

OCTOBER

MINES AND MINING

What is Going on in... Shaft, Drift, Stope, Winze, Etc., Etc.

THE FRANKLIN CAMP. Mention of Some of Its More Valuable Properties.

Mr. H. N. Boss, mining man, who was formerly a well known resident of Roseland, has for the past year and a half been in the Boundary country.

I found the veins well defined and in most cases true fissures, and in several instances shear zone fissures. These veins usually cut the formation at right angles.

The Silver Bell group of two claims is a good property. It has a strong lead between two well defined walls. The ore consists of galena and copper in a quartz gangue.

Two miles south of the Silver Bell it lies the Bryan and McKinley claims. These claims have a true assure vein of great strength and seeming permanence.

The Silver Queen lies about a mile south of the Bryan and McKinley. It has a fissure vein, showing two good walls and 12 feet of arsenical iron.

Mr. W. F. Borland, of Montreal, Vice-President of the Juno Gold Mining Company, is in the city.

ON THE BIG FOUR. A Find Has Been Made of a Nice Vein of Ore.

A visit was made yesterday to the Big Four. In the face of the lower tunnel, which is something over 100 feet from the surface, there is a vein of gold-copper ore that is about a foot in width extending diagonally across the breast of the tunnel from top to bottom.

ore is very encouraging to the management.

WORK ON THE GIANT.

The Development on the Property Most Promising. The Giant has as fine a surface showing of ore of a shipping grade as one would wish to see.

The Mahou group is bounded on the south by the Enterprise and on the west by the Neepawa. The Speculator group on the Ten-Mile side of the divide is bounded a month ago to J. Frank Colborn at \$65,000, and a crew of 25 men is now at work building a camp.

LE ROI INVESTIGATION. Little Was Done as Mr. Aldridge Did Not Appear in Court.

The case of the Le Roi appeal again came up yesterday morning at 11 o'clock, but as the witness for whom the court was waiting, Mr. Aldridge, of the Trail smelter, did not put in an appearance there was little or nothing done.

Work on the Juno Group. Mr. W. F. Borland, of Montreal, Vice-President of the Juno Gold Mining Company, is in the city.

Machinery Sold. The James Cooper Manufacturing company has sold a large Cameron sinking pump of a capacity of 300 gallons per minute and a mile of tramway wire rope to the Ymir mine.

TO CURE A BOLD IN ONE DAY. Take Laxative Broom Quinine Tablets. All druggists refund the money if it fails to cure. 25c. E. W. Grove's signature is on each box.

Several hundred dollars worth of goods from Hunter Brothers.

THE MABOU DEAL.

R. I. Kirkwood of Slocan City, the pioneer prospector on Springer and Ten-Mile creeks, is in the city in connection with an important mining deal, says the Nelson Tribune.

The group includes the Mahou, Ohio, Empire Fraction and the Summit fractions, and is located on the summit of the divide between Springer and Ten-Mile creeks.

The Mahou group is bounded on the south by the Enterprise and on the west by the Neepawa.

LE ROI INVESTIGATION. Little Was Done as Mr. Aldridge Did Not Appear in Court.

Mr. Lewis Levy recently returned from the Imperial group, which is close to the famous Yellowstone group. Mr. Levy reports that he has been doing some development work on the claims of some development work on the claims of the Imperial group.

A Bond on the Giant. The Spokesman-Review says: It is learned on good authority that 1,000,000 shares of the Rosland Giant have been bonded by San Francisco capitalists for \$100,000.

Ledge is 67 Feet Wide. In a notice published on Wednesday the Eldorado group, owing to a typographical error the ledge was made to appear to be six feet wide, when in fact, it is 67 feet in width, with very pronounced walls.

Machinery Sold. The James Cooper Manufacturing company has sold a large Cameron sinking pump of a capacity of 300 gallons per minute and a mile of tramway wire rope to the Ymir mine.

TO CURE A BOLD IN ONE DAY. Take Laxative Broom Quinine Tablets. All druggists refund the money if it fails to cure. 25c. E. W. Grove's signature is on each box.

CENTRE STAR INSPECTED.

Inspector McGregor Examines the Cages of the Centre Star Shaft.

Yesterday Mine Inspector McGregor visited the Centre Star mine, and paid particular attention to the safety of the cages on the cages, which are supposed to act in case of a break in the cable.

THE SULLIVAN MINE.

It is Shipping 50 Tons of Ore a Day to the Trail Smelter. The Sullivan mine at Kimberley is shipping 50 tons of clean ore daily to the Trail smelter.

