THE PANGS OF REMORSE — OR — A COMPLICATED TANGLE.

CHAPTER VII

The first thing that met her view was Miss Lucas sitting in the armchair, with half closed, sleepy eyes, the embroidery, as usual, in her thin fingers.

She raised her gray, half-closed eyes with the calmest, coolest composure, and rose to draw a chair for her mistress.

Lilian stood with her hand upon the back of the chair, looking first at Sir Ralph, who was dozing in his favorite lounge, and then at the quiet, serene countenance of her companion.

Was there time for her to reach the drawing room, settle herself, and—oh! if hers was the figure she saw in the rosery, where were the thick shawl and hat?

Not hidden away in any part of the room, for there was no place that would have concealed them from Lilian's searching gaze.

It was a mystery, and she was on the point of asking her if she had been in the rosery when Sir Ralph yawned and awoke.

"Lilian, my dear," he said, "I am very sorry—I have been asleep."

She glided over to him and knelt by his knee, her face still thoughtful and puzzled.

"I have not been asleep long," he said, looking up at the Louis Quatorze timepiece, which, alas! his once-keen eyes could not now learn anything from.

"Exactly thirty-five minutes, Sir Ralph," reminded Miss Lucas, monotonously, without raising her eyes from her embroidery. "Exactly thirty-five minutes, for, ten minutes after you had fallen asleep, I remembered that I had come down without my letters and that I should lose the post if you did not wake."

She smiled with due humility. "Pray, why did you not see and see that were sent?" asked Sir Ralph. "I could not think of disturbing you for the sake of my own little letters."

from him would prompt me to death and eternity. Well, my reward comes. He will meet me in the shrubbery in the woods. I shall see him, hear him! Oh, little puppets whose lives he dangles and plays with, beware, for neither he nor I have mercy!"

CHAPTER VIII

At certain abrupt bends and curves in its course a river stream will run more quickly, as a cataract it dashes on its way, ignorant of the rocks below, blind with impetuosity.

Clarence Clifford's life stream had reached a bend, and it was rushing on swiftly, almost madly. Having broken from its anchorage, his life soon consisted of one uninterrupted course of pleasure.

Five thousand a year goes a long way if a man does not gamble and is in the slightest degree careful to live within his income.

Five thousand pounds furnished Clarence Clifford with a set of luxurious chambers, a good stock of hacks and hunters, a first-class valet, the entire to most of the best houses in town, and the membership of five principal clubs.

He could play billiards now and ride as well as Mr. Beant himself—better, perhaps, for Clarence Clifford knew no fear, and found pleasure in riding a hard-mouthed, iron-limbed gray, the terror of the stablemen and the admiration of the Row.

Only those who have tried the adjuncts know how much good and fashionable dress, the sense of power bestowed by wealth and the regular intercourse with men of the highest breeding do towards finishing nature's noblemen.

Clarence Clifford was handsome enough, haughty enough, daring enough, and, to quote Miss Dalton—"hard-hearted enough."

See him as he enters the salon of the Sparkletons, who have not yet given up their petite conversations and well-appointed dinners. Quick of eye, yet outwardly haughtily indifferent, his well-set limbs—hardened by exercise—posed well with natural grace, one white, strong hand grasping his crush hat, while the other strokes the thick moustache that helps with the hand to hide the irrepressible smile of scorn and heart-weariness upon his clear-cut lips.

"My dear Mr. Clifford, how do you do?" exclaims Miss Dalton, welcoming him with empressment. "I thought you were never coming. Isn't it crowded?"—in a whisper—"pity the dear Sparkletons get such herds and flocks."

"Do you think so? Perhaps we should not be here unless they did," was the cool reply. "You do not look warm—nor crowded," he added, dropping into the seat beside her with the assurance of a man who knows it has been reserved for him.

"And there is little fear of your being anything else," she retorts, amiably; "but the most provoking man one meets. Were you ever out of countenance?"

His face looked grave for a second, but the next the usual look of far-away haughty nonchalance sat upon it.

"Oh, yes, often; when I am listening, for instance, to such a wonder as that young man"—and he nodded sarcastically at the grand pianoforte, at which a Herr Somebody or other was exhibiting the usual fireworks.

"Oh, satirical!" replied the young lady. "Do you not admire anything?"

"Oh, yes, all ladies, and, of course—"

(To be continued.)

His face looked grave for a second, but the next the usual look of far-away haughty nonchalance sat upon it.

"Oh, yes, often; when I am listening, for instance, to such a wonder as that young man"—and he nodded sarcastically at the grand pianoforte, at which a Herr Somebody or other was exhibiting the usual fireworks.

"Oh, satirical!" replied the young lady. "Do you not admire anything?"

"Oh, yes, all ladies, and, of course—"

(To be continued.)

With a smile that a victorious diplomat would not have been ashamed to own, the quiet governess raised the outer skirt of her dress and daintily fastened the shawl and the hat, unlocked her drawer and placed them carefully away.

"A narrow escape!" she muttered, looking at herself in the glass and setting her lips. "Three minutes later and she would have missed me from the drawing room; perhaps met me in the hall. Ah, but who would not go through fifty such escapes, through fire and water for a word from him?"

If those two, dotting father and love-sick girl, could have felt my heart throbbing, my ears tingling with the mad passion his presence fires me with, they would have known what love is. How grand he looked! A knave, a clever knave, he called himself, and child me for calling him noble good and kindly. A knave! Then I love a knave, more than all the saints in the calendar. What a mind! My poor, narrow one shrink within me while I heard his low voice unfolding his plan. His plan! My plan, he called it, knowing that a word of praise

What is Will-Power

Most things in life—the joys as well as the griefs—are mixed up with other people. But will-power is exercised alone.

To ask anybody to help you to strengthen your will is foolish and useless. It is entirely a private affair, and he who is engaged on this difficult and life-long task should never speak about it to anyone. Our friends and acquaintances will soon find out that we are exercising will-power. It shows itself, mysteriously, like good thoughts.

Some may be annoyed; some may scoff, but they will not be able to withhold their respect.

What is will-power? It is simply making the inclinations play second fiddle to the will; it is, when wisdom has decreed a certain course, forcing ourselves to follow that course.

Let me take a simple case. Suppose I decide overnight that I will get up on the following morning at a certain minute when the clock strikes. And suppose, when the clock strikes, I lie in bed for another ten minutes, and then get up and hurry. That in itself may not seem a very grave fault. But it is. Because every failure of the will makes it more difficult to conquer the next time.

A well-known man of science once said in my hearing: "If I say that I will get up one morning at seven, and do not get up until half-past seven, that minor negligence may be the cause of my committing a great crime twenty years hence."

By this he meant that this early failure of the will led to other and other failures, until in the course of time his will had become so weak that he was not able to resist the temptation to commit the great crime.

Will-power is formed by an accumulation of victories in little things. At the time they may seem trifling, but it is victory in these trifles that enables us to meet the great moment when it comes. For all the lowly as well as the mighty, must, at some time or another, be called upon to face their great moment when the will has to direct destiny.

What is the advantage of strengthening the will by this constant and difficult watchfulness? Apart from the inward joy that comes from these silent victories, the strengthening of the will gets one on in the world and opens the way to happiness. For happiness never comes by searching for it; it is a by-product as it were; it comes sideways from doing something else as well as we can, such as day in and day out cultivating the will-power.

Now let me sound a note of warning. Will-power is not obstinacy. If you find that what you thought was will-power is becoming obstinacy, and hurting those you love, wipe the slate clean and begin again.

Finally, remember that if you want to fashion your will into something fine and strong, begin at once, and begin with the little things.

Reservoir a Fleet Could Anchor in

6,750,000 Gallons of Water Opened By The King. Standing by The Queen on a tower overlooking London's new reservoir at Littleton, near Laleham, Middlesex, the King pressed a button and immediately a torrent of water leaped and foamed beneath him, pouring into a basin nearly 800 acres in area.

When the basin is filled—an operation which, it is estimated, will take about three months—it will contain 6,750,000 gallons of water to a depth of about 40 ft. A cost of \$2,145,304 has been involved in its construction, and to make room for the

reservoir part of the village of Littleton was demolished, while the River Ash at one point had to be diverted.

At the opening ceremony a place affording a sight of the King and Queen was reserved for the children who lived in the old cottages.

Among those who were presented to the King was Mr. Henry Edward Stilgoe, the Metropolitan Water Board's chief engineer, who in 1919 took over the task of constructing the reservoir after the death of Sir James Reister, the board's former chief engineer.

The work was begun in 1914, but owing to the war was suspended for two years.

A Month's Supply In an address to the King, Mr. C. G. Musgrave, chairman of the board, said that, when filled, the reservoir could provide anchorage for a fleet of battleships.

"It is larger than all the other Thames Valley reservoirs put together," he added, "and will hold enough water to supply the capital's seven million inhabitants for a month."

Replying, the King said: "The health and comfort of more than seven millions of my people depend very largely on the water supplies which you administer, and it is most reassuring that no longer any anxiety exists lest their supplies be cut off by drought."—Daily Mail.

800 Added to Unemployed by Closing of Sydney Billet Mills

Canadian Parliament Prorogued--Earl Haig Receives Great Reception in Montreal.

800 ADDED TO CAPE BRETON'S UNEMPLOYED.

SYDNEY, N.S., June 28. Eight hundred men are being added to Cape Breton's unemployed by the closing down on Saturday of the Blooming and Milling of the Sydney Steel Plant of the British Empire Steel Corporation, and the closing of the blast furnace and open hearths next Tuesday. The Rode and Wire Mills will operate on a four-day basis, beginning to-morrow. Slack orders were the reason given with the announcement from the general offices of the Corporation. J. E. McLaughlin is in Montreal and no other comment or particulars are given.

The colliery districts remain quiet and there is no apparent change in the situation affecting the Corporation and their miners who now approach four months of idleness. The two parties seem still widely separated on the Corporation's proposals based they say on economic demands for a ten per cent. wage reduction from the 1924 wage rates and some other features to which the miners do not agree. With the change in the Provincial Government, some two weeks away, it is not thought any action by the Province to bring the parties together can be taken until that time, and short of the disputants themselves getting together the only apparent hope of any new development lies in a possible visit by Hon. James Murdock, Minister of Labor.

HAIG RECEPTION AT MONTREAL.

MONTREAL, June 28. Field Marshal Earl Haig and his Countess, accompanied by a distinguished party of representatives of the British Empire Service League, with representatives from every part of the Province, arrived here on the steamer Letitia and was given a great reception. Before leaving this morning for Ottawa, where he will preside over the annual meeting of the League and that of the Great War Veterans' Association of Canada, in a statement to the press, the Field Marshal emphasized the value of unity in solving the problems affecting ex-service men and expressed the hope that the Ottawa Conference would be productive of happy results to the Veterans of Canada.

PROGRESSIVES FIX UP DIFFERENCES.

OTTAWA, June 28. A basis for co-operative effort has been reached between the main group of Progressives, according to an announcement yesterday by Robert Forke, Progressive leader, who declared that the Progressive group was

Can't do Without MINARD'S

"When we came back to England we brought a bottle of Minard's with us, but since then we can't get any liniment to come up to it. Will you please write and let us know how much it would cost to have 100 bottles sent over." MRS. R. ADAMS, Old Town, Hastings, England. We receive dozens of letters from far away countries asking for Minard's. For sprains, bruises, burns, colds, inflammation, etc., it has no equal. MINARD'S LINIMENT.

RAILWAYMAN DEAD.

MONTREAL, June 28. W. B. Howard, General Executive Assistant of the Canadian Pacific Railways, died at his residence here at four-thirty this afternoon.

BOWDOIN LEFT SATURDAY.

SYDNEY, June 27. The Arctic exploration schooner Bowdoin left Sydney this morning on her way north.

CANADIAN PARLIAMENT PROROGUED.

OTTAWA, June 27. Right Hon. F. A. Anglin, Deputy Governor General, to-day formally prorogued the fourth session of Canada's fourteenth parliament. The end came in the Commons humorously and shorn of some of the traditional ceremony. The death of Col. E. J. Chambers since the opening had left Parliament without a black rod whose picturesque duty it is to summon the Commons with many bows to Senate, there to attend the end of the session. This morning there were no three resounding knocks at the door of the Commons. An assistant of the Upper House merely conveyed a written message to the Bar of the Commons where he was met by the Assistant Clerk of the House. Speaker Lemieux arose to announce that the Deputy Governor awaited immediate attention of the Commons in the Senate. Mr. Meighen intervened with a question asking what the Government was going to do about the promise to bring down the details of the expenditure on the ocean rates inquiry. In the midst of Mr. Meighen's efforts to obtain the desired information, Speaker Lemieux left the House and business for the Commons was at an end. There was a general laugh over the unusual incident. The Senate adjourned during pleasure.

