BRITISH ADMIRALTY DECLARES GREAT BRITAIN MUST KEEP PACE WITH GERMANY

WE MUST HAVE AMPLE MARGIN OF STRENGTH INSTANTLY READY KEYNOTE OF WINSTON CHURCHILL'S SPEECH

First Lord of the Admiralty Sounds Warning That Will Ring Round the World; Sketches Unprecedented Rise of German Fleet of Men-of-War

Self-Governed Colonies Called Upon to "Defend Our Common Heritage" and Participate in Determining the Policy of the Empire

LONDON, July 22.—The speech of Winston Spencer Churchill, first lord of the admiralty, in introducing the supplementary naval appropriation of \$5,000,000 in the house of commons this afternoon, fully endorsed as it was by the prime minister, will cause greater concern to the country than any warnings which have gone before.

Lord Churchill, the former leader of the opposition, was prompt in his speech on the government program. "Those who have listened to the speech of the first lord," he said, "must now be convinced that there is no use talking about dropping out shipbuilding. The cost of the navy must increase so long as insane competition in shipbuilding goes on elsewhere."

A notable feature of the debate was Premier Asquith's call to the Dominion to join in the defence of "our common heritage" and his remarks foreshadowing an early summoning of the statesmen of self-governed colonies to participate in determining the policy of the Empire.

James Ramsay MacDonald, labor member of Leicester, said that neither Germany nor England could long stand such a strain on their finances and he declared that British laborites would join the laborites of Germany in opposing the constant increase in the naval appropriations.

Lord Charles Beresford criticized the increase in the naval program as insufficient. He prophesied that the country would go on building more ships each year, but not enough—just sufficient to insure Germany to follow suit until war came.

OPPOSITION SCORES; PROBE COMMITTEE BILL LIES ON THE TABLE

Three Investigation Committee Members Were Absent and the Vote was 5 to 3

Superintendent McCauley Has Salary Raised to \$3,900 Per Year

Not Enough Signatures on the Early Closing Bylaw, and Short Day Dies

All Bylaws Having to Do With City Parks Board are Repealed

WITH three aldermen who were active members of the recent probe committee absent, Aldermen C. H. Minchin, Alex. McDougall, R. S. Whaley, Mangus Brown and S. B. Ramsey last night succeeded in laying over for two weeks the expense account of the investigation totalling \$1,300.

Alderman Ramsey, who at the previous meeting of the council, voted for the immediate adoption of the committee's report, voted with the opposition.

Expenses Sure to Be Paid

It is inevitable that with the return of Aldermen A. J. Samis, S. G. Carscallen, and G. W. Morfit that the expense account of the committee will be paid, as these gentlemen were active in the investigation work.

The chief objection that the aldermen who voted to lay over the account for two weeks made was that the council originally authorized the committee to spend \$100.

At the first meeting of the committee, called at the request of the attention of the council and at a later meeting, the \$100 was voted. We spent considerable time with the men who were making the investigation.

WEATHER OF THE WEST: SAME TEMPERATURE

Table with 2 columns: City and Temperature. Includes Calgary, Port Arthur, Winnipeg, Vancouver, Kamloops, Edmonton, Peace River, Moose Jaw, Regina, Swift Current, Battleford, Medicine Hat, and St. John.

BABY SCALDED TO DEATH IN A HUGE POT OF SOUP

Frank Aita, July 22.—The two-year-old baby of Mrs. M. and John McDonnell of the Union hotel in this place, met a frightful death in a most singular manner yesterday.

MURDER IN MONTREAL

Montreal, July 22.—A young Italian, 19 years of age, was shot and fatally injured in the Italian district last night.

PETITION PROTESTING CROSS' ELECTION FILED

Edmonton, Alta., July 22.—A petition protesting the return and petitioning that Hon. C. W. Cross be disqualified from sitting in the legislature or holding any office in this province on the grounds of the crime or any municipal office, has been prepared under the legal direction of C. F. Newell and was today filed.

CITY TO EXPEND \$400,000 ON FILTRATION SYSTEM

The council last night passed the bylaw providing for the construction of a filtration system and extension of the gravity intake. The measures provide for submission to the people of the propositions to establish the filtration system including a sedimentation tank, cleaning and lining of the reservoirs, and a 2 and 1-2 mile extension to the gravity system at a cost of approximately \$400,000.

CALM REIGNS IN PORTUGAL; REFUGEES FLEE TO MADRID

Lisbon, July 22.—Calm reigns throughout the country, but the republican troops continue to control these districts in which royalist outbreaks have occurred. The number of the people is shown by the fact that the peasants fraternize openly with the soldiers everywhere.

Madrid, Spain, July 22.—Hundreds of refugees from Portugal are arriving in Madrid. Among them are several army officers and journalists, who have issued a statement today in which they say: "We will go to America, Germany or Japan if necessary, but we will never return to Portugal so long as the monarchy is not restored."

STRIKE HAS DELAYED WORK ON ALL SCHOOL BUILDINGS; MAY USE CONCRETE

Quarrel Between Stonemasons and Stonecutters Blocks School Buildings

Conference Today With Contractors; May Eliminate All Stone Work

Necessary to Take Care of the Tremendous Increase of Student Body

School Structures Said to be Four Weeks Behind What They Should Be

According to the statement of H. McClelland, superintendent of school buildings, the work of building the various school structures, necessary to take care of Calgary's growing school population, has been very seriously retarded by the quarrel between the stonemasons and the stonecutters.

Several of the contractors are said to have expressed themselves as favorable to the change, and if at today's conference the feasibility of the plan is made apparent, the proposition will be put up to the school board.

ARE BEGINNING TO FEAR OUR COMING GREATNESS

Montreal, July 22.—La Patrie, discussing the criticism of the Winnipeg Tribune of its approach that the west after the Saskatchewan election, would be serving their own interests, without regard for the interests of the east, says:

It is reasonable that the west, which has been the recipient of the progress of a giant, should not be satisfied with that, but should seek to accelerate its prosperity without consideration of the interests of the east.

PROGRESSIVE MUNICIPAL LEAGUE MEETING ON JULY 30 INSTEAD OF TONIGHT

The meeting of the proposed Progressive Municipal League will be held in the hall in the basement of the Bow block, Tuesday evening as previously announced.

GRABSTAKE MARAUDERS; 200 TRIBESMEN SLAIN

Feb. 22.—A French column sent out to chastise marauding bands to the northwest of Safron, by a cunning manoeuvre forced the tribesmen to cross a ravine under the concentration of fire from rifles, Maxim, and artillery. Two hundred of the tribesmen were killed in a few minutes.

CALGARY IS CAPTURED BY THE CLEVELAND GRAYS

Historic Military Organization Visits City and is Accorded Cordial Reception

The Cleveland Grays, one of the crack military organizations of the United States, visited Calgary last night. The Grays arrived from Vancouver and Victoria last evening, and spent three hours in looking over Calgary.

The Cleveland Grays, one of the crack military organizations of the United States, visited Calgary last night. The Grays arrived from Vancouver and Victoria last evening, and spent three hours in looking over Calgary.

Feb. 22.—A French column sent out to chastise marauding bands to the northwest of Safron, by a cunning manoeuvre forced the tribesmen to cross a ravine under the concentration of fire from rifles, Maxim, and artillery. Two hundred of the tribesmen were killed in a few minutes.

HOT AFTER MURDERERS OF NEW YORK GAMBLER

Four Men Under Arrest, Five More are Being Searched For by Authorities

New York, July 22.—"Bald Jack" Rose, "Bridge" Webber, William Shapiro and Louis Libby, all held by the police for complicity in the murder of Herman Rosenthal, early last week, were arraigned before Coroner Feinberg today and held without bail for the coroner's inquest Thursday.

Grand Jury Investigating the Collision Between Police and Gamblers

PARRISH IS COLLECTOR OF CUSTOMS THIS MORNING

Will Represent the Department of Customs for the Port of Cardston

Government Reward for Twice Carrying Legislative Flag to Defeat

Lethbridge, July 22.—John Parrish, twice candidate for the provincial legislature honors, and two times defeated by the same ticket, will tomorrow be duly sworn in as the collector of customs for the Dominion government for the port of Cardston.

RAILWAY EARNINGS GROW

Rate of Freight Earnings of Regina Street Incorporated as a City

Regina, July 22.—Three hours work finished the sitting of the railroad commission here.

WHAT THE GREAT WEST DID YESTERDAY

In Calgary: The possibilities of the growth of small fruits in Alberta is shown by the fact that the Canadian Pacific supply farm at Strathmore is supplying the dining cars with 72 quarts of strawberries daily.

In Vancouver: The following buildings are under construction: Hudson's Bay store, cost \$200,000; Norwegian Methodist church, \$100,000; Orpheum theatre, \$200,000; six-story rooming house, \$50,000; six-story rooming house, \$50,000; two four-story rooming houses, \$30,000 each; three-story rooming house, \$18,000.

# We Announce for Tuesday and Following Days the Greatest Special Sale of Women's Ready-to-Wear Garments Ever Held in Calgary. Five Days of Unprecedented Bargain Giving July 23 to July 27

**Prices Cut to Half and Less Than Half on Every Garment in Stock**

Store Opens 8.45 a. m. Closes 6 p. m. Saturdays 9.30 p. m.

