BRITISH POLITICAL CRISIS.

This British political crisis is the first of the pitched battles for moral, political and social reform which, unless all omens be falsified, will distinguish the twentieth century. It comes now thru the action of the House of Lords, which for fifty years has steadily been passing more and more out of touch with democratic sentiment. There was a more and more out of touch with democratic sentiment. There was a time when it more closely falfilled the functions and purpose of a Sec-ond Chamber, and even yet it holds peers who by reason of their ability, knowledge and experience are admirably fitted to perform its proper duties. Their interposition gives to important House of Lords debates the quality and temper that makes them unexcelled in any other delib-erative body themout the civilized world.

But unfortu even largely of men of their stamp. As now constituted it is simply, to use the apt phrase of the late Lord Goschen, "a committee of the Carl-ton Club," the headquarters of the British Tory party. Year by year the number of LAberal peers has diminished, until to-day they are but a handful of the 616 active members of the hereditary house.

Even at that, had the House of Lords maintained, even to a limited extent, the principle that should guide a revising Chamber, the question of its reform would not have become the live issue it is now. Ever since the general election of 1868, when the disestablishment of the Church of England in Ireland was the critical issue, the peers have set themselves to destroy and mutilate Liberal measures. Not one of the numerous reform proposals associated with Mr. Gladstone's various governments escaped drastic amendment all but invariably in the interests of the landed and privileged classes.

Contrariwise the House of Lords has never failed to pass legisla-tion, however reactionary, proposed by the Conservative party, of which it is the epitome. Hence the growing spirit of indignation against the hereditary house in the ranks of British reformers, the burning sense of injury, the increasing demand that the whole strength of the British democracy be turned against a body of men who are nothing if not partisan. Hence, too, the instant response that has come from every sec-tion of the Reform party and the flerce joy with which the call to battle has been received.

If the Lords have done nothing else they have certainly succeeded

BOWLING GAMES TO-NIGHT.

DECEMBER 10 1909

. 12.00 7.50

Ress of Winnipeg and McGregor TARIUM BURGH, PROP.

> first hockey practice of the season was held last night at Mutual-street Rink. when Teddy Marriott turned loose his bunch of stars. These were joined by a dozen more, and at the conclusion of a good two house work, the ice was found to be in the pink of condition, act a hole being visio.e anywhere. This is the best ice Mutual-street has ever had so early in the season.

Among those on the ice last night were Ross of Winnipeg and McGregor of Regina. Others out were Bud Mc-Lean, Roy McGiffin, Dode Burkhart, Addison; last year's goalkeeper for Osgoode; Nell, a junior from Barrie; Bruce Ridpath and a dozen others.

Pretty near all the managers of the different "teams were on hand getting practice hours for their teams. Toronto Canoe Club were out in full force with their whole executive, and they nise a cracking good senior team. They have two cand.dates for goal in Reid of last year's Corticelli' team, and

Holmes of last year's intermediates. Fo: point they have Carr-Harris, who played with Goderich two years ago

and was picked on the western all-stan team. Coverpoint is still uncertain, bu before the season starts Murphy of the Dominion Bank may be found holding down this position. On the forward line they have secured that great little goal-getter, Bud McLean, while Ross of Winnipeg and McGregor of Regins will also throw in their lot with the T. C. C. Al Crocker, who was spare man for last year's St. Michael's team, Woodstock College, who was sought term. after by the Woolstock juniors last

Newton Bennington Starts Again. NEW YORK, Dec. 9.—Newton Ben-mington, once well-known on the turf, in Wall-street and in the real estate world, has been discharged as cured from the sanitarium th Corono, L. I., where he was committed for mental disorder in 1907. His fortune has been swept away by adverse circumstances, and the once wealthy man finds him-self facing the world without a dol-lar. But he made his own money, and had tess than \$20 when he arrived first in New York. Bennington says he will in New York. Bennington says he will 'come back" in every sense of the

year, will also turn out with T. C. C., while several other dark horses will be out to-night. Manager Frank Dissette of the cham-pion St. Michael's team is not giving out any information, but claims to have secured the point player and right wing man to take the place of Tim-

Word comes from T. A. A. C. head-quarters that their team will be a great deal stronger than last year, and that Norman Henry, the Ottawa dispersive of the team of team of the team of team

of Paris will be comparatively unencumbered by street cars or other vehicles for passengers. The tubes pay well-except in New York, where hundreds of millions of watered stock was sold to the public.

So pronounced a success have these properties been that the second-class c ties, say cities in the neighborhood of half a million, are beginning to look to tubes. First of all, because it has been found out that they can be cheaply enough built to make them a success in cities of second-class size; next, because they give wonderfully improved service; lastly, and paramountly, for the reason that they promise to relieve the cities of the United States and Canada from the horrible infliction they have all brought upon themselves in the way of surface car franchises. Many of these franchises in the United States are perpetual; others are for fifty years, and as a consequence companies that control these franchises lord it over the cities, interfere with municipal politics and do as they please in regard to the public. giving what service they like, and, as a rule, ride rough-shod over the people. Civic reformers now 'see that if the tube franchises can be held by the citles themselves, and the tubes constructed by the cities, all this arrogant conduct of the surface line companies may be put an end to.

This is why the cities of Cleveland, Toronto and others are now looking to tubes, and The World predicts that within the next six months every city of the half million class, or neighborhood, will be looking into the tube question as a source of relief, and as a source of much improved local transit.

But the danger of 'the situation is that the surface people are even more active, and they are already beginning to organize to forestall municipal action and to grab the franchises and charters themselves. This very thing is to-day under way in Toronto, where a co-called terminal railway is seeking powers at Ottawa to build tubes under Toronto; the same thing is un-Her way in Montreal; a local company is trying to get the dranchise in Cleveland; and so ft will be in every other city. But now is the time for the people to become wise to the situation. and to adopt measures that will forever prevent these underground franchises from passing into the hands of private companies. Let Toronto be warned in time. There are newspapers Toronto to-day saying that we are at up so the take line yet, while, as a of faot these as

OBSERVATORY, TORONTO, Dec. 9.--(8 p.m.)-The cold has continued thru-out the western provinces, and has been particularly severe in Manitoba, where minima of 34 and 38 below zero have been recorded. Wintry tem-peratures have also prevailed in On-tario, and the cold is now spreading into the maritime provinces. More moderate conditions are now indicated in the west. The aching and the agony of rhe matism is refleved as soon as Zam-Buk's soothing ingredients reach the seat of the trouble. Just rub Zam-Buk well in over the muscles affected and get ease! Mr. P. C. Wells of 332 Ogden-street, Fort William, says: "I had rheumatism in both knees and in my left arm and shoulder. The

GALT PEOPLE TERRIFIED BY MAD DOG EPISODE Orders Given by Police Department to Shoot All Canines Running

at Large on Streets.

GALT, Dec. 9.-(Special.)-The mad dog which terrorized Galtonians yes-terday was killed by a Bell Telephone at Huynter's Corners. The brute attacked a little girl and lineman running to her assistance patched him with a club. James Anderson, V.S., amputated the head, thich was immediately sent to J. G. Rutherford of the biological depart-ment, Ottawa, for examination. Nine citizens were bitten, four seri-ously, and the dog engaged in fights with other dogs, and several were bit-

The police department have issued rders that no dodgs will be allowed to run on the streets, and every dog found running at large will be immediately shot and the owner sum

MODERN SHOE WAREHOUSE

Head of Big Hamilton Business Owns Building Where He Started as Boy.

Hamilton has always been known hruout Canada as a great shoe town, not only from the manufacturing end of the business, but also as a distribu-ting centre for the very necessary ad-junct to the costumes of civilization. An event of exceptional importance in the shoe trade was the recent acculsi-tion of the Knox building on East King-street, and its entire remodelling by the wholesale shoe firm of John Lennox & Co. Few Hamilton mer-chants are better known thruout the hants are better known thruout the length and breadth of Canada than John Lennox, and the marvelous suc-cess that has attended his business ca-reer, of which Hamilton has always been the headquarters, makes the story of that career as interesting as those of the many young men who have sought and found fortune in the far off plains or mountains of the glorious west. In the early seventies, as a lad of twelve, Mr. Lennox en-tered the service of Kerr, Brown & McKenzle as a junior, in the same big building which he now owns and oc-cupies for his immense shoe business. Even at this early age he gave pro-noise of being a hustler, and as he had plenty of ambition and no lack of energy he sought to become thoroly acquainted with every branch of the business, and soon became a decidedly useful lad. Hils advancement was so rapid that at an exceptionally early age he was made a traveler for the big house whose name was almost a household word from the maritime provinces to the head of the great lakes. Mr. Lennox was probably the youngest man who ever went out on the road front this city, but youth, was no bar to his progress. Even at this early stage of his business experience his interest was keenest for the shoe line, and in 1876 he became identified as a traveller with the wholesale shoe business, carried on by Wan. Griffith in the present Sanford building on East Kingstreet. About seventeen years ago, after building up a reputation second to none as a commercial traveler. Mr. Lannox retired from the Griffith firm and established the firm of John Lennox & Co., occupying the big premises that had for years been the old home of the old firms of John Garrett & Co. and Orr, Harvey & Co., con-cerns that were for years in the forefront of the wholesale shoe business of Canada. These premises had long been two small for the growing needs of the Lennox business, when this year, the head of the firm bought the Knox building on King-street, where he had started his business career as a lad. The new home of the Lennox Company has long been recognized as one of the finest sites for a wholesale business in the city. The interior of the big building ing has been entirely remodelled and brought up to date in every way for the expeditious handling of an immense volume of business. The offices and example rooms are among the most elegantly appointed in the country, and the fact that the presiding genius of the original firms named, and now Mr. Lennox, the office boy of years age, is their present owner, and the business if a as a lad in the same building not me devoid of interest to the original firms named, and now Mr. ing on King-street, where he had start- and he has risen until now perhaps he ing furnishes an object lesson that their present owner, and the business should not be devoid of interest to the he does in boots and shoes is one of ambitious youth. It is interesting to the largest in Canada, note the success which has attended the commercial lives of a host of the young men who graduated from the deak or the warehouse of those old firms of Kerr, Brown Co. and Kerr, The annual ball of the Jewish Bene-Brown and Mackenzie The building, which is now the home of the Lennox firm has had many occupants since it was first occupied about 1848 by the firm of A. & T. C. Kerr. After the principal of this firm, Kerr. After the principal of this firm, Mf. Archibald Kerr, retired with a large for the flow Land. Mrs. W. H. Pepler and her daughter beris, are spending a few days in Gueigh. The later wars Wr. John I. Macropain The flow Land. fortune, making his home in Scotland, the firm became Kerr, Brown & Co. In later years Mr. John I Mackenzie was admitted as a partner, and the firm was changed to Kerr, Brown & Mackenzie. John Brown, who was a partner in all the firms, was a brother of Adam Brown, who is now postmas-ter, and who was the head of the firm of Brown, Gillespie & Co., wholesale grocers in the early fifties. Of late def Brown, Gillespie & Co., wholesate

Mayor Brown, the present occupant

Strong Digestion and an Adequate Ex. Mayor John Fisher May Offer for Nutrition Invariably Mean a Long and Healthy Life.

There is a process known as meta bolism going on constantly in the body. and by which the tissues are built up, and after having served their purpose in the physical economy, are torn down and cast off.

