

Wardrobe-logic

Five salesmen and twenty wardrobes in a Semi-ready store are equal to 15 salesmen in any other. That is, the wardrobes do the work of about ten men, as well as all the crush, fade and dust preventing services they render.

Wardrobes earn no salaries, they belong to Semi-ready. Ten extra salesmen would greatly increase expenses. Stores would have to be twice the size to accommodate them and the numerous tables and shelves the wardrobes entirely dispense with.

The wardrobes constitute one of the potent factors which keep down Semi-ready prices—explain why all the points of high-grade custom-tailoring can be embodied in Semi-ready clothes for gentlemen at prices very little higher than ready-mades.

THE SHRIeking LOCOMOTIVE

The Railroad Gazette offers some good advice to the people in cities, towns and villages who are troubled with shrieking locomotives. It does not believe in municipal bylaws restricting whistling so much as in appealing to the common sense of the railroad superintendent. A property conducted campaign directed toward that official would be a dozen pages of ordinances, which can be enforced only by means of a mass of lawyers' technicalities. After referring to the passage of an ordinance by the city of Massillon, Ohio, forbidding whistling, the Gazette goes on to say that it is a pity that there are not more such laws in force in other cities.

MR. MACAULLY'S REPLY

Editor World: I have never been fond of law, nor am I looking for a law suit to outgrow from my reply to the Canada life's unapproved attack on the Sun Life; but if the Canada's president considers himself or his company unduly aggrieved by my criticisms into the attacking camp, he knows where I am usually to be found. And while I am not possessed of the great wealth which he is reputed to control, I may perhaps be found to be financially responsible for all the purposes of any action at law that he may have in contemplation.

AREA OF THE BOER WAR

New York Tribune: Recent occurrences in South Africa have strongly called attention to the widespread area of the Boer resistance to the British. Never in the history of the war has the scope of operations been so extended, and the consequent difficulty of governing the vast areas of the Boer territory. In the earlier stages of the war the Boer forces were chiefly scattered in two or three places. Now they are scattered all over South Africa, from the Cape to the Limpopo River.

WALRIKE SPIRIT AMONG NAUTICALS

The British Navy is still stronger, by a considerable margin, than the navies of France and Russia combined. John Bull is also busy building submarines, and will probably be few and far between in a single day. It is becoming more and more a game of chance. Time was when war vessels went in the open and fought fairly, and armies used to meet face to face on the battle plain and settle international disputes by the sword. Now, however, the art of self-defense is being taught to the masses, and the art of self-defense is being taught to the masses.

SCHLEY DID RIGHT

Witness Defends the Admiral for His Conduct During Battle. Washington, Oct. 7.—Lieut. Commander Hodgson again occupied the greater part of the Shelby Court of Inquiry to-day as a witness. He was followed on the stand by Captain W. M. Peifer, formerly chief of the Bureau of Ordnance of the Navy Department, but commander of the New Orleans during the Spanish war. Lieut. Peifer also was recalled to add some details to his former testimony concerning the coal supply of the American fleet during the Santiago blockade.

THE ART OF SELF-DEFENSE

The popular idea expressed in the phrase, "the art of self-defense," shows that the opinion that the chief enemies are visible and external. But the real danger of every man is from minute and often invisible foes. In the air we breathe and in the water we drink are countless minute organisms leagued against the health of the body.

Ald. Sheppard said the trouble in banking on the closed cars arose from the fact that the managers had been indicted for the same offence. He said that the managers had committed an outrage upon the public, and that the company had been a party to it.

DEATH OF GEO. GIBB.

At the meeting of the Toronto Typographical Union No. 91 on Saturday night the following resolution was passed: That, whereas, thru the illness and death of our late fellow member, Mr. George Gibb, it has been brought most forcibly to our attention that in this, the Queen City of the Dominion, the city of churches and charities, and institutions wherein the lame, the mentally deficient, the diseased and the feeble-minded, may find shelter and comfort—there is not one of our non-sectarian institutions wherein a person dying of pneumonia, cholera, or any other fatal disease, is not so freely accorded the attention which is so freely accorded the sufferer in the most virulent and infectious diseases:

And, whereas, after having been denied admittance to various institutions for the relief of the sick and distressed, our late brother was given shelter and attendance by the authorities of the connected with the House of Providence in Toronto:

