The matter is one which has been engaging the attention of these two departments for some time, and it is understood that some concrete pro-posals will be considered tomorrow. Last year Canada turned to the United States for a supply of labor to meet the necessities, more particularly of the Canadian west.

Owing to the participation of the United States on an increasing scale in war activities it is doubtful whether there is in that country as large a sup there is in that country as large a supply of labor available as there was the first of the year. The matter is one which would probably have to be taken up with Washington before definite action looking to the securing of a labor supply across the border could be taken bere.

The reason of the Russian catastrophe is acceptance of defeat by part of the Russian people; the reason for the impending German catastrophe will be despair of victory by the German people. The news that the Germans and Russians broke off negotiations at Brest-Litovsk evoked commotion in German cities. Crowds paraded the streets of Berlin, Leipsig and Essen, clamoring for peace. The Germans, however, have evidently just tided over some internal crisis, for Von Ludendorff has withdrawn his resignation as German quartermastergeneral, and the government is assuring political leaders that the situation is safe.

Some conception of how Germany will run into a catastrophe, an ending, by the way, predicted some time ago by General Sir William Robertson, may be had from contemplating the consequences of sustaining the strain of war protractedly. Officers in Ottawa to Get Better System for Transporting Soldiers.

One of the first instances of the civil police arresting men of Toronto military district as defaulters under the Military Service Act is reported from Penetang. The chief of police of that town sent word to Toronto yesterday that he had placed three defaulters under arrest. His report stated that one of the men, altho of the age included in the first call, had not re-sponded to any of the requirements of the act. One of the others had gone up for his military medical examination, but had failed to register or appear before his exemption tribunal. All three, had failed to report for service. Two of them are stated to be Hamil-

ton men.

It will be a few days yet before the authorities commence to follow up and investigate the cases of the men who have not reported at Exhibition camp under the Military Service Act. About a week will be allowed for the men ordered to report to put in an ap-pearance, and then before the actual apprehending process commences the lists are to be checked over by the provincial registrar's department. It is stated by military officers that many men thought defaulters joined up with the Royal Flying Corps and other the Royal Flying Corps and other units since the issuing of the Military Service Act proclamation, and this ex-plains why on some days the full num-ber notified to go to Exhibition camp did not report.

Primarily Civil Police.

Primarily Civil Police.

When asked yesterday whether the military police or the civil police would investigate the cases of defaul-ters, the military authorities at Toronto headquarters gave the answer that it would be "primarily the civil police." This is in line with the working out of the act in regard to the ex-emption tribunals, which were civil courts.

The sixth quota of Toronto men called to the colors under the Military Service Act mobilized at Exhibition camp yesterday. The response was good, the proportion of defaulters being perhaps the lowest of any day since the actual mobilizing of the since the actual mobilizing of the drafted men began. Several hundred of the drafted men were inoculated during the morning. The training of the drafted men is now in progress. Some have reached the stage where they are qualified to do guard duty.

A policy of retrenchment seems have been inaugurated by the Ottawa militia department. An order just received from the quarterniaster-general states all Canadian Army Service Corps officers at present employed are to be medically examined and a report forwarded at once to military head quarters.

Suffered From Nervous Exhaustion and Melancholy.

Mrs. A. North, Grand street N., Brantford, Ont., writes: "Both my husband and I can speak very highly of Dr. Chase's Nerve Food, having used it with splendid results. My husband suffered from weakness and a rundown system, and became so bad he finally had to give up work. He also had spells of melanchola. He combatter in the surprise the Germans on the western front.

had spells of melancholta. He commenced using Dr. Chase's Nerve Food, and after a treatment of this medicine I never saw such a change in anybody. He is now able to attend to his work, and is enjoying splendid health. "Before I started taking Dr. Chase's Nerve Food I was troubled with nervousness, sleeplessness and a pain around the heart. The Nerve Food built up my system, made me feel stronger in every way, and relieved me of the annoying symptoms from which I had suffered. We always keep Dr. Chase's Nerve Food in the house ready for use in case they are needed."

When the nerves give out everything goes wrong. The heart's action is weakened, the stomach fails to digest the food, headaches result, you cannot rest or sleep properly, and you get rundown and discouraged.

There is only one way to get out of this condition, and that is by feedtures.

THURSDAY MORNING, JAN. 10.

Tearing Up Rails.