## PRYCE JONES

GROCERY PHONE 1492 (CANADA) LIMITED PHONE EXCHANGE 1191.  
STORE CLOSURES EVERY WEDNESDAY AT 1 P. M.

**Suits, Dresses, Tweed Coats, Silk Coats, Cloth Coats, Wash Dresses, Lingerie, Dresses, Wash Skirts**

Here is the most important sale announcement of a month that is rife with sale. It is something MORE THAN A SALE. It is an event. It derives its importance not merely from the reductions, but from the degree of those reductions, yet the values are unimpaired as to quality, rather, they are notable for their superior workmanship and fidelity to current designs. What then is the reason for such heroic inducements to the purchaser?  
The varied demands of our increasing clientele have made necessary lavish assortments of all lines of ready-to-wear apparel—now that the time draws near when preparations for the Fall season must be

started to find on hand a more than normal stock of these garments, and we aim to offset that by reducing prices to such an extent that you'll gladly help us in the task of quick distribution.  
It is as well for you to remember, that while the selling season is fairly well advanced, it is quite early enough for you to get practically a whole season's wear out of them; for at least ten weeks ahead we shall have glorious summer weather so that this sale is unique for you in that you save money—and lose no advantage on the score of timeliness.

**DISTINCT BENEFITS IN SIGHT**

There are evidences that the west will benefit materially from the results of the sittings of the railway commission now in progress in western cities.

A point of paramount importance was dealt with during the session of the commission held at Moose Jaw when the justice or injustice of freight rates being higher in the west than the east, was considered.

Commissioner D'Arcy Scott, who presided, announced the conclusion that there is no justification for the maintenance of higher rates in the west than in the east. It was shown at the hearing, he said, that the volume of traffic in the east is no greater than in the west and that the cost of operating the railroads is no greater in the west than in the east, yet freight rates are incomparably higher in the west than in the east.

As the two points mentioned are the only ones to be considered in determining the justice or injustice of freight rates in one part of a country as compared with another, the conclusion of the board was inevitable, the evidence on both points being quite clear. While the board has given no indication as yet as to what order it will make in the matter, there is little doubt that reductions will be ordered which will be of very great benefit to the west.

Another point adjudicated, which is of large importance, perhaps not more so to the west than the east, but in relation to which all shippers will be largely benefited, has to do with demurrage charges. Under conditions existing hitherto, as shippers have ever shipped anything in carloads are sent the railroads have charged demurrage for the holding of a car beyond the time specified in which it must be unloaded. From the viewpoint of the shippers, this was necessary in order to insure the unloading of cars without unnecessary delay from that point of view, was no doubt justifiable, but shippers have always felt that it was a hardship sort of an arrangement, inasmuch as while they had to pay for holding a car beyond the time limit, they had no recourse in the event the railroad allowed undue delay in the delivery of cars to their destination.

Under Commissioner Scott's ruling, the railroads will still be allowed to charge demurrage, but the shipper is to have some protection against unnecessary delay in transport; that is, unless the railroads succeed in convincing the board that such an arrangement should not be put into effect as an order has been made directing the railroads to show reason why compensation for unreasonable delay in forwarding should not be made.

Gradually, some of the injustices this country has labored under so long are being eradicated.

**BONUSING, EXPENSIVE EVIL**

The action of the convention at Winnipeg, called to consider the subject of what encouragement may properly be extended to manufacturing and other industrial concerns to locate in a town in adopting a resolution in favor of discontinuing the giving of bonuses and exemptions from taxation, was a move in the right direction.

In the judgment of the Albertan there is but one view that can be taken of these matters, that is, that they are evils which ought not to be countenanced further by western municipalities. We believe that a manufacturing concern that is worth having will not stay away from a town simply because it is not given a bonus of a few thousand dollars or a tax exemption.

The Albertan takes the position that the few thousand dollars that any ordinary town can afford to give a manufacturing concern for locating in it is so small a matter to a manufacturing concern of any sort of proportions that the bonus would not have a penny's weight of influence in determining the location if the company affected could not see that the town was favorably situated for its purposes, both as regards economy in manufacturing and market available. These are the prime considerations with every concern which contemplates the establishment of a new industry anywhere.

As to the tax exemption, if the concern is worth having in a town at all the fact that it must pay taxes will not operate as a deterrent in determining its location because taxes constitutes one of the items every manufacturing or other industrial concern takes into account in its cost sheet. It is true, that the amount of taxes it may have to pay, or rather, the rate of taxes, may have some influence, but the way to regulate that is to make all pay taxes alike and by so doing the rate may be kept at a minimum, which no reputable manufacturer will object to.

The Albertan's view is that to provide industrial concerns with the opportunity for cheap power and cheap sites is all that any company or individual has any right to expect and that any community is better off without a concern which will

not locate in it because it cannot get a bonus or tax exemption, for nine times out of ten such a concern will not make good and if it fails to do that the place is worse off than it was before the factory came, as nothing hurts a community worse than the failure of such an institution.

Then, there is another view with regard to tax exemptions; the object of every industrial concern of every character, is to make money. They are not brought into being for any other purpose. If they do make money there is no sane reason why they should not pay their just proportion of the taxes of the community. As a rule they are very much better able to pay them than anyone else and in such cases the injustice of exempting them is all the greater. If they cannot make enough money to enable them to pay taxes, the community, as said, is better off without them, as it is only a matter of time before they must fail, in which case, the pay-roll which was the main object of inducing them to locate, is discontinued and the town sustains the black eye that always goes with such a failure.

On every account, we believe, the giving of bonuses and tax exemptions should be discontinued throughout the west and we shall hope to see the movement started at the Winnipeg convention go on to the permanent organization of a league of municipalities in which the members are pledged to refuse encouragement of the kind in question to all concerns seeking location in the west.

**MAKE CALGARY GORGEOUS**

With profit might Calgary emulate the example of Winnipeg when His Royal Highness, the Duke of Connaught visits the city.

Sojourners in the prairie city during the duke's visit there state that the city was brilliant with gorgeous colorings by day and ablaze by night with a most elaborate electrical display.

And that is as it should be in Calgary. The Albertan is of the opinion that Calgary, outstripping every other city on the face of the globe in the rapidity of her growth, ought not to be second to any place in the cordiality or magnificence of her welcome to "the person of the king" for that is really what the governor-general is in Canada.

Elaboration of decorative display on a scale of magnificence hitherto unthought of by any other city, would not only add to the apparent cordiality of the welcome, but would cause the name of our city to resound around the empire as never before. Undoubtedly it would be a good investment for Calgary.

While the visit of the duke is yet a considerable distance off, it is not too early to begin giving thought to the matter if anything out of the ordinary is to be attempted. Decorations on a large scale will require time to plan and time to prepare. Materials, too, will have to be brought in and it will all take time. It cannot be put off to the last moment if anything worth while is to be done.

Would it not be well to call a public meeting and decide if a concerted effort to do something commendable shall be made, and if the decision is in the affirmative, form an organization to take charge of the matter with committees to look after each department of the work? What do Calgaryans think of the suggestion?

**ARGUMENT FOR THE RECALL**

The spectacle of the city council ordering an investigation of civic affairs; of the appointment of a committee of its members to conduct such an investigation; of that investigation being held; of the committee returning a unanimous report to the effect that things are rotten in the administration of the affairs of the city and recommending that the services of certain city officials be dispensed with; of the council, by a majority vote, adopting the report which is of course tantamount to a dismissal of the officials in question, yet in the face of it all, seeing those officials flaunt defiance in the face of the law-makers of the community, affords a strong argument in behalf of the recall.

A great many cities have adopted the recall to meet just such cases and in a number of instances the people have availed themselves of it, very much to the benefit of those cities. If a recall law were in force in Alberta such a spectacle would not long disgrace the community.

**EDITORIAL NOTES**

The story that Commissioner S. J. Clarke is said to be deferring the acceptance of a desirable appointment at Banff until the final outcome of the fight, presided at by the council probe committee report, reflects credit on the commissioner's fighting spirit. No one ever accused "Jack" Clarke of lack of courage; in fact, judging from some of his recent pronouncements against other city officials, it would seem that his intrepidity verges almost upon rashness.

Mr. Clarke's friends aver that he carries the Banff appointment in his hip pocket but refuses to quit "under fire." In this connection, a certain humorist who sees the funny side of local politics, pointed out yesterday that Mr. Clarke might take caution in his attitude toward the investigators from the example of a somewhat rash individual who was haled before a magistrate in a frontier court of justice in Texas. The accused was found guilty and gazed around the rude courtroom with an insolent air while the judge pronounced sentence.

"I'll fine you," said the magistrate, "50 and costs—"

"Oh, that's all right, Judge," broke in the prisoner, slapping his coat tail. "I've got it right here in my hip pocket."

— and, continued the judge imperturbably, "twenty days in jail. Have you got that in your hip pocket?"

"You can't propel a reform movement and then say it, 'roll on.' It requires work to keep it moving. This, from Prof. Albert Bushnell Hart, of Harvard University, who was one of the speakers at the National Municipal Congress, is respectfully submitted to the "probe committee" for their consideration.

There is no particular reason why Commissioner Clarke should get so peeved over the raven and declare there is no such thing; apparently it is only another of those things in connection with the city's business that he doesn't know about.

