, Charlotte-town.*

with blood. Its prominent symptoms are, difficulty in breathing, generally accompanied, but not always, by pain in the side, from Pleurisy, severe cough, expectorations of rusty colored phlegm, with a considerable amount of fever, loss of appetite and general *malaise*. The action of the heart is much disturbed, the pulse quickened, the skin hot and dry, the urine scanty and high colored, the bowels sometimes costive, sometimes, especially in the late stages, affected by a teasing diarrhoea.

WILSON'S PULMONARY CHERRY BALSAM is just the thing which is needed for the relief of all these symptoms. It is composed exclusively of vegetable materials, and those of the purest kind, that the dose may be small, and the stomach not be clogged by inert or hurtful and useless material.

Its base, the Wild Cherry Bark, seems as if specially intended by nature for diseases of the lungs and air passages. It acts as a tonic to the stomach, aiding to give it a healthy appetite, and at the same time assisting in its work of preparing the food for conversion into good, bright, healthy blood; at the same time it has a peculiar soothing, what physicians call sedative, action on the heart and large blood vessels. Any irritation of the lungs, producing a stoppage of blood in them, is referred back to the heart, and sets it to pumping more blood, in order to force a passage through, and so restore the balance of the circulation. This of course only tends to increase the difficulty. Here the soothing action of the PULMONARY CHERRY BALSAM comes beautifully into play, the excited nerves of the heart are calmed and quieted, the strong forcing action of the heart is allayed, the extra current of blood ceases to be forced in on the already overburdened capillaries of the lungs, and time is given for another action of the PULMONARY CHERRY BALSAM to be developed, that is, its power of giving tonicity to the coats of the capillaries, thus enabling them to resist the stretching from the increased quantity of blood within their cavities, and at the same time by contracting, to force on the weakened current of blood through these.

To Wild Cherry Bark as a base, is added an ingredient, which has a special solvent action on the tough stringy phlegm, which clogs the mucous lining of the air tubes and cells. It thus acts as an expectorant, because, as can easily be seen, it cannot require so forced a convulsive cough to bring up the liquid phlegm, as it does to force out the same substance, when tenacious as glue, and sticking firmly to the inner walls of those same tubes. Besides this, after a long spell of coughing, the walls of the chest be-

come so tired and sore under the exertion forced upon them, that oftentimes the phlegm cannot be brought up at all, unless so dissolved, and there it lies in these air tubes and cells, blocking them up, and after a time rotting and fostering them, and thus bringing on tubercular consumption.

But there are still other ingredients added in order to produce a healthy tendency in the inflamed membrane. Ever since the annals of medicine began, certain gum resins of a fragrant character have been known to possess a vulnerary action, that is they stimulate ulcerated tissues to heal. We have in our own woods in America, some of these articles, viz., the White Pine and Fir, which exude a gum resin or turpentine of by no means despicable healing qualities. But in our climate the gums so elaborated from the sap are harsh in their action, and generally not acceptable to the stomach. Not so the gum resins which flow from some of the trees which have their habitation in torrid climes; the first rays of the sun, acting for a long season, burn out the harsh and irritating qualities, and leave only the pure and more agreeable ingredients behind, producing a pure and healing balsam of acceptable flavor to the stomach.

Mixed with all these materials, and holding them all in accurate combination, is a bland, unirritating lubricant, which acts as the healthy secretion of mucous itself does by coating the mucous membrane, and keeping it soft and pliable, so as to prevent the ill effect of friction. It takes the place of the acrid phlegm, dissolved away by the ether ingredients, substitutes its own unirritating moisture for the irritating ulcerative action of the diseased secretions, and thus adds materially to bringing about a healthy state of the membranes.

All these different ingredients are so combined, that while there shall be no conflict between their action, each shall naturally help and assist the other; at the same time it is made acceptable to the stomach, thus doing away with one great objection to taking medicine, especially with children.

Dr. Wilson, therefore, on theoretical grounds, as well as on practical grounds that he has used it now many years, and never without advantage to the patient, feels that he is justified in claiming for the PULMONARY CHERRY BALSAM that it is a *positive remedy for Diseases of the Lungs*.

If, then, you are affected with any of these diseases, begin at the beginning: as soon as your *chills* are over, a *Sore Throat* or tickling in the throat, causing you to hack or cough frequently. If you sneeze repeatedly, or if you have a dryness in swallowing, take a full dose of WILSON'S ASTI-BILIOUS

"Dr. Wilson's Anti-bilious and Preserving Pills are composed of chemical vegetable extracts, mostly from plants growing in our own country. Some of these plants have a direct action on the liver, others upon the skin, others upon the kidneys, and others upon the bowels and lungs. It is by a peculiar chemical combination of all these extracts that these pills are made to possess the most extraordinary efficacy for curing diseases growing out of a derangement of the bowels, kidneys or liver.

In chronic diseases or diseases of long standing, such as Liver complaints, Dyspepsia, Constipation of the bowels, Erysipelas, Scrofula, Scald Head, Pimples on the skin, and old sores, the treatment with these pills should be continued for a longer time than with less stubborn diseases.

"These Pills have become so much of a favourite, that it is only necessary for us to say that they are for sale by all the principal Druggists and Dealers in Family Medicines."—Sentinel, Woodstock.

PILLS at bed-time, to unload the Liver and Kidneys, which are always affected in these cases, to carry off the vitiated phlegm, which finds its way into the Stomach, and by remaining there brings on fever. Gargle the sore throat with WILSON'S CRAMP and PAIN RELIEVER, one teaspoonful to six teaspoonfuls of milk, or milk and molasses, three or four times daily, rub in the CRAMP and PAIN RELIEVER on the outside of the throat and chest—it is better than a mustard plaster, and helps to bring the inflammation outwards, and so relieve the Lungs. Then use of the PULMONARY CHERRY BALSAM frequently, as often as you feel the tickling or irritation of the throat, take a small dose of it, and at bed time take a full dose. By following these directions, you will often prevent a serious attack of illness, resulting in great loss and danger to you.

CARLETON, N.B., July 19, 1875.

A few years ago I was taken with *hemorrhage* of the lungs. I bled very freely, and became very low. My physician, after trying some time, concluded he could do me no good. I was induced to try WILSON'S PULMONARY CHERRY BALSAM, and before I had used the second bottle I was able to walk about the house. By persevering in its use for a short time it afforded a permanent cure.

J. K. HOOD.

In milder attacks of *Influenza* and *common Colds*, the PULMONARY CHERRY BALSAM will be found invaluable; also in irritation of the throat which many suffer from, after speaking or singing. Carry the Balsam in your pocket, and take a little of it frequently, you will find its beneficial effects.

ST. CHARLES, P.Q., April 4, 1876.

I have suffered several winters past with severe coughs, which were very troublesome and I feared dangerous. This winter my cough set in with more severity than usual, but I began taking WILSON'S PULMONARY CHERRY BALSAM, and soon found out it had cured me. I find also that several of my friends have been cured by it of troublesome hacking coughs, and affections of the lungs.

L. McCLOSKEY.

In Croup, it is best to use an Emetic of Ipecac first, and then a dose of the Pills; use WILSON'S CRAMP and PAIN RELIEVER externally on the Chest and Throat, and then continue the use of WILSON'S PULMONARY CHERRY BALSAM, to cure the disease and prevent a recurrence of the attack.

