We use Canadian made material and so can give you the highest grade material at a saving of duty and exchange. Let us store your battery this winter.—Ray Morningstar. tf. .

Morningstar.

The hiccough epidemic has not yet reached Watford, but if it does it is said that one-half teaspoonful of mustard in a cup of lukewarm water has stopped severe cases of hiccoughs. The first drink usually brings relief, but in some cases it acts as an emetic and the hiccoughs returns but if mustard water is continued, however, relief will follow. The hiccough is a toxic condition of the diaphragm where the nerves are attacked by a twitch or spasm. It takes, in the present attack, the nature of a half vomit. It is brought on by nervousness and worry. It is not a contagious ailment. not a contagious ailment.

ture of a half vomit. It is brought on by nervousness and worry. It is not a contagious ailment.

Watford Christmas trade was gratifyingly large—better than had been expected. Nearly all the merchants report increased sales as compared with previous years, instead of the falling off they were prepared for. No doubt this result is partly accounted for by the general disposition to buy at home, instead of sending money to the department stores in Toronto. The truth is, the truth has long been, that buying can be done in Watford to better advantage than in the city, but it has taken some people a long time to find that out. Some there are who have not discovered it yet, and others who never will. But the percentage has dwindled down wonderfully.

2 dozen Ladies' and Misses wool Pullovers, regular \$3.00 to \$3.50, sale price \$2.25.—Swift's.

The young ladies Utopia Bible class of the Methodist church held its first meeting in the new year at the home of the president, Miss Wynne Harper, Tuesday evening last. In place of the usual mission study hour the New Year session opened with a debate "Resolve that the problem of City Progress is greater than that of Rural Reconstruction." The debate was discussed in a very capable manner, the affirmative side winning by only four points. After the debate lunch was served and a social hour spent. The next meeting will be held at the home of Miss Annie Lovell, Front street, Tuesday evening Jan. 18th, to which all young ladies are condially invited.

The Presbyterian church was connletely filled on Sunday evening sconnletely filled on Sunday evening conditions.

18th, to which all young ladies are cordially invited.

The Presbyterian church was completely filled on Sunday evening last to heav Rev. J. C. Forster who has been minister of the church and Knox church, Main road, for the past eight years preach his farewell sermon. The reverend gentleman snoke very feelinely and the well sermon. The reverend gentle-man spoke very feelingly and the large congregation was deeply man spoke very feelingly and the large congregation was deeply touched by his words. Clergymen of other demoninations were present and expressed regret at the departure of Mr. and Mrs. Forster from our town. On Friday evening the Missionary Society met ture of Mr. and Friday evening the our town. On Friday evening the Missionary Society met to say good-bye to Mr. and Mrs. Forster and Rev. E. H. Sawers read an address was made to the Rev. E. H. Sawers read an address in which reference was made to the work Mr. Forster and his wife have done in this charge. A well-filled purse was presented by the members to Mrs. Forster, who has been president of the society. Miss Scalling was made a life member. been president of the society. Miss been president of the society. Miss Spalding was made a life member. 20 dozen Ladies' plain and ribbed Hose, size 8½ to 10. Sale price 30c per pair.—Swift's Sale.

Interest a large and the prices of Swift's Sale.

The United States agreed over a year ago to advance a credit of \$5,000,000 to Greece, and the State Department at Washington is wondering whether the obligation is binding on the United States, in view of the return of King Constantine. Canada actually made the advance of \$5,000,000, and may wonder whether the new Administration in Greece will feel any obligation to return it.

A general invitation is extended to all to attend the public meeting to be held in the Lycenm, Watford, on Wednesday evening, Jan. 19th, in the interests of J. E. Armstrong, M. P. The meeting will be addressed by Hon. Hugh Guthrie, Minister of Militia, who is known as a fluent and forceful speaker and also by Miss Clayton of Listowel, a lady well known throughout Ontario as a charming platform speaker. Mr. Armstrong will also speak. It is hoped that the ladies will turn out in numbers to hear these talented speakers. They will be charmed with Miss Clayton's address.

FRIDAY, JANUARY 14, 1921

CURRENT COMMENT

During the past nine months Federal taxation has averaged almost \$27 per head for every man, woman and child in Canada's estimated population of eight and three-quarter millions.

U. S. Secretary of the Navy Daniels makes a shrewd play by Daniels makes a shrewd play by proposing great naval expenditures to Congress, with an intimation that they will not be needed if the United States joins he League of Nations. It is a poser for the enemies of the League.

Unemployment in Canada is stated to be about four per cent. greater than would be the normal condition at this time of year. This means that there are approximately some 75,000 more men out of work in the different sections of the country than there have been other years at this time.

A committee is now at work in Toronto considering changes in the high school curriculum. It is claimhigh school curriculum. It is claimed that only a small percentage of pupils entering high school go through the full course. It is thought that the course may be so altered as to make it seem more worth while to pupils who do not intend going on to university.

Four years ago a carload of newsprint weighed 25 tons, cost \$925 f.o.b. the mill in Quebec. Now the Reformer has to pay for the same carload \$3,250. This is one of the reasons that it is necessary for all newspapers to raise subscription and advertising rates, even in the face of reductions in some other face of reductions in some other lines.—Oshawa Reformer.

Trans-Atlantic wireless telephonic Trans-Atlantic wireless telephonic communication is an accomplished fact, and soon will be on a large practical scale. I also believe an invention will be perfected to the extent of enabling a person in New York or Montreal to see the person with whom he is speaking in London or Paris, said Professor Alexander Graham Beli, inventor of the telephone.

Emergency rehef has become a live topic throughout the country, and the Ontario Government has decided that it will contribute one-third of the amount spent by the municipalities of the Province of Ontario on emergency relief this winter, provided the Government is put in possession of the general system and details of the relief given and the safeguards adopted to prevent abuses.

Brantford Expositor,—In the Western Provinces the municipal elections are out of the way, and are not a disturbing element during the holiday season, while in Quebec municipal maters are not taken up until early in the new year. Ontario still stands alone among all Provinces and all states as to the period of the year when her municipal rulers are elected, and it is time she got rid of her splendid isolation.

Manning Doherty is reported to be trying to discover the cause of the big "spread" between the prices of apples in the Ontario orchard and the price paid by the Old Country customer. He doesn't need to go so far from home to find big spreads in price between producer and consumer. Walking through the Union station at Toronto the other day, we noticed oranges which came 3,000 miles across the continent ticketed "4 for 25c," and apples, probably grown out at Clarkson, fiften miles away, in the Minister's own riding, at "2 for 25c," There's room for Mr. Doherty's investigation right at home. It is hold-ups like his which give Canada a black eye in the veiw of the travelling public.—Actor Free Press.

VEGETABLE SEED.

British Columbia Product Every Way Equal to Imported.

Considering the strenuous efforts put forth by the Federal Department of Agriculture to induce Canadian farmers to produce home-grown seed of roots and vegetables to take the place of the shortage that resulted from the falling off of imports from Encope during the early years of the Europe during the early years of the war, it would be a pity if those who responded to the call to produce this responded to the call to produce this most necessary supply should lose all chance of profit from their now well-established business, through competition provided by our former enemies, or even by friendly Oriental countries that proved unable to supply our needs in the seed line when the need was most pressing.