**JOTTINGS FROM OLD NEW YORK**

New York, July 22.—Strangers visiting New York City for the first time, and even many who have visited the city on several occasions, do not, as a rule, realize that the importance of New York is not altogether due to its enormous population, the greatness of its financial and commercial business and to its favorable geographical location as a seaport, but that the city is also a great manufacturing center—in fact, the greatest in the world.

Statistics just given out by the federal census bureau show that the greatest value of the products manufactured in New York City during the year 1909 reached the staggering total of \$2,829,892,376. The same year there were twenty-one industries in this city, having each an annual output of products valued at more than \$200,000. First in importance among the industries of the city is the manufacture of men's and women's clothing. The 5,221 establishments engaged in this manufacture employ a total of 287,000 persons and produce goods valued at \$454,588,000.

The printing and publishing industry was next in importance, with 2,883 establishments, employing 48,222 persons and turning out products valued at \$138,500,000. Other important industries in the city include slaughtering and meat packing, foundry and machine shop products; tobacco manufacturing; bread and confectionery; malt and liquors; millinery and lace goods; for goods; gas, illuminating and heating; paint and varnish; musical instruments; men's furnishings; gold and silver jewelry; iron and steel; artificial flowers and fathers, and confectionery.

The Chinese are undoubtedly making rapid strides toward civilization in a Western sense. There was a time, not so very long ago, when the Chinese Tong men were not only warriors but also blood feud considered hatchets as the only approved weapons for manufacturing ancestors. After a while they became American citizens and the revolver became their favorite weapon of execution. The revolver period lasted several years, but it seems that the Chinese are now turning their attention to the study of the law. The first of its kind ever used by the Chinese Tong men in this city was exploded the other day in one of the Chinatown streets. The Chinese were so careless with their money and after every performance the employees cleaning up pick up several dollars in change, carelessly dropped by patrons. With quite remarkable honesty the sweepers invariably turned over the money found by them to Mr. Hammerstein, who held the money in case it should be claimed. Of course, nobody came to claim it, and gradually the accumulation of coins reached a total of more than \$500. Then a great idea came to the mind of Mr. Hammerstein. He hid the money which he was too scrupulous to keep, and, at the same time, advertise his roof garden.

He made out checks varying in amount from 15 cents to \$5 and aggregating \$55 per every afternoon performance, thoroughly shuffled them and had the man at the entrance present to every third person entering the garden one of these checks until all were distributed. In this way he increased the attendance and the advertisement showed that this advertising dodge was quite successful.

There is a man in Beonton, N. J., who, unless further returns should change the result, may be considered the champion beer drinker of the United States. According to his own statement in court he sports a 275 beer in 27 days. At five cents a glass that would mean a total of 14,800 glasses, an average of nearly 64 glasses a day. It is not surprising that the man did not support his wife, and she had to go to court to compel him to contribute toward her maintenance.

William Hammerstein is proving himself indeed "a chip off the old block." He has been as resourceful as his father and quite as skillful in inventing advertising dodges. The patrons of the Victoria Theatre most garden scene, he was careless with their money and after every performance the employees cleaning up pick up several dollars in change, carelessly dropped by patrons. With quite remarkable honesty the sweepers invariably turned over the money found by them to Mr. Hammerstein, who held the money in case it should be claimed. Of course, nobody came to claim it, and gradually the accumulation of coins reached a total of more than \$500. Then a great idea came to the mind of Mr. Hammerstein. He hid the money which he was too scrupulous to keep, and, at the same time, advertise his roof garden.

He made out checks varying in amount from 15 cents to \$5 and aggregating \$55 per every afternoon performance, thoroughly shuffled them and had the man at the entrance present to every third person entering the garden one of these checks until all were distributed. In this way he increased the attendance and the advertisement showed that this advertising dodge was quite successful.

**WOMEN PAMPERS; MEN MONEY GRUBS**

Distinguished French Visitor to Frisco Says American Women Have Too Little to Do

San Francisco, July 22.—Monsieur M. Henault, of Paris, engineer, in charge of the French capital and bridges, streets and courts, says the American woman is too much pampered and has too little to do.

On the other hand, according to M. Henault, the American man is all business and gives insufficient attention to the home and the elegancies and refinements of life.

"And the elements of your American life," he continued, "constitute the basic reason for so many divorces in the United States. No country can stand the violent shock of so many domestic tragedies without harmful effect. There is more in life than mere money getting, and the pursuit of gold here is furious and unending. There should be an article written in your society to round it out and give pleasing and educational distractions to your commercialism."

Mr. Henault has been attending the International navigation convention at Philadelphia. He says this country should transport, at a minimum of cost, its heavy freight by means of a network of canals connecting the country's five rivers.

**Our Daily Special**

They abolished hell last week. And people were just getting used to it.

**Own Hot Weather Hint**  
 Take your time. Keep your nose clean and smile.

**HUDSON'S BAY COMPANY**  
 DURING JULY and AUGUST STORE CLOSSES WEDNESDAY at 1 P.M.

**Cash's Famous Coventry Trimming**

Women's and Children's Undergarments, etc., are mostly made of perfectly plain materials at the outset. How pretty and becoming they will look when finished depends in no small measure upon the way they are trimmed and especially upon the kind of trimming used. It is therefore advisable to see that you secure a trimming that is suited to your needs and that will do your needlework justice. Discriminating women who ply their own needle and dressmakers who ply theirs professionally have come to realize that a trimming eminently suited for the above purposes is that made by the Cash Company, Ltd., Coventry, England.

And they think this not only on account of the daintiness of these trimmings, but also on account of their fine quality, durability and their inexpensiveness. These trimmings can be secured in plain hemstitched, ruffled, banded and lace edged styles, and in widths of 1 1/2 to 3 1/8 inches.

Prices, yard .....

Some in 6 yard pieces .....

**Smart Shetland Veils**

The Shetland Veil is now enjoying great popularity, as can readily be seen by the number worn. These veils are principally used as hat drapes, but also serve as a veil when occasion demands. They are very stylish and becoming and when draped gracefully from the hat they make a very effective trimming.

You will find them here in colors of brown, navy, gray, purple, helio, saxe blue, black, buff and white. Their size is 1 1/2 yards long and 17 inches wide, and they have open mesh with plain ends and \$1.75 border. Splendid value At Glove Counter

**30c Playing Cards 15c**

In reading the account of the big Vancouver fire that appeared in Saturday's papers we noticed that one man threw a pack of cards out of the window before being assisted down by the firemen. We do not know what his motive was for doing so. Probably he did not want to miss the pleasant evenings that are associated with such articles. However, there is one thing sure, he would not have risked his life for them if he could have bought another pack for as little as you can today. Regular 30c for ... **15c**

**STORIES OF THE STREETS**

"Cappy" Smart tells this one about the days when fire insurance premiums were higher in Calgary than they are at present and conflagrations were of more common occurrence. Along Eighth avenue there were a number of second-hand stores and pawnshops and the fire department had been called out several times within the space of a few weeks to extinguish blazes. Some of the fires looked to be of incendiary origin. "Cappy" made an investigation of one established that had been twice slightly damaged.

A long shelf extended the length of the store on both sides of the shop. Twelve gallon cans labelled "fire extinguisher" were placed thereupon at convenient intervals. The chief made an investigation—also an analysis. Here is what he found:

The cans contained about 30 per cent. gasoline and 58 per cent. wood alcohol.

Regular fire extinguisher that!

Street cars, particularly in cities where they have belt or loop lines are at times confusing. John "Haze" Hammond, late of Santa Barbara—and later home—started for his residence Saturday morning during a heavy rain. He gave the conductor a dollar and absently minded neglected to accept his change. Instead he started to read a newspaper.

The car completed the loop trip three times and then it came time to go to the barn. Hammond was still busy reading.

"All off," shouted the conductor. "This car to the barn."

"I don't want to go to the barn, but I would like to get to the hay," exclaimed Hammond folding up his paper. "Is this Blank avenue?"

"We've passed Blank avenue three times since you got aboard," explained the conductor. "We're now down town."

Dr. "Bill" Metzger—perhaps "William" would sound more professional—is back in Calgary after a visit to his old home in Montana. Metzger is always good for a story. This one is culled from some overlooked store in Butte:

"Casey Moran—a journalist of national reputation—was sojourning at Dawson, Yukon Territory. He entered a buffet—that's giving a Dawson saloon the best of it to use that term—and called for a highball. The wine clerk—more generosity—looked puzzled.

"A highball?" he queried. "What is that?"

"Some liquor, water, a piece of ice, a slice of lemon peel and a long glass," explained Moran.

"We have no ice," explained the bartender.

"For the love of Mike!" exclaimed Casey. "This close to the Arctic Circle and no ice. This is surely a fast town. Wagt, I'll get some."

Later in the day Moran had an ice floe towed in from the Yukon river. He then opened an office and hung out a 12x2 foot sign over the door:

"Ice by the pound, ton or berg. Casey Moran."

**Theo. Haviland Limoges Dinner Sets**

Reg. \$75.00 for \$44.50

You will make a clear saving of \$30.50 by buying one of these dinner sets. You will get a famous Theodore Haviland set, too, and in a beautiful green and gold design. The body of this set is of a fine, well glazed Limoges china, and the handles are of solid, dull, coin gold. The pattern consists of a gold lace drop relieved with touches of green, and the edge has heavy gold line. You can hardly realize how nice this set really looks from this printed description, but we can assure you that it will enhance the effect of your table and give a pleasing touch to an appetizing meal.