BANK DIRECTORS CONVICTIONS QUASHED.

TORONTO, June 27. Convictions registered against the Directors of the Home Bank of Canada, by the Senior County Judge, Emerson Coatsworth, under the Bank Act proceedings, instituted following the failure of the Bank in August, 1923, were quashed by the first appellate division of the Supreme Court of Ontario in the judgment handed down this morning. The Home Bank sentences were, Chas. A. Barnard, 18 months plus six months indeterminate; Richard F. Gough, one year and one year indeterminate; S. Casey Wood, six months and six months indeterminate; J. F. M. Stewart, four months and four months indeterminate; and Clarence F. Smith, six months and six months indeterminate.

Rails Disposed of

A deal with the Gason Co., of St. John, N.B., was closed on Saturday, whereby all the old rails now being removed from the track between St. John's and Clarendville were disposed of for a sum in the vicinity of \$100,000. The contract in the above sale was signed at a meeting of the Railway Commission Saturday afternoon, and the company will take delivery from loaded cars.

Offered a Count; a Millionaire or a Boy

WHICH WOULD YOU MARRY?

Sara Lansdale was a typical American girl. She and her mother had been living together since the death of her father. He had left them sufficient money to keep up appearances but not enough to indulge in the extravagances of the class of society in which they were received. Sara was brilliant, without being smart. She was vivacious, but not fresh. She loved luxury but had good taste. She had taken life by the scruff of the neck and was shaking every innocent thrill out of it when into her life came three men and she was confronted with the serious problem:

"Which one shall I marry?"

Count Cott Desanges was the wealthiest bachelor in France. He was athletic in build and an all-round sportsman. He owned a racing stable that was the pride of France. His chateau was one of the showplaces in the centre of the French racing activities. And he had a title.

Charles Carleton was a dashing American millionaire from California. He, also, was an athlete and an all-round sportsman. His American horses swept everything before them. He was handsome and women worshipped the ground he walked on. Seeing what he wanted, he took it, leaving behind him a trail of broken hearts.

Julian Greer was young, almost

boyish. He had never really been in love and had not lost the illusions of his extreme youth. Since graduating from college he had worked continually with his father and would eventually be equally as wealthy as the others. He, too, was handsome and athletic but had been protected more or less by his father from the wiles of ambitious women. He loved life, took it seriously and lived it well.

These are the three men who came into Sara Lansdale's life. One of them she thought she loved, one of them she did love and one of them she married, in the First National picture, "In Every Woman's Life," which is now being shown at the Star Theatre.

None Should Miss "The Age of Innocence"

TO-NIGHT'S BIG ATTRACTION AT THE NICKEL THEATRE.

Nothing less than the Pulitzer Prize novel, "The Age of Innocence," by Edith Wharton, furnishes the story that will be offered movie patrons by the Nickel Theatre, to-night, at which time the screen translation of this popular book will be shown.

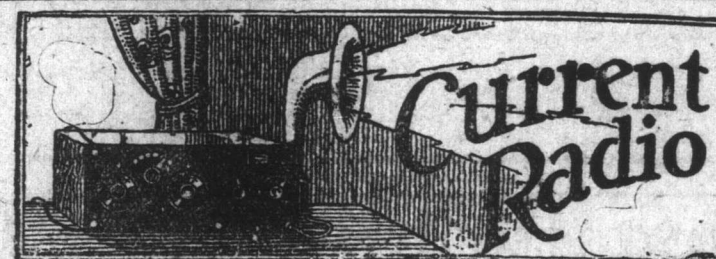

When it is remembered that Miss Wharton's novel, "The Age of Innocence," was chosen from amongst thousands of others as the best piece of literature published in 1922, the depth and merit of the story can very readily be appreciated. The plot is unusually interesting and deals with

the novel experiences of a Russian Countess, who attempts to acclimate herself to the conventionalities of aristocratic New York, finding romance hedged about by restrictions that seem absurd and meaningless to her European code of living.

The novel calls for some characterizations of cameo clearness, and it seems that Warner Bros. have been particularly happy in their selection of Beverly Bayne and Elliott Dexter,

both favorites of long standing, to portray the central figures, around which Willard Louis, Edith Roberts, Stuart Holmes, Rosa Rosanova, Fred Huntley, Gertrude Norman and many other notables weave the gripping story of love, that most poignant of all human emotions.

The direction of this popular novel was entrusted to Wesley Ruggles and his assistant, Doran Cox.

The Honeycomb Coil Receiver

EDITED BY JOHN M. CLAYTON.

A lot of people still use honeycomb coils in regenerative broadcast receivers. They do make up a most flexible receiver and are not so bad for broadcast reception if the coil mountings and the plugs on the coils are moulded from good material. Beware of either coil mountings or coil plugs which melt when a soldering iron is touched to them. Most modern honeycomb sets do not have these "mud" mountings and are quite satisfactory even on the broadcast bands. Above 600 meters the honeycomb coils are ideal for a long wave receiver they are as good as any form of coil.

In our diagram above we show the standard one-tube hook-up for a honeycomb coil set. The series antenna condenser should have a capacity of from .005 to .001 mfd. The rotor plates, as usual, should be connected to ground and the rotor plates of the secondary tuning condenser should be connected to the filament circuit. The secondary condenser should be a .0005 mfd. variable condenser with a vernier dial or gear.

Copyright, 1925, by The American Radio Relay League, Inc.

It is customary to use the center mounting in a honeycomb coil set as the secondary, the left mounting as the primary and the right as the tickler. The tickler terminals must be "poled" properly or the set will not regenerate. If it doesn't, reverse the two tickler leads.

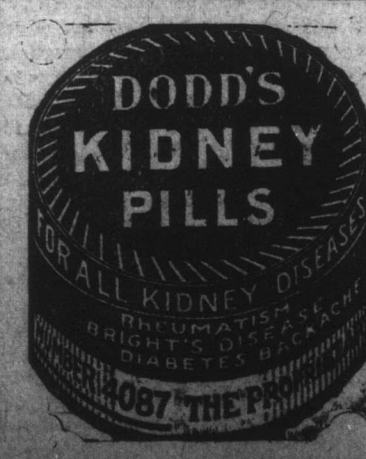

In our diagram shown above there is no by-pass condenser from the phones to the A battery. The capacity of the phone cord and the windings of the phones themselves usually is sufficient to act as a good by-pass condenser. If any audio-frequency amplification is used the primary of the first transformer should be connected in to the circuit in place of the head-set, and a by-pass condenser having a capacity of .002 mfd. should be shunted across the plate side of the transformer to the "grounded" side of the filament circuit.

For the broadcast wavelength band a secondary of 75 turns will be satisfactory together with a 25 or 50 turn tickler. The primary coil will vary from 25 to 75 turns, depending on the size of your antenna.

Confirmation at St. Patrick's

The Sacrament of Confirmation was administered to two hundred and sixteen children at St. Patrick's Church yesterday afternoon by His Grace Archbishop Roche, Miss K. McFarlane and Mr. John Doyle were sponsors. His Grace was assisted by Rev. Dr. Kitchin and priests of the parish.

The broad-brimmed hat arrives, as son as the summer sun becomes too hot to be endured. Generally, it is lower-trimmed.

The BROADWAY HOUSE of FASHION

"A STORE FOR EVERYBODY"

Under the Jolly Roger!

NARRATIVES OF THE HIGH SEAS IN THE DAYS OF THE BUCCANERS.

By NEVILL CORBETTE.

The remote and the romantic always make a strong appeal to the imagination, and stories about the old Buccaneers are ever popular. But, as with most tales of "the good old days," the truth has become somewhat hidden under the cloak of fiction. The adventure, as retailed by the novelist, are nowadays often accepted as fact—though, truth being proverbially stronger than fiction, it is surprising that the true stories of those who sailed under the Jolly Roger are not better known.

As an example of the bold and fearless men who wrought havoc upon the high seas, who lived only for ad-

venture, wealth, and pleasure, Henry Morgan stands prominent. In spite of his brutal and unscrupulous nature, he rose from slave boy to be Sir Henry Morgan, Lieut.-Governor of Jamaica, and the friend and intimate of the King of England. And this he accomplished via the quarter-deck of a pirate ship.

A Welsh Boy.

Henry Morgan was born at Llanrhymny, Glamorganshire, about the year 1635. As a boy, he was kidnapped at the port of Bristol, and sold into slavery in the Barbadoes.

Having served his time, he went to Jamaica, where he presently joined one Sparks, a notorious corsair.

After half-a-dozen successful voyages with this buccaner, Morgan had amassed enough money to join with some fellow spirits in buying and fitting out a vessel of their own. Such was his enterprise and fearless na-

ture, and the esteem in which he was held by his comrades, that the ambitious Welshman was elected to captain the ship.

From their very first adventure the pirates were well rewarded; and Morgan soon acquired a reputation amongst the many buccaners who, at the time, infested the West Indies.

It was not long before his doings came under the notice of Mansfield, the "admiral" of a fleet of pirate vessels, who held an unofficial commission from the Governor of Jamaica to carry out raids on the Spanish settlements, and in return was allowed to use the British Harbours in the West Indies without molestation, and to keep what plunder he came by.

This Mansfield was so struck by the ability of Henry Morgan that, before long, he made him the "vice-admiral" of his fleet.

With five hundred men, in fifteen ships, they captured the island of

Santa Catalina, off the coast of Costa Rica. The Spanish garrison was forced to surrender at the point of the sword; and the buccaners built a bridge to a neighbouring island in order to carry it by assault.

A garrison was then left to hold both islands as a base for the pirates; and the slaves were set free, and the Spanish prisoners taken into slavery in their place. The buccaners then sailed away to harry the coast of Costa Rica.

Elected "Admiral."

But this was Mansfield's last adventure, for shortly afterwards he fell into the hands of the Spaniards, who put him to death.

Then it was that Henry Morgan was elected "admiral" of the buccaners, and at once began to make his name one of fear and dread along the coasts of the Spanish Main.

It was feared that the Spaniards

were about to invade Jamaica, and Modyford, the Governor, commissioned Morgan to raid the Spanish settlements, take prisoners, and discover the truth about the rumour.

Morgan collected twelve ships and seven hundred men to the south of Cuba, and sailed on his enterprise. His objective was the town of Puerto del Principe, and he anchored his fleet in the bay of Puerto de Santa Maria. But a Spanish prisoner managed to effect his escape, and, swimming ashore, gave the alarm. Ambuscades were prepared, and everything was arranged to give the buccaners a hot reception.

Morgan, however, realized the tactics that would be employed. Therefore he landed his sea rovers at another place, and, making a forced march through the wood, launched his attack from an unexpected quarter.

The steady musketry of the buccaners cut up the hostile Spanish cavalry who, perceiving the surprise attack, had made a charge across the plain at the rear of the town. The fortifications were taken by storm.

Morgan's men then locked the prisoners up in the churches, and left them to starve whilst they fell to plundering the town and indulging in riotous orgies. In addition to sacking Puerto del Principe, Morgan demanded a ransom of 50,000 "pieces of eight" to save the town from being burned to the ground.

After this adventure, Morgan fell out with his French adherents over the division of the spoils, and eventually returned to Jamaica with only the English rovers to man his ships.

Wholesale Slaughter.

With a fleet of nine ships, Morgan next sailed for Puerto Velo, where he landed his buccaners and marched on the city. His advance party took the

sentries by surprise, and the outer defences were easily overcome. There were, however, two castles, whose garrisons put up a stout resistance. Eventually, one of these fell, and the surviving members of the garrison, whom it had been intended to put to the sword, were herded into one large room. Then the pirates blew 'em up, every mother's son, castle and all, into the air—which, says the buccaner Exquemeling, who was present, "was much the better way of the two."