In undertaking the business of growing seed of roots and vegetables on a large scale, the farmers of British Columbia accepted a considerable risk, in view of the fact that the industry was climost entirely new to the country, and the possibility

to the country, and the possibility of success was established on only the apparent suitability of the soil the apparent suitability of the soil and climate, as they agreed with conditions in seed-producing areas in other countries. Now, however, the adaptability of certain sections of British Columbia to seed productions has been well proven, and it has been found that the seed produced is equal in every sense to the best imported seed and in the case of some varieties of roots and vegetables, wastly superior for use in Canada. Canada.

So far as the matter of price enters into consideration of the British Columbia seed growers' request for pro-tection of their industry, there is no reason that farmers who are not seed growers should foresee an increase in the present price because the source of seed supply is limited to source of seed supply is limited to their own country. For the future, it may well be expected that production of the kinds of seed considered can be exported as economically in this country as abroad. The area suitable for such production is by no means limited, and what is most needed to promote increased production and consequent competition is a paying price for the product at this time when the industry is just starting. It can be easily recognised that the only feature that can account for cheaper production of seed where cheaper production of seed where climatic and soft conditions are equal is cheap labor, and there are few farmers or others who would care to ree labor prices in Canada reduced to the level of those existing in Europe.

Possibilities In Sunflower

as they should be able to do, there
would be no more disastrous conditions prevailing such as prevailed
during the winter seesons of 1212. during the winter seasons of 1919-1920."

Mr. Hutton believes the lesson Mr. Hutton believes the lesson has been learned and predicts that two to three hundred silos will be erected in Alberta this year. In speaking of sunflowers for filling, he says that 34 tons to the acre of says that 34 tons to the acre of these were grown under irrigation at Strathmore last year, and in Montana over 44 tons under like conditions. As showing the drouthresisting capacity of the plant. Mr. Hutton says that at Scott, where the rain fall was less than two inches during the growing season, almost seven tons of sunflowers to the acre were produced.

were produced.
Sunflowers for ensilage have proven a success in Saskatchewan as well en a success in Saskatchewan as well as in Alberta, Montana and Oregon. On the farm of C. E. Thomas & Son, near Lloydminster, ten acres were seeded to the mammoth Russian variety, half on summer fallow and half on spring ploughing. Although cultivated only once, the ten acres gave a crop of 150 tons. The Thomas firm intend to use this form of ensilage both for winter feeding and as an insurance against a lean passure. an insurance against a lean pasture year. Indian Head Farm experiments show sunflowers to be equal to corn

in feeding value.

Sunflower silage in 1920 has been a great factor in Oregon and great areas have been planted suc-cessfully and silos have been erected in all parts where formerly the feed question was a most serious one.

Oats Very Light In P.E.I.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Give the Yanks another year of trade invasion and your dollar will be worth about 60 cents

Fundamental of the Universa An atom of matter, as now understood, is a tiny package containing a number of "electrons."

The number of electrons contained

in the package varies with different kinds of matter. In an atom of iron, for example, it is not the same as in

an atom of oxygen.

But the substance composing the electrons is always the same. It is the substance out of which all things are made—the fundamental structure material of the universe.

The electrons inside of the atom

The electrons inside of the atom are always in motion at an astonishing speed. They are traveling at a rate of 90,000 miles a second, or

rate of Second, or even faster.

Thus the term "atomic energy" may be to some extent comprehended. Sir Oliver Lodge, famous physicist, recently and that the atomic energy contained one ounce of matter would suffice to lift all the warships sunk by the Germans at Scape Flow sunk by the Germans at Scapa Flow out of the water, and place them on top of the highest mountains in Scotland.

Obviously, if we could find out how to utilize even a small fraction of this energy our civilization would be revo-

What we call an electric current a stream of electrons.

The Ways of Doctors.

The ways of Doctors.

Two small boys who had been in hospital together were discussing experiences. "What ward were you in medical or surgical?" asked one, "What's the difference?" replied the other. "Well," said the first, "were you ill before you went in, or did they make you ill when you got there?"

Labor Saver.

Cotton crepe can be used to keep down the ironing bill. For underwear t should be made up with rather heavy lace to look well, for if it is combined with some lace or embroidery which needs ironing to look its best, either the garment so made looks flimsy and unattractive or else it defeats its own purpose of making less work for the aundress. There is nothing more serviceable than cofton crepe in pink, brown or blue and white for children's rompers. Made with a little colored braid at the neck and wrists and belt, these rompers are pretty as well as practical.

Flannel Decorations

Milady will decorate her fall blouses with flannel. A recent model is made of white georgette, and has a throw collar and bell sleeves of flannel. The very plain blouse has two rows of scallops near the waistline which are bound in color to match the scart.

Children Cry FOR FLETCHER'S CASTORIA

Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 vears has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

EXIDE

BATTERIES

Why we sell Exide Batteries

Sound business reasons, every one of them

- 1. The first commercially successful starting and lighting battery was built by The Electric Storage Battery Company.
- 2. Exide Batteries are manufactured in Canada by Canadian Exides Limited, a branch of The Electric Storage Battery Co.
- 3. The Electric Storage Battery Company is the oldest and largest manufacturer of storage batteries in the world.
- 4. Exide Service means a definite battery service-repairs, overhauling and attention by a group of battery experts.
- 5. We can sell an Exide Battery, secure in the belief that you will get all the battery value possible and more than you ordinarily would get. Also, being Canadian made, the price is not inflated by the addition of duty and exchange.

No matter what make of battery you have now in your car, if it needs attention, we shall be glad to give it expert, unprejudiced attention so that it will last as long as possible until you are ready to replace it with an EXIDE, THE LONG LIFE BATTERY.

ELECTRICAL CONTRACTOR

TOBACCO ON THE LAND IT IMPROVES THE QUALITY OF

THE SOIL.

Experience on a Farm at Virgil, Ont., Shows How Forty Acres Were Made to Yield Magnificent Crop of Oats After Being Used to Grow

"Fragrant Weed."

"It was a fairly good piece of land for growing oats, before we gave it the treatment necessary to produce paying crops of tobacco, but when we laid off tobacco growing this year and sowed oats instead, the yield all over the 40 acres was 80 bushels per acre. This statement made by Hamilton Gibson, of Virgil, Ont., part owner and manager of the tobacco growing plant which includes 40 acres of land, extensive drying sheds and a factory splendidly equipped for handling the tobacco up to the last stage previous to its the last stage previous to its being made into cigars, goes to show that tobacco growing has no bad after effects on soil, provided the soil is properly fertilized and culti-vated for growing the tobacco. The fact that the tobacco farm at Virgil was sown to cate instead of

The fact that the tobacco farm at Virgil was sown to oats instead of tobacco last spring shows that the owners were not satisfied with the chances for disposing of a big crop of tobacco to advantage in the fall. Mr. Gibson said in this regard, that although the plant had made good returns ever since it was started ten years ago and had paid well of late years despite increased cost of labor. years despite increased cost of labor, the indications of a lower price for tobacco combined with the fact that labor price showed no reduction, had provided the owners with suffi-cient reason for turning this valuable land over to the business of growing oats. The return in the way of oats, per acre, he declared, justified the change in practice, "and the present price of tobacco is further justification," he added.