President Wilson's proclamation taking over the possession and operation of United States railroads and connecting steamship lines has had the effect of stirring into unwonted activity the Canadian Railways War Board. The board just now is bubbling over with suggestions of activity, and the Montreal despatches tell us that it desires to have from 1,500 to 2,000 miles of rails torn up in various parts of Canada and relayed as sidings. double trackage, and so forth in other parts of the country. Chinese coolie labor, it is suggested, should be utilized.

Activity is a great thing, but we are not ready to have a board of railway officials mainly representing the Canadian Pacific and the old Grand Trunk turned loose with coolies and crowbars to tear up 2,000 miles of railway. We have already had some 600 miles of rails removed from the National Transcontinental (including the Grand Trunk Pacific); This was done by the Dominion Government at the request of the imperial authorities to speed up railway construction on the western front. It was a war measure no doubt justified by an extreme military situation. but even then there were bitter complaints that the government railway was being discriminated against to the advantage of rival roads owned an by private corporations.

It is a far different proposition for a board of railway officials/even under government supervision to tear up three times 600 miles of tracks in one part of the country and transport them to another. It would be easy, we imagine, thus so to dismember the Canadian Northern system, promptly and unreservedly. now passing into the possession of the government, as to give the Cana-

now passing into the possession of the government, as to give the Canadian Pacific a complete monopoly in many parts of the west.

The National Transcontinental cost the people of this country at least 100 thousand dollars a mile. Indeed, the prime minister in some figures he gave the house a year or two ago figured that our investment in the N. T. R. (including the Quebec bridge) amounted with interest to 432 million dollars. That would mean 250 thousand dollars a mile. The Canadian Northern, we are now taking over, may increase the liabilities of the nationalization of all the railways of the Dominion Government by 636 million dollars. At any rate our dian Pacific a complete monopoly in many parts of the west.

The National Transcontinental cost the people of this country of least 100 thousand dollars a mile. (including the Quebec bridge) amounted with interest to the Association of all the railways of the Dominion Government by 636 million dollars. At any rate our government roads, whether constructed by the government or acquired by purchase or mortgaged to the government for more than their value in the open market, have cost us a sum that can only be described as supposed to the government must not be hacked to pieces and broken into fragments by any executive order of the government, much less by any arbitrary ukase of a few railway officials who happen to hold some advisory and more or less honorary position as a "board" under the government. No power less supreme than parliament should scrap one-fifteenth of the railways momenting like one-seventh of what we might call the national railway system could be destroyed.

Union government is committed. If the outside civil service is to be efficient every soldier must carry a baton in his knapsack. A young man entering the service should have the same chance of rising to the highest position as would be given him by a big, well-managed private corporation. Promotion for efficiency should be the slogan in every big department of the government, and the big prizes in the postoffice and customs departments should not be reserved for defeated members of parliament or more distinguished statesmen for whom an asylum is desired.

There seems little doubt but that the late minister of customs. Hon. Dr. Reid, intended to promote Collector Bertram of Toronto to the collectorship at Montreal, but his hand was stayed by local prejudice and political clamor. Mr. Bertram comes back to Toronto, where his great SIR ROBERT BACKS services are needed and will always be appreciated. The Montreal collectorship, however, does not go to some politician who never saw inside a custom house, but goes to an official of the customs department of the local port who is well qualified to advance from second to first place.

Hon. Arthur Sifton, the present minister, has an open pathway before him. He is not a party appointee like his precedessor, nor is he bound by party loyalty to ladle out patronage. On the contrary, he is a minister of a Union government, pledged to abolish patronage. He can instal and insist upon the rule of promotion in the customs department so that a messenger boy or tide waiter may work himself up to the col-

Sir Eric Geddes.

Current Opinion publishes an interesting sketch of Sir Eric Geddes, the first lord of the admiralty. Sir Eric follows tradition in never having gone to sea, but he is said to be smashing all other traditions in the way he is handling "the King's navee." Indeed, one may wonder how long he will hold out, opposed at the same time by the "ginger group" and the bureaucrats.