Therefore, be it resolved, that Toronto Typographical Union, No. 91, take this opportunity of expressing its thanks to the Reverend Dr. Treacy for assistance rendered, and of placing upon record its profound appreciation of the feeling of true Christian fellowship, which prompted the Lady Superior and her assistants to open the doors of that institution and extend to our late brother medical attention and nursing and the privilege of a shelter in which to lie down and die:

And, be it further resolved, that a copy of this resolution, signed by the proper officers, and attested by the seal of Toronto Typographical Union, No. 91, be handed to the Reverend Dr. Treacy, with the request that he forward it to the proper authorities.

EXTRAPATE ANARCHISTS.

London, Oct. 7.—The speech of H. Kelly of New York at the Anarchist meeting held in a hall in Whitechapel, London, last night, which he denounced the late Premier McKim's political career, has led to a revival of the demand for the extradition of Anarchists. The Pall Mall Gazette this afternoon compares Anarchism with Pantheism, and maintains that the only difference between the two is that of Anarchism and the war of outrage advocated by such men as former Congress man Henry in merely one of diverse means to the same end, and that the police of the two Anarchist, who president of the Anarchist League, and the late Premier McKim, are the same.

AT OSGOODE HALL.

The Divisional Court yesterday granted an order calling upon J. A. Mackie, J.P., of Waterloo to show cause why his conviction of Henry B. Duering in August last should not be set aside. Duering was fined on the information of one Schott for that he does had run down and killed some of the latter's sheep. The case, two in number, was ordered to be heard, but this has not yet been done. The main ground upon which the application was made was that the Justice of the Peace usurped the functions of the Waterloo Police Magistrate.

PROSPECTUS UNITED FACTORIES LIMITED

The Charter of the "United Factories Limited" has been obtained and Stock issued to acquire, as going concerns, the Brush, Broom and Woodenware businesses of the well-known and long-established firms of

Boeckh Bros. & Company, of Toronto and Montreal; Wm. Cane & Sons Manufacturing Company, Limited, Newmarket; Thomas Bryan, London, Ontario,

including all properties, leaseholds, real estate, plant and machinery, stock-in-trade manufactured and in process of manufacture, timber limits (many years' supply), trade-marks, patents, and in fact every asset of the three businesses except book debts and bills receivable, and thus the new Company takes up the whole business and continues the same without interruption or change of management.

ACCOUNTANTS' CERTIFICATE.

We hereby certify that we have examined the books and accounts of Boeckh Bros. & Company, and Thomas Bryan, for the years 1897 and 1899, and the Wm. Cane & Sons Manufacturing Company, Limited, for the years 1897, 1898 and 1899, and find that the combined average yearly net profits amount to \$45,669.91. All expenses, including bad and doubtful debts, allowance for depreciation of plant and equipment; the rate of 7 per cent. per annum, and also salary for management, have been charged in arriving at these profits. We find, however, that the sales have increased over 52 per cent. during the past four years, and these three businesses are year by year increasing their profits.

A. C. NEFF, F.C.A., WILTON C. EDDIS, F.C.A. Chartered Accountants.

Toronto, May 21st, 1901.

NOTE.—It will be observed that, after deducting Management salaries, all expenses, providing for bad and doubtful debts, and annually writing off 7 per cent. for depreciation of plant, the net profits have been at the rate of \$45,669.91 per annum. In consequence of increased business of the past nine months it is estimated that the net profits for the current year will be over \$60,000, and continue to largely increase, so that the \$28,000 required to pay the 7 per cent. dividends upon the First Preference Stock is more than assured.

DISTRIBUTION OF PROFITS—RESERVE ACCOUNT.

The First Preference Stock is entitled to preferential (cumulative) dividends of 7 per cent. per annum payable quarterly on March, June, September and December the First.

Of the remaining profits, not less than 10 per cent., nor more than 20 per cent. thereof, shall be transferred to a reserve account to better ensure the above mentioned dividends (to be used in the business of the Company), and this policy is to be continued until the reserve reaches 20 per cent. of the First Preference Stock issued and outstanding, at which sum it will be maintained, and if drawn upon will in like manner be restored.