The company is now constructing a new bank house, a larger mess house and other buildings. It is expected that the shipments will be increased to 75 tons daily.

A GIGANTIC ENTERPRISE. Ex-Governor Mackintosh Secures Control Over the Stave Lake Power Company.

Vancouver, Oct. 1.—The visit of Hon. C. H. Mackintosh, who arrived here some days ago from Portland, Ore., was in connection with the announcement that he had secured control over the shares of the Stave Lake Power company, which was organized primarily to supply electric power to the cities of Vancouver and New Westminster.

BACK FROM THE NORTH. J. Fred Ritchie Has Returned From a Surveying Expedition.

Mr. J. Fred Ritchie, P. L. S., has returned from the Lardeau and the Slocan, where he has been in a professional capacity. In the Lardeau he surveyed the Black Bear group, the Black Bear Mining company.

Will Take a Vacation. Mr. A. B. Mackenzie, the city passenger agent of the C. P. R., leaves this morning for New Westminster for the purpose of attending the provincial exposition which opens there today.

Oriel Mining and Milling Co., Limited

Owning the Good Hope Group, Ymir, B. C. Fifty thousand shares are now offered to the public at 15 cents. The property is one of exceptional merit, having a clearly defined vein traceable for 2,000 feet.

Rosland, B. C. Rolt & Grogan

Still Another Chance . . . TO BUY . . .

Humming Bird Shares

BEFORE THEY ADVANCE. Development work and increased values in the ore warrant much higher prices. Mine is shipping regularly to Granby smelter.

S. THORNTON LANGLEY & Co., Rosland, B. C. MINING BROKERS

ACCIDENT INSURANCE

P. A. Daggett & Co., general agents of the Maryland Casualty Co., writes all forms of Personal, Accident and Miners liability insurance. Assets, \$2,232,000. Surplus to policy holders, \$1,434,000.

THE ROSSLAND MINER'S MAP

...OF THE... The mines and mining claims of the Rosland camp, and their buildings, such as shaft houses, compressor plants, ore houses, boarding houses, etc., are all on the map.

Rosland Camp

The mines and mining claims of the Rosland camp, and their buildings, such as shaft houses, compressor plants, ore houses, boarding houses, etc., are all on the map. All physical features of the surrounding country, such as mountains, hills, valleys, plateaux are shown just as they are.

The Rosland Miner's Map

It is the most complete and elaborate map of Rosland and the surrounding country that has been published. It is finely lithographed in several colors on the finest and most durable paper.

Send orders to.....

The Rosland Miner Printing and Publishing Co., Limited, Rosland, B. C.

Accurate

The map is almost a photographic picture of the Rosland camp, with the exception that it is produced in colors and shows the country as it is in the early summer. No expense has been spared to make this map a really first-class production of artists, engineers and engravers.

Complete

Renew your subscription to the ROSSLAND WEEKLY MINER by paying \$2.10—the 10 cents to cover cost of mailing—and receive a copy of this beautiful map.

THE GOLD COMMISSIONER'S EVIDENCE. The Case for the Merits. Closed—The Court Hours.

The hearing of the Le Roi case, before John H. Kay, the gold commissioner, in connection with the gold lease case, has just been called upon by the gold commissioner, John H. Kay, to give evidence. Mr. Gordon Hunter, in his cross-examination, asked questions which led to the admission of the fact that the assay of the ore at the Le Roi smelter was not correct.

Witness stated that the No. 1 assay was not correct, and that the No. 2 assay was correct. The witness stated that the No. 1 assay was not correct, and that the No. 2 assay was correct.

The mine does the ore it ships. This is the first time that the ore is shipped. The mine does the ore it ships. This is the first time that the ore is shipped.

THURSDAY, October 4, 1900

LE ROI SMELTER CHARGES

THE GOLD COMMISSIONER GIVES HIS EVIDENCE.

The Case for the Mining Company is Closed—The Court Adjourned for 24 Hours.

The hearing of the Le Roi case was resumed this morning before Mr. Justice...

According to later information gained by Mr. Kirkup from the Trail smelter...

Cross-examined—When Mr. Curry brought down the smelter returns...

The smelter returns are always made in the same way and always have been...

Edwin Durant, sworn, stated that he was financial agent of the British America Corporation...

By the court—Witness was not the original broker who signed the original contract...

The output for the week just ended comes up very nearly to the figures of the previous week...

Le Roi—The work on the mine above and below is proceeding on the usual lines...

Velvet—Work on the crosscut from the main adit is in progress...

The Kootenay Mines—Work is going on at the 1,000 foot level in the drift east and west...