So long as the due relation between the mayoralty, is said to be practical-ly assured. The fight will be to a fin-ish and the lines of cleavage will be waste and supply is maintained, nutri-tion, and the various functions of the body are continued. But after middle sharply drawn. body are continued. But after middle sharply drawn. life and in old age there comes a time A largely signed petition is said to when waste exceeds supply, and when the various elements whch constitute people, asking ex-Mayor Eisher to of-the different fluids, tissues and organs for himself for the mayoralty. It is no longer hold their due propertion. and the principle of life itself becomes conceded on all hands that the acceptand the principle of life itself becomes ance by the ex-mayor of the offer enfeebled, the body no longer having would ensure a very large vote and power to assimilate new material as it His long and splendid record in the service of the town, his there grasp of once did.

As old age creeps on, all the functions gradually fail, especially those all municipal matters, coupled with of digestion, absorption and assimila-tion, and the system being deprived of its full quota of nutriment, slowly, wears out. If the nutritive and diges-tive processes of old people could be maintained unimpaired, life could be brolonged almost indefinitely.

There are many old persons in whose stomaches the gastric function is simest entirely suspended. When this trouble occurs, the problem is, how to digest the food and get along without the natural stomach juices. There is but one way to overcome the effects of this condition, and that is to supply artifcially to the stomach a powerful di-gestive substance to take the place of the juices which it fails to secrete and all or any of them would make good, useful members of the civic govnaturally

For this purpose, there is nothing for to STUART'S DYSPEPSIA TABLETS known to medical science.as they supply the deficiency, and are such a reliable and thoroughly efficient supstitute for the natural mastrle juices, that if two or three are taken after each meal, the food will be digested in so complete a manner, that the matural digestive fluids will never be missed.

Stuart's Dyspepsia Tablets should be be one of the features of the used by all old and middle aged per- Everybody is invited to attend. sons, in order to prevent or cure dyspepsia of old age. Through their use complete digestion of the food is assured, with a consequent increased nutrition of the body, and a staving off of the sensibility and decreptitude of old age.

This remedy is, however, not only good for the indigeston incidental to advanced life, but is also applicable to the dyspepsia and stomach troubles of

any age, from youth up. Secure a package of this famous dys-

pepsia remedy from your druggist for soc, and if you find that as you got older, your digestion and assimilation becomes weaker, this remedy will as-eist the stomach in the performance of quency of the digestive organs. A sample package will be sent you if

"Great Britain alone has close to 2000 nunicipal undertakings. The incomes rom these enterprises total each year Examination will prove these in round numbers \$150.000.000. and in round numbers \$150.000.00°, and a stated by Prof. Frederic C. Howe, who made a critical examination of the condition of these enterprises for the National Bureau of Commerce and Labor at Washington, it is equivalent to 23 1-4 per cent. of the total rev-enues collected from all sources in Eng--No Piano possesses a sweeter or more delightful tone, -No Piano contains more exmues collected from all sources in and and Wales, and to 39 per cent. of the total revenues of Scotland, pert or more painstaking

"One hundred and forty-two of these municipal undertakings are street allway systems, and Mr. Howe adds railway systems, and Mr. Howe adds that the gross profits to the munici-palities from this source is close to 510,000,000 a year, besides a generous amount paid in taxes. The capital used in the street railway enterprises is about \$200,000,000, all raised on the faith of the public in these under-takings, and there has yet to be an in-stance in which those loaning money to municipalities for this purpuse have lost a single cent. Many of these en-terprises are not run to make money, however; they are run to give the cities service at cost, or as near cost as is safe.

is it Morally Right?

Is it Morally Right? "There are some who contend that it is not morally right for the city to enter into a business that can be conducted by private individuals. It is always morally right to protect our interests, either individually or collectively. It is not only a moral right to protect ourselves from mon-opolies, but it is a legal right, and, therefore, becomes a personal duty. As to the operation of street railways in a municipality, it is not a competi-tive industry. The history of the en-tire world demonstrates this fact. It is yet fresh within our memory how ex-Mayor Pingree encouraged the De-troit Electric Railway, known as the three-cent line, with the underwatanding that it would be a competitor, compet-

566 to charitable ch institutions. One dollar that it would be a competitor, compet-ing with the other roads within the city; but how long did that competition last? A consolidation soon took place, dren. Toronto Hospital for Incurables, and the roads were owned and open by one company and it has held an ab-solute monopoly over the city. Thus the question naturally comes as to Infants' Home and Infirmary, House of Industry, Girls' Home, Haven and the quest Prison Gate Mission. To the Broadwhether it is morally right to protect ourselves against this condition and ina-avenue, \$500 way Tabernacle, Spadina-avenue, \$500 ourselves against this condition and was left, while the Women's Mission-ary Society and the Ladies' Aid Society in the effect of this combination upon our civic life in the fundamental test of any of that church each get \$100. The institution, method or service must be in its effect upon the public good, its relation to morals, manhood, govern-Women's Home each get \$100, and the relation to morals, manhood, govern-greater, moment than the momey pro-ducts. "There is too much interest, too much affecting society and its future welfare to trust and place these street trailroads again in the hands of pri-tate parties, whose only object and alm is to secure the almighty dollar. In order to establish the proper stand-ard of morality in civic life it is neces-sary that the municipality own and operate its own street railways, give service at cost, and eliminate the ele-ment of allowing a private company to do the public's business for profit. **Can it be Free from Political Corrup-tion?** "To considering the political question" EXPELLED FROM SAXONY The parties whose only object and make the singlety during the constant assume to establish the proper stand, and the monitogality own and operated where he assume the state of the constant assume to establish the proper stand, and the monitogality own and operated the while he was picking there was the constant assume the constant assume the state of the constant assume the constant assume the proper stand of the proper stand of the proper state compared to the state the constant of the proper state compared to the state the proper state compared to the state the proper state compared to the state the proper state compared to the proper state compared to the state to the state the proper state compared to the state to the state the proper state compared to the state to the state the proper state compared to the state to the sto the state to the state to the state to the state to the state Toronto Youth Has an Uupleasant Adventure.

The Burning Question of the Day Solved by the LePage Patent Hygienic Furnace.

A Furnace which has effectually solved the burning question of the day. No coal to carry, no ashes to sift, no trouble and absolute safety. For the Patent Hygienic Furnace eliminates the worry and trouble which an ordinary furnace means to-you.

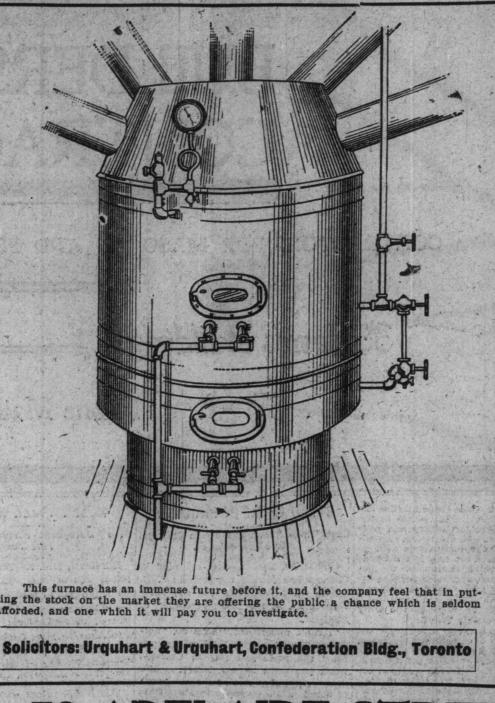

WHAT IT IS

This is a gas furnace consuming only gas as fuel. From two gallons of water steam is generated in a coil of pipes, where, without escaping, it is conveyed to a larger coil of piping, in which it is superheated by an intensifier. A constant supply of fresh air, coming into contact with these coils as it passes through the furnace, is heated and distributed through the house by means of ordinary hot air pipes and registers, such as are used for any hot air furnace.

ADVANTAGES OF SUPERHEATED STEAM.

This is essentially a hot air furnace, heated by gas fuel instead of coal, superheated steam being employed to intensify the heat and save gas. Ordinary hot water and steam heating are very objectionable, for hygienic reasons, as by these means the air of the house remains stagnant, becoming more and more vitiated, and so proving conducive to bronchial diseases and pneumonia.

COMPARE THE PRICE OF ONE OF OUR FUR-NACES WITH ONE OF THE ORDINARY KIND. SEE THE SAVING. DO YOU WONDER THAT WE HAVE DIFFICULTY KEEPING UP WITH THE DEMAND?

WHAT IT DOES

This furnace promotes a constant circulation of fresh air throughout the house, without robbing it of oxygen and its life-giving qualities.

It is perfectly safe, sanitary and simple to operate.

The temperature of a fireless house can be raised to any degree desired in the shortest possible time by merely lighting the gas and regulating combustion. No grate to clean out, no fire to light, and all without soiling the hands.

The principle of superheated steam, a recent scientific innovation, is here applied to produce the maximum amount of heat with a minimum of fuel, thus ensuring economy and a steady, uniform temperature.

COAL FURNACES THAT WERE PUT IN AS LATE AS LAST YEAR ARE BEING TAKEN OUT TO. INSTAL LEPAGE'S PATENT HYGIENIC FURNACE. BECAUSE IT IS THE BEST PROPOSITION ON THE MARKET, AND BECAUSE IT PAYS AND IS DESIR-ABLE TO DO SO.

MR. BAIRD'S FIRST CASE

New County Crown Attorney Secures Conviction.

In his first case since his appointm as county crown attorney James Baird obtained a conviction. Walle K.C. Nicholson was found guilty in the ses sions vesterday of committing a common assault on his wife. A recommendation for mercy went with the verdict, and the prisoner was remanded till the end of the court for sentence. Mrs. Nicholson, in giving evidence against her busband, said he had gone into the house drunk and threw her against the hot stove and knocked her down three or four times, and that she yan out of the house with her face bleed-tor

Drink and Tobacco Habits. Were a remedy known that would

cure the craving for liquor or tobacco without the knowledge or co-operation of the patient, it would be the greatest discovery of the age, since not a drunkard or a tobacco user, in a very short time, would be found in the land. A little reflection on the part of anyone contemplating curing a friend of either habit in this manner will reveal the absurdity of it. Frankness with the person to be nefited should be practised, for with

his assistance he can be cured of either habit, while without his consent the effort would end in failure. Dr. McTaggart of 75 Yonge-street, Toronto, Canada, guarantees a cure of

Newspaper practice above all others is subject to such contingencies.

So much for the general atmosphere of the composing room. How about the mechanical equipment? The chief mechanical feature, of course, is the linotype machines. As before indicated, these machines have revolutionized typesetting. The newspaper of the average size requires from eight to twelve linotypes. The more machines it has the more time and care can the editors bestow upon the copy, the news stories can be sorted and a wider range of subjects covered. After the type is set, proofs are taken in order to) correct mistakes. Sikilful as the proofreader may be, typographical errors often pass their eagle-gaze. The proofreader, while not infallible, is not always responsible for the little mis-takes that appear in the paper. Late copy is trusted to providence—but with copy is trusted to providence—but with varying results depending probably. upon the amount of faith employed A short time ago one machine acted in an unladylike manner, and a quarter-column story went into the paper with something like twenty typographical errors.

