**Technical and Bibliographic Notes / Notes techniques et bibliographiques**

The Instituté has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured covers/  
Couverture de couleur
- Covers damaged/  
Couverture endommagée
- Covers restored and/or laminated/  
Couverture restaurée et/ou pelliculée
- Cover title missing/  
Le titre de couverture manque
- Coloured maps/  
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/  
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/  
Planches et/ou illustrations en couleur
- Bound with other material/  
Relié avec d'autres documents
- Tight binding may cause shadows or distortion  
along interior margin/  
La reliure serrée peut causer de l'ombre ou de la  
distortion le long de la marge intérieure
- Blank leaves added during restoration may appear  
within the text. Whenever possible, these have  
been omitted from filming/  
Il se peut que certaines pages blanches ajoutées  
lors d'une restauration apparaissent dans le texte,  
mais, lorsque cela était possible, ces pages n'ont  
pas été filmées.
- Additional comments:/  
Commentaires supplémentaires:

This item is filmed at the reduction ratio checked below/  
Ce document est filmé au taux de réduction indiqué ci-dessous.

10X	14X	18X	22X	26X	30X
<input type="checkbox"/>					
12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

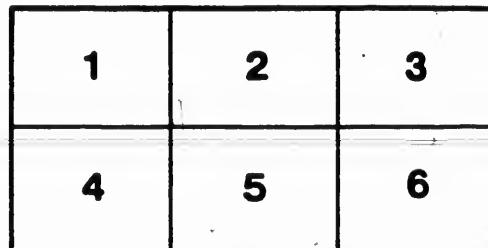

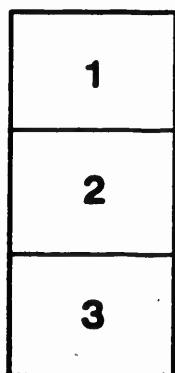

Library of the National Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives nationales du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

## PLEASE NOTE.

**In writing me** be particular to give your post-office address, and write your name plainly.

**To save unnecessary correspondence** please give as full particulars as possible of the machinery you require.

**In ordering** be particular to give all measurements so that I can fully understand what you desire me to send you, and full plain shipping directions.

**All claims for errors** must be made on receipt of goods.

**Discount Sheets** furnished on application.

**Prices are subject to change** without notice.

**All orders for machinery** to be taken upon, or subject to the conditions, of my usual lien order forms.

**All quotations for machinery** are on a Cash Basis; and for **Supplies**, monthly settlements. If under \$30 per month, net cash. If over \$30 per month, three months, or 3 per cent. off for prompt cash.

## INTRODUCTORY.

1887

**I**N presenting this catalogue to the Trade and users of machinery, I desire to thank my customers for the patronage bestowed upon me, and to assure them that I will endeavor, by prompt and careful attention to their needs, by sending them the very best goods, and by giving early and full replies to their inquiries for information, to merit a continuance of their trade.

I intend this catalogue to be, as per the title page, a

## "Price List of Machinery,"

AND A

"Price List and Illustrated Catalogue of

## MACHINERY & SUPPLIES."

I will furnish full particulars of any of the machines herein on application.

This catalogue only covers prices for new machinery and goods. I always have in stock a large supply of second-hand machinery and goods, which, when refitted and put in first-class order, I can sell at quite a discount from prices of new machinery. I will send list of second-hand machinery on application.

**A. R. WILLIAMS,**

35.00	Scroll Saw Attachment, including 12 assorted Scroll Saws.....	9.00
60.00	Boring Attachment, including an "Old Reliable" Self-centring Drill-Chuck.....	14.00
70.00	Counter Shaft for steam power.....	14.00

## I. X. L. Pipe Machine.

This machine is simple in construction, easy to work, not liable to get out of order, and requires no skilled labor. The arrangement of the gearing permits of the machine being adjusted to the work to be done, enabling one man to screw two-inch pipe with ease.

CROOKED THREADS CANNOT BE CUT, as the pipe revolves, and the die stands still. There are no loose guides to be changed or lost. The machine can be easily arranged to operate by belt power when desirable.