Current Opinion claims Sir Eric Geddes as something of an American, attho he spent only a few years in the United States. During those few years, however, he lived in the south and acquired a broad accent which is conversation with Hon. Frank Cochrane, former minister of railways in the late

The Saturday Press Prairie Farm, Saskatoon, thinks the railways made a good case for an increase in rates. Those who object to the increase, it says, should go in for railway nationalization:

There has been very strong opposition to the increase just granted by the board of railway commissioners, but there seems to be only one other solution, the taking over of all railways by the government during the duration of the war in this country, as well as in the United States. Unless the country is prepared to have this step taken, opposing the increased rate will not help matters any, or give a square deal to the railways.

Clothing Workers Stand By Members on Strike

Will Donate Portion of Wages to Assist 150 Tailors Who Are Out on Strike.

"Resolved that the members of the five local bodies of the Amalgamated Clothing Workers of America do stand by the 150 members now on strike against the Tip-Top Tailors, Ltd., of Yonge street, and also that they do hereby decide to give five per cent. of their wages toward the fund assisting the strikers in their combined effort against the unwarranted action of the firm herein mentioned."

The above resolution was passed at the conclusion of a largely attended mass meeting held at the Builders' Institute, Nelson street, which had been called to consider the attitude of the Tip-Top Tailors, Ltd., who, they alleged, were opposed to the employment of union men and women in their establishment. The strikers claim that discrimination has been shown against those favoring the principle of "Resolved that the members of the

Business Agent James Blugermann, of the Toronto joint board of the amalgamated association, in the course of his address, pointed out that the local unions had grown from 200 to 1,300 in membership during the past eighteen months, and had fought successfully for an eight-hour day and for an increase in wages. Leon Alstein, another well-known representative of the union, also addressed the meeting.

HIGHER WATER RATES.

Consumers of water in this city will probably be called upon to pay higher rates if the city council adopts the reports of Commissioners Harris and Bradshaw which will be presented to the aldermen at an early meeting of council. There was a surplus of \$45,000 in the operations of the waterworks department last year, but this includes large amounts charged up against civic departments. The fire department alone paid almost \$750,000 for water service last year.

Record.

The boy scout movement in the city received a big boost last night at the Church of the Redeemer when Chief Thunderbolt inaugurated the ceremony of burning the staves to record the badges won by the troops to which the staves belonged. Chief Thunderbolt is an Iroquois Indian from near Belleville, and with his long flowing black hair and his clear eye he looked far from his 62 years. He was dressed in full Indian regalia, and along with the camp fire and tent on the platform, a picturesque scene was presented.

SOME WORK GOES ON.

The announcement of Hon. Frank Carvell that expenditures on Toronto harbor improvement work during the coming year would be confined to maintenance work does not mean that construction work will cease entirely, altho it will be considerably curtailed. New work will be cut out, but there is a great deal of old work under way which will probably be completed. Another feature is the fact that the contracts let to the Canadian Stewart Company provide that their work shall go on during the year without cessation.

CHARGED WITH THEFT.

Sign Companies Affected.

There are 1515 Illuminated signs in the city, all of which will be affected by the new order. The city obtained a revenue of \$7700 from the inspection of these signs last year, but no rebate will be given unless the owners of the signs have them dismanuled.

The Macey Sign Company and other concerns stated yesterday that if the new order is strictly enforced their business will be considerably hurt. The electric sign business would be ruined, they stated. The E. L. Ruddy Company has a large number of brill boards throut the city which are illuminated by inverted lamps. These would be dark at night under the new order, and as a result the rates for rental of space on the signs would have to be reduced.

muss.
Outside of the rough stuff it was a grand game. The Torontos beat the Canadiens with their speed and back-checking, and on lest night's form will be a hard team to nose out for the honors. The players had the confidence in Holmes and put a dash into their play that was acking in other games. Alf. Skinner played his best game of the season and t was his back-checking that stopped the Canadiens on several occasions when they looked dangerous. they looked dangerous. Skinner collected a Toronto's first two goals and his work in around the net was perfect. Noile, despite the rough passage accorded, played stering hockey. Randali did telling work in the opening session and Denneny tore like a mad man and checked hard. He tired badly a couple of times, but it was not to be wondered at when one looked at the pace set.

Mummery and Cameron make an ideal defence, it takes a mighty good man to get past Mummery and Cameron is the man to break with the rush. Cameron turned in another of his good semes. The first was the best period. Only one goal was scored and Skinner netted this after er minutes of strenuous play. In the first few minutes Noble followed in the puck and Lajonde and Hall sand-wilched him in between them and gave him a shaking. In tearing away Noble took several inches of skin off Lalonde's face. On the next rush Lalonde deliberately worth by getting in front of the Canadiens.