In those cases of consumption of the lungs where the fatal termination of the disease is almost certain, the Pulmonary Cherry Balsam will do much to prolong the suffer-

er's life and make it comfortable. It relieves the Cough, makes the expectorations easy, and prevents those pains in the chest which often causes much suffering, and which are the effect of local congestion.

MAITLAND, N.S., July 3, 1877.

Having tested the extraordinary virtues of WILSON'S PULMONARY CHERRY BALSAM in the case of a most distressing lung complaint, I feel impelled to write the particulars of my case for the benefit of others similarly afflicted. I am now forty-five years old, and previous to taking the Balsam had been afflicted with cough for eighteen months, attended with night sweats and all the symptoms of consumption. During twelve months out of the eighteen I was confined to my room, and most of the time to my bed. After having given up all hope I was induced to try the Balsam, and took it for about three months. When I began I was so prostrated with the disease that I could not stand up. I was reduced almost to a skeleton, and my cough was incessant. I took nothing but the Cherry Balsam during this time, and I now feel entirely well, and am able to go to business again. My recovery seems almost a miracle to me, and I ascribe it entirely to the use of the Balsam. Hoping that other sufferers from consumption, who have tried without benefit the thousand and one advertised nostrums of the day, may be persuaded by my statement to avail themselves of this great remedy, I send you these particulars.

T. E. LEAMING.

MAITLAND, N.S., March 21, 1877.

I write to acknowledge the benefit I have received from WILSON'S PULMONARY CHERRY BALSAM. I have suffered with a disease of the lungs over two years, and tried many remedies without much relief. Some have considered my case as hopeless, and all who knew me felt that I had but a faint prospect of life. At the time I began taking the Balsam, in January, I had violent coughing fits and strangulations from the phlegm in my throat, and frequent vomiting. My feet and limbs were swollen and *hectic fever* had full possession of me. Indeed I was thought to be, and I myself supposed I was, in the last stages of the disease. The CHERRY BALSAM has relieved all of these symptoms, and entirely removed some of them. The fever has abated, the swelling in my feet and limbs has disappeared, my cough has almost gone, and I am recovering my strength rapidly, and have every prospect by God's blessing of prolonged life and health.

T. H. WOODWARD.

EVER SINCE THE DAYS OF THE patriarchs of old men have been troubled with Bald Heads, and almost every man with any pretensions to science, from those days to the present, has tried to seek out a substance or compound to restore this crowning glory to man, and most graceful ornament of woman. As an evidence of this, almost every newspaper you take up, has columns of advertisements of preparations for the restoration and growth of the hair, but none of them appear to produce the desired effect, and, Wigs, Toupees, &c., still cover the "top of the head where the hair ought to grow." The reason

why all these hundreds of preparations for the hair have failed is simply because they have been conceived and prepared in ignorance of the true nature of the hair, its material structure, its chemical composition, its physiological relations to the nerves, and vascular system, and that source from which it springs. The results of which have been, as might have been expected, by any one knowing the above facts. From long and laborious study, research and experiment on the original growth and structure of the hair we have at length succeeded in producing a preparation possessing all the elements that

## DR. WILSON'S DEAD-SHOT WORM STICK

is an excellent and reliable cure for Worms presented in such shape as to be agreeable to children's appetites, while it is always safe to use, and in no way injurious to the health. Its active ingredients are entirely of vegetable origin—are not poisonous or anyways hurtful to the system—are separated entirely from the inert and unpalatable matter with which they are found connected in nature—thus presenting what has long been a desideratum—a certain specific for Worms, a safe one, and an agreeable one to the taste—one that children can be induced to take, without worry and without force.

DR. WILSON'S DEAD-SHOT WORM STICK has now been so long in use throughout this country—so largely has it been consumed, and with such favorable results, as the numerous unsought testimonials we have received testify, that we need scarcely press the matter upon the public attention. But when we consider what ill effects follow from the neglect of parents to attend to the symptoms of worms in their children, how many suffer and how many die, when they might readily be cured by the use of so pleasant and mild a remedy as DEAD-SHOT WORM STICK, we cannot refrain from urging a trial of it. In all the many years in which it has been in use, we have scarcely ever heard of a case in which the symptoms of worms were at all marked, in which its use was not followed by good results; in some cases large numbers being expelled after the use of a single stick, as many as from twenty-five to five hundred having been actually counted in the subsequent stools.

The symptoms of Worms are very numerous and various; the most common are a pining away, growing weak day by day, a variable appetite, sometimes voracious, sometimes not to be tempted by delicacies, an unhealthy, doughy complexion, puffiness of the face and eyelids, dark circles under the eyes, a swollen stomach, irritability of the stomach with nausea, and frequent attacks of a teasing mucous, slimy, greenish diarrhoea, a fetid breath, feverish, restless nights, tongue large, and marked on the sides by pressing against the teeth, pains in the bowels, high colored and strong smelling urine; where any or all of these symptoms are present in children, there is reason for believing that the trouble is *Worms*, and it is worth while to give the DEAD-SHOT WORM STICK a trial; you will scarcely ever be disappointed with the results, and if you are, you have done no harm, either to the child's health or temper, by the use of it.

But it must be borne in mind that worms, though destroyed in the bowels, do not always make their appearance whole in the stools either alive or dead, as if the Worm Stick meet with them high up in the bowels, and destroy them there, the dead worms will be acted upon by the digestive fluid, and will come away "OUT WIP" and mixed with the excrements, often giving it the appearance of chopped greens, and making it very offensive.

Mothers can place the utmost reliance in this harmless and pleasant remedy, and therefore, need not have any hesitation in using it whenever they think the symptoms demand a remedy for worms; for although it is a powerful and effectual worm destroyer, it can be given to the most delicate child without the least fear of injurious consequences, and besides it has the approval of the *highest medical authority*.

But though the DEAD-SHOT WORM STICK is competent to destroy worms, it is not always competent to the cure of these cases. Children whose constitutions are affected with scrofula, are specially prone to the production of worms in the bowels in large quantities; there seems to be juices generated in the bowels by this disease, which fatten and breed worms very quickly. In such cases, the DEAD-SHOT WORM STICK should be used occasionally to expel the new broods which are hatched out, while in the intervals the general health should be improved, and the scrofula vice eradicated by the use of WILSON'S TONIC AND SASAPARILLIAN ELIXIR, which is the best remedy science has discovered for such a state of the system. By thus alternately using the DEAD-SHOT WORM STICK and WILSON'S TONIC AND SASAPARILLIAN ELIXIR, you will soon find a satisfactory change in your sickly child's appearance. It will lose the wan aspect it formerly presented, and instead present the appearance and reality of robust health, and you will have the satisfaction of knowing that you have warded off from your offspring evils of great magnitude, for there is scarcely any disease which may not be excited by the presence of those pestilent parasites in the system. Many cases are recorded in which they have produced Fits, Epileptic and Cataleptic, Dropsy of the Head, St. Vitus's Dance, Palsy, Fainting, Hiccough, Dysentery, Convulsions, Lockjaw, and even Idiocy.