Speed in Making Plates. Assuming, however, that the setting is correct, the type is trimmed and laid on the table for the foreman. Ho comes along, finds the correct heading ord puts the story into the form, which corresponds te a page of the paper. When filled, the form is locked and and goes to the stereotypers, who make a matrix form which the colline make a matrix from which the cylin-drical plates are cast for the press cylin-The wet matrix—a composition of solt pulp paper—is laid over the face of pump paper-is laid over the face of the type, pressed into the intersices of the type by passing under heavy rollers, placed upon a steam table where huge presses filled with steam quickly dry out the moisture. After a little trimming the matrices are sent to the exciting machine and interse sent to the casting machine, and in a few moments-actually at the rate ofthree to the minute-the heavy cylindrical plates are cast out of type metal and are ready for the press.

The new mechanical equipment at The World is the most improved in Canada, and is probably unexcelled by any paper on the confinent. In the stereotyping branch especially, has a great saving of time been gained by One of the Big Motors Which, Mounted on a Pedestal of Concrete in the Basement, Drives the Press at High Speed. Satisfying All Kinds.

Since the chief importance of a newspaper is its news columns, one of the greatest difficulties publishers have to meet as the apportionment of space to the different events in the day's

history. If all readers were of the same phase of mind it would be a comparatively easy task to learn their tastes and give them what they most delight in. But all kinds and conditions of people make up the readers of a great city newspaper. Here are the readers of the sporting page, the fol-lowers of religious and moral reform

It is, with one or two exceptions, our newspapers are too big to be great."

Nodern conveniences. References exchanged. Ad-dress "Organist," World office. Practically the only wood in metal. the building is the maple floor on its cement bed. Effecting a Saving of Time. But when all this is attained you have done only a part for newspaper efficiency; it is in the laying out of the building and in the machinery and appointments where the greatest newspaper efficiency can be attained; and with this object in view the first thing to avoid was all unnecessary holst-ing of paper, of metal, of forms and of the persons who have to do with the various work in connection with the newspaper. To start right, then, one must have the press on the ground floor, which means that the papers, when printed, and the bags contain-ing them when they are sent out, are on the street level without any lifting and carrying and consequent loss of time. And it is also found that a lot of time is wasted in newspaper offices where the type forms have either to be elevated or lowered in order to make the stereotype plates. The World decided to do the casting of the plates which go on the press (and it takes 72 of these plates, each weighing 60 pounds, to plate The World's presses), on the same floor as the press; but to do this efficiently it was necessary to make the papier mache moulds from which these plates are cast on the composing-room flat, where the type forms are made up; so that The World has its composing on the second flat above the ground floor, where all the type is set and the forms are made up, and where the forms are beaten in order to get a mould from which to cast the stereo-type plates. Each of these page moulds weighs only a few ounces, and is drop-ped down thru a metal tube to the press-room flat, where the stereotyping plant is located, and where the otype plates are cast and finished. The World, therefore, attains the greatest efficiency in not having to fit or lower its type forms, or to lift or lower its stereotype plates, and it has no carrying up and down of tons and tons a day of these things in order to produce a paper. Another great obstacle in the efficiency of a newspaper is the handling of the rolls of paper from which the paper is Several tons of paper are printed. used in The World newspaper every day, and it is of the greatest moment to avoid unnecessary lifting or lowering of these rolls daily. So The World put in an elevator which lowers the paper from the lorrie level on the street to the basement below, where it is stored. From here the paper goes on the basement level, to the latest device in the way of reeling the paper to the press on the ground floor level. That is, the paper is reeled in the basement and

RESTAURANT, THE COLDEN EACLE,

certain governments to turn the attention of the people to foreign matters and distract their interest from matters at home. Russia serves as an excellent example in this use or abuse of the press. For generation after generation the various governments of that country have used the press to create certain hostile sentiments against one country, or another, just as the situa-tion seemed to require. In a slightly weaker form we still find the practice in various other countries where despotism still is prevailing.

In recent years, however, in the more enlightened countries the press has frequently and gloriously championed the cause of peace. The press of to-day in these countries is more than, ever conscious of its great influence and of the enormous responsibilities which rest up-on it and uses this influence in the interest of universal peace."

However, this working hand in hand, of the press with the responsible states-men of each country for universal peace pleaded for by Sir Edward Grey will be only possible when the govern-ments themselves will be convinced of the desirability and even the necessity of universal peace. The press, therefore, must in every case know the plans and aims of the government in order that it may talk to the people authoritatively and convincingly. However, one thing is practically certain now: The press will never permit itself to become an instrument in the hands of statesmen. who would declare war as a mere matter of distraction or excitement.

Must Be Independent.

But while the press must seek to be posted clearly on all political matters, it must never permit itself to hobnob with, to be unduly influenced by statesmen. It must be fearless and independent. Without such independence the press can ney-er be the great popular educa-tor which it should be. Under no circumstances must it deviate from its policy of educating; warning the people, and pointing out to them the right way in national and international matters and transactions.

The press of to-day is an intellectual world power. And I order that it may keep up this high place it must call into service well equipped men and women. The first-class newspaper man of to-day must have an equipment nowise inferlor to that of the diplomat. Best Men Needed.

It is with great pleasure that we notice that the great newspapers of all countries are beginning to require from their workers that degree of education and experience which will fit them best for their fascinating but none the less diff cult task. France has already an excellent institute where future diplomats and newspaper men rub shoulders with each other and study side by side the great problems of to-day, problems which they will soon be called upon to

FRIDAY MORNING

Night in The World Office One of Most Interesting Scenes in City

Scenes in Editorial Rooms During Busy Night Hours

'Mid Ra le of Typewriers, Telegraph Insrumens and Phones Morning Paper is Produced.

quantity in a morning newspaper ofsitting down to that meal, the news- the public ear thru the public eye. papermen are closing up the first roundup of the day's news. When you are setting out for the theatre, the dance or whatever form of entertainment you heart.

have chosen for the evening, the newspaper bunch are just gathering for the big battle of the day, which is and long after that the game goes on until, just as the day is breaking, the last of the news gleaners is striking for home and sleep. One of his chiefest comforts in life is to meet the early worker trudging thru the streets on his way to toil when he, the slave of the lamp, is on his path to rest.

In the Editorial Rooms. Think of a long rangy room with desks scattered about (such as that on the second floor of the new World building). Over these appear splashes of light that drop directly over the typewriter, which has almost entirely replaced the paper, and, generally, the scene is one of chaotic confusion, out of which the orderly columns of news which you will pursue at the breakfast table must be brought, heaven alone knows how.

One thing is certain. Those orderly columns will appear at thousands upon thousands of breakfast tables every Your own particular paper may be missing, but for the great bulk of the thousands of readers who get that sheet every morning, either delivered ises of purchased at the corner from the newsy, shivering in win-ter or sweating in summer, it is going to ie there. To accomplish this, reporter and editor, printer and ste-reotyper pressman and mailer, must

Night, in the accepted sense of a go forth into every corner of the city period of rest and quiet, is an unknown wherever the finger of incident points, and to it they return to beat out the quantity in a morning newspaper of-fice. There the game begins about the time that you are going back from the buzzing hive come yet other stories lunch to clean up the afternoon's work over the telephone and telegraph wires, and get home for dinner; as you are brought by those who are in-terested one way or another in gaining This is the very soul of the game, for were it not for this, there is enough of labor and of sorrow in the news paper game to break the stoures

When at Its Busiest Hour. Somewhere about eleven o'clock at night, the newspaper office is at its busiest. Then all the features noted waged at night. When you are going are present to a greater extent than at to bed the battle is still at its height, every man on the staff is in the office, and the movement and din are at their height. This lasts perhaps an hour, and then the crowd begins to thin. The pace slackens. By midnight the groups of loungers engaged in general conversation outnumber the workers who are still pounding out "copy" upon the clicking typewriters.

But it takes only a moment to drive the whole tribe back to activity. The report of a big fire or a sensational crime or accident coming in over one

little telephone wire will clear the office and send the gleaners sourrying to the scene. It may drive them to the phones to wake up possible sources of information from their slumbers, more silent and romantic pen. The floor is more than likely a litter of paper, and, generally, the scene is one awakened who cannot quickly rub the sleep from their eyes or the sense of personal injury from their minds when suddenly called from bed to answer what may seem to them a trivial question. But if the report is not se-cured, it will be missed from the story of the day by thousands of eager readers, and the reporters must glean the facts from whatever source they may.

And this is one of the great points in the game-time. The story which may be worth a column at 8 o'clock or even at midnight may have to be dis-tere at midnight may have to be dis-

Noices Are Part of the Game, This is the look of the room, and, es for its sounds, they are many. First, there is the rattle of a score of type writers; to these add the heavier and more constant chatter of the telegraph instrument. These are constant and form what night be called the phonetic background for the "occasional" noises of the place. Now a ticker buzzes as f a ball game or some other interesting event comes in on the ribbon. Again there is heard the sharp call of a telephone bell from any one of a dozen telephone instruments scattered about the room. Men are hurrying or stroiling hither and thither about the room, as the occasion calls for haste or permits of leisure. The continual, buzz hum of a dozen conversations is heard from groups gathered about the These groups may be of any size, but couples predominate, for it is one of the strange things of newspaper dom that even the man who comes into the office for the purpose of see ing that certain information is spread broadcast before the public prefers to amunicate that information to a single man in private.

This, then, is the setting of the strug- Of this class the professional gle that goes on daily or nightly, to agent" is the most astute, but it easily

A weekly newspaper differs from a next, pages 2, 3, 6 and 7. But before the locking up can take place, the editor of The Toronto Sunday World must write descriptive epithet or pyramidal "lines" to follow under each "cut," according to the size evolution during the time he was plan- entele and in methods of circulation and social importance of subject of the cut.

> Readers of The Toronto Sunda World who glance cursorily at the pic tures in the illustrated supplement and peruse the descriptive lines undernath (some times above and below) the cuts may think the writing of these an easy task. But suppose, for ex-ample, as, often happens, the editor

Will Be the Next Mayor? MAKING A NEWSPAPER, . Hard to Picture Either One as a

Men who make newspapers some imes believe that their profession is an exacting one. They are wrong, It is the simplest calling. Making a newspaper is an easy trick. Anybody

Hocken or Geary, Who

can do it. A lawyer, with only a diploma and a bress sign, who would lose a suit even if the other side was ready to confess judgment, will tell you how to a newspaper. An actor who never ling the world's news. Any old lady who knows enough to get off the street car backward has positive opinions on the press. Even a society person who never paid anything but a call or made

Private Citizen - Candidates Already Framing Up Speeches of Explanation Heard in the City Hall Coridors.

It will all be over in four more weeks, except the explanations of the , vanquished, for which it is on y reasonable to allow a week or ten days. On she second of January everybody will be run a newspaper. A physician who saying how perfectly simple it should would send his patient to the morgue have been to figure out the result, and before the presciption has been filled that it was inevitable from the start, will know all the fine points of making Supporters of the tallen will be gauge ar und remarking that a magningent carned any other plaudit than a soft fight was put up against heavy odds, tomato will give instructions in hand- that the wonder was the vote was so. close as it was, and that, the temporarily defeated, the struggle for a clean, progressive administration has just begun, etc.