Now Hamburg (8)—Goal, C. Berger:

The first was not to be wondered at when one to break with the rush. Cameron is the man to break with the rush. Cameron is the least of the union Jacks' wonderful result of a well-contains at the college street within a college street within a shaking. In tearing away Noble took several inches of skin off Lalonde's face. On the next rush Lalonde deliberately worth by getting in front of the Canadiens.

They tore up and down the ice at marvelous speed, and Mummery showed his worth by getting in front of the Canadiens.

The first was for the contained the second period, when the score stood 7-all. The looked the speciation of the wing officers: Honorary president, Major W. F. Easton; secretary-treasurer, Sergt, V. R. Rambert, W. Keiterborn; rover, I. Bergeri browning at 8.

The first was for the long the proposed propo

worth by setting in front of the Canadien puck-currier and blocking him off.
Lajonds tried every trick to get in close but falled. Holmes took the shots from any taste and it was the best exhibition of goal-tending that the local fans have seen in many a day.

The only goal of the period came ten minutes after the start. Denneny went in behind the net and passed out to Skinner who batted it in under Vezina's feet. It was heatly done. Just before the tally Couture tried to lam in thru the Toronto delence and when Randall blocked him off in stardy style he jumped on the Toronto player being able to hit back. When there two players returned to the ice Rundall tried to cross-check Couture and was benched.

The Torontos had a better system of stack and Vezina had more to do than Holmes Both teams kept the hot pace going right to the first bell and it was thrilling hockey.

The second session was different. The Torontos koked as if they had skated themselves out and lacked the dash of the first round. The blue shirts were all right for the first few minutes and netted the puck twice in a minute and as half, and then talled off. Skinner followed thru and grabbed a puck after Denneny had carried to the defence. He notted it neatly. Denneny went right from the face-off, tore thru the whole

McPhail had the unpleasant experience of scoring for the visitors when he kicked the puck into his own net. The last two minutes of play was fast and featured by Hillman, who scored his second goal of the night.

The third period opened with the score 8 to 3 in favor of the visitors, and both teams going hard. The first goal was secured by Murray from close in, after which the Hams, cheered on by the fans, attempted to run away with the game. Parker, Hillman and Reise each pulled off spectacular rushes, but shot wild, Boyd scored again for Hamilton, putting them only three goals behind. The Sarnia men now uncorked a terrific brand of speed, and Adams and Murray both hit the nets, putting them five goals to the good. Play ended with Hamilton trying desperately to tally. Line-up:
Hamilton (5)—Goal, McPhall; defence, Parker, Reise; centre, Boyd; right, Bishop; left, Murray; centre, Hillman; right, Adams; left, Schumacher.
Galbraith (Hamilton) replaced Bishop for a few minutes in the second period, and Montgomery (Sarnia, spare) went on in the second in place of Grannary and finished the game.

the final score of the period. Kitchener continued to play loose hockey in this period, shooting much, but carolessly. The soldiers were a bit raw in combination work and were no match for Kitchener's forward line in a defence work, Much was expected from Klaehn, the former Kitchener man, but he failed to show stellar class. Rupple featured for the khaki.

The third period opened with Kitchener showing speed. Leroux scored for the locals in 30 seconds, followed in 45 seconds by Parkes, who tallied the eighth score. The tenth tally was made by Parkes, who tallied the eighth score. The tenth tally was made by Leroux on pretty combination work from marges and selomon. The score was made in 4.30. Parkes came down the line and in the second in 5.05. Kitchener shot almost at will for the remainder of the period, scoring four more tallies. Goaler Hainsworth, 10r kitchener, was knocked out for a few minutes as a result of getting a stick in the mouth.

The line-up:

The Art of Kidding Asset to Fighters

A lot of qualities go to the make-up of the successful pugilist, and not the least of them is the art of kidding. This was illustrated 18 years ago today in the famous lattle between Kid McCoy and Peter Maher, at Coney Island. The Irishman was a good fighter, and if he had kept his temper might have been the victor. Kid McCoy was the champion sneerer of the ring, and could think of more mean things to say than any other fighter that ever lived. In the second round the Hoosier began to unlimber his verbal artillery. "You big stiff," he remarked "the newspapers say you have been doing the baby act, crying for sympathy because your wife is sick. Before I get thru with you, you'll have a real reason to Llubber for sympathy. Take that —"

Such insulting language would be enough to "get the goat" of amost any man, and Peter fairly frothed at the mouth. The Irishman's wife had been very ill, and this added fuel to the flames of Peter's wnith. He wailed in regardless, which was exactly what the clever Kid was playing for. In the flith round Maher was smashed to a pulp, and the Hoosier was declared the victor.