The type of tobacco grown on the

tion," he added.

The type of tobacco grown on the Virgil farm when tobacco is in favor is Havana, which Mr. Gibson says is a hardy variety that will stand a tot of rough usage as compared with some others, and yet yields a leaf well suited to make excellent binders, far superior in fact to the kind found on the average 15 cent cigar that carries a hand 15 cent cigar that carries a band marked Habana, which mark may stand for Connecticut Broadleaf or stand for Connecticut Broadleaf or any other variety as far as the binder is concerned. The yield of Havana is not so heavy as of Broad-leaf or even Burley, but the quality is excellent as grown on compara-tively light soil on the Virgil tobacco

farm, and the type is in good demand by the cigar manufacturers.

Speaking from ten years' experi-ence in which he has studied tobacco-growing in Connecticut and Southern States, as well as having managed plantations in California, Mr. Gibson declares in favor of deep ploughing and heavy manuring in growing the crop. At Virgil, he uses an extra heavy plough, and turns his land nine inches deep. As fertilizer he uses barnyard manure to the acre, in addition to a dressing of fertilizer. In cultivating the crop he uses a Prout hoe, which takes away all weed growth up to within an inch or two of the plants in the row. Any weeds that may remain after the horse hoe has passed are removed by hand hoeica and the ground is kept practic

Cultivating and weeding pro-simple matters as compared with suckering, which is the most important operation in connection with the actual growing of tobacco. Neglected suckers not only retard the growth of the nlants, but in addition work mechanical injury to the desirable leaves, making them unfit for use as hinder or filler. Security as an expension of the security as a security of the security of t binder or filler. Securing men cap-able of doing a good day's work of suckering is the greatest part of the labor problem on the tobacco form, and it is very difficult to impress green hands with the importance of the operation

green hands with the importance of the operation.

Although relatively free from insect pest/trouble, tobacco is constituted attacked by "the flea." this pest being more common in the older established tobacco districts than it is in Ontario. Concerning this pest Mr. Gibson relates an interesting story of his experience in California. One of the ranches under California. One of the ranches under his charge, was planted in part to citron trees, and, owing to some cruse citron trees, and, owing to some course unknown to the men who had cont the planting, the grove yielded very poor crops although at full borring age. Mr. Gibson decided to plant to bacco between the rows of citron trees, with a view to getting some return from the land, while citying the trees an extra season to show it they were worth keeping or not. The tobacco, when half-grown became tobacco, when half-grown became badly infested with fleas, and at Mr. Gibson's orders the foreman had the plants sprayed with paris green. The appraying saved the tobacco. But that was not all. The citron trees here a good paying crop. And the growers in the district gave the tobacco credit for helping the crop of citrons. Mr. Gibson's opinion is that the flea had destroyed the new-formed fruit the citrons, year after year, and reason for the failure of the grove to

reason for the failure of the grove to produce fruit had never been rec'i-d. Mr. Gibson's quickness to inline the presence of an indiction in the tobacco, and his immediate upof spray as a cure, was a result of his experience in the growing of tender fruits on his home farment Virgit. der fruits on his home farm at Vir !!

Dispose of All Old Fowls. All the old hens that are not needed or wanted for next year's breck'rd should be culled out and disposed of after the breeding season is over. Tofore selling these old hens, they should be confined in a small space and fed all they will eat for two or three weeks. They can be futioned at a good profit in this time even though grain prices are high.

Are We Decadent? It is often stated that the result of the war has shown that we are not a decadent race, but are as lusty and courageous as our fighting fore-

A good test has recently been applied which seems to point to the fact that even our athletes are not quite up to the standard of old days. It is the test of the bow and arrow. How far did the old English archer, who won so many battles for England, shoot his shaft? We have it recorded that at Agincourt an English archer struck a Frenchman and pinned him to a tree at 240 yards.

The Royal Company of Archers used to set their targets 185 yards away, and they would not do that unless there were a fair chance of hitting the bulls-eye, which means that an arrow could carry twice as far. Yet to-day the target is put under a hundred yards away! der a hundred yards away!

Shakespeare mentions 290

Perhaps it is lack of skill, just as a novice fine difficulty in making a golf ball travel fifty yards, but it may point to the fact that we are muscularly weaker than our fore-

fathers.

At the same time it has often been pointed out that there are very few suits of armor extant that one of our big athletes could squeeze into. They are mostly on the small side,

Long Thumb-Strong Will.

Long Thumb—Strong Will.

If the top joint of your thamb is long, it shows that you have good will power. Well-developed, reasoning faculties are possessed by those people who have thumbs, the second joints of which are long.

Thumbs that work easily are owned by careless, happy-go-lucky spendthrift individuals. A stiff, firm jointed thumb, however, shows that the person is keen, tactful, self-possessed, and cautious—the sort of man who will get on in the world.

Up to Him.

Husband—"Another new dress?
Where do you suppose I shall get the money to pay for it?"
Wife—"You must excuse me. I didn't marry to give you financial advice."

Sapphire "Sells."

People who pride themselves on the beauty of their sapphire rings and other sapphire ornaments would do well to have the genuineness of the stones tested.

stones tested.

Taking advantage of the perfection of synthetic or composition sapphires, which only a jeweler can detect from real gems, unscrupulous dealers are selling them as Australian sapphires.

This is a distinct fraud, for the Australian sapphire is a real stone, worth from \$12 to \$40 a carat, while synthetic sapphires, like imitation rubies and emeralds, are worth only aport 50 cents.

—the one adopted generally in Canadian homes, is the policy of keeping Zam-Buk always bandy. Zam-Buk ensures quick clean healing in cuts, burns, scalds, coldsores, and all injuries and skin troubles. It promptly ends p.in, irritation and inflammation; it purifies the tissues; prevents blood-poison and ulceration. Its everready herbal character and powerful antiseptic properties make Zam-Buk the safest and best healer ever discovered.

Miss Belle Grant, Brazil Lake, N.S., says:—"Cold got into my burnt hand, and I began to fear blood-poison. I hadia't used Zam-Buk long before it took out all pain, soreness and inflammation."

Mr. Jonathan Beaton, of Delia, Alta., writes:—"With the threshing outfit last fall, many little accident happened, cuts, bruises, frost bites, etc., for which, was found explaints each.

pened, cuts, bruises, frost bites, etc., for which we found nothing so good as Zam-Buk. There's nothing like it." Chilblains, cold-sores, winter cozems, ulcers, piles, abscasses, and skin sores and injuries generally, are safest treated with Zam-Buk. Of druggists and stores 50c, a box; \$107\squares\$1.25.

THE GRAVEL QUESTION
BEFORE THE COUNTY COUNCIL

The Lambton County Council wrestled with the question of a supply of gravel for the County Road System at their Wednesday afternoon session and the outcome of a protracted discussion was the adoption of a motion authorizing the Warden to despatch a lettergram to the Minister of Mines asking in substance, why the County order for gravel for 1920 placed through the County Road Superintendent, J. Mc-Callum, had not been filled.