Formerly this design sold for \$100, but recently we have made a special of it at \$75.00. Now, however, we offer the balance at this great reduction in order to effect a dispersal before inventory. But you will have to act at once to secure one of these sets, as the number is limited. Better come in today. Regular \$75.00, 100 pieces set. While they last ... **\$44.50**

Each set contains:

1 doz. cups and saucers, 24 pieces	1 coupe soup
1 doz. Bread and Butter Plates, 12 pieces.	1 dozen Fruit Saucers, 12 pieces
1 dozen Tea Plates, 12 pieces.	2 Vegetable Dishes, 4 pieces
1 dozen Dinner Plates, 12 pieces	1 Sugar and Cream
1 Slip Bowl	1 Boat and Stand, 2 pieces
3 platters, 10, 12, 14-inch, 3 pieces	1 Salad Bowl, 1 piece
	1 Teapot.

China Department, Second Floor.

**Lingerie Waists, Reg. \$1.50 for 95c**

They are made of sheer muslins, lawns, voiles, cambrics and vestings. The styles are varied and pretty, and have high or low necks and long or short sleeves. Some are plain tailored with starch collars, while others are a perfect network of pretty laces, guipure medallions and insertions; colors white and cream; all sizes. Regular \$1.50. Continuing today **95c**

**LOOKING FOR GRAIN ROUTE DIRECT TO ENGLAND**

Phillip Haas Leaves Bill for Educating Grandchildren at \$100 Yearly

One of the First Millers of England to Study Grain Conditions

Chicago, July 22.—An odd will in which a father not only cut off his only son with an inheritance of \$2, but also enters claim for \$1,400 for educating his son's four children for fourteen years, was filed in the probate court. The document was the last will and testament of Phillip Haas, who died recently at the age of 85 years. He accuses his son, George Carl Haas, of conspiring to obtain his property.

The son is accused in the will of having sold to the father two lots at 2394 North Leavitt street with cottage and having inserted another's name in the deed. The will in part follows:

"I tried to borrow money on the property after my wife's death. I could not do this nor sell it, as the title of the warranty deed was not clear. I had to suffer for four years until other persons have helped me."

"My son, George Carl Haas, claims the whole property. He is waiting for my death. I claim one-half of it also one-half of my wife's share. I had to pay taxes and the other expenses. He has not paid a single cent to maintain the property."

"I name as my heirs my grandchildren, Nellie Rauscher, nee Haas; Willie Haas, Tony Haas, Elsie Haas and Louise Haas, my brother's daughter."

"I say again that my son, George Carl Haas, is not worthy that the sun may shine upon him. I hereby appoint Mr. George Baucher, 155 Burlington street, my sole executor without bond."

"I educated my son's four children. He has not paid 5 cents for it. I demand for this \$1600 a year. Having done this for fourteen years, he owes me \$1,400. This amount shall be divided amongst the four grandchildren named if anything is left."

The will was signed April 28, 1908, and signed by Frank Lear, 1797 North Leavitt street, and Jacob Kraft, 2467 North Leavitt street, as witnesses.

**Justifiable Nemesis**

Murder most foul had been done. The victim reposed upon the sidewalk and his face had been pounded into a shapeless mass.

The police were at a loss for a clue, but Herlock Sholmes, the great detective, was on the scene in a jiffy. Carefully wiping his heated face, the wonderful sleuth gazed first upon the victim and then upon the faces of the innocent bystanders.

Herlock Sholmes walked up to a fat man whose garments were wet and who mopped at the streams which poured from his brow.

"I understand it all," whispered Herlock Sholmes to the fat man. "He asked if it was hot enough for you, and this was your reply."

Herlock Sholmes walked up to a fat man whose garments were wet and who mopped at the streams which poured from his brow.

"I understand it all," whispered Herlock Sholmes to the fat man. "He asked if it was hot enough for you, and this was your reply."

"Officers," said Herlock Sholmes, "this is clearly a case of suicide. You may remove the body to the morgue."

### ARGUMENT UPON WHICH WILL BE DECIDED NE- TEMERE DECREE ON BEFORE PRIVY COUNCIL

Mr. Nesbitt for Dominion Government, Contends Legislation Touching Contract of Marriage is in Exclusive Power of Federal Government

### THE PERSONS AGREE TO LIVE TOGETHER ARE MARRIED

Opposition Holds Would Take Away Liberty of Provinces to Prescribe Own Forms of Marriage Ceremony; a Brilliant Array of Counsel is Appearing

London, July 22.—The privy council chamber at Whitehall today was the scene of the opening arguments in an appeal which will undoubtedly rank as historic in the annals of Canada when the famous marriage law case referred by the supreme court of Canada to the judicial committee of the privy council came before Lord Chancellor Loreburn, Lords Salisbury, MacNaughton, Atkinson and Shaw, and the Chief Baron of the Exchequer of Ireland, Lord Pales.

An array of Canadian counsel was present. Wallace Nesbitt, E. L. Lafleur, K.C., and Geoffrey Lawrence appeared to argue questions for the Dominion government. P. B. Magnault, K.C., and H. H. Hellmuth, K.C., to argue other questions. While S. R. O. Smith and A. G. Keenan represented the attorney general of Quebec.

The judicial committee sit unrobed, but counsel are robed. The council chamber is merely a large room like a council chamber and their lordships sit round a table. Counsel take turns in addressing them from a sort of lectern and practically no provision is made for the general public and reporters except the official stenographers.

Today Nesbitt opened with a formal reply to the grounds of the appeal. The first question of the court to be decided he said, was the parliament of Canada's authority to enact in whole or in part the first and second sections of the twelfth parliament of Ontario.

Lord Chancellor: "That was an act intended to amend the marriage law."

Mr. Nesbitt: "Yes, and the bill proposed the following amendments, then going on to quote what these are."

Lord Shaw: "Whether the reference to the act is to the provisions of the act or to the provisions of the act and if not, which one is it?"

Mr. Nesbitt agreed and proceeded to read question two.

### ALBERTA PACIFIC OPENS UP CALGARY OFFICES

Rumor Again Afloat that Road Rights Have Been Acquired by Big Milwaukee

O. E. Culbert, Pacific Solicitor, Here but Declines to Make Statement

That the Chicago, Milwaukee & St. Paul railroad has secured control of the interests behind the projected Alberta Pacific railway, and will proceed to construct the line north from Whiskey Gap, Mon., just on the other side of the international border, to Calgary, and thence to Edmonton, is an authoritative report that is in circulation in Calgary.

"I have absolutely nothing to say for publication," said Mr. Culbert yesterday. "I am here simply to secure information, but I am not going to talk about the Alberta Pacific railway under any circumstances. Too much publicity would injure the enterprise."

The Alberta Pacific originally secured a charter from the Dominion government, with promise of a cash bonus of \$2,500 per mile. The line was to be projected by the Hill system, affording a Canadian connection on the north for the Great Northern.

Some years ago the Canadian west, through the Kootenay, west, and thence down the Flathead to connect with the Milwaukee line already building north from Kalspoff.

It would open up timber, rich fields on the north fork of the Old Man river in Alberta, and the rich territory in the Flathead district of British Columbia.

Some years earlier Mr. Morgan found it necessary to have on deposit in London the sum of \$25,000,000 in gold to meet certain obligations incurred in the organization of the International Finance Corporation.

### STATES JUGGLE WITH BIG BANKERS OF THE COLLOSSAL SUMS THROUGH THE CROPS

On One Occasion Morgan Raised \$25,000,000 on Cotton Bills of Exchange; Cotton Stood Behind the Twenty Million Dollars Payment to Spain

New York, July 22.—At the time of the money panic in October, 1907, the harvest of the cotton crop of the year were, to a considerable extent, ready for the markets. It was the knowledge that cotton in great amounts was ready for export, which enabled some of the largest dealers in foreign exchange to discount cotton bills and with this security to obtain instantly in Great Britain large amounts of money.

On one day one of the chief institutions of New York which makes a specialty of foreign exchange discounted \$5,000,000 worth of cotton bills. These discounts established credits for the brokers against which they could draw in case they were willing that their checks should be paid through the Clearing House and the cotton bills were, by means of the cable and the fine artifices of international financing, converted into gold.

Some years earlier Mr. Morgan found it necessary to have on deposit in London the sum of \$25,000,000 in gold to meet certain obligations incurred in the organization of the International Finance Corporation.

ACQUATIC SALUTE GIVEN THE KING AT THE REGATTA AT HENLEY.—For the first time in years the Henley Regatta was this year under royal patronage, the King and Queen being rowed up the river in the gilded barques of the King and Queen, centuries ago. ### WILSON FURNITURE CO. TO BUILD LARGE WAREHOUSE

City Makes Application for a Permit to Erect Electric Light Station

Former to Cost \$66,000; City's Expenditure \$8,000; Many Residential Permits

Applications by the city of Calgary to construct an \$8,000 electric light station, and by the Wilson Furniture company for a \$66,000 warehouse were the principal items at the office of City Building Inspector Sylvester yesterday.

The new municipal sub-station will be located on the city's property at Maharaj, East Calgary, and will be constructed of brick and concrete. It will be used to house the transformers and equipment made necessary by the extension of the lighting system.

The warehouse for the Wilson Furniture company will be six stories high. The big structure is to be located on Eleventh avenue and Fourth street east, on lots 21 and 22, and part of 23, block 7, section 15, east of the city.