After the battle the Kid apologized for his remarks, saying that they were only a "matter of business." and Maher was hotter than over, realizing how McCoy had made a fool of him.

The late—pugil'stically speaking—Jack Johnson was also something of a kidder, and nothing that his opponents could say to him had any effect. He took a big amount of kidding in his fight against Jeffries at Reno, but it never bothered him a bit. Young Corbett's victory over Terry McGovern was also won in part by the talking route.

As Charlie Says:

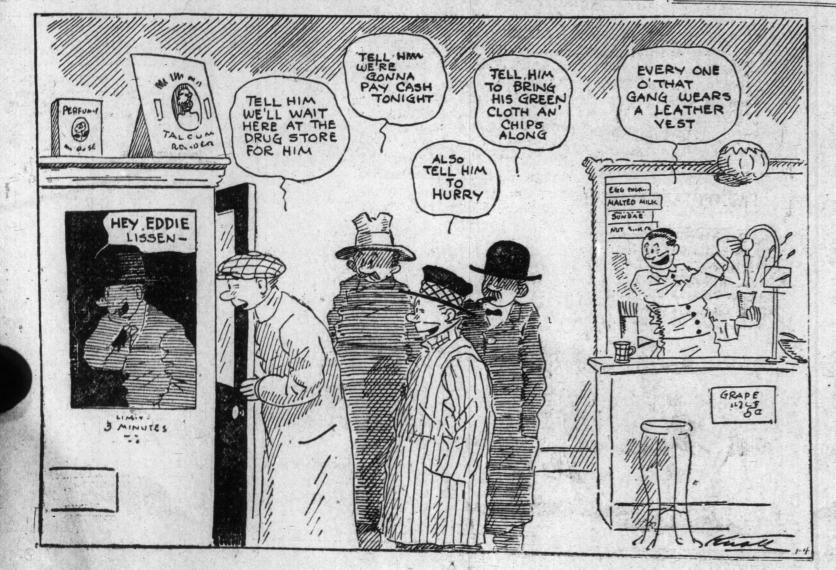

The cigar which was admittedly good enough when I made my debut as a smoker, falls lamentably short of an ARABELA today. The art of blending leaf has made strides. (The 10-cent cigar)

Special to The Toronto World.

Brantford, Ont., Jan. 9.— For the first year of the operation of the Ontario Temperance Act in Brant County the sum of \$8340 was collected in fines, a total of \$10,250 in fines was imposed while 14 commitments to jail were made. Of these totals, as might be expected, the City of Brantford supplied the greater number. The amount collected in fines in this city was just under the amount collected in licenses before the law came into effect, and for the whole county was in excess of the license fees.

ENTERTAIN SOLDIERS.

The main auditorium of Davisville Military Hospital was crowded with soldiers last night, the occasion being the play, "Every Youth," a moral fantasy, which was presented by a very capable company under the leadership of F. Bridgen, of Queen Street Methodist Church, many well-known artists assisting. A twenty-piece orchestra conducted by Hazel Cook furnished the music. All the expenses were borne by the Young People's Society of the church.

A busy meeting with much in the way of accomplishment is the record of the meeting of the Sir Henry Pellatt Chapter, I.O.D.E., in the Sherbourhe House Club, yesterday after-

noon.

Returns from the Bon Marche showed that twice the sum at first thought of had come from the venture, \$602.05 being to the credit of the chapter, expenses being only \$2.45. He did not ask for financial backing, Mr. Morrell explained, but for co-operation in the matter of visiting and taking individual interest in returned soldiers and their families. As an instance of the necessity, he told of 200 cases in need of coal which he had himself handled this week. After some discussion, on

Machinist's Infection

Men employed as machinists or on lathe work in factories frequently suffer indections in trifling cuts or abrasions and less sacre unduly susceptible to bolls on work in factories frequently suffer infections in trifling cuts or abrasions and also seem unduly susceptible to boils on arms, legs and faces. In the State of Ohio, for instance, 22 per cent, of the amount paid by the industrial commission on death claims was for infections, and 10 per cent, of the amount paid for loss of time was for the same cause.