Superintendent McCallum was called to the Countil chamber after the members had discussed the problem for a short time to give explanations respecting the purchase of gravel for the County system and he gave a lucid outline of the system in vogue. He stated that a requisition for the estimated amount required for the year had been sent in in May after interviewing the different Reeves, but to date there had been no action by the companies and no gravel had been received, and further no word regarding the order had been received from the department at Toronto. Prior to this the superintendent had pointed out that the purchase of gravel apart from the county pits is an unfortunate condition. Some of the municipalities have no pits hence it is necessary to get it from outside places. It may seem an injustice for municipalities not holding pits to have to pay for gravel taken out of pits in adjoining municipalities, but the only remedy is to purchase it in local sources and charge it to the roads on which it is used.

The subject was broached on the prosposed introduction of a motion whereby the cost of gravel for municipalities having no pits and buying by the yard should be paid from the general fund, but this motion was laid over until a later stage of the session. A request was also made to have all correspondence from the government respecting gravel supply from the St. Clair river laid on the table.

ASLEEP AT THE SWITCH

(Petrolea Topic-Advertiser, Dec. 17)
The County Council last Friday
considered a telegram from the Minister of Mines stating that the requisition for gravel sent in by Road
Superintendent McCallum had been
overlooked, consequently Mr. McCallum could not carry out his road
building plans for the year. Until a
few years ago the Dominion Government was selling the gravel taken from the St. Clair in Detroit.
The local member, Mr. Armstrong,
made strong representations to Ottawa that it was required for road
building purposes in Ontario and building purposes in Ontario and the government agreed to guarantee a supply at Sarnia, Courtright, Wallaceburg, Corunna and other points where it could easily be transferred to inland points. Last spring the provincial government with the consent of the Dominion government. provincial government with the consent of the Dominion government, took control of the gravel. Mr. Mc-Callum made his requisition early last May and is only now advised that it had been overlooked. A trifling matter doubtless to the Minister of Gravel, but a matter of first importance to those now wallowing in the mud of Enniskillen and Dawn.

MARRIED

At Bow City, Alberta, on Dec. 4th, 1920, by Rev. W. Whitmore, Hazel Marie Smith, youngest daughter of Mr. and Mrs. J. E. Smith of London, to Albert W. Dann, of Warwick Village.

At Ottawa, on Monday, Jan. 2, 1921 by the Rev. Dr. Akins, Hazel Caroline Perkins, to Capt. Bury Collins Binks.

At Wanstead, on Christmas Day, by

Collins Binks.

t Wanstead, on Christmas Day, by
Rev. W. H. Fry, Emily Martha,
youngest daughter of Mrs. Frank
Alexander, to Albert A. Randell,
all of Wunstead.

DANN-SMITH

The marriage took place on Dec. 4th, 1920, at Bow City Methodist church, Alberta, by the Rev. W. Whitmore, of Hazel Marie Smith, youngest daughter of Mr. and Mrs. J. E. Smith of Lomond, to Albert William Dann vouncest son of Mr. youngest daughter of Mr. and Mrs. J. E. Smith of Lomond, to Albert William Dann, youngest son of Mr. and Mrs. B. B. Dann of Warwick Village. The you'thful bride was dressed in a very smart dress of copenhagen blue silk and wore a very becoming white lace hat. She was attended by her sister, Mrs. H. Westgate and Mr. Westgate was best man. After the ceremony a dainty lunch was served by Mrs. H. Westgate at her home in Bow City. A large array of wedding presents spoke of the esteem in which the young couple are held in and around Lomond, where they will reside on the groom's homestead.

BINKS-PERKINS

The marriage of Hazel Caroline

The marriage of Hazel Caroline Perkins, daughter of Mr. and Mrs. Guy W. Perkins of Ottawa, to Capt. Bury Collins Binks of the department of soldiers' civil re-estaoliehment, son of Mr. and Mrs. William Irwin Binks of St. Benedict Square, Lincoln. England, was quietly solemnized at the Dominion Methodist Church on Monday afternoon, January 3rd.

The ceremony was performed by Rev. Dr. Aikins, pastor of the church. Miss Ethelyn Farley was bridesmaid and Lieut. James D. Laurie, Royal Canadian Navy. attended the bridegroom. The bride was dressed in a charming French gown of orchid shade and carried a beautiful boquet of roses. Many intimate friends were present at the ceremony, after which a reception was given at the Country Club by Edmund Bristol, K. C., M. P.
Captain Binks left Wednesday Jan. 5th, for Vancouver where he is to hold a position on the S.S.R. Mrs. Binks will join her husband in a few weeks.

RANDELL-ALEXANDER

A pretty wedding took place at the home of Mrs. Frank Alexander, Wanstead, Ontario, on Dec. 25th, at 5 o'clock. when her youngest daughter, Emily Martha, became the bride of Albert Ardean Randell, son of Mr. and Mrs. Joseph Randell, also of Wanstead, Rev. W. H. Fry officiating. The bride was given in marriage by her brother. Mr. Truman wanstead, kev. W. H. Fry officiating. The bride was given in marriage by her brother, Mr. Truman Alexander, and wore a lovely gown of shimmering white satin with overdrapings of silver lace and bridal veil of filmy net with orange blossoms. Her boquet was a shower of white roses and maidenhair fern. of white roses and maidenhair fern. There was no attendants and the "Lohengrin Bridal Chorus" was played by Mrs. Lawson Dodge, cousin of the grooms Following the ceremony a wedding supper was served, the guests, 40 in number, including friends from Windsor, Sarnia, Strathroy, Watford, Wyoming and Centralia. Mr. and Mrs. Randell left on Sunday to spend their honeymoon in London, Sarnia and points west, the bride travelling in a tailored suit of navy serge with smart blue hat. On their return they will reside in Wyoming. The many gifts included a substantial cheque from the groom's father.

VEIL THE TARNISHED LACE

Beautiful Effects May Be Gained; Two Fabrics May Be Attractively Used Together.

Just because it is impossible to restore tarnished gold or silver lace to its original glistening brightness, do not despair, for really beautiful effects may be gained by veiling the tarnished lace with georgette crepe, fine net, gauze, chiffon, or tulle. If desired, two of the veiling fabrics may be used together.

Experiment with various samples and you will easily discover just the combination you wish.

Tarnished silver lace veiled in pale rose or blue chiffon that is in turn veiled in smoke gray or taupe gauze may be fashioned into an exquisite costurae blouse to accompany a taupe or gray suit. Or the dull lace may be veiled in black georgette crepe to give a rich effect.

Of course, very light colored veiling cannot be used alone over such lace, but must be veiled with a darker shade to keep the foundation lace from appearing dingy.

Tarnished gold lace veils look espe-

cially well in a clear dark blue, though cinnamon or woods brown gives an equally pleasing effect, and purple of-fers possibilities.

Experience not essential we train you. Exclusive territory, liberal co-operation and excellent pay. To men of energy, ability and absolute integrity this position offers a valuable associaton, and one that is of real service to the community. Write us today.

The Shinn Mfg. Co. of Canada Guelph, Ontario Secretary & Manager W. H. DAY (Formerly Professor of Physics at the Ontario Agricultural College, Guelph.

TWO THINGS THAT HURT THE EYES

Reading by Intense Light
A person has been known to
say, "I have ruined my eyes by
reading too much." Not so—
the eyes were made to use. One
sure way to permanently injure
the eyes is reading by intense
light. The light should come
through ground glass to soften
it. Never use clear glass for
either gas or electricity. Oil
lamps give out a soft light,
therefore clear glass chimneys.