McNeill & Trainer, contractors, the building will be 66 x 24 feet by 14 feet in dimensions, provided with two elevators, steam heat and electric lights.

Building permits have been granted to the following owners: J. DeBrock, one storey brick veneer store building, lots 13 and 14, block 1, Sunnyside, \$1,000.

H. J. Morton, one storey brick veneer, lots 28 and 10, block 39, section 22, Royal Plaza, \$2,000.

J. C. Ritchie two storey frame, lots 6 and 7, block 4, Rosevale, \$2,000.

James Lynamington, frame, lot 16, block 68, South Calgary, \$250.

Isaacs Dash, one storey frame, lot 14, block 45, section 27, Tuxedo Park, \$300.

STOP WRECKS BY COMPETITION (From the Chicago Record-Herald.) Impetus has been given to the safety movement on the Frisco system through an announcement by the management that passes will be issued to the wives or mothers or sisters of the employees on the division which made the best record in the reduction of personal injury accidents during the year ended June 30 last.

Records of the various divisions are now being compared and the winner, it is expected will be announced within a short time. Each pass will be signed by the superintendent of the winning division. These passes will be good for a period of six months on the division in question and will be limited in the majority of instances to families of employees who have been in the service of the Frisco system for a year or more. In some cases a service limit of three or more years has been established to women who are employed on the line. The passes also will be furnished to the successful division.

English to Discuss Roads Three thousand persons from all parts of the world will take part in the International Road Congress which opens in London.

Evidence will be offered as to what constitutes the perfect road and how different kinds of trees and ways of shoeing horses act upon road surfaces. The effect of tarred roads on public health, fish life and vegetation will be discussed, and many roads in the home countries will be inspected by delegates.

At It Was Last Year A great many people have wondered how the bankers of this country have managed to accumulate funds enough to make it possible for them to lend Germany in the present emergency a sum of a hundred millions, and also to send large amounts of money out to the States, Mexico, Canada, Mexico and other countries.

But this great accumulation of available money is not the only reason why the American farmer has been able to continue to figure upon the prospects of the harvest on July 1. It has already been estimated that in the rainy season of last year our export of cotton alone was sufficient to make the United States a net creditor of \$200,000,000 in the world at that time.

On the basis of the estimates made by the State Department, the average of the harvest on July 1, it has already been estimated that in the rainy season of last year our export of cotton alone was sufficient to make the United States a net creditor of \$200,000,000 in the world at that time.

### CHILDREN CRY FOR FLETCHER'S CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Dr. J. C. Fletcher and has been made under his personal supervision since his infancy.

What is CASTORIA Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant, it neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Dizziness, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of Dr. J. C. Fletcher The Kind You Have Always Bought In Use For Over 30 Years

### SHORT LINE EXTENSIONS OF LIGHT DEPARTMENT

Nearly five miles of short line extensions were put in during the month of June, according to a report submitted to Commissioner Graves by Superintendent Brown of the city light department. The total revenue for the month amounted to \$31,564.22. The department is now getting in shape so that the promised reductions in the cost of light and power to consumers may be announced within five or six weeks.

Ninety 200 candle power tungsten and twenty alternating current lamps have been installed in Sunny-side, Hillhurst and Upper Hillhurst streets during the month. The underground conduit work is progressing rapidly. Pending the completion of the Ninth avenue sub-station, the three 500 kilowatt transformers purchased from the Packard Electric company have been removed from the storehouse and put into service to take care of the large number of recent connections in the west end of the city.

exclusive jurisdiction of the dominion parliament, while the provincial power extended only to the regulation of the solemnization of religious formalities by which the contract was to be authenticated or satisfied.

Following Mr. Lawrence, who supported Mr. Nesbitt's argument, I. C. Hellmuth, K.C., replied to the arguments which so far had been addressed to the lordship, and mentioned that P. B. Magnault, K.C., would deal with the further point of the Roman Catholics who were married by a minister other than a Roman Catholic priest.

Lord Chancellor Loreburn: "You are not dealing with the code?"

Counsel replied that he was not dealing with the point that on a true construction of the code Roman Catholics were rendered absolutely incapable of having their marriages solemnized other than before a parish priest.

Continuing his argument in support of the negative answer to questions 1 and 2, he characterized the act as one dealing with the solemnization of marriage, which was assigned to the respective provinces. In regard to the proposed changes in the ceremonies, Mr. Hellmuth contended it took away the liberty of the provinces to say what ceremonies should be observed. Each province now had its own marriage laws.

Lord Shaw: "It is, then, not your view that what is aimed at here is that assuming there is a proper ceremony in a particular province, the marriage shall be valid, notwithstanding the religious disqualifications?"

Mr. Hellmuth: "The religious side of the question I ignore."

There were other cogent arguments why the provinces ought to make their own marriage laws, notably because by the British North America act the solemnization of marriages in the provinces was expressly disallowed from which latter subject was specifically assigned to the dominion.

Counsel was still speaking when the committee adjourned.

### BORIS OF BULGARIA LOVES ELIZABETH OF ROUMANIA

Vienna, July 20.—A Bukharest newspaper publishes a remarkable story of the romance of the young Bulgarian prince, Crown Prince Boris, who is said to have fallen in love with Princess Elizabeth of Roumania through having seen her photograph.

Princess Boris has never met Princess Elizabeth, who is the eldest daughter of the Crown Prince of Roumania, but he saw her photograph when the Queen of Roumania visited the Bulgarian court a year ago.

Immediately on coming to age, Prince Boris informed King Ferdinand, his father, of his desire to marry Elizabeth, who is the eldest daughter of the Crown Prince of Roumania, but he was told that he would remain single all his life.

King Ferdinand had no objection to the match, but King Carol of Roumania on being approached objected for political reasons. King Ferdinand, however, persuaded the Austrian emperor, during his recent visit to Vienna, to use his influence with the King of Roumania.

King Ferdinand was successful that the official announcement of the engagement of the young couple is expected shortly.

Following Mr. Lawrence, who supported Mr. Nesbitt's argument, I. C. Hellmuth, K.C., replied to the arguments which so far had been addressed to the lordship, and mentioned that P. B. Magnault, K.C., would deal with the further point of the Roman Catholics who were married by a minister other than a Roman Catholic priest.

Lord Chancellor Loreburn: "You are not dealing with the code?"

Counsel replied that he was not dealing with the point that on a true construction of the code Roman Catholics were rendered absolutely incapable of having their marriages solemnized other than before a parish priest.

CLOSING FORTIFIED PORTS MISCONSTRUED

Ottawa, July 22.—Some New York newspapers have taken the proclamation in The Canada Gazette of Sunday closing the ports of Quebec, Halifax and Montreal to foreign steamers under regulation, as indicating a decision on the part of the Canadian government to close these ports to all steamers of any nation whatever. But it is explained at the naval department that the order is purely a precautionary one, and that it is advisable for the masters to pass it in their boats and keep it in their memories. There is no present reason for trouble, but it is considered just as well to show ship masters all over the world that when the hour of danger comes it will be necessary to obey the regulations of the Canadian naval department.

TWO NEW CRUISERS FOR CANADIAN NAVY

Ottawa, July 22.—The naval department has issued a call for tenders for the construction of two new fighting protective cruisers for the Pacific coast. Encroachments of Russia, Japanese, and United States fishing schooners upon Canadian territorial waters have made increased protection urgent and the government is determined to prevent at all costs the loss of Canadian fishing rights by foreigners. The new cruisers will be the swiftest ever used on the Pacific coast and will be equipped in the most up-to-date manner. They will open the slower fisheries previously closed now in commission.

# AUTOMOBILE DEPARTMENT

Calgary's automobile club has determined to have the roads throughout the province of Alberta materially improved and the members are going at it in a business way. They are not appealing for subscriptions but have arranged to bring pressure to bear upon the provincial parliament to have a large part of the \$23,000 revenue of Alberta to the government expended in road improvements. Automobile owners in this province pay a tax of \$10 per annum and as there are more than 2,300 automobiles owned in Alberta the club provides a fund which would be very helpful in maintaining good roads.

The motorists are entirely unselfish in their demands. Good roads are as essential to the farmer as to the city dweller. While automobile use is increasing rapidly, the pleasure and convenience, to the farmer good roads are a necessity. It is the plan of the Calgary Automobile club to have the legislative assembly use all of the motor tax fund for road improvements, save what is actually needed to construct the office. And this is where the money should be spent.

Calgary has a duty to perform when His Royal Highness the Duke of Connaught visits us in September. The city should be well decorated and put on a gala attire during the sojourn of the distinguished guest. Automobile owners can help largely by having their cars decorated for the occasion and the demonstration planned by the Auto club should be generously participated in. It is the intention of the club to have

a big automobile parade and practically every machine in Calgary and many from outside cities as well, should be in line.

**Women Watch New Features**  
Wide-awake women in Montreal are more interested in the motor-car problem than ever before. A woman no longer estimates the merits of a car by the speed with which it transfers her from point to point, or merely its pretty color. She may not be conversant with all of the underlying and poppet valves, ignition or carburetion, but she wants to know and test the results. During the last year more women than ever before have taken up the driving of their own cars withing principles of the sliding sleeve out of the shaft, and 1912 will see many more do the same.

