Leonard Ames, sr., head of the

. Y., on Friday night, aged 81 years,

There has hardly been as large an export trade this year as usual if one may judge by appearances without any figures to guide the opinion. And this falling off seems to be because of a dearth of suitable export animals. The export of horses from Canada and the United States grew in five years from 3,000 animals to 30,000 and from a value of \$700,000 to \$4,800,000. The continent of Europe took of the 30,000 less than 7,000 of which rather over half went to Belgium and the lesser half to France, Germany and Holland. France took a class of "cabbers." The bulk of all the others were draft horses, in fact of those going to Great of the service of There has hardly been as large The bulk of all the others were draft horses, in fact of those going to Great Britain 90 per cent. were draft animals, 7 per cent. were high class coachers, and 3 per cent. were roadsters and trotters. Those rated draft, are animals weighing 1,500 lbs. or over. It costs from \$30 to \$40 per head to send a horse from Chicago, Toronto or Buffalo, to the market in Europe and another \$10.0r so to put him in shape there for sale, as it takes some time for the horse to recover from the effects of the sea voyage.

time for the horse to recover from the effects of the sea voyage.

The charge for a cheap horse is just as great as for a first class animal so that it pays to buy and export the best class. From this it will be readily seen how important the Draft Stallion is to the export trade in horses. And the value of a draft horse increases largely with size. Horses weighing 1,700 lbs. are much more valuable than those weighing 1,500 lbs. Over the former weight a good quality of horse flesh is valuable; it has been estimated that over 1,700 lbs. it is worth 50c per pound. Good, well made draft stallions are more needed now than ever before if we are to keep and increase our export trade in horses.

Canada's Paris Exhibits.

The Canadian Commissioners for the Paris exhibition have decided to recommend that the exhibits be sent by regular steamer instead of by one of the government vessels as was first proposed. The only vessels available from the government fleet were the Newfield and Stanley. Both are comparatively slow boats, but the greatest drawback was the fact that their carrying canacity was very small.

The Santa Scala, or Holy Stairs, at Rome, were brought from Jerusalem along with the true cross by the Empress Helen, and were taken from the house which, according to popular tradition, was inhabited by Pontius Pilate. They are said to be the steps which Jesus ascendeed and descended when brought into the presence of the Roman Governor. They are held in the greatest veneration at Rome. It is sacrilegious to walk upon them. The knees of the faithful must alone touch them in ascending or descending that only after the pilgrims.

She wore a dinner-dress of delicate gray silk, trimmed with creamy lace, and in the bosom of her dress was a last tea-rose, half blown and fragrant. She was lovelier than ever, he thought, and yet so different from the Dulcie that had blushed and laughed her way into his heart in Kent. He contented himself with looking at her for a while, and then—just as she had known he would be—he was drawn to go and speak to her. As she watched him crossing to her from the other end of the long, bare salon, she wondered a little at her own interest in him. He was not her judge, yet she longed to appease his anger.

"It is horrible," she thought, "for a man so good and clever to think ill of me; and besides he might turn Esther against me if I quarrel with him now." So, for Esther's sake, and for fear of future prejudice, she set herself to soft ent his rigid law-giver. DICKENS KILLED HIMSELF.

DICKENS KILLED HIMSELF.

The Great Novelist Reckiesly
Brought About His Own Death.

Mr. Charles Dickens, son of the great
novelist, has given us a sad picture of
his father, bringing out very clearly how
recklessly the great novelist killed himself by giving public readings.

"There was something of almost willful exaggeration," he says, "of a defiance
of any fossible overfatigue, either of
mind or body, in the feverish sort of energy with which these readings were
entered upon and carried out." It would
almost seem that he might have been
living and writing novels to this day if
he had not persisted, in defiance of all
warnings, in giving public readings
which exhausted his strength and ultimately killed him. He had plenty of
symptoms of his approaching collapse.

"Among of his approaching collapse.
"Among other serious symptoms he rediced that he could only read the halv "Among other serious symptoms he noticed that he could only read the halves of the letters over the shop doors on his right. The old elasticity was impaired, the old unflagging vigor often faitered. One night at the St. James' hall, I remember, he found if impossible to say Pickwick and called him Pickswick and Picnic and Peckwicks and all sorts of names except the right, with a comical glance of surprise at the occupants of the front seats, which were always reserved, for his family and friends. In fact, when my father described himself in a letter written to Mr. Dolby on the very eve of the breakdown as being a little out of sorts, he was, in fact, on the brink of an attack of paralysis of the left side and probably of apoplexy."
What finished him was a farewell series of 12 readings at St. James' hill. The state in which he was can be imagined from the instructions given to young

"One day I met her in the corridor—a little woman with a face that beamed over with smiles and a whole world of love in her eyes, and I cursed that man in every picturesque phrase I could think of as a brute who didn't deserve such luck. What Yom Kippur Means.