It is also an excellent machine for machine and jobbing shops, for cutting off round iron and steel, and with the Bolt-Threading and Nut-Tapping Attachment it makes a very good Bolt-Threader and Nut-Tapper.

### HAND MACHINE,

with set of Dies  $\frac{1}{2}$  to 2 inches inclusive, Fly-Wheel, and set of Sockets for making Nipples  $\frac{1}{2}$  to 2 inches—complete.....\$100 00

### POWER AND HAND MACHINE,

with set of Dies  $\frac{1}{2}$  to 2 inches inclusive, Fly-Wheel, Pulleys, Counter-shaft, and set of Sockets for making Nipples  $\frac{1}{2}$  to 2 inches—complete.....\$115 00

Speed of Countershaft, 200 revolutions per minute ;  
Pulleys 11 inches in diameter.

## Veneer Machinery.

I control the patterns, and manufacture to order heavy, substantial Veneer machines, suitable for cutting cheese-box material and veneer from  $\frac{3}{2}$  to  $\frac{3}{8}$  of an inch thick. Can arrange the capacity of the machine to suit the work required, cutting from 3 ft. to 6 ft. long. The machine is built on a heavy oak timber frame, solidly tenoned and bolted together. Iron work fitted on, complete, and making one of the most substantial Veneer machines manufactured on the continent. I have quite a number in use, and can furnish good references as to the ability of the machine.

Price for the 6-ft. Machine, complete, free on board cars at  
Toronto..... \$650 00

These Pumps are manufactured to order specially for my trade. I can also furnish larger sizes, and including Mining Pumps and Pumps for special service, for prompt delivery. Write for prices.

**The New "Otto" Silent Gas Engine.**

SAFETY! CONVENIENCE! ECONOMY!

Started instantly with a match. Always ready to give out its full power at once. Expense ceases when Engine stops. No boiler, no gauges, no coal, no fires, no steam, no pumps, no explosions, no danger, no ashes, no engineer, no extra insurance, no unpleasant heat, almost no attendance. Where power is required at intervals it is the cheapest motor known. Over 10,000 in use.

A. R. WILLIAMS,

Fans and Blowers.**Wing's Disc Fans or Exhausters.**

One of the most successful machines of the age. Thousands in use. Sales constantly increasing. This light running power Fan will move fully six times as much air as the centrifugal or usual exhaust fans and blowers, and is invaluable for drying, removing steam, dust, smoke, gases heat, etc., and for general ventilation and cooling.

For Boston Blower Co.'s Dry Kilns, Fans, Blowers and Exhausters, send for special catalogue, giving as full particulars of your requirements as possible, so as to save correspondence and delay in giving a full quotation.

## The Pickering Governor.

This Governor, by its accurate regulation and good workmanship, will commend itself wherever used.

We guarantee to regulate accurately any style or size of engine, and under all circumstances.

For durability in all its parts, simplicity of construction, and economy in fuel, it cannot be equalled.

Having no joints, its action is direct, thereby insuring greater sensitiveness than can be secured with any other Governor.

In ordering Governors be particular to specify the style wanted.

If no special dimensions are given, Governors will be sent according with the table below:

Size of Valve or Steam Pipe.	In.	\$15 14 13 12 11 10 9 8 7 6 5 4 3 2 1	Portable. Plain. Finished.	Speeder, Extra.	Stop Motion and Speeder Extra.	Dia. of Cylinder suitable for.	In.	In.	In.	In.	In.	Rev. per Minute for Fig. 1.

$1\frac{7}{8}$	$4\frac{1}{2}$ and 5	6 80
2	$4\frac{1}{2}$	7 70

All orders are filled with Hobs exact diameter of order, with sharp V thread unless otherwise stated.

If wanted for cutting Screw Plate Dies, we make them considerably over size, but call the Hobs by the size of the bolt to be cut, and designate them as "Screw Plate Die Hobs."