The DEAD-SHOT WORM STICK leaves no excuse for this dangerous delay, as it is not only superior to all other preparations of its class as a *worm destroyer*, but is also pleasant and agreeable to the palate.

are required to produce a growth of hair on Bald Heads. The Hair rises from the areolar or cellular membranes of the skin, and in its growth and structure resembles a vegetative growth, and is analogous to bulbous plants,—the areolar membrane in the soil from which it springs. The substance of the hair is secreted and gathered into a nucleus in a membranous sack, which form the root of the hair. This is supplied with nerves and secreting vessels that are thickly distributed over and pass through the entire membrane of the scalp. When this membrane is in a healthy state, and all the cellular and secreting ducts, veins, and blood vessels are in free action,

hair will continue to grow, and its roots remain firmly planted and held fast, but if this membrane becomes diseased by constant applications of alcoholic and other stimulating mixtures, or with oily and greasy preparations which stop the perspiratory pores, and prevent the escape of worn out and irritating particles of matter, the soil from which the hair grows becomes exhausted, the elements and compounds that form the hair are no longer secreted, they become contracted, and the hair dies and falls out for want of support. All that is necessary then to restore it is to remove these causes of destruction, supply new material, virgate the hair,

## WILSON'S CRAMP AND PAIN RELIEVER.

The Great Internal and External Vegetable Remedy for Cramps and Pains of all kinds,

is suited to cure a greater variety of diseases than any other medicine. It is at once *stimulating, penetrating and diffusive*. It cures pain, both by its revulsive action, and also by its direct action on the nerves. Inflammation is produced by a congestion of blood to any part, that is a stoppage of the blood, and this is caused by the irritation of a nerve. *What inflammation is to the blood vessels, pain is to a nerve*, a congestion of the visible nervous fluid in the courses of the nerve, a stoppage of its circulation.

WILSON'S CRAMP AND PAIN RELIEVER cures pain and inflammation by the same action. It is so penetrating that applied externally, when the trouble is not too deepseated, it finds its way through the skin into the vessels and nerves, and there exerts its *stimulating action*, causing the overfilled vessels and nerves to contract and force on their extra contents, diffusing it through the system, thus restoring the balance of the circulation. Taken *internally*, an exactly similar effect follows,—inflammation and pain internally in no respect differ from the same things externally, and can be cured in the same way. This peculiarity in the action of WILSON'S CRAMP AND PAIN RELIEVER is what makes it so far superior to the preparations of Opium, Morphia, and Chloroform. They act by stupefying the brain, so that the pain is not felt, while the trouble is still going on: mere palliatives not cures, but WILSON'S CRAMP AND PAIN RELIEVER not only *relieves*, but *cures* the disease.

WILSON'S CRAMP AND PAIN RELIEVER cures *Chronic Coughs, Colds, Sore Throat and Diphtheria*, by using it externally upon the throat and chest, mixed with an equal quantity of sweet oil or goose oil, as a gargle, mixed in the proportion of a teaspoonful in half a cupful of milk and molasses, used frequently, and after each gargling swallowing from one to two teaspoonfuls of the mixture.

Indigestion, Cramps and Pains in the bowels, Diarrhoea, Cholera Morbus, Vomiting, Cankered Mouth and Stomach, are cured by rubbing the Reliever and Oil Mixture in externally over the seat of the pain, and taking it internally, mixed as before with milk and molasses, and using it at short intervals till relieved. If the disease is very severe, it may be used extensively in its pure state, following up the application with a cloth wrung out of hot water frequently changed.

In case of sea sickness; take from fifteen to twenty drops on sugar or with water,

and it will be found very efficient in relieving the terrible nausea.

WILSON'S CRAMP AND PAIN RELIEVER, applied externally either by rubbing it well in, or by simply saturating a piece of cotton with it, and applying it over the part, will be found an admirable remedy for Ague in the Face, Neuralgia, Rheumatism, Sciatica, Lumbago, Toothache, Bruises, Sprains and Strains, Felons, Frogs, Frostbites, Burns or Scalds, where the skin is not broken—Stings of Insects, and in fact for all the purposes of a Liniment, WILSON'S CRAMP AND PAIN RELIEVER cannot be surpassed. It combines in itself a *stimulant* which is powerful to prevent the effects of sudden colds—the fruitful mother of many severe diseases. An *anti-spasmodic* which relieves internal spasms and pains, and prevents the inflammation which is apt to follow them; and an *anti-septic* which destroys the causes of these diseases, by preventing putrefactive fermentation.

Cholera, Cholera Morbus, and Bloody Flux, in sudden and severe attacks take two or three teaspoonfuls of Wilson's Cramp and Pain Reliever, mixed as directed, and *drink it*, then bathe externally the stomach and bowels with the medicine, *undiluted*, also the limbs if they are cold. Repeat the dose *internally*, if *necessary*, and continue the bathing until relief is obtained. As Cholera and Cholera Morbus most generally commence with Diarrhoea, if you commence treatment for Diarrhoea in season, you will certainly avoid or prevent the secondary symptoms, Cholera. Should Cholera or Bowel Complaint prevail as an *epidemic*, take internally, once or twice a day, a teaspoonful in a little milk. It disinfects the malaria inhaled into the system, imparting warmth, vigor and health, and prevents the separation of the watery parts from other properties of the blood.

WILSON'S CRAMP AND PAIN RELIEVER is also an excellent remedy for Wind in the Stomach, and Flatulent Distensions, always troublesome, and frequently dangerous disorders. It is a safe and handy *domestic remedy, easy to use*, not liable to spoil by keeping, never dangerous in its effects, as too many pain relievers are, and should be kept in every house. For those who are working out of doors, in the hot season, as haymakers, and harvesters, a few teaspoonfuls of WILSON'S CRAMP AND PAIN RELIEVER, with a sufficient quantity of molasses, added to a pail of water, makes a safe and wholesome drink.

fold, and a new crop of healthy luxuriant hair will reward you for your labors. HURD'S HAIR VITALIZER will do all this. It has the material in it, and has been thoroughly tested and proven successful beyond his most sanguine expectation. By the use of this restorer, gray hairs will gradually assume their natural color, by its producing a healthy action on the scalp. Gray hairs are caused by diseased action of the vessels that secrete the coloring matter of the hair; restore them to health, and the color will be restored. Hairs are composed of two parts, one external, tubular, and transparent, the other

internal, with a structure peculiar to itself which communicates to them their color. If this internal structure becomes deranged, the coloring matter ceases to be generated and absorbed, and the hair turns white. As a Hair Beautifier nothing equals HURD'S HAIR VITALIZER; and no other preparation surpasses it for restoring the hair to its original youthful color.

The success of Dow's Sturgeon Oil Liniment, for all purposes to which a liniment is applicable, speaks volumes for the doctor's skill and knowledge of chemistry.

## HURD'S HAIR VITALIZER.

For Restoring Gray Hair to its Original Color, for Promoting a Healthy and Luxuriant Growth, and imparting to it a Soft, Silky Appearance.

It is compounded from the prescription of an eminent Dermatologist, for the purpose of giving increased vitality to the growth of hair, making it more luxuriant, and restoring its natural color and glossiness.

NOTHING INJURIOUS IN IT.—There is now nothing wanting in this happy combination to make it the most perfect preparation for the hair, in every respect, that this age has yet discovered. It is complete in itself, combining all the essential qualities of a *Hair Renewer and Invigorator, a Hair Restorer and Vigor, and a Hair Beautifier or Dresser.* It is not a dye, and is entirely free from mineral caustic, which although it is instantaneous in its effects, destroys the vitality of the hair, leaving it harsh, wiry, and disagreeable. These Hair Dyes give it an unnatural color by staining the coating of the hair, and in so doing fill up its pores, preventing the natural circulation, and thus lead to the hair becoming brittle, breaking off, and to its ultimate death.