In order to storm the remaining castle, Morgan had a number of scaling-ladders made, wide enough to accommodate three or four men at once. He forced the Monks and nuns of the town to carry these forward, and erect them against the walls. When the ladders were in position, Morgan's men carried the defences at the point of the sword. The buccaners, finding themselves masters of the town,

indulged in every wild excess. The scenes of debauchery are indescribable. With daybreak, however, Morgan found that there was not as much plunder as he had hoped for. So the inhabitants were put to the most fiendish tortures, until they would reveal where their wealth was hidden. In addition, an enormous tax of 1000,000 pieces of eight was levied to save the buildings from being razed to the ground.

News of the attack was presently brought to the Governor of Panama, who set out with a large force to drive off the pirates. But Morgan, with an admirable display of tactics, ambushed the Spaniards in a narrow pass, and routed them. When the buccaners finally left the town, they sailed away from Jamaica to spend their share of the booty.

The Taking Of Maracaibo.

That Morgan was not only a bold adventurer, but a tactician of no mean order, was shown on his next enterprise—the taking of Maracaibo, and the forcing of the passage into the lake of that name. Defences, considered impregnable, guarded the mouth of the river, which connected the lake with the sea. The Spanish garrison was fully prepared for a bombardment from Morgan's ships, but the wily buccaner landed his troops during the night. The garrison promptly fled; and at daybreak the Welshman found that Maracaibo itself had been abandoned by its inhabitants, who had sought refuge in the

woods. But for a stroke of luck, however, a different tale might have had to be told. One of the garrison, more enterprising than the rest, lit a fuse attached to the powder magazine. The pirate crew would have been blown sky-high, had not one of their number, in search for loot, discovered the flame, and stamped it out.

During the days that followed, the buccaners scoured the country, hoping to take prisoners who would enable them to discover where the wealth of the rich merchants was hidden. Those who did fall into their hands were subjected to fiendish tortures, but all the pirates were able to discover was merchandise—certainly valuable, but too bulky and needing transportation to turn it into cash. One unfortunate peasant, who volunteered to lead Morgan to the Span-

iard's hiding-places, lost his way, whereupon the buccaners promptly hanged him to a tree "for betraying them."

For three weeks, Morgan's men occupied the town of Maracaibo, filling their ships with what plunder they found, before they sailed up the lake to the town of Gibraltar. This place was ransacked also, and spent another five weeks in riotous living.

Later, news was brought to Morgan that three Spanish men-of-war had arrived at the mouth of the river, and had re-occupied the forts.

Here was a critical situation for the Welshman. He and his rovers were caught like rats in a trap. For without his big ships, he could never hope to return to Jamaica to enjoy the fruits of his fighting. With the

Spaniards blocking the only exit to the sea the position seemed well-nigh hopeless. But, Morgan ever believed in taking the boldest course. So, he sailed down the lake, and found the Spanish ships had come up the river, and were awaiting him at the entrance of the narrows.

The pirate chief promptly summoned the captains of his three ships, and explained his plan. It was no less than to employ the tactics of Sir Francis Drake, and use a fire-ship. A vessel which had been lying at Gibraltar, was brought down the lake, filled with inflammable material, set alight, and driven on to the enemy. In the confusion which followed, one of the Spanish men-of-war ran aground, and was deserted by her crew; another was sunk; and the third was boarded by the buccaners, who put her crew to the sword.

Before Morgan's ships could reach the open sea, however, there were still the forts to contend with. These had been strengthened and re-fortified. Morgan, however, carried through the situation by a gigantic piece of bluff.

At dusk, but when it was still light enough for the garrison to see his movements, he landed his men in boats. At least, the Spaniards saw each boat-landed upon the shore. But they did not see the buccaners returning to their ships after dark; and, thinking that Morgan intended a surprise attack in the rear of the forts, moved most of their cannon to protect this vulnerable position. As soon as Morgan found that his bluff had worked, he weighed anchor, and calmly sailing down the river, past the embrasures which shortly before had contained sufficient guns to blow all his ships to bits. When morning

came, the pirates were well on the way to Jamaica.

Reproved And Promoted.

On his way to Port Royal, Kingston, however, Morgan was reproved for exceeding the terms of his commissions were considerably strained in the West Indies, and as practically the only means of protecting British interests were in private hands, Modyford presently appointed the buccaner to be "Commander-in-Chief of all the ships of war of Jamaica."

Neither Morgan nor his men were to receive any pay for the upkeep of their vessels. But all plunder that they might take from the enemy might be theirs—which in practice meant that any acts of piracy would be countenanced by the British Government.

Morgan sailed from Port Royal on August 14, 1670, and made his base at

Cow Island, to the south of Cuba. Ever since his encounter with the Governor of Panama, after the sacking of Puerto Velo, Morgan had dreamed of carrying out an assault on the city of Panama itself. And he now began to put his plans in operation. As a preliminary, he recaptured the island of Catalina. From this advance base he proceeded to the mainland, where his men stormed the Castle of Chegre, and carried it by a lightning assault. Then he began his advance overland to Panama City.

The Spaniards had news of the buccaner's coming, and drew up their forces on a large plain. Having already had one encounter with the terrible Welsh pirate, the Governor was now taking no chances. He, therefore, ordered large herds of bulls to be driven towards the advancing buccaners, hoping thereby to break their

ranks, and make an easy opening for his cavalry. But he did not reckon upon the expert maneuvers of the searovers, who poured deadly volleys into the oncoming cattle—so much so that the animals turned about and stampeded into the Spanish forces!

There followed a hand-to-hand encounter where soldiers, pirates, riding less horses, and terrified bulls were mixed in confusion. Two hours later the forces of Spain threw down their arms. The buccaners then continued their advance on the city, which was soon in flames.

When the pirates returned to Chegre, Morgan quarrelled with his captains over the share-out of the booty, and eventually sailed for Jamaica in his own ship, leaving the others behind. At Port Royal the buccaner received

(Continued on page 7.)

Parliament of the Empire

A VISIT TO NEWFOUNDLAND.

The Newfoundland Branch of the Empire Parliamentary Association have invited the United Kingdom Branch to send a deputation of 12 members to visit Newfoundland during the summer recess. The executive committee of the United Kingdom Branch have accepted the invitation, and have expressed their warm thanks to the Newfoundland Branch.

Though the United Kingdom branch have from time to time sent delegations to the Dominion, this is the first time that a delegation has been arranged to Newfoundland. During the visit an informal conference will be held at St. John's, when matters of common interest to the Parliaments of Newfoundland and the United Kingdom will be discussed. While in the country the delegates will be the guests of the Newfoundland Government, and the invitation has the full support of all the political parties. A visit will probably be paid to the new paper mills on the West Coast, and to other points of interest. Though no definite arrangements have yet been made, it is probable that a delegation will visit Australia next year.

At a meeting of the executive committee of the United Kingdom Branch, on the motion of Mr. J. H. Thomas, the retiring chairman, Mr. Amery, the Colonial Secretary, and one of the treasurers of the branch, was unanimously elected chairman. Lord Burnham was re-elected deputy chairman of the committee.—London Times, June 17.

World-Known Feature at the Majestic

FATHER AND SON RIVALS IN "MY WIFE AND I"

The bond between father and son is difficult to break, no matter what the provocation. There is a certain pliancy between the two that transcends any petty quarrelling that might otherwise disrupt the harmony between them, as in "My Wife and I," the new Warner "Classic of the Screen" that will be shown at the Majestic Theatre tonight.

The relation between Gordon, Sr., and Gordon, Jr., was one of tolerant love, with the father rather amused by his son's extravagant pleasures and the boy accepting his dad's unquestioning acquiescence as a matter of course.

Both the father and son desire the love of Betty, a beautiful, glided lily of easy morals, who is portrayed by Constance Bennett, the vamp of a hundred movies.

Both Gordon, Sr., and his son grow more indiscreet and reckless in their game for love, until Irene Rich, who plays the featured role of mother and wife, solves the problem in a way that is entirely new and effective.

The following stars are in the cast: Irene Rich, Huntly Gordon, John Harron, John Roche, Constance Bennett, Tim Ricketts, Claire de Lorez.

"My Wife and I" is a nine part melodrama. Admission to any seat on the theatre, twenty cents.

In Memory of the Fallen

UNIQUE MEMORIAL UNVEILED AT BEAUMONT HAMEL.

One of the most remarkable war memorials to be found anywhere on the Western front is the park at Beaumont Hamel. It has been dedicated to the memory of the 29th Division and the Newfoundlanders who fell in the Somme battles, and was inaugurated by Field-Marshal Earl Haig in the presence of a large attendance, which included Marshal Foyolle. The park covers 100 acres, and remains—as far as the healing hand of Nature will allow it—scarred and mutilated as it was in the war. The ground was purchased by Colonel Nangle, who commanded the Newfoundland troops, and it contains a large bronze statue of a caribou, the native deer, which stands as a symbol of Newfoundland. The two marshals met at Albert, and were received at the entrance to the park by Colonel Nangle. After a short service, which concluded with the benediction, speeches were delivered by Hon. J. R. Bennett, Colonial Secretary of Newfoundland, by Earl Haig, and by Marshal Foyolle, all of whom referred to the great friendship between the French and British nations, and expressed the wish that the bonds cemented in war would be strengthened in peace. After the ceremony the two marshals inspected a guard of honour of French troops and veterans of the 29th Division. Then in the celebrated Y ravine the bugles rang out "Last Post," and an impressive two minutes silence followed.

Note.—In inaccuracies in the above (in heavy type) are obviously the fault of an overzealous news correspondent.

Underground Peril

Tokio Menaced by Railway Excavations.

The Tokio municipality and two private companies are planning to construct 41 miles of underground railways in Tokio, at a cost of about £13,700,000, and work upon one of the short systems has already begun, but a cry of warning has gone up and all work may be stopped until there is an investigation.

The Tokio streets will not stand being undermined, especially as the plans call for open ditch work, to be later filled in, and not for subterranean borings. Tokio is so close to sea level that deep "tubes" are out of the question. It is now believed that to trench the streets will result in a settlement of the ground.

The city has been installing a sewer system, the main sewers being 10ft. affairs requiring deep excavation, and it has been discovered that in some cases the streets have sunk a foot. Pavements have been stirred around as if by an earthquake, and on some streets the concrete pavement has been dropped and cracked into great uneven blocks.

There's nothing quite so soothing to the throat as...

What England Has Taught the World

By ARCHIBALD MARSHALL.

During the war I was watching some French soldiers in puttees kicking a football about. "There are two things," said my companion, "that England has put all over the world—football and puttees." And that led us to think of other things in which our lead had been universally followed. I remember that we mentioned Boy Scouts, the Salvation Army, and the Sam Browne belt.

A nation's pre-eminence is shown as much in the little things in which its lead is followed as in the big things—perhaps more. What other nation's example has been followed in so many respects as England's? We have given to the world most of its games and sports. Lawn tennis began in England; so did Bridge. Golf is a Scottish game in its origins, but it had been played in Scotland for centuries before it began to spread everywhere, and it did that when England took it up.

We have never made a universal game of cricket, which seems to belong only to people of our own temperament and is hardly played even in Scotland, Ireland, or Wales.

In the matter of men's clothes we exercise an unassailable example. In the Italian seaside towns from which I am writing the young men are going about in recognizable varieties of the Norfolk jacket, though I must admit that their remarkable coiffures seem to owe more inspiration to the Zulu. The higher you go in the social scale the nearer you get to the English pattern, so that a well-dressed foreigner is hardly distinguishable from an Englishman gentleman.

One outstanding characteristic of the Englishman abroad is that when he settles himself he runs his life on English lines, with no more than a flavour of the country in which he takes up his residence. Not only that, but if he settles in any place in sufficient numbers he draws the natives of his own sort into his ways.

In France, Italy, before the war in Germany and Austria, and to a lesser degree in other countries, English colonies have flourished in a way that no other nation has even approached. Germans were to be found in great numbers and are now returning to France and Italy; but they were always a race apart and are so more than ever now. Even the Americans don't "put it over" as the English do. You have only to imagine a group of any other nation whatever settling themselves, let us say, in Brighton or Llandudno, with their own clubs to which we should be proud to be invited, their own games, in which we should join, and their own national habits, to see that there is no other side to the picture at all. We can do what no other nation can do in this respect, and take it as quite a natural thing that we should do it.

Doing His Bit

During the recent Prohibition plebiscite in Ontario, a prominent Ottawa man, who is an ardent prohibitionist, was surprised by a visit at his office of his small barelegged son.

"Hello, young man," the father said. "What brought you to town?"