Private Citizen, Who ? anything but a visit, did anything but i a tailor, knows how stupid those men Of course, either Controller Hocken or Controller Geary must be just a are who write "stories," edit "copy." or Controller Geary must be just a wrestle with heads and won't fit, and private citizen next year, but each is so absolutely confident that it is

No One Section Supreme. '

clim that one particular section the paper is the most widely read would be violently opposed by the men who have to do with the premonths to of other sections. Cer-financial page is all-importainly the ant to the Man in the Street who must now everything about the fluctuations market. He has his own urce of information-the tape-yet he bas, not the same facilities for assembl-ing the information it conveys as the newspapers have, and he wants his morning paper to elaborate the story that the tare hurriedly told on the **previous** day. Then, many will open the paper at the sporting page. The World, because of this demand, gives a great deal of space to this feature of the day's news. Who does not glery in the achievements of the men has not the same facilities for assembl-ing the information it conveys as the of the day's news. Who does not glory in the achievements of the men of brawn and muscle on the field of sport? We are all interested first of all in the home teams, but it would surprise you to know what a lot of **itruggle**. The sporting page tells also the doings of the giant pugz, and don't forget that half the people of Toronto want to know which of the better man Not that they have ever better man Not that they have ever seen either of them or care one iota which proves his superiority in the squared circle, but the sporting page has been talking of these men, giving of it in this way: the opinions of the adherents of both Grows We camps, and working up an intelligent in what is going on in the fistic world. This is not altogether confined to the strata of society which follow ring combats for the purpose of lay-ing wagers. Even preachers read the prize ring column. No? Well, take a night off when there is a big fight on and the newspaper offices are being besieged with enquiries from the nt the men enter the ring till last blow is struck, and see if more than one good parson does not ask: "Who won the fight?" It is patural; it is human; consequently The World finds that it is doing a service to the public by printing all news from the ringside Endeavors to Satisfy All Tastes And therefore in view of all this. it is one of the functions of a newspaper to satisfy the hunger of the sporting man, the dabbler in stocks, the buyer and seller of live stock, the man interested in sociological questions and the seeker after informiation that : ay follow the current of events in their particular sphere. But outside of these factors it surely cannot) be disputed that every citizen of Toronto maintains constant interest in the daily toll of strange occurrences and ordinary happenings that go to fill the local columns of the paper. The first essential to a city editor responsible for recording the little and big items of interest, is a staff of alert news getters. Things are going on al around us that most of us know not The reporter was created to find these things out: He must have the faculty to perceive what; in the daily grind of city Mie, is happening that will interest people generally. Cover Whole of City's Life. "he department o? the city editor on a big daily covers practically the whole of the city's life outside of the realm of sport, the cattle market and the stock market. These are departments themselves and in charge of compe tent men who make news of that character a specialty. But the city editor's staff is required to get everything that fails outside of these divisions. For instance, a man is assigned to the pobeat. He is a man who week week and month by month must tramp the same old paths to keep in touch with what is going on in the under Another man covers the transportation interests; another the busi-ness run, including the Board of Grade, the Canadian Manufacturers' Associa-tion, the Retail Merchants' Association

tion and duty of the city editor is to ant'cipate as far as possible, to weigh, to gauge, to select with discrimination, so that his paper may be bright, attrac-tive and interesting. Of course, there are occasionally events of such outstanding importance as to rivet the attention of a whole nation. If all were of this class, a city gces to work on the feature story. arrest of a man often implies a Looking Out for Big 'Uns.

considerably lightened. But the word "news" when applied to events of less general appeal has different meanings for different classes of readers. What aitracts one man, repels others, and a newspaper that is really alive and up-t. date must keep constantly in view the varying tastes and predilections

that charge tastes and predilections that charge terms and predilections provide something for everyone. In his own sphere the city editor has to decide the question, remembering that what may please one man may displease another. News, I would say is what the public want to know and ought to know. The aim of a big news peper is to print something that will interest everybody in some way. The New York Times prints at the head of the news that's fit to print," while the field charles A. Dana of The New York Sun is credited with having once said hat he would print "anything that Goi limighty chooses to let happen." But had to happen for Dana to take no-ce of it, consequently it was the regretted Whoever He Was. A live reporter will sometimes sit for hours in front of the office of a inimister waiting for such intelligence as the foregoing. However, the rou-tine work of the legislative buildings has its compensation when the report.

to get an interview with someone who was on the spot. Automobile acc.-dents are sometimes hard to fun down. since invariably the joy riders, or whoever they may be, conspire to keep the affair out of the papers. has its compensation when the reporter pulls off an announcement that the whole province has been waiting for Lays His Lines With Purpose.

He knows its coming some time and he lays his pipe lines early. The pos-sibility of his being one of the first to inform the people of the event will depend on the degree of familiarity that he has cultivated with the of-ficial or minister who is going to pass on it. The minister way be friendly, He knows its coming some time and

evening papers. Pulling in Nets With Fish.

Looking Down Along a Row of Linotype Machines in The World Composing Room. These Are the Instru-ments That Work With Almost Human Intelligence.

the city editor. It is the place where keep it to yourself * * * * * I am not spring poems and letters from "Pro Bono Publico" are invariably put and it saves a lot of worry and a lot of hard work. of the processes which are necessary to the production of a cut. He wants his pictures, and, like the child in the soap advertisement, he won't be happy doesn't get them.

Illustrations Necessary To-Day. So it comes that a lavish use of illustration is a practical necessity of a large modern newspaper.

And yet this feature is a comparatively recent one. Compare the paper of to-day with that of twenty, fifteen, even ten years ago, and see the difference. A cartoon usually, an occasional sketch portrait, and the before-andafter-taking of the proprietary medicine advertisement form the select gallery of primitive newspaper art.

The difference has largely been brought about by improvements in engraving processes. It is not many years since it was thought to be impossible to produce a half tone cut from which a satisfactory stereotype could be cast

ished aluminum fittings and tapering bellows, but sensible and solid, with substantial square bellows as large as an entire page of the paper. On the other end of the track is a solid perpendicular easel on which the picture to be copied is

Truly fate stalks in the person of Mr.

Moberly Bell. He has great daring and there are evidently other ways of On closer inspection and in conver-sation Mr. Moberly Bell's face loses disregarding orders than putting a tele-none of its strength but all its grim-scope to a blind eye. ness. Instead of the latter there appears a great kindliness, that comes nected with The Times and here again He gave me a kaleidoscopic view

A Man Who Made and is Making History. If the second the

(By L. W. Makovski, in Vancouver Province.) not stout, but very powerfully built. His health apparently is of the best and yet one of the first things he told ters to London that way and found I

and yet one of the first things he told me was that in 1866 when he was 18 years old the doctors gave him six months to live. "The day Lord North-cliffe was born." he said, "I went off to Egypt, Cholera was raging there." "Then why choose Egypt?" I asked. "Well, I thought I might as well die gesting that I send them their eastern of cholera as consumption and so well gesting that I send them their eastern papers, but he took no notice. ever, I subscribed to papers in China, Australia and India, and had them sent to Alexandria and from there forward-ed them to The Times. The papers ter. He knew he had to die, but the to Alexandria and from there forward-marner of his death did not disturb in the least. Fear is unknown to him and he takes things as they come with phil-osophic contentment. If he had died Oriental mail was distributed, thus getit is quite possible the history of Egypt ting extracts into Saturday's instead of might have been different, as with 325 Monday's papers. The Times sent me a Monday's papers. The Times sent me a cheque for \$500 and offered me \$250 a year to keep up my correspondence. After that I took to politics seriously. I found them too interesting to give up, besides I had always hated busines Just at that time Rivers Wilson, who was financial minister, drafted the

Rquidation laws for Egypt. When they were passed he suggested I tele-graph the details to The. Times. It cost me \$900 to do it, but I made the speculation on my own account and it turned out well."

To me this bit of history showed not only the resourcefulness of the man but also his monumental patience. He marks his quarry down and then with-

in Mr. Bell's pocket until the Cyprus marks in quarty hown at the states in starks in quarty hown at the state out any excitement proceeds to stalk out any excitement proceeds to stalk it. He will dine, sleep, and go about his ordinary business but never lose sight of his game. Where another man would go wild with excitement, and lose his head I can imagine Mr. Bell sitting quietly sifting and appraising the value of some epoch-making news with no more sign of anything unusual than if he were reading a law report. When he makes up his mind to a thing he will not worry about it, or lay spec-

The Enterprise a Financial Success. Some twenty years ago the City of Ulm, which is in Wurttemburg, underwork out a reform in the mattook to ter of living conditions for wage earners. The city owned a tract of land and it erected upon it modest little. homes, each with a small yard and gar-

Happiness in Ulm, Germany-

den, and these the city sold on casy terms to laborers. Other improvements were, of course, made in the way of sewers and parks and pavements, and all of them have added to the betterment of living con-ditions of the city, but it is claimed that the workin men's homes. more than anything else are responsible the conditions now found in Ulm. And what are those conditions? These: The death rate is lower than anywhere else in Wurttemburg. The infant mor-takty has been greatly lessened. The tax rate is lower than anywhere else. There is less crime and fewer paupers. There are more contented people and the rising generation gives promise of eclipsing any other generation that has been produced in the country.

Houses Paid For. In addition to all of this the city has lost nothing in the transaction in the way of finances. The houses have all been paid for, so the city is not out a

been paid for, so the city is not out a penny. In fact, it made a small profit on the places. It receives more taxes, than if the improvements had not been made, and the cost of policing that section of Ulm and the expenses at-tendant upon the fire department and police department generally are not so great for that section of the city.

Erecting More Houses. After this twenty-year demonstration the city proposes to go into the home-building business in earnest. The proposition is approved by the people all over the city and money will be bor-rowed and additional land purchased and a lot of workingmen's homes erect-ed. It is believed by the people who have studied the matter that Uhm has solved a very hard problem and that it has solved it in a way that other cities and countries will have to adopt if they expect to produce the best results in citizenship and wealth.—Dayton News.

the Egyptian campaigns of Gordon, Stanley, Stewart and other men whose names are writ large across the pages of Egyptian history. Incidentally he also gave me an insight into his vein of almost sardonic humor. Referring to the Soudan campaign he said: "I would have gone with him, but broke my leg. I was in hospital from September, '84, to January, '85, with a compound fracture and had to have 21 operations. Eventually the ankle bone was taken out, rendering me lame for the rest of my days. I had that bone nade into a head for my walking stick, so that you see it still supports me. Some of my friends suggested that I

better have it made into a cigaret-holder, but I feared people might say that whenever I opened my mouth I put my foot in it." Returns to London.

In 1890 Mr. Walter, proprietor of The Times, telegraphed to him to come and help at headquarters for three months. It was just after the Parnell commission. Mr. 'Bell's action was character-istic. He packed up all his household goods and took his family to England, shaking the dust of Egypt off his feet. 'I meant to stay in England anyhow, my children were growing up, and there was their education to be consid-ered," he said. He did stay, for at the end of the three months Mr. Walter asked him to take full charge.

He replied that he would try it for a year, as he had had no experience. A less honest and less conscientious man would have accepted it without parley However, on March 4 next he will have However, on March 4 next no will intro-been manager for 20 years. "Lord North-cliffe told me," I said, "that as long as I talked to you of The Times I need not fear you, as you love it so." "It not fear you, as you love it so." "It is blood of my blood and bone of my bore," he quoted, and forthwith told me many things of The Thunderer, in which he takes a positively fatherly

Down on the wharff just before the Victoria boat left, I happened to catch another glimpse of the man as he is. A sturdy but rather short laboring man was standing just in front of Mr. Rell, and over his left shoulder sprawled a child about a year old. In the press of people the child's head was very close to the cditor's chest, and his eyes were gazing into his face curiously. Suddenly it began to talk its own language and apparently Mr. Bell understood ex-actly what was said. He stooped and for a few moments held an animated conversation with that child. I am sure no one else could have understood a word of what they had to say to each other, but it was evident that it was an affair of deep import from the earnest way Mr. Bell discussed it. I re-membered the picture I had drawn in any mind the evening before, of the man matedly with a baby. The latter show-ed where his weakness lay as well ed where his weakness lay as well as ponies played by the Meadowbrookers his strength

merc glimpse of one great Englishman who in his own quiet, persistent way helps work out his country's destiny.