KEEPS THE HEAD CLEAN.—The HAIR VITALIZER acts in a different way. Its almost miraculous virtues result from its powerful *invigorating, vitalizing* effects upon the scalp, thereby increasing the tenacity of the tissues which is necessary to keep the hair in its place, and its healthy stimulating effect upon the bulbous roots of the hair, giving them new life and vigor, thereby securing a strong, healthy growth of the hair, and a due secretion of coloring matter. This preparation keeps the scalp clean and entirely free from scurf and dandruff or dead cells, which are thrown off from the root and shaft, which if allowed to remain, close up the pores and prevent the circulation through the shaft—drives away humorous eruptions of every kind, prevents the hair from falling out, changing all the varieties of light, sandy, and curly hair to a beautiful auburn, and crowns the head with a rich, luxuriant growth of hair, rendering it dark, and at the same time imparting to it the richest lustre.

WHAT THE HAIR IS COMPOSED OF.—Chemical analysis shows the hair to be composed of albumen, salts of lime, sulphur, manganese and iron, and a certain proportion of oily substance. Each hair has a bulbous root or sac which resembles very much the common onion. Every hair fits into its follicle or sac, closed at its inner extremity, where it supports the growth of the hair. These hair follicles are imbedded in the skin, and furnish the requisite nutriment for the growth and sustenance

of the hair. Here then is the seat of all diseases which produce the loss of hair, and blanching or turning gray. When the bulb of the hair is in a healthy condition, the hair is moist and glossy, but when diseased the hair loses that fresh appearance, and gradually turns gray and falls out. Each hair consists of two distinct parts, an external fibrous tube, and an internal substance or pith through which circulates a portion of the blood, and an oily coloring matter, secreted by the follicles, and by which is produced the various shades of color that we see in the hair.

WHY HAIR BECOMES GRAY.—By many it is said that where the hair falls out it cannot be restored; as well might they say there is no remedy for disease. Now, the hair is constantly falling out, but where there is no disease, new hair grows from the same hair tubes, as new shafts are constantly in process of formation, the old being pushed forward by the new. The cause of hair becoming gray or blanched is through an impairment of the secretory follicles, and this is very frequently the case when their strength and vitality in other respects is undiminished. In such cases the hair merely becomes gray without any tendency to baldness. It is evident from the above physiological truths that a HAIR-INVIGORATOR, RESTORER, or RENEWER, to be successful must possess the power of strengthening and vitalizing these hair follicles. This the HAIR VITALIZER will accomplish. We more particularly advert to the coming out of the hair which frequently occurs in young persons, or those of a middle period of life, particularly persons of a nervous temperament, from excessive mental labor or activity of mind, which produce a febrile affection of the head. By sickness the same result is arrived at. The loss of hair in all of the above cases proceeds from too great amplitude of the pores, or the relaxation of the skin. The use of the HAIR VITALIZER gives a healthy condition to the capillary tubes, and so tightens the hold of the pore upon the hair shaft.

GRAY HAIR.—*Gray Hair* is liable to occur at any period of life after the person has arrived at the age of manhood or womanhood; and a premature blanching of the hair is much to be regretted by either sex, especially women. There are a variety of causes which produce blanching of the hair. In many cases it is want of tone of the scalp,

Winter weather is trying to the lungs; the cold winds are apt to induce coughs, and colds, inflammatory diseases. Wilson's Pulmonary Cherry Balsam cures these complaints by allaying the congestion which produces them. It is both safe and certain. Try it.

Dr. Wilson's Anti-bilious and Preserving Pills, used according to the directions, always do good, and leave no ill effects behind them. They contain no mercury.

With the stormy, cold weather comes rheumatism, lumbago, and pains in the bones. Dow's Sturgeon Oil Liniment has a wonderful control over these disorders, all who have used it can testify.

R. P. Winter, of Fredericton, N. B., writes us that his daughter was cured of a long-standing cough (she had commenced spitting blood) and is now enjoying good health by the use of Wilson's Pulmonary Cherry Balsam.

S. B. Little, Cambridge, Queen's County, N. B., was completely cured of dyspepsia and liver complaint by using Dr. Wilson's Anti-bilious and Preserving Pills.

Thos. J. Paul, Portland, has spent hundreds of dollars for doctors' fees and medicines, and never found any relief from rheumatism till he used Dow's Sturgeon Oil Liniment. He can now walk without a cane or crutch.

resulting from a weakened energy, and to be attributed to excess of mental or corporal labor; also humors of the scalp, which can be detected by a small white scale around the hair tube, which when forcibly removed, will exude a yellowish matter. This, if not cured, will result in baldness of the most inveterate kind, but by using the VITALIZER in time, it will eradicate the disease. Another phase of disease is a contraction of the skin which closes around the hair sheath, and prevents a circulation of the coloring matter. This disease is caused by the use of oil and alcohol preparations which have been sold under the name of tonics and restorers. Excessive perspiration will not only produce gray hair, but baldness. The perspiration contains an excess of salt, which after being thrown out by the pores of the skin, the water evaporating, deposits the salt upon the scalp, and is again absorbed by the skin, which will change the condition of the coloring matter and destroy the nutritious principles of the hair.

The proprietor of the HAIR VITALIZER does not pretend that in those cases in which the bare scalp presents a shining, glossy appearance, and in which the hair follicles are closed up, and the hair bulbs dead, that the VITALIZER will produce a new growth of hair. In such cases the skin is chalky white, thinner than the surrounding skin, and almost transparent, so that the seams of the bones can be seen. There is a lack of subcutaneous fat wherewith to nourish the oil tubes. In such cases a new growth of hair is generally hopeless. The powers of man are limited. He can induce more vitality in natural processes, but nature must supply something to work upon. To create is beyond his power.

**BALDNESS.**—But in a very large proportion of cases, baldness and thinness of hair are the result of an inactive state of the scalp, a dormant condition of the hair bulbs, and a choking up of the hair follicles. Very often this is the result of fevers or other wasting disorders. In these cases the HAIR VITALIZER will be found a specific. Under its use the short, stumpy, brittle hair, whose color is dead, and whose general appearance has not inaptly been compared by some facetious youth to that of a half-worn scrubbing-brush, will at once take on new life. The scalp instead of being covered with dry branny scales—dandruff—resumes its natural pinkish hue, it becomes soft and elastic; the hair bulbs change their wizened appearance and swell out round and full; the half-dead shafts of hair resume their natural gloss, their ends, instead of being split or stumpy, lengthen

out apace, while the renewed circulation brings back the original brightness of its color, deepening it in proportion to the renovated vitality.

Nor is it merely on account of the greater beauty which the new growth of hair induces that the HAIR VITALIZER is a boon to mankind. The increased thickness of the hair, for a strong healthy hair bulb will send off more than one shoot or shaft, gives a necessary protection to the brain beneath from the vicissitudes of the weather and from accident, and thus often wards off disease and even death.

But it is not only to bald or partially bald persons that the VITALIZER is of decided benefit. As a dressing for the hair, or an invigorator for the scalp, it has no superior. A luxuriant head of hair is a most noble ornament to the person. Those who are by nature thus endowed, will find the HAIR VITALIZER just what they want. It keeps up the natural growth, it cleanses the scalp, it prevents the necessity for hair oils and greases, which are both uncleanly and detrimental to the hair. Even the most vigorous growth of hair must fail, if the scalp is not kept clean and healthy, and its natural gloss and color must be deteriorated if the pores are not kept open and the circulation allowed to penetrate the whole of the shaft by the occasional use of some such searching cleanser as the VITALIZER, and for that purpose we know nothing that can be compared to it. The young should not fail to use it when they desire to give a deeper shade to that light, faded, undecided color of the hair, which is repulsive and which so detracts from the beauty of the person. Those whose locks are wearing thin, and bare, and becoming sprinkled with gray, either from age, sickness, or mental anxiety, by using the HAIR VITALIZER will soon rejoice in an increased growth of hair, rivalling in luxuriance and beauty that which was their pride in their youthful days.