Mr. M. It. Shie, a medical student, made a hacteriological investigation of conditions in a large Cleveland factory and found that the "oli pimples" and infections were caused by the contamination of the cutting mixture and oil which is used over and over again in such work. He further investigated various remedies to prevent such infection. The odor of cresol is disagreeable to some persons. It is possible that the hygienic laboratory disinfectant (a Cross secretary, will speak to the women of London shortly at a big rally for Red Cross workers in that Mrs. Julia A. Laughlin, recently installed as station master of the Chicago Great-Western Railroad at Ames, Ia., is probably the first wom-

In shops where oil pimples, boils and infections are frequent, the men should be taught the necessity of protecting the oil and cutting mixture from needless pollution, as by expectorating in it and throwing their exhausted tobacco into it. ADVICE TO GIRLS

By ROSALIND. =

DEAR ROSALIND: I am a young girl of twenty, and I am a young girl of twenty, and having no one to go to for advice, thought I would write you. My girl friend and I are deeply in love with two Yankee cadets, and in spite of our warnings they will not be careful when up in the air. They frequently offer us cigarets in Toronto's largest hotel, where we sometimes have dinner. Would it be very wrong, as we see lots of sometimes have dinner. Would it be very wrong, as we see lots of girls doing so. One is at present confined to his room. Would it be very wrong for us to call and visit him? Anxiously awaiting your reply. W. W. and M. M. B. Dear girls: Don't worry about your birdmen while on duty. They are careful all right, altho they probably like to hear you beg them to be more so. In some countries it is the custom for women to smoke in hotels and res. so. In some countries it is the custom for women to smoke in hotels and restaurants. Toronto has not yet considered this good form; so if you would be considered as belonging to the "best" set rather than the "smart" set you will not smoke in public. I am not saying anything here about the smoking itself. What would your mother like you to do? As for the invalid, better wait until he can sit up and look pathetic in a big chair and receive callers properly before you go to see him. It's just a matter of being careful, girls, and of always considering your own self-respect.

FOR HALIFAX SUFFERERS. Miss Wallace of Willowdale, a nember of the York Township

branch of the Red Cross Society, col-lected the sum of \$300 in that local-ity for the Halifax sufferers. The money was forwarded thru the city treasurer. The collection was made under the auspices of the branch of the Red Cross of which Mrs. C. J. Catto is president.

Live Stock Market

There was a streng active market at steady prices for practically all kinds of actic out at the Union Stock Yards yesterday, and while the receipts were not rary heavy they were moderately so, note than 1700 head of cattle, 109 calves, 800 hogs and 516 sheep and lambs. Fat lows and butcher bulls were in strong lemand and as on Monday and Tuesay the market was well cleaned up at attisfactory prices.

demand and as on Monday and Tuesday the market was well cleaned up at eatisfactory prices.

There was a light run of stockers and feeders, and white the demand for this class of cattle has abated a good deal more would have sold well at the market has lost none of its firmness, but rather shown more strength, and some of the buyers for the larger packing houses said it was a good 25 cents stronger than on Tuesday, but be that as it may there was a good clean up. One thing was freely commented upon, and that was the fact that a good deal of the stuff coming on the market at the present time is far from being well finished. This is said to be due to the high price of coarse feeds of all kinds, but there is not a commission house or drover but regards the sending out of peoply-finished cattle as a mistake. All the best feeders in the country declare that it pays to finish their cattle well, as the greatest gain is when they are well advanced. Well finished cattle are always sure of a ready market on the Union Stock Yards Exchange.

There was a strong market for all the small stuff, but there were no striking price changes to note. Lambs continue very strong, as indicated by the reports. It looks like a steady trade.

The builk of the nogs on the market brought \$18.50 fed and watered yesterday and \$18.75 weighed off cers. There was a good deal of talk on Tuesday about he price being hammered down to \$18, but if such was the intention of the big packing houses they failed to get them brought down to that level. As stated the price was \$18.50 fed and watered.