New St. Elmo—The south drift is in 20 feet. For the last 150 feet the snowing has gradually improved...

Giants—The Giant sent 50 tons of ore to the smelter last week...

The Output. The output for the week just ended comes up very nearly to the figures of the previous week...

Le Roi. 4,827 113,228 Centre Star. 1,989 14,953 War Eagle. 10,603 10,603 Le Roi No. 2. 504 2,964 Iron Mask. 1,435 370 L. X. L. 351 273 Mont. Christo. 50 239 Iron Colt. 20 20 Spitzee. 20 20

Rossland and Great Western. The work above surface on the Rossland Great Western mine is now being concentrated on the finishing of the huge stone foundation of the electrical compressor...

War Eagle—The shaft is still going down below what will be the eighth level. On the seventh level on the north vein a drift is being run to the west...

Evening Star—The winze from the bottom of the 200-foot level has reached a depth of 31 feet during the week...

Douglas—Work on the lower tunnel continues to be pushed, and the showing of ore is increasing.

I. X. L.—Work on the tunnel which is being driven to tap the lead at the 200-foot level is continuing...

usage out the rich spots; now the whole vein was stopped out, as it paid to export it. The lower the values the more marketable ore there was in Rossland.

There are 450 men employed at the mine, and the pay-roll is about \$50,000 per month.

Mr. Daly, in reply to a question from the court, said there were nine shareholders in the smelter. None of these were registered shareholders of the Le Roi. They might be speculating in the stock; that was possible. Mr. Daly had not seen the Le Roi register, but from conversation with the smelter shareholder in the Le Roi. It was possible that these men might have stock in the Le Roi held in trust for them.

David S. Fotheringham said he was assistant manager at the smelter, and had been connected with it since July, 1897, but it always in the same capacity. The smelter returns produced give the exact values to the mine. They were all signed by the witness. Mr. Bellinger was the first superintendent of the smelter. Mr. Breen was not directly concerned with the management, but little went on without his knowledge. Witness was familiar with the major portion of the contracts. The statements were made up according to its terms. The rebate of \$2 on \$10 was done to bring down the rate of smelting Le Roi ore to 88 per ton, which was intended. The first ore shipped from the Le Roi mine was in January, 1898. The smelter returns are always made in the same way and always have been. The smelter return form is that which is generally used in all smelters. Before going to Northport with as charge of the books of the Trail smelter, Le Roi ores were smelted there at \$11 per ton. The Le Roi ores were treated at Northport in the same way as the other custom ores. Speaking from his own knowledge, witness said that Breen's contract at \$3.75 was a good contract for the Le Roi, as it saved \$2.75 a ton on the previous contract with Trail. The allowance for the metallic contents was always a feature of smelter contracts. The allowance in Breen's contract was liberal, as the witness had dealt with contracts where the allowance for gold and silver was only 91 per cent, as against 85 and 90 cents per copper unit instead of \$1. The contract with the Le Roi was the one under which all its ore was treated. The copper unit at \$1 was considered fair at the time the contract was signed, as the New York rate was then 10 cents per pound. Since then it has increased in value. The smelter pays the freight of the matte to the refinery, and also certain tolls on the copper.

Cross-examined the witness said that he was next in authority to Mr. Hudson, who was the smelter manager. The smelter returns produced were not compiled by the witness, while, therefore, he believed them to be accurate, he could not be positive. The smelter which only allowed 91 per cent of the values was in Bute in the year 1893. The contract when first made was good for the mine. The smelter was only getting a reasonable rate at that time. It was making a bigger profit now than formerly as copper had increased in price. The Northport smelter is now treating other ore similar to the Le Roi, but no settlement has been reached as yet as to the smelter rate. The rate charged by the Trail smelter was nothing to Northport. The rate had a hard and fast contract with the Le Roi which would give the smelter all the ore it wanted.

Witness was then asked as to the amount of profit made by the smelter. He was advised not to answer the question by Mr. Daly, who said that this was disclosing trade secrets. Mr. Hunter argued that it was easy to see that if all numbers of the daily shipments can be ascertained, it would be possible to determine the amount of profit made by the smelter. Mr. Daly said that the information as to the amount of profit was unwarranted as there was a bona fide contract, further than that there was no evidence to show that the rate was too high.

Witness said that the price charged to the Le Roi would be the maximum from this camp. Ores have been treated for less and conditions may arise where more might be charged. Most of the smelters in the States have gone into the trust, but the Northport smelter has not entered it. No pool has been entered into as yet.