## Machine Screw Taps.

To avoid annoyances and misunderstandings which are constantly occurring, I wish to state here, that Standard Machine Screws are not made in fractional sizes, as regards diameter. They are made to the Standard Screw Gauge, which is as arbitrary as the Standard Wire Gauge. Thus, when  $\frac{1}{4}$  inch are ordered we send No. 14—20 threads to the inch—and when 5-16 we send No. 20—16 threads to the inch—neither of these Screws fit Standard Taps, as the No. 14 is a trifle smaller than  $\frac{1}{4}$  inch, and the No. 20 is not only larger than 5-16 but is 16 threads to the inch, while the regular standard is 18 threads. Those who use these Screws will find it at a great deal cheaper in the end to buy Standard Machine Screw Taps, as they can always order Screws by the number marked on the Tap, and be sure of getting them the right diameter and thread, and get them *at once*. The odd sizes (those differing from the Standard) in this list, are used generally for repair work and special purposes.

No.	Diameter about	Standard threads to the inch.	Size of Drill to Drill for Tapping.	We also carry taps of the following threads.	Price per Dozen	Price Each.

## Malleable Iron Fittings.

(Classified and sold by weight as under.)

### CLASS A.

Price 30 cts. per pound.

Elbows  $\frac{1}{2}$ ,  $\frac{1}{2} \times \frac{1}{2}$ ,  $\frac{3}{8} \times \frac{1}{2}$ .  
 Tees,  $\frac{1}{2}$ ,  $\frac{1}{2} \times \frac{1}{2}$ ,  $\frac{1}{2} \times \frac{1}{2}$ ,  $\frac{3}{8} \times \frac{1}{2}$ .  
 Reducing Couplings,  $\frac{1}{2} \times \frac{1}{2}$ ,  $\frac{3}{8} \times \frac{1}{2}$ .  
 Couplings, R. H.,  $\frac{1}{2}$ .

### CLASS B.

Price 18 cts. per pound.

Elbows and Tees, from  $\frac{1}{2}$  to  $\frac{3}{4}$  inclusive.  
 Street Elbows, all sizes.  
 Elbows, side outlets, all sizes.  
 Crosses, all sizes.  
 Drop L's and Drop Tees, all sizes.  
 Caps, Plugs and Lock-nuts, all sizes.

### CLASS B.

(Continued.)

Reducing Couplings, all sizes.  
 Extension Pieces.  
 Right and Left Fittings, all sizes.  
 Right Hand Couplings,  $\frac{1}{2}$  to 1.  
 Waste Nuts, Chandelier Hooks.  
 Return Bends, all sizes.  
 Straps, not tinned, all sizes.

### CLASS C.

Price 16 cts. per pound.

Elbows and Tees  $1 \times \frac{3}{4}$  and larger.  
 Such Fittings, in this class, as  
 have one or more outlets smaller  
 than  $\frac{3}{4}$  will be charged in Class B.

Wheels bored and key-seated or furnished with set screws at above prices.  
A reduction will be made on wheels not bored.

#### MEMO.

Nos. 35 and 45 work on same wheels as No. 55, but are cheaper and lighter in weight and strength.

Nos. 57 and 67 work on same wheels as No. 77, but are cheaper and lighter, and are not ribbed as No. 77 is, but are shaped like No. 55.

No. 75 is a fine size for light transfers, live rolls, tie and pole loaders, cord wood elevators, lumber trimmers, slash tables, shingle block tables. Nos. 78 and 88 are stronger chains working on same wheels as No. 75.

Order S1, attachments for light sawdust carriers.

**The Penberthy Improved Automatic Injector.****OUR PROPOSITION.**

As every injector is tested before it leaves the factory, we know that if properly connected as in diagram furnished, and instructions are carried out, they cannot fail to work. We therefore offer to pay the expenses of any man to come to the factory, and \$10 per day while there, if the Injector does not work, providing it has not been misused.

# The Improved Boiler Feeder.

NEW STYLE, WITH McAVITY'S  
PATENT IMPROVEMENT.

These are constructed in two parts, as shown, one side being designed for lifting and delivering, and the other for forcing against pressures. The lifting side only need be used to raise water to a moderate height, and for extreme height the forcing side.

Each Boiler Feeder carefully tested and proved before leaving the Factory.

When ordering, state as above, whether a full set, or a set of 12, or small set of 8 is wanted.