Reading by Din Light

Reading by Dim Light
Take our advice—do not read
or sew by a dim light—it will
be a direct strain upon the
sight centers of the brain. On
these two things hang the fundamental laws of sight economy.
Never use cheap or pick-up
glasses—come to us for advice
about things optical. Everything
needful here.

WANSTEAD BRANCH, U. F. O.

A meeting, representative of the farmers in the vicinity of Wanstead, was held in the school house of that place on the evening of Jan. 7th, 1921, for the purpose of discussing the advisability of organizing a local branch of hte U. F. O. Those present unanimously favored organization and the following staff of officers was duly appointed: Pres.—P. W. McPhedran; Vice-Pres.—J. C. McNeill; Sec.-Treas.—Arch. Williamson; Directors—John A. McPhedran, W. G. Lawsen and Calvin Hodgins.

Phedran, W. G. Lawson and Calvin Hodgins.

The shipping of live stock to the United Farmers' Co-operation Co., Union Stock yards, West Toronto, which is now well past the experimental stage, and which has proven so acceptable to all the patrons of this department of the work in this community, will be resumed at once, under the auspices of the newlyformed Wanstead Farmers' Club, and will be conducted by Arch. Williamson as shipping agent. liamson as shipping agent.

Mr. and Mrs. D. Johnston returned Wednesday from Niagara Falls where they have been visiting their

where they have been visiting their daughter.

At the regular meeting of the local Masonic lodge, officers for the year were installed as follows by P. M. Herb. Hall; W. M., Otto Schmidt; S. W., H. Dowding; J. W., Wm. Woolvett; J. D., Mr. Brown; S. D., Geo. Lampman; treasurer, Fred Eastman; chaplain, Rev. Mr. Redcliffe; secretary, Alex. Thoman; D. of C., Mr. Thoman; senior stewards, L. Murray and Fred Glover; inside tyler, Ed. Crawford; outside tyler. Phil Austin.

L. Murray and Fred Glover; inside tyler, Ed. Crawford; outside tyler. Phil Austin.

James, the son of Hugh Johnson, was severely bitten in the face by a horse, while playing with some other boys in the barn. Three stitches were required to close the wound. Infection has since set in, caused by poison in the horse's teeth, which has added to the seriousness of the case.

DEATH OF FORMER WARWICK RESIDENT

(From the Rouleau Enterprise.)
The death occurred in Rouleau,
Friday, Nov. 26th, whereby the town loses one of its most respected residents, Mr. W. H. Stewart. The deceased had been in failing heaith since August and had a paralytic stroke on November 13th, from which he did not recover.
Deceased was born in Montague, Lanark County, April 8th, 1839. In 1872 he was married to Ann Jane Phillips and there were five children, two having died, Edna at the age of five, and Elmer at the age of

twenty-nine. He leaves to mourn his loss, his wife and three sons, Albert, Clarence and Lloyd.

He was a stautch member of the L. C. L. becoming a member when not quite sixteen, by initiation in L. O. L. 439, Carp, Carleton County, in 1856, returning to his boyhood home in Montague, Larnark Co., he joined L. O. L. No. 31, of which he was elected Master, and as such attended the meeting of Grand Lodge of Eastern Canada, held in the town of Perth in 1867. In 1869 he moved from his old home in Lanark County, settling in Warwick township and joined L. O. L. 516, of which lodge he acted as Treasurer for over 26 years. In 1885 he was elected County Master for East Lambton, which post he filled for six terms. In 1889 he was elected auditor and was re-elected continuously for nineteen years (with one exception) and as such auditor audited the books of Grand Lodge Benefit Fund from its transfer from Ontario West till 1907, a period of about sixteen years. Except one meeting held in Winnipeg in 1888 he attended every meeting of M.W. Grand Lodge from 1885 up and including 1907, which was held in Vancouver. These with three meetings in the West made 25 sessions in all and during the same time was present at 16 meetings of Grand Lodge of Ontario West. He time was present at 16 meetings of Grand Lodge of Ontario West.. He was one of the oldest members of the Orange Lodge, being sixtysix

the Orange Lodge, being sixtysix years in the order.

In municipal life he was fairly active: When he left Montague in 1869 he resigned the office of auditor for that township and in 1874 he was appointed municipal clerk for Warwick Township, a position he half appointed municipal clerk for Warwick Township, a position he held continuously until 1906, when he resigned to go West, and received a neat testimonial from the council of that municipality. He also held the office of auditor for the Lambton County Insurance Company and likewise had to resign. He was for several years along with the County Judge on the Board of Criminal Justice for the County of Lambton, and for ten years Secretary of the Justice for the County of Lambton, and for ten years Secretary of the Warwick and Forest Agricultural Society. After moving to Rouleau, Sask., he was for four years after incorporation, Sec.-Treasurer of the new town.

The funeral was held on Monday and was largely attended.

Eleanor H. May, relict of the late Joshua R. Cronkite, of Plympton, died Dec. 18th, at the home of her daughter, Mrs. Harry Millard, Spring City, Pa. She was in her 76th year. Mrs. Cronkite was the last survivor of the May family who lived near Camlachie many years ago.

FRAGILE, PALE AND MISERABLE

The Melancholy State of Thousands of Bloodless Children and Young Girls.

How often do you hear the remark "She is very delicate?" How often it means that some young woman is living in misery, suffering from periods of prostration, diziness, loss of appetite and disordered digestion. Headaches afflict her at intervals: pain in the back and limbs follow any exertion. She is never well.

This fragile state of health, this lack of vitality, calls for prompt treatment. The blood must be nourished and made strong enough to vitalize the system that is so lacking in energy. In such cases Dr. Williams' Pink Pills have proved remarkably successful in making the new, rich, red blood necessary in restoring tone to the system. Mrs. L. M. Duncan, South Mountain, Ont., tells ably successful in making the new, rich, red blood necessary in restoring tone to the system. Mrs. L. M. Duncan, South Mountain, Ont., tells of the wonderful benefit Dr. Williams' Pink Pills made in the case of her young daughter. She says: "It is only right that I should let you know of the good derived from the use of Dr. Williams' Pink Pills by our girl of eleven years. She was always very thin and not gaining in weight. Her appetite was poor and she had no desire for wholesome food. Finally we decided to give her Dr. Williams' Pink Pills. After taking one box, she went away on a three weeks' vacation, taking three boxes of pills with her, which she took regularly while she was away. When she returned home we were surprised and delighted to see how well she looked, and to find that she had gained seven pounds in weight. She had a much better color and her appetite had improved so that she was always ready for her meals. She continued using the pills until she had taken seven boxes, and the great improvement they made in her condition was noticed by many around provement they made in her condition was noticed by many around here. I can only add that I believe Dr. Williams' Pink Pills are a splendid redigine.

Dr. Williams' Pink Pills are a splendid medicine.

The best time to begin taking Dr. Williams' Pink Pills is the moment you feel the least bit out of sorts. The sconer you do so the sconer you will regain your old time energy. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 form The Dr. Williams' Medicine Co., Brockville, Ont.

Whose Pup?