When buying a 1912 model the woman that expects to drive her own car all or part of the time is alert to ascertain if it is too bulky for her to handle in districts where traffic is congested. She will be decidedly in favor of a car equipped with a self-starter, electric-lighting system and shock preventers.

In wet weather when the roads about the island are muddy, few women feel secure of driving a car without the regular antiskid chains on the rear wheels, but I have found many who prefer a non-skidding type of tire tread on the rear wheels at all times, so great is their dread of skidding at turn of corners, or wheels being caught in trolley tracks, which cause violent slowing. Personally, I feel much safer in a car with studded tires.

are not adept at lighting matches where a strong wind is blowing and they wait until the match will be free from becoming chilled or drenched while endeavoring to light three lamps, to avoid the embarrassment of being arrested on a public road, or what is even more important to insure their own safety.

The women who wish to ride without injury over rolling, rough or flat country roads, are joining and fears the troubles or overstraining or clashing with springs—and that means every woman—will appreciate shock absorbers. They can make a great difference in the way a car rides as the writer has ascertained from practical experience.

**Abolish the Cut-out (sh)**  
Most convincing proof was furnished during the motor tests conducted last week in New York under the auspices of the Touring Club of America, eliminate the use of the muffler and out on automobiles—a movement that has spread throughout the country. A view to demonstrating that a motor equipped with a muffler designed muffler will develop its maximum power without the use of a cut-out, the Touring Club arranged with the Packard Motor Car Company for the experimental use of a Packard "30" motor which was installed in the laboratory of Joseph Tracey, the well-known automobile engineer, where a series of tests were made during the week under the direction of Mr. Tracey, chairman of the Club's Technical Committee. The figures obtained showed a much less percentage of loss in power without the cut-out than by the experiments recently conducted in London upon some of the best makes of foreign cars.

At that time, Child's bank, a private concern, which had the backing of a great part of the English nobility, exhibited such signs of future greatness that the Bank of England became greatly alarmed, especially in view of the fact that the "Old Lady's" notes were at a discount of 10 per cent. So little by little through their agents, the manager of the Bank of England bought up every receipt bearing the Child's signature, allowing the collections to accumulate each year until the time should be ripe, during a shortage of gold, to present the receipts in one great mass for payment. It was deemed a certainty that Child's would not be able to meet the demand and would thus be ruined.

**THE USE OF TRACTORS**  
Over 1,800 young men in the prairie provinces received instruction during the last two months in the handling of tractors in schools conducted by experts of the Rumely company alone. These schools lasted from six to twelve days and were in operation in the cities of Calgary, Saskatoon, Regina and Winnipeg. The local gathering was attended by 360 farmers and farmers' sons of the province, every part of which was represented.

The period spent by the young men in these schools might appear to be quite insufficient to secure a knowledge of the modern tractor. The fact, however, is that the school of instruction is practically a post-graduate nature. Almost every farmer in the province has had some experience with a tractor, and the only concession that has been previously owned on the farm, or rented machines have been employed for brief periods, or the machines of neighbors have been used for still more brief periods. The result is that the men who come to the schools have a practical knowledge of the tractor, and the instruction on these points is given by the experts, and the students progress rapidly, grasping the points very quickly.

## CASH THAT FOUNDED THE BANK OF ENGLAND

London, July 22.—No other banking institution has so romantic a history as that pertaining to the Bank of England, "The Old Lady of Threadneedle Street."

The founder of the bank was William Paterson, an adventurous Scotchman, who it was said at one time of his life had controlled every privateer that sailed the Spanish Main. Paterson laid the foundation of his fortune in the buying and selling of slaves and the clearing of £100,000 as his share of the gold found on the sunken Spanish galleon.

It seems to be agreed, says Harper's Weekly, that it was with these funds and those derived from his buccaneering expedition that Paterson, who had been banished to Holland by James II., financed, in part, the expedition of the Prince of Orange across the Boyne.

With the advent of William III. to the English throne came the first plans for the establishment of a national bank. Those writers who treat of the "inside history" of the times entertain no doubt that while William III. was indeed the moving spirit of the scheme, Paterson was, nevertheless, the indispensable one in the realization thereof. He was the official mouthpiece at the weekly meeting of the famous group of financiers known as "the Wednesday Club."

At that time, Child's bank, a private concern, which had the backing of a great part of the English nobility, exhibited such signs of future greatness that the Bank of England became greatly alarmed, especially in view of the fact that the "Old Lady's" notes were at a discount of 10 per cent. So little by little through their agents, the manager of the Bank of England bought up every receipt bearing the Child's signature, allowing the collections to accumulate each year until the time should be ripe, during a shortage of gold, to present the receipts in one great mass for payment. It was deemed a certainty that Child's would not be able to meet the demand and would thus be ruined.

The principal figure in the drama that ensued was not other than the famous Sarah Jennings, in whom Child's bank found its staunchest supporter. One night there came a wild clanging at the bell of the great gate of the Town of Bienenheim—a clanging that soon awakened every one in the town. In her dressing gown appeared the duchess, inquiring the reason for this unseemly visitation, the man explained that the Bank of England held the Child's receipts in the amount of six hundred and twenty thousand pounds, that these receipts would be presented for payment at noon following, that there was not a cent of gold in the vaults to meet them, that unless the demand could be satisfied within eight hours Child's was ruined, and that there was but one person in the world—her grace—to whom they might turn.

Whereupon the redoubtable duchess sat down and wrote out a cheque, which she handed to the agent. It was an order on the Bank of England for the payment of £700,000. He was instructed to take this cheque to the Bank of England, and to say that if he hesitated for a single instant in paying it the duchess would proclaim it as a defaulter.

At 12 o'clock that day there appeared at the Child's counter an agent of the Bank of England bearing a bag full of receipts and blandly suggesting immediate payment. At the same moment the Child's agent was in Threadneedle Street receiving cash on the cheque of the duchess.

The cashiers at Child's naturally took their own time in scrutinizing the receipts, spending fully half an hour over the first batch alone. They were at the end of the first hundred when their messenger arrived. Then they quickened the procedure a little, and within ten minutes the Bank of England had been paid in its own coin. The net result was that Child's was many thousands pounds richer.

## TWENTY YEARS IN CHAINS

Pittsburg, Pa., July 22.—An insane man, who had been a prisoner in chains for twenty years in his home in Indiana, Pa., was received at a district asylum yesterday, shipped in a rough pine box. He was bound with ropes, wore no clothing, and with uncut beard and hair was more like a wild animal than a man.

According to the county officials and physician, who accompanied the patient, the man has been insane 20 years. His condition was kept a secret by his parents. The father, obliging to the hope that his son might regain his reason, shackled him with chains to the wall of a room in an obscure part of the house.

The father's death recently revealed the story. As soon as the county authorities learned the state of affairs, they took charge of the demented man.

## WOMEN SHAVE THEIR CATS

District Society Women Have Fur of Felts Clipped Because of the Hot Weather

Suffering cats! Come and get shaved! That is the call sent out by a number of society cat owners of the District of Columbia since the hot weather set in and since a woman in Chicago solved the problem of how to keep cats cool by having their hot fur clipped off. The cat-shaving idea has struck a popular chord among the owners of aristocratic felines, with the result that if the present hot wave continues scores of pedigreed tabbies are doomed to lose their furry coats.

Mrs. Henry L. West, president of the Washington Cat Club, said last night that she understands that several district women have already had their cats' hair clipped. Personally, she said, she believes in cutting tabby's fur only when it gets tangled, but other women do it because of the heat.

## AN AEROPLANE AS A MOVING VAN

Final notice having been served on the birdmen at Nassau Boulevard that all hangars would be razed within a day or two and that all the tenants were to take up their residence at the Hemstead Plains aviation field, George W. Beatty last night got together his belongings, piled them into his aeroplane and with Mrs. F. F. Schick for a passenger flew across the field to his abode. After Beatty had accomplished his moving, he made a flight with Miss M. Banning and to add to the luxuriousness of his fur during the winter. After a cat's hair has been cut it grows out very smoothly and softly, she said. The

custom has not been adopted as generally in the District as in other parts of the country, she stated. It is a rule that the fur on the cats' tails never be cut, added Mrs. West. "The hair on the tails grows more slowly than the hair on other parts of the body, but when it does not grow—and therefore if the tail hair were clipped or shaved it would remain short for quite a while."

"Cats with long fur, especially Persian cats, suffer severely in the summer from the heat, and many people believe that it is perfectly proper to clip the fur and thereby add to their comfort."

## What the Press Agents Say

### CLEVER PLAYERS COME IN "LOUISIANA LOU."

"I am sending on the tour of 'Louisiana Lou' the very identical company I have been playing in the La Salle Opera House in that musical comedy," writes Harry Askin, the manager of the La Salle, from Chicago.

It is Mr. Askin's idea that no La Salle Opera House play should be sent on tour unless every man and girl in the company is fitted in every way to appear in the La Salle itself. This is his idea, and it is also the general theatrical idea of the act test of musical comedy to be able to make good in the La Salle audience in Chicago. "A player who can please a Chicago La Salle audience, can please an audience anywhere else in the world," is an axiom of the latter-day managers of musical comedy and comic opera.

Manager Askin's original La Salle Opera House cast, to be seen here on Monday and Tuesday nights, August 19 and 20, at the Sherman Grand, well bears the closest inspection by those who know the most talented men and women in musical comedy today.