**Steel Dog Wrenches.**

Fitting screw heads from  $\frac{3}{8}$  to  $\frac{3}{4}$  in. square. Will answer for both Dogs and Tool Post.

Price 75 cents each.

### Straight Tail Lathe Dogs (with Steel Screws).

U.S. Standard, and the points hardened. To be driven from a stud in the face plate.

It is from the same pattern as the Heavy Steel Dog, and warranted, like that, not to break with any work.

This pattern will stand much more than a bent tail, and some prefer them on account of their direct action on the work.

5	150 "	7 "	9 "	32 00
6	160 "	8 "	10 "	36 00

NOTE.—The No. 1 is too small to require a Leg, and is therefore made without it.

This vise requires very little more power to move than the ordinary single screw vise. It holds the work parallel always, at any opening up to the full measure of its capacity. The jaws are made of the best tool cast steel, welded on, file cut, properly hardened and of convenient shape; and for a strong, durable, convenient vise there is nothing to equal this "Fisher" vise in the market.

### French Band Saw Blades.

I have the exclusive agency, and import direct from the makers, in France, these well-known Saws. I purchase in long lengths, and braze to order. Every saw is guaranteed to the satisfaction of the purchaser. Customers can do their own brazing, if they so choose. Prices are for unbrazed Saws. Brazing extra, as per List. Give extreme lengths in ordering, and be particular to say whether you want the Saws brazed or unbrazed.

## English Oak-Tanned Belting.

tanning process, and finished in very best style. Joints are all glued and sewed joints (sewed with raw-hide lace) up to 4 in., and glued and sewed and riveted above 4 in.

The widths  $4\frac{1}{2}$  ins. and under weigh 18 oz. to the square foot, and from 5 ins. and over run from 20 to 24 ozs. per square foot. — A number of my customers are using this single belt instead of double belt with very satisfactory results. I have all widths in stock up to 16 ins. in single, and also carry 3,  $3\frac{1}{2}$ , 4, 6, 8, 10, 12, 15 and 18 ins. double.

This belt is guaranteed to run true and straight. I sell by the low Canadian list and guarantee the belt equal or superior to any of the best American belt now imported into Canada and sold on the American price list, which is much higher.

I also carry in widths 4 ins. and under a lighter grade of this belt, weighing about 16 oz. to the square foot. Quality of leather, joints and finish are all similar to "Heavy," but the leather is a little lighter. This I call "No. 1."

Pliers for clinching, 35 cents per pair.

## DIRECTIONS.

Place the ends of the belt to be fastened on a block of soft wood and drive the fasteners, beginning about one-fourth of an inch from the edge of the belt, and continue driving them at distances of one-half inch apart. Having done this, turn the belt over and place it on a piece of iron; if you have pincers use them to curve the points of the projecting fasteners, then use the hammer to drive the points back into the belt. (Always clinch them toward the end of the belt.) Now drive fasteners between those just clinched so that they may be clinched on the side that the others were driven. Clinch as before, and you will have the best, cheapest and most simple fastening in use.

## The Shimer Matcher Heads.

TONGUE HEAD.

GROOVE HEAD.

THE SHIMER MATCHER HEADS represent a combination parts that give to the Bits the best possible position to form their work at once neatly and economically. No part of the bit comes in contact with the lumber but cutting edge ; hence their widespread reputation for light easy running.

Other Heads, per set, complete with Bits,  $2\frac{1}{4}$  circle and upwards ..... \$38 00  
Other Heads, per set, complete with Bits,  $2\frac{1}{2}$  circle and under. 36 00

They are made to fit any Matcher in use.

Write for special large Catalogue giving full particulars of Shimer's productions. Measurement cards furnished application.

25,000 of the Shimer Cutter Heads are now in use. Each head is stamped with a number agreeing with a number in Mr. Shimer's Order Book. A careful record is kept of every head made and all its parts.

When you order Cutters or anything pertaining to these heads, please refer to the record number that you will find stamped upon each head, and I will understand your wants fully. Be sure to give the number ; it will save time in getting for it.

## **Book of Moulding Patterns.**

I have a large book of patterns of all styles of Mouldings, Railing etc., price 50c. each, by mail, prepaid. It will pay any woodworker have one of these. All the patterns are numbered, so that knives can be ordered by number.