According to the behests of Judaism actual guilt cannot be converted into right by any act of forgiveness or atonement, human or divine. The definition of the Hebrew word kofar, which is the root of kippurim, conveys quite a different meaning. It denotes "covering up," to "overlay." It means that by carrying out resolutions of repentance into practice man will be able to "cover up" a multitude of sins. This is the rational idea of Judaism regarding the expiation of sins. This is the cornerstone of salvation as attained through man's own efforts.—Jewish Spectator.

How the Indian Women Go Shopping
In the Territories.

If you watch Indian women shopping
you will see feminine eagerness, caprice
and love for fine and pretty things. They
cannot shop as other women do, poor
things, for, instead of flitting gayly to any
shop that pleases, they are in most cases
obliged to patronize one, and that is rareity the best. The reason for this goes deep,
into governmental appointments and Indian agents, and the question is too delicate and reformatory to discuss. Women
of the Sarah Barton class cannot speak of
t with patience. dian agents, and the question is too delicate and reformatory to discuss. Women of the Sarah Barton class cannot speak of it with patience.

When the woman of the reservation goes shopping, she does so only at such times as the government gives its wards their allowance. The Indian trades on credit, the agent pays the store and not the Indian, and the storekeeper sees that the bill of goods bought shall equal the amount of pension money due his customer, even though he is reduced to selling half a yard of velveteen for \$2 and common gilt tape at \$1 a yard.

And yet the women find shopping infinitely amusing. In some of the larger towns shops reach a cheap imitation of the department store, and the Indian women take varied and feminine delight in sauntering from one counter to another, feeling of dress goods and gazing at unattainable ribbons and passementeries. The shop's interpreter goes with them, like a courier, and lightly directs their somewhat doubtful fancy to unsalable goods. They are timid and gay as children and most unlovely to look upon, for there is an unhappy incongruity about tenement house garb and Minnehaha physiognomy.

They are very shy and show none of the dignified indifference of the men, which is like that of a lion in captivity. In the shop they cling to the interpreter with a faith that would appeal to any ordinary conscience, but the Indian and his money are considered fair game in the territories. After the shop is left the women follow closely on the heels of their lords until bundled into the big box wagon to drive home. I have never seen one alone on the streets of a town, so great is their timidity in the face of that civilization toward which they are inevitably advancing.

There were seven of them, all big, sturdy fellows, who were believed to be harmless. The keeper only looked in upon them now and again, feeling that his constant presence was unnecessary.

"The doctor unlocked the iron barred door of the kitchen and went in among the lunatics.

"There were five large boilers containing scalding water ready for making the day's dinner for the patients.

"One of the lunatics pointed at the boilers full of hot water and, laying his hand upon the doctor's shoulder, said, 'Doctor, you'll make a fine plot of both,' and the words had no sooner been uttered than the other six madmen shouted in a voice of delight, 'Just the thing,' and, seizing the doctor, were in the very act of putting him into one of the large boilers of scalding water, when the doctor had the presence of mind to say, but not a second too soon:

There are no expressive eyes. The expression of the eye is really in the lid. The eye itself, independent of its surroundings, has no more expression than has a glass marble. A prominent English oculist makes this daring statement, and he defends his position with emphasis. "The eyes have no expression whatever," he says. "How do you explain the fact that the eyes of one person are more expressive than those of another? I am asked. They are not. The difference consists in certain nervous contractions of the lids peculiar to the individual.

My upper eyelid raises itself just a little, but the eye proper does not change an iota in appearance. If the interruption is but momentary, the elevation of the lid will be but momentary. If the surprise caused by the interruption is continued, the lid may be raised even a little more, and, in fact, the whole of the forehead, including the eyebrows, is raised and wrin-

A GAMBLING EXPERIENCE. The Wide Awake Captain Won by

The Wide Awake Captain Wom by Coppering the Colonel's Game.