"Ore as low as seven ounces, broken and on surface, can be treat-

An interesting analysis of the position of the Nipissing Mines Company has been prepared by Kiely Smith and Amos, Based upon the figures in the last annual report, the balance of current assets over liabilities is \$1,577,521.40. The estimated ore reserves consist of 167.394 tons containing \$9,153,139 ounces. Less to serve is continuing to meet with such as a continuing to meet a con

taken as evidence that the Crown Reserve is continuing to meet with success in its operations on the property. McIntyre, Dome, Porcupine Crown and Teck-Hughes were all firm to strong, while Hollinger was shaded slightly in price.

In the Cobalt list Nipissing was in request at 8.40 and McKinley at 58½. The Nipissing report of earnings for December, showing production of silver valued at slightly over \$340,000, is regarded as highly fav rable. Hargraves was well supported, holding around 11½. Among the reactionary issues were Beaver, Timiskaming and Peterson Lake, the last named selling back to 10. The seemingly well-grounded hope that the price of gilver will be fixed around 95c, thereby ensuring a big margin of profit to Cobalt companies, has not resulted in a buying movement, but definite announcement from Washington should have buillish effect.

Canada has the potential resources, but labor and capital must combine in their development, and until there is sufficient labor there will not be sufficient capital. The war has created conditions altogether unforeseen. It has greatly retarded the growth of Porcupine. Under normal conditions the production of the camp would be over \$25,000,000 during last year, but the production of the camp would be over \$25,000,000 during last year, but labor costs, the principal item in producing gold, have been unusually high, and low grade mines have not been able to work at a profit.

When the government is considering the supply of labor for the farmers and others they should also have regard to the requirements of the

and others they should also have regard to the requirements of the mines. Their product is vital in meeting the huge expenditure entailed by the great war and in the preservation of the country in the face of its constantly increasing the face of its constantly increasing liabilities.

Co., promises to be one of the most profitable in the history of the Nipissing Mines of Cobalt, and when the record of this great silver producer is perused this means something. Till the end of 1916 the Nipissing had produced over 45,000,000 counces of silver with comments. S. R. Clarke. KIRKLAND-PORPHYRY

issing had produced over 45,000,000 ounces of silver with a gross value of over \$26,000.000, and had paid dividends amounting to almost \$16,000,000. During 1917 the value of the output reached a new high level in the history of the property, amounting to \$3,360.078, as against \$2,725,-123 in 1916, and \$2,425,066 in 1915. The former high record of produces Hamilton B. Wills, Dr. Conrad Wettlaufer and a party from Buf-falo returned yesterday from the Kirkland Lake district, having left 123 in 1916, and \$2,425,066 in 1915. The former high record of production for the mine occurred in the year 1910 when silver to the value of \$3,008,958 was produced.

During the year 1917. dividends to the extent of 30 per cent. on the outstanding capital were disbursed, amounting to \$1,800,000, which brings the dividends paid by this company up to the magnificent total of \$16,-740,000, or equal to 279 per cent. on the capital of the company.

The production by months for 1917, as compared to the output of the previous year is shown below: Kirkland Lake district, having left Toronto for the north on Saturday night last to examine the spectacular discoveries made on the 170-foot level of the Kirkland Porphyry. They returned highly enthusiastic, Dr. Wettlaufer saying: "I am now convinced Manager Cecil has brought to light one of the very biggest and richest ore bodies yet revealed in the Kirkland Lake camp."

He added that he did not believe any other part of northern Ontario

any other part of northern Ontario could show an ore body of such richness as was now proven to exist in the Kirkland Porphyry, and there were indications that with another 200 feet of sinking sufficient ore would be available to keep a large mill in operation for years.

DROP IN COAL OUTPUT

Montreal, Jan. 9.—Mark Workman, president of the Dominion Steel Cor-poration, states that the production poration, states that the production of that company's steel mills was well up to the 1916 figures. As regards the Dominion Coal Company there has been a big falling off in production owing to the enlistment of some 4500 miners since the outbreak of war, and the replacement of only 1000 of them. the replacement of only 1000 of them. The result is that the output of coal for the year just closed is the smallest in many years, falling below the 4,000,000-ton mark. The 1917 coal output fa'ls half a million short of 1916 and 1,250,000 tons below normal. "Ground floor" investors in the nines of Northern Ontario have had returned to them many thousand last dozen years. A notable instance is Hudson Bay Mining Company, which has yielded approximately 25,-

Dome Mines when operating costs adanced to a level that wiped out profits. The Dome had been using lowgrade ore, while it had plenty of relatively high-grade ore at lower levels only partially developed. There was only one thing to do. namely, to cease mill operations and proceed to break down ore that would yield a net profit at the higher operating cost basis. This is exactly what the management is doing in an aggressive manner at the 800-foot level. Here most favor-able developments have occurred, which caused the president of the company recently to issue the state-ment that the Dome mill would re-

An ore body at the 800-foot level 130 feet while is being maintained in ore of good commercial value. Dome with its enormous volume of high and low grade ore has a long and prosperous future ahead of it.