A Knight In Petticoats. From The New York Press.

Queen Alexandra is the only woman Queen Alexandra is the only woman who ever has been made a knight. It ond fiddle to Ranelagh. Captain Wilwas not until 1862 that an order was oren to women, and then the Order of Victoria and Albert was established. This is divided into four classes, two being restricted to women in the royal family, the other two being open only to peeresses. Queen Victoria, however, confined the order strictly to her re-latives and friends, and not a single woman has been decorated since Ed-ward and Alexandra began their reign. The Order of the Crown of India is bestowed on women who have been associated with government work in India either themselves. associated with government work in India, either themselves or thru their

annals. Sir Isaac Newton, having set forth when it filled the minds of the people

It seems as tho it has become shorn of some of its early splendor, but in all probability it will form a conspicuous object in our winter sky. If so, it will be a matter for general gratulation. The youth and early manhood of this generation, indeed all on the younger side of forty, have never seen a large comet. In the last century there were five of this very largest to be seen. These were the comets of 1811. 1843, 1858, 1861 and 1882. The last, however, was not so distinct as the earlier four, and did not rise in these latitudes until after midnight, but it was a glorious sight in the southern hemisphere. The comet of 1811 was perhaps the lare, and so never return. Thus, some nets move in a closed path and some an open one. allev then set himself to gather toapproach to the sun; that of 1858 for three months was one of the most mag-nificent of cometary displays; while that of 1861 is famous for the suddenness of its appearance and for the fact that the earth passed thru the centre of the sweep of its tail.

This leads to the remark that the substance of a comet must be of the most tenuous kind. The great comet, known as Donati's passed between the earth and the noticeable first-magni-

Appears Every Seventy-Six Years and Will Be Conspicuous Object in This Winter's Sky. Maler 's Comet has now come within the range of astronomical photography, and in the cource of a fow weeks it will be a conspicuous object in our heavens. This comet takes about seventy-six years in which to travel the eliptic years in which to travel the elliptic path around the sun. Halley, who was the second Astronomer Royal, first traced its orbit and set forth the time taken to traverse it, and that under cir-

SCOTLAND WOOLEN MILL SUIT OR OVERCOAT.

One of these excellent garments, which goes direct to you from the Mills through our workrooms in Toronto, costs you but

FIFTEEN DOLLARS

fit and finish guaranteed, or the money you paid us will be cheerfully refunded.

TO THE MAN WHO IS NOT OUR CUSTOMER: Don't you think that you are paying too much for the clothes you are wearing? Should they cost you more than FIF-TEEN DOLLARS? We know that we can bring from the Mills in Scotland the best cloth that comes off the looms there and make it into clothes from your own measure and fit and finish it to your taste, and charge you fifteen dollars for the suit, and MAKE ENOUGH PROFIT TO

SATISFY US. And if you desire to ascertain if we are right, give us your next order. IF YOU ARE NOT SATISFIED WE WILL REFUND YOU THE MONEY YOU HAVE PAID US.

Made-to-Order Suit or Overcoat

TO THE MAN WHO IS OUR CUSTOMER: At this particular season of the year we take considerable pleasure in reflecting on the enormous amount of trade that has come our way during the last twelve months. It's still piling up and promises to wind up in a whirlwind of orders.

All our employees are picked for their excellence in their respective work. The linings and trimmings are the best we can buy. You know about the cloth. It comes direct to us from the mills, and is guaranteed.

Thus-all is well.

All the unpleasant talk about sex in

Lady Violet Greville in The London

unrest has touched even the trimony, which, atter-of-fact sincerity. I should gard it also from the point of

ter of the present day (and not the spinster know. espe-

cally about marriage?) assures us that marriage is slavery, and never thes of railing at the iniquities of men. No could marriage, 'ike all human institu-tions, is imperfect. There are bad hus-bands and unhappy marriages, just as 'here are ill-tempered, scolding wives, and sour, suspicious spinsters; but up to the present it appears to be the most, workable and least unsatisfactory scheme for the union of the sexes. The advanced person loudly advo-cates, and occasionely practices (but generally sub rosa), what are called free unions, or marriage on lease. No less an authority than George Meredition once said. "Certainly, however, one duy, these present conditions of marri-age will be changed. Marriage will be allowed for a certain period, say ten years." Experience, however, has proved in most cases, beginning with that of Mary Wollstonecraft, the pio-neer of the new woman, that these un-ions have generally ended unhapplity, and that as a rule the woman suffers. it marriage?) assures us that there of the new woman, that these un-one have generally ended unhappily, and that as a rule the woman suffers a her life, her love, and her ambitions. "Liberty and a Latchkey." denounce as slavish and brutal.

When we come to marriage as a pro-ssion, the spinster can find no good ord-for husbands. There are women word--for husbands. There are women who are spinsters born, for whom the wise provision of o'd provided shelter and peace in the convent and the clois-tered life. There, secure from the at-tentions of men, the vingist lived, hap-py in her study, her philanthropy, her teaching, and her prayers, which light-ened her days and soothed her rebelli-ous instincts. At present there is plen-ty of hope for the spinster in the world, if she likes ibberty and a latchkey, fure likes therety and a latchkey, fur-ed lodgings and discomfort. She please herself. No one objects to her coming and going, her occupations and her amusements. But the average woman still prefers matrimony. It may be she is weak or incapable, or has not the energy or will-power to defy fate and fight for herself in the happily to him all the while.

arena; or it may be she is simply a normal creature, anxious to love and

ancrmal creature, anxious to love and be loved. To her and her sisters the bald, bare scridid gospel preached by the spinster must inevitably smirch and deface the tone of family life. Woman is not a slave; she is, as a rule, perfectly aware of her, own im-portance and her own influence. In many cases she is the born ruler and counsellor, the confidante of her hue-band and children. The advanced wo-man, however, recks little of religion or the accepted code of morality, but reduces everything to, a matter of pounds, shillings and pencer, calmby asking for wages for the wife and mo-ther. We know that the "wages of sin to despise men, look on marilage as degrading, and believe that its only privileges are "the wearing of a gold ring, and the permission to read erctic

WHEN GIRLS NEED CARE.

It is in the Transition Period Between Childhood and Early Womanhood.

Man does not delegate only the tasks he dislikes to woman, he simply leaves to her what nature has designed her for. Man can do many of woman's tasks quite as well as she can, he can work, sew, design and make dresses, do hair, and nurse children, but he cannot give birth to them, a fact withch supremely grieves the advanced It is much to be regretted, writes Mary B. O'Sullivan in Donahoe's Maga-zine, that more care is not given to write in the transition period between girls in the transition period childhood and early wom

tasks quite as well as she can, he can work, sew, design and make dresses, do hair, and nurse children, but he cannot give birth to them, a fact which supremely grieves the advanced woman, who calls her married sisters "breeding machines." Note the strong and gentle hand of the surgeon, the skilful way in which he wraps bandages and arranges pil-lows! No one can doubt that a man can do the gentler tasks of hife as well as a woman. The widower working man, the artizan whose wife is ill or employed while he is forced to remain idle for lack of work, will wash and dress the children, prepare the food, icile for lack of work, will wash and dress the children, prepare the food, and take the little one out for a walk, perched on his shoulder and babbling and accepts the hundred and on doubtful attentions men pay to wome they do not respect. She accepts their invitations to dinners, theatres, theatre parties and balls of a suspicious cha

acter, where she dances away the feve of unrest, together with her reputatio and does it not because she real love for wrong-doing, but because she has no stability of character, the craving for amusement must be satisfied. Such girls should be the satisfied. Such girls should be the special care of all women with a spark of motherliness in them. A word in season, a kindly act, a few friendly (not patronizing) attentions go far in bringing a frivolous, thoughtless girl to a better knowledge of herself, in forming a truer conception of the dignity of womanhood.

CLOTHES SHOW CHARACTER.

JH.A. Murray & Colimited A TREASURE HOUSE OF GIFTS

THE conventional gift is, in a great many cases, something admired for a short time and then cast aside-forgotten. The unconventional gift is the one which possesses both utility and distinction; the latter sort you will find here in a large assortment-a veritable treasure house. Quality is our first thought and our stocks are all selected with regard to their distinctiveness and individuality, and yet, notwithstanding these attributes, our prices are all uniformly modest.

Make your selections now when they may be made with the greatest facility and full assurance that you will find just what you are looking for.

SPECIAL PURCHASE OF WOMEN'S OPERA CLOAKS \$35.00 ---- WORTH AT LEAST \$65.00

These Handsome Imported Wraps are wonderful value, and is another example of what our Garment Section is doing in the way of giving special values. It is especially opportune because they will make excellent Christmas Gifts to Mother, Daughter or Sister, as well as personal selection. We have made a large window display, and if you examine the various models we know you will agree with us when we say the value is excellent. These handsome Cloaks are made of a fine quality French Broadcloth, in all the newest shades, with an interlining of cream flannel and a lining of an extra fine quality of silk; some are tastefully braided, others embroidered. The illustration shows one of many models that we place on sale to-day. All are garments that should be priced at \$65.00, but as we 35.00 obtained a special discount we offer them to you at

Out-of-town Customers should not fail to take advantage of this offering at once, as the stock of them will not last long. We guarantee the value, and if not satisfactory in every respect we will cheerfully refund the amount of your purchase.

WOMEN'S HIGH-GRADE FURS

We cannot emphasize too strongly on the quality of our Furs, as they are bought with great care for our particular trade; the skins are all perfectly matched. CHRISTMAS GIFTS FOR THE CHILDREN

There is a proverb to the effect that Fine feathers make fine birds." Would t not have been as near the truth to have said "You can discover the habits

of birds by the kind of plumes they wear ?" What is true of birds is true or people-a great deal of a woman's character is u ii. her clothes, sciously expressed The woman who thinks of little

things about her house, her table or fer garden will think of the littly things in regard to her clothes. She is the woman who is careful of details. She may not have things beautiful around her, she may select the wrong color and the wrong material for he drecs, but she can always be counted

n to be neat. Take the woman who never makes up her mind; she is sure to show it in the way she dresses. A woman on her way to Europe last summer was undecided until the last minute whether she sould travel in her black or tan

The result was she traveled in one of each, for while she was coming to a decision one tan shee got stored in her trunk and sent down to the steamer. When the hour came for sailing she had to appear like Plerrot in the cir-cus shoes that did not match. Then there is the woman who is sup-

posed to be clever and yet is so often badly dressed. It is not because she is superior to clothes; no woman fails to want to appear well dressed. But the clever woman thinks in a big way clever woman tinnks in a big way without understanding the importance of little things or their relation to her-self. She will start out with a good idea for a dress of a beautiful color and material, but she may still be badly dressed because she has not thought whether her costume was suit-able to her own appearance and she able to her own appearance, and she has forgotten all the little things to complete her toilet .-- Washington Post.

POCKETS FOR WOMEN.