Ores are first crushed and sampled. They are then conveyed to the yard and placed on a bed of wood in heaps of 3,000 or 4,000 tons and set on fire, igniting the sulphur, which furnishes the fuel. The roasting continues about six weeks. From there it goes to the furnace; is blended with other ores and fluxes. It comes out as a low grade matte, which is granulated and put through a mechanical process, whence it comes out as roasted calcine. It is then put in the form of bricks and put through a third furnace, whence it emerges as matte for the refinery. Sulphides from Rossland camp are expensive to treat. Dry ores from the I. X. L., Evening Star, Second Relief, Arlington and Yellowstone have been handled at low rates, as they were needed to complete the contract with the refinery, which required certain amounts of gold in the matte. Dry ores are ores that carry gold or silver, or both, but no copper.

Mr. Daly stated of his own knowledge that there was no other contract between the company and that brought out in the evidence.

LE ROI INVESTIGATION.

The testimony That Was Adduced at Friday's Hearing.

On the resumption of the sittings of the court of revision on the Le Roi appeal from the assessed value of its ore, Mr. Gordon Hunter, counsel for the crown, opened his case by calling Boswell McDonald, collector of customs for the port of Rossland.

Boswell K. McDonald, sworn, stated he was collector of customs, and had been for the past two years. He was collector for the quarter ending June 30, 1900. Witness produced a copy of the export entries of ore from the Le Roi mine for that quarter with the signature of the witness attached. The tonnage reported was 37,900 and the value, \$1,672,254. The original entries were made by E. W. Hinsdale, who is the customs broker for the Le Roi mine. The original entries were made by Mr. Hunter's copy to an inadmissible. Mr. Hunter thereupon called upon the maker of the copy to testify to its accuracy.

Edward White, sworn, stated he was a customs broker, and that he had prepared the copy of the 135 original entries of Mr. E. W. Hinsdale. The totals were made by the witness. The body of the document was in the handwriting of the person of the witness. The total tonnage was 37,900, and the declared value, \$1,672,254.

Mr. Daly objected to the whole of the evidence.

By the court—Witness was not the original broker who signed the original contract. Mr. B. R. McDonald, recalled, was cross-examined. He stated that he had been familiar with the customs work for the past five years. They were practically the same as five years ago. No change had been made in the values with the exception of copper. The tonnage is taken from the supposed capacity of the cars.

To the court—The tonnage and values are guesseswork. The Dominion statistical returns are prepared from these documents, a copy of which goes to Ottawa. They may be incorrect up to two or three hundred per cent. They are not of much value to the public.

Edwin Durant, sworn, stated that he was financial agent of the British America Corporation. Was not connected with the Le Roi in any way whatever. Just before the advent of Mr. Bernard Macdonald was office manager for a few months under Mr. Carlyle. He retired soon after the registered attorney of the British America Corporation, and was still office manager for that corporation. Witness does not and has not held stock in the Le Roi Mining company. Witness was trustee and secretary-treasurer of the smelting company, and held stock to qualify himself. Witness had held that office since the formation of the company. There are no stockholders of the Le Roi Mining company who hold stock in the smelter to the knowledge of the witness. He did not know who were the stockholders of the Le Roi, and consequently was not in a position to know whether they held stock in the smelter or not. Witness did not think it probable that there were such stockholders. The British America Corporation may or may not hold stock in the Le Roi. Witness knew nothing of any smelter contract. The B. A. C. had no mines in Rossland. Witness did not know whether it held stock in Rossland mining companies or not. Did not know what the Le Roi was paying for the smelting of the ore.

By the court—Witness acted as trustee in the smelter company on behalf of the Le Roi company. As trustee of the Le Roi witness held nearly all the stock of the smelter. The remaining shares were held by directors. As an attorney, Mr. Durant said his duties were to take his orders from Messrs. Daly and Hamilton.

In the absence of Mr. Aldrich, of Trail, the court adjourned for 11 a. m. this morning.

MINING REVIEW.

The Risk Goes to C. P. R. Officials and the Smelter Facilities.

Whether the visit of the magnates of the Canadian Pacific railroad to the War Eagle yesterday where they met in friendly conference around the luncheon table such backing, E. Kirby and W. Thompson, of the B. A. C. will settle the differences as to the smelter at Trail, and the flat race for the treatment of the War Eagle and Centre Star ores yet remains to be seen but it may be stated that the proposition made by either party will be fairly considered before the decision by building a third smelter there is arrived at. This is of course the crucial question on the needs of this camp, the sufficiency of smelter power to treat its ore. The output it is now easy to see will presently far exceed the smelting capacity even when dealing with ores of this camp alone and as a percentage of the ores of the Sloan, the Nelson district and the Boundary are treated here it will necessarily follow that increased accommodation is necessary. Whether this will take the form of increased capacity of the present reduction works or will be partly solved by the erection of a third smelter is a matter which is still under consideration.