Hollinger.

Although there is some doubt entertained by mining authorities as to when the Hollinger Consolidated will resume dividends on the stock, the big mine is being placed on a strong physical and financial basis, and dividend payments should not be long delayed. The chief developments have occurred lately on the Millerton property, where at the 400-foot level 71 feet of \$27 ore has been opened up. It is worthy of note that when the Hollinger consolidation took place the ore values on the Millerton were estimated at slightly over \$1,000,000. Indications are now that several million dollars' worth will be taken from known ore bodies. The current price is about \$5 per share, as compared known ore bodies. The current price is about \$5 per share, as compared with \$7.50 a year ago. The daily capacity of the mill is now 2800 tons as compared with 1800 tons a year ago, and the company has some \$40.000,000 worth of ore actually in reserve.

For some time now the McIntyre mine has been producing gold at the rate of \$2,000,000 per annum. That means that net profits are at the rate of close to \$1,000,000 per annum. Dividend requirements aggregate \$720,000 per annum. Thus it appears that a maintenance of 20 per cent per annum dividend is assured, with a considerable surplus left over to accumulate a reserve treasury account. Mclate a reserve treasury account. Mc-Intyre's extensive high-grade ore bodies are more consistent as they go to depth. During the year the milling capacity has been increased milling capacity has been increased from 400 to 600 tons per day. The mining equipment is one of the most effi-cient and economical in the world.

FAILURE OF BROKERS.

New York, Jan. 9.—The suspension of Kerr & Co. was announced today on the floor of the stock exchange, of which the firm has been a member for about 25 years. Inability to meet obligations is given as the reason. An estimate of liabilities and assets will not be available for several days, it was stated.

that you should not overlook NEWRAY as an investment opportunity.

Not so long ago NEWRAY could be bought in the market for 30c per share. It has since sold up as high as 48c per share. We repeatedly advised the purchase of NEWRAY, confidently believing that the market was bound to reflect the progressive conditions of the property.

Our opinion has been confirmedour judgment vindicated.

BUT

WE FIRMLY BELIEVE that the market has not yet fully discounted the fact that NEWRAY looms up as one of the biggest mines in Porcupine.

That Newray has the "goods" was amply proven in the old days when over \$200,000 in gold was taken out of the Connel vein. And since reopening, the mill has been turning out bullion from ore taken from underground operations.

The property has three essentials of a big mine---large acreage---excellent vein systems carrying pay ore---and an efficient management.

In other words, it has every opportunity to make good.

From an investment standpoint, therefore, WHAT MORE COULD be desired?

GRAIN HIGHER IN

Montreal, Jan. 9.—The tone on the market for oats today was very strong, in sympathy with the advances in prices in the option markets yesterday. There was a keen demand from local and country buyers for supplies, but offerings were small. Car lots of No. 1 feed were quoted at 93c per bushel and of No. 2 white at 92c.

The receipts of butter today were 146 packages, as compared with 118 last Wednesday. The tone of the butter market remains very film, with a fair amount of business passing in a wholesale Jobbing way, but the demand for round lots is rather quiet. The trade in oleomargarine was fairly active today. There was a steady demand for small lots to meet immediate requirements, and prices were unchanged at 30c to 32c per pound.

Guelph, Ont., Jan. 9.—Except an inght and for an hour, at noon no street cars are running in Guelph, and it is more than likely that in other ways the demands for power will have to be reduced. Manager Heeg has received word from the hydro headquarters that Guelph's limit was being exceeded and that he must cut down the load 20 per cent. This compelled him to shut off the power which ran the street cars, and they remained idle the greater portion of the day, thus inconveniencing many people, especially those who are attending the experimental meetings at the O.A.C.

Manager Heeg stated this morning that the situation had practically come to a question of closing down some of the smaller factories in order that the manufacture of munitions and the completion of war orders might proceed without interruption.