"I was in a parade," the little boy said proudly.

"What parade?" asked the father. "I don't know," he answered; "but I carried a big sign."

"What was on the sign?" asked the man curiously, and almost collapsed as his son replied:

"MY FATHER'S A DRUNKARD! I've got no shoes!"—Everybody's.

Bishop Fleming's Letter

The following is the late Bishop Fleming's letter to which reference was made on Thursday by Miss Morris, in her address at the Rotary luncheon:

Letter from Bishop Fleming to the President of the Mechanics' Society. Dear Mr. Maher—I have long observed with a feeling of pleasure the steady and calm movement of the Incorporated Society of Mechanics towards the improvement of St. John's generally. I lent my feeble aid to the organization of that Society, and always felt gratified at my identification with their interests, but I confess I now feel proud of them. It is now indeed they make the first great movement towards the mental elevation of Society.

I need not say how heartily I approve of your resolution to establish a Library and Reading Room, and I am sure that when your design is understood of affording to the public so valuable an opportunity of drawing together usefully, men of every shade of politics, and of all religions; there are many who will step forward to assist you liberally, in your benevolent and praiseworthy undertaking.

In laying down a code of rules, for the government of this new Institution, therefore allow me to suggest to you, in the first place, to be careful to make them as few and as simple as possible, and in the next that they should all tend to attract men of different—even of discordant opinions, to avail themselves of the advantages you hold out to them, and to secure them the benefit brought together from all dangers of discord or dissension.

It may appear to the unreflecting that we are too sanguine in our expectations, when we anticipate from such silent re-unions, a kindly blending of the elements of society, but when we reflect what creatures of habit and associates we are, we perceive that association alone has much to do in producing these dispositions, while we know that conversation, particularly when rendered acid by dissipation has too often a contrary effect. But who is there that can, night after night, sit in your Reading Room, and observe around him, men from whom he was in the habit of differing, (applied studiously and perseveringly to the cultivation of their minds), and will not gradually begin to feel he has mistaken their true character, or his own and over whose spirit the most benign influences will not fall slowly to descend, awakening kindness and consideration, and reflection within, and diffusing around a Christian union, cemented around a Christian union, cemented by fraternal affection.

There is nothing more calculated to demoralize, than those petty bickerings (the result of ignorance), which flow from national or provincial divisions—why should we exclude from that love which our Divine Master taught us towards all any man because he does not worship as we worship, or because he was not born where we were born? Indeed it is difficult not to feel that our race here is too rapid to permit us without eternal ruin to hate one and the other, and you therefore in bringing about that men shall meet there in quiet, in calm and in thoughtful, either drawing from the wise and learned, lessons of prudence and intelligence, or deriving from reflection and observation those feelings and dispositions that are calculated to undermine the reign of prejudice and establish the dominion of benevolence and philanthropy, and do much towards permanently establishing that charitable union of all so essential to Christian happiness.

I beg to present you with a sort of humble foundation to begin upon, a few words. They are I think, upon examining my Library those of my

books that I believe most appropriate to your views, and therefore I hope they will be accepted in the spirit in which they are given. They number two hundred volumes, such as they are. I regret that they are so few and that I have not English books more calculated to be useful to the St. John's Mechanics' Society.

I have the honour to remain, Yours very truly,

MICHAEL ANTHONY FLEMING.
To Mr. Maher, President St. John's Mechanics' Society.
Jan. 6, 1846.

Under the Jolly Roger

(Continued from page 5.)

the formal thanks of the Governor, but, owing to an Anglo-Spanish treaty having been signed at Madrid, Modford was summoned to England to answer charges brought against him by the late captain. Morgan was seized, and escorted to London, under arrest. His period of disgrace, however, was short, for the King, who loved a clever rogue, took a liking to this bold adventurer, who, before long, found himself Colonel Sir Henry Morgan, Lieutenant-Governor of Jamaica!—Glasgow Weekly Herald.

Cape Town.—The British Parliament's adoption of Imperial Preference has caused the utmost satisfaction in business and agricultural circles, particularly among the raisin, tobacco, wine, and sugar farmers. The proximity of South Africa to England together with the cheap native labour and the frequent steamer service is expected to give South Africa an advantage over Australia. It is hoped that the preference will result in a marked improvement in the Union's general trade conditions.

THE HOME OF GOOD SHOES.

A Modern Jean Valjean

250 POLICE SEARCH 65 MILES OF SUBWAY.

CHICAGO, June 10.—U.P.—The gripping story of a manhunt in the sewers of Paris, written more than a hundred years ago by Victor Hugo, in "Les Misérables," is being acted out in the vast system of a dark freight subway in the bowels of Chicago, with 250 policemen cast in the role of the man-hunters and a swarthy little Italian gangster, taking the part of Jean Valjean, the hunted.

It is a strange situation, one in which life is successfully imitating fiction. The heroic Valjean of Hugo's immortal tale fought armies of rats; he swam through seas of filth; and he escaped the Paris police because they were less courageous than he.

The pursuers in the story stumbled through fetid caverns lighted only by the torches they carried. In the modern version the police are whirled through the endless tunnels by electric trains with powerful search-lights sweeping the darkness before them.

The little gentleman of Chicago's underworld, who is believed to have sought to kill State's Attorney Robert E. Crowe, is a less heroic figure than Valjean, and probably less courageous than his pursuers. But he is imitating the famous character of fiction dramatically and with desperate cunning.

Valjean could not remain in the Paris sewers. The rats would have done away with him, or disease would have brought him down. He got out as quickly as possible. The little Chicago gunman has already been in the tubes 8 hours, and knows that he may safely stay there for a week or even indefinitely.

The Chicago catacombs consist of 63 miles of narrow, dark, low-roofed tunnels, criss-crossing in all directions some forty feet below the surface of the heart of the business district. They are used entirely for freight transportation on narrow gauge lines, with tiny cars resembling those used in coal mines. The tiny electric trains whirled freight and produce from warehouses to department stores and shipping points. If the gunman is hungry he can rob the cars. He can even obtain clothing.

The hunted man entered the underground world Tuesday afternoon, after shooting at a police guard in the Criminal Court building, whom he mistook for State Attorney Robert E. Crowe. Thirty-five policemen descended into the tunnel and pursued him, but they lost him in the darkness. Later more men joined the hunt until now there are 250 prowling the bowels of the earth for the modern Valjean.

MINARD'S LINIMENT FOR CORNS

Baking a Watch

Baking a watch seems a silly thing to do. Yet at Greenwich Observatory it is done every day. The watches are marine chronometers, writes J. A. Lloyd, F.R.A.S.

Greenwich Observatory, being under the control of the Admiralty, it is part of the routine work of that establishment to test chronometers for the use of the Navy. This work has been continuously done there for the last hundred years.

Longitude can only be determined at sea by knowing the Greenwich time. Therefore ocean-going vessels must carry very accurate timepieces which can be relied upon to give the time to a fraction of a second. It is for this reason that chronometers are so rigorously tested.

There are two things that must be known about a chronometer: its error, or the amount it is short of the correct time, and its rate, or the amount it loses during 24 hours. It is the rate that is really important. When the rate is accurately known, a simple correction can be added to the time shown by the dial to find exact Greenwich time.

It is well known that changes of temperature affect the rate of a chronometer. Though the balance-wheel is compensated against temperature effects, the compensation can never be absolutely perfect, and even the best clocks in the world have a small rate. It therefore becomes necessary to determine exactly what effect any given degree of temperature may have on the going of a ship's chronometer, so that it can be allowed for at any time.

At Greenwich there are special ovens in which the chronometers are placed and raised to any required temperature. Their rates are then compared under these conditions with a standard clock. The temperature of the oven can be maintained constant by means of thermostats, the chronometers being kept under observation by skilled men during the time of baking.

But ships often sail to high latitudes where they meet with intense cold, so the chronometers must also be placed in refrigerating chambers and further tested under these conditions.

The progress of wireless telegraphy has made it possible to broadcast Greenwich time can now be picked up anywhere at sea and the error of the chronometer found on the spot.

Indeed, position-finding by the directional wireless will in the near future supersede astronomical observation at sea. No longer will it be necessary for the captain to "take the sun" at midday with a sextant in order to find his position.

In the comfortable seclusion of his cabin he will put on a pair of headphones and listen in for his position, which will be broadcast from powerful wireless stations in various parts of the world.

CONFEDERATION LIFE.

Shipping

S. S. Newfoundland, which sailed at 8.30 Saturday night for Halifax, made a splendid run to the Cape, which was passed at 12.30 a.m. Forty-one passengers sailed by the ship. She is due to arrive at Halifax early to-day.

TO-DAY'S MESSAGES.

EXPEDITION OFF FOR THE NORTH
SYDNEY, N.S., June 28.
(Canadian Press)—The Donald MacMillan Arctic expedition got fully on its way to-day when the steamer "Peary" sailed from North Sydney following the schooner Bowdoin with Commander MacMillan on board which left yesterday. The Bowdoin has two passengers for Battle Harbor, Dr. Wilfrid Grenfell enroute to his work on the Labrador, and Dr. Gilbert Grosvenor, President of the National Geographic Society, Washington. The Geographic Society is co-operating with Commander MacMillan. Dr. Grosvenor came up on the schooner from Wiscasset, Maine, intending to return from Sydney, but at the last moment yielded to the temptation to go to the Labrador port.

TUSCANIA CUTS DOWN GLOUCESTER FISHERMAN; 15 LIVES LOST.

GLOUCESTER, Mass., June 28.
The Cunard Anchor steamer Tuscania rammed and sank the fishing schooner Rex of this port with the loss of fifteen lives to-day, according to a message received by the schooner's owners here from the Anchor Line offices in New York. The collision occurred off Quebo Bank in Long 43.24 North, Lat. 65.15 West, or about 200 miles east of Halifax. Nine men were rescued. The dead included Capt. Thomas O. Downey of Lowell, thirteen members of the crew, and a ten year old boy. The message from New York, thought to be based on a wireless despatch from the Tuscania, read in part:—"In collision during fog with schooner Rex Sunday. Survivors picked up and now aboard Tuscania. Thos. O. Downey picked up dead. Tuscania undamaged and cruising on spot." The Rex sailed from this port on June 17th and when struck was loaded with halibut. The Tuscania left Liverpool for New York on June 22nd and cleared from Moville, Ireland, June 23. The fisherman registered 75 tons net and was 102.6 feet in length. She was built in Essex in 1907, and was valued at \$25,000. The Tuscania registered at 17,250 tons. The names of the dead were reported as follows:—Capt. Thos. O. Downey, Lowell; Samuel Tibbets, Angus MacDonald, Chas. Goodrick, W. M. Roach, Archibald Pili, Clide Larkin, Angus Smith, Geo. Johnson, cook, Austin Pirih, and Charles Austin Pirih, his 10-year-old son, all of Gloucester; W. M. Turner, Shelburne, N.S.; Charles Wiegall and Joseph Talton, address not obtained, and an unidentified sailor.

STEAMER HAS PECULIAR EXPERIENCE WITH AN ICEBERG.
HALIFAX, N.S., June 28.

A Northerly "set" of warm weather from the Gulf Stream will shortly dispose of all the remaining icebergs that endanger the North Atlantic steamship lanes, according to the official officers of the United States cutter Modoc, which arrived in port to-day completing its share in the thirteenth annual ice patrol. The Modoc was relieved by the Tampa last Thursday, and will sail from here shortly for Wilmington, N.C. Fog was encountered all the way from Sable Island to Halifax and the northerly set of the current was noticeable the whole distance. The water was alive with myriads of jellyfish. It was stated, which were believed to have been brought by the current from the warm water of the South. The Modoc brought details of a strange accident to the United States Shipping Board steamer Saugus which ran upon an iceberg that had taken the formation of huge floating dock, a hollowed out centre with the floor submerged and sides towering two hundred feet above the surface. The Saugus floated off the obstruction undamaged.

BESCO PREMISES DESTROYED BY FIRE.

SYDNEY, N.S., June 28.
Last night's and this morning's fire at Number 11 Colliery Caledonia, Glace Bay, caused damage of one hundred and fifty thousand dollars. H. J. McCann, General Manager of the Dominion Coal Co., one of the constituents of the British Empire Steel Corporation, said to-day. The bank head treasure, boiler house and contents, compressor, haulage house, and equipment were completely destroyed. The cause of the fire is unknown.