"It isn't many men who have beaten a brace fare game," said an old steamboat captain, 'but I enjoyed that experience in Memphis one night, at the time gambling was wide open everywhere along the river. I was steered into the place by a pleasant spoken chap, who had scraped acquaintance at the hotel, and I saw immediately that I was against a lot of robbers. I realized, however, that I would probably get sandbagged if I raised a row, so I concluded to sit down at the fare table, lose a few dollars and then make some excuse to go out.

"I bought a stack of chips, and had just started to play when two new men came in, one of them evidently a 'capper' for the house and the other a drunken planter. From the significant glances of all hands it was plain that a rich prise had been landed, and as they made room for the poor dup's at the table, the dealer asked me very courteous; to cash in my chips and quit. You see, they was room for the poor dup's at the table, the dealer asked me very courteous; to cash in my chips and quit. You see, they was to derote their enhance, attention to plucking the planter, and the dealer gave as a reason that 'Colonei — was an old friend and liked to have the game to himself."

"That gave me my cue, and I told him pretty shortly that I intended to remain where I was. 'Oh, let him stay,' grunted the planter, good naturedly, and the chap behind the table, soowling like mad, resumed the deal. The drunken man slapped down \$50 at a time, and I followed him with \$5 a shot, playing opposite. In other words, when his bet was open mine was 'coppered,' and vice verse. It was impossible for them to win from him without losing to me, and I could hear the whole crowd gritting their teeth every time I gathered in the chips. They wanted my gore, sure, but didn't dare molest me for fear of alarming the planter.

Preparing Stuffed Eggs for the Table.

Put six eggs into lukewarm water, bring to boiling point and simmer gently for twenty minutes; remove the shells and cut the eggs into halves lengthwise; rub the yokes to a powder, adding gradually two tablespoonfuls of melted butter, half a teaspoonful of salt, a dash of pepper, and, if you like, a few drops of onion juice. Form into balls and put back into the whites. The seasoning may be changed by adding two or three mashed sardines to the yokes, or one or two anchovies, or you may add a tablespoonful of chopped tongue or ham.—Ladies' Home Journal. Judgment of the Court.

A wildly turbulent peasant was once a witness in a trial before Chief Baron O'Grady. The counsel, after pestering him for some time, put a question to him which reflected on the character of the witness.

"If ye ax me that again I'll give ye a kick on the jaw!" was the answer. The counsel appealed to the court, stating that an answer was necessary to his client's case, ending up with the query: "What would your Lordship advise me to do?"

"If you are resolved to repeat the question," replied the court, "I'd advise you to move a little from the witness."

"Yes, and a great long one—as much as six feet long."

DICKENS KILLED HIMSELF.

DICKENS KILLED HIMSELF.

The Great Nevelist Recklessly
Brought About His Own Death.

Mr. Charles Dickens, son of the great
novelist, has given us a sad picture of
his father, bringing out very clearly how
recklessly the great novelist killed himself by giving public readings.

"There was something of almost willful exaggeration," he says, "of a defiance
of any fossible overfatigue, either of
mind or body, in the feverish sort of energy with which these readings were
entered upon and carried out." It would
almost seem that he might have been
living and writing novels to this day if
he had not persisted, in defiance of all
warnings, in giving public readings
which exhausted his strength and ultimately killed him. He had plenty of
symptoms of his approaching collapse.

"Among other serious symptoms he noticed that he could only read the halves of the letters over the shop doors on his right. The old elasticity was impaired, the old unflagging vigor often faltered. One night at the St. James' hall, I remember, he found if impossible to say Pickwick and called him Pickswick and Picnic and Peckwicks and all sorts of names except the right, with a comical glance of surprise at the occupants of the front seats, which were always reserved for his family and friends. In fact, when my father described himself in a letter written to Mr. Dolby on the very eve of the breakdown as being a little out of sorts,' he was, in fact, on the brink of an attack of paralysis of the left side and probably of apoplexy." What finished him was a farewell series of 12 readings at St. James' hall. The state in which he was can be imagined from the instructions given to young Dickens by his father's medical attendant.

A MODEL WIFE.

And the Curious Discovery Made by an Inquisitive Bachelor.

"She was my model wife until yester-day—that is," remarked the cynical bach-elor who lives in an apartment house on the east side, "she was my model for wives. She and her husband lived in the wives. She and her husband lived in the flat just over mine, and I used to hear him come home at hours that made even a hardened old sinner like me ashamed for all men's sake. It would be 2 or 8 and sometimes 4 o'clock in the morning when he would come thumping up stars, and I knew—the privacy of an apartment house is not all that it might be—don't you know, that she was waiting for him and that the door flew open to greet him and that for an hour or two afterward there would be the sound of talking. Not scolding, but merry conversation and laughter.