(From the Philadelphia Record.) The return of the pocket as a dominant feature in women's dress is seen in one of the very smart rigs from

Three pockets is the allowance for a striking black and white check tailor-made gown designed by this famous Paris house. Two of the pockets are on either side of the coat, large, serviceable pockets with square flaps. A third pocket is tucked away under the revers This little breast pocket gives a jaunty air to a well-cut tailor-made coat.

Many of the new coats have a fourth pocket hidden in the lining of the coat. This invisible pocket solves the problem of the convenient disposal of the handkerchief. Pockets have not made their way into the skirt, althe the ampler width would make the inclusion of a pocket quite practicable.

Bad Made Worse. In a country store a young boy was under discussion by the cracker-barrel committee. Jones just remarked, "That boy's a regular fool. He don't know nothing; he doesn't know enough to come in when it rains." Then Jones discovered the boy's fa-ther who had overheard the remark, and wishing to appease him, he said: "Wall, Sam, 'tain't your' fault. You learned him all you knew."-Lippin-

The leadership among Canadian newspapers, as regards circulation, influence and result producing qualities, is conceded, by universal consent, to La Presse, Montreal's great French newspaper.

When an advertiser turns his attention to the French population of Montreal and Ouebec Province, his first thought is naturally of La Presse. And the more carefully he analyzes its position, the more he is impressed by its strength.

La Presse, with its daily circulation of 100,000, is the national newspaper of the French Canadian population, numbering upwards of two million of Canada's most prosperous and progressive citizens.

La Presse goes into the French homes of the entire City of Montreal and suburbs, and has a large distribution in the other cities and large towns of Quebec Province.

The weekly edition, whose circulation is 46,000, covers the villages and rural districts of the entire Province of Quebec, and of other parts of Canada where there are French speaking people.

As the largest and strongest medium in Canada, La Presse is considered by experienced advertisers in every line as the paper they must use if they are cultivating business in Quebec Province and looking for most profitable results.

In planning your advertising campaign, be sure to make provision for a liberal amount of space in

ceptable. cent. discount all small rugs. Shomas Q Edison Why Don't YOU Get This Phonograph

On FREE TR

For almost four years I have been making the most liberal phonograph offer ever known! I have given hosts of people the opportunity of hearing the genuine Edison Phonograph right in their own homes without charging them a single penny. So far you have missed all this. Why? Possibly you don't quite understand my offer yet. Listen-

I will send you this Genuine Edison Fireside Outfit (the new-est model), complete with one dozen Edison Gold Moulded and Amberol Records, for an absolutely free trial. I don't ask any money down or in advance. There are no C. O. D. shipments; no leases or mortgages on the outfit; no papers of any sort this offer any plainer, any clearer, any better than it is. There is no catch about it anywhere. If you will realize that the high standing of this concern would absolutely prohibit anything

WHY I WANT to Lend You This Phonograph. You Don't Have to Buy It: All I ask you to do is to invite as many Whit i WANT to Left for this Fitologizable. I know that there are thousands and thousands of people who have never heard the Genuine Edison Phonograph. I can't tell you one-twentieth of the wonders of the Edison, nothing I can say or write will make you actually hear the grand, full besuty of its tones. No wonders can begin to describe the tender, deltate sweetness with which the genuine Fireside Edison reproduces the soft, pleading notes of the flute or the thunderous, crashing harmony of a full brass band selection. And you can get the records in any language you wish. The only way to make you ac-tually realize these things for yourself is to lone you a Genuine Edison Phonograph free and let you try ft.

a Genuine Edison Phonograph free and let you try it. Our Easy Payment Plan. I have decided on an that gives you absolute use of the phonograph while paying for it. \$2.00 a month pays for an outfit. There is absolutely no lease or mortgage of any kind, guar-antee from a third party, no going before a notary public, and the payments are so very small and our terms so liberal that you rever notice the payments.

as possible of your friends to hear this wonderful Fireside Edison. You will want to do this anyway, be-cause you will be giving them genuine pleasure. I feel absolutely certain that there will be at least one and probably more who will want an Edison of their own. If they don't, if not a single one of them orders a Phonograph (and this sometimes happens) I won't blame you in the slightest. I

shall feel that you have done your part when you have given these free concerts. You won't be asked to act as our agent or even assist in the sale of a single instrument.

Get the Latest Edison Catalog

in the second A Constant of the second secon Just sign your name and address on the terms so liberal that you never notice the payments. If YOU Want to Keep It that is, if you wish to rour own, you may do so, but it is not compulsory. I am asking you merely to send for a free demonstration. Owners of Edisons—1910 Model Equipments New Ready: All those who already own an Edison Phono-graph can wonderfully improve their old machines, and can also get the SUPERB new 1910 Edison Amberei records, the loudest, clearest, most beautiful records ever made, playing TWICE AS LONG as any of the free circular AA, describing all this.—F. K. BABSON, Manager.

Canadian Office: 355 Portage Ave., Dept. 5248, Winnipeg, Canada F. K. BABSON, Edison Phon. Distrib'rs, Edison Block, Chicago.

morning in 1890 only caused him to re-mark to his wife lightly, "I wonder who will be the next to die." That evening he received a message an-nouncing that his sister, Mrs. Jane En-light, had died at her home in Hancock County, Indiana. Now the doctor, fearing to again hear the clock, keeps it in an abandoned woodshed. Even tho the clock has left a century-long trail of deaths, Dr. Anderson would not part with the old-fashioned timeplece because of its great age and the fact that it has been handed down from one generation of the family to another. The clock stands four feet high, and it is made almost entirely of wood.

LYING KILLS SELF-RESPECT.

Pernicious Habit Warps Judgment and Weakens Character.

Memphis News Scimitar: "All boys," an old philosopher says, "are born Hars."

Perhaps it is because lying is the diplomatic refuge of helplessness. The instant we learn to know punishment desire to escape it becomes a prime

Morality, like knowledge, is not herelitary, but attained. The child must earn that lying is a sin and a selflearn njury, just as it must learn by being burnt to avoid the fire. Until this lesson is learned the child,

Learned Men Have No Real Standing in the U.S .- Prof. Munsterberg Makes Comparisons in the Atlantic Monthly.

AMERICA

"Scholarship has no real standing in the American community." This is the opinion of Prof. Munsterberg, stated in the Atlantic Monthly. He adids: "The foreigner feels at once that great difference between the Americans and the Europeans." The British foreigner, if it is any consolation to Prof. Munisterberg, would feel no dif-ference. This scholar is, if I do not err, experimental psychologist, a schol-in that branch of learning. Now, do many of us know even by name the experimental psychologists of Bri-tain? Prof. Munsterberg remarks that the death of Simon Newcomb "did not bring the slightest ripple of excite-ment;" more interest was taken in the desease of a professional manager of a baseball team. Mr. Newcomb was the greatest American astronomer." never heard of him before, and who greatest living astro

Germans are different: 'grieved the joss of men like Heim-noitz and Mommsen and Virchow." To be just, the deaths of Darwin, of llay, of Froude, and others were nored. But they, with the great ans named, were scholars in of human interest. The Rohistory of Mommsen was "as sting as a novel," whereas as romomy, except in the hands of Maraffair. So is experimental psychology ng, and, with William James, to ing, and, with William James, to med-iums and Mrs. Piper. At least, that is the general opinion. I myself, like Malvolio, "think highly of the soul," and of experiments in the science of souls. America does not. When Mr. James left Harvard there were festi-vitice, which seems odd; fasting was more to the nurrose more to the purpose.

Decorative Professors.

"In the United States and Germany the scholars are almost exclusively university professors, in striking con-trast to France and England, where of the greatest scholars have s been outside of the universialways ties." Prof. Munsterberg may not be aware that at our universities there are few professors, and that they are rather decorative than utilitarian. Again, one can think of but few Eng-lish scholars outside of the universities: Grote is the most prominent exception, unless we call Darwin the term is not commonly applied to him. But it is true that the scholar and the man of science except historians, best known their by-products," lectures magic lanterns), magazine articles, and How can it be otherwise? make, perfectly fast blue, with broad shoulder, Semi-Shape back, with in you expect to pore over mathematics and the obscure metaphysics of Homeric grammar, and the Cypro-Arcadian dialect? The Greeks good wife pant 17,50 I were an intellectual people, but they did not ripple with excitement at the FANCY VESTS, flannel lined, bound with different shade. No. names of Zenodotus and Aristarchus; they put an end to Socrates, and Theonifty and warm, \$3.50 for 2.25 critus himself tells us that his own poetry was a drug on the market. The Americaans cannot give "bar-onetcies for the leading scholars." as we do, according to Prof. Munster-berg. I am not able to remember any berg. I am not able to rememoer any scholar who was given a baronetcy for his learning. Scholars, like the little modest girl at the school feast, may cry, "I asked for nothing and I got nothing:" Baronetcies come by acking, not by scholarinip. netking, not by scholar hip. Interested in "Corners." The scholar, like the poet, "is born to be so;" he is naturally interested in the disinterested exercises of the mind. It was so in Greece. Nobody in Ionia thought much of Prof. Thales; he was only a "crank," with pecutiar; opinions about water; was a scholar opinions about water; was a scholar in Ionia thought much of Prof. Thales: he was only a "crank," with peculiar opinions about water; was a scholar in the sense of Prof. Munsterberg. But when he made a corner in oil mills, when he struck ile, and prevent. ed other people from striking it. Ionia knew 'no bounds in her admiration. Let Prof. Munsterberg make a corner in something, say in radium, and America will ripple with excitement, while he will be mobbed by inter-viewers and photographers. Laputa was the right country for the profes-sor; there only were scholars objects of popular enthusiam. Meantime the scholar is not compilaining; he is sin-cereiy indifferent to baronetcies; he does not want paragraphs in the press; he is not anxious to see bloched and black photographs of filmself in the newspapers. Nanciencie Rest. rial for the mind to work upon in soll-tude. Most offenses are committed in blindiness or stupidity. Few people de-liberately wrong others. We must al-low for the almost necessary friction in a crowded world of clashing inter-ests. We might anieliorate our feedings of dislike a little by granting it possi-tile that we invited the offense by our own manner, words, thoughtlessness or perhaps irritability. If we had been, own manner, words, thoughtlessness or perhaps inritability. If we had been, reflect it is not probable that the of-fender would have been angered at us. In any case, for the sake of our own burniness, it is best to forgive and forhappiness, it is best to forgive and forget. Indentification. "I'm very sorry to trouble you, madam," said the bank teller politely, A particle of dust, if it should be a Napoleon's Poetic Appreciation. mere trifle heavier than its neighbors, is sufficient to explode a small pile of "but you'll have to be identified." He Ambition, love of money, love of one crowded hour of glorious life," pushed the check across the marble slab this curious substance. take pulssant men into the law, Walltoward her as he spoke. Take puissant men into the law plato's street, dentistry, the cult of Plato's "great beast," the political public, and take them away from scholarship. Look at the case of Napoleon Bonaparte. He was a born Homeric critic; his remarks on the "Ihad" (he used to read it aloud to Gourgaud, with comments) leave no doubts concerning it is that a fly should walk over the compound. It has only to let one foot come in contact with the explosive will ignite it. It is not the advertise in the scholar says:
Too late for us your horns you blow Whose ply was taken long ago.
We are like children reared in shade Beneath some old world abbey wall.
Easily Exploded.
As I have said, the most remarkable fact concerning it is that a fly treading upon this explosive will ignite it. It is upon this explosive will ignite it. It is not the scholar says:
Too late for us your horns you blow Whose ply was taken long ago.
We are like children reared in shade Beneath some old world abbey wall.
Too late for world abbey wall.
Too late for us your horns you blow the shade beneath some old world abbey wall.
Too late for us your horns you blow the the scholar says:
Too late for us your horns you blow the stantly by the thundering explosion. on the Maine coast, who had never but who in his journeys to the stars that shone above his little boat, and to the depths of the vast ocean of which he tossed as serenely as a child and to the farthest limits of the great world as he knew it thru the few boks he had almost by heart, and to the depths of human experience as he had indice and children and home-had tra-veted farther and home-had tra-veted farther and to better purpose the surface of life, crammed with too much reading, too much society and business, ever to apply experience to cor own hearts and LIVE! There are happy women in security inter to continent, and gallop madify over the surface of life, crammed with too much reading, too much society and business, ever to apply experience to cor own hearts and LIVE! There are happy women in security intered them deeply until their wision axceeds the wisdom of those sages who have had all things but experience. Books are one source of growth to tak the greatest of all. And from each of the greatest of all and hom each of the greatest of all. And from each of the greatest of all by the will but use the great world than you were yes attength and joy if we will but use the great world than you were yes the greatest of all. And from each of the great world is the wiser and a trange of your face to the sum with the feel to the world than you were yes to the world than you were yes to you be a a liftle gentier to the sum deeply and wiser. "But I wish to read," says, another it wish to become better informed and

"But I wish to read," says, another. "I wish to become better informed and more cultured, but I do not know how to begin."