FOREIGNERS REQUESTED TO LEAVE SHAMREEN.

HONGKONG, June 28.
The British and French Consuls General have requested all foreigners other than British and French subjects to leave Shamreen, the Foreign Consession at Canton as a measure of protection.

TWO KILLED IN MOTOR ACCIDENT

TORONTO, June 28.
Stanley Sorrell, 24, of Toronto was instantly killed and Fred Smith, 27, had his neck broken when a heavy Limousine in which they were riding rolled into a ditch on Lansing Road, North York Township yesterday.

DIED AT THE THROTTLE.

TORONTO, June 28.
Wm. McIntosh, aged 42, died at the throttle of his locomotive between Toronto Union Station and Sunny Side Station, three miles distant. Sunday evening about 6 o'clock. McIntosh was driving the Toronto-Hamilton local

Canadian Pacific train. He had been under the doctor's care for some time.

FUSION OF EX-SERVICE ORGANIZATIONS.

MONTREAL, June 28.
The fusion of several ex-service men's organizations in Canada into one whole with the loss of present identities and the sinking of minor difference to achieve a united front, will be the outcome of the British Service League Conference in Ottawa this week, if the hopes of Field Marshal Haig are realized, according to Captain Donald Simpson, the Honorary Organizing Secretary of the League and Editor of the official paper "Canada," he said, "is the only Dominion where there is more than one organization of ex-service men."

CHINESE GOVERNMENT'S DEMAND

CANTON, June 28.
A representative of the Chinese foreign office arrived in Shanghai this afternoon, bringing five demands by the Chinese Government. They include that the British and French Consuls apologize and be replaced by others; that foreign gunboats all leave; that Shamen be handed back to the Chinese; compensation for all deaths; and that naval officials apologize.

15 DROWNED; 9 SAVED IN THE REX DISASTER.

GLOUCESTER, Mass., June 29.
Fifteen men were drowned and nine other members of the crew of the fishing schooner Rex of this port were rescued, when the boat was sunk in collision with the Cunard anchor line steamer Tuscania, 200 miles east of Halifax yesterday, this being the message received by the ship's owners from the anchor line reporting the disaster. No word has come to amplify the details. The Tuscania, which struck the little fishing craft during fog, reported herself standing by searching for possible survivors and bodies. The master of the sunken vessel, Thomas Downey, of Lowell, was picked up dead. Officials of Fred L. Davis Company, owners of the Rex, believe many of their ship's crew were killed below decks in their bunks, and that others, stunned by crashing timbers were drowned before they recovered consciousness.

Work on New Car Barn

AND SUB-STATION COMMENCED.

A gang of thirty-five men, under Foreman Horman, of the W. I. Bishop Company, commenced excavation work to-day on the site for the combined Sub-Station, Car Barn and Offices for the Nfld. Light & Power Company. The old car barn is being dismantled, and space for the erection of a temporary one is already being proceeded with at the extreme western end of the property. The plans and specifications calls for a combined building, measuring 117 ft. 6 in. in depth, with a frontage of 96 feet. The eastern end of the building will have a measurement of 93 feet, while the western end will measure roughly 77 feet. The building will be of concrete with standard metal reinforcements, the walls inside will be finished with cement plates. Steel columns which will be used for supports are due to arrive next week. The roof will be of concrete and covered in felt pitch with a valleyed centre for drainage. As soon as the new rails for the street railway arrive, the work of taking up the present rails will commence.

Fatal Motor Accident

NEAR KING'S BRIDGE.

On Saturday night about 9 o'clock, a fatal accident occurred at King's Bridge, when Edward Kelly, the six year old son of Mr. and Mrs. Edward Kelly, was struck by a motor car driven by Mr. E. V. Spry, at the foot of Kennas Hill, from which he expired at an hour later. Mr. Spry, with Mr. E. J. Salt, was leaving town via King's Bridge Road, and upon nearing Kennas Hill, Mr. Spry slowed down to change gears in order to take the hill. Whilst he was in the act of doing so, he noticed a black dog on the road, and swerved his car to the left to avoid hitting it. Just at the moment, however, the little boy ran from an embankment on the left side and was hit before the driver was aware of his presence. The car was immediately brought to a standstill, when Mr. Spry got out, and picking up the boy, carried him to his home alongside. Dr. Macpherson was immediately got in touch with and hurriedly arriving on the scene, made an examination. No injuries could be found on the child's body, and there was every appearance that he had not been seriously hurt. Dr. Macpherson then brought the little victim to the hospital to have an X-ray examination performed. Meanwhile Mr. Spry motored to town and reported the accident to the proper authorities. Scarcely had this been done, when Dr. Macpherson phoned police headquarters that the child had passed away. Mr. Spry, upon learning of this, gave himself up to the police, but was later released. A magistrate enquiry into the tragic happening commenced before Mr. McCarthy

this morning, when the evidence of Mr. E. J. Salt was taken.

Bait and the Baited

A keen angler, whilst fishing with every success a stretch of private water, suddenly became aware of the approach of a gamekeeper, whose duty it was to warn all such trespassers off.

Well aware of what generally happened, he decided to play the part of an eccentric old gentleman.

He drew in his line and, taking off the bait, substituted a small potato in its place.

The keeper, having inspected the bait, decided that there was nothing to fear from such an enthusiast, and retired to chat to his pals in the village inn. Of course, he regaled these gentlemen with the tale of the angler.

At this moment the angler himself appeared on the scene, carrying a basket loaded with trout.

"What did you catch those with?" inquired the keeper. "Surely not with that potato?"

"No," replied the other. "You're the fish I caught with the potato!"

MINARD'S LINIMENT FOR THE GRIPPE.

CEMETERY DECORATION DAY

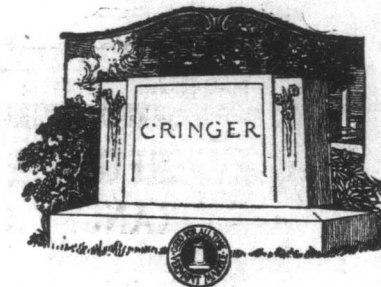

All Family Memorials should be in place for Decoration Day and the Annual Flower Services in Newfoundland Cemeteries. We are willing to co-operate with purchasers and make special efforts to fill every request; but we do ask that Memorials be arranged for as early as possible in order that we can give fitting attention to each, and thereby make "Perfect Tributes" of them all.

It is our privilege to assist you with your Memorial Problems, and we place our entire service at your disposal.

The Cemetery Beautiful

That is something more than a pretty phrase. It is an appeal to each individual lot-owner to do his share toward making the Cemetery what it should be—really attractive—full of harmony—replete in restfulness.

It calls for artistic—although not necessarily large—Memorials, placed in well ordered, well kept settings—all brought together in a colorful gloom-dispelling picture.

The essential part of our business is to give assistance to those deciding these matters. Our service, with complete information, Catalogues and estimates, is at the disposal of all Memorial purchasers. We invite you to visit our Display Rooms and let us confer with you on what you require.

garet C. Best, H. F. Albrecht, Mrs. Al-
brecht and 3 children, G. T. Town-
send, H. Holman, S. Lazar, A. J. Bon-
ning, Pearl Sparkes and Ronald J.
Cave.The Munceaster was formerly the
Excelsior and was launched at Wil-
mington, Delaware, in 1882. In 1911
she was returned to the yards of the
builders, Harland & Hollingsworth,
and practically rebuilt. She was owned
by the Southern Pacific Company and
for a long while was engaged in the
passenger and freight business be-
tween Havana and New Orleans. The
Munceaster firm took her over, and has
her re-conditioned at New York. She
is an iron ship of 3,542 tons gross, and
1,576 net. She has accommodation
for 62 first and 62 second cabin pas-
sengers. The saloon and staterooms
are splendidly furnished, and every
accommodation has been provided for
the comfort of the travelling public.
The Munceaster is in command of
Capt. Thomas Simmons, formerly of
S.S. Munargo, of the Munson Line.
The first mate is D. C. Ernest; sec-
ond mate, T. J. Green; third mate, W.
Jensen; Bosun, A. C. Downs; Chief
Engineer, Joseph Weaver; 1st Assis-
tant Engineer, Carl Brons; 2nd As-
sistant Engineer, A. Euper; 3rd As-
sistant Engineer, M. Pankor; Purser, J.
Walker; Chief Steward, Joseph Os-
borne.The work of discharging was carried
out with despatch, and the ship sailed
again at 2 p.m. yesterday, schedule
time for Halifax and Boston. The fol-
lowing passengers went from here:—
Mrs. T. R. Jackson, Miss Vera Green,
Sidney J. Ollerhead, Mrs. Wilson
Clarke and two children, John Col-
lins, Mrs. Elizabeth Collins, Miss

extra.—June 29, 11**How the Destruction
of a Pest May Kill
an Industry**EDMONTON, Alta., June 10.—The
old question of man's interference
with nature has been raised anew over
the persistence with which the wolf
of the far North is being hunted, as a
result of the increase in the govern-
ment bounty from \$20 to 30.
Every trapper coming down from
the far North carries in his pack a
few wolf pelts. For the past year, the
government has had a party of four
wolf-catchers at work across the
northern plains, trapping eastward
from Great Slave Lake.This season, it is estimated, two or
three hundred wolf pelts will be sur-
rendered to the government, from all
sources, taken from the territory
north of Edmonton.
The trappers themselves have raised
the question whether it is advis-
able for this trapping of wolves to
continue. They are generally in
agreement that it all levels down to
that fine adjustment which nature
sets up between the denizens of the
wilds, and in the case of the wolf, the
balance swings between the wolf, the
caribou and the fox.The fox is the real standby of the
trapper. The wolf preys on the caribou.
The fox largely is dependent
upon the wolf for meat, and after the
wolf has had his fill, the fox like a
jackall feeds on the remaining car-
cass. The trappers are beginning to
realize that by the destruction of the
wolf they are gradually chasing away
the fox.It is reported that the trappers of
the North are considering the feasi-
bility of petitioning Ottawa for the with-
drawal of the wolf bounty entirely,
for a period at least.Misses' Tan Calf, all Leather

SMALLWOOD'S.—June 19, 11**The Wreck of the Argos**In a letter received by Hon. J. J.
Long from Mr. Geo. A. Bartlett, Burin,
in connection with the loss of four
lives during salvage operations on the
S. S. Argos the writer states that
had the accident happened two hours
earlier an awful tragedy would have
occurred as at that time 150 men
were on board the wreck. After
striking at Doding Head, the ship
went down forward with the water up
to the bridge and the stern standing
high in the air. All that held her
afloat was the aft water-tight bulk-
head. The captain, police officers
and customs officials stood by the
ship until 8 p.m. Tuesday and then
ordered everybody away as the bulk-
head gave signs of collapse. All the
sailors and the officials quit but sub-
sequently 25 men returned to try and
get what they could before the ship
went to bottom at 9 p.m. A terrific
explosion of compressed air told that
the bulkhead had given way and im-
mediately afterwards the ship went
to bottom. The suction was so great
that a trap skiff lying close by was
engulfed. The roll call showed that
four men were missing, most all the
others had narrow escapes.**Women's and Growing Girls'
Tan Calf Lace Skuffler Shoes, all
Leather, only \$3.00 pair at F.
SMALLWOOD'S.—June 19, 11****Perils of Popularity**If you have ever shaken hands with
a prince or a president you will have
realized that they have reduced hand-
shaking to a fine art. There is none
of the hearty pressure with which
one friend meets another. There can-
not be, for when a man has to shake
hundreds or even thousands of hands
in a day, the result is not merely
unpleasant—it is horribly painful, as
the Prince of Wales has discovered.American Presidents, who are pop-
ular in proportion as they are "good
mixers," spend hours weekly in shak-
ing hands. I once attended a recep-
tion by the late President Cleveland,
and, although the place was a mere
country village, over 700 people were
waiting to shake his hand. I was
told that Mr. Cleveland's right hand
was a size larger than the left, and
I believe that this is one of the dis-
abilities which attend the term of
office of nearly every President.At one of his Oyster Bay receptions
President Roosevelt spent four hours
on end shaking hands with more than
eight thousand people. Mr. Roose-
velt was a man stronger than most,
yet when the ordeal was over he was
exhausted.In the past monarchs have been
chary in the matter of hand-shaking,
reserving such greeting for their per-
sonal friends. King Edward was al-
most the first to break the old rule
and to shake hands with many of his
subjects.The worst of being a personage is
the difficulty of getting out of the
linelight. Someone once asked the
late President Wilson if he had seen
a certain museum in Washington.
"Never," he answered sadly. "If I
turn up anywhere the curator and
every other official turn up and show
me so much attention that I never see
the building. I have often thought,"
he added, "of providing myself with a
disguise so that I could knock about
where I please, unobserved and un-
attended."Perhaps some such thought runs at
times in the head of the King. One
cannot help realizing how greatly he
and the Queen would enjoy a day "on
their own" at Wembley, unobserved
and unattended. But an English
crowd has, at any rate, the good feel-
ing to show its strong disapproval
when, as recently happened at the
exhibition, ill-mannered folk force
themselves rudely upon the notice of
royalty. T.C.B.**CIGARETTES**—Men, don't
buy your fags before you attend
the G.W.V.A. Sports Wednes-
day, as all the popular brands
will be sold on the field at regular
prices.—June 29, 11**Foolish Driving**If the driver of No. — always
takes a curve at the foot of a hill in
the same foolish manner as she rushed
headlong for the incline near the

Don't Say Paper, Say the Evening Telegram.