MGUIDE-ADVOCATE,

By JESSIE DOUGLAS

Camilla hastily stepped out of her little gray gingham dress and crossing the room on tiptoe opened her closet door and slipped out the plnk and white dress with the short sleeves and the ruffles around the skirt.

She listened almost breathlessly for complaining voice below to cry: "Camilla! Ca-mil-la!" as she wrestled with a buton in the middle of her back. She was safe! Still on tiptoes she went across the floor and down the stairs, to be greeted at the bannister head by an ecstatic, wriggling body of

soft brown fur.
"Binks," Camilla whispered, "will you be good if I take you out? Very

The little dog stuck out its long pink tongue and tried to cover Camilla's hand with wet kisses.
"Come on, then!" Camilla closed
the door behind her as though she

were a thief, so softly, so stealthily. But once down the steep white path, with the white gate swung behind her, she began to run lightly and gayly along the country road.

Binks was just as gay. He made circles in quest of his tail and chased imaginary cats and darted about like a small prisoner set free.

She found herself thinking with a

strange, homesick longing of that home that she had left a month ago. That careless, happy, laughing household, with Ted and Winnie, Ellen and the baby for constant companionship.
"But I'll never let them know!" she

a rabbit at all!" Aunt Emma had written that she would like one of "the children to stay with her for a while." She had said at the end of her letter that these were her nearest relatives and "that child would find herself greatly bene-

said aloud; "come on, Binks, that isn't

fited some day by the arrangement." So it was Camilla they chose to send. Because Camilla was just through school and Ted was needed on the farm this summer and Winnie was engaged and Ellen just wouldn't

She crinkled her nose when she remembered how the days went-one so much like another that there was only the calendar to tell that they were different.

Breakfast at 7:30. In silence, for Aunt Emma did not like conversation at her meals. Then Camilla waxed the old mahogany in the parlor and dusted each fragile knicknack and washed the breakfast dishes, and put them away in the white cupboard in the dining room.

There was the porch to sweep, and best of all, the flowers to gather in the garden' with the bees humming about her in the sunshine, and a large straw hat that Aunt Emma said she must wear. For Aunt Emma thought her freckles were "common," and it was not ladylike to have brown hands, so she must wear old gloves. Then there was mending to do and

lunch to get-Camilla stopped suddenly in her thoughts, for as far down the road as she could see there was no brown,

wriggling furry body.
"Binks!" she called, and again: "Binks!"

She whistled and called his name again and again, but no funny little mongrel pup appeared at her calling. Camilla could have sat right down in the road and cried. She had found Binks when he came shivering to the door just a few days after she had been with Aunt Emma. Much to Aunt Emma's disgust she had fed him and bathed him and changed him into a soft little mischief from the whimpering, tiny thing who had begged from

To Camilla, Binks was the one gay spot in her sober life at present.

But when she trudged home an hour later, she went alone, for Binks had disappeared as mysteriously as he had

She forgot the dress with the short sleeves and the pink ruffles in her distress. But Aunt Emma, spying her from the porch, looked up with displeasure. She was entertaining the curate, and Camilla looked altogether pleasure. too colorful and gay and careless, with no hat and short sleeves.

Aunt Emma nedded briefly, and Camilla going into the house did not see the gleam of laughter light the young man's eyes for a moment.

But next day Binks had not returned to his home. The house seemed drearier and darker than ever, and Aunt Emma more "difficult." Camilla thought longingly for home, and al-

"Til stick it out a bit lenger," she told herself stanchly, for she knew how hard it was just now at hore. If

o without; so that Camilla had secretly resolved that she would get a position in the district school this au-

But when she took her little pail and went out for the butter in the afternoon, her heart gave a bound, for there in the highroad was a funny little dog running along with his pink tongue hanging out! "Binks!" she called: "Binks!"

And before her very eyes some one rhistled and Binks turned tail and fled. But Camilla was not to be daunted. She followed, too; seram bled under a fence and went through the meadow; jumped the brook and

came out at last in the village square to find Binks standing beside a young man with a soft gray suit and laugh-"That's my dog!" Camilla said with

her eyes flashing fire. "It is?" said the young man in a

conversational tone. "Of course, I can prove it to you by his collar. Come here, Binks!" Ca-

milla commanded. The little dog seemed to smile, but he did not move one step from the heels of the young man. Camilla stooped over and lifted him up and cried: "There!" but when she looked at his collar she read with dismay:

"Fide." Then before the young man could say a word Camilla had dropped her pail of butter and squeezed Binks into her arms and had run back the

way she had come. "Robber! Thief!" Camilla told herself, still seeing the laughing eyes of a certain young man in a gray suit. When Camilla reached Aunt Emma's breathless, she suddenly remembered the pail of butter. For Aunt Emma said staidly: "I've asked the curate to come to high tea tonight, Camilla."
"Oh, yes, Aunt," Camilla said, but

first she went to the shed and put-ting Binks behind the door, bolted it securely. Camilla was not one bit surprised

to find the curate was her thief, but she did say "Thank you," in a low voice when he brought her the pail of butter, so that Aunt Emma did not

She found herself blushing whenever she looked in his direction across the hot biscuits or when she passed him the ham. He had still a disconcerting way of laughing out of his eyes. They heard during tea the wails that emanated from the woodshed. When the young curate suggested that. he should release the prisoner after tea, Camilla made no objection, but she watched the little dog turn a wet tongue on this stranger.

"Perhaps he remembers me!" the man in gray explained, and Camilla answered "Oh!" and blushed to the roots of her red-brown hair.

But that hardly accounts for the reason that made Camilla sit down and write Winnie that night and end her letter with a P. S. that said: "I don't think I shall go home before the autumn. Winnie, and then I think

Camilla, smiling softly to herself. blew out the kerosene lamp and sent an airy kiss to a small brown dog that was lying in a diminutive dog kennel beneath her window.

IDEAS ABOUT FOODS DIFFER

Delicacies Among Some Peoples Are Looked Upon With Distinct Aversion by Others.

"There's no accounting for the freaks of human appetites," writes W.
J. Showalter to the National Geographic society, describing some

strange foods as follows: "The Roosevelt story of how he got the best work out of the men with sharp-filed teeth by promising them the choicest bits of raw hippopotamus and rhinoceros steak for speed in skinning, will be recalled by many. Capt. Robert H. Bartlett, commander of the Karluk, which carried Stefansson to Arctic waters, says that on his return from Herald island to northern Siberia he found raw polar bear meat tasting better than any piece de resistance he

had ever eaten in the home country. "The Frenchman likes his snails and wonders how anyone who accepts oysters can refuse them. In Canton, Ohina, rats sell for 40 cents a dozen, and a dog steak brings more per pound than a leg of mutton. The Chinese mandarin pays \$30 a pound for the birds' nests from which his soup is concocted. In parts of the West Indies the palm worm is stewed in fat, while certain African tribes are as fond of caterpillars as an American is of reed birds on toast. The Turk is as disgusted with the oysters we eat as we are with the fish the Corsican relishes.

"Eating earth, or geophagy, is common thing in many parts of the world. In some parts of Europe a butter is made of fine clay, and in other regions various kinds of earths are sold in the open market. The Persians use some varieties of soil in making their sweatmeats, while in Aexico

the eggs of certain species of trees are used by the Indians in making a food paste which is regarded as a great

Daily Water Consumption.