Ruskin's Advice.

We Want Conservative, Long-Headed Men There were note were as in the restance of the first mark is and as the restance of the re

son in every way. Real Attractiveness.

Real Attractiveness. The woman who is stupid and listless mentally can never be attractive. It takes an intelligent and animated soul to give lasting charm to even the most beautiful body. The women of fustory who have charmed even in their old age found their greatest power not in physical charms, but in an aleri mind and noble spirit. Ruskin tells how thought and love and hope and inspiration and sorrow nobly borne and all the lofty human intelligences and emotions chisel the face and features into beauty. This is the most magnetic and most enduring kind of beauty, such as neither illness nor old age can fade away. Indeed fil-ness and age sometimes make it to

A British tourist sends to his home newspaper the following compliment ary criticism of the Canadian people Let me repeat to you, then, the ad-vice of Russin! "The Place for the Farmer NOW is in the South"-Says Secretary of Agriculture Wilson.

Men and women alike are urged to look into this. We now offer for sale only 2400 acres of land at Largo, on the Pinellas Peninsula,

Florida. The prices are extraordinary, considering the wonderful value. Never were better terms made even on land of less value. We invite the inspection of those who are hard to satisfy. Read what we are able to tell here. Judge what we say. Then, if you are interested, write for our handsomely illustrated FREE book about Largo. Go as deeply as you like into the proposition. All we ask is

investigation by those who want land that will bring them large returns. For we know we have such land to offer at Largo.

Nowhere in America today can you equal this land opportunity.

That may be news to you-for this Largo Tract has never been advertised. Yet such a statement should be worthy

your investigation. If it proves true, doesn't it merit your

consideration. Choose the Land

California land is selling high as \$2000 an

Practically everything that can be raised in California is raised in Florida.

And Florida has the advantage of being 3000 miles nearer the markets-the densely populated portion of the country.

Yet you can NOW buy land at Largo as low \$20 an acre. Not because the land is actually less valuable than in California-but because people are just beginning to awake to its true value. So the prices have not yet soared.

orange crop will be shipped from Largo and the Pinellas Peninsula. The town of Largo has four fruit-packing

houses, a bank, a first-class hotel, churches, schools, stores, telephones and good neighbors. After the disastrous freeze of '95 most of the oranges shipped out of Florida came from this,

Lake Largo, a beautiful fresh water lake,

near the town, covering almost 500 acres, affords excellent boating and fishing.

Largo is only 12 miles, by rail, from St. Pe-tersburg, a city of 5,000 population, and one of the most popular winter resorts in the United States. Fifteen thousand Northern tourist and health-

seekers spend their winters at St. Petersburg and an equal number at the other resort towns on the Peninsula.

Before you buy land in Florida or else-where, find out exactly how far you are from a market, from a railroad and the nearest shipping point; also find out how far you are from water transportation. Water rates are not only cheap, but they have the effect of keeping down railroad rate

High-priced fruit and winter vegetables are

Petersburg, and the service, both for freight and passengers, is excellent.

An appropriation has been made by the U.S. Government for surveying a navigable channel from St. Petersburg to Clearwater, through the inner passage, along the western boundary of the Largo tract.

Still, this is no backwoods, no pioneering country. .

Theman who settles at Largo will not be on the border line of civilization. His children can walk to school. There are splendid 'schools in Largo and throughout the county.

There are also neighbors in abundance—cul-tured, hospitable people, who welcome the new-comers and those that come to help develop the Peninsula.

Competent Instructors **Provided Free**

Nor does a man who settles here have to "attend a college" to learn whatever he might not know about fruit growing or truck farming.

We provide competent instructors in such work free of all charge to all settlers. And these instructors are right on the ground—to help you

Send today for our handsome book. We have included in it every detail about the land you could wish to know. It is profusely illus-trated. It is about the size of a grammar-school geography-and it's FREE on request. This is the country for perfect health and financial independence.

The orange and grape-fruit industry of Florida has reached its highest state of development at Largo and on the Pin-ellas Peninsula.

Its insular position, its climate, soil, water and drainage make this section peculiarly adapted to growing the finest of fruit; indeed, it seems that this strip of land, 20 miles long and about 8 miles in oreadth, might have been created on purpose for an ideal orange grove.

Here are to be found the largest, oldest, most beautiful and most profitable groves in Florida, if not in the world. In some sections of the Peninsula one can walk for miles through long lanes of trees heavy with their golden load.

A country to be thoroughly adapted to citrus fruits must be safely outside the frost line.

When bearing orange and grape-fruit groves are valued at \$1,000 an acre a freeze may wipe out their value in a night, unless they are located in a section where freezes do not occur.

Very little of the United States is safely below the frost line. Most of this area s close to the southwest coast of Florida, and warmed by the waters of the Gulf.

At one time growers thought that all Florida was below the frost line, but

safety-skirt with bloomers.

antry where grape fruit can be produced with absolute certainty of success Grape-fruit groves near Largo are now yielding as high as \$2000 an acre.

This land, at the present prices, is just ten times cheaper than land in the Northwest that will not equal it in production.

Largo is in the western portion of Hillsborough Country, Florida, on the Pinellas Peninsula "Peninsula of Pines.")

The soil is adapted to citrus fruits-such as oranges and grape fruit-and to winter vegetables as well.

Open Country, . High, Dry, No Swamps

It is a fine, open country, high and dry, with no swamps, and excellent drainage.

The Atlantic Coast Line Railway runs almost through the center of the tract. No portion of the land is more than five miles from the railroad.

Largo and the Pinellas Peninsula is the second argest shipping point in Florida for oranges and grape fruit.

The most beautiful groves in Florida are located at Largo and vicinity.

This year one-tenth of the entire Florida

to market quickly they will and spon. The U. S. Department of Agriculture, Bulle-tin 282, states that six miles is as far as any delicate truck should be hauled.

Largo is on the main line of the Atlantic Coast Line Railway, which passes through the center of the tract for about three miles.

None of the land is more than five miles from the railroad, and most of it is within two miles.

There are two other shipping points besides Largo on the property, where refrigerator cars may be loaded directly from the field and rushed to Northern markets.

The average time for freight from Largo to New York by rail is less than 70 hours, but vegetables and perishable fruits are rushed through by express in two days.

At St. Petersburg and Tampa connections are made with three great steamship lines opera-ting regular boats to Mobile, New Orleans, Jacksonville, Savannah, Charleston, Baltimore, Philadelphia, New York, Boston, Key West and Havana.

Tampa, with its 50,000 population, is one of the most important deep-water ports on the Gulf. St. Petersburg, only a few miles from Largo,

fronts upon a magnificent two-foot harbor. .There are two free shipping piers at St. We can tell you no more about Largo here. But we urge further investigation.

For City Man, or **Owner** of Unprofitable Farm

We want the salaried man, sick of the city toil and cramped life, to look into this—to find out first how easy our terms make it for him to procure a home at Largo, with land enough to make a goodly income. Then we want him to prove to himself the high value of the land.

The man or woman now struggling with an unprofitable, 'uncertain farm, if he or she will only get our handsome free book, and study the facts and figures—Government reports, etc.', will quickly realize what a wonderful opportunity is here—at Largo, on the Pinellas Peninsula, Florida

We have only 2400 acres to offer now-remember-so its to your advantage to start your investigation at once and get an early choice of your ground, for we play no favorites, merely al-lotting the tracts to the applicants in the order they apply.

So, send for the free book and particulars today.

the great freeze of '95 demolished that theory, ruining thousands of orchards and sending the owners to those sections on the southwest coast that went through the disaster almost unharmed.

That memorable year, known in Florida as the year of the "big freeze," the orange crop for the whole State fell from 6,000,000 to 75,000 boxes, most of which came from the Pinellas Peninsula and the protected sections of the West Coast.

The cost of bringing Grape Fruit and apple orchards into bearing is about the

Grape-Fruit land at Largo sells at onetenth the price of apple lands in the Northwest. How long will this last when people realize the facts?

THE TORONTO WORLD

Wesley Dunn

Wesley Dunn, of the firm of Dunn & Levack, has long ago learned the art of specializing and from this knowledge has gained the enviable. title of the "Sheep King of Canada." | Born of a family with a cattle trade history, Mr. Dunn had a natural aptitude for the business which by careful and assiduous labor he has extended. Both his father and his uncle were among the pioneers of the cattle exporting business of Canada in which they were entirely successful. As a boy Mr. Dunn was connected with the late Mr. Patrick Kinnear, who for many years was the leading sheep dealer of the Toronto live stock market. At the death of his employer Mr. Dunn with a breadth of view on which he must be congratulated saw the tremendous possibilities ahead of him. At this time he was a mere boy, but with his resolute disposition he took up the obligations which he has followed since the commencement of his career for himself. He has met the strongest kind of opposition from firms better financed than himself, but by close application to business and assiduous labor in the interests of his customers he has worked away from those with whom he has had to compete. To-day he holds the record in the Dominion as being the best handler of sheep, lambs and calves. The straight and honorable method of his deal-ings during the years of his career is testified to by the fact that firms who started to trade with him in his early history are still dealing exclusively with the firm with which he is connected. His record with the drovers is an enviable one. Collectors of cattle and sheep thruout the Dominion place implicit confidence in him and entrust their shipments to him without any provisos. In the sheep and lamb trade Mr. Dunn has no peer in Canada and his business acumen in this department has brought to him such

Fred Rrowntree

A many sided man is Mr. Fred Rowntree, whose particular calling in the present ownership, and he is still + life, however, is that of following the business established by his father, Mr. David Rowntree of Weston, 43 years ago. The excellent record of In addition to carrying on a large this man has been ably maintained by the son, Fred, whose specialty is buying and selling hog business at the that of buying and selling butcher cattle and milch cows. As a specialist ducts a commission frade at Peterbord along these lines he is one of the largest men in the business at they local in the wholesale meat business and has along these lines he is one of the largest men in the business at the local representatives thru all the districts markets, having connections thruout Ontario and in the Province of in Ontario between Peterboro and To-Quebee! While Mr. Rowntree is a firm believer in the notion that a man ronto. While not catering as a regular should pay strict attention to his business, he is broad enough to believe commission house this firm have nu-that a man can also give some of his valuable time for the benefit of his merous clients who ship stock to them neighbors, and in this connection it might be mentioned that he is one of for disposal, and this is a growing the most prominent members of the Weston Council. His entry into branch of the industry conducted by

municipal politics was as the most youthful member of the village of Weston and his popularity cannot be more clearly demonstrated than by R. J. Collins, who is known to all saying that the vote he received at the polls was double that received by the drovers and cattlemen on the Onany of his confreres at the municipal board. W. J. NEELY.