A Happier and Healthier City

The following is the prize essay written by Miss Annie McCormack of St. Bride's College, Littledale, in the competition recently held in the schools by the Child Welfare Association:

"HOW CAN WE MAKE ST. JOHN'S A HEALTHIER AND HAPPIER CITY."

This is the twentieth century! To-day we gaze back over the departed years and we feel justly proud of the great achievements and giant strides in the advancement of art and science that have of late years been made. But with all this modern improvement comes a problem.

Are we going to forge ahead with the nations of the world and remain at a standstill? Certainly the pioneers and colonists of "our rock-bound island home" when selecting St. John's as their capital, foresaw for it with its natural capabilities a magnificent future. They and their descendants have faithfully done their work for St. John's and it is now equipped with all the aids of modernity.

Yet looking over the city we cannot fail to realize that there is yet much room for improvement. And we must be aware too that it is the individual in the city who counts, and that if we are to have a happy and healthy city we must have a good, pure, energetic people.

"The home" has been the favourite theme of poets in all ages, and it is true that it exercises a potent and lasting influence on the life of the individual. To the homes then we must first direct our attention and although in St. John's the majority of the houses are a tribute to their owners, there are blocks in lanes and alleys where crowded families manage with difficulty to eke out a meagre and morbid existence.

Would it not be our first duty to alleviate this distress, and to provide better homes for our poorer brethren? Would it not also be well to widen those narrow and squalid streets so that the air and sunshine could penetrate into and brighten those darkened homes?

When we have our people properly housed we may feel secure that we have done much towards good citizenship for we shall not exaggerate when we say that of all the factors employed in the work of education, the home exercises the greatest influence on the social, physical and moral man. With better homes so many of the youth of the city would find a brighter and more wholesome atmosphere in the domestic circle, than on the much-frequented streets.

What priceless treasures are entrusted to our keeping and what a great responsibility rests on us when we consider that we have to mould the character of such a great number of souls "so fresh from God." We cannot allow them to choke 'mid the busy throng of a crowded thoroughfare, and we cannot fail to realize that at no distant date they will be the people on whom will depend the welfare or degradation of the city which we are trying to improve. In the city there are numbers of insufficiently fed waifs and our first duty is towards them for—

"In faith and hope the world will disagree But all mankind's concern is charity."

If we could but foresee the good we could achieve by assisting them we would not hesitate to tender our aid, and after all it is not a great privilege to be able to rescue but one soul from the slough of degradation and vice. "Opportunity knocks at the door" and we must be on the alert to bid her enter. It is true that they are gallant workers, who are silently but none the less forcibly doing untold good, but we must not allow those who are instrumental in promoting "Child Welfare" to do their work unaided.

"Let us all be up and doing" and enter wholeheartedly into this great mission of mercy so that we may discover for ourselves the benefits of co-operation. Let us all take a greater interest in the orphanages provided for children.

Now can we allow our charity to rest with the waifs and strays for there is perhaps a majority of children provided with the necessities of life who yet need a helping hand to attain the goal of perfection. We could provide for those by taking an active interest in the schools of the city and by uniting our earnest endeavours to those of the teachers and instructors who have already done so much towards promoting education. And in dealing with the educational problem it would be wise to establish a good system of compulsory education, for some of the people who are most anxious for their children's success in life, fail to see the absolute necessity of sending them to school. And when we note the beneficial results this system of education has had in England and America we cannot fail to press for its splendid possibilities in Newfoundland. Another way in which we could assist not only the children but the whole population of the city would be to establish circulating libraries, for they are an education in themselves, and help towards providing amusement. And this idea is not entirely original for we have an illustrious example in

the person of Andrew Carnegie who was the first to appreciate the great need for public libraries in his own Dumfries. Not only should we provide for children's educational welfare, but we should try to devise some means for their entertainment, and show a sincere interest in their sports. Nor should we allow their moral improvement to suffer, for every nation rightly considers moral training of the utmost importance. Instructions should be promoted. At present under the distinguished patronage of Her Excellency, Lady Allardice, the Girl Guides are rapidly forming into a splendid organization, which promises to be productive of good results in the near future.

Should we not also be a little more benevolent towards those other institutions—our hospitals, asylums, etc., for they undoubtedly need our assistance. If we would try to bring a little consolation to the inmates of those various houses, we would be doing untold good, and especially should we try to afford some consolation to those poor souls who are condemned to live behind prison bars, and we could thus not only appreciate and

admire, but discover for ourselves the sublimity of those lines of Shakespeare:

"The quality of mercy is not strained; It droppeth as the gentle rain from Heaven Upon the place beneath: It is twice blest; It blesseth him that gives and him that takes. 'Tis mightiest in the mighty."

It is an old adage that "God made the country and man made the town," and it is true that in the city we cannot realize and appreciate the beauty of Nature's handiwork so well as in the green fields and meadows of the country.

Yet city-dwellers cannot afford to lose the influence of Nature, for unconsciously she exerts wonderful influence on the character and soul of the individual. To prevent "the love of the beautiful" from dying out in our urban population we must pay special attention to our parks. At the present much is being done to make them more beautiful, and those who propagate the good work must feel amply repaid when they see the numbers of people who frequent them.

Yet all improvement will be of no avail if this city is going to depopulate, and yet we cannot expect the youth to remain at home where there is little employment. The only remedy for this evil of emigration, it seems, is to devise some means for the employment of the people and yet this is a difficult task. But yet, if there is a true spirit of patriotism those whom Fortune has favored could by promoting the industries of the country, find a way to help the unemployed.

As regards the system of prohibition at the present day, it would be for the betterment of the city if the rules regarding it were a little more rigid, else why not return to pre-prohibition days. Now the poor laborer spends a day's earnings on a glass of his favourite beverage when he could have had it formerly at a much cheaper price. And it cannot be gainsaid that when the rules were more rigid, the people were at an advantage from every point of view.

Another cause for the alarm of morally irreproachable people is the great craze for the movies. The cinema is undoubtedly a boon if used properly for children and much older people as well get much helpful knowledge through its medium. But it is being abused, and in its present state corrupts rather than helps the people. The pictures should be properly censored before being brought before the public eye.

Since the far-off dawn of civilization, there have been rules and laws, inaugurated for the benefit of mankind, to which the individual must conform. And these laws, instead of depressing the people, have helped them to such an extent that they look for the advantages of civilized life, and unanimously argue with the poet when he says:

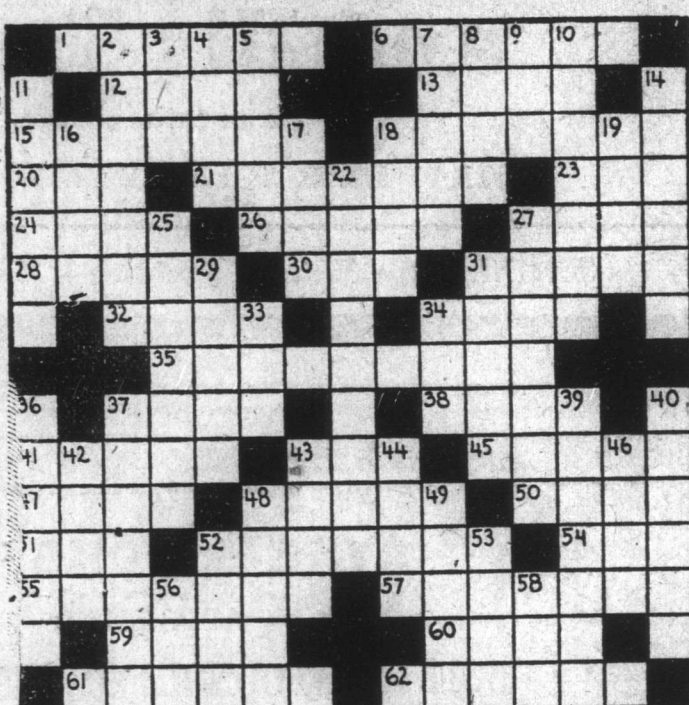

"Better fifty years of Europe Than a cycle of Cathay."

And it is necessary, too, that in our city, the church, the home, and the school should co-operate to inculcate in us a stronger desire to be law-abiding citizens, with a sound patriotic instinct.

And in those days of progress and advancement should we not do our utmost for the improvement of our city so that we could exclaim with the poet and with the universe:

"Not in vain the distance beckons Forward, forward let us range; Let the great world swing forever, Down the ringing grooves of change."

CROSS-WORD PUZZLE

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES
Start out by filling in the words of which you feel reasonably sure. These will give you a clue to other words crossing them, and they in turn to still others. A letter belongs in each white space, words starting at the numbered squares and running either horizontally or vertically or both.

- | | |
|-----------------------------------|------------------------------|
| HORIZONTAL | VERTICAL |
| 1—Go away | 2—Take by craft |
| 6—Hypothese | 3—in a fit manner |
| 12—Body of a church | 4—Assent |
| 13—Intermittent fever | 5—Freshen |
| 15—Attend closely | 7—Detested |
| 18—Frighten | 8—Interjection |
| 20—Girl's name | 9—Pronoun |
| 21—Narrate | 10—Fall back |
| 23—Moved swiftly about | 11—Fastenings |
| 24—to play the leading role | 14—Glass for converging rays |
| 26—Grew less | 16—Denoting entrance |
| 27—Low marsh lands | 17—A blow |
| 28—Looked at with close attention | 18—Stair-tread |
| 30—Disease of fowls | 19—Go ashore |
| 31—Stalk of grass | 22—Livelihood |
| 32—Always | 25—Feasted clamorously |
| 34—Child (contemptuous) | 27—Raised rims |
| 35—Rivalry | 28—Fiend |
| 37—Narrow opening | 31—Ponder over |
| 39—Morasses | 33—Sunken track in road |
| 41—Verdant | 34—Chin cloth |
| 43—Suitable | 36—Struck dumb with horror |
| 46—Station | 37—Searching |
| 47—to take notice of | 39—Broad thin knife |
| 48—Clownish person | 40—Cooked in liquid |
| 50—Preserve | 42—to repose |
| 51—Request | 43—Loving |
| 52—Basket used on horseback | 44—Neat |
| 54—Boy's marble | 46—Egg-shaped |
| 56—Clerk's income | 48—Companies of musicians |
| 57—Particle | 49—to work for |
| 58—Spokenard | 52—Father (French) |
| 60—Musical instrument | 53—Precipitation |
| 61—Exit | 56—Nominal value |
| 62—Of the teeth | 58—Used in refusal |

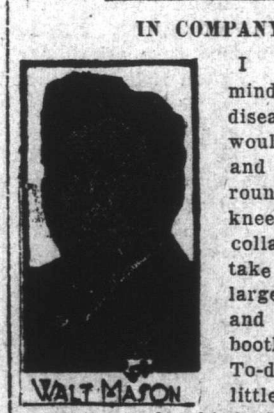

Solution of Saturday's Puzzle.

Fads and Fashions

The tunic frock is a new sometimes closely figured material, worn over a plain colored slip. "Chantilly lace over flesh-colored chiffon is always a delightful combination for tea or theatre. Not one bracelet, but many, are worn—with two wide bracelets of diamonds and emeralds is worn—a third, with two rows of diamond strands, each strand ending in an emerald.