The HAIR VITALIZER will also be equally certain and effective in restoring the color of the whiskers. It will be necessary, however, to make more frequent applications than when it is used to restore the color of the hair, as the whiskers change more slowly than the hair. They should be thoroughly rubbed with the VITALIZER every night. The proprietor is fully confident, after long study and mental research, employed in investigating the various agents that have been used and recommended for *renewing* and *restoring* the hair, that HURD'S HAIR VITALIZER comes nearer perfection than any other preparation of the kind before the public.

We verily believe, that dyspepsia is largely the cause of much of the moroseness and ill nature which mars the harmony of the social relations of all of us. Dr. Wilson's Anti-bilious and Preserving Pills cure dyspepsia, and set the liver, stomach and kidneys right, and thus make us better natured.

Why take pints of nauseous fluids in shape of bitters, or as a remedy for headache and liver-complaint, when a few doses of Dr. Wilson's Anti-bilious Pills will cure you at once?

We have, like many others, suffered from influenza and cough, during the cold and stormy weather, and nothing which we had tried has relieved us so much as Wilson's Pulmonary Cherry Balsam. It soothed the throat, eased the cough—in short, it cured us.

Mr. Whitman Estey Douglass, York County, N. B., writes that he was cured of an alarming cough of six weeks standing, was very weak and raising dreadfully. A bottle and a half of Wilson's Pulmonary Cherry Balsam saved him from an early grave.

## NURSE WILSON'S SOOTHING SYRUP

has now been so long before the public, has been so thoroughly and satisfactorily tried, that it has become an indispensable article in every well-ordered nursery. Its inventor, Nurse Wilson, enjoyed during a long lifetime a large practice as nurse and lady physician, and profiting by the advice of the numerous able physicians, under whom she was employed, and after an extensive trial of many articles of the *Materia Medica*, for the relief of the little ones under her charge, at length hit upon this prescription, upon which this SOOTHING SYRUP is compounded, and finding it to be exactly the thing wanted, at length gave to the public the benefit of her experience. NURSE WILSON'S SOOTHING SYRUP differs in composition from all the other Soothing Syrups and Carminatives in the market, and is proportionably safer, more certain, and more efficacious. She therefore warns mothers not to confound it with other articles having a similar name; they only resemble it in name, and not in efficacy. Use only NURSE WILSON'S SOOTHING SYRUP, you will find it the very thing you want.

Wind Colic affects many infants from birth, their mother's milk does not seem to agree with and nourish them as it ought, they vomit it almost as soon as it is taken, or pass it through them in curds unaltered, or mixed with greenish, slimy discharges, passed with much pain and distress. As a consequence, instead of being plump and hearty, they look wizened and shrivelled, their skin loose and wrinkled; they do not gain flesh, their limbs are cold and drawn up, and their whole system is disordered, because their stomach and bowels being so irritated, their food does not nourish the body, while the constant pain and loss of sleep worry and weaken them so that they cannot gain strength. The constant worry and loss of sleep also affects the mother's health, so that she cannot grow strong after her confinement, and if she is not in good health herself, she cannot furnish good nourishing milk, such as would be suited to give strength to her offspring. From this cause many children die young, and with many others—the foundation of life-long disease is brought about. In such cases as this, NURSE WILSON'S SOOTHING SYRUP acts like a charm. Give from six to ten drops of it two or three times daily, or as often as may be found necessary to relieve the pain, and prevent the frequent vomiting, and you will soon see a delightful change. The vomiting, and curdy, slimy, greenish discharges will cease, the child will sleep quietly and wake up bright

and refreshed; the pitiful wailing will be replaced by smiles, and the child will soon assume a plump and healthy aspect, while the mother will have the needed opportunity for rest, will gain in health and strength, and her milk will become more nourishing, and digestible in proportion.

From the fifth to the seventh month after birth *Teething begins*. The babe appears anxious to bite the nipple, the finger, or anything with which its mouth comes in contact, as the presence of round, smooth substances seems to ease the aching of the gums. On looking at the gums they will seem to be more or less red and swollen, shewing the markings of the teeth, which are pushing their way out beneath. After a time the child will be noticed to cry out frequently, as if from sudden, acute pain, its rest at night is disturbed, its skin hot and dry, its stomach irritable, and its bowels loose, it twitches frequently, and the agonized expression on its countenance betrays the anguish it suffers.

Where such a set of symptoms are noticed, NURSE WILSON'S SOOTHING SYRUP is what is wanted to give relief to the little sufferers, and ease the mother's mind. Given in the dose of a small teaspoonful three or four times daily, graduating the dose and its frequency by the relief experienced, and the recurrence of the pain and nervous irritation, it will be found to give ease, to strengthen the child, by allowing it to experience the influence of nature's restorer—sleep—to relieve the teasing diarrhoea, check vomiting, assist indigestion, and will prevent those dreadful "fits" from which children are so apt to suffer while teething. Always have NURSE WILSON'S SOOTHING SYRUP on hand if you have young children, for it will give ease if they should awake and cry piteously in the night with pain and inflammation of the gums.

Diarrhoea is a pregnant source of trouble and danger to children in their earlier years. Under the name of *Cholera Infantum*, it carries off every year a great many promising children. This is generally caused by *Indigestion*, *Sourness of the Stomach*, and irritability of the bowels, and may always be prevented by the use of NURSE WILSON'S SOOTHING SYRUP, perseveringly, in proper doses.

NURSE WILSON'S SOOTHING SYRUP is the greatest boon which medical science has given to mothers. Used persistently, it prevents those frequent attacks of wasting illness the effects of which are felt for a lifetime.

## WRIGHT'S VERMIFUGE

is the great *Worm Destroyer*. Not so pleasant as the Worm Lozenges and Candies, which are so much in vogue, and which no doubt often do much good—it possesses what they do not—a *certainly of destruction of Worms*, wherever they may be found. Worms can no more exist in the bowels after WRIGHT'S VERMIFUGE has come in contact with them, than snow can lie on our streets under the rays of a July sun. Here is where it differs from the Worm Candies—to do good—that is to destroy the Worms, the Worms must eat the candies, and they are therefore made with a small quantity of medicine and a good deal of sugar, in order to tempt the appetite of the Worms. If the Worms are already gorged with food, as they are very likely often to be in the bowels, hanging on, filled to repletion, in a semi-torpid state—the medicine in the candy does not affect them at all, because not eaten. But it is with a view to this very difficulty, that Wright's Vermifuge is prepared—it *kills by contact*—the mere presence of the Vermifuge in the fluids of the bowels, passing over the Worms, is destructive to *Parasite Life*, though only purgative, and not at all dangerous to the human animal. Here lies the secret of the unfailling success of Wright's Vermifuge: in its *searching, penetrating, parasite poisoning power*. If the Worms are in the bowels, it is sure to *search them out, penetrate and destroy them*. It is a medicine of the old-fashioned, downright sort, *sure to do its work every time*.