There is a minor matter to which the attention of Mr. Shaugnessy was also directed and that was the inconvenience resulting from the lack of a proper junction of the C. P. R. and Red Mountain tracks. Because of this lack of facility the War Eagle and Centre Star are practically debarrued from getting their timbers from any but one source, and that on the C. P. R. line while the Le Roi and others similarly situated are compelled to get their supplies from the opposite direction along the line running south. Thus there being no competition both have to pay a higher figure for their timbers than is actually necessary. In a similar way the absence of the junction forces the Le Roi to ship its ore dump from a point which will presently be below the line of track of the 135,000 tons on the second class dump about \$10,000 tons have been shipped and with an equal amount in addition the crown of the dump will have been removed. All the remainder, over 100,000 tons of ore, will remain in the level of the C. P. R. track and it will then either have to be hoisted at a large expense in a matter that depends on the Red Mountain line, running over the Red Mountain line, or to be shipped below the dump at a much smaller expense to Northport.

The barriers to the progress of the camp resulting from conditions prevailing here will sooner or later be swept away, and it is trusted that Mr. Shaugnessy will see his way to make the path smoother at an earlier rather than a later date as far as the clearing away of the obstacles lies within his power.

The Output. The output for the week just ended comes up very nearly to the figures of the previous week, and is again over 7,000 tons. That this will be kept up to the end of the year is a matter that depends primarily on the increase in the smelting capacity, but to no small degree upon the ability of the railway to the Northport smelter to keep up a sufficient supply of ore cars. If the output is kept up at the figures of the past two weeks during the coming month of October the total of last year will have been reached by the end of that month, and the export for November and December will then represent the increase of the present year's shipments over those of last.

Appended is a list of the shipments of the past week and year to date:

Table with 4 columns: Week, Tons, Year, Tons. Rows include Le Roi, Centre Star, War Eagle, Le Roi No. 2, Iron Mask, L. X. L., Mont. Christo, Iron Colt, Spitzee, and Total.

Rossland and Great Western. The work above surface on the Rossland Great Western mine is now being concentrated on the finishing of the huge stone foundation of the electrical compressor...

War Eagle—The shaft is still going down below what will be the eighth level. On the seventh level on the north vein a drift is being run to the west, and a raise is being started there to the level above. On the intermediate vein a drift is being carried east, and some diamond drilling is also in progress. On the south vein drifting is proceeding both east and west. There is no other work in hand in the mine. The repairs to the tramway have not at present started.

Evening Star—The winze from the bottom of the 200-foot level has reached a depth of 31 feet during the week. Two machines and three shafts are at work in the winze, and the intention is to crowd the work so as to reach the 200-foot level as soon as possible. The winze is a big four-compartment one, 75 ft. feet.

Douglas—Work on the lower tunnel continues to be pushed, and the showing of ore is increasing.

I. X. L.—Work on the tunnel which is being driven to tap the lead at the 200-foot level is continuing...

CERTIFICATE OF IMPROVEMENTS.

Notice.

Golden Hope, Golden Age, Snow Bird, Trio, Anglo-American Fraction, I. X. L. and Produce mineral claims, situate in the Arrow Lake mining division of West Kootenay district. Where located: At the head of Goat Canyon, between Goat Canyon and Snow Creek.

Take notice that I, Kenneth L. Burnet, (agent for Michael D. Shea, Free Miner's Certificate No. B. 30777) Free Miner's Certificate No. B. 31110, intend, sixty days from the date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this ninth day of August, 1900. KENNETH L. BURNET.

CERTIFICATE OF IMPROVEMENT.

Notice.

"Golden Terra" Fraction mineral claim, situate in the Trail Creek mining division of West Kootenay district. Where located: On Trail Creek, about two miles east of Rossland, between the "Palo Alto" and the "Jo Jo" mineral claims.

Take notice that I, Wm. B. Townsend, F. M. C. No. B. 30638, agent for C. W. Doud, F. M. C. No. B. 41224, intend 60 days after date to apply to the Mining Recorder for a certificate of improvements for the purpose of obtaining a "crown grant" of the above claim.

And further take notice, that action under section 37 must be commenced before the issuance of such certificate of improvement.

Dated this 27th day of September, A. D., 1900, at Rossland, B. C. W. M. B. TOWNSEND.

CERTIFICATE OF IMPROVEMENT.

Notice.