The quantity of water used daily in the United States for drinking, bathing, cooking and washing is surprising. Statisticians say that the average family contains three members, and that each family uses 90 gallons a day to each member of the household. Th consumption of water for household and personal use thus amounts to the enormous total of 400,000,000 cubic feet daily. This quantity of water would keep a Niagara Falls going for a period of 35 minutes. A ship affoat displaces an amount of water equal to its own weight. The Leviathan, with a tonnage of 50,000, displaces 1,600,000 cubic feet of water. It would take 250 such giant steamers to displace the quantity of water that the American public is said to consume every day.

Meditating Revenge "Ah," exclaimed the brisk caller, "having a day dream?"

"You might call it that," said Mr Dubwaite, sourly,

"I was just thinking up a few cold and sarcastic remarks to make to my landlerd if I ever pass by him in my flivver when his motor car is in a ilitch."—Rirmingham Age-Herald.

FASHION NOTES

Gold cloth evening gowns have girdles of jet. Daytime frocks feature a new wool

poplin which plaits well.
Copper-colored shoes and stockings for daytime wear are the latest fad in Paris.

A warmth of color, softness of texture, and flowing grace of line is promised for the frocks.

The coat dress will be a popular fall nodel, while long, swathing scarfs, short capes and coats with the vester effect will grace the slim forms of the fair sex.

Odd colors prevail in high-class corsets of silk fabrics, blue, lavender, yellow and pale green sharing honors with the long-established flesh pink and white.

French gloves are unusually attractive. Open work latticing, stenciling. combination of two colors of kid and embroidery are all used as ocnaments. Gauntlets are fluted or vandyked, a new departure being the gauntlet which turns back like an inverted frill above the elbow

For Class-Room Wear.

Cotton crepe, often too warm for summer, is ideal for class-room wear It is a material that lends itself readily to tubbing, while the ironing of it is almost a minus quantity. It be had in the warm, medium shades lovely deep blues, bright tans, rose pinks, leaf greens, etc., which are becoming to young folks and are almost as practical as the very dark colors.

CUFFS AND POCKETS DROPPED

No Provision Whatever, According to Styles, for Women to Keep Hands Warm.

Skirts are not to be any shorter, but they will be wider, with a decided flare, according to advance dope from the Garment Manufacturers' association, which sets the styles for practically the entire country and which recently closed its convention at Chicago. Twelve inches from the soles of the shoes will be the correct length for skirts. Nearly everything the forthcoming season will be brown or moose heavily embroidered and beaded. Gold and silver thread embroideries especially will be shown and beads will be used on everything except the most severely tailored suits.

Cold hands will be in vogue, for

there are no cuffs or pockets on the suits and muffs are quite out of fash-Big fur collars will be all the rage, but no provision whatever is made for women to keep their hands comfortable. Shoestring belts and buckles of self-

material, high choker collars or a neck line cut only three inches from the base of the throat, one little pocket next to the seam and tight three-quarter sleeves with white cuffs to the wrist are the new features of afternoon frocks and tailored suits. Many of the frocks will have deep hems, buttons all the way down the back and white lace yokes. Duvetyn and velvet in moose and brown with an occasional copenhagen blue will be the

materials most in use. For the fluffy, frilly young person evening dresses of black lace over charmeuse with French flowers will be shown, and for the woman given to more severe gowns beaded from top to bottom in all sorts of gorgeous colors. Gowns will be much higher cut this year, both back and front and some of them will even have little

ANOTHER VICTIN OF RHEUMATISM

Entirely Well After Six Weeks'
Treatment With "FRUIT-A-TIVES"

MR. AMEDEE GARCEAU

32 Hickory St., Ottawa, Ont. "I was for many years a victim of that terrible disease, Rheumatism. In

1913, I was laid up for four months with Rheumatism in the joints of the knees, hips and shoulders and was prevented from following my work, that of Electrician. I tried many remedies and was under the care of a physician; but

nothing did me any good. Then I began to take 'Fruit-a-tives' and in a week I was easier, and in six weeks I was so well I went to work again. I look upon this fruit medicine, 'Fruit-a-tives', as simply marvellous in the cure of Rheumatism, and strongly advise everyone suffering with Rheu-

AMEDEE GARCEAU. 50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

matism to give 'Fruit-a-tives' a trial."

FOOD MUST BE PURE.

One Important Feature of a Recent Act.

When the new feed law, known as the Feed Stuffs Act, comes into force there will be at least one point of great satisfaction for the live stock feeder in his dealings with the feed trade, namely, that bran will be oran and shorts will be shorts, and there will be no mustard seed in eight of these by-products of the wheat. Heretofore, and in fact, up to the present, the law has allowed the adpresent, the law has allowed the admixture of a certain amount of weed seeds and other foreign material that arrives with the wheat at the flour mill to be incorporated in the bran and shorts. The amount of such material permitted to be used has been very small in proportion to the bulk or weight of the branch state. or weight of the bran or shorts, but sometimes the foreign matter has sometimes the foreign matter has happened to include material either injurious to the health of animals, or of such a nature that it is entirely lacking in feed value. With everything but the outer coating of the wheat excluded from the bran, and nothing but bran and a proportion of flour included in the shorts, the reeding value of both bran and shorts will be determined entirely by the quality of wheat used in the manufacture of

Of course it must be expected that with the use of all wheat cleanings prohibited in the make up of that and shorts, these feeds wilk show an increase in price, but it is only reasonable to expect that feeders of live stock will be willing to pay the increased price in view of the superior quality of the article. What disposal will be made of the cleanings now used up in bran, shorts and mill feeds when the new Feedstuffs. Act becomes effective is a question that will prove difficult of solution by the millers and feed manufacturers. One result of the new regulations will doubtless be the putting of a greater premium on thoroughly Of course it must be expected that of a greater premium on thoroughly clean grain. Farmers will have to get back to the old-time practice of fanning their wheat before taking it to the market. It looks as though the disposal of material entirely unsuited for flour or feed could best be disposed of on the formal best be disposed of on the farms, and the saving of haulage effected by thorough cleaning of the grain at the point where it is grown is a matter worth considering.

The new act, beside being well calculated to protect the health of saic

culated to protect the health of animals, will also protect the farmer who is endeavoring to keep his farm who is endeavoring to keep his larm free of weeds while maintaining its fertility by the use of live stock ma-nure. Mechanical analysis of the ma-terial included in the make-up of the commercial feeds will reveal the presence of such weeds seeds as have reviously passed muster as desirable for feed, while still a menace to farm

WATFORD

Management of Herds Affects Their Health.

TESTING CATTLE.