There are several different varieties of parasites that infest the intestinal canal. The most frequent tenant of the bowels is the *ascaris lambricoedes*, or round worm. Their place of habitation is usually in the small intestines, sometimes passing upward into the stomach, or downward into the large bowel, in either case being generally voided. The most common variety, the *ascaris vermicularis*, or thread worm, is the source of great irritation. These live principally in the rectum, and sometimes exist there in large numbers—by the thousand—being often discharged in matted balls. These two kinds belong chiefly to childhood, but sometimes adults are troubled with them. The *tenia* or common tape worm, is by far the most formidable of any of these parasitical animals, often measuring twenty feet in length. This kind of worm is more frequent in adults than in children, and its place of abode is usually in the small intestines, but extends to the stomach and large intestines. Intestinal

worms prevail most in weak and in unhealthy persons, wherever there is much debility of the digestive organs.

The symptoms of worms are very numerous, and in many cases a large number of them do not co-exist. But, mothers, if you find that your child grows thin and pines away; if it picks its nose frequently; complains of itching at the fundament, or says that something is biting it there; if its bowels are always out of order, sometimes costive with colic pains, sometimes very loose with slimy or even bloody discharges; if its appetite is variable, at one time voracious, at another not to be tempted by any food; if its belly is hard, swelled, and full of urine; if its breath smells wormy, its tongue is coated, its mouth is full of a sticky dirty spittle; if it complains of a nasty coppery taste; if it is restless and feverish at night, talks or raves and tosses about in its sleep; if it frequently wets the bed with a very offensive urine; if you notice that it has frequent headaches, palpitation, swimming of the head, nausea, or spells of difficult breathing; if it has sunken eyes, especially if it has a ringing in the ears, followed by convulsive fits; if it has any considerable number of these symptoms, rely upon it, mothers, that *Worms* are the cause of the mischief, and that you cannot safely lose time, but should at once use *Wright's Vermifuge*, and not be satisfied with one dose, but continue it at intervals, till you have not only rid the child of the Worms, but also of the new broods which will infallibly be hatched out from the eggs by the heat of the body, which are left sticking to the coats of the bowels and shielded from the action of medicine by natural secretion.

Wright's Vermifuge is best given on an empty stomach, for thus it is most certain to come in contact with the Worms, without the intervention of the food, as then it is sure destruction to them. *It will kill the Worms and cure the patient.*

With adults also, WRIGHT'S VERMIFUGE will be found to be an excellent medicine, from the popular idea that they only infest the bowels in children is a mistake, and many diseases, otherwise mild, are much augmented by the unsuspected ravages of Worms.

In cases where a *scrofulous taint in the blood* keeps up the symptoms first produced by the Worms, it is best to use an occasional dose of *Wright's Vermifuge* to keep down the Worms, and assist it by the regular use of **WILSON'S TONIC AND SARSAPARILLIAN ELIXIR**—best known remedy for Scrofula.

## ROBERTS' EYE WATER

is especially prepared for the cure of the common inflammatory diseases of the Eye Balls and Eye Lids. It is to the neglect of these comparatively slight ailments that we may fairly attribute so many cases of dimness of vision and blindness. From cold or the irritation of dirt, smoke, or some acrid humor falling into the eye, the conjunctive or living membrane of the eye becomes inflamed, the blood vessels, which in a state of health are invisible, become injected with blood, there is a feeling as if sand had got into the eye, acutely painful, the eyes are filled with water, and if not relieved after a short time, they begin to run matter, the membrane becomes thickened, the sight becomes dim, because light cannot penetrate through the thickened membrane, then follow the other symptoms of disease of the internal portions of the eye, deep seated pain in the ball, and around the orbit, bulging of the eye-ball, &c. Sometimes these go on to ulceration and bursting of the ball, and then the eye is lost. From the early appearance of this disease it goes by the common name of RED EYE. In the stage in which matter exudes from the eye, it is contagious, and may be carried from one person's eyes to another's by using the same towel. Persons using from the same bottle of Eye Water, should be careful not to bathe their eyes from the same portion of the water, or use the same cloths.

In all these cases of inflamed eyes, the eyes should be well bathed with warm milk and water two or three times daily, then let the head be held well back so as to give the eye water a chance to run into the eye, then having at first diluted the eye water with an equal portion of soft water free from specks, let a few drops be run into the inner angle of the eye, separating the lids with the fingers, then pulling slightly first the lower lid, and then the upper one, so that the eye water may have full contact with the surface of the eye ball, and also with the inner surface of the eyelids as the inflammation extends throughout. It is necessary to be thus careful about the directions for this apparently slight operation, as many of the failures to cure which are charged upon the eye water are really the result of carelessness in its use, the water being allowed to run away over the face and never coming in contact with the inflamed surfaces at all. After the first acute inflammation is over, the quantity of water added to the eye water may be decreased gradually until it is used in its full strength, the object being not to produce more than a

slight smarting after the first application at night on going to bed, until the acute symptoms have subsided; if a teaspoonful of the eye water may be added to two or three table spoonfuls of hot water, and a compress of old linen be wet with it, and bound over the shut eyes, it will hasten the cure much. By following these directions perseveringly with eye water the most aggravated cases of RED EYE have been and may be cured.

In SPOTS ON THE SIGHT, all kinds of WEAK EYES, and also in that ever-un-sightly disease Scrofulous Inflammation of the lids, characterized by little matterly pimples at the roots of the lashes, in STYES, in INFLAMMATION OF THE TEAR SACS, Roberts' Eye Water has NO SUPERIOR, and at least among the remedies which are put up in cheap form so as to reach everywhere, no equal.

It is the prescription of a celebrated OCU-LIST who devoted himself specially to the diseases of the eye, during a long professional career, and his own statement was that with this simple remedy he had saved more eyes from blindness than with all other medicines and all his operations added together.

Many of the Eye Waters which are highly vaunted and offered to the public as infallible, are dangerous remedies, probably from the ignorance of those who make them up, being composed of lead water, mainly; if there be any small crack or abrasion on the outer coat of the eye, they are liable to deposit a white coating on the surface of the sore, and when the sore heals up this remains there, and permanently damages the eye. But with Robert's Eye Water there is no such difficulty; it is eminently PAIN RELIEVING, HEALING, CURATIVE; try it and you will be satisfied with the truth of these statements.

Dr. Roberts' Eye Water will be found invaluable in the *Scrofulous Ophthalmus* or *sore Eyes* of children, in connection with WILSON'S TONIC and SARSAPARILLIAN ELIXIR which it will be necessary to use in order to get rid of the Scrofulous habits on which the disease depend. At the same time the patient must have plenty of exercise in the open air, and should not be stinted in diet. In almost all cases of *Chronic Sore Eye*, particularly of children, the difficulty of effecting a cure will be found to result from a *Scrofulous Taint* in the system. The very fact that the disease hangs on and does not yield to local remedies will justify the suspicion that the system is vitiated and the blood impure. In all such cases use Wilson's Tonic and Sarsaparillian Elixer.

## CLARK'S DERBY CONDITION POWDERS

is the great remedy for Worms, Bots, Want of Appetite, Horse Ail, Hide Bound, Coughs, Colds, Heaves, and all the common diseases of Sheep and Horses, Cattle and Pigs.

Its use is now so general, its virtues so well known from long experience by our farmers, and all those who keep animals, that we think it scarcely necessary to enlarge upon them, and what it has achieved.

In England, where it has long been established, it takes the place of all others professing to be of a similar character, and so much is it esteemed, that those persons who make it their business to fatten beef, would as soon think of doing without roots and linseed cake, as they would without the Derby Condition Powders.