"I used to hear the rattle of dishes and often on summer nights would catch savory odors floating down the light shaft—that blessed agent for the transmission of everything but air and sunshine. Then after a time there would be
silence. It used to go on—that sort of

What Yom Kippur Means.
According to the behests of Judaism actual guilt cannot be converted into right by any act of forgiveness or atonement, human or divine. The definition of the Hebrew word kofar, which is the root of kippurim, conveys quite a different meaning. It denotes "covering up," to "overlay." It means that by carrying out resolutions of repentance into practice man will be able to "cover up" a multitude of sins. This is the rational idea of Judaism regarding the expiation of sins. This is the cornerstone of salvation as attained through man's own efforts.—Jewish Spectator. What Yom Kippur Means

PORK PRODUCTION.

In a bulletin just issued by the Octawa Experimental Farm directors, all the experimental Farm of the past eight years have been directed in the feeding and fattening of swine at the Central Experimental Farm for the past eight years have been tabulated and summarized so as to present in a condenced form the whole of the information which has been gained by the investigations made regarding pork production during that time. Information is also given in this bullettin in reference to the care of the breeding stock and the management and feeding of young pigs.

The experiments conducted and reported upon seem to indicate that:

I. It will not pay to cook feed for swine where economy of pork production is the sele consideration.

3. There is a gradual increase in the quantity of feed consumed for every pound of gain in live weight after the average live weight exceeds 100 lbs.

The most economical time to all shaped to the form of the protection is the sele consideration.

The most economical time to talge the most economical gains are made when the swine are able to eat the most effect in proportion to their weight.

Frozen wheat may be used as a profitable feed for swine.

The Missourian was duly equipped with a brush and big bucket of whitewash and was starting to his work, when Bob said:

"By the way, there is a crazy fool in this town that has got it into his head that he owns that barn. If he comes around interfering, you just chase him off the premises."

"All right, boss," responded the Missourian. "If that lunatic monkeys around here he'll wish he hadn't."

This was in the early morning, and soon the Missourian was slathering whitewash over that beautifun! red barn in a manner most ghastly to behold.

What is a complete food for the pig, and will it pay to feed some wheat even when wheat is pretty high in price? If wheat is fed with cornmest, the results are highly satisfactory. Bran, because of its character of com-position, is not a wholly desirable feed profit at any time during the hog's life.

They are not only rich in protein and ash, but are what may be called a clean, smooth food, being tree from the objectionable crude fibre which so prominently distinguishes bran. About the second twist the big Missourian seized his bucket of whitewash and poured the whole contents over Mose's head and shoulders and then sild down the ladder to the ground, where the two mixed in one of the prettiest fights the town had ever seen. But the Missourian was too much for Mose, and pretty soon he had the redheaded Irishman on the ground with two black eyes and a bleeding nose. Then the crowd which had gathered compelled him to let Mose up, and with a howl of rage that much abused man started for his room and his six shooters. The Name of Mary.

Mary is one of the oldest names in use today. Women of all classes christen their children with the Virgin's name, and its universal use will never detract from its dignity. Marie is the French version of the name, and those bearing it look forward to Aug. 15, the festival of the assumption, the fete day when all Maries receive the floral offerings in honor of their patron saint. There is no name more favored throughout France than the name of Marie. It is borne by the peasants and by the young women of the house of Orleans. Notable among Maries is the Princess Waldemar of Denmark. The Name of Mary.

Maries is the Princess Waldemar of Denmark.

In some provinces of France almost every woman is christened Marie, with an after name—for example, Marie Antoinette. Many of the ancient houses of both France and England value the inheritance of Marie with their heirlooms and lands. The Noailles, Boisgelins, d'Andignes, Larochejaguleleins all include one or more Maries in each generation. Byen men in France bear the prenom of Marie, which is used in legal documents, though seldom, if ever, used in uments, though seldom, if ever, used speaking.

How the Indian Women Go Shopping
In the Territories.

If you watch Indian women shopping

If you watch Indian women shopping you will see feminine cagerness, caprice and love for fine and pretty things. They cannot shop as other women do, poor things, for, instead of flitting gayly to any shop that pleases, they are in most cases obliged to patronize one, and that is rarely the best. The reason for this goes deep into governmental appointments and Indian agents, and the question is too delicate and reformatory to discuss. Women of the Sarah Barton class cannot speak of it with patience.