PEARS'
Used in the best circles.

IN COMPANY.
I would not mind one fell disease, if it would come alone and wait me roundly in the knees, or in the collar-bone. I'd take my pills, as large as peas, and have no bootless groan. To-day I catch a little cold, the common, garden kind; I feel the ailment taking hold, and I relieve my mind of language opulent and bold, severe but unrefined. For well I know the cold will fetch more ailments in its train, and they may writhing form will stretch upon a bed of pain, and there, a weak and weary wretch, I must for days remain. I've had diseases forty-three, while I've been growing old, and all these ills come back to me, when I have caught a cold; the Spanish flu and housemaid's knee, and aches and pains untold. They come from out their secret lairs, to punish and exhaust, they climb upon me unaware, and make my life a frost; they come at me in raging pairs, do not mind the cost. Forgotten ailments troop by troop, come back to take a hand, the mumps, the whooping cough and croup, and ills I thought were canned, come back and riot in my coop, until they must disband. And so I hate the common cold of which men lightly speak; it brings back all those pangs of old, flu and housemaid's knee, and aches and pains untold. They come from out their secret lairs, to punish and exhaust, they climb upon me unaware, and make my life a frost; they come at me in raging pairs, do not mind the cost. Forgotten ailments troop by troop, come back to take a hand, the mumps, the whooping cough and croup, and ills I thought were canned, come back and riot in my coop, until they must disband. And so I hate the common cold of which men lightly speak; it brings back all those pangs of old, flu and housemaid's knee, and aches and pains untold. They come from out their secret lairs, to punish and exhaust, they climb upon me unaware, and make my life a frost; they come at me in raging pairs, do not mind the cost. Forgotten ailments troop by troop, come back to take a hand, the mumps, the whooping cough and croup, and ills I thought were canned, come back and riot in my coop, until they must disband. And so I hate the common cold of which men lightly speak; it brings back all those pangs of old, flu and housemaid's knee, and aches and pains untold. They come from out their secret lairs, to punish and exhaust, they climb upon me unaware, and make my life a frost; they come at me in raging pairs, do not mind the cost. Forgotten ailments troop by troop, come back to take a hand, the mumps, the whooping cough and croup, and ills I thought were canned, come back and riot in my coop, until they must disband. Mosquitol

An absolute Preventative from the Bites of
Mosquitoes, Sand Flies, etc.

WE RECOMMEND IT
WE GUARANTEE IT

because we have tried it out and found it the
best we have ever used. It does not dry off
quickly as most Mosquito Preparations do.
When you visit the country, or go on a Trout-
ing Excursion, take a bottle of MOSQUITOL
and you need have no fear of mosquitoes troubling
you.

Two Sizes

20 and 30c per bottle

WHAT IS A SNOB?

What is a snob?
The dictionary
says it is a "vul-
gar person who
affects gentility
or social or moral
superiority."

But I do not
think that is the
popular sense of
the word at all.

If you could get the average person
to admit honestly what he means
when he calls a person snobbish he
would simply say "somebody who
thinks he is superior to me."

If He Lets Us Think He Thinks So.

Whether the person actually is his
superior in the matter of education,
of brains, of character, of breeding,
would not matter one way or the
other. If he considered himself super-
ior and lets anyone suspect it that
would make him a snob.

We do not have fixed classes in
America. Someone has said: "Every
American is as good as his brains and
his character and no better." But that
is merely a high ideal of democracy
to which it would be absurd to say we
actually approximated. I am afraid
the Hibernianism: "Every American
is as good as any other and some are
a little better," comes nearer to de-
scribing the way most people feel.

"Some," of course, being themselves,
for no better reason than that they
are themselves.

Some people in classifying snobs go
even further than stigmatizing any
sense of superiority as snobbish. They
consider anyone snobbish who is not
always ready to make new friends.

Is She A Snob?

I have a neighbor who is both a
housekeeper and a professional woman
and consequently leads a very full
life. She is a woman with a natural

genius for friendship but she cannot
see half as much of her friends as she
would like to; she is a great reader
and she never gets all the time she
would like for reading.

A newcomer into our neighborhood
conceived a very great admiration for
this woman—and no wonder, for she
is a charming person—and tried to
rush her.

My neighbor did not respond as
much as the new friend hoped she
would, and now she has no use for her
quondam admiration. "She is so snob-
bish and exclusive," she says. "She
hasn't any use for anyone outside her
own little circle."

Which in one sense is very unfair
and in another is exactly the truth.

She Hasn't Any Use For Them.

She hasn't any use for more friends.
She might like them but she simply
hasn't time for any more. She hasn't
the time she would like to devote to
the friends she now has, friends of
long standing, with whom she has
many interests in common. She is
gracious to new people but she just
hasn't time to see a great deal of
them. Therefore she is called snob-
bish.

I do not see why it is snobbish to
prefer old friends to new. I do not
see why a new comer should expect a
circle of old friends with many inter-
ests and memories in common to open
and take her in at once. Perhaps
someday when she has more in com-
mon with them she may find herself
naturally and without effort one of
them. But if she stigmatizes them as
snobs that will be less apt to happen.
People who are always calling other
people snobs ought to remember one
thing; that it takes two to make a
snob, one to look down and one to
look up—even while he protests he
isn't.

"This iron rake is made so strong
I'll rake the garden all day long,"

explained the Black Poodle Dog Sales-
man to Uncle Lucky, who had stopped
at the Three-In-One Cent Store in the
last story, you remember.

"How much is it?" asked the dear
old gentleman rabbit, taking out his
leather wallet.

"One dollar twenty-two.
Very cheap I think, don't you?"

"Here's the money," answered nice
Uncle Lucky, peeling off a Lettuce
Leaf Dollar Bill from a big roll
and counting out 22 Pumpkin Pen-
nies. Then taking the rake he hopped
out with his small bunny nephew and
into the Luckymobile. Giving the horn
a honk or two he glided up Cabbage
Street. But, Oh dear me! Just then
something happened. The rake, which
the little rabbit was holding up, caught
on a telegraph wire, and the next min-
ute out he went and on sped the
Luckymobile, leaving the poor little
bunny swinging to and fro above the
crowded street. If he had only let go
when the rake was jerked out of the
car. But he didn't. No sir. He held
on tight, and so there you are, and
there he is. Dear, Oh dear.

"Stop, stop!" shouted the kind Pol-
ice-man Dog, waving at Uncle Lucky,
who, strange to say, had not even no-
ticed what had happened, being so in-
terested in avoiding bumping into taxis and
wagons that he couldn't have seen out
of the corner of his eye had he tried.
Of course when he heard the Police-
man Dog's shout, he stopped, just like
that, quick as the hills on the first of
the month, and turning his head
around he saw his dear little bunny
nephew swinging from the rake hand-
le.

"Goodness gracious meebus!" ex-
claimed the old gentleman rabbit,
"what has happened!" and backing the
Luckymobile till it stood just un-
der poor little Jack Rabbit, he lifted
him down to the seat beside him.
"Thank goodness," gasped Uncle

Lucky, "I got back in time. You might
have dropped to the street and brok-
en your left hind leg."

"Here's your rake," cried the kind
Police-man Dog, lifting it off the wire
and handing it to the bunny boy. "Be
careful not to hold it up straight. Let it
lie across the seat in the back. Don't
block the traffic," and with a wave of
his good right paw, he motioned to
Uncle Lucky to go ahead.

"Dearest me!" sighed the frighten-
ed little rabbit, as Uncle Lucky began
to smile once more, "I didn't know
what had happened when I found my-
self swinging from the wire."

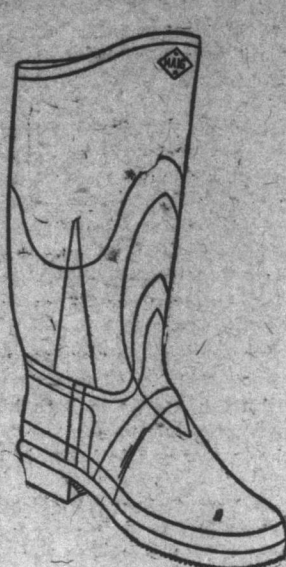

On Sped the Luckymobile.

"Narrow escape," answered the dear
old gentleman rabbit. "But all's well
that ends well. So let's think of some-
thing pleasant. Maybe Little Miss
Moustie has baked a deep apple pie for
lunch. Who knows," and he guided the
Luckymobile up to his red garage,
for by this time they had reached home.

"Oh, I'm so glad you're back again.
I've an apple pie for you rabbit men,"
sang the tiny mouse housekeeper from
the kitchen porch.

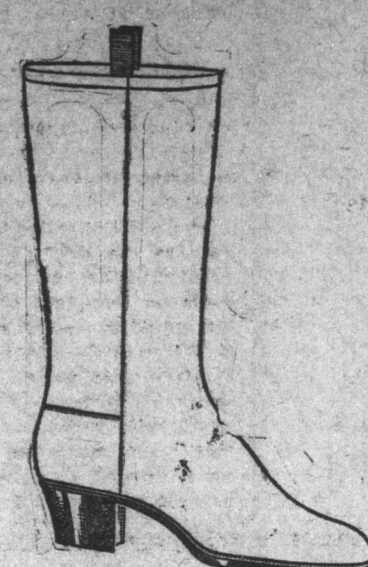

"There, didn't I guess right," chuck-
led dear Uncle Lucky, and in the next
story you shall hear what happened
after that.

LINES ON THE DEATH OF A
MOTHER.

You have lost her whom you loved.
Stilled the voice so sweet to hear.
Now the hands by death are gloved,
Warmed by love for many a year.
Rest is hers, who never asked
Rest however she was tasked.

Peacefully she sleeps to-day,
Those who would not sleep before,
Those she loved had come to say
They were safely home once more.
Now she's closed her eyes and takes
Rest no trouble ever breaks.

Mourn for her, of course you must.
Oft your eyes shall fill with tears,
But she would not have you to trust
God throughout the passing years.
She who taught you how to pray
Had in mind this very day.

You believed her when she said:
"God knows best, and trust in Him!"
Shall you fail her now she's dead?
Even though your eyes are dim,
Dim with tears beside her grave,
Live her teaching and be brave!

Need Classics for
Proper Education

France Makes Decision After 20 years
of Study and Experiments.

PRINCETON, N.J., June 18.—France
has decided, after 20 years of experi-
mentation, to require a study of the
classics as an essential part of a
liberal education, according to an
announcement made recently by the
American Classical League. The
announcement was made for the
League, which is reporting on re-
search into foreign studies by An-
drew F. West, dean of the graduate
school of Princeton University and
president of the league.

"The most momentous change in
systems of classical education in
Europe is found in France," the re-
port read. "After 20 years of experi-
ment with varying programs, of study,
classical, semi-classical and non-
classical, and after prolonged discus-
sion France has decided that the clas-
sics are to be required as an essen-
tial part of liberal education."

G.W.V.A Probe
Not Serious

Dominion Secretary Says Following
Report Of Special Senate Com-
mittee.

OTTAWA, June 19.—(C.P.)—C. G.
MacNeil, Secretary of the Dominion
Command of the Great War Veterans'
Association, commenting last night
upon the reports of the special com-
mittee of the Senate, which enquired
into the administration of the can-
teen and disbursement funds, said:

"Those with a knowledge of the
facts do not take the report seriously.
It is merely a recital of evidence fur-
nished by the prosecution, and total-
ly disregards evidence filed on behalf
of the Association by competent wit-
nesses."

Mr. MacNeil said that the reports
would be considered at the Dominion
Convention of the G.W.V.A., to be
held in Ottawa on the 24th of this
month.

An Unseen Companion

This is just what Indigestion is. It causes a very un-
comfortable feeling about the Stomach, distress after
eating, Nausea, Headache, Irritability of Temper,
tenderness and even pain over the pit of the Stomach,
bad taste, loss of appetite, constipation, etc.

Stafford's Prescription A

will certainly help you, and in nearly every case effect
a cure if you suffer from any of the above symptoms.
This Prescription A is prepared from a good reliable
prescription that has been tried out for 35 years, and
as we have various testimonials from people who have
used it as to its merits, we can recommend it to any
sufferer of Indigestion. If it fails to give you any
relief we REFUND YOU YOUR MONEY.

IN THE REALMS OF SPORT

TO-NIGHT'S GAME.