In all racing stables, in hunting and breeding studs, in the huge stables of the omnibus and hack proprietors, the DERBY CONDITION POWDERS are in constant use, and the more it is used, the more it is esteemed.

On this continent there have been many kinds of Condition Powders made up in imitation of it, and puffed into a short-lived reputation, and some of them have been a very tolerable representation of it, but none of them can be compared for real utility to the only GENUINE DERBY CONDITION POWDERS, as their proprietors, either from want of knowledge, or because the more valuable ingredients were too expensive for use, did not employ the most effectual remedies.

In Horses and Neat Cattle, the appearance of the skin and hairy coat is the most reliable index of the animal's healthy condition or otherwise. If the skin is hard and dry, if the coat is rough and staring, there is something wrong with the animal, and it needs to be seen to. The appetite may still be keen, but the food fails to make good bone, blood and flesh, as it ought to do, and the owner is daily losing a portion of the food he supplies.

Clark's Derby Condition Powders improve the appetite, strengthen the digestive powers, stimulate the kidneys and bowels to carry off effete material, and so make the blood more pure, the circulation more equal, and thus prevent Inflammation, Gripes, Stoppages, and the scurvy eruptions on the skin which they produce, and which are known as Mallenders, Poll Evil, and Farcy Buds, all of which are caused by Impure Blood, and imperfect Digestion of Food, congesting the kidneys and glands of the intestines, and preventing the elimination through them of the worn out material, which is then thrown on the skin, and makes its exit through these unsightly eruptions and

discharges. To prevent or cure Hide Bound, which is the result of stoppage in the intestines of the accumulated dry hay and oats, with horses, the Derby Condition Powders should be fed in a bran mash or with ground feed two or three times a week in winter. They will save many times their cost in food, and are good for working purposes.

One who has not been accustomed to the use of the DERBY CONDITION POWDERS will be astonished to find, on trying them, on how much smaller a quantity of food the horse will keep fat and at the same time be able to do his work well, than without them, and the horse in the spring will be healthier and stronger.

For Breeding Mares, the DERBY CONDITION POWDERS are especially valuable, as their occasional use during the long season in which the mare carries her colt, prevents those internal congestions which are so apt to result in mal-nutrition of the colt, and consequent deformity of limbs and body, and which are also liable to destroy the mare at the time of foaling. Many valuable mares have been saved to their owners, by judicious use of the DERBY CONDITION POWDERS during the season of pregnancy.

For Neat Cattle, the DERBY CONDITION POWDERS are especially suitable. Fed at short intervals to fattening cattle, they increase the activity of, and give tone to their digestive organs, causing less waste of food and quicker laying on of flesh. They prevent loss of cud, hoven or flatulent distension of the paunch, which kills many fattening cattle, and when once produced is very difficult to cure. For the disease among cows known as RED WATER, they are an absolute specific.

Seeing a notice of CLARK'S DERBY CONDITION POWDERS in the *Farmer*, that they were equally good for stock, and having already lost a number of cows this spring from RED WATER, I determined to try them. I had previously used another kind of Condition Powder without the desired effect. I had not given them more than a few doses when they began to mend, and they are now entirely over it. As this is a disorder generally considered among us difficult to cure, I think I would not be doing my duty if I did not acquaint my brother farmers that a remedy so simple and effective is so easily obtained.

JAS SLOOT,  
Lower Queensberry."

Given once a week to milch cows, they prevent bloody milk, which renders so many milch cows valueless except for the butcher. They keep the blood pure and the circulation equable, thus increasing both the quantity and the quality of the milk. They also keep the cow in good condition for breeding purposes, causing her to calve easily.

## DOW'S STURGEON OIL LINIMENT.

This celebrated chemical compound is the result of an extensive experience, with regard to the curative powers of all the known medicinal agents, and of a theoretical and practical knowledge of the various chemical affinities brought into play in their combination. By careful investigation and laborious research, the ingredients—having been selected with special reference to their different virtues and peculiar powers, and with an accurate knowledge of the various chemical reactions by which each could be made to modify and strengthen the other—were so compounded as to form a perfectly homogenous compound, possessing through its wonderful efficacy and manifold healing influences, an adaptation to a wide circle of diseases. The experience of years has fully demonstrated the skill of its composition and the superiority for all the purposes for which it was recommended. There is no one who has used this Liniment, and tested its curative powers, but what gives it preference over all other Liniments, which accounts for its popularity. It is valuable not only as a counter-irritant to draw pain and inflammation from the internal organs to the surface, thereby relieving deep-seated injuries and organic lesions, but will be specially useful in restoring the skin to a healthy condition in all those annoying affections, attended with inflammation and eruptions, but where the surface is not broken, such as FROST BITES, CHILBLAINS, BURNS, SCALDS, ERYSIPELAS, RINGWORMS, BOILS, FELONS, &c., &c.

For horses it is equally efficacious as for the human family, and has no equal. Farmers and Stable Keepers, and all who have the care of horses and cattle, should not fail to keep the STURGEON OIL LINIMENT constantly at hand, as it is the best application for external injuries on animals, and for almost all diseases to which they are liable, that has yet been discovered. We say this with perfect confidence, that all who may use it will corroborate the truth of our assertion. A discerning public is rapidly appreciating its unrivalled excellence, and as it becomes widely known its complete triumph will be rendered secure.

Invented as it was by a Physician in extensive practice in New Brunswick, and whose reputation for a knowledge of horse-flesh is co-extensive with the Province, it soon found its way into general use in livery and private stables for all the uses for which a Liniment is applicable.

For BRUISES, STRAINS, SADDLE and COLLAR GALLS, CUTS, WOUNDS of all kinds, SCRATCHES, SCURVY, CRACKED-HEELS and GREASE it was found to be an excellent ap-

plication, cooling down the inflammation, preventing proud flesh, and bringing about a speedy healing surface.

DOW'S STURGEON OIL LINIMENT is also a valuable strengthener for Weak Knees, giving tone to the cords and muscles of the knee.

Applied early to cases of Blood Spavin, it never fails to reduce the soreness and swelling, and if thoroughly applied often brings about a positive cure.

In Founder, Ringbone, and Hard Hoof, its virtues are well known and acknowledged by the most experienced horse owners. In fact it is not too much to say that for the ordinary diseases of horses and cattle, such as are most commonly met with, DOW'S STURGEON OIL LINIMENT and CLARK'S DERBY CONDITION POWDERS make one almost independent of the Veterinary Surgeon. The Liniment is applicable to all the external injuries, while the Derby Condition Powders keep the blood pure and the strength unimpaired.

Poll-Evil and Fistula in the Withers have been frequently cured by injecting the Sturgeon Oil Liniment in the fistulous pipes. It must be recollected in these cases that an opening must be made at the point where the matter gravitates, and kept open by a seton so as to allow a free exit for the matter. If this is done and the Sturgeon Oil Liniment is used by injecting it into the fistulous opening, a cure will be effected without fail.

WIND GALLS can be dissipated very frequently in one night by taking a pad of several thicknesses of old muslin and saturating it with the Sturgeon Oil Liniment and applying it to the WIND GALL, securing it in its place by a firm bandage.

CRACKED HEELS, SCRATCHES and GREASE, are all names for the same disease in the different stages of its progress. These are very troublesome affections, but are readily cured by the use of the Sturgeon Oil Liniment if strict cleanliness is observed. Before each application the affected parts must be washed with Castile soap and warm water, and thoroughly dried. In the several forms of the disease it would be well to add a drachm of alum or blue vitriol to a bottle of the Liniment.