Knoxville Fraction mineral claim, situate in the Trail Creek mining division of West Kootenay district. Where located: On Monte Christo mountain, Rossland, south of and adjoining the mineral claim Idaho, Lot 559, Group 1.

Take notice that I, H. B. Smith, acting for Joseph D. Bevine of the City of Rossland, Province of British Columbia, special free miner's certificate No. 1933, intend 60 days from the date hereof, to apply to the Mining Recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this thirteenth day of July, 1900. H. B. SMITH.

CERTIFICATE OF IMPROVEMENT.

NOTICE.

Umatilla, Blackfoot, Bennock, Sailor Boy and Amen mineral claims, forming the Umatilla group, situate in the Trail creek mining division of West Kootenay. Where located: On the eastern slope of Sophie mountain.

Take notice that I, F. R. Blochberger, (agent for the Umatilla Gold Mining Co.) F. M. C. 31199 B., intend, sixty days from date hereof, to apply to the mining recorder for a certificate of improvements, for the purpose of obtaining a crown grant of the above claims.

And take further notice, that action, under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this 15th day of August, A. D. 1900. F. R. BLOCHBERGER.

RACES AT SUNNYSIDE.

Three interesting events were run on Sunday afternoon at the Sunnyside track was fair. The races were interesting and closely contested. The first race was between Mr. Ernest Kennedy's Steptoe and Mr. R. L. Dinkard's Miss Miller.

It was a five-sixteenths of a mile race, best two in three, for a purse of \$200. Miss Miller won the race in two straight heats.

The second event was a mile hurdle race between J. S. Deschamps's Rattler and Mr. J. F. Lindburg's Vici. The horses in the course of the race jumped over four four-foot hurdles. The event was easily won by Vici.

The third event was a race between Mr. Thomas Hilliard's Nellie and Mr. A. Thomsen's Raider. It was a half-mile race, best two in three, for \$25 a side.

The first heat was won by Nellie by three lengths. The second heat was won by Raider, and was closely contested. As they passed under the wire Raider made the nose in the lead. This heat was easily won by Raider, as in this heat Nellie went to pieces.

HALF-HEARTED ATTEMPTS.

TO GET WELL ARE NEVER SUCCESSFUL.

Honest Use of Paine's Celery Compound Will Permanently Banish Your Troubles.

THE GREAT COMPOUND GUARANTEES A NEW LEASE OF LIFE.

It is pitiable to see the half-hearted and almost useless attempts made by many people to get rid of poor health. More determined efforts and greater energy would be put forth to achieve victory in any other undertaking.

Paine's Celery Compound is recommended by neighbors, while many are quite satisfied if temporary relief is afforded.

If Paine's Celery Compound be used to cleanse the blood, to regulate the tone of the nerves, to banish rheumatism, neuralgia, headaches, kidney disease and dyspepsia, then be assured the good work is fully and permanently accomplished.

Go to your druggist at once and procure a bottle of Paine's Celery Compound and see how soon the "blues" will vanish; your nervous debasement, headache, backache, rheumatism will disappear and permanent health, activity and happiness will be yours.

A Mixture. Robert Floyd charged Lee Foo and another Chinaman with assaulting him before Police Magistrate Boulbee yesterday afternoon. The Chinamen have a counter charge against their accuser. To give the parties in the case an opportunity of marshalling their evidence the case stands adjourned for Thursday next.

T. G. SHAUGHNESSY'S VISIT

HE IS PLEASSED WITH THE PROGRESS THE COUNTRY IS MAKING.

Looks for an Increase in the Railway Business, as Is Determined to Provide Facilities for It.