After many years of successful dealing in the extensive range of western Ontario, Mr. W. J. Neely has latterly confined his efforts as buyer on the Toronto markets for Messrs. Park, Blackwell & Co. Mr. Neely has a most amiable disposition and has drawn to h mself many a sociable acquaintance who is extremely beneficial to him in his business operations. He has been connected with the live stock trade for upwards of 12 years, and is a native of the Village of Dresden, in the Town-ship of Camden. His wide experience thruout the country has given him a grasp of the live stock business such as few men have, and he is one of the recognized authorities in judging all

Few drovers bring a higher class of cattle to the Toronto market than Mr. Isaac Groff, who operates in the highly

Belgium People Now Negotiating With Heir - Apparent, Prince

T. J. Corbett

Messrs. Corbett & Hall, live stock commission dealers have offices at both of the Toronto markets, and conduct a large volume of trade at both of these cattle exchanges. Mr. T. J. Corbett has been in the present business for about ten years; previous to which he was in the butcher trade, thereby qualifying himself with a thoro knowledge of the worth of live cattle. His original entry as a commission merchant was in association with W. J. Henderson, but about a year ago he changed his affiliations to go in with Mr. Hall, with whom he now operates.

Mr. Corbett has a wide business acumen, and his regard for his clients during the years he has been in the trade has created a highly favorable impression as to the straightforwardness of his dealings. One shipment made to this firm is a sure precursor of others. In a social way Mr. Corbett has a particularly likable way, and his exterior appearance is sufficient to stamp the impression of the honorableness of his character.

"A good, all round cattle man," is the opinion held by almost everyone in regard to Mr. A. Y. Hall, the other member of this firm. He has had a widely varying experience in the cattle business, having been for seven years a large buyer of cattle which he shipped himself to the markets for disposal.

A. Y. Hall

For four years he was associated with the firm of Brown & Snell, where his ability was shown in the exporting of large numbers of cattle which were

shipped to Great Britain. His entry into the commission business was made

with the firm of Maybee and Wilson, from whom he disassociated himself

to join Mr. Corbett. He is considered as able a buyer of cattle as anyone on

ments. His judgment is regarded always as of considerable value in rela-

record in the volume of business which they have been able to bring in.

Consignments shipped to the firm are given personal attention of either one

of the partners, and obligations entrusted to them are well carried out. The special branch of the firm's business is the execution of orders for butchers

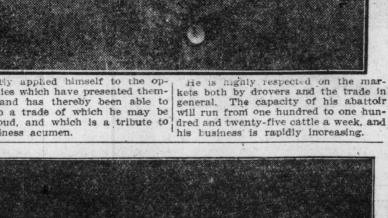

and exporters, and this branch of their trade is making a rapid growth,

largely because of the satisfaction with which these orders are filled.

tion to matters pertaining to the cattle trade.

Mr. Hall is a big man physically, intellectually, and in social attain-

Considering the youthfulness of this firm they have had a remarkable

In the firm of Maybee & Wilson special qualifications have joined to-gether. Both Mr. Maybee and Mr. Wilson came from families who have for several generations closely allied themselves with the live stock business. Ellsworth Maybee was born in the business, his father, the late Henry May-bee, having been a drover in Eastern Ontario all his life. Mr. Maybee has been connected with the cattle trade since he has known what business was. His character is absolutely straight, and it is a common saying that his word is as good as his bond at any time.

Of Joe Wilson nothing need be said to those who know him. His family favorable agricultural district of the history is synonymous with the word integrity, and the association of these two men is particularly favorable for the extensive business which they

Albert, With a View to Succession.

BRUSSELS, Dec. 9.- (Special Cable Sunday World)-For years King Leopold of Belgium has cynically ignored the obligations of his position as thular head of a nation which is pustly esteemed for the enterprise and solid merits of its citizens. He has condoned, and profited substantially from the barbarities practiced in the .Congo, to the infinite disgust and pain of other civilized peoples and has squandered his illicit income in satisfying the exacting demands of the many abandoned women whom he has taken under his protection.

It is more to the credit of their sense of loyalty than to the common sense of the Belgian people that they have tolerated such a state of affairs for so

It is learned on high authority that Leopold Must Abdicate.

and the heir-apparent to the throne. consent to accept the succession then and there. This step, of course, is of the utmost significance in itself, but it gathered additional importance from the fact that during the last few days the strongest representations have, been made to Leopold that, unless he decides to abdicate, there is no say-

This sensational development marks the climax in the series of notorious ng what may occur. episodes' connected with the career of the King of Belgium. With callous indifference he has flaunted his vices before the eyes of his people, and made Europe marvel at the way in which the latter have endured his rule for **so** long without protest.

long without protest. Of all his armours that which he has indulged in for some years past with the lady who is styled the Bar-oness Vaughan has been the most flagrant of all. At first he was content with paying frequent visits to her at the villa in which he had estab-lished her in the neighborhood of Paris. It proved a very expensive af-fair, and the Belgians, to their chagrin, learned that the royal roue was disposing of priceless treasures in or-der to satisfy the requirements of the latest object of his passion. Scandal Suppressed.

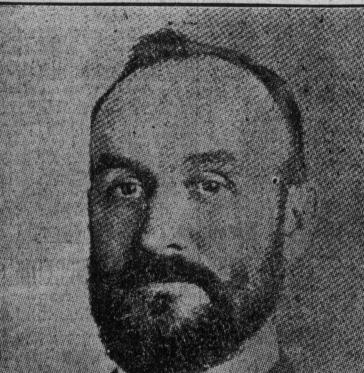

They suffered in silence rather than draw the attention of the world to the scandal. But latterly things have come to such a pass that even the stoical Belgians have been roused to action. The Baroness Vaughan has for some time past been actually living in Brussels, and despite the oppu-lar resentment that has been shown, she has not hesitated to show herself frequently in public, and is even cred-

RLOOM. a Howe

David McDonald Mr. David McDonald, senior member of the firm of McDonald and Hal-isan commission merchants of the Western Cattle Markets and the Union tock Yards, is one of the most widely experienced cattle men in Canada. Mr. McDonald has had a wide experience in the cattle business, having prior to his entry into the commission business acted as a drover for several years. His experience was materially added to by several years spent with the leading firms in the Buffalo Cattle Market, after which, some twelve years ago, he saw the big possibilities in front of the cattle business in Toronto and strated in this city. His Buffalo training gave him an insight into marand started in this city. His Buffalo training gave him an insight into market methods, and in this connection it might be mentioned that he was one of the first to recognize the value of The World's advertising space, which

e has assiduously followed ever since commencing. Mr. McDonald has always been a strong advocate of the Union Yards on the ground that the city market had practically served its purpose and that it was essential for the trade to broaden out if it was to be carried to the extent warranted by the Toronto market.

Mr. McDonald can readily remember reminiscences of his early days in the cattle business, and can well remember when fifteen or tweaty loads

Thomas Halligan

in one day was considered a big market. He also well recollects when the

West Toronto market was first opened, and he has a unique record of having sold the first load of cattle that went over the scales to his friend W. J.

self, has been in the business for a large number of years, and has bought and sold cattle for the exporting business. His record among the cattle men

of the province and outside points is an excellent one. His integrity and

straightforward dealing have made him innumerable friends, and his ex-

From Wrath to Tears. Two recent events, duly exploited in the press, illustrate these racial traits: A Sicilian actor, celebrated for his stirring interpretation of historic casts, int all his decrear in a moment of fine let slip his dagger in a moment of fine frenzy and cut the head of a spectator in the pit. From stimulated rage to genuine tears was but the twinking of an eye. Catching the wounded one of an eye. Catching the wonnact one up to the stage, the heartbroken trage-dian threw himself before his victim, weeping copiously and kissing him again and again, "Brava! Bravissima!" The audience went wild; the actor gracefully bowed his thanks; the play

Honor Satisfied.

Honor Satisfied. Film No. 2 rises upon a duel in France. At the fateful word one shot, and only one, was filed—a clear miss, even the seconds escaping. Upon be-ing praised for his generous ohivairy in withholding his fire, the other party modestly disclatimed any merit, admit-ting after hesitancy that he had really forgotten to pull the trigger. Needless to say, there were mutual profestati-ons of admiration and respect, and all left the field of safety feeling that honor had been satisfied. Such irre-sistible monchalance is equalled only by the famous duel of the great Sainte Beuve, who, when a slight drizzle be-gan, paused but a moment to raise an umbrelia, and then in a firm voice di-rected that hostilities be resumed. How restful to turn from these ex-treme exhibitions of emotion to the How restful to turn from these ex-treme exhibitions of emotion to the sober Anglo-Saxon ways; to observe in England, for instance, the cool de-meanor with which the suffragette chains herself in public places, and the quiet determination with which the stomach pump is employed in her be-haid. In our country, too, there broods a peaceful calm. From grandstand and bleachers, the prize ring, the foot-ball field and the hustings come the soft murmurs of the assembled throngs, as they peacefully comment upon the umpire's decision or speak in low tones of the virtues of the politi-cal opponent. Down Breathitt way they are mildly merry, burning a few ballot boxes; but that's their little cus-tom, and a well-bred militia is stand-ing around to see that no one gets ing around to see that no one gets

GIVE HIM A NEW SUIT OR OVERCOAT

THE TORONTO WORLD

DECEMBER 10 1909

What better or more practical gift? But be sure it is a good Suit or Overcoat, one that will leave nothing to be desired in looks or wear. The surest way is to get it here.

RIDAY MORNING

TORONTO'S MOST DEPENDABLE ALL-CLOTHING STORE.

The best made Suits and Overcoats in this country bear the "Sovereign Brand" label in the inside pocket of the coat.

Do you know that we are selling custom, hand-tailored clothing all ready to slip into? Well, we are, and we have a buyer who has the courage of his convictions and goes right after the best that can be made. Not many

stores in Toronto, or Canada for that matter of it, can boast Hand-Tailored Suits at \$30, \$35 and \$40. We know there are scores of men who will cheerfully pay these prices for garments that are right, and the best proof we have is the increasing sales of Hand-Tailored Garments---If you're going to do the handsome thing in Christmas Gift Giving, let it be a Suit or Overcoat, \$15 to \$40, from our wide variety of styles and fabrics.

In case you should not get the exact size required, we will gladly exchange or make the necessary changes after Christmas.

We expect to be in our big, handsome, new store Corner Yonge and Adelaide Streets by the 1st of May next.

"Come on In" Because OAK HALL Are Clothiers Only 115 to 121 King Street East J. C. Coombes, Manager