When the woman of the reservation goes shopping, she does so only at such times as the government gives its wards their allowance. The Indian trades on credit, the agent pays the store and not the Indian, and the storekeeper sees that the bill of goods bought shall equal the amount of pension money due his customer, even though he is reduced to selling half a yard of velveteen for \$2 and common gilt tape at \$1 a yard.

And yet the women find shopping infinitely amusing. In some of the larger towns shops reach a cheap imitation of the department store, and the Indian women take varied and feminine delight in sauntering from one counter to another, feeding of dress goods and gazing at unattainable ribbons and passementeries. The shop's interpreter goes with them, like a courier, and lightly directs their somewhat doubtful fancy to unsalable goods. They are timid and gay as children and most unlovely to look upon, for there is now unhappy incongruity about tenement house garb and Minnehaha physicognomy.

They are very shy and show none of

tenement house garb and Minnehaha physiognomy.

They are very shy and show none of the dignified indifference of the men, which is like that of a lion in captivity. In the shop they cling to the interpreter with a faith that would appeal to any ordinary conscience, but the Indian and his money are considered fair game in the territories. After the shop is left the women follow closely on the heels of their lords until bundled into the big box wagon to drive home. I have never seen one alone on the streets of a town, so great is their timidity in the face of that civilization toward which they are inevitably advancing.

FIRST AMERICAN PATENT.

Granted at Boston in 1648 and Called a Monopoly.

To the general court of Massachusetts belongs the honor of granting the first American patent. This was in 1648 and was then designated as a monopoly. It was confined to the region controlled by Massachusetts, and the one issue apparently included all the invention of the inventor connected with engines that depended upon ed with engines that depended upon water for their motive power. The limit of the monopoly was 14 years, and the court not only retained power to forbid exportation, but to prevent exorbitant charges upon the public for

From the significant glances of all hands it was plain that a rich prise had been landed, and as they made room for the poor duj's at the table, the dealer asked me very courteously to cash in my chips and quit. You see, they was at tention to plucking the planter, and the dealer gave as a reason that 'Colone'—was an old friend and liked to have the game to himself.

"That gave me my cue, and I told him pretty shortly that I intended to remain where I was. 'Oh, let him stay,' grunted the planter, good naturedly, and the chap behind the table, secowling like mad, resumed the deal. The drunken man slapped down \$50 at a time, and I followed him with \$5 a shot, playing opposite. In other words, when his bet was open mine was 'coppered,' and vice versa. It was impossible for them to win from him without losing to me, and I could hear the whole crowd gritting their teeth every time I gathered in the chips. They wanted my gore, sure, but didn't dare molest me for fear of alarming the planter.

very seldom given to drunkenness.
In Brazil, for instance, where coffee
is grown extensively, and all the inhabitants drink it many times a day,
intoxication is rarely seen. The effect
is not only noticeable among the natives, but the foreigner who settles
there, though possessed of ever such
a passion for strong drink, gradually
loses his liking for alcohol as he acquires the coffee-drinking habit of
the Brazilian.

our beloved brother,—
We, the members of Court Glen Buell No. 878, Independent Order of Foresters, embrace the opportunity to extend to you our heartfelt sympathy bereavement. The sad affliction that has come to your home has also reached us. You have lost a kind and loving husband and father brother. As such, we mourn for him. The remembrance of his kindly deeds and smiling countenance cannot soon be forgotten by us. You will pardon us, we pray, for recalling the sad event. for Brother Orten was such that we cannot refrain from expressing our deep regret at his sudden death. We therefore, in fraternal bonds of "Friendship, Benevolence and Concord," commend you to Him who has promised to be a husband to the widow and a father to the fatherless, praying that He will give you divine strength and courage to bear the great loss thus sustained

Not a Faith Cure.

Not a Patth Cure.

Faith never worked a miracle in the case of Dr. Hall's Rheumatic Cure. It is the wonderful curative properties of the remedy that does the work. Mr. S. O. Taylor, Charlecote, Ont., suffered with rheumatism in the back (Lumbago) for four years. Five bottles of Dr. Hall's Rheumatic Cure completely cured him. He has been free from pain since. This preparation is used internally. One bottle contains ten days' treatment, so cents a bottle. For sale at all drug stores.