In SAND CRACK the STURGEON OIL LINIMENT has been found an effectual cure. It will soften the hoof, prevent fungous granulation from the *sensible laminae*, and by anointing the coronet with the Liniment two or three times a day, it will stimulate a healthy secretion of the horn, and gradually obliterate the opening in the hoof. A hot iron should be applied to the angle of

the crack for a second, to prevent its further extension, and the hoof be bound with wax end.

Dow's Sturgeon Oil Liniment has never been puffed into favor—it has always pushed its way by its own merits, its inventor did not label it as good for such and such diseases, regardless of truth, but carefully trying it, where he found it useful he kept a note of it, trying it again in similar cases until he was sure of its efficacy. In this way he was led to use it in his practice for Neuralgia, Rheumatism, Contracted Joints, Lumbago, Sciatica, Cramp in Muscles, Sprains and Bruises, and for all these he found it a most valuable remedy, and now that it has been many years before the public, and its value thoroughly tested, he can still bear his testimony that he has found no other remedy in his wide experience which can do more good by external application than the Sturgeon Oil Liniment. He has seen contracted joints which seemed gone beyond hopes of recovery, yield gradually under its persistent use, in a way which astonished him, and the severest pains of Sciatica vanish like a dream under its soothing application. If for these diseases there be a better remedy than his Sturgeon Oil Liniment, he has yet to be informed of it.

ROCKVILLE, N.B., Nov. 8, 1876.

*Dr. Dow. Dear Sir*—Your STURGEON OIL LINIMENT is doing wonders here in the way of healing Rheumatics. Perhaps the most remarkable case is that of a neighbor of mine who has been suffering from Rheumatism some fifteen years. He is now well, and for the great blessing he now enjoys he is indebted, under Providence, to your Liniment. Send me another supply immediately. B. T. SHORT.

SPRINGFIELD, N.B., Dec. 15, 1876.

*Dr. Dow. Dear Sir*—Having tested the virtues of your STURGEON OIL LINIMENT in the cure of a most obstinate disease, I feel impelled to relate the particulars of my case for the benefit of persons similarly afflicted. The disease was at first acute or inflammatory, but became at last a most obstinate chronic complaint, defying all attempts at cure. During the whole of four years I was in more or less pain continually, and was confined to my room, or obliged to hobble on crutches at least six months in the year. After using one bottle of your LINIMENT I experienced great relief, both as regards pain and the use of my limbs. After using the second bottle I could walk out and attend to business. I feel it a duty and pleasure to send you the above few facts.

W. O. STEVENSON.

GRAND RIVER N.B. Feb 14 1876

*Dr. Dow. Dear Sir*—I never expected to be able to write such a letter as this, to say that I am clear of Rheumatism. I hardly knew what to make of it, after suffering excruciating pain for years. At every coming storm my whole body and joints were in the greatest possible torment man could bear, and somehow or other it always appeared to me as if nobody pitied a man with the rheumatism. However, thanks to you I now ask no man's pity on that score. I can do as good a day's work as I ever could. I used but two bottles of your STURGEON OIL LINIMENT, and now feel like another person.

W. H. BLACKMAN.

CHURCHVILLE, N.S., March 7, 1877.

*Dr. Dow. Dear Sir*—I have been afflicted with chronic Rheumatism for fifteen years, —ten out of the fifteen mostly helpless—at times not able to raise out of my chair without assistance. My limbs were swollen and joints stiff. I applied to all the physicians within my reach without benefit. I have used but three bottles of your STURGEON OIL LINIMENT, and am now as well as any person of my age (fifty-six). The pain and swellings of my limbs have disappeared. I can walk as well as ever I could in my life. D. W. REEVES.

SALMON RIVER, N.B., Dec. 5, 1876.

*Dr. Dow. Dear Sir*—Your STURGEON OIL LINIMENT cured me of Rheumatism of four years standing. I suffered with severe pains during a great part of the time. No other remedies could cure, or even do me any good. But your Liniment has, and my health is entirely re-established. That I should be sincerely grateful to you is natural enough, and I am, and that you will be rewarded is the sincere wish of

A. E. HOOD.

WELLINGTON, N.B., Dec. 12, 1876.

*Dr. Dow. Dear Sir*—About three years since I became a cripple from Rheumatism, through the indiscretion of bathing while overheated. My joints and limbs were drawn out of shape by the excruciating pain, and my general health was bad. Medicines did not reach my case until I used your STURGEON OIL LINIMENT. I gave it a trial and two bottles cured me. I am now free from the complaint, and even my distorted limbs are recovering their shape and pliancy.

J. P. MOFFATT.

ALMA, Dec. 6, 1876

*Dr. Dow. Dear Sir*—I suffered from the Rheumatism during last winter more than pen can write. I was bed-ridden all winter, suffering all tortures flesh can bear. It

makes me shudder to think of my pains with every change of weather. I tried all the Liniments and drops and sweating medicines to be got without any benefit whatever. Fortunately, a friend who knew its virtues brought me some of Dow's STURGEON OIL LINIMENT, and insisted on my using it. I did so, and began to mend rapidly. I gained eleven pounds of flesh in three weeks. I am now as well as ever.

C. M. BURROWS.

BROCKVILLE, Jan. 4, 1877.

*Dr. Dow, Dear Sir*—It affords me great pleasure to recommend to those who are unfortunately afflicted with Rheumatism—that terrible scourge of our race—your STURGEON OIL LINIMENT. For several years I have been a victim of that dreadful case; my sufferings at times seemed greater than I could endure. I had used every preparation which I thought could possibly relieve me, but continued getting worse. When your Liniment was brought me I was lying helpless on my bed, and had no faith in it helping such a case as mine. But I was induced to try one bottle of it, which, to my great joy, alleviated my distress. After using the second bottle, I was able to leave my bed and walk across the room. I am now quite restored, and able to take care of my family. With my best wishes for your success in your efforts to alleviate human suffering, I am, &c.,

DAVID HIGBY.

SIMONDS, N.B., March 22, 1877.

*Dr. Dow, Dear Sir*—I have long been the victim of Chronic Rheumatism, which so affected my joints as to render me almost helpless, and unfitted me to earn my living.

I used a great many kinds of medicine in the vain hope of getting relief, but derived no benefit from any of them. The disease obtained such a hold of my system, that it seemed impossible to remove it, and I feared that it would continue to afflict me as long as life remained. But fortunately for me I was urged to try your STURGEON OIL LINIMENT, and consented. I have used two bottles, which I am happy to inform you has entirely cured me, and I am on my feet again enjoying good health.

M. B. CHESTER.

*Mr. J. W. Brayley, Sir*—I hereby most willingly and with much pleasure record my testimony in favor of DR. DOW'S STURGEON OIL LINIMENT. A few weeks since I met with a serious accident, having been thrown from my waggon on a stone in the road, with my head downwards, cutting my head severely and quite stunning me. The wound was dressed and the Liniment applied and the application continued for a few days; my head soon got well. The Liniment seemed to have a peculiar soothing and healing influence. A neighbor of mine—John McGowan—was about the same time prostrated with a severe attack of Rheumatism in his back, and on my recommendation he sent and got a bottle of the same Liniment, and by a thorough application, only once, he was cured almost magically. The Rheumatism was fairly driven out, and has not troubled him since. I know it to be an excellent remedy for all trouble for which it is recommended.

WM. TAYLOR.