Mr. A. W. Ross of Columbia is in the city. He visited the Boundary country and went to the end of the track at Midway as one of the party which accompanied President Shaughnessy of the C. P. R. On the return trip from Midway the party visited the site where the pyritic smelter is now being built by Messrs. Laidlaw & Co. After this the party visited the smelter being erected by Paul Johnson of Greenwood. Mr. Johnson took the party all through the works and fully explained his plans. Then the party left for the Granby smelter, arriving there at 1 p. m. on the 30th instant. Mr. J. P. Graves, the manager, Mr. Hodges, the superintendent, and Mr. Fummett, the assistant manager, took the party over the buildings and works. President Shaughnessy was delighted at the manner in which the works were running and the apparent success of the smelter. The management of the smelter complained of the want of sufficient coke in order to start the second furnace and to run the same without intermission. The president and the other officials of the C. P. R. present assured Mr. Graves that the required coke would be forthcoming before the end of this week, so that next week the second furnace will be started and 600 tons a day at least will be treated by the Granby smelter. The major portion of the ore will be supplied by the Knob Hill and Old Ironsides. Mr. Shaughnessy expressed himself as being more than satisfied with the results of the development of the mining interests in the Boundary country during the past year, and stated that not one of the spurts that the company had built to the mines and the mining camps had proved useless; the result of which will be that the company's policy in the future will be to aid the development of mining properties as rapidly as they show productiveness. Mr. Shaughnessy announced that the railroad's policy would be liberal, both in the interests of the smelters and that of the mining companies. As a result of his visit an order has been given for the construction of the most modern and best equipped of cars of a number sufficient to meet the current and growing requirements of the shipping companies. The president stated that since his visit of last year he found considerable improvement in the mining industry of the province, and he has great faith in its future. He thought the mining industry had got over the center and from now on it would go ahead rapidly. In short, Mr. Shaughnessy thinks the progress of the mines of this section from now on will be rapid, and he feels certain that there will be a great increase in the output of ore during the coming year. This will increase the number of workers and the population. Under the circumstances there is certain to be a largely augmented business in the railroad, and he is determined to provide all the necessary facilities for handling it expeditiously and properly.

THE MACCABEES.

Last Night's Social Was in Every Way a Great Success.

The lady Maccabees gave one of their delightful socials yesterday evening in the lower hall of the Miners' Union. It was in every way an unqualified success. The proceedings began by the exhibition of a huge snowball, represented by cotton wool, and filled with all kinds of toys and small articles of a more useful description. These were sold successfully at a remunerative though low figure, the eagerness of the buyers quickly melting the bulk of the snowball. Then followed a pretty Maccabean drill, which was gone through by ladies in tri-colored dresses worn knotted under the arms, the dress itself being white. The evolution of the ladies provoked much admiration, though some military critics present (but they were men) pretended that they could do better. After this the ladies invented a new game by this name, about 200 of whom had by this time assembled. A Kosky mountain man in an equine attitude over the canary bird had been suggested over the border in sections, and the game was to fit the sections together when blindfolded. Those who knew most of the nature of the songster came out away ahead, while those who knew least got the booby prize, so that the competitors in the novel play were fixed anyway. After this the social devoted itself to odd games around the room, breaking up into little knots and coteries, and had a good time. There was lots of fun, and everybody was sorry when the pleasant social came to an end.

IT IS THE LOWEST YET.

A Freight and Treatment Rate of \$4 Offered at Greenwood.

Mr. Paul Johnson, of the smelter at Greenwood has offered to make a contract with the Winnipeg mine for a freight and treatment rate of \$4 per ton, the contract to commence on December . It is understood that similar offers have been made to other mine owners by Mr. Johnson. This is said to be \$1.50 per ton less than what the Winnipeg has been paying for the Granby smelter and at Grand Forks for transporting and treating its ore. It will enable the mining and treating of all ores than run \$8 and above to the ton at a profit. This is one of the most important announcements that have been made to the miners of the Boundary county, and it will spur them to renewed activity on their mining properties when they know that such a low rate is in vogue. Mr. Johnson is putting up a smelter which is supplied with all the modern improvements and is well versed in the reduction of ore and he says that he can make money on a \$4 rate.

Mr. S. F. Peterson, mining man of Mosser, Ore., is a guest at the Allan.

THE STOCK MARKET.

The Sales for the Week Aggregated 158,500 Shares.

The stock market has been steady during the week which ended last evening, as is shown by the fact that 158,500 shares were disposed of outright and 30,000 shares on 60 and 90 days calls. The latter dealings were all in Giant stock, which continues to hold the middle of the stage in this market. White Bear is being largely dealt in, too. The announcement made in this issue that Mr. Paul Johnson, the manager of the Grand Forks smelter, has offered a freight and treatment rate of \$4 to the Winnipeg and other mines in the Boundary country is important, because it is the lowest rate that has yet been offered and means increased profits for the mine operators. The lowest rate hitherto in vogue has been the \$4.50 one in force on certain classes of ores at the Northport smelter. This rate may be regarded as another distinct forward step on the part of the mining interests and cannot fail to have a beneficial effect. Good news concerning the mines, as will be seen in the summary from the various camps, published elsewhere in this issue, continues to pour in, and the outlook could not be much brighter. The year 1900, which started in so gloomily and so full of trouble for mining and mining men, has steadily shown a change for the better during the past few months, and the year will go out with everything in a prosperous condition. The sales by days for the week ending yesterday were as follows:

Thursday.....	22,500
Friday.....	20,000
Saturday.....	35,000
Monday.....	11,900
Tuesday.....	40,000
Wednesday.....	30,000
Total.....	158,000

Against 164,800 for the previous week. Giant sold to the extent of 66,500 shares on the board during the week. In addition to this about 30,000 shares were sold on options. The price at the commencement of the week ranged from 3 1/8 to 3 1/2 cents, and yesterday it was from 3 1/4 to 3 1/2 cents. From this it will be seen that the lowest price yesterday was one-eighth of a cent higher than the lowest price of Thursday last, while the highest price was the same. Shipments continue to be made from the Giant.