## Eagle Anvils.

These anvils are fully warranted. The "Peter Wright" and all anvils, except the EAGLE, are made with a body and horn of fibrous wrought iron. This soft iron gradually settles, carrying the face with

it, and the anvil becomes hollowed on the face. Shear steel for the face is used, but it can never be made to take good temper like cast steel. The EAGLE ANVIL body is made of gun metal—crystallized iron—which neither settles nor breaks, and not only the face, but the horn also, is of the best Tool. Cast Steel, welded on so perfectly by the process of its original and only inventor, the late Mr. Mark Fisher, that it is warranted never to come off. The face, planed to a true surface, is made so hard that it always remains so. The steel horn is tough and unhardened and will not break or bend.

## **Pecora Paint Co.'s Steel Colors.**

FOR ENGINEER, TOOLS AND GENERAL MACHINERY.

This paint gives a smooth and handsome finish; dries quick and hard; is uniform in shade, and very durable. In four shades—light, standard, medium, and dark.

Barrels (800 lbs.) . . . . .	at 10c. per lb.
Half Barrels (400 lbs.) . . . . .	" 10½c. "
Quarter Barrels (150 to 250 lbs.) . . . . .	" 11c. "
Cans (6 in a case), 25 lbs. each . . . . .	" 12c. "
"Paint Thinner," for Flat Color . . . . .	90c. per gal.
Iron Filler . . . . .	\$2.80 "

The Filler makes rough castings smooth, fills all holes and irregularities even, thus preparing the castings for a fine finish with the "Steel Color."