The relative freedom of a herd of cattle from tuberculosis depends on the kind of management the herd receives rather than upon a resistance inherent in the cattle themselves. This conclusion, applying to 14 recognized breeds of cattle in the United States, is based on a study of officiatuberculin-test records for nearly half a million animals. As a basis for answering inquiries regarding the prevalence of tuberculosis in various classes and breeds of cattle, the federal bureau of animal industry has compiled all of its test records since the beginning of tuberculosis-eradica-

tion work.
The results, though capable of re ceiving many interpretations, fall to show that any breed can be consider-ed safer from tuberculosis than another. Of 30,670 Hereford cattle tested in pure-bred herds, the per-

A Registered Hereford Bull Used In Grading Up a Herd.

centage of reactors was unusually low—only 0.77 per cent. But in grade herds of the same breed the percentage of reactors was 5.11. In the Aberdeen-Angus breed the experience was reversed. Pure-bred herds showed 5.79 per cent, cf re-actors, compared with 2.30 in grade herds. Among the Shorthorns 5.75 per cent. of tuberculosis was found in pure-bred herds and 3.74 per cent. in grade herds, about 77,000 animals

being included in the computations.
Although it has been frequently asserted that dairy cows, by reason of closer housing, have more tuber-culosis than beef cattle, the official D D S., TRINITY UNIVERSITY, L. D. S., Royal College of Dental Surgeons, Post graduate of Bridge and Crown work, Orthodontia and Porcelain work. The best methods employed to preserve the natural teeth.

OFFICE—Opposite Taylor & Son's drug store MAIN ST., Watford.
At Queen's Hotel, Arkona, 1st and 3rd Thursday, of each month figures fail to support that assumption. In some dairy breeds the per-centages of reactors were relatively high, but in others the percentages were low. Likewise in dairy herds, as with beef cattle, there was little uniformity between the proportion of reactors for pure-breds and grades representing the same breed. Briefly, the figures indicate that

the freedom of a herd from tuber-culosis is influenced chiefly by the efforts of the owner to keep the herd healthy, not by the breed. Some breeders' associations have been no-ticeably active in encouraging their members to adopt tuberculosis-eradication measures. The figures are believed to reflect such activity.

Furthermore, the compilations dis-prove the assertion, sometimes made, that pure-bred herds are more susceptible to tuberculosis or have more of it than grade cattle. In fact, the highest percentage of tuberculous cattle in any group was for grades.

Manurial Requirements.

The results of a chemical analysis of a soil do not, as a rule, afford a satisfactory basis for determining manurial requirements. The chemist, it is true, can determine what the soil contains, but no ordinary ana-lysis determines with exactness what lysis determines with exactness what proportion of the several elements present is in available form for the crop. Indeed, there is no such thing as a constant ratio of availability. While one crop finds in a given soil all the plant food it requires, another may find a shortage of one or more elements. Further, on the very same field one crop may find an insufficient amount of potash; another may cient amount of potash; another may find enough potash for normal growth, but insufficient phosphoric acid; while a third may suffer only from the insufficient supply of

nitrogen. The manurial and fertilizer requirements are determined more largely in most soils by the crop than by peculiarities in the chemical conditions of the soil.

Wheat Production of Czecho-Slovakia Agriculture is highly developed in Czecho-Slovakia and intensive farm-Czecho-Slovakia and intensive farming is everywhere carried on. With a normal production the republic should be self-supporting in respect of essential food supplies, while the farms also furnish the raw material for some of the most important industries of the country. In pre-war years the yield of wheat on the territory of Czecho-Slovakia was about 161,300,000 bushels. Last year's crop amounted to approxiyear's crop amounted to approxi-mately 88,000,000 bushels. The domestic requirement of the country was estimated to exceed 110,000,000 bushels a year, so that at present there is a deficiency of over 20,000,-

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Read the Guide-Advocate "Warts."

Health and Happiness

Women of today seem to listen to every call of duty except the supreme one that tells them to guard their health. Home duties, church duties, war activities, and the hundred-and-one calls for charitable enterprises soon lead women to overdo. Nervousness, headsches, backaches and female troubles are the inevitable result.

Philadelphia, Pa.—"I was very weak, always tired, my back ached, and I felt sickly most of the time. I went to a doctor and he said I had nervous indigestion, which, added to my weak condition, kept me worrying most of the time—and he said if I could not stop that, I could not get well. I heard so much about Lydia E. Pinkham's Vegetable Compound my husband wanted me to try it. I took it for a week and felt a little better. I kept it up for three months, and I feel fine and can eat anything now without distress or nervousness. Health and happiness? Yes, I have both now."—Mrs. J. Worsbullne, 2842 North Taylor Street, Philadelphia, Pa.

The majority of women nowadays overdo, there are so many deman a upon their time and strength; the result is invariably a weakened, run-dovn nervous condition with headaches, backache, irritability and depression—and soon more serious ailments develor Avoid them by taking in time

Lydia E. Pinkham's Vegetable Compour

": (' ow" Now Preferred.

GUIDE-ADVOCATE, WATFORD, FRIDAY, JANUARY 14, 1921

nereafter it will be "milk cow" and not "milch cow." This decision marks the termination of a controversy in which etymolists have had not a little interest. Those defending "milch" have pointed to scriptural use and certain of the classics as establishing precedents,

Liberal Feeding Must Be Practiced

Milk Cows. while the opposition has contended that dairymen, ranchmen and farm-ers in general use "milk" instead of "milch" almost universally. The advocates of "milk" also favored that word because, they contended, it was more strictly an English word, while "milch" was akin to German. This last sally of the "milk" defenders helped as much as any to decide the question in their favor.

Scrubs.
A scrub is an animal of mixed or unknown breeding, without definite type or markings. Such terms as na-tive, mongrel, razor-back, dunghil, piney woods, cayuse, broncho and mustang are somewhat synonymous with "scrub," although many of the animals described by these terms have certain fixity of type even though they present no evidence of systematic improved breeding.

Tankage for Growing Pigs. In response to an inquiry in regard to the use of tankage in balancing a ration for hogs we duote from Illinois station bulletin:

For young growing pigs, as follows: One part tankage to nine parts corn, bran or middlings; for adult hogs, one part tankage to 11 parts corn, bran or middlings. This balances a ration, with the proper pro-portions of each, to build up the hog or maintain or fatten the hog.

Vegetable M. for Soil.

There are many anown methods of supplying the necessary vegetable matter to the soil. Crop residue is usually the basis of more humus. Grass or sod crops are the most valuable in this respect. Stable manure is also of great value in increasing humus. Winter cover crops, such as annual clover, vetch, or rye, are now extensively grown to be turned under in the carbon country. in the early spring.

Good Business Proposition. Time was when the selection of seed corn on the farm was looked upon somewhat as a fad. Sentiment, though, has changed until to-day wehave come to consider the field selec-tion of seed corn as a thoroughly approved business proposition.

The early robin was seen in To-ronto on Jan. 3rd, by Mr. Carter of the Dept. of Health, so the Globe re-ports. Don't expect Spring right away because of this report.

KEEP LITTLE ONES

WELL IN WINTER

WELL IN WINTER

Winter is a dangerous season for
the little ones. The days are changeable—one bright, the next one cold
and stormy that the mother is afraid
to take the children out for the
fresh air and exercise they need co
much. In consequence they are often
cooped up in overheated, badly ventilated rooms are soon seized with
colds or grippe. What is needed to
keep the little ones well is Baby's
Own Tablets. They will regulate the
stomach and bowels and drive out
colds and by their use the baby will
be able to get over the winter season in perfect safety. The Tablets
are sold by medicine dealers or by
mail at 25 cents a box from The Dr.
Williams' Medicine Co., Brockville,
Ont.

passed.—Carried, 'and by-law read and passed.