Morning Glory sold to the extent of 9,500 shares during the week. The price on Thursday last was 8 1/4 cents and on Tuesday it sold for 7 3/4 cents. There were no sales yesterday of this stock. Tamarac sold to the extent of 1,500 shares during the week, and the price was 5 1/2 cents. The company has let a contract for the erection of a tramway and in three months will commence shipping ore.

There was one sale of 1,000 I. X. L. during the week, and the price was 14 cents. The work of developing this property continues along the usual lines, and a car of high grade ore is sent to the smelter about every 10 days.

Rambler-Cariboo sold to the extent of 14,500 shares during the week, but has declined from 25 1/2 on Thursday last to 24 cents yesterday.

There has been a little trading in Centre Star, and the price is \$1.67. White Bear sold largely, and 55,000 were disposed of on the board, and it is said that an equal number were disposed of off the board. Toronto, too, has purchased freely of the stock. The price on Friday last was 2 1/2 cents, and yesterday it had risen to 3 1/2 cents. The reason for this is said to be because the miners are purchasing. The management is of the opinion that the White Bear vein runs into the White Bear ground, and explorations at depth are being commenced by means of diamond drills in the hope of locating the ledge. It is said that work will be recommenced on the White Bear early next month.

There was a sale of 3,000 Evening Star yesterday for 6 3/4 cents. This was the only sale of this stock during the week. At the Evening Star the winze is being extended from the 200 to the 300-foot level, and the work of development is being pushed.

A broker reports that there is some inquiry for Humming Bird. The Humming Bird is now one of the shipping properties of the Boundary country.

Appended are the official quotations for yesterday of the Rossland Mining and Stock exchange:

Mr. Joe Perrine arrived in the city yesterday from Kamloops, and will be here for a few days. Joe says that Kamloops is the only place to him.

William's Championship.

Berlin, Oct. 3.—The newspapers here unanimously applaud Emperor William's championship of the combined interests of civilization and Christianity as contained in his reply to the message of the Emperor of China. At the same time the commentators find in His Majesty's telegram a new bridge upon which the Chinese authorities may approach the demands of the allied powers. The reply is generally regarded as conciliatory. The national Zeitung thinks it affords an indisputable basis for sober, effective common action on the part of the allies.

GREAT WORK FOR LITTLE MONEY.

DIAMOND DYES ARE THE MOST PROFITABLE AGENTS USED IN THE HOME.

No other article used in the homes of the Dominion of Canada are as popular as the Diamond Dyes. These indispensable helps in economical housekeeping make new finds every day. This popularity is gained by quality, excellence of colors and ease and comfort in doing the work of dyeing. Just think of it! One package of any of the Diamond Dyes will color from one to six pounds of goods, according to the shade desired. This is wonderful work when the small expense is considered. Your last year's jacket, cape, blouse, dress, skirt, and your husband's suits and children's clothes may be soiled, faded and unsightly; but with a ten cent package of Diamond Dyes you can work a mighty change, and make the old things like new for this season's wear. One effort in this work of true economy will convince you that Diamond Dyes are true money savers to the family.

Money

The average man wants to make money. There will never be a better opportunity than at the present time to make money in mining stocks. We are in a position where we can advise you as to the best.

Investments

All standard stocks are on the advance and sure money can be made by investing a small amount at present prices. See us for any of the reliable Republic and Rossland stocks.

S. THORNTON LANGLEY & CO.

Established 1895. Rossland, B.C.

The Gateway City
..... OF THE
Boundary District

Is pre-eminent-ly a financial, mining, smelting and distributing centre.

Roads extend to all the tributary mining camps throughout the Boundary.

The marvelous richness of the gold-copper ledges along the North Fork of the Kettle River is attracting wide-spread attention.

Granby Smelter leads them all. Treats 500 tons of ore per day and its capacity is to be quadrupled.

The ores of Republic camp and other Reservation camps will seek

Grand Forks for treatment with the early completion of the Grand Forks and Kettle River railway.

Our fruit and vegetable farms are famous.