# THE SPILKER JOINT-CUTTER.

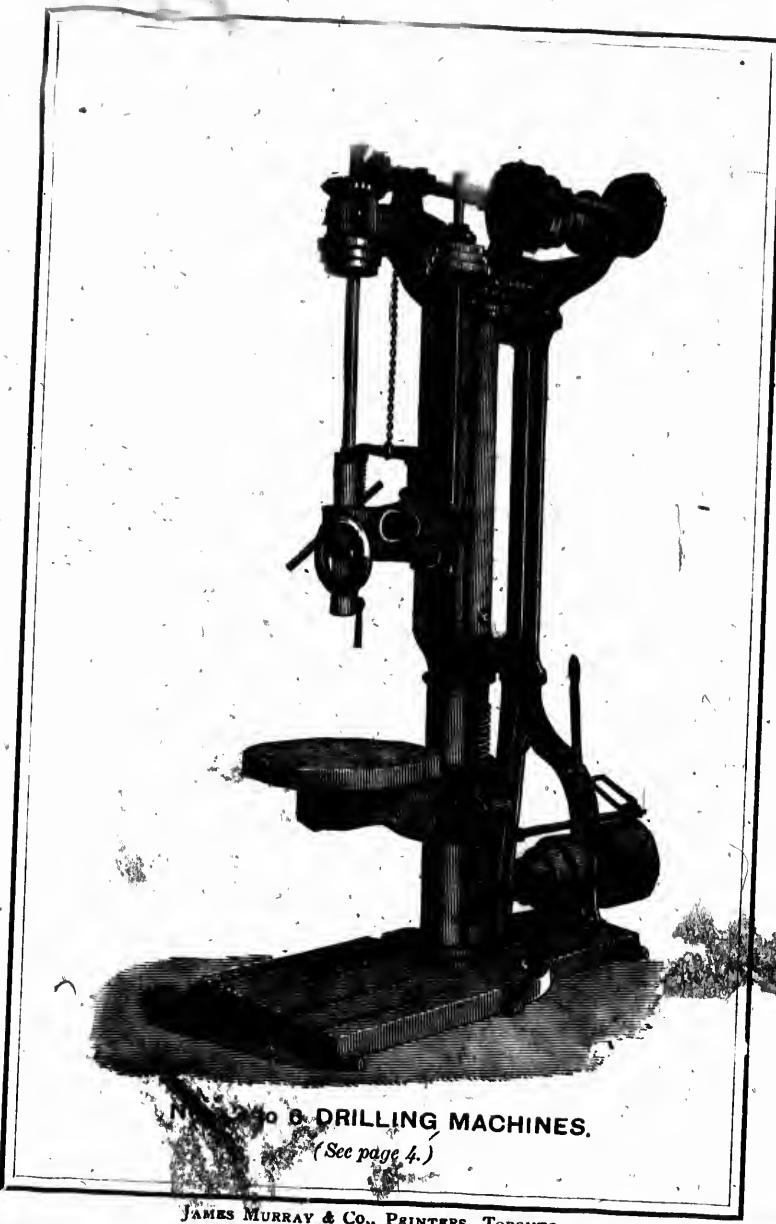

AHEAD OF ALL OTHERS FOR CHEAPNESS, DURABILITY,  
AND RAPID OPERATION.

Undoubtedly the best Mitre machine ever offered; has stood the severest tests. They are used by Picture Frame, Sash, Door and Blind and Cabinet and Furniture Manufacturers, and in every branch where mitring is done. A Joint-Cutter will do mitring perfect in two-thirds less time than others.

Any one with very little practice can do work on this machine equal to the best mechanic.

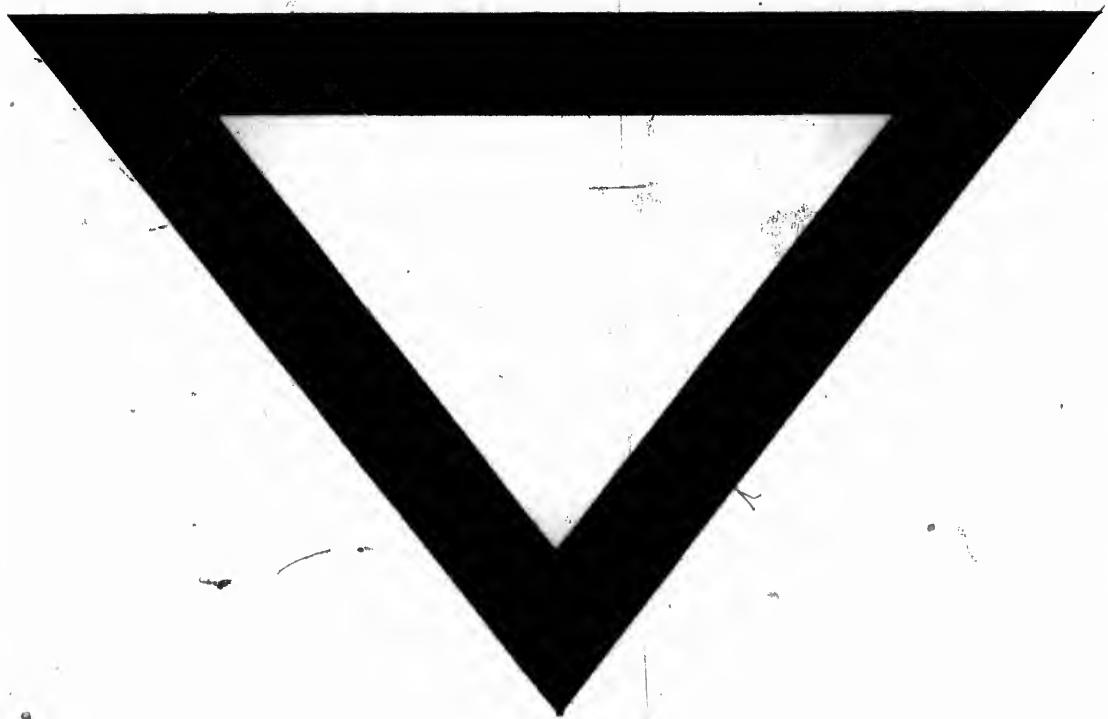

Price, No. 1 Size, Cuts 4 inches wide, 3½ inches high. \$36.00 net.