### "THE GREAT ALBINO" COMING

Coming this way with a car-load of new and bewitching illusions and surprises, representing an outlay of \$50,000, the Great Albino, heading his own company, will play an engagement of three days with us, commencing Thursday, July 26, at the Sherman Grand. The Great Albino-Avolo aggregation of world-famed stars is a company of artists of recognized ability and have been so selected that there are no conflicting elements on the long and interesting programme. On the contrary, the performance has been so arranged as to portray the elements of novelty, comedy, singing, dancing, and music. The Great Albino has never before been seen at such an advantage as this season. He has added so many new features that he changes his act daily. He has established himself as a favorite, there being no one in his class, through his business in which he has been so long engaged. The world's acknowledged premier xiphon exponent, Four Avolos, will render popular music and classical selections including Mr. Chas. Avolo's recent composition, "The Avolo March." The bewitching Four Allen Sisters in a series of delightful songs, dances, with character changes; Scotland's Own, singers, dancers, and bagpipers, the three Stratton brothers, Mile. De Vallence, the charming comedy and novelty artists; the globe-trotting ventriloquist and dancing doll, Cobly and Way; and Tom Brantford, storyteller and mimic, also known as the "human band." The performance lasts two and one-half hours without a wait, and during this time creates more laughter and shows more novelties, and causes more favorable comment, than all the farces comedies ever seen. The prices during the engagement will be popular, and within everyone's reach, and this company on its merits, should play to capacity business.

### Reasonably Sure.

(From the Chicago Record-Herald).  
"Are you in favor of government ownership?"  
"Most emphatically yes."  
"Very well, I guess you're not counting any bonds that you ought to be paying taxes on, 'im the assessor?"

## EFFEL TOWER WIRELESS CREATES DISTURBANCE

Paris, July 20.—Electricians at Clichy-Levallois who touched the wires of a large stand of telegraph wires not connected with any system revealed severe shocks. Investigation revealed the fact that the shocks were due to Herizian waves sent out from the great wireless station at Eiffel tower. By pure chance the group of wires filled all the conditions of height, distance and position necessary to receive the Eiffel tower's communications.

### John D.'s Slim Chance

Here's a new story on John D. Rockefeller told the other day by his Cleveland pastor, Rev. Dr. W. W. Bustard.

"While riding in an auto with Mr. Rockefeller recently, some miles from Cleveland," said Rev. Dr. Bustard, "we were about to pass a little barefoot girl plodding along through the dust, when Mr. Rockefeller ordered the chauffeur to stop the car. Then he invited her to step up on the running board, and asked her where she would like to have the car stopped."

"The little girl said she wanted to get off at the second crossroads, and asked:

"How far are you going?"  
"Oh, we're going to heaven," Mr. Rockefeller answered.  
"The little girl was surprised, as many people are when he says that. Then he asked: 'Will you get in?'"  
"No," said the little girl.  
"And why not?" persisted Mr. Rockefeller.  
"I don't think you have enough gasoline," she said.

THE MARKETS

QUICKEST CLEAN-UP FOR SOME TIME IN CATTLE... LOOKED GOOD FOR A TIME; FLATTENED OUT LATER... Some 450 Head Offered on Montreal Market Yesterday Morning; Good Prices... Receipts Since Thursday Last 600 Head; Market Still Continues Steady... Montreal, July 22.—The quickest clean-up seen on any local cattle market for some time was made this morning at the west end stock yards. When some 450 head of butcher's cattle, all that were left from a consignment of 600 since Thursday last, were offered. The chief reason was that their prices were all within reach of the buyers and comparatively at par with Wednesday's quotations, except for the few choice animals which were stronger owing to the demand caused by the lack of butcher's steers, there being only about two loads offered. Receipts of cattle since Thursday are estimated at 600 head. Market steady. Top butcher's steers, 675 to 700; good, 640 to 660; fair, 610 to 630; poor, 575 to 590. There was a demand for butchers, but they were strong for canning purposes only, at 500 to 400. Best butchers' cows, 600 to 625; good, 575 to 595; fair, 555 to 585; poor, 525 to 555. Receipts—sheep since Thursday, 500 head. Market steady. Old sheep, 375 to 400; spring lambs, 450 to 500. Receipts—hogs, since Thursday, estimated, 1,000. Market strong. Selects, 575 to 590; short and long run, respectively, 550 to 675, and 525 to 600. Receipts—calves, 270 head. Market steady. Calves, 4 to 12 each, as to size and quality. Last week's receipts—1,450 cattle, 1,450 sheep, 1,500 hogs and 625 calves.

BEARISH AT MINNEAPOLIS

Developments Tending to Counteract Decline—Less Little Effect—Prices Low, But Firm... Minneapolis, July 22.—While there were developments in the market that tend to counteract the bearishness of speculative sentiment, the effect was nil. Selling was not especially pronounced, but buying power was limited. On the decline, which was at a new low point, there was evidence of some sturdy resistance. A more marked effort to rally. A most authentic report on the existence of black rust came to hand today. A pretty broad flour market developed locally, with a little export business looked. Cables were relatively firm, and domestic prices are on a fair export basis. Speculative sentiment is very bearish. The general aspect of north-west crops is very favorable, and harvest prospects are bright. The dreams of even the most optimistic with every body figuratively wringing their hands wondering who will take the hedge, will not account for a part of its placement may account for the cash market locally had an advance of last week's close. 800 Pauly was sold on September, but only 10 cents over future. Demand for top milling grades was good.

HAD CENTRE OF STAGE

Toronto Railway Occupied All Attention Given to Stocks at Toronto Yesterday... Toronto, July 22.—Toronto Railway stock occupied the centre of a quiet stage for a while today by running a couple of points better than the rest well at the morning session, but liquidation in the afternoon sent the quotation down to 14 1/2. It recovered fractionally at the close. The weakness in Toronto rails and points out that the majority of German writers have considered it wholly from a financial standpoint. He contends that there is another point, almost as vital, to be considered, and that is the question of subsistence in the event that a superior fleet or cut off all importations of foodstuffs. Professor Frohlich takes up the question of whether Germany could meet the exhaustive drain of a war and points out that the majority of German writers have considered it wholly from a financial standpoint. He contends that there is another point, almost as vital, to be considered, and that is the question of subsistence in the event that a superior fleet or cut off all importations of foodstuffs. Professor Frohlich takes up the question of whether Germany could meet the exhaustive drain of a war and points out that the majority of German writers have considered it wholly from a financial standpoint. He contends that there is another point, almost as vital, to be considered, and that is the question of subsistence in the event that a superior fleet or cut off all importations of foodstuffs.

GERMAN WRITER PREDICTS FAMINE IN CASE OF WAR

Declares Germany Would Be in Grave Danger of Starvation if Cut Off From the Sea... Little Help Could Be Expected From Other Powers—Are Not Producers... Berlin, July 22.—That a famine would be inevitable in a war that resulted in cutting her off from the sea and Germany would be in grave danger of being starved into submission and have a victory snatched from her, by the gaunt spectre of hunger, is the declaration of Professor Franz Frohlich, a noted German historian and military writer, in an article just published in Professor Frohlich, who has written recent articles and books upon war, and who has declared that brought victory to one side and defeat to the other, urges upon the German government to purchase 1,000,000 tons of wheat as a reserve "famine store." Professor Frohlich takes up the question of whether Germany could meet the exhaustive drain of a war and points out that the majority of German writers have considered it wholly from a financial standpoint. He contends that there is another point, almost as vital, to be considered, and that is the question of subsistence in the event that a superior fleet or cut off all importations of foodstuffs. Professor Frohlich takes up the question of whether Germany could meet the exhaustive drain of a war and points out that the majority of German writers have considered it wholly from a financial standpoint. He contends that there is another point, almost as vital, to be considered, and that is the question of subsistence in the event that a superior fleet or cut off all importations of foodstuffs.

BIG CROPS EXPECTED IN ALL THE COAST STATES

Portland, Ore., July 20.—Pacific Northwest grain crops for 1912 show a heavy increase in quality over the 1911 crops and are in excellent condition, says The Portland Journal today. The wheat crop for Washington, Idaho and Oregon shows the greatest increase, being estimated at 74,000,000 bushels, against 68,750,000 bushels in 1911. Following is the estimated yield of wheat for 1912 for the three states: Oregon, 24,500,000; Washington, 23,200,000; Idaho, 11,300,000. Oregon shows the greatest increase, this year's wheat crop being greater by 7,750,000 bushels than that of 1911. Washington crops are heavier by 1,200,000 beyond its 1911 yield. Idaho shows a decrease of 7,000,000 bushels in comparison with the 1911 crop. The great increase in Oregon is principally in the central section of the state. The barley crop for the Pacific Northwest for 1912 amounts to 14,800,000 bushels, as compared with 11,350,000 bushels for 1911. Oats total 20,000,000 bushels for the Pacific Northwest this year, compared with 28,500,000 bushels last year. The red clover crop for 1912 is 500,000 bushels, as compared with 420,000 bushels in 1911.