The Second Preference Stock is non-cumulative and is entitled to dividends out of the then remaining profits up to 5 per cent. per annum, payable yearly. After which all three Stocks—First and Second Preference and Common—are entitled to participate equally in any further profit of each fiscal year.

In the event of the liquidation or dissolution of the Company the First Preference Stock is to be paid in full before anything can be paid on the Second Preference, and the Second Preference then stands next for payment in full before anything can be paid on the Common Stock. These provisions make the First Preference Stock unusually attractive, as its 7 per cent. (cumulative) dividends and safety are not only guarded, but the Directors of the Company believe it will be earning and paying larger dividends in a comparatively short time.

MANAGEMENT OF THE COMPANY.

The Directors and Managers of the Company are gentlemen of standing and long experience in this class of business, inasmuch as all of them were instrumental in making the old firms such a substantial success and their goods so favorably known from one end of Canada to the other.

WORKING CAPITAL, ETC.

In addition to the other assets of the old business, the Company, after all adjustments are made, will have a working capital of \$125,000 beside \$100,000 of First Preference Stock in the treasury; will have no liabilities, mortgages, or debts of any kind, and will possess a union of the three businesses profitably established for upwards of forty years, during all of which time the manufactured goods and standing of the firms were of the highest class.

TORONTO STOCK EXCHANGE.

Application will be made in due course to have the First Preference Stock listed on the Toronto Stock Exchange in the usual way.

LETTER FROM MR. EMIL C. BOECKH. Attention is directed to the annexed letter from Mr. Emil C. Boeckh of Toronto, the President and General Manager of the Company: Toronto, Sept. 28th, 1901.

Hon. Geo. E. Foster, Vice-President and General Manager. The Union Trust Company, Toronto.

DEAR SIR.—In connection with the issue of the Prospectus and Stock of United Factories, Limited, it may prove of interest to add a few words as to "why we unite."

The primary object has been to give permanence to a line of industries which have grown up with the country, and which through consolidation will continue to grow without fear of the interruptions which are liable to occur in an ordinary company or partnership business. These industries are, in their very nature, difficult ones to establish, requiring technical knowledge, perfect organization, and careful attention to details, so that the possibility of undesirable competition is reduced to a minimum.

Arrangements have been made to retain the present Managers, who are all interested very largely in the financial success of the Company through holdings of shares acquired in the transfer of their respective businesses. Through many years' connection in the markets of the world, for the buying of Bristles, Broom Corn and other raw material, and possessing important timber limits, through which its lumber is acquired at first cost, and through extensive additions to its plant already made, the company will be in a position to greatly increase its business and profits in the future.

An important objective point which the new company will achieve is the manufacturing and marketing of a better article than has been possible in the past, and at no increase in cost. There are no articles in general use better known to the trade and consumers in Canada than Boeckh's Standard Brushes and Brooms, Bryan's London Brushes and Cane's Newmarket Woodenware, and the Company holds a most valuable asset in these well and favorably known brands. Brushes, Brooms and Woodenware are in demand in every home, warehouse, factory, mill, stable and public building, and on boats, railways, farms, etc., and are distributed through dealers in hardware, paints and oils, groceries, harness, drugs, etc., and the company has a very strong connection with the leading houses in these lines. Owing to the rapid development of the packing industries of the Dominion, both for export and for home consumption, the Company is assured of a constantly increasing trade with pork packers, confectioners, canners and manufacturers of pickles, paints, oils, varnishes, syrups and jams, all of whom are very large consumers of wooden packages of all kinds.

Judicious Advertising, one of the secrets of modern business success, will form an important feature in the policy of the Company. It is a well-known fact that, after passing a certain point, and which we have passed, increased business can be done with comparatively little extra expense, thus assuring greater profits, while the retail prices are not disturbed.

The First Preference Stock is strictly a safe investment, which will earn a practically guaranteed dividend of 7 per cent., and owing to the provisions made for participation in further profits, and judging from our steadily increasing business, I am of opinion the First Preference Stock, in a reasonable time, will be earning and paying 8 per cent. and higher.

Yours very truly, EMIL C. BOECKH.

SUBSCRIPTIONS FOR STOCK.

The Directors and their associates have taken \$200,000 of the First Preference Stock at par. It is their intention to hold the stock, and in the meantime have mutually agreed in writing to withhold it from the market.