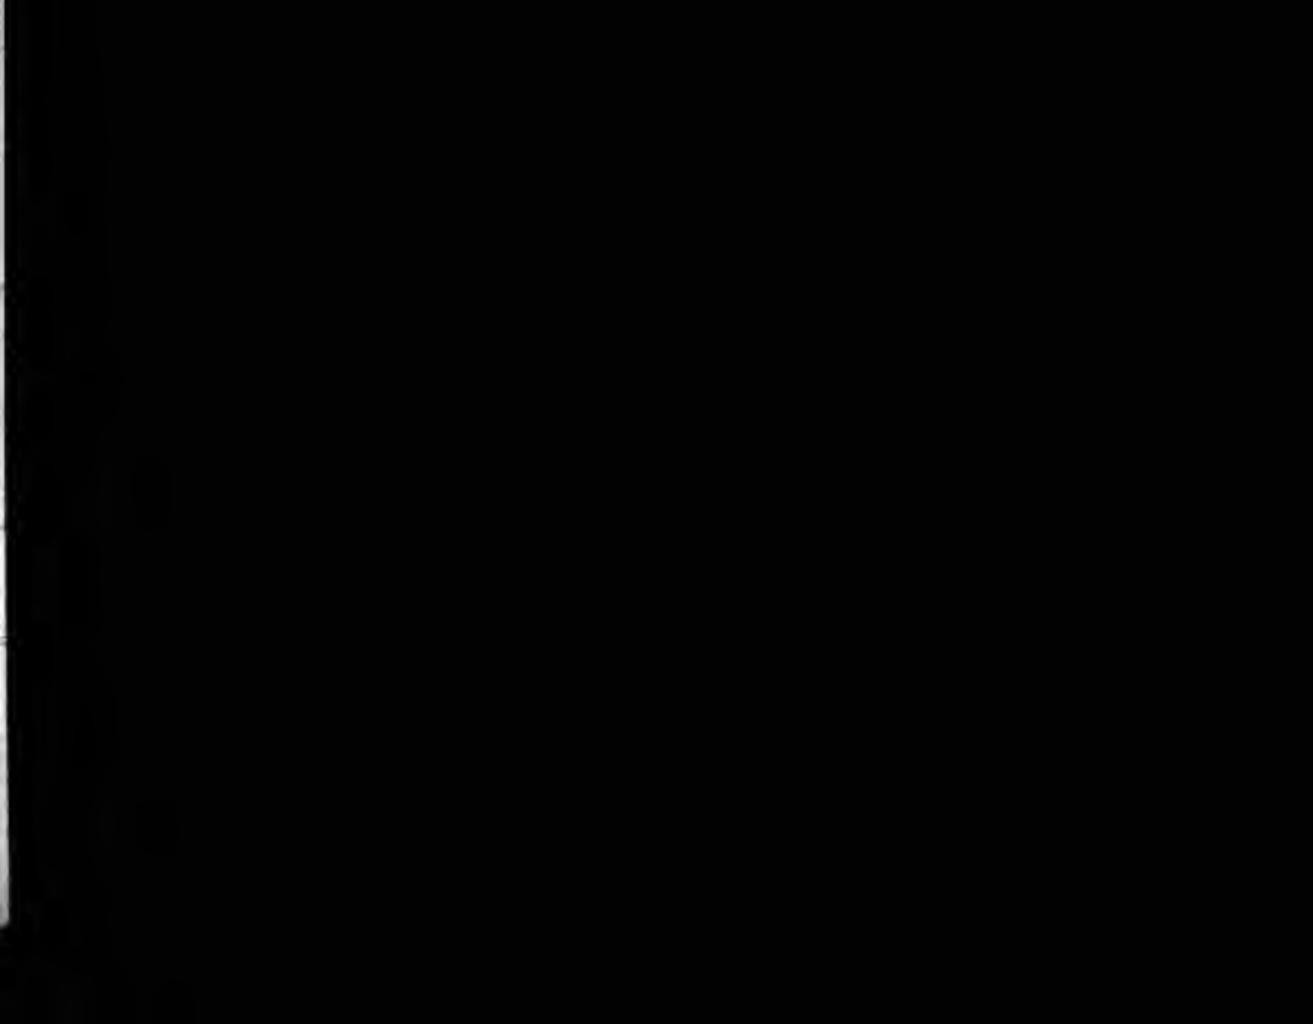

NO. 90 DRILLING MACHINES.

(See page 4.)