WHITMAN THREATENED TO BE MURDERED

New York, July 20.—District Attorney Whitman and others active in running down the assassin of Herman Rosenthal, the gambler who was killed, suspected by the police, for "breaching" were notified today by anonymous letters that if their efforts to ferret out the mystery do not stop, they too will be assassinated. Whitman has been declared today that the underworld is determined to go to any length to stop the probe, and grave fears are felt that other killings are planned. District Attorney Whitman admits that threats to kill him have been received since the arrest of Wm. Charles Rosenthal, the assassin of Herman Rosenthal, the gambler who was killed. He believes that it was not little gamblers who caused Rosenthal's murder, but that it was carried out simply to strike terror to the hearts of others expected to give information of the reign of crime. He asserts flatly that the shadow of the police is over the assassins. Whitman's detectives are investigating everyone connected in any way with the Rosenthal murder. Lieutenant Becker, who was connected with the killing in remote ways and who is known to have been an intimate of the headquarters, Commissioner Valdig refuses to remove him until formal charges are filed. Austria, continues the writer, cannot give a helping hand in the matter of food and provisions because it has all its own people in time of peace to feed its own people. Italy, the third member of the triple alliance, does not produce enough for its own subsistence and must import. Little is to be expected from the Balkans, hence Germany must look to itself and prepare for such a contingency. The inevitable consequences of such a condition, says Prof. Frohlich, is that Germany must not only arm itself financially, but also fill its pantries and granaries. Just as in the great Julius tower at Spangenberg a reserve war fund of \$30,000,000 was also stored in Germany, also maintain a great reserve store of food, oil, and grain. For example, the government of Austria imports little, 1,000,000 tons of wheat, which well dried, should be stored in large granaries. As what will keep for years, it would be necessary to renew only a small quantity each year. As to the question of cost, a million tons of wheat could be bought for a year of \$50,000,000, which would mean a year's loss of interest of about \$2,500,000. The cost of granary and their administration would be about \$750,000 annually, a total yearly expenditure of approximately \$3,250,000. This addition of the budget would be significant when it is considered that it may prevent jeopardizing a successful beginning of war through famine. Conditions and the population of Germany changed rapidly since the war 1870 that the nation would be confronted by entirely different problems than it was then. The population is more than one-third greater. There is more industry, largely an agricultural nation now it is largely industrial. In view of the possibility of being cut off from all ocean traffic in a war, it devolves upon Germany to insure its independence of the sea in the matter of food for at least some months after war begins. The report that the population of France has decreased 34,000 in the last year has caused German officials to again examine Germany's vital statistics very closely. And Germany is just a bit worried about the fact that slowly, but apparently none the less surely, it also is in danger of coming under the head of race suicide nations.

Why Samson Became Tame (From Harper's Magazine) "And when Dallah cut Samson's hair, he became as mild as a lamb. Can you understand it?" asked the Sunday school teacher. "Well," said little Tommy, shamefacedly, "it does make you feel weaker when a woman cuts your hair."

GENERAL STRIKE IN NEW ZEALAND NEXT MONTH

Christchurch, N. Z., July 20.—Industrial troubles are causing great anxiety throughout New Zealand, and the impression is growing that a general strike will break out in the spring (September). The labor leaders have declared that the strike at the Waikato gold mines, which broke out last month, is to be a fight to a finish with the gloves off.

QUIET AT WINNIPEG

Winnipeg, July 22.—Trading on the wheat market today was quiet and dull, and prices generally weaker. Winnipeg wheat closed 1/2 over Chicago July and 3/4 over Minneapolis. While October declined from the opening 4, but recovered before closing. October prices were unchanged for July, and 1/4 lower for October. Oats closed 1/4 up for July, and 1/4 for October. Americans were steadier for all the spread and the spread between Winnipeg and American markets is very noticeable. Winnipeg July closed 1/2 over Chicago July and 3/4 over Minneapolis, while Winnipeg October was 1/2 over Chicago September, and only 1/4 under Minneapolis October. While the tone of Winnipeg markets was much the strongest. Continental cables were lower and Liverpool closing figures were 4 to 5 lower. The Winnipeg cash demand was decidedly poor. While offerings were heavy comparatively. Oats were not much in demand, and prices were weak early, but stiffened in the close. Flax was steady. October closed unchanged and July's higher. While corn was weaker, but oats made a fairly sharp advance at the close. Receipts were heavy and 500 cars being in sight for inspection today. Deliveries through the clearing house today were: Wheat 37,000, 28,000, extra No. 1 feed oats 34,000, 1000.

CHICAGO LIVE STOCK

Chicago, July 22.—Cattle receipts 12,000. Market steady. Steers, 490 to 700; western steers, 550 to 750; calves and heifers, 250 to 450; cows and heifers, 250 to 450. Sheep receipts 14,000. Market active. 5 to 10 cents lower. Light, 635 to 675; mixed, 730 to 875; heavy, 710 to 785. Hogs receipts 8,000 to 8,500. Market active. 5 to 10 cents lower. Light, 635 to 675; mixed, 730 to 875; heavy, 710 to 785. Sheep receipts 14,000. Market active. 5 to 10 cents lower. Light, 635 to 675; mixed, 730 to 875; heavy, 710 to 785. Hogs receipts 8,000 to 8,500. Market active. 5 to 10 cents lower. Light, 635 to 675; mixed, 730 to 875; heavy, 710 to 785.

EGYPTIAN ANTIQUITIES FOR THE TURIN MUSEUM

Milan, July 20.—Eighty-eight huge cases of Egyptian antiquities, discovered during the last season's explorations under the direction of the Italian archaeological mission under the direction of the famous Egyptologist, Prof. Franz Schiaparelli, are now being transferred to the Turin museum, which contains one of the finest collections of this kind in Europe. Special interest centres in the Schiaparelli finds from the circumferences of the fourth and twelfth dynasties, including a number of 22nd century before Christ, with respect to which archaeological material has hitherto been very scarce. The tombs of this epoch were found intact, and over 120 coffins were recovered in a splendid state of preservation. They contain skeletons and all kinds of art objects, pieces of furniture, and fragments of wooden statues. The new finds of painted sarcophagi are said to be exceedingly fine.

TO TICKLE HIS PALATE

But the Deficacy of Fish Feathers? (From The Popular Magazine) The young man did not know what he wanted to eat. His appetite was poor. He wanted to be tempted and tickled. He scanned the menu card again and again. Finally, with a sigh of resignation, he said to the waiter: "Bring me some fish feathers." "Fish feathers!" exclaimed the waiter. "Yes, fish feathers. And I want 'em tonight—no next week!" The waiter retired for a conference with the chef, the captain and the floor manager. "No such dish here," was his report. "There ain't any such thing. There never was such a dish in New York." The young man arose and sighed again. "That's what I've been told by every waiter in New York," he remarked sadly. "But if you'll direct me to a boat out of here, the commissaire of fisheries in Washington, he will correct your mistake, enlighten your ignorance."

WHEAT STEADY, CHICAGO

Chicago, July 22.—Reports that harvesting had spread as far north as Minnesota and that except in a few counties the whole spring crop of the United States was practically beyond danger from rusts made today's wheat market steady. Closing prices showed a 1 cent net decline. Latest trading left corn 1/4 down, and oats varying from 1/4 to 1/2 up. Although foreign rallies took place in the wheat pit, they grew weaker as the day advanced. The best display of strength was witnessed when word came from Milbank, S. D., that black rust had been discovered near there. Prices soon began to slip down again, however, after experts had declared that barring the furthest away strip of North Dakota, the crop had reached safety from any new infection. Late advices of black rust at Eden Prairie, Minn. and Fargo, N. D., received little attention. Ideal weather for growth led to active selling of corn. Cash grades were in fair demand. Belief that recent rains had delayed the early marketing of oats developed sentiment in favor of an uptick for that cereal. Receipts were small.

NOTHING NEW IN LONDON

London, July 22.—No new features developed in the stock market today, and trading continued quiet. Foreign rails and copper shares hardened, and consoils were steady, but other sections eased off. Home rails were weak following the announcement of ground shares were steady except the local group. American securities were quiet and steady. Prices advanced on light covering during the morning, and later the list showed a further slight improvement under the lead of Erie shares. The market closed steady. Money and discount rates steady. The Bank of England bought most of the \$3,000,000 South African gold offered in the open market. The stock exchange will be closed Saturday, August 3, and Monday, August 5. The latter is a bank holiday.

**The Paper Carriage**

on the Burroughs Visible adding machine is as easy to operate as a typewriter carriage.

Drop the paper into the chute and turn the platen—two sets of rubber pressure rollers catch the paper and guide it into place ready for work.

This carriage can be put on or taken off with a screw-driver in 30 seconds—any one of three standard carriages (3-1-2, 12-1-2 and 20 inches) can be furnished.

We'll be glad to show you this machine, any time, anywhere.

Burroughs Adding Machine Co.  
C. W. Higgins, Sales Manager  
P. O. Box 68. Winnipeg, Man.

**MAIL INSURANCE**

To be insured against hail on June 25th, hailed out on June 27th, and to receive check for insurance covering damage on July 5th, was the experience of Ross Bros. north of town, and is an example of quick work on the part of the insurance company, who not only appraised the damage to the crop, but had a report in and a check mailed in 10 days from the time of the storm.

Ross Bros. took out a policy with THE WESTERN CANADA FIRE Insurance Co. of which George Millar is the agent here, on June 25th. Two days afterwards 45 per cent of their fine wheat crop was damaged by hail which came during the heavy rain storm on June 27th. They reported the damage, an appraiser came down from Calgary, made his report, and on July 5th came the cash for 45 per cent of the amount of the policy.—Tabor Times.