The C.E.I. and B.I.S. are the contesting teams at St. George's Field to-night.

JUNIOR FOOTBALL MEETING.

A special meeting of the Newfoundland Junior Football League, was held on Saturday night, at which delegates of five teams were present. The principal business was the releasing of C. Byrne from the Gaelic team of last year to the Holy Cross. This was granted. The matter of playing a game on the night of July 1st, was discussed, and after some consideration it was decided to postpone the Wesley-Gaelic game, called for that evening. It was felt that being a whole holiday, some of the players on both teams would be going out of town, as well as many of their supporters, who would desire to see the game.

The League was requested to draw up fixtures for football fives, for St. Patrick's and Belvedere Garden Parties, and these were arranged as follows:

For Belvedere Garden Party:

T.A. vs. Gaelic

Mount Cashel vs. Wesley.

BRILLIANT WOMEN ATHLETES.

Four New Records Set Up At Stamford Bridge Big Meet.

Watched by a keenly-interested crowd in ideal weather, a galaxy of brilliant women athletes at Stamford bridge recently gave a wonderful exhibition of their prowess in competition for The Daily Mirror trophy.

Honours of the day were shared by the London Olympiads A.C., who, with 46 1-2 points become first holders of the trophy; by Middlesex Ladies' A.C. (the promoting club), who were runners-up with 31 points; and by Manor Park Ladies' A.C., whose members did particularly well.

Four new records were set up. Miss P. Green (London Olympiads) established fresh honors in both high and long jumps, clearing 4ft. 11 1-2 inches. In the former and 17ft. 2in. in the latter.

Miss Vera Palmer (Middlesex Ladies) beat the world's record for the quarter mile, her time in her heat being 62 1-5 seconds, as against 62 2-5 seconds. Miss Palmer went on to win the final heat in 63s., and she was also first in the 220 yards.

Wonderful Javelin Throw
Miss I. Wilson (Manor Park) created a new record for throwing the javelin (two hands) 158ft. 10in.

IN ENGLAND READY FOR CHANNEL SWIM.

PLYMOUTH, Eng. June 23.—Miss Gertrude Ederie, United States champion woman swimmer, arrived here to-day and announced she would immediately commence training for an attempt to swim the English Channel in July or August. She will attempt to swim the Channel from Cap Gris Nez, France, to Dover, England.

Paint Up! Clean Up!

Editor Evening Telegram.

Dear Sir,—I wish to avail of this opportunity to congratulate the Telegram on its popular campaign to "Paint Up!" First, I would like to say that I am not a shareholder in our local paint factory or any outside concern, consequently I have no axe to grind, although I think I can count all our painters among my personal friends. I write merely to support your appeal, and with that object only in view. A score of years of newspaper work and four as a representative on the Civic Board have brought me in every section of the city, and the conclusion that one arrives at is that our needs are many, one of the greatest is a liberal supply of paint. Many of our prettiest residential sections are marred by the ill appearance of some dwelling, and in not a few instances there is no excuse for existing conditions. Paint not only improves appearances, and is pleasant to the eye, but every authority assures us that it acts as a preservative.

to all wood work. Lack of means may be the reason why many do not dress up their houses, but if paint be such a preservative as we are lead to believe, then it is just as essential as Fire Insurance, and there are very few citizens who do not realize the value of the latter. Think what the effect would be if the houses of St. John's had been painted regularly! Those ugly eye sores in various parts of the city would not be permitted to exist; there would be such a protest against them that owners would be compelled to remove them, and it is to be hoped decent houses would go up in their places.

Paint, Mr. Editor, may be like charity, and cover many defects, but it does not entirely reach the root of the trouble. What St. John's needs to remedy many of her troubles is water and sewerage in every home, and until every building is connected there will be trouble. Huge sums have been spent on the dole and are expended on public works, and I am of the opinion that if only a portion of them were devoted to the extension of water and sewerage the results would be far more beneficial.

You have heard the excuse, I dare say, sir, that "if we paint our houses, the Municipal Council will raise our taxes." Such is not the case, for nothing is further from the mind of the present Board. We can only have an ideal city when every man is employed and owns his own home; that is what the present Mayor and Councilors would like to see, I am sure, for it would mean that all would be contented and happy.

In conclusion, Mr. Editor, I must again compliment you on your campaign and express the hope that the results will be up to expectations.

Sincerely yours,
REG. DOWDEN.

Susu in Port

S.S. Susu, Capt. Jacob Kean, returned from ports as far as Change Islands, at 10 o'clock Saturday night, after a trip of 4 1-2 days. The Susu brought a small inward cargo, and the following passengers:—Const. F. Hickman, Miss C. House, J. P. Worrell and son, W. H. Greenland, S. J. Jones; Messdames Woodrow, Clarke, Warrell, Parsons, Jamieson, Bugden and son, Wright and Butt; Misses Penny, Hill, Young, Piercey, Reid, Collins, James and one in steerage. Returning south for was met with on Friday and the ship was obliged to anchor at Lumsden for the night. Captain Kean reports the fishery has improved at the Wadham's and Peckford's Island, where crews secured from 10 to 20 barrels daily. In fact the fishery is very good along the route to Change Islands. There is plenty of caplin for bait, and as soon as the weather becomes more suitable a brighter fishery can be hoped for.

MINARD'S LINIMENT FOR COLDS.

A Modern Romance of the Cargo Boat

Only those who live in the past think that romance is dead. They dream of the days of galleons sailing out of the west laden with untold wealth, with gold, with rubies, new woods, and strange spices and perfumes, and they lament the days that are no more.

But take the steamship Brecon which sailed into Montreal this week. She carried no gold, no precious stones, no spices and perfumes, but romance lay in her holds as surely as in the Spanish ships that sailed out of the Caribbean Seas four hundred years ago.

They lifted the hatches of the holds and from them came the pungent smell of onions, millions of onions. Bag by bag they were swung out of the hold and as they disappeared there came a set of bells three, bronze beauties, cast in Orleans, in Old France, for the Parish of Ste. Jeanne de Chantal, in New France.

But bells and onions were only the beginning. There followed mustard from London, tea from Ceylon, jam from the Cambridge orchards, pickles from Battersea, hales of silk from India, champagne from the fields of France, whiskey from Scotland, gin from England and boot blacking.

But still there were more. There were vermouth from Italy, barrels of Bordeaux wine and pharmaceutical goods, jellies, flavouring essences, marmalade, patent barley foods, linoleum, paint. There were wood from Australia, and huge bales of rags and battered boxes of settlers' effects.

Vichy water from France, jostled cannisters of corrosive sublimate, steel rods leashed against cases of soap, and a little way off were cases bearing such names as Heideck, Pol Roger, and the like.

Then there was sandal wood oil from Banagalore in far-off India, 308 ammunition, sherry, port, a condenser from Toulouse, scientific instruments, biscuits, golden syrup, wares from Switzerland, France, Belgium, Holland, Spain, and half the other countries of Europe bound for all parts of Canada, and to Minneapolis, Detroit, Denver, and the far American west.

An interested group gathered round the three bells for the parish of Ste. Jeanne de Chantal. They were founded in the works of G. & L. Bolles, Orleans, France, and they will call the people of Quebec to prayers. On one of the inscription is

Plus XI. Pope.
Mgr. Raymond Marie Rouleau, O.P.
Evêque de Valleyfield.
Messire J. M. Duhamel, Cure,
A.D. 1925.

At the base is the name of the bell "Raymond Marie" and the legend "Defunctos Ploro festos Decoro," which being translated is "We mourn the dead and honor the righteous."

On the smallest of the three bells there is:
A. D. 1925.
Notre Dame de la Garde.
Priez pour nous
That bell is named "Notre Dame de la Garde."

On the third bell appears the legend:
Paroisse Ste. Jean de Chantal.
Fondée en 1742.
"Cette cloche a été donnée par MM. Aches Leduc, Lophle Daoust, Adelmair Lalonde, Antoine Lalonde, Ludger Stoker, Ovil Peladeau, Mme. M. Leduc, and the name that it bears is "Joseph Michel."—Montreal Star.

Vets Must Drop Petty Quarrels

OTTAWA, June 22.—(C.P.)—"Unless the ex-Servicemen's organizations of Canada drop their petty misunderstandings and quibblings, Earl Haig will likely conclude his Canadian tour in Ottawa," declared Lt.-Col. T. Nangle, Aide-de-Camp of Earl Haig, who arrived in Ottawa yesterday to arrange for the Earl's visit. Colonel Nangle stated that he had already received assurances from the officials of the Great War Veterans' Association that the Association is behind the Field Marshal in his desire for union among the Veterans and that all organizations have been invited to participate in a preliminary conference to be held in Ottawa before the Field Marshal arrives, with the object of presenting a united front when he comes.

Col. Nangle, who is a staff officer of the British Empire Service League under the auspices of which the coming conference in Ottawa will be held, stated that Field Marshal Haig is coming to Canada for two reasons, first, to preside at the conference and secondly, to meet the war veterans of Canada. An itinerary for his tour of Canada has been prepared, but various details are to be settled before it can be announced. Chief among the details to be settled, according to Colonel Nangle, is whether or not the Earl will find it worth his while to continue his tour.

Harbor Grace Notes

On Thursday evening, June 18th, over two hundred and fifty members of St. Paul's congregation gathered in St. Paul's Hall to spend a final social hour or so with the Rector and Mrs. Higgett, to express their esteem and regard and bid farewell. The People's Warden, Mr. A. J. Goodland, acted as chairman for the evening, and opened with a brief speech, explaining the object of the gathering. Next followed a short programme, under the direction of the Organist, of the Church, Miss May Chafe, which proved very interesting and enjoyable. Then the members of the Women's Association and St. Catherine's Girls Guild served tea with their usual promptness and despatch, and all were well supplied and greatly enjoyed the good things that the ladies had prepared for the occasion. After tea was served, the Rector and Mrs. Higgett were then invited to the platform, attended by the Chairman, the Rector's Warden, Mr. C. D. Garland, and Mr. Thomas Ross, one of the oldest parishioners who for many years, including the early part of Mr. Higgett's ministry, had acted as People's Warden.

Mr. Goodland then, on behalf of the congregation, read the address, which expressed deep regret that owing to ill health Rev. Mr. Higgett was compelled to resign his office, as Rector of the Parish. And referred to his lively interest in all branches of the Church work, which was always supported by Mrs. Higgett. While the visible results of this have been great, it would be impossible to estimate the far reaching effect of their beloved Rector's Ministry. The address was accompanied by a purse of gold. Mr. Ross made the presentation, with a few brief words.

Rev. Mr. Higgett in thanking the congregation, referred to the happy relations existing between them, and expressed his regret at leaving. He thanked them for the references to Mrs. Higgett, and assured them that he owed much to her sympathy and quiet help in his work. He also spoke of the ready help of the church officers, and asked for the same support of all to his successor that they had extended to him in the past. His thoughts and prayers and those of

his wife, would often be with old St. Paul's in the days to come.

After a few remarks by the Chairman, the National Anthem was sung which brought to a close a time long to be remembered by all present.

The funeral of the late Mr. O. V. Travers—one of our oldest and most highly respected citizens who entered into rest here on the 19th inst., was held on the following Saturday. It took place from the "Gracian House" where he had been staying for some time, and was very largely attended. In the procession were the members of the Masonic Order (of whose Lodge he was a past master) and of Carbon-eat Lodge, and also a large number of citizens and friends desirous of paying their last tribute of respect to the deceased. There was a brief service at the house and then at the graveside in the Presbyterian Cemetery, at both of which Rev. W. Harris officiated.

Mr. R. S. Munn left here recently by the Sagona for Labrador to attend to business at Snug Harbor and Shoal Bay during the summer months.

Miss Hutchings, who spent the winter months with her relatives at St. John's, returned home on Tuesday last, accompanied by her niece, Miss Olive, and will spend the summer here.

Mr. and Mrs. A. W. Carter, (nee Miss Carrie McKay) arrived from the city by last Saturday afternoon's train and spent the week-end here. They were the guests of Mr. and Mrs. J. Gordon during their stay.

Dr. W. S. Goodwin left here on Thursday week on a visit to his old home and relatives in Nova Scotia, and will be absent from town about three weeks. We wish him a very pleasant trip.

Miss Stella LeDrew, who was visiting St. John's returned home again on Saturday last, after an enjoyable visit.—COR.
